Chapter 1

Introduction

1.1 What is “Cassiopaea”?

The name “Cassiopaea” was given by a consciously “channeled source” which Laura Knight-Jadczyk accessed in 1994 after two years of experimental work. The source identified itself by saying “**we are you in the future.**” Modern physics does not provide us with practical means for this type of communication, and theories on this subject are not well developed; they are, in fact, inconclusive and controversial.

When interpreting “**we are you in the future**” in an oversimplified way, we are faced with causal paradoxes. On the other hand, from the theoretical papers published in physics journals we can learn that, with a proper and careful interpretation, and taking into account **quantum uncertainties**, communication into the past cannot be dismissed as impossible. Improbable perhaps is the right word, but there are many things that are improbable and yet happen.

The more improbable is a given phenomenon, the more information is carried by its occurrence, the more we can learn by its study.

That is why we did not dismiss the “**we are you in the future**” as impossible and therefore ignorable. Instead we decided to continue the “communications” as a form of a controlled experiment in “superluminal thought transfer” — even if it was clear that the term should be considered as a tentative indication of only one out several possible interpretations.

The information received from this experiment is presented in the context of broad ranging historical, scientific and other metaphysical material and offers the clues that have led to the world view and inferences presented by us in our numerous publications on this website and in print. Perhaps it is only our own “subconscious mind” that presents itself as a “source,” but even if it is so, does that tell us more? Do we really know what “unconscious mind” is and of what is it capable?

We sometimes ask ourselves if the Cassiopaeans are who they say they are, because we do not take anything as unquestionable truth. We take everything with a grain of salt, even if we consider that there is a good chance that it is truth. We are constantly analyzing this material as well as a great quantity of other material that comes to our attention from numerous fields of science and mysticism. We find it to be quite extraordinary that the Cassiopaeian Material is so closely aligned with the teachings of the great Sufi master, Ibn Al’Arabi, with the Fourth Way Teachings of Gurdjieff, Castaneda, with the Esoteric Christianity of Boris Mouravieff, and even ancient Altaic Shamanism. In this sense, the **Cassiopaean Experiment** is truly a Fourth Way work.

1.2 About this book

This book is a growing compilation of the Cassiopaeian Experiment session transcripts that can be found on the Cassiopaea Forum¹. Since the communication is still ongoing and old transcripts are being reviewed and published, it's only a snapshot of the repository, which can be outdated. The main purpose of this book is archival: to have the ability to read and ponder the material while offline.

The reader is advised to visit the Cassiopaea Forum to read about the ramifications and context of the session of interest, because those are not included in this compilation and often can change the meaning or work out some vagueness.

Chapter 2

1994

2.1 July 16, 1994

“Frank”, “Candy” and Laura

Q: Hello.

A: Hello.

Q: Do you have any messages for us?

A: Keep doing what comes naturally.

Q. (L) In what respect?

A: Study.

Q: (L) What is your name?

A: Mucpeor.¹

¹This was an unusual name. Up to this point in time, the names we had been given had all been, more or less, familiar. Names like “Dave” or “John” or “Mary” were not uncommon with the “dead dude” type contacts. Some

Q: (L) Are you an alien from another planet?

A: Alien from your perspective, yes.

Q: (L) What is your group called?

A: Corsas.

Q: (L) Where are you from?

A: Casiopaea.

Q: (L) Where is that?

A: Near Orion.

Q: (L) I heard that the Orions are the “Bad guys.” Are the Orion group bad?

A: Some bad.

Q: (L) Do you serve self or others?

A: I serve both.

Q: Are you bad or good?

A: Good.

Q: (L) What is your philosophy?

A: One.

Q: (L) What are you here for tonight?

A: Prophecy.

Q: (L) What prophecies?

of them even used archaic, but still familiar names like “Agamemnon” or “Aquila.” So, a completely unfamiliar name with no known connection was a first.

A: Tornadoes Florida - several.

Q: Where else?

A: Also Texas and Alabama.

Q: (L) When?

A: Sun is in Libra.²

Q: (L) What planet are you from?

A: Corsoca.³

Q: Where is that?

A: 2 DILOR. [Some confusion about this as the planchette had begun to mover rather quickly and this is not complete.]

²This remark about the “Sun in Libra” becomes extremely important later on, so it was interesting that this was brought up at the very first session.

³The term “Corsoca” was one of the first “clues” about hidden things in our reality the Cassiopaeans gave that related almost directly to a particular written work. In Jacques Vallee’s book, *Revelations*, at the beginning of each section, there are quotes from Cassilda’s Song in *The King in Yellow*, Act 1, Scene 2, by Robert W. Chambers. The Song goes:

Strange is the night where black stars rise,
 And strange moons circle through the skies,
 But stranger still is... Lost Carcosa.
 Songs that the Pleiades shall sing,
 Where flap the tatters of the King,
 Must die unheard in ... Dim Carcosa.
 Along the shore the cloud waves break,
 The twin suns sink behind the lake,
 The shadows lengthen... In Carcosa.

So, of course, having just read this poem, I was immediately struck by the similarity of Corsoca to Carcosa. The reference to Twin Suns was also significant later on, but not of any significance to us at this point. Finally, considering the state of the world at present, the description of “Lost, Dim Carcosa” become particularly poignant.

Q: What was that again?

A: You pay attention.

Q: (L) What else is going to happen?

A: Seattle buried; Japan buckles; Missouri shakes; California crumbles; Arizona burns.

Q: [Unknown question.]

A: Go to Denver airports.

Q: (L) When is all this going to happen?

A: Scandal - Scandal - Denver Airport.

Q: (L) What about the Denver airport?

A: Scandal.

Q: I don't understand.

A: New Denver airport.

Q: I don't understand.

A: Pay attention.

Q: Okay, we are paying attention. What are you trying to tell us?

A: Denver new airport big, big, big, big scandal.

Q: (L) What kind of scandal?

A: Government.

Q: (L) Specifically what?

A: You will see. Dallas airport is secret base; Orlando too; Miami Too.

Q: (L) What about Denver airport and how does it relate to prophecies?

A: Denver reveals the government. Look for it. Pay attention.

Q: (L) What else do you have to tell us?

A: Montana: Experiment with human reproduction. All people there - rays - radon gas.

Q: (L) How are they doing this?

A: Compelled - Don't trust - Don't ignore - too strong urges - sinister plots.

Q: (L) What do you mean? I don't understand?

A: Strong urge is directed by sinister plot.

Q: Plot by whom?

A: Consortium.

Q: (L) Who are the members of the consortium? Aliens? The government?

A: All.

Q: (L) All who?

A: Government and other.

Q: (L) Who is the other?

A: Unknown.

Q: (L) Why can't you tell us who is the other?

A: You know who.

Q: (L) Bob Lazar⁴ referred to the fact that aliens supposedly refer to humans as containers. What does this mean?

A: Later use.

Q: (L) Use by who? How many:

A: 94 per cent.

Q: (L) 94 per cent of what?

A: Of all population.

Q: (L) What do you mean?

A: All are containers; 94 per cent use.

Q: I don't understand.

A: Will be used. 94 percent.

Q: (L) Used for what? You mean eaten?

A: Total consumption.

Q: (L) What do you mean by consumption? Ingested?

A: Consumed for ingredients.

Q: (L) Why?

A: New race. Important. 13 years about when happens.

⁴Bob Lazar is a fellow who claims to have worked at Area 51 on retro-engineering alien space craft that had been captured by the U.S. government. He talks about his experiences in a video presentation that is well worth watching. In this video, he mentions having read a Top Secret-Eyes Only file on the subject of aliens, in which it was said that they repeatedly refer to human beings as "containers." This struck me as extremely curious, and I didn't think that the standard explanation of a body as a "container" for the soul was exactly what was meant. We had been discussing this video while sitting at the board earlier in the evening, so that is why the question was asked.

Q: (L) Why are humans consumed?

A: They are used for parts.

Q: (L) We don't understand. How can humans be used for parts?

A: Reprototype. Vats exist. Missing persons often go there and especially missing children.

Q: (L) Do we have any protection?

A: Some.

Q: (L) How can we protect ourselves and our children?

A: Inform them. Don't hide the truth from children.

Q: (L) How does truth protect us?

A: Awareness protects. Ignorance endangers.

Q: (L) Why tell children such horrible things?

A: Need to know.

Q: I don't know how knowing this helps. This is awful. Why tell children such things?

A: Must know - ease pain with meditation.

Q: Why are you telling us this? It's awful!

A: We love you.

Q: Are we supposed to tell others?

A: Don't reveal to public. You would be abducted.

Q: (L) What is the purpose of this project?

A: New life here.

Q: (L) Are the aliens using our emotions and energies?

A: Correct; and bodies too. Each earth year 10 percent more children are taken.

Q: (L) Do they suffer?

A: Some.

Q: (L) Do they all suffer?

A: Some.

Q: What happens to souls? Is this physical only?

A: Physical - souls recycled.

Q: Where do the souls go?

A: Back here - most.

Q: Do some go elsewhere?

A: And go out of planet human.

Q: Who is responsible for this?

A: Consortium.

Q: (C) This is totally sick! I don't want to do this any more!

A: Sick is subjective.

Q: (L) But what you are telling us is so awful!

A: Understand, but all does not conform to your perspective.

Q: Why is this happening to us?

A: Karma.

Q: (L) What kind of Karma could bring this?

A: Atlantis.

Q: (L) What can protect us?

A: Knowledge.

Q: (L) How do we get this knowledge?

A: You are being given it now.

Q: (L) What knowledge do you mean?

A: You have it.

Q: (L) How does the knowledge of what you have told us help us?

A: Gives great defense.

Q: (L) What knowledge gives defense?

A: Just gave it.

Q: (L) What specifically?

A: Don't ask that not important.

Q: We don't understand.

A: Knowing about it gives psychic defense.

Q: How do we tell other people? And who should we tell?

A: Inform indirectly only.

Q: (L) How?

A: Write.

Q: Should we use hypnosis to uncover such memories?

A: Open.

Q: (L) Have any of us been abducted?

A: Yes.

Q: Who of us sitting here?

A: All.

Q: (L) How many times?

A: Frank - 57; Candy - 56; Laura - 12.

Q: (L) Why has Laura not been abducted as much? (Laura laughs)

A: It is not over.

Q: (Candy laughs)

A: Candy was abducted last month. Laura - 33 - [years of age or years ago?]

Q: (L) Who is abducting us?

A: Others.

Q: (L) What is the name of the group?

A: Different names.

Q: (L) Are we all abducted by the same group?

A: Mostly.

Q: (L) What did they do to us?

A: Gave false memories. Made you inhibited child - headaches - sick at school.

Q: (C) Where is my implant?

A: Head.

Q: Frank?

A: Same.

Q: Laura?

A: Same.

Q: (L) What are the implants for?

A: Study device.

Q: (L) To study what?

A: Soul composition.

Q: (L) Do any of the rituals we perform provide protection against further abduction?

A: Don't need protection if you have knowledge.

Q: (L) How do we get this knowledge?

A: Deep subconscious.

Q: (L) When did we get it?

A: Before birth.

Q: (L) Is there anything else we can do for protection?

A: Learn, meditate, read.

Q: (L) Are we doing what we need to be doing at the present?

A: So far. Need awaken. Must go now. Out of Energy. I must go.

END OF SESSION

2.2 July 22, 1994

“Frank”, Laura and “Candy”

Q: Hello.

A: Hello.

Q: Is anyone with us?

A: Listen, Look. Learn. Stop eating.⁵

Q: What is the problem with eating?

A: Not good connection.

Q: (L) What is your name?

A: Ellaga.⁶

Q: (L) Are you discarnate from Earth?

A: No.

Q: Are you an alien like we had the other night?⁷

A: Yes.

Q: (L) Are you from another galaxy?

A: No.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Is this the constellation we know as Cassiopaea?

A: Yes.

Q: (L) What can we do for a better connection?

A: Less noise. [There was activity in the next room. We shut the door.]

Q: (L) Do you have information for us this evening?

⁵Candy was having a snack.

⁶Another unusual name; I was intrigued.

⁷I was making an assumption that we had been conversing with “aliens.” In fact, the Cassiopaeans have never described themselves as “aliens.” What they had actually said was “alien from your perspective.”

A: Space invasion soon. Four to six years. Battle between forces good and evil. Wait near. Look far. Listen. Mexico fall; Ethiopia quake; September - both - New Near - January - Paris bomb - London Blizzard - 109 die - Plane down - Tahiti - Cholera - Montana - January 1995 - government US - behind California quakes - Three soon - Oklahoma political abduction - February 95 - Big news.⁸

Q: (L) What is causing the Earth changes?

A: Electromagnetic wave changes.

Q: (L) Can you be more specific?

A: Gap in surge heliographic field.⁹

Q: (L) I don't understand.

A: Put Frank on processor channel open.

Q: Do you mean that Frank can channel on the computer?

A: Yes. Do it now.¹⁰

Q: (L) Is a meteor or comet going to hit Earth?

A: Open.

Q: (L) What are the effects on us of the comet striking Jupiter?

⁸The curious thing about this remark is that on February 25 of 1995, we were given a warning of a terrorist bomb attack within a month. Connecting that back to this mention of Oklahoma "political abduction," and we find a curious relationship to the Oklahoma Bombing in March of 1995. In one of the earliest reports of the capture of Timothy McVeigh, he was quoted as saying that he was under the control of an implant that was in his hip, and that he believed he had been abducted and programmed by the government. And it was, indeed, BIG news!

⁹Keep this in mind also, along with the "Sun in Libra" remark from the first session, and the "twin sun" reference from the "Carcosa" clue.

¹⁰We tried it and it was nonsense. We concluded that this was an attempt at side-tracking the process.

A: Further field imbalance.

Q: (L) Was that comet meant for Earth as some psychics are saying?¹¹

A: Open.

Q: [Unknown question.]

A: Bits childrens organs removed while wide awake - kidneys crushed - then next feet - next jaw examined on table - tongues cut off - bones stress tested - pressure placed on heart muscle until burst.

Q: Why are you saying these awful things?!

A: Must know what consortium is doing.

Q: What children are they doing this to?

A: Done mostly to Indian children.

Q: Why am I getting this horrible feeling while you are telling us this?

A: Because subject is distressing.

Q: Why do we need to know these things?

A: Very big effort on behalf of Orions and their human brethren to create new race and control.

Q: (L) Where are you from?

¹¹There were many rumors on the internet at the time of the Comet Shoemaker-Levy impacts on Jupiter that this comet had been meant to hit Earth, but a certain group of aliens, and I don't remember which one, had decided to "save" the Earth by redirecting these comets to strike Jupiter instead. Naturally, all of mankind was supposed to be grateful to this particular group for saving our buns from the fire!

A: Cassiopaea.

Q: (L) Where do you live specifically?

A: Live in omnipresence.

Q: (L) What does that mean?

A: All realms.

Q: (L) Can you tell us what your environment is like?

A: Difficult.

Q: (L) Well take a stab at it.

A: What stab?

Q: (L) Do you serve self or others.

A: Both. Self through others.

Q: (L) Candy wants to know the details of her abductions.

A: Do you?

Q: (C) Yes.

Are you sure?

Q: (C) Yes.

A: Soon, vibrations not right at this time.

Q: (L) Does this mean Candy's vibrations are not right to receive this information?

A: Right.

Q: Why was information about our abductions given last time?

A: Was not I.

Q: And who are you?

A: Ellaga.

Q: (L) Is there a tenth planet as described by Zecharia Sitchin?¹²

A: No.

Q: (L) Was Venus ejected from Jupiter?¹³

¹²I had recently read Zecharia Sitchin's *The 12th Planet*, which posits that a superior race of alien beings once inhabited our world. Sitchin claims that they were travelers from the stars, that they arrived eons ago, and genetically engineered mankind to be slaves for them. He claims that the "Sons of Anak" mentioned in the Bible are the Annunaki, and also that they are the same as the Nefilim mentioned in the Bible. His claim is that they are a race of gold-seeking giants from a renegade planet in our own solar system that was known to the Sumerians as the "Planet of the Crossing." This planet "crosses" the plane of the ecliptic every 3,600 years, and when it gets close enough, these beings make a "hop" to Earth to check up on their creation. Supposedly, this will happen again soon. The title comes from the fact that Sitchin proposes that there are 12 houses of the zodiac because there were 12 "planets." He includes the Sun and moon in his count because they are zodiacally significant. But, in actuality, it is really a 10th planet, excluding the Sun and Moon. He also fails to note that the Earth is excluded from zodiacal considerations due to the fact that astrology is geocentric. But that is a minor point. More significantly, there does seem to be something to the idea of a 3,600 year "event" of comet swarms due to the break-up of a giant comet as described by astronomers Victor Clube and Bill Napier in their books *The Cosmic Serpent* and *The Cosmic Winter*. This idea was given additional support by Firestone, West and Warwick-Smith in *The Cycle of Cosmic Catastrophes*. I am not aware of any other channeled source that has brought up and discussed these ideas and added information to the pool that later turned out to be correct based on scientific assessment.

¹³This was proposed by Immanuel Velikovsky as an explanation for why the ancient astronomers and myth makers claimed that Venus was born from Jupiter.

"Several times during the 15th and 8th centuries BC, the Earth was convulsed by near collisions with other celestial bodies. These cosmic brushes caused a series of catastrophes that altered the course of ancient history." A host of ancient myths and legends offer clues as to what happened during these catastrophes. Further written evidence is contained in the Old Testa-

A: No.

Q: (L) Did Venus follow a cometary orbit for a time?

A: Yes.

Q: (L) Did Venus appear in our solar system, from the area of Jupiter, coming from deep space as suggested by Velikovsky?

A: That is correct.

Q: (L) Was Venus the the pillar of smoke by day and fire by night as seen by the Jews during the Exodus?

A: No.

ment Book of Exodus and also historical and astronomical texts inscribed on papyrus and on stone and clay tablets.

“Millennia after being ejected from Jupiter, the cometary Venus was thrown into an elliptical orbit around the sun. Along that orbit, it intersected the orbit of the Earth. Mankind watched in terror, as the sky seemed to catch fire. The Babylonians called Venus the “bright torch of Heaven.”

“The Chinese wrote that Venus spanned the heavens, rivaling the sun in Brightness. An ancient rabbinical record said that Venus “Blazes from one end of the cosmos to the other.””

Velikovsky theorized by following the trail of Venus through world-wide myths and legends, that Venus intersected the Earth in its orbit sometime during the middle of the fifteenth century BC. This event was recorded in the Bible as the plagues of Egypt and the means by which the Jews escaped from bondage. Searching for verification of his theory, Velikovsky spent weeks trying to find an Egyptian account of the events of the Exodus. Finally he discovered a translation of an Egyptian papyrus which contained a description of a great catastrophe including the plagues of Egypt. It was called Admonitions of a Sage , or the

The reader will most certainly wish to read *Worlds in Collision* because it is one of the most rational books ever written. Even if Velikovsky was wrong about some of the conclusions he drew regarding myth and legend, his observations and proposals of a new way at looking at the cosmos have yet to be fully appreciated. And, according to the Cassiopaeans, he was, at least, partly correct.

Q: (L) What was seen by the Jews?

A: A Guideship.

Q: (L) Were Sodom and Gomorrah destroyed by nuclear weapons?

A: Yes and no.

Q: (L) How were they destroyed?

A: EMP

Q: (L) What is “EMP”?

A: Electromagnetic pulse.

Q: (L) Was Jesus genetically engineered by Aliens as some channeled sources suggest?

A: Close.

Q: (L) Can you explain?

A: Too complex.

Q: (L) Was Mary a true virgin when she gave birth?

A: No.

Q: (L) Did she conceive in the normal way?

A: Yes.

Q: (L) Who did she have sex with?

A: Her husband.

Q: (L) Was Jesus genetically altered?

A: After - in childhood. Use computer.¹⁴

¹⁴Again, we are being urged to “use the computer” or a form of “automatic

Q: (L) We tried it. It wasn't satisfactory. Was Jesus special, Christed as it is called, in any way?

A: Quick exalted - Yontar¹⁵ - ancient wars - civil entrancement - Zindar council.

Q: (L) What is the Zindar Council?¹⁶

A: Two cycle exchangers mission.

Q: (L) What does that mean?

A: References vast. Use Laura Channel computer.¹⁷ Must go.

END OF SESSION

2.3 July 27, 1994

“Frank”, “Candy”, Laura

After a brief encounter with an easily identifiable “dead dude,” whom we sent away, we used our Reiki symbols, asked specifically for our communicants from Cassiopaea and the following came through:

writing” for channeling purposes. Yes, it would certainly have been easier and faster, but I did not feel that the contact had been sufficiently checked out to warrant taking that step yet. One thing that occurs to me long after the fact is that this was a conflation of the idea of channeling with networking via computer.

¹⁵This reference proved later to be the name of a planet. The question that occurs here is: Are planets also beings as is suggested by this reference to “ancient wars?”

¹⁶Zindar or Zendar also turned out to be a planetary name.

¹⁷Again the computer is being suggested, only this time it is specifically addressed at me. But, I wasn't buying it. Not yet, at least. Later, however, I felt that a lot of “The Wave” was written in a “special state”.

Q: We want to communicate with the Cassiopaeans.

A: I am Ra keeper of light.

Q: What are you here to tell us?

A: UFO not all bad.

Q: Why is the connection so bad tonight?

A: You see you are tired.

Q: [Unknown question.]

A: Level through 6.

Q: [Unknown question.]

A: Planet.

Q: [Unknown question.]

A: Always. Please let me go.

It was clear that the energy was very weak on this last contact. It was also curious that the character “Ra” came through and identified himself as a “keeper of light.”

2.4 July 30, 1994

“Frank”, “Candy”, Laura

Q: Hello.

A: Hello.

Q: And who do we have with us?

A: Name Panua Name Oz Name Pamala

Q: (L) Where are you from?

A: Corsoca.

Q: (L) Do you have messages for us?

A: Be careful.

Q: (L) Of what?

A: Aliens.

Q: (L) Which Ones?

A: Orions.

Q: (L) What do they do?

A: Follow you.

Q: (L) Did Ann, Candy and Laura see an alien craft last night?¹⁸

A: You better believe it.

Q: (L) Whose craft was it?

A: Orion.

Q: (L) Did it appear for us specifically.

A: No.

Q: (L) Do they know we saw them?

A: Yes.

Q: (L) Did they leave because we saw them?

¹⁸The three of us had gone to visit a friend and had a very unusual sighting of a stationary, triangular craft with a bright light on each corner. When we pulled off the road under it and stopped, as soon as I got out of the car, it just zoomed away.

A: Yes.

Q: (L) Were they planning to abduct somebody?

A: Maybe. You are next.

Q: (L) What?

A: To be abducted.

Q: (L) Who?

A: LK

Q: (L) By whom?

A: Orion.

Q: (L) When?

A: Open.

Q: (L) Why?

A: For Knowledge monitoring. Craft above now.

Q: (L) Above the house?

A: Absolutely.

Q: (L) Is it good for me to be abducted.¹⁹

A: Neutral.

Q: (L) Will I be abducted because I saw them last night?

¹⁹I still had a lot of mixed feelings about the phenomenon of abduction. There were so many groups and sources propagating the idea that it was “for the good of mankind,” even if such activity was based on violation of free will, pain, terror and suffering.

A: Partly. Mike and JW have reported you.²⁰

Q: (L) Are they in cahoots with the aliens?

A: Not knowingly.

Q: (L) How, then?

A: Subconscious. Implants.

Q: (L) Do we have implants?

A: Two implants; one monitor.

Q: (L) What is the difference between a monitor and an implant?

A: All are monitors. Implant is permanent. Frank and Laura have permanent implants. Candy got monitor three months ago. Next is implant.

Q: (L) Why?

A: To watch and observe you.

Q: (L) Why?

²⁰The first individual mentioned here, claimed to be a UFO investigator with a lot of supposed “credentials” that later turned out to be fake. He was quite a character, going around in his white convertible, wearing a straw hat and safari type clothing, with a “UFO detector” in his pocket disguised as a cigarette pack that occasionally began to beep wildly, at which point he would dash off to a telephone to report the presence of a UFO to some secret organization to which he claimed to belong. He was obsessed with “Bigfoot”. It was all pretty comical, and typical of the kinds of nuts that you find in the UFO milieu. The second individual was someone I would never have dreamed of being “in cahoots” with aliens. He was most emphatically sure of one thing: if he ever met an alien, he would shoot first and ask questions later! Of course, he also believed firmly that the Annunaki were our gods and would return one day and he would be there to welcome them! He even thought that humanity should build giant houses for them in advance.

A: You are all higher level beings. Frank implant: 4 years old.
Laura implant: 5 years old.

Q: (L) Have Laura's children been abducted?

A: Not yet.

Q: (L) Have Candy's children been abducted?

A: One.

Q: (L) Which one?

A: Last.

Q: (L) Who is putting implants in us?

A: Orions.

Q: (L) And there is nothing we can do about it? That's sick!

A: A matter of perspective.

Q: (L) What do the Orions look like?

A: Grays.

Q: (L) Are they big nosed grays like I have read about in some sources?²¹

A: Both kinds of grays.

Q: (L) Are they insectoid?

A: No.

Q: (L) Do they have hive souls?

A: No.

Q: (L) Do they have emotions?

²¹See Ray Fowler's The Andreasson Affair .

A: No.

Q: (L) Do they want human bodies as hosts?

A: Some.

Q: (L) What is their planet like?

A: Similar to earth.

Q: (L) What planet is it described in several books as a desert with huge spiders with legs like tree trunks?²²

A: Uzuli.

Q: (L) Has any of us ever been abducted by the giant spiders?

A: No one has.

Q: (L) Well why have people seen this planet?

A: It is one of the planets of ZR 4.

Q: (L) What is ZR 4?

A: Zeta Reticuli 4. There are seven planets. The 4th one.

Q: (L) What other information can you give us?

A: Base of Aliens near here small.

Q: (L) Are you the ones we refer to as the ‘Boys in Brazil’?²³

A: Yes. Anclote Gulf Park²⁴ used to be a military base. Underground.

²²See Whitley Strieber’s *Majestic* .

²³This is our joking reference to “whoever is in charge of the universe”.

²⁴This is a County Park next door to a power plant. The warm water outflow of the cooling towers makes a haven for manatees and many other fish. It is a little bit south of some ancient Indian mounds, also.

Q: (L) Why underground?

A: To hide.

Q: (L) What group are you with?

A: Federation. Among many.

Q: (L) Is there any way we can prevent Orion abductions?

A: No.

Q: (L) Why?

A: It would interfere with universal law of free will and service to self.

Q: (L) But we don't want to be abducted. Can't we stop it?

A: Not likely. They have more power than you.

Q: (L) Well then, why can't you help us?

A: Would interfere in natural progression of your race and theirs. Jews called upon us to save them - could not. And natives of your land from your race - could not stop that either. Natural progression, see?

Q: (L) Are we going to be wiped out by aliens as part of this natural progression?

A: Maybe. What makes you feel you are special?

Q: (L) Jesus told us God loves us. Is this true?

A: But it is the soul that matters, not the body. The body dies not the soul.

Q: (L) Well, this whole thing just gives us the creeps.

A: No. You are energy. There is an energy that comes from soul and body connection; later the body is used for parts.

Q: (L) What are they using our energy and bodies for?

A: Create a new race. Theirs fading out.

Q: (L) Well, do they just take people and kill them and do what with them?

A: Slice them up.

Q: (L) Do they die?

A: Maximum matter and energy transfer during transition.

Q: (L) In other words, you are saying that a slow painful death gives them the most of what they want? This is totally sick.

A: You asked for truth. You say it is sick but it is merely the ultimate form of service to self.

At this point my daughter, who was standing by and watching, described reading a passage in a book which stated that Native Americans believed a slow torturous death of an enemy gave them more power. As she finished speaking, the Cassiopaeans added:

A: What about your lab animals? Is that not service to self as well? What about unwanted insects et cetera?

Q: (L) We were here first!

A: So were insects. Grays now want your planet.

Q: (L) That is sick.

A: Is natural progression sick?

Q: (L) Is what is happening something like what Jesus described in the parable of the wheat where the workers come in to take out the weeds first?

A: Close.

Q: (L) What kind of people is this being done to?

A: Low level humans.²⁵

Q: (L) What happens to the high level humans?

A: Some will survive.

Q: (L) Will Jesus be reincarnated into a body?

A: No.

Q: (L) Is Jesus an alien?

A: One of us.²⁶

Q: (L) Will there be atomic war?

A: No.

Q: (L) Will there be a war in the sky with the aliens?²⁷

A: Yes.

Q: (L) Will it be between Orions and the Federation?

A: Yes.

Q: (L) Will it be visible on earth?

A: Oh, yes.

²⁵The question naturally arises as to what is meant by “high level humans” as opposed to “low level humans.” The reader should not get caught up in thinking that this is an “elitist” or exclusionary definition in terms of the value of all human beings in their own context and reality. It has to do with, simply, the difference between those who are ready to graduate to a new level of being, and those who wish to continue in physical existence. In all cases, it is a choice that is demonstrated by one’s frequency, rather than by whether or not one says that they are one or the other.

²⁶“Us” meaning 6th density, not necessarily “Cassiopeans.” This will be clear as we go along.

²⁷This was a recurring dream of mine, that there would be a “space war.”

Q: (L) When will this be?

A: It has already started. Will intensify steadily.

Q: (L) Why are we not aware that it has already started?

A: Disguised at this point as weather. Fighting part still in other dimension. Will go to this one within 18 years. Anytime within this period. Not determinable exactly when. Could be tomorrow or 18 years.

Q: (L) 18 years from now is 2012. Is there some special significance to that time?

A: By then.

Q: (L) Will the earth be affected by a comet or planet?

A: Maybe. One at a time please. Stop thinking physical thoughts - they are low frequency.

Q: (L) What do you mean by physical thoughts? Who is thinking physical thoughts?

A: Anything to do with body or animal like - minimize as much as possible - that raises vibration level.²⁸

Q: (L) Is vegetarianism then the way we should eat?

A: That is concentrating on the physical. The body is not important.

Q: (L) Does this mean that to worry about the body in any way is wrong?

²⁸This was a curious remark. I knew I wasn't thinking "low level" thoughts, I was pretty focused on my questions. I also knew Frank well enough to know that it wasn't him. So, the only logical candidate for a person thinking "low level" thoughts having to do with "animal-like" behavior was Candy.

A: Close. Don't concentrate on life in the body. Concentrate on the spirit.

Q: (C) Does this mean Laura should ignore her heart condition?

A: Don't worry about it. Treat the spirit.

Q: (L) Well, heart troubles mean that the heart is broken. Why is my heart broken?

A: Confused energy.

Q: (L) How can we improve the energy for reception?

A: Meditate in general.

Q: (L) But we like being in bodies and having opportunities to love and appreciate the natural world and all the beautiful things of creation. It is only natural to not want to terminate access to something that can be so pleasant.

A: Concentrating on trying to prolong life in the body. You will always have access.

Q: (L) Would we be happy moving to British Guyana?²⁹

A: Not likely.

Q: (L) Will we be happy staying here and fixing this house?

A: More likely. No dish or clothes washers in Guyana. No electricity. No air conditioning. Are you ready for that?

²⁹My ex-husband, to whom I was still married at the time, had been trying to convince me for a long time that we ought to sell everything we owned, pack up the children, and move to the rain forest in British Guyana. He was convinced that when the New World Order took over the country, this would be a safe place to be. I had my doubts, but with all the new information about aliens coming out, I was beginning to think that maybe it wasn't such a bad idea even if we had two children with medical problems who needed to be close to proper facilities in case of the need for treatment.

Q: (L) But we don't want to stay here and be eaten by aliens!

A: Aliens eat Guyanans too.

Q: (L) But where should we go when Florida sinks?³⁰

A: Who said Florida was going to sink?

Q: (L) Are we chosen?

A: What is chosen? Only you can choose. The choice comes by nature and free will and looking and listening. Where you are is not important. Who you are is and also what you see.

Q: [Unknown question.]

A: Haven't you figured out by now?

Q: [Unknown question.]

A: Up to you to discover. Use other medium for that.³¹ Have given enough. Must go.

END OF SESSION

As the reader can see, we were asking a whole lot of random questions about aliens and abductions that were based on the many things we had read or heard about the topic.

2.5 September 30, 1994

Frank and Laura (This is the first taped session.)

³⁰This was another of the endless rumors of prophecies being passed along via various channeled sources in books.

³¹Again, we are being urged to use another channeling medium. But, I still was not satisfied that this was proper advice based on all the analysis we had done.

It should be noted that, at this point, I was rather hung up on the idea that any communicant should be “Christian” and should support the Jesus story so there is a lot of emotional investment going on here that could easily have skewed things. See also foot-notes that I put at the end some time ago.

Q: Hello.

A: Hello.

Q: (L) Who are you?

A: Pamthora.

Q: (L) Are you the same individual who communicated with us last week?

A: No.

Q: (L) Are you from the same group?

A: Yes.

Q: (L) Why are you with us tonight instead of the one who was here last week?

A: Frequency waves.

Q: (L) The frequency waves are different?

A: Close.

Q: (L) Are you better able to communicate with us than the one who was here last week?

A: Same.

Q: (L) I don't understand what you mean about the frequency waves. Could you elaborate?

A: Too complex.

Q: (L) Okay. Does this mean that you are not going to be able to communicate complex answers to us tonight?

A: No difference

Q: (L) Last week we were talking about Jesus of Nazareth who became the Christ. Can we continue that subject this week?

A: Yes.

Q: (L) Who was Jesus of Nazareth?

A: Advanced spirit.

Q: (L) Was Jesus born from an immaculate conception; that is did his mother not have sex with a man in order to conceive him?

A: No.

Q: (L) She did have sex with a man in order to conceive him, is that correct?

A: Yes.

Q: (L) Who was the man with whom she had sex to conceive Jesus?

A: Tonatha.³²

³²Reading in a very well researched book entitled “Lost Survivors of the Deluge,” by Gerd von Hassler and translated from the German by Martin Ebon, we find the following relating to this mysterious “Tonatha”:

“In the Bible it says:”And it came to pass, when men began to multiply on the face of the earth, and daughters were born unto the,, that the Sons of God saw the daughters of men that they were fair; and they took them wives of all which they chose. And the Lord said, My spirit shall not always strive with man, for that he also is flesh: yet his days shall be but a hundred and twenty years.

“With this Divine dictum, the golden times, when gods and their direct offspring lived to be 900 years old, and more, came to an end.

“For hundreds of years, these lines have troubled religious scholars, be-

cause direct and literal translations specifically yields the term "Sons of God," as pursuing human maidens. Accordingly, some 2,000 years were devoted to many an inspired and convoluted explanation, in order to come to terms with a notion that fits neither the concepts of the Bible, nor that of a heavenly Divine Creator, but had to be given an appropriate interpretation.

"This is a fact [since the Deluge] we have lost godlike Near-Immortality and all the efforts to intensify the quality of the divine blood through incest - as both the Inca Emperors and the Pharaohs attempted - had to fail. [...] The Divine Blood had been diluted.

"But God had desired the equality of the divine with the human. The Bible tells us: And God said, let us make man in our image, after our likeness...

"Let us make man in our image' is but one of the somewhat dictatorial decisions of democratic majorities within a family of gods, to be found in all the world's myths.

"This brings us to the crucial question. It is, indeed, so vital and controversial that St. Boniface, when he presented it to the Frisians during his missionary journey on June 5, 754, was put to death by the sword! Today, we may ask such a question without facing the sword; it is: Just what is the name of the God-Creator? What is the name of the god who governed the earth even before the Deluge; this God of Gods, rightly called Father of the Gods, and thus Father of all Mankind? To put it even more simply: If a highly developed civilization existed more than 10,000 year ago, governing the world's then populated regions, and if the God-King was able to aid his contemporaries in surviving the Deluge catastrophe, surely the name of this ruler must have been handed down to later generations of survivors; who was he?

"We know from the Epic of Gilgamesh, of the horrible Enlil, who was responsible for the Deluge. The other gods did not think highly of him, but feared him a good deal. His influence never extended beyond Mesopotamia. His antagonist, Shamash, the Sun God, enjoyed greater prestige. He remains, notably in Asia even today, a figure of magical power, the epitome of the shaman. But even the early Egyptians called their Sun God by a different name, Ra. This need not mean much, because Plato tells us that the Egyptians had even then developed a unique and high level of civilization hostile toward the unknown earlier culture.

"The Egyptian term 'Ra' was integrated into the language of early Peru, where we encounter the annual sun festival Rami or Raymi. But this adaptation undoubtedly dates back only to the period following the Deluge, as does the word 'Wotan.' This enables us to draw a firm dividing line: we are able to eliminate all gods who emerged from the post-Deluge civilizations as cre-

ators of cultures, builders of cities, magicians or agronomists. The ONE God for whom we search has to be the father - or even ancestor - of this post-Deluge generation of gods. Just as Tuisto, father of Mannus, was the ancestor of Germanic culture.

“Tuisto? Can that be accurate? Or did Tacitus fail to understand the name correctly? The curious linking of the darkest and lightest vowel in our language brings back a curious association. Of course! It is Tiu, the god whom the early Germans recalled when they made up the calendar and named one day of the week after him: Tuesday. Otherwise he has been overshadowed by the ever-present Wotan-Odin, as the highest Ruler of the Heavens. This replacement took place, at the latest, during the *Volkerwanderung*, the Great Migration that caused a gigantic upheaval of populations on the Eurasian land mass. We may even assume that, just because Tiu (or Ziu) was removed heavenward, the very vigorous Wotan managed to take his place in human imagination and thought. It was a fate that Wotan experienced himself later on, when missionaries cut down the very oaks that had been dedicated to his divine presence.

“Tiu-Ziu was just as much one of the Aesir as Wotan had been. And the Aesir had even managed to infiltrate the antagonist worlds of Egypt and Mesopotamia, representing the sun and divine wisdom. [...] I do think, however, that our search for the original name of the primal Creator-God should not get bogged down in such minute details. The survivors of the Deluge of whom we learn from the Bible and the earlier Gilgamesh Epic and other traditions, were themselves survivors of the earlier world of gods. [...] Over thousands of years, they passed on a handful of names. No doubt, precisely how much and what one name or another had originally meant may simply have been forgotten over the long, long years.

“If we concentrate on the godlike of God Ziu, we discover the following points:

Zius was the highest god of northern Europe;

As Zeus, he was the highest god of ancient Greece;

As Jupiter (Iu-Pitar = Tius-Pater) he was the Father God of ancient Rome;

As Deus (from which we derive ‘Deity’) he was the basic concept of the heavenly, the only Deity in the Latin liturgy of the Church, and the God in all Romance languages, as well as in the word ‘theology’)

As Ometeotl (again, ‘theology’ is closely related) he was the highest god of the Mayan culture.

As Cinteotl and God of Corn he is equivalent to Quetzalcoatl, the WHITE GOD;

Q: (L) And who was this individual, Tonatha?

A: Acquaintance.

Q: (L) How old was Jesus mother, Mary, when she conceived Jesus?

A: 19.

Q: (L) Was Joseph upset to discover that Mary was pregnant?

A: No.

Q: (L) How old was Joseph when he married Mary?

A: 39.

Q: (L) Was Joseph unable to father children?

A: Close.³³

As TONATIUH, he was the Sun God, who provided the Aztecs with a sort of Valhalla for their war dead.

As Xiuhcutli, he was the Fire God of ancient Mexico.

As Tirawa-Atius, the highest divinity of the Pawnee, he was credited with populating the world with ‘giants.’

As Tieholsodi, the monster who caused the Deluge and ruled all waters, he exists in the traditions of the Navajos;

As Szeu-kha, he is the son of the Creator-God whom the Pima Indians knew as floating above the Deluge;

As the falcon Tiuh-Tiuh of the Guatemaltec Indians he mixed the blood of a snake with that of a tapir, kneaded it with corn-flour and ‘thus created the flesh of man.’ This tribe says that it came from Tulan, the Place of the Sun, across the sea.

“We have previously mentioned the divine cities Tiahuanaco and Teotihuacan. To this should be added the holy plants, including the mushroom Teonacatl which caused divine visions.

“All of this narrows down to one conclusion - which nevertheless is not definitive - and that is: our old Tuesday God, Tiu, was a divine Ruler-God in primeval times and his name imprinted itself so deeply into human memory that it has survived thousands upon thousands of years.” [Von Hassler, 1976]

³³As time went by, we learned that when the Cassiopaeans say “close,” we

Q: (L) What date, counting backwards in our calendrical system, was Jesus born?

A: 01 06 minus 14.³⁴

Q: (L) What time of day was he born?

A: 6 am.

Q: (L) Was there any unusual celestial event in terms of star or planet alignments at that time?

A: No.

Q: (L) What was the star the Magi saw in the East that led them to the place where he was born? Was there an event where the Magi came to present gifts?

A: Close.

Q: (L) Who was it that came to present him gifts?

A: 3 prophets.

Q: (L) What country did these prophets come from?

A: Iran. Also known as Persia.

needed to pay attention to the specific terms and assumptions we were making. Being “close” to “unable to father children” could as easily mean that he was unable because of choice or unable because of physical factors. It could even mean that the word “unable” was only close.

³⁴Interestingly, if this date is taken as correct, it certainly solves a number of problems in terms of where, when and how the early Christian church got its start relative to where, when and how the earliest epistles were written, since they were being passed around well before the gospels were written, and Paul claimed to have been a Christian before Christianity could reasonably be considered to have begun, going by the standard “dating” of the birth of Jesus.

Q: (L) Was Jesus an individual who had psychic or unusual powers from birth?

A: Close.

Q: (L) Did he have an awareness from the earliest times of his life that he was in some way special or chosen?

A: Yes.

Q: (L) What was the “star” that indicated to the prophets...

A: Spaceship.³⁵

Q: (L) What kind of space ship?

A: Mother.

Q: (L) Where did this mothership come from?

A: Other realm.

Q: (L) Does that mean other realm as in dimension or density?³⁶

A: Yes.

Q: (L) Do we know of these other realms or densities as other star systems or planets?

A: Partly.

³⁵If one considers the possibility of a spaceship appearing in those times, there are two problems that can be immediately reconciled. The first is the constant effort to find the “right” celestial event so as to pinpoint Jesus birth-date. The second is the fact that, apparently there IS some strong reason to hold on to the tradition that something unusual occurred at this time in the heavens.

³⁶We were still a bit confused as to the difference between “dimension” and “density.” We had all read the Ra Material by this time, and knew that there seemed to be some essential difference, but we had not yet formulated exactly how to use these terms.

Q: (L) Jesus grew up to the age of twelve, at which point he was Bar Mitzvahed, is that correct?

A: He was Bar Mitzvahed at the age of 10.

Q: (L) Did he at that time receive training elsewhere?

A: Aramaic rite.³⁷

Q: (L) Did Jesus, during the course of his growing up years travel to other countries and study under other masters?³⁸

A: No.

Q: (L) Where did he receive his teaching or training?

A: Channeled to him.

Q: (L) Did he at any point in his life travel to India?

A: No.

Q: (L) Did he travel to Egypt and undergo an initiation in the Great Pyramid?

³⁷This refers to the previous remark about the Bar Mitzvah at the age of 10. I still haven't found an tradition that refers to this specifically.

³⁸This is a fairly common explanation offered by many channeled sources over the past couple hundred years. It seems that none of these sources, even though they claimed to be using the technique themselves, could accept the idea of a truly "miraculous" download of knowledge or grace. Thus, there were many attempts to explain the source of Jesus' teachings in the many schools and systems prevalent in the world at that time. I should also note that this was my first clue that we were definitely NOT dealing with the run-of-the-mill channeled source. It would have been so easy to just go with the flow of all other channeled sources and make up a long story about all the various initiations and teachings and so forth that would explain Jesus mission in "realistic" or materialistic terms. But the Cassiopaeans were obviously not going to be seduced by taking the easy way. And, by so doing, they actually gave to the figure of Jesus more honor and puissance than those channeled sources that had sought for so long to "normalize" the existence of Jesus.

A: No.

Q: (L) He lived his entire life in Palestine?

A: Near. In that general area. The Bible is not entirely accurate.

Q: (L) When Jesus attended the marriage at Cana, whose wedding was it?

A: Did not happen.

Q: (L) Did Jesus feed thousands of people with a few loaves and fishes?

A: No.

Q: (L) Are you saying that all the miracles of the Bible are myths?

A: Remember this is corrupted information altered after the fact for purposes of political and economic gain and control.

Q: (L) Tell us what Jesus really did.

A: He taught spiritual truths to those starving for them.

Q: (L) And what was the basis of these spiritual truths?

A: Channeled information from higher sources.

Q: (L) What is the truth that Jesus taught?

A: That all men are loved by the creator and are one with same.³⁹

Q: (L) Did he perform miracles?

A: Some.

Q: (L) Can you tell us about one or two of them?

³⁹In this short series of questions and answers, the Cassiopaeans took with one hand and gave with the other. The result was, of course, that Jesus became more accessible and at the same time more remarkable.

A: Healing.

Q: (L) Was he able to literally heal with the touch of his hand?

A: Yes.

Q: (L) Did he perform exorcisms?

A: Close.

Q: (L) Is Reiki the method he used to heal; or something similar?

A: Yes.

Q: (L) Is there any way to enhance the Reiki energy to make it powerful enough that one could do in a very short time what now takes quite a while?

A: Yes.

Q: (L) What can one do to enhance the Reiki energy?

A: Attain lofty spiritual purity.

Q: (L) I have here two sets of Reiki symbols; which set is the correct or most powerful set: the first set or the second? {Holds up two sets of symbols}

A: The second set.

Q: (L) Are these the original Reiki symbols as given to Dr. Usui?

A: Close.

Q: (L) Are the Reiki symbols in the possession of Caroline the correct symbols?

A: No.

Q: (L) Are the symbols that Ann is using correct?

A: No.

Q: (L) Is Ann able to transmit the initiation in a full and powerful way?

A: No.

Q: (L) Is she just wasting her time thinking she is doing the transmitting as I suspect?⁴⁰

A: Yours.

Q: (L) Is there someone I could go to for the correct initiation?

A: Yes.

Q: (L) Do I know that person?

A: No.

Q: (L) Who do I know that may know that person?

A: Helen. VG has strongest ability.⁴¹

Q: (L) Does this mean that Vanna has the strongest Reiki ability of us all?

A: Yes.

Q: (L) Is her Reiki more powerful than my Reiki?

A: Yes. Candy has no ability. Crosses yours out.

Q: (L) Are you saying that Candy has given me Reiki that has cancelled my own Reiki out?

A: Precisely.

Q: (L) We did four hypnosis sessions with Candy where she discussed abduction experiences and so forth. Was any of that information that she gave embellished in any way?

⁴⁰See *The Wave* for more info on Reiki.

⁴¹VG was an occasional sitter with the experiment.

A: Yes.

Q: (L) Was it embellished consciously or unconsciously?

A: Both.

Q: (L) Was she actually abducted by aliens?

A: Yes.

Q: (L) What was the purpose of her abduction? What were the aliens trying to do with or to her?

A: Vaginal probe.

Q: (L) For what purpose?

A: Reproductive efficacy.

Q: (L) But Candy has had a hysterectomy.

A: They found none.

Q: (L) Was she abducted more than one time?

A: Yes.

Q: (L) How many times has she been abducted?

A: 52.

Q: (L) How many times has Frank been abducted?

A: 53

Q: (L) Why have they been abducting Frank?

A: Mind.

Q: (L) What about his mind?

A: Programmed by advanced powers.

Q: (L) Did they abduct Candy 52 time just to do a vaginal probe?

A: No. That was the most recent.

Q: (L) What were all the previous ones for?

A: Study mind and tap emotions.

Q: (L) In other words, they have tapped her emotions?

A: Yes.

Q: (L) Do they feed off of her emotions?

A: Yes.

Q: (L) Do they feed off Frank's emotions?

A: Yes.

Q: (L) Is there any way to break that tap?

A: It is not continuous.

Q: (L) Do they tap my emotions?

A: Yes.

Q: (L) Is this for our benefit?

A: No.

Q: (L) Is it the "bad guys" who have been doing this?

A: Yes.

Q: (L) Is there any way we can disconnect these taps?

A: Keep channeling and meditating.

Q: (L) What does the channeling do to break the tap?

A: Informs.

Q: (L) Let's go back to Jesus. Are the only miracles he did healing?

A: No.

Q: (L) What other kinds of miracles did he do?

A: Telekinesis.

Q: (L) Did he walk on water?

A: No.

Q: (L) Did he turn water into wine?

A: No.

Q: (L) Are these all just stories?

A: Yes.

Q: (L) What is the purpose of the stories?

A: Control.

Q: (L) Was Jesus crucified?

A: No.

Q: (L) Was somebody crucified?

A: Too vague.

Q: (L) Was somebody crucified on a cross and represented to be Jesus?

A: No.

Q: (L) There was no crucifixion, there was no resurrection after three days, is that correct?

A: Close.

Q: (L) Okay, what is the truth on that matter?

A: Left earth plane on ship after extended sleep state.

Q: (L) When did he go into this sleep state? Did he just go in one day and go to bed and go to sleep and then a ship came and picked him up?

A: Close.

Q: (L) So he appeared to his followers to have died?

A: They thought this.

Q: (L) Did he get up and say anything to anybody before he left on the ship?

A: Yes.

Q: (L) Did he come back to life...

A: Yes.

Q: (L) And then he told them things he had seen in his extended meditative sleep, is that what happened?

A: Close.

Q: (L) Okay, what happened?

A: Told prophecies then proclaimed eventual return.

Q: (L) Was this information he got during this period of extended sleep?

A: Yes.

Q: (L) How long was he asleep, or in this state of semi-death?

A: 96 hours.

Q: (L) And then, a ship arrived and took him away, is that correct?

A: Yes. Upon pillar of light.

Q: (L) Are there any other miracles he did that are outstanding?

A: Miracles are subjective.

Q: (L) Did he raise Lazarus from the dead?

A: No.

Q: (L) Did he raise anybody from the dead?

A: No.

Q: (L) Okay, when he got to this other plane, what did he do?

A: Vague question.

Q: (L) Is there any special power or advantage in praying in the name of Jesus?

A: Yes.

Q: (L) Well, if he didn't die and release his spirit into the earth plane, how is this power conferred?

A: Prayers go to him.

Q: (L) And what does he do when he hears the prayers?

A: Determines their necessity against background of individual soul development.

Q: (L) You said that when a person prays to Jesus that he makes some sort of a decision, is that correct?

A: Yes.

Q: (L) Well, how can he do that when millions of people are praying to him simultaneously?

A: Soul division.

Q: (L) What do you mean by soul division?

A: Self explanatory.

Q: (L) Do you mean soul division as in cellular mitosis where a cell splits and replicates itself?

A: No.

Q: (L) Does Jesus' soul divide?

A: Yes.

Q: (L) How many times does it divide?

A: Endlessly as a projection of consciousness.

Q: (L) And what happens to this piece of soul that is divided or projected?

A: Is not a piece of a soul.

Q: (L) What is it?

A: It is a replication.

Q: (L) Is each replication exactly identical to the original?

A: Yes. And no.

Q: (L) In what way is the replicated soul different from the original?

A: Not able to give individual attention.

Q: (L) Are any of us able to replicate in this manner if we so desire?

A: Could if in same circumstance. The way the process works is thus: When Jesus left the earth plane, he went into another dimension or density of reality, whereupon all "rules" regarding the awareness of time and space are entirely different from the way they are perceived in your realm. At this point in space time his soul which was/is still in the physical realm, was placed in a

state of something akin to suspended animation and a sort of advanced form of unconsciousness. From that point to the present his soul has been replicated from a state of this unconsciousness in order that all who call upon him or need to be with him or need to speak to him can do so on an individual basis. His soul can be replicated ad infinitum—as many times as needed. The replication process produces a state of hyper-consciousness in each and every version of the soul consciousness.⁴²

Q: (L) Who was Jack the Ripper?

A: Dr. Bates.

Q: (L) Did he commit suicide and is that why the Ripper killings stopped?

A: No.

Q: (L) Did he just stop doing it?

⁴²So, finally, the Cassiopaeans gave an explanation for the “power of Jesus” that was, on the one hand, rational and, on the other hand, totally comprehensible from the human perspective. Not only that, it could be inferred from what was said here that the mythicization of Jesus, the corrupting of his teachings, and the substituting of the myths of other “dying saviour” cults over the truth of his life, amounts to the work of those who wish to confuse and corrupt mankind for purposes of control and domination. We can see that the idea was to present Jesus as a performer of miracles that are unavailable to humanity for the most part, so that this would distort human understanding of what the life experience of Jesus here on earth was all about; and further, how it applies to each and every one of us in a direct and meaningful way. That is to say, when Jesus claimed that “these things I do, you can do too,” it was far more attainable than standard religious teachings would have us believe. This explanation also brings a whole new meaning to the saying: “Greater love hath no man than that he should give up his life for his friends.” To submit oneself to crucifixion, knowing that one will “rise again to eternal life” in three days, is no real sacrifice. But to submit to a state of suspended animation in a “time warp cocoon” for thousands of years that may seem like eternity, is a very great sacrifice, indeed.

A: Yes.

Q: (L) Why did he do it?

A: Experiment human organs; he was a mad surgeon.⁴³

Q: (L) Was Adolf Hitler possessed by demons or evil spirits?⁴⁴

A: Close.

Q: (L) Was Adolf Hitler under the control of the negatively oriented aliens?

A: Close.

Q: (L) Where is Adolf Hitler now?

A: Sleeping.

Q: (L) How long will he sleep?

A: Indefinite.

⁴³I have a rather large collection of books on the subject of Jack the Ripper. Each and every one of them proposes a different solution to the identity of the killer. And each of these books is written logically, sincerely, and with a great deal of research to back up the conclusions. In the end, it is difficult to favor one solution over another. I wonder if the Cassiopaeans use of the term "Dr. Bates" was a sly allusion to the character of the movie "Psycho," the unforgettable Norman Bates of the Bates Motel? And, if so, was it an indicator of a type of killer, rather than an actual name?

⁴⁴After reading several biographies of Adolf Hitler, there were several incidents in his life that stood out in my mind as having been potential points of possession by evil spirits in the terms described by Dr. William Baldwin in his book "Spirit Releasement Therapy." One of these incidents was the fact that a brother of Hitler died when he was a child, and this was noted as a point in which his entire personality changed. His family home was next to a graveyard, and he was known to spend much time sitting on the wall, staring at the tombstones. Such morbidity in a young child is often precursor behavior for possession.

Q: (L) Will Adolf Hitler return to incarnation at some point in the future?

A: Yes.

Q: (L) Can you predict what kind of life he will lead in his future incarnation?

A: No.

Q: (L) The passages attributed to Jesus in Matthew 24 and Luke 21, where Jesus predicts the end of the age and his return, is that fairly accurately rendered?

A: Close.

Q: (L) Is Jesus, in fact, in a state of suspension, voluntarily, in another plane of existence, having chosen to give up his life on this plane in order to continuously generate replications of his soul pattern for other people to call upon for assistance?

A: Yes.

Q: (L) If one calls upon him more than once, does one get a double dose?

A: Define.

Q: (L) If one repeatedly calls upon Jesus does one get repeated replications or additional strength, power or whatever?

A: No.

Q: (L) In other words, once one has truly made the connection, that's it?

A: That's all that's needed.

Q: (L) Has any other soul volunteered to perform this work?

A: Yes.

Q: (L) How many souls are doing this work at the present time?

A: 12.

Q: (L) Can you name any of the others?

A: Buddha. Moses. Shintanhilmoon.⁴⁵ Nagailikiga.⁴⁶ Varying degrees; Jesus is the strongest currently.

Q: (L) What year did the Exodus occur counting backward from now according to our calendrical system?

A: 4670.⁴⁷

Q: (L) At that time did a cometary Venus pass close to the earth and cause disruption?

A: Yes.

Q: (L) Was Venus born from the planet Jupiter?

A: No.

Q: (L) Did it appear in the sky from the area of Jupiter?

A: Yes.

⁴⁵I have never come across anything that seems remotely similar to this name, but it strikes me as having an Oriental flavor. Perhaps it is related to the Shinto religion of Japan?

⁴⁶Again, the only relationship I can think of to make to this name is that it has the feel of India, with the term "Naga" incorporated into it.

⁴⁷This would put the Exodus at 2676 B.C. As it happens, some very mysterious things were going on in Egypt at that time. Those who wish to research this more thoroughly should look into the figure of the Pharaoh Peribsen, who suddenly imposed the worship of the dark god Set on the Egyptian people. Another thing to consider is that this was very close to 3100 B.C, a time of some sort of global disruption recorded in ice cores and tree rings. This date is different from the one proposed by Immanuel Velikovsky. The fact is, there was some sort of discontinuity of many ancient cultures which occurred at both these periods: 3100-2500 B.C. and 1600 B.C.

Q: (L) Was the earth knocked into a new orbital position because of this activity?

A: Yes.

Q: Is an event of this type going to take place in the not-too-distant future?

A: Maybe.

Q: (L) Did an event of this type take place at the time of the flood of Noah?

A: Yes.

Q: (L) How many years ago did the flood of Noah occur?

A: 12656. (10,662 B.C.)

Q: (L) Was Noah an actual historical person?

A: Close.

Q: (L) Was Noah the same person described in the Babylonian or Sumerian texts as Utnapishtim?⁴⁸

A: Close.

⁴⁸In the Sumerian poems he is a wise king and priest of Shurrupak; in the Akkadian sources he is a wise citizen of Shurrupak. He is the son of Ubara-Tutu, and his name is usually translated as “He Who Saw Life”. He is the protégé of the god Ea, by whose connivance he survives the flood, with his family and with ‘the seed of all living creatures’. Afterwards he is taken by the gods to live for ever at ‘the mouth of the rivers’ and given the epithet ‘Faraway’. His name means “he found life” (i.e. immortality). According to the Sumerians he lives in Dilmun where the sun rises. He is the main character of the Flood story in the eleventh table of the Gilgamesh epic. In an different version of this epic (such as the Atrachasis myth for instance) he is named Atrachasis, “the exceptional wise one”. Old Babylonian Utanapishtim, Sumerian Ziusudra. He shows many similarities with the much more recent biblical Noah.

Q: (L) Which is the older civilization: Sumerian or Egyptian?

A: Sumerian.

Q: (L) Who were Enlil⁴⁹ and Enki⁵⁰, the Annunaki⁵¹ of Sumerian stories?

⁴⁹In ancient Sumero-Babylonian myth, Enlil (“lord wind”) is the god of air, wind and storms. Enlil is the foremost god of the Mesopotamian pantheon, and is sometimes referred to as Kur-Gal (“great mountain”). In the Sumerian cosmology he was born of the union of An heaven, and Ki earth. These he separated, and he carried off the earth as his portion. In later times he supplanted Anu as chief god. His consort is Ninlil with whom he has five children: Nanna, Nerigal, Ningirsu, Ninurta, and Nisaba. Enlil holds possession of the Tablets of Destiny which gives him power over the entire cosmos and the affairs of man. He is sometimes friendly towards mankind, but can also be a stern and even cruel god who punishes man and sends forth disasters, such as the great Flood which wiped out humanity with the exception of Atrahasis. Enlil is portrayed wearing a crown with horns, symbol of his power. His most prestigious temple was in the city Nippur, and he was the patron of that city. His equivalent is the Akkadian god Ellil.

⁵⁰The Sumerian high god of water and intellect, creation, wisdom and medicine who could restore the dead to life. He was the source of all secret and magical knowledge of life and immortality. Enki possessed the secret of me, ‘culture, civilization’, which is the genius of progress in knowledge to lead humanity. He invented civilization for the people and assigned to each his destiny. He created order in the cosmos. He filled the rivers with fish. He invented the plough and the yoke so that farmers could till the earth with oxen. He made the grain grow. He is the father of all plants. In most myths his consort is Damkina, or Ninhursag, who gave him a daughter. Enki is depicted on a relief holding Zu, the storm-bird. His main cult center was Eridu in ancient Sumer, one of the first cities in the world. He was called Ea in Babylonian, King of Apsu.

⁵¹The Annunaki are described by Z. Sitchin as the “sons of An,” the Sumerian high God over all the other gods. He includes Enlil and Enki among them, though the facts may be somewhat confused. “Annunaku” was the Akkadian name for a group of gods of the underworld. They function as judges in the realm of the dead. Their counterparts are the Igigi (although in some texts the positions are reversed). The Annunaku show many similarities with the Sumerian Anunna. The Anunnaku are the offspring of Anu.

A: Great teachers.

Q: (L) Were they human or extraterrestrial?

A: Extraterrestrial.

Q: (L) Where did they come from?

A: Cassiopaea.

Q: (L) Was the human race genetically engineered to be slaves?

A: Yes.

Q: (L) And who were the genetic engineers of this slavehood?

A: Lizard beings.⁵²

⁵²Charles Fort, an obsessive collector of anomalous events, once remarked that the only conclusions he could draw from all his research, was that Earth was “owned” by some beings who we could neither see nor comprehend. Barbara Marciniak’s Pleiadians say, in *Bringers of the Dawn*:

“During Earth’s early history, there were wars in space for ownership of this planet. ...Skirmishes took place, and Earth became a place of duality. ...When this skirmish occurred, a certain group of entities fought in space and won the territory of Earth. These new owners did not want the native Earth species - the humans - to be informed of what took place. Uninformed, the species would be easier to control. This is why light is information and darkness is lack of information. ... These new owners who came here 300,000 years ago are the magnificent beings spoken of in your Bible, in the Babylonian and Sumerian tablets, and in texts all over the world. ...Who were these gods from ancient times? They were beings who were able to move reality and to command the spirits of nature to bend to their will. ...The creator gods who have been ruling this planet have the ability to become physical, though mostly they exist in other dimensions. They keep Earth in a certain vibrational frequency while they create emotional trauma to nourish themselves. ...In order to have you believe they were Gods with a big G, they rearranged you genetically. ...The gods who did this are magnificent space creatures. They can do many kinds of manipulations and work with realities in many different ways. ...Some of these creator gods married and merged their line... The creator gods would mix one kind with another to see what they could create. Remember,

they understood genetics, and all things were created by manifesting and using the life force and understanding how the life force works. ...Who are these beings... the Dark T-shirts? Be kind when you speak of the forces of darkness. Do not speak as if they are bad. Simply understand that they are uninformed, and they create systems that are uninformed because that is how they believe they must operate. They fought at one time and separated themselves from knowledge, so now they desperately hold onto their existing knowledge and onto life as they have evolved it into being. It is life based on fear, life that does not honor other life, life that uses other life. Who are these beings? They are the reptiles. These space beings are part human and part reptilian. We call them Lizzies because we like to make things a little less emotional and a little humorous so that you don't take them so seriously and get so upset. We are not here to frighten you - we are here to inform you....Creator gods take many forms, and they are not all Lizzies. There are creator gods who are insectlike. We Pleiadians are associated with the creator gods that are birdlike and reptilian. ...At one time, the birds and the reptiles worked together, and at other times they fought."

The Cassiopaeian perspective is slightly different from the Pleiadian perspective as the reader will soon see. However, there are many terms and concepts that are similar, if not identical.

From *The Two Babylons* by Alexander Hislop, which is a rant against Catholicism, which, in the process of demolishing he also manages to demolish Christianity altogether, though that was not his intent, we find the following:

"Baal-abirin signified The Winged One. ...Now, the understanding of this equivocal sense of Baal-aberin can alone explain the remarkable statement of Aristophanes, that at the beginning of the world, 'the birds were first created, and then after their creation, came the race of the blessed immortal gods. ...Let it only be borne in mind that 'the birds' - that is, the 'winged ones,' - symbolized 'the Lords of the mighty ones.' In the Polynesian story the heavens and earth are said to have been 'bound together with cords,' and the 'severing' of these cords is said to have been effected by myriads of 'dragon-flies,' which, with their 'wings,' bore an important share in the great work. The deified 'mighty ones' were often represented as winged serpents.... There is hardly a people or kindred on earth in whose mythology the overcoming of a vile, serpentine oppressor is not shadowed forth. The Greeks represented their great god Apollo as slaying the serpent Pytho, and Hercules as strangling serpents while yet in his cradle. In Egypt, in India, in Scandinavia, in Mexico, we find clear allusions to the same great truth. The evil genius of the adver-

Q: (L) Where do they come from: earth or another planet?

A: Other.

Q: (L) What planet from?

A: Qaddeera.⁵³

Q: (L) What star system is that in?

A: Zeta Reticuli.⁵⁴

Q: (L) Are the little gray beings from Zeta Reticuli also?

A: Yes.

Q: (L) Are the little gray beings...

A: Cybergentic.⁵⁵

Q: (L) Are they created by the lizards?

A: Yes.

saries of the Egyptian god Horus is frequently figured under the form of a snake, whose head he is seen piercing with a spear.”

All over the world, from time immemorial, gods have been represented with scales. Most analysts have interpreted this to be a symbolic representation of the “powers” of the gods. Or the “wisdom” of the serpent. But why a serpent would acquire any kind of cachet as wise simply does not compute in any way, shape or form. How do we explain the ubiquitous presence of a serpent race on earth? Perhaps it is because at one time, or at various times, and even still, they are present in our realm, but as hyperdimensional beings; the secret Control System that owns Earth.

⁵³I have never found anything that relates to this name.

⁵⁴A binary star system that is roughly 37 light years away from Earth. The aliens that abducted Betty and Barney Hill (See: “The Interrupted Journey” by Raymond Fowler) were calculated to come from a planet in this system, and Bob Lazar claimed that the nine UFOs he saw in S-4 came from one of the planets in the Zeta Reticuli star system.

⁵⁵Cyber - from a Greek word that means “to steer, navigate, direct,” and “genetic,” or creation. In other words, genetically engineered.

Q: (L) Do they have souls?

A: They are Decoys.

Q: (L) Are the Lizzies currently with us?

A: Near.

Q: (L) Are the Lizzies planning to take over our planet?

A: Yes.

Q: (L) Are they planning on landing and doing this openly?

A: Close.⁵⁶

Q: (L) Do they utilize such things as possession by dark energy forms to effect their control?

A: Yes.

Q: (L) What other groups are they in cahoots with?

A: Orions.

Q: (L) How many members are there in the Orion/Lizzie group?

A: 16.

Q: (L) Who are the good guys? You say the Cassiopaeans are the good guys. Who else?

A: Pleiadeans and many others.

Q: (L) How many?

A: 16.⁵⁷

⁵⁶Remember that “close” gets no cigar. It took us awhile to learn this and to go back to questions that had been answered this way to try and pin down exactly how close we were or were not!

⁵⁷This does not refer to individuals, but to distinct “groups” or “types” of “aliens.” It seems to me that there may be some “mystical” significance to

Q: (L) Are the sides equally balanced?

A: Yes.

Q: (L) Do the good guys abduct people?

A: No. They may contact and voluntarily transport.

Q: (L) Who really killed Abraham Lincoln?

A: Booth. Conspiracy.

Q: (L) Who was the head of the conspiracy?

A: Booth. But was not caught; was patsy stand in.

Q: (L) Was the story of Noah's flood the story of the breaking up of Atlantis?

A: Yes. But symbolic.

Q: (L) How many people were on the planet at that time?

A: 6 billion.

Q: (L) Out of this six billion people, how many survived?

A: 119 million. (or 19 million)⁵⁸

Q: (L) Was Noah's flood caused by the close passage of another celestial body?

A: Yes.

this number 16. It is, in fact, the exact number of pieces on a chess board, and the chess board has been the symbol of mystical reality for millennia. And the game of chess is played on a board with 64 squares which is 4 times 16. Broken down in another way, on the chessboard there are 8 "dominant" pieces and 8 pawns to each side and the number 8 will be seen to figure significantly as we go along. Keep spiders and scorpions in mind, for example.

⁵⁸I am not sure of this figure. The early tapes were destroyed, and the notes have the number both ways with a couple of cross-outs.

Q: (L) Which body was that?

A: Martek.

Q: (L) Do we know this body in our solar system now?

A: Yes.

Q: (L) What name?

A: Mars.

Q: (L) Was Martek an inhabited planet at that time?

A: No.

Q: (L) Did it have water or other features?

A: Yes.

Q: (L) When it passed close to the earth did it, in fact, overload our planet with water we did not have prior to that time?

A: Yes.

Q: (L) Did we, prior to that time, have a water-vapor canopy surrounding our planet?

A: Yes.

Q: (L) Was this the time of the major dying of the large dinosaurs?

A: Close.

Q: (L) What event transpired to kill off most of the dinosaurs?

A: Beasts.

Q: (L) What kind of beasts?

A: Mastodon, sabertooth tiger, giant sloth, etc.⁵⁹

⁵⁹Despite the range of possible theories over the years, scientists are now

Q: (L) Was it a cosmic event that brought about the death of some of the largest dinosaurs?

A: Yes.

Q: (L) It did not happen at the time of Noah, is that correct?

A: Yes.

Q: (L) Did it happen before the flood of Noah?

A: Yes.

Q: (L) How many thousands of years ago counting backward?

A: 27 million years ago.⁶⁰

virtually certain that the demise of the dinosaurs and thousands of other prehistoric plant and animal species was caused by the impact of a massive meteor on Earth some 65 million years ago. Around this date, dinosaur evidence first began disappearing from the fossil record. But, far from popular belief, all the dinosaurs and other species were not wiped out with a bang, but instead gradually disappeared as a result of the consequences of the impact over a long period of time, perhaps millions of years.

When the 10 kilometre-wide meteor struck, the explosive equivalent was larger than the capabilities of the world's entire nuclear arsenal. Molten lava, created by the Earth being crushed beneath the meteor, spewed out over the area for hundreds of kilometres. Tidal waves made the effect of the impact travel even further afield, destroying coastal and marine life in the vicinity. While significant, these events alone would probably not have wiped out entire species. But once the initial impact had died down, the major long term effects came into play. The atmosphere was filled with dust and microscopic debris which effectively blocked out the sunlight. The resulting death of plant life over time, and the plunging temperatures, radically altered the world's climate and hence the world's ecosystem. Based on the ocean floor samples, the researchers estimate that anything up to 70 percent of the planet's species were wiped out as a result of this prolonged and harsh winter. The main survivors of this scenario were those species adapted to life underground or in the oceans, or those that ate meat.

⁶⁰The accepted date of most scientists is 65 million years ago. However, after considerable study of the matter, we come to the idea that science may

Q: (L) What event took place at that time that caused the death of the dinosaurs?

A: Comet impact.

Q: (L) Did a comet actually strike the earth?

A: Yes.

Q: (L) Was it a large comet?

A: Yes.

Q: (L) How large?

A: 18 miles diameter.

Q: (L) Is there any regular periodicity or cycle to this comet business?

A: Yes.

Q: (L) What is the period?

A: 3600 years roughly.⁶¹

Q: (L) Was Velikovsky correct when he said Venus was on a 52 year orbit during a certain period in our history?

A: Close.

not be taking all things into consideration when setting up these dates. In particular, what is not being considered is the possibility that magnetic aberrations caused by ancient cataclysms might alter the isotopal imprints of matter. Electromagnetic surges could scramble the radiological dating, as well as other dating methods. These problems are discussed by some scientists, but they are generally not allowed to be heard in the mainstream journals.

⁶¹This is the same period suggested by Zecharia Sitchin for the “return” of the 10th planet. And, the fact is, there is evidence that possible cataclysmic type activity does occur on Earth at exactly such an interval based on analysis of ice core samples.

Q: (L) How many passes did Venus make through the solar system before it was precipitated into a regular planetary orbit?

A: 7

Q: (L) Where did Venus originally come from?

A: 19 light years away.

Q: (L) So, it is actually an extra-solar system visitor?

A: Yes.⁶²

Q: (L) Is it true that at regular intervals the sun radiates massive amounts of electromagnetic energy which then causes the planets of the solar system to interact with one another to a greater or lesser extent?⁶³

⁶²In 1967, a Russian space probe, Venera 4, and the American Mariner 5, arrived at Venus within a few hours of each other. Venera 4 was designed to allow an instrument package to land gently on the planet's surface via parachute. It ceased transmission of information in about 75 minutes when the temperature it read went above 500 degrees F. After considerable controversy, it was agreed that it still had 20 miles to go to reach the surface. The U.S. probe, Mariner 5, went around the dark side of Venus at a distance of about 6,000 miles. Again it detected no significant magnetic field but its radio signals passed to earth through Venus' atmosphere twice – once on the night side and once on the day side. The results are startling. Venus' atmosphere is nearly all carbon dioxide and must exert a pressure at the planet's surface of up to 100 times the earth's normal sea-level pressure of one atmosphere. Since the earth and Venus are about the same size, and were presumably formed at the same time by the same general process from the same mixture of chemical elements, one is faced with the question: which is the planet with the unusual history – Earth or Venus?

⁶³It was a theory of mine that the sun itself was responsible for the periodic cataclysms in the solar system; that it had major long period oscillations that were capable of so charging the bodies of the solar system with electrical energy that their mutual attraction or repulsion would cause them to interact with one another without the need for an "outside agent." I was pretty fond of this theory, too!

A: Other irregular pulsations determined by external vibrational events.

Q: (L) The sun is not the source of the periodicity of “dyings”, is that correct?

A: Sometimes. Many causes.

Q: (L) Well what is the cause that recurs like clockwork? Is there some cause that is a regular pulsation?⁶⁴

A: Cometary showers.

Q: (L) Where are these cometary showers from?

A: Clusters in own orbit.

Q: (L) Where is the orbit of these clusters? Is it the Oort cloud?⁶⁵

⁶⁴In one of the many books on the subject that I read about catastrophe theory, the story was told of the scientist who had compiled a list of all the extinct species and supposed times of their extinction and fed his data into a computer. He wanted to see if there was some biological pattern of dying out. The computer spit out rather disturbing results – not only is there a pattern, there is a very definite cycle! Some of these “Great Dyings” were more widespread and devastating than others, but it was unmistakably a regular pulsing of extinction! This is not, to put it mildly, a pleasant thought. Formerly extinctions were thought to occur because a lot of things just coincidentally got bad all at once. The idea that the Dyings are a regular, cyclic thing implies “a single, powerful, and awesome cause, recurring like clockwork.”

⁶⁵Once scientists had discovered that the Great Dyings occurred inexorably like clockwork, there was a lot of sweating going on to figure out when, where, how and why. What they came up with was this: Way outside the edges of our solar system there is a ring of comets which circles around and around like good little comets should. Supposedly these are bits of matter which did not have sufficient impetus to amass into a planet, or are remnants of a planet or planets which were broken up billions of years ago. Also, spinning around out there in our galaxy somewhere is a dark star which swings close to this little band of comets, (called the Oort Cloud), and the force of the Death Star’s gravity sends billions of them spinning through our solar system and, of course, a

A: No.

Q: (L) Where is the orbit of clusters of comets located?

A: More specific.

Q: (L) A specific orbit containing clusters of comets?

A: Yes.

Q: (L) Does this cluster of comets orbit around the sun?

A: Yes.

Q: (L) Is the orbit perpendicular to the plane of the ecliptic?

A: Yes and no.

Q: (L) Does this cluster come into the plane of the ecliptic and cause havoc in the solar system?

A: Exactly.

Q: (L) How often does this cluster of comets come into the plane of the ecliptic?

A: 3600 years.

Q: (L) Is this cluster of comets the remains of a planet?

A: No.

few of them smack into the earth. You will notice that this explanation does several important things. First, it maintains the steady state of our solar system - an outsider is the culprit. And, secondly, it makes the event chancy enough that we might escape if we are lucky. Based upon the dating of the extinct specimens, it is said that this event occurs once every 26 million years, or so - give, or take a day. And, curiously, this happens to be very close to the period of time in the past that the Cassiopaeans have assigned to the death of the dinosaurs.

Q: (L) Is the cluster of fragments in between the orbits of Mars and Jupiter the remains of a planet?

A: Yes.

Q: (L) What was that planet known as?

A: Kantek.

Q: (L) When did that planet break apart into the asteroid belt.

A: 79 thousand years ago approximately.

Q: (L) What body were the Sumerians talking about when they described the Planet of the crossing or Nibiru?

A: Comets.

Q: (L) This body of comets?

A: Yes.

Q: (L) Does this cluster of comets appear to be a single body?

A: Yes.

Q: (L) Is this the same object that is rumored to be on its way here at the present time?

A: Yes.

Q: (L) Who were the Annunaki?

A: Aliens.

Q: (L) Where were they from?

A: Zeta Reticuli.

Q: (L) Do they come here every time the comet cluster is approaching to sap the souls energy created by the fear, chaos and so forth?

A: Yes.

Q: (L) The two events are loosely interrelated?

A: Yes.

Q: (L) Is that why they are here now?

A: Close.

Q: (L) Is there a large fleet of space-ships riding a wave, so to speak, approaching our planet?⁶⁶

A: Yes.

Q: (L) Where are these ships from?

A: Zeta Reticuli.

Q: (L) When will they arrive?

A: 1 month to 18 years.⁶⁷

Q: (L) How can there be such a vast discrepancy in the time?

A: This is such a huge fleet that space/time warping is irregular and difficult to determine as you measure time.

Q: (L) Are these craft riding a “wave” of some sort?

A: Yes.

Q: (L) How many planets are in our solar system?

⁶⁶I asked this question because this was a phrase used by an abductee in a hypnosis session I conducted.

⁶⁷Note that this is the same period given for the window of “space wars.” On the other hand, the period given for the completion of a certain program having to do with readying a new prototype being in terms of the “creation of a new race,” in the first session, was given as 13 years. So, it is possible that, if these ideas are at all valid, there will be a period of 5 years when we are rockin’ and rollin’ here on the Big Blue Marble.

A: 12

Q: (L) Could you tell us the names of all the planets, their distances from the sun, the chemical composition, and the diameter.

A:

- Mercury=Opatanar, 36 million miles from Sun; 3000 mi. diameter.
- Venus=Pemuntar, 67 million miles from Sun; 7,500 mi. diameter.
- Earth=Saras, 93 million miles from Sun; 7,900 mi. diameter.
- Mars=Masar, 141,500,000 miles from Sun; 4,200 mi. diameter.
- Jupiter=Yontar, 483,400,000 miles from Sun; 88,700 diameter.
- Saturn=Zendar, 886,700,000 miles from Sun; 74,500 diameter.
- Uranus=Lonoponor, 1,782,700,000 miles from Sun; 31,566 diameter.
- Neptune=Jinoar, 2,794,300,000 miles from Sun; 30,199 diameter.
- Pluto=Opikimanaras, 3,666,100,000 miles from Sun; 1,864 diameter.
- NI=Montonanas, 570,000,000,000 miles from Sun; solid matter; 7000 miles diameter.
- NII=Suvurutarcar, 830,000,000,000 miles from Sun; 18000 miles diameter; hydrogen, ammonia.

- NIII=Bikalamanar, 1,600,000,000,000 miles from Sun; 46000 miles diameter; hydrogen, ammonia.

END OF SESSION

2.6 October 5, 1994

October 5, 1994 Frank and Laura

Q: Hello.

A: You are good to do it this way without ritual.

Q: (L) What ritual do you want us to do?

A: None.

Q: (L) Does ritual enhance or prevent communication?

A: Constricts.

Q: (L) What is your name?

A: Donarra.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Why is it every time we communicate with you Casiopaeans we get a different person?

A: Energy disbursement.

Q: (L) Who is the energy disbursed to?

A: The next in order.

Q: (L) Does that mean that you utilize our energy to disburse?

A: No. We disburse.

Q: (L) We have a series of questions we want to ask.

A: Go ahead.

Q: (L) Assuming there is a fleet of spacecraft riding a wave, and approaching from the vicinity of Zeta Reticuli, what does it mean to say that the space time warp is indefinite in terms of arrival? Why is this? Please specify.

A: Mass affects electromagnetic transfer within gravity wave.

Q: (L) In other words, if there is a large mass you are trying to transfer, is the problem partly because the mass itself spreads out over such a large area of space/time and must be transferred in stages or something along that line?

A: Close.

Q: (L) Can you help us out anymore here?

A: Mass affects time cycle: small equal short cycle; large or dense equals long cycle.

Q: (L) We would also like to have more information on earth changes. Is the Japanese earthquake that just happened as you predicted last week, the last of the Japanese problem? {An entire session had been lost due to tape malfunction. It consisted in part of a prediction of an almost immediate Japanese earthquake which did occur exactly as predicted.}

A: No.

Q: (L) Can you give us more on that...

A: There will be activity about 8.9: 67 miles off Osaka coast; 9.7: central Tokyo.

Q: (L) Are all of these going to happen within this year?

A: No. Within 16 years.

Q: (L) I would like more details about the man you say is the biological father of Jesus. Once again, what is his name?

A: Tonatha.

Q: (L) You said he was an acquaintance of Mary's?

A: Yes.

Q: (L) Was he selected for some reason to be the biological father of Jesus by other beings or powers.

A: Close.

Q: (L) Can you give us any details about him. What was his lineage, where did he come from, etc.

A: He was a member of the White Sect.

Q: (L) What is the White Sect?

A: AKA Aryans. Andarans.

{We didn't as who were the Andarans, though it did come up again in a later session.}

Q: (L) Was Mary a member of the Essene group?

A: Yes.

Q: (L) Was this man also a member of the Essenes?

A: No.

Q: (L) This person, Tonatha, was chosen to be the biological father of Jesus?

A: Yes.

{Note that the answer here is a “yes,” while the previous similar question that was qualified by “other beings or powers” was “close.”}

Q: (L) Why did Mary not marry him?

A: Feelings were extremely transient.

Q: (L) You are saying she was fickle?

A: No. Influenced by telepathic suggestion.

Q: (L) Was she already betrothed at this time?

A: No. Hypnotized level 1.

{This term, “Level 1” comes up over and over again throughout the text when a “predestined mission” is being discussed. So, we might assume that “hypnotized level 1” refers to behavior that is simply driven from the inner self with, perhaps, no conscious understanding of why one is being so driven.}

Q: (L) Did Mary and Joseph, once together, subsequently have other children?

A: No. But Jesus did.

Q: (L) Jesus had children? Who was he married to?

A: Was not.

Q: (L) You mean he had illegitimate children?

A: Subjective institutionally.

Q: (L) Who was the mother of these children?

A: There were three women.

Q: (L) There were three women?

A: Yes.

Q: (L) Are they mentioned in the Bible?

A: One is but not by name.

Q: (L) Who was one of them?

A: Alicia.

Q: (L) What was the name of the second one?

A: Rafea.

Q: (L) The third one?

A: Vella. Romans.

Q: (L) All three of them were Romans?

A: Yes.

Q: (L) And what happened to the children?

A: Survived and multiplied fruitfully.

Q: (L) How many children were there from the three mothers?

A: Three.

Q: (L) Is that, as some people claim, the true meaning of the search for the Holy Grail, that it is not a cup but the “Sang Real”, or holy blood line?

{See “Holy Blood, Holy Grail.” by Lincoln, Leigh and Baigent.}

A: Yes.

Q: (L) Are there any descendants of Jesus living today?

A: 364,142.

Q: (L) Was Jesus Christed in the sense of having some special mantle of power falling over him at the time of his baptism?

A: Nearly correct.

Q: (L) Is Guyana a relatively safe place in terms of earth crustal movements, earth changes, etc?

A: What is? Earth includes all planet surface.

Q: (L) Are there any places that are going to be safer than others?

A: Changeable.

Q: (L) Is the North Caroline/Blue Ridge Mountain area relatively safe?

A: What did I just tell you? Depends on vibrational frequency changes. No specific earth changes are accurately predictable until near event.

{This is an important clue that suggests that by changing the vibrational frequency of either ourselves or our planet, or both, that cataclysms can be mitigated.}

Q: (LM) Ask what happened to those people that just died in Switzerland that were talked about on the news. Were they murdered? {As we were conducting the session, my ex-husband was watching the 11 o'clock news and the story about the Solar Temple Cult suicide was aired. He came in to ask us to ask the Cassiopaeans what was really behind it since the story was just breaking and there were no details.}

A: Pact. Agreement. Covenant.

Q: (L) They all made a pact to commit suicide together?

A: Yes.

Q: (L) Why? How many were there?

A: 48. Religious zealously.

Q: (L) Did the United States government deliberately murder the Branch Davidians at Waco?

A: Close. Led them to destroy themselves.

Q: (L) How?

A: Psychological warfare tactics.

Q: (L) Did the US government set their compound on fire?

A: No.

Q: (L) Who set the compound on fire?

A: Branch Davidians. Drove them crazy.

Q: (L) Were ELF or subliminals used?

A: Yes. As well as other means.

Q: (L) Did OJ Simpson kill his wife?

A: Yes.

{Well, that was a hit, but a lot of people were already thinking that O.J. would beat the charges.}

Q: (L) Did he take the murder clothes and weapon to Chicago and leave it there in a bag as some people are saying?

A: No.

Q: (L) Where is it?

A: LA dump. One of them.

Q: (L) What gifts did the magi/prophets bring to Jesus as a baby?

A: Gold; spices; clothing.

Q: (L) What other realm did the mother ship come from that was sighted by the magi?

A: 5th density.

Q: (L) And what was the purpose of the appearance of this mother ship at the time of the birth of Jesus?

A: Too vague.

Q: (L) Was it here for specific purposes relating to the birth of Jesus?

A: To lead the prophets.

Q: (L) Was that the main purpose?

A: No. Also observation of event and encoding.

Q: (L) Encoding of what?

A: Infant.

Q: (L) Was that encoding done physically or telepathically?

A: Both.

Q: (L) What realm or area did Jesus come from before he was born into the earth in the body of Jesus of Nazareth?

A: 5th density.

Q: (L) He was a fifth density soul?

A: Yes.

Q: (L) Had he had any other incarnations in other human bodies on planet earth?

A: Yes.

Q: (L) How many incarnations did he have before he achieved fifth density?

A: 1009.

Q: (L) Was Melchizidek an incarnation of Jesus?

A: No.

Q: (L) Was Joshua, the right hand man of Moses an incarnation of Jesus?

A: Yes.

Q: (L) Are there any other incarnations of Jesus with which we would be familiar if you were to name them?

A: Yes. Socrates.

Q: (L) What was the spiritual relationship of Jesus to John the Baptist?

A: Pact.

Q: (L) What was the spiritual relationship of Jesus to Mary, his mother?

A: Pact.

Q: (L) There was no other spiritual relationship in the sense of being combined souls? {I had read where another channeled source suggested that Jesus, John the Baptist and Jesus' mother, Mary, were all parts of a single soul that was too "immense" to incarnate in a single individual.}

A: No.

Q: (L) Were either Mary or John the Baptist fifth density souls?

A: Both.

Q: (L) Are there any fifth density souls on the earth today or any of recent times we would recognize?

A: Yes. Arafat. Sadat. Pope John V.

Q: (L) Do demons and evil spirits fear anything?

A: Yes.

Q: (L) Do they fear any power that we, as humans, possess?

A: Yes. Knowledge.

Q: (L) Do they fear religious symbols, signs or figures?

A: No.

Q: (L) Is there any name or sign or symbol that can halt their activity?

A: Sometimes.

{It is curious that the Cassiopaeans have said that “demons” do not “fear” religious symbols, signs or figures, but that there may be some name, sign or symbol that can halt their activity! A most interesting clue.}

Q: (L) Were they afraid of Christ?

A: Yes. Because of his knowledge. The mass of his knowledge raised his vibrations. Knowledge is truly power.

Q: (L) Do pentagrams have any effect in slowing down or halting negative entities?

A: Only if you think they do.

Q: (L) Is the greatest power we have to resist demonic entities held in our free will: our power to say no?

A: No.

Q: (L) What is our greatest power?

A: Knowledge.

Q: (L) Does the accumulation of spiritual knowledge hold the key?

A: Yes.

Q: (L) Is there any other clue you can give us?

A: You do not need anything else than knowledge.

Q: (L) You said the Exodus occurred in 2676 B.C., is that correct?

A: Close.

Q: (L) Was that the last passage of the cometary Venus?

A: Yes.

Q: (L) Was this activity of Venus interactive with the close passing of the cluster of comets you have mentioned?

A: Close. One of three cataclysms close together.

Q: (L) If Venus was one of the cataclysms and the cluster of comets was another, what was the third?

A: Mars.

Q: (L) Was Mars knocked out of it's orbit by Venus?

A: Yes.

Q: (L) And the two appeared to do battle in the sky to the inhabitants of the Earth as Velikovsky described, is that correct?

A: Close.

Q: (L) Now, this cluster of comets, when was the last time it came into the solar system?

A: 3582 yrs ago?

Q: (L) What is the cycle?

A: 3600 yrs.

Q: (L) So, when is this cluster expected to hit the plane of the ecliptic again?

A: 12 to 18 years.

Q: (L) Are the aliens traveling with this cluster of comets?

A: No.

Q: (L) What land did Noah/Utnapishtim live in, what continent?

A: Atlantis.

Q: (L) Where did the ark land after the receding of the waters?

A: Egypt.

Q: (L) What caused Martek to pass close to the earth at that time since that was many thousands of years before the Venus interaction?

A: Planetary alignment gravitational aberration related to Venus.

Q: (L) So, there was a planetary line-up that caused Mars to be pulled out of its orbit?

A: Yes.

Q: (L) What was the event a hundred or so years after the flood of Noah that was described as the confusing of languages, or the tower of Babel?

A: Spiritual confluence.

Q: (L) What purpose did the individuals who came together to build the tower intend for said tower?

A: Electromagnetic concentration of all gravity waves.

Q: (L) And what did they intend to do with these concentrated waves?

A: Mind alteration of masses.

Q: (L) What intention did they have in altering the mind of the masses?

A: Spiritual unification of the masses.

Q: (L) Who were the “gods” that looked down on the tower of Babel, at those who were building it with the intention of unification, and decided to destroy their works?

A: Lizards.

Q: (L) Okay, so the Lizzies blew up the tower of Babel. What else did they do to the minds of mankind; did they do something causing literal disruption of their understanding of language?

A: Close.

Q: (L) What tool did they use to accomplish this divisiveness?

A: Brainwashing of masses.

Q: (L) Did they do this through implants and abduction?

A: Partly.

Q: (L) What is the true meaning, the original meaning, of the Hebrew word “shem”?

A: Purity.

Q: (L) Why was this word related to the obelisks or standing stones later called “shems” by the Hebrews?

A: Symbolic of purity: unification. Uniformity.

Q: (L) Did these stones themselves actually possess any power?

A: Residual.

Q: (L) What object were the ancients going to place in the tower of Babel to...

A: Crystal.

Q: (L) Is “shem” also synonymous with “crystal”?

A: Close.

Q: (L) Shem, the son of Noah, was the ancestor of the group that built the tower, is this correct?

A: Yes.

{Z. Sitchen writes: The Mesopotamian texts that refer to the inner enclosures of temples, or to the heavenly journeys of the gods, or even to instances where mortals ascended to the heavens, employ the Sumerian term mu or its Semitic derivatives shu-mu (“that shich is a mu”), sham, or shem. Because the term also connoted “that by which one is remembered,” the word has come to be taken as meaning “name.” But the universal application of “name” to early texts that spoke of an object used in flying has obscured the true meaning of the ancient records. Thus G.A. Barton (The Royal Inscriptions of Sumer and Akkad) established the unchallenged translation of Gudea’s temple inscription - that “Its MU shall hug the lands from horizon to horizon” - that “Its name shall fill the lands.” A hymn to Ishkur, extolling his “ray-emitting MU” that could attain the heights of Heave, was likewise rendered: “Thy name is radiant, it reaches Heaven’s zenith.” Sensing, however, that mu or shem may mean an object and not “name,” some scholars have treated the term as a suffix or grammatical phenomenon not requiring translation and have thereby avoided the issue altogether. It is not too difficult to trace the etymology of the term, and the route by which the “sky chamber” assumed the meaning of

“name.” Sculptures have been found that show a god inside a rocket-shaped chamber, as in this object of extreme antiquity [...] where the celestial nature of the chamber is attested by the twelve gloves decorating it. Many seals similarly depict a god (and sometimes tow) within such oval “divine chambers”; in most instances these gods within their sacred ovals were depicted as objects of veneration. ...The ancient peoples developed the custom of setting up imitations of the god within his divine “sky chamber.” Stone pillars shaped to simulate the oval vehicle were erected at selected sites... That the purpose of the commemorative stone pillars was to simulate a fiery skyship can further be gleaned from the term by which such stone stelae were known in antiquity. The Sumerians called them NA.RU (“stones that rise”). The Akkadians, Babylonians, and Assyrians called them naru (“objects that give off light”). The Amurru called them nuras (“fiery objects” - in Hebrew, ner still means a pillar that emits light...). “The 12th Planet,” Avon Books, New York, 1978. So, we see where Sitchin is going: a shem is a rocket ship. Never mind the fact that the descriptions in the ancient writings fit much better with the Cassiopaeian explanation.}

Q: (L) How were Sodom and Gomorrah destroyed and the other cities of the plain? And by whom?

A: Nuclear; EM pulse. Who else?

Q: (L) The lizzies?

A: Yes.

Q: (L) Why?

A: To implant fear and obedience.

Q: (L) Weren't the Sodom and Gomorran really evil and bad doing sodomy and Gomorrah? {Well, the word Sodom has been used to coin the word “sodomy,” so why not Gomorrah? I have

NO idea what it might be, so the reader can use their imagination.}

A: That is a deception of history.

Q: (L) Did Lot's wife get turned into a pillar of salt?

A: No.

Q: (L) Is there any symbolism in that particular story for us today?

A: No.

Q: (L) Was the god who communicated with Abraham one of the Lizzies?

A: Yes.

Q: (L) Was the pact that Abraham made with the Lizzies?

A: Yes. Not directly.

Q: (L) Was Melchizidek a priest of the Lizzies?

A: No.

Q: (L) Did Melchizidek give Abraham the true information?

A: Close.

Q: (L) Is the Kaballah the true teachings of the good guys?

A: Close.

Q: (L) Is the Osirian cycle the exemplification of the action of the Lizzies upon mankind in terms of the cutting up of Osiris' body as the breaking apart of the strands of DNA?

A: Close.

Q: (L) What was the Fruit of the tree of Knowledge of Good and Evil that was supposedly eaten by Eve and then offered to Adam?

A: Knowledge restriction. Encoding.

Q: (L) What did it mean when it said Eve ate of the fruit of the tree of knowledge? What act did she perform to do that?

A: Consorted with wrong side.

Q: (L) What does consorted mean?

A: Eve is symbolic.

Q: (L) Symbolic of what?

A: Female energy.

Q: (L) The female energy did what when it consorted?

A: Lost some knowledge and power.

Q: (L) Why was the eating of the fruit of this tree called knowledge of good and evil feared by god or gods to enable Eve to be equated with gods?

A: What? Clarify please.

Q: (L) Who was the god that feared that the eating of this fruit would make Eve equal to him or them?

A: No. {They were right. I had the trees confused.}

Q: (L) The Bible says that these gods said that they were afraid that man would now take hold of the fruit of the tree of life and live forever. What does this mean? Why did the eating of this fruit make god afraid?

A: Did not.

Q: (L) What was the fruit of the tree of life?

A: Limitation.

Q: (L) How can the fruit of the tree of eternal life be limitation?

A: Conceptually limited.

Q: (L) I want you to know that this does not make a whole lot of sense.

A: Yes it does. Think carefully.

Q: (L) Was the god who walked in the garden who warned Adam and Eve not to eat of the fruit of the tree of knowledge of good and evil, was that the original creator god? i.e.

the good guy?

A: No.

Q: (L) Who was that god who ordered them not to eat of this tree?

A: Complicated. Laura you are missing the obvious.

Q: (L) In what sense would the fruit of the tree of life be limiting?

A: Believing that one source contains all knowledge is contradicting reality.

Q: (L) What was the flaming sword barring re-entry to Eden?

A: Do you not understand?

Q: (L) No I do not understand.

A: Review. If the concept was the eating of the fruit of the tree of knowledge provides all knowledge, then one is being deceived, because no one particular source can provide all knowledge. Therefore, when one believes in the deception, one has now trapped oneself within parameters. And, forevermore, the human race, will be poisoned by the very same problem which is reflected in several different ways: one is always seeking

the truth through one pathway instead of seeking it through a myriad of pathways; and also believing in simplistic answers to very complex issues and questions.

Q: (L) What was the flaming sword barring re-entry into the garden of Eden?

A: Symbolizes trap.

Q: (L) A self-imposed flaming sword?

A: Yes.

Q: (L) Where was Eden?

A: Earth.

Q: (L) The entire earth was Eden?

A: Yes.

Q: (L) Was the “fall” in Eden, or the loss of the Edenic state, also accompanied by a cataclysm?

A: Yes.

Q: (L) What was the nature of that cataclysm?

A: Comets.

Q: (L) The cluster you have mentioned before?

A: Yes.

Q: (L) And, how long ago did this occur?

A: 309882 years ago.

Q: (L) Was the loss of the Edenic state also accompanied by a takeover of mankind by the Lizzies?

A: Yes.

Q: (L) Who were the original creator gods?

A: Us. Sixth Density.

Q: (L) The Cassiopaeans? Were the Pleiadeans also the original creator gods?

A: Same. Sixth Density.

{Note that the Cassiopaeans do not claim to be THE creator gods, but that it is a function of 6th density.}

Q: (L) What was the true identity of the serpent in Eden?

A: Lizards.

Q: (L) Who built the great pyramid?

A: Atlanteans.

Q: (L) What year was it built?

A: 10643 years ago.

Q: (L) Why was it built? What purpose was it used for?

A: Capture cosmic energy.

Q: (L) And what was this cosmic energy used for once it was captured?

A: Many things. Power, transport, healing, mind control, climate, et cetera.

Q: (L) Who built the sphinx?

A: Same.

Q: (L) Was the sphinx built at the same time?

A: Yes.

Q: (L) Why was the sphinx built? What was its purpose?

A: Temple.

Q: (L) Are there records buried under the sphinx?

A: Yes.

Q: (L) What happened to Neanderthal man?

A: Removed by Lizzies to other planets.

Q: (L) Is that removed as in taken off the planet physically?

A: Yes.

Q: (L) What planet were they taken to?

A: Others.

Q: (L) Of the several places around this country that we have thought about moving, which one would we be happiest in?

A: Indefinite.

Q: (L) Would we be happy in the Blue Mountains in Oregon.

A: Not determinable.

Q: (L) Shouldn't you be able to give prophetic insights? {I was still stuck on the idea that a truly "valid" source would just give reams of prophecies that would come true. But, as we shall see, any source that does so as a "habit" is doomed to failure because of the probabilistic nature of reality. The future is not absolutely fixed! And therefore, only probabilities can be given, and then, only just before the event. However, the cyclical nature of "time" does give us a field of probabilities, and we were learning gradually of what this field consisted.}

A: Too many variables in this matter.

END OF SESSION

2.7 October 7, 1994

Frank and Laura

Q: Hello.

A: Hello.

Q: (L) What's your name?

A: Bayreera.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Are you the next in line for the energy disbursement?

A: Precisely. You are learning well.

Q: (L) Are you disbursing the energy to us?

A: No.

Q: (L) Are we giving energy to you?

A: Near. Our disbursement is akin to taking turns.

Q: (L) Is there an advantage to taking turns as opposed to having one communicant?

A: Yes.

Q: (L) What is the advantage?

A: Energy equalization.

Q: (L) Is it difficult for you to make contact with us?

A: No.

Q: (L) Would it be difficult for you to make contact with others?

A: Becoming easier with you.

Q: (L) I would like to know the time of the great dying of the major dinosaurs, the big critters?

A: 27 million years as measured by your scale.

Q: (L) Regarding the “Fall” in Eden and the loss of the Edenic state, how long ago did that happen?

A: 309000 years ago approx.

Q: (L) What was the situation... what happened... what was the state of mankind?

A: Loss of faith caused knowledge and physical restrictions by outside forces.

Q: (L) What did the snake or the “tempter” represent?

A: Forces known to you as Lizzies; we have already taught you this.

Q: (L) I am just checking!

A: Faith dear.

Q: (L) I’m having faith, I’m just checking.

A: Suit yourself.

Q: (L) Who were the original creators of the human race?

A: Us.

Q: (L) The Cassiopaeans, correct?

A: Yes.

Q: (L) For what purpose did you create us? Was it a mandate from God?

A: Soul development or advancement.

Q: (L) The Sumerian story of the creation of human beings involves a story where they say they killed a god and mixed his blood and parts to mix with mud and then planted it in these female “gestation” goddesses and that this is where the human race came from. Now, this sounds an awful lot like what the “Grays” are doing at the present time. Did someone actually kill a “god”, break his soul in pieces, and thereby make the human race?

A: Symbolism and not correct event sequence.

Q: (L) What was that story about? What was the real seed event?

A: Lizard beings genetically altering the human race after battle for their own feeding purposes.

Q: (L) When did these events that these Sumerian stories are talking about take place?

A: 309000 years ago, approx.

Q: (L) So, it happened so long ago that these stories have lost the truth?

A: Reflection passed down through psychic memory channel.

Q: (L) What killed off the major dinosaurs?

A: Comet impact.

Q: (L) What was the source of this comet?

A: Cluster.

Q: (L) How long has this comet cluster been with us in our solar system?

A: 890 million years.

Q: (L) What was the origin of this comet cluster? Was it originally a large planet?

A: No.

Q: (L) You said the other night that there was a planet between Mars and Jupiter that was destroyed and became the asteroid belt. Was this planet ever inhabited by sentient beings?

A: Yes.

Q: (L) What caused this planet to be destroyed?

A: Psychic energy.

Q: (L) And where did the beings come from that lived on this planet? Did they evolve there?

A: No.

Q: (L) Were they also, like us, created beings?

A: Yes.

Q: (L) Who created them?

A: Same.

Q: (L) The Cassiopaeans?

A: Yes.

Q: (L) Okay, who created the Cassiopaeans?

A: Your super ancient spiritual ancestors.

Q: (L) Do these beings have a name?

A: No.

Q: (L) What are they called?

A: Transient Passengers.

Q: (L) Where are these “Transient Passengers” From?

A: Too difficult to explain on this medium; lengthy.

Q: (L) What is the closest you know to the original God/Creator force?

A: Seek other media. Computer.

Q: (L) This cluster of comets that you talk about that caused an impact, did one of the cluster impact the earth at the time of the dinosaur dyings?

A: No one was large enough for event.

Q: (L) Was it some of these comets in the cluster that hit the earth?

A: Yes. 14 hit at that occasion.

Q: (L) Does this cluster of comets orbit around the Sun?

A: Yes. Your government already knows they’re coming close again.

Q: (L) You said that the orbit is around the Sun. Where does it enter the plane of the ecliptic?

A: Varies.

Q: (L) Does it enter between Mars and Jupiter, for example?

A: Sometimes.

Q: (L) Is the orbit perpendicular to the plane of the ecliptic? Or is it at an angle?

A: In between.

Q: (L) What degrees of angle does it intersect the plane of the ecliptic?

A: Not correct idea structure. Picture a spirograph.

Q: (L) Do the comets orbit around themselves. Do they have a sort of axis?

A: No.

Q: (L) How many are in this cluster?

A: Varies.

Q: (L) Do they lose or pick any up from time to time?

A: Yes.

Q: (L) How big is the biggest one at this time?

A: 900 miles diameter. Spirograph.

Q: (L) The planet that was destroyed between Jupiter and Mars, you said was destroyed by psychic energy?

A: Yes.

Q: (L) What was the source of this psychic energy?

A: Beings inhabiting the planet.

Q: (L) Do beings in this area of the galaxy just sort of destroy their planets from time to time? Is this getting to be a habit?

A: Close. Has been.

Q: (L) Did any of those beings leave that planet and come to earth?

A: Yes.

Q: (L) Who were they? Were they humans like us?

A: Blond and blue eyed descendants.

Q: (L) Was that a colder planet?

A: No.

Q: (L) Was that planet much like earth?

A: Yes.

A: Blue eyes. Eye pigment was because planet was farther from Sol.

Q: (L) How did the people of that planet come to earth? Did they know it was going to be destroyed?

A: Some knew and were taken by Lizzies and they are the An-nunaki.

Q: (L) Now, you say that the father of Jesus was an Aryan. Where did he come from?

A: Palestine.

Q: (L) What is the origin of the Aryan race?

A: 5th planet now know as asteroid belt.1

Q: (L) When did they come to earth?

A: 80 thousand years ago? Difficult for us to use your measuring system.

Q: (L) Were they similar in form and structure to what they are now?

A: Yes.

Q: (L) Why is it that our scientists have not been able to uncover evidence of such ancient existence?

A: They have. Do not want to acknowledge it.

Q: (L) Where do the Celts come from?

A: Same. Ferocious people. Came from fifth planet.

Q: (L) When was that planet destroyed?

A: 80 thousand years ago.

Q: (L) Were any of the descendants of Jesus famous individuals that we would know.

A: Yes. Yassar Arafat. Churchill.

Q: (L) You said that the Exodus occurred in 2676; is that B.C. or years ago?

A: B.C.

Q: (L) If the Exodus occurred in 2676 B.C., that is 4,670 years ago more or less, this would mean that this was not related to the comet cluster which came in 1588 B.C.

A: Correct.

Q: (L) Then, the comet cluster came by 8,788 B.C., is that correct?

A: Close enough.

Q: (L) Was there any historical cataclysm recorded in history that we could relate to that passing?

A: No.

Q: (L) And Noah's flood occurred 12,388 B.C., is that correct?

A: Close.

Q: (L) Now, the time of the passage of Venus was the time of the Exodus, is that correct? Was Venus a result of this cluster of comets?

A: Semi-stimulated by gravitational pull.

Q: (L) Venus was stimulated by the gravitational pull?

A: Attracted.

Q: (L) Venus was drawn into the solar system by the gravitational pull of the cluster of comets?

A: Yes.

Q: (L) Where did Venus get all its gases and clouds and so forth? What was its origin? Where did it get all this stuff?

A: Collected during fiery, friction filled journey and space matter in general.

Q: (L) Where was Venus originally from?

A: Ancient wanderer from near Arcturus.

Q: (L) What are Mars' moons?

A: Disguised bases.

Q: (L) Who built them?

A: Who else? The Lizzies.

Q: (L) The film I saw at Andy's house, the Mars landing, was that an actual film of a Mars landing?

A: False.

Q: (L) Has there been a landing on Mars by the United States?

A: No.

Q: (L) Is Al Bielek a phony?2

A: Semi.

Q: (L) Did he work on the Philadelphia project?

A: No.

Q: (L) Was he brainwashed to have fake outrageous memories?

A: No.

Q: (L) Is he lying deliberately?

A: Instructed by government for disinformation dissemination.

Q: (L) Did a space-craft of the Lizzies piloted by the Grays crash in Roswell?

A: Yes.

Q: (L) What caused the crash?

A: Ionization.

Q: (L) Were the bodies and the craft recovered by the United States Government?

A: Yes.

Q: (L) Are the Majestic 12 documents...

A: Semi-factual.

Q: (L) Were they dummied up?

A: Near.

Q: (L) Who did this and why?

A: To leak information and disinformation. Many were involved. ONI and CIA.

Q: (L) Is the information in the book "Majestic", by Whitley Strieber factual?

A: Semi-factual. There are many glaring falsehoods.

Q: (L) What is the source of the Native American Indians?

A: Asia.

Q: (L) Across the Bering Strait?

A: No. Rescued. Transferred.

Q: (L) By whom?

A: Grays.

Q: (L) What were they rescued out of?

A: Cataclysm.

Q: (L) When did that cataclysm occur?

A: 7200 years ago approx.

Q: (L) What was the nature of that cataclysm?

A: Comets.

Q: (L) Where do the Basques come from?

A: Atlantis.

Q: (L) Is their language the Atlantean language?

A: Derivative.

Q: (L) Which came first, the Sumerians or the Egyptians.

A: Sumerians.

Q: (L) Where did the Egyptians come from?

A: Atlantis.

Q: (L) Which came first, the Sumerians or Atlanteans?

A: Atlanteans.

Q: (L) Were the Sumerians a high civilization at the same time the Atlanteans were?

A: After.

Q: (L) Did the Atlanteans go to Sumeria and afterwards go to Egypt?

A: Traveled.

Q: (L) The Atlanteans traveled to Sumeria?

A: Yes.

Q: (L) Did they set up outposts in Sumeria?

A: Yes.

Q: (L) Then did the main Atlanteans move to Egypt when Atlantis was destroyed?

A: Yes. And elsewhere.

Q: (L) Where else did the Atlanteans go?

A: Americas. Inca. Aztec. Maya. Hopi Tribe. Pima tribe.

Q: (L) When the Jews were dispersed, did some of them come to America?

A: A few.

Q: (L) Who was the angel who communicated with the Prophet Daniel?

A: Us.

Q: (L) Who gave John Revelation?

A: The Lizzies.³

Q: (L) Who did Paul encounter on the road to Damascus.

A: Spirit of the 6th density.

Q: (L) If the Revelations are from the “bad” guys, are they an accurate portrayal of the end times?

A: Close.

Q: (L) What was the source of the prophecies of Isaiah?

A: Fiction.

Q: (L) What was the source of the so-called Cassiopaeans when Candy was present? Was that you guys?

A: Mixed.⁴

Q: (L) Does Jupiter have a solid core?

A: Yes.

Q: (L) Was Zecharia Sitchen correct in his naming of the planets?

A: No.

Q: (L) Was the interpretation I gave to it more correct.

A: Better but needs help.

Q: (L) True meaning of the word “Shem”?⁵

A: Purity.

Q: (L) What language is the root of this word found in?

A: Atlantean. Hebrew.

Q: (L) Where did the Jews come from?

A: Atlantis.

Q: (L) Who was Yahweh.

A: Fictional being.

Q: (L) Who was the god that spoke to Moses on the mount?

A: Audible projection of Lizards.

Q: (L) Did Moses at any time realize that he had been duped by the Lizzies?

A: No.

Q: (L) Yet, the other night you said that Moses is also doing work with Christ on another plane, is that correct?

A: Yes.

Q: (L) Well, if he was misled by the Lizzies, how did he get to be a good guy?

A: Taught afterward.6

Q: (L) After what?

A: Plane transfer.

Q: (L) Did Moses die?

A: No.

Q: (L) Who took him?

A: Us.

END OF SESSION

1. The asteroid belt is a doughnut-shaped concentration of asteroids orbiting the Sun between the orbits of Mars and Jupiter, closer to the orbit of Mars. The asteroids have a slightly elliptical orbit. The time for one revolution around the Sun varies from about three to six Earth years. The strong gravitational force of the planet Jupiter shepherds the asteroid belt, pulling the asteroids away from the Sun, keeping them from careening into the inner planets. The asteroid belt may be material that never coalesced into a planet, perhaps because its mass was too small; the total mass of all the asteroids is only a small fraction of that of our Moon. Whether or not the asteroid belt is the remains of a planet that was destroyed cannot be definitely affirmed or denied. After reading a number of books and papers on the subject, one finds that those who say “impossible” don’t

have much to back them up, and those who think that it might be possible can't prove anything either. Those who think it was a planet suppose that it might have been fragmented by an impact by a large comet.

2. Al Bielek is, apparently, a convincing speaker in the eyes of some people. He presents a wide range of popular references during his talks and weaves quite a tale in the telling. However, the information available prior to the 1983 movie, "The Philadelphia Experiment" did not concern the prospect of time transport. The stated focus of the "Philadelphia Experiment" project was to "achieve radar invisibility". Mr. Bielek states that his "memories began coming back AFTER seeing the movie in 1988."

Many people get the impression that he incorporates new topics into his storyline as fast as he hears them, claiming that his "memory suddenly came back on that." One major flaw in his story is the statement that Nikola Tesla was in association with and in charge of the Philadelphia project. This is highly incredible since the experiment supposedly occurred in July, 1943 and Tesla died on January 7, 1943 in New York City. Dr. Von Neumann (of computer fame) was supposedly involved in the "Philadelphia Experiment" with Tesla, Einstein and LeBon. Bielek says he is recorded to have died in 1953 or 1957.

In Phoenix, 1986, Bielek's memories recalled a site in Montauk which, according to Bielek, "might be where Von Neumann currently resides in obscurity". Another major discrepancy, records indicate the original manned experiment occurred on October 28, 1943, NOT the 12th of August, 1943. Despite the irregularities, there were some interesting comments made in regard to time. The two most outstanding things about the public lecture was the

showing of a slide purported to be a “Zero Time Reference Generator” which looks strangely similar to an old Army field kitchen refrigeration unit, according to Chuck Henderson’s military experience. No technical details were given or offered. This device was purported to be the oscillator which drove the coils of the experiment. Mr. Bielek claimed that the unit shown was used to synchronize two separate signals (one for each coil).

The literature of the “Philadelphia Experiment” is replete with descriptions of the technology. If you get the chance to hear Mr. Bielek, it is highly recommended if only for entertainment. However, if you want usable data, good luck!

3. Which does not, of course, mean that they can’t tell the truth sometimes!
4. Pay particular note to this remark above. It was my sensation that “Candy” was a corrupting influence in her participation and focus on personal issues, and here we have the C’s confirming this. Keeping the connection clean has been an ongoing problem. Very often, the presence of a person with extremely negative, low or even aggressive attitude can “skew” the reception. But even in such cases, we are often able to retrieve the Cassiopaeian intent by careful study.
5. The reader will notice that I often ask the same questions over again, sometimes in a different way, and sometimes not. This was my way of “testing” the source in terms of consistency over time.
6. This is an important point because it signifies that even if a person is deceived while in the body, the true frequency of that individual, and their intent to be of Service to Others means a lot.

2.8 October 9, 1994

Frank and Laura

Q: Hello.

A: Hello.

Q: Who do we have with us?

A: Baderea.

Q: (L) What do the Cassiopaeans look like?

A: Light form.

Q: (L) What do you mean by light form?

A: Humanoid light form.

Q: (L) Are you physical in atomic terms?

A: All according to the perceiver.

Q: (L) Do you mean you arrange yourselves according to what the perceiver wants?

A: No. It is according to perception capacity.

Q: (L) Can you appear to us?

A: No. Vibrational frequency envelope of your density prevents this.

Q: (L) Are you ever in any way physical?

A: Varying degrees according to realm.

Q: (L) Why are you communicating with us?

A: Because you called.

Q: (L) What are the differences between the Celts and the Aryans?

A: Geographic and cultural.

Q: (L) Are there any differences inherent from the former planetary home?

A: No. Post arrival difference development.

Q: (L) Were they the same prior to arrival?

A: Yes.

Q: (L) Was Mars ever inhabited?

A: Yes.

Q: (L) By whom?

A: By those you now know as Sasquatch or Bigfoot.

Q: (L) Do they now live on this planet as a result of being brought here by other beings?

A: They are transitory. Do not inhabit on a permanent basis.

Q: (L) Well, how do they come and go?

A: They are the slaves and “pets” of the Lizard Beings.

Q: (L) How did the Sasquatch get here from Mars?

A: Brought by Lizard Beings but they do not inhabit earth.

Q: (L) Why have Sasquatch been seen in remote places throughout history?

A: Put there for menial slave tasks.

Q: (L) Does that mean that whenever Sasquatch have been seen that there is a Lizard nearby?

A: No.

Q: (L) What menial tasks might they be doing?

A: Collecting samples.

Q: (L) Why has everyone who has ever come in contact with Sasquatch commented on the awful odor of them? Why do they stink?

A: Organic functions.

Q: (L) What is it about their organic functions that makes them stink?

A: Sweat.

Q: (L) Who killed Sir Harry Oakes?

A: David Crofts.

Q: (L) Who was St. Issa of India.

A: Lama Kirtanah.

Q: (L) Where was he from?

A: Palestine.

Q: (L) When was he in India?

A: 13 and 14 A.D.

Q: (L) Is Frank's mind programmed?

A: Yes.

Q: (L) To do what?

A: To be an open channel.

Q: (L) By who?

A: Us.

Q: (L) You said one other time that he was also programed by the Grays.

A: Yes.

Q: (L) To do what?

A: To destroy himself.

Q: (L) Is this why it is important for him to channel?

A: Yes.

Q: (L) Why do they feed off emotions?

A: To fuel their energy.

Q: (L) Details about Jesus' extended "sleep" state.

A: He spent 96 hours in a comatose state in a cave near Jerusalem. When he awoke, he prophesied to his disciples and then exited the cave. 27,000 people had assembled because of mother ship appearance and he was taken up in a beam of light.

Q: (L) Why did we have trouble with the tape recorder?

A: Influence of Lizard beings. In your head.

Q: (L) Why didn't you guys tell me the tape was not recording?

A: Must experience to learn to practice precaution.

Q: (L) I am going to give a list of planets written about in the Sumerian texts which Dr. Sitchen has interpreted. I would like for you to give me the true translation of these names. What was meant by {the Sumerian word}:

{In the following, the words to the left are what I called out and the words to the right of the colon are the C's responses.}

Mummu: Comet cluster.

Lahamu: Venus

Lahmu: Earth

The Hammered Bracelet: Comet trail of Venus and cluster.

Anshar: Jupiter.

Anu: Moon.

Ea: Sun.

Gaga: Saturn.

Marduk: Mars.

Tiamat: Sirius.

Q: (L) You say that Christ gave into temptation, could you please clarify what that means to us?

A: Three women represented sexual temptation. He felt bad after each. He washed himself and asked for strength and forgiveness.

Q: (L) What did Christ write on the ground in the story about the adulteress who was about to be stoned?

A: Look into soul.

Q: (L) That is what he wrote?

A: Yes. Translation.

Q: (L) What, exactly, does the U.S. Government know about aliens?

A: That they exist.

Q: (L) Does the government have or did they ever have a treaty with any aliens?

A: Yes.

Q: (L) Is the treaty still in effect?

A: Never was.

Q: (L) Did they try to get a treaty with them?

A: Yes.

Q: (L) Did the aliens refuse?

A: No. Tricked.

Q: (L) How long before the U.S. government realized they had been tricked?

A: 19 years.

Q: (L) What year was this?

A: 1972.

Q: (L) Does the government have any alien technology?

A: Yes.

Q: (L) Is this technology they were given?

A: Yes.

Q: (L) Is this mind control technology?

A: Close.

Q: (L) Does the government have the ability to say, walk through walls as the aliens do?

A: Incompetent.

Q: (L) Does the government listen to us on the telephone?

A: Can.

Q: (L) The individual in the Karla Turner book who had an experience similar to virtual reality, inside a blue bubble, who did this?

A: Grays.

Q: (L) Who were the grays working for when they did that?

A: Lizard Beings.

Q: (L) Is M F working for either the government or the aliens?

A: Aliens.

Q: (L) Which aliens is he working for?

A: Lizard beings. Unwittingly.

Q: (L) What influence was Adolf Hitler under when he undertook to do the things he did. Who was guiding him?

A: Lizards. Indirectly.

Q: (L) What connection did they use to influence him?

A: Projected beings of human type, inspired forms of great Aryan spirits.

Q: (L) Can you tell us more about the six billion people on the planet at the time of Noah's flood. Where were most of these beings living?

A: Atlantis.

Q: (L) In the upcoming cataclysms, which continent is going to suffer the most destruction?

A: As yet undetermined.

Q: (L) Why are there more abductions by the grays in the United States than in other countries around the world?

A: Government opened channel.

Q: (L) Are there alien bases in the United States?

A: Yes. New Mexico, Colorado, Off Florida, Appalachia, California.

Q: (L) Are these underground bases?

A: Yes. Also under water.

Q: (L) What age was I the first time I was abducted?

A: Three.

Q: (L) Who abducted me?

A: Grays.

Q: (L) What was the purpose of that abduction?

A: Encoding.

Q: (L) To do what?"

A: Kill yourself.

Q: (L) Why did they want me to kill myself?

A: Threat to reveal truth.

Q: (L) When did they abduct me next?

A: Age three.

Q: (L) Why?

A: Same.

Q: (L) Did they ever at any time do anything to my physical body to cause me problems?

A: Yes.

Q: (L) What did they do.

A: Implant.

Q: (L) What kind of implant and where?

A: Brain silicon.

Q: (L) Did they ever put one in the lower part of my spine?

A: No.

Q: (L) Was I ever abducted by you guys?

A: No. Contacted at age three. We do not abduct.

Q: (L) How did the grays know I would be a threat to them?

A: Image aural reading.

Q: (L) Is this the same reason they have abducted Frank so many times?

A: Yes.

Q: (L) How many times have I been abducted?

A: 17 (This is five more than previously stated)

Q: (L) How many times have they abducted Frank?

A: 53

Q: (L) Why have they abducted Frank more than me?

A: You fight it.

Q: (L) When was the last time they abducted me?

A: Age 22

Q: (L) When was the last time Frank?

A: Age 23

Q: (L) So they haven't been abducting us for quite some time, is that it?

A: So far.

Q: (L) Do they have any plans to abduct either of us again?

A: Maybe.

Q: (L) Is there any way we can prevent it?

A: Knowledge channel.

Q: (L) Could you describe to me the true meaning of the Osirian cycle. What was the symbology of the killing of Osiris and the cutting up of the body?

A: Removal of knowledge centers.

Q: (L) Knowledge centers in what?

A: Your DNA.

Q: (L) So, the breaking up of Osiris' body represents the breaking up of the DNA in our bodies?

A: Partly. Also means knowledge capacity reduction.

Q: (L) What was the symbology of the throwing of the phallus into the river and it's being eaten by three fishes?

A: Sexual violence energy introduction.

Q: (L) What did Isis searching for her lord Osiris symbolize?

A: Separation of female energy from male energy union.

Q: (L) Does this have anything to do with brain activity?

A: Yes. The separating of the hemispheres of the brain.

Q: (L) Was this achieved through DNA modification?

A: Yes.

Q: (L) What did the son of Isis, Horus, represent?

A: New reality of limitation.

Q: (L) What is the meaning of Horus avenging himself upon Set, the murderer of his father, Osiris?

A: Beginning of perpetual conflict energy to limit humanity.

Q: (L) Who did Set represent?

A: War.

Q: (L) What war?

A: All.

Q: (L) You say that part of what was done to the human race was that our capacity to retain or absorb knowledge was reduced genetically, was there anything done to Frank or I either before or after birth in this regard?

A: In process of altering to make smarter. Ongoing since conception. Capacity for processing information will increase exponentially.

Q: (L) You mean we are going to get smarter than we already are?

A: Much. [Much laughter]

Q: (L) Who are the beings that have been abducting Karla Turner and her family?

A: Lizards.

Q: (L) Why have they been abducting that group of people?

A: Same reasons they have been abducting you and Frank.

Q: (L) They have been abducting Karla Turner and her family because they perceive them as a threat?

A: Yes.

Q: (L) In one abduction where her son was involved, what was the black shadowy thing that seemed like a moving “nothing” on the ground?

A: Blocked grays. Son not as in tune as Karla. Careful driving alone to lectures and meetings.

Q: (L) Should she make sure there is always someone with her in the car?

A: At night and on lonely roads. Nephew must pay attention. Also son’s friend.

Q: (L) Why did the Egyptians mummify their dead?

A: Superstition.

Q: (L) Was there really a curse on the tomb of King Tut that caused the deaths of many people?

A: Yes.

Q: (L) Who put the curse there?

A: Egyptians. Anybody can create curse successfully with enough mental energy.

Q: (L) What happened to Tiffany Sessions?

A: Murdered.

Q: (L) By whom?

A: Bob August.

Q: (L) Where is the body.

A: Many sites. We are trying to contact Karla Turner's son's former roommate. But he is resisting. She does not realize the extreme importance. Communicate this to her now please Laura.

END OF SESSION

2.9 October 16, 1994

Frank, Laura, V__

Q: Hello.

A: Hello. Music is Good.

Q: (L) Can you give us your name?

A: Cederra.

Q: (L) I would like to know what is the origin of the Freemasons?

A: Osirians.

Q: (L) Can you tell us when the original Freemasons formed as a society?

A: 5633 B.C.

Q: (L) Is Freemasonry as it is practiced today the same?

A: 33rd degree, yes.

Q: (L) So, there is a continuing tradition for over 7 thousand years?

A: Yes.

Q: (L) Is this organization with a plan to take over and rule the world?

A: Not exactly.

Q: (L) What is their focus?

A: Overseers.

Q: (L) Of what?

A: The status of quorum.

Q: (L) What is the quorum?

A: Deeper knowledge organization. Totally secret to your kind as of yet. Very important with regard to your future.

Q: (L) In what way?

A: Changes.

Q: (L) Can you get more specific? Is that changes to us personally?

A: Partly.

Q: (L) Earth changes?

A: Also.

Q: (L) What is the relationship between this quorum and the Cassiopaeans?

A: They communicate with us regularly.

Q: (L) Do they do this knowing you are Cassiopaeans or do they do it thinking...

A: Yes.

Q: (L) Has there been an ongoing relationship between the Cassiopaeans and this quorum for these thousands of years?

A: For some time as you measure it.

Q: (L) What is the origin of the Kaballah?

A: Channeled truths given to early pre-Mosaic Jews to use your terminology.

Q: (L) When the Jewish commentators began setting down the teachings, was this the first time this had been put into writing?

A: No. Not even close.

Q: (L) Is the form that it is in today very close to the original form and can it be relied upon?

A: No. Corrupted.

Q: (L) What is the origin of the books of Enoch?

A: Sanskritian society in area now referred to as India.

Q: (L) What evaluation can we give the books of Enoch as far as level of truth?

A: 50% of area was destroyed in nuclear conflagration in between

Q: (L) In between what?

A: Then and now in the expanded present.

Q: (L) What is the “expanded” present?

A: The real measure of time.

Q: (L) Who was Hermes Trismegistus?

A: Traitor to court of Pharoah Rana.

Q: (L) Who is Pharoah Rana?

A: Egyptian leader of spiritual covenant.

Q: (L) In what way was Hermes a traitor?

A: Broke covenant of spiritual unity of all peoples in area now known as Middle East.

Q: (L) Who did Hermes betray?

A: Himself; was power hungry.

Q: (L) What acts did he do?

A: Broke covenant; he inspired divisions within ranks of Egyptians, Essenes, Aryans, and Persians et cetera.

Q: (L) What was his purpose in doing this?

A: Divide and conquer as inspired by those referred to as Brotherhood in Bramley book you have read.

Q: (L) Is this the Brotherhood of the snake Hermes formed in rejection of unity?

A: Hermes did not form it; it was long since in existence.

Q: (L) Who was the originator of the Brotherhood of the Serpent as described in the Bramley book?

A: Lizard Beings.

Q: (L) Where did Moses get his knowledge?

A: Us.

Q: (L) Okay, you told us before that he saw or interacted with a holographic projection created by the Lizard Beings. Was that the experience on Mount Sinai?

A: Yes.

Q: (L) Okay, well, if he got knowledge from you, did he get this prior to the interactions with the Lizard beings?

A: Yes. He was corrupted by imagery. He was deceived by the imagery a la Joseph Smith, for example.

Q: (L) Are you saying that Joseph Smith, the recipient of the Mormon texts, was deceived by the Lizards also?

A: Yes. They do that a lot.

Q: (L) Why did it take so long for us to get a “good source” through this medium?

A: Too many interactions with channel cancellers.

Q: (L) Who are the individuals are channel cancellers?

A: It would not be our way to name names.

Q: (L) Do you mean people we have had involved in our lives?

A: Yes.

Q: (L) Does it have anything to do with our activities?

A: No.

Q: (L) Does it involve other entities that have tried to come through that have blocked the channel?

A: Yes.

Q: (L) Are they Lizards?

A: No.

Q: (L) Are there any exercises we can use to help our bodies transform into fourth density?

A: Not necessary. It is the soul that matters.

Q: (L) Does this mean that if we focus on soul development, that at the time of transformation that our bodies will automatically be transformed for us?

A: No. It is natural process. No preparation is needed.

Q: (L) So, if you are meant to transform, you will, if you are not you won't?

A: Yes.

Q: (L) Does this mean that when my body reacts to certain foods that I should stop eating them? Is my body trying to tell me something?

A: Up to you. Nothing needs to "tell" you anything.

Q: (L) Can you clarify that?

A: Why are you searching for guidance where it is not needed?

Q: (L) In other words, if we just do each day what naturally comes to us as the best choice in each moment, we are on the right track?

A: Precisely.

Q: (V) I find the information of transforming to the fourth dimension very exciting and natural which is why I ask if this is going to be something I will experience in the future excluding death?

A: Vague.

Q: (L) If, theoretically, an individual... I am getting a very unusual feeling right at this moment, why?

A: Metabolic changes enhanced by accelerated learning.

Q: (L) Is this happening to all three of us?

A: Yes.

Q: (L) Now, as I was starting to say, if, theoretically an individual was to develop in a natural way by making all the proper choices, and was to arrive at the point in time when the major transition

is to be made, would that individual's body pass through into that heightened dimension in a physical state? Remember, this is just a theoretical person...

A: Of course.

Q: (L) Now suppose this theoretical person were to pass through this transition to the other side, what state would they find their body in? Would it be exactly as it is now in terms of solidity? What would be the experience?

A: The key concept here is variability of physicality.

Q: (L) Does this mean that everybody will be different or that an individual will have greater control over the substance and constitution of the body?

A: Not exactly either. Your physicality will be variable according to need and circumstance.

Q: (L) Okay, does this mean that sometimes we will be more of a light body?

A: Close.

Q: (L) Does this mean that sometimes we will be more of a firm body as we have now?

A: Yes.

Q: (L) Will our bodies age differently?

A: Yes.

Q: (L) What will be the median lifespan?

A: 400 years

Q: (L) And will those who pass through this transition as, say, 50

year olds, will they have an equal opportunity to live an additional 400 years?

A: Will regenerate in youthful appearance.

Q: (L) Now, when you say 400 years, will it be that the plane has a different orbit and that a year will be different?

A: No.

Q: (L) Will the days be different as to length of time light and dark as they are now?

A: Not the point. Planet will be 4th density as well.

Q: (L) But will the days and nights be different and will the orbit be different? Will the axial angle be changed?

A: You are thinking in terms of the 3rd level density. The rules will be so totally different that physical inspired comparisons are moot.

Q: (L) But I like the sunshine and birds singing and breezes. I just want to know if those things will be the same.

A: In some fashion.

Q: (L) Can't you give a few clues?

A: We must let you see for yourself.

Q: (V) I had an experience with Preying Mantis beings. Who are they?

A: Minturians.

Q: (L) Where are they from?

A: Orion.

Q: (L) Are the Orions the bad guys?

A: Subjective.

Q: (L) Well, what group do they belong to?

A: Federation as do the Plieadians.

Q: (L) Did they abduct me or what is the source of this memory?

A: It is a memory of a past life held in the deep subconscious level.

Q: (L) What did they do to me?

A: Retroprogramming for learning purposes.

Q: (L) For what?

A: Lessons are to be learned by you not told by us.

Q: (L) Why did the grays abduct V__?

A: To try to encode her to destroy herself.

Q: (L) Has she overcome this programming?

A: Hopefully. There is always room for error. Remember, free will is the most important law of consciousness in creation.

Q: (V) I had a dream about being a teacher and showing small children how to use light and color. Was this precognition?

A: Probably.

Q: (L) Would this probability be within the next ten years?

A: Listen. Open.

Q: (L) What is the meaning of the number 666 in the book of Revelation?

A: Visa.

Q: (L) You mean as in credit card?

A: Yes.

Q: (L) Are credit cards the work of what 666 represents?

A: Yes?

Q: (L) Should we get rid of all credit cards?

A: Up to you.

Q: (L) Would it be more to our advantage than not to disconnect ourselves from the credit system?

A: Isn't just credit also debit.

Q: (L) Is that an affirmative.

A: How are you going to do this?

Q: (L) Well, do you have any suggestions?

A: World will soon have nothing but credit and debit have you not heard of this new visa debit cards this is the future of money as controlled by the world banking system i.e. the brotherhood i.e. Lizards i.e. antichrist.

Q: (L) If I don't have a credit card then I don't have to belong to this system?

A: No. You will have no choices: belong or starve.

Q: (L) What happened to free will?

A: Brotherhood aka Lizards aka antichrist has interfered with free will for 309000 years. They are getting desperate as we near the change.

Q: (V) It has always been my nature to rebel against that which I did not feel was good for me. Is rebellion against this system possible?

A: If you are willing to leave the body.

Q: (L) Leave the body as in death, croak, kick the bucket?

A: Yes.

Q: (L) If we were to move...

A: Changes will follow turmoil be patient.

Q: (L) We would like to move into the country. Will it be possible to get along without this credit/debit card leading that kind of life?

A: No.

Q: (L) Are they going to have the kind of capability of controlling everything and everybody no matter where they are?

A: Yes.

Q: (L) Even if we moved to Guyana and built a log hut in the rain forest and didn't bother anybody, we'd still get sucked into this thing?

A: Laura you will feel the effect of the Lizard beings desperate push for total control no matter where you go.

Q: (L) That is inexpressibly depressing. Do you understand?

A: Why? Change will follow.

Q: (L) Will it follow soon?

A: You are slipping a bit. Refer to Literature "Bringers of the Dawn". Challenge will be ecstasy if viewed with proper perspective which is not, we repeat: not of third level reality, understand?

Q: (L) In the reference cited, Joan of Arc is described as feeling ecstatic while burning at the stake. Is that what you mean?

A: Sort of, but you need not burn at the stake.

Q: (L) That's small comfort. There's other ways to die.

A: We are not speaking of death, Laura. If you listen to those who are firmly rooted in 3rd level this is when you run the risk of slipping in your knowledge learned no matter how good the intentions i.e. L*** {Laura's then husband, now ex-husband}.

Q: (L) What do you mean about L***?

A: Guyana.

Q: (L) What do you mean "Challenge will be ecstasy"? What sort of challenge?

A: Living through the turmoil ahead.

Q: (L) Several books I have read have advised moving to rural areas and forming groups and storing food etc...

A: Disinformation. Get rid of this once and for all. That is 3rd level garbage.

Q: (L) We feel pretty helpless at the mercy of beings who can come in and feed off of us at will. Do we have someone on our side, pulling for our team, throwing us energy or something?

A: Who do you think you have been communicating with?

Q: (L) Are you going to be able to assist us through this turmoil?

A: Yes.

Q: (L) Are you going to?

A: Up to you.

Q: (L) If we call, can we get your assistance?

A: All you have to do is ask.

Q: (L) Will we go through any periods when we may be cut off from help?

A: You are never ever cut off.

Q: (L) Oh, I don't want to suffer!

A: You need not suffer. Stop thinking 3rd level.

Q: (L) I don't want anybody I love to suffer either. I don't want any pain. I've suffered enough!

A: You are stuck at 3rd level tonight.

Q: (L) It's not just that. There is so much disinformation you just don't know who to believe... I mean, how do we know we can believe you? There are so many sources out there deceiving and they do it so cleverly. Look at the Bible... for 2,000 years people have been believing that...

A: They deceive when you allow it.

Q: (L) I know you are supposed to take some things on faith... but, do you see my problem here?

A: Yes, but you don't.

Q: (L) What is my problem?

A: Mental block.

Q: (L) In the recent past you indicated that chapter 24 of Matthew and chapter 21 of Luke, were given by Jesus after his extended sleep state. Now, both of those chapters refer to the present time as being like the days of Noah. Is that a correct assessment?

A: In a sense and individual events are as yet undetermined.

Q: (L) Well, the story of Noah tells us that Noah was told to build an ark.

A: Symbolic.

Q: (L) Yet Noah built an ark. Was it true that certain individuals, whoever they were, built boats or did things to survive that terrible cataclysm?

A: No. Look at it this way. Noah built a boat because it seemed like an enjoyable enterprise and when the flood came it came in handy, see?

Q: (L) So, you are saying that if we do what we do because we enjoy it that we will be in the right place at the right time, doing the right thing when whatever happens happens, right?

A: Close.

Q: (L) Are you saying that we will be led to do what we should be doing and be where we should be?

A: You will just fall into it but if you force things you run the risk of going astray.

Q: (L) Am I correct in thinking that many people who think they are channeling are just channeling earthbound spirits?

A: Sometimes.

Q: (L) Is it possible to channel dead people who have gone into the light?

A: Sometimes.

Q: (L) Would it be possible for us to do this with other people present so that they could ask questions also?

A: Yes.

Q: (L) Is S___ under the influence of other forces?

A: Yes.

Q: (L) Who?

A: Who else? The Lizzies.

Q: (L) Is it acceptable within universal law to do spirit release work on people without requesting their permission?

A: You already do this without inquiry.

Q: (L) Is it alright to do it without inquiry?

A: Open.

Q: (L) Is it possible that we could be loading ourselves with Karmic debt by sticking our noses in where we may not be wanted?

A: Yes.

Q: (L) Would it be better to not do this without request?

A: You must answer within yourself.

Q: (L) Can one do a spirit release on another after asking the higher self permission?

A: Too many conflicting thought patterns.

Q: (L) Can one ask the higher self for permission to do a cleansing?

A: Be cautious not to interfere with karmic learning assignments.

Q: (L) Do some people have attachments that are part of karma?

A: Yes.

Q: (L) Let's go back to the subject of the beast and the number 666. You say that following the enforcement of control by the Lizzies on the entire world that the change is going to take place, is that correct?

A: Yes.

Q: (L) How long following?

A: Open.

Q: (L) Several prophetic works have said that this period is going to last 6.3 or 7 years. Is that correct?

A: Open.

Q: (L) On the subject of the 666, I was given an insight into this several years ago as to another meaning of it, is that interpretation also correct?

A: Maybe. VI is 6 in Roman Numerals. S was 6 in ancient Egypt. A was 6 in Sanskrit. VISA, see, is 666. Interesting that to travel for extended periods one needs a “visa” also, yes?

Q: (L) The other parts of chapter 13... Verse one says, “I stood on the sandy beach I saw a beast coming up out of the sea with ten horns and seven heads. On his horns he had ten royal crowns and blasphemous titles on his heads...” What does this verse mean?

A: Many meanings. Monetary control. 10 represents universal control of whole units of value.

Q: (L) So, the ten horns represent units of value, so we are talking about money here. What are the blasphemous titles on his heads?

A: In God we trust.

Q: (L) “And the beast that I saw resembled a leopard...”

A: New World Order.

Q: (L) “And to him the dragon gave his might and power and great dominion...” Who is the dragon?

A: Read again please.

Q: (L) “And the beast I saw resembled a leopard...” What does the leopard signify?

A: Leopard is fast moving and distinctly patterned.

Q: (L) “His feet were like those of a bear...” what do the feet represent?

A: Russia.

Q: (L) Why are the feet like those of a bear?

A: Hidden power center in that geographic location.

Q: (L) What nature this power center?

A: Same as USA. Feet are not so easily seen.

Q: (L) Does this mean that Russia and the US are secretly united?

A: Under same control.

Q: (L) Are these the Lizards?

A: At the root.

Q: (L) “His mouth was like that of a lion...” What does mouth represent and why is it like a lions?

A: Noisy and boastful.

Q: (L) Who is noisy and boastful and how is this going to manifest?

A: Economic power structure. Lion is powerful and commands attention by roaring. Who has been speaking loudly about a new world order?

Q: (L) The United States?

A: Close. Elements of same.

Q: (L) “One of his heads seemed to have a deadly wound, but his death stroke was healed and the whole earth went after the beast in amazement and admiration...” What does it mean that one of his heads seemed to have a deadly wound?

A: Aliens.

Q: (L) The aliens will seem to be a deadly wound to the Beast?

A: Initially.

Q: (L) “But his death stroke was healed, and the whole earth went after the Beast with amazement and admiration...” What does this mean?

A: Initial fear gives way to worship and admiration.

Q: (L) “They fell down and gave homage to the dragon because he had bestowed on the beast all of his dominion and authority...” Who is this dragon?

A: World Body Politic.

Q: (L) And who is this Beast?

A: New World Order aka Brotherhood aka Lizzies aka antichrist.

Q: (L) “The Beast was given the power of speech uttering boastful and blasphemous words and was given freedom to exert his authority and exercise his will during 42 months...”

A: Timing is open. Power of speech is self explanatory in terms of audio and video media.

Q: (L) “And he opened his mouth to speak slanders against God blaspheming his name and his abode even vilifying those who live in heaven...” Does this mean that this group, this beast are going to...

A: Disseminate disinformation with respect to encouraging worship, loyalty and obedience to antichrist.

Q: (L) “He was further permitted to wage war on God’s holy people and to overcome them and power was given him to extend his authority over every tribe and people and every tongue and nation...” Does this means trials and tribulations of those who refuse to submit?

A: No. See previous answer.

Q: (L) “And all the inhabitants of the earth will fall down in admiration... everyone whose name has not been recorded from the foundation of the world in the Book of Life of the Lamb that was slain in sacrifice from the foundation of the world...” What are “those whose names are recorded in the Book of Life... what is the Book of Life?

A: Supercomputer.

Q: (L) The Book of Life of the Lamb... everyone whose name has not been recorded... it is saying that the people who are going to worship the Beast are names that have not been recorded... does that mean that there is a supercomputer recording the names of those who do not worship the beast?

A: Yes.

Q: (L) And who has this supercomputer?

A: Beast. All names will be recorded as being either obedient or disobedient.

Q: (L) Who is this “Lamb?”

A: Beast.

Q: (L) “If anyone is able to hear let him listen: whoever leads into captivity will himself go into captivity; if anyone slays with the

sword, with the sword will he be slain... herein is the call for the patience and fidelity of the saints (God's people)...”Who are God's people?

A: All.

Q: (L) What does it mean: “Whoever leads into captivity will go into captivity?”

A: Follow the leader.

Q: (L) If they follow the leader they will become captive and if they fight with the leader they will be killed?

A: Yes.

Q: (L) “Then I saw another Beast rising up out of the land; he had two horns like a lamb and he spoke like a dragon...” What does this signify?

A: Other faces of the same entity.

Q: (L) What does it mean that he had two horns like a lamb? A lamb doesn't have horns. Why does it say he has horns?

A: Confusion by contradiction.

Q: (L) And what does the lamb represent?

A: Same face of the Beast.

Q: (L) What does it mean he “spoke like a dragon”??

A: Same.

Q: (L) “He exerts all the power and right of control as the former beast in his presence and causes the earth and those who dwell upon it to exalt and deify the beast whose deadly wound was healed and worship him...” Well, it seems to say that there

is a second beast that is different from the first beast but you are saying that it is just another face of the beast...

A: Yes. Look at it this way, aliens one face; God another; government another et cetera.

Q: (L) Did you mean to say that God was another face of the beast?

A: As represented by religion.

Q: (L) “He performs great signs, startling miracles, even making fire fall from the sky to the earth in men’s sight..” What does that mean?

A: Aliens perform “miracles”.

Q: (L) And what is the “image” of the Beast?

A: Aliens.

Q: (L) What does it mean to have been wounded by the sword and still live?

A: Perceived as scary then Godlike.

Q: (L) “And he was permitted to impart the breath of life into the Beast’s image so that the statue of the beast could actually talk and to cause all to be put to death that would not bow down and worship the image of the beast.” What does this mean?

A: Total control once deception is complete.

Q: (L) “Compels all alike, both small and great, rich and poor, free and slave, to be marked with an inscription on their right hand or on their foreheads....” What is this inscription?

A: Visa ID number.

Q: (L) Is this going to be actually physically put on our bodies?

A: Encoded.

Q: (L) How? Is that what the aliens do when they abduct people?

A: No.

Q: (L) How is it going to be done?

A: Stamped.

Q: (L) By what technical means?

A: Electronic encoding. A series of numbers.

Q: (L) Are they going to put these on our skins or imbed them in the skin on our heads or hand...?

A: Yes.

Q: (L) Does that mean that you will have to place your hand on an electronic scanner in order to conduct any type of monetary transaction?

A: Precisely.

Q: (L) Okay, it says: “Here is room for discernment, a call for the wisdom of interpretation, let him who has intelligence, penetration, insight enough calculate the number of the Beast, for it is a human number, the number of a certain man, his number is 666. What does this mean?”

A: Visa as explained previously. Everyone will get their own number and it will be a Visa number, the number of the Beast.

Q: (L) “Then I looked and Lo! the lamb stood on Mount Zion and with him 144,000 men who had his name and his father’s name inscribed on their foreheads...” What does that mean?

A: ID. The Lamb is the Leadership council of the world bank. Many will think they are taking the “mark” of God when actually being marked by the Beast.

Q: (L) “And I heard a voice from Heaven like the sound of great waters and like the rumbling of might thunder and the voice I heard seemed like the music of harpists accompanying themselves on their harps...” What is this voice from heaven and the sound like great waters and mighty thunder?

A: The return of Christ.

Q: (L) “And they sing a new song... No one could learn to sing that song except the 144,000 who had been ransomed from the earth... you said the 144,000 are the leaders of the world bank and here it says they have been ransomed from the earth at the coming of Christ... it says the 144,000 have not defiled themselves by relations with women for they are pure as virgins. These are they who follow the Lamb wherever he goes...they have been ransomed...”

A: Symbolism added later and this is not entirely accurate point. The symbols have been mixed. Tends to encourage elitism and divisiveness.

Q: (L) Are the 144,000 good guys or bad guys as we would term them?

A: Both. But they are ones who have supreme knowledge.

Q: (L) Are these human beings?

A: Yes.

Q: (L) There will be 144,000 people on the earth who have supreme knowledge?

A: Approximately.

Q: (L) Now, this 144,000, are we among that number? Just curious.

A: Maybe.

Q: (L) “No lie was found to be upon their lips for they are blameless, spotless, untainted without blemish. And I saw another angel flying in midair with an eternal gospel to tell to the inhabitants of the earth, every race and tribe and people, and he cried with a mighty voice: Revere God and give him glory, for the hour of his judgment has arrived, fall down before him, pay him homage and adoration and worship him who created heaven and earth and the sea and the springs of water...” What does this tell us?

A: Added later by questionable source.

Q: (L) “Then a second angel followed declaring: Fallen, fallen is Babylon the Great, she who made all nations drink of the wine of her passionate unchastity...” Who is Babylon and what does it mean she has fallen?

A: Same as previous answer.

Q: (L) “Another angel followed, a third, saying with a mighty voice saying whoever pays homage to the beast and permits his stamp to be put on his forehead or on his hand he too shall have to drink of the wine of God’s indignation and wrath poured undiluted into the cup of his anger, and he shall be tormented with fire and brimstone in the presence of the holy angels and in the presence of the lamb...”

A: Disinformation. Intended to create fear and resistance so that the aliens can feed off of these emotions.

Q: (L) “Again I looked and lo! I saw a white cloud and sitting on the cloud one resembling a son of man with a crown of gold on his head and a sharp scythe in his hand...” Is that further additions?

A: Yes.

Q: (L) “Another angel came out of the temple saying with a mighty voice to the one sitting on the cloud: put in your scythe and reap for the hour has arrived to gather the harvest for the earth’s crop is fully ripened...”

A: More fear based disinformation.

Q: (L) Now, I have compared certain passages of Revelations to the work of Immanuel Velikovsky, were those sections accurate in what they describe?

A: Yes.

Q: (L) And those are events that will transpire after the Lizzies have done their thing, after the Visa is in place, and before or after Christ returns?

A: Before.

Q: (L) So the cluster of comets is going to come before the return of Christ??

A: Yes. But return is just one event not the whole thing.

Q: (L) Is there going to be massive disruption on the planet and maybe a lot of people transitioning out of the body simultaneously because of the interaction of this cluster of comets and the earth.

A: Close.

Q: (L) And, shortly following this event, Christ will return?

A: As part of the whole.

Q: (L) That is going to be part of the cluster of comets activity?

A: After.

Q: (L) What is Christ going to do after he returns?

A: Teach.

Q: (L) How many people are going to be on the planet to receive this teaching?

A: Open.

Q: (L) May we assume there will be six billion?

A: Assume as you please.

Q: (L) You keep saying that the return of Christ is a part of the whole as though there is some important thing that I am missing the question to discover. Consider that question asked... tell me what it is I am missing, please.

A: Obvious if you have been paying attention.

Q: (L) And that is...?

A: The transition to 4th density.

Q: (L) Is the transition to 4th density going to happen before the comets or after?

A: After.

Q: (L) Is the interaction of the comets and the planet earth going to....

A: Precede the transition.

Q: (L) Is it going to generate this change in some way?

A: No.

Q: (L) It's not going to have anything to do with electromagnetic interactions which would heighten the atomic vibrations of the planet?

A: No.

Q: (L) So, the comets are going to make a mess of things and then the transition is going to come as Christ comes?

A: Before.

Q: (L) The transition will happen and we will all be standing around glazed in the eyes or whatever, wondering what to do with ourselves, because we are finding ourselves in a new estate we have not been in before, and then Christ comes?

A: More or less.

Q: (L) Now, what is going to happen after Christ comes back and everything is sort of straightening out and he is teaching... is everybody on the planet going to be gathered together in one place to receive these teachings?

A: No.

Q: (L) Is he going to travel around and teach?

A: Technology.

Q: (L) He will teach via the media?

A: Yes.

Q: (L) And we are still going to have access to our media, television and radio and so forth?

A: Some.

Q: (L) Are some people at that point in time or just prior to this transition, going to leave in large groups with the Lizzies?

A: Yes.

Q: (L) Are there going to be large groups of people moving into domed cities on the planet living in "cahoots" with the Lizzies?

A: Close.

Q: (L) In other words there may be areas of Lizzie control on the planet and areas under the control of Christ?

A: Christ does not control.

Q: (L) Will the Lizzie people come out of their cities from time to time and “molest” the followers of Christ from time to time?

A: Maybe.

Q: (L) So, in other words, we will have a greatly reduced population, people here and people there, none of whom are totally united on the planet?

A: Goodnight.

END OF SESSION

2.10 October 18, 1994

Frank and Laura

Q: (L) Hello.

A: Hello.

Q: (L) Can you give us your name and opening statement?

A: Dedeba. Hello.

Q: (L) Are you a discarnate?

A: Cassiopaeon.

Q: (L) Why do you not seem to have as much energy as the others?

A: Slow at first. Builds.

Q: (L) Has someone of you been looking over my shoulder during the day and reading the questions I have been preparing?

A: Yes.

Q: (L) Are you prepared to answer my questions fully and completely tonight?

A: Yes.

Q: (L) Are you a male or female?

A: Both.

Q: (L) Are all Cassiopaeans both male and female?

A: Yes.

Q: (L) Do you reproduce in anyway?

A: We are Light.

Q: (L) Have the Cassiopaeans ever been in physical bodies?

A: Ever is subjective.

Q: (L) Okay, at any point in space time have you occupied physical bodies?

A: Have, will and do.

Q: (L) Are you talking about the simultaneous past present and future?

A: Omnipresent.

Q: (L) Are you part of the collective subconscious, unconscious, or consciousness?

A: Too vague.

Q: (L) Are you part of our higher consciousness?

A: So is everything else.

Q: (L) Are you prepared for my questions and to give practical answers because you know I am a practical person.

A: Yes.

Q: (L) Would anyone else be able to answer the sorts of questions we ask?

A: Anyone covers wide spectrum.

Q: (L) You understand our frustration with a lot of channelled sources?

A: Yes.

Q: (L) Our frustration lies in the fact that when a question is answered it is rarely, if ever, answered succinctly, directly, or anywhere near the point.

A: So your perspective, yes, to not do...

Q: (L) Is there any such thing as racial superiority regarding the races on the planet earth?

A: Only karmically determined by physical confinement assignment.

Q: (L) It can be karmically determined to be born into one race or another?

A: Yes.

Q: (L) Are the Aryan/Celts who came to this planet from the other one that was destroyed, were they, when they came, in any way superior to the humans already here?

A: Somewhat.

Q: (L) What was the nature of this superiority?

A: Durability.

Q: (L) Physical or mental?

A: Physical.

Q: (L) Well, blond haired, blue-eyed people seem to be somewhat more delicate or thin-skinned compared to, say, the blacks.

A: In this environment on surface.

Q: (L) Which race on earth is the oldest?

A: All are same.

Q: (L) Even the Aryan/Celts from the other planet?

A: Yes.

Q: (L) Was there ever a time in history when Kantek, Martek, and Earth were all three occupied by sentient races which communicated with one another?

A: No.

Q: (L) Was there ever a time in history when all three planets were occupied simultaneously?

A: Yes.

Q: (L) Why are there different races?

A: Many reasons. Experimental creations. Partly.

Q: (L) Where did the Orientals come from?

A: Same as all others. Result of experimentation.

Q: (L) Did they originate on this planet? Are they native to this planet?

A: Both. Orientals reserved for souls most advanced; Aryans most aggressive; Negroes most naturally attuned to earth vibrational frequency. So are “native Americans”.

Q: (L) Can you determine my dominant genetic type?

A: Caucasian.

Q: (L) Is Caucasian different from Aryan or Celtic?

A: Aryan subgroup Caucasian.

Q: (L) In terms of being Caucasian, do I have any negro blood in me?

A: Faint trace.

Q: (L) Who were the blue skinned people written about in the Vedas?

A: Aryans.

Q: (L) Were the Aryans originally blue skinned?

A: No.

Q: (L) Why did the Vedas talk about blue-skinned people and why are there blue skinned people in remote areas of the Appalachians?

A: Are whites real “white”?

Q: (L) Were there ever any really blue people?

A: No. They were perceived as blue due to thinness of skin and contrast with native population.

Q: (L) What is the origin of the swastika.

A: Oriental. Signified supremacy.

Q: (L) Were Adam and Eve attempting to obtain knowledge to free themselves from bondage when they ate of the fruit of the tree of knowledge?

A: Adam and Eve are symbolic.

Q: (L) But were they in bondage and trying to help free themselves with the help of a benevolent “serpent”?

A: Not benevolent.

Q: (L) Were they already in bondage to someone else when the Lizzies came?

A: No. They were free. The symbolic story of Adam and Eve was a story of enticement to false knowledge. The tree of knowledge of good and evil was focused, imprisoned knowledge.

Q: (L) Is the solar system sort of a giant atom?

A: No. But similar; remember your atomic knowledge is still mostly theoretical.

Q: (L) Could the orbits of the planets be described as energy ‘shells’ such as the shells occupied by the various electrons around an atom?

A: Close.

Q: (L) Does the solar system, at different points in time absorb or emit energy and do planets move from one shell to another? And, does the nature of the solar system change what it “is” by adding or taking away bodies?

A: First, if a solar system adds or subtracts bodies then of course it changes. Next, the fundamental changes occur as a result of interaction with outside forces.

Q: (L) What outside forces?

A: Plane convergence.

Q: (L) What is plane convergence?

A: What will happen to earth.

Q: (L) Is this going to happen soon?

A: Yes.

Q: (L) Is this plane convergence a phenomenon that occurs frequently in the universe, galaxy or solar system?

A: Yes.

Q: (L) What is it caused by or manifested by?

A: Passing through realm border.

Q: (L) What is a realm border?

A: Too complex.

Q: (L) What is the source of the legend of the phoenix?

A: Ancient Indian destruction and rebuilding.

Q: (L) Who created the Lizzies?

A: Ormethion.

Q: (L) And who is this individual?

A: Thought center.

Q: (L) Located where?

A: Everywhere.

Q: (L) Can you give us a little more of a clue?

A: Another sector of reality.

Q: (L) Is this a sentient, self-aware being that created the Lizzies?

A: Yes and no.

Q: (L) Is this individual one of what you called the Transient Passengers?

A: No.

Q: (L) Is it similar?

A: No.

Q: (L) And who created this Ormethion?

A: Not being; thought center.

Q: (L) Thought center of what?

A: Too complex.

Q: (L) Who was it who appeared to Ezekiel?

A: Lizard beings.

Q: (L) What do you intend for us to do with all this information?

A: Put in book.

Q: (L) Any suggestion for title?

A: Up to you.

Q: (L) Should we let it out gradually? Some of the information is pretty heavy.

A: All at once.

Q: (L) Is there only one ultimate creator of the universe

A: All is one. And one is all.

Q: (L) From the one what was the first division?

A: Mass division and disbursement.

Q: (L) Was this simultaneous?

A: Yes.

Q: (L) Was this what we refer to as the "Big Bang?"

A: Yes.

Q: (L) Is there any reference to this event in terms of time?

A: Always.

Q: (L) Can we say that all that exists in the material universe is, say, “x” number of years old?

A: No. It is the eternal now. Not only did happen, is happening and going to happen. The expanded presence.

Q: (L) What is the true source of the brotherhood of the snake in terms of human members?

A: Adam and Eve.

Q: (L) Were Adam and Eve real people?

A: No.

Q: (L) A group of people?

A: Thought pattern change not a giving into temptation.

Q: (L) What or who were these people? What country did they live in?

A: All people. Realm border crossing.

Q: (L) You mean this occurred at a time when realms crashed or crossed each other?

A: Yes.

Q: (L) Did this involve a war of some sort between one group of beings and another group?

A: Realm crossing has many manifestations.

Q: (L) So, in other words, if it hadn't been the Lizzies it would have been someone else?

A: Yes.

Q: (L) Was this just sort of destined to happen?

A: Yes.

Q: (L) Is it just part of a great cosmic drama?

A: Yes.

Q: (L) Is the ultimate creator self-conscious and self-aware?

A: Yes and no.

Q: (L) These events that occur in our universe just sort of happen?

A: Close.

Q: (L) Are there other universes besides ours?

A: Yes.

Q: (L) Are these other universes also spun off from “our” ultimate creator?

A: Yes.

Q: (L) Are these universes countable?

A: Counting is artificially limiting concept.

Q: (L) Are the numbers of universes limitless?

A: In a sense.

Q: (L) Do universes ever crash into each other?

A: Too complex.

END OF SESSION

2.11 October 19, 1994

Frank and Laura

Q: (L) Hello.

A: Hello.

Q: (L) Do we have anybody with us tonight?

A: We are always with you.

Q: (L) Who are we talking with tonight?

A: Nonigera.

Q: (L) Is it true that when we ask an individual under hypnosis about an alien abduction scenario to try to tune in to aliens... can we do that?

A: Yes. The individual is aware on every level and the information you seek was known at the time. The questions you ask are merely an accessing of information that is already in awareness at some level. Budd Hopkins and David Jacobs are too regimented.

Q: (L) Why does Mike F__ think that people are trying to come between him and S__? {Mike F was a self-proclaimed UFO/abduction expert who “took over” the case of “Candy” as written about in The Wave.}

A: Paranoia.

Q: (L) Is M__ engaged in physical relationship with S__?

A: Trying.

Q: (L) Why did S__ just suddenly turn cold to everything and everybody?

A: Embarrassment.

Q: (L) About what?

A: Cream.

Q: (L) Because she backed out on the cream deal? {"Candy" had the idea to make and sell a face cream and had gotten a number of people involved and investing and it flopped.}

A: Close.

Q: (L) Well, embarrassed in what way?

A: Realized how stupid she looked and two faced also. Usually when someone stops contact with you it is because of embarrassment.

Q: (L) Why did she stop contacting V__?

A: V__ is connected to you.

Q: (L) Is S__ still having serious problems at this time?

A: S__ is having problems she perceives as serious.

Q: (L) But they are not, is that correct?

A: Subjective.

Q: (L) How does J__ W__ really feel about me and Frank? {JW is cousin written about in "Amazing Grace".}

A: Questions your intent.

Q: (L) In what respect? Does he think I am up to something?

A: Thinks you are volatile.

Q: (L) Am I?

A: Subjective.

Q: (L) How does he feel about Frank?

A: Resents him.

Q: (L) Why.

A: Intelligence.

Q: (L) What are J___'s intentions toward me.

A: Make you a follower.

Q: (L) Is he jealous.

A: Yes.

Q: (L) Is it because Frank has a strong mind?

A: Yes. He only wants followers.

Q: (L) I am asking you to help me out here.

A: Can't help with karmic level 1 processes.

Q: (L) What is a karmic level 1 process?

A: Major predestined lesson or mission.

Q: (L) Are Frank and I going through all of these things right now to create some change in our state of being or our living... {Basically, we were discovering that everyone we met who were involved in UFO/alien research were a bunch of loopers; two-faced, back-stabbing, egocentric nutcases!}

A: To open memories, psychic record.

Q: (L) Have we been through these experiences in other lifetimes?

A: Yes.

Q: (L) When we do this channeling does it magnetize our bodies to bring benefits into our lives?

A: Yes.

Q: (L) Is this work a destined mission?

A: Yes.

Q: (L) If one is in process of fulfilling one's destiny in terms of performing a mission, is not the universe capable of meeting one's needs?

A: Yes.

Q: (L) Is this, in fact, going to happen for both of us as we focus on this work?

A: If you keep pushing forth.

Q: (L) So all the things we are doing now...

A: And coordinate each others input equally.

Q: (L) Did S__ make any money selling her jewelry?

A: No.

Q: (L) What does S__ think about Frank?

A: Resents his superior intelligence.

Q: (L) Me?

A: Resents same. Thinks you're weird.

Q: (L) What does A__ B__ really think about me? {This was a guy in St. Pete who claimed to be the highest level Golden Dawn initiate in the State of Florida. My impression of him was that he was not the brightest crayon in the box.}

A: Resents your power.

Q: (L) C__ H__?

A: Fears your power. She is misguided.

Q: Okay, thank you for the help.

A: Good Night.

END OF SESSION

2.12 October 20, 1994

Frank, Laura, V__

Q: Hello.

A: Hello.

Q: Who do we have with us tonight?

A: Elminioia

Q: And where are you from?

A: Cassiopaea.

Q: Last year both V__ and I went to visit a psychic surgeon named C__. Is this individual legitimate?

A: Not in the way presented.

Q: Does she actually insert her hand into your body and do what she claims to do?

A: No.

Q: Is it all faked?

A: Delusional.

Q: Where does the bloody water come from?

A: Trickery.

Q: Does Reverend Rita know that she is a fraud? {Rev. Rita was the head honcho of the local spiritualist/metaphysical church as written about in “Amazing Grace” and “The Wave”.}

A: No. She believes her.

Q: Is there any psychic activity that occurs when this woman works on one?

A: Yes.

Q: What is the nature of it?

A: Transference of energy.

Q: What is the source or root of this energy?

A: Intense concentration of psychic thought power.

Q: She is not influenced by any negatives such as the Lizzies or anything like that?

A: Some, for confusion purposes.

Q: So C__ works with the Lizzie energy?

A: Somewhat.

Q: What is the force or background of R__, G__, J__, et al.

A: Bogus but some sincere healing does occur as a result of faith.

Q: In the incident that occurred in the spring at A__ B__’s house when “Rev. B” came up and sort of zapped me, who or what was behind that activity and what did he do? {Written about in “Amazing Grace” and “The Wave”.}

A: Dark energies of terrestrial nature were temporarily concentrated upon you.

Q: What was the intent.

A: Harm out of jealousy.

Q: Did they intend to kill me?

A: Hurt.

Q: Who put this Reverend B up to this activity?

A: Rita.

Q: Anybody else involved with her in that decision?

A: S___.

Q: Why?

A: Fear reaction to overtaking of influence she wanted.

Q: Is A__ B___ once again involved with the characters at that metaphysical church?

A: Yes.

Q: What are they up to?

A: Strange thinking patterns.

Q: Why did B___ call V___ the other day?

A: Try to steer her away from you and Frank.

Q: Why does B___ think she has to steer V___ away from me and Frank?

A: You are powerful influence and so is Frank.

Q: What do these people think we are that makes them behave so cruelly and fearfully toward us?

A: Don't agree with your knowledge.

Q: Well, what's the story here? Am I completely in left field? Or, is Laura right and them wrong?

A: Close. You are far closer to the supreme truth than they.

Q: Is J__ a good psychic?

A: Like Aunt Clara on Bewitched.

Q: How do aliens control people?

A: Which ones?

Q: How many choices do I have?

A: Open.

Q: Well, how do the grays and Lizzies do it?

A: Mind and body interference with electrical response patterns.

Q: Can they do this remotely?

A: Less effectively.

Q: So they need to work directly on you or be in contact with you by some means that is somewhat material?

A: Yes.

Q: Are there other aliens on the planet abducting people?

A: Much less often.

Q: What was the flying boomerang the kids and I saw last year?

A: Lizard projection multiple reality station.

Q: Did they fly over my house deliberately for me to see them?

A: Yes.

Q: What was the purpose of them showing themselves to me?

A: Make you aware of existence.

Q: Why did they want to make me aware of their existence?

A: That is an extremely complicated situation.

Q: Did that little flap that occurred in Pasco county in spring of 1993 happen as a result of Frank's and my activities?

A: Yes.

Q: Was there a craft over my house the night I hypnotized P__ Z__?

A: Tuned into visual stimuli from implants. And Z__ implants alerted scout craft of Grays and Lizzies.

Q: Is P__ Z__ under the control of the Lizzies?

A: Yes.

Q: How many people are not under the control of the Lizzies nowadays?!

A: Open.

Q: We would like to know what is the origin of the Gypsies.

A: Genes spliced. Slaves of dark forces.

Q: Who are these dark forces?

A: Same.

Q: As what?

A: Brotherhood.

Q: Does this brotherhood consist of Lizzies and various humans?

A: Yes.

Q: If the Gypsies were gene spliced, who were they gene spliced with?

A: Alien race, humanoid, and Atlantean drone workers.

Q: What were Atlantean drone workers?

A: Slave people controlled by crystal.

Q: Why do the Gypsies remain so cohesive? Is that genetically programmed?

A: Yes. And mind control.

Q: There are legends of half human creatures, minotaurs, centaurs, etc. Were any of these creatures real?

A: Experiments known as beasts in Atlantis. V__ is part Gypsy. Hiding this.

Q: Does she know it?

A: Some.

Q: Who built the city of Baalbek?

A: Antereans and early Sumerians. We meant Atlanteans. {Who are the Antereans?}

Q: What is the reason for the enormous proportions of this building?

A: Giants.

Q: Who were the giants?

A: Genetic effort to recreate Nephilim.

Q: Did the Atlanteans and Sumerians succeed in recreating the Nephilim?

A: No.

Q: Why did they build this enormous city?

A: Retarded subjects.

Q: The results of their efforts were retarded?

A: Yes.

Q: Why did they build the enormous city?

A: In anticipation of success.

Q: Why would someone come along and build a city of the proportions of Baalbek in anticipation of a genetic project that could take many years to accomplish.

A: Project took only three years. Speeded up growth cycle using nuclear hormonal replication procedure. Why failed.

Q: That's why it failed, because of the speeded up growth?

A: Did not take properly.

Q: What technical means did they use to cut the stones and transport them?

A: Sound wave focusing.

Q: What happened to interrupt or halt the building of this city?

A: Venus first appearance and pass.

Q: What year was this project brought to a halt?

A: 3218 B.C.

Q: Who built the city of Mohenjo-Daro?

A: Lizards directly. Coatzmundi legend ties in to this directly look at illustrations on stones now.

Q: Who is Coatzmundi?

A: Other deity of the Lizards worshipped by the Atlanteans and their descendants because of the direct contact with humans for 1000 years.

Q: Now, you said Mohenjo Daro was built by the Lizzies directly. Did they occupy this city themselves?

A: No.

Q: When was this city last inhabited continually?

A: 3065 years ago.

Q: When was it built?

A: 6092 years ago.

Q: I would like to go back to the subject of the Nephilim. Now you said the Nephilim were a group of humanoid types brought here to earth to be enforcers, is that correct?

A: Yes.

Q: When were they brought here?

A: 9046 B.C. one reference.

Q: They were giants, is that correct?

A: Yes.

Q: They were presented to the people as the representatives, or “Sons” of God, is that correct?

A: Yes.

Q: You say these dudes were 11 to 14 feet tall...

A: Yes.

Q: You and the ancient literature say that these sons of god inter-married with human women, is that correct?

A: Yes.

Q: Did they do that the same way it is done today, that is, sexual interaction?

A: No.

Q: How was it done?

A: Forced insemination.

Q: So, it was artificial insemination?

A: Close.

Q: Were these beings like us, including their sexual apparatus?

A: Close.

Q: Any significant differences?

A: Three gonads.

Q: Was their sexual apparatus otherwise similar?

A: Yes.

Q: Did they mate with human females in a normal way at any time?

A: No.

Q: Why not?

A: Size difference.

Q: Just for the sake of curiosity, just how different in terms of size?

A: 23 inches long.

Q: Were they circumcised?

A: No.

Q: Just what was the origin of the practice of circumcision?

A: Same as all Judaic traditions hygiene.

Q: Where do the Tibetans come from?

A: Asia.

Q: Were they special in any way? Hybrids or anything?

A: No. All are hybrids. At some juncture.

Q: What is the origin of the Nubians?

A: Caucus range.

Q: How come they are so terribly black?

A: Genetic mixing.

Q: With what? Anything particularly special about them?

A: East Indian aborigines.

Q: Who was the Queen of Sheba?

A: Fictional.

Q: Did a great queen come to visit King Solomon?

A: Alien influence.

Q: Who was Arjuna?

A: Same as Sheba.

Q: Who is Shiva?

A: Same.

Q: Rama?

A: Indian. High priest influenced by Confederation.

Q: Is Ormethion who the Lizzies worship?

A: Close.

Q: Who do they worship? What do they call their god?

A: Physical universe.

Q: The physical universe is their god?

A: Yes.

Q: What happened to K__ W__? [Little girl missing in another state.]

A: Killed.

Q: By whom?

A: Demented human named Carl.

Q: What happened to D__ W__ and C__ S__? {Two local men who had disappeared without a trace several years previously.}

A: Abducted by aliens for experimentation.

Q: Were they killed through these experiments?

A: Yes.

Q: How were the walls of Jericho brought down?

A: Earthquake.

Q: What happened to the army of Sennacherib?

A: Destroyed by cosmic rays energy concentration by Lizards.

Q: Is there such a thing as sound that can kill?

A: Yes. Anything properly concentrated can kill.

Q: Are there words that can kill by their simple pronunciation?

A: No.

Q: Are there words of power that invoke energies by their pronunciation?

A: Maybe.

Q: Could you tell us any of them?

A: No. You might use unwisely.

Q: Sitchin says that the pyramid was built as a permanent marking system to navigate the planets of our solar system. Could you give comments on this please?

A: It was not built for that.

Q: Who was Jehovah?

A: Lizard projection.

Q: What is the Melchizedek priesthood?

A: False rite.

Q: Is there an order of priests to which the original Melchizedek belonged that was true?

A: Yes.

Q: I had an experience under hypnosis several years ago while in the mountains of North Carolina. What was that? {Written about in “Amazing Grace” and “The Wave”.}

A: Soul memory awakening.

Q: What was the significance of the necklace?

A: Symbolic of ability to communicate supreme knowledge.

Q: Another experience on the boat one night, I am remembering now. What was that event? {The “Boatride to Damascus” written about in “Amazing Grace”.}

A: Similar.

Q: What was the source of these two events?

A: Us.

Q: Alright, another event during meditation followed by period of intense crying. What was this event?

A: Soul cleansing.

Q: The source?

A: Us ridding you of dark influences.

Q: When did the Aryans invade India?

A: 8243 years ago.

Q: Who was there before that?

A: Asian tribes and number 3 prototype.

Q: What is a number 3 prototype?

A: Known as Neanderthal man.

Q: And what are we?

A: Number 4 types c and d. Translation into English comprehension.

Q: Were the Aryan/Celts the original giants?

A: No.

Q: What white men were seen in South America and talked to

the tribes there and promised to return one day and were worshipped as Gods.

A: Egyptians and Atlantean descendants.

Q: What did the Atlanteans do to bring this karma on us such that the grays and Lizzies...

A: Worshipped and served self to extreme.

Q: Does the act of channelling actually change our genetics or DNA or some element around our being in some way that we are not even conscious of?

A: Steadily yes.

Q: Will this channelling have effects on us that will cause changes our lives and lifestyle?

A: Yes.

Q: Will there be benefits brought into our lives because of dedication to this work?

A: Yes.

Q: If we dedicate ourselves does this mean that we will be protected or cared for in any way?

A: Close.

Q: We got some information from the first session when we were working with S___ which said some awful things about bits of childrens' organs were removed etc, what was the source of that information? Did that come from you guys?

A: Yes. Sorry for shock but necessary for broadening channel.

Q: You say that there is an effort on the part of the Orions or Lizards... Are the Orions and Lizards synonymous?

A: Close.

Q: Okay. You say that there is an effort on the part of these beings to create a new race. Why do they want or need a new race?

A: Theirs no longer satisfies them.

Q: When we asked you in the session on July 30th where you were from you said Corsoca, is that correct?

A: Yes.

Q: Is that a planet?

A: No.

Q: What is Corsoca?

A: Point of energy confluence between realms that reflects locator when we were 3rd level.

Q: When we do this channelling, Frank and I together, is it different than if Frank were to do it alone?

A: Yes.

Q: Okay, when we are doing it together with the board, where are you in space time relative to us as we sit here?

A: Above at 6000 miles at border between 3 realms.

Q: Once again, you said that if we called on you for help, you would come if we ask. Is there any special way to call and how can we know if you answer?

A: Will feel it.

END OF SESSION

2.13 October 22, 1994

Direct channeling with Frank under hypnosis. Present: Laura, Terry, Jan

This was an experimental session undertaken because Frank kept insisting on trying it this way. The information seems to be very good, and I've noted elsewhere that Frank was an extremely talented psychic who could look at your palm, tune into you in some way, and pull out all kinds of astonishingly accurate things – not because they came to him from some outside source, but because he extracted it in some way from the individual he was “channeling for.” This session seems to be just an enhanced version of that type of thing – that I was there with the questions and he was somehow extracting this information THROUGH me. So, as I said, the info seems to be good - though most of it is unverifiable - which I understood as a tactic of negative entities: give you good info so you get hooked, and then slowly twist and transform the messages. We could already see this process in this session. One other thing I can say is that you had to be there to understand why nobody else present liked it. It was a certain “taste” of the tone and attitude of Frank that was extremely unpleasant. We all felt somewhat invaded. Also, notice the verbosity. We all had the feeling that if this was continued, the end result would be word-salad.

Q: (L) Who is with us?

A: Enduanda and Alorra

{That two “energy sources” are named is interesting.}

Q: (L) What is the significance of the earthquake that occurred a few months ago that was called the superdeep earthquake that was 400 miles deep?

A: A magma shift caused by gradual heating from within. Just part of a periodic cycle.

Q: (L) Any other comments on that?

A: No.

Q: (L) We would like to have comments on the thumping noises reportedly heard off the coast of California?

A: Expansion of a base.

Q: (L) What kind of base?

A: It's a transfer center for those beings known as the Grays.

Q: (L) And what was the thumping?

A: They are expanding it.

Q: (L) Is it construction work?

A: Yes except that they are using sound waves to disintegrate rock in the crust under the ocean. This disintegration causes the atomic structure of the particles being disintegrated to completely disappear which has something to do with why those sounds are heard in that particular rhythm.

Q: (L) Any other comments?

A: There is some awareness on the part of the U.S. government as to what is going on there. They are suspicious.

Q: (L) What was the source of knowledge accessed by Edgar Cayce?

A: Well, he had a unique biochemical composition which allowed for easy opening and closing of his consciousness from outside sources without interference with his electromagnetic flow stream. It is a very unique and unusual situation. The first

manifestation of this was when he asked for help. If he had not asked for help from a higher source, possibly his awareness of his abilities would never have come forth.

Q: (L) What is the source of Lama Singh's knowledge?

A: Lama Singh has studied long and hard in metaphysical fields through meditation and other areas and therefore a doorway or channel can be opened voluntarily. This requires the cooperation of the host and is not as easily opened or closed as it was in the case of Cayce.

Q: (L) In terms of access levels, which one of the two had access to the greatest field of subjects or information?

A: Actually Cayce was accessing a somewhat different source, but the overall accuracy level and the overall intensity level were greater with Cayce.

Q: (L) In terms of relationships relative to the Cassiopaeon level of knowledge, how would Cayce and Lama Singh relate?

A: The access level is much greater and broader.

Q: (L) When and how did planet earth acquire its moon?

A: Was caused by the regular passage of a large comet cluster which caused a gravitational disruption allowing a large chunk of the original earth's surface, which was somewhat less solid at that point in space/time, to break away from the main body and assume a locked in orbit around the main body.

Q: (L) When did this happen?

A: This occurred approximately 3 billion years ago.

Q: (L) Can a spiritual being become entrapped in physical matter?

A: It's possible but very unlikely.

Q: (L) Are human beings entrapped in physical matter?

A: By choice.

Q: (L) Why did they make this choice?

A: To experience physical sensations. It was a group mind decision.

Q: (L) Who was in charge of the group?

A: The group.

Q: (L) Does the interaction between the spirit/soul and the body physical produce some by-product that is desirable to other beings?

A: Well, all things have desirable consequences as well as undesirable consequences, but it must also be mentioned here that everything that exists in all realms of the universe can experience existence in one of only two ways. That would be defined as a long wave cycle and a short wave cycle. Going back to your previous question about why humans are “entrapped” in physical existence, which, of course, is voluntary and chosen, this was due to the desire to change from the long wave cycle experience of completely what you would call ethereal or spiritual existence, to the short wave cycle of what you call physical existence. The difference is that a long wave cycle involves only very gradual change in evolution in a cyclical manner. Whereas a short wave cycle involves a duality. And this is the case with souls in physical bodies as is experienced on this earth plane because the soul experiences an ethereal state for half the cycle and a physical state for the other half of the cycle. While these halves are not measured in time the way you measure time, the totality of experience is equal in each half. The necessity to form the short

wave cycle was brought about through nature through the natural bounds of the universe when the group mind of souls chose to experience physicality as opposed to a completely ethereal existence.

Q: (L) Does this interaction produce a by-product?

A: It produces equal by-products of a positive and negative nature.

Q: (L) And what are these by-products?

A: Which one first?

Q: (L) Positive.

A: Positive by-product is an increase in relative energy which speeds up the learning process of the soul and all of its one dimensional and two dimensional interactive partners. In other words, flora and fauna, minerals, etc. All experience growth and movement towards reunion at a faster rate on the cycle through this short wave cycle physical/ethereal transfer. Of a negative nature, it also produces many negative experiences for these very same entities which otherwise would not exist because being of a first level and second level nature, flora and fauna would ordinarily experience a long term or long wave cycle on the physical plane as opposed to a short wave cycle physical and ethereal, as they do now because of their interaction with the human species in its short wave ethereal/physical cycle.

Q: (L) The comment was made at one point that certain alien beings abduct humans and subject them to cruel and torturous deaths in order to create “maximum energy transfer.” In this respect, what is this maximum energy transfer that occurs during a long, slow, torturous dying process?

A: Extreme fear and anxiety builds up fear/anxiety energy which

is of a negative nature which fuels the beings that you speak of in that they draw from that and produce a sort of a fueling energy which keeps them going as one of their forms of nourishment based on their metabolic structure.

Q: (L) What is their metabolic structure?

A: That is very complex and very difficult to describe because it is on the fourth level of density which you do not understand. But, part of their reason for existence on the fourth level is their ability to nourish themselves both through ethereal methods and through physical methods. Therefore, this energy transfer would represent the ethereal method of nourishment and other means are achieved physically.

Q: (L) What other means?

A: Well, the drinking of blood and blood by-products would be an example of that.

Q: (L) Do they do that?

A: Yes, but the manner of intake is different than what you may be thinking. It is done through pores.

Q: (L) In what manner?

A: Bathing and then absorbing the necessary products and then disposing of the remaining product.

Q: (L) Did Arthur Clarke channel "Childhood's End"?

A: No. Used imagination.

Q: (L) Is the amnesia related to UFO abductions deliberately induced or is it a product of the mind's inability to deal with the event?

A: It is an equal commingling of both.

Q: (L) The part that is deliberately induced, how is that accomplished?

A: By using a cosmic energy flow to influence memory function through a combination of spiritual and chemical interaction.

Q: (L) Can you be more specific?

A: Being more specific would be in another way less specific, but a good way to put it is altering the flow of electromagnetic energy in the brain. Electromagnetic energy, electromagnetism, is the life force that exists within all that evolves through long wave or short wave cycles.

Q: (L) Going back to the beings that absorb nutrients through their pores, what kind of beings are they?

A: Both those that you describe as the Lizard Beings and those you describe as the Grays. This is necessary for their survival in each case. Even though the Grays are not natural parts of the short wave cycle, but rather an artificial creation by the Lizard Beings, but nevertheless they mimic the nourishment functions.

Q: (L) Since they are artificially created by the Lizard beings, does this mean they have no souls?

A: That's correct.

Q: (L) How do they function? Are they like robots?

A: They function by interaction with the souls of the Lizard beings. This technology is extremely far in advance of that with which you are familiar, but the Gray beings are not only built and designed artificially, but also function as a projection mentally and psychically of the Lizard beings. They are like four dimensional probes.

Q: (L) As four dimensional probes, what are their capabilities?

A: They have all the same capabilities of the Lizard beings except for the fact that their physical appearance is entirely different and they do not have souls of their own and also their biological structure is internally different. But, their functioning is the same and in order to remain as projection beings they also must absorb nutrients in the same fashion both spiritually and physically as the Lizard beings do. The reason the negative energy is necessary fuel is that the Lizard beings and the Grays are both living in the fourth level of density, which is the highest level of density one can exist in serving only self as these entities do. So, therefore, they must absorb negative energy because the fourth level of density is the highest example of self service which is a negative thought pattern. The fourth level of density is a progression from the third level of density. With each progression upward in density level, the existence for the individual conscious entity becomes less difficult. So, therefore, the fourth level of density is less difficult to exist in than the third, the third is less difficult than the second and so on. It puts less strain on the soul energy. Therefore, beings existing on the fourth level of density can draw from beings existing on the third level of density in terms of absorption of negative soul energy. Likewise, beings on the third level of density can draw from beings on the second level of density, though this type of drawing is not as necessary but is done. This is why human beings existing on the third level frequently cause pain and suffering to those of the animal kingdom who exist on the second level of density because you are drawing negative soul energy as beings who primarily serve self, as you do, from those on the second level, and on the first, and so on. Now, as you advance to the fourth level of density which is coming up for you, you must now make a choice as to whether to progress to service to others or to remain at the level of service to self. This will be the decision which will take quite some time for you to adjust to. This is what is referred to

as the “thousand year period.” This is the period as measured in your calendar terms that will determine whether or not you will advance to service to others or remain at the level of service to self. And those who are described as the Lizards have chosen to firmly lock themselves into service to self. And, since they are at the highest level of density where this is possible, they must continually draw large amounts of negative energy from those at the third level, second level, and so on, which is why they do what they do. This also explains why their race is dying, because they have not been able to learn for themselves how to remove themselves from this particular form of expression to that of service to others. And, since they have such, as you would measure it, a long period of time, remained at this level and, in fact, become firmly entrenched in it, and, in fact, have increased themselves in it, this is why they are dying and desperately trying to take as much energy from you as possible and also to recreate their race metabolically.

Q: (L) Well, if we are sources of food and labor for them, why don't they just breed us in pens on their own planet?

A: They do.

Q: (L) Well, since there is so many of us here, why don't they just move in and take over?

A: That is their intention. That has been their intention for quite some time. They have been traveling back and forth through time as you know it, to set things up so that they can absorb a maximum amount of negative energy with the transference from third level to fourth level that this planet is going to experience, in the hopes that they can overtake you on the fourth level and thereby accomplish several things. 1: retaining their race as a viable species; 2: increasing their numbers; 3: increasing their power; 4: expanding their race throughout the realm of fourth

density. To do all of this they have been interfering with events for what you would measure on your calendar as approximately 74 thousand years. And they have been doing so in a completely still state of space time traveling backward and forward at will during this work. Interestingly enough, though, all of this will fail.

Q: (L) How can you be so sure it will fail?

A: Because we see it. We are able to see all, not just what we want to see. Their failing is that they see only what they want to see. In other words, it's the highest manifestation possible of that which you would refer to as wishful thinking. And, wishful thinking represented on the fourth level of density becomes reality for that level. You know how you wishfully think? Well, it isn't quite reality for you because you are on the third level, but if you are on the fourth level and you were to perform the same function, it would indeed be your awareness of reality. Therefore they cannot see what we can see since we serve others as opposed to self, and since we are on sixth level, we can see all that is at all points as is, not as we would want it to be.

Q: (L) Zecharia Sitchin proposes that the pyramid was built as a permanent marking system to navigate the solar system, could you comment on that idea?

A: That is incorrect. The pyramids were built as energy storage and transference facilities. They were built by the descendants of those known to you as the Atlanteans who are, of course, your ancestors in soul matters. They were not built to be markers for anything.

Q: (L) Did any aliens at all, and specifically the Lizzies, ever live among mankind and receive worship?

A: They did not live among mankind, but they did interact di-

rectly with human beings, at various points in the past. It was at those points when human beings were ready, willing and able to accept deities appearing directly from outside sources and then worship them. Such things would not have occurred in the recent past. But, beware, it may very well occur very soon.

Q: (L) Who made the Nazca lines in South America and what was their purpose?

A: Those were natives living in the area at the particular time who were highly advanced spiritually and they put those lines there to call to others that were coming from what they perceived to be an outer space location.

Q: (L) Were they symbols of power in any way?

A: Well, some may have perceived them as such but they were mainly an effort to call forth those who had been worshipped and had appeared to them previously from the outside including not only the Lizard Beings, but other travelers.

Q: (L) Who built the city of Angkor Wat?

A: That was built by the Lizard Beings themselves. Built approximately 3108 years ago.

Q: (L) Who built the city of Mohenjo Daro?

A: That also was built by the Lizard Beings directly.

Q: (L) Did they live in these cities?

A: No, as stated before, they did not live there, they visited or occupied on a temporary basis, but did not live there.

Q: (L) Who did they build the cities for?

A: They built the cities for themselves and their worshippers amongst humans.

Q: (L) In an earlier reading, the question was asked as to what planet you are from, and the response was Corsoca. The question was then asked: “Can you be more specific?” and the answer was 2 dilor. Is this an incorrect spelling or what does this mean?

A: That which you refer to as Corsoca is actually not what you would refer to as a planet in your understanding, because you must understand it is at the sixth level of density which is completely out of reach of any of your senses except for the sixth one, therefore you do not have any concept of the level of being at that density. So, the term “planet” simply cannot apply here. But, that is, indeed, our residence. But it is best left at that because to try to explain to you what exactly it is like there would not be possible for you to imagine.

Q: (L) Alright. You mentioned in this earlier reading something about a “Denver Airport Scandal”. Recently it has come to my attention that this is a possible development. Is this scandal going to develop into a far worse situation and, if so, what are the ramifications?

A: Yes, that will be an ongoing problem, to say the least.

Q: (L) Are there any rituals that can be performed to provide protection for one against intrusion by the Lizzies.

A: Rituals are self-defeating.

Q: (L) Are there any technological means we can use?

A: The only defense needed is knowledge. Knowledge defends you against every possible form of harm in existence. The more knowledge you have, the less fear you have, the less pain you have, the less stress you feel, the less anguish you feel, and the less danger you experience of any form or sort. Think of this very carefully now for this is very important: Where is there any limitation in the concept behind the word “knowledge”? Being that

there is no limitation, what is the value of that word? Infinite. Can you conceive of how that one concept, that one meaning frees you from all limitation? Use your sixth sense to conceive of how the word, the term, the meaning of knowledge can provide with all that you could possibly ever need. If you think carefully you will begin to see glimpses of how this is true in its greatest possible form.

Q: (L) Does this include knowledge learned from books?

A: This includes all possible meanings of the concept of the word. Can you think of how it would be that simply with one term, this one word can carry so much meaning? We sense that you are not completely aware. You can have glimpses of illumination and illumination comes from knowledge. If you strive perpetually to gain and gather knowledge, you provide yourself with protection from every possible negative occurrence that could ever happen. Do you know why this is? The more knowledge you have, the more awareness you have as to how to protect yourself. Eventually this awareness becomes so powerful and so all encompassing that you do not even have to perform tasks or rituals, if you prefer, to protect yourself. The protection simply comes naturally with the awareness.

Q: (L) Does knowledge have a substance or an existence apart from its possession or its acceptance?

A: Knowledge has all substance. It goes to the core of all existence.

Q: (L) So acquiring knowledge includes adding substance to one's being?

A: Indeed. It includes adding everything to one's being that is desirable. And also, when you keep invoking the light, as you do, truly understand that the light is knowledge. That is the knowl-

edge which is at the core of all existence. And being at the core of all existence it provides protection from every form of negativity in existence. Light is everything and everything is knowledge and knowledge is everything. You are doing extremely well in acquiring of knowledge. Now all you need is the faith and realization that acquiring of knowledge is all you need.

Q: (L) I just want to be sure that the source that I am acquiring the knowledge from is not a deceptive source.

A: If you simply have faith, no knowledge that you could possibly acquire could possibly be false because there is no such thing. Anyone or anything that tries to give you false knowledge, false information, will fail. The very material substance that the knowledge takes on, since it is at the root of all existence, will protect you from absorption of false information which is not knowledge. There is no need to fear the absorption of false information when you are simply openly seeking to acquire knowledge. And knowledge forms the protection – all the protection you could ever need.

Q: (L) There are an awful lot of people who are being open and trusting and having faith who are getting zapped and knocked on their rears.

A: No. That is simply your perception. What you are failing to perceive is that these people are not really gathering knowledge. These people are stuck at some point in their pathway to progress and they are undergoing a hidden manifestation of what is referred to in your terms as obsession. Obsession is not knowledge, obsession is stagnation. So, when one becomes obsessed, one actually closes off the absorption and the growth and the progress of soul development which comes with the gaining of true knowledge. For when one becomes obsessed one deteriorates the protection therefore one is open to problems, to tragedies, to all sorts

of difficulties. Therefore one experiences same.

Q: (L) While we are on the subject of knowledge and experiencing things that may or may not be pleasant, I would like to ask for Frank what it is he needs to learn?

A: He is moving in the right direction at the present time even though he is not completely aware of that fact. He can appear to be under more stress than he actually is and also he has an extreme store of innate information which is one reason why we are able to work through him because we opened those channels a long time ago. Interestingly enough, though you are not aware of it, your own existence has been influenced by this very same factor.

Q: (L) Which factor?

A: The natural progression being experienced by the one you know as Frank.

Q: (L) In what respect?

A: You are being driven and you are driving yourself in the right direction because of your interaction with this individual even though you are not completely aware of that fact, that is, in fact, what is happening.

Q: (L) What caused Frank to spend so many years interacting with a person such as N__ E__? {"Dane" in "Amazing Grace".}

A: That was part of the learning process and was also Karmic in nature.

Q: (L) And what brought that whole situation to a halt?

A: It was time to end.

Q: (L) During a previous reading we asked several questions about Jesus of Nazareth known as the Christ. The question was

asked: “Was Jesus special, that is, Christed, in some way?” The answer came back was: “Quick exalted; wars; civil entrancement. Zindar council.” I would like to know the meaning of these references.

A: Quick exalted refers to a sudden boost of awareness level as related to your previous questions about knowledge. Sometimes that acquisition can occur in a surge and sometimes this is referred to as illumination. Jesus acquired his knowledge by having complete faith in his ability to acquire the knowledge from a higher source. This faith caused an equal balancing interaction with higher sources, which allowed him to gain supreme knowledge simply by having that faith. Remember that the resources for the acquisition of knowledge in the space/time ere of Christ were much more limited than they are now. There were few options open for acquiring true knowledge except total and complete faith. And this one was instilled with the awareness that total and complete faith would cause dramatic and spectacular acquisition of knowledge; also would cause dramatic and spectacular progression of the soul being. Therefore, the faith was felt, the knowledge was received.

Q: (L) What was the source of the knowledge?

A: The source was the sixth level of density which is where we reside and we also were involved in that as well.

Q: (L) What does the term “Civil entrancement” mean?

A: Civil entrancement is a complete balancing of one’s useful energies to a level where there is no experiencing of over balancing on the positive or negative side which is preferable for meditation in a mass form.

Q: (L) What is the Zendar Council?

A: Zendar Council is a sixth level density council which spans

both physical and ethereal realms and which oversees dramatic development points at various civilizational sectors in lower density levels.

Q: (L) I would like you to expound a bit on the life of Christ in terms of chronology of events. Could you tell us about his understanding about himself, his interaction with higher sources, his state of being Christed, and what was the true work he came here to do and how did he accomplish it?

A: His awareness of who and what he was gradually came as he grew. He was taught by us through his faith as described previously. And you should have faith as well because you would find things would come to you as “knowings” more often than even now. Jesus awareness of his mission and his actions pertaining to it were part of the natural progression of his growth and development. The information about his “miracles” has been largely corrupted by writings which have been passed down after the actual event period. Most of these writings are by entities who wish to confuse and corrupt all humanity for previously stated purposes. The idea was that if one perceived Jesus as performing physical miracles, then your entire understanding of what the life experience here on earth and on this plane is, and the meaning for it all, is also corrupted and the knowledge is blocked which is the goal of those who have done this. Jesus’ purpose and plan was to teach knowledge to all who sought but did not have the strength to express as great a level of faith as he had to acquire the knowledge as he did from higher sources. If they were open and willing to learn they could be taught by hearing. He had only very limited success in imparting faith to others because faith comes solely from within and that is one of the most difficult things for beings on your plane to acquire.

Q: (L) Now, it has been discussed before that Jesus was probably the product of a genetically selected impregnation, could you

comment on this and why this would be.

A: There was no genetic selection of the impregnation. That is incorrect.

Q: (L) Okay, then what was it?

A: It was a natural conception.

Q: (L) Well what I meant was that the person was selected to be the biological father.

A: Well, that is always the case in every single birth that occurs in your level of density.

Q: (L) Could you comment on the idea that is implicit in this that Jesus was illegitimate?

A: Obviously if one feels that this would put a shadow or stain on him in some way, or the knowledge that he imparted, then you have not been paying attention. Did you not hear what was said about obsession as opposed to knowledge? Those who are truly, within themselves, at all points of development, trying to seek greater knowledge, will not be blocked by any ideas relating to illegitimacy as you refer to it. Those who are obsessed, by choice, rather than trying to seek true knowledge, will indeed be blocked at that point. It is all up to the choice of the individual. If you choose to develop and gain knowledge then you are never blocked or obsessed at any point about anything ever. However if you choose to limit your knowledge or become obsessed then you are constantly finding yourself blocked and this will manifest in all your life experiences. That is part of the individual soul development pattern. It is all based on choice. Therefore it is not possible for you to interfere with another's choice to acquire knowledge or not and how it is or is not done. There is no need to try to alter another's perceptions because that would be

to interfere with free will. If one chooses to be obsessed rather than to be illumined, that is their choice!

Q: (L) We talked about the planet Martek. Is this an ancient human name for Mars or is it an Alien designation?

A: Combination of both as were many things at various levels of the development of your history.

Q: (L) The remark was made that the planet earth, prior to its interaction with Martek, had a water vapor canopy. How was this water vapor canopy suspended?

A: The water vapor canopy was a natural element of the particular composition of your atmosphere at that particular measure point in space/time.

Q: (L) Was the gravity level the same as what it is now?

A: It was somewhat different. But not perceptible to you. That difference is part of the explanation of why that vapor canopy remained suspended.

Q: (L) Did that condition prior to the flood of Noah, the altered gravitational state as well as the water vapor canopy, was that condition more conducive to extended life spans than the conditions that exist on the planet now?

A: Not only those things but all the other conditions that existed on the planet at that particular point in space/time were more conducive to longer life spans. And, by the way, Noah is a symbolic message rather than an historical event.

Q: (L) Do you mean a historical event in the terms of Noah being in an ark or historical event in terms of the flood?

A: First of all, there was no Noah. Secondly there was no actual real flood as depicted in that story. Thirdly, the whole story was

a symbolic message as opposed to an actual event.

Q: (L) What did actually occur and what does the symbolism have to tell us?

A: It is a very broad representation. It simply means that there was a cataclysmic event that did envelop the whole planet at that time and that those that were ready to experience that as part of their soul development without exiting the body, were warned ahead of time. But not by trying to manipulate events, but by simply allowing faith to let them acquire knowledge and being naturally drawn into position to experience what they needed to experience to survive the event.

Q: (L) At that time was Martek drawn close to the earth and did it have water on its surface which the earth then robbed or borrowed?

A: That is very close to being the case. It is far more complicated than that so we will leave that at this time.

Q: (L) Tell me about the Nephilim.

A: That was a race of beings in the third level of density which came from an actual planet at another point in this particular galaxy also in the third level of density, who were taken, or shall we say kidnapped, reprogrammed and retrained by the Lizard Beings to act as enforcers during a particular era of what you would measure as your past.

Q: (L) What era was that?

A: That was an era... it would have been approximately 8 to 5 thousand years ago but there are also dates relating to 12 to 14 thousand years ago and others. Dating system is not ours and does not exist for us.

Q: (L) For how many years did these beings exist on our earth?

A: Approximately 15 to 18 hundred years. They died off because they were not able to reproduce naturally in the atmosphere of the earth and experimentation to try to cause them to intermix with the human population did not succeed.

Q: (L) When did the last of them die off?

A: Probably near 6 to 7 thousand years ago. But there is also a reference point of 12 to 14 thousand years as well.

Q: (L) What was the name of the planet they came from?

A: Dorlaqua.

Q: (L) Where was this planet located?

A: This planet was located in the Orion complex.

Q: (L) After the “flood of Noah” approximately how many people survived that cataclysm on the whole earth?

A: Approximately 19 million.

Q: (L) Why did the population of the earth continue to decline from that point?

A: Because of disease and inability to adjust due to artificial manipulations of the genetic pool.

Q: (L) What did the tower of Babel look like?

A: Looked very similar to your Washington monument. Which re-creation is an ongoing replication of a soul memory.

Q: (L) Would the great pyramid in Egypt still work if someone knew how to use it?

A: It still works today even though it isn't being artificially used. It was also a preservative chamber. If you were to walk inside the confines of the great pyramid and then leave the body, your

body would retain its structure for quite some time. This ability has contributed to the preservation of the actual structure.

Q: (L) What did the original face on the sphinx look like?

A: Looked like a representation of a feline and a human.

Q: (L) At one point in a previous transmission it was stated that the Lizard beings altered the human race after a battle for their own “feeding” purposes. Could you clarify this?

A: It would not be possible for these beings to completely control your existence. If it were you would not be able to do the things your race has done. There has been interference by the Lizard beings in the physical structure of the human beings for their own benefit. Remember what we told you before. They have been interfering with the time cycle experienced on this plane, for quite some time as you measure it. For 74 thousand years they have been interfering in a backwards and forwards time reference manner in order to set up circumstances that they perceive to be beneficial for them in the measure of time that you would consider to be forward, that is, in the future. They have been going backwards and forwards in time to do this. They are suspended in the time cycle as they do this. So what they perceive as being your equivalent of one hour could be as long as 74 thousand years.

Q: (L) So they haven't been here for 300 thousand years?

A: They originally set up circumstances for their benefit 309 thousand years ago, however, they have been using the particular bracketed period of the 74 thousand year period alter things in all the various ways mentioned earlier.

Q: (L) Now you mentioned the creators of your group as the super ancient ancestors called the transient passengers, what is the meaning of this term and who are these beings?

A: Transient passengers are not beings. Transient Passengers are unified thought form.

Q: (L) Why are they called transient passengers?

A: Because they transit all forms of reality. And they spring forth from the Unified form of existence.

Q: (L) The planet that was destroyed between Jupiter and Mars that we now know as the asteroid belt, you said was destroyed by psychic energy. Could you clarify that?

A: The occupants of that planet, many of whom are your soul ancestors, simply decided to develop a service to self atmosphere that was so super charged in the negative that it actually caused their home planet to be destroyed because the energy levels became so intense crashing back upon themselves that they actually destroyed the atomic structure of the planet, causing it to physically explode.

Q: (L) Was this done technologically or was it strictly done by mind power?

A: They are one and the same.

Q: (L) Did they do something like drop bombs?

A: No, no. This was done by psychic energy. There has been in a transient fashion of reality the danger of the same thing happening on your planet. Although we are quite confident it won't because we see all reality, past present and future. But, you must understand also that even in our particular perspective point, all reality is nonetheless fluid. There are still many choices of realities and possible futures and possible pasts and possible presents. But we feel fairly confident that that particular fate will not befall your planet, although it did the one then known as Kantek.

Q: (L) On a couple of occasions it has been mentioned that Yasser

Arafat was a fifth density soul and that he was a descendant of Jesus of Nazareth. What is there about him that demonstrates these qualities or these genetics?

A: Have you not seen? Imagine what it would be like to be Yasser Arafat. Look at your perception. What is he doing now?

Q: (L) Well the pro-Jewish point of view is not favorable to him.

A: Well, what you describe as pro anything is an obsession. And, as we know, obsession blocks knowledge which in turn blocks the ability to protect oneself against negative occurrences. Not a good idea. If you were following circumstances, Yasser Arafat is now trying to take the world upon his shoulders by making peace with the Israelis who have been enemies for a very long time. And, therefore, he is now a peace maker and knowledge dispenser.

Q: (L) In that particular conflict between the Jews and the Arabs, which side has the greater validity?

A: All sides have equal validity. It is only with individuals we find negativity or positivity.

Q: (L) In discussion of a purported crash of a space craft in Roswell, it was remarked that this crash was caused by ionization. Could you be more specific?

A: That reference simply means the bouncing of what you call radar beams off of the ions existing in the atmosphere at the time, caused electromagnetic disturbance which interfered the gravitational balancing system of that particular craft.

Q: (L) Why were the ions present at that time and not at other times?

A: The ions were charged at that time because of storm activity.

Q: (L) You said that there were bodies recovered by the government. How many bodies were recovered?

A: Three dead and one still in operation.

Q: (L) How long did the one live?

A: Remained in operation for approximately 3 and a half years. It was a robotic biogenetic being rather than a soul encompassing physical existence.

Q: (L) Did the government know that it was a robotic being?

A: No.

Q: (L) Do they still think it was a living being?

A: The government is not one individual. Some are now aware that these are biogenetic engineered beings.

Q: (L) In another transmission we were told that we would receive information from a different being each time of contact in order to get good information. Why is this?

A: That is to make sure that balance and equilibrium is maintained and also informational sources are fresh in the interaction between the giver and the receiver.

Q: Well, that is it for tonight. Thank you.

A: Good Night.

END OF SESSION

2.14 October 23, 1994

Frank, Laura, VG

See the October 22nd session – direct channeling with Frank – for context.

Q: (L) Hello.

A: Hello. Join mirth Laura.

Q: (L) I am not unmirthful. Who is with us tonight?

A: Onokoia.

Q: (L) Where are you from?

A: Same.

Q: (L) Are you a Cassiopaeon?

A: Yes.

Q: (L) Last night we tried direct channeling through Frank, I was not entirely satisfied with the results. Can you tell me what the status was and should we pursue that avenue?

A: Yes.

Q: (L) Was Frank operating as a clear channel last night?

A: Partly.

Q: (L) What was the nature of the interference?

A: Static electromagnetic.

Q: (L) What was the origin of this static?

A: Various. Channels must be grooved as this one has been.

Q: (L) Is it correct that we should persist with practice for him to become a clear channel?

A: Yes.

Q: (L) How often should we do this?

A: Open, but one time per week would be work.

Q: (L) How long will it take to “groove” or clear the channel?

A: Open.

Q: (L) Was the trance technique acceptable?

A: Choose another.

Q: (L) Could you give a suggestion?

A: Opening.

Q: (L) So I should suggest another thing for the opening of the channel?

A: Good idea: subject, you are drifting, falls, etc.

Q: (L) What visual image should I give him in suggestion to open the channel?

A: Up to you. You are now probing in lieu of learning.

Q: (L) E___ L___: Can you tell me about her physical condition?

A: Thyroid and Estrogen count. Psychological problems caused by thyroid.

Q: (L) Is there anything wrong with her heart or her aorta?

A: Thyroid.

Q: (L) How long after mankind was engineered by the Cas-siopaeans did they live on the earth in a harmonious, Edenic, condition before the zapping by the Lizards?

A: Mankind was not engineered by us.

Q: (L) Well, were we created by you?

A: No.

Q: (L) Well, then how did mankind come to be here?

A: Combination of factors. Numerous souls desired physical existence then was altered by three forces including principally Lizards through Grays, Nephilim and Orion union.

Q: (L) Tell us again who are the Nephilim?

A: Enforcers. Slaves of Orion. From Planet 3C, or 3rd star, 3rd planet.

Q: (L) You said the other night that the Nephilim came from some area around the constellation Scorpio, is that correct?

A: Originally seeded there but you were too.

Q: (L) We were originally seeded somewhere else? Where? Orion? What is the name of that planet?

A: D'Ankhiar. Ankh is ancient symbolism of this planet. Is female symbol. Stands for mother planet.

Q: (L) Is this other planet our original home?

A: Yes.

Q: (L) What is it like back Home?

A: Spent. Cindered. Burned up.

Q: (L) So it's true, you can't go home?

A: Yes.

Q: (L) These Nephilim, how tall were they again?

A: Up to 15 feet maximum.

Q: (L) Was Goliath, who was killed by David, one of the Nephilim?

A: Yes. In legend. Actual event depicted in story was earlier.

Q: (L) Was it actually David and Goliath?

A: Yes.

Q: (L) Did he actually slay him with a stone from a slingshot?

A: Close.

Q: (L) Were these Nephilim genetically intermixed with human beings?

A: Temporarily.

Q: (L) Why only temporarily?

A: DNA conflict.

Q: (L) Were they smarter than us?

A: No.

Q: (L) Were they bigger and dumber?

A: No.

Q: (L) About the same?

A: Yes.

Q: (L) Was it difficult for them to live on our planet because of their size and gravity and so forth?

A: Yes.

Q: (L) Did they have physical problems here?

A: Yes.

Q: (L) And when did the last of them die off?

A: 6000 B.C. Approximately. One reference.

Q: (L) When were they originally brought here?

A: 12000 B.C. approx. one reference. Please understand your measurements don't make sense.

Q: (L) Let's go back to the three forces. You said numerous souls desired physical existence. When the numerous souls did this, how did physical existence come to be?

A: First was apelike.

Q: (L) And then what happened? Did these apelike being just pop into the air? What did the souls do with these apelike beings?

A: Souls altered them by transfer.

Q: (L) Transfer of what?

A: Souls into seeded bodies. Orion Union was first into Neanderthal.

Q: (L) The Orion souls came into Neanderthal bodies?

A: No. Put humans there for incubation process.

Q: (L) Were altered ape embryos put back into ape females for gestation?

A: No. Souls only.

Q: (L) They put the souls into the ape bodies?

A: Close.

Q: (L) Did the soul's presence in the ape body cause its genetics and DNA to change?

A: Yes.

Q: (L) They entered into living creatures on this planet to experience 3 d reality and by entering in caused mutation?

A: Yes.

Q: (L) Then were altered by Orion Union first. They resemble you.

Q: (L) Who resembles us?

A: The Orions.

Q: (L) We haven't talked too much about the Orions...

A: Orion Union. There are others in Orion Community.

Q: (L) Are some of the Orions not good guys as we would term it?

A: Yes.

Q: (L) Are some of them good guys?

A: Yes.

Q: (L) So, you are saying that the original creators or genetic engineers were Orions?

A: Close. The original engineers but not inhabitants.

Q: (L) Where did the souls come from that entered into the bodies on the planet earth? Were they in bodies on other planets before they came here?

A: Not this group.

Q: (L) Were they just floating around in the universe somewhere?

A: In union with the One. Have you heard the Super ancient legend of Lucifer, the Fallen Angel?

Q: (L) Who is Lucifer?

A: You. The human race.

Q: (L) Are the souls of individual humans the parts of a larger soul?

A: Yes. Close. The One. All who have fallen must learn “the hard way.”

Q: (L) Are you saying that the act of wanting to experience physical reality is the act of falling?

A: You are members of a fragmented soul unit.

Q: (L) What is it about wanting to be physical is a “fall”?

A: Pleasure for the self.

Q: (L) How many people on the planet know what you are teaching us?

A: A few.

Q: (L) Are we “special” in some way to receive this?

A: All are special.

Q: (L) How many know?

A: 8 so far.

Q: (L) Will we be able to teach others?

A: Up to you.

Q: (L) Who are the others?

A: No contact right now.

Q: (L) Did, at any time, the human race live for a long time in an Edenic state, where they were able to use bodies and still have a spiritual connection?

A: Yes. But not long. No addiction takes long to close the circle.

Q: (L) So, mankind was addicted to pleasuring the self?

A: Became quickly.

Q: (L) How long from the time of the moving of souls into bodies did the “Fall” in Eden occur?

A: Not measurable. Remember Laura, there is no time when this event occurred. Time passage illusion did not exist at that point as well as many other falsehoods.

Q: (L) So you are saying that the Fall in Eden was also the beginning of time?

A: Yes.

Q: (L) These many other falsehoods that you mention, could you tell us about a couple. We know that the first one is time...

A: You must learn on your own.

Q: (L) {One of my kids} wants to know what the Loch Ness Monster is?

A: Serpent. 40 feet long average. There are 51 in the lake. They live in underwater cavern system and are leftovers from pre-cataclysmic times.

Q: (L) Are there any huge monsters at the bottom of the ocean?

A: Giant squid about 1000 feet long. There are about 20,000 of them more or less.

Q: (L) Are there any leftover dinosaurs in the jungles of Africa or South America?

A: No.

Q: (L) Is a vegetarian style of eating good for one?

A: Not usually.

Q: (L) What did human beings eat before the Fall?

A: Vegetarian.

Q: (L) So, until we go through the transition we are not really designed to be vegetarian?

A: Correct.

Q: (L) Would we be able to use this source to do readings for other people to give them information that they need?

A: Open.

Q: (L) Would you be willing to help us to give readings for other people?

A: OK.

Q: (L) I would like to know if the teachings of Gurdjieff were in any way accurate or near the truth?

A: Open.

Q: (L) We would like to know the source of information coming through Billy Meier?

A: Grays.

Q: (L) He is not channeling Pleiadians?

A: Was but not now.

Q: (L) Are the Minturians associated with the Lizzies? {Name of alien group given in a text we had read in Val Valerian's "Matrix", I believe.}

A: Yes.

Q: (L) Are the Minturians assisting in abductions?

A: No.

Q: (L) Are the Minturians on the planet at this time?

A: No.

Q: (L) Are they nearby our planet?

A: No.

Q: (L) Are they in any way involved with the activities going on on the planet at this time?

A: No.

Q: (L) Are they slaves of the Lizzies?

A: No.

Q: (L) Are they living on a free will planet?

A: Yes. All are.

Q: (L) How tall are they?

A: 11 feet tall average but in 4th density realm.

Q: (L) Do they eat?

A: No.

Q: (L) Do they reproduce?

A: Mechanically.

Q: (L) When the earth becomes 4th density will we still eat?

A: Differently.

Q: (L) Will we still reproduce?

A: Differently.

Q: (L) Will people still have sexual relations?

A: Wait and see for yourself. Absorb nutrients through the skin.

Q: (L) In the same way as the Lizzies and Grays do?

A: They are 4 level.

Q: (L) And they also absorb nutrients through their skin?

A: Yes.

Q: (L) What nutrients do they use?

A: Many.

Q: (L) What source do they use for these nutrients?

A: Answered by Frank previous session.

Q: (L) Are you saying that we will be feeding ourselves the same way?

A: No.

Q: (L) Is it true they throw people in the blender and then absorb their bodies.

A: Close.

Q: (L) Was Jeffrey Dahmer abducted by the Lizzies at an early age?

A: Yes.

Q: (L) Did he get his perversions from the Lizzies?

A: Yes.

Q: (L) Is he genetically connected to the Lizzies?

A: No.

Q: (L) I have a book in the bedroom called The P'taah Tapes channelled by a gal named Jani King. Who is Jani King channelling?

A: Herself.

Q: (L) We want to know about the Ra Material by Elkins, Rueckert and McCarty, where is the Ra Material coming from?

A: Us.

Q: (L) Would you say that the Ra Material comes through a clear channel?

A: Yes.

Q: (L) If we had a book with the inscriptions from the city of Mohenjo Daro, would you be able to translate them for us?

A: Maybe.

Q: (L) Who built Stonehenge?

A: Druids.

Q: (L) Who were the Druids?

A: Early Aryan group.

Q: (L) How did they move the stones and set them up?

A: Sound wave focusing; try it yourself; coral castle.

Q: (L) Who taught the Druids to use the sound waves?

A: They knew; handed down.

Q: (L) When was Stonehenge built?

A: 6000 approx. B.C.

Q: (L) What was Stonehenge built to do or be used for?

A: Energy director.

Q: (L) What was this energy to be directed to do?

A: All things.

Q: (L) Was the energy to be directed outward or inward to the center?

A: Both.

Q: (L) Are you suggesting we should get together and try to move something with sound?

A: Yes.

Q: (L) Does this sound come from our bodies?

A: Learn. Laura will find answer through discovery.

Q: (L) It says in the Kaballah that when a group meets regularly with intent and purpose to acquire spiritual awareness, that they create what is called a vessel. Is this what we have done these past three years?

A: Yes.

Q: (L) Now, since we have created this vessel, into which this information can flow, can we add other people to the use and benefits of this vessel?

A: Maybe.

Q: (L) We have heard about a movie called The PuppetMaster, is this movie a depiction of truth?

A: Close.

Q: (L) Were the events surrounding the death of JFK depicted correctly in the Oliver Stone movie, JFK?

A: Close.

Q: (L) Is it true that he was shot by one of his own bodyguards?

A: No.

Q: (L) Why was he killed?

A: Corruption.

Q: (L) Was he the one who was corrupt?

A: Too many facts to discuss in this medium.

Q: (L) Did Marilyn Monroe commit suicide?

A: No.

Q: (L) Was she murdered?

A: Yes.

Q: (L) Was she murdered because of her connection with JFK?

A: Yes.

Q: (L) What did she know that made them want to murder her?

A: A lot.

Q: (L) Who was the man in the velvet or iron mask who was imprisoned by Louis xiv?

A: An heir to the throne.

Q: (L) If that was an heir, what relation was he to the king?

A: Bastard son. Using your terminology.

Q: (L) Did Elvis Presley really die?

A: Yes.

Q: (L) Is he really in his grave?

A: Yes.

Q: (L) Did he die of an overdose?

A: Close. Heart attack.

Q: (L) Do the tabloids print truth about UFOs?

A: Very often.

Q: (L) Was the woman who reappeared in Berlin who said she was the Princess Anastasia really who she said she was? {There have been books claiming she was not, that a DNA test on a tissue sample proved she was not. However, this was done after she had died and there were powerful reasons to dismiss her claims so there was motivation to either fake this test or replace the tissue sample with another. The most compelling book about her claims used sophisticated analysis – including intel agency developed ear matching techniques – to prove that she was the Grand Duchess, Anastasia.}

A: Yes.

END OF SESSION

2.15 October 25, 1994

Frank, Laura, VG

Q: (L) Who do we have with us tonight?

A: Batuva.

Q: (L) Are you a discarnate earth spirit?

A: No.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Are you prepared to answer our questions this evening?

A: Yes.

Q: (L) The first question is what is the meaning of the winged circle that is so common throughout ancient religions?

A: Life energy.

Q: (L) Why was life energy represented this way?

A: Closed circle. Free spirit in closed circle.

Q: (L) What is the meaning of the eye of Horus?

A: Psychic energy.

Q: (L) What was the origin of the serpent god?

A: Lizard rule.

Q: (L) Who appeared to Joan of Arc?

A: Lizard projection.

Q: (L) What is the true origin of Halloween?

A: All Hallows Eve.

Q: (L) Is there something older than that?

A: No.

Q: (L) Are there alien bases on the Moon?

A: Yes.

Q: (L) Who do the bases belong to?

A: Grays.

Q: (L) Was there ever at any time such a thing as mermaids?

A: No.

Q: (L) What is the origin of this legend?

A: Sailors delirium.

Q: (L) Are there alien bases on Mars?

A: Yes.

Q: (L) Whose?

A: Grays and Lizards.

Q: (L) The kids want to know what the giant squids eat?

A: Various things.

Q: (L) Do they have a purpose for being on the planet?

A: Does anything?

Q: (L) Does it?

A: We asked you. Rhetorical question.

Q: (L) The kids also want to know how long it takes a squid to grow that big and how long they live?

A: 200 to grow and live up to 700 years.

Q: (L) What procedure or technology do the Grays use to pass through solid matter?

A: Transdimensional atomic rearrangement.

Q: (L) How do aliens transport themselves or others on beams of light?

A: By electron focusing and previous answer.

Q: (L) How do aliens create the virtual reality scenarios as described in Karla Turner's second book?

A: Mental image restructuring.

Q: (L) Why does this phenomenon involve the use of the "blue bubble" or light?

A: Hypnotic suggestion trigger.

Q: (L) What is the basis of the Gnostic texts such as the apocryphon of John?

A: Ancient atheists.

Q: (L) What was the energy fueling the crazy sick life of Aliester Crowley?

A: Lizards.

Q: (L) Are Lizards responsible for paranoid schizophrenia?

A: Some.

Q: (L) In a general sense, in the majority of cases, what is the cause of paranoia or schizophrenia?

A: Lizard manipulation of energies.

Q: (L) Why?

A: To feed off the negative results.

Q: (L) So it isn't necessarily attachments?

A: No.

Q: (L) Do Lizards use attachments of dark energies to effect their purposes?

A: Yes.

Q: (L) In a lot of cases of paranoid schizophrenia are attachments used?

A: Yes.

Q: (L) Are they perpetuating schizophrenia through genetics?

A: Can. Or mental and emotional. Environmental life experiences.

Q: (L) Why does it not usually show up until adolescence? Is this because adolescents are being abducted and having implants put in?

A: Not necessarily.

Q: (V) Do I have an implant in my right ear?

A: Yes.

Q: (V) It has been going off a lot lately.

A: Caused by your interactions with these powerful channels.

Q: (V) What do you mean by powerful channels?

A: Laura and Frank.

Q: (V) Are they Lizard implants?

A: Yes. Monitoring heavily lately.

Q: (V) When did I get the implants?

A: Age 3.

Q: (L) How come Frank and I cause her implant to Buzz? **(V)** It buzzes when I'm not with you guys, too.

A: Set off.

Q: (L) Does that mean that we are controlled by Lizards?

A: They are concerned by VG's communication with us through you.

Q: (L) What is their concern?

A: Losing mole.

Q: (L) As in espionage terminology.

Q: (L) Is VG a mole?

A: Were subconsciously.

Q: (L) VG wants to know if she is detrimental to the project by being here?

A: No. Beneficial but the Lizards may resist.

Q: (L) How would they do this resistance?

A: Make her life more difficult just like they have with you two.

Q: (V) But it seems that my life is more on track that it has ever been before?

A: Watch out. Too late to leave project.

Q: (V) I just heard something in my left ear. Is that also an implant?

A: Yes.

Q: (V) Do they know what we are doing right at this moment?

A: Yes.

Q: (V) Should I stop and go home?

A: Up to you.

Q: (L) Why do the implants go off when they do?

A: Monitoring. They have reasons to monitor when they do. They can turn on the monitor and read everything that has gone on since the last monitoring. It is done at their convenience.

Q: (V) Do I have an implant in my left sinus which causes thick discharge?

A: Yes.

Q: (V) Am I going to be able to blow it out?

A: No.

Q: (L) I want you to translate for me this phrase: Enuma elish lanabu shamamu.

A: All are seen together.

Q: (L) Translate: Apsu.

A: Life.

Q: (L) Nudimmud.

A: World.

Q: (L) Marduk

A: Mars.

Q: (L) Kingu

A: Light.

Q: (L) Duggae

A: Ground.

Q: (L) What is the Enuma elish really about?

A: Ascent.

Q: (L) Ascent of what?

A: Gods.

Q: (L) What gods were these?

A: Lizards.

Q: (L) How many planets did the Sumerians know about?

A: They thought 12.

Q: (L) What is a “tablet of destinies”?

A: Map.

Q: (L) How did Marduk slay Tiamat?

A: Wrong.

Q: (L) Marduk did not slay Tiamat?

A: No.

Q: (L) What did it mean when it said “putting Tiamat’s head into position?”

A: Mars conjunct Moon.

Q: (L) How did Tiamat’s head form the “hammered bracelet”?

A: Comet trail.

Q: (L) Is the Quorum composed of members who are humans on this planet?

A: Partly.

Q: (L) Would we know any of them as well known figures?

A: Hidden. None you would know.

Q: (L) How is the Quorum important in regard to the Earth changes?

A: Watchers.

Q: (L) Why is it important to have watchers?

A: Keep track of prophecies.

Q: (L) How do the Masons relate to the Illuminati?

A: Masons are low level branch.

Q: (L) I would like to know the approximate years of the life of Hermes Trismegistus.

A: 5211 approx. (Years ago or B.C.?)

Q: (V) What were the red and green balls of light E {her son} saw several months ago?

A: Grays probing.

Q: (V) Was he abducted at that time?

A: No.

Q: (V) Were the probes there because of him or because of me?

A: Him.

Q: (V) Has he ever been abducted?

A: Yes.

Q: (V) How old when first abducted?

A: Two.

Q: (VG) {My son's} dream of being choked?

A: Past life memory disconnection.

END OF SESSION

2.16 October 28, 1994

Frank, Laura, V_____

Q: (L) Hello.

A: Hello.

Q: (L) Is someone with us?

A: As always.

Q: (L) Can we have your name please?

A: Gursaea.

Q: (L) Are you a discarnate human?

A: No.

Q: (L) What are you?

A: Cassiopaeon.

Q: (L) There were two little boys stolen from their mother in South Carolina, we would like to know if we can obtain any information regarding this matter?

A: House in Union South Carolina in closet.

Q: (L) Can you give us any details about the house and how it could be found?

A: On street with lots of other houses white clapboard.

Q: (L) Any other details? Name of street?

A: Oak in name.

Q: (L) How close is this to where their parents are?

A: Close.

Q: (L) Where is the vehicle?

A: In woods West.

Q: (L) Are the little boys alright?

A: Will be found soon for comparison to ultimate results.

Q: (L) Why am I having these current headaches?

A: Changes DNA

Q: (L) A___ suggested an ozone generator to enhance the contact. Is this a good idea?

A: He means well. Have him supply it.

Q: (L) Is it alright for me to send the edited version of our transcripts to A__ B__?

A: B__ may share with questionable individuals.

Q: (L) Will that be detrimental to us?

A: What do you think?

Q: What was B__'s purpose in calling me today?

A: Curiosity generated by UFO grapevine gossip.

Q: (L) What was the gossip?

A: W__ and F__ inspired intrigue.

Q: (L) Do these two have more contact than we would think?

A: Yes.

Q: (L) W__ and F__?

A: Yes.

Q: (L) W__ hates F__, isn't that correct?

A: Variable.

Q: (L) Should I not share information with J__?

A: All is learning process.

Q: (L) Are they all in a tizzy about what we are doing here?

A: Generally yes. T__ and J__ are OK.

Q: (L) So T__ and J__ are not saying anything to W__ or F__ about this?

A: Yes. But that's not the point.

Q: (L) What is the point?

A: Motives are good omnipresently.

Q: (L) What do you mean by that? Are we talking just about J__ and T__?

A: Yes.

Q: (L) Are B__'s motives good?

A: Variable.

Q: (L) Are J__'s motives good?

A: Same.

Q: (L) Would J__ ever do anything that would damage me or this work?

A: Search within self for answer.

Q: (L) Why should we take the Melatonin?

A: Is mild hallucinogen.

Q: (L) Why do we need this?

A: Keeps exercising psychic abilities and opens paths. Don't be alarmed by vividly erotic dreams.

Q: (L) Should we expect to have vividly erotic dreams?

A: Possible as psyche passes through levels on ascension.

Q: (L) Is there a problem with the energy level tonight?

A: With board.

Q: (L) What is wrong with board.

A: Getting crumpled.

Q: (L) We need to get a new board?

A: Good idea.

Q: (L) If I get a piece of glass to put on the board and felt for the planchette will that do it?

A: Maybe.

Q: (L) Better to get a new board?

A: Open.

Q: (L) I wonder if there is a chance of getting the old Lizzies involved if we are not careful about who we tell?

A: Always chance of that.

Q: (L) We would like to have a rundown of certain UFO related individuals:

Q: (L) William Cooper?

A: Independent; good intentions; slightly overactive imagination; a little misled.

Q: (L) Bob Lazar supposedly worked on alien craft retro-engineering?

A: Did but sinister. Involved with questionable types.

Q: (L) His video about working at area 51 and descriptions of propulsion systems and alien craft was or was not truth?

A: Close to the truth. Craft tech: minor points were off.

Q: (L) What about Stanton Freidman?

A: Pure, good man.

Q: (L) William Moore who co-wrote the Roswell incident with Charles Berlitz?

A: Same as Friedman.

Q: (L) What about the incident where he admitted to disinformation?

A: Was coerced to say that by complex sources. That situation is very complex.

Q: (L) What about Jaime Shandera?

A: Misled by same as Moore. Has mixed intentions.

Q: (L) What about Don Ware?

A: Disinformation artist.

Q: (L) What about John Lear?

A: Good but overcareful.

Q: (L) What about Dr. Richard Boylan whose book I just read? This guy says he had an experience where he was abducted and overnight his attitude about aliens changed. Who was responsible for that abduction that changed his attitude?

A: The Grays changed Boylan's attitude.

Q: (L) What was the motivation in doing so?

A: Get him to dispense selective info.

Q: (L) What is the intent of this selective information?

A: Confuse investigators.

Q: (L) Was his mind taken over when the Grays abducted him?

A: In a sense.

Q: (V) A Navy plane crashed on Tuesday, why did the plane crash?

A: Guidance system malfunction.

Q: (V) Why wasn't the pilot able to eject?

A: It was her time to go.

Q: (V) So none of this had anything to do with Aliens?

A: No.

Q: (V) I listened to a woman named Janet Dailey who says that women who have abortions have a higher incidence of breast cancer but that spontaneous abortion or miscarriage do not cause the same reaction, is this true?

A: Yes. But women who have their first pregnancy later in life also have higher instances of breast cancer and same for those who never get pregnant.

Q: (V) Does abortion create karma resulting in breast cancer?

A: Hormonal anomalies cause breast cancer. Karma is interconnected with physical experiences.

Q: (L) Are you saying that having an abortion can create Karma?

A: Of course.

Q: (V) Is this research funded by pro-life activists?

A: Some.

Q: (L) I think that V__ wants to ask if she has Karma in this regard?

A: Yes.

Q: (L) She has not worked it out?

A: No.

Q: (L) Bill Baldwin says abortions lead to serious spiritual attachment situations. Is this true?

A: Semi-accurate.

Q: (L) Is there some way to release this kind of karma for V__ or others who have it?

A: Yes.

Q: (L) Could you tell us?

A: If we tell you, you won't learn.

Q: (L) Now, several people have told me that there is a small child who is with me constantly, who is she and why is she here?

A: Next in line.

Q: (L) Next in line for what?

A: Birth.

Q: (L) Am I going to have another child?

A: Maybe.

Q: (L) How many are there in line?

A: One.

Q: (L) Male or female?

A: Female.

Q: (L) Is this to happen within the next year?

A: Open.

Q: (L) I am 42 years old. If I were to get pregnant would I be able to have a normal pregnancy and produce a healthy infant?

A: Yes. Your consciousness will soon give you spectacularly sharp, exact and correct information.

Q: (L) Will this be due to ingesting the Melatonin?

A: Partly.

Q: (L) Is soon within a month?

A: You will know.

Q: (L) I get the feeling that this has a lot to do with trusting my own intuition.

A: Yes.

Q: (L) I had a very serious physical attack yesterday. What was the nature of that attack?

A: Gallbladder.

Q: (L) What should I do about it?

A: See ultrasound specialist.

Q: (L) Will Reiki heal it?

A: Open.

Q: (L) When V__ had her hands on my heart area and they were visually vibrating. Is that a sign of transmission of a great deal of energy?

A: Yes.

Q: (L) And what part of the body was that energy going to?

A: Chest area.

Q: (L) V__'s hands are tingling right now. Is that Reiki energy happening right now?

A: Yes.

Q: (V) Is my Reiki energy going to Frank and Laura as we are doing this?

A: All ways. You have strong natural healing power.

Q: (V) So, it isn't necessarily the Reiki initiation?

A: No. A__ is misguided.

Q: (L) If V__ had the correct initiation would this power her up so that she could do near miracles?

A: Precisely.

Q: (V) Does E__ also have this ability?

A: Some ability.

Q: (L) This evening E__ was acting up, what was going on with him?

A: Hormonal upsurge.

Q: (V) Is this due to interacting with females?

A: Close.

Q: (V) Female energy?

A: More physical.

Q: (V) Are they having a good time?

A: Fluctuating.

Q: (V) Is L__ o.k.?

A: Yes.

Q: (V) How much longer do I have to deal with this Hormone thing with E__?

A: 6 years.

Q: (L) Is patience the key?

A: Yes.

Q: (V) Can Reiki clear marijuana residue from the lungs?

A: Partly but what if there are continuous infusions?

Q: (L) Is there ever a case when ingestion of pot or alcohol are beneficial in a spiritual way?

A: Yes.

Q: (L) V__ used pot within past two weeks, why?

A: Search within.

Q: (L) Was it an outside influence?

A: All uncomfortable events are influenced either directly or indirectly.

Q: (L) Was this the passing of her uncle?

A: Search within.

Q: (L) Many years ago I was with a friend and we pulled off the road to let me drive. We both walked around the car and got in and I believe we sat there for a very long time. Was that because of the potency of what she had smoked or what?

A: You were abducted due to the open state produced by the drug.

Q: (L) What was in that stuff?

A: Strychnine.

Q: (L) Have I done great physical damage to my body through drugs?

A: Some.

Q: (L) Is it irreversible?

A: Not likely.

Q: (L) If I went on a fast would I be able to reverse the damage to my body?

A: Good chance.

Q: (L) Is that the same for Frank and V__?

A: Yes.

Q: (L) Is it advisable to take colonics with the fasting?

A: Good idea.

Q: (L) Also to take vitamin supplements?

A: No.

Q: (V) Is the Godspark the portion of the Creator that lives within us, the soul, so to speak?

A: Sounds good.

Q: (L) If the godspark is the soul within us, does anybody have godsparks times 2 or 3 or so on? That is more than others?

A: Yes.

Q: (L) What type of person would have more Godspark than anybody else?

A: Jesus has Godsparks ad infinitum.

Q: (L) How does Jesus have Godsparks ad infinitum?

A: Soul replication for communication purposes.

Q: (L) So, every time we call upon Jesus, we are replenishing our Godspark?

A: Yes.

Q: (L) Would you describe these soul replications as being more like a template or hologram?

A: Hologram.

Q: (L) And what is his connection to the Creator that enables him to do this soul replication?

A: Volunteered.

Q: (L) Rudolf Steiner called Christ “The most sublime human principle ever to unfold on earth,” is this an accurate statement?

A: One interpretation.

Q: (L) He also said: “The Christ, who in the course of this evolution lived 3 years in the body of Jesus of Nazareth...” Is this a correct statement? Did the Christ statement enter Jesus at age 30?

A: Formed then.

Q: (L) How did this sublime being, the Christ, dwell in a human body?

A: Natural process caused by supremely pure faith and thought.

Q: (L) Yet previously you said that Jesus had sexual relations with women after he was Christed, is that correct?

A: No. Before.

Q: (L) So, after he was Christed he had no sexual relations?

A: Correct.

Q: (L) Did the Christ spirit descend into the body of Jesus in his 30th year?

A: No.

Q: (L) What happened?

A: Formed within him. And it could do thusly in anyone who reaches such levels of service to others plus faith and supreme levels of pure thought.

Q: (L) What was the source of the belief that Christ descended into hell during the course of his so-called death?

A: Superstitions created hundreds of years after his work.

Q: (L) When is the credit/debit card system going to be put into effect?

A: 4 to 11 years.

Q: (L) According to shamanistic teachings, one can have animal spirits or guides. Is this correct?

A: Partly. You have them if you believe you have them.

Q: (L) If believing in them makes it so, is this belief beneficial?

A: All belief is beneficial at some level.

Q: (L) Did Jesus of Nazareth believe in animal spirits or totems?

A: No.

Q: (L) Is it just New Age revival of superstition?

A: Shamanism is subjective and limits. Lizard inspired.

Q: (L) This book that is being promoted, M.A.P., what is the inspiration behind that book?

A: Not good.

Q: (L) Just for fun, If I had an animal spirit what would it be?

A: Peacock.

Q: (L) Frank?

A: Deer.

Q: (L) V__?

A: Cat.

Q: (L) Do the Cassiopaens have pets?

A: Not exactly.

Q: (L) What do you guys do for fun?

A: All is fun when perceived correctly.

Q: (L) Should I hook up to the computer internet to use as a source to propagate channeled messages?

A: Yes. Go for it.

Q: (L) Does Frank need Caffeine as he takes it.

A: Up to him.

Q: (L) Is this beneficial to him?

A: Believe it or not, yes.

Q: (L) Is it good for V__?

A: Yes. Adjusts your thinking and vice versa.

Q: (L) Is smoking detrimental to any of our bodies?

A: Not if mild. Not if mind is in right mode.

Q: (L) Does smoking enhance psychic abilities?

A: Yes.

Q: (L) Is it true that the government program to stamp out smoking is inspired by the Lizzies?

A: Yes because they know it may heighten psychic abilities.

Q: (L) What is causing the lung cancer they are attributing to smoking?

A: Mental conditioning and subliminal programming to expect it.

Q: (L) So, it only happens if you are convinced that it can and must happen?

A: Correct.

Q: (L) Is there any particular brand of cigarettes to smoke?

A: No.

Q: (L) Should I accept a job offer?

A: Will take you away from this work somewhat.

Q: (L) Would it be better if I turn it down?

A: Your inner self communicates this to you.

Q: (L) Is my idea to form a hypnosis association and teach and get clients thereby a good concept?

A: Up to you.

Q: (L) I get the idea sometimes that when you say “Up to You” that it may not be the best idea, is this correct?

A: Sometimes but not the only motivation.

Q: (L) V__ is jittery.

A: Mind control, V__. Try exercise.

Q: (L) Breathing or physical?

A: Physical.

Q: (L) “Bringers of the Dawn” advised spinning, is this advisable for all of us?

A: Major yes.

Q: (L) How many times a day?

A: 3

Q: (L) How many times?

A: 33

Q: (L) Is it ok to do it in the pool?

A: Okay.

Q: (L) Is the altar beneficial to have in one’s house?

A: Okay.

Q: (L) Is that okay beneficial?

A: Be careful not to jump to conclusions.

Q: (L) What conclusions? That the altar is okay beneficial. Is it highly okay for us?

A: No.

Q: (L) Mediocre okay?

A: No. No. No.

Q: (L) What?

A: Laura has been hurt by jumping to Lizard inspired conclusions.

Q: (L) So the altar is useless?

A: No. Just be careful remember metaphysical church group.

Q: (L) Is it a matter of misguided alliances?

A: Has been frequent problem.

Q: (L) Should I dismantle the altar?

A: Altar is okay but other things are not okay like silly rituals.

Q: (L) Is V__'s altar okay?

A: Yes.

Q: (L) Okay, during the period of time I was getting the hassle from the metaphysical church group, my pool was green. Was this symbolic of the attack I was under?

A: Yes but you left yourself open by association and buying too many concepts without careful examination.

Q: (L) Do you mean that, if, at that time, I had refused to acknowledge that any harm could come to me, that that would have made it impossible for any harm?

A: Close. But investigate before buying and practicing in future okay?

Q: (L) Investigate what? Ideas?

A: Yes. And concepts and especially practices

Q: (L) The ideas of candle burning, salt, sage, shamanistic rituals and so forth? Is all this useless?

A: Maybe.

Q: (L) Is sage not useful?

A: You are learning; remember when we say "good no ritual"?

Q: (L) In other words, your knowledge and your strength which comes from your knowledge and knowing is the point and the protection?

A: Precisely. This is extremely important.

Q: (L) Alexandra David Neel quoted a lama who said we must beware of the children of our own minds as well as the children of the minds of others, such as thought forms perhaps created by higher negative beings. If we do not acknowledge that such things exist, are we then subject to being devoured by them?

A: Ritual drains directly to Lizard beings.

Q: (L) Even our saying of the Lord's prayer?

A: It is okay to pray. Why do you think organized religion is obsessed with rituals?

Q: (L) Is the same thing true of shamanistic practices and so forth?

A: Exactly.

Q: (L) What occurred to make my pool clear up?

A: You restored your own energy.

Q: (L) And it had nothing to do with rituals?

A: Correct. In spite of rituals but you were lucky could have gone the other way.

Q: (L) What prevented this from happening?

A: Divine intervention. [energy surge]

Q: (L) Well, my life seems to have been full of incidents of Divine intervention. Is this true?

A: Yes.

Q: (L) What is the purpose of this intervention?

A: To preserve and prepare you for work.

Q: (L) What is this work?

A: You are extremely valuable to all on your planet.

Q: (L) What particular value? Is this common to all people?

A: No.

Q: (L) Is this something meaningful? What is the mission?

A: Faith in your opening channel; you will learn as you go. We cannot tell you all at once.

Q: (L) Since the energy is high at this time, we would like to know if you have anything to give in the form of a teaching?

A: Not ready for that yet; establish clear channel and forum first; one step at a time.

Q: (L) What is the forum?

A: What do you think?

Q: (L) Do you mean that we need to bring more people into this work?

A: Close.

Q: (L) We need to create a forum.

A: Yes. A direction will open if you persevere.

Q: (L) So things will be brought to us and happen for us if we just persevere?

A: Soon expect big opportunity.

Q: (L) I assume that we are not to ask what it is, we are to have faith, is that correct?

A: Yes. Danger you may misinterpret opportunity.

Q: (L) Should we all three be able to realize in congruence whether the opportunity is good?

A: Varying degrees.

Q: (L) If there is a danger we may misinterpret the opportunity, could you give us a couple of clues so that when it occurs we won't miss it?

A: At least one of you will have instant recognition but others may not. Wait and see.

Q: (L) This misinterpretation, does this mean we can count on this misinterpretation?

A: Open.

Q: (L) Are we an experiment?

A: Maybe.

Q: (L) How many others are receiving this level of information?

A: Less than 100 on entire planet. Less in this mode.

Q: (L) Are some of the others using other modes? What?

A: Many different ones.

Q: (L) Is channeling with three way energy as we are doing in a purer source of information than direct channeling through a single individual?

A: Equal.

Q: (L) Can any one of us do direct channelling?

A: All have equal potential.

Q: (L) Is A__ B__ attached in a major way?

A: Yes.

Q: (L) Is he going to order the Bill Baldwin book?

A: Yes.

END OF SESSION

2.17 November 2, 1994

Frank, Laura and V__

Q: (L) Hello.

A: Hello.

Q: (L) What is your name please.

A: Fori.

Q: (L) Why was Frank in such a state last night?

A: Because his life is difficult.

Q: (L) What is making his life difficult?

A: Destiny.

Q: (L) Is it his destiny for his entire life to be difficult?

A: Open.

Q: (L) Is that choice up to him?

A: No.

Q: (L) Well then, why is it open?

A: Will dark or light forces win?

Q: (L) Win what?

A: Battle.

Q: (L) Battle where?

A: All.

Q: (L) Well, I thought you said that the forces of light were definitely going to win? Is that not correct?

A: Too simplified.

Q: (L) Is there anything Frank can do in this battle to assist getting over this problem?

A: Fight.

Q: (L) Why does V__'s friend T__ snipe at her the way she does?

A: Jealousy.

Q: (L) So should she just keep all this information to herself?

A: Up to her. All will be okay. We feel important matters need discussion from here forward please.

Q: (L) Could you define important matters for us?

A: Of importance to all.

Q: (L) Who or what group is responsible for crop circles?

A: Us. You bet.

Q: (L) What is the purpose of the crop circles?

A: Messages to world. All.

Q: (L) Do these crop circles mean an idea, an energy, a concept; how do they transmit messages?

A: Translate; it can be done.

Q: (L) This one here, what does it mean?

A: You.

Q: (L) Do you mean the human race?

A: Yes. Symbol for human race.

Q: (L) What does this one mean?

A: Planet.

Q: (L) What was the meaning of the circle my husband found in his driveway?

A: Mars.

Q: (L) What message did that convey?

A: Astrological.

Q: (L) Did it convey any message other than astrological?

A: What does Mars represent?

Q: (L) War... anger, energy, struggle, assertiveness, sex, life...

A: First four.

Q: (L) Now, what does this circle represent?

A: Interdimensionality.

Q: (L) This one here, what does it represent?

A: Atomic structure.

Q: (L) This squiggly one, what does it mean?

A: Struggle.

Q: (L) In what way?

A: Learning from change and adversity.

Q: (L) Well, that is all the pictures I have...

A: Need more soon.

Q: (L) In the Library?

A: Maybe. This is of the utmost importance.

Q: (L) Is this going to help with the “forum?”

A: Yes.

Q: (L) Who carved the stone heads on Easter Island?

A: Lemurian descendants.

Q: (L) The natives say the stones walked into position. Is this true?

A: No.

Q: (L) Well, how?

A: Tonal vibration.

Q: (L) And what did these stones represent?

A: Nephilim.

Q: (L) Is this what the Nephilim looked like?

A: Close.

Q: (L) Does that mean that the Nephilim were present in Lemuria?

A: Close.

Q: (L) Where was Lemuria located?

A: Pacific off South America.

Q: (L) So when the Easter Island natives talk about their ancestors they are talking about people who came from the direction of South America?

A: No. Right near all around. Easter Island is remnant of Lemuria.

Q: (L) What happened to Lemuria?

A: Submerged close to time you refer to as Fall of Eden, approximately.

Q: (L) Well if the Nephilim were brought here 9 to 12 thousand years ago...

A: Last visit. Have been here 5 times. Will return.

Q: (L) The Nephilim are going to return? Where do the Nephilim currently live?

A: Orion.

Q: (L) They live in the constellation Orion? Where is their planet?

A: Don't have one. In transit.

Q: (L) The whole dadgum bunch is in transit?

A: Three vehicles.

Q: (L) How many Nephilim does each vehicle hold?

A: About 12 million.

Q: (L) Are they coming to help us?

A: No. Wave comet cluster all using same energy.

Q: (L) Using same energy to what?

A: Pass through space\time.

Q: (L) Does this mean that without this comet cluster they cannot pass through space/time?

A: No. Slower. message follows here. Quiet for one moment please: From now on when word to follow is in quotes we will designate as follows: mark then word then mark. Now, "slower."

{We installed quote marks on the board after this. From this point on, when words in the Cassiopaeian responses are in quotes, it is because they have so designated.}

Q: (L) So, it is slower for them to come here without this wave. Where is the wave coming from?

A: Follows cluster.

Q: (L) It follows the cluster. What does this wave consist of?

A: Realm border.

Q: (L) Does the realm border wave follow the comet cluster in a permanent way?

A: No.

Q: (L) Is the realm border loosely associated with the comet cluster each time it comes?

A: No. Realm border follows all encompassing energy reality change; realm border will follow this cluster passage and has others but not most.

Q: (L) Is this realm border a dimensional boundary?

A: Yes.

Q: (L) Okay, this realm border, do dimensions...

A: Pulsating realms. Fluctuating realms.

Q: (L) Is our realm fluctuating or pulsating?

A: No.

Q: (L) But this other realm does?

A: No.

Q: (L) What fluctuates?

A: Residence.

Q: (L) Whatever is in that realm fluctuates?

A: No. Your planet fluctuates between realms.

Q: (L) How often does this fluctuation occur?

A: About every 309,000 years.

Q: (L) In other words we can expect to be in 4th density for about 300,000 years?

A: Yes.

Q: (L) Does this mean that the Edenic state existed for about 300.000 years before the “Fall?”

A: Yes.

Q: (L) Now, you say these Nephilim are coming and there is about 36 million of them, correct?

A: Yes.

Q: (L) And they are the enforcers of the Grays and Lizzies, is that correct?

A: Yes.

Q: (L) Well, let’s sit back and watch the show! You are saying that the planet fluctuates...

A: No, realms do planet merely occupies realm.

Q: (L) What is the source in space/time of this other realm?

A: Too complex.

Q: (L) What is the generative source?

A: Part of grand cycle.

Q: (L) Is this the cycle understood by the Mayans?

A: They understood partially.

Q: (L) Their calendar extends to 2012... is that accurate as to the time of the realm border change?

A: Close. Still indefinite as you measure time. Lizzies hoping to rule you in 4th density. Closer to 18 years.

Q: (V) Is E__ {teenage son}home in bed?

A: Yes. and No.

Q: (V) He is at home but not in bed?

A: Yes.

Q: (V) Was he out earlier?

A: Yes.

Q: (V) Is this the same individual as before?

A: Yes. E__ going through many changes.

Q: (V) Is he asleep?

A: No.

Q: (V) Should I call him?

A: No.

Q: (L) Is the present arrangement better? [We had switched seats.]

A: No.

Q: (L) Better before?

A: Yes.

Q: (L) What was better?

A: You and Frank switch places.

Q: (L) Why?

A: Energy vortex.

Q: (L) If the Nephilim are coming 36 million strong as enforcers for the Lizzies, does the Confederation have a like amount for defense?

A: We don't operate that way.

Q: (L) Are we just going to have to fight them off ourselves?

A: Think of The Wizard of Oz. It was inspired by us.

Q: (L) Does the witch represent the Lizzies?

A: Yes.

Q: (L) So, is there something we have or can do...

A: Glenda like us.

Q: (L) And who is the Wizard? Is that the Beast or the U.S. Govt?

A: Close. Illuminati.

Q: (L) Are the monkeys the Nephilim.

A: Close enough.

Q: (L) If water destroyed the witch, and the witch represents the Lizzies, can we destroy the Lizzies?

A: Knowledge.

Q: (L) But there are only a few on the planet who have the knowledge, am I correct?

A: What do you mean? Against all when all when time comes.

Q: (L) So the 36 million will be against all on the planet when the time comes?

A: Of course.

Q: (L) And those who have the knowledge and can dispense it to others ...

A: Yes.

Q: (V) Have you inspired other movies we could watch?

A: We have but different meanings and subjects.

Q: (V) Is cocoon one of yours?

A: No. Hollywood.

Q: (L) Who were the original inhabitants of the city of Jericho?

A: Aramaic.

Q: (L) There was a stone tower at one of the lower levels, what was it built for?

A: Energy disbursement. Attempt to duplicate tower of Babel and Atlantean crystal towers.

Q: (L) Who carved the crystal skull found in Central America?

A: Mayans.

Q: (L) What was the purpose of that skull?

A: Study brain. Long message follows pause: Now: skull was to learn about soul; reflective remolecularization imaging. Grays do this with abductees.

Q: (L) Through what kind of instrument.

A: Energy focusing.

Q: (L) What is behind their eyes?

A: Camera like system.

Q: (L) Is that system also able to send signals?

A: Yes.

Q: (L) At what spectrum level?

A: Thought paralysis.

Q: (L) Do they implant thoughts with their eyes also?

A: Can.

Q: (L) What do they do with implants?

A: Monitor.

Q: (L) Do they monitor our thoughts?

A: Yes.

Q: (L) Do they monitor what we see?

A: Yes.

Q: (L) Hear and feel?

A: Yes.

Q: (L) Do the implants just monitor?

A: And control.

Q: (L) Do all of us have implants?

A: Yes.

Q: (L) Are we under the control of the Grays?

A: Attempt.

Q: (V) How many times have I been abducted?

A: 55

Q: (L) Laura

A: 12

A: A__: None.

Q: (L) J__: Yes.

Q: (L) Can I protect them from abduction?

A: Maybe. Tried A__.

Q: (L) What stopped it?

A: You.

Q: (V) When was I last abducted?

A: June.

Q: (V) Was that when I was perceiving being attacked...

A: Yes.

Q: (V) When I called on the hand of God did that help?

A: No.

Q: (L) Who carved friezes in French caves as well as the cave paintings?

A: People. Aryans. In caves because struggling to survive conflicts between many forces including Lizard being domination.

Q: (L) Why did the Egyptians draw sideways?

A: Atlantean method handed down. Simply artistic stylization.

Q: (L) What about the passages in the pyramid. Why so odd?

A: Used energy vortex for movement. Floated, levitated. Can still do this if you know how. In the pyramid the passages created the energy by their placement and relationship to other space/solid configurations. And passages sometimes changed their structure atomically and still do.

Q: (L) What is the purpose of the Sarcophagus in the “Kings” chamber?

A: Energy storage.

Q: (L) Was there ever anything in this object?

A: Yes.

Q: (L) What?

A: Many things.

Q: (L) So, there was nothing permanent in it, you could put various things in it for various reasons?

A: Yes.

Q: (L) In our machinery we generally have dials and tuners which can adjust the machine to do a specific job or deliver a particular amount or flow of energy. What was the equivalent of dials and tuning devices in the pyramid?

A: Thoughts.

Q: (L) Was it the thoughts of a person in there or of a specific individual whose job it was to do this “thinking?”

A: Both on occasion.

Q: (L) Could just anybody go into the pyramid, get into this sarcophagus, and have something done to them as they specified? Or, was it the culmination of some other long process?

A: All.

Q: (L) When you say that the passages changed atomically, did you mean that they might actually become larger or smaller?

A: Yes. And change position as well.

Q: (L) Is the theory of Petrie anywhere near correct?

A: In 1967 the U.S. Army Corps of Engineers did study. Look it up.

Q: (L) Was there ever at any point in time such a thing as a unicorn as is described in legends?

A: No.

Q: (L) What is source of this legend?

A: Atlantis beast was similar to unicorn. All died in cataclysm. Looked similar to horse and some had horn but not all.

Q: (L) What is the origin of the Sanskrit language?

A: Atlantis.

Q: (L) When the Aryans were brought here, were they brought to Atlantis?

A: No. The Aryans were different from the Atlanteans.

Q: (L) Is there any language in existence today that is descended from the Aryan language? Or, that has remained more similar in

development from Indo-European?

A: Yes. All Germanic.

Q: (L) Is Celtic considered to be one of these?

A: Yes.

Q: (L) What was the origin of the Minoan civilization?

A: Atlantean descendants.

Q: (L) What was “bull leaping?”

A: A test, a sport, a religious rite.

Q: (L) When Thera blew, it seems to have destroyed all the Minoan cities except for Knossos.

A: Thera was result of close passage by Maldek. Knossos was not destroyed because structures were fundamentally stronger and blast wave was perpendicular. Underground shelters saved a few of the people.

Q: (L) Knossos lasted for about another 75 years after the events which destroyed most of the Minoan civilization. What were the events which brought about the final downfall of the Minoans?

A: Meteor borne parasites. Meteor destroyed city.

Q: (L) The Mycenaeans built a city with a 50 foot thick wall. Why was this wall built so if the only dangers were warriors armed with spears and arrows?

A: Protected against frequent cataclysmic events during that period. It worked. Much of wall is still standing.

Q: (L) Now, when you talk about the comet cluster, as you have on many occasions, the technical definition of a comet is that it is a chunk of ice. Is this the case with the comets in this cluster?

A: And other substances, primarily iridium cores.

Q: (L) Now you say there are 36 million Nephilim heading this way, are they 4th density beings?

A: No. They live in 4 d but are 3 d. They are as physical as you. Behave like gestapo. Gestapo was inspired by Nephilim through Lizard beings' influence over Hitler. It was a practice run.

Q: (L) Are any of the Nephilim going to be friendly toward us?

A: No.

Q: (L) Now, you said that the Nephilim were seeded on a planet called D'Ankhiar as were human beings. When you said we were seeded there, what did you mean.

A: Was proper environment for molecularization.

Q: (L) Are you saying that the physical bodies on planet earth, the various types of mankind such as Neanderthal, Cro-Magnon, Australopithicus etc., were generated on that other planet and then brought here?

A: Yes.

Q: (L) I am assuming that if the Nephilim are 3 d that they die like we do. Is this correct?

A: Yes.

Q: (L) So, we can shoot them and they will die?

A: Correct. But wrong approach.

Q: (L) What is the right approach?

A: Knowledge protects.

Q: (L) Well, if a 15 foot tall guy comes at me and wants to knock me around, what is knowledge going to do to protect me?

A: You will be in 4th density.

Q: (L) So, before they get here we will be 4 d?

A: Crossing.

Q: (L) All three of us?

A: Yes, and many others.

Q: (L) So, we are not going to have to deal with the Nephilim?

A: Not correct.

Q: (L) Does this mean that there will be 3 and 4 d beings on the planet at the same time and that some will have to deal with these guys and some won't?

A: But you will have to too.

Q: (L) I don't understand. Are these Nephilim coming here to transition to 4 d also?

A: They already live there as 3 density beings. Demonstration: When you are abducted you are 3rd density but you are taken into 4th density.

Q: (V) In June I had a dream where I was taken up and there were light beings and I was also a light being; I was trying on different clothes. I was led into a room where I was told I could write there and when I was told it was time to leave, I had shoes on that had written on them "Earth Star". Was this an abduction?

A: Yes.

Q: (V) Talk about illusions, I thought that was a good thing! Was this a bad thing?

A: Subjective.

Q: (V) Who were the abductors?

A: Grays.

Q: (V) When I woke up I felt so tall and so electric. I thought it had been the best thing... that was my abduction in June?

A: Yes.

Q: (L) We would like to know about this plane crash. Early report from a witness said that there were no bodies. Is that the case?

A: No.

Q: (L) Where are the bodies?

A: Scattered.

Q: (L) What caused the crash?

A: Just like USAir. Was Lizard attack. Will be covered up.

Q: (V) The night before the USAir crash several of us had headaches and woke up drained.

A: Precognition and soul transfer of energy.

END OF SESSION

2.18 November 4, 1994

Frank and Laura

Q: (L) Hello.

A: Hello. Rocks.

Q: (L) What about the rocks? {We had been discussing large crystals on a nearby table.}

A: Put in sunlight for two days.

Q: (L) And what will that do?

A: Energize.

Q: (L) Energized to do what?

A: Provide power to you.

Q: (L) And who do we have with us tonight?

A: Rolla.

Q: (L) Are you a discarnate?

A: No.

Q: (L) Where are you from?

A: Cassiopaea. Did you see the article about the newly discovered galaxy?

Q: (L) Yes I did and I was curious about that. Is there something about that that you would like to tell us?

A: Our energy transference line to you.

Q: (L) What is the energy transference line, this newly discovered galaxy?

A: In a sense.

Q: (L) Why was the information received about the little boys so unclear?

A: Need to interpret for practice.

Q: (L) Does this mean that all information we get has to be interpreted also?

A: Not as much. That was a particularly sensitive subject with many focusing at once.

Q: (L) Was there interference from the people focusing on it?

A: Close. Remember Allison is good but not when too many are focusing.

Q: (L) Who is Allison? (Frank) Dorothy?

A: Yes. Dorothy.

Q: (F) Yeah, the psychic who finds dead people. (L) Well, I don't even know who she is. (F) She's very famous. (L) Well, I must be living in a cave. I was reading today in "Bringers of the Dawn" about people who are keepers of frequency. Is this an accurate concept?

A: Yes.

Q: (L) Are Frank and I keepers of frequency?

A: Yes.

Q: (L) Are we nearly at the frequency we need to keep?

A: Yes.

Q: (L) H__ D__ gave me a reading a few month's ago when she told me about two people in a partnership and she said no others should be brought in. Was this about S__ or Frank and me?

A: Interference caused reading to be askew.

Q: (L) Well, was she referring to this work with Frank and I or was she talking about S__?

A: Maybe.

Q: (L) In that reading she also said that I was going to meet somebody in the month of November who was going to become a very important part of my life in some way. Could you tell me a little bit about that?

A: Wait and see. Time to rattle the bushes again.

Q: (L) Which bushes?

A: Manner of speech.

Q: (L) Of all the different bushes I have rattled and people I have contacted, which ones in particular?

A: UFO people.

Q: (L) How can I do that?

A: Re-contact. Some doubt. Re-contact.

Q: (L) Re-contact some who doubt?

A: No. Re-contact some do doubt.

Q: (L) Which ones in particular?

A: Must just rattle without prejudice.

Q: (L) Does this mean sending out scripts from our sessions?

A: Good idea. Spark interest.

Q: (L) Well, that is what I have been planning to do.

A: It takes more than one spark of the flint to ignite the fire.

Q: (L) Should Frank get the Reiki initiation?

A: Okay.

Q: (L) Would it be good for him to get the Reiki initiation?

A: It is always.

Q: (L) Who are the Nordic type aliens?

A: Your ancestors.

Q: (L) What planet did they come from?

A: Several and transitory.

Q: (L) What is their type called? Just the Nordic types?

A: That is as good as any description.

Q: (L) What is their purpose here on the planet at this time?

A: Observation.

Q: (L) Haven't they been seen with the Lizzies on occasion?

A: Yes.

Q: (L) Are they involved with the Lizzies?

A: Some are.

Q: (L) Are some of them not nice?

A: Fifty-fifty.

Q: (L) Do they ever abduct people?

A: Have but not too often. When they do, they do not give back.

Q: (L) What do they do with the ones they abduct?

A: Take away to too many other places to mention. Purpose is multiple. Too complex.

Q: (L) I get the feeling that maybe it is not too complex, but that you just don't want to answer, is this correct?

A: Open. Not at this moment.

Q: (L) What about the Villas-Boas case; who were these beings and what was the purpose for this interaction?

A: Aryan's breeding experiment.

Q: (L) Where do these Aryans live?

A: In transit.

Q: (L) When they get to where they are going, where do they live?

A: They don't. There are many who do not live specifically anywhere. They are perpetually in transit.

Q: (L) Why is this?

A: There is no need to be grounded; it is only your perception because that is your familiarity. A planet is a vehicle too.

Q: (L) Why were there 3 pyramids. Did they each have separate purposes?

A: Variance in energy levels and age. Did you research about the 1967 engineer's study yet?

Q: (L) What book would that be in?

A: Look at Mystery volume. Now, please.

Q: (L) Why was Moses not allowed into the promised land?

A: Because he became tyrannical.

Q: (L) Were the Lizards the ones who led the Jews to the "Promised Land?"

A: No. Were not led; followed their own paths in effort to escape the effects of cataclysms.

Q: (L) Why have they got this big legend about being chosen and led to the promised land?

A: More brotherhood influence and nonsense.

Q: (L) What kind of weapons do the Nephilim use to do their "enforcing?"

A: Stun guns.

Q: (L) Do they actually use some kind of material weapon?

A: Yes.

Q: (L) And could you tell us what the Lizzies look like?

A: Upright alligators with some humanoid features in face.

Q: (L) I heard one theory that the Lizzies originally evolved on planet earth, is this true?

A: No. Neither did you.

Q: (L) Do you mean us in the sense of the early human prototypes?

A: All prototypes.

Q: (L) When these prototypes were evolved on another planet, did they have souls at that time?

A: Were added.

Q: (L) What souls occupied those prototypes on that other planet?

A: Same.

Q: (L) So, the legend of the Fall of Lucifer as the origin of the souls incarnating into physical life was an event that actually took place on this other planet?

A: Yes.

Q: (L) Do the Lizzies have more than one heart?

A: No.

Q: (L) Do they have more than one brain?

A: No.

Q: (L) This fellow, E__ P__, who claims that he was abducted, and taken by the aliens and altered in physical ways, was any of this true?

A: No.

Q: (L) Was he abducted, in fact?

A: Yes.

Q: (L) What was done to him?

A: Same routine as other abductees.

Q: (L) Does E__ P__ know that he is deceiving other people?

A: Yes. He is a fraud. Misguided by delusions.

END OF SESSION

2.19 November 6, 1994

Frank and Laura

Q: (L) Are you there?

A: Wait.

Q: (L) Are you there?

A: Yes.

Q: (L) Who do we have with us tonight?

A: Vedeeba.

Q: (L) Are you a discarnate from earth?

A: No.

Q: (L) Who are You?

A: Cassiopaeon.

Q: (L) Have you been listening in on our discussion?

A: As always.

Q: (L) In this particular discussion we have been talking about freeing up life energy which can be blocked by emotional traumas and so forth, and that, according to this book I read, you can tell the life energy is blocked by the way a person holds or moves their body. From this information I think that Frank's life energy is blocked. Am I correct?

A: No.

Q: (L) Then why is Frank so ill at ease in his body?

A: Book not entirely incorrect but remember not to take anything entirely on face value.

Q: (L) Is there some part of that idea that would benefit Frank and help him to feel more at ease?

A: Frank is ill at ease because most others are ill at ease with him.

Q: (L) Well, who started out being ill at ease, him or others?

A: Others.

Q: (L) And why were they ill at ease with him?

A: Sensed differences.

Q: (L) If Frank were to do some bodywork and bring his energies into focus where his physical sensations are concerned, would this, in some way, help to overcome this particular difficulty or situation?

A: Won't work.

Q: (L) Is there anything Frank can do to free up his energies and to become more at ease with himself?

A: He is more at ease now than before because he no longer listens to others' criticisms.

Q: (L) Is Frank correct in saying that his body and mode is that of the future?

A: Closer. But not there yet.

Q: (L) There was a comment made in an earlier reading when we were told we needed to equalize our input in this project. I am curious as to the exact meaning of equalize the input? Does that refer to use of the board or what?

A: Many meanings. One must not dominate decision making. Be open all ideas and input. Once we have made financial arrangements that will be your cue to dedicate full time efforts to this endeavor.

Q: (L) Are you making financial arrangements for us to be taken care of?

A: Will.

Q: (L) When will this be?

A: Open.

Q: (L) Does it depend on our dedication and increasing of this channel strength etc.?

A: Just wait. Continue as you are.

Q: (L) Now, I was just reading in "Bringers of the Dawn" about male energy and female energy and it says: "We have said that the male vibration will transform in a very short period of time.

We will not tell you why or how because some of you will consider it to be entirely too ominous, however, we will say that as the waves continue to come there will be a unilateral rising of consciousness within the population. At a certain point, when men are in the deepest point of mastering feeling, the feeling center will be activated. This will either occur gently or it will be blown wide open.” What will be “entirely too ominous?”

A: Energy redirection.

Q: (L) Energy direction is going to happen and that is what you are saying is the ominous thing here?

A: Overview.

Q: (L) Well, what does energy direction specifically mean? What kind of energy?

A: Sexual.

Q: (L) And this is going to be the ominous event that would frighten people?

A: Repercussions.

Q: (L) What are the repercussions?

A: Many.

Q: (L) Could you tell us some of them?

A: First you must figure out answer to number one.

Q: (L) Well, sexual energy “redirected”; does this mean women will stop having sex with men?

A: Not exactly.

Q: (L) Am I close?

A: Yes. Men will lose most of their drive in favor of more spiritual pursuits. It is the sex drive that is at the root of most of the historical aggression and lack of feeling on the part of the male.

Q: (L) Can we tell others?

A: Might cause turmoil but up to you.

Q: (L) I noticed that at about the same time I began meditating heavily that my drive plummeted. Is this because of the meditation?

A: Yes. Females will lose some drive too. But how will humans react to this, that is the question. Will they be prepared?

Q: (L) Does this mean that everybody is going to lose interest in sex?

A: Will have much less and must learn to relate to each other more spiritually.

Q: (L) Is this because one of the major drives of the human being is for contact and, up to now, this has been manifested through sexual union and without the sexual urge they will be forced to find other ways to relate?

A: One would hope so. You are all moving toward 4th level which is less physical thus you must learn this existence in order to pass through into the 4th level.

Q: (L) And those who do not learn will not pass, is that correct?

A: Yes. Some will be relieved. It depends upon how advanced one is.

Q: (L) I have drawn a sort of conclusion about some of the activities of the Lizzies and their abductions through the Grays and so forth, and it seems to me that these excessive numbers of exams, gynecological, reproductive or whatever exams might possibly

be a screen for a process that is used to extract life force or energy from the human being, through the basal chakra, the sexual chakra, as I understand where the life force enters in. Is this idea correct or on track?

A: Close.

Q: (L) It does seem that the Grays and Lizzies are abnormally interested in sexual activities of human beings, is that correct?

A: Yes.

Q: (L) Why are they so inordinately interested in this and why do they practice sex, sexual aberrations, or do they have a tremendous sex drive even though they are fourth density beings?

A: Too many questions; one at a time.

Q: (L) Do they have tremendous sex drives even though they are in fourth density?

A: No.

Q: (L) Are they interested in sexual energy simply because it is life force?

A: Partly and also desperately to stave off change in order to retain control.

Q: (L) What changes are they desperate to stave off?

A: To 4th level.

Q: (L) They are trying to stave off the 4th level change. Can they do that?

A: No. Also hoping to retain control even if change occurs.

Q: (L) By what means do they do this through these gynecological exams? Is there some technical activity they undertake?

A: Yes. Too complex.

Q: (L) Are these supposed memories people have from their abductions of these exams just screens of procedures used to take life force from them?

A: Yes.

Q: (L) When they sample an abductee's tissue and take the little scoops or chunks out of them, what do they take these chunks of flesh for?

A: Cloning.

Q: (L) If they clone, why do they need such a large chunks?

A: You don't know all details of cloning process yet.

Q: (L) Do they take twins, or one of a pair of twins, and raise one artificially?

A: Have done so.

Q: (L) Have they done this to a great extent?

A: Define.

Q: (L) Is this done frequently?

A: No.

Q: (L) What is the purpose of taking one of a pair of twins?

A: Study to determine which is best soul receptacle: one of twins or clone.

{This raises the question as to why the choice has to be either. Is there some connection between clones and the original body and one twin and another that is vital to the purpose of the Lizzies?}

Q: (L) Do these twins they raise, do they raise them on their ships or in their enclave wherever they are?

A: Yes.

Q: (L) And do they treat them well?

A: Open.

Q: (L) Do they teach them a great deal?

A: Yes.

Q: (L) Do they do this to test the brain capacity of the human being?

A: And other reasons.

Q: (L) Was I one of a pair of twins?

A: No.

Q: (L) For what purpose are they trying to decide which is the best receptacle, the clone or the twin? Receptacle for what?

A: Future project.

Q: (L) To do what?

A: Switch physical realities.

Q: (L) And who is going to switch physical realities? Are they going to enter into bodies they have prepared for themselves and force human souls to enter into their bodies?

A: No.

Q: (L) They are going to enter into the bodies themselves so that they can switch their reality?

A: Yes.

Q: (L) So, they are preparing a bunch of soulless bodies into which they can enter in themselves?

A: Will try.

Q: (L) You said the other night that the Lizzies were like upright alligators only with somewhat humanoid features to their faces, is that correct?

A: Yes.

Q: (L) Do they have tails?

A: Yes.

Q: (L) How tall are they?

A: Six to eight feet tall.

Q: (L) Do they wear clothing?

A: Yes.

Q: (L) I know this is a silly question, but does their clothing have an opening for the tail?

A: Yes.

Q: (L) Do they defecate?

A: No. They are 4th level.

Q: (L) So, when you are 4th level you neither eat nor defecate in the regular way?

A: Correct.

Q: (L) Do the Lizzies have the ability to change their shape or appearance?

A: Temporarily.

Q: (L) In the Karla Turner book, the son's roommate encountered a female alien type, who was that?

A: One of us. But several individuals sharing form.

Q: (L) Karla Turner had a visit with several entities in her kitchen while she was cooking, who were they?

A: Others.

Q: (L) Others who?

A: Different group.

Q: (L) What different group?

A: Not necessary to know.

Q: (L) Were they "good" guys or "bad" guys?

A: Open. We only rarely appear as human.

Q: (L) The other night my daughter A__ thought she saw a spirit figure standing near as we were channeling, did she, in fact, see an old woman figure?

A: Yes.

Q: (L) And who was that individual?

A: Us.

Q: (L) Why did that individual say "remember me?" Was that the entire message or was there more message?

A: Message is for A__ to interpret.

Q: (L) Why did A__ say that she had some questions as to whether that was a positive or negative source. She first felt that it was positive but then she had doubts. She wondered about being deceived. Can you help her with that?

A: All must search to learn.

Q: (L) The kids want me to ask about fairies. Are there such things?

A: There is such thing as all things in one reality or another.

Q: (L) A__ wants to know about dwarfs or midgets?

A: Karma.

Q: (L) They are not Lizzie experiments?

A: No. Predictions will arrive spontaneously when needed.

Q: (L) Do you have any predictions for us at this time?

A: Not at this juncture.

Q: (L) Is there anyone I should add to the list of people to send the transcript to?

A: Marciniak.

Q: (L) What is wrong with the A drive on my computer?

A: Hardware glitch.

Q: (L) Is it repairable?

A: Yes.

Q: (L) How much is it going to cost?

A: Open.

Q: (L) All the UFO sightings in Gulf Breeze, are these aliens or government experiments?

A: Some are and some are projections.

Q: (L) And who is responsible?

A: Multiple sources.

Q: (L) Positive or negative?

A: Both.

Q: (L) And the Gulf Breeze six, as they call them, the AWOL military personnel who were taken into custody and who were receiving messages on a ouija board, what information were they receiving and who was it from?

A: Some from us and some from others.

Q: (L) Was there something terribly frightening about this information that caused the government to confiscate these people and their transcripts?

{Last part of session lost due to tape malfunction.}

2.20 November 7, 1994

Frank and Laura

Q: (L) Hello who do we have with us tonight?

A: Goonian.

Q: (L) Are you a discarnate?

A: No.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Are you ready for our questions?

A: Yes.

Q: (L) I would like to know what is the origin and meaning of the Biblical story of the “mark of Cain”? Was it a physical mark?

A: Knot at top of spine.

Q: (L) Do you mean like a humpback?

A: No. Signified.

Q: (L) Was it a physical knot on top of the spine?

A: Is yours and all others. Feel your head.

Q: (L) The occipital ridge?

A: Close.

Q: (L) Well if I have it does it mean that I am a murderer?

A: No. More superstitions spread by brotherhood.

Q: (L) Well, what did the mark of Cain signify?

A: Jealousy.

Q: (L) Jealousy of whom?

A: All humans.

Q: (L) Was there a group of people who were set apart by this mark?

A: No. All it is is one of your shortcomings genetically engineered by the Lizards.

Q: (L) What was the “Ark of the Covenant?”

A: Power cell.

Q: (L) What was the origin of this power cell?

A: Lizards given to the Jews to use for manipulation of others.

Q: (L) Why was it that if you came close to this object or touched it you would die?

A: Energy overload; scrambling by reverse electromagnetism.

Q: (L) What is reverse electromagnetism?

A: Turned inward.

Q: (L) What effect does it produce?

A: Liquification of matter.

Q: (L) Well, that is pleasant. This “cell” was kept in an ornate box of some sort, is that correct?

A: Yes.

Q: (L) Why was it only the priests who could handle it?

A: Only those who would not try to use for selfish reasons.

Q: (L) But then did just coming near it injure a person?

A: Yes.

Q: (L) Well why were these individuals able to come near it?

A: Nonselfish energy field.

Q: (L) So it could tune into thought fields?

A: Yes.

Q: (L) Why are UFOs frequently sighted over geological fault lines?

A: Electromagnetism. Use electrical free waves as fuel for power restoration.

Q: (L) Could it be that the UFOs are a manifestation of the geo-magnetic energies emitted at fault lines?

A: No. Not all theories are correct and some are not even sincere.

Q: (L) What is the connection between UFOs and earthquakes?

A: Is none. Coincidence. If they are there, some fault breaks produce EM fields which are visible briefly as red or yellow light flashes.

Q: (L) How do UFOs affect the electrical systems of automobiles and so forth and why is this phenomenon also associated with hauntings?

A: Electromagnetic pulse. Can be manifestations of hauntings also.

Q: (L) Would this indicate that both phenomena are originating from the same source or utilizing the same power?

A: Laura, do you not know by now that all these phenomena are interdimensional?

Q: (L) Is there something about moving from one dimension to another that creates this electromagnetic pulse?

A: Yes. Kind of like breaking the sound barrier.

Q: (L) Okay, we talked about the fact that the brown eyed people are earth seeded for much longer than blue eyed people who were seeded on another planet, where did green eyed people come from?

A: Green and blue are the same in terms of origin.

Q: (L) Who was Seth, channeled by Jane Roberts?

A: Higher plane earth spirit.

Q: (L) Were the teachings in the Seth material accurate and was that a good source?

A: Yes but rapidly becoming obsolete as you move toward new reality.

Q: (L) What happens to people who commit suicide?

A: Varies according to circumstance.

Q: (L) In a general sense, is there some negative karma involved in committing suicide?

A: There can be negative karma involved with many things.

Q: (L) What about the death penalty?

A: Specify.

Q: (L) Is putting a criminal to death the equivalent of reducing society to the level of the criminal?

A: You are all put to death.

Q: (L) What do you mean?

A: In one way or another.

Q: (L) Well, is there any negative karma on society, the judge, the jury, the executioner, if a criminal is brought to trial, found guilty of a heinous crime and then put to death?

A: What about war? What is better? This is open because all are murderers and suicides. It is the supreme lesson you all must learn before you can graduate to ethereal existence. Your thinking is too simplified.

Q: (L) Is there ever a situation where execution helps relieve the criminal of some of his karma that may be caused by the commission of the crime for which he is being executed?

A: No.

Q: (L) Is it better to take a criminal, such as Dahmer, and have all of society support and take care of him?

A: These are all past issues. Will be resolved soon.

Q: (L) Are there any other physical creatures on planet earth which have souls?

A: All do.

Q: (L) Is the human soul different from, say, animal souls?

A: Of course.

Q: (L) Are there any other physical creatures on the earth which have souls like human souls? On the same level, so to speak?

A: No.

Q: (L) Well, I have heard that dolphins, porpoises and whales have very advanced souls. Is that true?

A: All souls are advanced.

Q: (L) But are whales sentient, thinking, self-aware as humans are?

A: Apples and oranges.

Q: (L) Well, since whales are so big, do they have bigger souls?

A: Irrelevant.

Q: (L) Is there some way to communicate with whales or dolphins and can one find a way to translate the differences and have a reasonable, intelligent exchange with a whale or a dolphin or even an elephant?

A: You don't need conversation "with" when a higher telepathic level.

Q: (L) Dolphins and whales communicate telepathically?

A: Yes. So do dogs and cats and snakes etc. etc. only humans have learned the “superior” art of verbal communication.

Q: (L) But, at the same time, verbal communication can be quite limiting, is that correct?

A: That is the point.

Q: (L) So, you were being sarcastic with me, weren't you?

A: Humorous.

Q: (L) Do whales form long-lasting bonds and feel love?

A: Yes.

Q: (L) Do dogs feel love?

A: Dogs feel need as love.

Q: (L) Who would make a better governor, Bush or Chiles?

A: Either.

Q: (L) Which one is going to win?

A: Open.

Q: (L) Carlos Casteneda writes about the peyote beings called “Mescalitos.” This being supposedly is part of the peyote plant, a sort of being from the plant. Is this true?

A: No.

Q: (L) What beings does one encounter when one eats a bunch of peyote?

A: Hallucination.

Q: (L) Why are these hallucinations so consistent?

A: Because those that do have that expectation. If you ate enough peyote you would encounter Santa Claus if that was your expectation. (Much laughter)

Q: (L) What happens if you give someone LSD while they are dying? Does it help them die easier?

A: No.

Q: (L) Does it make dying more difficult?

A: No.

Q: (L) Is there any essential difference or effect of note?

A: No.

Q: (L) What is the “philosophers stone?”

A: Idea center.

Q: (L) How can this idea center be accessed?

A: Many ways: meditation is the best.

Q: (L) Is there any visual image of the philosopher’s stone that one could use to access it in meditation?

A: Yes. Diamond or prism.

Q: (L) Was there or is there such a thing as a literal, physical, philosopher’s stone that can transmute lead into gold?

A: No.

Q: (L) Was anybody ever able to transmute lead into gold by any means?

A: Everybody is able.

Q: (L) How?

A: You must discover this yourself.

Q: (L) Is this knowledge written down somewhere on the planet?

A: Yes, but it will be easier in 4th level.

Q: (L) Comte St.Germaine claimed to be able to transmute lead into gold. Was this true?

A: Yes.

Q: (L) He also claimed to have discovered the secret of eternal youth, was this true?

A: No.

Q: (L) Did he die like everybody else at the regular age?

A: Yes.

Q: (L) Is Elizabeth Clare Prophet channelling St. Germaine?

A: No.

Q: (L) Who does she channel?

A: Imposter.

Q: (L) Who was Merlin?

A: English jolly fellow.

Q: (L) He wasn't a great magician?

A: He was the Houdini of his time.

Q: (L) There was a very famous case of haunting called the Bell Witch case, can you tell us about it?

A: Inform, ask and we will access.

Q: (L) Is that why we have to ask every question in such detail?

A: Yes.

Q: (L) When we ask a question how does it enable you to access the information?

A: Puts in visual image.

Q: (L) Who or what was the Bell Witch?

A: Connected spirit. Karmic.

Q: (L) Was this spirit connected to Betsy Bell or her father?

A: Both.

Q: (L) Why did this spirit so brutalize her father until he died?

A: Revenge for previous life wrongs.

Q: (L) Is it true, as Dr. Nandor Fodor suggested, that this was an aspect of Betsy Bell's own personality which attacked her father because he had been sexually molesting her?

A: No.

Q: (L) What is the cause of Alzheimer's disease?

A: Genetic.

Q: (L) Is there anything that can be done to prevent it or lessen its effects?

A: Biogenetic engineering but will resolve anyway in the near future. And much other as well.

Q: (L) Do Ann Boleyn and Catherine Howard haunt the Tower of London and Hampton Court?

A: Spirit reflection.

Q: (L) Is a ghost or haunting just an image imprinted in space/time?

A: Sometimes.

Q: (L) Are there some cases where the actual spirit of the person hangs around causing phenomena?

A: Yes.

Q: (L) Can they do this for untold centuries?

A: Yes because there is no time.

Q: (L) Is T.C. Lethbridge's theory about dowsing correct?

A: Yes.

Q: (L) Is it possible to dowse things in other dimensions by lengthening the string?

A: Yes.

Q: (L) Is it possible by using this technique to dowse winning lottery numbers?

A: Difficult; intentions must be pure.

Q: (L) It is very difficult to have pure intentions about money, isn't it?

A: Yes.

Q: (L) But if, theoretically, one did have pure intentions, would they be able to dowse numbers...

A: Tall order. Yes.

Q: (L) Are lottery numbers... fixed?

A: Everything is at some level. But choice is at what level will be experienced.

Q: (L) Recently I read an article about bursts of gamma rays in the upper atmosphere. What are these bursts of gamma rays?

A: Increasing energy with approach of wave.

Q: (L) So, these bursts of gamma rays are not effects of battling UFOs in other dimensions?

A: No.

Q: (L) Why are there so many crop circles in Britain?

A: Window. Why Stonehenge was built there.

Q: (L) What is the relationship between UFOs and clouds?

A: Can create clouds or appear as clouds but no other relationship.

Q: (L) What is ball lightning?

A: Electromagnetic spark. Pass from 4th to 3rd density.

Q: (L) Is the Ayurvedic system a superior system to others?

A: Free will.

Q: (L) What are the implications of the fact that the Lizzies worship the physical universe?

A: Self service.

Q: (L) What do they see in the physical universe that they feel is superior to the spiritual universe?

A: All who serve self yearn for physicality.

Q: (L) These bodies they are creating for themselves, are they creating some kind of super physical beings they can then move into and occupy which will have very advanced abilities that would enable them to serve self better, longer or more completely?

A: Yes.

Q: (L) There has been a lot of scuttlebutt about Walt Andrus, the head of MUFON. I would like to know what energies are behind him and what his motivations are?

A: He is okay. Paranoia is his chief problem.

Q: (L) What about L__ S__?

A: Muddled thoughts.

Q: (L) Jenny Randles?

A: Okay. She means well.

Q: (L) What are the copper scrolls discovered in Israel?

A: Essenes. The treasure described was real but no longer intact as described.

Q: (L) Who was or is Baal?

A: Lizard.

Q: (L) Beelzebub?

A: Same.

Q: (L) Were these actual names of individual Lizards?

A: No. Personifications.

Q: (L) What was the beast known as Leviathan?

A: Sea god. Same as Neptune.

Q: (L) I discovered the name Nibiru in a list of demonic names. What is the origin of this name?

A: Dark teacher.

Q: (L) What is the origin of the name Appolyon?

A: Light being?

Q: (L) Why is Appolyon called the “destroyer” in Revelation?

A: Backward for sake of deception. Bible corrupted.

Q: (L) You have often stated that the Bible is corrupted, I would like to know who, exactly, corrupted the Bible and when and how they did this?

A: Illuminati brotherhood for a thousand earth years.

Q: (L) Does this mean that up until a thousand years ago the Bible was fairly accurate?

A: No.

Q: (L) Is there any possibility that the Catholic church had anything to do with this corrupting influence?

A: Yes.

Q: (L) Does the Catholic church have in its possession actual original texts of the Bible that have not been corrupted?

A: No.

Q: (L) Were there ever such texts in existence?

A: No.

Q: (L) Who wrote the book of Matthew?

A: Greek enforcers.

Q: (L) What are Greek enforcers?

A: Like your FBI.

Q: (L) Who wrote the book of Mark?

A: Same.

Q: (L) Luke and John?

A: Same?

Q: (L) Acts?

A: Same?

Q: (L) Are any books of the New Testament written by who they claim to be written by?

A: No. Remember this is 70% propoganda.

Q: (L) Is 30% then the truth or the actual teachings?

A: Close. Enough you must decipher from instinct through meditation.

Q: (L) Why did my son's leg suddenly start giving him problems at about the age of three?

A: Reflection of past life. Leg was torn off at death. SAM missile shot by North Vietnamese Army. He was flying a jet. This was 1969. Name was George Raymond. Shot down over Phan Bien.

Q: (L) Is there anything that can be done to help him release this problem?

A: Will be difficult.

Q: (L) Is his past life very strong for him?

A: Yes.

Q: (L) Is it stronger than in the other children?

A: Yes.

Q: (L) Will hypnosis help him to release this?

A: Yes.

Q: (L) How old was he when he was shot down?

A: 25.

Q: (L) Was he married?

A: No.

Q: (L) Why did he pick me to be his mother?

A: Previous life connection.

Q: (L) In his previous life was he abducted by aliens?

A: Yes.

Q: (L) What country did he live in?

A: Which lifetime?

Q: (L) When he was shot down?

A: USA

Q: (L) What about the lifetime when he was connected to me? When was that and what was the relationship?

A: 1600s brother.

Q: (L) Does his leg cause him pain?

A: All violent deaths reflect difficulties in next incarnation?

Q: (L) Is that why I have so many difficulties, because of a violent death?

A: Yes.

Q: (L) How did I die in my last life?

A: Head hit pavement.

Q: (L) How is that reflected in this life?

A: Non-specific pains in body. You have a lot of those because of the violent trauma.

Q: (L) Scars of the soul, so to speak?

A: Yes, exactly.

Q: (L) Does Frank have physical aches and pains because of violent trauma?

A: Mental in his case.

Q: (L) What brings it on?

A: Continuation of past life. Victimization by many. Left unresolved.

Q: (L) What could he have done to resolve that in that lifetime?

A: Fought back.

Q: (L) Is Frank telling the truth when he says he has no repressed anger?

A: Yes.

Q: (L) But how can he fight back if he has no anger to fuel the fighting?

A: Does not need to. Not the problem exactly. Different circumstances now. Needs to be patient and ride out the storm.

Q: (L) This situation will pass?

A: Open. Will pass if can withstand; didn't last time.

Q: (L) If he doesn't ride it out this time does this mean he has to come back into 3rd density and do it over?

A: Yes.

END OF SESSION

2.21 November 9, 1994

Frank and Laura

Q: (L) Hello.

A: Hello. Promia.

Q: (L) Is that your name?

A: Yes.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Having you as communicants, does this protect us from the intrusion of earthbound spirits?

A: Earthbound spirits yes but others no.

Q: (L) What others do you mean?

A: Aliens.

Q: (L) So your presence protects us from earthbound spirits but other aliens can come through if they choose?

A: Not through while with this connection but around.

Q: (L) They are around?

A: Not now.

Q: (L) Have they been around on other occasions when we were communicating?

A: Yes.

Q: (L) Have they ever, on any occasion, contaminated or corrupted our channel?

A: Tried but failed because you recognized it the one time.

Q: (L) When was the one time?

A: Several sessions ago.

Q: (L) Is that one of the sessions on tape? What was the name of the individual that came through that time?

A: Not named.

Q: (L) I was reading today about the theory that if you get the name of an entity you then have power over it. Is this true?

A: No. There is much foolishness to muddle through.

Q: (L) We want to thank you for your help, by the way, and the good and precise answers we get through this source.

A: You are welcome. More to come.

Q: (L) Well, I want people to be just awestruck with the accuracy of this information.

A: They will be.

Q: (L) I was reading an article about Cayce's teachings on the root races. Is this idea as presented by him basically correct?

A: Close.

Q: (L) What is that phenomenon we commonly call a poltergeist?

A: Many causes.

Q: (L) Each situation is different?

A: No. The causes are multiple.

Q: (L) Could you list these?

A: No. There are many causes but some are the same as others. One cause is female pubescent children giving off life force aura burst.

Q: (L) What is this thing we call hypnosis?

A: The 2nd step to open consciousness union with level 5.

Q: (L) What's the first step?

A: Dream state.

Q: (L) What's the third step?

A: Trance.

Q: (L) What's the fourth step?

A: Expiration of body functions.

Q: (L) You mean as in death, kicked the bucket?

A: Of body.

Q: (L) In many ancient ruins there are found certain symbols which interest me, specifically the coil or spiral which seems to be ubiquitous throughout the world. This is also very similar to one of the Reiki symbols. What is the origin and meaning of this symbol?

A: Energy collector translevel; stonehenge was one. Stonehenge is a coil. The missing stones form a coil arrangement. People have been "zapped" at stonehenge.

Q: (L) If I had a large place in my yard and I arranged plants and a walkway in a coil and then I walked that spiral, would it give me power?

A: Yes. Do it. If you do it you will actually see us when 3 levels are right. Move the pool.

Q: (L) Move my pool!

A: Which is more important? We did not say get rid of it.

Q: (L) What about the area next to the pool?

A: Up to you.

Q: (L) Do you know how hard it was to put that pool in?

A: Yes.

Q: (L) Now, J__ and A__ B__ think the Ouija board should work without us putting our hands on it. Is that true. Would or could it work that way?

A: If it did it would not be us. Self serving forces do that only. Remember there is much foolishness. W__ and B__ are suspicious.

Q: (L) A__ B__ told me that M__ F__ said he caused John's wreck. Did he?

A: No.

Q: (L) Why would he say he did?

A: Tales are easy to sew when the past is yours only to know.

Q: (L) A__ B__ also said he disintegrated a man with his mental powers. Is this true?

A: Rubbish.

Q: (L) Was he able to cause S__ S__'s tv to act up with his powers of mind?

A: Nonsense.

Q: (L) Does A__ have any powers?

A: The same as yours.

Q: (L) Do I have any powers?

A: Yes, but when was the last time you zapped someone's tv?

Q: (L) Archaeologists repeatedly find grotesque little carvings of fat bellied, big breasted women and they call them mother goddesses. What were they?

A: They were children's toys. More foolishness.

{Wrong, in my opinion.}

Q: (L) Who built the temple complex on the island of Malta?

A: Moors.

Q: (L) When?

A: 800 a.d.

{Clearly wrong, in my opinion.}

Q: (L) Is the Sufi path a good one to study?

A: Up to you.

Q: (L) I know that but I want to know if it is valid or better than another?

A: We don't want to judge that for you.

Q: (L) What percentage of truth is in that path.

A: In one sense all teachings are truths.

Q: (L) Can't you just tell me?

A: Subjective. Would you like us judge Reiki?

Q: (L) Well, yes before I spend any money on it. Will I waste my money?

A: Not if you go to right source. Now we have led you to answer we want you to continue to exercise your mind. That is how you progress.

Q: (L) So you want me to study Sufi for the exercise?

A: Yes. If we answered all your questions you would not learn.

Q: (L) In this book I am reading it talks about knowledge that is only given to the elect and that certain things are passed down through secret organizations. Most people think this organization is the Illuminati and that they hold many deep, dark secrets. Is that true?

A: Close. But now there is a knowledge explosion. The Illuminati is no longer exclusive; but they still think they are.

Q: (L) Compared to the big high mucky mucks in the Illuminati, what percentage of their knowledge do Frank and I possess?

A: 2 per cent.

Q: (L) You mean they know 98 per cent more than we do? That's depressing! How much knowledge, relative to the Illuminati, does the average college graduate have?

A: 0.02 per cent.

Q: (L) Is there any one person who holds a major chunk of knowledge on this planet?

A: By this time next year you will have 35 per cent as much.

Q: (L) That means I have to work hard!

A: No. It will flow into you. Stop listening to those that block.

Q: (L) Who in my life is blocking me now?

A: Can't say. You must find this out.

Q: (L) Is it myself?

A: Only through others.

Q: (L) D__ M__ called today about an antique bracelet she put in the keeping of a jewelry dealer who was supposed to have it repaired for her...

A: Woman sold it to a dealer in Atlanta. D__ must confront her and she will break. Sold for 11,000 dollars.

Q: (L) What did my dog Dannyboy die from?

A: Heart condition.

Q: (L) Is there another Dannyboy puppy out there for me?

A: Maybe.

Q: (L) Why have I been so depressed today?

A: Too much interaction with negative energy coming from others.

Q: (L) Is Babaji living in Tibet?

A: Yes.

Q: (L) How old is Babaji?

A: 190

Q: (L) In the book of Revelation it describes a being with copper skin and white hair. Is this a real Nephilim from the planet Nibiru? Who is that being?

A: Nephilim descendant but not from Neburru.

Q: (L) This was a giant?

A: Yes.

Q: (L) Is there a planet Nebiru?

A: No.

Q: (L) What does Nibiru mean in the Sumerian language?

A: Slave owner.

Q: (L) Back about a year or so ago we got an individual who claimed to be Keith. Was this, in fact, Keith Laumer?

A: Yes.

Q: (L) How does he feel about being dead?

A: Okay.

Q: (L) Was it like he expected?

A: Better.

Q: (L) Was it his influence that caused me to continuously play opera?

A: Yes.

Q: (L) Was he around me for a period of time after he died?

A: Yes.

Q: (L) Has he gone into the light now?

A: Yes.

END OF SESSION

2.22 November 12, 1994

Frank and Laura

Q: (L) Hello.

A: Cassiopaea calling.

Q: (L) What does that mean?

A: We are beginning to tune into your humor.

Q: (L) What do you mean.

A: "Cassiopaea calling."

Q: (L) I get it!

Q: (L) What are the dogs barking at?

A: Someone in alley.

Q: (L) What are they doing in the alley?

A: Passing.

Q: (L) Do you have any specific messages for us?

Q: (L) On a number of occasions we talked about the quorum and the Illuminati. They both seem to be the highest levels of secret organizations. What is their relationship to each other?

A: Please put new music on; this a little disruptive. {Creation Chant}

Q: (L) How is this? {Celtic harp}

A: Better.

Q: (L) You don't like the Native American stuff?

A: It is okay but disruptive to vibrations.

Q: (L) Back to the quorum and illuminati.

A: Quorum mostly alien; illuminati mostly human.

Q: (L) Well, the quorum has been described...

A: Meet; two halves of whole.

Q: (L) Well the quorum seems to be described as being in touch with the Cassiopaeans, that is, yourselves, which you have described as beneficial beings, is this correct?

A: Close.

Q: (L) The illuminati has been described as being behind or with the brotherhood which has been described as being in connection with the Lizard beings...

A: Close. But not that simple.

Q: (L) Well, if the quorum is the good guys and the illuminati is the bad guys, and they both are at the high levels of Freemasonry, what is the story here?

A: Picture a circle or cycle first now then contemplate for a moment before follow up.

Q: (L) Okay, I am contemplating a cycling circle.

A: Now, two halves representing positive and negative. Two halves.

Q: (L) Well, what I am getting out of that is the two halves and both sides are playing with the human race. Is that it?

A: No. This is complicated but if you can learn and understand, it will be a super revelation.

Q: (L) Well, go ahead and explain.

A: Ask step by step.

Q: (L) Why do we so often have to ask things step by step?

A: In order to absorb the information.

Q: (L) The quorum is described as the good guys. The illuminati is described as bad guys. And yet, they are both Masonic. When a person in the Masonic organization reaches the higher levels, are there individuals at the higher levels recruiting masons to one side or the other?

A: First, not exactly one side or another.

Q: (L) I am beginning to not understand something here because if the Lizzies...

A: Unblock.

Q: (L) I don't have a block here. If the brotherhood AKA illuminati AKA Lizzies AKA beast are the ones who are going to do detrimental things to this planet, how are they related or connected to the quorum which is in touch with...

A: This will take time to explain be patient it will be worth it.

Q: (L) Well, are you going to explain it right now?

A: Ask step by step.

Q: (L) Okay. What is the nature of evil?

A: Blend.

Q: (L) Are the Lizzies what we would consider to be evil?

A: Yes.

Q: (L) Are the Cassiopaeans what we would consider to be good?

A: Yes.

Q: (L) Yet, do the Cassiopaeans use and manipulate the Lizzies to accomplish certain things?

A: No.

Q: (L) The Lizzies work independently and in opposition to the Cassiopaeans?

A: Independently, not in opposition.

Q: (L) Well then, is there somebody over and above this whole project...

A: We serve others therefore there is no opposition. Careful now. Step by step. If you do not fully understand answer ask another.

Q: (L) Part of a whole. Part of a circle.

A: Blend.

Q: (L) Does this mean...

A: Picture a blending colored circle image.

Q: (L) Are you saying that at some levels the two halves overlap?

A: Close.

Q: (L) Are you saying that some of the Quorum are good guys and bad guys and the same for the Illuminati because the two are on opposing sides of the circle but at the point of blending one is weighted more to one side and the other to the other side? And these organizations are where the interactions come together?

A: Closer.

Q: (L) Let's leave it for the time being.

A: No. Now please.

Q: (L) Okay. So it is a blending. Does it have something to do with ... in your case service to others means that you even serve those who serve self, is that correct?

A: Yes; we serve you and the Lizards have programed your race to self service remember.

Q: (L) Well, I am down a notch or two. So, I am still a service to self individual to some extent, is that correct?

A: But moving slowly toward service to others. Not all humans are.

Q: (L) Does this mean that when people who are members of the quorum or illuminati call for information or help, that you, because of your service to others orientation are obliged to answer whoever calls?

A: Yes and no.

Q: (L) What is the no part.

A: If vibrational frequencies are out of pattern we do not connect.

Q: (L) Is the work of the Lizzies part of an overall grand plan or design?

A: All is.

Q: (L) Let's go on. I am depressed because you guys told me I was a bad person.

A: You are not a bad person.

Q: (L) Well, I am feeling pretty crummy right now.

A: Lizzies induced.

Q: (L) You mean my crummy feelings are Lizzie induced?

A: As always.

Q: (L) Well I am feeling crummy because you guys let me know that I am in the same sinking boat as the rest of the poor slobs on this miserable planet. I was working pretty hard to get out of the boat.

A: Silliness; you're in your own boat.

Q: (L) I would like to know where Dr. Usui got the Reiki symbols?

A: Must answer question.

Q: (L) What question? The quorum and illuminati question?

A: You will feel ecstasy once answered.

Q: (L) Okay. A blending. Yet two halves.

A: Of a circle.

Q: (L) Who designed this circle?

A: Natural frequency wave. Some near conjunction blend both service patterns and each "camp" to create perfect balance.

Q: (L) Okay, so the Illuminati are the higher level on the pathway of service to self and somehow, by reaching these higher levels may have come to realizations or frequencies which have caused their position to be modified or blended to where service to self becomes or incorporates or moves them to service to others realizations, is this correct?

A: Continue.

Q: (L) Okay, the ones in the quorum are those who are focused on service to others and they, in their pathway of service to others begin to understand that some service to self is service to others.

A: Close.

Q: (L) And the whole idea is to blend both pathways no matter which direction you come to it from?

A: Service to others provides the perfect balance of those two realities; service to self is the diametrical opposite closing the grand cycle in perfect balance.

Q: (L) So it is necessary to have a pathway of service to self in order for the pathway of service to others to exist?

A: Yes.

Q: (L) And those who are in the quorum and the illuminati ...

A: Blends in middle.

Q: (L) So it is necessary to have the darkness in order to have the light...

A: Yes.

Q: (L) And it is necessary to have the Lizzies in order to have the Cassiopaeans...

A: Close.

Q: (L) And both groups evolved through the Masonic organizations..

A: Freemasonry is human reflection in physical of these processes.

Q: (L) Okay, thank you very much. I think that is all for tonight.

A: Good Night.

END OF SESSION

2.23 November 16, 1994

Frank and Laura

Q: (L) Hello.

A: Hello. How are you?

Q: (L) Well I guess we are fine this evening. Who do we have with us?

A: Roligea.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) I have been reading recently about the shrine at Lourdes where the Virgin Mary supposedly appeared to Bernadette Soubirous...

A: Energy focusing center.

Q: (L) What kind of energy is focused there?

A: Positive due to consistent prayer patternings.

Q: (L) Okay, what appeared to Bernadette?

A: Imaging energy consciousness wave.

Q: (L) Was this image out of her own mind?

A: Close.

Q: (L) The healings that take place...

A: Because of the concentration of positive energy.

Q: (L) What or who has been causing the apparitions of the Virgin Mary at Conyers, Georgia?

A: Deceptive field.

Q: (L) What energy is behind this?

A: Lizards.

Q: (L) Why?

A: Confusion campaign part of bigger picture and plan.

Q: (L) What is the bigger picture and plan?

A: Conquest.

Q: (L) How will that aid their conquest?

A: By dispersing knowledge.

Q: (L) Dispersing as in breaking apart or scattering?

A: Spreading thin. Confusion does this. You are being bombarded with confusion in this era.

Q: (L) A__ had a dream where she saw some symbols and would like to know what the symbols represented in her dream.

A: One by one.

Q: (L) The first one:

A: Battle.

Q: (L) The second one?

A: Life force.

Q: (L) The third?

A: Spiritual union with higher planes.

Q: (L) The fourth?

A: Destruction.

Q: (L) The fifth one?

A: Fear.

Q: (L) What is the entire message?

A: Up to her to learn; remember if we tell you certain things you will not gain adequate protection for the time ahead.

Q: (L) I dreamed last night about a puppy belonging to my sister in law. As I was walking away in the dream, I turned back and saw a car run over the dog. It was quite graphic and I awoke very upset. What was the cause or purpose of this dream?

A: This one was not particularly pertinent.

Q: (L) Was it just a dream?

A: Yes.

Q: (L) Now, relating to what we have been discussing lately. Did any groups of the black race, on their own, ever create a high civilization as has been reported by several archaeologists or other individuals.

A: Yes.

Q: (L) On their own without assistance?

A: No.

Q: (L) Who did they have assistance from?

A: Lizards.

Q: (L) Why have black people, in general, for most of recorded history, been living in such primitive conditions with such primitive mind set?

A: Isolation from modern interaction.

Q: (L) Why is this?

A: Karma. Punishment for past society which was cruel master hierarchical.

Q: (L) Are black people being abducted by the Lizzies as frequently as white people?

A: Yes.

Q: (L) Why do we hear so little, if any, about this?

A: You hear little of black culture in general.

Q: (L) Are black people, within their cultural confines, aware of aliens and alien abductions?

A: Less aware and discuss it less.

Q: (L) We are aware that we are being manipulated by the media. We would like to know what types of methods do they use and what is their objective?

A: More precise.

Q: (L) What kind of technical means do they use to project mental manipulation by way of TV or movies?

A: Simple bombardment visual and verbal.

Q: (L) Do they use subliminal implantation of ideas?

A: Not needed most often.

Q: (L) The music that kids listen to, is there any effort to program them in this media?

A: Yes.

Q: (L) Do they use subliminals?

A: Yes.

Q: (L) Do they use electronic signals?

A: Yes.

Q: (L) Do they use electronic signals on television programming?

A: Have but not that often.

Q: (L) Is there any signal being sent over the test of the emergency broadcast signal?

A: No.

Q: (L) If the Lizzies have been feeding off of us frequently and are planning to come and take over our planet, why, when they achieved their domination 300,000 years ago, did they not just move here and take up residence and be in charge?

A: No desire to inhabit same realm.

Q: (L) Why was this?

A: You are 3rd level they are 4th level.

Q: (L) Why are they planning to now?

A: They want to rule you in 4th density.

Q: (L) If the mother planet that the human race was seeded on originally, is burned up, or turned into a cinder, I would like to know how it burned up?

A: Star expanded.

Q: (L) Well, if the star expanded, it must have expanded recently, is that correct?

A: Time does not measure that way in that realm.

Q: (L) What realm is that?

A: Time/space warp.

Q: (L) What do you mean by a time/space warp?

A: Too complicated but you already have some understanding of concept.

Q: (L) So, the star expanded and the mother planet was turned into a cinder. If this was the case, it means that it must have turned into a cinder very close to the point, using time loosely, when human beings were created?

A: You can't even use it loosely.

Q: (L) Would you help me out here. I'm trying to figure out why, if that planet was turned into a cinder, why were human beings seeded there... what was the point in being brought into being on a planet that was very shortly to become a cinder... a crispy critter...

A: Okay. Now: "Shocker" For you. It hasn't become a cinder yet.

Q: (L) Okay. What is it. You told us it was a cinder... burned up... what is the real story here?

A: It will be at the same "time" that you go to 4th density. The human race is currently being formed on D'Ahnkiar.

Q: (L) What do you mean that the human race is currently being formed on that planet? Is that because that planet is this planet?

A: No. That closes realm grand cycle.

Q: (L) Are you saying that there are human beings being created on that planet at this current time...

A: Yes, you are. Your race is forming there.

Q: (L) How?

A: Realm crossing understand?

Q: (L) Are you saying that there are 4th density bodies being formed there...

A: No. 3rd.

Q: (L) There are 3rd density bodies... are we going to leave the bodies we are in and go into other bodies?

A: You are drifting... Think carefully. Realm is derivative of reality. Cycle.

Q: (L) So the human race is being formed on this other planet at the present time...

A: Yes.

Q: (L) And at the time of the realm border crossing, this other planet will then become cindered... burned up...

A: Yes.

Q: (L) Where will the human beings go that are being formed on that planet at the time of the realm border crossing?

A: Ancient earth.

Q: (L) They will go to ancient earth?

A: There is no time as you know it; its all just lessons for the collective consciousness.

Q: (L) So at the closing of this grand cycle everything will just start all over again?

A: Not exactly; you see, there is no start.

Q: (L) Are a lot of souls on the earth going to recycle into these new bodies coming onto the earth?

A: Yes.

Q: (L) As ancient mankind?

A: Yes.

Q: (L) And do the whole thing all over again?

A: Yes.

Q: (L) So, in other words, a lot of people are going back to square one?

A: Close.

Q: (L) Is this punishment.

A: No. Nature.

Q: (L) Are some of the souls, at that point, going to move into a higher density level?

A: Yes.

Q: (L) Could you give us a percentage on this?

A: No. Open at this point.

Q: (L) Now, getting back to the planet, if at some point in the cycle, bodies were generated on this planet and brought to earth, who brought them?

A: Realm crossing.

Q: (L) It was not a who, it was a what, is that correct?

A: All is who and what.

Q: (L) Well, the other night you mentioned something about the Transient Passengers hauling these bodies off that planet and bringing them to earth, is that correct?

A: Yes.

Q: (L) Well, are these Transient Passengers Realms?

A: Yes. So are you.

Q: (L) Do you guys know what you are doing to the linear mind here?

A: Can of worms.

Q: (L) You said something the other night when we lost the tape about the expansion of the star being conducive to creation. Could you give us a little bit on that aspect?

A: Transdimensional Atomic remolecularization.

Q: (L) What is Remolecularization.

A: Being reassembled.

Q: (L) Reassembled from what to what?

A: Complex. Density collision.

Q: (L) Collision of one density with another. Which?

A: Learn 4 level assembly.

Q: (L) How?

A: Study.

Q: (L) Does this mean that this was a point in space time when pure energy could form around a framework of a thought pattern and thus become solid matter?

A: Close.

Q: (L) Is this transitioning of energy from higher densities into third density or solid matter kind of a traumatic event for universal energy?

A: Subjective.

Q: (L) Is it a form of death?

A: Death and birth are the same.

Q: (L) Was it a requirement to be on a planet with a dying star for this remolecularization to take place?

A: If 3rd density remolecularization.

Q: (L) So, for energy to go into 3rd density physical level... is energy moving down when it comes into 3rd level?

A: No. Upward.

Q: (L) What moves upward?

A: Molecules, atomic matter. Light is first density and unifies all densities.

Q: (L) Does that mean that by us moving from 3rd density into 4th density that we are getting farther away from unification with the source?

A: No. Light and darkness unify all densities.

Q: (L) How many levels of density are there?

A: 7

Q: (L) When you reach the seventh level, how would you describe that if 1st level is light?

A: 7th is core of existence.

Q: (L) Well, if seventh density is the core of existence, would that mean that 1st density is the outer edge of existence?

A: Base.

Q: (L) When one has reached 7th density, then what does one do?

A: When one reaches 7th all do.

Q: (L) Are there any beings on 7th level?

A: Time does not exist.

Q: (L) When light is transferred to electrical energy, does it actually change density?

A: Yes.

Q: (L) Is it from 1st to 3rd when it becomes electricity?

A: Yes.

Q: (L) Once again, are there any beings on 7th level?

A: Big bang.

Q: (L) Big bang is at 7th level?

A: Close enough.

Q: (L) So, when we all reach 7th level we will all blow up? We will all become one and it will all start all over again?

A: Close.

Q: (L) Well, that's not a pleasant thought!

A: Why? There is no time, you dwell there eternally. 7th is the light you see at death of the body.

Q: (L) So, when you die and leave the body, do you go to seventh level?

A: See it.

Q: (L) Well, I have a book over on the shelf called "Messages from Michael"... this entity says that souls are being continually flung off from some sort of soul generator somewhere in the universe... what was this source?

A: Entity at 3rd incarnate.

Q: (L) Was this information valid in absolute terms?

A: No. Souls are already created.

Q: (L) You mean from the first instant of time (excuse the term)?

A: Yes.

Q: (L) Well, it all seems pretty amorphous.

A: Amorphous is perceptive.

Q: (L) I want to ask what is the source of the pain L__, J__ and I have been experiencing identically for the past week or so?

A: DNA changes.

Q: (L) And what is the source of these DNA changes?

A: Moving to 4th density.

Q: (L) How soon are we going to make it?

A: Open.

Q: (L) In referring to the Nephilim you used the term “forced insemination”. How does this differ from “artificial insemination?”

A: No difference.

Q: (L) At the time of the tower of Babel it says that the Nephilim looked on the daughters of men and took wives as if there were some friendly interaction of some sort... does this mean they broke ranks and had feelings for their human “wives”?

A: No. Another deception of history. Picturesque way of describing genetic experiments.

Q: (L) Why did the sphinx look like a feline human?

A: Symbolism of feline energy.

Q: (L) Was this why the Egyptians worshipped cats or held cats in such high regard?

A: At root of this.

Q: (L) What was the origin of this feline god?

A: Atlantean tradition.

Q: (L) Where did the Atlantean tradition of the feline god originate?

A: Superstition.

Q: (L) What was the superstition about?

A: Not important.

Q: (L) Well, it is possibly important because such an enormous monument was built to honor this god and I am sure the world would like to know what is at the root of this.

A: What is at root of Statue of Liberty?

Q: (L) A principle. So, a feline principle is at the root of the sphinx?

A: Close.

Q: (L) It does not represent any alien beings, gods or goddesses?

A: No.

Q: (L) And what was this god's name?

A: Endurra.

Q: (L) Why did the worship of this god or goddess stop?

A: Fizzled out.

Q: (L) You said that the Lizzies lived among humans for a thousand years. When, in our illusion of time, did this occur?

A: During peak of Atlantis.

Q: (L) And how long was the Atlantean civilization in existence?

A: 70,000 years

Q: (L) Was mankind living on the earth as a sentient being during the time of the large dinosaurs?

A: Yes and no.

Q: (L) What does that mean?

A: Transitory time warp.

Q: (L) Was there ever a time when there was a physical human race that contained within a single body both sexes?

A: No,.

Q: (L) Was the physical human race always two sexes, that is, male and female?

A: Yes.

Q: (L) Did Atlantis go down as a series of destructions?

A: Yes.

Q: (L) How many cataclysms?

A: Three.

Q: (L) Were these cataclysms all caused by the same source?

A: No.

Q: (L) And you said that the “flood of Noah” was the story of the final deluge and destruction of Atlantis?

A: Yes.

Q: (L) And that was caused by what?

A: Venus.

Q: (L) I thought you said it was caused by Martek?

A: Yes.

Q: (L) Well, how can it be caused by Venus if it was caused by Martek?

A: Venus also “caused” Martek.

Q: (L) You said that the earth, up to that time, was surrounded by a water vapor canopy, correct?

A: Yes.

Q: (L) And when Mars came by it overloaded the earth’s atmosphere and it fell as a deluge, correct?

A: Close.

Q: (L) When did Venus enter the solar system?

A: 80000 years approximately.

Q: (L) How many close passes to the earth did Venus make?

A: Seven.

Q: (L) Was Venus involved with the planet Kantek which you said exploded due to psychic energies generated by its inhabitants?

A: No.

Q: (L) When L__ took the Melatonin the other night, how come he was unable to sleep?

A: Adjusting to the melatonin.

Q: (L) Is everything going to work out for Frank in a positive way?

A: Eventually if he can withstand the rough period.

Q: (L) Is it true that once we have gotten through rough periods and established faith and patience, we don’t have to do it anymore?

A: Open.

Q: (L) How long is it seen that mother will be staying with this lady in Largo?

A: 4 to 6 months longer.

Q: (L) Why has A__ B__ not called me back about crop circles?

A: UFO grapevine gossip.

Q: (L) Saying what?

A: Your source is not valid.

Q: (L) Who started that grapevine rumor?

A: Two people.

Q: (L) Who are they?

A: F__ and W__. Ego again.

Q: (L) Well guys, let me ask you: did you start this communication because you wanted this information given out to the world in a general way? Or just simply because we were driven to have answers?

A: Yes. Both.

Q: (L) If we are going to get this information out, it should just happen...

A: Yes, but resistance and interference too. Persevere.

Q: (L) Well, with all this resistance and this grapevine it is real discouraging.

A: Not right people.

Q: (L) Well, can you tell me about a few of the right people?

A: Not problem. Just press those you have.

Q: (L) Okay, thank you and good night.

A: Good Night.

END OF SESSION

2.24 November 19, 1994

Frank, Laura, V__, Terry and Jan

Q: (L) Hello.

A: Hello. Please no rituals. They constrict energy flow.

Q: (L) Who do we have with us this evening?

A: Xora

Q: (L) Are you a discarnate?

A: No.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (V) I met a young man named J__ this evening who claims to be a psychic vampire. Do you know of the person I am speaking of. The conversation I am speaking of?

A: No.

Q: (V) What I want to know is has he mislabeled himself?

A: Yes.

Q: (V) Is he under demonic possession?

A: No.

Q: (V) Is he playing games with me?

A: No.

Q: (V) What's his problem?

A: Delusional.

Q: (V) He wants to, more to the point of questioning, he wants to speak with me more. I figure it's for one of two reasons, one is he wants to take my energy, or two because he is calling out for help, is he wanting to take my energy?

A: In a sense.

Q: (V) Does he want my help as in counseling?

A: No.

Q: (L) Does he want to waste her time?

A: Open.

Q: (V) So he's not attached? I find that hard to believe. Is he attached?

A: Most likely.

Q: (L) Terry wants to ask why he has such deep rooted anger?

A: Victim of much circumstances related to this life.

Q: (L) Is it karmic?

A: It always is.

Q: (L) Can you give us a clue about how to deal with this and relieve it?

A: It's already in progress.

Q: (L) Is there anything to speed the process?

A: Not necessary.

Q: (T) Is there something I can do about it or will it relieve itself in its own course?

A: You are already on right path.

Q: (T) Have I been abducted?

A: Childhood.

Q: (L) Has he been abducted since he was grown?

A: Maybe in level 3.

Q: (L) What is level 3?

A: Type of abduction.

Q: (L) How many levels and types of abductions are there?

A: Six

Q: (L) What is level 3?

A: Consciousness altered to “alpha” state.

Q: (T) Does this mean screen memories?

A: Close.

Q: (T) In other words I will be seeing something other than what is actually happening? Or remembering something other than what actually happened?

A: Yes but not physical as in childhood.

Q: (V) Has he been to the caves? Have the Grays taken him to the caves?

A: This is strange question.

Q: (L) How many times has he been physically abducted?

A: 27.

Q: (L) How many times have they interfered with his consciousness by inducing an alpha state?

A: 196.

Q: (T) Is this when I am asleep that they induce this alpha state?

A: Sometimes.

Q: (V) Has it ever happened when he's in front of his computer?

A: At work.

Q: (T) At work for Honeywell?

A: Inside large white building.

Q: (L) Where is the large white building? (T) That's the Honeywell complex. (F) Are they all white? (T) They're all white. (V) Is the Honeywell corporation agents of the Lizzies?

A: No. US government.

Q: (T) Yes they are. They are a government contractor. Has it happened since I worked at my new job?

A: No.

Q: (T) Is it because I am no longer working for a government facility?

A: Partly.

Q: (T) What would the other part be?

A: You have recently had consciousness raising experience.

Q: (L) And this consciousness raising experience has made it more difficult for them to play with his head?.

A: Yes.

Q: (T) What was the consciousness raising experience?

A: Soul searching period.

Q: (V) Have you been doing a lot of soul searching? (T) I've been saying that I have been at 100% depression for six or seven weeks now. (L) What is causing Terry's depression?

A: Change of DNA.

Q: (T) What brought about the change in DNA?

A: Moving toward 4th level of density reality.

Q: (L) Why does this always seem to cause pain, suffering or depression?

A: All level 1 changes do.

Q: (L) What are level 1 changes?

A: We use "level" designation to denote significance.

Q: (L) Is level 1 most significant?

A: Yes.

Q: (L) As the numbers go higher does the significance get lessened?

A: Close.

Q: (L) What is causing the pain in Jan's right shoulder since several of us have been having this exact same symptom?

A: DNA changes.

Q: (L) Can Reiki be used to help alleviate the discomfort?

A: Not necessary or recommended.

Q: (L) Do we just have to suffer through this one?

A: Each “suffering” will be closely followed by dramatic life changes.

Q: (V) Is there any reason why I have not experienced this discomfort?

A: You will.

Q: (T) Will I continue to be abducted now that I have had this change of consciousness?

A: Open.

Q: (T) Are the same beings doing all the abductions or are there different groups?

A: Two groups.

Q: (T) What is one group?

A: Grays.

Q: (T) What is the other group?

A: Lizards.

Q: (T) Is the woman Marissa Tower channeling the Lizzies?

A: Yes.

Q: (T) Are these Lizzies she is channeling intentions beneficial toward Human beings?

A: No.

Q: (T) Was I in some kind of danger by ticking her off?

A: Not at this point.

Q: (T) Is there anything further you would like to say about this woman channelling the Lizzies?

A: Further interactions with Lizards are not encouraged. Be careful of some in "MUFON".

Q: (T) Is it true that the government is using MUFON as their grass roots information gathering organization?

A: Yes.

Q: (T) I received information during a dream. Was the information real or was it just a dream?

A: Corrupted.

Q: (T) By who or what?

A: Conflicting energies.

Q: (L) What are the sources of these energies, are these within Terry himself or outside him?

A: Both.

Q: (T) Can the information that was sent through be retrieved?

A: Will be repeated. Have you noticed your repeating dream patterns?

Q: (T) I have not been remembering most of my dreams.

A: Try melatonin; avoid any antidepressants. Some have suggested.

Q: (L) Is pot considered an antidepressant?

A: No.

Q: (T) Is the information of the dream important not only to me but to everybody?

A: All is.

Q: (T) Are different people receiving different pieces of information or are some people receiving as much as they can handle and then it moves to another person to receive more of the information in varying amounts?

A: Too many questions.

Q: (T) Is this information being given out in pieces to different people to be put together?

A: Close.

Q: (T) The information I have would not then be whole unto itself?

A: Network. Use computer net. There are others communicating and piecing together in this way.

Q: (T) How do I retrieve the information?

A: Ask.

Q: (L) Start taking the melatonin?

A: No. On computer network.

Q: (T) Ask on the computer network how to retrieve the information?

A: No. Others ask.

Q: (L) Ask if others are having dreams of a similar nature?

A: Open dialogue.

Q: (T) I received a dream one night, I saw what was presented to me, I would describe it as a holographic or virtual reality computer screen. It was a glowing outline of a screen and information scrolled past. The information was in different colors. There were a lot of different documents. The long documents I believe were some kind of technical references. It was just a black void; I wasn't even there; it was just there in front of me like I was watching a screen. There were red documents, very short, that I took to be some kind of statement, they scared me. I don't remember what they were. There were green documents, there were yellow documents. The outline of the screen changed the color of the documents as they scrolled through. There was a lot of them. I know I read all of them but I don't know what any of them said.

A: Hypnotize Terry.

Q: (L) In that hypnosis with my son, was that an abduction in a previous lifetime?

A: End of life information session. Read "Majestic".

Q: (L) When a person dies and leaves the body, are the beings who take charge of the soul and direct the end-of-life review and the next life plan, are these beings similar to what we call aliens?

A: Sometimes. But on individual basis and level 5 density.

Q: (L) So, are you saying that any "aliens" that would be assisting with this type of thing would be of the level 5 density? Or, that the individual would be of the 5th level?

A: Alien is based on one's perspective.

Q: (L) But, does this mean that the "being" is the level 5 density person?

A: Yes. Reflective of experience vibration.

Q: (L) Why is the planchette moving so slowly tonight?

A: V___'s attention is diverted.

Q: (L) Diverted to what?

A: Writing.

Q: (T) One last question and I will be gone for now. Who sent me the information in the dream?

A: You don't have to "go". Complex.

Q: (T) Was the information sent by the good guys or the bad guys?

A: Different concept.

Q: (T) What race of beings? Did it come from a specific race?

A: Not exactly.

Q: (L) Can you give us just a few words on this?

A: Okay, Laura. Cosmic retrieval system.

Q: (L) What does the cosmic retrieval system retrieve?

A: Remember computer was inspired by cosmic forces and reflects universal intelligence system of retrieval of reality.

Q: (T) This is a computer network, yes or no?

A: Strange thought pattern.

Q: (T) What you have described, on a very large scale, sophisticated...

A: Grand scale, close.

Q: (T) Can I access it through our earthly computer system?

A: In a sense, but not directly as of yet. But just wait. [Break]

Q: (L) Okay, we are back guys. Have you been listening to us?

A: We are always with you now.

Q: (L) With all of us?

A: We have added Jan and Terry. Will add more as needed.

Q: (J) Is there a specific pattern to the phone calls that I have been getting in the mornings?

A: No.

Q: (J) Is there any outside agent causing my phone to ring to help me to wake up when I need to?

A: No. Just coincidence.

Q: (J) Is there any significance to the high number of hang-ups I have been getting on both our phone lines?

A: Three calls were monitors because of MUFON involvement.

Q: (L) Are Terry and Jan's phones tapped?

A: Phone "taps" are no longer necessary.

Q: (L) Why?

A: Technology advancements.

Q: (L) You mean they can listen to us without tapping our phones?

A: Yes.

Q: (L) Can they listen to us over the phones even when the phones are hung up?

A: Can.

Q: (T) Can they listen to us through the t.v. through the infra-red frequency?

A: Again, technology has advanced beyond that. Walls have “ears.” Satellites can monitor any conversation or meeting.

Q: (J) Is this conversation being monitored at this point in time?

A: No.

Q: (T) Can our movements be tracked through the electronic ignition systems in our cars?

A: Not necessary. You are not yet aware of the extent to which humans have been “aided” in technological advancement.

Q: (T) By whom?

A: This requires long and complicated response.

Q: (T) The object behind using the electronic ignitions, from what I have heard, whether the source is true or not I can't say, but I had a strange confirmation of part of it.

A: Beware of disinformation. It diverts your attention away from reality thus leaving you open to capture and conquest and even possible destruction.

Q: (L) Is the information about the electronic ignition systems correct?

A: Disinformation comes from seemingly reliable sources. It is extremely important for you to not gather false knowledge as it is more damaging than no knowledge at all. Remember knowledge protects, ignorance endangers. The information you speak of, Terry, was given to you deliberately because you and Jan and others have been targeted due to your intense interest in level of density 4 through 7 subject matter. You have already been documented as a “threat.”

Q: (L) Can you tell Terry what event occurred (referring to “confirmation” of electronic ignition subject)...

A: Remember, disinformation is very effective when delivered by highly trained sources because hypnotic and transdimensional techniques are used thereby causing electronic anomalies to follow suggestion causing perceived confirmation to occur.

Q: (T) Who was the guy in the Camaro?

A: Diversion.

Q: (T) About two weeks after I saw the video tape where I heard this information, a guy pulled up out of nowhere driving a souped up Camaro... (Jan: No! It was the night we were watching it!) We had watched it before and we were talking about it and decided to watch it again. So, Gary and I had decided to go outside to take the dog around the block and we had just gotten back and put the dog on the porch and we were standing outside smoking a cigarette when the guy in the Camaro pulls into the driveway with steam coming out from under the hood. He asked to use the hose. I told him yes. He gets out wearing jeans, tee shirt and scraggly blond hair. He says: "I overheated. I'm coming back from Gulfport and was going back to Ocala and was on the interstate when his car overheated. Now, 275 is a little ways from my house and he came all the way, passed a gas station and convenience store, turned off the main drag and then onto my street to get water... then he started talking about how the new electronic ignitions are designed to shut down when the car exceeds a certain speed so he had installed a special racing ignition but ever since his car had been overheating... we had just finished watching this movie about electronic ignitions and we were flabbergasted... What I want to know is who has the power and ability to set up these kinds of "confirmations" or synchronicities?

A: Same forces spreading disinformation: Brotherhood/ consortium/ Illuminati/ New World Order/ "Antichrist"/ Lizards.

Q: (T) But I'm just a nobody. Why would they go to all trouble to send somebody in a Camaro to drive up on my lawn...

A: Several answers follow: Number One, Nobody is a "nobody." Number two, it is no trouble at all for aforementioned forces to give seemingly individualized attention to anybody. Number three, Terry has been targeted and so has Jan and others because you are on the right track. Number four, This area is currently a "hot bed" of activity and extremely rapidly expanding awareness. [Talk about the Philadelphia Experiment during break]

Q: (L) I suppose you have been listening to us talk. What do you have to comment about the Philadelphia experiment?

A: We are always listening. (Laura makes error in calling out letters.) More coffee, Laura. [Terry takes V___'s place at the board for a time.]

Q: (L) Are you, in a sense, part of the cosmic computer network retrieval system?

A: All are in one way or another.

Q: (L) Did the Philadelphia experiment, as described by Terry's scoutmaster, occur in the way it was described?

A: That description was not of Philadelphia experiment.

Q: (L) Was that the ship that was part of the Philadelphia experiment?

A: One of three.

Q: (L) Were the effects that ship experienced a result of the Philadelphia experiment as we understand it?

A: Reality molecular residual.

Q: (L) Did the Philadelphia Experiment, as we have read about it, occur in the way it was described?

A: Close.

Q: (L) Was Al Bielek part of the experiment?

A: Yes.

Q: (L) Was the information he has given out about this factual?

A: Close.

Q: (L) Is the information he gives about being aged regressed in the body and his brother coming into a new body accurate?

A: No.

Q: (T) Is his brother, Duncan, really who he claims to be?

A: No.

Q: (L) Is Al Bielek really who he claims to be?

A: No. Was technician but not aboard vessel.

Q: (L) So he did not go back and forth in time?

A: Correct.

Q: (T) So he's trying to make himself out to be more than he actually is?

A: Yes.

Q: (J) He is a wannabe?

A: No. He is an agent of the government.

Q: (T) Is Preston also a government agent?

A: Yes.

Q: (T) Why are they coming out with this story? Besides disinformation...

A: Slow revelation to effect gauge of public response.

Q: (L) Should V___ stand behind Terry and put her hands on his shoulders for energy?

A: Not necessary because Terry has adequate energy of his own. George Bush was involved with Philadelphia experiment.

Q: (T) He was Navy, World War II. (L) I would like to know what happened to Ambrose Bierce?

A: Dead. Spontaneous combustion.

Q: (L) What happened to Marcia Moore who was working on drug enhanced outer space contact via altered consciousness?

A: Permanent abduction victim by Lizards.

Q: (L) Why?

A: Too close to truth.

Q: (L) Well, are we close to the truth too?

A: Yes.

Q: (L) Will we be permanently abducted by the Lizards?

A: Knowledge protects.

Q: (L) But didn't she have a lot of knowledge too?

A: Scrambled with drugs.

Q: (L) I would like to know what is the specific mode of time travel?

A: Complex.

Q: (L) Well, just give us a clue here?

A: Transdimensional transfer utilizing electromagnetic adjustment of atomic structure to alter speed of time cycle convergence.

Q: (L) Who or what are the individuals called “Men in Black”?

A: Lizard projections.

Q: (T) Does that mean that they are just projecting an image of a being?

A: Yes.

Q: (T) The MIBS are not real, then, in our physical terms?

A: Partly correct. You do not understand technology but we will describe it if you like.

Q: (L) We like. Please describe this.

A: Okay. Get ready. First we must explain further time “travel” because the two concepts are closely related. The first step is to artificially induce an electromagnetic field. This opens the door between dimensions of reality. Next, thoughts must be channelled by participant in order to access reality bonding channel. They must then focus the energy to the proper dimensional bridge. The electrons must be arranged in correct frequency wave. Then the triage must be sent through realm “curtain” in order to balance perceptions at all density levels.

Q: (L) Information in the event that has to be balanced or taken into consideration as to importance so that the program runs correctly. Is this the correct interpretation of triage as you have used it?

A: Sort of. Triage is as follows: 1. Matter, 2. Energy, 3. Perception of reality. That is it folks.

Q: (L) Who abducted Betty Andreasson.

A: Grays.

Q: (L) Was the information that Betty Andreasson was given by these beings who abducted her, screen information or false information of information for disinformation?

A: All of the above and some factual.

Q: (L) In the Ann Haywood case which is supposed to be a case of demonic possession or obsession, who or what are the beings that are afflicting this woman and her family?

A: 3rd density section “B” energy anomalies same as “poltergeist.”

Q: (L) The case that is described in the book “The Haunted”, about the Smurl family, with quite a bit of phenomena occurring in their house including the sighting of a big- foot type. Creature, what is the source of the phenomena in that case?

A: Same.

Q: (L) So, neither of those cases are “alien” related?

A: Correct.

Q: (L) Why are there such marked similarities between those two cases and the case described by Karla Turner and other alien abductions?

A: Similarities are open to interpretation. Turner household was opened to multiple types of phenomena due to interaction with Grays and others.

Q: (L) Does that occur frequently in interactions with Grays?

A: When there is excessive activity of this sort it leaves open channels or “windows” which allows all sorts of things to come through.

Q: (L) Well, who are these old hags who have sex with people...?

A: Poltergeistal entities.

Q: (L) What is a poltergeist entity?

A: Self explanatory.

Q: (L) Is the poltergeist entity generated by the subconscious energy of the individual to which the poltergeist effect occurs or takes place?

A: Interaction just like everything else between perceived and perceiver.

Q: (L) And what is, in this case, being perceived? Is it an energy construct or is it an actual being?

A: Both. Remember, Laura, you too are an energy construct.

Q: (L) Okay, in S__'s regression to the time she experienced a meeting on a ship, there was a woman very similar to the woman described in these other cases. Who or what was that woman and why was she there?

A: This "woman" is becoming quite popular isn't she?

Q: (L) Who, the woman in the hypnosis or S__?

A: The "Hag."

Q: (L) Why is she becoming so popular? (J) She must be good!

A: We don't know.

Q: (L) When my daughter A__ did a spirit viewing of me she saw a cord attached to me and at the end of this cord there was a blue astronaut. What was the blue astronaut she saw?

A: Guide.

Q: (L) Well, we disconnected him. Should we have left him alone?

A: Up to you.

Q: (L) Who were the beautiful Nordic beings seen by George Adamski?

A: Figment of George Adamski's highly evolved imagination.

Q: (L) Several times I have heard reference to big flying rectangular boxes. I would like to know who these belong to?

A: Lizard projections.

Q: (L) Why do they have so many different types of craft?

A: Not all are theirs.

Q: (L) Now, we went to the recommended person to take the Reiki initiation, do we now, at this point in time, have the true Reiki initiation?

A: Getting there. Must allow energy to solidify. Do you understand the concept of imprinting?

Q: (L) Yes.

A: Then you know.

Q: (L) Practicing Reiki is the thing that will solidify the force?

A: Partly.

Q: (L) Are there symbols for Reiki that are even older and stronger than the ones we have been given?

A: Yes.

Q: (L) Are the original symbols in Sanskrit?

A: Yes.

Q: (L) Where are we going to find them?

A: You are not.

Q: (L) And the Reiki Symbols we learned from S__ are the closest we can get?

A: Yes. Good enough.

Q: (L) When one receives the Reiki initiation does it reverse the flow of intake and output, positive or negative polarity of the energy flow in the hands?

A: Yes.

Q: (L) Does the left hand then become the output hand?

A: Yes.

Q: (L) Is the right hand then the intaking hand?

A: Yes.

Q: (L) Is the Sui Ching attunement S__ gives more powerful than anything we could have received from any other person?

A: Yes. Have faith.

Q: (L) The spiritual exercises she teaches, are those beneficial for us both to practice?

A: They are okay.

Q: (L) Is that so-so or really good?

A: Remember some things must be learned by your own path.

Q: (L) What or who are the South American aliens I have read about who are described as being gray with thick lips, rudimentary features, gray uniforms, and are called by the South Americans "Malos"?

A: Lizard projections.

Q: (L) Were these also the clay-like beings seen by Betty Andreasson only she saw them wearing blue suits?

A: Yes.

Q: (L) Where was Betty Andreasson taken to when she saw the Phoenix in her abduction?

A: Another dimension of reality.

Q: (L) Is Betty Andreasson correct in believing that her experiences are positive and are bringing her closer to God?

A: No.

Q: (L) Is Betty Andreasson deluded?

A: No. She is a victim.

Q: (L) What happened to the Australian pilot Frankerick Valentich?

A: He was taken by the Lizards and dissected.

Q: (V) It just gets uglier and uglier! (L) Okay, I want to ask about this purple energy plate. Is this something that would be worth spending money on?

A: No. Is bogus. Pretty color though.

Q: (L) How long should I wait to get the master initiation?

A: Up to you.

Q: (L) S__ likes for her students to wait six months. Is it necessary or beneficial for me to wait that long since I have been doing Reiki for so long?

A: Up to you.

Q: (V) We would like to know why we have all been under such attack lately?

A: Because you are now connected to a valid source.

Q: (L) Is Bob Oeschler a government plant?

A: Semi.

Q: (L) Was the Carp, Ontario UFO landing a real UFO landing?

A: Yes.

Q: (L) Who was involved in that?

A: Grays.

Q: (L) Anyone else?

A: No, but government wants to use it as in “opportunity knocks.” UFO per se was not staged. Guardian story was.

Q: (L) Was the UFO actually flown by aliens?

A: Yes. Government has miles of UFO footage in its possession. May use at its discretion.

Q: (T) What does it mean that the Guardian story was staged. How? Is the video tape real?

A: Used tape to concoct story around.

Q: (T) Did the individual calling himself Guardian actually film that?

A: No.

Q: (T) Who filmed it?

A: Military.

Q: (T) How did they know to be there in the middle of Ontario Canada to film that landing?

A: Landing took place near where regiment of NATO reservists were training.

Q: (T) Did it take place where they said it did?

A: Near.

Q: (T) Was the woman in the farmhouse part of the plot?

A: Saw UFO. Was part of “flap”.

Q: (T) Was the UFO experience that the woman in the farmhouse had, was that the same event on the Guardian tape?

A: No. But similar.

Q: (T) So we have a woman who saw a UFO landing, had one that they had on tape, and when she came forward to talk about her sighting, they decided to use the footage to corroborate her story, is that correct?

A: Yes.

Q: (T) Did the woman know about the NATO maneuvers?

A: No.

Q: (T) Were the NATO maneuvers near where she was?

A: Yes. All major military exercises are plagued by UFOs.

Q: (T) Is the government planning to stage an invasion by aliens to cause the populace of the world to go into such a fear state that they will accept total control and domination?

A: Open. But if so, will “flop”.

Q: (T) Why?

A: Many reasons: 1. Visual effects will be inadequate and will have “glitches”. 2. Real invasion may take place first. 3. Other events may intercede.

Q: (T) Such as what?

A: Earth changes.

Q: (T) Am I correct in assuming that some of these hot-shot, big-wig guys in the government who have plans for taking over the whole world and making everything all happy and hunky-dory with them in charge, are just simply not in synch with the fact that there are some definite earth changes on the agenda? Are they missing something here?

A: Close. They are aware but in denial.

Q: (T) Are these earth changes going to occur prior to the arrival of the cometary cluster?

A: No. But “time” frame is, as of yet, undetermined.

Q: (T) Am I correct in saying that if they knew what was really going to happen that they would still continue with their stupid little plans to make money and try to control the world?

A: Yes. Greed is a sickness.

Q: (T) Is there such a thing as “alternative three” the plan to take all the brains off the planet?

A: No.

Q: (T) Is that more disinformation?

A: Yes. So is Mars landing but not Mars monuments.

Q: (TL) Who made the monuments on Mars?

A: Atlanteans.

Q: (T) So, the Atlanteans had inter-planetary ability?

A: Yes. With ease. Atlantean technology makes yours look like the Neanderthal era.

Q: (T) Who created the structures on the moon that Richard Hoagland has discovered?

A: Atlanteans.

Q: (T) What did they use these structures for?

A: Energy transfer points for crystalline power/symbolism as in monuments or statuary.

Q: (T) What statuary are you referring to?

A: Example is face.

Q: (T) What power did these crystals gather?

A: Sun.

Q: (T) Was it necessary for them to have power gathering stations on Mars and the Moon. Did this increase their power?

A: Not necessary but it is not necessary for you to have a million dollars either. Get the correlation? Atlanteans were power hungry the way your society is money hungry.

Q: (T) Was the accumulation of this power what brought about their downfall?

A: Yes.

Q: (T) Did they lose control of this power?

A: It overpowered them the same way your computers will over-power you.

Q: (V) Is it similar to them gaining a life and intelligence of their own?

A: Yes.

Q: (L) You mean these crystalline structures came to life, so to speak?

A: Yes.

Q: (L) And then what did they do?

A: Destroyed Atlantis.

Q: (L) But I thought that Atlantis was destroyed because of the close passage of another body of the solar system?

A: Was damaged but recovered.

Q: (L) So Atlantis was damaged by a close passage of Mars or whatever and then recovered from that damage, is that correct?

A: Part of landmass, but not all, was destroyed.

Q: (L) So, how many seperate destructions did Atlantis experience?

A: Three.

Q: (L) One was caused by the close passage of Mars?

A: Yes. And comets.

Q: (L) Was Mars and the comets loosely interactive?

A: Yes.

Q: (L) And the second was caused by what?

A: Venus.

Q: (L) And the third and final destruction was caused by what?

A: Crystals.

Q: (T) Are the crystals still active?

A: Bermuda triangle.

Q: (L) I thought that was a myth?

A: No.

Q: (L) And what does that crystal do? Is it continuously active?

A: No. Erratic.

Q: (L) Is it still active in the sense of being a conscious or sentient entity?

A: No.

Q: (L) What activates it?

A: Many factors.

Q: (L) And when it is activated, what does it do?

A: Transdimensional window is blasted open.

Q: (L) Say a person was sailing along in the Bermuda Triangle and the window was blasted open and these people passed through or were engulfed in it or whatever, in what condition would they find themselves?

A: Something akin to suspended animation.

Q: (L) Would they be conscious of their state of suspended animation or would their consciousness also be suspended?

A: Either or.

Q: (L) Do they stay in this state forever, or do they come back out, or do they come out somewhere else?

A: Open. All are possible. Same thing happened to Philadelphia experiment participants.

Q: (L) If an individual were in this interdimensional state of suspended animation, does this mean they are stuck there forever?

A: Maybe.

Q: (L) Can they not die, is that what you are saying?

A: To them they may perceive something like waiting for millions of years.

Q: (L) Is there no one or no way to rescue them from this state?

A: Why do you think those sailors were hopelessly insane?

Q: (L) Besides the crystal in the Bermuda Triangle, are any of the others still active?

A: Yes.

Q: (T) Does the government know about them?

A: Semi.

Q: (L) Where are the others located?

A: Off Japan; in Brazil; in Ural mountains of Russia; North and South Poles.

Q: (T) Are the ones on the Moon and Mars active also?

A: Yes.

Q: (V) Are they responsible for any of the earthquakes like the one in Japan?

A: Yes.

Q: (L) If one crystal is found and the technology is deciphered, and another is found, does it increase the power...

A: Let us answer this way: If Neanderthals found a 747 would they know how to use it?

Q: (L) What were the physical dimensions of these crystals and were they cut or naturally grown?

A: Varied. Were synthetic.

Q: (L) Were they faceted?

A: Yes.

Q: (L) In their faceting, what was the general configuration?

A: Pyramid.

Q: (L) Was that an absolute pyramid with the same proportions as say, the Great Pyramid at Gizeh?

A: Close.

Q: (L) How large was the largest from base to apex?

A: 5000 feet.

Q: (L) What was the average size?

A: 500 feet.

Q: (L) And was the one that was 5,000 feet tall, is that one still in existence?

A: Yes.

Q: (L) Where is that one located?

A: 380 miles due East of you?

Q: (L) Some years ago a pilot reported seeing a pyramid near there in the water..

A: That is just the top sticking out of the ocean floor. It is 90 per cent buried.

Q: (V) In meditation, I saw crystals coming up during Earth changes. Is this what is going to happen?

A: Yes.

Q: (L) How come this crystal didn't shatter or break up during the subsidence of Atlantis?

A: Extraordinarily strong. An atomic bomb would not shatter it. The chain reaction of a thermonuclear explosion would be absorbed into the crystal and transferred into pure energy. That relates to the design function.

Q: (L) And then what would happen?

A: Energy dispersal unless focused as engineered by the Atlanteans.

Q: (L) Where did they get this technology?

A: They evolved it.

Q: (L) They invented it themselves?

A: Yes.

Q: (L) Did they interact with any aliens?

A: Yes.

Q: (L) Did they get any help at all from these extraterrestrials?

A: Yes.

Q: (L) And who were these aliens?

A: Lizards.

Q: (L) What kind of power frequency did these crystals use?

A: Full range.

Q: (T) How many of the crystals have been discovered by the governments of the world?

A: All.

Q: (T) Are they trying to use them?

A: Pointlessly.

Q: (T) Are they trying?

A: Maybe.

Q: (T) Is that why they backed off from the Moon and stopped the space program?

A: No. Government doesn't understand technology.

Q: (T) Have they backed off from their activities on the Moon?

A: Open.

Q: (T) Are the crystals on Mars why they want to get there so badly?

A: Yes.

Q: (T) Because of the crystals or because of what is stored in the monuments?

A: Neither.

Q: (T) Why do they want to get to Mars?

A: Explore.

Q: (T) Are the top echelons of the human race all the fools that they seem?

A: Subjective.

Q: (L) Can we utilize that crystalline shape to generate electricity?

A: Possible and has been done.

Q: (L) Is it complicated?

A: Yes.

Q: (L) What effect does wearing hematite have on the physical body?

A: Open.

Q: (V) What about this fellow Stephenson?

A: If all parties have faith in it.

Q: (V) Did Laura receive healing on her heart today?

A: Yes.

Q: (V) Where did Stephenson get his information?

A: Read it.

Q: (L) Jan has asked about doing a spirit release?

A: Okay.

Q: (L) She wants to know how many attachments she has?

A: Three. Two positive. One negative.

Q: (L) Terry:

A: Four 3/1.

Q: (L) How did they get them?

A: Find out.

Q: (L) Earlier the suggestion was made to hypnotize Terry, is that what they are saying we should do?

A: Yes.

Q: (T) Can I trust Jerry?

A: Maybe.

Q: (T) Does Commodore Kirk die at the end of the movie? (V) Does X-files have the Lizzie influence?

A: No.

Q: (T) Does X-files tell the people what they need to hear?

A: Yes.

END OF SESSION

2.25 November 24, 1994

Frank and Laura

Q: (L) Hello.

A: Greetings.

Q: (L) Who do we have with us tonight?

A: Peehmi.

Q: (L) Have you ever lived on earth?

A: No. There is little need to ask question each time as this is now grooved channel.

Q: (L) Does that mean that the vibrations have been adjusted for you specifically and that others cannot utilize it?

A: Cannot unless you request.

Q: (L) Are you aware of the letter I got today from Karla Turner?

A: We are Cassiopaeian.

Q: (L) Does that mean that you are aware?

A: We are aware of your entire life aura.

Q: (L) What caused her to react to the channelled information the way she did. Obviously something upset her, what was it?

A: Miffed by personal references; suspicious of motives send her this session verbatim.

Q: (L) Well, okay, what would you say to her... obviously she thinks you, as a source, were caught in a lie and that put her off, what can you say in response to that accusation, I guess you would call it?

A: There are no lies.

Q: (L) Well, obviously that is something that can be said, but she thinks that since you did not come right out and describe everything in precise detail about those two little boys in South Carolina, that what little you did say, she interpreted as a lie. What else is going on here that...

A: There are no lies only interpretations.

Q: (L) Is it important for her to receive information from this source?

A: It is important for all on planet to learn at their own pace.

Q: (L) Is Karla's pace slower?

A: Apples and Oranges.

Q: (L) I would like to address the issue of accuracy. How can we increase or determine or work on accuracy?

A: Accuracy is 3rd level concept.

Q: (L) Well, you do understand that at this level we determine whether information is correct or good by whether it happens or comes true, particularly in terms of prognostications.

A: Yes.

Q: (L) And if a source misses on a prognostication, very often people lose faith in that source. Is that an unrealistic expectation?

A: Yes.

Q: (L) Is that because accuracy is an impossible task because of variability of reality?

A: If it were possible there would be no existence. The universe is nothing more than a learning laboratory.

Q: (L) Okay, well, at this point I am wondering if there is any point in writing to Karla and sharing our information with her at all?

A: Of course. You are all learning. Share information to learn more faster.

Q: (L) Is there anything that can be said to her to help her in a positive way?

A: Have empathy. She was raised to put others before herself.

Q: (L) Well, okay, tell us about this, with the existing probabilities, will Terry and Jan be with us this coming Saturday?

A: Yes. But up to you. Ask and you shall receive.

{We did and they were.}

Q: (L) Jan was telling me that his friends S__ and S__ have bought into M__'s thesis that I am the wicked witch of the west, is this true?

A: Yes.

Q: (L) Why is M__ F__ doing this?

A: Same as all other; this is a self serving, ego dominated world.

Q: (L) Is there any particular viciousness in him toward me, inspired for any particular reason?

A: Some, because of your sex references.

Q: (L) He is mad because I identified his motivations toward S__ as being sexually inspired? Was this true?

A: Yes. But truth hurts.

Q: (L) Can you tell us about this recent volcanic eruption? What was the cause?

A: "Heating up" of earth.

Q: (L) What is causing it to heat up?

A: Vibrational frequency changes.

Q: (L) What is the source of these vibrational frequency changes?

A: Oncoming wave as we have told you before.

Q: (L) This oncoming wave, is this a wave which is so large or so vast that its effects are felt many years in advance of its absolute arrival point?

A: All waves in nature have a "contract" phase.

Q: (L) Does that mean like just before a wave comes up on shore it kind of sucks everything out?

A: Yes.

Q: (L) So we are in the sucking back phase {demonstrates with hand motion and sound effects.}

A: Cute analogy.

Q: (L) Back in 1981 and 1982, my daughter A__ frequently saw something outside her window that she described as an alligator, and she would wake up screaming and we would get up and, on one occasion we saw what seemed to be a figure standing in a corner by the closet. The whole series of events ended up with my having a dream in which I confronted a dragon...

A: Lizard.

Q: (L) What were they doing at that time?

A: Scoping.

Q: (L) What did they discover from their scoping?

A: Potential abductees.

Q: (L) And did they abduct anyone at that time?

A: No.

Q: (L) Why didn't they?

A: You stopped it.

Q: (L) How did I stop it?

A: Knowledge is rooted in awareness.

Q: (L) So, my awareness is what stopped it?

A: Close.

Q: (L) When I had the dream about doing battle with the dragon, was that just a dream, an astral event, or an actual interaction

with the Lizzies?

A: All three.

Q: (L) And what was their reaction to encountering my resistance to them?

A: Disappointment.

Q: (L) Have they tried to harass us since then?

A: Yes.

Q: (L) Have they succeeded on any of those occasions subsequent to that?

A: Yes.

Q: (L) In what way?

A: Alice.

Q: (L) Through my mother?

A: Yes.

Q: (L) Did they abduct her?

A: Garbled her emotions.

Q: (L) Is that their best shot so far?

A: Yes.

Q: (L) Can it get worse?

A: It can always get worse.

Q: (L) So we just have to stay on our toes at all times?

A: Absolutely don't let others distract you. You have suffered many attempts at distraction away from truth. Now follow some proclamations: Pause. All there is is lessons. This is one infinite

school. There is no other reason for anything to exist. Even inanimate matter learns it is all an “Illusion.” Each individual possesses all of creation within their minds. Now, contemplate for a moment. Each soul is all powerful and can create or destroy all existence if know how. You and us and all others are interconnected by our mutual possession of all there is. You may create alternative universes if you wish and dwell within. You are all a duplicate of the universe within which you dwell. Your mind represents all that exists. It is “fun” to see how much you can access.

Q: (L) It’s fun for who to see how much we can access?

A: All. Challenges are fun. Where do you think the limit of your mind is?

Q: (L) Where?

A: We asked you.

Q: (L) Well, I guess there is no limit.

A: If there is no limit, then what is the difference between your own mind and everything else?

Q: (L) Well, I guess there is no difference if all is ultimately one.

A: Right. And when two things each have absolutely no limits, they are precisely the same thing.

Q: (L) Is this all you are going to give for tonight?

A: Open. Can give more another time.

Q: (L) My husband wants to know why his ears have been ringing constantly?

A: Lizard move.

Q: (L) Why is this Lizard move causing his ears to ring?

A: They concentrate on those who are not protected or less protected by knowledge.

Q: (L) What can he do to stop this?

A: Open mind then learn.

Q: (L) And if he doesn't, what would be the result?

A: Further attack.

Q: (L) The other night when Terry and Jan were here and we were getting ready to sit down at the board, I had a sudden sharp pain in my left ear unlike anything I have ever had. It was three sharp jabs. What was that?

A: Electrical nerve surge.

Q: (L) What caused that?

A: DNA changing.

Q: (L) Well, A__ now has the ubiquitous pain in the shoulder. Is this because her DNA is changing?

A: Yes.

Q: (L) You said that each soul is all powerful and could create or destroy all existence... does this mean that an individual could create or destroy all of existence for all others?

A: Yes. But more complex than that will explain further another session.

Q: (L) If we were to ask specific questions, technically speaking, would you be able to tell us how to build a time machine or trans-dimensional transporter of some sort?

A: Yes. But where are you going to get all the hardware?

Q: (L) Well, I didn't say I was going to do it, I just wanted to know if you could tell us how.

Q: (L) Is there anything in a few words that you want to tell us before we end tonight?

A: Network but be careful with whom.

Q: (L) Is anyone going to drop into our lives imminently who is going to help us with this?

A: Wait and see. Just beginning.

Q: (L) We thank you for all your help tonight. Are we going to receive spontaneous information regularly like we did tonight?

A: Occasionally when vibrations are right. Vibrations suggest invite Rodemerks. Energy is better with them.

Q: (L) When V__ is with us, would it be helpful for her to stand behind us and give Reiki while we work the board?

A: If you wish.

Q: (L) I get the feeling that means it doesn't really matter.

A: Open. Goodnight.

END OF SESSION

2.26 November 26, 1994

Frank and Laura, Terry and Jan

Q: Hello.

A: Thank you for altering the board. {We had installed more punctuation marks} We worked on your psyches to get you to do that.

Q: (L) Well, you didn't have to work on our psyches to get us to do it. It makes things faster for us too. We wanted to do it.

A: Everything is interactive when it comes to the "collective mind."

Q: (T) "Endword" is for the end of every word not for the end of the sentence, so we can break the words up without having to do it... (J) I don't need it...

A: You will know the words as they come out.

Q: (L) Now for the questions...

A: Who am I Laura? You are slipping

Q: (L) Well, you told me last time that I didn't have to ask every time. Okay, who do we have with us tonight?

A: Fun.

Q: (L) Your name is fun?

A: Silly.

Q: (T) We're being silly or we're just going to have a fun silly evening?

A: Laura needs to lighten up a bit.

Q: (L) Okay, can we have your name, please?

A: Murean.

Q: (L) {Attempt to pronounce} Glad to have you with us Murean.

A: Accent on 2nd syllable.

Q: (T) Well, tonight we have Laura, Frank and Terry on the board and Jan transcribing, is this okay?

A: Of course, Terry.

Q: (T) Thank you.

A: You are welcome.

Q: (T) Something I noticed from last Saturday night: what you need is the energy from us in order to make the board work. Its not necessary that one or...

A: You add energy.

Q: (T) I personally add energy?

A: And Jan.

Q: (L) Just by being here? (T) Well, I don't want to feel that I am usurping V__'s position....

A: V__ is at earlier stage in learning process, so less energy.

Q: (L) Well, V__ is part of the group and is learning along with the rest of us, and we are all at different stages in one way or another. She has a great gift of healing which is definitely needed in the group. (T) And L__ is a fisherman.

A: V__ is more emotional like a "Gemini" lover. She gives better Reiki because she has this emotional power.

Q: (T) Well, I just don't want her to have hurt feelings or think that she is being replaced if I sit in.

A: Lighten up Terry.

Q: (J) I had a dream where I had vines growing out of my hair. I walked past a mirror and saw this and said "I'm going to have to get rid of this stuff!" Is there some significance to this dream?

A: None.

Q: (J) What causes my sinus problems?

A: Emotional repression.

Q: (J) Of what?

A: Feelings. Taught to be nondemonstrative in childhood.

Q: (J) There was a lot of repression of thought processes and creativity in my house as I was growing up. So what can I do to help my sinuses?

A: Go out and smash a few flower pots. {Much laughter.} Seriously. Harmless to others.

Q: (T) Well there is a whole bunch of them out there. (J) Should I identify the things I am angry at and name the flower pots as I smash them?

A: If she wants to. We suggested flower pots because you have a surplus. {Laughter}

Q: (T) We do, big time! {Someone suggests shooting them.}

A: Guns can cause harm unless extremely careful.

Q: (J) Why was Terry's mom so afraid of her cataract operation recently and why has she not yet healed and what can she do?
(T) Too many questions. My mother just had a cataract operation and several other people in the family all had the same operation and all of them healed correctly and quickly. She is not healing correctly and she's scared to death that she is going to lose the sight in that eye. She was scared to death of this operation and she has had other operations which did not scare her.

A: Too many thought patterns.

Q: Why was she scared of this operation?

A: Her nature to be scared.

Q: (J) She claims that she has never been frightened of any other operation.

A: Incorrect.

Q: Is the eye going to heal?

A: If she changes her thoughts.

Q: (L) Have you given her Reiki in her eye? (J) No. (T) Well, go over there and do it this week some time.

A: Not recommended. She will resist strongly.

Q: (L) Is there anything Terry or Jan can do... (J) or what can she do...

A: Her lesson, not yours. Please limit inquiries of a personal nature.

Q: (T) It's a free will universe and they can't tell us. See, I read the book!

A: Good job, Terry. {Laughter}

Q: (T) I'm slow learning, but I do get the lessons eventually.

A: Not so slow.

Q: (L) Can we at least ask what kind of spirit animals Jan and Terry would have?

A: Jan, mouse. Terry, snake. {Laughter}

Q: (T) Does my snake totem refer to something about Lizards or dragons?

A: No. You have been told that.

Q: (T) Well, I like dragons because I am into fantasy books. I'm not really crazy about lizards.

A: Dungeons and...

Q: (T) Dungeons and dragons, one of my favorite games. Since I like Dungeons and Dragons, and kind of have this thing for that sort of thing...

A: We know.

Q: (T) We all have our hobbies. Why do I feel that there is a connection in my life to bladed weapons. What is the root of my liking for the medieval games and so forth?

A: Swords. Was killed by pirate in 1713.

Q: (T) Why was I killed by a pirate in 1713? (L) Because you were there. (T) Wrong place at the wrong time!

A: Close enough.

Q: (L) What was his name in that lifetime?

A: George Caldwell. Lived in Plymouth, England. Occupation: Navy.

Q: (L) Who were the group of pirates that he encountered that took his life?

A: British cutthroats.

Q: (T) What was my rank?

A: Lieutenant.

Q: (T) What was the name of the ship?

A: HMS Siderail.

Q: (T) What type of a ship was that?

A: Schooner.

Q: (T) So, it was not a military ship, then?

A: Yes.

Q: (T) Well, it was not a fighting ship. (L) They never used schooners for fighting ships.

A: Yes. Commandeered, L__. {Laughter}

Q: (T) The British Navy commandeered this schooner?

A: Yes.

Q: (T) Is this listed in British Admiralty records anywhere? Is any of this recorded?

A: No. Covered up.

Q: (T) Are there still records about the navy personnel?

A: Yes. Go to London. Contact New Scotland Yard for access.

Q: (T) Who captained the schooner?

A: Ian Miller of Plymouth.

Q: (L) Was Terry married?

A: No.

Q: (T) How old was I when I died?

A: 23.

Q: (T) Did I have fun up to that point?

A: Open.

Q: (J) Can you tell me about a specific game I played when I was in junior high school with other girls, specifically M__ S__?

A: M__'s basement appears very dark. Candles or pinpoints of light. Words spoken in "ritual" fashion.

Q: (F) What did you do? (J) Yes. (L) You're kidding? (J) No. (F) What did you do? (J) {Laughs}

A: We are seeing scene you speak of in present “time”. It is difficult to interpret as there seems to be an effort to “cloak” activities from others in a somewhat “sneaky” fashion. But, it appears to be an effort to influence events or cast “spells”.

Q: (L) Were you? (J) Um hmm. (L) Did it work?

A: Open.

Q: (J) You cannot get any specifics on this regarding words?

A: We can’t decipher.

Q: (J) If I concentrated on it more?

A: Maybe.

Q: (T) Do you have something you want to share with us without us asking questions?

A: Clear vibrations. There is much interference at this time.

Q: (T) What is the source of that interference?

A: Many and varied.

Q: (L) Is it our tenseness or expectation about getting those words that created static?

A: Partly. But remember, the primary point of this communication is to bring information to all that is of universal importance as opposed to personal exercises and data. We want to clarify and expand upon previous statement. It is alright if you would prefer to use this forum for personal data and gain, because that is of free will. However, if you would like this connection to retain its strength and, in fact, increase, then it would be wise to limit personal inquiries because that is of the service to self realm and that realm is limiting and will eventually lead to con-

tamination by forces that are oriented toward service to self, unlike this one.

Q: (L) I'm tired. Do you guys really need me here?

A: "The more the merrier."

Q: (L) Can I ask my question now?

A: Okay, Laura. Go for it.

Q: (L) The other night we were talking about the "Mark of Cain" and I lost part of the tape. I would like to go back over that a little bit more at this time. What was the true event behind the story of the "Mark of Cain?"

A: Advent of jealousy.

Q: (L) What occurred to allow jealousy to enter into human interaction?

A: Lizard takeover.

Q: (L) Wasn't the Lizard takeover an event that occurred at the time of the fall of Eden?

A: Yes.

Q: (L) Was this story of Cain and Abel part of that takeover?

A: Symbolism of story.

Q: (L) This was symbolic of the Lizzie takeover, the advent of jealousy, and the attitude of brother against brother, is that correct?

A: Partly. The mark of Cain means the "jealousy factor" of change facilitated by Lizard takeover of earth's vibrational frequency. Knot on spine is physical residue of DNA restriction deliberately added by Lizards. See?

Q: (L) Okay, Jan is going to move her hand up my back and you tell her when to stop at the “knot”.

A: Okay.

Q: (L) You mean the occipital ridge?

A: Yes.

Q: (L) What was the configuration of the spine and skull prior to this addition?

A: Spine had no ridge there. Jealousy emanates from there, you can even feel it.

Q: (L) Do any of these emotions that we have talked about that were generated by DNA breakdown, were any of these related to what Carl Sagan discusses when he talks about the “Reptilian Brain”?

A: In a roundabout way.

Q: (L) Okay, at the time this “Mark of Cain” came about, were there other humans on the planet that did not have this configuration?

A: It was added to all simultaneously.

Q: (L) How did they physically go about performing this act? What was the mechanism of this event, the nuts and bolts of it?

A: Are you ready? DNA core is as yet undiscovered enzyme relating to carbon. Light waves were used to cancel the first ten factors of DNA by burning them off. At that point, a number of physical changes took place including knot at top of spine. Each of these is equally reflected in the ethereal.

Q: (L) Is that all?

A: No. But, do you need more?

Q: (L) Well, the question I do have is, how many people were there on the planet and did they have to take each one and do this individually?

A: Whoa.

Q: (L) How many people?

A: 6 billion.

Q: (T) That's 500 million more than there are now.

A: No, 200 million.

Q: (L) Okay, there were this many people on the planet, how did they effect this change on all of them?

A: Light wave alteration.

Q: (L) And light waves, actual light waves, affect DNA?

A: Yes.

Q: (T) What was the origin of the light waves?

A: Our center.

Q: (L) What is your center?

A: Our realm. STO.

Q: (L) So, how did the Lizzies use the light from the Service to Others realm...

A: They used sophisticated technology to interrupt light frequency waves.

Q: (L) Well, what I am getting out of this that you are saying from what you are not saying is that it was almost like,... well, was there a battle and you guys lost?

A: Yes.

Q: (L) Is this the same battle that the Pleiadians talk about?

A: Yes.

Q: (T) Not to go off on a tangent, but I have only come into this recently, you are the Cassiopaeans?

A: Yes.

Q: (T) Are you also the Pleiadians?

A: No.

Q: (T) Are you connected to the Pleiadians?

A: Yes and so are others.

Q: (T) You are all the family of light?

A: Yes. Exactly. You have been “doing your homework”.

Q: (T) I’m trying to. Now, another force in what we term as the past, defeated you and used the power of the light in order to alter us in different ways, is this correct?

A: Yes. Now understand this: It is all part of natural grand cycle.

Q: (L) If this is all a part of a natural grand cycle, and correct me if I am wrong here, it almost seems as if you guys, the “good guys”, and the other “bad” guys, that you just really kind of go at it just for fun, is that true?

A: No.

Q: (L) But you say it is a natural thing or part of a natural grand cycle. Is this natural grand cycle just part of the interaction between light and darkness which just simply must be?

A: Yes. We are at “front line” of universe’s natural system of balance. That is where one rises to before reaching total union of “The One”. 6th level.

Q: (L) Do you like being at 6th level?

A: Do you like being at 3rd level?

Q: (L) Frankly no, I don't. (T) If you answer the question by asking the question, and we know that we are striving to reach higher, does this mean there are more levels above 6th level?

A: Yes. One.

Q: (L) Is that union with the one?

A: Yes.

Q: (T) Now, the battle you had with the other side...

A: Are having.

Q: (T) This battle goes on... do you have the light power back?

A: Never lost it, you did.

Q: (T) Okay, I guess that for us the Lizzies are the main force even though they have others on their side...

A: Yes.

Q: (T) They took our light, not yours?

A: Not against you. Currently in union with you.

Q: (T) So we are but one battle in the universe in an overall, on-going struggle?

A: Yes. Balance is natural. Remember, it's all just lessons in the grand cycle.

Q: (L) I am really curious... when you guys and the Lizzies "go to it", what do you do? I mean, you obviously don't shoot guns at each other and you don't have tanks...

A: Too complicated for you to possibly understand because you are not at 4th level yet.

Q: (J) When you are fighting, is it any way at all possible for us to detect the battle?

A: First: We don't "fight." Second, yes; it's nature as in meteorology and earth changes.

Q: (T) Your form of confrontation takes the form of physical changes in the atmosphere and environment of the planet?

A: And in space.

Q: (T) But that is how we detect it? The more activity, the more conflict is going on?

A: Remember, we are the light. They are the dark. We are both high level thought forms reflected at all levels of reality.

Q: (T) So, what we perceive, then, is what comes through to third density which is not what we would perceive if we were looking at it from 4th or 5th or 6th.

A: Yes.

Q: (T) We are talking 4th density to 3rd density. Is this what Hoagland is referring to when he talks about the tetrahedral form he has detected from the Martian structures he has been studying that he postulated...

A: Yes. This is a bridge to 4th density.

Q: (L) Isn't it a little unfair for you guys, at 6th level, to take on the Lizzies at only 4th level?

A: The "Lizzies" are the 4th level representatives of the forces of the darkness not the 6th level, and you are 3rd level representatives.

Q: (L) Is there a 6th level representative of the forces of darkness?

A: Yes.

Q: (L) And what is this 6th level representative known as, or called, or look like or whatever?

A: Orion in your “neighborhood.”

Q: (L) The Orion’s are 6th level STS beings?

A: Yes.

Q: (L) Are they like you, thought forms?

A: Yes.

Q: (L) Do they ever appear in physical matter?

A: Can.

Q: (L) And they are the driving force that controls the Lizzies?

A: Close.

Q: (L) Is there some intermediary between the 6th level Orions and the 4th level Lizzies, such as a 5th level force or being?

A: 5th level is contemplation zone for both “sides”.

Q: (L) Does that mean that at the contemplation level that there is no activity? (J) Is it like a “time out?”

A: Close. Balancer.

Q: (L) Is there a 3rd level representative of the forces of the light?

A: Yes.

Q: (L) Who or what are they?

A: Don’t exist on your planet.

Q: (L) Do they have a planet of their own?

A: Have quadrillions of them.

Q: (L) Well, this is beginning to sound like we are in pretty bad shape here. This is like the Siberia of the universe as Gurdjieff said.

A: The Universe is infinitely huge.

Q: (L) If there are planets where there are 3D beings who are STS oriented, in other words, in a physical body, do they look something like us?

A: You are STS oriented. Did you really mean to say STO?

Q: (T) Is there a 3D race in this universe that is STO?

A: Yes. Already stated thus.

Q: (L) If there are planets with STO beings...

A: Some look like you.

Q: (L) What is life like on that sort of place? (T) They are not going to tell us that. That is something that we are going to have to develop to find out.

A: Exactly.

Q: (J) Is part of being STS being so appearance oriented as we are?

A: Not physical issue at 3rd level.

Q: (T) Who talks to me when I am having conversations with myself in my head?

A: You.

Q: Am I talking to other beings?

A: Have.

Q: Do we all do this?

A: No.

Q: (T) Does Laura communicate like this.

A: Has.

Q: (T) Does Frank?

A: Ditto.

Q: (T) Should I continue communicating with whoever it is?

A: Up to you.

Q: (T) Are they connected to you?

A: No.

Q: (T) Do you know who I am talking about?

A: Yes.

Q: (T) Can you tell me who they are?

A: Lizards.

Q: (T) Why are they talking to me?

A: Trying to convert you. Remember, Terry, your chronic depression represents a “battle” zone.

Q: (T) I no longer am depressed and they are talking to me more. (J) They are trying to get you back into it. (T) but they are not doing anything to convince me to be depressed.

A: Watch out!

Q: (T) Can I turn them off?

A: Yes.

Q: (T) Who is “Sing.”

A: Leader of forces assigned to influence you.

Q: (T) Forces, as in many are assigned to me personally?

A: Yes.

Q: (T) How many are in this force?

A: Seven.

Q: (T) Do they do this because of the implants that are in me?

A: All part of process.

Q: (T) Do I have implants?

A: Yes.

Q: (T) These implants are what they use to control my emotions and amplify them so that they can feed off of them?

A: Not control, influence.

Q: (T) No, not to control; influence. But when, say, I get angry, then I’m angry for a short time but then I’m angry for a long time because they have used this technology to amplify and extend this; is this what they do?

A: Yes. Knowledge protects, ignorance endangers.

Q: (T) Can I feed back through their equipment what I choose?

A: Not necessary.

Q: (T) In other words, if I get angry and realize that I am being more angry than I should be, and I change that to something positive, and feed that back to them while they have their amplifiers wide open, will that affect them? Sour their milk, so to speak?

A: Now you are “fighting fire with fire.”

Q: (T) Well, is that something that we are supposed to be doing?

A: Open. But what does phrase imply?

Q: (L) If you feed it back at them, in other words, what they are saying is, I think, when you feel yourself getting angry, the only way to stop the whole thing is to stop being angry and be happy or at peace. When you are happy and at peace there is not in you the desire to send anything back.

A: Bingo.

Q: (J) Redirect the energy into something positive. (F) You can't fight fire with fire. (LM) Well, actually you can in reality. (T) What I am getting at is, is it possible to do that, to change the emotional state to something more positive than what they are expecting and feed that back to them. Is that a possibility?

A: Why.

Q: (T) Just to give them a taste of their own for a change. (J) Do you want to antagonize them? You are still feeding them your energy. (L) The only change you could really have would be the opposite emotion which would be peace and if you are truly feeling peace...

A: 4th density STSers feed off negative energy.

Q: (J) So, give them nothing. (T) But what I am thinking about is the energy... I have a natural... They are feeding off negative energy. They put something in me, some technological thing, because they come into 3rd density to mess with us...

A: Yes.

Q: (T) ...that will amplify this for them. Make it even stronger.

A: Analogy follows: How effective is a light socket without a plug in it?

Q: (T) Well, how effective is a light socket without a socket in it... I'm trying to learn here so you guys give me some latitude.

A: What?

Q: (T) If you take a light socket and pull the socket... pull the plug on the light socket you no longer have light. (L) Well, the Lizzies are the light bulb and you are the power source so you just pull out their plug. (J) Unplug yourself. (T) Am I the socket?

A: How effective is a motor that is never turned on?

Q: (J) Do not be their source. If they feed off negative energy, starve them.

A: Implants are ineffective if not used.

Q: (J) The power source has to be on for the implant to work for them to get the juice and the power is negative thoughts and emotions. (T) But I am still a 3rd density being. I have all the emotions of a 3rd density being, the whole gamut, and that is part of what makes me a 3rd density being. Therefore I can't turn one emotion off without upsetting the balance of the other emotions, emotions are almost an analogy to the light and the dark.

A: No.

Q: (T) I have positive emotions and I have negative emotions; they both make up who I am.

A: If you choose, you may have only positive emotions.

Q: (T) Now, if I have only positive emotions, which is a nice thing to have and I'd like to have that, what does that do to the sensor equipment of the Lizzies?

A: Cancels them.

Q: (T) So they are tuned to negative frequencies?

A: Yes.

Q: (T) Having positive feelings cuts off the implants. If I cut off the sensors by having positive feelings, what will the Lizards do?

A: Go elsewhere.

Q: (L) Am I correct in my thought that when you first start turning this off that they may increase their efforts for a period and then finally they realize that you are really in charge here and then they go away?

A: Exactly.

Q: (L) So, when you first get a clue and you start getting a grip on your emotions and dealing with everything that happens to you with acceptance and knowledge that all is a manifestation of your own creation and for your ultimate good, for a period of time they may try ten times harder to get you back as a food source, but then once they realize they can't, then they do finally let loose?

A: You and Frank are experiencing this right now.

Q: (L) This is true. (F) We have both been under massive attack. Just doing this work has been a struggle to keep at it with everything coming from every direction. (L) The hardest has been to stay in a frame of mind to do it. (J) Am I under attack?

A: Not yet.

Q: (T) Is what I have been under the past few months the first assault?

A: Yes.

Q: (T) Now they are trying to sweet talk me?

A: Only first assault.

Q: (T) So, the more positive I become, the more they are going to continue trying, and I am assuming that because you said I have seven beings of some kind assigned to me, that they find something interesting in me that they want to keep?

A: Close.

Q: (T) Should it make me happy that they think I am important enough to have seven beings assigned to me personally? Should I take that as a complement?

A: No.

Q: (J) Is Terry's level of negativity what makes him attractive to them? His capability for strong negativity?

A: Vice versa.

Q: (J) Please explain. (L) Well, what did they say, is his negativity what makes him attractive, No. He has attracted them and that is what makes him negative? So what makes him attractive to them?

A: Not attractive, a threat.

Q: (L) Now, that is a point. I think there are a lot of people they start working on very early in life because they do like an aura reading or aura scan and determine, and know that a person has potential for great light so they start working on them when they are young and defenseless to try and take them out of the game, so to speak. (F) Not only great good, but also potential for knowledge. (L) Is this the case here?

A: Yes.

Q: (L) There you go. It isn't your potential for negativity, it is your potential for good.

(F) Right. If you look around you, you will see the mainstream of society, and they just seem to move through life and enjoy wallowing in materiality, these people don't seem to suffer as much.

(L) There seems to be two classes of people the Lizzies like to go after, extremely weak ones and those they haul off and eat or experiment on; and those who have potential strength and positivity.

(F) To give you an example is, the people they don't attack are those who they already have and they don't have to work on them. If you have the potential to rise above the service to self orientation, then you are a threat. And, if you look around at most of the people who are "making it" in this world, those are the ones that are usually the most viciously service to self.

(T) Very true.

(J) That's the way it is.

(L) And how many times have you heard these "New Age" teachers talk about "well, if your impression of people who have material possessions is that they are negative, then you are bringing this on yourself and you will just have to concentrate on prosperity more," that is, in a roundabout way promoting a very service to self philosophy. It's not that having things is bad, it's not that money is evil, it's the focus on it over and above helping others.

(T) I want to tell a little story. A guy I work for is a "Born again Christian." Only a year and a half born again. He's hobbying at it. He's looking for a lifestyle. He was pooh-poohing metaphysics and New Age philosophies in general saying: "New Age! That's the devil's work!" He has no idea what it is, but he is shutting it down because someone told him to shut it down and he is do-

ing it to be part of the Lifestyle. I said: “Where do you get this stuff?” He said: “It’s in the Bible.” I said: “What do you mean it’s in the Bible?” He said: “Well, it’s in the books.” So, I asked: “Well, where did the books come from? Some of them were written many hundreds of years ago and the New Testament books were written hundreds of years after Christ lived, that is, after the fact.”

So, he said: “See, those who wrote the Bible didn’t really write it, they got it from the Holy Spirit.” So, I say, okay, I can buy that. The Holy Spirit wrote the Bible. I can follow this. Fine. I ask him: “How do they know this was the Holy Spirit?” And I’m only bringing up a question, I am not putting him down. So, he comes back and says: “Well, the books say the Holy Spirit came down and did this, and since it is in the book, it must be true.” I said: “Wait a minute. The Holy Spirit came down and wrote these books through these people, gave them this information and helped them do this, and wrote in the book that it was the Holy Spirit that did this, therefore it makes it true because whoever brought this information said they brought this information. But, on a whole different level, the Holy Spirit brought this information to these people, and they didn’t write the books, did they not “channel” these books?” And he stopped there and it was like: “Well, I never thought of it that way.”

And I said: “Well, you just said that all of this was of the Devil, New Age, paranormal events, UFOs, the Rolling Stones...” So, he thought about it for a minute and then he said: “But it’s okay. It was the “right” channel!” And I say: “Wait a minute! Slow down here! Take this home and think about it for a few days. These books that you are putting your faith in, that you don’t know where they came from, were channelled to people by means that you say are the devil’s work if anybody else does it. And, the only reason you are accepting these works is because, IN these works

it says that it was the Holy Spirit that did it, but it was the Holy Spirit that told them to do this.”

(F) And it was the Holy Spirit that told them that it was the Holy Spirit.

(T) Yeah, right! I told him: “Think about it. Just THINK about what you are saying.” But he is just not seeing it.

(L) It’s hypnosis.

(T) And, he’s looking for a lifestyle. He talks about: “I heard this great group the other day, they’re a Christian band”. And a couple days later: “Hey, did you hear such and such, they’re a Christian Band.” I said: “Gee, James, know any good Moslem bands?” I told him I liked Garrison Keilor and he said: “That’s a Christian show.” I said: “Where did you get that?” He said: “Well, my pastor said he was because he’s from Minnesota!”

(F) Well, there are two points that this brings up. The first is that circular thinking and this whole idea is following what others tell you or what has been written without questioning it. You are not supposed to think. And then, the second thing, this source said once way back: “Don’t take anything at face value, including this.” Part of the light of knowledge is that you would always be open to new information.

(L) Well, that is the parable of the talents. I keep hammering on that one and one of these days I am going to write a little monograph on the parables of Jesus. The parable of the talents is prefaced by the phrase: “Now, knowledge of the kingdom is like unto a certain man who went on a journey...” and he called his three servants together and gave them each a certain number of talents. The talents represent knowledge. Two of the servants invested their talents. They were willing to take risks and give up what they had to get more. The third was afraid of losing the lit-

tle he had and he buried his talent. So, the two increased their knowledge by repeatedly giving up and getting back more. The master came back and the two showed how they had made a killing on the market and the master was pleased. But the servant who had buried his talent said: "Master, I knew you were a hard man and you reaped where you did not sow and I was afraid..." The master cast him into outer darkness. And, remember, remember, remember, we are talking about knowledge. He took his little bit of knowledge and he closed himself off and hung onto that little bit for dear life...

(F) Yet another demonstration of service to self. He buried it so he could have it instead of sharing it. It is continually reflected over and over. Everybody out there has their one little talent and they are all burying it for dear life.

(T) Okay. Where were we. Just by being positive will shut off the Lizzies desire to mess with me?

A: Yes.

Q: (T) That's all there is to it? But the implants will still be there?

A: So what?

Q: (T) Do the implants do anything besides transmit the frequency?

A: No.

Q: (T) And, as long as I am being negative it is transmitting and they can track me that way?

A: Close.

Q: (T) If I shut them off by being positive, they can't track me any longer?

A: Can track but not influence.

Q: (T) Why did they tell me that I gave them permission to do it when they abduct me?

A: “Bullshit!”

Q: (T) If I tell them it’s bull will they leave me alone?

A: No.

Q: (T) If I shut them off will they continue to abduct me?

A: No.

Q: (T) I am not buying into the victim line. (L) There is another aspect here. Knowledge breeds awareness which gives you the ability to detect it when they try to influence you in very subtle ways so that you can begin to control your mind and resist early on and that is the key.

A: Close enough.

Q: (L) And you have to persist with positive thoughts and feelings sometimes in the face of incredible adversity. No one said it was going to be easy, but it is worth it. (T) Are my Tarot cards telling me the truth?

A: Maybe. Enough on this subject, please.

Q: (T) One last question. How do I know you are telling me the truth?

A: Open. For you to decide. Listen: Revelations follow. Now would be a good “time” for you folks to begin to reexamine some of the extremely popular “Earth Changes” prophecies. Why, you ask. Because, remember, you are third density beings, so real prophecies are being presented to you in terms you will understand, I.E. physical realm, I.E. Earth changes. This “may” be symbolism. Would most students of the subject understand if prophecies were told directly in fourth density terms?

Q: (L) Is this comparable to my idea about dream symbolism. For example, the dream I had about the curling cloud which I saw in a distance and knew it was death dealing and I interpreted it to be a tornado, but it was, in fact, a dream of the Challenger disaster. I understood it to be a tornado, but in fact, what I saw was what I got, a death dealing force in the sky, a vortex, in the distance. I guess my dream was a fourth density representation but I tried to interpret it in terms I was familiar with. Is this what you mean?

A: Close. But it is easy for most to get bogged down by interpreting prophecies in literal terms.

Q: (L) Is there more information you plan to deliver on this subject?

A: Okay.

Q: (L) Let me ask a quick one. Did the Gulf Breeze Six, as they are called, who were supposedly receiving information via the Ouija board, did they receive prophetic information of some sort?

A: Yes.

Q: And, from what source did they receive this information?

A: Mixed.

Q: (L) Was their information accurate?

A: Mixed.

Q: (L) Why were they, their board, their transcripts and so forth confiscated? {The rumor was that they were shut down by the military and their work confiscated and classified.}

A: Paranoia.

Q: (L) In terms of these Earth Changes, Edgar Cayce is one of the

most famous prognosticators of recent note, a large number of the prophecies he made seemingly were erroneous in terms of their fulfillment. For example, he prophesied that Atlantis would rise in 1969, but it did not though certain structures were discovered off the coast of Bimini which are thought by many to be remnants of Atlantis. These did, apparently, emerge from the sand at that time.

A: Example of one form of symbolism.

Q: (L) Well, in terms of this symbolism, could this be applied to the remarks you made about the two little boys who were missing in South Carolina.

A: Yes.

Q: (L) And the symbolism was that you were reading the event from 3rd density into sixth density terms and then transmitting it back into 3rd, and while the ideation was correct, the exact specifics, in 3rd density terms, were slightly askew. Is that what we are dealing with here?

A: 99.9 per cent would not understand that concept. Most are always looking for literal translations of data. Analogy is novice who attends art gallery, looks at abstract painting and says “I don’t get it.”

Q: (L) Well, let’s not denigrate literal translations or at least attempts to get things into literal terms. I like realistic art work. I am a realist in my art preferences. I want trees to look like trees and people to have only two arms and legs. Therefore, I also like some literalness in my prognostications.

A: Some is okay, but, beware or else “California falls into the ocean” will always be interpreted as California falling into the ocean.

Q: [General uproar] (F) Wait a minute, what was the question?

(L) I just said I liked literalness in my prophecies.

(F) Oh, I know what they are saying. People believe that California is just going to go splat and that Phoenix is going to be on the seacoast, never mind that it's at 1800 feet elevation, it's just going to drop down to sea level, or the sea level is going to rise, but it's not going to affect Virginia Beach even though that's at sea level. I mean... somehow Phoenix is just going to drop down and none of the buildings are going to be damaged, even though its going to fall 1800 feet...

(T) Slowly. It's going to settle.

(F) Slowly? It would have to be so slowly it's unbelievable how slowly it would have to be.

(T) It's been settling for the last five million years, we've got a ways to go in the next year and a half!

(F) Right! That's my point.

(T) In other words, when people like Scallion and Sun Bear and others say California is going to fall into the ocean, they are not saying that the whole state, right along the border is going to fall into the ocean, they are using the term California to indicate that the ocean ledge along the fault line has a probability of breaking off and sinking on the water side, because it is a major fracture. We understand that that is not literal. Are you telling us that there is more involved here as far as the way we are hearing what these predictions say?

A: Yes.

Q: (T) Are we understanding what you are saying?

A: Some.

Q: (T) So, when we talk about California falling into the ocean, we are not talking about the whole state literally falling into the ocean?

A: In any case, even if it does, how long will it take to do this?

Q: (LM) It could take three minutes or three hundred years. (T) Yes. That is “open” as you would say.

A: Yes. But most of your prophets think it is not open.

Q: (J) Yeah, because they think they have the only line on it. (T) Okay. So they are thinking in the terms that one minute California will be there and a minute and a half later it will be all gone. Is this what you are saying?

A: Or similar.

Q: (T) So, when we are talking: “California will fall into the ocean, which is just the analogy we are using, we are talking about, as far as earth changes, is the possibility that several seismic events along the fault line, which no one really knows the extent of...

A: Or it all may be symbolic of something else.

Q: (L) Such as? (J) All the fruitcakes in California are all going to go off the deep end together. (L) Symbolic of what?

A: Up to you to examine and learn.

Q: (L) Now, wait a minute here! That’s like sending us out to translate a book in Latin without even giving us a Latin dictionary.

A: No it is not. We asked you to consider a reexamination.

Q: (L) You have told us through this source, that there is a cluster of comets connected in some interactive way with our solar system, and that this cluster of comets comes into the plane of the

ecliptic every 3600 years. Is this correct?

A: Yes. But, this time it is riding realm border wave to 4th level, where all realities are different.

Q: (L) Okay, so the cluster of comets is riding the realm border wave. Does this mean that when it comes into the solar system, that its effect on the solar system, or the planets within the solar system, (Jan or us), may or may not be mitigated by the fact of this transition? Is this a mitigating factor?

A: Will be mitigated.

Q: (T) Is this what the Star Trek movie, “Generations” is telling us?

A: Possible.

Q: (T) Are you or someone in the Federation influencing the writers of that program?

A: Open.

Q: (L) Does any of this mean that the earth changes that have been predicted, may not, in fact, occur in physical reality as we understand it?

A: You betcha.

Q: (L) Does this mean that all of this running around and hopping and jumping to go here and go there and do this and do that is...

A: That is strictly 3rd level thinking.

Q: (L) Now, if that is 3rd level thinking, and if a lot of these things are symbolic, I am assuming they are symbolic of movement or changes in energy.

A: Yes.

Q: (L) And, if these changes in energy occur does this mean that the population of the planet are, perhaps, in groups or special masses of groups, are they defined as the energies that are changing in these descriptions of events and happenings of great cataclysm. Is it like a cataclysm of the soul on an individual and or collective basis?

A: Close.

Q: (L) When the energy changes to 4th density, and you have already told us that people who are moving to 4th density when the transition occurs, that they will move into 4th density, go through some kind of rejuvenation process, grow new teeth, or whatever, what happens to those people who are not moving to 4th density, and who are totally unaware of it? Are they taken along on the wave by, in other words, piggy-backed by the ones who are aware and already changing in frequency, or are they going to be somewhere else doing something else?

A: Step by step.

Q: (T) In other words, we are looking at the fact that what's coming this time is a wave that's going to allow the human race to move to 4th density?

A: And the planet and your entire sector of space/time.

Q: (T) Is that what this whole plan is about, then, if I may be so bold as to include all of us here in this. We, of the beings of light who have come here into human form, to anchor the frequency, is this what we are anchoring it for, for this wave, so that when it comes enough of us will be ready, the frequency will be set, so that the change in the planet can take place as it has been planned?

A: Yes.

Q: (L) When this happens, will we piggy-back all those who are still unaware?

A: Open.

Q: (T) Okay, when the people are talking about the earth changes, when they talk in literal terms about the survivors, and those who are not going to survive, and the destruction and so forth and so on, in 3rd, 4th, 5th level reality we are not talking about the destruction of the planet on 3rd level physical terms, or the loss of 90 per cent of the population on the 3rd level because they died, but because they are going to move to 4th level?

A: Whoa! You are getting “warm.”

Q: (T) Okay. So, we are anchoring this. So, when they talk about 90 per cent of the population not surviving, it is not that they are going to die, but that they are going to transform. We are going to go up a level. This is what the whole light thing is all about?

A: Or another possibility is that the physical cataclysms will occur only for those “left behind” on the remaining 3rd level density earth.

Q: (T) Okay, what you are saying, then, is that we are anchoring the frequency, so that when the wave comes, we move to 4th level density as many people as possible, in order to break the hold the “Dark T-shirts” have got on this planet, those who remain behind will not have enough energy left for the “Dark T-shirts” to bother with the planet any longer. There will be less of them so the planet will be able to refresh and they will be able to move on in their lessons without interference?

A: Close.

Q: (L) At this point of dimensional transition, is what we are doing, anchoring a frequency, are we creating a sort of “super

string” network that will literally create another earth in 4th density, which will then exist in 4th density, and the old 3rd density earth – almost like the splitting of a one celled organism, only in this splitting one half of it moves into another dimension and is energized and quite literally created by the anchoring frequency, while the old one remains and experiences 3rd density reality?

A: Step by step.

Q: (L) Are we anchoring frequency to create a split?

A: One developing conduit.

Q: (L) We are developing a conduit?

A: Yes. One.

Q: (J) How many conduits do we need?

A: Open.

Q: (T) Is this conduit going to allow those who remain behind to be able to move to 4th density easier when they are ready?

A: No.

Q: (T) What is the conduit for?

A: You and those who will follow you.

Q: (T) Oh, this is for those of us who will move to 4th density. We will move through and they will follow us through the conduit.

(J) Oh, others who are ready?

A: Your group here tonight.

Q: (L) Does this mean we will have followers or just us here now?

A: Open. Up to you.

Q: (L) This conduit. Is this a conduit through which an entire planet will transition?

A: You are one. There are others.

Q: (L) There are other planets...

A: No. Conduit.

Q: We are one conduit and there are conduits...

A: No. Developing at this point.

Q: (J) So, at this point we are developing a conduit?

A: Yes.

Q: (T) There are other groups on this planet developing their own conduits?

A: Yes.

Q: (T) These are conduits for us to move to 4th density in?

A: Knowledge is the key to developing a conduit.

Q: (T) I am working on the assumption that all of us here are part of the family of light, is this true?

A: Yes.

Q: (T) And we have been drawn together in order to develop this conduit from where we are?

A: Yes.

Q: (T) Are there others in this area?

A: Yes.

Q: (T) Are they supposed to join with us or are they working on their own?

A: Open.

Q: (T) Okay, so it is up in the air as to whether we join with them, they join with us, or we all work independently.

A: It is up to how much publicity you manage to get.

Q: (T) Do we want publicity on this?

A: Open.

Q: (L) Would it help us?

A: Open.

Q: (T) We're developing a conduit to move us from 3rd density to 4th density. Once we have moved through the conduit does that mean we have completed what we came here to do, and that is anchor the frequency?

A: Partly.

Q: (T) Is the conduit kind of like an escape hatch for us?

A: Close.

Q: (L) Let me get this straight. When we move through this conduit, are the other...

A: You will be on the 4th level earth as opposed to 3rd level earth.

Q: (L) What I am trying to get here, once again, old practical Laura, is trying to get a handle on practical terms here. Does this mean that a 4th density earth and a 3rd density earth will coexist side by side...

A: Not side by side, totally different realms.

Q: (L) Do these realms interpenetrate one another but in different dimensions...

A: Close.

Q: (L) So, in other words, a being from say, 6th density, could look at this planet we call the earth and see it spinning through space and see several dimensions of earth, and yet the point of space/time occupation is the same, in other words, simultaneous. (J) They can look down but we can't look up.

A: Yes.

Q: (L) So, in other words, while all of this cataclysmic activity is happening on the 3rd dimensional earth, we will be just on our 4th dimensional earth and this sort of thing won't be there, and we won't see the 3rd dimensional people and they won't see us because we will be in different densities which are not "en rapport", so to speak?

A: You understand concept, now you must decide if it is factual.

END OF SESSION

2.27 November 27, 1994

Frank, Laura and LM

Q: Hello.

A: Hello. Illo.

Q: (L) Your name is Illo? Who are you and where are you from?

A: Cassiopaea.

Q: (L) I have a few little questions I want to ask, and I know they are personal and I know how you feel about personal questions but there is a reason for the importance of these questions. The

first is why is it every time I think about sitting at the board my left ear starts doing strange things?

A: DNA responding.

Q: (LM) Why or how would DNA make your ear hurt?

A: Changes.

Q: (L) How can DNA changing affect an ear or shoulder, for example?

A: Complex; read “Bringers of the Dawn”.

Q: (L) My husband is really concerned about his truck. This may sound like a simple thing, but for us it is because we can’t just go and spend money on fixing it only to find out that is the wrong thing and something else needs fixing. We need to know what is wrong with it so that we can fix it with the least amount of expenditure.

A: Catalytic converter.

Q: (LM) It doesn’t have one. (L) He doesn’t have one. What is wrong with the truck?

A: Space where converter should be.

Q: (LM) Whoever is telling you this is abysmally mechanically ignorant. No 1978 truck ever had a catalytic converter.

A: Check it. Your assertion. Fuel line clogged at bottom where “cc” should be. {This proved to be absolutely correct! A rubber cap was missing which led to the obstruction and LM was amazed.}

Q: (L) Is it possible to do hypnotic future progressions that give accurate information in a general sense?

A: Yes.

Q: (L) In the book “Mass Dreams of The Future”, are these statistically analyzed mass dreams in any way accurate?

A: In a sense.

Q: (L) Is it possible, since they showed several different scenarios... why am I feeling so strange at this moment?

A: Anemic/low blood sugar.

Q: (L) So it is not an emotional reaction to my husband’s hostility? {LM had left the room.}

A: Maybe.

Q: (L) Well, in that sense, I would like to know.

A: Know what?

Q: (L) Are you sure you are a Cassiopaeon?

A: Yes.

Q: (L) Well, you don’t seem to be really in tune or accurate about what is going on here tonight. {I was assuming that the response about the truck was wrong.}

A: In tune, but your energies are low; it “takes two to tango”.

Q: (L) Now, last night you said you affected our psyches in order to have us make changes on the board. It occurred to me that you might have the ability to change the electromagnetics of the body which would then affect the physical body, is this correct?

A: Maybe.

Q: (L) So, could you perform an electromagnetic healing on me, that is, on the etheric or spirit body, which would then manifest in the physical body?

A: Do.

Q: (L) You do? Well, I would like to have more of it, more often. I would like you to speed up the process because I am fairly miserable in the physical sense. Is that possible?

A: Cycle will pass.

Q: (L) Well, I want to know why my arm hurts so bad and why my heart feels like an elephant is sitting on it?

A: Energy low.

Q: (L) Is the answer to that just simply to rest?

A: Yes. Absolutely. Last session was particularly draining. Don't overdo it, just pace it.

Q: (L) Well, let's go back to the truck. Do you think you can tap into anybody who is a mechanic and just give us...

A: Truck problem will be resolved by your tomorrow and will be easy to resolve.

Q: (L) I talked to T__ M__ tonight and I wonder if he is going to be willing and able to compensate Frank for the electric bill?

A: Yes. But explain in detail. And point out his good fortune.

Q: (L) I want a new vehicle. Look into the future for me, please, and tell me which is there for me around the corner, is it a car or a nice, big, van?

A: Either.

Q: (L) Is it very close in the future for me.

A: Maybe.

Q: (L) Now, I want to know in terms of this activity, what percentage of our energy is utilized in this channelling process? Is it say, 60% Frank and 40% me or whatever?

A: Varies.

Q: (L) With Jan and Terry here, is that a more energetic session?

A: Yes.

Q: (L) Does it help to have more people in the room?

A: If they are not hostile.

Q: (L) Does hostility cut back the energy?

A: Immensely and negative moods as well.

Q: (L) Is LM more hostile and negative than he believes he is or than he lets on?

A: Varies.

Q: (L) Are you going to be able to do something to my psyche that is going to make my body start dropping tons of weight with no necessity for me to focus on that issue at all?

A: Not necessary, once project gets going, your energy will greatly increase, thus weight loss follows.

Q: (L) On many occasions I have had dreams about being on a train. What do these dreams mean to me?

A: Not significant.

Q: (L) What about the dreams of putting on make-up?

A: Hiding your self.

Q: (L) What level are the Pleiadians who channel through Barbara Marciniak?

A: 6th density.

Q: (L) Okay, I would like to know where A__ G__ is and what she is doing currently.

A: North Carolina, nursing.

Q: (L) Is she still with Tom?

A: No.

Q: (L) Why?

A: Split.

Q: (L) Where is he?

A: Tarpon Springs.

Q: (L) Why is he there?

A: Engineering.

Q: (L) What about C__ S__?

A: In Atlanta. Artist.

Q: (L) I talked to C__ P__ the other day, she seemed to be hostile. Is this a valid assessment?

A: Close.

Q: (L) Why does she feel this way?

A: Not on same wavelength.

Q: (L) Should I just forget her?

A: Up to you.

END OF SESSION

2.28 December 1, 1994

Frank, Laura, J__ and A__ (Two of Laura's children)

Q: (L) Hello.

A: Hello. You like puppies.

Q: (L) And who do we have tonight?

A: Romommea.

Q: (L) Who are you and where are you from?

A: Cassiopaea.

Q: (L) Should A__ participate?

A: Should sit quietly; she's at a "sensitive" age.

Q: (L) Does that mean it is better for her to not use the board?

A: Yes. Bad influences are near.

Q: (L) Bad influences are near? And what are these "bad" influences?

A: Discarnate "gargoyles".

Q: (L) What are they near for?

A: A__ is near the board.

Q: (L) Should she sit in the other chair?

A: Yes.

Q: (L) Is that better now?

A: Yes.

Q: (L) And, what would these gargoyles like to do?

A: Overtake communication.

Q: (L) Well, begone! Did that do it?

A: No.

Q: (L) Well, tell them to scram.

A: We are free will, we can advise.

Q: (L) Well, then advise them to leave, please.

A: Open. There is much interference.

Q: (L) What can we do to enhance communication at this end?

A: Communication is best when pure.

Q: (L) What is not pure tonight? Is it my attitude or activities?

A: No.

Q: (L) What is not pure?

A: Interference.

Q: (L) What is causing the interference?

A: We are not certain.

Q: (L) Is there anything we can do... should we have the children leave the room?

A: Maybe.

Q: (L) If they leave the room will you be better able to communicate?

A: Thought patterns show static.

Q: (L) My thought patterns show static?

A: Someone's.

Q: (L) Is it someone in this room?

A: Possibly, but not clear. It's someone apart from channel.

Q: (L) What are M__ and S__ doing at this moment?

A: Unreadable.

Q: (L) Why is that?

A: Static energy field.

Q: (L) Is that possibly where the static is coming from?

A: Possible.

Q: (L) {J__ leaves and goes to bed} Okay, did that help?

A: Remember, children most vulnerable when attack underway. You are currently under psychic onslaught.

Q: (L) Okay. {A__ leaves and goes to bed} Is that better?

A: Better, but you are definitely being deliberately assaulted by some source right now.

Q: (L) Well, my ears are ringing to beat the band. What is this source?

A: Earth bound.

Q: (L) Is the originator of this negative energy Ms. S__ H__ who claims to have practiced witchcraft in her youth?

A: Maybe.

Q: (L) Is another of these attackers M__ F__ who also claims to have practiced witchcraft in his youth?

A: Yes.

Q: (L) And is another one Mr. A__ B__ who claims to be Florida's greatest sorcerer, if not the world's?

A: Maybe.

Q: (L) Are they all in cahoots?

A: Maybe.

Q: (L) Can you give me any definite answers on this situation?

A: Static around all mentioned. Phone opened line of attack one attacker believes he has powers to damage you.

Q: (L) Is that attacker M__?

A: Maybe.

Q: (L) Okay, the situation is that, from any point of view, M__ and S__ have really treated me badly and I tried to be real low key and understanding and forgiving about the whole thing. However, when I learned that they had stolen from me, I got very upset. So, did I take the right approach in having my attorney send the demand letter to S__?

A: Yet to be seen.

Q: (L) Well, I decided that it was time for the buck to stop. These people have gone around doing what they are doing for as long as I am willing to tolerate not having my side heard. I never believed that people could be so vicious.

A: Will they share your beliefs?

Q: (L) Probably not, but I can only stay buried so long. And, it is definitely rattling some bushes.

A: Yes.

Q: (L) From your position of all-knowingness and all-seeingness, can you give me a little guidance on this?

A: No one is “all-knowing” and seeing.

Q: (L) Okay, you can't see A__, M__ or S__, is that correct?

A: Static.

Q: (L) What is creating the static around them? Are they performing some Lizzie rituals?

A: Machinery of some kind is being used to create the static.

Q: (L) Are they doing this to protect themselves from some sort of imagined attack from me (because I am sure S__ has convinced them I am an evil witch)?

A: Assault upon Laura directly.

Q: (L) They are using some kind of machinery to attack me directly?

A: Yes.

Q: (L) What kind?

A: Lights, bells, smoke, siren, oscillator, EM waves.

Q: (L) Are they going to try to burn my house down?

A: Open.

Q: (L) I need to know, this is serious.

A: Cannot tell.

Q: (L) Well, what you have described sounds like a fire-truck.

A: Knowledge protects. We have helped you to gain knowledge.

Q: (L) So, I should just be alert and aware?

A: Good idea.

Q: (L) Did A__ B__ call M__?

A: Probable.

Q: (L) Is M__ the person who called earlier this evening?

A: Was some sort of device.

Q: (L) Who called after Frank was here and did not leave a message?

A: Same.

Q: (L) How come all of this stuff started happening today.

A: Energy flow and W__ “bush rattling.” From remote location.

Q: (L) How can M__ attack me from a remote location?

A: He may try machinery.

Q: (L) What kind of machinery could cause my house to burn?

A: Not could cause, thinks could cause. Machines are frightening S__.

Q: (L) What is the likelihood of S__ paying back what she owes me? It's a lot of money.

A: Depends on course of events.

Q: (L) And what are the possible courses?

A: 956000 possibilities.

Q: (L) Is it better for the kids not to take the melatonin tonight in case M__ tries to burn my house down?

A: Okay either.

Q: (L) Should I just not have said or done anything?

A: Cannot “should have” done anything.

Q: (L) I would also like to ask you guys to use your abilities to counteract some of this influence in the sense of at least shielding.

A: Knowledge is shield.

Q: (L) Why is A__ depressed?

A: Biological changes.

Q: (L) Is it just a phase?

A: Close. S__ “crumbling”.

Q: (L) Why is she crumbling?

A: Mixed feelings.

Q: (L) Did she do the things she did toward me deliberately?

A: F__ heavy influence.

Q: (L) What does she think about F__ Now?

A: Getting progressively “spooked”.

Q: (L) By him?

A: Yes.

Q: (L) Is she figuring out how crazy he is?

A: Subjective.

Q: (L) Are S__ and S__ S__ believers in the Gospel according to F__?

A: Naive.

Q: (L) Is this fiasco going to open their eyes?

A: Open.

Q: (L) Is there any other thing I need to know about this situation?

A: Just be aware.

Q: (L) Will I be able to sleep safely tonight?

A: Should, but pray.

Q: (L) And who should I pray to?

A: Same as always.

Q: (L) Is there such a being as St. Michael?

A: In a sense.

Q: (L) Which higher being is most able to help a person in a situation of danger?

A: Universe.

Q: (L) Pray to the Universe?

A: Refer to recent session.

Q: (L) And what was in the recent session that I need to refer to?

A: November 26.

Q: (L) What was in that session?

A: Universe.

Q: (L) About universes, alternate universes etc?

A: Yes.

Q: (L) Anything else I need to know?

A: No.

Q: (L) Is it alright if we have Chuck attend?

A: Good boy!

Q: (L) Okay then, good night.

A: Good night.

END OF SESSION

2.29 December 3, 1994

Q: Hello.

A: Hello.

Q: (L) Who do we have with us tonight?

A: Wasanna.

Q: (L) V__ had an incident at school where a small pile of powder appeared on her books after she had put her head down on them. What was this?

A: Materialized thoughts passed through frontal lobe.

Q: (V) Well, that is just amazing.

A: Amazement is fun.

Q: (V) I would like to know the source of the tension between my mother and myself?

A: Maternal influences. Psychological anxiety. Mother daughter rivalry for male attention. Enough personal dilly dallys. Long message to follow. Pause: Ukraine explosion; chemical or nuclear. Hawaii crash; aviation, possibly involving military. More California seismic activity after 1st of year: San Diego, San Bernardino, North Bakersfield, Barstow: all are fracture points. Hollister, Palo Alto, Imperial, Ukiah, Eureka, Point Mendocino, Monterrey, Offshore San Luis Obispo, Capistrano, Carmel: these are all stress points of fracture in sequence. "Time" is indefinite. Expect gradual destruction of California economy as people begin mass exodus. Also, Shasta erupts; Lassen activity. Ocean floor begins to subside. Leave channel open and pause: Queen Elizabeth serious illness; blood related. Princess Diana suicide attempt. Gas explosions this winter in NE United States,

Texas and other. Supernova and unusual weather all over. Memphis feels tremors. Minneapolis banking scandal relates to mysterious Nordic covenant. Evangelical sexual tryst exposed. Gold is discovered in California after one of the quakes. UFOs dramatic increase and Gulf Breeze gets swarmed, becomes massive “Mecca”. Laura sees much more UFO activity. Huge wave of UFO activity. All manner and origins. Just you wait, it will give you chills and that feeling in the pit of your stomach. Many aliens will appear and we will be visible too. Think of it as a convention. All must awaken to this. It is happening right now. The whole populace will play individual roles according to their individual frequencies. This is only the beginning. Just you wait “Henry Higgins,” just you wait!

Q: (L) Are you a Rodgers and Hammerstein fan? {While “Rodgers and Hammerstein” is what I said, and the creators of “My Fair Lady” were actually Lerner and Loew, the general intent of the question was “musical comedy”.}

A: Yes.

Q: (L) How do you relate to the Pleiadians?

A: Pleiadians are communicating with many others; we are bursting upon the scene with you, but we are essentially the same, just at slightly different focus points on the realm border.

Q: (L) Well, why is all this activity happening now?

A: The grand cycle is about to close presenting a unique opportunity.

Q: (L) Does this mean that this is a unique opportunity to change the future?

A: Future, past and present.

Q: (L) Well, that sort of makes me think that if things are not

changed somewhat at this point on the grand cycle that things could get really direfully screwed up, is that correct?

A: But they won't. You have not grasped concept.

Q: (L) Yeah I have, I got you, I understand. It's just part of the cycle. It's all a cycle. I mean their being here is part of us being here...

A: You do??? {inscribed giant question mark on board}

Q: (L) Do what?

A: You said you understood concept. Really? Learn.

Q: (L) Well, since you guys can do that {referring to the big question mark}, why can't you teach us power symbols that will enhance our Reiki?

A: You are not ready.

Q: (L) But if we work on the Reiki will you teach us more power symbols?

A: Okay, we'll give you one. {draws symbol}

Q: (L) What is this symbol called?

A: Anuki. Pronounced: AH - NEW - KEY.

Q: (V) And, as it applies to Reiki, what does it do? What does it represent?

A: Retention of energy at location most in need.

Q: (V) So, if we work on somebody, do we use the symbol at the beginning or at the end?

A: All Reiki you have as yet learned involves passage of healing energy, this one involves prolonged retention for strengthened power, thus results.

Q: (L) Where are you getting this from?

A: Access is Universal.

Q: (L) Did Dr. Usui also receive this and then not remember it?

A: Usui did not reveal all to Takata.

Q: (L) Why?

A: He was told that the knowledge was priceless and must not be wasted by too much dissemination particularly to those who do not have the burning desire for truth. Those who did, as you do, would find some way of accessing knowledge.

Q: (V) Are we also advised not to divulge this information?

A: As always, be discreet.

Q: (L) Is this something we should pass to _____ and _____ {referencing two local Reiki practitioners of our acquaintance}.

A: Open.

Q: (L) Is it necessary to line the points up and the ascending line with geometric precision?

A: Yes.

Q: (L) And then, the circle elongated or more a perfect circle?

A: {Demonstration of drawing of circle part of symbol}

Q: (V) Has there ever been a crop circle that looks like this? It looks like one I saw.

A: Precisely. All are interrelated

Q: (L) Is it true that crop circles are a kind of grand Reiki being given to the planet?

A: But also messages and lessons.

Q: (Laura) Well, could it also be said that Reiki symbols as applied to the body are etheric messages to the etheric body?

A: Yes.

Q: (L) Do they communicate information into our field, so to speak?

A: Everything that exists at all levels is just lessons.

Q: (L) Well, in the case of Reiki, what I specifically want to know is if, say an individual is psychically, spiritually, karmically, or otherwise wounded or discombobulated, does the application of Reiki symbols give messages to the electromagnetic field to reform or re-arrange the pattern in the perfect pattern intended?

A: Yes.

Q: (L) And can repeated application of this, can not only physical things, but also etheric things, be healed? That is karma and so forth?

A: Yes.

Q: (L) So that our continual use of Reiki and application to ourselves and each other literally would cleanse us from our karmic burdens, memories or scars of the soul?

A: Yes.

Q: (V) I am just concerned about the previously mentioned “convention”...

A: Convention is because of realm border crossing.

Q: (L) And why is there a convention attending this realm border crossing? I mean, is it just a “reely big shew!”

A: It is an opportunity.

Q: (V) As in the windows are all opening at one time so that all these beings can get in at one time?

A: As in an opportunity to affect whole universe. Picture cosmic playing of “Pomp and Circumstance” AKA “Hope and Glory.”

Q: (Laura) How can a convention with slews of different kinds and races of people, converging on a single little pin- point planet on the outer edges of an insignificant galaxy, at the farthest reaches of this enormous universe, affect the whole thing?

A: That is your perception.

Q: (L) Well, what is the correct perception? Is the planet earth and the people thereon, and the things that are going on in this spot, the earth specifically, more important than maybe we would ordinarily have thought?

A: The Earth is a Convergence point.

Q: (L) Has it always been a convergence point? Was it designed to be a convergence point? Or, is it just going to be a convergence point this once?

A: Too many questions at once.

Q: (L) Was it designed to be a convergence point from the beginning?

A: Natural function.

Q: (L) Has it been a convergence point all along? Is that why so many weird things happen here?

A: That is difficult to answer because you have no understanding of “time”.

Q: (V) Has this type of convention thing happened on other planets with other groups of beings?

A: Has, is, and will.

Q: (Laura) So, in other words, there are other planets, I don't mean similar in structure or occupation, but other planets that are convergence points?

Q: (V) Are they parallel universes?

A: Drifting.

Q: (L) If these convergence points are scattered around the universe, is the convergence of this realm border crossing going to occur simultaneously at all points in the universe that are convergence points?

A: No.

Q: (L) It only happens at say one, or selected, convergence points at any given point?

A: Close.

Q: (L) So, do realm borders have something to do with location?

A: Realm borders ride waves.

Q: (L) And where do these waves come from?

A: They constantly cycle.

Q: (L) Does it have something to do with the movement of the planet earth into it or does it move onto us?

A: Either or.

Q: (F) Does this convention or convergence have something to do with the fact that there are living beings on the earth?

A: Yes. And because you are at critical juncture in development.

Q: (L) I would like to know in terms of prophecy if the prophecies you gave us in the first session are still valid and upcoming?

A: They are evolving.

Q: (L) Does that mean that they are evolving to the point that they are going to happen soon?

A: Fluid.

Q: (L) Does that mean that some of them may not happen?

A: Yes.

Q: (L) And the prophecies that you gave tonight, are they subject to change also?

A: Maybe.

Q: (L) Are they more solid?

A: Open.

Q: (L) I would like to know who is communicating with Ken Carey. Who does he get this information from?

A: Many.

Q: (L) Are these individuals “good guys” from our perspective?

A: Yes, some. Some is corrupted.

Q: (L) Is some of the information that comes through this channel corrupted?

A: Not as yet.

Q: (L) Are the 6th density Orions, also known as Transient Passengers, are they the same TPs that have been referred to as the ones who genetically engineered us or put us here?

A: Close. They are Wave riders.

Q: (L) Are those groups that ride the wave, is riding the wave part of the definition of Transient Passengers?

A: Yes.

Q: (L) Do they like to ride this wave?

A: Is it “fun” for you to live on earth?

Q: (L) Well, I like living on earth a great deal, but I don’t like pain and suffering, and I don’t like man’s inhumanity to man and I don’t like to see other people suffer.

A: Do you live on earth for amusement?

Q: (L) I would like to live on Earth for amusement but I haven’t had a whole heck of a lot of laughs since I have been here this time. I would like to have a life on the planet where things were pleasant...

A: You misunderstood.

Q: (L) I see what you are saying. That’s where they live because that’s where they live.

A: Yes.

Q: (F) In other words, did you choose to live on Earth because you bought a ticket? (Laura) I got it, Frank. I do want to ask about the “Course in Miracles” that is supposed to be channelled by Jesus Christ or the Holy Spirit. Is this true?

A: No.

Q: (L) What is the source that this is channelled from?

A: Variable sources.

Q: (L) Are they good guys?

A: Some.

Q: (L) So, even the “Course in Miracles” must be taken with a grain of salt?

A: Good idea.

Q: (L) I sent the answers to Karla, is this what she wanted?

A: Yes. She is diverted at the moment by others.

Q: (L) Is it possible to do hypnotic future progressions and get accurate responses?

A: Yes.

Q: (L) In the book “Mass Dreams of the Future,” there are 4 scenarios described; are all of these scenarios accurate in terms of general experience?

A: Possible futures.

Q: (L) So, when a person does a future progression, they are seeing a possible future and not necessarily...

A: Depends on quality of channel.

Q: (L) So, some people can be hypnotically progressed and get really accurate information?

A: Yes.

Q: (L) I would like to know, in the description of the Pentecost, it was said that the disciples gathered in a room and prayed for days and days and suddenly a wind came rushing in and flames danced over their heads and they all began speaking in tongues. I would like to know if this event or something similar occurred?

A: No.

Q: (L) In other words, the true baptism of the “Holy Spirit” was when Jesus breathed on his disciples and transmitted something like the Reiki initiation?

A: Close.

Q: (L) Now, I had an experience a number of years ago when I was in church, when it seemed to me that I was speaking in tongues. Was that, in fact, what happened to me?

A: Suggestion.

Q: (L) It was suggested to me and therefore that is what occurred?

A: Yes.

Q: (L) Was any kind of psychic event occurring to me at that time?

A: Close.

Q: (L) Who or what energy is behind Jacques Vallee, the great scientist, investigator and writer? Sometimes it seems like he is missing the point and sometimes it seems like he is the only one who knows what is going on.

A: He means well and his intentions are pure and good.

Q: (L) What did Jesus look like? How tall was he?

A: 5’9”

Q: (L) What color eyes did he have?

A: Blue.

Q: (L) What color hair did he have?

A: Strawberry blond.

Q: (L) What was his skin tone?

A: Fair.

Q: (L) What was his weight?

A: 160.

Q: (L) Was he muscular?

A: Average.

Q: (L) Was he what we would consider handsome?

A: Open.

Q: (L) Is there anybody I or Frank would know who bears a resemblance to him in facial features?

A: Maybe.

Q: (L) Could you name someone?

A: Scanning....

Q: (L) Okay what was his occupation?

A: Carpenter.

Q: (L) Did he own his own home?

A: No.

Q: (L) Did John the Baptist really lose his head?

A: No.

Q: (L) In talking about the new level of being after transition to 4th density, will this be something like what is described in the book "Celestine Prophecy?"

A: Close.

Q: (L) Is the carbon 14 dating process fairly accurate, if not, what is its major weakness?

A: To an extent.

Q: (L) What is its major weakness?

A: Same as yours.

Q: (L) Which is?

A: “Time” does not exist.

Q: (L) When was the last time a realm border crossed as far as the earth is concerned?

A: As you measure, on Earth, 309,000 years ago.

Q: (L) What does this wave consist of in terms of energy?

A: Feeling.

Q: (L) This wave is feeling? It is a wave of emotion?

A: Hyperkinetic sensate.

Q: (L) What does that mean?

A: All.

Q: (L) We don't understand

A: Too complex for this medium.

Q: (L) Okay. How many times has the wave come and involved the earth as we know it?

A: Infinite number.

Q: (L) I would like to know if the Shroud of Turin was ever wrapped around Jesus.

A: No.

Q: (L) Was it wrapped around somebody who was crucified?

A: No.

Q: (L) How was it made?

A: Wrapped around Roman worker.

Q: (L) What caused the image on the shroud?

A: Body oils, hormones and other physiological chemicals.

Q: (L) Well, the kids have wanted me to ask this one for a long time and I keep forgetting. There was a woman out in California who was taken to the emergency room. Several attendants and a doctor collapsed while treating her and there was a big hoopla about contaminated blood.

A: Air conditioning system spread pesticides.

Q: (L) Recently there was a supposed secret diary of Edgar Cayce reported in the tabloids. Was there such a diary?

A: No.

Q: (L) I received an article from Piers about experiments by a fellow named Persinger who has been trying to duplicate the “abduction” experience by subjecting people to EM fields in a sensory deprivation chamber. I would like comments on that, and second...

A: Nonsense, some have closed mind inspired by fear.

Q: (L) My concern is that if he is doing this to people, and we have talked about electromagnetic energy blowing holes in the dimensional boundaries, my concern is that this experimentation could be detrimental to the persons being experimented on; is this a possibility?

A: Yes.

Q: (L) What could be the results of subjecting someone to these electromagnetic fields?

A: Cessation of body.

Q: (L) In other words, it could kill them?

A: Yes.

Q: (L) Could it also open doors between dimensions and allow other things to enter in?

A: Yes.

Q: (L) Could they be subjected to spirit or demonic possession by this method?

A: Yes.

Q: (L) Could they also be subjected to further programming by aliens through this method?

A: Yes.

Q: (L) Anything else you wish to say on this?

A: Always keep open mind.

Q: (L) Are there any psychological effects that could occur to a person as a result of this type of experimentation?

A: Maybe.

Q: (L) In the establishing of an ongoing connection between an abductee and the abductor, what methods or techniques are used? Is it a psychic bond?

A: Close.

Q: (L) Is it formed technologically?

A: Partly.

Q: (L) There are so many stories of the “gazing” process where the alien controls that abductee by staring into their eyes and the

abductee feels full of love and harmony and thereby thinks that the experience is beneficial. This makes me wonder just exactly what is the purpose of this “gazing”?

A: Hypnotic.

Q: (L) Does it also form a bond?

A: Yes.

Q: (L) What is the substance of this bond? Is there a psychic cord or connection and is it true that the same...

A: Channel wavering.... (planchette spinning around board)

Q: (L) Is that all you are going to say on that?

A: Please say good night.

Q: (L) Why?

A: Energy going.

Q: (Laura) Are you tired Frank? (F) Not particularly. (Laura) Well they have never had their energy go before... and, especially since I am asking this particular question... is there some reason you do not want to answer this particular question?

A: Save...

Q: (L) Goodnight

END OF SESSION

2.30 December 5, 1994

Frank, Laura, V__

Q: (L) Hello.

A: Hello.

Q: (L) Celestial dudes! {Laura and V__ had been trying to make contact prior to arrival of Frank and were commenting on the fact that not so much as a nudge came from the planchette.}

A: Look upon that as a sign.

Q: (L) A sign of what?

A: Kindly remove ridge from board.

Q: {Adjustments made}

A: Move board away from center of table.

Q: {Further adjustments made} (L) Is that better?

A: Okay.

Q: (L) Now, look upon what as a sign?

A: Channel.

Q: (L) Channel? How is that a sign channel? I don't get it?

A: Who? {draws large question mark}

Q: (L) Who?

A: Is.

Q: (L) Okay, you mean who is the channel?

A: Yes.

Q: (L) They are trying to tell us Frank is the channel. Who do we have with us tonight? {Clearly, this was Frank himself who felt threatened by the fact that anyone try the board without him, as became abundantly clear later.}

A: Urua.

Q: (L) I have a number of questions prepared. Now, the beginning questions may seem a little bit personal, and we understand that you are STO. We are in need of a little service tonight. Is this alright?

A: Okay, but you are supposed to be moving toward STO.

Q: (L) Well, we are. The answering of some of these questions will stabilize certain aspects of our lives which will then enable us to devote ourselves more fully to helping others. Is that understandable?

A: Turn board, please.

Q: (L) Which way?

A: Not important, just turn slightly.

Q: (L) Will that do it?

A: Okay.

Q: (L) First question asked by neighbor down the street, what is the nature of the frog phenomenon.

A: Drugs.

Q: (L) How does this relate to drugs?

A: Left over influence.

Q: (L) Where are these frogs coming from?

A: Energy brings.

Q: (L) His energy manifests them? Or the drug energy manifests them?

A: Same.

Q: (L) Same? So, these are a manifestation of the frequency of drug use, is that a way of stating it?

A: Past drug use.

Q: (L) It is his own and not anyone else in the house?

A: Yes.

Q: (L) What do the frogs signify? What is the symbolism of the frogs?

A: Not signify, consequence.

Q: (L) Are these actual, physical frogs coming from somewhere?

A: Brought on.

Q: (L) I don't understand. Are we talking in circles here?

A: Your perception.

Q: (L) Well, if you are a STO being, isn't our perception the one that matters? The one you are serving by clarification?

A: Serve by help to learn, learn by using mind. Direct answers don't help to learn.

Q: (L) Okay, is there anything this individual can do to...

A: What would you do?

Q: (L) What would I do in his situation? Well, I would quit all drugs, I would begin meditating, and I would try in all ways to straighten myself out because a bunch of desiccated frogs suddenly appearing all over the place in my house would probably freak me out.

A: Yes, and? (large question mark)

Q: (L) Obviously I am supposed to think of something else...

A: SRT

Q: (L) What does that mean? Is that an abbreviation?

A: Yes. You have used the two words together extensively recently. Okay now, is part of book title.

Q: (L) Spirit Releasement Therapy?

A: Yes.

Q: (L) Okay, so what this person needs is spirit releasement?

A: Bingo!

Q: (L) And so, what did we just learn from all of that?

A: How to use your mind.

Q: (L) Okay, so he has some attachments. V__'s friend, B__ P__ says she has channelled in the past. Who does she channel?

A: Lizards.

Q: (V__) When she was channelling did she realize... well, obviously she didn't realize...

A: Most channel them.

Q: (V__) So, then, it wouldn't be advisable to compare her channelled information with this information?

A: Up to you.

Q: (L) My mom wants to know about the physical condition of the lady she is taking care of whose name is M__ F__. Is there anything she can do to improve the condition of this lady. Or, can you tell how long this lady will be in this plane?

A: Rub for circulation.

Q: (L) Is there any possibility of this lady getting better so that she can get about on her own to any extent?

A: Always possible.

Q: (L) What is the likelihood of her acceptance of getting better soon?

A: Open.

Q: (L) Okay, is it seen in the immediate future that this lady has chosen to transition?

A: Open.

Q: (L) Mother also wanted me to ask if it would be advisable to invest funds in the marketing of my face cream?

A: Please understand, we are not here to lead you by the hand, because, that would interfere with your free will, which is how you learn, which is how you progress.

Q: (L) Well, all things considered, I would still like to know if investing money in that project would be one of the better courses of action to take as far as developing a source of income.

A: What have we just told you?

Q: (L) Yeah, yeah. Is P__ Z__ going to accept the paper work for the mortgage assignment as it is being drawn up?

A: What are you going to do to help yourself?

Q: (L) Well, I am actually asking this as a test question to test your ability to predict because it doesn't matter a whole lot if he accepts it the way it's being drawn up because if he wants to have it changed we can always change it. It's no big deal.

A: This is deteriorating into a personal forum.

Q: (L) Well, somehow I don't feel that it is wrong to ask personal questions to test our source because that is the only way we can determine what kind of information we are getting.

A: Ask test questions that potentially affect all. P__ Z__ is not particularly well known in Katmandu, for example.

Q: (L) I would like to ask about a book called the "I AM" discourses. Could you tell us the source of this book?

A: Good.

Q: (L) What density level is the source of this book?

A: Sixth level.

Q: (L) Can you tell us the name of the group behind this book?

A: All is one and the same.

Q: (L) As a service to another person can we get a health reading?

A: Is this of benefit to all?

Q: (L) Well, does this mean that we are going to be restricted forever to general questions that we can't verify?

A: Verification is not dependent upon personal nature. It is not STO if it limits.

Q: (V) So, asking about just one person is not service to all, it is just service to the one person?

A: And you.

Q: (L) Well, I am starting to wonder... I mean, if I didn't have to go back and start all over on prehistoric earth, in the primordial soup, I would think this STO road is just a little bit rough.

A: No pain, no gain.

Q: (L) I don't want any more pain!

A: You are in the wrong place then.

Q: (F) I think this should be noteworthy, if Karla Turner claims that you can't trust anything that comes from this source because it will only tell you what it wants you to hear and so forth, this proves that this source does not just tell us what we want to hear. (L) Most assuredly {Speaking sarcastically}. (F) It sometimes tells us what we don't want to hear and sometimes it tells us what ever it feels like. Another thing that should be noteworthy is, every time you try to do something to verify something, it keeps answering that verification does not depend upon personal information. (L) Does this mean that I have to can my last three questions?

A: Aren't things of universal significance more important?

Q: (L) Well, didn't you say before, when I was asking things that had to do with the various events of the past two years that knowledge of them was protection. If that is the case, why can't I ask about these things now?

A: Yes, but we have repeatedly told all you need to know for your protection.

Q: (L) In regards to my protection and V__'s and Frank's, and this is going to be the last on this series of questions, V__ and I both received cards from A__ B__ who, as you know, is hooked up with the metaphysical church group, I also received a card from S__ V__ who is hooked up with G__ and J__, is there any underlying motivation from these individuals to send these cards and should we just disregard them?

A: Up to you.

Q: (F) Well, Laura, you can't ask for advice every step of the way

on how to deal with everybody you know. (L) I know. (V) Have I been abducted in the last month?

A: No.

Q: (V) Do we need to interpret our dreams through this source?

A: Why not?

Q: (L) You mean you will discuss our dreams?

A: Up to you.

Q: (L) What a relief! A concession! Okay, I had a dream last night, I dreamed about large mechanical flying "V's" that had flapping wings like metal bat boxes. They scared me. Then, I was with my family and we were going to see my cousin who is deceased and she had just had a baby. The baby was walking and talking and quoting Shakespeare. My Aunt got very upset and said it was unseemly because the baby was illegitimate and she walked out. The baby was only 10 days old. My aunt ran out the door and said it was evil.

A: Suggestion, get on computer net ASAP.

Q: (L) In other words, I really need to take my computer down and get the A drive fixed etc and log onto the network?

A: Yes.

Q: (V) What does that have to do with the dream? (Laura) I think it relates back to when Terry and Jan were here and we were talking about dreams and the suggestion was given to hook up to the network and discuss and share dreams. Like a dream forum kind of thing. Is there any significance to the ten days in this dream?

A: When you network, your entire life will dramatically improve immediately! See, sometimes we do advise when appropriate.

Q: (L) Alright. Point well taken. Would you please elaborate on the concept that alien abductions are “the scourge of God” and are manifested so that consciousness may grow and differentiate itself by a refusal to accept negative experience within the delusive material world?

A: Nonsense!

Q: (L) Well, that was real elaborate! Would you comment on the Biblical command to not make graven images. Why was this command issued?

A: In order to prevent control by too many sources.

Q: (L) How would not making graven images prevent control by other or too many sources?

A: Deception.

Q: (L) Who issued this command to not make graven images?

A: Central.

Q: (L) What is “Central?”

A: Level 7.

Q: (L) What is the true symbolism of the Egyptian scarab and why was it invented?

A: Operation.

Q: (L) The symbolism was operation? What do you...

A: Was an operation.

Q: (L) How was a scarab an operation?

A: Think. Action.

Q: (L) The scarab is a dung beetle. It rolls dung into little balls. Am I onto something here?

A: Continue.

Q: (L) And supposedly the scarab symbolized eternal life because it represented the rolling of the sun... oh dear, wait a minute... the rolling of the sun across the sky is what the Egyptians understood... but what the dung beetle really does is simply rolls dung up into little balls... is this the operation you are talking about... the rolling of dung into little balls?

A: Close.

Q: (L) Well, that's all I know about the scarab so you are going to have to help me out here.

A: Life cycle.

Q: (L) Okay, the life cycle. I would like to know what force was behind the rise and domination of Oliver Cromwell?

A: Lizards.

Q: (L) Okay, there is a woman named Jane Allyson who channels an entity known as Zeena. I would like to know who or what is Zeena?

A: Just Jane.

Q: (L) So, she is just channelling herself? What is the significance of the number 444 as repeated by Cytron, a robot channelled by Jane Allyson, a super cyborg?

A: Zilch. {Much laughter}

Q: (L) I would like to know what is the Karmic ramification of the killing of those two little boys in South Carolina by their mother?

Everybody in the U.S. will be interested in this one, maybe not Katmandu, though.

A: Pain teaches.

Q: (L) And, in this case is the mother suffering the pain?

A: And all others involved including the whole nation. All is lessons.

Q: (L) Did these two little boys volunteer to come in for this purpose?

A: Yes. Were higher density beings on mission.

Q: (L) Do 4th density STO's feed off of 3rd density energy?

A: No.

Q: (L) I would like to ask about the "Starseed Transmissions". I would like to know about the Bird Tribes. What is this source?

A: Ken Carey is only channelling his alternate self.

Q: (V) Who are good channels, then, if every one we ask about is channelling themselves or false channels, who can we look to as a clean channel?

A: We have already told you of one example.

Q: (L) Barbara Marciniak?

A: This session.

Q: (L) The I Am discourses?

A: Review. Graven images.

Q: (Laura) Could you tell me what source of information was behind the...

A: Akashic records.

Q: (V) I wanted to ask about that and I had totally forgotten! Are the Akashic records the same thing as the source that you called “Central?”

A: No.

Q: (L) Are the Akashic records the same source that the I Am discourses come from?

A: All is one at base but different “branches”.

Q: (L) Was Nostradamus getting his information from the Akashic records?

A: Yes.

Q: (L) So, Nostradamus’ quatrains, if interpreted correctly, would actually be valid.

A: Interpretation is the key.

Q: (L) If we were to hold a series of sessions about the quatrains of Nostradamus, would you be able to help us interpret them?

A: Yes.

Q: (L) Would that be a worthwhile project for us?

A: Up to you.

Q: (L) Are the 6th density STS individuals that you indicated are the Orions, these are the same beings, I understand, that genetically engineered or created mankind, is that correct?

A: No.

Q: (L) Are they the first to alter us after creation?

A: Close.

Q: (L) Are the 6th density Orions known as Transient Passengers?

A: Yes.

Q: (L) So there are Transient Passengers that are STO as well as STS?

A: TP is “wanderer”.

Q: (L) And what is a wanderer?

A: TP.

Q: (L) Well, the idea of the Wanderers, according to the Ra Material, is 4th or 5th density beings that have chosen to come back into 3rd density to help us. Would that be the same kind of Wanderer?

A: 5th or 6th density.

Q: (L) Is Frank a Wanderer?

A: Open.

Q: (L) Am I or V__?

A: Open.

Q: (V) What if we felt like we were?

A: Check it out.

Q: (L) How?

A: How would you think?

Q: (V) Faith, I guess, and how I feel. What else do you have to go on?

A: Not answer, try again.

Q: (L) Would hypnosis be the solution?

A: Bingo!

Q: (L) Okay. Now, I would like to know, for the sake of all the Theosophists around the world, what was the source of the information in the book “Isis Unveiled” by Helena Blavatsky?

A: Orions STS and STO. 6th Density.

Q: (L) So, her information was from both sides? And it is up to the reader to figure out which is which?

A: Good idea.

Q: (L) Is there any possibility that the information we get through this source is STS oriented?

A: Yes. Always possibility.

Q: (L) I would like to know what is the definition of, and would you describe for us, a dimensional curtain?

A: Self-explanatory. Think.

Q: (L) When we are talking about dimensional curtains we are talking about divisions at the same level of density, is that correct?

A: Maybe.

Q: (L) Can dimensional curtains be between dimensions at the same level of density?

A: Yes.

Q: (L) Are dimensional curtains also something that occurs between levels of density?

A: Yes.

Q: (L) So, a dimensional curtain is a point at which some sort of change takes place... what causes this change?

A: Nature.

Q: (L) In specific terms of the engineering of it, what defines this change?

A: Experience.

Q: (L) Is it in any way related to atomic or quantum physics or the movement of atoms?

A: Yes.

Q: (L) Okay. An atom is in 3rd density. What distinguishes it from an atom in 4th density?

A: Reality.

Q: (L) What distinguishes one realm from another?

A: Assumptions.

Q: (L) Okay, what you assume or expect is what you perceive about that atom depending upon which reality you are in, is that correct?

A: Close.

Q: (L) What determines your assumptions?

A: Experience.

Q: (L) My experience of atoms is that they congregate in such a way as to form solid matter...

A: Every thing that exists is merely a lesson.

Q: (L) Okay, so once we have learned certain lessons, as in experience of certain things, then our assumptions change?

A: Yes.

Q: (L) Okay, is this wave that is coming our direction going to give us an experience that is going to change our assumptions?

A: Catch 22: One half is that you have to change your assumptions in order to experience the wave in a positive way.

Q: (L) And what does this wave consist of in absolute terms?

A: Realm border.

Q: (L) Is that realm border as in a cut-off point between one reality and another?

A: Yes.

Q: (L) Is that realm border as in dimensional curtain?

A: Yes.

Q: (L) So the planet earth is going to pass through a dimensional curtain?

A: Or an earth. All is merely a lesson, and nothing, repeat nothing, more.

Q: (L) Well, my experience with lessons has been that they are generally painful. Is this realm border crossing, or this merging experience going to be what we, or I, in the 3rd density, would perceive as painful?

A: Wait and see.

Q: (V) Is the realm border 3rd density?

A: Have answered; stop and contemplate.

Q: (L) What exactly are crop circles and how are they formed? I know we have asked about crop circles before, but I would like to know the specific mechanism by which they are formed?

A: Not issue, but energy vortex.

Q: (L) Does this energy vortex arise from within the earth itself?

A: No.

Q: (L) Where does this energy vortex issue from?

A: Here. Sixth density.

Q: (L) Do you want to give us more on the wave, or realm curtain?

A: No, not at this time. You have enough for now. Goodnight.

END OF SESSION

2.31 December 9, 1994

Frank and Laura

Q: (L) Hello.

A: Hello.

Q: (L) And who do we have with us this evening?

A: {Name lost}

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Now, tell me the name of the beings D__ M__ experienced as preying Mantises in her hypnosis session?

A: Her essence.

Q: (L) But, in that reality don't they have a name?

A: Too complex to answer adequately in this medium.

Q: (L) Well, you said that the beings that V__ encountered were Minturians, aren't they the same?

A: No.

Q: (L) Is there a difference between essence beings and incarnate beings?

A: Yes.

Q: (L) So we have a distinct difference. Okay, who were the ant/fly beings she described?

A: Her essence too.

Q: (L) And what were those snakey, slug-like beings that she saw?

A: Same.

Q: (L) Are you saying that all of this stuff is who she is? All of these horrible creatures and these..

A: In some of the alternate realities.

Q: (L) Do I have creatures like that that are my essence?

A: Yes.

Q: (L) My essence is something that horrible and dark and icky?

A: Subjective.

Q: (L) Well, weren't those horrible icky beings eating little children? Weren't those real human children?

A: How do you think you are viewed by deer, for example?

Q: (L) Well, I can immediately see that. I saw that already. I mean, cows and chickens would have to view us that way. I mean, it's pretty gross.

A: Roaches, too.

Q: (L) Is that why the night before D__'s session, I dreamed of ants that I could have stepped on and smashed, and for some reason

I decided I did not want to take the life of even a single ant?

A: Yes.

Q: (L) Was that dream preparing me for what I was going to experience in that session?

A: Yes.

Q: (L) Well, what do we do about these essence parts of ourselves? I mean, I don't like it that there may be something of the predator in me. I would like to not have it, or get rid of it, or transform it, or whatever.

A: Wait and see.

Q: (L) Well, am I going to have to remember myself doing things like that in order to come to terms with it?

A: Yes.

Q: (L) Is that going to happen to me, that I am going to have memories like that surfacing?

A: Yes.

Q: (L) Well, I can't even cope with it in someone else, how am I going to deal with it in myself?

A: You will.

Q: (L) Is this something we are all going to have to do?

A: All eligible.

Q: (L) And who is eligible?

A: 4th density candidates.

Q: (L) Is Frank going to have to remember these things, too?

A: Yes.

Q: (L) How does one know that one is a 4D candidate?

A: You gradually “awaken”.

Q: (L) Are my children 4D candidates? And my husband? You have to tell me this. If I have to deal with things, let me do it a little at a time.

A: You are not in correct frame of mind.

Q: (L) Well, that sounds ominous.

A: Wait for answer.

Q: (L) Wait until when?

A: You are ready.

Q: (L) So, in other words, some people may have to leave behind children or mates, or siblings or parents, is that true?

A: If so, will be prepared.

Q: (L) Is there any way to tell if someone is a 4D candidate?

A: Inquire of them.

Q: (L) And, will they know?

A: Yes, at some level. In a sense. Those who are chosen feel it. You will know.

Q: (L) Well, I happen to think that my family is extremely special.

A: So do all.

Q: (L) I have taken a great deal of time and care with spiritual matters. Is that because it was my obsession or did they choose me because of this?

A: Open.

Q: (L) Did the Minturians, the preying mantis beings that V__ experienced in her regression, did those preying mantises eat people?

A: Too complex for your thought patterns of this session. You are upset.

Q: (L) Well, is that what is wrong with me tonight. You aren't telling me much.

A: Biological, and we are telling plenty, you are not "hearing" because biological factors have temporarily pushed you back more into 3D.

Q: (L) Would it be a good idea to do the Reiki exercises and stop the cycle?

A: Your cycle may stop soon anyway.

Q: (L) Well, is it true that that exercise, when it stops your cycle, it also stops the aging process?

A: Somewhat.

Q: (L) Would it be beneficial.

A: Maybe.

Q: (L) But, I thought you guys said I had another baby waiting to come in?

A: Does not necessarily mean will make it.

Q: (L) So, am I going through the change here?

A: Not yet.

Q: (L) When will it start?

A: Open.

Q: (L) Is S__ going to pay me the money she owes me?

A: Maybe.

Q: (L) What are the odds?

A: Depends on your efforts.

Q: (L) Does that mean that I have to now send her a certified letter through my attorney?

A: Up to you.

Q: (L) And, if I do this, will she pay?

A: Maybe.

Q: (L) Have the B__'s made their final payment to Fleet?

A: Not yet.

Q: (L) Will they pay on Monday?

A: Probably.

Q: (L) When will I get my SSI check?

A: Within 10 days?

Q: (L) When will I get my monthly check?

A: The same.

Q: (L) And how much will the back pay be?

A: 3000 approximately.

Q: (L) And how much will we get from Paul with the deed to the house?

A: Open.

Q: (L) Back, a year or so ago, when we talked to Keith on the board, and you verified that it was Keith, Keith gave us a set of numbers that came in within 8 days of the day he gave them to us. Now, if he, as an earthbound spirit, was capable of giving us a set of numbers that came in within 10 days, could you not do the same?

A: Maybe, when all is well.

Q: (L) In other words, when I am not in this crummy mood?

A: Okay.

Q: (L) Is there any qualification that needs to be established for us to get the lottery numbers? Is there some thing we have to do, or be, or think, or say?

A: Completely pure intent, i.e. open.

Q: (L) Completely open?

A: Nonanticipatory.

Q: (L) Our anticipation constricts the channel when we ask for that kind of information?

A: Yes.

Q: (L) We have to be completely uncaring whether we get it or not, so to speak?

A: Happy-go-lucky attitude helps. As you were before.

Q: (L) So, as long as we are worried, tense, anticipatory, and attached to the idea, we constrict the flow?

A: Yes.

Q: (L) Now, you said in an earlier session that you were making financial arrangements for us. Well, I am not putting any weight

or pressure on that, but, does that have anything to do with M__
T__ and referrals for hypnosis?

A: Maybe. Don't be anticipatory. Faith, dear.

Q: (L) Thank you and good night.

A: Good night.

END OF SESSION

2.32 December 10, 1994

Frank, Laura, Terry and Jan.

Q: (L) Hello.

A: Hello. Poinsettia.

Q: (L) What?

A: Just came to mind.

Q: (L) Is that in our minds?

A: No, ours.

Q: (L) Who do we have with us tonight?

A: Cassiopaea calling.

Q: (L) What is your name?

A: Rodann.

Q: (L) I want to ask again for the benefit of Terry and Jan, what or who were the beings seen by DM in her hypnotic regression the other night? {This session is recounted in the Wave in some detail including direct transcript.}

A: Her essence.

Q: (L) Were these in any way physical beings on the earth we occupy in space/time from where we are at this moment?

A: No.

Q: (L) This happened in a so-called alternate reality?

A: Is still.

Q: (L) So, in some alternate reality, DM is a preying mantis being eating little children?

A: And so are you. And all others.

Q: (L) This is an essence of what?

A: Her being.

Q: (L) Are these aspects of our being coming to earth as part of the realm border crossing?

A: Yes.

Q: (L) Are all of us going to have to face these aspects of ourselves as other beings?

A: Yes.

Q: (L) Are there other parts of us in all realms doing other things at this moment?

A: Yes.

Q: (L) And how is this going to be affected by the realm border crossing?

A: Will merge.

Q: (L) Do we need to do extensive hypnosis to bring these aspects of ourselves up and deal with these things a little at a time?

A: Will happen involuntarily. Will be like a thermonuclear blast. Message follows: See pattern. Orion, Pleiades, Arcturas, Cassiopaea; check distances from earth; progress locator for wave combined with earth references of space time. For you to figure out. Cross reference channelled messages, printing dates and location. We are where we are.

Q: (L) What do you mean you are where you are?

A: Cross reference Time and distance.

Q: (L) What book do we need to cross reference?

A: Any star chart and Marciniak, Arcturas Channel, Orion literature and Us. We speak from “crest” of wave, now, where are we?

Q: (L) Is this a riddle?

A: From, not of.

Q: (L) You speak from the crest of the wave? (T) Are you riding the wave?

A: Yes.

Q: (L) You said in another reading that you were 6 thousand miles...

A: Window of transmission.

Q: (L) We are certainly hoping that you are going to make all of this plain and clear..

A: It is.

Q: (L) Well, can you help us poor 2 strand DNA creatures to understand this?

A: How far away is Cassiopaea?

Q: (L) Do we need specific distances?

A: General is okay.

Q: (L) So, if we just find the general distances... and does each of these star clusters represent a general area of the wave?

A: Each represents locator in space time. You can judge speed and ETA by cross referencing distance with publishing dates and these messages from us.

Q: (L) I got it! You mean that YOU are the Arcturians, the Pleiadians, and now you are the “Cassiopeans” because you “are where you are”! And you are riding the wave. Is this wave a straight line connecting all these constellations?

A: Circuitous or cyclical route.

Q: (L) So, is it like a spiral?

A: Yes.

Q: (L) So we really need to set up a map so we can draw it?

A: Yes.

Q: (L) When we speak from Orion we are “Orions”. When from Pleiades, we are “Pleiadian”, and so on.

Q: (L) So, all of these channelled books you have mentioned are coming from the same basic source, through different channels, that they are able to connect with because of their different positions in space time and preparation level of the channels, is that correct?

A: Close. We have given you a Wave crest locator. We are from where we are and speak. Get it?

Q: (L) You are the wave crest?

A: We are Marciniak's Pleiadians. We are where we are.

Q: (T) So, you are not really Cassiopaeans from the Constellation Cassiopia?

A: We are Transient Passengers.

Q: (T) So, when the wave reaches earth and you are transmitting to somebody else out there you will represent yourselves as the "Terrans?"

Q: When wave reaches earth, we merge with you.

A: (L) When you were at Orion, did you merge with the Orions?

A: Not on same frequency for realm border crossing.

Q: (L) What effect did the wave have on the Orion sector?

A: None. Already at 4th density level.

Q: (L) Where did the wave originate?

A: Did not.

Q: (L) Has it always been cycling through the universe?

A: Close.

Q: (T) Okay, you are riding on the crest of this wave in 6th density, is this true?

A: Yes. We are you in 6th density.

Q: (T) You are we, that is me Terry, Laura, Jan and Frank?

A: Yes.

Q: (L) Are you alternate selves extending into higher densities?

A: At your current reference point in space time, we are you in the future.

Q: (T) We are your destiny?

A: And vice versa.

Q: (L) You are not, by any chance, one of those weird ant or preying mantis beings are you?

A: Yes and no.

Q: (T) You are just another part of ourselves? You, us, the Lizards, the ants, the grays, the trees...

A: We are your whole self as you/we are in 6th density.

Q: (T) So, what we are working to become is You? You are us?

A: Yes.

Q: (T) So, when we move to 4th density and become whole with ourselves, we will know you also for a short time?

A: Not whole yet when at 4th density.

Q: (T) But in order to move to 4th density...

A: Closer.

Q: (T) We, us, in this room, are closer than others are?

A: No. Closer when at 4th density.

Q: (L) When S__ was under hypnosis she described seeing a fleet of space ships "riding a wave" and this unnerved her. She felt this wave was a fearful, invasion-type thing. Was this you and your wave she was perceiving?

A: Wave is transport mode.

Q: (L) Is that transport mode for many beings?

A: Yes.

Q: (L) Are you coming to invade us?

A: No, merge.

Q: (L) Are others coming with the intention of invading us?

A: Yes.

Q: (L) And, when you merge with us, are you going to empower us to resist and defend ourselves?

A: Wave is “crowded.”

Q: (T) So, everybody out in the whole universe who want a piece of the earth action are on this wave?

A: At realm border crossing.

Q: (L) Let me ask a couple of quick questions to get them out of the way, unless you have something you really... I mean, you pretty much gave us what we need on that... this channelled material received here...

A: Oh yeah?

Q: (L) Well, I guess they are telling me that we did not get all we needed on that subject. But, we can come back to it.

A: You may ask questions if you wish.

Q: (L) Well, I don't want to cramp anybody's style here. (T) Oh, go ahead, they're crowded on the wave already anyway. Okay, here is a transcript I received in the mail from a group called “Cosmic Awareness”....

A: Dezinformatzia.

Q: (T) Well, I love a 6th density being with a sense of humor. (L) Has the base at area 51 been moved to Kirtland as this stuff says?

A: No.

Q: (T) Is there a base at area 51?

A: Yes. Kirtland has a new addition.

Q: (L) Is the base at area 51 where our military and aliens are working in conjunction?

A: They have recovered craft of grays, but human and alien personnel are not working together there.

Q: (T) Are the craft actually captured?

A: Recovered from crash.

Q: (T) Have any alien beings given the government craft?

A: No.

Q: (L) Why not?

A: Would you give mice tv sets?

Q: (L) How do these insect beings, these other manifestations of ourselves, how do they view our treatment of insects on this planet?

A: Unconcerned.

Q: (L) Is that because the insects on our planet are not sentient beings?

A: Different.

Q: (T) How do the insect beings handle insects on their planet?

A: They are the insects on their planet.

Q: (L) Do they have pests on their planet like little miniature humans that run around and tear up their groceries? (T) Any energizer bunnies?

A: Mirth!

Q: (L) But really, do they have pests?

A: No.

Q: (L) Well, with serious intent, do they have pests on their planet like we do?

A: No. Microbic.

Q: (L) Well, do they exterminate them like we do?

A: No.

Q: (L) Can we understand our pests as something that has been inflicted on us by the Lizzies. I always did wonder why God created mosquitos?

A: No.

Q: (L) When we go into 4th density are we going to be free of mosquitoes, roaches, slimy worms, slugs and so on?

A: No.

Q: (L) In conjunction with DNA changes, is there any similarity between the human race and the idea of transformation relating to populations such as grasshoppers into locusts?

A: Yes.

Q: (L) When grasshoppers turn into locusts, they swarm when their population gets too large.

A: All is part of natural cyclical process.

Q: (L) Was the DNA change that we are experiencing programmed into us so that after so many generations these changes would just sort of kick in?

A: Close.

Q: (L) So, we all selected certain bodies before we incarnated that would be prime for this programming?

A: Are you ready to be hermaphrodites?

Q: (L) Is that what we are going to be?

A: Wait and see.

Q: (T) Since you are riding this wave, in order to communicate, since the wave is what you are using to focus this contact with, and you are, whoever you may be at whatever point the wave is, you gave Barbara Marciniak information under the name “Pleadians”. You are telling us this. Have you told the other people, such as Barbara Marciniak, that you are contacting other people?

A: No.

Q: (L) So, Barbara may not know that the contacts are the same only under a different name?

A: No.

Q: (L) Is it because she didn’t ask?

A: Progressive information. Also, system is like mosaic.

Q: (L) Does this mean that different people get different pieces of the mosaic?

A: Yes.

Q: (T) But, you have told us that you have contacted others under other names?

A: Yes.

Q: (T) Have you told the others?

A: No.

Q: (T) Why have you not contacted the others and told them this?

A: Just answered. Progressive.

Q: (T) Are you still contacting Barbara?

A: Not at this point. She is in pause mode.

Q: (T) Does she know this?

A: Yes. Write to her and tell her to call “Cassiopaea”. Next stop is Leo.

Q: (T) In some time in the future, the next sending point is Leo. Does that mean that at some point we will not be able to contact you?

A: We just told you who to call.

Q: (T) Well, what I am having trouble understanding is why we have to call to a certain space point. We are now in touch, does this channel not stay open?

A: Reference point.

Q: (T) So it doesn't matter as long as we meet regularly to talk with you?

A: Yes.

Q: (T) Barbara is also able to continue talking to you even though you are no longer the Pleadians?

A: She may talk to someone else.

Q: (T) Are you saying that she is channelling some other source at this point?

A: Maybe.

Q: (L) J.Z. Knight supposedly channelled Ramtha. Who was Ramtha?

A: Originally valid source.

Q: (L) Did that change?

A: Greed.

Q: (T) So she faked it?

A: Yes.

Q: (L) I wanted to ask about something you mentioned last night; I haven't transcribed the tape, but you said something about being a 4th density candidate and I had not heard you use the term before. What is a 4th density candidate?

A: Self-explanatory.

Q: (L) How does one get to be a 4th density candidate?

A: Natural progression.

Q: (L) Is everyone on this planet a 4th density candidate?

A: No.

Q: (L) How many are there?

A: Open.

Q: (L) Could someone become a candidate overnight who is not now a candidate?

A: Yes.

Q: (T) How many strands of DNA do we have?

A: Terry, 4; Frank, 4; Jan, 3; Laura, 3.

Q: (L) Well, gee... does this have anything to do with sex?

A: No.

Q: (L) Are you telling us that Frank and Terry are smarter than Jan and me?

A: You are growing your 4th, 5th and 6th right now.

Q: (T) If our 3rd density were to examine our DNA right now would they see this?

A: They would call it Junk DNA.

Q: (T) Would it be noticeable as DNA that was not there before?

A: Maybe.

Q: (Frank) They would have to compare to a baseline.

A: (L) Were Atlantis and Lemuria the most ancient of Earth's civilizations?

A: No.

Q: (L) What advanced civilizations were before Atlantis and Lemuria?

A: Many.

Q: (L) Was there an ancient advanced civilization located in the area we now call Antarctica?

A: Yes.

Q: (L) What was the name of this civilization?

A: Gor.

Q: (L) What kind of individuals lived in Gor?

A: 18 feet tall.

Q: (L) Were they humanoid and did they look like us?

A: Close.

Q: (L) Were they male and female like us?

A: Yes.

Q: (L) And did they have space travel capabilities?

A: No interest.

Q: (L) Are there any remains of their civilization left?

A: Yes.

Q: (L) Did they only inhabit Antarctica?

A: No.

Q: (L) Did they inhabit the whole world?

A: Close.

Q: (L) Are there any remains in Florida?

A: No.

Q: (L) Where might the remains be found

A: South America.

Q: (L) Where in South America?

A: Amazon. Ancient legend of Amazons.

Q: (L) Do our scientists know any of this?

A: Yes.

Q: (L) Are there remains of Atlantis and Lemuria?

A: Yes.

Q: (L) Do our scientists know of any of those?

A: Yes.

Q: (L) Are they withholding information on purpose?

A: Yes.

Q: (L) Have they any intention of telling about it?

A: No.

Q: (L) Do they have relics of these stored?

A: Yes.

Q: (L) I would like to know if there is anything T G could do to enhance his recovery from cancer?

A: PMA. Positive Mental Attitude.

Q: (L) In our cultural experience we have a lot of very strange things that our young people participate in. Among these activities is the use of extremely loud stereo systems that quite literally vibrate the cells in their bodies until they turn to jelly. Could you tell me, please, the long term physiological effects of this kind of exposure of the human body to these loud booming noises?

A: Strange thought patterns.

Q: (L) What effects are these violently loud stereos having on people?

A: Varies.

Q: (L) Are these effects negative?

A: Open.

Q: (L) Are these effects less than conducive to optimum health?

A: Maybe.

Q: (L) What can these very loud booming sounds do to the body?

A: Make the body go “boom boom.” (Much laughter)

Q: (J) Blue Cheer concert, 1969; group advertised as the loudest in existence, and they were. I sat ten feet from the speakers and couldn't hear for three hours afterward and had ringing in the ears for several days. That was the last concert I went to. (L) Is this part of a plot to destroy the minds and bodies of our young people?

A: Maybe.

Q: (J) Or are they just being stupid?

A: Good answer.

Q: (L) On two separate occasions you have mentioned Andarans. I have never heard of them before. Who are they and why have you mentioned them? Where did they come from and what did they look like?

A: One question at a time.

Q: (L) Who are the Andarans?

A: Thought forms for STS.

Q: (L) What level of density are they?

A: 5th.

Q: (L) So, they are at the contemplative level?

A: Yes.

Q: (L) Where do they come from?

A: 5th level.

Q: (L) Can you tell us what is the Rainbow Bridge referred to in *Bringers of the Dawn*. Is this what you were talking about when you spoke of our group being a conduit?

A: Yes.

Q: (L) What happens psychically at the moment of orgasm?

A: For whom?

Q: (L) For anybody. In just a general way. Does anything happen to a person psychically when they have sexual climax.

A: Open.

Q: (L) Is it different for each individual?

A: Close.

Q: (L) Is it different for males from females?

A: Usually.

Q: (L) The reason I ask is because a man named Wayne Cook did some work with dowsing and he found out that the human body, after sexual climax, dowses the same pattern as a dead body. Why is this? (T) Draining of energy.

A: Yes.

Q: (L) Okay, where does the energy drain to?

A: To the ether.

Q: (L) Does the energy go to one or the other partner?

A: Maybe.

Q: (L) Is it possible, during this activity, for Lizzies or other beings to be hanging around and be drawing this energy?

A: Yes.

Q: (L) Is that, in a general sense, what often happens?

A: Yes.

Q: (L) Is this one of the reasons that sex has been promoted and promulgated in our society to such an extent...

A: Yes, yes, yes.

Q: (T) Was there anybody hanging around us last night? (L) Terry!

A: Sure, why not.

Q: (T) Cause we're that good? (L) Terry! Now, Otto Muck came to the conclusion that the final breaking up of Atlantis occurred on June 5, 8498 B.C. Is this pretty close?

A: Close.

Q: (L) What happened to the Mayans?

A: Taken by Lizard beings to cosmos in 4 D. "Lizzieland."

Q: (L) What did they do with them there?

A: Many possibilities.

Q: (L) Do any of those possibilities include having them for dinner? Sorry about that, I couldn't help myself. (J) "Mayan Helper." And I helped!

A: Maybe.

Q: (L) How big was the main island of Atlantis?

A: 1,354,000 square miles.

Q: (L) There is a woman named J__ A__ who channels a robot named Cytron. Is this a put on or is she really channelling a super cyborg?

A: Nonsense.

Q: (T) Emergency, emergency, Dr. Smith! (L) A few months ago I had A__ in trance to do spirit viewing for several people. In several frames of reference she saw a funny little grinning man with big, pointed ears, wearing black, boots and holding a whip, darting about and hiding behind people. Who was this little guy?

A: He was a carnal thought form.

Q: (L) And who created this carnal thought form that was zipping around?

A: Host.

Q: (L) Who was the host?

A: The subject with whom it appeared. It indicated an individual with many carnal thoughts.

Q: (L) I would like to know... my friend, Keith Laumer, who died last year, I am a little bit curious since he came and hung around me for a time after death, did we have a past life relationship and if so what were the dynamics?

A: Yes. You must learn this yourself. Are you learning yet? You keep asking 3rd level questions.

Q: (T) You talk about both STO and STS. Yet you tell us that we need to learn to be STO. Why is there a difference between what we have to do and what you are doing?

A: STO is balance because you serve self through others.

Q: (T) You have said a couple of times that you are STS by being STO. Is this not true?

A: Yes. Already answered.

Q: (T) Kind of like: what goes around, comes around?

A: Yes.

Q: (T) Is STO a means to an end for STS?

A: No. STO is balance. STS is imbalance.

Q: (T) How can you be STS through STO if STS is imbalance?

A: STO flows outward and touches all including point of origin, STS flows inward and touches only origin point.

Q: (T) Well, they refer in the material that I am reading through, that they are STS through STO. (L) They serve self BY serving others. (T) Is that what they mean? (L) Yeah. (T) Is that what we're supposed to do, serve ourselves by serving others? (T) Yeah! Because what goes around, comes around. If you serve others then you get things back. (F) Because when you serve yourself, all there is is an infinite number of individuals serving self. (T) There is no energy exchange, no synergy within the group; there is no exchange. (F) Everything moves inward. (T) There is no sharing, no growth, there is no nothing. (F) No interconnecting. (T) Right! There is no learning. (L) In terms of major STS, this may or may not be related, could you tell us the nature of a Black Hole?]

A: Grand Scale STS.

Q: (L) Is it like a being that has achieved such a level of STS that it has literally imploded in on itself in some way?

A: Close analogy.

Q: (T) Possibly an entire civilization of STS?

A: No.

Q: (L) Well, maybe a civilization can't do it because that implies working together. It must need to be an individual being.

A: Black Holes are a natural force reflection of Free Will consciousness pattern of STS. Notice that Black Holes are located at

center of spiral energy forces, all else radiates outward.

Q: (L) Now, you say “spiral” energy forces, and you also have said that this wave is a spiral. Is the central point of this wave that is spiraling, a black hole?

A: No.

Q: (L) Is it a radiating wave?

A: All in creation is just that: a radiating wave.

Q: (L) Where does the energy go that gets sucked into a black hole?

A: Inward to total nonexistence.

Q: (L) Well, if a black hole continues to suck stuff in, is it possible that it would eventually suck in the entire creation?

A: No.

Q: (L) Why is that?

A: Universe is all encompassing. Black holes are final destination of all STS energy.

Q: (F) So, does this mean that we, or anyone else who is classified as STS, remains on said path, that we will eventually end up in a Black Hole?

A: Close.

Q: (L) Well, that is pleasant. And what happens to energy that is “total non-existence”?

A: Total non-existence balances total existence. Guess what is total existence?

Q: (L) Well, is it kind of like a balancing force?

A: “God.”

Q: (T) Are we talking about the creator god as in the Pleiadians?

A: Not Pleiadians. Prime Creator.

Q: (T) What is the difference between the Prime Creator and “God?”

A: None. As long as you exist, you are of the Prime Creator.

Q: (L) Now, this stuff that goes into Black Holes, that goes into non-existence, is that, then, not part of the Prime Creator?

A: Correct.

Q: (L) How can Prime Creator lose any part of him or itself?

A: Prime Creator does not “lose” anything.

Q: (L) Well, then, how would you describe this energy that was in existence and then is no longer in existence because it has become or gone into a Black Hole?

A: Reflection is regenerated at level 1.

Q: (L) So, this energy goes into a Black Hole and... does it come out on the other side?

A: No.

Q: (L) Does it become like a primal atom?

A: No.

Q: (T) Does it go back into the cycle?

A: No. Reflection regenerates as primal atoms.

Q: (L) So, this energy that is sucked into the Black Holes... what
(T) When we put out energy as positive or negative energy, and

there are beings on other levels that feed on this energy, is this true?

A: Yes.

Q: (T) Okay, and you said that the Lizzies feed on the negative energy?

A: Yes.

Q: (T) Who feeds on the positive energy?

A: You do.

Q: (T) How do we feed on the positive energy?

A: Progression toward union with the one, I.E. level 7.

Q: (L) In other words, you fuel your own generator instead of fueling someone else's. (T) You are at level 6, what do you feed on?

A: You have the wrong concept. We give to others and receive from others of the STO. We feed each other.

Q: (L) So, by feeding each other you move forward and grow but those of the STS path do not feed each other so must feed off of others. (T) Now, you are talking to us now. This is considered STO?

A: Yes.

Q: (T) We are providing energy for the channel also, does that provide you with energy?

A: No.

Q: (F) You are not keeping up with the program, Terry. (L) What do you want from us?

A: We don't want when pure STO. We came because YOU wanted. But that is STS until you share with others.

Q: (L) So, it is necessary that we share this information?

A: Up to you, it is a free will choice.

Q: (L) Is there some risk to ourselves by sharing this information?

A: At some level, but there is "risk" to all things.

Q: (T) I have a question: where do you get all your cute little cliches and sayings?

A: We access the human condition.

Q: (L) In one of my Fate magazines over there I read a story about a fellow who discovered an enormous structure in a cave when he was wounded and hiding there during the war. It was in Europe somewhere. I am visualizing the image. What was this thing this man found in this cave?

A: Magnesium wall made by Lizard beings. Constructed 309448 years ago. It was part of a base. It was buried during cataclysms.

Q: (L) What is buried on Oak Island?

A: Regenerator.

Q: (L) What is a regenerator?

A: Remolecularizer.

Q: (L) Who put it there?

A: Lizard beings.

Q: (L) When did they put it there?

A: 10,000 years ago, approximately.

Q: (L) Do they use it from time to time?

A: No.

Q: (L) Does it still work?

A: It could.

Q: (T) What is the purpose of a remolecularizer? (L) Yeah, what do you use it for? Entertain your friends at parties?

A: Regenerate matter.

Q: (L) Such as physical bodies?

A: Yes.

Q: (L) So, you just go and stand next to it or inside it or whatever and it regenerates you?

A: Any matter.

Q: (L) Well, that would be a really handy thing to have in the barn. Is there any way to get it out of there?

A: Maybe. Are you planning an expedition?

Q: (L) No, we're just being nosy. How deep is it buried?

A: Deep.

Q: (T) Well, we can send it in to a treasure hunter's magazine and give somebody an idea of how far they have to go. (L) Yeah, tell them what it is and they will go whole hog for it. (T) Yeah. It's a regenerator. "What?" Well, it's a remolecularizer. What's wrong with you? Where have you been? You never wanted to be regenerated? You, too, can be a Time Lord! (L) Amaze your friends, confound your enemies, you can hypnotize any woman from a distance by the power of your... REGENERATOR! (T) Wow! Look at the size of his Regenerator! [much laughter] Thank you.

A: Good Night.

END OF SESSION

2.33 December 17, 1994

Frank, Laura, V__, DM

{DM is the woman discussed in the previous two sessions who, under hypnosis, described being abducted by preying mantis beings who ate children. She was a science teacher at a local high school, divorced from a history professor at the University of South Florida, and had a rather wild teen-aged daughter who she obsessed over. We had earlier attended a reception at a New Agey bookstore – an alleged expert on Mayan cosmology and/or esoteric teachings. Liquor had been served and we had all had a couple of drinks which was unusual in the extreme for me.}

Q: (L) Hello.

A: Hello.

Q: (L) Celestial Dudes!

A: That was cute!

Q: (L) Who do we have with us tonight?

A: Porsonea.

Q: (L) I guess you were with us at the party tonight? {Talk about the speaker who was guest of honor at party.} What was his talk about?

A: Mayan, Laura.

Q: (L) Was our alcohol consumption bad for us?

A: Only if in excess.

Q: (L) Did I have too much?

A: Some.

Q: (L) We would like to ask what is the source of the warts D__ and EDDIE Page's wife have in various places on their bodies? {Eddie Page: alleged abductee doing the UFO speakers' circuit. I thought he was a fraud, but DM was very taken by his nonsense. His wife was literally covered, all over the exposed parts of her body, with hundreds of warts. D's warts were a more minor thing with only a dozen or so.}

A: Genes Oriented.

Q: (L) Does this mean warts are genetic?

A: Oriented.

Q: (L) Is it the same for both of them?

A: Not exactly.

Q: (L) How can warts be connected to genetics?

A: Progression to 4th density.

Q: (L) Why does it have to be so hard?

A: Many things are. Backaches, for example.

Q: (L) Backaches are one thing, but warts are very unpleasant.

A: Unpleasant is subjective.

Q: (L) How does D__ get rid of her warts?

A: Not the point.

Q: (L) What is the point.

A: Natural progression. Warts are not the issue. All have symptoms, but not all are the same.

Q: (DM) What can I do to get rid of the warts? They make me feel awful.

A: Adjust your feelings.

Q: (DM) Am I getting these warts because I am transitioning to 4th density?

A: All are headed to 4th density. So, what does it matter, remember, transformation is always accompanied by some difficulty.

Q: (L) Is there anything that can be done physically to help D__ with her warts?

A: Can be accomplished, try adjustment of mind and diet. You are missing potassium. You must also adjust your mind.

Q: (L) Adjust her mind in what way?

A: Anti stress measures.

Q: (L) Is this the same thing Mrs. Page needs to do?

A: Help, but not cure.

Q: (L) What will work for her?

A: Compresses.

Q: (L) What kind of compresses?

A: Mud nourished with minerals. Check with horticulturist.

Q: (L) How do we find a horticulturist? Network?

A: Always "Network". Networking is 4th Density STO concept seeping into 3rd density with upcoming realm border crossing.

Q: (DM) Networking is the way to get things done from 3rd level into 4th level?

A: Coming from 4th level into 3rd because of influence of wave.

Q: (DM) So, each of us has a skill that we develop and help each other. (L) We are all part of a body.

A: This is the way lives in STO! D__ on board, V__ write. V__ not to feel bad, will return. Please be patient. Hello, D__.

Q: (L) Who has EDDIE Page been abducted by that he says look like us?

A: 4th density Orion STS.

Q: (V) Well, he is under the impression that it is the Pleiadians. Why does he...

A: All can create false impression.

Q: (V) Well, he is planning in 6 months to leave his family and the planet and heading off toward the Pleiades.

A: Free will.

Q: (V) So, his free will is going to propel him into the Pleiades?

A: Your free will propels you always.

Q: (DM) The Pleiadian he talks of is his father, is this correct?

A: No.

Q: (DM) Are you saying that he is not a hybrid, is this correct?

A: If he chooses to be hybrid, then that is his choice.

Q: (L) Are you saying... (DM) How can be being a hybrid be a choice?

A: How can anything?

Q: (L) You mean it is a subjective choice to perceive that way?
(DM) Is his father a Pleiadian?

A: No.

Q: (L) Why does he think is father is? (DM) Is he giving false information?

A: He believes what he is saying.

Q: (DM) So, what he is saying, he believes to be the truth?

A: Yes.

Q: (L) But, is it the truth?

A: It is, but on what level? That is the question.

Q: (L) On what level? (DM) Is this 5th density?

A: Okay, time to learn... {groans of dismay} The past and the future are all in the present!

Q: (DM) So, we are talking about different levels all at the same time...

A: But you know that by now, D__.

Q: (L) Okay, at some level... (DM) Are all of his levels together, now?

A: Integrating.

Q: (DM) So, he is integrating into one, is this correct?

A: Close enough.

Q: (DM) Does this mean that, as soon as he has integrated, that he will leave this planet?

A: If he chooses.

Q: (DM) And he will choose, is this correct?

A: Open.

Q: (L) Well, what worries me is that they are saying the STS guys have ahold of him and that's not good. (DM) Is EDDIE STS?

A: You all are still. You all are moving toward graduation to STO.

Q: (F) We all are still STS?

A: Yes.

Q: (L) Well, I still don't understand about EDDIE... (DM) Would you please explain to me what service to others entails?

A: Complete lack of concern for self.

Q: (L) Well, that's a real tough one. (DM) It would be like being Mahatma Gandhi, is this correct?

A: Closer.

Q: (DM) Then there is no one that I know of that is going to make this?

A: Do you know anyone who is in 4th density?

Q: (L) Of course not. (DM) I'm not sure. (V) So, when we transition from 3rd density to 4th density we lose that need for service to self?

A: If you transition, you are ready to do so if you choose.

Q: (DM) So, it's like an instant thing? As soon as you are ready, you are gone!

A: No. Realm border crossing.

Q: (L) At the time of the realm border crossing those who are of the correct vibrational frequency to transition will do so, as it says in the Bible, in the twinkling of an eye. Almost instantaneously. We are getting ready... you have to be at least a certain level... it all has to do with the coming of this wave...

A: We ride the wave.

Q: (L) Who does EDDIE Page channel?

A: Many.

Q: (L) Many who are what? (DM) Does he channel his father?

A: Not in the sense you mean. All are “father” in some sense.

Q: (DM) So, when he talks to his father he is talking to many because many are the father? So then, are we speaking of his father as being a collection of DNA composite?

A: No. Collection of consciousness.

Q: (DM) The universal consciousness?

A: Close.

Q: (V) A male consciousness?

A: No.

Q: (L) Okay, you say it is not his father in the sense of being a genetic line, is that correct?

A: Okay.

Q: (L) Is EDDIE Page genetically mutated or altered in some way? {He claimed to have two hearts and black blood; however, he never provided any proof of this and when I asked for it, I was considered a heretic.}

A: No. Not in this space time.

Q: (L) So, in other words, what he may be tapping into is similar to what D__ was tapping into in her hypnosis as carnivorous preying mantis beings, another aspect of himself, and he is misinterpreting this aspect of himself as being who and what he is now?

A: Not misinterpreting.

Q: (L) Does he fully understand what is going on?

A: No. Neither do you.

Q: (DM) Will I be meeting some Pleiadians Tuesday night at 10 o'clock? Will they be coming to my house? {Eddie Page told her that the Pleiadians were going to visit her. She gave him a large donation after that!}

A: In a sense. Review concept.

Q: (L) In case you haven't figured it out, this whole operation is a learning process. The Cassiopaeans make us go through all kinds of hoops to get stuff.

A: If you review you learn. Knowledge protects.

Q: (DM) But, am I going to be visited by Pleiadians?

A: Bring D__ "up to speed."

Q: (DM) Okay, then what I can expect is a psychic connection with you if you are connected to the Pleiadians?

A: We only rarely appear as human.

Q: (DM) I am going to have humans come to me Tuesday night and they are going to be Pleiadians?

A: No.

Q: (DM) What is going to be at my house Tuesday night at 10 o'clock.

A: Nice people.

Q: (DM) But are they Pleiadians?

A: Review.

Q: (DM) Will I understand what is going to happen Tuesday when it happens?

A: Keep mind open.

Q: (V) What is it that is supposed to happen Tuesday night at your house? (DM) EDDIE Page told me the Pleiadians were going to visit me.

A: Wait and see.

Q: (DM) Okay, that's cool. (F) Well, it said to keep your mind open and wait and see. (DM) But they are not saying no!

A: Mind is not currently open.

Q: (DM) Why?

A: Expectations are influenced by various sources.

Q: (DM) Then, EDDIE is one of these sources, is that correct?

A: Yes.

Q: (L) Should she be surprised if nothing happens at all?

A: Up to D__.

Q: (DM) I don't think I am going to be surprised. But why isn't my mind open? (L) Maybe because you decided to believe what EDDIE told you, is that it?

A: Open.

Q: (DM) Well, somebody's going to come to my house Tuesday! (L) Well, I am really confused about EDDIE. You say he is being abducted by Orion STS guys. What level of beings are doing this abducting?

A: Has been.

Q: (L) Has he been abducted by other groups?

A: Yes.

Q: (L) What other groups?

A: Grays.

Q: (V) Well, he thinks the Grays are just hunky-dory friendly fellows. (DM) Are the Grays STO?

A: No. Cybergenetic.

Q: (L) Who has told EDDIE that the Grays are good, why is he convinced of this?

A: Many.

Q: (DM) Am I channelling this?

A: Starting to.

Q: (DM) Have I been channelling the questions too?

A: S__ is okay.

Q: (DM) I have been wanting to ask questions about S__.

A: On your mind. Ease up.

Q: (DM) Am I being too controlling?

A: Yes and too concerned.

Q: (DM) Is her boyfriend into drugs?

A: Has been.

Q: (DM) Is she into drugs?

A: Not at the moment.

Q: (L) Is it true that this is S__'s choice and S__'s lessons?

A: As with all.

Q: (DM) Is her father influencing her actions?

A: No.

Q: (DM) Does he have any intentions of doing that?

A: Intentions are transitory.

Q: (DM) Are there any actions I can take that will be beneficial for S__?

A: Open. Free will.

Q: (DM) Am I going to have a problem with her father before October?

A: Okay now. Worry no more.

Q: (L) Can we ask about J__ Reed?

A: Why so much interest in individual students?

Q: (L) He is a student?

A: All are. Us too.

Q: (DM) Everyone has a creator.

A: We are not creator any more than you are. We are all creator!

Q: (L) D__ was telling me on the ride over about EDDIE Page telling her about an event that happened to her when she was a child. She perceived this as a demonstration of psychic ability and therefore goodness. Can you tell me how, if he is being influenced by the STS guys, how he can have this psychic ability?

A: All have ability, it just depends on how it is used.

Q: (L) Was EDDIE Page killed in battle? {In Viet Nam – his claim to fame; that he died and was saved by aliens.}

A: Yes.

Q: (L) Was he revived by aliens?

A: Yes.

Q: (L) Who revived him?

A: Orion STS.

Q: (L) What was their purpose in reviving him and restoring him to life?

A: Purpose already determined.

Q: (L) And that is...

A: Many faceted.

Q: (L) What is the primary purpose?

A: Complex.

Q: (L) We know it is complex, give us one...

A: Very important for all to review, what happens at realm border crossing?

Q: (L) We transition to 4th density, is that correct?

A: Partly.

Q: (L) We either choose to transition as STS or STO, is that correct?

A: Partly.

Q: (L) And we do this based upon knowledge, is that correct?

A: Partly.

Q: (L) And EDDIE Page has been given a certain...

A: What do STS 4th Density intend to do?

Q: (L) The 4th level STS beings intend to set things up so that they can rule us and feed off of us in 4th density. They want to bring everybody over to their way of thinking and their domination so that we will give them our energy and give up our free will... (DM) So, we are being set up. (F) Well, that is part of it. Don't you remember the battle that is supposed to ensue that has already begun at some level, and this will determine, in part, whether we will be STS or STO, which also is known at some level... (L) Has EDDIE Page been subverted and programed to lead people astray?

A: No.

Q: (L) Well, then I don't understand.

A: You are reading into situation.

Q: (DM) What is it that she is reading into the situation that isn't there?

A: Page is experiercer, you are witnesses, that is all!

Q: (L) What is he experiencing?

A: We have told you already.

Q: (L) What he is experiencing is... (DM) We are watching him put himself all together. (L) Is this what we are witnessing, him integrating?

A: Yes.

Q: (L) He is integrating, we are witnessing. He is integrating... (DM) He is putting himself together at all the different levels... there isn't anything more. (L) Is this true?

A: Yes.

Q: (L) Well, in another session we were told that a lot of what

EDDIE Page is saying is disinformation designed to take people in, is that true?

A: Yes.

Q: (L) And what is the source of that disinformation?

A: Orion STS.

Q: (L) Are they trying to, to put this in plain terms, are they trying to “take his soul?”

A: No.

Q: (L) Are they trying to win the battle in terms of dominating him in 4th density?

A: And you and all others.

Q: (L) Well that is pleasant...

A: We have told you this before, knowledge protects, ignorance endangers.

Q: (L) How does one...

A: All knowledge is good.

Q: (L) How can one, such as EDDIE, defend himself against beings of such superior capabilities of mind control, that they can literally put thoughts in his head; I mean, what chance is there for anybody?

A: He has participated in process.

Q: (L) So, at some level he has chosen the STS pathway, is that what you are saying here?

A: Yes.

Q: (L) And part of this STS pathway is just going off and leaving his family, is that it?

A: Close. But please don't read into situation. Open your mind.

Q: (DM) Is this just something that we are going to have to see in the future?

A: Okay. Get to know Page.

Q: (DM) In what respect.

A: Open your minds. He is experiencing, you are witnessing. Just watch and see. Look, listen and learn.

Q: (L) Okay, thank you and good night.

A: Good night.

END OF SESSION

2.34 December 23, 1994

Frank, Laura, DM

{DM appears in a number of sessions. She is a middle-aged high school science teacher, divorced from a college professor husband, with a highly disturbed teen-aged daughter. She is mentioned in the Wave as the individual who, under hypnosis, saw preying mantis type beings eating small children.}

Q: Hello.

A: No ritual.

Q: (D) Explain, please?

A: No ritual.

Q: (F) Did somebody do a ritual? (L) No. Did you do one in your mind, DM? (D) I just rubbed my hands together. (L) No, I don't think that is what they are talking about. It's because we were talking about rituals and why we don't do them. Okay, why did you tell us "no ritual?"

A: DM. Caution.

Q: Tell DM, please, why we don't do rituals.

A: Rituals constrict. Who are we?

Q: What is your name, please?

A: Oplea.

Q: Are you a discarnate?

A: No, Cassiopaeian.

Q: Let me ask you about your spelling of the word "Cassiopea." It is the archaic spelling of Cassiopeia, but not the one currently used. However, the last part of the word, as you spell it, is the word Paean, which is a "warning" sound or an announcement or message. Something that calls people to attention. Is there any chosen symbology in your use of this spelling.

A: No, but nice analogy.

Q: (D) I want to thank you very much for the advice you gave me. It was something that was very much on my mind and your advice probably saved my daughter from running away.

A: You are welcome.

Q: (D) I want to impose on you, and I hope you don't mind. S__'s father has influence on her; is he someone I need to warn her about? {Asking about her daughter}

A: Worry not.

Q: (L) Does that mean that the less DM says, the sooner S__ will figure things out for herself?

A: Open.

Q: (D) Will be S__ be okay by herself if I leave the state?

A: You're not leaving.

Q: (L) Well, that is a pretty definite statement. Is she going to get... (D) Do you have a use for me here?

A: Your use is your pathway of learning.

Q: (D) My pathway... I am not understanding... (L) In other words, they may not specifically have a use for you in the sense of being used, but your pathway of learning is what you are here doing. (D) I am supposed to be learning and I'm supposed to stay here until I learn?

A: Yes. Everyone is always learning.

Q: (L) Why do you say she is not leaving. That is a pretty definite statement and you guys don't usually make real definite statements like that?

A: Because she is not.

Q: (D) Am I to be working with E__ P__?

A: Wait and see.

Q: (D) I have felt that I was going to sell my house and would be doing something significant and that would be in North Carolina... (L) Well, maybe you will end up in North Carolina. I wanted to go to Montana and I ended up on Montana Avenue. I guess that is as close as I am going to get.

A: Pressing does not work.

Q: (D) Well, I was trying to press things. (L) I was a presser too, and still do from time to time, but it never works... I'm learning to let things happen.

A: House sells, but move isn't far. How do you like New Port Richey?

Q: (D) Well, I don't know there is a position open or opening and I do know the people over here and...

A: Bingo!

Q: (L) Well, why don't you tell Frank and me stuff like that? Am I going to sell my house? I want to move too!

A: We tell that which needs to be told.

Q: (L) Well, DM gets told stuff and I don't. That's not fair...

A: Yes you do!

Q: (L) Would it be a good idea for DM to get the Reiki initiation?

A: Up to DM. You are pressing again.

Q: (D) Well, I understand that Laura wants me to and she has given me the reasons. What I do is listen and assemble the information... probably I will.

A: You know. You are soft spoken.

Q: (D) I discovered that if I put vitamin E oil on my warts it stopped them from itching...

A: Potassium.

Q: (D) Yes, I am eating bananas! I put some antibiotic oil on them also, and then I could scratch off part of it and it stopped itching so much. I am sure the potassium did help. I have been eating bananas. (L) Well, we were talking earlier about all the

synchronous events that happened during the year prior to the beginning of this contact, and I would like to know if those events were, in part, engineered by you guys?

A: Open.

Q: (L) What was it that caused the repeated swelling of my eyes and other soft tissue of the body?

A: Learning comes with discovery.

Q: (D) You were discovering. You were being led. (L) Oh, see what they are saying. (D) Just like I am being led to live here and work with you. (L) Is DM part of the conduit?

A: You will see. Forum first.

Q: (L) Is DM part of the conduit?

A: You will see.

Q: (D) That means yes. (L) In the forming of this conduit, is the conduit not only something that brings energy into us, but also through which we can travel into other dimensions as well? Does it go both ways?

A: Learn by discovery!

Q: (L) In other words, do it! We got the program loaded for the computer net, which you told us once we got online our lives would change suddenly and dramatically. (D) Are we not quite ready for this?

A: Discover.

Q: (L) You told us that if we created the maze in the yard and walked it, that it would change our vibrations to the point that we would be able to see you, if we did that as a group, what would be the result?

A: Same.

Q: (L) Would a group moving in that energy format create a greater energy than, say, a single individual?

A: Yes.

Q: (D) So, what if we had a lot of people do that? (L) They told us that this was similar to what they did at Stonehenge, that walking a pattern like a maze design would concentrate energy. A spiral. (Planchette demonstrates by moving in a gradually expanding spiral which then gradually got smaller.) Are you demonstrating the pattern that should be used?

A: Cycle.

Q: (L) Would this do a lot to empower us as well as hasten the bundling of the DNA?

A: Wait and see.

Q: (L) In other words, you just want us to do things, to get moving on these projects, get these transcripts organized, get the maze built, do our spinning...

A: We want you to do what you will do.

Q: (L) Well... (D) Thanks a lot... (L) I guess that is what it comes down to: get free, get happy...

A: Above all learn.

Q: (D) Is there something we can do to help other people?

A: Access instincts, network.

Q: (D) Are you talking about the computer network?

A: In general.

Q: (D) Now, wait a minute. They may mean networking people and their uses. (L) Does network in general mean, as DM says, contacting people, spread the word, bring others in, along that line?

A: Why S__ so many viruses?

Q: (L) What do you mean? Who has so many viruses?

A: S__.

Q: (L) Well, does S__ have a lot of viruses? Why does S__ have so many viruses?

A: We asked you.

Q: (D) Well, she's having her tonsils out Tuesday. I don't know why.

A: Have you not noticed?

Q: (D) Well, I hadn't put things together. (F) Is it true? (D) Yes, she does. She has, different kinds of viruses... (L) Well, are you going to give us a clue on this one?

A: Emotions reflect in physical body.

Q: (L) What is the nature of her emotional upset?

A: (D) It's her father. Is it her father?

A: No.

Q: (L) What is it? (D) Has she been abducted?

A: That is not the point.

Q: (L) What is the nature of her emotional viruses?

A: Complicated but, mother-daughter soul connection is unusually strong in this case!

Q: (L) How many lifetimes have DM and S__ had together?

A: 59.

Q: (L) Well, that's high. (D) Let me tell you something, the last time I killed her...

A: Twins.

Q: (L) Which one of...

A: Last was tragic.

Q: (D) I killed S__... (L) Could you tell us the dynamics of that last lifetime that are so strong...

A: DM reveal.

Q: (L) Should DM do this through hypnotherapy?

A: Okay but has done work already.

Q: (L) What could DM have done for or to or with S__ in the lifetime that is most heavily affecting this lifetime, to have resolved the issue then?

A: Not important, this one is!

Q: (L) What does she need to do now?

A: On right path since Tuesday.

Q: (L) What did you do Tuesday? (D) Tuesday... (L) What happened Tuesday that was so significant?

A: Discover.

Q: (L) Does it have something to do with the roller blades DM bought S__ Tuesday?

A: Now you are learning, so we will help. Now you see?! She needs the childhood she never had.

Q: (L) Why did she never have a childhood? (D) Because she was sexually abused by her father she always felt that she had to be the grown-up; she had to be between her father and myself; she had to pull everything together. She always felt that responsibility and she... oh! I see! Thank you! I took her shopping. We went to the mall. She saw things that she didn't get when she was a kid and I explained to her that now she wasn't a kid and she couldn't really enjoy those things but she could enjoy the things that would be more her age level. She got down and saw little doo dads that she always wanted. (L) Well, get them for her. Can you? (D) Yes! (L) Is that the answer? Give her the childhood things?

A: Continue...

Q: (D) I'll go down and buy her those things tomorrow.

A: Okay. Childhood is stepping stone to spiritual growth in each lifetime.

Q: (D) I want to thank you!

A: We are helping you with this because you simply must resolve this issue before you can properly progress to important work, see?

Q: (D) I have to solve this... (L) They just told you that you had important work to do which is pretty close to a prophecy... am I correct on that, that she has important work to do and that you have plans for her?

A: Yes. DM has been "discombobulated".

Q: (L) You have been discombobulated? (D) I can handle that. (L) Is there anything else you can add to help solve this issue that maybe we haven't asked? (D) I think I just need to enjoy my daughter rather than trying to control her...

A: Now you are on the right path.

Q: (D) I haven't been talking against her father and I have been telling her, encouraging her... I have been forgiving him... and I told ____ today that I found out from S__ that her father is the one who took her to get the abortion, and he paid for it, and I said something about mixed feelings, not everything is bad. There's something good in everything, and I referred her to different parts of different books... Page 29 in the Ra Material, and not showing the anger... and that is what I have been doing: showing anger, getting that emotion out and feeding the Lizzies... and getting wrinkles and gray hair and growing warts... and warts?

A: Yes.

Q: (D) They said to get rid of stress situations. (L) I would almost say that what you just learned was that a lot of your stress is self generated... (D) exactly... my hat is off to you guys, I thank you...

A: Now DM, do you still want to move to North Carolina?

Q: (D) No. That's cool! Thank you very much. I don't need to flee! I can stay. (L) I guess that is what you needed to be here tonight for. (D) And I thought that I was going to help mankind and I got helped...

A: This is only the beginning of this work!

Q: (D) How can I thank them?

A: Not necessary because we are working together.

Q: (D) I also started telling S__ about spirituality and God and things like that, and I told her that what you first have to understand is there is no such thing as sin... (L) It's all lessons... (D) There is no such thing as sin and then I named all the negative emotions and said that what we need to do is have a lot less of that and more of love, caring, sharing and that kind of thing...

and she really listened! So, I have started teaching her. And, I want her to have something to... Oh!, here's a good question: Could you help me out and guide me into what book would be good for S__ to read?

A: No, this is up to S__. It is all just lessons for each individual. That is all there is, nothing else.

Q: (L) I guess it is like dancing, you follow the signals and the music to know what step to do next. Take your cues from S__.

A: There is nothing, repeat nothing, but lessons.

Q: (L) I guess it is a big laboratory and we are the guinea pigs...

A: No, everything that exists in all of creation is a lesson, there is no laboratory.

Q: (L) Sorry guys. (F) So, absolutely everything is a lesson. (L) Let me ask this: On Tuesday when DM was reading and fell asleep, did she get a visit or a contact from any source?

A: Hypnotize her to access this information.

Q: (D) Was there something pertinent that happened that night?

A: Discover.

Q: (D) Okay, so we should discover through the hypnosis. (L) Did the Pleiadeans come?

A: Laura, you are such a card!

Q: (L) Well, I thought I would try to sneak that one by them. Let me ask: On the night the big black boomerang came over my house, was I or one of my children abducted?

A: Why do you think you learned hypnosis, to put it on the shelf for a conversation piece, maybe?

Q: (L) Are you saying that I need hypnosis myself?

A: Others. Children will have answers.

Q: (L) Oh, good, that's clever! I never thought about that. Okay, that's how I'll find out. It's too simple. I'm beginning to feel brain dead. Why have my eyes been bothering me so much for the last year?

A: Eyes do that on 3rd density.

Q: (D) I have been having similar problems. (F) I have been getting near-sighted in the last year. (L) Anybody got any questions? (D) Not me, I just had a huge, huge problem solved in just a few words... what else could I want to know? But, there is something... DM N__, how does he fit in my life?

A: Open.

Q: (D) Is he a good guy? (L) They are not going to tell you that.

A: Subjective.

Q: (L) I guess it depends on your point of view. I'm sure Hitler thought he was a good man. That is subjective. Good and evil are subjective. (D) Would he and I be compatible?

A: Discover on your own. Free will.

Q: (L) Well, there is a way you might be able to find out something. Since all minds are one mind, the Cassiopaeans don't mind telling you what another person thinks or how they think. What does DM N__ think of DM?

A: Jumbled thought patterns.

Q: (L) Is this DM N__ that DM has met, is he the same David Navarra that Sally B. was acquainted with in St. Petersburg?

A: How many are there with that name?

Q: (L) Well, there are probably more than one, but I don't think all of them in this area would be involved in the metaphysical community. That would narrow it down. Was Sally B. accurately reading the situation when she said that the DM N_ she knew was a little hung up on sex?

A: Many are.

Q: (L) Okay, what are David N_'s intentions toward DM?

A: Open.

Q: (D) Would he like to get me in bed?

A: We might ask the same question of you.

Q: (L) What are your intentions? (D) I don't have any intentions until I find out whether or not he has good intentions. I am not going to jump in the hay with anybody unless I find out that they really care for me. So, that is why I am asking.

A: Okay.

Q: (L) I don't think they are going to help you out on this one. The closest we are going to get is that he has jumbled thoughts and he is probably the same guy Sally knew.

A: The "bedroom" is not our specialty.

Q: (D) Not mine either, fortunately or unfortunately. (L) Well, let's ask about J_ R_, has he read the transcripts all or in part, and, if so, what is his reaction?

A: Dreamy person.

Q: (L) What do you mean by dreamy? He dreams a lot?

A: Self explanatory.

Q: So, "dreamy person" is his reaction to the transcripts?

A: Dreamy person is he.

Q: (L) Does this mean that he lives in the world of dreams and not reality? (D) Or, is he someone who initiates his thoughts in the dream state?

A: We are merely relating our observations.

Q: (L) Has he read the transcripts?

A: Some.

Q: (L) What did he think in reaction to them?

A: Went into dream state.

Q: (D) Oh, he was reading it and it hit something? (L) Is that it, what DM is saying?

A: Maybe.

Q: (D) Well, it hit something and he went off into a dream. So, it hit some of his reality. (D) I want to ask some questions about M__: will she and Eddie Page reestablish communication? (L) I didn't know they were on the outs. But, I don't know either of them well enough to ask questions. (D) Well, apparently the story is that M__ told someone else that Eddie was having affairs with other women and it got back to E__.

A: People have shortcomings.

Q: (D) Will they get back together?

A: Open.

Q: (L) Did M__ relay a falsehood about Eddie? (D) Eddie said she did, anyway.

A: Subjective.

Q: (D) She said that Eddie had mistresses.

A: That is not important.

Q: (D) Well, that is okay. (L) On the day that we saw Eddie, I guess it was last Saturday, he told us that he had been abducted three days before. Was this a physical abduction or was it a Virtual Reality abduction?

A: It was the latter.

Q: (L) Of the many abductions he claims to have experienced, how many are of the VR type?

A: Half or thereabouts.

Q: (L) In a Virtual Reality Abduction, does any part of the person actually leave and go into another dimension?

A: Soul replication.

Q: (L) So, a replica of their soul, like a shadow of the soul, so to speak, like maybe a holographic part of the soul gets moved into another dimension and experiences events; is that what you mean?

A: That is close.

Q: (L) So, when a person experiences a Virtual Reality Abduction it's virtually real in the sense that it happens to them on some level, or to some part of them?

A: It is real.

Q: (L) But, their physical body is not being abducted and going anywhere?

A: The original does not.

Q: (L) Well, that's intriguing. (D) Is that like... (L) It said soul replication...

A: Think of photo copier, similar concept.

Q: (L) A photocopy? So, half of Eddie's abductions are Virtual Reality Abductions...

A: Yes.

Q: And the other half are actual physical abductions?

A: Yes.

Q: (L) Who is he being abducted by, I know we asked this before, but I want to clarify something...

A: Orion STSers.

Q: (L) And what level of density are these abductors who abduct him?

A: 4th level.

Q: So, the 4th level Orion STS group abduct Eddie Page. What do they look like?

A: They rearrange appearance.

Q: (L) Well, to look like what? He perceives...

A: What ever is anticipated by the abductee.

Q: (L) Well, he told me they were beautiful. (D) His father is one of them, he says. Beautiful people, the way I see it, means from the heart... not like physical beauty... (L) Does he perceive them as physically beautiful?

A: That is subjective.

Q: (L) And, since you say that they rearrange their appearance, in their natural state, before they are rearranged, what do they look like?

A: Natural state is variable.

Q: (D) Are they robots?

A: Some.

Q: (L) What do the robots look like?

A: Grays.

Q: (L) Okay, what do the other ones look like? (D) Are they 12 ft tall robots... (L) I get the feeling they don't want to answer this question...

A: 3rd density thinking.

Q: (L) I'm sorry. I guess you just want us to learn by this exercise, is that it?

A: Review material.

Q: (L) What do the 4th density STS Orions look like? I know what the answer is... are they Lizzies?

A: Some.

Q: (L) So, Eddie Page is getting hauled out by the Lizzies and the Grays and they make themselves look and seem nice to him, is that it?

A: Laura, 3 and 4 don't jibe.

Q: (L) Are there 3rd level Lizzies?

A: All these are 4th who sometimes travel to 3rd rules are totally different in 4th density have you not grasped this yet?

Tape runs out. We decided to stop at this point as we were tired.

END OF SESSION

2.35 December 28, 1994

Q: Hello.

A: Hello. Wonderland.

Q: (L) What does “Wonderland” have to do with anything?

A: It just popped to mind.

Q: (L) Since this happens from time to time, an odd word or phrase pops to mind as the connection is made, is this because that particular thought is occupying the point in space\time where the connection is made?

A: Laura, such an active imagination you have, my dear!

Q: (V) I think they just mean they see all the Christmas cheer and so forth... (L) Well, why do these little phrases just “pop” in... ? It’s curious.

A: Why not?

Q: (L) Who do we have with us tonight?

A: Rollaea?

Q: (L) Haven’t you been with us before?

A: No. And yes.

Q: (L) Well, we have two or three things on the agenda tonight. The first thing I would like to ask for Suzanne Konicov...

A: Where are we from?

Q: (L) I’m sorry, where are you from?

A: Cassiopaea. If you don’t ask, how do you know who we are?

Q: (L) Well, good point. If you were the Lizzies and I asked, wouldn't you answer that you were the Cassiopaeans to deceive me?

A: They would not.

Q: (L) Well, aren't they telling Eddie Page that they are the Pleiadeans?

A: Not Lizzies.

Q: (L) Okay, who is telling Eddie Page that they are the Pleiadeans?

A: Orion STS.

Q: (L) Well, if you were Orion STS and we asked who you were, wouldn't you say you were the Cassiopaeans?

A: No. Pleiadians. That is "trendy" thus deceptive.

Q: (L) Back to my question. Now, at one point in the transcript of past sessions you said that you could not help the Jews or the Native Americans who called upon you, and yet, you say that when we call on you that you can help us. What is the difference?

A: Did not say that, review transcript now!

Q: (L) Well, what I remember is that I asked if our race was going to be wiped out by the Lizzies and the answer was "Maybe." And then... well, I'll get it out now... okay, it says here; "We don't want to be abducted, can't we stop it?" And you answered: "Not likely, they have more power than you." Then I asked: "Why can't you help us?" and you answered: "Would interfere in natural progression of your race and theirs. The Jews called upon us to save them and we could not. And the natives of your land called upon us and we could not save them from your race. We could not stop that either. It is natural progression, see?" And then I asked:

“Are we going to be wiped out by aliens as part of this natural progression?” Answer: “Maybe...” Okay, so, in a sense, the question related specifically to stopping abductions and you said no, you could not stop that and you said that you could not save the Jews or the Native Americans because it would interfere in Natural Progression... yet you said you could help us individually if we called upon you for help... What is the difference?

A: We cannot interfere to help, knowledge protects, ignorance endangers. You can help yourselves to gain knowledge, we can be the “conduit.”

Q: (V) So, that is a misinterpretation on all our parts of what this help might or might not be? (L) We have a couple of other things that we have been discussing here this evening that I am sure that we all want to know about. The first thing is: Could we have a little reading for our friend Sandra D. who has been in the hospital. What is the root of the problem and how can we help her or how can she help herself to get better?

A: Sandra has chosen her karmic path. Her problem is manifesting in several locations: heart, weight affects all other organs in the body.

Q: (L) Does Sandra have attachments causing physical problems?

A: Not the issue. Physical reflection.

Q: (L) If she changes her diet will her health improve?

A: She will improve only if she chooses to. We cannot interfere, but she could always choose to explore her subconscious, but we must warn this will be a “tall order.”

Q: (L) Now, before Frank arrived, V__ and I were having a discussion about physics and psychology and it is my understanding from experience and study, that emotions, as human beings

term them, are related to physiology, to chemicals, and can be controlled by thoughts. And, that if we choose to change our emotions, we have only to change our thinking. Is this correct?

A: Partly.

Q: (V) What you are saying is true, and that is all fine and dandy, but how many of the population can do that? Would even believe that they could do that? (L) Not very many. Less than ten percent. (V) Well, then, how does the definition...

A: That is not the issue?

Q: (L) Well then, what is the issue?

A: Karma.

Q: (L) Are emotions that are carried over karmically, do they affect the physical body that they come into in a chemical way...

A: Can.

Q: (V) So Laura's hypothesis that all emotions stem from chemicals is not necessarily true as an exclusive statement?

A: Okay.

Q: (L) Does the soul have emotions of its own as we human beings term emotions?

A: Close.

Q: (L) What emotions does the soul experience?

A: Complex.

Q: (L) Can the soul, at an absolute level, experience hatred, for example?

A: Not same state.

Q: (L) Well, when one is dealing with psychology, what would be the best approach... what is the true aspect of the self or the being that one should inquire into in order to heal?

A: Subconscious mind.

Q: (V) Is the statement that psychology studies emotions, is that a fair statement?

A: No. Subconscious is same in body or out.

Q: (V) The subconscious is part of the soul?

A: One and same.

Q: (V) Is the higher self the same as the soul and the subconscious?

A: Yes.

Q: (V) Please define true psychology for me?

A: Half.

Q: (L) What do you mean by half? What is the half?

A: Half spirituality.

Q: (V) Do you think that the spiritual part put together with the subconscious part is a good way to approach psychology as I have been planning?

A: Be careful of “influences,” you are easily influenced.

Q: (V) Is this directed at me and my idea of spiritual psychology?

A: Yes. And no.

Q: (V) What influences?

A: Any.

Q: (V) That is kind of open, isn't it? (L) Well, you never answered the question about "true" psychology. You only said "Half." What is true psychology? Is it the investigation of the subconscious mind?

A: True psychology only half.

Q: (L) And what is true psychology, a definition? Was it as I said, an investigation of the subconscious mind?

A: Physiologically directed study of mind.

Q: (L) The effects on the mind of the physiology, the hormones, blood sugar levels and so forth, input and output of the various organs and how that can affect the thought processes, is that correct?

A: Close.

Q: (L) And that is half of it. What else?

A: Spirit is missing half.

Q: (L) And what would the person who is working on the spiritual half of it focus their energies on? Would it be techniques of meditation, understanding the nature of the universe, would it have to do with physics, what area?

A: Apples and oranges.

Q: (L) All of those things are apples and oranges compared to the spiritual application of psychology that you intend?

A: No. Spirit has nothing to do with psychology as you know it.

Q: (L) But, in this theoretical psychology that you are telling us about, how would you fit the spiritual aspect into it?

A: Totally restructure theory.

Q: (L) Okay, and how would you present this totally restructured theory?

A: Much too complex.

Q: (L) In the discussion of psychology that we have had here, obviously you think that there is something about the way you have discussed it that V__ has missed or would miss because of influences from other sources, is that correct?

A: Yes.

Q: (L) In terms of these sources that influence her, by what means of her system, her organic or spiritual system, do these influences tap into her being?

A: Visual and auditory.

Q: (L) Okay, so she sees things and hears things that influence her, is that correct?

A: Yes.

Q: (L) And where does she usually see or hear these things?

A: Scholastic.

Q: (L) So, these are scholastic things that you are talking about. She hears and sees things at school that influence her, that you say these influences are not going to be helpful in what she is ultimately trying to achieve, is that correct?

A: Bingo!

Q: (L) These things that she sees and hears, are they people and words that the people speak, or are they images such as film images, or just general...

A: All of the above.

Q: (V) Okay, now listen guys: if I don't go to school to get an education, and, in other words, to get the degree and get the credibility, then how am I going to be able to do any work? (L) Did you ever think that the people you would want to work with wouldn't come to anybody with a traditional degree?

A: Laura, let us answer.

Q: (L) I'm sorry. I'll butt out.

A: Why do you think you need a degree?

Q: (V) Well, the professional world here on planet Earth is built around degrees. I'm sure you are aware of that.

A: Incorrect!

Q: (L) People with degrees are in bread-lines... I'm sorry... I'll shut up. (V) Well, my goodness... so then I...

A: Disinformation cleverly and carefully orchestrated.

Q: (L) For what purpose?

A: To mislead.

Q: (V) To mislead in what way? What am I being led away from?

A: Not just you.

Q: (V) All psych students are misled?

A: All humans.

Q: (L) Are you saying that the public school system, including the college system, is deliberately designed and implemented to fill one's brain with false knowledge, to perpetuate Lizzie rule?

A: Close but this manifests at lower levels too.

Q: (V) Well, let me ask this question... is this the only species in the universe that studies this concept of psychology? Are there psychologists in Orion, are there psychologists in Cassiopea?

A: Narrow concept.

Q: (L) What do you mean it's a narrow concept? (V) I mean, I mean... (L) Do you understand what they mean? (V) No, but what I mean is are we the only thinking, intelligent, types of people that... (L) I don't think that's what they meant to imply. (V) Well, it's not coming out right. You know, I sit here and I try and put things into words and it's so hard...

A: Expand your mind.

Q: (V) I'm trying to. (L) By what means?

A: Less prejudice.

Q: (L) Bet you never thought you would be called prejudiced, did you? (V) Prejudice about what? I don't think they are talking about blacks and whites... (L) I know, but there are other kinds...

A: The universe is an infinite illusion.

Q: (V) Jesus Christ! You guys...

A: We are not Jesus Christ.

Q: (V) That was just an exclamation... (L) They know that. I think they are being funny. (V) Ha, ha. Well, then, I guess... okay, when you say the universe is an infinite illusion, then why not close the eyes, lights out and the illusion is over?

A: Stop focusing so narrowly and rigidly.

Q: (V) Now, I don't think that's fair because I sit around all the time not focusing on narrow... (L) I know nothing! They already

told me to shut up! Alright, you guys, you better help V__ out here because she is losing it... (V) Well I'm, I'm...

A: Blast your mind open.

Q: (V) Alright. You guys have said you are with us at all times, then you must know that I constantly am thinking about the possibilities... not even to think about possibilities, just accept that there is endless, boundless possibilities and move forward every day from that point of view?

A: That's a good start.

Q: (V) Well, if I have as open a mind as I do, I mean, I think I have a pretty open mind, what do you guys consider an open mind? Does anybody sitting here have the ultimate open mind? (L) Don't include me in this... I don't want them starting on me! (V) No, I mean how... as 3rd dimensional beings, how open can our minds be? Can you not tell that I am trying?

A: You are moving to 4th level, but all are not at same level of progression.

Q: (L) Are you saying here that V__ is much farther along than many people?

A: No.

Q: (L) Well, are you saying that she's got a good start? (V) Am I doing... let's put it this way, if I am moving on in my progression, what are the most critical things that I am doing in my moving and my progressing to move faster, that's making it happen? What are the key things that I do...

A: Association with individuals who speed your progress.

Q: (V) And naturally, that's Laura and Frank, correct?

A: Maybe. That is up to you.

Q: (V) Okay, association with individuals who speed my progress, that's one of the things that I do right, that's what you said, right?

A: Okay.

Q: (V) Is that the only key thing that I do?

A: Learning involves discovery.

Q: (V) Alright... So then, am I wasting my precious time going to school to get a degree in psychology?

A: Open.

Q: (L) I just think if going to school makes you happy, do it, but don't take it too seriously. (V) Are you saying that I can be so influenced that I ...

A: Influence comes not from experience but belief.

Q: (V) Well, if you guys hadn't just instilled within me that what I am doing, my education, is also being highly influenced, then would I ever have had the belief that you are talking about? Are you part of the influence? (L) What are you saying here? (V) Influence comes not from experience but belief... I didn't have a belief before this that I could... (L) Okay, in other words you have warned her about influences therefore, it is now okay for her to continue on her daily path as it is currently set up because she has been warned and is aware, is that correct?

A: Close.

Q: (V) My understanding is that the whole psychology thing, you know because Frank pooh poohs it all the time, and its that even though the teachings of Freud and all the others, Erikson, Horney and so forth, may not apply to the whole universe, they do apply to the species as a society...

A: Application is subjective.

Q: (L) So V__ is okay to continue along her current path, and there are a lot of benefits she is receiving from going to school including networking, as it exists for her... (V) Yes, I do a lot of seed planting while I am at school...

A: Okay, but be careful of influences.

Q: (L) Well, I guess that is it. You have the knowledge now and you're loaded for bear.

A: Now, you could gain much more knowledge by independent study and meditation.

Q: (V) Well, the knowledge that I want to gain in psychology and in school, and all of this is in order to help other people grow. (L) I think that what they are telling you is that the knowledge that you want you are not going to get there. That is the whole issue.

A: Why do you feel you need a degree?

Q: (V) Like I said, for credibility. It's also a legal aspect of practicing. You just don't practice...

A: Nonsense!

Q: (V) But you are not going to tell me how I can do this otherwise, are you?

A: We just did, but because you are not yet open, you did not recognize this.

Q: (V) So, independent study and meditation is the true way that I could find how to help other people?

A: Yes.

Q: (V) So, in other words, if it is going to happen, it is going to happen. No need to force the issue, huh? Okay, once this is published

and people start being aware of what we do, what will they be looking for?

A: Everything.

Q: (L) You did say that once we got on the network, things would happen suddenly and dramatically. Now, as you must know, I did have an automobile accident the day after I got hooked up to the network, as you can see. I am put back together now with screws and tape!!! I'm sure I look charming! Now, oddly, as I was driving, just a few minutes prior to the accident, I was thinking very strongly of the fact that you Cassiopaeans were with me and I was saying to you in my mind that I wished you would also go and help my friend, Sandra, who was in the hospital. I was planning on rushing through my Christmas Eve and going to the hospital to give her Reiki. And then, Kowabonga! I got the smash-smacko in the rear. Why did this happen? What did I do wrong? Is this what you meant by "sudden and dramatic?"

A: All happens for a reason.

Q: (L) Was there something I was supposed to learn from this smash-up?

A: If so, learn by meditating.

Q: (L) Is there something about our state of being that we can be sitting there thinking loving thoughts about others and then we get smashed?

A: Meditate.

Q: (V) Is her accident directly connected with getting on line? (L) Well, they didn't kill me, though they tried!

Q: (V) Back to my question...

A: Not necessary to answer.

Q: (L) Is that because I know the answer?

A: Okay.

Q: (L) And my answer is that there is a definite connection between the accident and getting hooked up, is that correct?

A: You explore well.

Q: (L) I think... now, my whole spinal column snapped like a whip on impact and I did have a concussion... and my shoulder is in REALLY bad shape... I am really surprised that they didn't keep me in the hospital longer...

A: You must be a "Whippersnapper."

Q: (L) Are there going to be some really positive results from the computer net? I mean, this is a rather painful beginning.

A: What have we told you?

Q: (V) Well, let's turn it on now.

A: Good idea.

Q: (L) Good night.

END OF SESSION

2.36 December 31, 1994

Q: Hello.

A: Hello. Did you get last message?

Q: Yes, the last message was: We are happy to see more people here.

A: Yes. Say hello to M and Billy, Luanne, Glenn and others. You have visitors in ethereal plane because of holiday get together and we brought 4 here because it is time for exposure. Terry keep up, this is the night for important stuff.

Q: Okay, who needs to be on the board. You asked for Terry, can I trade with DM?

A: Okay.

A: Okay now. DM

Q: (DM) Hi.

A: Ease up on pressure. Very important: this time measurement year represents big changes.

Q: Changes of what sort?

A: Spiritual linked to physical on planet.

Q: I guess you are going to tell us?

A: Terry on board. Keep fingers on.

Q: (T) It's hard, you're moving so fast tonight. Energy's up.

A: Power is explosive. (Many spins around board.)

Q: (T) Well, happy New Year to ya'll, too!

A: We want you all to succeed this year.

Q: (DM) In what?

A: To send messages.

Q: (DM) Thank you.

A: DM easy on pressure.

Q: (T) You guys are moving so fast tonight we have to hang on.
(DM) I'm just trying to keep up.

A: You're correct.

Q: (V) Are you guys ready for a couple of questions?

A: Okay.

Q: (V) This right here I picked up at the Tampa Metaphysical bookstore, (Holds up rock), it is supposed to be a piece of meteorite. What can you tell me about this? I was told that it's used for transformation.

A: Bogus. (Laughter)

Q: (DM) It's funny, the word came into my mind!

A: We are going through you and Frank tonight. Easy, DM. DM sell house this month.

Q: (DM) Yes! Can you give me a day?

A: 19th. Drop price 2,000 dollars.

Q: (DM) I can live with that.

A: You got it.

Q: (DM) Should I drop it or dicker it?

A: Drop it now.

Q: (V) Let's ask about this letter. I received a letter in the mail today that is really perplexing us all. Can you tell me what this letter is about?

A: Third party got ahold of privileged info.

Q: (T) Who is the third party?

A: Amos Sanders.

Q: (V) Is it my privileged information?

A: No. Consortium.

Q: (L) What is the intent of this letter?

A: 3rd party got your bio off files.

Q: (V) What files?

A: Computer grid.

Q: (T) What computer grid?

A: FBI

Q: (T) Has this letter been set up by the FBI?

A: No. Amos Sanders broke into system.

Q: (V) How am I mixed up in this? (T) Who is Amos? (DM) Maybe it's an acronym.

A: New license.

Q: (V) I just got a new license in November. (T) A driver's license?
(V) Yes. (T) Is this the DMV computer system?

A: FBI.

Q: (T) Why is V in the FBI computer system?

A: You all are on file.

Q: (L) Is that "you all" as in everybody in the country or just us specifically?

A: You and others.

Q: (V) Well, what course do I need to contact... the police... what course of action do I need to take with this? This is fraud...

A: Ignore it.

Q: (T) Is this letter a set-up?

A: No Amos is “nuts.” Crazy “genius.” Breaks into files.

Q: (T) The guy mentioned in the letter is “Wilbur”.

A: False name.

Q: (V) So this is in no way... this is not a threat to me financially or in the future legally wise... somebody...

A: But you are on FBI file.

Q: (T) Why is she on the FBI file? (V) Because I know too much.

A: Piano.

Q: (Terry and Laura) Piano? (V) I have a piano debt. Why would that be on the FBI file? (J) What? (V) Is there a warrant out for my arrest? (laughter) (T) Why do they have her on file for a debt for a piano?

A: Tracer. They know all and keep track of everyone and every thing.

Q: (T) Is there more to this than just general tracing of debt and license accessed by a nut?

A: Not yet.

Q: (T) Well why, besides the debt, would they be interested in watching her?

A: Your activities.

Q: (L) In specific?

A: Metaphysical.

Q: (T) The FBI is watching people who are involved in metaphysics?

A: And UFOs.

Q: (T) Well, they always watch us UFO people... (DM) Are they watching people like Eddie Page?

A: Eddie Page file “one.”

Q: (T) What is a file “one?”

A: Top priority.

Q: (V) Well, let’s hope my file is a “200.” What priority is my file?

A: Four.

Q: (T) What is a level “4” file?

A: 4th most important.

Q: (V) Well, what about Frank? (T) Is Eddie Page telling the truth?

A: Some.

Q: (DM) What is he not telling the truth about?

A: Too many things.

Q: (T) So, his story is mostly false?

A: He believes.

Q: (V) Are these FBI files that have to do with metaphysical and UFO business and what have you, are they more than just the government? Are they connected to...

A: Are you listening?

Q: (V) Am I listening? Of course I’m listening.

A: FBI tracks everyone.

Q: (V) Okay, so just don’t worry about it. (T) I can just imagine what my file looks like! (L) The computer systems are so

advanced it is no trouble for them to even know what color toilet paper you buy. (Laughter) I mean, the checker at the store tells what color toilet paper you buy on your receipt... “Scottis-sue:blue”...

A: V prefers green.

Q: (L) Do you prefer Green? (V) Yes, but I have white. (V) Are you telling me I’m supposed to use green toilet paper? (T) They are perfecting 3rd level humor at 4th level. (laughter)

A: Joke.

Q: (T) You’re getting good at it too! (DM) I’d like to know what they look like. (L) Did you read the transcripts? We already asked that. (DM) No, I haven’t gotten to it yet.

A: We are light beings, we are you in the future.

Q: (L) Susanne K. talked to me about Al Bielek. Previously you had said that Al was an agent of the government disseminating disinformation for one thing, number two: that he knew that he was an agent of the government; there’s a little confusion about his participation in the Philadelphia Project; I found a reference to him in an Ivan Sanderson book published some time ago. Susanne says that this poor guy just lives from hand to mouth, and she finds it hard to believe that he is an agent of the government since he lives such a poverty stricken existence. Could you comment, please, on Al Bielek and his activities. (T) Is Al an agent for the government?

A: Al Bielek is many faceted. Poverty is subjective.

Q: (L) Is he an agent for the government. (T) They say he is many faceted.

A: Yes. But he is in involved in activities.

Q: (T) In one session you talked about Al Bielek you indicated he was, um, not actually involved in the Philadelphia Experiment, that he was a technician on shore, and that he is now feeding out information that is provided to him, or that he had knowledge above and beyond his involvement with the experiment...

A: Close.

Q: (T) Okay, if he is working partly with the government and then partly for his own purposes, what is it that he expects to get out of this?

A: Exposure.

Q: (T) What does he want from the exposure?

A: He wants people to know.

Q: (L) Is it possible that he is giving out some true information along with disinformation, so that the information itself can be gotten out, could it be that his intentions might be...

A: Confused thought pattern.

Q: (L) Is that my thoughts or Al's thoughts?

A: Bingo! Laura's.

Q: (T) Does Al know that he is giving out false information... does he know that the information the government is giving him is false?

A: He is so involved you would not believe.

Q: (T) He is involved with the government cover-up?

A: With all of it. He knows that what he is saying is false but he has no choice because he is entangled in the web. They are using him.

Q: (L) Ask about this letter Susanne sent from some source that states that Jesus was a mythical character.

A: No, Jesus was not mythical.

Q: (T) What about this information from this Acharya?

A: Babble.

Q: (L) What is the point of this stuff? It is very well done. Why are they trying to prove that Jesus never existed?

A: Nonsense. It is disinformation. Desinformatzia. Russki.

Q: (T) This is from Russia?

A: No, we were having some fun with words.

Q: Mirth! Mirth! (T) Are any of the people they are copying this to believing this stuff?

A: Some.

Q: (T) Is UFO Library going to print this?

A: Who knows.

Q: (T) Well, I wouldn't be surprised if it is in there next month.

A: There is a lot of garbage in there each month.

Q: (L) Well, this is on a different subject, but, has M ever been abducted by aliens?

A: Yes, starting at age three. Do you remember "ghost at corner window" at 3 yrs old?

Q: (M) I remember something very vaguely. I think I told Frank the story. Something happened and I think I woke up screaming. I saw something. When was the last time?

A: At age 22.

Q: (V) How many times has M been abducted?

A: 23 times.

Q: (M) Will I be abducted again?

A: Yes.

Q: (M) When?

A: It depends on belief center.

Q: (L) I think it might depend on how much knowledge you acquire as to whether you will be abducted again or under what circumstances.

A: Grandfather let you in on secrets of life.

Q: (M) Yes, yes. He taught me a lot and I think that's what they mean.

A: He was a "Priority One Soul."

Q: (L) What is a Priority One Soul?

A: One who sacrifices life's pleasures to teach others. He was your teacher. You are lucky, M. He kept you from "trouble."

Q: (L) Who abducted M?

A: Grays.

Q: (L) What was the purpose of M's abduction?

A: To study his mind. He has a very strong mind and resolve.

Q: (L) Did they put an implant in him?

A: Yes.

Q: (L) And what do they do with that implant?

A: Is monitor. Frequent ringing in ear signifies monitoring activity.

Q: (Frank) Do you have frequent ringing in your ear? (M) Yes. (L) One ear more than another? (M) Yes. It is kind of a tone. (T) Last session when I was here you were giving us information on how to calculate when the wave is going to reach Earth. I was able to plot two of the four for distance, but two were constellations. I cannot plot those distances.

A: Check third most distant star in Cassiopaea and middle “belt” star in Orion, closest star in Leo. Welcome M to the board.

Q: (M) Well, just tell me what to do.

A: Hi, M. We are glad to have you here with us tonight. We have been trying to reach you for 18 years as you measure time.

Q: (M) Why?

A: You are destined just like the others and you know it inside. We have gone to great lengths to reach you. That is why you were brought together with Frank. Do you not remember feeling different back then?

Q: (M) What does that mean? (V) Well, when you met Frank did you feel different? (M) Yes, I guess so. (L) Anybody who meets Frank feel different! (M) Amen! Thank you! (J) I would like to point out that we have all male energy on the board. That is different!

A: You and Terry knew each other in last life, remember?

Q: (M) Well, no, I don't. (V) You would probably remember if you would start meditating. (L) You could have past life regressions. (T) He wasn't that guy that got me with the sword when I was in the British Navy, was he? Those cutthroats?

A: No, but on same ship! This is why you returned to England!

Q: (V) Why you returned to England. Were they brothers?

A: No.

Q: (L) M was born in England.

A: That you returned to sea. You love the water.

Q: (M) I'm confused. (T) So, M and I knew each other in our last life? When was this?

A: 1700's

Q: (T) We didn't have any other lives between 1700s and now?

A: Not for M. He was a sea captain with the same last name. You, M, are your great, great great, grandfather Simon E_____.
(Break for New Years)

January 1, 1995 [Continuation of December 31, 1994 session after break for New Year celebration.]

Q: (L) Who do we have with us tonight?

A: Cassiopaea calling. Sorrna.

Q: (L) And who are our guests?

A: You must network tonight as there are those who are awaiting your message as promised.

Q: (L) Do you mean do the board and transfer it to the network?

A: Open.

Q: (V) Have you promised somebody else that you work through that we will.... (L) No, we promised on the network...

A: You did.

Q: (L) Frank and I promised that we would channel on-line. Yes, we logged on and made the announcement and the next day I had the wreck {auto accident}. I had been promised that my life would change suddenly and dramatically.

A: It is.

Q: (L) My life is changed?

A: Yes. In process.

Q: (L) We want to know who the ethereal visitors are tonight...

(T) And have they left since all the noise started?

A: Mary, Laura, John, Ruth, Terence, Todd, Vance, There's a Ronald.

Q: (L) Is the Laura someone who is related to me?

A: Grandma.

Q: (L) Does anybody else recognize any of those names? (V) I recognize John, my uncle. Are each one of these names like a guide for each one of us?

A: No. Visitors. Attracted by energy center.

Q: (V) Have I had contact with John before?

A: Yes. Uncle.

Q: (T) Am I related to any... (V) My uncle that's just passed on?

A: Yes.

Q: (L) Is Terry related to any of these people?

A: Yes.

Q: (L) Who?

A: Vance.

Q: (T) Who is Vance? (V) Do they have messages for us? (L) Who is Vance?

A: Great Uncle.

Q: (L) Do any of these people have messages for any of us?

A: No.

Q: (V) About 5 or 6 weeks ago I was surrounded by a smell of ...

A: Yes.

Q: (V) It was my uncle Wayne?

A: Yes.

Q: (V) His name was John Wayne... (L) Has D__ ever been abducted?

A: Yes.

Q: (L) When was she first abducted?

A: Age 2.

Q: (L) How many times?

A: 59.

Q: (V__ and Laura) You got the record! (T) How many were physical?

A: Not correct thinking pattern.

Q: (L) In a sense they are all physical? How many of these abductions were virtual reality abductions?

A: Everything is that.

Q: (L) Well, how many of these level 1 abductions?

A: 9

Q: (T) How many were alpha state abductions?

A: Two weeks ago felt “tingle.”

Q: (V) Well, two weeks ago was the night of the party at the book store in Tampa. (L) Okay, has Luanne ever been abducted?

A: Yes.

Q: (L) How many times?

A: 17.

Q: (LE) No way. (L) When was the first time?

A: When lived in red house.

Q: (L) Did you ever live in a red house? (Billy) Yeah, we lived in a brick house. (L) How old were you? (LE) When I was five.

A: 4

Q: (LE) We moved there when I was four right before I was five. (L) Does she have an implant?

A: No.

Q: (L) Does D__ have an implant?

A: She has 4.

Q: (D) Has 4 implants?

A: Yes.

Q: (L) Where are they?

A: In brain.

Q: (L) In her brain? Ar-r-r-gh! (LE) I had lots of allergies. (D) What is their purpose?

A: Monitor.

Q: (L) That's what they all are, monitors. (D) But, why?

A: You are aware.

Q: (L) They want to monitor you because you are aware. (T) They don't have cable... (L) Is Susan going to be here shortly?

A: Open.

Q: (L) We want to know what kind of energy is behind Budd Hopkins?

A: Divergent.

Q: (L) Is he on the right track in his research?

A: Halfway.

Q: (T) Is the Linda Cortile case a set-up to discredit him?

A: No.

Q: (T) Everything that she says happened really happened to her?

A: In 4th density.

Q: (T) Well, all the abduction stuff was in 4 D, but being pulled out of the apartment from the 17th floor or wherever it was, and being sucked up in the beam of the light, that actually happened to her?

A: In 4th density.

Q: (T) How did people in 3rd density see it?

A: Only those who were tuned in saw it.

Q: (L) Were there people there who did not see it?

A: Yes.

Q: (T) What or who were some of the people who didn't see it?

A: Not important.

Q: (L) Now, Whitley Strieber. (T) Can implants be removed?

A: No.

Q: (L) What is the energy fueling Whitley Strieber and his work?

A: Grays.

Q: (L) He is an agent of the Grays?

A: No. Instrument of the Grays.

Q: (T) So, all his writing is compromised by the Grays?

A: Influenced by them.

Q: (T) Well, he says that, too. (L) Well, he now thinks he has learned how to be a companion of God through these experiences.

A: Wolfen reflects Lizzie reality.

Q: (L) Who's read the book, what's it about? (T) I saw the movie but I never read the book. I can't stand his Gothic style of writing. (L) I can't stand to read his stuff either. (T) I only got half-way through *Communion* and gave it up. (L) Well, let me ask, while we are on the subject of writing, is Anne Rice channeling her concepts in her vampire books?

A: She also is influenced by the Grays.

{I didn't like that answer because Anne is one of my favorite authors.}

Q: (T) What about Stephen King?

A: Carnal influences.

Q: (T) He's writing from his cojones, eh? (laughter)

A: Okay, Terry.

Q: (L) Are there any further comments or do you want us to go on line now?

A: Yes.

[break - lively discussion. Someone mentions to V that she projects a lot of sex energy from her lower chakras]

A: V__, do not be offended, we are all learning.

Q: (V) Well, thank you so much for the honesty from everybody in the room, I really appreciate it. (LM) I wasn't being honest, don't blame me. (V) What chakra level is G__ operating at?

A: Chakras are like escalators, you choose your step and rise accordingly.

Q: (G) Well, I was hoping they would give me a number. I don't know much about chakras.

A: Learn.

Q: (T) The whole thing is that we are supposed to learn for ourselves. They will point us in the right direction, but then we are supposed to go out and do it. If you don't learn it on your own, you don't really learn. You have to go out and fall off the log a couple times to learn to walk the log. (V) E- just told me about something that happened. Can you give me some insight?

A: Imagination.

Q: (V) Are the boys fine? Are the boys okay?

A: Boys will be boys.

Q: (V) They thought they saw a witch. (T) Who was she? It was the neighbor lady again. (L) Where was she and what was she

doing? (V) What do you mean over a car that just started? (V) Their imaginations are just going.

A: How do peyote users see Santa Claus? (laughter)

Q: (V) Are the boys doing drugs tonight?

A: Nope. (Undecipherable comment from G– amidst laughter.) When did you last see this in Rochester, G–?

Q: (G) Never! [Much laughter]

A: Bingo!

Q: (V) That kind of smacks of Frank’s “When did you ever see this in Half-Moon Bay, V__?” (L) Where do you think Frank is getting it from? (V) Aren’t we all being enlightened? (T) Is this...

A: Frank is channel. Others are grooving rapidly.

Q: (T) Others of us?

A: Yes. Forming conduit.

Q: (V) You were real happy to see all of us here together this evening...

A: Yes.

Q: (V) Can we look forward to a greater group and a greater gathering as the year progresses?

A: Yes.

Q: (T) Will it reach a point where there is too many people?

A: No.

Q: (V) Is this like a community gathering? A society?

A: A conduit.

Q: (T) If I am not supposed to be at Home Shopping, {employer} where am I supposed to be?

A: Discover.

Q: (T) Am I supposed to be doing another kind of a job or is there something entirely different that I am supposed to be doing?

A: Discover.

Q: (L) Is he going to come to this awareness after he does some hypnotic work and processes?

A: Open.

Q: (V) With meditation and metaphysical exercise, I can lift my chakras higher, is this correct?

A: Yes.

Q: (V) Dedication?

A: Yes.

Q: (V) Is it all in what I perceive my purpose to be?

A: Yes.

Q: (L) [Indicating little plastic dinosaur] Do you like our little mascot here on the table?

A: Okay.

Q: (V) Do you have any messages for us before we say goodnight?

A: No. Goodnight.

Q: (L) Thank you very much.

END OF SESSION

Chapter 3

1995

3.1 January 1, 1995

[Continuation of December 31, 1994 session after break for New Year celebration.]

Q: (L) Who do we have with us tonight?

A: Cassiopaea calling. Sorrona.

Q: (L) And who are our guests?

A: You must network tonight as there are those who are awaiting your message as promised.

Q: (L) Do you mean do the board and transfer it to the network?

A: Open.

Q: (V) Have you promised somebody else that you work through that we will.... (L) No, we promised on the network...

A: You did.

Q: (L) Frank and I promised that we would channel on-line. Yes, we logged on and made the announcement and the next day I had the wreck. I had been promised that my life would change suddenly and dramatically.

A: It is.

Q: (L) My life is changed?

A: Yes. In process.

Q: (L) We want to know who the ethereal visitors are tonight...

(T) And have they left since all the noise started?

A: Mary, Laura, John, Ruth, Terence, Todd, Vance, There's a Ronald.

Q: (L) Is the Laura someone who is related to me?

A: Grandma.

Q: (L) Does anybody else recognize any of those names? **(V)** I recognize John, my uncle. Are each one of these names like a guide for each one of us?

A: No. Visitors. Attracted by energy center.

Q: **(V)** Have I had contact with John before?

A: Yes. Uncle.

Q: **(T)** Am I related to any... **(V)** My uncle that's just passed on?

A: Yes.

Q: (L) Is Terry related to any of these people?

A: Yes.

Q: (L) Who?

A: Vance.

Q: (T) Who is Vance? (V) Do they have messages for us? (L) Who is Vance?

A: Great Uncle.

Q: (L) Do any of these people have messages for any of us?

A: No.

Q: (V) About 5 or 6 weeks ago I was surrounded by a smell of ...

A: Yes.

Q: (V) It was my uncle Wayne?

A: Yes.

Q: (V) His name was John Wayne... (L) Has D__ ever been abducted?

A: Yes.

Q: (L) When was she first abducted?

A: Age 2.

Q: (L) How many times?

A: 59.

Q: (V__ and Laura) You got the record! (T) How many were physical?

A: Not correct thinking pattern.

Q: (L) In a sense they are all physical? How many of these abductions were virtual reality abductions?

A: Everything is that.

Q: (L) Well, how many of these level 1 abductions?

A: 9

Q: (T) How many were alpha state abductions?

A: Two weeks ago felt “tingle.”

Q: (V) Well, two weeks ago was the night of the party at the book store in Tampa. (L) Okay, has Luanne ever been abducted?

A: Yes.

Q: (L) How many times?

A: 17.

Q: (LE) No way. (L) When was the first time?

A: When lived in red house.

Q: (L) Did you ever live in a red house? (Billy) Yeah, we lived in a brick house. (L) How old were you? (LE) When I was five.

A: 4

Q: (LE) We moved there when I was four right before I was five. (L) Does she have an implant?

A: No.

Q: (L) Does D__ have an implant?

A: She has 4.

Q: (D) Has 4 implants?

A: Yes.

Q: (L) Where are they?

A: In brain.

Q: (L) In her brain? Ar-r-r-gh! (LE) I had lots of allergies. (D) What is their purpose?

A: Monitor.

Q: (L) That's what they all are, monitors. (D) But, why?

A: You are aware.

Q: (L) They want to monitor you because you are aware. (T) They don't have cable... (L) Is Susan going to be here shortly?

A: Open.

Q: (L) We want to know what kind of energy is behind Budd Hopkins?

A: Divergent.

Q: (L) Is he on the right track in his research?

A: Halfway.

Q: (T) Is the Linda Cortile case a set-up to discredit him?

A: No.

Q: (T) Everything that she says happened really happened to her?

A: In 4th density.

Q: (T) Well, all the abduction stuff was in 4 D, but being pulled out of the apartment from the 17th floor or wherever it was, and being sucked up in the beam of the light, that actually happened to her?

A: In 4th density.

Q: (T) How did people in 3rd density see it?

A: Only those who were tuned in saw it.

Q: (L) Were there people there who did not see it?

A: Yes.

Q: (T) What or who were some of the people who didn't see it?

A: Not important.

Q: (T) Can implants be removed?

A: No.

Q: (L) What is the energy fueling Whitley Strieber and his work?

A: Grays.

Q: (L) He is an agent of the Grays?

A: No. Instrument of the Grays.

Q: (T) So, all his writing is compromised by the Grays?

A: Influenced by them.

Q: (T) Well, he says that, too. (L) Well, he now thinks he has learned how to be a companion of God through these experiences.

A: Wolfen reflects Lizzie reality.

Q: (L) Who's read the book, what's it about? (T) I saw the movie but I never read the book. I can't stand his Gothic style of writing. (L) I can't stand to read his stuff either. (T) I only got half-way through *Communion* and gave it up. (L) Well, let me ask, while we are on the subject of writing, is Anne Rice channeling her concepts in her vampire books?

A: She also is influenced by the Grays.

Q: (T) What about Stephen King?

A: Carnal influences.

Q: (T) He's writing from his cojones, eh? (laughter)

A: Okay, Terry.

Q: (L) Are there any further comments or do you want us to go on line now?

A: Yes. {break - discussion lost. Apparently someone said something that V took offense to, probably about her strong sex chakra emanations.}

A: V__, do not be offended, we are all learning.

Q: (V) Well, thank you so much for the honesty from everybody in the room, I really appreciate it. (LM) I wasn't being honest, don't blame me. (V) What chakra level is G__ operating at?

A: Chakras are like escalators, you choose your step and rise accordingly.

Q: (G) Well, I was hoping they would give me a number. I don't know much about chakras.

A: Learn.

Q: (T) The whole thing is that we are supposed to learn for ourselves. They will point us in the right direction, but then we are supposed to go out and do it. If you don't learn it on your own, you don't really learn. You have to go out and fall off the log a couple times to learn to walk the log. (V) E- {her son} just told me about something that happened. Can you give me some insight?

A: Imagination.

Q: (V) Are the boys fine? Are the boys okay?

A: Boys will be boys.

Q: (V) They thought they saw a witch. (T) Who was she? It was the neighbor lady again. (L) Where was she and what was she doing? (V on phone to her son and friend) What do you mean over a car that just started? (V to people in room) Their imaginations are just going.

A: How do peyote users see Santa Claus? {laughter - V hangs up phone}

Q: (V) Are the boys doing drugs tonight?

A: Nope. (Undecipherable comment from G- amidst laughter.) When did you last see this in Rochester, G-?

Q: (G) Never! {Much laughter}

A: Bingo!

Q: (V) That kind of smacks of Frank's "When did you ever see this in Half-Moon Bay, V__?" (L) Where do you think Frank is getting it from? (V) Aren't we all being enlightened? (T) Is this...

A: Frank is channel. Others are grooving rapidly.

Q: (T) Others of us?

A: Yes. Forming conduit.

Q: (V) You were real happy to see all of us here together this evening...

A: Yes.

Q: (V) Can we look forward to a greater group and a greater gathering as the year progresses?

A: Yes.

Q: (T) Will it reach a point where there is too many people?

A: No.

Q: (V) Is this like a community gathering? A society?

A: A conduit.

Q: (T) If I am not supposed to be at Home Shopping {his employer}, where am I supposed to be?

A: Discover.

Q: (T) Am I supposed to be doing another kind of a job or is there something entirely different that I am supposed to be doing?

A: Discover.

Q: (L) Is he going to come to this awareness after he does some hypnotic work and processes?

A: Open.

Q: (V) With meditation and metaphysical exercise, I can lift my chakras higher, is this correct?

A: Yes.

Q: (V) Dedication?

A: Yes.

Q: (V) Is it all in what I perceive my purpose to be?

A: Yes.

Q: (L) {Indicating little plastic dinosaur on table by board} Do you like our little mascot here on the table?

A: Okay.

Q: (V) Do you have any messages for us before we say goodnight?

A: No. Goodnight.

Q: (L) Thank you very much.

END OF SESSION

3.2 January 2, 1995

Frank and Laura

Q: Hello.

A: Hello.

Q: (L) Who is with us?

A: Rivia.

Q: (L) And, where are you from?

A: Cassiopaea.

Q: (L) Have you been listening to Frank talk about his woes and miseries?

A: Yes.

Q: (L) What do you have in response to his woes and miseries, since he is the primary channel, it seems to me that it ought to behoove you to give him some kind of a word on this matter..

A: Open.

Q: (L) What do you mean it is open? Is he going to...

A: Is under attack, as previously described.

Q: (L) Well, would it not behoove him to not respond negatively in thought word or deed and to take care of business as best he can and trust that it will all work out? Because, by becoming all discombobulated, he is giving off negative energy...

A: His methods accomplish the task.

Q: (L) So, in other words, it is alright for him to get all emotionally wrought up and to spout off all these violently...

A: That repels attacking forces because they thrive upon blase passivity.

Q: (L) Well, we are not talking about passivity here. Are you sure you are a Cassiopaeian? It sounds to me like you are saying he ought to be giving off... I think we are pulling in Lizzies because of your negativity...

A: Incorrect, you have your “way” of repelling attack, and Frank has his.

Q: (L) Well I just don’t see how a whole bunch of negative energy in thought and word can repel beings who thrive on negative energy. I mean, they should be just rolling in joy that they are making him so miserable that he has to carry on that way which then makes me miserable.

A: Not miserable when repelling.

Q: (L) Well, then, the problem here is that when he does this, everybody else he does it around, it makes them miserable, so, what’s the deal here?

A: Subjective, your methods can cause perception of upset too.

Q: (L) Yes, I know this, but I am working on being totally unmoved by attack, isn’t that the whole point here?

A: If it ain’t broke, don’t fix it.

Q: (L) So, I should continue, when I get upset or attacked, to just rave and rant and yell and scream and carry on?

A: You don’t, you attack back, externally. Frank attacks back internally. The external manifestation is merely overflow and harmless if recognized correctly.

Q: (L) My understanding is that service to others involves complete lack of concern for self. Therefore, the objective is to have

complete lack of concern for self, therefore one would be in such a state of lack of concern for self that when one feels oneself to be under attack, so to speak, or being baited or jabbed, one would simply utterly and entirely disregard this and continue on in a peaceful way. Now, am I misapprehending this in some way?

A: Not misapprehending, misinterpreting.

Q: (L) So, I misinterpret Frank's lack of regard for my feelings because he spouts off and upsets me... that's really a service to others activity and it is only my subjectivity that makes me get upset, therefore, I should eliminate my subjectivity as a service to him so that he can continue to spew off and therefore not upset me, is that what we are getting at here?

A: Off base.

Q: (L) Well, that is what you are saying.

A: That's what you want to believe we are saying, but we are not we are saying all should strive to be objective.

Q: (L) Well, I don't think it is being objective for every little sling and arrow of misfortune to throw somebody into a tailspin. I think part of the whole process is to learn how to go smoothly through all this stuff. And, what you are saying here is don't worry about going through stuff, just dump...

A: You are all learning, including Frank.

Q: (L) Well, let's just drop it. It doesn't make any sense.

A: Your perception, there is much to this whole process that is manifest on other levels, levels other than 3rd...

Q: (L) Well, I just don't think you really understand what is going on. I think that it's...

A: Yes we do. You do not. Open your mind.

Q: (L) Well the only thing I can change about this whole thing is to just stop listening when Frank moans and groans about things that I know everybody else has gone through without moaning and groaning, cause it is entirely, extremely irritating to me to have to listen to it when everybody else has been through it and kept a stiff upper lip.

A: If Frank tried to keep a “stiff upper lip” it would destroy him because of his make-up, which does not correspond to that of most others; try to recognize differences.

Q: (L) Well, I recognize the differences, but I am only human too.

A: If you were asked to be passive toward aggressors, how would you feel about that?

Q: (L) Well, I thought that was what I was supposed to be practicing and, in fact, have been. I thought that this whole thing was about doing and practicing things to make us different than we had been programmed to be.

A: When it is wholly within your “comfort zone” not before, remember, in “Bringers of the Dawn” it says to do that which is effortless.

Q: (L) Okay, it says to do what is effortless. It takes a lot of effort to put up with Frank when he is like that so he will have to swear and vow that he will never complain to me again. Agreed. It takes too much effort for me to deal with it.

A: Would cause karmic backsliding.

Q: (L) Now, just a minute here. You just said to do what is effortless. I said it takes a lot of effort for me to put up with that kind of stuff, and now you are saying that this will cause me karmic backsliding?

A: No we said “do” that which is effortless, “acceptance” is another matter entirely.

Q: (L) What does that mean? (F) I think that what it means is that if you are doing something that is one thing, accepting is another thing. If I have some sort of foible that you don’t like, that is not doing. Whether you accept it or not has nothing to do with doing. I accept you, foibles and all, but you are saying that you simply refuse to... (Laura) But I don’t attack you, either. (F) I don’t attack you. (L) But, it amounts to the same thing to me. To have to listen to moaning and groaning that repeats over and over is the same thing as being attacked. I listen to everybody’s troubles all day long and I get sick of people complaining who never do anything about their problems. (F) Well, you don’t say that it is my problems that bother you, it’s everybody’s problems, and it did say that there is karmic significance here which means that you must have brought yourself into a situation where you are surrounded with other people all moaning and groaning about their problems. And, you chose this. If you didn’t want to listen to other people’s problems, why did you get married and have kids? (L) Well, you would think that my friends would know that I don’t need to have problems dumped on me... (F) Who is dumping problems on you? You keep saying this as if somehow... (L) Well, let’s drop it... I want to ask: the other night Frank read my palm and gave me several bits of information. When he reads palms does he direct channel this information?

A: Some.

Q: (L) Where does the other information come from when he is reading palms?

A: Varied.

Q: (L) Well, one thing he said to me was about something buried in my cellar. Is there, in fact, something buried in my cellar?

A: Discover.

Q: (L) How am I to discover it other than digging the whole cellar out?

A: Patience will pave path.

Q: (L) Does that give me a clue that something is buried under the steps to the cellar rather than under the cellar itself?

A: No.

Q: (L) Well, I was down there today - I had the kids empty the cellar out - I went around tapping and knocking, and...

A: Yes.

Q: (L) I used a pendulum and dowsed. I came up with a spot using a pendulum, I found a spot. I used the sledge hammer and broke open a part of the cellar floor, dug down four feet, and there was nothing there. Now, I don't look forward to doing that over a 9 by 7 space, and I certainly don't intend to knock all the walls down...

A: Part of discovery process, test dowsing skill on known entities in order to refine process.

Q: (L) Well, either dowsing works or it doesn't, wouldn't you say? Test it on known...

A: Depends upon skill of dowser as in all psychic talents.

Q: (L) Well, the clue I am getting from that is that I may not be the one to do the dowsing, is that correct?

A: If you take one piano lesson and fail to produce Chopin, does that mean you should give up the piano?

Q: (L) Well, let me ask this, give me a straight answer on this one, is there something down there so that we should continue working on the project?

A: Yes.

Q: (L) Is it worth tearing up the damn cellar to find it?

A: Up to you.

Q: (L) Well, let me ask you this, is it worth five thousand dollars?

A: To some.

Q: (L) Is it worth ten thousand dollars?

A: Discover.

Q: (L) What is it? (F) Money, it could be gold, it could be jewelry, it could be a valuable stock certificate. (L) Speaking of stock certificates, I have an old stock certificate for one share in the Elk's Club, it is very, very old. Is it worth anything and should I pursue having it checked out?

A: Yes.

END OF SESSION

3.3 January 5, 1995

Frank and Laura

Q: (L) Hello, who do we have with us tonight?

A: Turoian.

Q: (L) Where are you from?

A: Cass.

Q: (L) Cass? Are we abbreviating Cassiopaea now?

A: Sure, why not.

Q: (L) Well, I am sure that you must be aware of the excitement yesterday with the confirmation of the information received some time ago about J__'s past incarnation as a pilot in Viet Nam...

A: Yes.

Q: (L) Well, I would like to have a few more details about this G__ R__ K__. Is this, in fact, the individual who is incarnated as my son?

A: Probably, but up to you to discover so as to learn. Remember, its all just lessons.

Q: (L) Well, what I would like to do is get some information from you and then do a session with J*** and then compare the information, to have a sort of guideline to go by, would that be alright.

A: Okey dokey.

Q: (L) The first thing I want to ask is this: G__ R__ K__, the probable individual, could you tell us what kind of plane he was flying?

A: EC 121.

Q: (L) How many other people were on board that plane?

A: 15.

Q: (L) And was that plane shot down?

A: Yes.

Q: (L) It did not just simply crash, is that correct?

A: Yes.

Q: (L) What was it doing when it was shot down?

A: Combination reconnaissance and bombing.

Q: (L) Who was the pilot of the plane?

A: There were two.

Q: (L) What were their names?

A: G__ and G__. The “Two G’s.”

Q: (L) Now, G__ R__’s sister called me, what is her reaction to this information?

A: Anticipation.

Q: (L) What is she anticipating?

A: Reunion.

Q: (L) Because of this information, A__, of course, has inquired as to who she was in her last lifetime. So, could you tell me this?

A: Rebecca Rendell.

Q: (L) Where did she live?

A: Georgia.

Q: (L) What year was she born?

A: 1900.

Q: (L) When did she die in that lifetime?

A: 1963.

Q: (L) Is this the lifetime she recalled under hypnosis where she finds herself sitting and waiting and says that everyone is gone, has deserted her, she is alone?

A: Yes.

Q: (L) What is the situation surrounding that? Why does she feel so abandoned and alone?

A: Alcoholism.

Q: (L) She was an alcoholic?

A: Yes.

Q: (L) Was she abandoned and left alone because of her alcoholism?

A: Husband problems.

Q: (L) She had problems with her husband because of the alcoholism or did the problems with husband cause the alcoholism?

A: Interwoven.

Q: (L) Did she have children in that lifetime?

A: One.

Q: (L) When was that child born?

A: 1919.

Q: (L) Is that child living today?

A: No.

Q: (L) Did she have any grandchildren?

A: Three.

Q: (L) Was the child a boy or girl?

A: Girl. Fonora Jean. {Or Nora Jean}

Q: (L) The next one I want to ask about is A__. Who was A__ in her last lifetime?

A: Have you finished with J__?

Q: (L) Well, I guess I could ask a few more questions about J__. What else could I ask?

A: Searing his lungs with flames.

Q: (L) Did that happen in the plane crash?

A: Immediately after missile strike.

Q: (L) Tell us more of what you are seeing at this moment.

A: Breathing in fire.

Q: (L) Was this the cause of death?

A: Yes.

Q: (L) Is this the reason J__ has suffered from asthma?

A: Yes.

Q: (L) And, you previously said the leg was torn off with the missile strike, is this correct?

A: Yes.

Q: (L) Are there any other injuries that occurred that he would be experiencing backlash from at this time?

A: Spine severed 17 locations.

Q: (L) Does this cause him back pain?

A: Yes.

Q: (L) Any other physical symptoms or experiences?

A: Psychological.

Q: (L) In this experience, how long after the missile struck did he actually leave the body?

A: 14 seconds.

Q: (L) It was pretty much instantaneous.

A: Close.

Q: (L) Still, under those circumstances, 14 seconds can be forever. (F) No kidding. Time slows down to a standstill. (L) What were the last thoughts G__ R__ had before he left the body?

A: He thought of his family and his childhood home.

Q: (L) If I were to take J__ to the home G__ R__ grew up in, would he remember it?

A: That was only one of his homes.

Q: (L) Did he remember his earliest home?

A: Yes!

Q: (L) Was he particularly close to his sister, R__?

A: More close to brothers.

Q: (L) Is that...

A: Rivalries, other siblings were more assertive.

Q: (L) Anything else we need to know at this time?

A: Body remains were questionable.

Q: (L) They may have buried the wrong remains in G__ R__'s grave?

A: Open.

Q: (L) Well, what do you mean the "remains were questionable?"

A: All will say.

Q: (L) That is all you are going to say on that?

A: Yes.

Q: (L) Well, that is real curious. Goodness gracious. Okay, I would like to know who A__ was in her last lifetime?

A: Luther Meinhardt.

Q: (L) Where did Luther Meinhardt live?

A: Deutschland.

Q: (L) And what year was Luther Meinhardt born in Deutschland?

A: 1904.

Q: (L) And when did Luther Meinhardt die?

A: 1947.

Q: (L) What did Luther Meinhardt die from?

A: Dysentery.

Q: (L) Was there some connection between Luther and me in that lifetime?

A: Was officer in Gestapo.

Q: (L) Did I know this officer in the Gestapo?

A: Not directly or by name.

Q: (L) Well, if I didn't know this person directly or by name, did this person have some effect on my life?

A: Yes.

Q: (L) What effect did this person have on my life. What did they do?

A: Arrested husband.

Q: (L) And at the time my husband was arrested, what happened then?

A: Nothing of import.

Q: (L) What happened to the husband after he was arrested? Why was he arrested?

A: Judisch.

Q: (L) He was arrested because he was Jewish?

A: Yes.

Q: (L) Was I also Jewish?

A: No.

Q: (L) And how many children did I have?

A: Four.

Q: (L) What was the result of the arrest of my husband? Was he taken to a concentration camp, killed, or what?

A: Killed.

Q: (L) How was he killed?

A: Shot.

Q: (L) Was this the point at which I committed suicide by diving from a window?

A: Yes.

Q: (L) Okay, there were the four children; what then happened to the children?

A: Taken to camp "Orphanage."

Q: (L) What happened to the four of them there?

A: Different fates.

Q: (L) What was the oldest one's name?

A: Rita.

Q: (L) What happened to Rita?

A: Died in camp.

Q: (L) How old was Rita when she died in the camp?

A: 17.

Q: (L) What was the next oldest one's name?

A: Gerta.

Q: (L) What happened to Gerta?

A: Died in camp.

Q: (L) How old was Gerta when she died?

A: 15.

Q: (L) What was the next one's name?

A: Klaus.

Q: (L) What happened to Klaus?

A: Experimented upon, survived, lives in Austria or Holland.

Q: (L) Why does he live in one or the other?

A: Hard to decipher because he moves.

Q: (L) Does he move back and forth from one place to the other?

A: Has or does.

Q: (L) And Klaus is still living. When was Klaus born?

A: 1929.

Q: (L) What was the last name of the family?

A: Gerspringer.

Q: (L) What happened to the youngest child?

A: Ernst. Died 1987.

Q: (L) So, Ernst survived the camp. Are any of the children I have now reincarnations of my children then?

A: No.

Q: (L) Are there any ramifications of this situation that I need to deal with?

A: Watch karmic interaction with A__. You may have hidden anger.

Q: (L) But A__ is such a lovable baby. Why did she decide to come into my family if she was part of the Gestapo that destroyed my family?

A: Guilt.

Q: (L) She wanted to come in to assuage her guilt?

A: Was Gestapo, but intents were not evil, just “orders.”

Q: (L) And who was my husband in that lifetime?

A: Gerhard.

Q: (L) And who is he in this lifetime, has he already reincarnated?

A: No.

Q: (L) Didn't you tell me that he had reincarnated and that he was G__ M__?

A: Yes, but has apparently passed and other entity told you, not us.

Q: (L) So, on the occasion when those questions were being asked, the entity that was telling us that was a corrupted influence?

A: Not corrupted, just other.

Q: (L) Another of the Cassiopaeans told me that?

A: Check records.

Q: (L) I don't understand. Well, since you brought that subject up, are you intending to say that the entity in this person's body has passed and another entity has taken its place?

A: No. G__ was husband, but other lifetime.

Q: (L) I see, I guess. Okay, well, where is the person who was my husband in that lifetime? Is he still floating around somewhere?

A: Yes.

Q: (L) Okay. What lifetime was it when G__ was my husband?

A: Before the last one.

Q: (L) What year was that lifetime?

A: 1800's..

Q: (L) In that particular lifetime, what was the karmic interaction or dynamics?

A: Husband and wife. Deutschland, Prussia.

Q: (L) What was his name?

A: Gunther Steinbrandt.

Q: (L) What was my name in that lifetime?

A: Wilhelmina.

Q: (L) Did we have any children?

A: No.

Q: (L) What was Gunther Steinbrandt's occupation?

A: Solderer.

Q: (L) He was a worker with solder?

A: Yes.

Q: (L) I didn't know they had solder in that time. Sounds like a totally boring life. Did anything dramatic or interesting happen in that life?

A: Subjective.

Q: (L) My current husband and I seemingly have very strong karma together. What is the source of this karma?

A: Were lovers in Persia.

Q: (L) And that was in the 1600s as we have been told before, correct?

A: Yes.

Q: (L) Do I have any particular karma toward or with any of my children that is outstanding? Any one or two children with outstanding karma?

A: A__.

Q: (L) What about A__?

A: No.

Q: (L) Who was A__ in her last lifetime?

A: Brian Jones.

Q: (L) When did Brian Jones die?

A: 1889

Q: (L) When was Brian Jones born?

A: 1803.

Q: (L) And do all of my children have strong connections to me in terms of affection or karma or whatever?

A: As always.

Q: (L) When was the last lifetime Frank and I were together?

A: 1700's.

Q: (L) Who was Frank in the 1700s?

A: Bavarian landowner's son.

Q: (L) Who was I in this lifetime?

A: Daughter.

Q: (L) I was Frank's daughter?

A: No, sister.

Q: (L) Was this the same lifetime when I was married to G__?

A: No. Spent 3 lifetimes in what is now Germany.

Q: (L) Was my mother with me in that lifetime?

A: No.

Q: (L) In that lifetime as Bavarian landowner's children, what was Frank's name?

A: Heinrig.

Q: (L) What was my name?

A: Sheila.

Q: (L) What did we do in that lifetime? Argue?

A: Were sheltered.

Q: (L) Any exceptional talents or abilities?

A: Piano and harp.

Q: (L) So, all I did was sit around and play the piano and harp all the time?

A: Close.

Q: (L) And read books? What did Frank do, smoke cigars and gaze out the window?

A: Read.

Q: (L) Must have been nice, Frank. What area of Bavaria was this?

A: Muenchen near. South of there. On Braunau.

Q: (L) Was this a very large house?

A: Castle.

Q: (L) Sounds better all the time. Is the castle still standing?

A: Yes.

Q: (L) Would we know that castle by name?

A: No.

Q: (L) What was our last name, surname, family name?

A: Von Endersohn.

Q: (L) Did we live long and fullfilling and happy lives?

A: Open.

Q: (L) Did we experience tragedy?

A: Was turbulent era.

Q: (L) Well, how old was I when I died?

A: 43.

Q: (L) How old was Frank when he died?

A: 43.

Q: (L) Were we twins?

A: No.

Q: (L) Who was older, me or him?

A: Year apart.

Q: (L) What did he die from?

A: Heart attack.

Q: (L) What did I die from?

A: Pneumonia.

Q: (L) Did we die still living in our castle?

A: Yes.

Q: (L) Did either of us have any children?

A: No. Were sheltered from turbulence directed at wealthy.

Q: (L) How were we sheltered from this turbulence?

A: Kept isolated. Never married.

Q: (L) Well, I guess that is one way to shelter yourself from turbulence, just never go out. We just sat around, played the piano and harp and read books. That sounds like a pretty ideal existence to me. Did we ride horses too?

A: Yes.

Q: (L) I guess we worked hard to entertain ourselves. (F) That must be why we both yearn for security, peaceful reading and so on. (L) I have always wanted to live in Europe. Would I be happy doing so?

A: Up to you.

Q: (L) (F) Well, that is probably why you yearn to live in Europe, because you spent 3 lifetimes in that area. (L) If I used hypnosis, could I improve my piano playing? Also, would I be able to automatically play the harp?

A: Open.

Q: (L) Has it ever been done before?

A: Yes.

Q: (L) The other night, on New Year's Eve, you said there was a whole group of celestial visitors, and, among these you included my great-grandmother, Laura, is that correct?

A: Yes.

Q: (L) Well, does this mean that she has not gone into the light or can people come who have done so?

A: Latter.

Q: (L) I would like to know what my grandmother thinks of being dead?

A: Relief.

Q: (L) Well, I think that one of the things that made her hang on so long was that she was worried about me. I think about her a lot. When I do, is she aware of it?

A: Maybe.

Q: (L) Now, getting back to the idea of walk-ins, this is an idea that Ruth Montgomery promulgated, does this ever happen?

A: Rarely.

Q: (L) What about the case of the individual known as Lobsang Rampa? Was Lobsang Rampa a walk-in?

A: No.

Q: (L) What was the source of the material Lobsang wrote about in his books?

A: An active imagination.

Q: (L) So, Lobsang's books were basically his imagination and were not channeled in any way?

A: Open.

Q: (L) Is there a possibility that he channeled some of that information?

A: Yes.

Q: (L) I sent out a batch of mail today, I sent a copy to M__ F__ with a cover letter etc. I am curious as to whether this will open his eyes in any way to the fact that what is going on with us is far more interesting than what is going on with Scarlett?

A: Doubtful.

Q: (L) I also sent a copy of it to L__ S__ and a copy to this metaphysical group over here on 54 and a copy to J__ and G__ B__...

How will M__ N__ react to our information?

A: Open.

Q: (L) Are you going to give me any indication about how any of these people are going to react to any of this information? Can you look into the future and give me any idea of what I can expect from the different people?

A: Wait and see.

Q: (L) As far as I can see, having found out about the network, until I can get an access line, it seems that our use of this network is going to be severely limited.

A: Look into 800 number.

Q: (L) Well, in order to get an 800 number, I would have to get the company to do it. I'll look into it, but I don't think so. Now, this person on the network, IrishSir, I have basically decided that I am not going to respond to him because he is very offensive in his responses. It is as though he is attempting to draw me into a situation where he can attack. Is this course of action acceptable?

A: Open.

Q: (L) Is there anything I could say to this guy that would have an impact on him?

A: Of course.

Q: (L) Give me a clue as to what approach to take?

A: Up to you to learn communication with challenging subjects.

Q: (L) The other night when we were talking about Jesus, I asked if there was any historical person we knew who resembled him and said you were scanning.

A: No.

Q: (L) What was Jesus actual name?

A: Jesinavarah.

Q: (L) What is the source of A__'s aversion to what I do and think?

A: Different orientation.

Q: (L) And what is her orientation?

A: Material.

Q: (L) Is A__ a 4th density candidate?

A: Open.

Q: (L) We have been having a lot of very unusual cloud shapes and formations. What is the source of this...

A: Upper level wind convergence.

Q: (L) When this occurs, does it represent anything from other dimensions? Or is it something to do with EM wave formations from the earth?

A: Vague.

Q: (L) In other words, can these upper level winds and strange cloud patterns be 4th, 5th or 6th density interactions?

A: Maybe.

Q: (L) Could these cloud patterns be a result of strange electromagnetic patterns on the earth such as those that presage earthquakes and volcanic eruptions?

A: Can.

Q: (L) Do we have an upcoming volcanic eruption or earthquake in the, say, next ten days?

A: Yes.

Q: (L) Which?

A: Earthquake. Andes. 7.6 Peru.

Q: (L) Is there anything we need to know before we shut down for the night?

A: No.

Q: (L) What time of day was G__ R__ born?

A: a.m. 6:21.

Q: (L) I apologize for asking so many personal questions, but this thing about J__ has definitely given a lot of credibility to the source here. Goodnight.

END OF SESSION

3.4 January 7, 1995

Frank, Laura, Terry, Jan, V, D, T

Q: (L) Hello.

A: Hello. Victim V__. {Laughter}

Q: (L) Who do we have with us tonight?

A: Powder.

Q: {Powder added to board} (L) Now, I guess you'll want after-shave too.

A: Aftershave, please.

Q: (L) Who do we have with us tonight?

A: Lomarra.

Q: (L) Are you a discarnate?

A: No.

Q: (L) What or who are you?

A: Light being.

Q: (L) And where are you communicating from?

A: Cassiopaea.

Q: (L) We have a few interesting questions tonight. I think the first thing on everybody's mind is the strange events during the night and early morning hours, reported by Terry and Jan compared with events that happened that John said that he experienced and also, Terry's dad, and also something woke A__ up with a start and I was awakened with a strange feeling. We are a little bit curious about this event, this occurrence, and we would like to have some information on it. What exactly was it?

A: Thunder.

Q: (L) It seemed to be an extraordinarily massive strike, and it seemed to have been heard at a great distance in several directions. Where, in fact, did this lightning bolt strike?

A: Cell was uniformly structured throughout region.

Q: (T) So we all heard that particular blast because of that?

A: No. Each zone received similar EM profile, thus one particularly heavily charged event in each zone.

Q: (L) What is an EM profile?

A: Electromagnetic.

Q: (L) Was there any particular significance to this type of blast since it is not something any of us has experienced in our imme-

ciate memory. Is there any implication to this blast in terms of 4th density activity?

A: You have, and yes, as always.

Q: (L) Since this was such a boomer, what exactly was going on on 4th density that produced a boomer like this?

A: Overlapping densities, lasting approximately 1.3 seconds, as you measure time i.e.: for 1.3 seconds, you lived completely in 4th density.

Q: (T) So this was a significant event for us to have noticed?

A: The noticing was more significant than the event.

Q: (V) Can I ask... so every time there is... am I wrong in assuming that every time there is thunder there is a mix of 4th density? (L) No, no. (V) It's just this one time? (T) What about if you didn't notice? I didn't hear it. (T) What was the answer? (L) The noticing was more important than the event. (T) So it was important that we were aware that something had happened...

A: You did at another level of consciousness.

Q: (L) Did this event have anything to do with A__'s experience this morning of being awakened by a rustling in her room and thinking that she heard a squeaky voice calling her name?

A: Yes.

Q: (L) Okay, what was it that she experienced?

A: 4th density "resident."

Q: (L) And what kind of 4th density resident was this?

A: Om.

Q: (L) Who is Om. (V) Is it a name? (T) Is Om the name of the being?

A: Type.

Q: (L) What is a type Om?

A: You would rather not know!

Q: (L) No, I would rather know. If something is going to be visiting my daughter in her bedroom, I definitely want to know who or what it is.

A: Who says this will be regular event?

Q: (V) So, in other words, if it is not going to happen all the time, don't worry about it, is that right?

A: Yes.

Q: (T) This was just a one time event?

A: Yes.

Q: (V) Was the reason A__ was so aware of this is because she is psychically open when she is asleep?

A: Yes.

Q: (V) Is there anything she needs to do to control her psychic openness in order not to be harmed?

A: Why control something beneficial?

Q: (V) Well, it's just that Laura was concerned because you know... (T) Is this something that we all encounter every now and again?

A: Three of you have... no, make that five. Terry, Tom, Frank, D__, Laura.

Q: (D) The thumps that I hear in my house, this is not my grandmother, is this correct?

A: Yes.

Q: (D) Are these visitors?

A: Yes.

Q: (D) What can you tell me about that?

A: What do you want to know?

Q: (D) Are these Cassiopaeans?

A: We do not “Thump.” {laughter}

Q: (L) What is causing the thumping phenomenon in D__’s house.

A: 5th and 4th visitors of varying description your many activities have attracted.

Q: (T) Are they harmful? (D) My many activities like reading... psychic readings? (L) No, no, stop. Are these beings in general STS or STO oriented?

A: STS.

Q: (L) So, varying activities of D__’s have attracted them. What initial activities did D__ do that opened the doorway for this type of activity?

A: Networking.

Q: (L) Networking with who or what?

A: Her recent contacts.

Q: (L) With who or what?

A: People.

Q: (L) Who, specifically? (D) Are we talking about E__ Page?

A: That is one.

Q: (D) M__ T__?

A: Yes.

Q: (D) J__ H__?

A: Yes.

Q: (V) Laura and Frank?

A: No.

Q: (D) P__ K__?

A: No.

Q: (D) Anyone from the church?

A: Yes.

Q: (D) B__?

A: No.

Q: (D) D__ W__?

A: Yes.

Q: (D) Did it start with my association with D__ W__?

A: Yes.

Q: (D) Was that the first time?

A: Yes.

Q: (D) How can I stop these visits?

A: Complicated.

Q: (D) Where do I start. What is the first step? (L) Well, you have an EM opening. Closing that would be the first step.

A: You have begun already.

Q: (D) With reading. (T) By asking?

A: Yes. Yes.

Q: (D) What is the next step?

A: This is not a “step by step process.”

Q: (L) Is it that she is going to have to have knowledge and awareness?

A: The light is knowledge, which is protection.

Q: (L) I guess that means that you need to visualize light around yourself and your house. (D) I guess some sage and holy water... (L) No, no, no, no, no rituals. Knowledge. The power of the mind only. (T) If she stops associating with P__ and group will this be a good step in the right direction?

A: We do not condone recommendations for friendships and associations; that is free will.

Q: (L) So, they are not going to tell you who to associate with, it is your own choice. (J) But, now that you have the knowledge, you can make an informed choice. (D) Well, there is no choice... that is it.

A: Up to you.

Q: (L) I would like to bring up before we get sidetracked, that we have Tom with us this evening and...

A: Hi T__.

Q: (L) T__ has a couple of questions he would like to ask about moving and his direction in life, this will be brief. So, I will just let him ask his questions.

A: Now you are beginning to see what happens when you let emotions take over, T__. We warned you in a subtle way.

Q: (T) What do I need to do to get myself back on track on a spiritual path?

A: We were talking directly to you with the last 2 answers.

Q: (T) Did you get some kind of a warning?

A: Do you remember, T__.

Q: (T) No, I don't remember the warning.

A: Okay, now think carefully, access memories of first day of "union."

Q: (T) Are you talking about my relationship with A__?

A: We were being discreet.

Q: (L) You blabbed it out, they were being discreet. Did you get some kind of warning? (V) Did you get any "gut" feelings? (L) Have you not learned that your relationship is taking you away from your spiritual path? (D) Did she ask you to give up anything? (V) Did the relationship make you feel uncomfortable? (D) Did it give you negative thoughts about spirituality?

A: Let T__ figure it out. This is rather of a private nature.

Q: (T) Okay. Well, I'm thinking of...

A: T__ has a tendency to be rebellious and secretive.

Q: (J) Well, that's not such a bad combination. (T) Yeah, I'm working on that... (V) We all have our crosses to bear... (L) Tom now

has a plan where he is going to... his relationship has led to other situations that have caused unpleasantness in his life; he is now going to travel half-way across the country to escape this...

A: Repeating syndrome.

Q: (T) No matter where you go, there YOU are. (L) The scenery may change, but you will be the same with the same problems until you change yourself. (T) It is really because I know I can support myself better out there and I know that we can support ourselves better out there.

A: How do you know that?

Q: (T) Because I have checked with the papers, I have looked at what is out there... There's more jobs out there, there's more apartments, more opportunity, better chance to really get ahead.... (L) Who are you trying to convince?

A: Really???

Q: (T) I just feel like it's time for a change.

A: You have felt that way often before.

Q: (T) Okay, let me ask this: could I have some kind of place out there, do something that needs to be done out there?

A: Many have lived under the illusion that relocation improves destiny. All have failed.

Q: (L) If you can't succeed where you are, you probably won't succeed anywhere else. (J) You always carry yourself with you wherever you go. If you are what's wrong, moving doesn't change that. (L) And, in fact, it can make things worse. (T) Yeah, you lose a lot because you lose your connections and contacts, your support system, your network, everything. (T) Well, part of it is that I just

want to go. (L) Maybe wanting to go is part of your problem. (J) Are you running away? (T) No. (L) Is T__ running away?

A: {T__ gets on board.} Yes.

Q: (L) Is there anything you can tell T__....

A: The community he is considering is much more 3rd density. It is not metaphysically oriented.

Q: (L) In other words, if he moves, he will get more in the soup? {break for discussion} T__ thinks he can make it work... comments please.

A: Well, this plan is related to and contingent on shaky emotional considerations. His relationship is unstable and that is at the root of the issue.

Q: (T) What do I have to do to make the relationship stable? (V) Oh, the youngsters! "We are going to make this square peg fit into this round hole no matter what!"

A: Open.

Q: (T) Can you give me a hint as to what I need to do... (L) What they are saying is that you can't make this relationship stable... (J) Either it is or it isn't.

A: Let T__ decide.

Q: (T) Let me just ask this... can I make this relationship stable?

A: Discover. But moving won't accomplish this.

Q: (T) I know I can make this work, but should I stay here?

A: Better chance of survival of the relationship if you remain and work things out.

Q: (T) But her best friend is out there...

A: Friendships are not stable with this one. (A__)

Q: (L) They are saying Andrea is not capable of a stable friendship and that may extend to relationships. (T) Can I help her attain spirituality or a level of enlightenment?

A: What we told you with the first answer applies. Does not have to be painful.

Q: (D) I have been married twice. The day before I was to marry the man who I thought was wonderful, of course, I was told that no one was going to make me marry him, and that if I wanted to I could change my mind. I had reservations but I did not feel that I could back out because the wedding was already set. And it turned out to be a very destructive marriage and divorce. So, what I am saying to you is that if everything is not perfect about your mate, in terms of your expectations and needs, if there is anything that you think you can or have to change about this person, or that involvement with you will change, you are wrong. You can't change them, they won't change, and the relationship will deteriorate destructively. If you are now asking what you have to do to "make" it work, it is already on the road to destruction. It is never to late to come to your senses and back out.

A: Yes.

Q: (L) Is there a past life or karmic tie between T__ and Andrea?

A: As always. It is up to him to discover. He is rebellious and is not listening. We have given much, now it is up to him.

Q: (L) Is anyone in this room not rebellious? (Chorus) I am!
(L) Have we not all learned the hard way? (Chorus) I certainly have... yes... (V) We have all learned the lesson we see T__ facing. It's easy for us to sit back and know the end result because we have all been through it before. It's easy for us to tell him to back away and rethink because we have all been forced to do it but

we need to remember how painful it was to us at the time and how we all thought it was the end of the world. (L) Yes. We all thought that ending destructive relationships was the hardest thing in the world to do... other people gave us advice when we were younger like we are advising T__ now, and we didn't take it... (L) But how much easier on us it would have been if we had the wisdom then to do what we see now... (Chorus) Amen!

A: Real love is not strictly hormonal.

Q: (T) So, what they are saying is that I can make this work here but I can't make it work there? (L) No, T__, the chances are not good either way, but you have something of a chance here with a good support system and your metaphysical network. There, it is certain to fail and then you will be in emotional turmoil, probably broke, and stuck far away from everybody. (V) There is not a pat answer on your relationship, they just said if you stay here, it has a better chance. They didn't say that if you stay, you definitely will succeed... And, if you are seeking spirituality right now, it is definitely a bad move to make...

A: Yes.

Q: (J) Going back to the event of this morning, when J__ related his experience of it to me, he said that when he opened his eyes that the light looked yellow... (V) I noticed the discoloration too... (J) Was that related to the event?

A: Yes.

Q: (J) What caused the light to change color?

A: Leftover 4th density effects.

Q: (L) Is this something that is going to be happening more and more as we move to 4th density?

A: Yes.

Q: (L) Is this electromagnetic charging of the atmosphere, I am assuming that is what it is, and that it is occurring as part of the shifting of densities...

A: Yes.

Q: (L) If it is an electromagnetic charging of the atmosphere, is this charging coming about because of this oncoming wave and effects that we are beginning to feel more and more of, are they part of the wave, its presence or approach?

A: It is a buildup, similar to the early effects preceding the arrival of a sea wave.

Q: (T) Are the extremely high winds they have been experiencing in North Carolina and California and the earthquakes in Japan all related to this?

A: Yes.

Q: (T) Yes. The media is playing that down... 140 mile an hour winds up in the Carolina's and out in California they were hitting 160 miles an hour winds. (L) Well, they told us we were going to have really weird weather. (T) There was another earthquake in Japan today. This has been ongoing for the last couple of weeks. Japan is supposed to go. (V) Sylvia Brown was on a talk show. Sylvia Brown is known as a highly aware psychic. How do you feel about her psychic abilities?

A: Okay.

Q: (V) She had said that there was going to be a big earthquake in Alaska... a huge one... what can you tell us about this?

A: One of many events of the buildup lasting years, as you measure time.

Q: (V) That's interesting because I followed Sylvia Brown for a

number of years. (L) Let me ask this: I got a letter from Piers A. and he was giving me the big pooh pooh and....

A: Piers is misguided.

Q: (L) Well, my question about this is, in addition to that really revolting letter I got from that creep on the network, my feeling about this is: I really want these people to open their eyes, will they?

A: Those who will, will.

Q: (T) Look at it this way, you have an open enough mind to allow those who have their minds closed to keep them closed. You have tried, you don't have to take it any further. (L) You guys said that we were going to have a whole big, bodacious bunch more of UFO activity this year, is that correct? 1995

A: Bingo!

Q: (L) And I guess it has already started because some guy in Michigan filmed a UFO in broad daylight and they showed it on the news three days in a row and I don't think they were being snide in their comments... (Frank) Yes they were. I saw it on channel 13 and they were being definitely snide. (T) And those guys lost their network affiliation, too! (L) That fellow in Michigan, could you identify that craft for us and who it belonged to?

A: It was the Grays.

Q: (L) Now, are the Grays going to allow themselves to be seen more and more in 3rd density in the upcoming years.

A: Yes.

Q: (L) Is there a reason behind this exposure?

A: All of these events are related to that with which you are now familiar.

Q: (L) This is part of their movement to land on the planet, interact with human beings, say, via the media... (T) They are already landing on the planet...

A: No, for all is related to approach of oncoming wave, what the details are will remain to be seen.

Q: (L) By the way, T__, your information about the bases in Appalachia happens to have been confirmed. (T) Are there military bases in the Appalachian mountains?

A: Yes.

Q: (L) Hidden ones?

A: Yes.

Q: (T) Are they for the subjugation of the U.S. when they start to implement the final stages of the New World Order in this country?

A: Remains to be seen.

Q: (L) Do they actually have buildings or places set up in this country to be crematoriums and labor camps as I have read about in several articles?

A: Yes.

Q: (T) When do they intend to initiate this plan?

A: Open.

Q: (T) Last I heard was March of 1995. (V) Goodness gracious. (L) I have been saying for years now after doing the charts that 95 is going to be one strange year. (V) A lot of other people are saying that too. (D) There is supposed to be something big, some big organization fall... (L) If we sat here and visualized a clockwise

vortex of light and energy, would it greatly enhance the energy flow?

A: Not necessary any longer.

Q: (V) Last night I all of a sudden got a flash to do a Tarot reading. Now, I hadn't done this in months because I know it is not a super clear channel, but, I had the overwhelming feeling that it was okay to do this. Was the reading I did for myself last night a valid and factual true reading?

A: If you wish it to be.

Q: (V) Well, I was hoping with the reading that I was drawing on your energy, was I?

A: You do not cards to "draw on our energy." Your strong feeling was to meditate for information. You misinterpreted it as a need for Tarot. Cards can confuse, meditation never does.

Q: (V) Well, they were nice cards and I threw a spread this morning that was beautiful... the last card was the moon card... and in my perception of that card I haven't been able to signify whether that meant psychic energy or deception... what was the meaning within my perception?

A: We have given enough personal data for this session.

Q: (T) What is a good way to meditate?

A: The way that feels "effortless" for you.

Q: (V) Okay, if we are getting off of personal stuff here, and moving on to more generalized... I would like to know... there is a common knowledge kind of thing among metaphysical people that when a soul is born onto the planet, that soul, that little baby, has infinite knowledge, and as we grow and learn we were conditioned to lose our knowledge, is this true?

A: No.

Q: (L) How could a baby have infinite knowledge, it only has imprint of its past life experiences. (V) You have heard that also...

A: That is nonsense.

Q: (V) That's fine... I was just... I'm sure you've heard that...

A: Souls are not "born" into this planet. Souls were never born! And, will never die!

Q: (V) I understand, my question was loose; I'm sorry. (D) Are there any new souls being created?

A: Just answered if you use your head. Diana does not know the real concept of "time."

Q: (D) Well, that is a concept that is very difficult for me. (L) Well, for everybody. We can talk about it and play with it... but there really is no time. It's an illusion, it's a lie... (T) It's part of the 3rd density world we have created... (D) I'm trying real hard... (F) Okay, let me give you an example: Take yourself off the planet, take yourself farther away so you can't see the sun anymore except as a speck. (D) Okay, I'm there... (F) Now you are floating out there in space... there is no direction, everything is just out from you... there is no up or down or sideways... nothing... You see stars every way you look, but there is no point of orientation... Now, being no longer on the planet, the sun doesn't rise and the sun doesn't set... you have no watch or clock... how do you know what was before and what was after... (T) Have you ever heard of people who go down into caves to do research experiments, and they come out thinking that only 45 days have passed when it has really been 65 or a hundred... because time slows down and virtually stops. Time is a human concept. (F) I read the book about the Barbara Mackle abduction. She was kidnapped by a guy who put her into an underground coffin with gadgets to help her sur-

vive, and she was buried... she thought, when she was pulled out, 83 hours later, she thought she had only been in there one night. (L) Let's ask this question: In a state where there are no artificial considerations such as the delineation of night and day, in such a state, what would be the natural cycle of the human physical body in terms of, say, sleeping or eating, and refer this back to our concept of time. In other words, how long would we naturally stay awake, and then how long would we naturally sleep if we were not constrained by artificial time references, in a general sense?

A: Your entire existence would be radically different and would not cycle in the same ways at all.

Q: (L) Can you tell us how it would?

A: It depends on the environment.

Q: (L) So, we are so interactive with our environment that we almost can't separate ourselves from it, is that what you are saying?

A: Close.

Q: (L) If our solar system motion was such that, according to our present time delineations, we had 48 hours of daylight and 48 hours of night, would there be a concomitant extension of life-time in the same terms?

A: Maybe.

Q: (L) Sitchin has an interesting idea about his theorized planet Nebiru, that their solar year is 3,600 of our years, and, therefore, for every one year of their life, 3,600 years pass on earth, and therefore a being who theoretically was on such a planet, one with a 3,600 year orbit, would live many multiple thousands of years. Is this a valid concept insofar as it goes?

A: That is a confused cross conceptualization.

Q: (L) Now, is that confusion as I presented it, or confusion as Sitchin theorized it?

A: It's the whole gang.

Q: (T) We have to remember that time is only relative to earth, and it came about the way it is now only because of mathematics based on base 10 counting system. If you go to the moon, time is not reflected in the same way, if you have to measure it, as it is here. We use earth time on the moon. If we were to go to Mars, Mars time would be different. It is all based on rotation and orbit, which is only one way of doing it. As an example, not exactly having to do with time, but the idea of pi, 3.1416. On the SETI program they send out pi on a radio program saying: "Intelligent life will understand pi because pi is a basic idea in circular mathematics." You have to be able to figure pi in order to calculate circumference and diameter and so on in circles and arcs. So, I ask, what is the good of sending out pi in base ten when, say, the Grays only have 8 digits on their fingers? What is pi in base 8? 3.1416 means absolutely nothing to someone who is working in another system base.

A: Grays are cybergenetic beings, therefore they use mathematics they are programmed to use.

Q: (T) You all missed the point. I understand that Grays are...

A: No, we did not. Why do you look "up" when talking to us?

Q: (L) Well, where should we look?

A: Anywhere.

Q: (L) Okay now, the Grays are programmed to use mathematics. I am assuming that they are programmed to use the mathematics of the Lizard beings, their creators, is that correct?

A: Variable.

Q: (L) Well, the question I am trying to get at here is, what base do the Lizards use?

A: The Lizards have a form of mathematics you would not even begin to understand.

Q: (L) Well, I would imagine so. Now, if a line is defined as the movement of a point in a single direction, and a plane is defined as a line moving at right angles to itself, and the 3rd dimension is defined as a plane moving at right angles to itself, and the 4th dimension is defined as a three dimensional object moving at right angles to itself, then what we are talking about in 4th density, something that we simply cannot grasp. If we look at a 3 D apple, we are only seeing a slice, so to speak, of a 4th dimensional object. If we could see the apple in its true, 4th dimensional state, we would see something, probably more like a long, red tubular type thing that goes onto infinity. Is this a correct assessment?

A: Close.

Q: (T) And then there is 5th, 6th and 7th density levels. The whole point is to demonstrate that time doesn't exist and is irrelevant. It could be defined in any countless numbers of ways.

A: Yes.

Q: (L) Look at the Mayans... they counted in base 20. (T) Once you remove all references to time, it slows down and eventually stops. (J) Yes, look at what happens to those who are in sensory deprivation chambers. (T) Exactly. (L) An imploding infinity, so to speak.

A: If you were out in space, you might sleep for thousands of years or remain "awake" for millions of "years."

Q: (T) This refers back to Frank's explanation of floating in space

along with how time might be perceived without reference points.

A: It really does not matter, because you would not be under the same illusion that “Time” even exists.

Q: (L) Let me ask this: I am kind of drifting into another subject, but we are talking about being in space. We talked at one point, I believe, of the matrices of the various planets and our perceptions of the planets in our solar system, and these matrices being almost like a doorway to another density, and that if we were in the proper dimensional mode that we would see the other planets of our own solar system quite differently from how we see them in our third density mode, and that we would, in fact, be able to look upon Venus, which manifests in 3rd density as a pretty hellish place, with temperatures 900 degrees or thereabouts, and we would find it to be something else altogether with beings inhabiting it, is this correct.

A: Yes. Beings live absolutely everywhere in one realm or another.

Q: (L) Are the beings who live on the planet Venus aware of us on the planet Earth?

A: Yes.

Q: (L) Are there beings also living on Mars?

A: Yes.

Q: (L) Are they aware of us?

A: Yes.

Q: (L) Are the beings on all the other planets in our solar system aware of us here, on planet Earth?

A: Yes, because they are all of higher density.

Q: (L) Why is it that the Earth seems to be the lower density planet and we seem to be kind of left out in the cold, so to speak. They know of us, but we can't perceive them. Why is this? Why are we singled out for this? (D) Was earth created after all the others?

A: NO, no, no.

Q: (T) Are they interacting with us?

A: Okay, stop, whoa! A review session follows: Who is 1st density?

Q: (L) Rocks and minerals, right?

A: And?

Q: (L) Plants?

A: Yes. Now, what awareness do you suppose they have of you?

Q: (L) What awareness do rocks and plants have of US?! Oh, dear God! (V) That's an interesting way to put it. An excellent example. (T) When we ask why higher beings have awareness of us but we are not aware of them, we need to ask what awareness beings lower than us have of us. (J) Obviously no more than we have of 4th density. (T) But when you play music to a plant, it has some awareness because it makes it grow better. (L) But music is not a being. (T) It's an energy wave. (J) Wait a minute... what they are saying is: they have no more awareness of us than we, as 3rd density beings, have of 4th density beings. (T) Does this mean that they interact with us the way we interact with plants?

A: Who is "on" 2nd level.

Q: (L) Animals. (T) Insects, lower life forms.

A: Now, think carefully, what level of awareness, and more importantly, understanding, do they have of you?

Q: (L) Well, I guess they are aware of us in some way, but they don't understand us... (T) Some do at some point... (T) They understand us to a certain extent... (Frank) But their understanding is entirely different from our understanding of them. In other words, they see these big hulking beings, but they don't know what's going on. (L) Was Ouspensky's explanation of how animals perceive humans very close to the truth?

A: Close. Now, what about 1st level understanding and perception of 2nd level?

Q: (L) Okay, 1st density, minerals and plants... now rocks and minerals combine with plants through growing actions, water dissolution, erosion, and so on, they have a real limited existence. And what happens is that mostly animals come along and eat them. (Frank) Bees pollinate flowers. (L) Different kinds of animals live in trees. (T) Some animals live in the ground and in caves. (T) So, rocks and minerals and plants have a really limited understanding of the animals above them which interact with them in various ways.

A: Yes, and you have a limited understanding of the densities above you.

Q: (L) Well, that is still begging the question, my question was... (T) As an example, today we all experienced something we call thunder, but we were all aware that it was something more. Something happened in 4th density that we experienced in a certain way, and it was a limited understanding of that level.

A: Laura, unblock, do rocks and plants "see" you?

Q: (J) Probably not. (D) We don't really know. (T) We see the 3rd density manifestations of 1st density objects. We don't see the 1st density perception of itself. So, how do we see the 4th density manifestations, they see us on a 4th density level... not

necessarily as we perceive ourselves.

A: Tom, you are making rapid progress. Laura better watch her Butt! {laughter}

Q: (V) So, I am curious... what do rocks look like to each other?

(L) Let's ask. What do rocks see when they look at each other?

A: They sense each other.

Q: (L) What example of our sensory apparatus would be close to an example of what a rock senses when it is aware of another rock?

A: That is a cross conceptualization and will not work.

Q: (L) So there is no way we can interpret what a rock senses. Well, another 1st density example is plants. We know that plants can react positively to certain persons and negatively to others. They have experimented with hooking them up to polygraph machines and measured these responses. (J) They also react to music... (T) Third density reactions...

A: Yes.

Q: (L) If plants interact with each other, do they feel, say, fondness for one another?

A: Something akin to that.

Q: (L) Does it hurt a plant when we eat it?

A: Does it hurt you when a "Lizzie" eats you?

Q: (T) Yes, you see, on 4th density... we are on 3rd density and we eat 1st and 2nd density, the 4th density eats us. (D) If we hurt plants by eating them like the Lizzies hurt us when they eat us, how are we to survive without eating?

A: When you no longer crave physicality, you no longer need to “eat.”

Q: (L) So part of the “fall” into the physical existence and part of the Edenic story of the whole business, “you shall eat by the sweat of your brow,” has to do with being physical and needing to eat?

A: Lucifer, “The fallen Angel.” This is you.

Q: (L) So, “falling” means going into physical existence wherein you must feed on other life, other beings, is that it?

A: Yes.

Q: (T) When plants feed on 1st level beings such as rocks and water and so forth, do the 1st density beings feel pain?

A: That is redundant. We have already covered this.

Q: (T) So when a plant absorbs nutrients.... (L) Well, a plant is the same density as minerals, so it is almost like... (T) Like two separate entities becoming one? (V) Like Jeffrey Dahmer... {laughter} (L) My bologne has a first name... (LM) Minerals dissolve in water and are then absorbed by the plant, what pain could there be in this?

A: Subjective, L__.

Q: (L) Maybe the dissolution of, say, phosphate in water, is a “death” to it...

A: Close. You limit when you perceive on 3rd level only and think that your perception is all there is.

Q: (L) So, in other words, we should be able to perceive on 1st and 2nd as well as 3rd while working on 4th level understanding?

A: No. Work on 4th, 5th and 6th.

Q: (L) Is it not also beneficial to understand the 1st and 2nd density levels as well, just simply for the exercise in understanding that which is below us?

A: Strive always to rise.

Q: (V) Haven't we already done our 1st and 2nd level work as evolving souls?

A: Yes.

Q: (V) So there is no reason to step back. (T) Who eats the Lizzies on the 4th level?

A: No one. 4th is the last density for full manifestation of STS.

Q: (T) So, beings on the 5th and 6th level exist in pure energy?

A: Yes.

Q: (T) The 4th level is the last for full STS. Does that mean that the 5th level, which you have described as the "contemmplative" level... what is the state of existence of a STS being on the 5th level?

A: Souls of 1,2,3, and 4 go to 5th.

Q: (T) So 5th level is where they go to while waiting to go back to one of the 4 for their next incarnation?

A: Exactly.

Q: (T) That is why it's called the contemplation level. You go and think about what you have done. (T) What about souls on 6th density? (L) Are there 6th density STS beings?

A: No, when you get to 6th you no longer need to recycle.

Q: (L) But still, is there an STS experience at 6th density, like the 6th density Orions?

A: These are only reflections of individuals, not unified entities. These reflections exist for balance. They are not whole entities, just thought forms.

Q: (L) Are these 6th density beings what the Bible describes as a “gathering” of angels as in the story of Job where “Lucifer” came in before the Lord...

A: Yes.

Q: (L) So, there are STS and STO at 6th density which balance? And they are just there, they exist?

A: Reflection for balance.

Q: (L) Is there any kind of hierarchy to this thing? Do these beings come before some kind of “Grand Council” and make plans and discuss things, and make decisions and implement them?

A: No.

Q: (L) Well, how do things happen? Do things just sort of happen as a natural interaction of things and energies?

A: Yes.

Q: (V) If we are on the 3rd density and you are working with us and we are striving to make 4th density, at the same time are you, at 6th density, striving to reach 7th?

A: Yes.

Q: (T) Is helping us, helping you to reach 7th density? (V) Are there others at higher densities working with you as you are working with us?

A: No, we all reach 7th level together.

Q: (L) So, in other words, you guys are trying to bring us up and everybody else is coming up, and when all the pieces are back

together, we then go to 7th, is that it?

A: Yes.

Q: (T) So that is your purpose in helping us?

A: It's a natural process.

Q: (T) Will our function be, when we are at 6th density, to help others on 3rd, as you are doing?

A: Yes. We are you in the future.

Q: (T) When more than 50 per cent of the souls reach 6th density in preparation to go to 7th density, will all the rest of them automatically manifest into that density?

A: Not correct concept. You are using 3rd density "Brotherhood" inspired mathematical calculations and ideas.

Q: (J) So, there are no percentages involved in it. (T) So, we have to get every single soul up there. (V) I don't think it is as much that as that you can't apply 3rd density mathematics to that level. (T) Let's say a majority.

A: No. Still using 3rd density mathematics.

Q: (L) Okay, what criteria constitutes the means of this ultimate translation into 7th density?

A: The lessons completed.

Q: (J) Okay. (T) When all the souls transition to 7th density, will all the souls be integrated into one soul?

A: Close.

Q: (T) So that is why we have to get everybody, because we all become one on 7th density. (D) What will we then do to change the game and make it interesting again?

A: Don't have to "do" anything, has, will, is!!!

Q: (L) The fellow who wrote the Ultimate Frontier , was he channeling that information or did those events he described actually take place?

A: Yes and yes.

Q: (L) Was he, in fact, the reincarnation of King David as he claimed?

A: If he prefers.

Q: (L) He lost me when he went off on his thing about women and that souls reincarnated as only one sex. (J) No, that's not so and I think switching sex has a lot to do with homosexuality. (L) Yes. (T) But I do think that a soul has a tendency to be more of one than the other.

A: No.

Q: (L) I think it ends up being balanced.

A: It is all just lessons.

Q: (J) Does the human state of sexuality, such as homosexuality, have something to do with changing sexes from one lifetime to another?

A: Sometimes.

Q: (L) Of all the modes of sexual expression, which one is more likely to advance one to 4th density more rapidly?

A: Total celibacy.

Q: (D) Well then I'm okay! {laughter} (V) Can you explain why total celibacy?

A: Because you are then “letting go” of the cravings for physicality. {That is, celibacy when one has let go of cravings is effortless. Celibacy that is an effort is probably not positive because it is done in an effort to GET something, i.e. advance to 4D.}

Q: (T) It is a 3rd density act which entices you to 3rd density. (L) Okay, now, what is the second most likely for advancement? {laughter} (D) We have me taken care of, now we’re going to get you taken care of! (J) In order of importance... {laughter}

A: Does it matter?

Q: (D) It does to Laura, would you please answer? (L) I suppose that everyone should get to the point that they would simply desire to be totally celibate and totally let go of all physical things and so forth, but, we have left to us, at this point, heterosexuality, homosexuality, bisexuality and multisexuality {laughter} (D) We also have the ability to take pleasure in our physical bodies in those forms of sexuality. We have the ability to have pleasure in the flesh and they can’t. And, what I have read, is that they envy that. (L) Is that true, that you envy our physicality?

A: No. Not in the least!

Q: (L) I have read that when you are at the higher spiritual levels that you can do a spiritual merge which is better than orgasm. Is that true?

A: Why do you need orgasm of any kind?

Q: (L) Well, it does seem to be like one of the ultimate experiences of physicality. (T) That’s exactly it... it’s physicality... (L) If that is so, isn’t everything that exists in the physical, 3rd density world, in some way a reflection of experiences or states of being on higher realms?

A: 3rd density as you experience it is an illusion you have been

fed to continue your imprisonment therein.

Q: (L) So, in other words, there is no cosmic orgasm that keeps the worlds in existence as exemplified by the eternally copulating Vishnu and Shiva?

A: That is Bull! {laughter}

Q: (L) Well, they teach this stuff in the Eastern religions and they even have the idols sculpted in this posture...

A: That is a rationalization to continue the illusion.

Q: (L) So, in other words, the orgasmic experience is quite literally a lure to keep us... (D) Controlled... (T) And in the third level... (L) Is that true?

A: Yes.

Q: (L) Let's go back to a question I asked in another session on this same subject: what happens to our energy at the point of orgasm? Where does that energy go?

A: Drains to 4th level STS.

Q: (T) Is this a manifestation of the Lizards feeding off of us?

A: STSers there retrieve it.

Q: (T) So, orgasm is a 3rd density manifestation of the 4th density consumption of 3rd density energy?

A: One of their methods.

Q: (D) In "Bringers of the Dawn" it talks about sex and it says that it is an expression of love and so forth and that you should not have sex with someone who does not really love you.

A: Love is all that is needed.

Q: (L) If two individuals, as an expression of true love at higher levels, desire to express this love in a physical way, is it possible to channel the energy in a positive way without feeding the 4th level STS guys?

A: Nope.

Q: (L) In other words, no matter what you do, how you think, or whatever, that's where it goes?

A: Sex is a physical craving.

Q: (V) So, when the big transition comes, let me assume, anybody who is having sex at the time or has any kind of sexual relationships around that time is not going to transition because of that?
(L) I don't think so... **(V)** Well, I just want to get this clear. Is that true?

A: No. Transition is the "Millennium." A thousand years is the 3rd level interpretation.

Q: (L) So, for a thousand years we will be living as physical beings in 4th density... so to speak... making this transition during this period... and, by the time it is over we will have done away with our physical appetites?

A: Close. Some will be there at the beginning, others will need more "time."

Q: (T) So, when we are on the 4th density, we are still in the physical, and we will still be consuming, will we then be consuming that energy from 3rd density, the orgasmic energy, or something like that?

A: Some.

Q: (D) Even if we are STO?

A: Not if completely STO.

Q: (D) Then how do we get energy.... we get energy from each other. Which is more powerful... the service... well we have to be service to others... (L) That is because STO multiplies and grows... STS just fragments, segregates, and gets smaller and smaller... (J) The law of diminishing returns. (D) We can access or receive other's energies as we give our own?

A: Yes.

Q: (D) Well, then, that is where Service to Others is Service to Self. (L) Any last messages? I feel a lot of changing going on here. Is there anything for any of us in the way of guidance?

A: Only if requested specifically.

Q: (D) Am I contacting you when I channel at home?

A: Yes but be careful of corrupting influences. Soulsearh, T__.

Q: (T) I've been soul searching and soul surfing, too! Is Keen Industries going to do anything with me?

A: Wait and see.

Q: (T) Will I be able to contact you?

A: Here.

END OF SESSION

3.5 January 10, 1995

Frank and Laura

Q: (L) Hello. I wonder if they will show up?

A: We always show up.

Q: (L) Thank you very much. I have some pretty serious questions I want to ask tonight, so please be patient with me even if I do ask questions that are not quite in line.

A: Okay but such sessions drain you physically, thus must be kept short.

Q: (L) Okay, it will be short. I just have a few questions. The first question is: my doctor sent me to a chiropractor. This chiropractor does not adjust me like any chiropractor I have ever been to. In fact, I feel that he is making me worse.

A: Go to another.

Q: (L) Is this, in fact, some sort of a scam?

A: Money is only concern there. Not your welfare.

Q: (L) Okay, could you, at this point, access the names of chiropractors in our area and give me a recommendation... should I go to D*** H***? It's an awful long drive to make after adjustments.

A: That must be up to you. McG***.

{Turned out to actually be a local chiropractor; I went to him and had good results.}

Q: (L) I have here a diagram of my cellar and I am going to put it on the board and I would like you to please, locate it on this diagram?

A: Okay.

Q: (L) {Places diagram on table; planchette indicates location.} Is that the spot right there? {puts finger on spot.}

A: Yes.

Q: (L) Okay, thank you very much.

A: More than one place.

Q: (L) Oh, well sorry. {places diagram back on table; planchette moves and indicates location.} Okay, this sector here? Any other places? {planchette indicates 3rd place.}

A: Across steps underneath.

Q: (L) Is that all of it, now?

A: Maybe. Eccentric former owner died before he could retrieve.

Q: (L) What year was this put there?

A: Between 1933 and 1945.

Q: (L) On this one spot where I have my finger, how deep must we dig?

A: Near surface.

Q: (L) And this spot that goes under the steps?

A: Deeper.

Q: (L) So, he dug the hole and buried stuff and then he built the cellar and built the stairs on top of it, is that it? About how deep is this going to be?

A: Discover, but be careful of shifting sands.

Q: (L) I bet he dug the cellar and put it in to cover up his activities. What was this guy up to other than digging this cellar?

A: Seek records at city hall.

Q: (L) Do we have a well, a usable well, on our property?

A: Useable for what?

Q: (L) For drinking water.

A: It is 260 feet to good drinking water. To get crystalline water.

Q: (L) Is there a well here that would still pump water even if not for drinking?

A: Iron high.

Q: (L) Is there a pipe in the ground on this property that was formerly used as a well that could still be used?

A: Yes. Iron is too high for drinking.

Q: (L) Now, I am sure you are aware of how V__ is feeling. I think she took offense at the fact that you used the word “Bullshit” the other night...

A: V__ should talk!! Mirth! Word is used commonly by your people.

Q: (L) Well, I know that and I wasn't offended. I didn't say anything. Some words are offensive to me and I don't use them. She was also upset because you guys would not tell me about the Om 4th density resident that was in my daughter's room. Is Om an abbreviation for a type of being?

A: No, it is full word.

Q: (L) What is an Om being for the benefit of the whole world which waits breathlessly to discover the nature of this type of being?

A: Poltergeist-type being.

Q: (L) Was that Om being brought in because of the dimensional overlap or is it strictly related to my daughter?

A: Former mostly.

Q: (L) So poltergeist type beings can enter our density through these dimensional overlaps?

A: Sure.

Q: (L) V__ is talking about dropping out of the group because she says it is “no longer personal.” I would like to know what she really means by this?

A: The answers conflict with her personal desires and expectations.

Q: (L) Well, I had the feeling from the beginning that V__ was not capable of the type of objectivity needed to deal with absolutes. And then, every once in a while I would think that her dedication and determination would carry her far. But, apparently she is only dedicated and determined when it satisfies her own point of view. At times I was very sympathetic toward her struggle and then at other times I would get very agitated toward her because I don't suffer fools gladly. I expect that you guys are a lot more patient than I am. As things are at this moment, what are the chances she will come back to the group?

A: Open.

Q: (L) I didn't think you would tell me that one. Now, I have some articles in this magazine here: This is Lyssa Royal and she has “channeled for thousands around the globe since 1985. Her books and magazine articles are published in six languages worldwide. Etc., etc.,” She writes here: “The human consciousness is roughly divided into three different areas for the sake of this illustration: the conscious mind, the subconscious mind and the unconscious mind.” Now, are these labels generally correct?

A: Roughly.

Q: (L) She says: “The unconscious mind is a link to your greater self, it is also used as a wasteland where scary, dark things are stored that you really don't want to bring up.” Is this a fairly accurate statement?

A: Semi-accurate.

Q: (L) Is there anything you can say to make the statement more accurate?

A: The unconscious mind is also a conduit for connecting with the higher self, other selves, and the universal mind.

Q: (L) Lyssa also says: “When you are a child and have a traumatic event, the subconscious not only finds a way to immediately process the information and store it, but also to protect you from further fragmentation. It must seek to create a balance.” So, she says, the “very intense raw energy that is generated from trauma gets stuffed into the unconscious mind.” Is this true?

A: Close enough.

Q: (L) She then goes on to say: “When an extraterrestrial looks at us, we seem like multiple personality cases to them because of our mind divisions.” Is this true?

A: Irrelevant.

Q: (L) Why is that irrelevant? Is it because when a higher density being looks at us they know what they are looking at?

A: Yes. They know and understand the separations of your minds quite precisely. That would be like saying “when a human looks at a rodent, they notice that they are excessively furry.”

Q: (L) She goes on to say: “The ET often does not know how to communicate with a fragmented human. Sometimes they fly their ships by and few people may see them, but the greater percentage do not see them as that data gets sucked into the subconscious and the triage occurs.” She means triage in the sense of the mind being so flabbergasted that it immediately shunts information into the unconscious. Is this true, that ET’s are having problems communicating with us because we are the one’s

blocking contact?

A: No.

Q: (L) Is it true that some people may not see ET's or UFO's because they block it from their own minds?

A: This can happen or the blockage may be inspired by the alien.

Q: (L) Now, she says: "For the most part, the average person in society does not know how to interpret telepathic contact... (Lyssa's alien talking) in the moment you start perceiving us reality starts shifting because, remember, you are one frequency and we are another." Is this true?

A: It is irrelevant.

Q: (L) Why is that irrelevant?

A: This is not an obstacle, as suggested by this statement.

Q: (L) Anyway, the article goes on: "So an ET walks up to you in your backyard and for a fragment of a moment you may perceive us. But what commonly happens is that the human will suddenly shut down usually by becoming very sleepy and falling into a sleep or type of trance state such as one that is produced by alpha or theta brain waves." Is this true? When a person sees an ET do they just turn off from the shock? Is this why most ET contact is not remembered?

A: It can happen but does not usually.

Q: (L) It says that when you start clearing out the stuff in your subconscious mind that the first layer that comes out of the subconscious is simply the top layer of priorities that were given to your subconscious mind to store and process. For the most part the first layer is not scary. It represents procrastinated perceptions that are waiting for processing by the conscious mind... then you

start peeling off more layers through hypnosis or meditation and then...

A: We do not wish to further critique this as we can give all relevant and related information when needed. You are “comparing notes” which is fine if in moderation, but remember, separated sources are subject to variable corruption.

Q: (L) What is a separated source?

A: That which is separated from yours.

Q: (L) Somebody different from us? Okay, let me work on this. Our source is you, correct?

A: Yes.

Q: (L) So, the source this person is getting her information from is separated from you?

A: From you, thus unverifiable.

Q: (L) Well, I don't exactly get what you mean. The whole point of this article is to say that ET's who abduct people are here to help us evolve and that it is only us, if we have dark and dirty unconscious minds, who perceive them as negative.

A: Wrong, you do not need “help” evolving, nor does anything else.

Q: (L) Well, the thing that concerns me about this particular point of view is that a lot of people are using this to rationalize seeing the ET's and the abductions... can I read you just a little more?

A: Overall gist is enough for us.

Q: (L) This woman here, Dorothy Ann claims she channels dolphins and whales. Dolphins and whales are telling her that they are here to keep frequencies and to awaken energy centers on

the earth, and that they are very high level beings, for eons they have kept the electromagnetic grids in the oceans, they follow the old paths etc. The grids are now in the process of being reset and the whales will be instrumental in this change of the vibrational patterns on the planet.

A: No.

Q: (L) The dolphin kingdom has been empowered to communicate more easily with humans; the whales are awakening to their mission of greater contact and communication with other beings...

A: Nonsense.

Q: (L) So, I don't really need to go on because all of this is nonsense. Now, this guy here who channels this being called Kryon writes an article about the metaphysical Christ. I read this article and really liked it. It made me feel nice and good and pleasant. Well, I'm not even going to ask you because I like him. It says here on another page that the Milky Way galaxy is part of a system of loosely 20 other galaxies. Is this true?

A: Too vague, all systems can be measured thusly if desired.

Q: (L) So that is too arbitrary.

A: Also a system of every conceivable combination.

Q: (L) In any event, it says that all of these universes expand at the rate of 90% of the speed of light. The ultimate central sun of it all is what we vaguely call God.

A: We have already covered these areas and "God" is "Everything," not a central sun.

Q: (L) Well, he is talking about this 25 thousand year cycle where the earth passes into a photon belt that circles the Pleiadean sys-

tem, and, when this photon belt hits us it is going to make all kinds of changes and it one of the small cycles, and the harmonic convergence is...

A: Fragmented channel.

Q: (L) This guy is a fragmented channel? Is there such a thing as the harmonic convergence?

A: If you wish to converge harmonically, you may.

Q: (L) So there is no photon belt circling around the Pleiades that hits us every 25,000 years?

A: If this was true, don't you think we would have informed you by now?

Q: (L) Well, sometimes you don't inform us of things because we don't ask the specific questions. I just wanted to check this out. Okay, he is fragmented and I can forget that! Now, next question: As you know, there is some major flooding going on in California right now.

A: Yes.

Q: (L) You didn't tell us about this, did you?

A: Yes we did. We specifically mentioned weird weather all over.

Q: (L) Okay, I have communicated with this woman, this Marilynne, from the computer net, and she says she wants to move down here. She seems to be a very nice person. Anybody who does Reiki and cans applesauce is okay in my book. Is there anything you could say to her about her desire to move to this area?

A: Good idea!

Q: (L) Is one of the things I am supposed to be doing responding to IrishSir from the network even though he is so negative?

A: Of course, if you only network with those of like mind, what have you accomplished???

Q: (L) Now, our other little friend, SFPro, who says his mother is experiencing a ghost, who she thinks is her deceased husband, is this the case?

A: Maybe. Not crucial information.

Q: (L) Was the advice and information I gave him adequate?

A: Okay.

Q: (L) Should I see a lawyer about my accident?

A: Up to you. We are not here to lead you by the hand, because then you do not learn.

Q: (L) I would say you are right about that. L__ came over and told me that he thought that the information we were getting was quite accurate, based upon independent verification. Was he being sincere in this?

A: Yes.

Q: (L) H__ D__ told me that I was going to meet an older, retired person around the end of the year who was going to be very instrumental in my work. Is this going to happen

{Ark?}

A: Wait and see.

Q: (L) Are S__ and N__ going to be helpful?

A: Open.

Q: (L) Any information for either of us here?

A: No.

Q: (L) Well, thank you. (F) They give you information about yourself when it is necessary to prevent you from falling into a black hole.

Q: (L) Good Night.

END OF SESSION

3.6 January 11, 1995

Frank and Laura Barry and Susy Konicov, publishers of a popular New Age magazine, via telephone

Q: Is anyone with us?

A: Yes.

Q: Frank is talking with Susy Konicov. We'll put her on speakerphone.

A: Channel disrupted.

Q: (Susy) Are you from the same group as the Pleiadians?

A: Same. When at Pleiades, Pleiadians, when at Cassiopaea, Cassiopaeans. Light beings.

Q: (Susy) What kind of source are you?

A: 6th density.

Q: (Susy) Why are you choosing Laura and Frank to transmit this information?

A: Because balancing fields are correct.

Q: (Barry) Maitreya... What is the destiny of this person in this lifetime?

A: Plays prominent role in disinformation process.

Q: (Barry) Is Benjamin Creme aware of that?

A: No.

Q: (Barry) Are the E.T.s putting thoughts in Benjamin Creme's head?

A: Yes.

Q: (Barry) What is their purpose in this?

A: To cause confusion, diversion, and deception so that reality channels may be cloaked. Self explanatory.

Q: (Barry) Does this mean so that what we think is real really isn't?

A: Close.

Q: (Barry) This must mean that the Aliens want to give us one person to focus on which is so spectacular, so that we cannot see the truth.

A: Remember warnings about false prophets in the "desert."

Q: (Barry) Does this mean that Benjamin Creme is an STS person?

A: Yes, indirectly.

Q: (Barry) Is he the antichrist?

A: No. The "antichrist" is not an individual, but consortium.

Q: (Barry) Who is the Consortium?

A: Term refers to idea of large body of individuals.

Q: (L) Who specifically? (Frank) Human beings?

A: Yes and others.

Q: (Barry) Are these beings who have lived longer than most people live in one lifetime?

A: Confused thought patterns.

Q: (Barry) Are these people who have reincarnated for lifetime after lifetime and have kept the same memory to continue the same plan?

A: Only a select few.

Q: (Barry) Is this channeling going to go beyond the primitive method of one letter at a time, or is it going to go into the method of writing or typing or direct channeling consciously or unconsciously?

A: Can now, less danger of corruption through this method.

Q: (Barry) What is the purpose of this contact?

A: To help you to learn, thus gain knowledge, thus gain protection, thus progress.

Q: (Barry) What do the Cassiopaeans gain from this contact?

A: By helping you, we are moving toward fulfilling of our destiny of union with you and all else, thus completing the Grand cycle.

Q: (Barry) Is this the only probability open to you or is this the best probability open to you?

A: Both.

Q: (Barry) Are you a great distance from us in light years?

A: Distance is a 3rd density idea.

Q: (Barry) Light years is 3rd density?

A: Yes.

Q: (Barry) What do you mean by traveling on the wave?

A: Traveling on thoughts.

Q: (Frank) Our thoughts or your thoughts?

A: Not correct concept.

Q: (L) What is the correct concept?

A: All is just lessons.

Q: (L) Whose thoughts are they?

A: Thoughts unify all reality in existence and are all shared.

Q: (Susy) You travel on a wave of energy created by all thought forms?

A: Thought forms are all that exists!

Q: (Barry) Have those that are STS acknowledged that those that are STO are going to win in this race or conflict?

A: No, absolutely not! In fact, the STS cannot conceive of “losing” but instinctively feel pressure building upon them, that is the reason for the impending turmoil.

Q: (Barry) What happens to them when they lose, does this mean that they are degaussed, or does that mean that they have to go back and do the whole evolutionary process all over again on the other polarity?

A: Latter.

Q: (Barry) So, there is a nexus point coming up?

A: Close. When we said “close” we meant concept was “close” to reality. Not close in terms of time or distance.

Q: (Barry) At that point do they experience the pain that they have caused? (L) Good question!

A: No, that is what happens on 5th level only.

Q: (Barry) What is the proper protocol when meeting a Lizard?

A: Up to you!

Q: (Frank) I don't think I'll repeat that Barry. (L) Did he use the "F" word? (Frank) No, he referred to a part of the anatomy. (Barry) Are Lizards shape shifters?

A: All on 4th level of density have that ability.

Q: (Barry) Do they have the ability to block their true appearance?

A: Yes.

Q: (Barry) Are they walking around amongst us now?

A: Infrequently, they use "agents" to do most of their tasks on 3rd level.

Q: (Barry) Are these agents the "Men in Black" or are they the "Grays?"

A: Both and many others. Men in Black are often Lizards cloaked as human types, and can remain on 3rd density level for limited periods called short wave cycle. Men in Black claim to be government in order to have excuse to have direct contact with selected humans.

Q: (Barry) Have these Men in Black killed humans?

A: No.

Q: (Frank) They just threaten?

A: Yes.

Q: (Barry) Have the Lizards killed humans?

A: Oh yes!!!

Q: (Barry) There is a book out that says that if you meet the Buddha on the road you should kill him, should we do the same with a Lizard?

A: Strange.

Q: (Barry) Is there a physical confrontation going on in other than 3rd density that is resulting in bodies being blown apart and death and destruction and so on?

A: Not exactly, remember, you are applying 3rd level ideas to 4th level reality, which does not fit.

Q: (Barry) Does that mean that blowing bodies apart does not fit?

A: Yes.

Q: (Barry) But they do have physical bodies on the 4th level, don't they?

A: Transitory.

Q: (Barry) So are ours.

A: No, yours aren't.

Q: (Barry) Because they can shape-shift does that mean that if they were to be shattered they could bring their bodies back together again into the shape they just were?

A: Close.

Q: (Barry) Are the Lizards behind any of the apparitions of the Virgin Mary around the world?

A: Yes. All of them.

Q: (Barry) What is the purpose behind this?

A: Diversions and disinformation so that knowledge will be dispersed, therefore more will be open to attack.

Q: (L) If you think about it, propagating belief in the “old time religions” which include belief in hell or purgatory tend to put a person in a very vulnerable position because then they are open to thoughts of guilt, sin, and are therefore susceptible to thought control and terror.

A: Yes.

Q: (Susy) Theo, through the “Ashtar Command” Channeled through Yvonne Cole, predicted a landing of aliens in December 1994, was this a fabrication or was this a miscalculation?

A: Fabrication.

Q: (Susy) She is such a nice person...

A: Channel is deceived.

Q: (Susy) Who is really channeling through Yvonne Cole?

A: Agents of the Lizards, more disinformation. Who is not receiving disinformation, then, you ask? Well, you will know when you have opened your mind and have received much information; now message to you: Konicovs, we are aware of your work, and you are close to a major “breakthrough,” however, beware that STS forces are trying to defeat you, and we would suggest you slow down your battles against STS forces a little, so as to prevent too much heat from them coming down upon you!!

Q: (Susy) Are you talking about the de-taxing work Barry is doing?

A: Precisely.

Q: (L) Are they marking them?

A: Have already been watched closely.

Q: (L) Barry is not one to step back, so what can they do to protect themselves?

A: Knowledge is protection. Two calls recently.

Q: (L) Did you have two calls? About what or from who?

A: Had to do with “business” but was ruse.

Q: (L) Okay, I think that is all their questions. We thank you.
{Phone conversation is terminated}

Q: Are you still with us?

A: Yes.

Q: (L) Tell us what Barry and Susy think of the reading you just gave them?

A: Enthralled.

Q: (L) Well, they may call it a primitive method, but all the people who are doing straight channeling are producing straight crap.

Q: (L) As you know we have a very large hole in our cellar and we haven’t reached anything yet. Are you sure there is something under there?

A: Search carefully.

Q: (L) Could it be in the dirt that has already been taken out?

A: No.

Q: (L) Which way to go from where the hole is. How much deeper? I mean, I know you told us to keep on, but if we don’t

find something pretty soon... I mean, how much can you dig? The whole cellar will disappear into this hole.

A: Patience pays.

Q: (L) Well can you just tell me how much deeper...

A: Sift carefully.

Q: (L) Sift the sand that's already taken out or the sand that's coming out?

A: All.

Q: (L) Do we need to go deeper?

A: Maybe.

Q: (L) Do we need to go wider?

A: Patience!!!

Q: (L) Frank, do you know how big a hole there is in that cellar?
(F) No, but I'd love to see it. (laughter) (L) You and I could take this table and sit in that hole comfortably. (F) How long did it take you to dig that? (L) They've just been working on it today. (F) There could be tons of stuff inside the dirt. (L) Now, I'm in a real tough spot, guys. I've either got to go with P__, and his deal is pretty poor or do something else and I don't know what that would be. At least that is the only option I see. {Referring to real estate transaction.}

A: Sorry, but you must decide what to do it's part of learning process.

Q: (L) Are Barry and Susy going to play an important part in the work we are doing in the future?

A: Probably, but wait and see.

Q: (L) What is P__ thinking about the deal just now?

A: Money.

Q: (L) He wants the mortgage?

A: Why not negotiate and explain your position honestly?

Q: (L) That is what I am going to do.

A: He will understand delays better, no one can blame you for wanting best “deal.”

Q: (L) I want to ask one other thing, recently the personal effects of J__ O__ were found, can you tell us what kind of vehicle was driven out to that area in which those items were... {An unsolved local murder.}

A: Time for you to move on past this issue.

Q: (L) Jeannie {psychic of my acquaintance who was generally very accurate!} was talking to me and she said that she really thought JO was trying to get people to solve this mystery...

A: Aunt Clara strikes again.

Q: (L) Should I send Frank to Sharky? {My dentist.}

A: Up to you. Time to go.

Q: (L) Thank you and good night.

END OF SESSION

3.7 January 14, 1995

Frank, Laura, Terry and Jan, Tom M and Andrea

Q: (L) Is anyone with us?

A: Yes.

Q: (L) Who do we have with us tonight?

A: Hnorra.

Q: (L) Where are you from?

A: Cassiopaea.

Q: (L) Why is the movement so slow this evening?

A: It will speed up dramatically, so be patient. Send the little one away, please.

Q: (L) Why do the children have to be kept at a distance?

A: As protection against possible psychic damage as soul is not yet fully blossomed!

Q: (L) Does this mean that when a person's soul comes into their body at birth that it is kind of like reduced to a seed form or like the bud of a flower, and that the growing up years are either the rooting or...

A: It is a reawakening period.

Q: (L) Does that mean that when the soul comes into the body that it cannot, at that point, remember any of it's past experiences...

A: Cycle.

Q: (L) So it cycles like ebbing and flowing and that is the ebb point where there is very little awareness?

A: Something like that.

Q: (L) We have some questions and the first one is: You have told us in the past that you are us in the future and that you are moving this way to merge with us.

A: Yes.

Q: (L) As we measure time, how far in the future are you us?

A: Indeterminate as you measure time.

Q: (L) Does this mean that at the point in time when the wave arrives on the earth in this upcoming event that you have given us the information to plot the ETA, is that the time at which you will merge with us and become us in the future?

A: No, that is not the correct concept.

Q: (L) You have said that when the wave arrives that you will merge with us. Is this the same thing that you are talking about when you say that you are us in the future?

A: No.

Q: (L) So, we are talking about two separate events or subjects, or two separate points in space/time, is that correct?

A: No. You are again slipping into trying to apply 3rd density logic to higher levels of density reality.

Q: (L) So, this is pick on Laura night!

A: No. We are trying to help everyone to advance.

Q: (L) So, we are not talking about the same event...

A: What is "future," anyway?

Q: (L) The future is simultaneous events, just different locales in space/time, just a different focus of consciousness, is that correct?

A: Yea, so if that is true, why try to apply linear thinking here, you see, we are merging with you right now!

Q: (L) I see. (T) So, what you are trying to say is that when the wave comes it is going to take us to 4th density, if we are ready, but we are not actually going to merge with you in 6th density at that point, but we may experience a “merge” at that point because all points of focus merge during transition from one density to another?

A: Partly correct, partly way off.

Q: (J) What part is right and what part is wrong? (T) The wave is going to take those of us who are, at that point ready, to move us into 4th density, is this part correct?

A: Open.

Q: (T) Which part of it is open?

A: You are a 4th density candidate.

Q: (T) So, we are 4th density candidates but that doesn't necessarily mean that we will make it into 4th density, true?

A: Partly.

Q: (T) As 4th density candidates, anyone that is, when the wave comes, if they have reached the correct frequency vibration, and have raised themselves up to the point that the wave will take them, they will, at that point, move into 4th density, true?

A: Close enough.

Q: (T) Now, when those who move into 4th density make the move, will they experience a completeness or merge with all other densities of their being, at that point, even if it is for a short time?

A: For one immeasurably small instant, this is what is meant by “illumination”!

Q: (T) But, for that small instant, because there really is no time, maybe an instant or an aeon, depending on how any individual might measure it, we might experience oneness with ourselves?

A: It may seem to last “forever.”

Q: (L) Is this what is known as the “rapture?”

A: Some have attempted to explain instinctive thought patterns this way.

Q: (L) Is the moving into 4th density, and the understanding we have of it, which is the possible transcending or leaving a 3rd density earth, which is under great assault in terms of cataclysmic activity and so forth, and moving to a place where none of that is apparent, is this what is known as the “rapture?”

A: Laura, you are reaching.

Q: (L) Well, Jan and I were talking about it this week, it’s her fault. Don’t blame it on me. (J) It’s my fault. (L) Jan made me do it. {laughter}

A: Jan is the “boogie” man!

Q: (L) That’s right, Jan is the boogie man, she did it. (J) Wait a minute! (T) You took responsibility. (J) No, I kinda like that! Thank you. (L) We have a couple of questions that can be answered, I think, fairly quickly, so let’s get them out of the way. Jan, as you know, her mother passed away yesterday morning, and she is very interested in knowing where her mother is at this point, and what condition she finds herself in. Can you give her this information?

A: She is at 5th level density now.

Q: (L) Is she finding her introduction to this level to be pleasant?

A: That is subjective.

Q: (L) I knew that was coming. Any more questions on that, Jan, I don't want to get fussed at. (J) No, that's alright. Has my mother been having OBE's in the last month?

A: Yes.

Q: (L) Now, Terry had a very interesting experience when he was standing outside his house.

A: Terry has many of those.

Q: (T) Yes, thank you, I do. It's amazing how they come to me. I was standing outside. There's a lot of cats in the neighborhood and we, ourselves, have six cats. They look at one a lot and I recognize cats for cats and don't think it is possible that I made a mistake in this. A cat came around one of the trees across the street from me, and it wasn't a regular cat. It was much larger. It looked at me and hunched down into it's cat-like stance and locked on me. Was this a real cat, or a bob cat?

A: Yes, it was a bobcat from Northeastern Pinellas Piney woods preserve.

Q: (L) Is there a preserve in that direction from you? (T) Yes, it is up on the Pasco/Pinellas border, down from us here as a matter of fact.

A: Up from you, Terry. Learn direction better, please. Compass awareness is to be vital in the future.

Q: (T) I know it is up from me, but I am north of the place now and I'm talking as if I am in St. Petersburg, saying up from me, but it is south of me at the moment.

A: Incorrect, you were speaking from home in your mind.

Q: (T) True. (L) Busted! (T) You guys are cool! (L) What was it you said, "Love a 6th density dude with a sense of humor!"

A: Yes.

Q: (T) Are there dudes and dudesses up there?

A: Yes, cool dudes and dudesses! (laughter)

Q: (L) Now, come on, stop it, I am trying to get a question in here!

A: Stop what?

Q: (L) Stop fooling around, I want to get these questions done.

A: But we are having fun, is there anything wrong with that?

Q: (L) No, but I want to get through my questions. (T) Lighten up, a fun session is something we need.

A: Uptight. {laughter}

Q: (T) We got a live one tonight.

A: Yes.

Q: (L) It's because of you, Terry. (T) Thank you. (L) You got all this practical joke business going...

A: No, Andrea.

Q: (T) Andrea! My goodness. {laughter} Why Andrea?

A: She is fun loving.

Q: (T) Okay, we're having fun tonight. Go on, ask the next question. (L) Can I ask my question now?

A: Oh, what the hell, go for it!

Q: (T) I didn't know W.C. Fields had made it to 6th level. {laughter} (L) Seriously now...

A: Seriously now, folks!

Q: (L) The other night as I was reading by the window, I saw something white pass by the window. In order for anything to pass that window, it would have to be very tall or floating. Also, my dogs would not have allowed anything to be passing by my window unless they were dead, drugged or paralyzed in some way. After a few minutes I explained it to myself as having just seen my cigarette smoke float by in my peripheral vision, but, after thinking a while, I realized that after all these years of smoking, I have an acute sense of what smoke is and where it is around me. Therefore, I think that some sort of awareness cued me that I was seeing something besides a waft of smoke. Can you tell me what it was, outside my window, or was it just my cigarette smoke?

A: You are gradually experiencing more and more “bleed-throughs” of 4th density.

Q: (L) What did I see go by my window?

A: Fourth density energy source.

Q: (L) Is an energy source like an entity or being?

A: Tell us what you imagine 4th density to be like, Laura?

Q: (L) Well, I have no idea. (T) Good answer.

A: Okay, then please try harder to discover.

Q: (L) Do you mean right now?

A: Yes.

Q: (J) Can we help?

A: Yes. You see without further progress in this area, we cannot adequately explain details of 4th density life.

Q: (L) Alright guys, how do we imagine 4th density life to be. (T) Let me ask a question first.

A: Free association.

Q: (T) Is this energy source that she saw not necessarily a being or an entity, but loose energy being transmitted from 4th density?

A: Answer to that depends upon greater understanding of 4th level reality.

Q: (L) Why do I have this gripping and pinching sensation on the back of my neck right at this moment?

A: We are blasting open your learning chakra.

Q: (T) Did it just start? (L) Oh, yes. It feels like I am being gripped by a pair of pincers right at the base of my neck. Okay, 4th density is like, am I correct, that it is similar to the dream state. The instant you think something or focus on it, it happens or becomes real?

A: Continue.

Q: (L) And that, for example, if you wished to be on a boat on the water, that you would find yourself on a boat on what is actually a more real ocean than the ocean we experience here, because, in every way it matches your expectations, down to the glints of sunlight on the water..

A: Slip 4th.

Q: (J) Like slipping gears? (L) Am I slipping?

A: Yes. Why do you need a boat?

Q: (L) Well, just because in that particular fantasy the idea is to be on a boat. (T) But it is not a fantasy. (L) It is reality. Okay. So, in other words, 4th density is a realm where your thoughts

instantly manifest as reality. If, for example, you think of yourself being a princess in a tower, a castle would manifest and you would be in a tower, and if you wanted your hair to hang down to the ground, it would hang down too.

A: That is 5th level stuff.

Q: (L) Okay, so, we have something in between that and 3rd level.

A: Continue.

Q: (T) Does it closely resemble 3rd density, but different in some manner?

A: No.

Q: (T) You were saying that when the transition comes about that there would be a 3rd and 4th level earth, and some people would be 3rd density on the 3rd density earth, and some would be 4th density on the 4th level earth.

A: One possibility for you to ponder.

Q: (L) Okay, let's take a short break... [break] Now, guys, I guess you have been listening to our discussion and you listened to Jan read the paragraph from the article about 4th density experience being the highest level of wishful thinking, that wishful thinking becomes reality... (J) Or did I take it out of context?

A: Close. STS.

Q: (L) So, STO wishful thinking...

A: STO does not wishfully think.

Q: (L) Well, how does STO think? (T) Responsibly... (L)[experiencing acute pinching feeling at nape of neck] God! You guys are doing strange things to my body...

A: Helpful and balanced. Wishes are strictly STS.

Q: (L) So, acceptance of experience in the sense of just allowing things to happen and responding in a balanced and helpful way is an STO response or experience in 4th density, is that correct?

A: Close.

Q: (L) And therefore, seeing things moving past such as what I saw by my window, and responding to them basically in an open, curious, and allowing way would have been an STO response, is that correct?

A: Maybe.

Q: (T) It depends on how you respond curiously. (T) The Lizzies are hanging out in 4th density too, and they are not STO, are they?

A: Correct.

Q: (T) So, they are not having STO helpful, responsible..

A: True.

Q: (T) So, in 4th density, both types can still happen?

A: Yes.

Q: (T) The desired type is the STO type thinking...?

A: Yes.

Q: (T) But STS thinking is also available if that is the way you decide to go when you get there?

A: Yes.

Q: (T) This of course limits you in your ability to move up to 6th density?

A: Yes.

Q: (T) Once you are in 4th density, if you choose STS, can you change it to STO?

A: Yes.

Q: (T) So you can move back and forth as you so desire and it is all still free will?

A: If you move from STS to STO in 4th level, you don't move back.

Q: (T) Once you are STS in 4th density you have to stay there?
(L) No. (J) If you move from STS to STO in 4th density you don't go back to STS, you stay at STO, is that correct? (T) That's what I mean, once you have decided to do STO, that's where you stay because you don't have any desire to go back to STS?

A: Yes.

Q: (T) So, it is not so much that you don't have a choice, it is just that you don't want to go back to STS?

A: Yes.

Q: (T) So if you move up and do what the Lizards are doing, then you continue to do that until you get tired of it or see different, or become enlightened and then move to STO and then that's where you will want to stay?

A: Open.

Q: (T) Can you move from STO back to STS? I know you said you can't, but that's because you choose not to?

A: Natural factors prohibit this.

Q: (L) So, I guess that once you get to STO natural factors, the nature of that position is that you just simply don't... it just doesn't happen.

A: Now, blockbuster for you: 3rd level beings who reach total STO profile automatically and instantaneously go to 4th level at moment achieved!

Q: (T) They just vanish? Have people done that before here?

A: Yes.

Q: (F) Yeah, I've heard of that. (T) Sure, people disappear that all the time. (L) Well, I don't think it happens that often, but I think it happens... (F) It has happened. (J) People disappear and you never hear what happened to them. (F) There have been cases where people have suddenly vanished, where a flash of light has just hit them and Poof! (T) Like spontaneous combustion... (F) No... (J) Not spontaneous combustion because the body is left behind. (F) There have been cases where people were actually sitting with other people and suddenly everybody present suddenly sees a blinding flash of light and that person is Spffft! Gonzerooni! (L) Gonzerooni? (F) Once and for all! (T) I want to ask this question, if it has already been asked, somebody stop me, what is the total STO profile? (L) Total lack of concern for self.

A: Yes.

Q: (L) So, in other words, you don't do anything or think anything in terms of fulfilling or doing for self. You always think in terms of doing or fulfilling for others. (T) Damn, I've got a long way to go then... (Chorus) Don't we all! (J) Was Gandhi?

A: No.

Q: (T) Mother Theresa?

A: No. Political deceptions.

Q: (J) Mother Theresa is a political deception? (laughter) (L) Let me ask this question... it is on a little bit different subject right

now, but I am kind of stretching my brain right now and I need a little bit of a relief there and then we will come back...

A: You are off balance this session due to a “bug” in your body. You have a bacterial overgrowth in your intestines.

Q: (L) Okay, I was talking to Jan earlier about real estate in Pasco and Pinellas counties and the differences and so forth, and I made the suggestion or statement that they might want to sell their house in St. Pete and move to Pasco County. What do you think of that?

A: Okay.

Q: (L) Is that all you think of it?

A: What else?

Q: (L) I just wanted to know if you thought it would be advisable?

A: Open.

Q: (L) Now, I want to ask about these KROLL documents that Sally has told me about and is sending. Tell us what is the background and validity of the KROLL papers. Terry knows more about them than I do. Supposedly it is some kind of exposition written by an alien being revealing the government conspiracy. Were the KROLL papers valid? (T) KROLL was supposedly a prisoner of the United States. (L) Was there really such a being as KROLL?

A: Semi.

Q: (T) Is there any validity to the KROLL papers?

A: Semi.

Q: (T) Was it dictated by this alien being?

A: Maybe.

Q: (T) Was it put together by a human?

A: Semi.

Q: (T) Is this in the same area of UFO lore as the Cooper and Lear and Lazar and Bennewitz stuff?

A: We have told you many times... Laura, pay attention... Listen!

Q: (L) Well, you say semi. Semi means half-way. Is it half true or half-way true?

A: Whoa! Calm down! Patience, my love!

Q: (T) Should we put about the same amount of validity we have in the other UFO documents?

A: Stop now!!!!

Q: (L) Is this an area we can't talk about now because it is too delicate?

A: No!!!!!!

Q: (F) What the H is going on?

A: We are trying to tell you something important, and you keep asking questions. Now, please, silence for a moment!!!! We have told you many times to communicate with each other and network and share ideas, because that is how you LEARN and PROGRESS! But, you are beginning to rely on us for all your answers, and you do not LEARN that way!!!!!! Now, try this, you will be thunderstruck with the results: Each of you has stored within you unlimited amounts of factual and "Earthshaking" information. This information was put into your consciousness in order for you to retrieve it in order for you to learn. Now just start by holding a discussion about the last series of questions you were trying to ask us, and "let it flow."

Q: (T) I have a question for you Laura, does that feel weaker? {Tom is giving Reiki to Laura's neck} (L) Well, it's not hot like it used to be, and I am just wondering, since you took the second attunements from Jim G... let's just ask... Is Tom's Reiki cancelled by Jim G's. initiation?

A: Faltering.

Q: (L) But he had good Reiki to begin with and it will be okay for me right now?

A: Open.

{At this point the group reviewed the comments that had been made regarding several persons prominently involved in UFO research who had also been involved or quoted in the Krill document. This gave us a starting point in evaluating the material. The reader may wish to recall said comments from earlier sections. Don Ware was brought up because he was also mentioned, though he had not been involved in the KRL papers.}

Q: (L) Who is Don Ware. I asked about him because JW gave me a list of names.

(T) Okay Don Ware used to be the Regional MUFON director over on the East Coast, and he got run out because he was moving into the metaphysical side of the phenomenon and MUFON is a nuts and bolts operation. They don't want to hear this kind of stuff at all. (F) I know they don't because they are looking strictly at it as... (T) They are trying to get scientific credibility...

(F) Well, yes, and they want a UFO to land that you can go up to and take a hammer and go Plink, plink, plink! It's Here!

(T) They want to know where the aliens are from, what they are up to, what kind of propulsion systems they use, how they build them, which... I have reached the opinion that MUFON is the con-

tinuation of Project Bluebook. When they closed Project Bluebook, they went out and subverted the UFO groups starting with NICAP and APRO and MUFON is one of the latest of the groups that changes from one type of group to another and all the information that is gathered in the field, goes to Texas and there it disappears and no one ever hears about it again. The Black Hole of Texas.

(L) So, in other words, if John Lear and William Cooper are getting the Cassiopaeon Seal of Approval, and they are saying basically the same thing the KRLI document is saying, where did they get their information?

(T) One of the thoughts on that was Moore or Lear or Bennewitz, one of these, was the one that had written the KRLI papers. There was some talk that KRLI may have been an acronym used by the government to identify this being who gave the information which is the basis of this document.

(L) To your knowledge, would Lear or Cooper ever have been in a position, or did they ever at any time claim to have been in a position, to observe any of this activity written up in this document themselves?

(T) I don't believe that either of them have ever claimed to have been in a position to have physically observed any of this or to have been in the underground bases. They were working with information they claimed to have gotten from other sources.

(L) And what do they claim their other sources are, unnamed?

(T) A lot of them are unnamed. Moore and Cooper claim they have inside government sources. I believe Cooper is the one who claims that he at one time worked for the military. In fact he was Air Force, I believe.

(L) Is he the one who claims that he was the intelligence analyst

for the Admiral of the Pacific Fleet?

(T) Yes. There are several versions of the Cooper papers as he modifies and updates them. He didn't change anything really, he just cleaned them up, re-edited them and added to them.

(L) Okay, if this is the case, it would seem to me that a person would have a much better chance of having something believed if they presented it as coming from a human source who either observed or saw it. Why would they say that this is an alien dictating this when that is so far and away more unbelievable? It seems to me that if they were making it up they would have far better chance if they said a human extracted this information rather than that it is what the alien said. That would almost tend, in a backward sort of way, to make you think that maybe this KROLL dude, maybe it was true. But, the only thing about that is, if it was an alien, especially if it was an STS alien, how much of it was true? That's the question.

(T) Well, KROLL was supposed to be one of the standard Grays.

(L) Well, then, we can't rely on anything he says. We can rely on the fact that it is possible that it was an alien who gave this information, but if it was one of the standard Grays, then we know who and what they are and we have to look at the information itself as being unreliable, not necessarily the human who revealed the scenario.

(F) Well, it is not necessarily unreliable even if it is an STS source.

(L) Yes, but as STS they would undoubtedly only give information that would tend to service their position.

(F) That would seem to be the case if you look at it from the obvious angle. But, that is not necessarily true. Just because it is an STS alien, and, in fact, a cybergenetic being, that does not mean that the information is necessarily inaccurate for several

reasons. For those of us who have reached a certain level of understanding, our first assumption would be that it is inaccurate, so it could be a reverse psychology ploy. Give accurate information, get those who are at a higher level of understanding to think it's inaccurate, when in actuality it is accurate.

(L) Well, do you know what it said? It says, basically, what we have been getting here.

(F) Well, then it is accurate.

(T) If this is a standard cybergenetic Gray, the question is how much biological is he? Is he biological enough to pass a dissection?

(L) Sure, absolutely. There are reports of autopsies of these guys, they just can't figure out how they feed.

(F) They are cybergenetic, but they look and function exactly like a biological being. If you go inside of them you will find blood and fibers and tissue and microscopic evidence...

(L) The microscopic exams, from what I have heard, reveal that they're more in the line of a plant...

(T) Yes.

(F) Which, of course, would indicate that they have been grown!

(L) Yes. Imagine chromosomal linking of human genetic information with that of the plant kingdom.

(T) You could literally grow hundreds of them easily.

(L) And plant them like seeds... and, apparently that is what they have done. People have come back who have been taken to these ships and have seen walls of containers growing these things. Like a room in a hot house.

(F) Well, there you go. We have gotten information which indicates that the Grays have access to both dimensions because they are probes of the Lizzies. And this gives us a further clue as to what a strange place 4th level is if such “probes” can be grown like plants! And, what level must fully souled 4d beings be when we are fooled into believing their cybergenetic constructions are the “real thing!”

(T) Does this mean that the abilities of the Lizzies, since they have to create “probes” to enter our density, would not be any more advanced than, say, your everyday spirit? Without the Grays, would they be able to interact with us at all?

(F) Yes.

(L) Yes, they are, they have, they will and they do. (F) But, there are several problems. One is their appearance is very, very alarming...

(J) They would garner a lot of attention if they walked down the street.

(T) It depends on how they dress themselves.

(L) They can shape-shift.

(F) They can shape-shift, but only for a limited period of time.

(L) Because it takes 3rd density energy to do that.

(F) That brings up something, when we were talking to Susy on the phone the other night, Susy and Barry mentioned the Men In Black. The response said that the Men In Black were “Lizard beings.” In many reports of Men In Black, they have been described as very strange in numerous ways. Their voices have been described as sounding like they come from an echo chamber, and...

(T) Well, when we asked about the Men in Black in one of the sessions, what did the Cassiopaeans say? That they are “Projections.”

(J) Exactly, maybe that is a clue, maybe that is how they come into our reality: as projections from 4th into 3rd.

(F) But, there is one case that always sticks in my mind, and it took place relatively recently, on April 28, 1978, a guy in Maine who had been doing UFO research, was accosted by a single Man in Black. He said the guy was very strange in many ways. He had pink... his face looked like it was covered with make-up, and, in fact, when he touched himself at one point and his face started to smear as if it was completely covered. And then, he suddenly got up and said: “Have to go now... run-n-n-ing out of e- ner-gy.” Then he walked out of the house and staggered down the drive. They guy said that at that point he became somewhat disoriented as he watched the Man in Black start to stagger....

(L) He was not the Energizer Bunny! {laughter}

(F) And then the man saw a light that he at first thought was the headlight of a car, but the Man in Black walked into the light and was gone.

(J) Projections! That’s how they move from 4th to 3rd.

(L) They said they project as a “triage.” Remember. It was something like travel in space/time.

(T) Well, we have gotten off the discussion of KRLL, but we have certainly been led into some pretty amazing conclusions about 4th level.

(F) Maybe KRLL is just Kaput, at this point.

(L) Who cares about KRLL? We just use them and throw them away! {laughter}

(T) That's what I was getting at... should we treat our standard UFO stuff... I mean, we are beyond that now...

(J) Yes, we are...

(T) with what we are working with here...

(F) All of what we have worked with over the years, the ideas of it being nuts and bolts, which I originally thought too, and it's clear if one has been following the whole phenomenon closely, it has evolved, actually, from a nuts-and-bolts perspective, and I am not knocking nuts-and-bolts, but those who are really looking with an open mind are seeing that this is far more.

(L) Alright, here it is guys... {had been looking for references to Men In Black} ... Who or what are the Men in Black? Lizard Projections.

(T) We got on to that because we were asking about the projection of the guy in the Camaro that showed up in my driveway.

(L) Okay. Does this mean that the Lizards are just projecting an image of a being? And, the answer was "yes." At that point Terry asked: "The MIBs are not real in our physical terms?" And the answer: "Partly correct. You do not understand technology but we will describe it if you like. First we must explain further "time travel" because the two concepts are closely related. The first step is to artificially induce an electro-magnetic field. This opens the door between dimensions of reality. Next, thoughts must be channeled by participant in order to access reality bonding channel. They must then focus the energy to the proper dimensional bridge, the electrons must be arranged in correct frequency wave, and then the triage must be sent through realm curtain in order to balance perceptions at all density levels. Triage is as follows: 1. Matter; 2. Energy; 3. Perception of reality." In other words they send through...

(J) Holographic images.

(T) They transmit energy that takes matter here and creates what we perceive, and what we perceive depends on...

(L) No, no, no... I know what it is... the triage must be sent through... the triage is that the matter becomes energy which then becomes perception and when it hits the other side of the curtain, the perception reconverts to energy which then coagulates as matter... it is like doing a back-flip through the realm curtain.

(T) And what the individual sees depends upon what they expect to see, which the Lizzies have to tap into first before they do the triage... that is the “reality bonding channel.” If you are open to see Men in Black, even if you don’t know what they are, then at some level of consciousness...

(F) But I think this is not just limited to Men In Black.

(L) Listen to this! “Several times I have heard references to big rectangular boxes, I would like to know who these belong to?” And the answer was: “Lizard projections...” What are they doing, projecting their whole damn reality into our world?

(F) Well, apparently part of the whole process of going from 4th to 3rd is the “projection” process itself.

(T) Yes, you have to move backward somehow.

(F) This also, of course, explains much of what we have read and heard about in terms of higher phenomena. You cannot ground it at all. So many people have fallen off the track by expecting to capture metallic craft and dissect them, and, while that does happen...

(J) And the whole concept of what’s wrong with science now is that they can’t hold it or measure it, or see it physically because

it doesn't exist!

(F) That is where material science falls apart. It is stuck in a vicious cycle.

(J) Yes, and it is using it's own rules to make itself obsolete!

(F) Right!

(T) So, the bottom line is, we have simply gone beyond the KRLI stuff, the Cooper and Lear stuff, and so on.

(F) Which is one of the reasons why the Cassiopaeans keep telling us to stop asking these stupid questions.

(T) We don't need to go into all that. (F) Yes, that's UFO's 101.

(J) Yeah, right, we've moved beyond all that.

(T) There's another thing that is even more interesting and that is that we are not alone in this density, there are other beings on other planets also. And, it just may be that some of them are coming here just to throw some more stuff in the soup to keep us confused as to which or who is what.

(F) I have a feeling, though, that probably, everything that we have experienced in the UFO area over the many years is a passage from higher levels of density to this one. I don't think that we have ever experienced a 3rd to 3rd transfer. That is just my feeling. And, it is only just now that people are beginning to realize that. In other words...

(T) Well, that is what Vallee thinks, along those lines, so he is just looking at interdimensional, because...

(F) But Vallee is also a material scientist so he is examining it in a scientific way. He is a little more open-minded than some who would just say it is impossible because we haven't discovered it yet...

(J) Yeah, our name isn't on it so it doesn't exist...

(F) But, he is doing it in a very careful way.

(L) Well, have we done enough with KRLL? (T) Yeah, I think we have done more than enough with KRLL. (L) KRLL is irrelevant. I think we need to be more careful about our questions. (J) I would like to ask if this is a mode of learning the Cassiopaeans would like to see us pursue on a regular basis? (L) Okay. Consider it asked..

A: Would be a good idea.

Q: (L) I do have a question that I don't know if we could discuss it and work it out because it is a real outside one. I would like to know if the soul's electromagnetic pattern can be forcibly altered, from the outside, by another being, force, or source of energy?

A: No.

Q: (L) Is a person's soul pattern determined by the cumulative experiences of that individual?

A: Part of the equation.

Q: (L) Does a person carry within their soul pattern memories of every single incident, event or happening that has ever occurred to them throughout all realms of their experience?

A: Memories are imprint of "Past, Present and Future."

Q: (L) So, if the imprint is there... (J) "We are you in the future!" (L) Right, so if the imprint is there, and no outside force including Lizzies or Orions can...

A: You can remember us.

Q: (L) The point I am trying to get at here is that, at some level, anything that happens to us can be accessed, correct?

A: Yes.

Q: (L) And it is incorrect to say that any other being can come and erase some part of our experience and replace it with their own creation in any way, shape, form or fashion?

A: Nonsense!

Q: (J) Ask if I should give “Childhood’s End” to Laura to read. I think there is some very important information in there.

A: Up to you.

Q: (J) Never mind! (L) Of course you should lend it to me. You know I read everything in sight!

A: Jan, are you going to ask us what socks to wear tomorrow?

Q: (L) Do you wear socks, Jan? (J) No. (T) What socks should she wear tomorrow? (L) Terry!

A: Red with white stripes.

Q: (J) I’m sorry. I shouldn’t have gotten off line. (L) Now, here’s a couple of things I would like to ask about and I am not asking about because I want... because we have already discussed this at some length. Some time ago I asked about the “Wise Baby” dream, that is about the baby that was ten days old and quoting Shakespeare, and I thought this was unusual and asked about it. You said I should discover. Well, Mother had a similar dream the other day. She did not know about my dream, but we both dreamed about talking babies. This is mentioned in the Budd Hopkins book. The significant things about these dreams is the talking baby. The passage in the Budd Hopkin’s book describes the woman who underwent hypnotic regression to investigate her “Wise Baby” dream and discovered that the dream was not the reality. In my and my mother’s dream there were individuals present who pronounced the baby to be evil and who advised

us not to interact with it. The day following the dream we both felt very uncomfortable, ill-at-ease, and slightly depressed. In the book, the woman who had the dream said it was a “feel good” dream and she liked it. But then she found out it was not such a good dream. My question about this is, at a very deep level, what does this baby represent?

A: Nothing.

Q: (L) Is the baby a cover memory or a screen memory of another event?

A: Maybe.

Q: (L) We hashed it around and Jan pointed out that in both dreams there was somebody in the dream who told us not to listen to the baby. Who does this person telling us not to listen to this baby represent? Is this information from you guys in our dreams telling us not to listen to this baby? Is this baby, in fact, a screen memory of an interaction with an alien of some sort? i.e. Grays or Lizzies?

A: Differs.

Q: (L) What differs? (T) It wasn't an interaction with the Grays or the Lizzies. (L) Okay, can you tell me...

A: Each is individual.

Q: (L) So this means that my dream is different from my mother's dream and both are different from the dream of the woman in the book?

A: Yes.

Q: (L) Well, I guess that if I want to know more about the dream I can do a meditation or hypnosis.

A: Bingo!

Q: (L) Terry and I were discussing the migration of objects underground. As you know, we dug where you told us to dig and we did find a space underground where something obviously had been. We then found that the ground was soft.

A: Yes.

Q: (L) And it was as though somebody had dug very deep but moving in a strange direction. Well, Terry, interestingly, had read a work on the tendency of objects to move underground stimulated by the drainage of water through the earth. It almost seems that the pattern of this soft sand is toward an area where there is water. Could it be possible that something could migrate through the sand this way?

A: Yes.

Q: (L) And would it migrate toward an area where water flows through the ground?

A: Yes.

Q: (L) And could it migrate that distance in, say, 50 or 60 years?

A: Sure!

Q: (L) And, in order to migrate that distance in that period of time, what would the approximate weight of an object have to be?

A: Open.

Q: (T) It doesn't matter. The weight of the object is irrelevant to the movement. The thought crosses my mind, what if it was dug deliberately as a tunnel?

A: Yes. Are you onto something? Hmmm?

Q: (L) So, my husband's idea to expand the cellar, to brace the corners with blocks as he digs, in order to prevent cave-in...

(F) Did you find a place when you dug that looked like a place where somebody had put something? (L) There was a hollow space under the cement floor. Under this was the soft sand area which continues to extend downward and outward surrounded by hard packed sand. (F) Well, obviously something was there. (L) Was this something that has been moved already?

A: Discover, it is fun.

Q: (L) Well my thoughts are, also, interestingly, because out of this whole project has come the idea of expanding the cellar which will then make a space that you can go into and stand instead of just a root cellar. Do you guys have plans for this room we are building?

A: Who knows?

Q: (L) It occurred to me as I was thinking about it: remember when we were talking about Noah and the ark and how we were told that the symbolism was that Noah just built an ark because it seemed like a good idea at the time and later it came in handy. (T) And you are digging this out because it seems like a good idea but you don't know why yet. Maybe there is some other reason and maybe you will find something in the digging, too. But, you are also going to end up with an expanded basement and there may be another reason for it. But, you don't know that yet and they are not going to tell you! (J) You'll find out when the time is right. (T) You are already started in that direction. (L) Yeah. He said since he has already done all this digging he might as well finish the job. (T) It may not be for a flood or an earthquake or whatever, it just may be useful for something else. Maybe you're just supposed to get that finished so we can move our sessions downstairs!

A: You are learning, Bravo!

Q: (T) Well, we are back on the right track. So, you have to continue digging! (L) Gee, thanks! (T) Well, that is where the fun is! It's a treasure hunt!

A: And you might just find something verrrry interesting!!!

Q: (L) Jan and I are very curious about artistic expression at 4th density. We experience art and music in a very positive and moving way, most of us, in this realm, and sometimes music can be very sublime and very transforming. It can move one in a lot of very unusual ways. What is it like in 4th density?

A: In 4th, you can "see" sounds and "hear" colors, for example.

Q: (L) Is this, now you guys just calm down when I ask this question... (F) I know what you are going to ask... (L) No remarks, okay? Many years ago when I was a child of the 60's and 70's, I tried some LSD. (T) I know exactly what you are going to ask, yeah, because I've seen it too! (J) Yes. (L) In a major way! Geometric patterns and colors manifested with music. (T) Yes! (L) Is this what we are talking about here?

A: Bingo!

Q: (L) So, in other words...

A: The answer to your next question is yes, you experienced a bleed through of 4th density.

Q: (F) In other words an acid trip is like a glimpse into 4th density. (L) Do you recommend this method for accessing this type of reality.

A: Open.

Q: (T) Well, the problem is that some people would want to do that all the time and not work on doing it in a natural way.

A: Yes.

Q: (T) And other people would use it and abuse it and use it as an excuse. (J) And damage themselves. (L) Yes, it is obviously something that has to be very carefully handled. We can't encourage this. {My experience with it was not extremely pleasant, to put it mildly and I never let anybody talk me into something like that again!} (J) Is that like the concept of adding additional dimensions to the 3 we normally experience?

A: Yes. 4th level density implies an additional dimension of experience, doesn't it?

Q: (T) The first dimension is a single point, the second is the movement of the point into a line, the third is the movement of the line into a plane and the addition of time gives solidity. What is the fourth?

A: Discover!

Q: (T) Is time frequency also as we perceive time?

A: Not as you perceive it.

Q: (T) We perceive it linearly, but is it a frequency that our sense organs do not interpret correctly?

A: Maybe.

Q: (L) They have told us before that time is an illusion or a deception imposed at the time of the "fall." (J) I've seen, we have all seen, the light spectrum. What we are able to perceive with our eyes is only a limited section. Is reality like that? What we are able to perceive is only a small section of the spectrum of vibrations?

A: Close.

Q: (T) When we move into 4th density will we be able to perceive more of this electromagnetic band?

A: Much.

Q: (J) So, it expands our awareness?

A: Yes.

Q: (L) A few years ago I was meditating and I did what I call “zoning.” It is an indescribable state. I kind of bobbed back to the surface for a moment because I experienced a buzzing in my head that sounded like an electrical transformer. Words came into my head that were like: “The presence is approaching,” and I thought immediately of Shekina, or the “forerunner” of the “presence of God.” I was a little agitated because I was not positioned in the way I would have liked to be to receive any experience or visitation. I adjusted myself in a more “prim and proper” position and remember nothing more until I just sort of came to with the intense urge to relieve my bladder. I don’t know how much time passed, but it must have been a considerable period to have the physical urge that strong. The bed was adjacent to a wall between the bedroom and the bathroom with just a walk space. I had to be careful not to bump my head on the wall when I was getting up. I got out of the bed and was quite startled to discover that my head and shoulders passed right through the wall. As soon as I noticed that, I started to pay attention to what else I was experiencing. I noticed that all physical objects appeared as transparent slides of color and light. The walls of the house did not exist, I could see the children in their beds in other rooms in the house, their bodies were light. I could see through the house to the outside and it was not darkness as we perceive it. I was aware that it was night, but trees, plants and other objects were apparent by their appearance as color and light. I had a brief thought of something distant and it was as though my vision was telescopic and zoomed onto it instantaneously. I was also aware that my vision was 360, that is, I could see in all directions at once. All of this happened very quickly, or so it seemed, and I realized

that I was not in the body. That thought startled me and the instant I was startled, that is, felt an inkling of fear, I snapped back in like a rubber band. I discovered myself exactly as I had been prior to hearing the buzzing, not having made the adjustments in my position. I think what we are talking about when we talk about 4th density, is this kind of perception.

(F) Well, you remember in Whitley Strieber's book, he talks about floating out of his body and he became aware of all kinds of things including the fields around power lines and it is quite a description.

(L) Well, it was a very strange experience, to say the least.

(T) When you started to explain about the trance state, you said: "What I call zoned out, I can't explain it." That's the same thing the Cassiopaeans say when we ask them to explain what 4th density is like!

(J) Yes, we have no physical frame of reference.

(L) Yes, I can't say I wasn't unaware, because I was intensely aware of everything. And yet, I can't say I was focused on any one thing, because I was not.

(F) The last session we had we received some clues as to why it is they can't explain all these things. They said something when we were talking about plants and rocks at 1st density. Try to think of something in animal language to express what it is like to perceive the universe as a human. The thing that occurs to me is that, even though we share the same space with dogs, cats, etc., their perception of the universe is so radically different that for all intents and purposes, they might as well be on another planet.

(T) Science tells us that a dog's eyes only see in black and white.

(F) It isn't just what they physically can see and how they see it,

but how they perceive and understand it and how they think. It is so radically different from a human being... and some people get all attached and all emotional and think that animals are almost human and the dog isn't even thinking "Oh, I'm a dog, I think I'll just take a nap." There is no anything that we can understand. So, if you think about the steps up density-wise, if they are merely equal, imagine the jump from 3rd to 4th! In 4th, they may understand us entirely, but their view is radically different.

(L) Let's say goodnight.

END OF SESSION

3.8 January 21, 1995

Frank, Laura, Terry, Jan, S, D, Chuck

{the guests, "D" and "Chuck" were problematic for a number of reasons. Chuck was a PI who had worked with me on an abduction case. He wasn't really "into" the paranormal and asked to attend just out of curiosity. "D" is the woman who appears at a couple other sessions and was discussed in "The Wave" as the science teacher who claimed, under hypnosis, to have been affiliated with preying mantis type aliens.}

Q: (L) Who do we have with us?

A: Torrillahk.

Q: (L) And where are you from, Torillahk?

A: Cassiopaea. [(L) Let's get the ridge out of the board.]

Q: (L) Do you have any messages?

A: Thank you. [Apparently for getting the ridge out of the board.]

Q: (L) You are welcome. Do you have any messages for any of us tonight, or should we just start in on our questions?

A: Any rituals performed tonight?

Q: (L) Did anyone do any rituals? Why do you ask?

A: Feel some restrictions.

Q: (D) I bathed in bath salt. (L) That wouldn't do anything. Sue has some questions about some of her healing things. (S) If I put my finger on a certain muscle in an inter-oral area, would you be able to tell me if it is the correct position? {Sue is a massage therapist.}

A: Okay.

Q: (S) Okay, is this the terragoid?

A: Okay.

Q: (S) Okay, I guess it's the terragoid. That was where I had my finger. I just needed to know that. (S) Which school of thought, Upliger or Nix (?).

A: Your work is less dependent upon physical factors than you think.

Q: (T) Is it that she should use more intuition in this? **A:**

Aural frequency.

Q: (L) In other words, feel it. (S) Don't I still need the basic knowledge?

A: Sense, knowledge is held within, simply unlock more and more as needed.

Q: (S) Sometimes it's hard to... (L) Go ahead, ask your questions. (S) Does realigning the sphenoid (?) bone actually do something

with the pituitary gland?

A: All these procedures are factored by your own natural healing abilities, this is of the light, and comes from within when you follow your natural instincts and trust!

Q: (T) Yes, it does, it does what they just said! (S) Would myofacial unwinding help me unblock some of my own fears, hesitancies...

A: Just trust your extraordinary abilities!

Q: (T) What they are trying to tell you is to go with what you think is right because it will be right, because it is coming from within you, and it's not so much whether you've touched here, or touched there, it's that wherever you've touched is the intent. It's what they say, intent is what it is. (S) But the way the law of this country and state goes, you also have to have that piece of paper that says yes, you can do this.

A: Bravo, Terry!

Q: (T) Thank you, thank you! (L) Well, go ahead and get the licensing and do what feels right. You're doing the right stuff. Everything you're doing, you're doing by instinct, you know, continue the classes. (S) It's like, I know about three or four ways for carpal-tunnel syndrome, they're all totally different... (L) Try them all, one might work differently for a different person, they can all be right, you know.

A: It is not the physical methodology that matters.

Q: (J) It's like you're tapped in, just go with the flow.

A: Humor the authorities, they know not any better.

Q: (S) Why am I so reluctant to use some things, is it because I'm going to too many classes, too many different schools of thought, that I'm getting confused?

A: Lose the fear and just do it! Welcome, Chuck, you were a “wild one” in youth, eh? Lady Killer. Mirth.

Q: [Laughter.] (L) We’re going to go on with our questions and see how many we can cram into this session. (D) Monday is the 23rd, my house is supposed to sell. My Realtor is sweating blood.

A: Did we not tell you?

Q: (D) Yeah, you did. (L) The van I looked at today, is there anything significantly wrong with it that doesn’t show up, or that I have missed, that we have missed, is it as good a deal as it seems to be?

A: Yes.

Q: (L) Okay, that’s all I wanted to know. Back in the 1970’s in the Central United States there were quite a number of cases of animal mutilation. There has been a lot of publicity about this at some point and then it died down and was covered up, and there were a lot of ideas and theories about it. What I would like to know is who was doing the animal mutilations?

A: Many.

Q: Okay, who was doing most of the animal mutilations?

A: Not applicable.

Q: Okay. Was some of the animal mutilation done by the U.S Government, or entities within the government?

A: Was?

Q: (L) In other words, it is still going on. So Okay, so they are still doing it. Was, or is, some of this activity being conducted by alien individuals?

A: Yes.

Q: (T) Were they acting for the same reasons?

A: No.

Q: Why did the government do animal mutilations?

A: Copy, in order to throw off investigation.

Q: (L) So they copied this activity to throw off investigations. Did they do this as an act to protect the aliens who were doing animal mutilations for their own purposes?

A: No.

Q: (L) Were they doing it to protect themselves from the public knowing that they were engaged in alien interactions?

A: They do it to protect the public from knowing that which would explode society if discovered.

Q: (L) What is this item that they were protecting so that society or the public wouldn't know about it. What activity is this?

A: Humans eat cattle, aliens eat you.

Q: (T) They've said that before. (L) Okay, yeah, we eat second level, they eat third. Did aliens do some of the cattle mutilations?

A: Yes.

Q: What do aliens do to cattle?

A: Blood.

Q: (L) They take the blood out of them?

A: Yes.

Q: (J) They drink it? What do they use this blood for?

A: Nourishment.

Q: (L) Okay, but you just said that aliens eat humans, and humans eat cattle. Why were the aliens being nourished by cattle, if that's not their normal bill of fare? (J) Delicacy. (T) A cow's blood is a lot like human blood.

A: Do you not ever consume facsimile?

Q: (T) Hamburger helper? Shake and Bake, (J) And I helped! (laughter) Sorry!

A: Facsimile is less controversial, obviously!

Q: (L) So in other words, they were eating cattle just to keep from having to eat so many humans, that would have just upset people a lot, is that it? Oh god.

A: Yes.

Q: (T) So, since they're eating cattle instead of humans, does that mean they'll stop eating humans? (L) Terry, you know better than that! (T) Well, it's the next logical question.

A: Some of their human "food" is merely emotions, think of flesh as being the equal of "filet mignon."

Q: (T) Some of their food is merely emotions. Okay, when we're talking about these aliens, are we talking about the Grays?

A: No.

Q: (T) We're talking about the Lizards.

A: Yes.

Q: (T) Okay, what do the Grays feed on?

A: Plasma.

Q: (T) Okay, the Grays feed on plasma, blood plasmas of some kind, is this what you are saying?

A: Yes.

Q: (T) Okay, so that's why they want the blood; so, do the Grays feed on emotions?

A: No.

Q: (T) Okay,

A: They send them to Lizards.

Q: (T) The Grays send emotions to the Lizards? They're transmitters?

A: Transfer energy through technology.

Q: (L) Let me ask this... (T) Are the cattle giving off enough emotion for the Grays to feed this to the Lizards also?

A: No. That is physical only, you see, Lizards and Grays only need physical nourishment while "visiting" 3rd level, not when in natural realm, 4th density, there they feed on emotions only.

Q: (T) Grays are not strictly third density? Because they've been created by the Lizzies?

A: Yes. Correct, they too are 4th level.

Q: (L) Okay, let me ask, while we're on this subject, real quickly, we need to move on to cover these questions. Actually, it becomes moot, since we know their technological capabilities. What technology do they use to surgically excise certain areas of the cattle's anatomy, is this done by laser...

A: Laser-like

Q: (L) Okay, since it has been noted that quite frequently the cattle mutilations consist of taking very specific parts of the body, such as the eyeballs, the genitalia; they core out the anal sphincter right up to the colon; what would be the purpose for these

specific body parts? I mean, do they core out the rectum and put a pump on there and suck all the blood out, I mean... (T) That's what the tail's for! It's a pump! (L) Why? Why do they do this?

A: Close.

Q: (L) Close? I'm close?

A: Yes. Not the tail part, ha ha!

Q: (L) Okay, I think we kind of have an answer to this one, but there have been very frequently associated with the phenomenon of cattle mutilations, sightings of black, unmarked helicopters, who or what are these helicopters?

A: Variable.

Q: (L) Are some of these helicopters disguised alien craft? Are some of these helicopters the property of the U.S. Government?

A: Yes to both.

Q: (T) Are some of these helicopters private enterprise? **A:**

Yes.

Q: (L) Oh, boy Terry, you had to do that! A whole new can of worms!

A: All are interconnected

Q: (L) Okay, I want to ask this one, because this is one I haven't hit lately. Wendelle Steven's, who was associated with Billy Meier, and also Genesis 2 or 3, put out the Billy Meier book on the Billy Meier sightings....

A: Some too, are projections, this phenomenon is multifaceted.

Q: (L) I expect that goes back to the black helicopters. I want to know about Wendelle Stevens, associate of Billy Meier...

A: Why? This is wasted energy.

Q: (L) Well, I just want to know how reliable he is. In a word, is this person somebody who can be relied upon for factual information, yes or no?

A: No.

Q: (L) Okay, that's good enough. Who are the oriental- appearing personnel that have been seen manning the helicopters and the white vans that have been sighted all over the country?

A: MIB.

Q: (T) Talk about opening up another can of worms! (L) I'm not even going to touch that one!

A: And government copycats.

Q: (L) Okay, now, I have a list of names, and I want a yes or no as to whether these individuals were - because I believe most of them are deceased right now, this is just a little verification on some other things for the general public - were these individuals involved in the cover-up of the UFO activity and phenomenon in the U.S.?:

Roscoe Hillencotter (Yes)

Dr Vannebar Bush (Yes)

Secretary James Forrestal (yes)

General Nathan Twining (Yes)

General Hoyt F. Vandenberg (Yes)

Dr. Detlev Bronck (?) (Yes)

Jerome Hudson (Yes)

Mr. Sydney Sauers (Yes)

Donald Menzel (Yes)

Robert Montague (Yes)

Dr. Lloyd B. Berger (Yes)

Q: Who is in MJ12 now?

A: Will not reveal as you would be terminated if this information were to be let out, so forget it now!

Q: Does MJ12 still exist?

A: In different form.

Q: I would like to know who sent the MJ 12 documents to Jamie Shandera? Who sent those documents to him?

A: Bill Cooper.

Q: (T) Who sent them to Cooper?

A: He discovered them in records review.

Q: (L) He is the one who discovered the MJ 12 documents? Does he claim he sent them? (T) Yes. (L) How did you know that and I didn't know that? (T) I read the Cooper book, the early Cooper papers.

A: Cooper was unintended security leak, then "turncoat."

Q: (T) Okay, so he found all this out when he was working for the government...

A: Yes.

Q: ...Which is how he got them out of the records?

A: Yes.

Q: (T) Well Okay, while we are on the subject... I don't want the names of those involved with MJ12, the question is, if you gave

us the names, how many of those people would we know? Not personally, but how many would we know? How many would we have heard of?

A: One or two maybe.

Q: (T) Which is what I figured. Just like back in the 40's you wouldn't have known who these people were. Hillencotter and Forrestal, maybe, because they were WWII people, their names were in the paper. Unless you were into sciences, you wouldn't know who these people were. (L) How many alien craft, actual alien craft, are in the hands of the government or this consortium?

A: 36

Q: (L) And were these captured craft? Or gifted?

A: And recovered.

Q: (T) Ok, they were all three. Were any of them purchased?

A: Not correct concept, Grays are not financial.

Q: (T) I didn't mean by money, I meant purchased as in some kind of a trade. A gift is something that is given without anything in return (J) We give them something in return. (T) Were the gift ones not what we would really consider gifts, but they were given to us in return for something else, some other kind of payment? Barter?

A: No. Because all sought return favors were already achieved.

Q: (L) So it was all just a farce. (T) So they were payment as opposed to gifts.

A: Not correct concept

Q: (L) How about this: They weren't payment, they weren't gifts, they were distractions?

A: Closer.

Q: (T) Okay, we've got captured ships, recovered ships, something called gifted ships, that were not really gifted ships, and the concept that some of them were purchased, but they were not purchased in a sense that we would normally purchase things, bartered for something, and that the ships that were gifted were given to the government in order to keep them distracted from other things that the beings were doing. Is this something close along the lines of what we're talking about?

A: Close

Q: (T) Okay, so there's a lot of different categories of how these ships got into the hands of the federal government?

A: Yes. Multidimensional

Q: (L) Okay, give me a yes or no answer on this: Dr. Paul Bennewitz - reliable, yes or no?

A: No.

Q: (L) Is his statement, as it is recorded in the KRLL papers, falsified?

A: No.

Q: (L) Is that statement true?

A: Partly.

Q: (L) Was he reliable previously? At the time he was doing that work?

A: Sort of.

Q: (L) Who is O. H. Krill

A: No one.

Q: (L) Is O. H. Krill a group?

A: Symbolism.

Q: (L) Symbolism of what? What does O. H. Krill translate out to?

A: For documentary purposes only, your government likes code names.

Q: (L) Are you implying that this piece of work was put out by the government for dissemination of the subject matter? (J) Is it disinformation?

A: Complex.

Q: (L) Give us a percentage of factual information in this document.

A: 43%

Q: (L) Are you saying that 43% is factual?

A: Close enough.

Q: (L) Okay, so, in other words, this has been planted by the government. Was it put out with the intention of giving out some factual information...

A: No. Planted? No.

Q: (L) You are saying it was planted? (T) It was leaked purposely?

A: Your government is operating on many cross-purposes, very complicated!

Q: (T) Even the simplest things are very complicated with them. Okay, question: The U.S. government...

A: On purpose!

Q: (T) Very true. Question: The government, our government, the U.S. government, is holding 36 craft of one kind or another that they gotten in one way or another. How many other governments have craft?

A: All is one.

Q: (L) We already have a one-world government is what they're saying. (T) Yes, they're just waiting to make it official somehow. (L) Let me ask. What is...

A: Has been so for long time, as you measure time.

Q: (L) Let me ask this one before the tape runs out and we take a break. What is the "ultimate secret" being protected by the Consortium?

A: You are not in control of yourselves, you are an experiment.

BREAK

Q: Do you have anything else to say on that subject?

A: Up to you.

Q: (T) When you say this is the ultimate secret, that we're being "protected" from by the government, are we talking about the ultimate secret of humans only here?

A: Basically.

Q: (T) The ultimate secret of the human race is that we are an experiment that other humans are conducting on the rest of us?

A: Part.

Q: (T) Okay, does the other part have to do with the Lizards?

A: Yes.

Q: (L) Other aliens also?

A: Yes.

Q: (T) Okay, so, are the humans who are running the experiment, do they know that they are part of the experiment also?

A: Yes.

Q: (T) And they're doing this willingly?

A: They have no choice.

Q: (L) Why do they have no choice?

A: Already in progress.

Q: (T) What is the experiment about?

A: Too complicated for you to understand.

Q: (J) I hate it when that happens! (T) Okay, is this part of, is this about the experiment the Lizzies are doing of dominating us and sucking us dry?

A: Yes, but there's much more than that, you will understand at level 4.

Q: (T) Okay, I won't pursue that much farther. (L) Okay, in this Krill document there was a statement made that the Grays and other aliens use glandular substances extracted during physical exams of human beings, what they would call the gynecological and the sperm extraction exams, that they used these glandular substances to get high or to feed on, that they are addicted to these, is this a correct assessment?

A: No.

Q: (L) Do they use glandular substances at all?

A: Yes.

Q: (L) What do they use glandular substances for?

A: Medicine.

Q: (L) And what or who do they use this medicine on?

A: Themselves.

Q: (L) And what does this medicine do for them?

A: Helps them cope with 3rd density.

Q: (T) Is this something that they use to help them stay in the 3d density?

A: Close.

Q: (L) Does it help them to manifest in a more solid physical manner?

A: Yes.

Q: (L) So, in other words, they draw glandular substances. Do they also use sexual energy given off by individuals to maintain their status in 3 dimensions?

A: No. That feeds them in 4d, as we told you before.

Q: (L) Yes. Okay. How “long”, and I put long in quotes, because we know, as you say, there is no time, but how long, as we measure it, have the Grays been interacting with our race? The Grays, not the Lizards, the Grays, the cybergenetic probes?

A: No.

Q: (L) What do you mean, “No”?

A: Time travelers, therefore, “Time is ongoing.”

Q: (L) Okay, recently I read a couple of books Jan gave me, “Knight in Shining Armor” and “Replay”. Both of these books

described time travel.

A: No, not finished with answer. Do you understand the gravity of last response?

Q: (L) They are time travelers, they can move forward and backward in time, they can play games with our heads... (T) They can set up the past to create a future they want. (D) They can organize things so that they can create the energy that they need... (L) They can also make things look good, make them feel good, make them seem good, they can make you have an idea one minute, and then the next minute, create some sort of situation that confirms that idea...

A: When you asked how long, of course it is totally unlimited, is it not?

Q: (L) That's not good. If they were to move back through space time and alter an event in our past, would that alteration in the past instantaneously alter our present as well?

A: Has over and over and over.

Q: (D) So they do it over and over and over, constantly? (L) So, at each...

A: You just are not yet aware, and have no idea of the ramifications!!!

Q: (L) We're getting a little glimmer! Yeah, I do, a little! (T) The ramifications of being able to move in and out of time and manipulate it the way you want (Jan/Laura) And the ramifications of what they're doing to us; what they are doing to us and what they will do to us, over and over. (F) What did it say about over and over? (L) So, in other words, our only real prayer in this whole damn situation is to get out of this density level. That's what they're saying, that's what it sounds like to me.

A: Close.

Q: (L) Because, otherwise, we're just literally, as in that book, stuck in the replay over and over and over, and the Holocaust could happen over and over, and we could just, you know... Genghis Khan, Attila the Hun... over and over and over again. (T) We're stuck in a time loop; they're putting us in a time loop. (J) Are we in a time loop?

A: Yes.

Q: (D) I have a question about... there was a... (PAUSE) Mankind has found it necessary for some reason or other to appoint time for some reason or other. The only reason I can see is to have a means of telling, like in verbal or written communications...

A: Control mechanism.

Q: (T) Is there a way for us to break the control mechanism? Besides moving to 4th density? (D) That was part...

A: Nope.

Q: (D) When 4th density beings communicate it's telepathic, right?

A: Yes.

Q: (D) Okay, since time doesn't exist, how do you communicate about happenings?

A: Rephrase, please; clarify.

Q: (L) What she means to ask is, if you're communicating telepathically... (D) On 4th density.. (L) And time doesn't exist, how do you communicate about events as one happens now, as opposed to later and the next thing happens, and the next thing happens... (J) How is it sequential?

A: Translate.

Q: (D) Translate? Okay, let me explain what I mean. I mean, we talk about 1907 something happened...

A: That is how it is done.

Q: (T) Translate is how it is done. You translate the experience?

A: From 4 to 3. And vice verse.

Q: (L) So, in other words, it's almost like making movies. (J) Are linear thought processes part of it? Is it being linear and non-linear?

A: Part of 3d illusion only.

Q: (L) So, in other words, if you're a 4th density being, everything is more or less happening, excuse the term happening, everything is simultaneous, and if you wish to discuss or communicate or have any focus upon any particular aspect of this unified dimension, then what you do is you kind of extract it out, project it into 3d...

A: Close.

Q: (L) ... like a movie.

A: But you will not understand fully until you get there

Q: (T) Okay, so it's a concept that we can't completely grasp in 3d at this point.

A: Can a dog grasp algebra? You got it.

Q: (L) In other words, we're in bad shape! And these guys are playing games with us, so to speak...

A: Subjective.

Q: (T) Subjective to whether we're in bad shape or not. **A:**

Yes.

Q: (T) I was going to say that doesn't necessarily mean we're in bad shape... (L) Well, the situation we find ourselves in, is the only way of getting out of this time loop, so to speak, to move into another density, or is there a loop in the other density as well?

A: No.

Q: (L) No loop in the other density?

A: Yogis can do it.

Q: (L) Yogis can do it... (T) Transcend time. (L) Okay, let me ask this before we really start to go...

A: How they control their own physicality.

Q: (L) Let me ask a few questions here before, I think we're breaking up. First of all, there was the television special on the other night about...

A: What is "breaking up"?

Q: (L) I think it means that everybody's getting tired and losing their focus. The question I want to ask is about this...

A: You are, but not all others

Q: (L) Well, let me get my question in here, and if you guys want to sit up all night, I'll just keep my mouth shut.

A: Laura has "bug" in her system

Q: (L) Okay, I have a bug in my system. I want to know what this humming sound is that people are hearing all over this country? I mean people have been reporting hearing this intense humming sound that literally drives them crazy. There was a TV spe-

cial on about this the other night. What is this humming and where is it coming from?

A: Increased EM waves in preparation for oncoming wave

Q: (L) What is the source of this sound, I mean, where specifically, location-wise, is it coming from?

A: Cosmic.

Q: (L) Okay, it's cosmic, it's not coming from the planet itself. Okay, what is the greatest weakness of the Lizzies or the Grays in 4d?

A: STS.

Q: (T) Yes, that is their greatest weakness; Service to Self. (L) Is that in both densities?

A: Yes.

Q: (T) Is there a way... can we use that against them? **A:**

Not correct philosophy.

Q: (T) Very true, very true. (L) I want to ask a question that Chuck brought up a little while ago, have we in our group...

A: Let Chuck ask himself.

Q: (C) Has this group been infiltrated by anyone in controlled by the aliens?

A: No, not exactly.

Q: (L) Can we get clarification?

A: Have attempted to corrupt communication, but remember, we, too are "alien".

Q: (D) There was one time when other aliens tried to interject, but they didn't succeed. (L) Yeah, that was in one of the other transcripts. I think what Chuck meant more specifically other than other alien communication or communicants was a particular 3 dimensional person, have we ever had such a person attend these sessions?

A: Not yet, but "stay tuned."

Q: (L) Well, I'm done with my questions, we covered my stuff. You guys are on your own now.

A: Chuck ask.

Q: (C) That was the only question I had, and they answered it.

A: Untrue.

Q: (L) Are you wondering something? Ask. (C) How truthful the source is?

A: Up to you to decide

Q: (T) They only provide the information. They want us to make the decisions as to what we do with it, interpret it, what happens with it. I'm sure we all look at it slightly differently. We all have a different way of perceiving things, so we all perceive it differently. (D) Is the information gathered from the collective consciousness? A collection of all lessons learned by all humans?

A: Yes, and other sources as well.

Q: (D) Does this include the Lizzies?

A: Yes.

Q: (D) That includes you, also?

A: Yes.

Q: (D) Okay, can we tune into the collective consciousness?

A: Of course.

Q: (D) Okay, then, are there certain abilities needed to do this connection into the collective consciousness?

A: You all have all you need.

Q: (D) Well then, if this.. (T) By sitting here, we tap into them and they tap into us. (D) If this collective consciousness is a collection, haven't all lessons been learned by someone at some time?

A: Yes.

Q: (D) Then can we tune into the collective consciousness to find how our same lessons have been solved before?

A: Yes. But what is "before?"

Q: (D) Before? No, I didn't ask... (J) Before, during, after, these are all time concepts. (D) Oh, yeah.

A: Yes.

Q: (D) Well, my real question is if all the answers are there, and we can get there, why are we going through the lessons again? I mean, why do we have to go through these lessons if the solutions are already there?

A: Its all just lessons.

Q: (D) I know, that's what made me ask... I just.. I can't understand this.. we already have the answers, and we're going through the lessons again... (T) Not all of us have learned all the answers, that's why we're all going through the lessons again.... (D) But, you see, all the answers are there...

A: Who said "again" ?

Q: (J) Is it more like “still” ? (D) But if all the answers are there...

A: You are still thinking at 3rd level.

Q: (D) Yeah, but I’m still trying to understand.. Sorry, guys

A: Don’t “try” so much, just go with it.

Q: (T) It’s like Master Yoda said in Star Wars, “Don’t try, do” Just do it.

A: Yes.

Q: (T) See, I knew Star Wars had a redeeming social value. (J) So did Relationships. The how is to do it. (D) But if the answers are there, and we can find the answers, to our lessons... (T) We don’t have to find the answers, we have the answers. The answers are within all of us. (D) It seems so redundant... (T) Most of the lessons are to find the right answers... (D)...to actually go through the doing of the lessons....

A: No. Not correct idea.

Q: (T) Where were we going with this? (D) Oh, it was just a wonder of mine, it’s just like, if we have the answers, I didn’t understand why we do it. (J) We’re not supposed to know. (T) Well, if we have all the answers, they’re all in us, and we all know the correct solutions to the lessons, we should always be able to do it right, but we’re doing it wrong, that means we haven’t learned it right yet.

A: Retrieval.

Q: (L) I know what she’s hanging up on here - what’s the point? (D) Yeah! (L) That’s the whole question, what’s the point? And I guess the point is, is that it’s just...

A: Lessons.

Q: (L) In other words, just to have something to do (J) Hang on a second, I want to read something to you. Corinthians 13... (D) I can't handle this... (J) just listen. This is from Corinthians 13, the one about love. "When I was a child, I spake as a child, I understood as a child, I thought as a child, but when I became a man, I put away childish things. For now we see through a glass darkly, but then face to face. Now I know in part, but then shall I know, even as I also am known." And that's what going from 3rd to 4th is going to be like. (D) Is that part of the... (T) Think so? (Tea kettle starts to whistle.....)

A: Yes.

Q: (J) That's it. We're not supposed to know it all now. In moving from 3rd to 4th, is part of the knowledge process. (T) We gain insight moving..

A: Yes.

Q: (T)...insight we don't have yet, but we can start working with what we may not understand what it is we're doing.

A: Close

Q: So when you said we're thinking in 3rd...

A: Stop noise.

Q: (L) Somebody turn off the kettle... (T) It's bothering us too, we're taking care of it..... (...Tea kettle whistle is turned off)that's one 3rd density thing we can do! So when you say that we're thinking in 3rd density, you're not always telling us we're not thinking correctly, you're just indicating that we're thinking in 3rd density, because we can't think in any other way.

A: Close.

Q: (T) So not all those shots were shots, they were just saying that

it's as far as we can get right now

A: We don't shoot.

Q: (L) I have a question - do you guys have emotions...

A: Not 3rd level.

Q: (L) Okay, well, then let me ask it this way. What are your thoughts towards us, or your attitude or emotions, as you know them towards us? Individually or as a group?

A: Love.

Q: (D) Well, that's what I needed to hear. [sigh] (J) Be patient, we're not finished yet.

A: Hoorah!

Q: (T) Well, there's not any of us here alone. They're us in the future. (J) Diana, think of us like those puppies in there. Our eyes aren't open yet, but they'll open up. **A:** Yes.

A: But there is no time so you are already are where you are, you see, we are you in the "future".

Q: (D) I have a question. Transdimensional atomic remolecularization, is this teleportation?

A: Close.

Q: (D) Okay, so this is the way we will transfer from 3rd to 4th?

A: Technology for this purpose.

Q: (D) Well, is this the way they're going to move the new bodies to the ancient earth?

A: No. That is a natural process.

Q: (T) They're creating the bodies now with the genetic engineering. (D) Yeah, I know, but...

A: TDARM is tech.

Q: (T) What was that? Was it a word? (J) I have no idea. Please repeat the entire...

A: Abbreviation

Q: (L) Trans Dimensional Atomic ReMolecularization! Got it. (T) It's on the tip of everybody's tongue these days! (D) Down at the church they gave me a list of prayers and symbols to use in a ritual where I would say a prayer while I had my hand on a symbol and the purpose of this...

A: Rituals restrict

Q: (D) So, in other words, that did not connect my DNA chains. Right?

A: Nonsense!

Q: (D) Okay, well that's what I thought, but I went ahead and did it because I didn't want to pass up an opportunity!

A: Stop!

Q: (T) Stop rituals. They don't approve of any rituals, it blocks the flow, it restricts. (D) That's fine, I won't do it any more. (L) Pure universal knowledge includes everything, and if you establish a ritual, that means you are adhering to one line of thought, one mode of thinking, one idea structure, and, excluding all others. (D) Was that in the thing, did I miss that? (T) In different words, it's in there several times. (L) You may not have gotten it, you only have part of the transcripts, you only have about 100 pages. (D) I got up to file 3, page 41. (L) You don't have a whole lot of it. You're probably missing parts of it. (T) You really have to read

through it many times. (D) I don't want to look like a pseudo-intellect... (J) You're trying to understand.

A: Nonsense!

Q: (T) Is it ok if we bring our friend Brad Merrill?

A: Up to you.

Q: (T) Would he be a good addition to the group?

A: Open.

Q: (T) What are his feelings towards what we're doing? **A:** Puzzled.

Q: (T) Puzzled about the purpose?

A: Does not conform to his belief system.

Q: (J) I could hear it in his voice when I was telling him, he wasn't being openly receptive, but he wasn't being combative about it, either. He was open...(F) Is he a MUFON person? (T) Yes, He's scientifically based. He's following Hoagland's stuff. (F) Well, I've got that tape, too, and I think there's something to it... (T) He talks with Hoagland, he's in contact with Hoagland... (D) Terry, do you want to ask about what the individuals in this group are going to do in the future?

A: Discover.

Q: (T) Is Jan's mom's estate going to be settled relatively quickly and easily?

A: Yes

Q: (T) Is it going to make everybody happy, the outcome? **A:** Subjective. Open.

Q: (T) When we were talking about other people, let me throw another name out here, Robert Dean, do you know who he is?

A: Yes.

Q: (T) Is he telling the truth as he knows it?

A: Some.

Q: (T) Is there more to what he knows, he's just not telling all of it?

A: Yes.

Q: (T) Is he as honest and up front as he seems to be?

A: Subjective.

Q: (T) Is he doing disinformation for the government?

A: No.

Q: (T) He's really a good speaker. Is he doing disinformation for anyone?

A: No. Withholds.

Q: (T) He's withholding information?

A: Some.

Q: (J) He's withholding MJ12 information? (T) Well, it could be anything. He's made several sweeping statements and has lots of facts and figures and stuff that he was privy to when he was in the military in NATO, was all that information about the "Assessment" and all that stuff all true?

A: Close.

Q: (T) Was he allowed to see it on purpose?

A: No.

Q: (T) So his story about that it was there in the security vault, and because he had access and because he was able to see it, and that he just was intrigued by it is true?

A: Yes.

Q: (T) Okay. Is he going to tell the rest of what he knows?

A: Open.

Q: (T) Is he in danger because he is telling the truth? **A:**
Maybe.

Q: (T) Also, it's smart to tell the truth as loudly as you can, and in front of as many people as you can. He's an amazing speaker, and the things he has to say.... to me, his body language is that he's telling the truth. I have a question about a friend, Nova Montgomery, is she open to this?

A: Maybe.

Q: (T) We've told her some about this, does she.. how does she feel?

A: Maybe.

Q: (T) How does she feel about what we've told her so far?

A: Skeptical.

Q: (C) What is my son's next duty station?

A: Open. Will he even stay in?

Q: (C) There's someone who owes me a great deal of money, will they pay within the next few months?

A: You must act upon this.

Q: (T) Will Chuck have to go as far as taking him to court?

A: Likely.

Q: (T) Does Chuck have a good lawyer? Humor! mirth! Don't answer that! All the good ones are in California right now! Oh, OJ. I think even they are bored with OJ by now! (J) Are you bored with OJ by now?

A: Yes.

Q: (T) What major event is happening under the cover of the OJ trial right now?

A: None.

Q: (T) You mean we're just getting stuck with all this snow, and there ain't even anything happening?

A: Diversion by opportunity.

Q: (T) What a waste of a good diversion if there isn't anything going on! Here's this great diversion and they don't even have anything to hide behind it! (D) Is Sara having some problems that she's not coming to me about?

A: Yes.

Q: (D) Is there anything that you can tell me about this?

A: Diana, communicate, as we told you.

Q: (D) What did I forget? (T) What have you been doing on your own? (J) Have you been 'surfing' the cosmos on your own? Surfing the board, so to speak? (T) Well, it will come to you; they've told you something and it will come back. (D) Would you mind clarifying that, I don't know... (T) What was it you told her?

A: Communicate, don't preach.

Q: (D) Thanks for the help, yeah, you're right. Is there anything else I can do to help Sarah?

A: Learn.

Q: (J) Do you have any messages for any of us tonight?

A: No.

Q: (T) Do you have anything you would like to communicate to the group?

A: Not this session.

Q: (T) You predicted a quake in Japan, near Osaka, several sessions back, you were off by the magnitude a little bit and by the miles a little bit, but basically you were correct. What between that prediction and the prediction for the Tokyo quake can Japan expect?

A: Not correct interpretation. Osaka quake yet to be.

Q: (T) So this was not the quake that you predicted the 8.9, this was a 7.2, but it was miles distance from Osaka almost right on the money, but this was not the quake that you predicted? (J) There's going to be another one coming?

A: Yes 14 more this sequence. (?? 14 more this sequence ??)

Q: (T) 14 more quakes? (J) I'm sorry, I'm losing it real bad tonight, I don't know why. {She was referring to her inability to keep up with the speed of delivery.} (D) Are you breaking up? (J)

No, it's me. Please repeat the answer. (T) We're having problems down here in 3rd density this evening!

A: SEQUENCE.

Q: (T) This is one in a sequence of earthquakes that are going to culminate in the 8.9?

A: 9 pt 6

Q: (T) In Osaka, near Osaka?

A: Tokyo.

Q: Okay, that's the one you talked about, then a 9.6, that's going to be the culmination of the quakes in this. This is only the 3rd or 4th in a sequential series and the 8.9 that's going to hit them hasn't happened yet.

A: 7th.

Q: (T) This is the 7th earthquake?

A: Yes.

Q: (T) 7.2 was the 7th earthquake, there's going to be 14 of them, is that what you said before?

A: Yes.

Q: (J) So there's 7 more coming? (T) So the 14th one will be the big one, in Tokyo?

A: 13th.

Q: (T) Okay, the 13th is going to be the 9.6 and I think the other prediction was 9.8, they're close. That'll be the 13th. What will be the 8.9, which one of those will be the Osaka 8.9?

A: Within next 4.(in the sequence?)

Q: (T) What will the 14th be?

A: Small.

Q: (T) So they're going out anticlimactically on the last quake. Is Mt. Fujiyama going to explode, is the volcano going to become active again?

A: Maybe.

Q: (T) Will these quakes, is China, Korea, Philippines and the surrounding area also going to be affected as these quakes increase in strength?

A: Yes.

Q: (T) Are we talking about putting about 30% of the world's industrial output out of business in the next year and a half or so?

A: No.

Q: (T) They're not going to recover anytime soon, ok so when this all happens is there going to be an effect on California of all of this, on the West Coast of this country?

A: Yes.

Q: (T) Not just California. Is Los Angeles going to be hit with any of these big earthquakes as the plate on the other side moves?

A: Yes.

Q: (T) What magnitude?

A: 8.9

Q: (T) Where will that happen?

A: San Gabriel Mountains.

Q: (T) Is that outside of Los Angeles? San Andreas Fault line?

A: Yes.

Q: (T) Will this be very destructive to Los Angeles?

A: What do you think?

Q: (T) In the destruction of this area, is this going to increase the job potential on the East Coast, in order to then, this is really se-

rious stuff here, because this is going to affect the economy the way it shifts...

A: Yes.

Q: (T) So it...

A: Mass exodus from California.

Q: (T) Those dumb people out there looked at that Osaka stuff and said, "Oh, you know, that might happen to us. OHHH, boy, the brain finally fired up out there. (J) They've been in denial about that out there... (D) Will that bring an influx of people to Florida?

A: Yes. 15 quakes.

Q: (D) And then they're going to move. (T) 15 quakes in the California area?

A: In near future.

Q: (T) Are we talking strictly the West Coast here?

A: California.

Q: (T) Are there going to be earthquakes elsewhere in the United States?

A: Yes.

Q: (T) 15 in the near future in California alone... (D) This is the beginning of the destruction of the state of California, there'll be separation from the North American continent. (T) Well, they said don't take that literally, or it will fall off, it's symbolic...

A: Open.

Q: (T) So look at it symbolically. (D) Okay. (J) Where are the other quakes going to be?

A: Hundreds.

Q: (T) Hundreds? Hundreds of earthquakes. Hundreds of places?

A: Yes.

Q: There's going to be that many additional earthquakes? Beside the 15 in California?

A: Yes.

Q: (T) We're going to be rocking and rolling on this continent! Of course, when you move a plate, that's a lot of stuff. Are we going to be seeing a lot of water damage on the coast?

A: Open.

Q: (T) Is the West Coast of Florida going to see a rising water level?

A: That is vague.

Q: (T) Is there going to be earthquakes in Florida?

A: Seismically stable.

Q: (T) Will the seismic activity cause the water level in Florida to go up?

A: No.

Q: (T) So, for the time being, during the quakes, we'll be fairly safe, but there's other things to worry about beside that?

A: Storms.

Q: (D) are we talking hurricanes?

A: Cyclonic.

Q: (J) Will there be any damage from such storms in this area?

A: Open.

Q: (C) Are these caused by nature? (T) Is all this activity being.. is natural?

A: Close.

Q: (D) If I were to go down to Hiala Dean's, is there anything I can do in the way of healing that would help him?

A: Open.

Q: Laura says goodnight. We're closing up

A: Bye

END OF SESSION

3.9 February 9, 1995

Frank, Laura, S

Q: (L) Hello.

A: Hello. Very good.

Q: (L) What is very good?

A: All.

Q: (L) I have here Barbara's latest book... {Marciniak}

A: Ego driven.

Q: (L) This book is ego driven? So this is not so much true channeling as ego?

A: Yes.

Q: (L) Is there any possibility that she has been corrupted and is channeling Lizzies?

A: No. Under pressure, constriction.

Q: (L) So, the pressure has constricted the flow. I think I would like to ask a few questions about Frank and his tiredness. What can we do to help Frank with his tiredness?

A: Nothing, it is process of progress.

Q: (L) I want to ask a little bit about this process of “unwinding” S__ has been facilitating with my body. Have you guys been watching?

A: Always. You have just accessed and outed globules of energy.

Q: (S) It’s an energy cyst. (L) What is the original reason for the presence of the energy?

A: Anger from age 22 when you were in severe depression and had plans for suicide. The negative energy went to your arms. {was there some past life impetus for depression at this particular age?}

Q: (L) Is that what is wrong with my neck, also?

A: No. That is fibrous tumor.

Q: (S) Is my work going to help diminish it?

A: Maybe.

Q: (L) S__ has been having unusual experiences in awareness as she reads the transcripts...

A: We are blasting open her awareness.

Q: (L) Well, she has been having quite a bit of success by following her inner guidance. She has also been accessing knowledge as she reads the transcripts, even well in advance of others, it seems. Is this correct?

A: Open.

Q: (L) I went to talk to the group in Orlando area and I am sure you guys had your secret eye camera while I was there. What I would like to know is what thoughts were in the mind of Jiles Hamilton and how did he react to my talk?

A: This ego is sexually focused and he reacts mainly to what he has to say.

Q: (L) Okay, this Henry Belk was a rather interesting person, I perceived something very unusual about him but I can't put my finger on it. Initially I thought he was a positive influence, or that he was one who had a great deal of knowledge, but later I thought I might be wrong in that assessment. And yet, there was something about him that I recognized. What was going through his mind?

A: Open.

Q: (L) Can you tell me anything about this person, or does it matter?

A: No, it doesn't matter.

Q: (L) Did I present the material in the way it should be presented?

A: Okay.

Q: (L) Is it true that when you die you go to the "Bardo?"

A: What is that?

Q: (L) Anything we need to know at this time?

A: Not tonight. Ask on the eleventh.

Q: (L) Well, goodnight.

END OF SESSION

3.10 February 11, 1995

Frank, Laura, SV, DM {IMO, DM was a bit New Agey and her presence was problematical}

A: Wow, what a change!

Q: What do you mean?

A: The new board.

Q: Well, glad you like it. Let's get on with the questions.

A: You didn't ask for ID.

Q: Okay, who do we have with us tonight?

A: Sorran.

Q: And where are you from?

A: Cassiopaea.

Q: (DM) Are you male or female?

A: There is no gender here.

Q: (L) You have said that you are us in the future, can you identify which one of you is me or Frank, or anyone else?

A: All are one. Names are used for your perceptions. We do not mean that we are one "individual", but that we are one in unity.

Q: (L) Well, I have some personal stuff I would like to ask about without mentioning it specifically, can I do that?

A: Whatever you desire!

Q: (L) Well, something has been going on with me internally and I just don't know what it is. I don't even know who I am right now. I am at odds with myself, it seems. What is going on? Why am I so irritable?

A: You are being defensive, letting go of old stuff.

Q: Well, I am trying not to be irritable.

A: You try too much. Stop attempting and just "Go with it!" There is no need to steer, no need to drive, just ride!

Q: Well, that is very hard for me to do when this energy threatens to overwhelm me. {I understand now that this was the seating of the higher emotional center. It really did feel like a form of madness.}

A: You have always been a driver, that is the old stuff to let go of. Why resist? This is why you have been irritable. Your super consciousness is telling you something.

Q: (L) Why did this feeling begin when Frank's dad passed away? Why do I feel now that I don't know which way we are going to go?

A: That was a steppingstone, a "milestone", if you like.

Q: (L) Okay, on one occasion you responded to a question by saying that JW and Mike F had "reported" me. Obviously this was not done consciously. You then said that they were unconscious and unwitting agents for the Lizzies. This perhaps implies that they have been abducted. How many times has JW been abducted and when did the abductions start?

A: He has been "contacted" or abducted 186 times beginning at age 4.

Q: What about Mike?

A: Are you ready for this? 446 times.

Q: {General sounds of amazement} How does the control mechanism work with these two since, obviously, they would both be quite amazed to hear this, if not, in fact, go into complete denial?

A: Waves are transmitted into their minds which stimulate pre-coded implants. They are monitored. When they are exposed to truth, the waves are generated to prevent their reception and to strengthen pre-coded thought patterns of resistance.

Q: (L) You also said on one other occasion that something was done to me physically to block my energy and cause physical problems. What was this?

A: Your thyroid was inhibited.

Q: (L) You have said on occasion that free will is the most important law of consciousness in creation. Why can we not exercise our free will and refuse to be abducted and experimented upon?

A: Those who abduct are exercising their free will in doing so.

Q: (L) Why does their free will have precedence over our free will?

A: Why does your free will have precedence over density 2 and 1 beings?

Q: (L) In a past reading you told me that the UFO I saw above my pool was a “multiple reality projection.” What is this in layman’s terms? Did we see a nuts-and-bolts craft, or did we see something that was projected?

A: Your mind was given to you to be used, we provide clues.

Q: (L) Multiple realities? Okay, so this was a point in space/time where there was or is a convergence of 3rd and 4th realities so that they were probably in 4th density, and we were in 3rd; yet

the area around my house was created as a multiple reality station for this event to occur, is that correct?

A: Bravo!

Q: (L) Once again I want to ask what was the purpose of them showing themselves to me, since they are the “bad” guys?

A: See last answer.

Q: (L) Well, I don’t like what I think when I think about that.

A: Then think something else.

Q: (L) I heard from Terry and Jan that there have been reports of numerous sightings of UFOs in the region, particularly on Saturday nights when we are doing our sessions. Is there any connection between this activity and what we are doing?

A: Of course!

Q: (L) What is the relationship?

A: You are leading the way.

Q: (DM) We are leading the way. (L) That’s the relationship? Can we get a clarification on that? (DM) Are we clearing the ground for other occurrences here on this planet? (L) Or, are they showing themselves to try to stop us from leading the way, because we are leading the way in a major way?

A: All of the above.

Q: (L) So, it’s the same thing. We are leading the way and they are trying to stop us. Okay...

A: And...

Q: (L) And it’s a manifestation of 3rd and 4th density conjunction that are created by the expanding of consciousness in this area?

A: And...

Q: (L) Umm, (DM) We are getting information to be given to mankind?

A: And...

Q: (DM) This is going to be published?

A: And...

Q: (L) And are they actually... are some of these craft evidence of your presence?

A: And...

Q: (DM) It is all going to fit together like a puzzle. (L) So, in other words, our activities are interactive in a sense... and we are leading the way?

A: Yes, for the whole world!!!

Q: (SV) For the whole world? (DM) God! Does this mean that we are of extreme importance?

A: Bingo!

Q: (DM) I got goose bumps! (SV) I didn't. (L) You always knew it. (SV) I didn't say that! {laughter} (DM) Can I ask a personal question? Is this why I am moving to New Port Richey?

A: Open.

Q: (L) They are not going to give you that one. You know why.

A: Now, we suggest you be humble!!!

Q: (DM) I think we will be. {laughter} (L) I'm trying hard... {sings} Oh lord, it's hard to be humble, when you're perfect in every wayyy! {laughter} {Oddly enough, last night (4 Dec 2011) I was

singing that very song with a guest – we were making fun of human foibles. So it’s funny to see it here in this session as I am editing it for publishing.}

A: Laura, this is directed mainly toward you.

Q: (L) You mean the “be humble” part?

A: Bingo!

Q: (L) I try real hard and you guys know it. It’s hard, sometimes when you have to be in charge. And, I know you told me to let go and let someone else drive for a while, so I will. Frank, you drive. You’re in charge now.

A: No need for that.

Q: (L) In a previous reading you stated that the Lizzies tried to abduct my eldest daughter and that I “stopped” it. At the time I should have asked, and am asking now: how, specifically, did I stop that activity? {The situation and what I did is described in “Amazing Grace”.}

A: Mental blocking, i.e. using 4th density principles.

Q: (DM) Was it just her presence that led them to believe that they should go find somebody else to abduct?

A: Pay attention to self-explanatory answers.

Q: (L) Okay, so, a mental block is a 4th density principle?

A: Bravo!

Q: (L) So, mentally blocking is our defense?

A: One of them.

Q: (L) And, I was galvanized to erect this shield around my child because it was my baby?

A: And you knew what to do.

Q: (L) So, we have to go global? That is a lot of responsibility. (DM)I would rather it just stay very private. (L) It can't. (F) We do not have the ability to direct it, DM, it just may become... (DM) This is something that I am trying to overcome... (F) Don't worry about it, go with it... (SV) Yeah, just go with it... (F) When they were speaking to Laura, they were really speaking to all of us. Don't try and drive or direct. (L) Whatever will come, will come. (SV) It's just like what they told me about massage and bodywork. I don't even plan it anymore, I just start doing it and whatever my hands do is what is done. (F) Don't worry about notoriety, if it is meant to be, it will happen that way and it will work. It won't cause your life to be disrupted and your entire family to be rent asunder. {Famous last words!}(DM) Well, I have at least started teaching {my daughter}, and the other day I even went so far as to express the teachings in the classroom.{DM was a computer science teacher in one of the local schools.} One kid said something very negative to another kid and I said: "You know, it's just like a big wall of elastic that comes up in front of you. Whatever you say just bounces right back on you." The kids in the class applauded! I feel that I have to be very careful of what I say to keep from losing my job. (L) There are a lot of things you can say in a general way that are acceptable to just about anybody, no matter what their belief system. (DM) I want to ask... Am I eventually going to lose my job because of my metaphysical abilities?

A: Open.

Q: (L) They are not going to tell you something like that. My initial reaction is no, but you may walk away from it someday. (F) Yeah, that's what came to me also. If someone came along and offered you a sewing factory, would you keep on knitting alone at home? (DM) I see what you are saying. Then, what we are doing here might lead to something big? (L) Huge. (SV) I think it already is.

(F) The momentum is starting to pick up. It is like the snowball just starting to roll from the top of Mount Everest. (DM) I never fathomed that...

A: Worry not, DM. “Que sera, sera!”

Q: (Frank) {sings} “Whatever will be, will be...” (SV) Sometimes when you lose a job, you always go onto something better. (DM) I need to actually put something out there to manifest. (L) You are already doing that right now...

A: No need to drive, just ride, that is what we do, we ride the wave!

Q: (SV) Go with the flow. (DM) I just kind of meandered into this. (L) I want to say something now. For a very long time Frank and I have been working at trying to get something through that was of a very high order, and we believed it could be done eventually. We knew we had to kiss a lot of frogs to get to a prince. We also knew we had to go through a lot of pooh to get to the prize. So, we did that for a long period of time. We carried a heavy burden, both of us, for a long time. I am now very, very grateful for all the help that has come from so many directions. It was overwhelming me. I knew the significance, I drove myself... Frank will tell you, I drove myself day and night... I did everything by myself. Finally, others came along who were willing to put forth financial help, time and effort, because I virtually carried it on my own, financially and every other way...

A: And others will be brought in.

Q: (L) And, I want to say that Susan is, at this point, playing a key role in the moving of this project because I have been so physically attacked for so long that without her work, I would not be able to continue, much less do even more, as I can see is going to be upcoming. Frank will tell you that he has seen me laid up in

bed from attacks for literally days and weeks at a time. Then, I would force myself to push on, start driving myself. (DM) Were these problems because of the DNA changes? (L) I think it was more the forces trying to block the fruition of this project, trying to prevent both of us from combining our energies. (DM) Do you suppose they could be working through {my daughter} on me? (L) Absolutely. (F) Nobody who is involved in this will just sail along until they get over the hump. For years and years these forces have been trying to get me to commit suicide because they saw this coming. (L) We have been told by the Cassiopaeans that both of us were programmed to commit suicide or otherwise destroy ourselves. I asked why this was and we were told that we were very important to the world. I initially had a little trouble with that answer, but, it seems that this project is the meaning of it, at least up to this point. Who knows what it ultimately means? (DM) What about Scientology?

A: Another Lizard plot, of course.

Q: (DM) Well, I was really into it. (L) So, on the one hand we experience a lot of attack, and on the other, there has been a lot of divine intervention to get us to this point. (SV) I have a friend from school named Linda, she's in Tampa. Who or what is she channeling?

A: Multiple sources.

Q: (SV) I am going to be taking a class from her in Oriental healing... (L) Now, in a previous session, and this is what I seem to be doing tonight, covering some stuff and filling in some blanks...

A: Okay, but why not spread review process over several sessions?

Q: Well, just one more question: You said that Neanderthal man had been taken by the Lizzies to another planet, now, I don't want

to know what other planet, but I would like to know what state, evolutionary speaking, is Neanderthal man in at present, as we measure time?

A: No progress, still the same.

Q: Any information for us in general?

A: Listen: Now is point where all can learn more information by searching within more, rather than from without. One or two of you are already very adept at this, this way you access universal truths directly, where there is less likelihood of corruption if done properly, see?

Q: (L) Does this mean you want us to start using a direct channeling method? (DM) Do you want us to use one of us as a voice?

A: All.

Q: (DM) Do you mean simultaneously?

A: As you wish.

Q: (L) Do you mean that you want us to, for example, gather as a group, meditate together...

A: Just ask yourselves questions, and receive answers.

Q: (L) In other words, no hypnosis, just sit and discuss and ask back and forth among ourselves and let the energy of the group interact?

A: Or in solitude as well. Then network and exchange lessons, one does this often.

Q: (L) Okay, you want us to do the discussion thing, and you want us to begin to ask ourselves? Does this mean you want us to discontinue using the board?

A: No, of course not!!

Q: (DM) I don't understand. (SV) I do, we are supposed to find out things on our own and check certain things out to make sure we are on track.

A: Open channel, one or two are open already.

Q: (L) One or two individuals in the group are already open?

A: Yes.

Q: (DM) Who are they?

A: Open.

Q: (L) They are not going to tell us that. (F) All you have to do is ask the questions and the answers come to you. I do it all the time and have been since I was five or six. (DM) That is what I started to do. I started hearing the answers before they were spelled out. (F) That happens here with the board, but what I am saying is the answer is to channel by yourself. (L) Don't we have to be concerned to a certain extent with corrupting influences?

A: Not with your group.

Q: (L) Does this mean, at this point, we are individually and collectively, tuned in?

A: Yes. We will aid in process to an extent.

Q: (L) And as the group grows larger, the other people who come and find themselves at home with us, will also be assisted in this manner, is this correct?

A: To an extent.

Q: (DM) We will have to use a lot of discernment as to who... each person will have to be checked...

A: No.

Q: (L) I think as people encounter this, they will either stay or go...

A: Yes.

Q: (L) I want to ask a question about two of our former participants who fell by the wayside... I have a very strong feeling that V*** may not come back...

A: Open.

Q: (L) I also do not feel that there is any possibility of S*** {"Candy" in "Amazing Grace"} being salvaged from the Lizzie control, is this correct?

A: Open.

Q: (L) Earlier we were reading from Ouspensky's "Tertium Organum" about perceptions, was this a fairly accurate description of the state of our perceptions and the state of 2nd density perceptions?

A: Yes.

Q: (L) Okay, now making a jump with that, as to 4th density perception, is the 4th density perception...

A: Wait and see.

Q: (L) The other night when I was meditating, I felt a gentle presence in a sort of light movement of air around my face and a sensation of mental floating, was this you?

A: Open. Your mind was given to you for a reason.

Q: (L) Okay, I am not going to ask about things I can figure out myself, but I am going to ask about something I don't know: as you know, Frank's dad passed away about two weeks ago. From that day to this, everything has seemed to be different in terms

of dynamics and energy, and this is not just with Frank and his family, but also with myself. I am curious as to why I feel so different. I cannot put a word to how different I feel... it is definitely a feeling, an emotional sense, why is this?

A: Let us just refer to this as a steppingstone or “milestone,” if you prefer.

Q: (L) Okay, it is a milestone, but why should this... I wish I could convey to you all how strange I have been feeling... (DM) Can you specify strange? (F) See, I don't even know... (L) Is Frank's dad earthbound?

A: Partially.

Q: (L) Is he trying to communicate through me?

A: Maybe.

Q: (L) Why, on the day and at the time that Frank's dad decided to make his transition, was I overwhelmed with the need to go to sleep? {Frank's dad committed suicide.}

A: Connection.

Q: (L) Connection to what? (DM) You mean he was connecting with Laura?

A: Close.

Q: (SV) She was connecting to him?

A: Close.

Q: (DM) Were they mentally entangled. (L) No, you are drifting. (F) Let Laura ask the question. (L) Did he basically come to me at another level...

A: Yes.

Q: (L) He came to me at another level, why me and not Frank?

A: He always trusts others to be more qualified.

Q: (L) So, he was trusting me to be more qualified than Frank, to advise him in his new estate, is that it?

A: Yes.

Q: (F) Well, that certainly fits his personality. (L) What does he want from me now?

A: Nothing specific, but open channel and see.

Q: (L) Can we address Frank's dad directly through the board?

A: Laura can meditate on an individual basis, this is the chosen mode.

Q: (F) That is probably why you are feeling so weird is that you haven't opened to channel on your own. (L) Yeah, and it's driving me nuts. (DM) It's interfering with your thinking processes. (L) Does Frank's dad need me to help him to release into the light?

A: Open.

Q: (L) Well, it has definitely been a problem, but I'll deal with it. (DM) I am wondering if your questions are carrying to the microphone. (L) Okay, anything further on this matter that you can give me to ease the situation?

A: No.

Q: (L) One of the things that has been being brought to my mind continuously and repeatedly since that time has been the memory of the lifetime that Frank and I explored before, where we were brother and sister in Bavaria, and I am wondering if there was some connection with Frank's dad in that time, and is that why it is being continuously shoved in my face?

A: Why not check it out? You are good at that, when you want to be.

Q: (L) Obviously you want me to check it out through my own head, right?

A: Yes.

Q: (L) Okay, well, since we don't really have any further questions we will stop for the night.

A: Goodnight.

END OF SESSION

3.11 February 18, 1995

Frank, Laura, Terry, Jan, DM

{This is one session that I believed to be corrupted. The woman, DM, who attended several sessions, including the one immediately prior to this one, was the probable cause. There was a STRONG conflict between her and Jan. There were a LOT of peculiar things about this whole session, as you will see. It wasn't just the attitude either. I think one of the clues was when they abbreviated the word "Cassiopaea," which was odd at this stage of the experiment. }

Q: (L) Do we have anyone with us?

A: Stop.

Q: (T) Stop what, our discussion of all this weirdness?

A: No. And it is not weirdness.

Q: (T) What does "Stop" mean?

A: Close doors.

Q: (L) Well, that is weird, they have never been bothered by the household noise before. (We closed the doors.) Who do we have with us tonight?

A: Teiurannea.

Q: (L) Okay, why did you want the doors closed and are you going to give us our answer?

A: There is usually too much interference from outside influences.

Q: (L) And we have with us...

A: Living room contains too much noise and static.

Q: (L) Well, they have never complained about it before... (J) It must be the TV... (Laura instructs children in the next room to turn down television and get quiet.) Don't you like Star Trek?

A: Not problem.

Q: (L) What is the problem?

A: Noise and innocent banter.

Q: (J) It's the kids. (L) Well, they will be going to bed soon...

A: You will not have control of this session, so don't worry about asking silly questions, as before!

Q: (L) Well, that doesn't sound very friendly, does it? (T) Are you going to impart some information that you want us to just listen to and absorb?

A: Sometimes friendliness must be set aside to get your attention and redirect wavelengths.

Q: (T) You have the floor, redirect.

A: Pause... wait for important information to be directed through our channel. You forgot id inquiry.

Q: (L) Where are you from?

A: Cass. Children are not cooperating. {Laura sends children to bed. Much negative feeling engendered thereby.} Thank you. You need to be more open, remember, we are you!!!!

Q: (L) Who is not being open?

A: Not issue. Can you imagine what it is like to look at yourselves as you once were, and to know you still are, and must communicate with yourself on a most unconventional level for union of purpose?

Q: (L) No, I don't think I could imagine that.

A: Well, try!

Q: (L) I am trying. I guess it would be like looking at yourself as an infant.

A: Okay. Continue.

Q: (L) Well, getting into the mindset of an infant we find that they have very little awareness of what is going on. Their awareness is primarily focused on meeting their personal needs, themselves, food, comfort, and the adult is worried about whether the roof leaks, whether the wind is going to blow the windows in and whether the wolf is going to come howling at the door, is that pretty close?

A: Progress!

Q: (L) So, you find us to be a bit trying at times?

A: We are you, you are us, we are literally one and the same.

Q: (L) So, you don't find us trying because it would be difficult to find oneself trying, but it is still possible to be dissatisfied with an aspect of one's personality? (J) Or, like loving someone and seeing what they could be and being a bit impatient that they are not?

A: Wow! What a concept!

Q: (L) Alright...

A: Laura, you still think we are a separate entity from you. You go around saying to people: "The Cassiopaeans said this, the Cassiopaeans said that." Don't you know it is you as you will be?

Q: (T) Faced with the fact that they were like this back then and they are trying to deal with it as it is, and they are trying to convince themselves back now, to open up enough to listen to ourselves there... or something similar to that. (J) Well, I think they have patience with us.

A: Close, Terry. It is fun to us to listen to you as you!

Q: (T) Cool! It's nice to know that I am entertaining myself in the future.

A: As us!

Q: (T) But, it's got to be frustrating because when you were us in your past, in third density, you didn't know enough to be able to communicate with yourself in the future. (J) Well, maybe they did. You don't know that.

A: Wrong! What do you think this is!

Q: (L) This is the future, the past, the present... (T) But, it is hard for you to understand that now as us stuck in 3rd density... they are me, we are all together, coo coo cachoo! (J) It's hard for us, it's not hard for them. (T) They are us, we are them.

A: Not hard for us in either point of reference.

Q: (T) Then why is it hard for us here to perceive what we there seem to understand? (L) Maybe it is not as hard for us as we seem to think it is. (T) Well, how do we get past it, then? How do we get to the point where we perceive what we need to perceive? (J) Let it go.

A: You are past it.

Q: (T) So, just by the fact that we are doing what we are doing, we are past that point. Now, all we have to do is to be able to open up more to be able to do this correctly?

A: Bingo zingo!

Q: (T) Obviously someone else of us likes to say “Bingo zingo,” which you got from us back then when you were here because I never said “Bingo zingo.” (J) It was Al. (T) Al, the hologram said bingo zingo...

A: Or maybe you changed and decided you liked to say it!

Q: (L) Alright guys, can I ask a question. I have had something bugging me all week.

A: Ask if you must, but we are going to have fun tonight.

Q: (J) I also want to ask about that sleep interruption I experienced. (T) We always have fun... why don't we let them run their stuff out... (L) Okay, run your stuff out...

A: No Laura, we are not the Lizzies; this is Cassiopaea calling. Worry not, channel is now permanently locked in, but damn those tapes!

Q: (L) You are giving me the heebie-jeebies guys. {I was really feeling that this session was off.}

A: You are too serious.

Q: (L) Well, somebody's gotta be!

A: No!

Q: (T) Well, you were going to give us some important information here... that is what you said in the beginning of this session...

A: All in due time, but first, we want to have some fun.

Q: (L) Well, go ahead. I want to see this happen, do it.

A: Lighten up, Laura. This is your other persona talking directly to myself!

Q: (J) This does not make sense. I don't like it when I can't understand it...

A: Persona. Jan, you always had trouble with the pens and pencils after you/I learned the computer!!!

Q: (J) That's true! I have to block print.

A: Now it's me/us, Jan.

Q: (J) So it was your persona talking to you, Laura.

A: Forget it, Laura, it was just only one of many, many learning experiences! They all enriched us tremendously.

Q: (L) What am I supposed to forget that was the learning experience?

A: Lifetimes of "woe."

Q: (T) Is this one of her/your lifetimes of woe?

A: They all are if we choose to view them thusly.

Q: (J) I have a comment to make to the Cassiopaeans. (T) Does this include 4th density life as well? (J) I may have a hard time

writing, but half the time I am already anticipating what they are going to say and am writing ahead, so they should cut me some slack. (L) Cut her some slack, guys. (T) Cut, cut!

A: Slack cutteth!

Q: {Laughter} (T) I'm glad to know there is still humor when you get up to 6th level!

A: There is a lot here, not nearly enough there. Dear Jan, give the pen and paper to DM.

Q: (T) A dear Jan letter! {laughter} (D) I guess I'm sitting over here getting stuff too. I've been feeling kind of like a fifth wheel anyway.

A: I,we, heard, DM. By the way, this is us talking!

Q: (T) By the way can be abbreviated BTW, guys.

A: BTO.

Q: (L) What does that mean? (T) By the other?

A: Bachman Turner Overdrive!

Q: {Laughter} (L) Well, Terry, if you didn't know that one you are really in bad shape! (T) Emerson, Lake and Palmer! Electric Light Orchestra! (L) Well, I just want to say something...

A: Okay, Laura, ask it if you must.

Q: (J) I want to ask about...

A: Laura first, we/she is about to jump out of her/our skin.

Q: {Laughter} (T) Ask away, my dear. (L) I wanted to ask, now you guys are going to be mad at me because I am going off on a very serious tangent...

A: We know, just ask it, already!!!!

Q: (LM) Is that New Yorkese? (L) The question I wanted to ask...

A: No, LM, Miami Jewishese!

Q: {Laughter} (LM) I thought they were in Cornucopia, not Miami! (J) Just spit it out! (L) My question is... (T) She forgot! (L) No, I didn't forget, I just have to figure out how to word this. As you know, I am reading this book about Holocaust victims reincarnating and remembering their experiences at this time. The question is, on one occasion you told us that the Jewish people, as a racial group, were Atlantean descendants, is that correct?

A: Some.

Q: (L) There is some. Can you give us that some?

A: No.

Q: (L) Is there some karmic element that was fulfilled by the Holocaust?

A: Of course.

Q: (L) Could you tell us what karma was being expunged in that activity, and what group the Jews represented?

A: This is not germane, but it was Atlantean overseers "expunging" guilt from that life experience.

Q: (L) So...

A: So what?

Q: (L) A couple of weeks ago I had an experience where I woke up in the morning and felt as though my tongue had been torn out. I felt the sensation of something unusual having happened. I would like to know what this was. {I actually woke up spitting blood from deep in my throat and it was on the night before I was to have an MRI done.}

A: It is not important.

Q: (L) I know you say it is not important, but this had some very serious ramifications for my physical body.

A: As always. And, have we not advised to concentrate less upon physicality?

Q: (L) Well, the point I am trying to get at is, if I was hauled out in the middle of the night by a bunch of Lizzies, or whatever, and worked on, I would certainly like to know about it. I know it's physicality...

A: You were not.

{Maybe not by Lizzies, but something very strange happened on that night. Something that had been seen in an X-ray was NOT present on the MRI that was done that morning.}

Q: (L) Okay Jan, ask your question, if you dare! (J) If I dare! I had an experience last week where I woke up about 20 minutes after I had gone to sleep, screaming my head off, because there was something standing by the bed. What was that?

A: Now Jan, you indeed were taken!

Q: (L) Who took her?

A: Our friends, the Grays.

Q: (L) What did they do?

A: Study update on psychic database.

Q: (T)

A: Mirth should never stop!

Q: {question lost}

A: Wrong concept.

Q: (T) Was Jan startled and screamed at the sensation of passing through a window?

A: Don't need windows.

Q: {question lost}

A: Usual abduction experience, as you are familiar.

Q: {question lost}

A: Okay.

Q: {question lost}

A: Yes.

Q: (T) The event seemed to have lasted, in our illusion of time, 20 minutes, because I was in the living room watching the television while this happened. But, the experience that happened to her may have lasted longer or shorter in our perception of time, correct?

A: Yes.

Q: (T) So, when she screamed... (J) Did I stop the abduction by screaming?

A: End, consciousness level border.

Q: (T) So, when I came into the bedroom, it had just finished?

A: Yes.

Q: (T) I had nothing to do with the ending of the event? Her screaming just alerted me.

A: You were diverted.

Q: (T) Well, that's easy enough to do for me. I'm easy to divert! Give me a computer screen and I'm diverted.

A: All are.

Q: (T) I'm in good company.

{Break}

Q: (J) I have a follow-up question. After that happened, Terry made the comment that he...

A: DM, please join board!!

Q: (J) Do they want all four of you? (L) No. I don't want to talk to them tonight, they are being ugly! (D) They are making me feel awfully important!

A: Ugly is subjective. We are you, Laura.

Q: (L) I'm not sure I believe that.

A: Why would we be ugly to ourselves? But we understand imprisonment of physicality and its biological tendencies.

Q: (L) What kind of a snide remark was that? (T) They are just telling you that you understand. (D) We are just talking back and forth to ourselves. (T) They are us. We are us.

A: Snide is your, and also our, perception. Alas.

Q: (L) Well, sorry, but it seems to me that you guys are wasting a lot of time and energy. I mean, we stay up late at night to do this and...

A: Who determines waste factor?

Q: (L) Well, that's just my opinion.

A: Ours, too!!

Q: (T) Cause they are you and you are them... as the Beatles said: "Coo coo cachoo, we are the Walrus!" (D) Can't we just ask if they have something important to dispense to the human race

or something like that? (T) Is there something more in the light of what you said earlier?

A: Is in process of being dispensed.

Q: (L) And when is that going to occur?

A: Is occurring now.

Q: (D) Well maybe this whole thing is just to let us realize that we are talking to ourselves from the past...

A: Part. Why resistance.

Q: (D) I guess we just understand it and we are waiting for the next thing.

A: We are not separate from you. Once this is recognized, progress will be made!

Q: (T) Yeah. You are us, we are you. (L) Alright, I want to ask what it was that I went through about a week ago when I felt like I was getting all kinds of stuff pumped into my system that I did not seem capable of coping with in terms of emotional control. What was going on?

A: Answered about one half hour ago as you/us measure time.

Q: (L) I don't remember asking a question about it or getting an answer. (J) You asked about your tongue. (L) I'm not talking about that.

A: No.

Q: (L) What are you talking about... the past life business?

A: Yes.

Q: (L) Well, what precipitated that activity?

A: Ions charged by awareness opening in window of EM envelope, used to precipitate physical trauma in immediate surroundings. “Used to” refers to past tense.

Q: (L) Okay, so in the past, this kind of opening of a window in the EM envelope...

A: You have elevated.

Q: (T) You made a connection with other life experiences, and you were able to experience them in another way. (L) Well, it had some damn strange effects, that’s all I’ve got to say about it! I wasn’t very happy about it. (T) Will she be experiencing more of this now that she’s made this elevation?

A: Yes. Each episode will be easier and easier.

Q: (L) Thank God! When do these guys get to enjoy that particular... (T) We haven’t gotten to that point yet, or we may experience it in a different way. Is that it?

A: Sort of, each has their own issues.

Q: (T) Well, we are all doing different things as we move forward. (J) We all have different issues to work through.

A: Why wish agony upon another?

Q: (L) I don’t wish agony upon another, I just want you guys to appreciate the utter agony... (T) They do appreciate... (J) And we do too... They went through it with you. You didn’t go through it alone! (T) They are you!

A: Why wish agony upon another, all have personal trials, would you/us like to share?

Q: (L) In other words, be grateful that it wasn’t worse. (D) I would like to ask a question because you probably understand it and I do not. If we are 6th and we are also 3rd, in the future, will we be

another 3rd and another 6th... (F) In our 3rd density perception, since our time is linear and we are looking at us in the future, talking back to us in the present, but it is all happening at once because there is no real time. And, probably, I guess this also means that one day, which is also today, we will be 6th looking down here... (D) We will be doing the same thing over and over? (F) Sort of yes and no... I don't think we can quite grasp the whole thing... (T) The problem is...

A: You will grasp it when at 6th level!!! So, rejoice in the "here and now!"

Q: (T) Even at 4th we will understand more than we do now. They are giving us concepts that are beyond third level. They are working with us to prepare us so that when we move into 4th we will have a head start on what's going on. They are bringing us up to where we already are because we came from 4th level to come here to do this originally, to set the frequency and hold it so that others can move to 4th level. We came from 4th density to do this. They are trying to give us enough information so that we will remember... (F) It is kind of like Hansel and Gretel going into the forest and leaving a trail of crumbs so that they can find their way out. We came back from 4th to 3rd to do what we've got to do and we're going back to 4th but we've got to leave a trail for us to keep connected to where we came from... something similar to that, in any event. (F) Is your mind exploding, D__? (T) We, where we are now, don't grasp all this because we are not supposed to at this level.

A: Learning. Laura just gained one more strand, that is why it was so painful, okay?

Q: (D) Say! Congratulations! (T) Yup, she gained another strand and made Reiki Master! (L) I am in a bear of a mood! (T) Mirth! You in 6th density are enjoying the hell out of you now. We are

going to take a break. (F) You gained a strand of DNA? Break

[Break and Discussion about why Laura's curiosity is so far-ranging and why expectations are so high.]

Q: (L) Are you with us guys? Of course, you are us!

A: Yes, something like that.

Q: (T) Why will Laura never be satisfied?

A: You are insatiable.

Q: (T) Are you insatiable? That's why everything is flowing on you, cause you're insatiable. (L) Oh well, we all have our crosses to bear. (D) You are better at asking questions, would you mind asking "us" if my abdominal problem has anything to do with my DNA changing?

A: Beware driving tonight, DM.

Q: (L) Is DM's DNA changing and is this stomach problem she has been having evidence of this DNA change?

A: Yes and no.

Q: (D) Thank you. (T) Are you dudes or dudettes? No, we already asked that...

A: Background review.

Q: (L) I want to ask about the Reiki Mastership. We have discussed the charges, at least Susan and I have been discussing it, my feeling is that it should be made available to people for a lot less than what it has been going for, but at the same time...

A: Yes, but please now less personalization.

Q: (L) Is that a personal question?

A: Was leading to same.

Q: (L) Well, I beg to differ. It was not.

A: Expect 4.7 tremor in the U.S. within three days. In the N.E., Rochester, N.Y. Area. Faults exist near there. Mt. Vesuvius and Etna activity within calendar 1995. And Thera as well. In Africa, floods kill 1,000's in summer of 1995.

Q: (D) I think it might be very important for us to contact somebody and tell them how we got this information... (T) Are the volcanos related to the Japanese stuff?

A: Yes. Volcanic eruption under arctic ice in 1996.

Q: (T) Cool! (L) That ought to be a real zinger. (T) That will bring us some floods then!

A: No. Weather causing increased evaporation and yes, UFO flaps are caused by our activities and these communications!

Q: (T) Did we ask that? (J) No, but I have been thinking about it and we were talking about it earlier. (T) We are helping to create...

A: Causing, Terry.

Q: (T) We are causing this? (D) No..

A: Yes.

Q: (T) So what they are saying is that we are helping to open up the area so that this is happening more?

A: Blasting open huge window. Gigantic, biggest in recorded history!!!

Q: (L) And to think that all this started when I hypnotized Pat Z__. Just think, if she only knew what she did!

A: Not PZ, is our "Link-up."

Q: (L) Well, I was just kidding. (T) A little mirth there, guys. (L) Can I have a little mirth once in a while?

A: Yes and you are going to need all the mirth you can get.

Q: (J) I always said that the only way to get through life is with laughter. (F) That sounds rather ominous to me. (L) Yeah, me too. (T) The more we work this channel, the larger this window is going to become, is this correct?

A: Yes. And you will be busy.

Q: (F) Is that why we need all the mirth we can get, because we are going to be so busy?

A: Yes.

Q: (D) Should we be doing this more than one night a week? (L) No! (D) Oh, excuse me.

A: No.

Q: (T) One night is more than enough. (F) What do you want to do, drain me into entire non-existence? {laughter} (L) We tried it more than one night a week and it nearly killed us. (T) While we are blasting this window open, are there other people on the planet taking notice of this?

A: Getting side effects.

Q: (T) Will they eventually be able to pin down the source?

A: Maybe.

Q: (T) So, we better keep a lot of mirth cause we might be having visitors. (D) Is there something we can do to help them to locate this? (L) We don't want them to! (D) Oh! Why?

A: MIB's.

Q: (T) The Men In Black! No, DM, we don't want them to know where we are! Anybody who will come about us causing them difficulties will not be happy about it! (D) Oh, I didn't realize it was a difficulty. I thought it was good. (T) It is difficult for them... (D) I see, I see... (T) If what we are doing here creates more and more difficulties, side effects would be problems with communications, things of that nature...

A: But also able to channel stronger.

Q: (T) Okay. We will be able to channel stronger because we are growing in strength. Are we also causing some earth changes... are we part of that?

A: Symmetry.

Q: (L) Huh? (D) Things are happening together. (T) Cause and effect...

A: Yes.

Q: (L) Are we building a giant energy bubble around our area?

A: You are the guidepost of the destiny of the planet.

Q: (L) But Mom! I didn't want to grow up to save the world! {laughter} (T) Will they make a TV movie about us after this is over? This is mirth! (D) Are we ever going to be known for this? (T) I sure hope not! I don't want them coming down on us!

A: Wait and see!

Q: (L) I have a question now... Jan and I worked very hard the other day on trying to lay out our mail-out. Is this the preferred format or should we go with a different format... just bear with us... (T) We need some style input here...

A: Of course you are heading in the right direction, symmetry, synchronicity.

Q: (L) Is the Reiki symbol that I picked to put on the cover, is that going to help to power out this energy.

A: Maybe. Why not use the symbol given to you?

Q: (L) You mean the An nu ki?

A: Bingo!

Q: (L) Then we'll put the An nu ki symbol on it then, which is the three part pyramid. (Terry reviews predictions.) Are there more predictions?

A: No.

Q: (T) Well, I just wanted to make sure that we didn't go off on a tangent and miss something. Okay. (D) Did I ask if we are supposed to let that be known? (T) What's that? (D) This information and the predictions? (T) I guess it is up to us whether we want to tell anybody or not. Will anybody be hurt in the Rochester quake?

A: No.

Q: (J) It's just a small one. (T) Just enough to get their attention?

A: Yes.

Q: (T) Okay, do we have other questions? (L) Yeah, I want to...

A: Small Fire in Illinois. Won't be tragedy, just inconvenient. Who has a farm in Illinois?

Q: (D) I'm from Illinois. My folks have a farm there. Is this the farm you are talking about?

A: Yes.

Q: (D) When will this happen?

A: Soon.

Q: (D) Is there anything I should do to prevent it?

A: No.

Q: (L) Alright, I want to ask a question. This is a trick question. It involves mind-reading. Please answer the question I am thinking.

A: Your dreams are valid.

Q: (DM) My dreams are valid?

A: No.

Q: (T) Laura's dreams?

A: Yes.

Q: (T) What dream? (D) your dreams are valid, Laura. (T) Was that your question? (L) Well, sort of. It could apply. (T) They answered your question before you asked it. (L) Yeah. I wasn't going to ask it out loud anyway. (T) If we could just get them to skip the questions and go to the answers, we would make a lot better time here.

A: Have.

Q: (L) In other words, my impressions of the ultimate outcome of this DNA switcheroo is...

A: Yes!

Q: (T) Any other questions?

A: Go to Pensacola.

Q: (L) Who wants to go to Pensacola?

A: I do, I do. {Laughter}

Q: (T) Is something going to happen in Pensacola?

A: Conference.

Q: (L) Is there a conference in Pensacola? (T) It's in October. (J) Are you talking about the October conference?

A: One before then.

Q: (T) There's another conference before the one in October? I don't know anything about this other conference.

A: Increasing activity in Florida panhandle, vortex. If you go to Pensacola you will see UFOs of all origins including yours truly.

Q: (T) Oh! It's your conference! And we've been invited!

A: Okay.

Q: (T) And we have tickets! Are you guys going to front for the hotel bill? That is, will we front the hotel bill for ourselves?

A: Silly.

Q: (L) I hate to come back to these mundane 3rd density questions, but that is an undertaking that requires a flow of energy called money. I mean, we can't just charge off to conferences every day, you know. (T) When is it that we are supposed to go. Is it that whenever we go, then will be the conference?

A: May.

Q: (T) Is there something in May? In Pensacola? (J) Project Awareness is in May but that's in Tampa. (T) Are you talking about the conference in May that is being put on by the Pensacola group?

A: Look and see.

Q: (T) You are talking about the conference in Tampa that is put on by Project Awareness? (J) Do you want us to physically go to Pensacola? This is beginning to sound like the Gulf Breeze Six, the guys that boogied out of Germany because they were doing

the same kind of stuff we are, only they had someone else who told them to do that. Okay, in May we should go to Gulf Breeze?

A: Yes.

Q: (T) Okay, the conference in Gulf Breeze is going to be in Tampa in May. (L) Well, maybe we should go there and all the UFOs will show up while they are all down here. That would be a gas! (T) Are we supposed to connect up with the C____'s?

A: Yes.

Q: (T) Are we supposed to go in May before the conference?

A: Go back with them. See them here, then return.

Q: (D) What are we going to accomplish by going back with them?

A: Do a session and monitor the skies at the same time. Have someone posted outside with a video camera!!

Q: (D) Is that when we are going to go public? (T) We are already going public. This is when we are going to convince the nation. We have to go to the conference, get the C____ aside and...

A: Let's try to steer all these "Ufologists" in the right path.

Q: (T) I'm going to take my hand off so it won't start moving while I am talking. I don't want me to start off while I'm talking! Don't you love it?! Not only do you have to contend with you, you have to contend with YOU. When we do what we are doing, we are opening a window, as we have been told. Are we pulling stuff in that doesn't want to come through? Are we accidentally pulling people or beings through while we are doing this?

A: Windows provide for easier transport.

Q: (T) Yes, but what I am getting at is, is there some 4th density being just bopping along the 4th density lane who just accidentally

falls through this window and goes: “What the hell!!”

A: It is conceivable. If 4th density “Lost Traveller” should show up at your door, please resist strong urges toward rejection.

Q: (T) We won’t make them feel uncomfortable. (J) We will always welcome guests, yes. (T) They are always welcome here!

A: That was serious comment.

Q: (L) How are we going to know it is a 4th density “Lost Traveller?” (D) You guys, I am getting very, very weak.

A: Obvious.

Q: (L) Let’s shut down for the night, I am pooped. (T) Any last words?

A: Goodnight.

END OF SESSION

3.12 February 22, 1995

Frank, Laura and SV

Q: (L) Cassiopaeans, are you with us?

A: Yes.

Q: (L) Who do we have with us this evening?

A: Iora

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) I would like to ask who was with us last Saturday night, was it one of the Cassiopaeans or were we pulling in some corruption?

A: Yes.

Q: (L) We were pulling in corruption last Saturday?

A: And us.

Q: (L) It was both?

A: Yes.

Q: (L) What was the source and reason for the corruption?

A: Trailer.

Q: (L) What is a trailer?

A: Hanger on. Diverter of energy wave.

Q: (L) And how did we acquire or have this diverter?

A: You know.

Q: (L) In other words, it is as I suspected, that DM has brought in attachments because she is an agent of the Lizzies, though she is not aware of this?

A: Hormonally charged through their influences on her mind.

Q: (L) Would it be better to do the sessions without such individuals present?

A: Up to you.

Q: (L) Well, obviously since we don't want that kind of thing to happen anymore, the choice is already made. Okay, I would like to know, recently I watched a video at Jiles Hamilton's on psychic surgery. This, obviously, was the real thing. Am I correct in

that assessment? {The video was made and presented by Henry Belk.}

A: No.

Q: (L) No?! What was happening?

A: Fakery and “demonic” influences to delusion, now, strict warning: avoid at all cost!!

Q: (L) Avoid what at all cost, psychic surgery?

A: Yes.

Q: (L) Well, that is pretty heavy duty. (F) They almost never say anything like that. (L) I would like to know for the benefit of somebody else who asked the question: What is the origin of AIDS?

A: Simian mutation.

Q: (L) A monkey virus, in other words.

A: Was, but mutated.

Q: (L) Who is the individual or group responsible for this mutation?

A: Not humans.

Q: (L) Well then, who?

A: Lizards acting in conjunction with destined frequency path.

Q: (L) And what is the purpose of the infliction of the AIDS virus on the human race?

A: Not determined.

Q: (L) I would like to know how many lifetimes I have had as a human being?

A: That is open to definition.

Q: (L) Well, on planet Earth.

A: Including Neanderthal?

Q: (L) No, we'll just pass that up.

A: Okay, then it is 79 in broken sequence.

Q: (L) Broken by what?

A: Other planes.

Q: (L) The same question for Frank?

A: Same exactly.

Q: (L) How many for SV? Same?

A: No. Not correct definition of answer.

Q: (L) What would be correct for her?

A: Not same exact sequence. 72 plus 4 as special learning channel "hold back" on contemplative plane AKA 5th density level.

Q: (L) SV is a 5th level soul?

A: No. Spent 4 sequence hold overs there.

Q: (L) Now this is curious. Why do Frank and I have these 79 lives in the exact same sequence? Isn't that a little odd?

A: No.

Q: (L) How many lifetimes have the three of us in this room worked together?

A: Discover.

Q: (L) Now, you said that the Jews were Atlantean descendants, and that Noah was an Atlantean...

A: Most of them.

Q: (L) What is the significance of this relating to their religion and their experiences and the current state of the Jews?

A: Was Jews in “holocaust” only.

Q: (L) Is the Jewish religion somewhat similar to the Atlantean religion?

A: Did you understand the previous answer?

Q: (L) Are you saying that the Jews were the only ones in the holocaust?

A: No.

Q: (L) Are you saying that the Jews were not the only ones in the holocaust?

A: No special karmic significance to being “Jewish”, special significance is experiencing holocaust for purpose of purging extraordinary karmic debt.

Q: (L) Okay. I got it. Now, is the Jewish religion similar to the Atlantean religion?

A: Not one religion only. Many “religions.”

Q: (L) Now, I would also like to know: last January we had a lot of booming sounds which were reported to the local sheriff’s office. The papers reported that they were military planes on maneuvers. Is this correct?

A: Yes.

Q: (L) I guess we are done for now. Is Frank going to have enough money to pay his bills? {He had spent several hours before the session complaining about his finances.}

A: If aided by group.

Q: (L) We would like to have this project bring income so that we can devote more of our time to it. Is it going to become self-supporting?

A: Eventually, yes, but immediately no, because of veil of skepticism combined with relentless 4th density level originating attacks. Beware of those who profess great interest; agents of STS are preparing many false guides, as you have already seen.

Q: (L) What can we do to protect ourselves from this?

A: Suggestion: “Buttonhole” in point blank fashion those who promise assistance or interest in indefinite way!

Q: (L) What does that mean?

A: Good question; when someone greets you at a function and gets your hopes up regarding helping you to further this most important work, demand immediate proof regarding their sincerity and credibility!!!

Q: (L) And if they don’t prove their credibility and sincerity?

A: Drop them at once!!!

Q: (L) In other words, don’t waste our time with deadbeats?

A: Or agents with ill intentions, either conscious or unconscious, don’t be afraid to confront directly immediately and openly.

Q: (Frank) If somebody comes up and says to us: “I can do this or that for you” or “I’m interested” or whatever, we must tell them right off the bat that it is very nice that they are interested, but they must understand that we are under attack because of our work, so we have to know that they are serious and honest and good intentioned. (L) So, how do we get them to prove their sincerity? (SV) Get out the checkbook! (L) Is that it?

A: Well, that can take many forms, but awhile ago, you asked about financial assistance, so why not say “put your money where your mouth is,” or something akin to that?

Q: (L) Well, that’s it for the night. Thank you very much for being with us.

END OF SESSION

3.13 February 25, 1995

Caryl D {woman into “color therapy}, Bill P {CD’s boyfriend and New Agey type}, Tom M, Gene B {Former head of regional MUFON}, SV, Terry and Jan, Frank, Laura, Denise J, LM

{The group had been discussing a June 5, 1995 mass UFO landing predicted by purported diary of last pope, supposedly found by his cleaning lady.}

Q: Hello, how are you tonight?

A: Hello. Okay. Why not regroup. Concentrate. Too much energy. Children. Sorry. Who are we?

Q: {Children are sent to bed.} (T) Ask them if anyone else can sit at the board this evening?

A: Sure.

Q: (GB) Can I sit in there now? (T) Sure. Do they want all four of us or just three? {GB takes Terry’s place at the board.}

A: No matter.

Q: (J) Who do we have with us tonight, we didn’t ask.

A: Concentrate. Slow mental processes down. Less pressure. {GB lightens up.}

Q: (L) Who do we have with us tonight?

A: Who are we?

Q: Who are you?

A: Cassiopaeans.

Q: And who do we have with us?

A: Pommori.

Q: (J) And who do we have with us tonight in 3rd density?

A: Unknown. 3rd density is you! And us in the “past.”

Q: (L) Let’s get on with it.

A: Ask who is at south position.

Q: (L) Who is at the South position? Oh, that’s you. Yeah, that’s GB, as if you didn’t know. Are we playing bridge, or what?

A: Hello. Concentrate all in room.

Q: (T) What are we going to concentrate on? (L) Is anybody thinking about sex? {laughter}

A: Mind.

Q: (GB) Ask TM’s question: will there be a mass landing in 1995?

A: Not ready to answer. Still trying to settle energy waves in room.

Q: (GB) Let me ask you Frank, you are the only one this comes through? (J) Well, we have not really determined that. (F) No, we haven’t determined exactly what happens. It seems like I’m the, what you would call, primary channel. (TM) Can you do it by yourself without anybody else? (F) If I did do it by myself without anybody else holding it, I wouldn’t trust the information.

(TM) Can you do it in a meditative state? (F) Well, we have tried it with me under hypnosis and have gotten a lot of information, but again, we don't trust it because it doesn't have the participatory aspect to it. (L) This way no one really knows what is being said. It is not coming through any one person's mind. No one thinks the thoughts as they come through. (F) I have also sat at the computer and gotten a lot of stuff, but, again, I don't know how much I would trust that. (L) You never can tell how much of that is your own stuff. (F) The standard way of channeling that so many people do, has an extremely questionable validity rating. The validity level of this is also somewhat questionable, but, we have done a lot of checking and testing and, so far, it has more than satisfied all the tests we have applied. (GB) Can we do it with our eyes closed. {An experiment is attempted to see if the information will come through with all eyes closed. It is unsuccessful. Trying various combinations of eyes closed and/or open are also unsuccessful. It seems that the eyes of all participants must be open at once in order for the contact to be sustained. This agrees with the idea that it is a purely telepathic contact and not 3rd density or "poltergeist" in nature.} (L) Now, we are curious as to this channeling process, and ordinarily, when we do not have so many guests, it is quite different, and we want to know who is the primary channel here?

A: That is not the issue.

Q: (L) Is it important for us to use our senses, as in our eyes, ears and so forth, while doing this?

A: Of course. How else can we see the board?

Q: (J) They have to see the board through our eyes. (L) Could Frank do this alone?

A: No.

Q: (F) Could Laura do this alone? (T) Do you want the original three on the board?

A: No. Not issue.

Q: (J) Well, what is the issue? (T) What is the problem here?

A: Fractured frequency.

Q: (J) Why is it fractured?

A: Detached energy.

Q: (L) Are you saying that there is something floating around in this room doing this?

A: Not certain.

Q: (J) What can we do to help?

A: Will clear eventually.

Q: (BP) Well, ask a question. Maybe it will clear with a question. (L) Well let me make a suggestion... Terry, you come back and sit down. GB you back up for just a little while and let's get the flow going with what they are used to and then others can cut in, so to speak. I mean, I am impatient with this method to begin with, even though I find it eminently trustworthy, and this dragging it out is getting on my nerves. (BP) Yeah, my brother-in-law pissed them off! {Changes are made.} (J) I think part of it is that we have new people present in the room and it is a great influx of new energy. (L) Now, how are we feeling?

A: Now, more powder. We are sorry for the delays. One in the room is under great stress.

Q: (L) Who is stressed?

A: CD.

Q: (L) Are you stressed? You don't look stressed to me. (CD) I don't feel stressed.

A: Under pressure for study.

Q: (BP) It's for that article you want to write. (CD) Maybe. (L) Do you have a deadline or something? (CD) Yes. But I am really not thinking about it, at least consciously.

A: Yes. You have been watched, CD.

Q: (L) By whom? (BP) CD has been watched?

A: Government.

Q: (BP) It's been nice knowing you! {laughter} (GB) Do these guys have a sense of humor? (J) Yes, as a matter of fact, they do! (T) Is this mirth, here?

A: No, this is not mirth.

Q: (BP) Why is the government watching Caryl?

A: Has because of writings or papers.

Q: (L) What are you writing? (CD) I write books. Does it have to do with the twin research? (BP) Vanishing Twin Phenomenon?

A: Partly.

Q: (CD) Does it have to do with the prodigies?

A: Partly.

Q: (CD) Does Tim C___ have anything to do with this?

A: Open.

Q: (BP) Is Tim C___ working for anyone other than himself?

A: Open.

Q: (J) How does Tim C___ feel about Caryl?

A: Okay.

Q: (T) Is he part of the problem?

A: Open.

Q: (GB) Does Caryl's new paper have anything to do with it?

A: Yes.

Q: (L) What is it about? (CD) The prodigies, people who have contacted extra-terrestrials and have become geniuses, and the Vanishing Twin Phenomenon.

A: Danger, this is serious!!

Q: (T) Is Caryl getting close to something?

A: She is at it!!

Q: (CD) What should I do? (T) Have you thought about a trip to deepest Peru? {Laughter} I could point you to some really good temples!

A: Serious problem, please take this seriously.

Q: (GB) Does Linda Howe have anything to do with it?

A: Open.

Q: (CD) What can I do? (BP) Can you suggest action at this time?

A: Stay with others.

Q: (T) Don't stay alone. (CD) Does the incident Thursday night have something to do with this?

A: Yes.

Q: (CD) Is it 4th density danger?

A: No. High level government, you have been striking a “nerve.”

Q: (GB) Well, the only thing you have been talking about is the prodigies and the vanishing twins. (CD) Is it more the twins.

A: Open.

Q: (CD) Does the color work have anything to do with it?

A: No.

Q: (GB) Who have you been contacting? Linda Howe...

A: Not important, the sources are sincere but closely watched. Some of this has now transferred to you.

Q: (BP) Is Robin in danger?

A: Yes.

Q: (T) Is more than one government of more than one country involved here?

A: It is a complex.

Q: (T) Should she take the trip to England.

A: Open.

Q: (J) They are not going to give advice other than to stay with others. (CD) The thing the other night... was I being bombarded by ELF frequencies?

A: All are.

Q: (L) All in the room?

A: All are.

Q: (BP) Are they using ELF or microwave technologies specifically to do something to Caryl?

A: Give maybe.

Q: (T) Run that by us again.

A: Give maybe.

Q: (T) They are giving us a maybe. (GB) Who in the government, which branch of the government?

A: It is a complex source.

Q: (CD) Am I in physical danger?

A: That is not the point. You can be harassed.

Q: (L) I will give you an example. We did a session for Barry and Susy Konicov and they were given a very serious warning to back off on certain activities relating to teaching people how to not pay income tax. They called us one night recently because several people they had been associated with had been raided by the IRS. The IRS had confiscated computers, jewelry, equipment, and whatever else they could lay their hands on and were basically holding these people's possessions hostage until they could determine whether or not what they were doing was illegal or whatever. Barry and Susy expected to be raided imminently. The Cassiopaens said to them that whether or not they got raided was not the point, because they had been warned. The point was, what are you going to do now? What steps are you going to take and what information are you going to accept to prevent further attack? (CD) Should I stop publishing the book?

A: Open.

Q: (J) They will not tell you what to do. (CD) Will not publishing the book stop the harassment and danger?

A: Open. MUFON has "spies."

Q: (GB) So what else is new? (BP) Cannot unconditional love and faith overcome all of this?

A: Open. More is needed.

Q: (GB) Will the government relax their policy this year and release more information to the public?

A: Complicated question because you are making simple judgments based upon available evidence which can be interpreted a number of different ways, not just one! {I believe this answer is for BP's question about unconditional love, not GB's inserted question on another subject.}

Q: (TM) In a book I have been reading it specifically states that Stanton Freidman is a spy. (BP) Really? (T) That is what Bill Cooper says? (TM) I may be taking it out of context because I have not read the whole book. (T) I have heard that before. (L) Let's ask that question. Why do they need spies. Why would anyone need spies in MUFON since everything in MUFON is public?

A: "Double verification."

Q: (BP) Would you ask if Caryl is the only one in the room in danger, and, if not, who else?

A: Yes. But all eventually.

Q: (GB) Is BP in Danger?

A: Well, these are simplistic questions, you need more exposure to this and other sources! We know you are skeptical, but that is good for balance, also, you have much material knowledge! There is more to the phenomenon than "meets the eye."

Q: (GB) What is the danger? Is it mental, physical...

A: Complicated, also GB knows more than he is telling!

Q: (CD) He's the spy! {Laughter} (BP) He used to work for NASA! (F) Did you really work for the Apollo program? (GB) Oh yeah. Secret, as a consultant. (Laura and Jan) Ah hah! (BP) Could they offer general suggestions... I know they won't tell us what to do, but this is a general question for all who are anchoring light, who want to be of service, can they offer any specific suggestions for us...

A: STO, not just "light." {Planchette flies off board.}

Q: (GB) In other words, you have to do something for others. (J) You have to have... (BP) See if Caryl can sit in... {Caryl takes Terry's place.}

A: Hi!

Q: (CD) Thanks for scaring the crap out of me.

A: Knowledge protects, my dear.

Q: (BP) Is the 4th dimension to be eliminated in anyway in terms of planetary ascension. People are talking about the planet going through this big change and the 4th dimension being eliminated.

A: What??

Q: (L) We are moving into 4th density. (BP) We are not going to skip 4th density and move directly into 5th? (L) 5th is the contemplation zone. (F) Where your soul goes when you die. (L) We are going into a state of variability of physicality. (BP) I read the pamphlet... (L) Well, that is just highlights. There is over 300 pages of material. (J) We are working on getting it together. (L) They have talked about the fact that we are moving into a 4th density state and the reptilian beings are trying like heck to prevent this because, once we are in that situation, if there are enough of us who are in the STO mode...

A: You are all 4th density candidates.

Q: (L) Once we move into 4th density we are on an equal footing with all these other guys and things will be more equal. At the same time, those who are not 4th density candidates are going to cycle back and start all over again. Basically they are all going to go into the primordial soup and experience another 300,000 years of strife and misery. (BP) And this moving into 4th density will be a change in perception, rather than a change in location, in terms of space/time, is that correct? (L) Um hmm.

A: Close.

Q: (L) I think that this is about as close as we can get with it. (CD) Is there anything else they want to tell me, or anything else I can do to be of service?

A: Keep quiet.

Q: (L) Keep quiet about what?

A: Two things recently learned.

Q: (L) Did you recently learn some things you are planning on telling the public? (BP) Anything you haven't already told? (GB) Is it in her subconscious? (CD) Is it in the article?

A: Close.

Q: (CD) Is it in my newest book?

A: Ask yourself, CD.

Q: (CD) Is it in the article?

A: Review.

Q: (L) You are talking about two things recently learned here, tonight? (GB) No.

A: No.

Q: (BP) Would one of the things be the mass cattle disappearances in Oklahoma? Is that significant?

A: Open.

Q: (CD) Does it have to do with Robin?

A: Ask yourself, CD, this is for you to know for yourself. More pressure for clean connection.

Q: {Laughter} (L) Well some use too much pressure and some don't use enough. (BP) There you go... They're touchy! {Laughter} No pun intended!

A: Cute, BP. {Laughter} Mirth!!! Knowledge protects. Now, Caryl, ask yourself, who are your true friends?

Q: (L) So, the connection is in there. Knowledge of who your true friends are can be protection. (CD) So, somebody who appears to be a friend is not really a friend?

A: Yes.

Q: (CD) Is it Robin? (L) They aren't going to tell you that. (GB) But you have suspected that all along, Caryl. (J) Ask yourself, you KNOW. (L) Have you had that feeling about this and have been ignoring it? (BP) Can you tell us anything about Jefferson S__? Who is he really? (CD) Is Jefferson S__ involved in this?

A: Open.

Q: (BP) Can you tell us anything about him? Who is he?

A: More than one person.

Q: (J) Interesting. (GB) Is he involved in the complex government? (CD) Is he involved in this danger for me?

A: Open.

Q: (BP) Why are you so f_____ non-committal? {This from the guy who was going on about “love and light”!!}

A: Discover.

Q: (L) This Jefferson S___, do you mean he is more than one person in a physical sense or that he has a multiple personality, or as in AKA? (BP) Multiple identities?

A: Both.

Q: (L) What are Jefferson S___’s intentions?

A: Varied.

Q: (L) What is at the root of his activity?

A: Won’t answer.

Q: (L) What are his thoughts or intentions toward Caryl?

A: Ask that of all.

Q: (J) Ooh! (BP) All in this room? (CD) Is Tim Crampton working for the government?

A: Cannot say, “Free will.”

Q: (GB) Why don’t we get off this subject and come back to it. Give me a definition of the soul. (TM) They never answered my question... will there be a mass UFO landing?

A: Too many concepts in one question. Need review.

Q: (L) Will there be... (TM) A mass landing of UFOs this year... (J) Anywhere in the world...

A: Need review.

Q: (L) They have answered those questions before.

A: Breakdown your question.

Q: (L) Will there be a mass landing of the reptilian beings this year. (BP) Will they manifest publicly? (L) Will they land in mass?

A: Breakdown much further.

Q: (L) Will they present themselves to the world as the rulers of the planet?

A: Time.

Q: (BP) Before the end of 1995?

A: Don't know.

Q: (L) Do they have that in their plans to do that?

A: Laura, what have you learned?

Q: (L) Okay, time for me to give you folks a review. {Review of the material omitted.}

A: CD under too much pressure to channel effectively.

Q: (CD) Are you talking about the article. (L) No, I think they mean just in general. You need relief, dear. (CD) No kidding. (GB) How do you spell relief? BP. {Laughter.}

A: Mirth!!

Q: (L) On the twin question: are some groups working with the twins in STO?

A: Maybe.

Q: (CD) Is that what is happening with the prodigies, as I term them?

A: Yes.

Q: (CD) Am I a twin?

A: Yes.

Q: (CD) Is BP a twin?

A: No.

Q: (L) Is Caryl's twin the one who fed her all the information on color in 1987?

A: Partly.

Q: (L) Is Frank a twin?

A: No.

Q: (L) Is anyone else in this room a twin?

A: No.

Q: (L) Are there any humans involved in this project?

A: Minutely.

Q: (L) And who is, in a general sense, that is, what percentage of this phenomenon is STO?

A: Vague question.

Q: (L) What percentage of this Vanishing Twin Phenomenon...

A: Small.

Q: (GB) So the idea is that the Vanishing Twin Phenomenon is the work of the STS beings? The reptilians. (CD) A small percentage is positive. (GB) What are they gaining out of it? (L) They are making bodies for themselves.

A: All has exception.

Q: (L) So, there are exceptions. (GB) I had a very strange experience when I meditated a while back, was that positive or negative?

A: You have had many “strange” experiences. Would you like to share any with those present, GB?

Q: (TM) I think I know which one you are talking about. (L) What was the nature of that experience?

A: Entity reflection through curtain.

Q: (L) Did you experience a being or something? An energy? (GB) Was the entity reptilian that I manifested behind me? Or was this a positive or negative energy?

A: Both and neither.

Q: (L) Was this a reptilian being?

A: Reflection. Projection.

Q: (L) What was it a projection of?

A: Complicated?

Q: (L) What was the source of this projection?

A: STS.

Q: (BP) I know exactly what it was! (GB) What were the loud whacks behind my chair? What did they try to tell me?

A: It was not a message, it was a “curtain breach.”

Q: (J) Kind of like a dimensional sonic boom. (GB) Well, I heard a tremendous crack behind my chair when I asked for a sign. About seven large whacks on the floor. (J) Was there an entity standing behind his chair?

A: Yes, but again, GB has had a most interesting life, apparently he does not want to divulge this.

Q: (L) Well, three times they have hinted about this! {Laughter} (BP) And I thought I knew you! (TM) Yeah, he doesn't even know

about it! (BP) Is GB a so-called “abductee?”

A: In more ways than one.

Q: (BP) Please clarify.

A: That is up to GB.

Q: (L) There are about 6 different kinds of abductions ranging from physical to telepathic contact and triggering.

A: And there are human abductions too.

Q: (L) You mean humans abduct people too? (J) Have humans abducted GB?

A: Up to GB.

Q: (L) Remember the gal, no names mentioned, who was supposedly hauled off by the Sasquatch. She came over to my house with bruises on the backs of her legs. Under hypnosis, she described being hauled out by the military and suggestions were implanted to make her think she had been abducted by aliens. She even perceived the truck they drove her off in as an alien craft hovering over the lake behind her house. Was GB abducted from the place on Stratford?

A: Yes.

Q: (L) Who abducted him at that time? And what did they do to him at that time?

A: Grays. Examined.

Q: (L) Was that his first abduction?

A: No.

Q: (L) When was he first abducted?

A: Age three.

Q: (L) How many times has GB been abducted?

A: 175 times.

Q: (L) When was the last contact?

A: Last week.

Q: (GB) Fooled me. (J) Obviously they have. (L) They can. That is what they do. (GB) What is the agenda for abducting me?

A: You know a lot, don't you?

Q: (L) Does GB have an implant?

A: Yes.

Q: (GB) Where?

A: In the brain.

Q: (L) What is it composed of?

A: Silicon.

Q: (L) Who put it in?

A: Grays.

Q: (BP) What is its purpose?

A: For Lizard monitor.

Q: (L) Well, we have all got one, so don't feel strange. (GB) Is that right? (L) Has anybody in this room not got an implant?

A: LM.

Q: (L) Yes, well, my husband doesn't have one but that is only because he is an alligator hunter. {Laughter.} (TM) That sort of answered the question I was going to ask. (GB) So all of us have

implants. {Actually, the fact that my ex-husband did NOT have an implant suggests that he didn't need one for some reason...}

A: This is why you are all interested in this subject.

Q: (TM) My next question is where is my implant?

A: You have two. One in brain behind sinus and one in leg bone.

Q: (TM) I have a suspicion that I might know when I got it, last year.. I have been having nosebleeds. (GB) Well, your brain is behind your sinuses. (L) They have to go through your nose to get to your brain. (J) You may be aware of the penetration, but you are not aware of the final residence of the implant. (TM) Where was I when I got the one in my brain?

A: On travel sequence, in transit.

Q: (L) Did you travel last year? (TM) Where was I going?

A: In transit to some sort of gathering.

Q: (TM) I had in mind a particular time... I was hoping they would tell me something that would justify my suspicions.

A: You tell us. We see transit clearly, but it is unclear why so rapid through 3rd level. Time cycle was interrupted and we can't see clearly due to cycle block.

Q: (L) Did you have missing time? (TM) Not that I am aware of. In fact, I got somewhere sooner than I should have. (L) Well, that explains why they said "unclear why so rapid through 3rd level." (J) Did TM experience time acceleration?

A: You bet.

Q: (TM) What kind of vehicle was I traveling in?

A: Can't see due to the cycle block.

Q: (L) What is a cycle block?

A: Too complex, but it involves a dome of frequency over subject.

Q: (GB) In a bubble?

A: Close.

Q: (BP) So, what they do is screw with our perception of time, they just yank you out, do what they do, throw you back in and if it's faster, it's faster, if it's slower, it's slower. Who gives a hoot.
(L) Sloppy work.

A: Close.

Q: (J) Kind of like putting people back in the wrong cars or facing the wrong end of the bed, pajamas inside out, or whatever. (BP) People have waked up in different beds, in different houses, out in the woods, whatever.

A: Yes.

Q: (GB) When was the last time my wife was abducted?

A: Last week.

Q: (J) Were they both abducted at the same time?

A: Yes.

Q: (L) They have told us that 94% are containers for the Lizzies to use. (BP) 94% of the population of the planet?! (GB) Let me get back to my wife. When we were both abducted together, was it a physical or other abduction?

A: Soul abduction.

Q: (L) Did it occur during the night while they were sleeping?

A: Yes.

Q: (GB) What did they do during the soul abduction, what was the purpose?

A: Knowledge review.

Q: (GB) For what benefit? (J) Who reviewed the knowledge?

A: Lizards, of course.

Q: (J) It was like a download. (L) Now, if they had discovered that GB and his wife had knowledge... that is, is there any knowledge that they might find during a review that might cause them to stop the abduction?

A: Open.

Q: (L) Are there any people, who, by virtue of their knowledge, do not get abducted?

A: Maybe.

Q: (GB) Is this to elevate our knowledge, or to monitor our knowledge?

A: Both, but mostly monitor.

Q: (L) How could being abducted by the STS beings increase our knowledge?

A: Accidentally.

Q: (L) How would this be done accidentally?

A: Self explanatory.

Q: (L) So, in other words, they may abduct someone to monitor their knowledge, but if the individual has achieved a certain level of knowledge, the abduction only serves to add to their knowledge?

A: Yes.

Q: (BP) What is the Lizard's Achilles heel?

A: STS. As in "wishful thinking" which blocks knowledge.

Q: (J) Their singular preoccupation with service to self blocks them from being able to move from 4th level.

A: Yes.

Q: (TM) Do they want to... (J) No they are happy there... they want to stay there forever and control, and consume, and have a good time. (BP) It is like finding a place with really good food, a great place to live, great sex, everything you like, you would want to stay there. (TM) Don't a lot of us like the idea of staying in the 3rd level forever?

A: Yes.

Q: (BP) Under the control of the Lizards! (F) But, you only want to stay in 3rd level forever if you are focused on STS. (TM) Yeah, but there are a lot of people on this earth who want the physical world. (J) It's physicality. (L) They like to consume, because that is the essence of this 3rd density reality, consumption. By being here you must consume. (GB) Is this message given to us tonight, from 6th density beings?

A: Yes.

Q: (GB) Do you have power over 4th density Lizard beings?

A: That is not the issue. We choose STO.

Q: (L) STO beings do not exert power over anyone, they only serve all. When STS beings call for knowledge and have raised their frequency levels, which can be done while still remaining STS, the only place in the universe they will obtain knowledge is from STO beings, even though they may use this knowledge

to serve themselves. STS beings won't GIVE knowledge, because that is STO. (GB) Do the Lizzies have souls?

A: Yes.

Q: (BP) Were the Mayans an STS civilization?

A: No.

Q: (BP) Why did they engage in human sacrifice and so forth?

A: They did not.

Q: (BP) They did not?! (L) I think that's an archaeological fallacy. (TM) Yes. (BP) Isn't that fascinating! (TM) I am going to be looking into that in the next couple of months. (L) You ain't heard nothin' yet! (TM) Wasn't there another group... the Toltecs, were they the ones who engaged in human sacrifice?

A: At some point.

Q: (GB) Does my wife have an implant in her now? (L) You know the answer to that, GB.

A: Yes.

Q: (TM) I would like to find out the purpose of my implant?

A: Monitor.

Q: (J) Do I have an implant?

A: Yes.

Q: (J) Where is it?

A: This is getting redundant.

Q: (BP) Would it be helpful in STO to be able to rid ourselves of these implants?

A: Do you wish to get a quick ticket to level 5?

Q: {Laughter} (BP) Yes! That's exactly what I was thinking. I want to get the hell out of here. (J) That would do it, I guess! (GB) Ask and you shall receive!

A: Do you, BP, know what level 5 is?

Q: {Laughter.} (BP) I thought I did! (TM) Be careful! (L) It's death. (BP) The intent behind the question was to become stronger in STO. (L) What they have told us on the implant question is...

A: You are an STO Candidate.

Q: (J) You are already on the path, so don't worry about. (L) Terry had the idea that we should use their implants against them and blow their circuits. We were told that the thing to do is to simply not manifest the thoughts and feelings they like. This has happened to a peripheral person here. She was supposed to be at the meeting today but she called and left a message saying that she had gotten a psychic message that she was not to go and meet us there. I called her when I got home and told her what a great meeting she had missed. She called me back ten minutes later telling me I had a lot of nerve putting her down and trampling all over her feelings. I was quite taken aback. The Lizzies are really working on her hard and are making her emotionally unstable, and making her receive everything positive in a negative way. As long as you KNOW that they are going to play with your head and your emotions, if you know that this is not YOU, but head games from outside, then you don't have to own it. It isn't yours. We don't have to buy into these negative perceptions. (F) Part of the disinformation tells us that we are totally in control of our own ship, our own minds, everything that happens to us, create your own reality and so forth. So, when negative things happen or we think negative thoughts, we either believe them or think that we are trying to destroy our own selves. (GB) Are all in this room 4th density STO Candidates?

A: Open.

Q: (GB) Am I?

A: Yes.

Q: (BP) Am I?

A: Yes.

Q: (J) Am I?

A: Yes.

Q: (GB) is Caryl?

A: Sure. TM has a minor liver problem.

Q: (BP) How are we getting additional DNA? How is it developing? (L) The planet is being bombarded with the effects of this oncoming wave. (F) It was described to us as similar to a sea wave. (L) Yes, and we were told that when it hits it is going to be like a psychic thermonuclear explosion. I said, well, that sounds pleasant... we're all gonna blow up! (BP) Maybe you are too literal for them. (GB) BP, why don't you try the board now? Can we receive this information through meditation?

A: Yes.

Q: (GB) By asking for the light to come in first?

A: Okay.

Q: (L) But watch the rituals. (GB) Does meditation increase...

A: Rituals restrict.

Q: (GB) Does meditation increase the DNA changing process?

A: Overall, if repetitive.

Q: (L) If you do it regularly. (GB) How often? (L) Every day or as often as you can do it effortlessly. (TM) Is Denise an STO candidate?

A: Yes.

Q: (L) Another thing is that physical problems can come with DNA changes. (TM) I am experiencing a mild headache. Is this coming from what we are doing right now?

A: Yes.

Q: (CD) I want to know if the information I learned that they warned me about had to do with Collette?

A: Maybe.

Q: (CD) What about Beverly?

A: Please discover, that is how you learn.

Q: (GB) Why is Frank given this ability to tap into the energy of the 6th density?

A: Not correct concept. Frank's abilities are not unique.

Q: (BP) Are you also transmitting through CLT in Los Angeles?

A: Maybe.

Q: (T) Is she in contact with you?

A: Open.

Q: (BP) Is the work of Carlos Castaneda historically accurate as far as what he says about Don Juan?

A: Yes.

Q: (T) Cool! (BP) Are all members of my immediate biological family implanted?

A: No.

Q: (BP) Is my perception that my STO is primarily as a healer correct?

A: You are still STS, like all humans.

Q: (J) We are human, therefore STS, but we are STO candidates. (T) 3rd density beings are STS. (CD) Is BP's special gift as a healer?

A: One of them.

Q: (L) Ask if Reiki will enhance his healing abilities?

A: Of course, as always.

Q: (L) Reiki will boost your healing abilities 50% instantly. (GB) Could you explain the process of the soul?

A: Soul is consciousness, period.

Q: (BP) Who is M__ H__?

A: True STO.

Q: (J) True STO? Wow! (L) Who is M__ H__? (BP) Is she a 5th density walk-in?

A: Yes.

Q: (J) Where does she live? (L) Who is this person? (T) Is there more besides just a yes?

A: Yes.

Q: (T) So, continue.

A: Exactly!!

Q: (L) Who is M__ H__? (BP) Damn! I took a trip with Reynaldo T__, I met M__ there and we were thrown together in an obvious sort of Celestine Prophecy sort of way, you know, like hit me over

the head. And we did this thing at the sacrificial well in Chichen Itza that was apparently some kind of cleansing, because, according to the archaeological inaccuracies, that is where the people were all sacrificed. Maybe they weren't sacrificed, maybe they were volunteers. (L) Maybe it was a different culture altogether. (BP) Yes, because we don't know who all was there. The Mayans may have been long gone. Anyway, we did some sort of healing there and afterward M__ told me a lot of stuff about who she was: on January 11, 1991 she was an ordinary person, she was driving down the road in her car and she felt a presence in her car that turned out to be Jesus Christ. She was taken out of her body, her life was reviewed for her, she was taken to 5th density, which she says is what we know as heaven, and after about 20 minutes or so, she returned as, apparently, someone else. She became very psychic and started having all these experiences. Classic walk-in story. Among other things she says now her body is silicone based and that she is here to anchor a certain energy. My feeling was that, well, I was bouncing back and forth between feeling that this was a demented housewife or an f_____ angel walking on the planet. That was my reaction. I sort of fell in love with her except that I wasn't physically attracted to her. She did some work on me. I didn't feel a thing. We spent 6 days in each other's company. So, I have been rather curious. And then, Caryl just sort of blew up in the middle of it. And it was so obvious to me that I had to follow my spirit in that direction and that was what I was supposed to do. It didn't feel like STS, but who knows? M__ reacted extremely negatively. We had not consummated the relationship. She is still living with her husband who won't touch her, who thinks she is crazy, he is total 3rd density. She hadn't been able to get out of that situation. She is way into some weird stuff. (L) Well, M__ may be pure STO, but she may not be fully manifested in the body. (BP) Yeah, she says she is having a lot of trouble anchoring here. (L) My thought is that a lot of us are

actually 4th density beings who have come back down to serve.
(BP) We are all multi-dimensional masters playing at limitation.
(BP) Who is Reynaldo T__?

A: In what respect?

Q: (BP) Is he a Gray experiment gone awry?

A: No such thing.

Q: (BP) Is Caryl's assessment of him correct?

A: Close.

Q: (BP) Is what he is teaching in terms of healing accurate?

A: Open.

Q: (TM) I have a close friend who had a personal experience with him... (BP) Was it a female? (TM) Yes. (BP) Yeah, it happens all the time... {laughter}

A: Cute.

Q: (L) Ask if M__ H__ fully manifested as a 5th density STO being?

A: Define.

Q: (L) Is she doing her work as she is supposed to?

A: Close.

Q: (BP) Does she know clearly who she is?

A: No, not yet?

Q: (BP) Will she find out in Hawaii?

A: Maybe.

Q: (CD) Has BP fulfilled his interaction with her?

A: Open.

Q: (BP) Can I be of any further service to M__?

A: Up to you.

Q: (GB) Can they manifest a sighting to us individually or as a group of any density?

A: Now, this is an interesting question with many answers. You can manifest sightings any time. But, the question is, how?

Q: (BP) Tell us how.

A: Meditation. Grays craft over Land O' Lakes tonight.

Q: (T) Are they coming this way?

A: Open. Why don't you ever have someone watching over this house during sessions?

Q: (T) That's a very good question. We have thought about it but nobody ever wants to be the one to do it. (BP) Well, if it was just one person out there, for God's sake, they could put a rope on 'em... (L) My neighbors already want to burn crosses on my lawn... (BP) Are we calling in physical danger by seeking to interact with these craft?

A: Knowledge protects.

Q: (GB) What is the knowledge that protects. (J) You are in danger if you are not aware... (BP) I say let's go to Land O' Lakes. (LM) How can knowledge protect you? They can zap you and suck you up in a light beam... (J) They are doing it all the time anyway.

A: Only if ignorant.

Q: (LM) You mean if a tractor beam comes out of a ship and you know it is a tractor beam, it can't get you? (L) You have to understand you are dealing with 4th density beings. (BP) Is a reasonable motive in seeking interaction with these craft the desire to

confirm the validity of what you are transmitting to us?

A: Okay.

Q: (J) GB went out to look. (T) I didn't know you could see Land O' Lakes from here. (LM) If it is 5 miles high it's easy. (F) The very first time we did anything with this, a whole UFO flap started in the area. (J) Well, one transcript said that there was a craft over the house at that moment. Why wasn't there an immediate stampede for the door? (L) I didn't want to see anything. (GB) I just went out there and I didn't see anything. (BP) Is it necessary through meditation or other methods, to raise one's frequency in order to see these craft? Are they always around?

A: Close. Not "Raise," change.

{Everyone got up and went outside, tape was turned off and not turned back on.}

Q: {Lost}

A: Open.

Q: {Lost}

A: Why didn't you see the first person?

Q: {Lost}

A: Two.

Q: {Lost}

A: Head, brain stem and behind eye.

Q: {Lost}

A: Yes.

Q: {Lost}

A: Funny.

Q: {Lost}

A: No, not important.

Q: {Lost}

A: If you make it to level 4 it will not matter.

Q: {Lost}

A: So what?

Q: {Lost}

A: No.

Q: {Lost}

A: No.

Q: {Lost}

A: Yes.

Q: {Lost}

A: Missing time.

Q: {Lost}

A: Light flash.

Q: {Lost}

A: Michelle.

Q: {Lost}

A: Sure, why not?

Q: {Lost}

A: No.

Q: {Lost}

A: Mirth.

Q: {Lost}

A: Yes.

Q: {Lost}

A: You are screwing around with us.

Q: {Lost}

A: No.

Q: {Lost}

A: Lizards are always present on level 4.

Q: {Lost}

A: Close.

Q: {Lost}

A: Open.

Q: {Lost}

A: Wait and see.

Q: {Lost}

A: Yes.

Q: {Lost}

A: No.

Q: {Lost}

A: Roommate was zoned out.

Q: {Lost}

A: Grays.

Q: {Lost}

A: No.

Q: {Lost}

A: STS.

Q: {Lost}

A: Up to you.

Q: {Lost}

A: Open.

Q: {Lost}

A: Subjective.

Q: {Lost}

A: No.

Q: {Lost}

A: Discover, ie: learn. Learning is how you progress.

Q: {Lost}

A: Senses.

Q: {Lost}

A: Yes.

Q: {Lost}

A: Yes.

Q: {Lost}

A: Close.

Q: {Lost}

A: Open.

{Tape recorder turned back on.}

Q: (TM) I have a friend by the name of L__ and I wonder if it is good for me to spend time with him?

A: Open.

Q: (TM) Who is L__ H__?

A: Open.

Q: (TM) What I am trying to find out is if it is good to be around this person.

A: Those are personal questions. There will be a terrorist attack in the U.S. month; bomb.

Q: (T) There is going to be a terrorist attack in the United States in a month?

A: Yes!!! {planchette flies off board}

Q: (T) In a month?

A: Yes.

Q: (T) Where in the United States?

A: Washington D.C.

Q: (T) Well, they filed bankruptcy now they are going to blow it up and collect the insurance.

A: Trial ongoing.

Q: (BP) O.J.? (TM) Oh, that's because of the terrorist trial? (T) Yes, the terrorist trial in New York. (TM) Yes, they are guarding Wall Street heavily because they are threatening to blow that up. (J) Oh, okay. (BP) Is the CIA or the FBI involved in this terrorist bombing?

A: No.

Q: (T) Do they know about it?

A: No.

Q: (BP) Is it Moslem terrorists?

A: Yes.

Q: (BP) Are we talking about a nuclear bomb?

A: No.

Q: (T) We should be so lucky. (J) Can you pinpoint where the bomb is going to be in Washington? (BP) Congress?

A: No.

Q: (BP) Will it be in the Capitol?

A: No.

Q: (BP) Will it be in the White House?

A: No.

Q: (BP) Will it be in a federal office building?

A: Maybe.

Q: (BP) So, it is variable as to whether it will be successful or not as well as other aspects?

A: Yes.

Q: (T) Do the authorities have an idea that this is going to happen yet?

A: Some.

Q: (T) Some authorities or some idea?

A: Idea.

Q: (GB) Any further predictions?

A: Amtrak derailment in Long Island or Chicago. Near one or the other by June.

Q: (L) Is this going to be a deliberate act?

A: No.

Q: (L) Why are the two locations so widely separated?

A: Indefinite.

Q: (L) So, it is like an amorphous event that hasn't firmed up yet.
(GB) Any more predictions?

A: One person here will be in a minor car accident by April. Think GB or TM. There will be a storm in Mid U.S. next month; lives lost 191; Missouri area likely.

END OF SESSION

3.14 March 4, 1995

Frank, Laura, Terry and Jan, SV

Q: (T) Good evening.

A: Luck.

Q: (L) Is the luck with us at this time?

A: Yes.

Q: (L) Who do we have with us this evening?

A: Not yet.

Q: (L) The luck is not yet with us?

A: Try not to second guess what we mean.

Q: (L) What does “luck” mean?

A: Nilionna from “Cassiopaea.”

Q: (L) What does the term “luck” refer to?

A: Discover.

Q: (L) Are we going to discover something very soon that is lucky for us as a group?

A: Second guessing!

{Interestingly, Ark was born in Luck, Poland. But this was 16 months before he “found” us. Was this being dropped as a clue for me?}

Q: (T) Hi, Nilionna!

A: Hello.

Q: (L) Nilionna, have you been listening to our discussion?

A: Maybe.

Q: (L) We have been discussing some control systems for our sessions.

A: Okay.

Q: (L) Are you saying that the control systems we are trying to set up are okay?

A: Yes. No time limit, though, when it is advantageous to stop for your benefit, the sessions will terminate.

Q: (L) In other words, we aren't supposed to put a time limit on it. (T) Cool, works for me. (J) I had a thought, Laura, even though DM was not present, her presence was felt before we opened up the channel because you are still torqued up about her. So she has had an effect. (L) You want to ask that? (J) Yes. Is DM having an influence on the session because of her phone contact with Frank and because of the way I reacted to her?

A: Perceptive of you, Jan!

Q: (L) Are we correct in what we have discussed, that her presence has a corrupting influence on the channel?

A: Clear.

Q: (L) What does that mean? (T) The channel is clear. (L) Is the channel clear right now?

A: Her.

Q: (L) She is clear?

A: Up.

Q: (L) I don't understand? (J) Clear her up?

A: Yes.

Q: (J) That is what we are going to do. She has made an appointment and it is in progress. (T) She needs spirit release. (L) On that subject, before we get going, let me ask about DM.

A: Enough said, remember, you have been learning slowly that personal issues hold minor significance. Terry's dream was sig-

nificant, however!!!! Susan too!! And Frank has been sent same message as well.

Q: (L) Did you have a dream or message, Frank? (F) That's true. I did have some funny feelings. (T) Did you have something else? (F) Well, I have received some stuff. Just the same kind of thing, that there is something that we are missing. (T) Okay. We are missing a key topic or issue, here, that's true.

A: 4th level STO!

Q: (L) Is that the title of the topic?

A: You have only thought of 4th level STS.

Q: (L) Ahhh! What Susan was talking about, we need to ask about the good guys.

A: They are the only ones who can help you defend yourselves against 4th level attack!!!! We give you information which is invaluable in nature, but remember we are 6th level STO, Beings of light, and on this density level there simply is no interference with free will no matter how detrimental to you!!!

{The introduction of this topic, along with the opening "Luck", and that being Ark's birthplace, is interesting.}

Q: (T) 4th density STO beings can actually help in a meaningful way! We knew there was both sides, but we never asked. We have been concentrating on the Lizards. (S) Yeah! There are 16 groups on both sides, and nobody has ever asked... (J) And by concentrating on the Lizards, we have been feeding their f_____energy. (F) Their damn energy. (J) Their damn energy. (T) That DARN energy! Who are these 4th density STO beings that we need to contact? Obviously we need to talk to them because they can talk to us. Sixth density "Us" can't.

A: Orion Federation.

Q: (L) And who are the members of the Orion Federation?

A: Not yet.

Q: (L) What can you tell us? (T) The Orion Federation is 4th density?

A: You have asked us to protect you, it is important for you to understand that we are beyond that!

Q: (L) We understand that. (J) I understand that. (T) We understand that you, at 6th density, can't interfere with free will on either side. But, the Orion Federation...

A: First, incorrect thought patterns which have become imbedded must be purged before you can move onto next subject.

Q: (J) It's like: D__ must be purged before she can come back into this group, she must get rid of her incorrect thought patterns. We have incorrect thought patterns that must be removed also. (L) What are they, Frank? (F) Don't ask me. Ask them. (J) Well, they're not going to tell us that. (T) Why not? Let's ask. (F) Yeah, if they are not going to tell us, they will tell us that they are not going to tell us. (T) What are the incorrect thought patterns?

A: That we protect.

Q: (T) Well, you said that Knowledge protects. You have been providing knowledge. (J) Uh uh. (T) No?

A: Indirectly.

Q: (J) They are not really giving it to us, they are helping us to draw it out of ourselves.

A: We are providing invaluable information which becomes knowledge, but you are under attack, therefore, you could maybe use some direct power from the same density as the attack is coming from.

Q: (F) But, until you have total knowledge... (L) You don't have the kind of power we are talking about needing. (F) Right. We would need 500,000 pages of transcript to have that kind of knowledge, to get to that point. (L) Okay, what is the phone number of the Orion Federation? (S) Laura! (T) That's what I was going to ask. {Laughter.} (L) How do we get ahold of them?

A: Off the hook!

Q: (T) Uh oh! (L) They're busy? (T) Getting a lot of calls. (L) Okay, guys, what do we need to do here?

A: Find a "Nordic." They are on Earth posing as humans.

Q: (T) They are 4th density. I thought they...

A: Yes.

Q: (T) I thought that 4th density couldn't hold the frequency that long and that is why the Lizards have so much trouble. (J) They're STS.

A: Not STO!

Q: (T) Very good, Jan hit it as they said it. The STS can't stay, only the STO.

A: Yes.

Q: (T) So, we need to find a Nordic, do we know one?

A: Have seen them at meetings and such.

Q: (L) What kind of meetings. (J) MUFON meetings?

A: MUFON.

Q: (T) I guess that means we are infiltrated over there. (L) Was there one at last week's meeting?

A: ?? Discover, remember these are among your protectors and Laura and Frank know what level one attack is like, Terry, Jan and Susan are perilously close to finding out!

Q: (T) And we are working hard to not get attacked. We have a Nordic coming to our meetings? (J) Did we meet one today? (L) They gave a question mark to that one. What about this big conference in May?

A: Discover.

Q: (L) Well, should we wear something special like a red scarf so they can find us in the crowd? (T) Wait, wait...

A: Not needed at all, just be open and aware!!

Q: (L) Is this there anyway we can get any help or power from these 4th density good guys prior to that so that we can put a period to this attack we have been undergoing?

A: Start to call them, maybe.

Q: (L) How do we call them. (T) They said “discover!” They don’t usually say that in regard to the project awareness meeting. (L) Yes. Okay.

A: Hint!

Q: (T) Thank you! (L) How do we call them? (T) We are calling them, we have our information packs out. (J) On the board?

A: No.

Q: (L) No, not on the board. (T) They’ll come to us.

A: They are 4th, not 6th.

Q: (T) We can’t contact them through the board because they are only 4th density? Is there a problem there?

A: Not conventional. It would be like using a FAX to contact Fido.

Q: (J) Is there any significance to the fact that one of our cats has been looking like she is really trying to tell us something?

A: One of your cats, no, make that 2 of your cats, are close to transition to 3rd level.

Q: (T) Sabrina's moving up in the world, she's going to get a promotion. (J) What's going to happen to her when she hits third? She's going to be a human?

A: Yes.

Q: (J) Wow. (T) When she moves from cat to human, her cat body will die?

A: Yes.

Q: (T) Is this going to happen some time in the near future as we measure it?

A: Not concept, we mean at next incarnation whenever that occurs. By the way, who gave her that name?

Q: (J) What name? (L) Sabrina? (S) The cat's name? (T) Two of our cats? (L) Maybe. (T) They are third density candidates. (J) What about the name?

A: Exactly.

Q: (L) Does that mean that when a person is a 4th density candidate that they have to leave their body to go to 4th density?

A: Yes unless they are in the body when the wave arrives.

Q: (J) What about the name? (T) Do you mean who gave the kitty the name?

A: No.

Q: (T) Oh, you mean why did I name that particular cat? It's not Sabrina?

A: ? There are 2 candidates.

Q: (T) So, you are not going to give us the name. (J) Is there any significance to the behavior that the cat, Sabrina has been displaying?

A: Maybe.

Q: (L) Well, let's go back to our Orion guys for a few minutes. Have you given us all you are going to give us on this seeking of help and protection?

A: Review.

Q: (J) Okay. (T) We gave out over a hundred of those pamphlets, if they are going to the meetings, they've got one. We are already calling them. (J) Will they contact us or do we have to recognize and contact them?

A: They know about you even without pamphlets.

Q: (L) This individual who sent me this letter, this Thor Templar...

A: Open.

Q: (T) Can you give him a weapons design? (L) Oh god! (T) Humor, mirth! (L) You did tell us at one point that we could achieve a certain level of protection with stones, crystals, and so forth, is that correct?

A: Yes but crystals are "small potatoes."

Q: (L) Is there anything we can do with our thinking patterns or with our bodies, or anything we can do to accelerate the receiving of assistance?

A: Unite.

Q: (J) That is what we are doing. In other words, keep on keeping on.

A: Not. You are still STS.

Q: (L) What can we do to accelerate this process, this uniting, this moving from STS to STO?

A: 8 Questions at once.

Q: (L) Maybe I will just say a little bit of what I think it is.

A: Okay.

Q: (L) Part of my perception of this is seeing that whatever that whatever I have or receive is shared with the group in terms of my time, my energy, my thoughts, my finances, and everything that is related to that, is that correct?

A: Evaluate attack intensity.

Q: (T) How strong is the attack? What is the intensity you have experienced. (L) Well, it has been financial through various institutions, mostly. (F) Yes, I would have to agree that we have been attacked in that way to a level never before experienced in middle class America. (J) Is that the type of attack being referred to?

A: Part.

Q: (L) Is another part of the attack the emotional upheaval I experienced a few weeks ago?

A: Part.

Q: (J) What about DM?

A: Part, accident, etc., etc. Not DM per se, but through her.

Q: (L) So the accident and all the other physical things are part of the attack?

A: Yes.

Q: (L) Does prayer help?

A: Terry and Jan are next in line.

Q: (L) Well, my suggestion would be to not leave your shoelaces untied! (F) Oh, God! You don't want to go through this, believe me. (T) Well, there is not much they can do to us at this point.

A: Not true!

Q: (L) Okay guys, you are telling us we are under attack, you are telling us it is going to get worse, you are telling us that maybe some of these other guys can help us out, what can we do in the meantime?

A: Prayers help but more is needed.

Q: (T) More than prayers is needed. So, we are on our own until we get contacted?

A: Find an Orion!!!

Q: (J) How? (L) What do we do, go out to the beach and say: "Orions, come here?" (T) No, they are at the disco, Orions like to dance.

A: That is all we can tell you, because it is the limit of informative arena, any further would interfere with free will, so discover.

Q: (L) One session I asked about some things that happened to me in the past and I was told that what saved my buns from the fire was divine intervention.

A: Yes.

Q: (L) Can you tell us about divine intervention?

A: Multi faceted.

Q: (L) Was this divine intervention enacted to protect me from direful consequences that would have prevented me from doing whatever work is forming up for me in the future?

A: Yes.

Q: (L) Does it not seem that being under attack as we are now might further prevent me, as well as my compatriots from doing our work?

A: Of course.

Q: (L) Well, does it not then behoove this same divine intervention enacted at these other times to act at this time, or is the threat less?

A: Divine intervention cannot be arranged by 3rd level beings.

Q: (L) What level beings arrange divine intervention?

A: 4th through 7th.

Q: (T) So, we are just shy of a level to do that! We can do some quasi-divine intervention!

A: You cannot do this divine intervention. You can do 3rd level intervention.

Q: (Laura, Jan) What is third level intervention? {Pause} (T) They're accessing the cosmic retrieval system.

A: Discover.

Q: (L) give us a hint!

A: You should know!

Q: (T) Knowledge protects! So when we find ourselves a fourth density being, things are gonna roll!

A: You do 3rd intervention all the “time.”

Q: (L) Do you mean spirit release and cleansing?

A: And other.

Q: (T) Well we’ve done spirit release and cleansing, which has prepared us somewhat. (L) Do we need to do this over and over again to constantly keep it up?

A: Open.

Q: (T) When I am on my lunch break, I go walking around the complex. As I am walking along, every so often I get an image, not a visual, it is like a perceived image, of the forms and shapes encountered when doing spirit release work. I can see these things coming toward me. As they come toward me I just send them to the light. I say, “Hello, how are ya, go to the light!” And they will swirl around me and disappear. So, I don’t know if that is part of what we are supposed to be doing; being prepared by keeping all of the stuff off of us, by always setting up a field... (F) You are protecting yourself against attachment, is what you are doing. (T) But, it is also setting up a field that automatically intercedes... (L) Okay, you say that I do 3rd level intervention all the time. Now, obviously this is partly the release work. Let me ask, is Susan’s work in moving this stuff out of the tissue base, is that part of this intervention.

A: Yes.

Q: (J) Is that a collective?

A: So is writing letters and yelling at people over the phone!

Q: (S) Getting it off your chest. (J) Yeah, not letting it... (F) That’s all

3rd level stuff... (J) Teflon coating yourself... (F) Punching somebody in the mouth is a 3rd level intervention. (S) Yeah, releasing, yelling is one of the best releases... (L) And they are saying to do this? (F) We can do it. (T) These are all things that are at our disposal, our repertoire of 3rd level... (F) You asked what can we do, and are we helpless... (T) About the attachments, what dawned on me was that, as we are drawing power, as we are increasing our energy level, we are drawing more and more of them to us. (L) You think so? (T) The stuff I have been experiencing in the last few days with these attachments is... they are coming to us because we look like the light to them. (S) Can read auras, you know. (S) I do it with my eyes closed. (T) Part of the attack experience is most likely the increase in these loose energy things flying around. And, as I realize this, I work to improve my shielding so that it holds automatically. Where I work is full of negative energy and a horrible place to be in terms of attachments. I walk across the parking lot and they fly at me. I can sense them. (F) Where I work, of course, two of the people there are alcoholics and you can bet they are a bus load with nobody driving. (S) Well, the Jin shin do goes beyond the body right to the energy level, also. (T) And, what we are doing right here, in this room, is that we are building an energy that may be drawing attachments to your house. (L) Is this work, with the board, is it in some way related to the location in space time, because of the fact that we have done this for so long in this spot?

A: Yes.

Q: (L) Does it work better because we are here rather than somewhere else?

A: For now.

Q: (J) Well, how about going to Leonard's on Saturday? (L) Will we be able to do a demonstration at the MUFON meeting on Sat-

urday?

A: Yes, because it is predestined.

Q: (L) That's heavy. (T) That's not free will. Let's not go next Saturday and break the predestined plan! {Laughter.} My free will wants to break predestined plans. Mirth, mirth! (L) Can we ask any further questions about that remark?

A: You are allowed to ask anything you wish.

Q: (T) But, they won't necessarily answer anything we ask! (S) I want to ask something about auras. On some people, their auras show, by kirlian photography, a white area, like a halo, behind or around their head or near the shoulder. What does this mean?

A: Open.

Q: (T) I guess what they mean is that it could be a different thing on different people.

A: Yes.

Q: (L) Is there a general schematic of aura colors and what they mean as has been presented by various groups.

A: No.

Q: (S) Was Edgar Cayce's readings on colors...

A: Reading anything requires accessing "higher levels" of understanding which are fluid, not concrete and absolute.

Q: (L) So this changes, fluctuates. (S) Oh yes, auras constantly change. (L) Yeah, but what they are saying is that the meanings of the colors can change with the individual. (T) It is like reading cards... (F) And palms, just because a person has a line of a certain sort doesn't mean that they are going to be in an accident on such and such a day... (T) Yes, and with the cards, one card can

mean one thing with one person, and something else with another person. (F) I could look at two palms that are almost identical but they could mean entirely different things... (T) Which really ticks off the materialists who want the directions to come with the card and palm reading kits! {Laughter.} (L) Are we, at this point, at an end of this subject of getting help and so forth?

A: Discover, that is how you learn, not by being “led by the hand.”

Q: (L) Let us get to the questions we have prepared. (S) I wonder if subliminal tapes could help in protection?

A: Up to you.

Q: (L) Was all the land on the planet earth formed into one vast continent at some point in earth’s history?

A: Multiple history reality possibilities.

Q: (L) In this reality that we experience, was all the land joined into one vast continent?

A: Incorrect conceptualization.

Q: (L) Well, I don’t know how to ask it. (J) Move on. (L) What is the source of energy generated by stars?

A: Transfer points cause friction thus producing energy.

Q: (L) Transfer points of what; from what to what?

A: Dimensions.

Q: (L) Now, this is going to be a strange question, but if you can help us out, relate this to something it would be very helpful. There are a lot of theories going around about the age of the universe. Some of the latest says that it is anywhere from 8 to 25 billion years old. I know that you have said that time is an illusion, but, in view of the fact that scientists are struggling with

this one... {Much laughter} which of the figures that they have pulled out of the air, in terms of the time illusion itself, is the most correct?

A: None.

Q: (F) Does that answer the question satisfactorily? That's like saying: "Oh, that's an interesting store, what's in there?" (L) Well, if none of the figures science has come up with is correct, what is the correct definition of the age of the universe?

A: Quasi-quantum possibilities.

Q: (L) What does that mean? {Laughter.} (J) Anybody's guess?! (L) Well, I think they are going to tell us something here.

A: Discover.

Q: (J) Thanks a lot! (T) That is certainly new to me! (S) Its probably a lot of gazillion years old! (T) What does quasi mean? (L) Partly, half-way... (F) And what does quantum mean? (L) Well, a quanta is a unit of measure... (T) All possible units of measurement... (F) Is that what that would... (L) Come on and help us out here guys? (T) In there time, which is no time, it exists at all times and not time, in our time, that would be infinity. (L) Okay. (T) So, the age of the universe is infinite in our time limit, but they way they perceive it is it doesn't... it exists until it doesn't... it does and then it does not... (L) Okay, let's ask this another way... help me out here... (J) Go for it! (F) You got yourself in the woods, keep looking for the crumbs to find your way out! (L) What do you mean by quasi-quantum possibilities?

A: Closed circle.

Q: (L) Okay, if you select any one point on the circle, and hold that point, and then measure around to the point again, where on that circle are we? Arbitrarily?

A: Not correct concept.

Q: (L) Okay, well help me out here. If there is a closed circle, that means that there is no point that you can arbitrarily designate?

(J) Yes.

A: Yes.

Q: (L) Should we just drop this line, or continue with it?

A: Open.

Q: (L) Okay, then let's just drop it. (J) It is, it was, it always will be, world without end, amen! (F) Well, if there is no time as we are told, and there is free will that is so important, how can this be? If there is no time and everything is connected, past, present and future, and everything is just a random collection of thoughts and experiences, and everything is supposed to be fluid, then there can't ever have been free will. If there is free will, and there is no past, present or future, and everything is all the same point in space time experience, the key is the free will, but there is no answer. (L) Is the planet earth, as so many have predicted, going to acquire an additional sun?

A: Maybe.

Q: (T) An additional sun, like if Jupiter blows up? Is Jupiter an unborn sun?

A: Jupiter is already a star.

Q: (L) Why do we not perceive it as a star?

A: You are still learning. Earth is a star to be.

Q: (F) How the hell can that be? (L) If a planet...

A: Every thing cycles fully.

Q: (L) If a star is a transition point from one dimension to another, when the earth moves into 4th density, is it going to appear as a star to the people in 3rd density?

A: “Gas planet.”

Q: (L) It will appear as a gas planet? (J) Just as Jupiter appears to us.

A: Jupiter is level 4 density.

Q: (L) To whom does Jupiter appear as a flaming sun, at what level?

A: 5, 6, and 7.

Q: (T) What does it look like in 4th?

A: Earth.

Q: (T) Jupiter looks like Earth and Earth looks like Jupiter in 4th density?

A: No.

Q: (L) What does Earth look like in 4th density?

A: Invisible.

Q: (J) Huh? (L) What do you mean, invisible?

A: Only visible upon request. Variability of physicality.

Q: (L) Okay, does this mean that to the Lizzies and Orions the earth is invisible?

A: When they are not thinking about it.

Q: (J) You mean when they are not thinking about it it doesn't exist? They have to focus on it for it to become visible?

A: Close.

Q: (T) But, you told us one time that everyone in 4th density was able to see us?

A: Yes.

Q: (J) Us, not earth. (T) What do they see us on?

A: Able to see you when they choose to.

Q: (J) In other words, they focus on the frequency to see us. (L) I guess it is like animals in second density. You ride down the road and don't really see what is around you unless you focus in on it. (J) Unless you concentrate on looking for them... (T) Like standing still in a forest and after a time you can see what is there. (J) It is all according to perception.

A: Yes, but 4th level is the first one with true variability.

Q: (L) Georges Gurdjieff proposed the idea that the earth is, in a sense, food for the moon. What he meant was, what he had learned from these ancient teachers was that earth was a food source for some level of being, and that possibly these beings had encampments or bases on the moon, but that earth was eventually to become a star and that then the moon would become an inhabited planet as the earth was, and so on... Is this a fairly...

A: Close.

Q: (L) Is the Moon a second density planet?

A: Yes.

Q: (L) And the Moon is used as a base by other beings?

A: On different densities.

Q: (L) Are there 2nd density beings that inhabit the moon in a full time way?

A: No.

Q: (T) Are there 3rd density beings?

A: No.

Q: (T) Are there 4th density beings?

A: Yes.

Q: (T) Are they Grays?

A: They don't inhabit the moon, they just use it.

Q: (T) Are there 5th density beings there?

A: 5th uses all.

Q: (T) Are there 6th density beings there?

A: Ditto.

Q: (T) Is the 7th density being there?

A: That is union with the One.

Q: (T) Thank you, just checking. (L) The "Arcturians" talk about the path to the Great Central Sun. What is the Great Central Sun, and what does this mean, "The path to the Great Central Sun?"

A: 7th level.

Q: (L) Is the star, Arcturus, also a residence, as in planet, for certain beings?

A: Stars are transition and communication points.

Q: (L) The book, "We Are the Arcturians", talks about the Arcturians, and it says that they live on the star Arcturus, that it is a planet for them, and that they have families, reproduce, and do all kinds of normal things. This struck me as strange and reminded me of the Jiles Hamilton stuff.

A: No.

Q: (L) Okay, what was the source of this information?

A: This information was told in a format that would be understood best by those who read it.

Q: (T) Is this the book we are supposed to get the dates out of for the Arcturus position of the wave? (L) Yes. Okay. Was there a massive volcano in the area we now call Kentucky at some point in our historical reference?

A: Not then.

Q: (J) Will there be? (L) Is there a massive volcano in the area of Kentucky?

A: No.

Q: (L) Will there be?

A: Open.

Q: (L) Where was/is the center of the caldera?

A: You have proceeded not according to info in previous answer. Who said there was a caldera?

Q: (L) Okay, in other words, there wasn't a volcano in the area of Kentucky, there isn't a volcano in the area of Kentucky and there isn't going to be a volcano in the area of Kentucky?

A: Open.

Q: (L) Could you describe for us the interior of our sun and how it works?

A: It is a window.

Q: (L) The interior of the sun is a window. Okay, is the interior of the sun composed of what we would call solid matter?

A: No.

Q: (L) The general idea is that the interior of the sun is composed of great masses of hydrogen and this is converting to helium and...

A: In 3rd density perception.

Q: (L) You are saying that the sun is a window or transmission point between dimensions. If that is the case, then it is virtually illimitable in terms of longevity?

A: Close.

Q: (L) So, the ideas of the sun running out of gas and turning into a red giant and sauteeing humanity are incorrect concepts?

A: No. 3rd level, Laura, 3rd level!

Q: (L) So, in 3rd level it will...

A: Open.

Q: (L) How long ago was North Africa green and fertile and what geologic factors created the state in which we find it today?

A: Weather changes in 3rd density 10,000 years ago.

Q: (L) Scientists have been making a lot of conjectures about the matter of the Universe and what they have been saying is that 90 to 95% of the matter needed to make the universe stable is unaccounted for. They call this dark matter. There have been a number of theories proposed as to what this dark matter consists of. I would like to know what is this dark matter?

A: You are “chasing rainbows” and so are they.

Q: (L) What is the source of cosmic background radiation?

A: 3rd level cosmic light rays.

Q: (L) Is there anything else we can add to that?

A: Trivia.

Q: (L) Where on earth was man first seeded? (T) Wimbledon!
{Laughter} Sorry, I couldn't resist that. (L) Was man first seeded
in one particular place?

A: No.

Q: (L) It was stated that the earth once had a water vapor canopy.
Was this one of the reasons for longevity in that time?

A: Yes, and already answered this. Review transcripts.

Q: (L) What are the effects of sunlight on the human body now
as opposed to then?

A: Degenerative.

Q: (L) Does that mean that we should avoid sunlight because we
no longer have our canopy?

A: You cannot avoid enough to matter.

Q: (T) It's everywhere, all day long. (F) When you are inside
you are still exposed to radiation. The radiation in the air is
leftover junk from the light rays coming in. (T) The radiation
is everywhere, even at night. Speaking of which, did you see
the article about the chunk of ice that broke off in Antarctica
the size of Rhode Island. The scientists said: "We don't under-
stand why." And Antarctica is where the major ozone hole has
been for the last five years. (F) Well, they have been predicting
that for years... (T) Hope it didn't fall on anybody's foot! (F) That
would be heavy enough that you wouldn't feel it. (L) Has the
woman, who is now known as Leah Haley, and I understand that
she legally changed her name to protect her family, has she been
harassed by the U.S. government, or is this a screen memory put
in by aliens with concomitant confirmations?

A: Yes to question one and no to question two.

Q: (T) Are any of her memories of abductions by Grays screen memories of abductions by the government?

A: No.

Q: (T) Why is she being abducted?

A: Review your data.

Q: (L) Then, she is being abducted for the same reason we are being abducted. (J) The agenda is the same all the way down the line.

A: Is this a review session?

Q: No. Okay.

A: Then why ask repeat questions?

Q: (L) Well, we didn't know it was a repeat question. (J) We don't have the transcripts memorized just yet. (L) If there was an agreement between the U.S. and the aliens, how was this agreement reached. Who met with who where and when?

A: Review.

Q: (L) Well, you never told us that exactly.

A: Yes we did.

Q: (L) No you didn't. (J) Don't argue with them. (L) Well, what happened to Captain Thomas Mantell on 7 January 1948, when he attempted to track a UFO? Whose craft was it?

A: Grays and he lost consciousness, thus piloting his plane above its ceiling, thus disintegrated.

Q: (L) So, in other words they didn't zap him, he just lost control. (T) Yeah, he was flying a P 51 Mustang and he went too high. (L)

At one point in a previous session, the remark was made when Terry was talking about directions, that knowledge of compass direction was going to become very important in the not too distant future. Could you tell us why this is so?

A: Because you will have increased sensitivity to magnetic influences.

Q: (L) So, in other words your comment was not that we needed to learn this but that this would become important because our sensitivity would increase?

A: Both.

Q: (L) Does our learning of compass directions act to increase our sensitivity?

A: Catch 22.

Q: (T) It is a contradiction. In the book: You have to keep flying the bombing missions because we don't have enough people to win the war, but we won't let you fly if you are crazy because we can't have a crazy person in the airplane with all those bombs. But, the doctor can't determine that you are crazy, you have to say that you are crazy so that the doctor can sign the papers, but if you say that you are crazy then the doctor can't sign the papers because one indication of sanity is to know that you are crazy, therefore you have to fly. (F) It's a no-win situation. (J) Does it have anything to do with the fact that when we move to 4th density we will lose the physicality we use to navigate with now?

A: One half of equation.

Q: (T) Okay, we have the ability to tell direction because of our physicality which will increase to the point where we will be able to sense direction when we don't need direction because we won't be physical?

A: Close.

Q: (T) That is the Catch-22. You will have the great direction sense when you don't need it.

A: You will have variable physicality.

Q: (J) Yeah, so in switching from one to the other you don't want to get disoriented. If you have compass knowledge ingrained in you when you switch from physical to non-physical, you will know where you are. (L) In a previous session we talked about the feline principle as represented by the sphinx, and the fact that Egyptians worshipped cats. Is there anything more you can give us on this? Why was this so? Was the cat representative of some principle we need to learn or investigate?

A: This is not really important.

Q: (T) Is the cat and the cat symbol itself important in some way?

A: You are; up to the perceiver.

Q: (L) We talked about the scarab and why the scarab represented eternal life to the Egyptians, and then we went into the thing about the scarab rolling dung. What is there in the symbolism of the scarab that might be significant to us today?

A: Up to you.

Q: (L) In the annotated copy of the Morris K. Jessup book, there were three people annotating: Mr.A., Mr. B., and one known as Jemi. One of the references was to the sighting made by Kenneth Arnold. In reference to that sighting, Mr.B wrote: "Don't worry, Jemi, those were LM ships not S men. They are an improved type and were on a training flight. That is why their leader interconnected their force fields, to teach them level tele-control without inducing a fear block." Now, what is an LM ship?

A: Light matter.

Q: (L) What is an “S man?”

A: Secret order member.

Q: (L) What is the secret order?

A: That is for you to discover.

Q: (L) What does it mean that their leader interconnected their force fields to teach them level telecontrol?

A: Self-explanatory.

Q: (L) Jemi’s comment on Jessup’s discussion on mysterious disappearances of persons throughout history is quite chilling. Written in the margin of the book was: “Hey, if he only knew why he’d die of shock!” To what does this refer?

A: We cannot reveal this at this “time.”

Q: (L) So you are saying that there is a whole lot more to this situation and what is going on on this planet than even we have been told at this time?

A: Of course.

Q: (L) So if there is a lot more to this, would we, knowing what we know, “die of shock” if we knew the rest?

A: Maybe.

Q: (L) Well, that is not pleasant. Okay, Jessup wondered in his book if aviators could be frozen by space ships and carried away in a field of invisibility. Mr. B commented in the margin: “If only he knew by experience, he would keep silent and not write or speak of it ever again in his lifetime. He couldn’t speak of it, for, you see Jemi, it paralyzes one’s sense of time and nullifies mental

cognition, functioning and memory. So he has no knowledge, he could not have, he is only guessing.”

A: Okay.

Q: (T) Okay what?

A: Exactly correct!

Q: (L) There are a lot of terms in this book...

A: Too much data.

Q: (L) There was some conjecture as to who wrote these comments. Can you give us a clue as to who did the annotations in this book?

A: Discover. If we told you everything, it would not be good!!

Q: On that note, I think we will close for the night.

A: Good night.

Q: (L) Well, here are the terms: Mothership Homeship Deadship Great ark Great bombardment Great return Great war Little men Forcefields Deep freezes Undersea building Measure markers Scout ships Magnetic and gravity fields Sheets of diamond Cosmic Rays Force cutters Undersea explorers Inlay work Clear talk Telepathing Burning coat Nodes Vortices Magnetic nets and what happens to people, planes and ships that have disappeared.

The three commentators of Jessup's book explain the origin of odd storms, clouds, objects falling from the sky, strange marks and footprints and other things we have not solved.

(F) If you were to try to find out about all of that, it would be like trying to bite into a grapefruit that is 19 stories tall, and swallow it all in one gulp.

(L) Well they say to “discover” things like this. How the heck are we supposed to discover these things?

(F) This will come to us step-by-step.

(J) It doesn't really matter.

(L) It does matter because they say that knowledge protects. This is knowledge.

(F) I know, but you can't get it all at once. Look how much you have acquired in the last three years, the last eight months. You are so impatient. You expect to have your mind totally input with all of this and then to go back and have fun with your children, eating popcorn and watching movies. It wouldn't work that way. This is what you would be like if you had all this knowledge at once. {Demonstrates extreme spasticity. Laughter.} Is that what you want?

(T) Yeah, the kids would get their popcorn and sit around and watch mom! Better than a movie.

(F) The rest of your existence in 3rd density would consist of eh-eh-eh-eh-eh!!! {Laughter} Doctors would be coming and injecting you with glucose and stomach feeding and you wouldn't feel it. You would be still going eh-eh-eh-eh-eh-eh-eh-eh-eh! You can't get it all at once! I have the feeling that as time progresses that we are going to get an enormous input of knowledge, every session has to be absorbed. You can't just get it all dumped into your brain like a dumptruck.

(T) We are doing what we are supposed to be doing.

(F) I suspect that some of those annotations in that book were coming from a 4th density being who already knew all of this stuff the way we know about tiddly winks. But, that is all fine and good. We are not there yet.

(L) Why would somebody annotate this book this way and send it to the ONI?

(F) To show the ONI how little they know.

(S) It worked, they now have a study group!

(F) Besides, if we get too much too quickly, you will be sitting watching a movie and all of a sudden you will hear a knock on the door and there will be four gray suits out there asking for you!

END OF SESSION

3.15 March 7, 1995

Frank, Laura, SV, MT {owner of New Age center in Tampa}, Mark (friend of Frank, son of “Dane” as written about in “Amazing Grace”).}

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us tonight?

A: Sijll.

Q: (L) And where are you from?

A: Cassiopaea, of course.

Q: (L) We have some questions tonight. We were discussing earlier this evening the ‘abomination of desolation’ as written about by the prophet Daniel and also spoken of by Jesus. What is this?

A: Disinformation.

Q: (L) Are you saying that the abomination of desolation IS disinformation, or that the writing about it is disinformation?

A: Both.

Q: (L) Can you tell us anything to clarify this point?

A: In what way?

Q: (L) Who, or what was the source of that information as prophesied by Daniel?

A: Illuminati.

Q: (L) The prophecies given to Daniel were disinformation?

A: Close.

Q: (L) Is there an ‘abomination of desolation?’

A: There is anything, if the definitions are unrestricted.

Q: (L) Well, okay. Who were the Elohim of the Bible?

A: Transdefinitive.

Q: (L) What does that mean? Transcends definition?

A: And variable entities.

Q: (L) Were the Elohim ‘good guys?’

A: First manifestation was human, then non-human.

Q: (L) Are they light beings as some people say?

A: Vague.

Q: (L) Well, what brought about their transformation from human to non-human?

A: Pact or covenant.

Q: (L) They made a pact or covenant with each other?

A: No, with 4th density STS.

Q: (L) Well, that is not good! Are you saying that the Elohim are STS? Who were these STS beings they made a pact with?

A: Rosteem, now manifests as Rosicrucians.

Q: (L) What is their purpose?

A: As yet unrevealable to you.

Q: (L) That's heavy! Okay, what is the source of the 'Keys of Enoch' teaching? James Hurtak claims that he was taken up to the higher realms and that the 'Keys' were programmed into him...

A: Disguised reality.

Q: (L) The place that he was taken to?

A: No the place, the message.

Q: (L) What is the source of this disguised reality?

A: Research; one here studies a bit too much to discover explosive reality trailblazings.

Q: (L) Okay. Is there coded information in this book on several levels as M__ suggests?

A: There is coded information all over the place. Suggest slower pace of studying in order to discover earth shaking principles.

Q: (L) Who is studying too hard?

A: You. Slower would help. Remember the old parable about biting off more than you can chew?

Q: (MT) What are we supposed to do if not study?

A: MT is resistant.

Q: (MT) To what?

A: Why do you think you are having difficulty determining the course of your life?

Q: (MT) Resistant to what?

A: The message about slowing down. It is important because it is hard to see the veins in the leaves when the car is travelling too fast to see the trees clearly.

Q: (L) Well, she does seem to be living life in the 'fast lane,' so to speak.

A: Incorrect interpretation. It is not living life in the fast lane, it is trying to absorb too much too quickly.

Q: (L) In other words, she is running on too rich a gas mixture?

A: Clumsy analogy, but the right idea.

Q: (MT) I'm not quite sure what is meant here.

A: Metaphysics overload. It is a good path, but we suggest that you be more like the tortoise than the hare.

Q: (L) Well, she is looking for a path where she can combine her studies and also make a living.

A: Readings, therapies, rather than "teaching." Become the therapist rather than the therapy instructor! People crave individual attention, have you not noticed?

Q: (MT) Well, I make a lot more when I read than when I teach.

A: Bingo!

Q: (MT) How can I get more work in that respect?

A: That will take care of itself when you network, which you are already adept at doing.

Q: (L) Okay, there is a journalist coming here on Friday who wants to talk to me... {St. Pete Times, Tom French}

A: Be open in your mind regarding the flow of the situation. You have a tendency to forget that all do not share your ability to expand consciousness so easily.

Q: (L) So, you mean he is going to be a real skeptic and I am going to have to deal with validation issues?

A: That is not the point. The audience will be looking for flaws in the materialistic reference point, so you must be cautious, lest you be made to look irrational.

Q: (L) Well, then I guess I better not talk about exorcisms or anything like that.

A: Balance.

Q: (L) Okay. I will try to stay balanced. I don't want to have to leave the country. (MT) I would like to know what my connection is with the Hindu temple?

A: Nice people, but not your place. You needed the uplifting vibrations during a particularly stressful and disappointing period!

Q: (MT) Should I bring my bookstore back?

A: Open.

Q: (MT) Can you suggest a way for me to find a place for my books?

A: One last time, network and all falls into place.

Q: (L) Has Mark been abducted?

A: Open.

Q: (L) Why won't you answer that?

A: Another session we will.

Q: (M) Can you indicate to me what I am supposed to do in my career?

A: Career path should be, as for everyone, that which is attractive, effortless and painless.

Q: (L) In terms of material activities, what would be the best course for Mark to follow in his healing process right now?

A: Don't follow. Not following anything is a key. It is up to the individual.

Q: (L) Could you give us in a few words, the potential in each of us, for the greatest forward movement or growth?

A: We cannot tell anyone of you this, because then you would not learn, and if you do not learn, you do not progress as an individual soul!

Q: (L) Is there such a thing as a 'soul number' as someone we know has been told?

A: Only if you want there to be. Time to say "good night, Gracie."

Q: (L) Good night.

END OF SESSION

3.16 March 11, 1995

Frank, Laura, Terry, Jan, SV

This was the session held on the evening of the day we gave a demo at the local MUFON meeting. At that meeting, one of the attendees placed a gauss meter on the table beside the board and every time the Cs responded to a question, it buried the needle. (Gauss meter: an instrument for measuring the intensity magnetic fields.)

Q: (L) Hello.

A: Real UFOs SV.

Q: (T) The word is coming off the board because the surface is too slick to hold the ink. {We were using a new board and had added several words and punctuation marks to it.}

A: Density.

Q: (T) Is this satisfactory even though we are losing the word “density?”

A: Losing density is a common experience.

Q: (J) Are we talking about dieting?

A: Several interpretations.

Q: (T) I love mirth!

A: Mirth is good.

Q: (L) Who do we have with us tonight?

A: Sorra.

Q: (T) Hi, Sorra! (L) And where are you from?

A: Hi, Terry! Cassiopaea.

Q: (T) We have provided a new board. Works great.

A: Please make a habit of this!

Q: (T) We all like the new board, yes indeed!

A: Smooth, have called others to observe in amazement!

Q: {Laughter.}

A: Next demonstration please use this or a similar board.

Q: (L) We are sorry that we had to use the old board for the demonstration. (T) We were all winging it! Did we do okay today?

A: Okay today, we are actually having fun with this board. Love it!!!!!!!

Q: {Laughter.}

A: Yeah! This is Deanorrilloa, I am impressed too! Oppilmno, me too! Your energy will soar tonight to new levels!

Q: (J) Does it have something to do with our demonstration today {at the MUFON meeting} and the new board?

A: Yes!!

Q: (J) You guys are going to get whiplash moving around the board so fast!

A: You are good!

Q: (T) We owe it all to us!

A: Yes.

Q: (L) Tell us about the general...

A: F wants back in! {MF, supposed UFO investigator for MUFON. When I was working with the abductee, "Candy", he saw it as a case to make him famous, started manipulating her, and ended up having an affair with her.}

Q: (T) What does F__ want? Yeah, we convinced him today. Why does F__ want back in?

A: You are a powerful channel, he does know a legitimate one when he sees one, you know! And he is a legitimate researcher who merely got caught up in an emotional state.

Q: (L) I thought that you said that he was an agent for the Lizzies?

A: Agent provocateur.

Q: (T) They are not saying that we should let him back in, they are just saying that he wants in.

A: All is up to you.

Q: (L) What was the reaction of Andrew B? {Supposed to be the highest level Golden Dawn initiate in the region. He was SUCH a poseur!}

A: Excitement.

Q: (T) I don't mind having Andy come if you don't. I don't mind as long as he doesn't go running and screwing around with F__.
(T) Well, he can do whatever he wants with F__ as long as he doesn't bring F__'s energy in here. Only MF can do that. (L) Who was the gray headed, bearded guy?

A: Barth H__.

Q: (T) Who the heck is Barth H__. (J) Who was the guy with the pith helmet? (L) He is at Leonard's meeting quite often. You guys said the other day that this demonstration that we were going to give today was a destined event.

A: Yes.

Q: (L) Tell us now, since we have done it, what was the intent or the purpose of this destiny?

A: Education of those who could use a little redirection.

Q: (L) All those people there were people with just a little bit of an open mind. I mean, you almost can't deal with metaphysical people because they are generally closet fundamentalists. (F) Yeah, they seemed to be more balanced than some of these "New Agers." (J) Why was there so much interference when we had the group here a couple of sessions ago and there was no interference today?

A: Grooved better.

Q: (T) It was also good practice for doing it with a larger group of people.

A: Did you notice the heightened openness?

Q: (L) Yes we did notice. What was the reason for that?

A: Grooving provides for less interference among other things.

Q: (T) When GB {former regional director of MUFON} and the others were here that was the first time we had that many people here who were all directing the energy at the channel, so that opened the channel and grooved it wider. (J) The more new people we bring in with the right attitude, the more grooved it will become.

A: No, it happens as a natural circumstance of events.

Q: (L) Am I correct in thinking that one of the things that happened today was that we explained quite clearly what was going on, put up the parameters, and told the people what we would accept in the way of questions, and that this set up the protection?

A: Yes.

Q: (L) AB wanted us to ask what were the original number of chromosomes the human being possessed?

A: 135 pairs.

Q: (T) And we now have 23 pairs. So, we lost quite a few chromosomes. (L) A lot! (T) Will we get them all back?

A: Wait and see.

Q: (L) I want to ask about the fellow with the Coral Castle. We went over to see Hillard, as you know. He had an accident after we saw him, the very next day, in fact. Was this accident caused to prevent him from communicating with us any further?

A: Open. Call him and press for details if you like.

Q: (L) When we were talking to Hillard, he told us about the man who built the Coral Castle {Leedskalnin}. This fellow had, apparently, in his private quarters, three objects: a bed, a table, and a swing made of an airplane seat suspended from the ceiling by a chain, complete with seatbelts. Is this...

A: You got it right because you are learning and rebundling DNA as a result of this and other activities.

Q: (L) Okay, so what SV and I were hashing out about this mystery, that was a process of understanding how this man performed these remarkable feats of engineering and construction, is that it?

A: Hypnotize SV if you wish.

Q: (L) Will SV be able to access this knowledge through hypnosis?

A: What do you suppose has happened to SV in her life, and why does she have nagging thoughts about her personal reality which she chooses not to disclose?

Q: (S) I think you better hypnotize me. I have nagging thoughts, but... (T) Does this bring anything out? (S) About my personality, I doubt myself, I don't know. It's like a great big question mark.

(T) Do you want to follow up on this? And, they started out with “Real UFOs, SV.” What does that mean?

A: What does it mean, indeed!

Q: (S) I guess as opposed to projections? (L) Okay, guys, let’s connect our brain cells here!

A: No need to connect “brain cells,” using your chakras will do!

Q: (L) Don’t connect your brain cells, connect your chakras? How do we connect our chakras? (T) I didn’t know that you could connect them? (S) They are all connected always. (L) But I mean how do we connect them with each other? (S) Think it, I guess.

A: Discover.

Q: (L) Can you give us a clue on this? (T) Meditation?

A: You are missing the point, don’t search, just let it happen when it is ready.

Q: (T) That’s easy enough. (S) What does “real UFOs” mean? (L) Yes, you opened with that, what does it mean?

A: Ask SV!

Q: (L) Well, we certainly will ask SV. (S) I have never seen a UFO that I know of. Maybe I have but I didn’t know it. Does it have anything to do with the fact that I am adopted?

A: Maybe.

Q: (L) Maybe you are an alien, SV. (T) Are you an Orion Federation member? {Laughter} (S) Am I?

A: Mirth.

Q: (S) You have to hypnotize me soon, I am dying of curiosity. (L) You won’t die, I promise. (T) Yeah, you are living in Curios-

ity City. (S) I have had some really strange, fragmented dreams lately. They are only like glimpses... (T) Lately? Jan or I haven't had any strange dreams lately since the last one we talked about, but Jan had the visual thing with the eye the other night. (L) Yes, what was this phenomenon Jan experienced with her eyes the other night? (T) This is like the third or fourth time this thing has happened to her over the years.

A: Strand development in progress.

Q: (J) That's what I thought.

A: If that is what you thought, why hold back, don't you see your increasing abilities?

Q: (T) You have just gained knowledge on what you should be thinking about the next time it happens. I have been telling her that when it started that she should just relax, get past the stress and the fear, and just watch it and see what it does. (L) Yes, well, we have all had some strange experiences. (T) Yes, it is easy for me to say but hard for me to do and the same is true for all of us. (L) And with each of us, it is different.

A: Yes.

Q: (J) What kind of abilities are you talking about?

A: Psychic!

Q: (J) Okay, good...

A: Stop resisting UFO phenomenon, just accept.

Q: (L) What is this? Are you resisting, Jan? (J) I think I am still skeptical, yes. (L) You're kidding! I guess you need to see one, I guess. It sure cured me. {Laughter} (J) I have not had any assurances at all. (S) Neither have I, as far as we know. {Laughter} (J)

I mean, I know all this stuff... (T) Can we arrange for something for all of us to see where you are?

A: You can arrange any time. Laura, more caffeine, please.

Q: (T) Do you guys want some coffee? Let me ask, could it be that you guys are hooked on caffeine and you can only get it through us?

A: Open. How does a 6th density light being go about being “hooked” on anything from 3rd density?

Q: (S) Okay, Terry, you’d better explain it to them! (T) It is coming through on the frequency we are transmitting. (L) Are you guys getting the caffeine when I drink it?

A: No.

Q: (T) Are you getting the shot of frequency change it provides?

A: If so, oh well! {Laughter}

Q: (L) I think what it does is make us able to stay up with them.

A: Yes.

Q: (T) Oh, come on! You get a little out of it! Yeah, you do! (J) Do you like flavored or non-flavored coffee?

A: Terry, what have you been smoking?

Q: (T) Oh! They want some of that too! Ho-ho-ho, mirth, mirth. (S) It’s those cigars you smoke, Terry!

BREAK FOR COFFEE

Q: (L) I assume that you/us have been listening to our/your conversation on finances...

A: As always.

Q: (L) Now, what we would like to know is, can you give us pointers in this regard, or reassurances, because we are still 3rd density and need reassurance in some respects, as to how to deal with this situation.

A: You are still 3rd density enough to need a lot of things, my love!

Q: {Oooh!} (L) Yes, but you didn't answer the question! (T) They are good at that.

A: RTB Review memory.

Q: (L) Okay, you said you were making financial arrangements for us...

A: RTB RTLTHEBSHS

Q: (L) Is this a code?

A: RTL, THE, BSHS...

Q: (Laura and Jan) RATTLE THE BUSHES! {Groans}

A: As you are doing, network!

Q: (L) So, we need to get more stuff and send more stuff out, and do like Frank said and look for sponsors and so forth.

A: Ask GB about money, he will not likely give, but may know someone who will! Do you now see the process?

Q: (S) A government grant? {Laughter}

A: Nyet.

Q: {Much laughter} (T) Let's ask Newt! (L) Nyet on Newt! (T) Ask GB?

A: Nyet on Newt! Mirth.

Q: (T) So, there are no Republicans on 6th level... now, what happened, Laura, when you were looking for the correct Reiki teacher? (L) I asked if I knew someone who knew someone who knew the correct Reiki... (T) And the Cassiopaeans said HD. And, when they said that, you said: “Well, Helen doesn’t believe in Reiki.” Yet Helen knew the person with the correct lineage and teachings.

A: Trust.

Q: (T) But, you didn’t know she knew someone, yet she sent you to the person you needed to find. (L) Right. (T) And, now they are suggesting GB. He won’t give us the help, but he will tell us someone to go see. Is it not the same? (J) He forks out every month to pay for the MUFON Newsletter and it costs about \$150 a month to print that out. (L) Jan, didn’t you have a question you wanted to ask? (J) Yes... I wanted to ask about that “psycho-power” (L) Where’s the envelope the ad came in? There it is... there is the psycho-power thing... (J) Yes, and how come they misspelled my name... {Laura waves envelope with ad in air} (L) You see this guys? We would like to know if this is...

A: “Karnak the Magnificent”

Q: (J) OH! (L) What’s the matter?

(J) Well, that’s confirmation enough for me!!

(L) What do you mean?

(J) We were talking about Karnak in the car on the way up today! You know, the Johnny Carson skit. (L) Oh! (T) Karnak gave the answer to questions that were sealed in envelopes. It was always a joke. He would give a straight answer to a question that turned out to be a joke. “Humpty Dumpty had a great fall,” is the one I remember, and the question was “What happened to Humpty

Dumpty when Misses September, October and November moved into his apartment complex.” {Groans} Bad jokes.

(F) He would frequently use a play on words for that skit. If there was someone whose name was in the news a lot, he would say something like: “Alexander Haig” and then they would open up the envelope and the question would be “who is the father of the son of Alexander Haig.” {Groans}

(L) Well, we can save our money on that one.

(J) Guys, I am still skeptical of this...

(L) What do you mean?

(J) This whole thing... I really am... and for that to come through like that after Terry and I were joking about that in the car on the way here, and they picked that out specifically... just blows me away... I am sorry. {Gets tearful.}

(F) That’s okay. Until you get something that you can literally put trust in, it isn’t really real for you.

(J) Yes, like Laura’s was...

(L) Actually the biggest one was...

(J) George R. Kidd...{Name of my son in his previous incarnation. See Tom French’s article, The Exorcist in Love, St. Pete Times, for details.}

(L) Actually there have been several... the 666 thing was not in anybody’s subconscious, I know... none of us could have known about the Coptic number-letter relationship... and the thing about...

(J) I think we each have to have our own personal thing...

(L) And I have had to have so many of them, and still, with so

many of them piling up, every once in a while I still go into my doubt mode...

(J) We all do....

(L) What is this, are we deluding ourselves, is this a master deception by some entity? Our own minds?

(J) My friend Ann over in Palatka, who publishes that newsletter, the UFOlogist. We played around with the board one weekend when I went to stay with her. We got this really strange entity, and it didn't really go much of anywhere, but one phrase came through that was very clear that I had seen on a TV episode several days before, and the other one that came through that got me was the night before we went to that charity event and the first word that came up was "Poinsettias", and we asked what it meant and the Cassiopaeans answered that it just came to mind. Well, when we went to that event the next night, there were Poinsettias all over the place.

(T) Yeah, that country club was just filled with Poinsettias.

A: Hand on.

{Laura had hand off while looking for papers and puts hand on planchette when requested.}

Q: (T) Okay, what...

A: Put your hand in the hand of the Cassiopaeans! Put your hand in the hand of the "Man" who rides the wave! {Laughter}

Q: (T) Oh, I like that one. (L) We need to get to our questions... (J) GB thinks we need to put a book together on predictions... (L) I think the words of Jesus on that matter are appropriate: "It is a weak and faithless generation that seeketh after a sign." (T) We were talking about that earlier in the car... that the predictions are minor things compared to what we are actually getting, and

that if you have the knowledge, you don't need the predictions because you already know that something is going to happen and you know that things are not necessarily "set" until just before they happen...

A: Ask.

Q: (L) At one point we were told that time was an illusion that came into being at the "time" of the "Fall" in Eden, and this was said in such a way that I inferred that there were other illusions put into place at that time...

A: Time is an illusion that works for you because of your altered DNA state.

Q: (L) Okay, what other illusions?

A: Monotheism, the belief in one separate, all powerful entity.

Q: (L) What is another one of the illusions?

A: The need for physical aggrandizement.

Q: (L) The focus on the physical as the thing one needs to hold onto or protect. (T) Is separate the key word in regard to Monotheism?

A: Yes.

Q: (L) What is another of the illusions?

A: Linear focus.

Q: (L) Anything else at this time?

A: Unidimensionality.

Q: (L) The veil... (J) The perception of only one dimension... (L) Were these illusions programmed into us genetically through our DNA?

A: Close.

Q: (L) Are there any others we should cover at this point?

A: Are you finished with the concept?

Q: (L) Well, I don't know. Can you tell us a little bit about how these illusions are enforced on us, how they are perceived by us?

A: If someone opens a door, and behind it you see a pot of gold, do you worry whether there is a poisonous snake behind the door hidden from view, before you reach for the pot of gold?

Q: (L) What does the gold represent?

A: Temptation to limitation.

Q: (L) What does the door represent?

A: Opening for limitation.

Q: (L) Was limitation presented as a pot of gold when, in fact, it was not? Was this a trick?

A: What is snake?

Q: (T) The Lizards? (J) Danger. (L) Okay, who opened the door. (J) We did. (T) No, what is the snake.

A: No.

Q: (L) Does that mean we did not open the door?

A: Yes.

Q: (T) Who opened the door?

A: Lizards.

Q: (L) So, we were, literally... (T) Who was the snake? (J) The Lizards, they are danger...

A: No!

Q: (L) Who was the snake?

A: Result of giving into temptation without caution, i.e. leaping before looking.

Q: (J) So we should exercise caution. (T) Okay, what was the snake? (J) The result of giving into temptation. The snake represents the classic... (L) So what you are saying to us is that the story of the temptation in Eden was the story of Humankind being led into this reality as a result of being tempted. So, the eating of the fruit of the Tree of Knowledge of Good and Evil was...

A: Giving into temptation.

Q: (L) And this was a trick...

A: No! Tricks don't exist!

Q: (L) There is an issue here. (T) Okay, no trick, a trap?

A: No! Traps don't exist either. Free will could not be abridged if you had not obliged.

Q: (T) Now wait a minute. I am losing the whole train here. What were we before the "Fall?"

A: 3rd density STO.

Q: (T) Didn't you tell us that 3rd density beings could not be STO? (L) No. They said there are 3rd density STO beings. (T) We are STS at this point because of what happened then?

A: Yes.

Q: (T) Okay, now, we were STO at that time. The Lizards opened the door, we are using this as an allegory, I guess, the Lizards opened the door and showed us a pot of gold hoping that we would reach in for the pot, or walk through the door, when they

were waiting for us on the other side in order to take us over in some way. Am I on the right track?

A: Hoping is incorrect idea.

Q: (T) Okay, what was it they were trying to do by enticing us?

A: Trying is incorrect idea, continue to probe for learning opportunity.

Q: (T) We were 3rd density STO at this time. Was this after the battle that had transpired? In other words, were we, as a 3rd density race, literally on our own at that point, as opposed to before?

A: Was battle.

Q: (L) The battle was in us?

A: Through you.

Q: (T) The battle was through us as to whether we would walk through this doorway... (L) The battle was fought through us, we were literally the battleground. (T) I got that, but I want to get back to this analogy to make sure where we are in the overall picture. The battle was going on when the door was opened. Was the battle over whether or not we walked through that door?

A: Close.

Q: (T) Okay, we were STO at that point. You have said before that on this density we have the choice of being STS or STO.

A: Oh Terry, the battle is always there, it's "when" you choose that counts!

Q: (T) Okay, so we are still looking at that pot of gold? What I am trying to find out is... there is something important here... (L)

Let's back up and ask it this way: Prior to this event, humankind was or was not...

A: Prior to?

Q: (L) Okay, not prior. But, we are still talking about somewhat of a historical event in a sense even though it is all simultaneous. This event, somewhere on the cycle, was humankind all one soul, so to speak...

A: Backsliding.

Q: (T) We are moving backwards here. Okay, let's ask it this way...

A: Closer. You were with the thought waves, perhaps better to defer to him for this one.

Q: (L) Okay, I'll shut up. Carry on Terry. (T) I need all the help I can get. (L) It's a tough one. (T) This must tie into why the Lizards and other aliens keep telling people that they have given their consent for abduction and so forth. We were STO and now we are STS. (J) Yeah, right.

A: Yes, continue.

Q: (T) We are working with the analogy. The gold was an illusion. The gold was not what we perceived it to be. It was a temptation that was given to us as STO beings on 3rd density. The door was opened by the Lizards.

A: No temptation, it was always there. Remember Dorothy and the Ruby slippers?

Q: (T) Okay, we were STO at that time, before we stepped through. We didn't have to step through. (F) But, wait a minute now, they keep saying, correct me if I am wrong, every time Terry says: "They tried to get us through..." (L) They said no... (F) It was always there. (J) Free will could not be abridged if you had not

obliged. (T) They didn't do anything but open the door. The Lizards opened the door and let us decide whether we were going to go through or not. (J) I still think the key is that we obliged by stepping through the door... (T) By our stepping through this door that the Lizards conveniently provided for us without actually doing anything to us, just opening it and showing it to us...

A: Provided? ! ?

Q: (L) They didn't provide it... (J) It always existed... (T) It's always there.... (J) It's there now... (T) The Lizards...

A: Yes, think of the Ruby slippers. What did Glenda tell Dorothy???

Q: (J) You can always go home. (L) You have always had the power to go home...

A: Yes.

Q: (L) So, we always have the power to return to being STO? Even in 3rd density?

A: Yes.

Q: (L) How does a 3rd density STO being conduct their life?

A: Discover.

Q: (T) I want to go back to the analogy of the door. The door has always been there. The temptation has always been there... (J) Is there... (T) Has, is, will be... is always.

A: "When" you went for the gold, you said "Hello" to the Lizards and all that that implies.

Q: (T) Okay, that was what I was trying to get at. You said that the Lizards, or the forces of STS opened the door.

A: No. Shouldn't say opened. We said "opened" only to introduce you to the concept, so that you would understand.

Q: (L) So, let's let go of the part that somebody "opened" the door.
(T) The door was always there and always open. I was just trying to work with the analogy. So, the concept is that, as STO beings we had the choice of either going for the gold or not. By going for the gold, we became STS beings because going for the gold was STS.

A: Yes.

Q: (T) And, in doing so, we ended up aligning ourselves with the 4th density Lizard Beings...

A: Yes.

Q: (T) Because they are 4th density beings and they have a lot more abilities than we at 3rd density...

A: You used to be aligned with 4th density STO.

Q: (T) And we were 3rd density STO. But, by going for the gold we aligned ourselves with 4th density STS.

A: Yes.

Q: (T) And by doing so we gave 4th density STS permission to do whatever they wish with us?

A: Close.

Q: (T) So, when they tell us that we gave them permission to abduct us, it is this they are referring to?

A: Close.

Q: (J) Go back to what they said before: "Free will could not be abridged if you had not obliged." **(T)** We, as the human race, used our free will to switch from STO to STS. **(L)** So, at some level we

have chosen the mess we are in and that is the Super Ancient Legend of the Fallen Angel, Lucifer. That is us. We fell by falling into that door, so to speak, going after the pot of gold, and when we fell through the door, the serpent bit us!

A: But this is a repeating syndrome.

Q: (L) Is it a repeating syndrome just for the human race or is it a repeating syndrome throughout all of creation?

A: It is the latter.

Q: (L) Is this a repeating syndrome throughout all of creation simply because it is the cyclic nature of things? Or is it as the Indians call it, Maya?

A: Either or.

Q: (T) Now, you keep referring to the movie, “The Wizard of Oz.” You have been saying...

A: 6th density inspired.

Q: (T) You have good filmmakers up there in 6th density. (S) What other movies did they inspire? (T) Before we go off on a sidetrack like that, I’m still trying to grasp something here... okay, you keep referring to the movie, and that we have an ability within us that is something like the Ruby slippers that can take us back to STO any time we wish.

A: Yes.

Q: (T) So, all this stuff we have been talking about, the realm border, the wave, raising the frequencies...

A: Realm wave is the “tornado.”

Q: (T) That is the rough wave moving.

A: Subjective.

Q: (L) In the analogy of Dorothy and the whole thing, the place where she started out was Kansas, i.e. STO? (J) It was in black and white...

A: Not really.

Q: (L) Was going to the land of Oz the STO state?

A: STS.

Q: (L) So Oz was STS. And Kansas, not necessarily the physical surroundings, but the state of mind of Dorothy prior to the Oz experience, was the STO state.

A: Yes.

Q: (L) So, we don't need necessarily to look at Kansas or the fact that it was filmed in black and white, it is just the state of mind. The going to Oz...

A: And Elvira Gulch.

Q: (J) The lady that turned into the witch.

A: The witch is the Lizards.

Q: (T) Yeah, okay. Tornado. Dorothy fell from the STO to the STS state through the tornado. Is this true.

A: Yes.

Q: (T) The realm wave you equated to the tornado... (L) Did a realm wave interact with...

A: Analyze more carefully, suggest break to do so.

BREAK

(T) They are equating the tornado as the shift from STO to STS.

(L) Maybe it also is a shift from STS to STO.

(J) Yes, a shift from one to the other would be dramatic.

(T) Was it a density shift also? The realm wave is supposed to be a density shift. A window between densities. Is there also a shifting between STO and STS. Is there a gateway that you go through? A door?

(F) Oh God! There are so many possibilities here.

(L) And if you switch into STO do you find yourself on a different Earth?

(T) They said this tornado is representative of Dorothy going from STO to STS state. She also went from her reality to a totally different reality.

(F) That's true.

(J) But switching from one to the other is going to be traumatic.

(T) They have been talking about a realm wave...

(F) I don't think it matters which way, I just think that in that particular story it was laid out that way.

(T) But what they have been telling us so far is that the realm wave is a window to move between densities.

(J) Right.

(T) But they just said to us that the tornado is an analogy of a realm wave. But the tornado was a passage from STO to STS, not from 3rd to 4th density.

(J) Two different things.

(F) True, however, a realm border passage may represent any kind of sudden shift?

(T) That is what I am wondering. Can it also mean that not only would we shift from 3rd to 4th, but also would we shift from STS to STO and start out in an STO state there? And then have, again, whether or not we shift back to an STS state in 4th density? Do you always start out in an STO state?

(L) Okay, let's stop.

(F) No, because if a realm border is coming now, and they have told us over and over again that we are STS, and what they have actually told us is that the realm border is a shift from 3rd density to 4th density, and they never said it was a shift from STS to STO, they have said that it is our choice.

(T) Yes, but they just referred to the tornado as this realm wave, and, in the Wizard the tornado was the symbol of shifting from STO to STS.

(J) Is it?

(T) I don't know. I'm just trying to get a handle on what they are trying to tell us here because it is something extremely important.

(J) They have been saying "Ruby Slippers, Ruby Slippers," not "tornado, tornado."

(T) Yeah, they said that just now, that the wave is the tornado.

(F) I think that is a different subject, there.

(T) But now it is the same symbology. The tornado took her from one point to another and the slippers took her back to point A again. Two different concepts.

(F) Wait a minute.

(L) They said that Kansas wasn't the STO state.

(F) There are all kinds of intricate little things here, somehow there must be a way to connect it. You know what it is, remember the slippers, they said, meant that the pathway was always there for her to go home.

(J) Yeah, but she had to kill the witch to get the slippers.

(F) No, she thought she had to. Don't you remember Glenda telling her "Ooh, no dear, you can always go home. All you have to do is say 'there's no place like home.'"

(J) Yeah, but you had to be wearing those slippers...

(F) No, no... remember, that was an illusion.

(L) You've always had the power to go home.

(S) Now, you know what, the tornado could be 5th density, as she was looking out the window all these things passed by...

(T) Yes, her life passed by her.

(F) Yes, but they have told us that the realm border passage itself is going to result in all kinds of hairy stuff going on.

(J) Like I say, switching from STS to STO or back, or from 3rd density to 4th density, it's going to be a violent... it is not going to be an easy passage either way.

(F) Right.

(J) It is a radical change in reality.

(T) Yes, but for Dorothy, in the movie, it was violent in the fact that it was a tornado, though it did not physically hurt her.

(J) Yes, and that is what we have been told, too.

(F) She was scared...

(T) Yes, but that was a mental thing... it was up here {pointing to head} where the hurt was. She didn't get hurt physically.

(F) There is also another thing to speculate about, throughout the entire movie, she was never hurt physically. Through all the threats, she was never actually hurt.

(T) It was also 1939, if the movie had been made in 1995 they would have had machine guns, missiles, chainsaws, and there would be body counts all over the place. And she still could have gone home anytime she wanted. You know, "Dorothy Meets the Terminator."

(L) "Dorothy and the Chainsaw Massacre."

(S) "Dorothy Goes to Elm Street." {Laughter}

(T) It's the cross between a children's fairy story and a Stephen King Nightmare.

(F) You know, the fundamentalists have attacked the Wizard of Oz.

(L) They have? Why?

(T) Because it is Satanic.

(F) Yeah, they say it's Hollywood's effort to pull people away from Christianity and fundamentalism and all that jazz.

(T) The Wizard of Oz is evil. To the fundamentalists.

(F) Yes, because you don't need the celebration of Christ to get back to Kansas.

(L) Yes, and Cinderella is politically incorrect.

(T) Because she didn't sleep with one foot on the floor like all the sitcoms.

(J) Excuse me?

(T) I don't know.

(S) We went from Oz to sitcoms?

(J) I think you are mixing your metaphors.

(S) That was Sleeping Beauty.

(T) Yeah, that was Sleeping Beauty in the box.

(J) And one foot on the floor.

(L) No, Snow White was in the box.

(T) Snow White was in the box. Yeah, Disney took all the things that had Beauty sleeping in them...

(L) Did you ever stop and think about that symbology: Sleeping Beauty? Being awakened by a kiss?

(F) Who turns into a frog.

(L) No!

(F) Oh, that's right, the frog turns into a prince.

(L) That's another analogy. Being awakened from the illusion into which one has been put by the evil witch...

(F) And Cinderella...

(L) And also, in all of these fairy tales it is because of some choice and lack of knowledge...

(J) Rumpelstiltskin...

(S) The Ugly Duckling...

(T) Yeah, all of Grimm's fairy tales were really pretty grim. They have been cleaned up a whole lot.

(L) Yeah, in the original Cinderella, the step sister cut off part of her foot to get it to fit the slipper and the Prince found her out because of the dripping blood.

(Jan and S_) Ooooh! Yuck!

(T) Must have been the glass slipper, cut my foot!

(L) Yeah, it's pretty grim. One cut her heel off and the other cut her toes off.

(T) Are we getting anywhere? We got the idea that when we fell from STO to STS we gave the Lizzies the right to do what they are doing. So, when they make the statement that we said they could, we did.

A: Okay.

Q: (L) We are having a bit of a puzzlement here because we are wondering if the tornado which represents the realm wave is something that moves one from an STO state to an STS state while still remaining in 3rd density?

A: Okay, that is one way. Okay...

Q: (T) The realm border is not only a way of transferring from one density to another, but it is also a way of transiting from STS and STO and back?

A: Can be.

Q: (T) So, those who transit on this pass may transit from 3rd to 4th density and come out as an STO being?

A: In some of the passages.

Q: (L) Okay, so people can either go from STO to STS in 3rd or 4th density... any of these choices are open at this passing of the realm wave?

A: Any of the above according to the orientation of the wave.

Q: (L) And what is the orientation of the wave that is coming? Is it strictly to move us from 3rd density to 4th density? Is this a function of this wave?

A: We have told you this.

Q: (L) And they have told us that this is a wave from 3rd to 4th density. Some of the waves, apparently, can move from STO to STS... (T) Not the wave, the person passing through the wave. As this wave passes by, does the orientation of the wave depend upon the individual?

A: Compare to sea waves. Waves are a part of the fiber of all nature.

Q: (T) Is it going to depend on where on the wave you are relating to the cycle, the crest and the trough? As to which way you transition on it?

A: No.

Q: (T) In other words, a wave that is going to transition from 3rd to 4th density will do so no matter where you are on the wave when it passes?

A: Yes.

Q: (T) A wave that is aligned to transit people from STS to STO or vice versa will do that also?

A: Or you could “go under” instead.

Q: (T) Under the wave? (J) Under the water. (T) Then you wouldn't move at all. (L) You could be pulled under, you could drown and become part of the primordial soup! (T) Is that Minestrone?

A: Chicken Noodle. {Laughter.}

Q: (L) Am I right that if you go under you get sucked into the ocean and start cycling all over again?

A: It is not that simple.

Q: (J) I didn't think that was simple at all. (T) Let's not even start on that one. I'm still trying to work out this movement from STO to STS. You keep referring to the movie about Dorothy. In the movie she was told she could go home any time she wanted just by saying I want to go home, or whatever. That is a lot easier than going through all the conniptions and contankerations waiting out this wave that comes only once every so often. Is there a way for us to go back to STO that is easier and simpler than hanging out for 300,000 years waiting for this wave to come around?

A: Sure!

Q: (T) Okay, now we are getting somewhere. Where are we going? (L) Well, they already told me to shut my mouth. (T) But now you have caffeine, you can assist me. {Laughter} So, there is another way of doing this. (J) Visualization?

A: Now wait a minute, are you ready to just go to 4th density right now?

Q: (J) Well, probably not. I don't think I'm finished yet. (T) Yeah, I am ready. Right now. Let's roll! Jan, feed the cats when you get home! (L) Even the idea of just taking off and leaving and abdicating your responsibilities and agreements is an STS thing. (T) Yeah, but I'd be 4th density STS. (S) You and the Lizzies! (T) Now, now, I wasn't saying... I'm not ready to go now because I'm wanted here! Anyway, what you are saying is that the realm wave is not the only way to make the transition, is this correct?

A: One idea presented.

Q: (T) That idea is the wave is the way of moving a large group of beings, is this true?

A: Off center.

Q: (L) Well, the wave is just part of a grand cycle. (T) And we are here to set up a frequency to pull as many beings through the wave, when it passes, and that is the whole purpose of why we are here... Is this so?

A: That implies interference with free will.

Q: (L) So, we are here to set up a frequency so that others may join with us... (J) And when we get to 4th density we make the choice or change from STS to STO... (L) Who do the munchkins represent?

A: 2nd density beings.

Q: (L) Do the monkeys represent the Grays?

A: If you wish.

Q: (L) Who do the Witches soldiers represent?

A: The Nephelim.

Q: (L) Who does the Wizard represent?

A: Think, learn, discover.

Q: (L) I think we have had enough on this subject.

END OF SESSION

3.17 March 18, 1995

Frank, Laura, Terry and Jan, Brad, Sue

Q: (T) Good Evening.

A: Hello.

Q: Who do we have with us this evening?

A: Usurro.

Q: And, where are you from?

A: Cassiopaea. Yes.

Q: (L) Have you been listening to our discussion?

A: Of course.

Q: (L) And, do you have any comments to make on the assistance factor? {It was a discussion about a guy who wrote to me about “alien resistance” and his catalog of stuff to fight aliens, eliminate their influence, etc.}

A: Comments a plenty.

Q: (T) Comment away.

A: Prejudice.

Q: (L) What does prejudice refer to?

A: Thor Templar’s views.

Q: (L) His views are prejudiced. Okay, can you tell us, does he actually have material or techniques that can cause implants to dissolve and be flushed out of the body?

A: No.

Q: (L) Why does he think he does?

A: Open.

Q: (T) Is he who he says he is?

A: Vague.

Q: (L) He says he is the Lord High Commander of the Alien Resistance Movement to protect the planet Earth from alien beings. Is this who he is?

A: If he wishes.

Q: (T) Cool. I'm the Lord High Pooh bah myself. (L) Are any of the items in his catalogue worth spending money on, such as the radionics devices?

A: Make good conversation pieces.

Q: (L) Is there any kind of third density technological devices that we could build that would, for example, keep our environment clean in terms of vibrations, protect us, or erect a barrier against attack?

A: Review.

Q: (L) What have they said on that subject? (J) I don't remember. (T) When we asked about building a TDARM, they said: "Sure, we can tell you, but where are you going to get the parts?" The point is, the technology the fourth density beings are working with, we can't build.

A: All you need is knowledge.

Q: (T) I think Thor is missing the point about the knowledge.

A: If you have the knowledge, what else do you need? Now, think carefully and multidimensionally.

Q: (L) Well, a TDARM would be nice to start off with. (T) There's one buried on Oak Island, go dig it up.

A: No, order from Sears.

Q: (S) You want me to bring over their catalogue? You can start looking. (J) Is it in the Spring catalogue? {Laughter.} (L) So, we can't get a TDARM. (T) Well, you can, but you have to get the right catalogue.

A: Discuss Thor's tape, and we will address points one by one, if you wish!

Q: (L) The first point that he made was that, since you don't give us practical material information that we can make machines and weapons with, that you must be giving us disinformation and maybe you are the Lizzies?

A: Distorted representation of what Thor said, suggest listen again!

Q: (L) Well, I was just sort of boiling it down. Okay...

A: No.

Q: (F) I thought it said what you said it said. (J) What he wants is a marketable item he can make money from.

A: Interpretation only, Jan.

Q: (J) Well, why else... I mean, here is a fellow that markets this stuff...

A: He was implying the information we have given you is invalid or not of practical use in general, do you believe this to be true?

Q: (T) That's very true, he was. (J) No, I don't believe that! (L) No, I don't believe this to be true, but we do need to....

A: Sense doubt.

Q: (L) Well, yes, you sense some doubts because he has pointed out that we should be able to get financial assistance here since

that is the biggest way we have been getting attacked. And, obviously, if you are who you say you are, you should be able to do this, right?

A: Who says not in progress, and must it be instantaneous?

Q: (S) Yeah, look, you got the van. (L) That's true. (S) And all the little things that have been happening here and there? I have been getting more clients...

A: He makes it sound as if we should materialize 100 dollar bills on board! We have told you that you must learn in order to make progress as souls, this does not happen any faster than your abilities to absorb and process!!!

Q: (J) We know that. (T) Thor just wants what he wants and he wants it now, he wants to defend himself against aliens that he has no concept of. (J) We are just trying to understand what this guy is all about. (T) He really doesn't understand. He doesn't have the faintest idea what is happening out there.

A: His thought is that his own personal notions of what should transpire are gospel.

Q: (L) Are his intentions good?

A: Open.

Q: (L) Well, what I told him was to put his money where his mouth is and this was his reaction. So, I think we can determine his motivations from this since that has been suggested to us as a test.

(J) It sounds to me more like he is looking to sell us his stuff.

(F) Yes, it does sound that way. And, he will naturally discount any information that says his little gadgets are not worth buying.

(B) He is trying to pick your brains to get something he can get rich off of.

(F) And or selling us on the idea of abandoning this and becoming followers of his group and helping him to market himself.

(L) Well, one of the things he says is that the Grays are thought-forms and then he wants to sell a material object to blast them! The Grays are cybergenetic constructs. They are just as real as you or I. If they died, or ceased functioning, we would be able to take them apart.

(T) They are extremely advanced cyborgs.

(F) As long as they die in third density.

(L) And, you know, the thing that Hilliard told us, about the material evidence that disappears. {Hilliard was a rather mysterious man who had taken a liking to me after I gave a talk in Orlando to a UFO group that included CIA millionaire Henry Belk. I am convinced that Hilliard was involved in some way with the “Alien Autopsy” video because of his military background and other clues, and he was also a close friend of Edward Leedskalnin, the guy who built the Coral Castle. Hilliard died of a stroke on the very day that Ark and I were to visit him when he had said he was going to hand over certain documents to me.}

(F) And that is found throughout ufology.

(L) Hilliard is this old guy who lives over in St. Cloud, who has the most incredible collection of UFO stuff I have ever seen. He has devoted 40 years of his life to this and. He knows or knew all the prominent researchers and has a lot of material that no one else I have ever met has. He is retired military and worked for NASA as a consulting engineer. He’s been to Medugorjee to view the apparitions of the Virgin Mary and apparently has the ways and means to travel around to satisfy his curiosity. What he told us

that what everybody in the public sector wants is material evidence and that there has been a lot of material evidence picked up from various sites around the world. But, once it is collected, it disappears! When he said that I immediately inferred that he was talking about someone in some conspiracy absconding with the evidence. I thought this was what he meant by “disappearing.” But, he made it a little clearer when he said “they had cameras on it 24 hours a day, and it just DISAPPEARED!” I realized that what he meant was that it literally dematerialized. When he said this I said: “Oh. I understand that perfectly!” It makes perfect sense.

We have been dealing with this fourth density nature of the phenomenon, which, if it is that, it explains an awful lot of very strange stuff! Aliens walking through solid objects, appearing and disappearing before the eyes of witnesses, beaming people around on “light”, being beyond the restrictions of time, appearing to specific persons in a group while, at the same time, being invisible to others. So, you hear about all this and at the same time you hear about the obvious material nature of the phenomenon: landing traces, changes in sites and people in contact with the UFOs and aliens, dead alien bodies, captured craft. So, you try to sort it all out, and it is so weird, and you try to understand it. But, when you understand it as a fourth density phenomenon, some of which is literally technological and not paranormal in the strict sense of the word, then it makes perfect sense.

And, with the hypnosis sessions I have done, there are always these alien guys moving around in the background, and I instruct the subject to see clearly what is going on, and they get a FLASH; and they say, God! the face was there for a second, but they can't get it back, and all they can say is “It looks like a dinosaur,” or “it has scales on it.” But that is all they can get. So, somewhere

behind all this are these damned reptiles who, apparently, are other density.

(B) You said that when fourth density beings come into third density reality, they can only exist for a short period of time, and then they dematerialize back into their own reality because they can't hold the frequency?

(T) Yes, in some of the stuff you have where it talks about the Lizard beings, the reptiles, usually they are only involved for a short period of time. They are only seen every so often. They can only manifest themselves into this density for a short period of time, after which it is too draining. The Grays are projected into third density, and they can stay longer because they are engineered to do so, but they still maintain it for extended periods because some sort of power source is projecting them.

(B) That's why they take the abductees into their density where they can have some stability.

(T) It is easier for them to take us into fourth than for them to come into third. But, they abduct in different states. They don't always abduct the person physically. They can take the essence out of the body.

(L) We have been told through this source that a lot of the things that they do, such as extracting the soul, is actually a technological thing: fourth density technology. It is so far in advance of anything that we can conceive of, but, nevertheless, it is still technology.

(T) Which may explain their interest in the human ability to astrally project. We have an ability to remove our essence and transport it to other places even though we have little control over this and we are not entirely adept at it. It is somewhat random. They are interested in that ability and they are interested

in our emotions, all these things that someone “from another planet” in a strictly physical sense, would not be interested in. Although I do believe that there are some of these sightings that are strictly from other third density planets.

(F) Let’s ask about that.

A: Are those ideas gospel?

Q: (J) No, we are just trying to figure it out. (T) We should consider the source of Thor’s ideas. We have to learn to sort through these things.

A: Yes. Part of the learning process.

Q: (T) Well, we have Brad M___ with us this evening. He came with us to say hello. And, I think he has some questions.

A: Hello, Brad.

Q: (T) Brad had a dream the other night he wants to ask about. (B) I had a dream several nights ago, is this of significance to move to... should I go into detail? (J) No. (L) No.

A: Explore relationships with blood relatives.

Q: (B) That is an interesting reading. (J) Yeah, it would work, wouldn’t it? (B) Yes. I’m adopted and I have been thinking about finding my biological mother. I know her name and the town she is from, but I have never met her. I have never pursued it. (L) Maybe that is what the dream is telling you? (B) I don’t think it is exactly related to that. The dream was about...

A: Yes. Indirectly; learn, continue to share.

Q: (B) The dream was very distinct. I went to the moon and I was taken to the interior of the moon, and there was a very realistic interior to the moon. There were some parts that were hollow inside. And, when I went inside a big cavern there was 1920’s art

deco style, and it was so clear. And, it was to learn more about who we are and where we are... (L) Did you know that, symbolically, the Moon represents the mother or the feminine principle? And, you are talking about going inside a “cavernous” area “inside” the Moon, or inside the “mother.” The womb. (J) Twenties Art Deco? {laughter} (B) Yeah...

A: Thirties art deco.

Q: {Laughter} (S) Did it have something to do with Miami Beach? That’s thirties art deco all over the place. (B) Yeah, I’ve been there a few times. (T) What did the thirties art deco...

A: Cross reference: perhaps your interest in UFOs and related has some connection to your bloodline?

Q: (B) So, if I was to explore this relationship... go back and find this woman who was my mother, she might be involved in some way with metaphysical subjects or UFOs?

A: More than you realize!!!!

Q: (L) Maybe she’s an alien! {Laughter.} (B) My mother’s a Casiopean! (S) In disguise! An Orion! (T) Well, we are looking for an Orion. We are not going to find them, they are going to find us. (J) It’s not like we can put an ad in the paper. (L) Why not? (J) No, no, no, no, no! (S) We’ll give your phone number, Laura! {Laughter}

A: For Brad’s benefit, Mars monuments are atlantean, some on Moon are others; are ET.

Q: (S) Yes. Edgar Cayce said that the Atlanteans were going to other planets...

A: Yes. With the same relative ease with which you would fly to Atlanta.

Q: (B) Strange!

A: Pun intended! Triple! What is the base root of the name?

Q: (B) Yeah, that's where I am moving later this year.

A: Plans change!

Q: (J) Is that just a general comment or a prediction?

A: No.

Q: (B) Is it for me?

A: Who else?

Q: (J) Are you saying he is not going to move to Atlanta?

A: Open.

Q: (L) They are not going to tell you anymore. It was a big hint! Okay, we have a couple of questions to ask here. The first is: What is this big thing going around about the "Keys of Enoch?" James J. Hurtak, I believe, is the author or "channel" or whatever. I would like to know what is the source of this material?

A: Various.

Q: (L) Can you be a little more specific for us?

A: Probe.

Q: (S) I never read the book. (L) I haven't either. (J) Well, maybe we need to do the research and get back to them later. (L) Would you say that these sources are reliable?

A: Open.

Q: (T) What is it supposed to be about. (L) I don't know. Some woman is supposed to be coming next Saturday night from Atlanta to talk about it at Martie T___'s. (T) From Atlanta? As easily

as you fly from Atlantis? {Laughter} (L) Well, Martie wants us to come hear this gal teach on this subject. (T) As long as she is not going to read it! {Laughter} (F) No, but Martie is going to have a handout so that we can all follow along flipping the pages. (J) You guys are being nasty!

A: Martie T__?

Q: (L) Is that a clue? (J) Is that a clue to consider the source?

A: Open.

Q: (T) Was that a question or a statement?

A: Up to you!

Q: (L) I want to ask again about the Urantia book. My reading of it tends to make me think that it is elitist and racist. Is that a valid assessment?

A: Open.

Q: (S) Let's ask about Commander X and that stuff. (T) Yeah, who is Commander X? (L) The Cosmic Patriot Files. (T) He is a cosmic survivalist!

A: Does not wish to be identified.

Q: (T) Well, we know that. (L) What is his position?

A: Free will.

Q: (L) Is he in a position to know of which he speaks?

A: Maybe.

Q: (T) And then again, maybe not. (L) I thought it was pretty good information. (F) It looks like a compilation. (L) Jan and I have a question. Hillard mentioned that the frogs are disappearing from the planet.

A: Ozone layer.

Q: (L) They are getting fried because of the loss of the Ozone layer?

A: Fried?

Q: {Laughter} (J) Where are they going? (T) The ozone layer is depleting and they are the first of the things we are really noticing as an effect of this?

A: Yes.

Q: (J) Where are they going? (T) They are not going anywhere, they are dying. (F) They are not reproducing.

A: Yes.

Q: (B) They have very sensitive skin. (T) Soon it is going to be affecting us all.

A: All part of the wave effects interconnecting realities.

Q: (L) Well, if it is having this effect on frogs, what is it going to do to us when it gets stronger?

A: Wait and see.

Q: (L) Now, come on! This doesn't sound like a real pleasant thing. Don't you think you ought to give us just a little more on this? A clue here?

A: No.

Q: {Laughter} (T) Are they saying that the loss of the ozone layer is a direct result of the approaching wave? (J) They sure did! (T) The loss is not due to the fluorocarbons?

A: Misinterpretation, review statement thoroughly.

Q: (J) Is removal of the ozone layer part of the frequency "fixing?"

A: Close.

Q: (T) This is keyed on the frog phenomenon?

A: No.

Q: (L) It's keyed on interconnecting realities.

A: Yes.

Q: (L) Are you saying that the wave is causing the interconnecting of realities? (J) And the ozone layer is in the wave?

A: And causing actions which affect third density in myriad ways, close circle. Please "excuse" eavesdroppers.

Q: (J) Is someone eavesdropping? {Child in next room peeking around door who then exits to upstairs.}

A: Was, disrupts channel and can be harmful.

Q: (L) Well, they have repeatedly told us that the children must not be around during the sessions because it can be detrimental to them with their "open" or unformed energies. Back to the frogs. Interconnecting realities is the key. Myriad manifestations. (S) Maybe the frogs are going into a higher density? Affecting third density is the dying of the frogs, correct?

A: No.

Q: (L) It is a symptom?

A: Yes.

Q: (L) Okay, it is a symptom of interconnecting of realities. When you say interconnecting of realities...

A: No "of".

Q: (L) Okay, I've got it... the dying of the frogs is symptomatic on second density level of what is occurring on third density level.

It's an expression, on that level, of what is happening here... (J) Or a warning... (L) Dying frogs... is that correct?

A: No.

Q: (L) Are the frogs moving from second density to third density?

A: Not that complex, perhaps you need to study transcripts more often, then you would not need to cover the same subject matter over and over!

Q: (L) Okay. Then we will drop it. (T) I want to go back to the "frogs are a symptom" of the overlapping realities. Realities, not densities. The frogs are dying because... (L) Because they feel sorry for us! (T) Yeah! Works for me! {Laughter} The frogs are dying because the ozone layer is becoming depleted. I think it is completely gone and they are lying to us about that.

(B) Maybe they are saying that all life is interconnected on the planet from their reality to our reality; from second density to third density... and there are warnings on all levels...

(J) Yeah: "See what is happening to the frogs now, wait and see what is going to happen to you guys later!"

(B) Right.

(T) But this is because the ozone layer is depleted... but the ozone layer is depleting because of the chemicals we are dumping into the atmosphere, it is not going away, it is dissolving into other chemicals.

(L) But the Cassiopaens said that the ozone was depleting because of the wave.

(T) But, is the relationship of the ozone being depleted and the approaching wave, perhaps that the wave isn't causing the depletion, it's the Lizzies causing us to deplete the ozone layer in

order to create suffering, in order to feed on this negative energy because of the approaching wave?

(L) Is the wave causing the ozone depletion?

A: Not directly.

Q: (L) But is the wave causing people to behave in a certain way so that they do things that cause...

A: You are getting warm...

Q: (L) The wave is causing the activities of the Lizzies to heat up as well as the good guys, and it is part of the conflict...

A: Colder...

Q: (T) Drop the Lizzies... (L) It is causing the destined actions to take place that are necessary for the closing of the Grand Cycle?

A: Close.

Q: (L) And the dying off of the frogs is part of this? Poor little frogs... I like frogs...

A: So are "earth changes."

Q: (J) Is the depletion of the ozone layer a part of the equation required for the wave...

A: In third density reality, it is important.

Q: (J) So, it is part of the natural progression of movement from third to fourth?

A: Let's try using the word "reflection," and see if that "rings a bell." Third into fourth.

Q: (L) Are the frogs going into fourth density?

A: No. No. No.

Q: (T) There were several questions in there. You said third into fourth...

A: And vice versa.

Q: (L) Well, I'm more confused than ever! (T) Reflection...

A: If you had been studying transcripts, you would not be!

Q: (T) Reflection is... there has been statements made that in sixth density STS balances STO in reflection only.

A: Ice cold.

Q: {Booo!} (J) Is the ozone layer a hole that allows it to reflect in both directions?

A: No.

Q: (L) Are new frogs being created to populate the earth?

A: Okay, here we go: Oncoming wave is a transformation from third density to fourth density so, events happening due to the approach of the wave are causing changes across densities and realities! In third density, you will notice changes that will have third density explanations, but they are a manifestation of the approach; you see them as third density because that is your current point of reference! Remember that all reflects in and cross all density levels but also there is a merging upon arrival of the wave, it is realm border crossing!!!!!!

Q: (J) Well, we are once again thinking third density. Please be patient with us. We aren't finished yet. (S) Does that mean we are half-baked? (T) Or half frogged! (L) I just thought that the Lizzies might like frog legs. {Laughter} (T) The Lizzies are French?

(F) I read something last night that said a scientist had been working at one of the bases, or he was a tech working at a super-secret complex somewhere, and he was working on something in some

underground room and the elevator door opened and he saw, standing there, right before his eyes, a Lizard Being. He said that the elevator must have been malfunctioning because it wasn't supposed to stop at that level, and he wasn't supposed to see it. In another instance, someone saw two Grays working on something in a hangar and they were told by an MP to leave or they would be shot.

(L) Are these stories Frank is recounting about Lizzies being on elevators and Grays working in hangars, are these true stories or are they disinformation?

A: True.

Q: (L) Well, that settled that! Let me ask a couple of quick questions for my kid. She wants to know the source of the Voynich Manuscript.

A: Disinformation.

Q: (L) Who put it together?

A: Various sources.

Q: (L) Why?

A: Monetary gain.

Q: (L) So, somebody just faked up an ancient manuscript to sell it for big bucks?

A: Yes.

Q: (T) Well, they did it with the Hitler diaries. (L) Her next question is: how are some people able to walk on fiery coals, pierce their bodies all over, or lie on a bed of nails without pain or permanent physical disfigurement.

A: Mentalism.

Q: (L) What causes some planes, people and ships to disappear in the Bermuda Triangle. Where do they go and what happens to them?

A: Already covered this.

Q: (S) Yeah, the Atlantean pyramid.

A: Yes. EM waves caused by same.

Q: (L) Where do they go when they disappear?

A: Of course some are just crashes and sinkings, but when accompanied by unusual phenomena, it is because of irregular anomalies.

Q: (L) Where do they go? (T) They don't go anywhere, they go to the bottom. (S) Fifth density.

A: To parallel reality.

Q: (L) Is this parallel reality like being on a parallel earth?

A: No.

Q: (L) What do you mean by a parallel reality?

A: Varies according to circumstances.

Q: (L) What happened to the infamous Flight 19? (T) They went to Philadelphia.

A: They are still trying to get their bearings.

Q: (L) Ooooh! (J) Oh! My God! Oh, how horrible! They are still out there trying to get back. (T) They are in a parallel reality... (L) Where time doesn't exist... (T) They are in a reality that holds them in frozen space/time over the ocean, am I getting this right?

A: In their thought reference, like being "lost souls."

Q: (L) Oooh, bummer! Does this mean that they are “stuck” in time? (J) You got it!

A: Bingo!

Q: (L) Is there any possibility that they could fly out of this place that they are stuck in and back into our reality?

A: Absolutely, remember, the wave is approaching, and as it gets “nearer”, more and more unusual events take place, witness crop circles, for example.

Q: (L) Is there anything anyone can do to release persons stuck in these parallel realities and bring them back into the reality of origin?

A: Yes, but the technology is a closely guarded secret.

Q: (L) Do you know the secret?

A: Yes, but you do too!

Q: (L) I do too? (T) Does Thor know it? {Laughter.}

A: Mirth!

Q: (L) I know the secret too?...

A: Philadelphia Experiment.

Q: (L) Since you mentioned the Philadelphia Experiment, could you tell us in specific detail, how this was done? What kind of machines were used and how can we build one? {General uproar and laughter}

A: Do you intend to sit here for a day or two?

Q: (J) In other words, it would take a day or two to give us the information? (T) Yeah, we got the time. Get some paper and a

pencil. (L) We will save that for another time. (T) Let's start with a diagram and send it to Thor.

A: In short, build an EM generator.

Q: (L) Here's another of the kid's questions: When and why did homosexuality originate?

A: It originated when sexuality did.

Q: (L) What is the world's oldest language, at least of those known to today's world?

A: Sanskrit.

Q: (L) What is the origin of Sanskrit?

A: Atlantean roots.

Q: (L) What is the karma involved with Siamese twins and why are some more joined than others?

A: too complex and not important.

Q: (L) Okay, that is the last of her questions, at the present time we would like to go through some....

A: Now, some more information about Flight 19. Do you remember a few years ago that a team of researchers claimed to have found the planes, then retracted?

Q: (L) Yes, I remember. {All agree.}

A: Did you find this to be curious?

Q: (S) Yes, because the planes that they found were never reported missing. (T) Yes. (L) Is that why it was so curious? (J) Why did they retract? (S) Where did the planes come from that they found?

A: Yes, if only you knew the details, and how three of the team have required massive psychiatric aid.

Q: (L) Well, tell us the details!

A: Patience, we are, but must do so slowly so you have some hope of grasping it.

Q: (T) Three of the recovery team needed psychiatric treatment?

A: What they found were five planes matching the description, and “arranged” in a perfect geometric pattern on the bottom of the ocean, but the serial numbers did not match.

Q: (L) Is the geometric pattern itself significant?

A: Now, first mystery: There were no other instances of five Avengers disappearing at once. Second: Two of the planes had strange glowing panels with unknown “hieroglyphics” where there should have been numbers. Third: When they tried to raise one of the planes, it vanished, then reappeared, then vanished again then reappeared while attached to the guide-wire, then finally slipped off and fell to the bottom. Fourth: In one of the planes, on the bottom, live human apparitions in WWII uniforms were temporarily seen by three exploratory divers and videotaped by a guide camera. Lastly: Three of the planes have since disappeared. All of this is, naturally, being kept secret!

Q: (S) I wonder where the planes came from. (L) That is the obvious question!

A: Parallel reality, you see, when something crosses into another reality, it accesses something called, for lack of a better term, the “thought plane”, and as long as that reality is misunderstood, the window remains open, thus all perceptions of possibility may manifest concretely, though only temporarily, as thought plane

material is constantly fluid.

Q: (L) Does this mean that this was a “Flight 19” of a parallel reality that went through a window into our reality?

A: Close.

Q: (L) Was this part of or connected to the loss of our “Flight 19?” Did we exchange realities here?

A: It is the thought patterns that effect the reality, when that window is opened, all thought can become physical reality, though only temporarily.

Q: (L) Does this mean that the divers’ and searchers’ thoughts about this became reality?

A: And all others.

Q: (T) All others involved in the search?

A: All others on the planet.

Q: (T) Even those that did not believe that the searchers were going to find them?

A: Yes. Researchers found what they expected to find, but when others heard the news, other things started to happen according to which thought patterns dominated.

Q: (L) So, in other words, if somebody believed that it was Flight 19, it appeared, and if somebody did not believe it was Flight 19, it disappeared?

A: Yes.

Q: (J) Oh jeez! (T) Well, I didn’t believe it to begin with... (L) So, I guess we won! (F) We sent some poor guys into the psychiatric ward. (T) The planes appeared because people... (L) No, I think

the searchers went looking for this and because there was a window there... (T) the planes showed up exactly as they expected to see them, in a formation... But the planes would not have come down as described there, and they appeared in a formation on the bottom. That should have told the searchers something right there. When I heard that they had found those planes in a formation, that close together, that bothered me. (F) Even if something sinks to the bottom, it won't arrive there in the position it started at the top. (T) And what they did find after they started checking the records, was that there are about 200 of those planes crashed along the coast. And, there was another guy who said that he found one of those planes, only it wasn't one of Flight 19. And, while he was out there looking for it, he found parts of the shuttle... (L) That reminds me, when the Challenger crashed, were the astronauts still alive when they hit the water, and did they continue to live for any length of time after they hit?

A: Four were alive but died instantly on impact with the water.

Q: (L) Are we done with the Bermuda Triangle? (T) I have a question... what happened to the PBA plane that went out searching for Flight 19?

A: Still trying to find the Avengers.

Q: (T) Is it in the same parallel reality with Flight 19?

A: Yes.

Q: (T) Will it ever find them?

A: ?

Q: (L) In the perception of the crew of Flight 19, how much time has passed?

A: None.

Q: (J) So, they have no idea. (S) I wonder if they will come back to our time or go back to their time?

A: Your perception.

Q: (L) We talked about doing a DNA count...

A: Will not answer. Up to you to discover.

Q: (L) Jan went through an experience lately, what does it relate to? Is it significant?

A: Yes.

Q: (L) What does it signify?

A: Awareness expansion.

Q: (L) Jan wanted to ask if there is any significance to the trashy confrontations currently on talk shows?

A: Immaterial.

Q: (L) Jan also wants to know what is serotonin?

A: Laura answer.

Q: (L) Serotonin is a hormone secreted by the Pineal gland and is also secreted in the mid-brain and is related to feelings of well-being, mood altering, and you suffer from lack of serotonin if you don't get enough sleep. The other day we were discussing the fact that infants on mother's milk do not produce much waste. Is there any diet that adult humans could eat that would be assimilated as well?

A: Less, but for no waste, just wait for fourth density.

Q: (L) We would like to know what the Christian Cross represents at a deeper level?

A: Part of the Lizzie disinformation campaign, sorry!

Q: (L) I thought that! Remember, the cross represents the “death” which never occurred. (J) The reason we wanted to ask that was because Brad wanted to know if the symbol had anything to do with “Realm Border Crossing.”

A: Cross is “cross” in English only.

Q: (L) Sometime ago we ask some questions about different life-times and S__ was told that she spent four sequences held over as a “special learning channel” or “hold back on contemplative level.” What does that mean?

A: Self-explanatory.

Q: (J) I hate it when they say that.

A: Learn!

Q: (L) Wait a minute, there is a distinction: was she the one doing the learning or was she helping someone else to learn? I understand “learning channel.” (T) It’s on cable...

A: Both.

Q: (L) It wasn’t because she was bad? She didn’t get “held back in school?”

A: Improper concept.

Q: (S) Why, when holding acupuncture points on Laura, do I get the sweats?

A: Because you are undergoing changes relating to the approach of the wave.

Q: (L) Is this significant of the work she is doing?

A: Unrelated.

Q: (L) Has Jan’s brother ever been abducted?

A: No.

Q: (J) Is there any elitism involved in interactions between other densities?

A: What?

Q: (L) I guess not. We have heard some things about D__ W__. We have heard that he was behind the Eddie Page fiasco. Is this true?

A: Open.

Q: (L) Well, then goodnight.

A: Goodnight.

END OF SESSION

3.18 April 15, 1995

Frank, Laura, Terry and Jan

Q: (T) Good evening. Who do we have with us tonight?

A: Good evening!

Q: (L) Who do we have with us tonight?

A: Shoura.

Q: (L) And where are you from?

A: Not from, but you know as Cassiopaea.

Q: (L) Alright. Long time, no see!

A: Oh yes!

Q: (L) Did we communicate with you when it was just S__, Terry and Jan and I?

A: Fragmented.

Q: (L) But it was you, fragmented?

A: Some.

Q: (T) Not all of it was you?

A: Like conflicting signals on radio.

Q: (T) Should we continue working with changing people on the board so that we can all work on the channel so that the channel will open for all of us?

A: Vague.

Q: (J) Do you recommend switching people on the board?

A: We recommend that which you feel is best.

Q: (L) Now, the pressing question: What has been happening to us?

A: We have warned repeatedly of attack!!

Q: (L) Was this ordeal we have just gone through an attack?

A: Of course.

Q: (L) What made us vulnerable?

A: Your work.

Q: (L) Was there anything having to do with any one of us contributing to this vulnerability?

A: Open.

Q: (J) Was anything that happened conscious with anyone?

A: Is this your inquiry?

Q: (J) Yes.

A: Then answer from within.

Q: (L) That doesn't help. A__ said that, even as a kid, she could have straightened it out between us without even trying. (J) Well, maybe S__ just wasn't cut out to be a mediator.

A: Okay.

Q: (J) What were the intentions of this attack?

A: S__ is insecure. Have you not noticed?

Q: (J) Yeah. (T) But insecurity is not a problem as far as that goes.

A: Problems are according to circumstances.

Q: (L) Well, that still leaves us in a bit of a quandary...

A: Do you employ a maid to fly a passenger jet?

Q: (T) So, the wrong person was doing the wrong thing. It wasn't her fault.

A: But relaying of messages is sensitive issue.

Q: (J) There is a clue there. Who indicated that she should relay messages between you and Frank? (L) Nobody, I guess.

A: Was spur of moment "flow." Plot course carefully, so as not to run aground.

Q: (T) We are doing Chinese fortune cookies tonight. (L) Well, I still feel a little bit hurt that everything I said was simply not understood and that the things Frank said, had they been conveyed exactly as he said them, would have brought the problem to an immediate halt. What should have been repeated was not and what should not have been repeated was.

A: True. Attack is most purposeful! Watch all portholes.

Q: (L) So, in other words, S__ may have been an instrument of attack unwittingly?

A: Close.

Q: (L) Was any part of this attack connected to those women in that Metaphysical church or Judy and Yvonne in Spring Hill?

A: Open.

Q: (T) When Terry saw this event in the cards he read for me, he saw three women in attack mode. Did that reading represent this event?

A: Open.

Q: (L) Now, we have three names here and these are people who are involved with Barrie and Susy Konicov. She called last week sometime and wanted us to get a “take” on these people. The way that Barrie phrased the question was: “How do these people plan to play him?” Or, what are their intentions. First name is Carl Grancy.

A: User.

Q: (L) Mark of Michigan.

A: Harmless.

Q: (L) Karen Hilton?

A: Other interests, losing connection to Barrie.

Q: (L) Does this just mean that she is there for the time and is planning on moving on eventually?

A: Close.

Q: (J) I want to ask about the fact that there has been some stuff that has come out lately that is an about-face of things that have always been the status quo. Disney's change of programming and their production of the Alien video, the recently released film that has been accused of being blasphemous; McNamara about face about Viet Nam. Is there any significance to this?

A: All explained by previous answers, of which you are well versed, i.e. preparatory foundation.

Q: (J) The foundation is being set for the changes to come. These events do have significance.

A: You know this, which is why there is recognition.

Q: (T) They are priming the country for a number of major reversals in policy and so forth. (J) I don't even think it is necessarily that. Isn't it just a reversal of known values?

A: All of above.

Q: (L) Is it necessary for me to have surgery to fix my shoulder?

A: Be careful not to be misled.

Q: (L) Is that about the surgery?

A: Yes.

Q: (L) Will my arm get well on its own?

A: Can.

Q: (J) How? (T) You ought to get a second or even a third opinion.

A: Yes. Surgery is profitable.

Q: (L) Can you recommend something that I can do other than surgery?

A: Heat therapy combined with dietary adjustment.

Q: (J) What dietary adjustments?

A: Calcium, manganese, starch cutback and potassium supplement, only use distilled water in order to flush solid obstructions!

Q: (L) Well, that is the most comprehensive piece of physical advice they have ever given. (J) No kidding.

A: You are in pain, my dear, and when you hurt, all others do too!

Q: (J) That was sweet. Moist heat or dry heat?

A: Moist?

Q: (L) Reiki?

A: Yes. When ligaments are damaged, it is often a function of calcium obstruction.

Q: (L) Is the bony prominence that shows up in the x-ray on the Coracoid prominence, a build-up against which the tissues have torn?

A: Yes.

Q: (L) So, it is not a broken piece, is that correct?

A: Yes.

Q: (T) Wasn't S__ telling you about that? A projection will tear the tissue like a piece of fabric. (L) Alright. Before we get on to other subjects, my mom wants to know what causes her abdominal distress?

A: Muscle atrophy.

Q: (T) She needs to exercise more. (L) Is that correct?

A: Yes.

Q: (L) I recently got a flyer from the Human Potential Foundation about this super duper conference being held in Washington. I would be really interested in that. Could we or should we plan on trying to attend that one?

A: Waste of time.

Q: (L) That's pretty definite. (J) We have enough on our plate. (L) In the book here, "Mysterious Fires and Lights," there is a whole segment on the idea that certain lights that have been called UFOs of a specific sort, which perform in a specific way, and this is not including all by any means, may actually be living creatures of some sort that manifest in our reality. And, that they seem to have a consciousness, and a purpose, but they don't manifest as "real" UFOs. Is this, in some cases correct?

A: Check publishing date for currency of theoretical data.

Q: (L) Okay, it is published in 1967. (T) Well, so much for that! (L) Well, it's not a stupid idea. Like ball lightning. It has been known to demonstrate intelligent behavior, kind of like a curious puppy. What is ball lightning?

A: Would be hard to "get attached" to such a pet.

Q: (L) I know that, but is it sentient? Is it a probe of some sort?

A: No.

Q: (T) It is just a very strange electrical phenomenon.

A: Close.

Q: (L) The other night when we were working without Frank, we got some information that indicated that Frank was in danger via the government. Is that true or was that true?

A: Partly.

Q: (L) What is the source of this danger?

A: Source?

Q: (L) I mean like, the IRS, the FBI, the CIA, or what?

A: Not initialled as such.

Q: (L) Is this physical danger or just harassment danger?

A: Mind attack for purpose of self-destruction.

Q: (L) Is there anything that can be done to shield against this kind of attack?

A: Yes.

Q: (L) What can be done for shielding?

A: Knowledge input on a continuous basis.

Q: (L) And what form should this knowledge take? Does this mean channeled information, books, videos, what?

A: All and other.

Q: (L) A specific other?

A: Networking of information now, warning!!! All others will very soon experience great increase of same type of attack, two of you have had episodes in past from same source for similar reasons, but now your association puts you in different category!! Remember all channels and those of similar make-up are identified, tracked, and “dealt with.”

Q: (T) Which two have experienced similar types of attack?

A: Up to you to identify for learning.

Q: (J) I’m pretty sure I’m one of them because I have been way down mentally and emotionally. (T) Is Jan one of the two? (J) I

know I'm one.

A: Suicidal thoughts?

Q: (L) Have you had suicidal thoughts? (J) No. (T) Not me. (Frank) I have had them constantly. (T) Laura, did you? (L) I was pretty damn low. I wasn't contemplating suicide, I was just thinking how nice it would be if we could just turn out the lights and end the illusion. (T) Okay, so we have identified the two, you and Frank. (L) So, in other words Jan, it is going to get worse. (Frank) Didn't they say two others? (L) I guess they are saying that a similar thing can happen. (T) If we don't work together on this, we are going to lose the whole thing. (J) Okay, ask about the card reading Terry did tonight? (T) Was it accurate?

A: Close.

Q: (T) Was the reading referring to the same thing you are now referring to?

A: Close.

Q: (T) So, we have the knowledge and all we have to do to prevent the attacks from being nasty?

A: You do not have all the awareness you need! Not by any means!

Q: (J) Is one of the reasons why this whole thing between Frank and Laura happened to show us that we could establish, albeit a very weak and very jumbled, connection with the channel without Frank's presence. A sort of verification of the channel's integrity. Was that one of the byproducts of this, or one of the purposes of it?

A: Byproduct is good way of putting it. Remember, all there is is lessons.

Q: (L) The attack was more internal in terms of doubt, not only of the channel and the information, but of the very foundations of existence. I mean, the realization that we may not be at the top of the food chain was shattering. (T) That snowballed on its own once the initial conflict was established. (J) Maybe the way to look at it is: yes, we went through all this crap, and you and Frank went through all this anguish, but maybe one good thing that came out of it, and maybe wasn't intended, was the fact that yes, we were able to see that there is a channel separate and distinct from all of us. It is not dependent on any one of us to be present. Yes, we do need to have all of us together for optimum contact...

A: All are able to channel, but practice is required to establish the same extent of grooving but be aware of ramifications!

Q: (L) What ramifications?

A: Observe Frank.

Q: (T) We are observing you. (J) Yeah. And? (F) I think what they mean is, when you can channel as I can, because I channel almost continuously, this has a good side and a bad side. Now, the good side you know. The bad side you don't know. The bad side is very hard to live with. I cannot even describe the state of my mind. (L) I would like to have practical advice and guidance on what we can do to fend off or prevent psychic attack. We know that knowledge and awareness is important, but any words of wisdom or advance things that can be given would be appreciated.

A: Daily prayer helps.

Q: (L) Something else came up here a couple of days ago, right out of the blue: after not having heard anything from her for months and months, V__ gave me a call and wanted to stop by with a poem for me to read. What she told me that one of the reasons

she dropped out of the group was that she had been under such massive attack. She believes that the attack came because she had been participating and working on the board and that this brought on the attachment, or something, and that what we are doing is “questionable.” Now, during the time we had not been hearing from her, she called the Reverend at the Metaphysical Church who caused me so much trouble before, to ask for her help and advice, and then she contacted the woman “Vanessa” whom we had asked about before. Vanessa, apparently, did a release for V__. Could you tell us what was afflicting V__?

A: Open.

Q: (L) Whatever it was, did it come by her association with us and this work?

A: No.

Q: (L) Did she have an attachment?

A: Has from times past and time to time.

Q: (L) Does it come and go with her?

A: Can.

Q: (L) Did Vanessa help her in releasing her attachment?

A: Open.

Q: (L) What was V__’s agenda in suddenly dumping this in my lap?

A: Wants to reestablish contact.

Q: (J) Contact with Laura or the channel?

A: Both.

Q: (J) Does she want back into the group?

A: Close.

Q: (L) Is there anything you wish to tell us before we shut down for the night?

A: Reread information given about attack warning and discuss amongst yourselves for strengthening of learning and knowledge base for purposes of protection and ultimately, survival!! Goodnight.

END OF SESSION

3.19 April 18, 1995

Frank and Laura

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Tikloria.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Have you been listening to our tape from Thor Templar?

A: Yes.

Q: (L) Do you have any rebuttal to make to his accusations of irrelevance?

A: Is rebuttal necessary?

Q: (L) Well, no, not for me, and, quite frankly, I don't think I will respond to him so it doesn't really matter. Is it alright if we ask

some questions about the situation that has transpired here over the last month or so?

A: Yes.

Q: (L) Okay, is there anyway I can access the information I need because we need to make some kind of assessment of what occurred here.

A: Open.

Q: (L) Have we ever had a person in our group or in our room here, who was sent here deliberately to break up our interaction?

A: If so, that is for you to discover for purposes of learning and growth.

Q: (L) Is that part of what has been taking place here?

A: Good chance.

Q: (L) Well, that is getting close.

A: Remember one can be manipulated by another.

Q: (L) In this case, who was the one being manipulated?

A: We mean that one can appear to be an “agent” when in actuality, control is originating elsewhere, this is especially true when the apparent “agent” is one of a good and simple and seemingly stable nature.

Q: (L) Okay, you are saying the control could be originating elsewhere. Is that correct?

A: Yes.

Q: (L) Would that control be third density or fourth density?

A: Either, or elements of both.

Q: (L) In this particular case, I would much prefer to think that someone was being used or manipulated by other forces. But, in that case, that could be a loose cannon, so to speak. Am I correct?

A: Up to your discretion.

Q: (L) Can we identify the source of control in this particular case?

A: We mentioned discovery and learning earlier.

Q: (L) So, we have to figure this one out?

A: Will benefit you greatly in “future” to do so.

Q: (F) Why is that?

A: In order to recognize “symptoms,” which may be common occurrence.

Q: (L) In this case, we have discussed it, and it seems that it has already become a common occurrence. Persons come in and are all excited and they put in energy or money or whatever, and they are all gung-ho, and then they become a disruption.

A: Yes. You are already learning.

Q: (L) Recently V__ came to visit and said that she had an episode with an attachment. Did she have an attachment from this work?

A: No. Hormonal fluctuations.

Q: (L) She called V__ and V__ did a cleansing on her. Did this help her with her hormonal fluctuations?

A: No.

Q: (L) A few weeks ago I did a hypnosis session with my son. In this hypnosis session, he seemed to go back through a memory of flying a plane, an EC 135, I believe. He seemed to go through

the crash and so forth. Was this a fairly accurate recall on his part?

A: Yes.

Q: (L) The most interesting part of the session was when he described smelling something strange in the hold of the plane, that the cargo smelled strange. Was this an accurate memory?

A: Yes.

Q: (L) When I asked him what it smelled like, he said it smelled garbagy or something really horrible like sewage. Was that a correct memory?

A: Close.

Q: (L) When I asked him if he knew what it was at a higher level, he said that it had something to do with aliens. Was that correct?

A: Yes.

Q: (L) Was he, in fact, transporting something having to do with alien-human interactions?

A: Yes.

Q: (L) Then, something happened as he was flying along, he seemed to be flying over the same spot twice and it startled him. Did this, in fact, happen?

A: Yes.

Q: (L) And it seems, after he was flying over the same spot the second time, that he said the smell was gone, the cargo was gone. Did this, in fact, happen?

A: Yes.

Q: (L) Was his plane, himself, and his co-pilot abducted in flight by aliens?

A: Yes.

Q: (L) Were they then shot down deliberately by the United States Government?

A: Open.

Q: (L) Was his memory of the actual situation, as he was shot down, fairly accurate?

A: Yes.

Q: (L) Does he need more work on this issue to clear it?

A: Yes.

Q: (L) Should I take him through the same thing over again more than one time?

A: Yes.

Q: (L) Okay, the other night we were talking about the episode when I was three or four years old and saw the face at the window that said to me: “No matter where you go you cannot hide. When the time comes, we will find you.” When I had that experience, who or what did I see at the window?

A: Gray.

Q: (L) And what was the message, exactly?

A: Just as given.

Q: (L) What is it that they were trying to convey to me? Is it that, in point of fact, that they are going to find me or do something to me or with me at some point in the future?

A: Not yet able to inform.

Q: (L) You are not yet able to give me this information?

A: Yes.

Q: (L) Why is this?

A: No.

Q: (L) When I was with Dr. Zanghi who was doing {trying} a hypnotic regression with me, he asked why I was being abducted. At that moment, in response to that question, a scene appeared to me of a sort of Greek Temple with a lot of “patriarch” types in long robes and wearing beards, who were teaching me and then sending me out to do something. What was this memory?

A: Not yet, Laura!

Q: (L) Well, that sounds foreboding. That sounds scary to me that you can’t tell me? Is this something I should be frightened about?

A: No.

Q: (L) Is this something that I am supposed to do that I can’t yet know?

A: Close.

Q: (L) Now, obviously, in my opinion, and this is just my opinion, there is some sort of destiny where Frank and I are concerned. Is this correct?

A: Most likely.

Q: (F) That sounds like a cross between a “yes” and an “open.” (L) Is it true, as we have surmised, that ever since our meeting, person after person has been sent in to attempt to disrupt our relationship. Is this correct?

A: Maybe.

Q: (F) I think we can read that in the direction of a yes. (L) Can I ask at what point in time this interaction will be fully activated?

A: Open.

Q: (L) Ahhh. They are trickier than I am. Was I correct in the flash of insight I had the other night that nearly caused a coronary, of seeing the skies opening and all sorts of beings just pouring into our reality?

A: Yes. But is it prophecy, or current reality?

Q: (L) Oh, god!

(F) Well, the thought I was having just a couple of days ago, (is that when you had this?) okay, the thought I was having was along very similar lines. It is that everything is happening right now, it is just our perception of it that is lagging behind. Instead of what we have always thought, that one day the veil would be ripped open because of some cosmic event, it just may be that the veil is being opened individual by individual. Then one day it will be the last group that doesn't know anything and then it will fly open. What is really happening is not that the UFOs will someday be invading, it is just that because of some perception, we do not see that it is happening now. Karla Turner described it as the "End of the World," and for her and her family, it was.

A: Yes. Goodnight.

END OF SESSION

3.20 April 22, 1995

Frank, Laura, Terry and Jan.

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Lioa.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) We have a couple of personal questions for the Konicovs. Are you willing to answer those questions for them?

A: Konikovs prone to vendetta.

Q: (L) They are prone to do vendetta's themselves?

A: Open.

Q: (L) Are they the object of some sort of vendetta?

A: All inclusive.

Q: (T) All inclusive of what?

A: Mindset.

Q: (J) Are they paranoid?

A: Okay.

Q: (L) Well, they have four names. Can I give the names and you give a response to each name? These are people they have been associated with and they would like to know...

A: We do not wish to be used for personal life direction by those who take an outwardly orientation. We have given answers for these people before, and you do not know what they have done with information.

Q: (L) V__ wanted to ask if the Naropa Institute in Boulder would be a good place for her to go to school?

A: More on previous subject: Suggest tread softly and use diplomacy, not what Terry suggested!

Q: (L) Yes, we don't want to tick them off. (J) Well, I don't like to lie. (L) Well, there are lies that are okay lies and there are lies that are hurt lies...

A: Yes. After further "online" connection with Konikovs, will communicate helpful information.

Q: (L) Do you want me to get them on the phone?

A: That was in "quotes."

Q: (L) V__ and I talked about points of entry of discarnates. I remember that Jan talked about something getting her on the back of the neck as she was sitting at the computer. I would like to know if there is any common entry point for these kinds of connections?

A: No.

Q: Can it occur at any place?

A: Yes.

Q: (L) Is the back of the neck a common place?

A: Common?

Q: (J) Do they find your physical weak spots and enter there?

A: Physical is not issue.

Q: (L) So, they find your auric weak spots?

A: Close.

Q: (L) Are your auric weak spots sometimes reflected in your physical?

A: All is possible.

Q: (L) During the time that we all had the pains in our shoulders, was this a psychic attack?

A: Maybe.

Q: (L) Well, you said that this was evidence of DNA changes. Was it that?

A: How does one learn?

Q: (L) Since we are not equipped to examine genetic material and find out about DNA changes, we are kind of relying on you to tell us when DNA changing is going on. You indicated at the time that this was DNA changes.

A: Network.

Q: (L) Is there anything going on with this heating up process, this feeling of being hot?

A: Paranoia will destroy ya.

Q: (L) Well, I'm not being paranoid. In seriousness, is there anything going on with vibrational changes. Is this heat a reflection of this?

A: In seriousness, no.

Q: (T) When we do the channeling and Reiki does that generate body heat?

A: Higher energy.

Q: (T) Does that translate into heat?

A: Yes in third density.

Q: (L) When I was reading our little bit about Oak Island the other day, I noticed that we never followed up on certain things. Could

we ask on that now?

A: Yes.

Q: (L) Okay, you said at that time that a Transdimensional Atomic Remolecularizer was buried at Oak Island. Is that correct?

A: Yes.

Q: (L) Who buried it there?

A: Learn.

Q: (L) Well, we are getting ready to learn because you are going to teach us, is that correct?

A: You already have tools.

Q: (L) What do you mean we already have tools?

A: We are trying to teach you to use your most precious commodity.

Q: (L) And that is, of course, our minds?

A: You betcha!

Q: (L) Speaking of precious commodities, since my accident, my brain has been doing some very strange things. When I write, I transpose letters. I get blank spots. I have been doing some other very strange things, playing with seeing if I know something and then discovering that I do. It is really kind of strange and I wonder if that accident had anything to do with these strange happenings?

A: Yes.

Q: (L) So, when I hit my head, I really hit my head! (J) Scrambled your brains.

A: Not issue.

Q: (L) What is the issue? Can you tell me exactly what it did to my head?

A: Not issue.

Q: (L) What is the issue? (J) We were talking about learning. (L) Did this event do something to help me learn in a different way?

A: Yes.

Q: (L) Then, I shouldn't worry about it. (T) Now you have to learn to work with it. (J) Let's not get sidetracked. (L) Let's go back to Oak Island. Okay. What I read about Oak Island was that there were legends of lights being seen there prior to 1703.

A: Yes.

Q: (L) Prior to 1703 would put the burial of whatever is there at least prior to that time, correct?

A: Yes.

Q: (L) Were those lights the lights of craft of other beings other than the natives of this planet?

A: Electromagnetic profile.

Q: (L) What was noticed when the kids arrived on the Island was that a limb was sawed off of a tree over the depression and there were marks of a rope and pulleys having been utilized. (T) If something more advanced dug the pit, they wouldn't have used chain hoists and pulleys. (L) That is what I am getting at. So, if there was evidence of this kind of stuff on the tree, it would seem to indicate that somebody had been doing something there who was a little more human or limited in their technology, is that correct?

A: Yes.

Q: (L) Now, my thought is that, it is beyond human technology to have produced that pit at that point in history?

A: Beyond known technology.

Q: (L) And yet humans may have been involved in that activity?

A: Bingo.

Q: (J) Think back to when we were talking about it and you mentioned the lights.

A: Some humans have always communed with “higher” powers.

Q: (L) So, humans may have actually... (J) Like those little kids that broke into those houses and did all that damage. They could have done it themselves, but they had to be directed to do it. I think it is a good analogy.

A: Not good analogy, we are speaking of conscious communion in this and other and instances.

Q: (L) Okay, there was conscious communion between humans and other powers in the building of this pit. What group of humans was this?

A: It's fun learn.

Q: (J) How about pirates? (L) Well, who was in this area? Eskimos?

A: No.

Q: (L) Indians?

A: Keep going, network.

Q: (L) There was the French and the English. How about the Vikings? (F) No, the Vikings were 600 years before that. (T) Well,

we don't know how long ago the pit was dug. (J) I'm still... yeah, good question. (L) When was the pit dug?

A: 1500s. Nationality is not issue.

Q: (T) Well, this pit was dug sometime in the middle of the 1500s. (J) And it was discovered in the 1700s.

A: Access sect information.

Q: (L) So, it could have been a religious group.

A: Now, who claimed communion, Laura has in memory banks from absorption of mass reading practice.

Q: (F) Was there a sect from that era that claimed communion?

A: Yes.

Q: (L) I think that this may have had something to do with the people that later became known as the Cajuns, a French religious sect that was living there...

A: Maybe.

Q: (L) Now, this article says that it would have taken a hundred men working every day for six months to have built this pit...

A: No.

Q: (L) The article also says that it must have been dug in 1780...

A: No.

Q: (L) When they drilled into the pit, some bits of gold came up and a piece of parchment and maybe some other odds and ends. What were these?

A: Alchemy.

Q: (T) The remolecularizer made it. (L) Why not? If these people were involved in doing this, why did they do it?

A: Instructed to do it.

Q: (L) They were instructed by the higher powers they were in contact with, correct?

A: Yes.

Q: (L) What did they intend to do with it once it was there? Did someone intend to come back for it at some point in time?

A: No.

Q: (J) Maybe it was a lesson. (T) Is it buried there in that location for a specific reason?

A: Sure.

Q: (L) Does it do something? (T) Does the location itself have something to do with the purpose of it?

A: Magnetic.

Q: (T) Are there other ones buried on the planet?

A: Yes.

Q: (T) Are they aligned to each other on the planet in some kind of geometric pattern?

A: Maybe.

Q: (T) Do they all work together?

A: Maybe.

Q: (T) Oh, we're getting too close now, they don't want to tell us. (J) Can you tell us where some of the other ones are?

A: Use mind, that is what it is there for.

Q: (T) We are using our minds. And, we are talking to you about this. We are friendly.

A: Shortcut city.

Q: (T) Yeah! That's what it is all about. We are still third density! If we use...

A: It's not nice to fool Mother Cassiopaea!

Q: {Laughter} (T) Mirth! If we were to follow the coordinates where this thing is buried, would it lead us to others?

A: Try it and see. When L__ said he wanted to hunt for buried treasure, do you think he had this in mind?

Q: (T) Is there a remolecularizer under us?

A: No.

Q: (L) Okay. I want to get back to the function of this thing. You say it is buried not to be dug up. It is actually buried to stay there? Is that correct?

A: Yes.

Q: (L) Then that explains a lot of things about the way it was buried. There was found, at a certain level, a rock with carving on it. It was destroyed through carelessness. I am curious as to what this said. Can you access this and tell us what it said?

A: Measure marker.

Q: (J) Could it be possible that this device was somehow related to the crystal pyramid of Atlantis?

A: In a small sense.

Q: (J) Did the pyramid have anything to do with powering this device?

A: Yes.

Q: (J) It is obvious that the device was buried long after the pyramid was there, but it may have tapped into the power. (L) Is this device continuously operational?

A: No.

Q: (L) What stimulates it to go into operation? That is, assuming it does.

A: Magnetic anomalies.

Q: (J) Is it affected by earthquakes?

A: Can be.

Q: (L) Are these magnetic anomalies ones that occur naturally on the planet?

A: Both.

Q: (L) So, they can occur naturally on the planet or they can be generated or stimulated by some other source?

A: Yes.

Q: (L) When this machine is activated, what happens?

A: Too vague.

Q: (J) Is this device a doorway for entry into this dimension?

A: Can be used as such.

Q: (J) Is it possibly a lock on a doorway into this dimension?

A: No.

Q: (J) Is it a focal point for entry into this dimension?

A: No.

Q: (T) Is it a stand-alone machine or is it to be used in conjunction with others?

A: Either.

Q: (J) Oh. So, they are networked together and if it is a small job, one can do it but if it is a big job they can all activate. **(T)** Do each of them cover a certain area of the planet?

A: No.

Q: (T) You said that they don't have to all work at the same time; they can work independently of each other? Are they positioned in such a way if something small happens only a couple of them kick in, but if something large happens, as many as necessary?

A: Okay.

Q: (T) Were they placed here to keep the planet stable in some sense?

A: Vague.

Q: (L) Who owns it?

A: Owns?

Q: (L) Who built it?

A: Answer for yourself, and enough, already on this subject!!!!

Q: (J) I think I just heard a door slam! **(L)** I want to go to the terrorist bomb attack that just happened. Can we talk about this?

A: You can always ask any and all questions, no need ask for permission, if unanswerable for any reason, we will let you know.

Q: (L) Okay. We received a prediction on this terrorist bomb attack on February 25th, at which time you said there would be a terrorist bomb attack in Washington D.C. within a month or

thereabouts, which was related to an ongoing trial which was identified as the one of the Moslem terrorists who bombed the Twin Towers. Can you tell us if this is the bomb that was supposed to be set off in Washington, but was then moved to Oklahoma because of security intensification?

A: No.

Q: (L) Well, no terrorist bomb attack took place in Washington. Can you tell us why?

A: Yet.

Q: (L) It is yet to happen?

A: Open.

Q: (L) The bomb in Oklahoma is being connected to the Patriot movement. Is this, in point of fact, who is behind this attack?

A: There is no unified movement as such, in either purpose or direction. This is extremely fragmented!

Q: (J) I read that it may be related to the Branch Davidians. (L) Is that true?

A: No.

Q: (J) Loose cannons? (T) Are the one world government people behind it?

A: No.

Q: (L) Were the guys who did this just loose cannons?

A: Close.

Q: (L) So this was just... (J) A couple of fruitcakes got together and... (L) Fruited?

A: It is very easy to be manipulated, thus be confused and see demons where there are none and the opposite.

Q: (L) Are you saying that these guys were manipulated?

A: Yes.

Q: (L) Can you identify the source of the manipulation?

A: Varied.

Q: (L) Can you give us a couple of hints, here. Name one of the sources of the manipulation?

A: Lizard race.

Q: (T) Name another.

A: All their agents conscious and otherwise.

Q: (L) Can you tell us who are some of the human Lizard agents?
(LM) Organizationally. (L) We won't tell!

A: All humans are at one "time" or another.

Q: (L) Yes. Nobody is immune to this manipulation. And that brings me back to the subject of the phone call from S__ the other day. I would like to know what was the motivation behind that phone call?

A: Dumping excess stuff.

Q: (L) It wasn't in the nature of a fishing expedition? (J) Or an attempt at reconciliation?

A: Maybe.

Q: (T) Well, that would be some of her excess stuff. (L) Do you mean excess stuff in terms of her emotions or whatever?

A: Answers are easier when questions are pin pointed.

Q: (L) Did she call for reconciliation?

A: Unconsciously, maybe.

Q: (L) Did she call because that bunch at the Metaphysical Church put her up to it?

A: Ditto.

Q: (L) Is she still connected to M__ F__?

A: Barely.

Q: (L) Well, it doesn't matter. Why have the roaches been so crazy in the last week or so. They have really been outrageous.

A: Electromagnetism.

Q: (L) What is the source of this Electromagnetism?

A: EM field disturbance.

Q: (T) What has disturbed the field?

A: Seismic.

Q: (L) Where is it going to "seat."

A: Open.

Q: (L) Well, I think something is going to happen because every time I have seen the roaches act this way, something has happened. Earthquakes, hurricanes, planes crashing and so forth. What is the size and locus of it at this point?

A: Moving continuously.

Q: (L) Is this a fairly large disturbance?

A: Yes.

Q: (T) Where was it before it came here?

A: Circling earth at 6500 r.p.m.

Q: (L) Per minute?

A: Yes.

Q: (LM) Is this subterranean or atmospheric?

A: Both.

Q: (L) What is the source of this EM disturbance?

A: Too complicated.

Q: (J) I hate it when they say that! (LM) How about in a nutshell? Is it a natural occurrence or is it being generated from other dimensions?

A: Natural.

Q: (L) Is it from some activity within the planet itself, or the planet's reaction to cosmic waves?

A: In and around.

Q: (J) Is this a normal occurrence?

A: No.

Q: (J) Has this happened before?

A: Yes.

Q: (J) When?

A: Four months ago.

Q: (L) What happened four months ago?

A: Access memory.

Q: (T) Well, the Japanese earthquake happened four months ago. (L) Is this what you are referring to?

A: Yes.

Q: (LM) Is it most likely to hit a fault again?

A: Open.

Q: (T) Is this going to show up as an earth change of some kind?

A: Yes.

Q: (L) Can you give us a prediction on it?

A: Open.

Q: (T) This has been going on for a while, now. (L) About ten days I think. (J) Is ten days accurate?

A: Close.

Q: (T) What is the general time period to play itself out?

A: Open.

Q: (T) Is it going to center on Laura's house? {Laughter}

A: Open. If so, suggest "vacation."

Q: {Laughter} (J) Any suggestions as to where they should go? (LM) Los Angeles. (T) That's a good spot for the summer Olympics! I hear the U.S. Team has a real good chance of getting gold and breaking windows this year. (L) Once again, I will ask for V__ if the Naropa institute is a good environment for her to continue her studies?

A: If she chooses.

Q: (L) My mother wants to know what are the ramifications of cremation. She has read some things on the subject and she is a little concerned about it. (T) They don't do it until after you're dead.

A: None.

Q: (L) So, it's okay to cremate the body and...

A: Body is third density not fifth density.

Q: (L) The reason she is concerned is because she read a book that says it takes a while for the soul to completely separate from the body and that there is a "cellular" consciousness that might experience pain for some time after death at least until every little cell dies individually. Is any of this true?

A: No. When the soul leaves, it leaves instantly. There is no body consciousness that remains and dies "slowly." Once dead, dead.

Q: (T) The only pain it causes is to those selling cemetery lots and exorbitant funerals who hope that the cremation trend does not continue! (F) If people continue to be buried, aren't we going to run out of space? (T) Some places are recycling the graveyards! I want to be cremated. (LM) Let's go outside! (T) Not right now! Not 'til I'm dead, L__. Then it won't hurt! {Laughter} (J) Ah, get some gasoline and come on outside! (LM) I was just kidding! {Laughter} (T) Yes, we had our kitty, Mr. Scott cremated and when I die I want to be cremated and I want Mr. Scott's remains poured in with me so I will have my kitty with me and Mr. Scott won't be alone. (L) That is very touching, Terry. A little sick, but touching. (LM) Why don't you grow some tomatoes and fertilize them with Mr. Scott and then you'll have him with you. (T) But, what goes in, must come out! And then he'd be gone!

{Break}

Q: (T) A few sessions back you used the term "take." What did this mean?

A: "Take" means what ever it is associated with.

Q: (J) I watched a couple of programs last night on television. One

of them was about a man who was struck by lightning about 20 years ago and this strike greatly increased his psychic abilities. I was wondering if that is a normal by-product of being struck by lightning?

A: Yes.

Q: (T) Do the enhanced psychic abilities remain or decline after a while?

A: Stays.

Q: (L) Did my blow to the head in the wreck I was in last December increase my psychic abilities?

A: Maybe.

Q: (J) We were watching a program about the pyramids in Egypt and they were saying that there was nothing magical or unusual about how the formula was arrived at by which the pyramids were built. Originally they were trying to measure it with tapes that stretched and are inaccurate. So, they decided that they used a measuring wheel which would have enabled them to do it without any great mathematical computation. Is that correct?

A: No.

Q: (L) You knew that. (T) Is this why pi appears in the mathematics of the pyramid?

A: Take means subject. I.E. a different “take” on the subject.

Q: (J) So, we should take a different tack on a subject. (LM) Well all the textbooks show a hundred thousand slaves rolling blocks on logs to build the pyramids. (L) It was done with sound wave focusing.

A: Textbooks are propaganda.

Q: (T) Was it built the same way the Coral Castle was built?

A: Close.

Q: (L) I want my husband to get me a bucket seat and suspend it from the tree so that I spin in it. If I do this, will I develop strange abilities?

A: Yes, dizziness.

Q: (L) Did the guy who built the Coral Castle sit in his airplane seat suspended from the ceiling and spin in it?

A: Open.

Q: (L) Was the airplane seat suspended from the ceiling in his room part of how he did his work?

A: If you spin, it must be a precise method, not just spinning randomly.

Q: (L) Did he discover a precise method for spinning to do such things?

A: Open.

Q: (T) So many turns and precise direction? (L) Can we follow up on this? Is there something on this moving things with sound that you can tell us? (J) What about a precise method for spinning?

A: Suggest experimentation.

Q: (L) What is wrong with my ear?

A: Vague.

Q: (L) Something is wrong with my ear. (J) Describe it. (L) No, it's too gross. (J) Do it.

A: Fatty tissue.

Q: (L) That can't be it! My ear is developing and exuding black tarry stuff. I think it is blood and ear wax mixed.

A: No. Fatty tissue.

Q: (L) Why is it doing this?

A: Inner ear.

Q: (T) Is there something wrong with Laura's inner ear?

A: Not to worry about.

Q: (L) Have I been doing the right thing by using the peroxide, alcohol and vinegar?

A: Okay but easy does it.

Q: (L) Well, it's only the one ear. The other ear is fine. (T) Can you hear okay? (L) Yes. (J) Some people have real active wax production. (L) But it is only one ear. And it is the ear I use the most.

A: Worry not.

Q: (T) Easy for them to say, they don't have ears. (L) Okay, a quick one here: am I going to get my {insurance} settlement soon?

A: Open. Wait and see.

Q: (L) Yeah, but I am broke right now.

A: Have been before, and you survived.

Q: (L) I am so broke I can't even buy food.

A: Will not last long.

Q: (L) Well, I have a lot of things I need to do. How am I going to pay for the conference, for example?

A: Faith. Time to say goodnight.

Q: Goodnight.

END OF SESSION

3.21 April 29, 1995

Frank, Laura, Terry and Jan

Q: (L) Hello. Good evening.

A: Hello, good evening!

Q: (L) Who do we have with us?

A: Toria.

Q: (L) And where are you from, Toria?

A: Cassiopaea.

Q: (L) Well, we were a little late getting started tonight and I expect you have been waiting. The energy has been generating in the room.

A: Terry, was it October, 1964?

Q: (L) To what does this question refer?

A: Ask Terry! Lake, yellow brick and brown brick buildings, cool day, fences, large cobalt colored cylinder, oscillating...

Q: (T) I would have been 14. (L) I bet they are talking about an abduction... (T) I was a freshman... my father's cousin had a place at Kuka lake and we used to go there and visit all the time... fences? I don't remember anything. I'm sorry. I'm drawing a blank.

A: Images we see...

Q: (L) Do these images relate to an event that occurred in Terry's life?

A: Ask... Now we see Victorian houses, green gabled roof... field... brown brick buildings...

Q: (L) Is this significant? We have a number of questions to get to...

A: Just "go with the flow." Directing "traffic" may restrict...

Q: (T) October?

A: We asked you.

Q: (T) Were there other people who saw this also?

A: Yes.

Q: (T) My mother?

A: Mother, brother.

Q: (T) Were there any neighbors who saw this?

A: Yes.

Q: (T) Did my father see it?

A: ?

Q: (T) Dark blue? (J) Cobalt blue. (T) Dark blue, almost a black color? (J) Cobalt is a bright blue.

A: Cobalt is metallic navy blue.

Q: (T) Well, Glenn wasn't home...

A: Another locus.

Q: (T) I know what you are talking about! Yes, I did see something. I don't know if it was in October of 1964, but I remember seeing

it!

A: Okay, now we are getting somewhere... what do you think happened to you that day?

Q: (T) I don't remember anything happening other than that I saw the object; it came floating over the house and then floated off in the other direction. I don't remember anything else happening. I stood outside watched it come, watched it go; and I stood outside and watched it for quite some time.

A: Neighborhood, what appearance?

Q: (T) It looked just like the neighborhood. It didn't seem any different. I don't remember...

A: Describe...

Q: (T) There was a fifties development out on the edge of the city limits of Rochester, surrounded by most of Kodak, out in that area, most of Rochester, across the street was a field with a schoolyard surrounded by a fence. A large, two-story brown school building, brown, or red brick... that I went to grammar school in. I don't know about yellow brick buildings, but our house was green at the time and the next door neighbor's house was yellow at the time with white fancy little trim stuff across the roof. (L) Victorian. (T) It wasn't gabled, but it looked gabled. There were little gables over the front doors of most of the houses. The doors came out to the front and there was a little peak. (J) Almost like a little porch... (Terry to Jan) You were in the house, you saw what it looked like? (J) Yes. (T) There was a stadium on the other side of the school yard, a ways back for Aquinas football games, their stadium. Some fields and one of the last remaining wooded areas that was in the city limits that wasn't a park down the street... a set of railroad tracks about five blocks to the East. The lake, lake Ontario, Rochester is right up against

it, we were about seven miles, eight miles from there, maybe ten, I used to ride up there on my bike and back... the neighborhood itself didn't look any different because I watched the thing come in over the field. I remember my mother, I don't know if my brother was there, but I remember my mother and my neighbor. The neighbor woman was standing out on the front walk talking and they called me because I was in the house watching tv. I don't know if it was October though because it was still warm, sunny. It came in from high over the West, over a field, by the stadium, came down toward us, came right toward us. I thought it was moving right at us. It didn't start moving right at us until we were looking at it...

A: Was.

Q: (T) Yes. Was moving toward us. It seemed to change direction when I came out and started looking at it. It went right over and...

A: Objective was you.

Q: (T) The objective was me? I don't think I was picked up at that time.

A: Oh yeah?

Q: (T) Well there were people standing there... (L) Doesn't matter.

A: Time "freezes" during abduction.

Q: (T) The object had the distinctive falling leaf motion to it which I thought was an extremely odd thing for it to do. It came right over the edge of the house on the side of the house, where, sometime in the future, I had that thing happen to me when I was in the basement. It was right over where I would have been sleeping...

A: Oscillating.

Q: (T) I thought it sure looked metallic and I wished I had a little pellet gun and could pop a pellet at it; it wasn't more than about 50 feet up in the air. It was maybe 10 to 15 feet long and maybe about 3 or 4 feet around. It looked like a weiner rounded on both ends but not as fat; it was longer and thinner. (F) It looked like a hotdog? (T) It looked metallic to me. It was smooth, perfectly smooth. (L) What are we getting to here? This was obviously brought up for a reason. If Terry was abducted...

A: Crossroads.

Q: (L) It was a crossroads in Terry's life?

A: And now... connection completed.

Q: (T) I'm not following this...

A: Access your recent dreams.

Q: (L) That was a crossroads then and that connection is completed now... (T) Recent dreams... I dreamed something about moving into a building and I had something that had a power cord or something that went outside... a connection of some kind... (L) Is this the dream we are talking about here?

A: Ask Terry.

Q: (T) I don't remember them... they are just very vivid. Could something have happened to me just recently that started with that experience?

A: Yes.

Q: (T) It has to do with what we are doing here, but this isn't the completed connection we are talking about?

A: Not exactly.

Q: (T) The connection that was completed was all about something else?

A: Interrelated.

Q: (T) Did something happen to me just recently?

A: Yes.

Q: (T) Something I am not aware of?

A: No.

Q: (T) Does it have to do with my job?

A: In part.

Q: (T) Does it have to do with the fact that I am saying certain things to people at work, or wherever I can, when I talk about events that are happening these days and trying to raise their level of thinking on these things?

A: Yes, now, let's explore your friends and relationships and experiences in the years immediately following the event to see if we can "dig up" something of startling significance!!!

Q: (T) Are we sure this is 1964 and not 1974?

A: Terry, you know better!

Q: (T) I'm just asking because that event and the event that happened in winter with the voices outside the window and all the weirdness that happened that night seemed to be a lot closer together and that other event happened in the 70s, sometime. That was somewhere close to my trip out to Arizona and the weirdness out there with the car and all that. (L) Is that what you guys are talking about, the trip to Arizona and the voices and all that?

A: Oh, there is sooooo much, isn't there Terry! It is time to divulge.

Q: (L) Okay, Terry, we're waiting. What happened in the year 1964 and the year following? (T) In the year following I was 15. (L) Who were your friends and what kind of relationships did you have? What were you doing? (Susan) How did you feel about everybody after this event? (T) In a way, but it was not immediate. After high school. But, in those days I was mainly hanging out with some people I met over at Edison. Tom ___, a lot of people named Tom. I used to go to the lake and take drives around it at night. We just used up gas. I felt comfortable because I did a lot of things but most of the people I knew didn't get along with each other. I still do this today, I have learned from hard experience that I can't mix my friends. I learned at that time that every person in any group that had a counterpart in any other group. Groups may be different, but they all have the same make-up, and I was always "my" person in each of a number of groups. There was nobody in any of the groups I hung out with that was like me; I was that individual for several groups. (L) Is this the issue here?

A: No.

Q: (T) Does it have to do with when I got my driver's license and we all used to drive around a lot out in the country? We drove all through the lakes area...

A: Some.

Q: (T) We used to drive all through the hills out there at night... long drives. (L) Did something happen on one of these drives?

A: Maybe 0...

Q: (T) Maybe nothing. (L) What is the objective of this particular line? (T) Does this have something to do with that bizarre town I came across one night and never was able to find again? Is that tied in here somehow?

A: Yes.

Q: (T) Strangest town I have ever seen. Talk about David Lynch!
(J) Divulge. (T) I was driving down through southwest New York one night. I was out of high school. I used to get stoned then too, so a lot of my experiences aren't dependable because I got stoned. I went through a town one night down there in the Southern Tier, in the Finger lakes area, and it was the strangest thing. I have been through all these little towns, and there's usually people and stuff. Not a lot, but at least somebody around. It was about nine or ten o'clock, and I went through this town; it was two story buildings built right up to this 2 lane main street, with a little narrow sidewalk, and it was like driving into a canyon, and the buildings went straight up into the air. There was a street light every so far, but they were those little yellowish bulbs that don't cast much light on the street. There was absolutely nobody out there. There was nobody in any of the buildings, they were all boarded up and shut down. It looked like a town but it didn't look like a town. It went about four blocks. I came back out of it, turned around and drove through it again because I didn't believe it. I could never find it again, and I didn't know the name of it.

A: Discover.

Q: (Susan) It was the Twilight Zone... (T) Was this town...

A: Yes.

Q: (L) You drove into another reality. (T) It wasn't really a town, was it?

A: Nope.

Q: (T) It gave me the willies. And, I turned around and drove through it a second time because I didn't believe it was there. (Susan) Were you by yourself? (T) Yes, I was all alone. There was

nobody out there. One signal light that looked like it was out of the 1920s; old street lamps... like a ghost town, literally. (L) What are you guys trying to tell us here about Terry, through Terry? We are big kids now, we can take it.

A: Not the issue.

Q: (L) What is the issue?

A: Learning increases power.

Q: (L) Okay, what are we trying to learn here in this walk down memory lane?

A: How many times do you learn when led by the hand, network!

[Break to discuss Terry's experiences.]

Q: (L) Are we getting anywhere?

A: It's all interrelated.

Q: (L) It is interrelated with what. What event that just occurred... has it been our period of attack?

A: No.

Q: (L) The event that just occurred is private to Terry and happened in his life only?

A: Yes.

Q: (T) Each of my relationships was with an individual who thought for themselves, they understood things, they had their own experiences that were different from most people, and knew that most people could not relate or understand. It doesn't have to be abduction experiences, but they have had life experiences...

A: Yes, but that is the sign of something more significant.

Q: (L) So, in other words, the fact that Terry... (T) Is it that these relationships formed and shaped who I am today because these people and I shared these different things with each other?

A: No.

Q: (L) No, I think it is the fact that you were able to form friendships with these people of all different kinds, that that was the sign of something significant. The thing that flashed through my mind is: are you a messenger, are you a catalyst?

A: No.

Q: (L) Did he have something or did he do something in his interactions with these people that caused...

A: No.

Q: (L) Did any of them do something where he was concerned?

A: No.

Q: (T) Is it the fact that I am able to form relationships with vastly different types of individuals?

A: All originate from same "plane."

Q: (L) In other words, he formed relationships with others like himself? And, did they all originate from the same plane, as in somewhere else?

A: Close.

Q: (L) Well, we are getting somewhere. And was this ship that he saw from that plane or place of origin?

A: No.

Q: (L) Did this ship have a lot to do with interacting with all of

these other people that Terry formed friendships and relationships with subsequent to this time?

A: Yes, but not central issue.

Q: (L) The central issue is that Terry and all of these other people that he formed relationships with... (T) Do we all share a common experience?

A: Close.

Q: (L) Do they all share a common origin?

A: Yes.

Q: (L) And what is that origin?

A: Neormm.

Q: (L) Neormm?

A: Closest English equivalent.

Q: (L) Is that a place?

A: Yes.

Q: (L) Where is it?

A: Check star guides.

Q: (T) Is this a star? All of us are from another star that I've formed relationships like that; the special ones that I would consider lasting?

A: In perpendicular reality.

Q: (T) Am I the Orion we are looking for?

A: No.

Q: (L) Is Jan one of these too?

A: No.

Q: (L) Jan! (J) What? (L) Why not? (J) I don't know! (T) I'm confused. (J) What is the significance of my relationship with Terry, then? (L) Humanize him? [Laughter.]

A: Open.

Q: (T) It's an open relationship! (J) No it's not. It's a marriage. Sorry! (T) You're the one who wanted it! We were fine for 27 years... (F) Was it that long? (T) No, it only felt that way. (L) Alright! Where are we now? We have discovered that Terry has a perpendicular reality that has been running through his life and probably is an ongoing thing, is this correct?

A: Yes.

Q: (T) What is a perpendicular reality? (L) It's a perpendicular reality! (T) Oh, well, thank you! That explains it all. (L) Well, you have side by side alternate realities, this one goes this way [gestures up and down]

A: Intersection is at realm border.

Q: (L) So, in other words, you could follow along in your mind to the realm border because you have an intersecting reality with it. Is that correct?

A: No.

Q: (L) Well, I tried. (T) It sounded good to me. I have an escape hatch!

A: They merge.

Q: (L) Okay, we have discovered the significance of the fact that Terry is part alien with a perpendicular alien reality that causes him to interact with other people who also have these perpendic-

ular realities. What's the point? (laughter) (Susan) Something to do! (J) It's a hobby.

A: "Point" is 3rd density concept, and you need "refresher" course!

Q: (T) Remedial Cassiopaeian. (L) Well, I am just trying to understand what this whole thing is all about. What are we getting at here?

A: Then learn from what we communicate to you and what you already have "locked up" inside of you i.e. time to get the key!

Q: (L) Do we have to look at our own stuff this way? (J) Does this have anything to do with the fact that Laura just spent the past day and a half...

A: Please stop trying to "push" us this way and that, and just learn freely.

Q: (L) What I think is, maybe everybody does this, right now on the planet. There are always different groups that are forming connections with other people with whom they share an alternate reality. (J) In other words, we are all being attracted to each other? (F) Right. That makes sense. (L) In which case, what alternate reality do we share or do we share no alternate reality and are each representatives of an alternate reality different from each other and are a connection point?

A: Latter concept is exactly correct!

Q: (T) We are what is common to each other in our group?

A: What did we say about increasing power?

Q: (L) So, in other words, each one of us is connected to our own reality and groups of our own realities and...

A: Read back now Jan.

Q: (L) I have heard the concept, written or talked about, that certain people, or perhaps everybody, have locked up inside themselves pockets of energy or knowledge as in electromagnetic patterning in their fields...

A: Like putting together the pieces of the puzzle.

Q: (L) We are the pieces of the puzzle? (J) Yeah, we've known that.

A: Draw on a piece of paper one perpendicular intersection.

Q: [We get paper and draw figure.] (L) Like that?

A: No, make it like an upside down "T"

Q: (L) Okay, this is it. [Draws figure] Now...

A: Use next page, and this time draw it near but not at lower left corner.

Q: (L) Is that okay?

A: That is at llc. Too close.

Q: [We try again.]

A: Make it much smaller.

Q: [We try again] (L) Is that okay?

A: Close to center.

Q: [We try again.] (L) Is that better?

A: Now, connect to another.

Q: (T) Above it or below it?

A: Make it slightly different angle.

Q: [We try.] (L) Like that?

A: Try again.

Q: [Terry tries] (T) I think I am getting what they want. (L) Is that it?

A: No.

Q: [Terry tries again]

A: Connect bases.

Q: [Terry tries again] (L) Why don't you just draw it on the board for us? [Clamps pencil next to planchette on piece of paper] Okay guys, draw! [The planchette draws the figure.]

A: Continue...

Q: (J) Is it a spiral?

A: No.

Q: [Terry draws figure which looks like polygon with perpendicular extensions to each side.] Is that the idea?

A: Now, circularize base. Now enclose with outer circle. Now, make clean copy on another page.

Q: (J) Is this a crop circle?

A: Has been done, yes. Designates union of perpendicular realities.

Q: (L) Was the town that Terry went through one of the perpendicular reality towns?

A: Close. Need seven spokes.

Q: (L) Each person in the group is a spoke?

A: Yes.

Q: (L) Are we ultimately going to have seven spokes?

A: Yes.

Q: (T) Are the five of us here, five of those spokes?

A: Open.

Q: (T) That was diplomatic, wasn't it? Is there more to this concept?

A: Of course!

Q: (L) Once the seven spokes are in place in terms of persons, is that going to increase our power/knowledge exponentially?

A: Explosively.

Q: (L) Is this why there has been so much attack and so many attempts to stop this process?

A: Partly.

Q: (T) Okay, we have the image on the paper with seven spokes. What do we do with it next?

A: Open.

Q: (T) Okay, this is just this lesson. (L) What is in the center of the circle?

A: Will fall into place, now you must ponder the significance and we must say goodnight!

END OF SESSION

3.22 May 7, 1995

Frank, Laura, Terry and Jan, SV

Q: (T) Good evening.

A: Okay.

Q: (L) Who do we have with us this evening?

A: Myip.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Okay, we have a series of questions we would like to get into this evening. Is that going to be alright? Or do you have plans already?

A: Some.

Q: (L) You have some plans or we can ask some questions?

A: Both.

Q: (L) Once again, since the thought was just stimulated by the sight of same, what is the story with the roaches in my house? Why are they coming inside in such numbers?

A: Open.

Q: (L) Well, there are all kinds of cracks and crevices for them to crawl in through, but usually, they don't.

A: Scent food.

Q: (L) They scent food and that is what they come in for?

A: One reason.

Q: (T) What's another reason?

A: Suggest electronic bug discourager.

Q: (L) You mean a bug zapper? (SV) Not the ones that zap them, just the ones that discourage them. (T) Won't that frequency interfere with the channel?

A: Silly question.

Q: (J) I didn't think so. (L) I didn't either. I mean, it's a frequency.

A: Too strong now is why.

Q: (L) Okay, let's kick into a couple of our questions here. The first one is: Who were the Sumerians?

A: Study mathematics.

Q: (L) Study mathematics? Is that the answer?

A: Yes.

Q: (L) Who should study mathematics?

A: You.

Q: (L) Is there something about mathematics that will tell me who they were?

A: Yes.

Q: (L) Well, I have read about the Sumerians, and I have read the Sitchin material...

A: We are not Sitchin!

Q: (L) How did the Sumerians produce their civilization so suddenly and completely, seemingly out of nowhere?

A: Study mathematics for all possible unanswered pieces of the puzzle!!! Interpolate and use appropriate computer program, learning now increases your power tenfold, when you use some initiative, rather than asking us for all the answers directly!!!

Q: (L) The first thing that comes to my mind is to enter in all the dates that they have given us, create a data-base, for data, not necessarily written matter, dates of comets, civilizations, archaeological dates, findings, and so forth, and see how it crunches.

Was that all the answer there? (J) I would like to have some more on crop circles.

A: Do you not want an increase in power?

Q: (L) Absolutely. Is there any underlying significance to the Great Year of 25,920 years, that is the precession of the zodiac?

A: See previous answers.

Q: (L) This is one that I don't know if mathematics will help us out with, but, what is angel hair that has been seen to fall from UFOs?

A: AKA "slag."

Q: (J) Is it byproduct of the propulsion systems?

A: And of transdimensional maneuvers.

Q: (T) That's why it dissolves and goes away. (L) Did you know that Mike F__ has some in a glassine bag that he got somewhere and is certified angel hair! (T) He also has a UFO detector in a cigarette pack!

(L) Okay. On many occasions there have been fiery falls of objects from the sky which leave a gelatinous substance which then disappears. Is there any significance to this that we would be...

A: See previous answer.

Q: (T) Same stuff as angel hair. (L) Okay, there were very unusual circumstances surrounding the so-called "Great Chicago Fire." I would like to know if there was any impetus given this fire from other dimensional forces, or was it just a natural phenomenon?

A: Vague.

Q: (L) Well, in specific, there were several people who reported what they described as literally a fiery tornado, or explosion, or

fire falling from the sky that just swept upon them so suddenly and so completely that they literally had no time to do anything except barely escape with their lives.

A: Rumours.

Q: (L) Well, there were entire little towns destroyed that weren't even next to Chicago, and it happened at the same time, supposedly.

A: Makes "good reading."

Q: (L) Who constructed the great serpent mound in Adams County, Ohio?

A: Armonan sect.

Q: (T) Who are the Armonans?

A: Atlantean descendants.

Q: (T) So, this was a long time ago?

A: (L) Is there anything about them we would be advised to know or learn?

A: "Puzzle pieces."

Q: (L) What period of time did they live in this area, from when to when?

A: See answers to Sumerian question.

Q: (L) Well, my opinion to this whole thing is that the Sumerians and the Armonans were Atlanteans who set up shop in their respective places when Atlantis went under.

A: Good, now go with that.

Q: (L) I would say that the same answer holds for the White Horse at Uffington, in England?

A: Yup.

Q: (L) Well, that takes care of that. Does someone or something, as in people, or civilizations, or a group, or organization, exist inside Mount Shasta in California?

A: No.

Q: (J) Is there any truth to the rumor of the mystical power surrounding Mount Shasta?

A: Roundabout only.

Q: (T) But, Mount Shasta, itself, doesn't have any power related to it?

A: Yes.

Q: (L) Yes, Mount Shasta, itself, but not any group or entities, is that correct?

A: Yes.

Q: (L) Is there any reason that we would want to pursue that line of questioning that we are not aware of?

A: Up to you.

Q: (L) Why is an unbearable stench of sulphur associated with Alien bodies and other related phenomena and entities?

A: Chemical interactions.

Q: (L) So, if an alien dies in 3rd density and remains in 3rd density, and decays in 3rd density, that causes a chemical reaction that creates sulphur or related compounds?

A: Bravo!

Q: (J) So, the difference in dimensions creates this? (L) Would they smell this way if they died in 4th density? (J) Well, that's a

stupid question because, what is “smell” in 4th density? (L) Well, it was a trick question!

A: Try to think more like 4th density instead of 3 and 2.

Q: (L) Does this imply, since this is what I am inferring, that the aliens are chemically constructed in 4th density?

A: Close.

Q: (L) Now, Frank and I both had strange dreams. I dreamed last Sunday that I went outside and there was a whole lot of activity in the sky. There were alien ships shooting at each other and at the ground and it was pretty scary. There were people running around and my husband abandoned me and the children because he was so freaked out by it all. A really strange dream.

A: Stay tuned!

Q: (J) Oh, goody! (L) Was this dream prophetic?

A: Open.

Q: (T) Stay tuned, as in stay tuned during the dream to see what else happens?

A: For more dreams.

Q: (L) Are these dreams giving us information?

A: Open.

Q: (T) I keep having repeating dreams about a female. Who is she?

A: See previous answer, from now on abbreviated as “SPA.”

Q: (L) Okay, now I was reading through the transcripts a while ago and it says that a Black Hole is total non-existence which is regenerated at level one. Or, that the regeneration at level one

is a reflection of a Black Hole. Is a Black Hole a level one phenomenon or a level seven phenomenon?

A: One through four only.

Q: (L) Is there any representation of the Black Hole phenomenon, that is, total non-existence, at the higher levels, that is, five through seven?

A: See previous answer.

Q: (T) Well, if the Black Hole is pure STS at level one through four, at level five through seven there is only pure STO. (SV) They said earlier that there was STS at level five and six. (T) But, that's reflection. (L) Thought form.

A: Encapsulated at five.

Q: (L) Is there, after level seven, is there another...

A: No "after seven," suggest "refresher course" of transcripts!

Q: (L) Well, the question you didn't let me finish was, is there an octave, does this step up and start the whole thing over like the octaves on a piano?

A: SPA.

Q: (L) Well, there is an awful lot of stuff being touted around about octaves and so forth.

A: Grand cycle, and who is doing the "touting" that you speak of?

Q: (L) One of the persons who talks of the octave cycle is Gurdjieff, the Sufi teachings, several of the great philosophical teachings talk about the octave effect. There is the cycle of seven and the next cycle is at a higher level and is called an octave like the segments on the musical scale.

A: Who are we?

Q: (L) The Cassiopaeans.

A: Yes, now, we have volunteered to assist you in your development, yes?

Q: (L) So, throw all that other crap out the window?

A: If there were a level eight, do you think we would have failed to mention it at this point?!?

Q: (J) Good point. (SV) They forgot! (J) Oh, by the way, did we mention level eight?! (T) Well, maybe these other people are perceiving the recycling as moving into another octave rather than just doing it all over and over. They just haven't got the information straight yet.

A: There are many who speak, and some who speak the truth!

Q: (J) Yeah, but which ones are speaking the truth? (L) The truth is out there! But why Seven? What is the significance of the number seven?

A: Why not?

Q: (T) Could there as easily have been eight or nine or six?

A: Is there "significance" to anything?

Q: (L) Only the significance we give it, I guess.

A: And if so, what is that?

Q: (T) Well, it is interesting to me because it means there was a structure to the way things were set up. There must have been a reason it was selected this way as opposed to another way.

A: Really?

Q: (T) It didn't just happen. Nothing just happens! (J) Now, hold on a second, base 10 is because we have 10 fingers.

A: Who says?

Q: (T) You did.

A: Oh yeah?

Q: (L) Are you saying, essentially, that it is the way it is because things are just arbitrarily that way?

A: No, we are trying to teach you how to complete the puzzle.

Q: (T) So the reason it is what it is and why is something we have to figure out.

A: And you have to figure out what is reason?

Q: (T) The reason for what? (J) For the seven.

A: No. No. No. Pay attention, please. What is reason?

Q: (J) As in reasoning?

A: Much of your learning to this point is based upon assumption of definitions of reality.

Q: (L) And, all of our assumptions are completely wrong?

A: Not all.

Q: (J) Anything that is rooted in 3rd density doesn't apply in most of these things and that's where we have to let go.

A: Logic is subjective.

Q: (L) Is symbolic logic as is used in mathematics subjective?

A: No.

Q: (L) But you always come up with different things using math than mentation. Okay. Well, we opened a can of worms here. (T) We do that every time. (J) Worms are us! (laughter)

A: Ongoing project.

Q: (T) Teaching us is an ongoing project. (J) We are a can of worms. (L) Is there any point in time when these communications will end?

[Tape ends abruptly and snaps off to surprised laughter at the synchronicity. New tape inserted before continuing.]

Q: (L) Was that a symbolic answer to that question?

A: Open.

Q: (T) I want to ask about my dream... I know, "See Previous Answer..." Who is the woman? Who is this being?

A: Stay tuned.

Q: (T) Oh good! This is like a cliff hanger every night! (J) Will there be more installments? (T) Maybe, because she changed tactics...

A: Laura tired.

Q: (T) Are you tired? (L) Not any more than normally. Is there any reason for that?

A: Open; suggest caffeine.

Q: (L) Pause for caffeine break! We want to know about this phenomenon of the street lights that go off as Terry and Jan drive down the road sometimes. I know this has happened to me a few times as well. Is there any significance to this phenomenon? Are Terry and Jan causing it, in other words?

A: Maybe.

Q: (L) Can you tell us anything further about that?

A: Discover.

Q: (L) Back a few years ago it seemed that an awful lot of things in my presence tended to break... windows, glasses, kerosene lamp chimneys, car windows, satellite dishes... mechanical objects would die upon my touching them.

A: EM anomalies.

Q: (L) Were these occurring because of something in me or around me?

A: Changes in awareness, etc.

Q: (L) Was there any abduction activity or contact activity going on with me at that time that contributed to this?

A: Discover.

Q: (L) Could Terry and Jan's experiences with the lights be related to this type of thing?

A: Maybe.

Q: (T) I guess that between open and maybe that maybe is closer to a yes. (L) It is EM anomalies and changes in awareness. (J) And, part of it, as I was saying to Terry, is that if you are not aware of what is going on around in your environment, you don't notice such things.

A: Yes.

Q: (L) Well, in my case, it seemed to be a little more explosive so maybe I was a little more in the dark and had to be hit over the head with a two by four, so to speak.

A: Maybe.

Q: (T) Is that EM wave still circling the planet?

A: Yes.

Q: (T) It hasn't done whatever it's going to do, then?

A: Open.

Q: (T) Something else I have noticed, triple negatives throw them off... (laughter) (J) Well, triple negatives are nasty anyway.

A: Crop circles.

1. A planetary "window."
2. Astronomical "twin" phenomena etc.
3. Alternating current.
4. Means: Expect to be rewarded at harvest time.

Q: Is this snail formation a hoax?

A: Open.

Q: What does it mean?

A: Open.

5. Buried memory.
6. Train.
7. Longing.
8. Knowledge through conception.
9. Sight provides confirmation.
10. Relay learnings.
11. Communication.

Q: (J) Well, that's the one they use for their logo. (T) I wonder if they knew that?

A: Wonder indeed!

12. Passage of knowledge.
13. Find necessary clues by studying cyclical patterns.
14. Family.
15. Season of change.
16. Grand advance.
17. Universe as laboratory.
18. Dimensional crossover.
19. Physical life pictorial.

Q: Why the dead porcupine?

A: Scrambled body chemistry.

Q: Are the porcupines significant in these figures?

A: Learn. You have enough material to digest for now, so good luck and until the next time, goodbye.

END OF SESSION

3.23 May 13, 1995

Frank, Laura, Jan and Terry, SV

A: Hello.

Q: (L) Hello. (J) Did we just have somebody else horn in on the channel? (L) Who do we have with us?

A: Rolora.

Q: (L) Did somebody else just horn in on the board a moment ago? {Referring to garbled exchange that occurred prior official “hello” process.}

A: Maybe.

Q: (L) Well, my mother and I got a Play 4 number on the board the other night and three of the numbers were correct, what source did we get those from?

A: Laumer.

Q: (L) Is he still hanging around?

A: All can “hang around,” if they choose.

Q: (J) Has my mother ever been present?

A: No.

Q: (L) I would like to ask, since it is probably bugging everybody at the moment, what is the source of this oppressive heat we have been experiencing?

A: Normal weather pattern variation.

Q: (L) Well, why isn’t my air conditioner working well enough to keep the house cool?

A: House was not built with air conditioning in mind.

Q: (L) Well, you got that right. Okay, we have a couple of questions we would like to get into. Jan noticed that there was a symbol on the Windows Wingdings file that is quite similar to the symbol that Ann B____ uses on her Reiki brochures. We would like to know what is the source of this symbol and why the variation?

A: Ethereal memory.

Q: (L) What is the meaning?

A: Interconnection of reality in general.

Q: (L) Is this a useful symbol to use in Reiki?

A: Okay.

Q: (J) Why is it different in the fonts from the one used by Ann ___?

A: “Different strokes for different folks.”

Q: (L) Is there anything further on this subject that you can, would, or should give us?

A: No.

Q: (L) Okay, last week we did a spirit release on myself and Susan with Frank acting as proxy. We also inquired about information about protection for ourselves. Was the information that was given through Frank, at that time, an accurate portrayal of how we can best protect ourselves?

A: Mostly.

Q: (L) Okay, one of the things that was said was that we don't really have to worry about cutting people off or out of our lives, but just to be aware of the potential of what they may be carrying, and that this awareness can actually create the barrier. Is this correct?

A: Largely.

Q: (L) Is it also, as I have conjectured, a good idea to sometimes limit contact with people who may be carriers of negative energy, or who may have...

A: In extreme cases.

Q: (L) So, in other words, if a person is extremely toxic, it is best to just stay away from them or limit contact?

A: Good idea.

Q: (J) I would like to ask about the experience Terry and I were having about my emotional imbalances. (L) Okay... Jan, actually everybody has been experiencing this attack situation...

A: Has caused stomach problems.

Q: (L) Have you been having stomach problems? (J) No more than usual. (L) Okay, the situation that Terry and Jan have, that she perceives as attack, was that, in fact, an attack?

A: Some.

Q: (T) What else was involved?

A: Biological changes.

Q: (J) Monthly hormonal?

A: Yes.

Q: (J) That fits. (L) Susan has been experiencing a situation that I experienced in the past. She perceives a misty presence in her room. What is the source of this presence, this fog?

A: Entity ID "code."

Q: (L) And what kind of entity is it?

A: Sublinear yeti like.

Q: (T) What does sublinear mean?

A: Scrambled identifier of channel mechanism.

Q: (T) Are we talking about encryption here?

A: Close.

Q: (L) Is it something being sent through the dimensional curtain and does it need Susan's energy to reassemble itself?

A: No.

Q: (L) Is it having trouble reassembling itself?

A: Chose Susan due to past imprint.

Q: (SV) What do you mean, "Past Imprint?"

A: Past associations have brought about conflicting imprints into your channeling aura.

Q: (L) Is there any way she can change these past associations or imprints?

A: Go to places where traumatic events occurred, and "reload with current aural pattern."

Q: (SV) Well, that would be all over the country. (T) Visualize them.

A: Not sufficient, must replace physically.

Q: (T) Is this all over from everywhere, all her life, or just recently?

A: Traumatic events are easily accessible.

Q: (L) In other words, she will know. Okay, since this situation she has experienced was very similar to the one I experienced when I was pregnant with {my first child}, was this similar?

A: No.

Q: (L) What was the fog I experienced?

A: Entity imprint brought on by unusual stress.

Q: (J) Because of the baby?

A: Partly. Pregnancies may cause unusual psychic awareness.

Q: (L) What is the intent of this fog in Susan's room?

A: Not correct conceptualization.

Q: (SV) Well, I don't feel any fear, I just wonder if it is eyestrain.
(T) What was the mist I saw the other day?

A: Ozone.

Q: (L) JW called today and talked to me a little bit about the Oklahoma bombing. Now, we haven't talked about it too much... he did bring up some interesting claims. Was the Oklahoma bombing an "inside job," that is, was it done by agents of the government itself?

A: No!

Q: (L) Okay, was the Oklahoma bombing done by the persons who have been arrested for it?

A: Yes.

Q: (L) Was the Oklahoma bombing accomplished by the fertilizer bomb placed in the truck parked outside the building?

A: Yes.

Q: (L) It was not accomplished by any bomb inside the building?

A: No.

Q: (L) Was Timothy McVeigh influenced to do this by forces outside of himself?

A: Yes.

Q: (L) Were these forces human or other?

A: Other.

Q: (L) Was it as I have written in my piece “The Politics of Metaphysics?”

A: Yes.

Q: (L) Was that piece essentially channeled?

A: Yes.

Q: (J) Was anything that JW said about the size of the bomb correct?

A: No.

Q: (T) Was anything John said about it correct?

A: In general, no.

Q: (T) So he is mouthing rumors or making stuff up, or passing on made-up stuff?

A: Within circles in which he moves.

Q: (J) What circles does he move in?

A: Anti-government militia types.

Q: (T) Is he an agent?

A: Of what sort?

Q: (T) Is he a government agent?

A: No.

Q: (T) Is he a STS agent?

A: Close.

Q: (T) Is he trying to influence things?

A: Forces trying to influence things are working through him.

Q: (T) He is not working for the CIA, or the NSA, or the FBI, or military intelligence, or anything like that?

A: No.

Q: (L) You told us before that he worked for the NSA... (T) The CIA...

A: CIA stands for Confusion Is Apparent!

Q: (T) He is a Confusion Is Apparent agent?

A: Might as well be.

Q: (J) He's doing their work but he is not on their payroll. (T) He is doing as good a job as they are putting out the disinformation. (L) Earlier we had a discussion about where we wanted to move. My husband has his ideas, we all have our ideas, and we just want to know, in terms of just being happy and content with the surroundings, of the places mentioned: South Dakota, North Carolina, which would be more pleasant?

A: As we have told you before, moving is pointless, as it is a manifestation of 3rd density thinking, and would thus regress you severely. It is not "where you are that matters, it is who and or what you are that counts."

Q: (L) That is not the point that we were talking about. We were not talking about moving out of fear. We were talking about moving out of the simple desire to not live in this area any longer because we don't like it! I want to get out of the heat!

A: That is 3rd density in the extreme!!!

Q: (T) That is just something we decided to do, like Noah building the ark, we thought it would be a good idea.

A: Then do it, but don't expect us to be there!

{At the time, I felt that this was a strong influence from Frank who was very much against anyone making any changes at all, let alone moving.}

Q: (L) Since Terry and Jan have the urge to acquire larger space for themselves, what would you propose they do if not move to North Carolina?

A: Does larger space automatically equate long distance move?

Q: (J) No, it doesn't, but I don't want to spend the kind of money required to get a larger house in St. Petersburg. This is something we have talked about for a long time.

A: Is St. Petersburg your only option?

Q: (J) We don't know, we have to find that out. It depends on what happens with jobs and other things. (L) Is my financial situation blocked because of my plans and ideas about moving?

A: Maybe.

Q: (L) If I changed my thought patterns in that regard, would my financial situation become unblocked?

A: If you open your mind to any and all possibilities, this always unblocks.

Q: (J) Well, that is what we are trying to do, and one of the possibilities is moving to North Carolina. (L) Okay, I say that I don't know what the Universe wants me to do. I am just waiting to see, and waiting for direction. What more can I do?

A: Good!

Q: (J) That's what we are doing. We are trying to open our minds up to all the possibilities. Something may open up here, or in St. Pete, or somewhere else. We don't know. And, unless we open

all the doors to find the one that's right. We have to shake all the bushes.

A: As long as you wish to communicate with us, and learn from the information we are sharing with you, multitudes of possibilities will present themselves to you.

Q: (L) Does this mean even for my husband, that he will get a good job? Is his potential also connected to this communication?

A: If a "good job" is what he desires, yes, however, if others are trying to convince him that that is what he desires, then there will continue to be blocking of the "flow" taking place! L___ is of the utmost importance to us!

Q: (L) Why do I keep having dreams of him abandoning me and the kids when the UFOs start landing?

A: Discover.

Q: (J) That's your fear. (L) Okay, you say he is of the utmost importance. Could you give us a clue about that, please?

A: All are.

Q: (L) Okay, he would like to have some advice as to how to shape his life from this point on?

A: Do what you really want to, and all else will fall into place, but don't procrastinate or "dream your life away."

Q: (L) Okay, have we pretty much exhausted this subject and should we move onto something else here?

A: Up to you.

Q: (J) I think we have pretty much exhausted the subject. We don't know what is going to happen and we are just waiting to see what the Universe has to offer.

A: Good! Cope.

Q: (L) What does cope refer to?

A: You.

Q: (L) I have to cope with what is going on?

A: All.

Q: (J) That's what we are doing, one day at a time.

A: Laura is dragging so badly that the channel is oscillating. Save for better circumstances.

Q: (L) Then, we will say goodnight.

A: Goodnight.

END OF SESSION

3.24 May 20, 1995

Frank, Laura, Jan and Terry, SV

Q: Hello.

A: Two messages.

Q: (L) Who do we have with us?

A: Rituals restrict channel!

Q: (L) We weren't doing a ritual, we were just surrounding ourselves with light. Is there something wrong with surrounding ourselves with light and creating light energy?

A: Rituals are rituals.

Q: (L) Who do we have with us tonight?

A: Sonow.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Okay, what are the messages?

A: That was one, the other is be careful with exposure to those who are still blossoming!

Q: (L) And who are they? (J) The kids were in here. (L) Do you have any other messages for us this evening?

A: Open.

Q: (L) You are open. Okay. {My daughter} did a {remote} viewing the other night of us doing this work. In this viewing she saw us around the table, and she saw a pyramid in the center of the table. What did the pyramid represent?

A: Energy focuser.

Q: (L) She also saw another person standing in a corner. Could you tell us who that person was?

A: Just viewer, you attract a lot of those in 3rd density and 5th density as well!

Q: (L) She also saw a lamp hanging over the table. What does the lamp represent?

A: Not lamp, was light, represents light channel to level 6.

Q: (L) She also saw a green glow surrounding us and green slime oozing out of the pyramid all over our hands. What did this represent?

A: Was interference in reading coming from level 4 STS.

Q: (T) Was this what she saw in reference to last week's work?

A: General.

Q: (L) Was what she was seeing interference in our work or interference in her viewing?

A: The latter.

Q: (L) So, STS was interfering in her viewing to cast a different light on it?

A: Yes.

Q: (L) Okay, last week we received information that said if we moved to North Carolina, that you would not be there. We felt very strange about this because we felt that our connection with you was something that extended throughout space and time. We had a very negative reaction to that. We would like to have comments on that subject.

A: Not point, you were brought together as a result of many confluences of energy transfers for a purpose! You are always free to pursue any path you choose, however, if you concentrate on 3rd level matters such as your physical location, you risk creating rifts within your group! This is because such thoughts and potential actions will strengthen 3rd level STS feelings within each member, thus risking breakup of channel. Now, please realize, you have a unique combination of forces working through all of you that brought you all to this point. This is fragile, and any major changes in the chemistry will inevitably change “the whole picture.”

Q: (L) By “major changes,” do you mean members of the group leaving?

A: We are not finished with the message. If you were to move your physical locator, it would not be possible to satisfy each member equally therefore, rifts would develop. Now, consider

this, you have all chosen to be in this location. Some chose this when on level 5 even! So, perceived dissatisfactions with locator are transitory, and like so much else, merely the result and symptomatic of the changes occurring within, as well as 4th level STS attack! Many other groups have been successfully misled by perceived need to relocate, with predictable results! Suggest you avoid joining them!

Q: (F) Based on what has been said before, part of the way we were all brought together was by being physically in proximity to one another. (J) Right! (F) And if we disrupt that... (SV) And we chose it, some of us, from 5th level, so it is sort of preordained that we do this. (F) Right! And there are so many factors delicately placed in this situation, that any movement... (L) It would actually be... if we tried to go and move as a group, someplace else, some of us would be dissatisfied with the idea of moving, and therefore that would actually create personal problems between us which would drive the group apart. (F) On a small scale, it is similar to when a husband and wife decide to move... "I'll go because I love you and you want to go..." and then they are miserable. (SV) The Cayce readings say that many aspects of our lives are decided beforehand on 5th level. So, we must have all gotten together there and decided we were going to all come to New Port Richey and do this! (L) New Port Richey! (J) The reality of our situation is that we want to get out of our tiny little house and into another... (L) Well, the way this was put, it sounds like you can't even move out of your house! (J) Oh, no! They have already told us that we can do that! (T) No, they just indicated that we shouldn't move from this general location. That is the way I understand it. (L) Last week it was pretty short... (J) But, on the other hand, maybe they have worked pretty hard getting this project cranked up with all of us being as hard-headed as we are, (laughter)... (T) Look how long it took us to get up here! (J) It is not like this is new... Terry and I have been talking about mov-

ing for years... we may do it someday. (SV) I like it here. (T) We don't know what is going to transpire. (F) If everybody decided together to go to North Carolina... (L) And we were all happy with the decision... (F) But right now I don't feel like going there... (L) And LM doesn't... (F) Something else interesting about dissatisfaction being transitory and part of inner changes and attack... I am not dissatisfied with where I am physically, but with who I am and what I am and everything else in my life, which would be precisely the same if I were in North Carolina... (L) It wouldn't matter, your physical location wouldn't matter... (F) Right, so... (J) Our situation is that we have to get out of that house. (F) Well, let's ask... (L) I think we should ask if we were all equally agreed to go to another location, would the channel work someplace else?

A: Yes, but that is unlikely.

Q: (J) We know that. (L) This leads to the assumption and the realization, which I have long held, and have picked at, and maybe it is time for you guys to take the gloves off, what is it that is going on here? Obviously things have been brought to a certain point for a reason. You have hinted at things, alluded to things, you have...

A: You will discover this as the process continues to unfold, if you were to be given a "preview" you would become "unglued."

Q: (L) I don't want to know! (T) Give me a preview! (L) We don't want a preview! (J) We have been having some pretty weird dreams here...

A: No.

Q: (T) Is this group complete?

A: Open.

Q: (T) Are there others yet to come?

A: Very distinct possibility.

Q: (T) That may be part of why we can't move, if there are others around here that are supposed to come. (J) I think as far as the group moving... (T) There are others that are supposed to come, they are not here yet... (J) It would have to be... in order for the group to be able to move as a group, Susan and Frank and LM would have to change their minds about wanting to move... (T) No, no, no... (J) Yes... (T) If we were to move the thing... there are others who are supposed to be in this group and they are not here yet, so it is not the right timing... if we were all in agreement to move... we don't have the whole group and there would be no way for the rest of the group to get to us... (L) The statement was made that we all chose to be here, is that correct?

A: Yes.

Q: (L) And we have chosen to work together for a distinct purpose, is that correct?

A: Close.

Q: (L) And we have all, whether together or individually, we all have a very distinct purpose and pathway to follow in this life that was pre-chosen and pre-set, is that correct?

A: That is true for all on level three.

Q: (L) And there is no one in this room who is here by mistake, is that correct?

A: Yes.

Q: (L) And there is no one in this room who doesn't need to get about finding out what their purpose is by doing each day what is in front of them, is that correct?

A: Close. But, beware of attack and desires to “push” things in any given direction, which is a manifestation of attack! Just let things fall into place naturally!

Q: (L) Okay. (J) Can you give any input as to Terry’s and my situation, regarding our house being too small, and needing to find something else?

A: There is no reason you cannot move from your current residence.

Q: (L) Okay, a strange thing happened the other day. Our neighbor, who has always been kind of aloof from us, came over and offered LM help in getting a job. Why?

A: We will occasionally throw “perks” in your direction, just to help you out, when you have had periods of equally balanced misfortune!

Q: (L) Well, is he going to get the job?

A: Up to LM, these are perks, not guarantees. In other words, we do not lead by the hand.

Q: (L) Well, if you can get him into a job, I thank you.

A: You are welcome.

Q: (L) Now, about the conference. (T) Is it all on the up and up?

A: No.

Q: (T) As far as the speakers go?

A: No.

Q: (T) Was Mr. O’Leary playing with a full deck?

A: Open.

Q: (laughter) (L) How about our putting our brochure out there?
(T) Yes, was it a good idea the way we did it?

A: Might be wise to be controlled in distribution methods, rather than scattering “to the four winds.”

Q: (L) But you said to rattle the bushes. (J) Should I not give G____ more copies of the brochure?

A: Open.

Q: (L) Are you saying that what we did was a good idea because it was for a specific audience rather than random distribution?

A: You have been less than careful to this point.

Q: (L) Well when we asked you beforehand, you wouldn’t tell us anything. Why are you saying this post-event? Post facto!

A: Discover. By the way, rattling the bushes can be accomplished with a broom, not only a howitzer.

Q: (L) Well, we thought we were being very restrained in what we put out...

A: Recently, you have settled down some, yes.

Q: (L) What do you mean “recently” we have settled down some? Is that me, specifically?

A: Earlier, you were less careful than now.

Q: (T) That was before you started telling us about the people that are waiting to eat us alive! (L) That is before we had all our attacks. We have been discussing the idea of putting this information out on the computer net.

A: Okay, but suggest no bylines, or “handles.”

Q: (T) In other words, don’t put our names out there?

A: Yes.

Q: (T) Well, we were talking about not putting the bio on the net, just the channel info and address for more info.

A: Up to you.

Q: (J) I think we could do a condensed bio with no names... (L) Well, why don't we put there naked? For all they know, the Cas-siopaeans downloaded it themselves. (T) They will be able to ID us. (L) Well, previously, you were very interested in us getting on the computer net. AOL was not worth the money...

A: Your opinion and you were characteristically impatient.

Q: (L) Well, I wasn't so impatient as broke. I was paying long distance charges and the net cost me over \$150. dollars that month.

A: You were not aware of tremendous progress made, due to "tunnel vision" and preconceived notions of what defines progress.

Q: (T) Were you using the message boards? (L) No, I didn't know how and I couldn't afford to hack through the system and figure it out. (T) Well, if I had known, I would have showed you how. (L) See, it wasn't my fault, it was Terry's. He didn't show me how to use the thing! I was paying by the hour, not just impatient.

A: We did not place individual blame.

Q: (J) We need to plan a little bit more. (L) We want to know if there are really underground tunnels all over the place that many people have reported being taken to in alien abductions?

A: Yes.

Q: (T) Have they been there a long time?

A: Subjective.

Q: (T) Do they predate humanity?

A: A few.

Q: (T) Are they equivalent of subway tunnels, to get from one place to another?

A: Okay.

Q: (T) Is there a set of trains or whatever to move from place to place?

A: No.

Q: (T) Is there any kind of high tech gear in place in these tunnels to move from place to place?

A: Subjective.

Q: (L) How do they travel through these tunnels?

A: Electromagnetically.

Q: (T) Can individuals be transported through the tunnels without benefit of equipment? Or do they use some kind of gadgetry?

A: All of the above.

Q: (L) Who occupies these tunnels?

A: Various.

Q: (T) Are there still beings in there?

A: Yes.

Q: (T) Are humans involved in this?

A: Yes.

Q: (T) Were there humans involved in digging some of these tunnels?

A: Some.

Q: (T) Before that, there were other beings that were not human?

A: Yes.

Q: (T) Are those other beings still down there?

A: Yes.

Q: (T) Is this a worldwide network of tunnels?

A: No.

Q: (T) Where are most of the tunnels?

A: North America, since that is the “capitol” of STS, currently.

Q: (T) Are there other tunnel systems other than in North America?

A: Yes.

Q: (T) Does it depend on where the STS alignment is as to whether they are operational?

A: Not point, just single factor.

Q: (T) Do any of the tunnels lead to Antarctica?

A: No.

Q: (T) Is there any way of getting to Antarctica through the tunnel systems even if you have to come to the surface occasionally?

A: Okay.

Q: (L) Are humans ever taken into these tunnels or places underground... (T) Against their will?

A: Sometimes.

Q: (T) Is there some kind of underground base in Antarctica?

A: Yes. Eight.

Q: (T) Are they related to the tunnels in time?

A: Vague.

Q: (T) Were any of those bases underground in Antarctica built by the Germans during World War II?

A: Sect.

Q: (T) Nazis?

A: Remember, all is structured in cycles and circles.

Q: (L) In other words, these tunnels were built by and belong to the Consortium, is that correct?

A: Circles within circles.

Q: (L) Masons?

A: One example of concept.

Q: (T) Jan and I have a friend who has told us about someone she knew who found entrances to tunnel systems in North America. One of the entrances was in the Adirondacks, another was in the Mammoth cave system. Was what she was told true?

A: Yes, but there are thousands of entrances. Are you ready for a “shocker?”

Q: (J) Oh, you know we are always ready for a shocker. (L) Sure!
(T) Okay, give us the shocker. (J) We’re ready!

A: There is a tunnel right beneath your feet!

Q: (J) I knew they were going to say that. (T) Of course! Is that where the digging is going to go from the basement?

A: Up to you!

Q: (L) How deep under our feet?

A: 2000 feet.

Q: (T) Is anything moving in that tunnel?

A: Vague.

Q: (T) Is that tunnel being used?

A: Yes.

Q: (L) Right at this second?

A: Open.

Q: (L) Who uses it more than anybody else?

A: Open.

Q: (T) Are there humans down there?

A: Have been, listen for sound anomalies such as loud sonic boom like noises and vague motorized sounds.

Q: (L) Is there any kind of electronic gadgetry down there causing my appliances to keep breaking down?

A: Maybe.

Q: (L) What is wrong with my air conditioner?

A: Fuse.

Q: (SV) Does this tunnel hook up with the doorway in the old stone house on Grand Boulevard that nobody has been able to open or cut through?

A: Open.

Q: (T) Is there an entrance to this tunnel underneath us somewhere in this area?

A: Near power plant.

Q: (T) Crystal River? (L) No, Anclote. (T) Is that why the power plant is built there?

A: Related; old Nike base.

Q: (T) What direction does this tunnel run that is underneath us?

A: East - West.

Q: (T) Out under the Gulf of Mexico?

A: No.

Q: (T) Where does the West end?

A: Just described.

Q: (L) The power plant. (T) Okay, where does the East end go?

A: Near Lakeland.

Q: (T) What is in Lakeland that would have a tunnel entrance in it? Why Lakeland?

A: Not issue.

Q: (L) What is on the surface may have no relationship to the tunnel.

A: Transfer point and redirector.

Q: (T) Is there another tunnel that comes into this tunnel, that intersects this tunnel?

A: Yes.

Q: (T) Near Lakeland?

A: Yes.

Q: (T) Is that what you are talking about; a transfer point?

A: Yes.

Q: (T) Does that tunnel travel North/South?

A: Yes.

Q: (T) Does that run up the East coast?

A: No.

Q: (L) Lakeland is in the center of the state. (T) Where does it go? Are these side tunnels to a main tunnel that runs along the East coast?

A: All are interconnected.

Q: (T) So, it is like a subway or bus line? Is there a tunnel farther South of here?

A: Yes.

Q: (T) How far does the farthest South tunnel go?

A: Antarctica.

Q: (J) Is there a tunnel near our house, in St. Petersburg?

A: No.

Q: (T) Is there a tunnel to MacDill?

A: No.

Q: (L) I think that, in general, importance we would ascribe to surface structures may not be a consideration here. (T) I was thinking about the military base. (L) I would think that the tunnels bear no relationship to the structures under the surface except in certain instances. (J) But, what got there first, the tunnels or the structures on the surface? (L) Obviously the tunnels have been there for a long time, and perhaps, in certain instances a situation may be manipulated so that a specific structure is built

to facilitate the tunnel usage, but the fact that Lakeland is built over it may not be relevant. (T) There is no entrance to the tunnel system near Lakeland?

A: Yes.

Q: (J) And there are no tunnels down in Pinellas?

A: Phosphate plant.

Q: (T) There's a tunnel entrance in the phosphate plant? (L) I've got one more question about the tunnels.

A: Mine.

Q: (T) There is a tunnel entrance in one of the phosphate mines?

A: Yes.

Q: (J) Was the placement of this tunnel under our feet the reason Laura got this house?

A: No.

Q: (T) Does the placement of the tunnel underneath us have something to do with the channel?

A: Maybe.

Q: (T) Because of the greater EM underneath us; we are tapping into that EM energy?

A: Helps in offhand way.

END OF SESSION

3.25 May 26, 1995

Frank, Laura, Susan

Q: (L) Hello.

A: Hello. Why not Susan?

Q: (L) Well, I don't know. Do you want Susan at the board?

A: Up to you and her; we just asked; no biggy.

Q: (L) Well, she is taking notes.

A: Okay. Hello.

Q: (L) Could we have your name, please?

A: Rohr.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Okay, we have several questions tonight...

A: Fire away.

Q: (L) The first question is regarding the warning of attack Terry and Jan received earlier this year...

A: Yes.

Q: We are concerned that they are currently under attack.

A: Yes.

Q: (L) Terry was offered a job that was interesting, and this offer came, seemingly under exceptional conditions, that is, during the interview, which almost never happens. When he got into the job, he felt that it was not the place for him to be and he quit after four hours. His perception, as I understand it, is that his quitting of this job was an act of protection stemming from his knowledge that it was not the place for him to be. I wondered,

and my clue was his word “feeling,” that because he was “feeling negative” toward the job, and therefore perceived the job in a negative way, he quit what may have been an excellent point of contact for other things, people and experiences that he may have been in line for. Interestingly, Jan felt the same way. Now, my question...

A: You are correct.

Q: (L) So, he quit the job and this is part of attack?

A: Yes. Resulting from.

Q: (L) What are the ramifications of this? Is this indicative of a possible financial bind? Like getting into the financial soup?

A: Open.

Q: (L) So, at this point, it will just have to be dealt with, is that correct?

A: Soups come in a variety of flavors.

Q: (L) So, it is not necessarily that he will have financial problems, it could be something else altogether?

A: Yes.

Q: (L) Well, I think Terry has been having some pretty negative feelings, as have I, in general. Is this a correct assessment?

A: Point out to him that feelings are best to be aired, lest they fester. Communication is the key.

Q: (L) Yes, we know that, and I tried to communicate some of my concerns to him on the phone, but he seemed to be blocking me because when I pointed out that feelings are not to be trusted, he said that he felt that his feelings ARE reliable in this case. He

kept using the word “feeling” which rang in my head like a warning, especially after what I have been through recently. I tried to communicate this.

A: Terry is the one who needs to communicate.

[Phone rings and time out is taken to talk to Jan and Terry!]

Q: (L) Were you listening to our conversation?

A: Of course as always.

Q: (L) That is so comforting. (SV) Yes. Remember when I whispered to you because I didn’t want the Cassiopaeans to hear?! (L) Right!

A: Ha! Ha!

Q: (SV) They did hear me! (L) Okay. I just talked to him about what we are discussing, and Terry is pretty convinced that he is on the right track and he has me pretty convinced at this point, too.

A: Attack, just look at what he is feeling about Frank and SV, do you not recognize the “symptoms?”

Q: (L) Yes, I guess I do since I just went through that and I seem to be suffering in similar ways from time to time. Could you give us some advice on how we can break the attack?

A: He needs to air it out with proper parties.

Q: (L) So, if we all aired everything out, it would help to break the attack?

A: Yes. Pops like a balloon.

Q: (L) Now, regarding my own situation... Terry and Jan have just offered assistance which is welcome and timely, but is only a band-aid...

A: We provide, and when ready, huge sums will come to all.

Q: (SV) It all depends on what you consider “huge.” (L) Well, I consider “huge” in the millions. (SV) Well, that is beyond my comprehension. What would I do with that much? (L) I could help you out with that! (SV) I was hoping you would say that!

A: You will manage!

Q: (laughter) (L) Okay, well, I have made the decision that I am not going to push to do anything, including moving, unless and until I am sure that that is what I am supposed to do. I am sure that you will let us know.

A: Okay.

Q: (L) So, we can just work on the house and work on making ourselves happy where we are.

A: Good girl!

Q: (L) We had our aura photographs taken at the metaphysical conference. Were those photographs accurate in color representation?

A: Yes.

Q: (L) Frank had a very lovely aura. There are, however, a couple of things that are confusing. In SV’s aura, the colors are very compact and close into her body. What does this indicate?

A: Stomach problems.

Q: (L) What could she do to alleviate her stomach problems?

A: Change her diet “big time!”

Q: (L) What is there about her diet...

A: Starch and fats must be reduced steadily.

Q: (L) And what should she add?

A: Fruit.

Q: (L) Any particular kind?

A: All.

Q: (L) Is microwaved food harmful to the person who consumes it?

A: Not much.

Q: (L) Now, are the colors in SV's aura fairly representative of what her colors usually are?

A: Parameters change within resulting in aura changes.

Q: (L) Can the color of your aura reflect psychic attack?

A: Maybe.

Q: (L) We gave some of our material to Michael Lindemann. I would like to know what his ultimate reaction to it will be? He did not seem to be favorably impressed, but I don't think he read it, either.

A: Let it seep.

Q: (L) I also left some material with Linda Howe. Is this going to help her in any way?

A: Sinking in.

Q: (L) Are we going to get any repercussions or responses to the distribution of this material?

A: Yes.

Q: (L) Are we going to get any positive responses?

A: Yes. We direct you as long as you have faith in us, as we are you! Attack is always designed to destroy that faith, either directly or indirectly. Think of the instances, to see if there is a familiar pattern to the “root.”

Q: (L) So, attack is always directed at undermining our faith.

A: In a roundabout way.

Q: (L) Now, there is a real issue here about SV working on different people who may be sources of negative energy. Is just knowing that there may be negative energies sufficient protection to allow her to work on just anybody?

A: Strengthens shield if knowledge is utilized properly through psychic channels, therefore, exposure is good if care, prudence and awareness are applied.

Q: (F) Does this mean that Terry, by withdrawing into a protective shell, has deprived himself of an opportunity to gain strength in this regard?

A: Yes. It is lack of faith in what is brought forth for him as well. Tends to weaken the shield.

Q: (SV) Maybe I just shouldn't tell anyone who I work on? (L) No, we can't not tell each other what we are doing because that is a lack of faith in each other. We can't baby ourselves or each other. (F) It all has to be aired out some time or another. (L) Can I ask something about the perpendicular realities?

A: Wait for Terry and Jan be present for answers.

Q: (L) Okay, I'm jumping the gun because I am eaten up with curiosity.

A: Goodnight.

END OF SESSION

3.26 May 27, 1995

Frank, Laura, Jan and Terry, Carla and Roger Santilli

A: Rouswo.

Q: (L) I guess that is the name. Hello, how are you this evening?

(T) Who do we have with us?

A: Name given.

Q: (T) Where are you from?

A: Cassiopaea.

Q: (T) How are you tonight?

A: Okay.

Q: (T) We are doing okay too. We have some company this evening.

A: Good.

Q: (T) Roger and Carla Santilli are with us. Roger has some questions to ask later.

A: Hello, Roger.

Q: (RS) Hello. (T) Do you have anything you want to talk about to start off with?

A: Channel open.

Q: (L) Alright, let's start off with the question that Susan and I have wondered about: Is it alright if I give the Reiki initiation during the Mercury retrograde?

A: Of course!

Q: (L) That's what I thought. Go ahead, Roger, ask what ever you like. (RS) I want to know whether we can have any clues on the propulsion systems of UFOs?

A: Sure!

Q: (RS) What's the mechanism of the propulsion?

A: This is difficult to answer when posed in such a manner, as we are talking about multiple realities, density levels and various modes as well!!

Q: (RS) Is the gravity experienced by an anti-particle in the field of matter attractive or repulsive?

A: Repulsive when thought of in the way that is parallel to your studies, but, as we alluded to in the previous answer, there are more realms involved besides the one with which you are most familiar.

Q: (RS) The next question is: particles move, matter moves, in our direction of time, do anti-particles, anti-matter, flow backward in time?

A: Think of it as merely one seventh of the equation, Roger!

Q: (L) Can we get an answer on whether this is the case strictly on the third level of density?

A: Backward.

Q: (RS) Yes! I am interested in the propulsion systems of UFOs, the only way that I can perceive travelling the long distances involved in interstellar space is to have what is called a "space/time" machine. We cannot move the enormous distances unless you can fold, somehow, time and space. You cannot fold space unless you join it and fold time. You cannot have interstellar travel unless you have a space/time machine. But,

a space/time machine means to also have the ability to move forward and backward in time, to manipulate time.

(L) Yes, you would have to cross distances and simultaneously move backward through time so that you would end up arriving wherever you are going essentially at the same moment that you left.

(RS) That is why I asked whether we can use anti-matter as a propulsion, because it would be repulsive in the right direction. The second question whether, when we use anti-matter, we would move backward in time. Because, some of those objects, you see them moving, and they can be moving in space but not in time, or they could be moving in time but not in space. If you see a UFO, it does not mean that it is in our time. It could be in a completely different time. (L) And, they disappear sometimes right before the eyes of the observer, and the question is: where do they go? They could be standing still in space, but moving time. Or moving backwards.

(L) And, there are a lot of abductions reported where there is seemingly no time lost at all. They come in, haul the victim out, do whatever they do, and then they slide them back in a fraction of a second away, if not at the identical second they took the victim out!

(RS) Yes! This article I presented is exactly about this point! If, indeed, anti-particles have lift, then necessarily they have to go backward in time. Then they manipulate this: you can have an abduction any length of time inside the craft, but in our time, in our level three, it is zero time!

(L) Yes, exactly! And not only that, there is the phenomenon of the craft that looks small from the outside, but inside is huge!

(RS) That is all tied up in it! This is very exciting. I am learning

the language. In our third level, the motion in space and time occurs via the change of the unit of time and space, therefore, can we change the unit?

A: Yes, this is precisely what we mean when we speak of “transiting from 4th to 3rd.”

Q: (RS) So, when they travel from 4th to 3rd, they change the units. That is precisely what is in the article in the journal! [Holds up book.] This is published in the Ukraine, [turns to page and displays diagrams and equations] this is the experiment to test anti-gravity. There is a two mile long tunnel which is a vacuum inside. They suck the air out. The first measure is to shoot photons to identify, at the end of the two mile tunnel, the no gravity point. The second measure is to shoot a neutron, and we know that a neutron is attractive. So, after two miles, the energy is very, very low. So, there is no gravitational effect when the neutron hits the point. Then, the third step is to shoot an anti-neutron at the same time and see what happens. This experiment will resolve this issue that this board has answered very scientifically. We call it the gravity of anti-particles because we don't know. It can be down... Einstein predicts this as attractive as a neutron, anti-matter and matter have the same gravitational attraction. That's what Einstein says.

But, when Einstein's theory was proposed, in 1915, anti-matter wasn't discovered until 50 years later. If now, theoretically, the only way a particle, in our theory, can go up, can have lift, is if time is reversed. There is no other possibility. So, if this experiment is correct, then the space/time machine is absolutely a consequence and can be tested in a laboratory. You can have a particle moving backward and forward in time.

[Displays new diagram.] This is the other experiment which is, in this case, is done by putting a particle which is neutral and sub-

jecting it to... since we don't have a bunch of anti-matter - ideally we would have a pellet of matter and replace it with anti-matter - we don't have a pellet of anti-matter, at this point, there are ways to do it though and it can be measured as to which way it moves, up or down.

Now, the question of the units, it is very important, a fundamental question, because, say, you are outside a UFO, and you see the UFO as big as a car, say, and people go inside and report this enormous interior. There is no other way to do this than by changing the unit. What is for us one inch, that unit is completely different inside. For us the unit is the same along the three directions. Now, if you are inside, they can have different units in different directions. This means that if you are outside a cube, and you go inside, the shape, not only the dimensions but the shape even, can be different.

A: Density borderline cross awareness. Does Roger have familiarity with density definitions?

Q: (L) Did we ever get a density definition, Terry. (T) Just about the seven levels. (L) Okay, what is a density definition?

A: Review, using your own knowledge base, i.e. network.

Q: (L) What do we understand about density? (T) There are seven levels of density. (L) First level of density is rocks, minerals, plants. They have an awareness at there level. Rocks may even grow and move, but they do it so slowly that we cannot perceive it. Second level is the animal kingdom. This density awareness relates to geometrical progression. The first level has the awareness of a line. The second level has awareness of a line moving at right angles to itself, or planes. Third density is human beings and we have the awareness of the plane moving at right angles to itself, but we can never experience this fully. We see things as three dimensional only because we create an

illusion based on memory and knowledge. We can never know the other side or the inside while we are looking at any given side.

(J) The Witnesses in Heinlein's book could only tell what they actually saw. If you asked them the color of a barn, they would tell you that the side they could see was red. If you took them around to see the back and they saw that it was red also, and you then asked them what color it was after it was no longer in view, they would still say that the side they could see was red. If you asked them about the other side that they had seen, they would say that since they could no longer see it, it may have changed color so they would not attest to it.

(L) So, third density is like that. We can only know things by our perception. So, if we extend the idea of 1st, to second, to third, to fourth, and try to understand what fourth density would be like, because then you would know the cup or other object all the way through at once. You would experience a sphere inside and out and all around all at once. We stretch for this...

(T) Fourth density is inclusive of all the densities below it and an added density. Fifth would be, again, fourth density nature turned at right angles to itself. The same for sixth and then seventh, which the Cassiopaeans call "The One." The completion point.

(L) And we have no idea of how to express these things. They have told us about TransDimensional Atomic Remolecularizers and we asked them how to build one. They asked if we had a couple of days to sit and take direction.

(RS) I do! I do!

(L) We know, and we said the same, but then they asked us where were we going to get the parts?

(RS) It would be like trying to build electronics in ancient Roman times...

(T) Or, telling a dog how to build a watch. Even if the dog understands how to build it, where is he going to get the parts?

(RS) This point of how deceptive is our perception has been proven scientifically with the seashells. Didn't we discuss about the seashells? (T) Yes. (RS) At the third level, is it true that the value of the dimension is changed by the available energy, or the energy is used to change the value of the units?

A: This concept crosses the density barrier, not limited to level three.

Q: (RS) Goes up to level four. That's the means of propulsion of the UFO.

A: Reason for exponential awareness "explosion" is approach of wave. Now, concentrate on visualization, answers are located there... After a period of contemplation, Roger to "hit upon" breakthrough question to solve puzzle currently occupying "center stage" of his psyche, with only one piece missing currently. [JR note: I take this to mean that Roger will be able to come up with questions to access the Cassiopaeian information in a way so that the information can be dispensed. Also that his awareness is exploding as a result of the oncoming wave.]

Q: (T) Starting with the fourth density, we are no longer confined to the physical. The key phrase is "variability of physicality." Once you move from 3rd density to 4th density, and we are all moving upward toward seventh density. When you raise your knowledge, your awareness, to a certain level, you can move to the next level. When we move from third to fourth density, at that point, we have the ability to visualize and decide what our reality is. We create reality from fourth level on. So, at one point,

there may not be a solid reality. It may all be energy, we would be light beings, so to speak. We could change that just by thinking about it and making a solid reality. Or, as solid as we wish. This point also, from fourth density up, there is no such thing as time as we perceive it. Our perception of time only exists in the first three densities. Each density perceives it differently.

(RS) What we perceive as back and forth in time, when we go to the fourth level, it doesn't exist anymore. Beings on that level can move back and forth through our density of time because, for them, it doesn't exist. It is all now. It is only one time.

(L) It is like a whole bunch of different doors, one says 1917, one says 1943, or whatever, and they can walk through whichever one they wish...

(T) There is the Realm Border. The Earth is moving into a 4th density area of space. Or it is moving toward us, or both. This Realm Border, this crossover between densities, and it's also a crossover between dimensions - a quick sidebar on dimensions: dimensions, according to the Cassiopaeans are lateral realities; all possible realities of a density level, an infinite number; there is a difference between density and dimension.

(RS) This is a fascinating meeting because the answers to the question about moving mathematically from the third level to the fourth level, this change in the units, the answer is exactly what is proposed in my book. The answer, as given, is possible...

(T) We have been told that the universe teems with life at all levels, and that humans are just one selection.

(L) And what they are saying, I think, is that this oncoming realm border, this density change, is being felt and is stimulating consciousness. Essentially what has been said is that what is coming up for us is the ending of a Grand Cycle. A Grand Cycle is

300,000 years... (T) Give or take a day... (L) ...as we measure time. At the beginning of this Grand Cycle, we were genetically altered to reduce our awareness and also genetically altered through our DNA to perceive time itself. It is in our DNA to be limited this way. Now, at the end of this 300,000 year cycle, a lot of people are re-assembling this broken DNA as a result of the changes in energy, and that this is causing their mental powers and perceptions to expand exponentially. I think that they are telling you that this energy is acting on you in a way to allow you to have the breakthrough that you need to finish the puzzle that you have been working on. By having the concepts that you are being given now, you will be able to hold this as a visual and this will give you the key.

(RS) I notice that if the question is not properly phrased... (L) You don't get your answer! Be specific.

A: Careful not to confuse with too much data that is not connected in the same concept arena, as visitor is concerned primarily with one direction; in order to familiarize let data be absorbed on schedule comfortable to researcher! Like trying to learn mathematics in broken dosages!

Q: (L) They are telling us not to tell you too much at once because it will take you away from the central question you are working on.

(RS) Also, I think we should report this work to the MUFON group!

(T) We offered to do this at the meeting and they don't want to do it. This does not fall within MUFON's guidelines.

(L) It is not nuts and bolts. (RS) But this has answered all the questions for the article! In an incredible way! It has answered all the fundamental questions.

(J) This is the first time that we have had someone present who has the technical background to understand what is going on and what kind of communication we are receiving.

(RS) Yes, it has me excited!

A: His energy has effect upon group.

Q: (RS) Two short questions and then I will stop...

A: Ask as many as you desire!

Q: (RS) In our level three, does the use of anti-matter change the sign of the unit? Does this imply the reversal of the sign of the unit of space and time?

A: Yes, but problem has always been for level three entities, that the “other” side is uncharted, therefore experimentation is not recommended, unless with assistance from level four through six STO.

Q: (RS) That is an incredible answer because this is traveling in time. First they said that by using energy you can change the numerical value of the units, and from this (incomprehensible) you can make a (incomprehensible) show. Now the question: how you can go backward in time; by changing the sign of the unit: plus one second and we move forward, if that unit is changed to minus one second, we move backward. So the question, whether by using anti-matter we can move backward. But their answer was saying... precisely, that we are moving from level three to level four. Last question and then I am through.

A: Not correct, Roger!

Q: (L) It's not going to be your last question! (laughter) (J) They already said to ask as many as you desire!

A: This session has been designated for you! That is why we ar-

ranged for you to be here!! You are about to embark upon an extensive tour, whereby you will be communicating and networking, and in fact studying and researching with others of similar paths. The learning and knowledge gain that will result from this sojourn will have extremely major implications! Therefore, consider this to be your “night!”

Q: (RS) They insist on it! Then, I have another very important question! In Greece, at this time, at the University of Santia (?), the nuclear physics laboratory at the University, there is a potentially fundamental experiment going on based on my studies and this book here, [displays book] to search for fundamentally new source of energy by bombarding zinc 70 or molybdenum 100 via Gamma with 1.294 MeV energy. Will the experiment be successful... (Carla) Ah ah... they will not answer that! (J) They may not touch that one.... (RS) Will zinc 70 be a new source of energy? Can these substances be new sources of energy?

A: All of the experiments you speak of share one thing in common: They all “touch the borderline” from the perspective of the third density side.

Q: (T) When you talked about using the anti-matter they said: “Yes” you can work with it, but you are only getting it on one side and you can’t get to fourth density side unless you have someone working with you from over there, you have to find a fourth density being to help you here... but you are touching it, you are at the edge of where you can go in third density... (RS) Will you help us? (Carla) Yes, let’s be practical! (laughter)

A: Terry did not give exactly correct answer. It is possible to cross over into fourth density from third, using third density technology. In fact, this has already been accomplished by various individuals and groups on a more or less accidental basis, the problem is “what does one do when one reaches fourth density reality

with only third density training and experience?”

Q: (L) Could you, if we spent the time, help us with this training and technology?

A: Yes, but what do you intend to use it for? This is not like going to Disney World for a day, you know!

Q: (Susan) They sure told you, Laura! (laughter) (T) I guess then that what Roger is working on is hitting the edge of third density and it can cross over! My question is: if a crossover is accomplished, will the experimenters know what has happened? What will they do? Will they be aware that they have just stepped into the twilight zone, so to speak. Opening that up is a door, or a window, and stuff can go both ways! (L) We were told that the members of the famous Flight 19 are frozen in a time warp and are still trying to get their bearings! They think no time has passed. (RS) In this type of theory, this is very plausible! (L) Well, you don't want to find yourself in a similar position! (T) Yeah, Carla will be on the phone asking: “When is Roger coming home?” And you will be over in fourth density asking: “How do I get home from this one!” (laughter) (J) I have a question: If it is not like going to Disney World, does the ride ever end?

A: Too complex, your query is too vague.

Q: (J) I was just making a joke! (T) Mirth, mirth! (RS) Did they answer the question as to whether they will help us? (L) They said yes.

A: What is your knowledge quotient regarding following: electromagnetism, Einstein's “unified field theory.” And did he ever complete said theory, or was it completed under the supervision of consortium, and suppressed. And if so, what are the ramifications!!! Also, Roger, are you capable of “filling in the blanks,” we think so!

[Laura's note: I don't think they mean the "blanks" of the unified field theory, but rather reading between the lines of this answer! What, exactly, are the ramifications of research in this direction?]

Q: (RS) From the third level there cannot be a unification of electromagnetism and gravitation because they are identical. There is an identity between electromagnetism and gravitation. So, there is no need of the unification because they are identical. Is this view correct?

A: Yes. What about fourth level?

Q: (T) What does this mean for fourth level? (RS) To my understanding to the third level, this is where the possibility to go up a level comes in. If gravitation and electromagnetism are identical, then anti-gravity exists. The origin of anti-gravity is not unification. Einstein was wrong, but the identification that they are the same implies the existence of anti-gravity.

A: Wrong when searching on level three density exclusively, but this is where the Consortium comes in, i.e. "Can of Worms."

[Note: "Wrong" is referring to Einstein's theory.]

Q: (T) It is considered known to the general public that Einstein did not complete his Unified Field Theory, but that may be a falsehood. Part of the disinformation campaign.

(RS) From what we know, Einstein failed to achieve the Unified Field Theory because the assumptions were not realizable.

(T) Maybe his ideas were taken and completed by someone else and suppressed. [Roger sits at board] (RS) Can I ask a question? The origin of the mass of an elementary particle is primarily electromagnetic, therefore, the gravitational field of elementary particle must be primarily of electromagnetic nature. That's why the

view at level three is, outside mass, the gravitation and electromagnetism are identical. This is our belief at this time, supported by experimental evidence. Why is this wrong? I need an explanation.

A: Not wrong at level three, wrong to limit to 3rd level.

Q: (RS) Is it true that the universe has equal amounts of matter and anti-matter as seen from level three?

A: Yes, all others as well.

Q: (RS) Then it is true that the total time in the universe is null?

A: Yes.

Q: (RS) This is incredible!

A: But, Roger less pressure! [Roger lightens up] ...thank you. Now, remember, most important concept is balance. How is balance achieved?

Q: (L) I guess that whatever there is one of, there is one of the opposite.

(RS) Matter and anti-matter. So, if matter is flowing in this direction of time, anti-matter is flowing the other way. They balance each other.

(J) STO and STS. We have to have both.

(RS) This is my question of the total time of the universe which is zero. If we flow this way, maybe others in another galaxy are flowing another way. The sum is zero.

A: Not galaxy, dimension.

Q: (RS) Yes. Another level. I always think at level three!

A: Not any more! (laughter)

Q: (RS) How can we represent mathematically the identification of gravity and electromagnetism, including the fourth level that you suggest? How can this be done? How can the inclusion of the fourth level be realized?

A: We asked you to visualize for answers. It is always there for you to discover.

Q: (RS) It is not going to be easy, but I am going to give it a try.

A: What ever is?

Q: (RS) The question is how to represent mathematically the transition to the fourth level. I think that this can be done by the iso-geometries, the geometry which we discussed earlier, which is generalization of the unit of space and time...

A: Geometry is one key, but there is another.

Q: (L) What is the other key? Maybe its a three dimensional matrix. (RS) That's what we use. We also use the cubic. (L) Could you give us a clue. Just a little clue. (RS) Give us the formula!

A: Have already... access...

Q: (L) They say they already have. Well, you know, all the time when I type these transcripts, I constantly find that things have been said that I didn't realize at the time the import. (RS) We should have a session... because this is confirmation of the only mathematical model we have of the UFOs... the only one that exists as far as I know. We have a computer model... we cannot build a UFO, we don't have the technology, but we can put the formula into the computer and get a model.

A: Merge geometry with optics.

Q: (RS) What?! It is the science of light. (L) Geometric light?

A: Matrix.

Q: (RS) That is precisely what I have done. I've done a representation of light represented by a unit which is a matrix. I have already done this! Years ago!

A: But you left out one important factor, remember, hypothesis does not theory make!

Q: (RS) I made a conceptual hypothesis in my mind. That's not a theory. It has to be formulated in a quantitative way, that's the mathematics, the formula, and then this has to be proven experimentally that it works. Hypothesis, formula, and experimental verification is the process for a theory.

A: Now, what factor was missing, Roger?

Q: (L) What is it? (RS) I don't know. (L) Maybe it's because you didn't factor in fourth density? (RS) Oh yes! That's for sure! (J) Maybe that's the missing factor. (RS) But how... I do not know how to express it mathematically...

A: Light waves... gravity... electromagnetism...

Q: (L) They are toying with you. (laughter) (J) What is this, multiple choice? (RS) I have to think it over. In isogeometry...

A: What role do waves play in third level understanding of physics?

Q: (RS) Transverse oscillation of the ether... the medium that fills up the entire universe. No wave can exist unless there is a medium to propagate it. Transverse oscillations fill up the entire universe.

A: Light, gravity, optics, atomic particles, matter, anti-matter... unify, please.

Q: (RS) That lists everything...

(J) What do they all have in common?

(RS) Oh! All of them are vibrations of the medium that fills up the universe! We perceive things, everything, even spaces between things. Reality is the opposite of this. Because light is a wave, like sound. If you remove the air, sound cannot propagate. Light is the same thing. Light is a wave and cannot propagate unless there is a medium that fills up the entire universe. So what we perceive as being solid and empty is not true perception. The whole universe is filled with the vibration of this medium. So, without the medium, there would be darkness. So, light is an oscillation of this medium. A particle is also an oscillation only the wave propagates and the oscillation stays there. So when I move my hand from here to here, I have just moved the oscillation. The space is oscillating. We are completely empty, but space is filled up. So, the answer is that what they have in common is that they are all oscillations of this medium that fills up the entire universe as perceived from third level and I think from fourth. (L) Maybe they are talking about it in a spectral sense? (RS) They could be...

A: Now, what relation between gravity and light?

Q: (RS) I do not know. At this moment in my studies, I do not know. (L) Maybe that is the key? (RS) Light can be converted into matter, therefore there is gravitation. (L) But, what could the relation between gravity and light be?

[Laura's Note: What about time? Since, at the speed of light there is no matter and no gravity and no time, maybe the three are different ways of describing the same thing? Maybe time is an electromagnetic, gravity producing phenomenon or vice versa which has a byproduct: matter???)

A: Access knowledge base and network.

Q: (L) They said discuss it.

(RS) The only connection between light and gravitation... the pho-

ton and the photon produces a pair of electron and positron, particles and anti-particles, and those particles have gravitation. So, in this way electromagnetic waves... a photon can create matter...

(L) And matter has gravity...

(RS) And matter has gravity, so... it can be converted...

(L) But where does it come from?

(RS) That is a good question because it isn't known. It could come from a vacuum...

(L) But how does it happen?

(RS) In experiments in the laboratory, you shoot a photon at a nucleus and the nucleus spits one electron and one positron, and so you have conversion of photon into particles. Those particles have gravitation. I do not know if a photon has gravitation. I don't think so, it travels at the speed of light. There is no time. Time is suspended.

(L) Okay, is it true that at the speed of light, there is no gravity?

(RS) There is no gravity.

(L) Okay, then maybe the speed of light is the antithesis of gravity just as anti-matter is the opposite of matter?

(RS) That is a good point. A very good point!

A: Close.

Q: (J) Is it about balance?

A: All is.

Q: (L) If at the speed of light there is no gravity... (RS) There is no time... (L) Then gravity must be... (J) What keeps us in third den-

sity... (RS) The clue... But is the missing clue... are we discussing the missing point to go from the third to the fourth density?

A: Yes.

Q: (RS) Then the point is valid. (J) Is gravity what keeps us in third density? (RS) So, then if you go at the speed of light then you are in fourth density.

A: Now, what is missing factor which allows third density and fourth density matter to achieve light speed without disintegration? Think...

Q: (RS) That is the fundamental question of nuclear physics... matter cannot reach the speed of light intact... (J) Anti-gravity? (RS) Even by using anti-gravity. At this moment, matter cannot do this...

(L) Okay, if you have some matter and this matter is speeding up, and it is approaching the speed of light and it is losing its integrity the faster it goes, what if, at some point you start incrementally adding anti-matter which...

(RS) Use the inverse process... take an electron and positron and put one inside the other and recreate the photon. But matter cannot reach the speed of light... if it does, time stops... there is no dimension...

(L) Maybe it is consciousness?

(J) Awareness?

(RS) If it is awareness, yes...

(L) Can you factor in consciousness mathematically?

(RS) Yes, of course!

A: What is the missing link between matter and consciousness?

Q: (RS) Ah! (L) If we knew these things we wouldn't be here! (laughter) (RS) It is supposed to be a field. (J) Is it EM? (RS) No, a bioenergetic field. (L) What if consciousness creates gravity? (RS) Gravity is created by matter. (L) But isn't matter created by consciousness? Don't we collapse the wave by observing it? (RS) Yes, the mind can create matter...

A: There are no "gravitons."

Q: (RS) Not to my knowledge. They do not exist. They are in Einstein's theory, but I will never believe it... Does our consciousness create gravity?

A: Getting "warmer." Not "our."

Q: (L) Somebody else's consciousness creates gravity? (RS) Fourth level.

A: Level Seven.

Q: (RS) Oh yes! That I can understand! The ultimate level. Is it true that the universe, as perceived from level three, which is expected to be made up of equal amounts of matter and anti-matter, is, in actuality, open? That is, is matter continuously created somewhere in the universe? Matter and anti-matter?

A: Better word would be: Recycled.

Q: (RS) Is it true that the same recycling occurs in the center of the earth. There is a theory that the earth is expanding. I heard this at a congress, that the earth is expanding in diameter precisely because the center of the earth is in process of the creation of matter. Is this correct?

A: Off base, but all concepts are valid within unified dimensionality.

Q: (L) I guess that in some alternate universe that may be hap-

pening, it just doesn't happen to be here.

(RS) My biggest problem has never been new knowledge, but politics, particularly the politics on Einstein. Is the can of worms mentioned before, can you give me anything on this? As soon as you go beyond Einstein, there are all sorts of problems, political problems in our contemporary society. Any suggestions?

A: Political problems have root in effort to suppress knowledge already gained in limited quarters for purposes of control of civilization.

Q: (RS) That is the best answer I ever heard. Very, very good.

(T) I have two questions to ask. About experiments that are pushing the borderline between third and fourth density... what happens when the experiment reaches the barrier? What can we expect?

A: Depends on individual circumstances, as we already have told you, this has already happened many times.

Q: (L) The Philadelphia Experiment, I suppose... (J) Flight 19...

(T) Okay, those have had negative ramifications. What are the implications, reaching the densities, without understanding of what has been done?

A: Already answered.

Q: (L) Yeah, they talked about that. Insanity. (J) Yes, and the people who thought they found Flight 19 went nutzoid. When the researchers reach the barrier, will they recognize that something has happened?

A: Partially.

Q: (T) When the barriers have been breached so many times, can it be stopped? In other words, can the breaches be repaired?

A: Vague.

Q: (L) That's assuming that they don't close automatically. (T) Do they close automatically once the activity is stopped? No, that's too vague. While I was walking around outside smoking my cigar, I was getting the image that one of the reasons that Roger is here tonight is to experience this, but also to see and read what we give you. We are not making this up. It is coming from somewhere. There is substance to this information. Roger is going to Europe. You have colleagues in Europe who are working on these very same things. The Cassiopaeans have indicated that you are on the edge of opening this barrier. That this can be done, it has been done with disastrous results the few times that we know of and possibly other times that we do not know of. What I am getting at is, part of the reason you are here and seeing this may be because you need to take this information with you because when they breach these barriers, they need to understand what they have done. Because, if they don't there is a possibility that what is transpiring naturally will be accelerated. Does artificial breaching of the barrier between the densities accelerate...

A: Yes.

Q: (T) That may be why when we ask how long this process is going to take, this oncoming density change, they answer "one month to 18 years." And we were thinking that maybe they can't tell how long it is going to take for this transition point, this realm border to come through our section of space/time and do whatever it does. Maybe what they are referring to is not that, but what people might do in terms of breaching the barrier unknowingly. They are stretching what they know, and pushing onward, but they don't understand what this is all about.

A: Yes.

Q: (T) You just had the survival of the whole of civilization moved onto your shoulders, Roger! (laughter) Laura has been sitting here week after week saying “I don’t want the whole burden of the world on my shoulders!” Roger, you just got part of it! (RS) Part of it, yes. I was the technical advisor on the book, “The Andreasson Affair,” because she made all sorts of drawings of things she saw on spacecraft. Any comment on the (incomprehensible) Research Institute in Italy?

A: Institute is controlled by Carboni “Foundation,” which is linked to questionable funding sources; no need to be disappointed, however, as knowledge protects. Therefore one can work in any environment without corruption when armed with knowledge.

Q: (RS) I don’t understand. (J) Maybe you need to find out about it... (L) I don’t think you need to worry about it. (RS) What about Cardone? (Carla) The board said Carboni... (RS) Who is the guy we are talking to on the board?

A: Guy?

Q: (laughter) (RS) Did they say Cardone or Carboni?

A: Carboni Foundation.

Q: (RS) There is no foundation named this! (L) Well, there may be funding coming from there. (RS) Not from Carboni... (Carla) Wait and see...

[Good night to Carla and Roger who had to leave. Discussion followed.]

(L) As you demolecularize moving toward the speed of light, it can be represented as a cone shape. The point of the cone is the speed of light, a sort of singularity, and as you reach this point, this is where you apply the remolecularizer, because maybe you

remolecularize as you emerge into an opposite funnel on the other side. I wonder if the Transdimensional Atomic Remolecularizer is a device that applies anti-matter in incremental, graduated doses, for lack of a better word, as you are speeded up? At one end you have light which has no gravity, no time, no mass. At the other end we have gravity, time and mass. What is the transition? Of the three pairs we were given, they each seem to be opposite to each other: Light and gravity, optics and atomic particles, matter and anti-matter...

(J) It's all about balance. What is the relation between gravity and light? What is the missing factor which allows third density and fourth density matter to achieve light speed without disintegration? What is the missing link between matter and consciousness?

(L) What is the missing link? Well, I think the relationship is right there. What is it that slows down light causing photons to manifest, collapsing the wave, so to speak, and creating matter?

(J) It may be that this same factor that allows third density to achieve light speed without disintegration. What is the missing link between matter and consciousness?

(L) Well, the relationship is there. We were told we were getting close when we said "consciousness" but that it was not our consciousness, but that of level seven. [Laura's note: Could electromagnetism be the "field" of the consciousness of "God" or level seven that crosses all densities? Cayce once remarked that "God is electricity." Is there some range of electromagnetism in the human consciousness that can be detected, amplified, augmented by controlled electromagnetic waves?]

(J) They said that "creation" was a recycling.

Q: (L) Are you still there?

A: As always, Laura, do you think we go out to lunch or something? (laughter) You keep asking if we are here?!?

Q: (J) They are always here, in us. We are all interconnected. (T) We are them, they are us, right here! (L) Okay, guys, we are so glad you know so much physics. And, since you do, or, since “we” know so much physics... (T) Did you enjoy talking to Roger and would you like to talk to him again?

A: Yes. Will.

Q: (L) Am I getting warm when I say... we have light and gravity, optics and atomic particles, matter and anti-matter, all are ways of talking about a transition... are these three pairs of relationships?

A: Close.

Q: (L) What is the thing that collapses the wave function?

A: ?

Q: (L) Is it consciousness?

A: Yes...

Q: (L) There is more. Can this consciousness be expressed... (T) We are trying to get from a third density concept to a fourth density concept where there is no physicality, per se. At fourth density they don't have a problem with going at the speed of light and disintegrating, because it doesn't exist there...

A: Close.

Q: (T) So, for us to try and think of this in third density...

A: Variable physicality is the key.

Q: (L) What makes the physicality variable?

A: Awareness of link between consciousness and matter.

Q: (L) What is the link between consciousness and matter?

A: Illusion.

Q: (L) What is the nature of the illusion? (T) That there isn't any connection between consciousness and matter. It is only an illusion that there is. It is part of the third density...

A: No. Illusion is that there is not.

Q: (L) The illusion is that there is no link between consciousness and matter.

A: Yes.

Q: (T) The illusion is that there is not a link. In third density... (L) I got it! (T) Don't disappear on me now! (laughter) The relationship is that consciousness is matter.

A: Close. What about vice versa?

Q: (L) Just reverse everything. Light is gravity. Optics are atomic particles, matter is anti-matter... just reverse everything to understand the next level... it can't be that easy. (J) Wait a second: gravity equals light, atomic particles equals optics, anti-matter equals matter? It is all about balance. (L) And the answer must always be zero.

A: And zero is infinity.

Q: (L) So, you are saying that it is not that there is a link, the illusion is that there is separation. There is no difference, they are the same?

A: Yes.

Q: (T) If you warp space/time you travel by bringing your destination to you. (L) Or, you can reverse that and understand that

there is no distance between us and, say, Alpha Centauri, it is the alteration of perception that turns the axis and creates the illusion of distance.

A: Now, all you need is the “technology.”

Q: (T) The technology is being developed right now. (J) The technology has probably already been developed, it is just suppressed.

A: Yes.

Q: (L) I have a very strange sense that this interaction has ramifications?

A: Yes.

Q: (L) A hint?

A: We could but won't at this “time.”

Q: (T) Are these major ramifications?

A: Yes.

Q: (L) Is there anything further for this evening? (T) Do we need to impart anything further to ourselves?

A: No.

Q: (L) Then we will say thank you and good-night.

A: Good night.

END OF SESSION

3.27 May 31, 1995

Frank, Laura, SV

Q: Hello.

A: Hello. S__ V__!

Q: (L) I have been feeling that the group, as a whole, is under attack. What can we do about it?

A: Will work itself out. Power struggles within groups are quite natural at level three STS.

Q: (L) Well, I don't know what they mean by "power struggles." I just know that I feel uneasy and a tension in the air. What power is there to struggle for? We are all just who we are. (SV) You don't need to worry about it and get yourself into a frantic state! (L) Well, it seems that we are all being confronted with some of the lines we have drawn in the sands of life and all the things we think of as "musts" or "shoulds" or "ought-tos," our internal parent self, so to speak are having to be dealt with. I think that maybe what we need to look at is that lines don't need to be drawn. We just all need to do what is in front of us to be done and not try to control each other or decide what is best for each other and just be accepting.

A: All will settle like sand in a jar of water.

Q: (L) That is interesting. I used the idea of lines in the sand and the you use the analogy of sand shaken up in water. Is it a good idea to not print up or send out any more brochures? I was very upset by the giving out of the information with the names not altered or deleted.

A: It was not Jan in charge of that.

Q: (L) Who was in charge of that?

A: Open. Do not assume that was a negative decision.

Q: (L) So, this is ultimately beneficial?

A: Maybe.

Q: (L) So, this was a protective measure or device?

A: Yes.

Q: (L) Approximately how long before this tension in the group will go away?

A: Wait and see.

Q: (L) And there is nothing we can do to help?

A: Not issue.

Q: (L) What is the issue?

A: Let it be.

Q: (SV) Quit worrying. (L) Okay, I will. Next question. RS called me about Reiki for his eyes. He said he was diagnosed with macular degeneration. Is this the correct diagnosis?

A: Yes.

Q: (L) What is the cause of this?

A: Genetic.

Q: (L) Is there anything that can be done to halt or reverse it?

A: Open.

Q: (SV) Will the Cayce files help in this?

A: Cannot hurt.

Q: (L) Why can you not give us some sort of information to help out here?

A: Level one karmic situation.

Q: (L) Will Reiki help this?

A: Maybe.

Q: (L) Is there anything else that you can give us on this?

A: If so, you will discover it an another point in space time.

Q: (L) Michael Lindemann gave a very interesting talk on the subject of angels. Apparently there are a lot of people seeing and claiming to interact with angels. Can you tell us about angels?

A: Be specific.

Q: (L) Are there such things as angels?

A: Yes.

Q: (L) Are angels as they have been described: very tall, beautiful beings with wings or whatever?

A: Yes.

Q: (L) Who are the angels?

A: Refer to the transcript.

Q: (L) I don't think we have ever mentioned angels in the transcript.

A: Not by name. See the second session. [The Zendar or Zindar Council?]

Q: (SV) There is a book out called "Mary's Message to the World" by Ann Kirkwood. Is this book a transmission from the Virgin Mary?

A: No.

Q: (L) Who is this transmission from?

A: Various thought centers.

Q: (L) Why do these thought centers identify themselves as the Virgin Mary?

A: For purposes of familiarity.

Q: (L) Are these thought centers STS or STO?

A: Open. Discover by studying previously given information. You should review the material regularly, not just to familiarize yourselves with data, but also to learn by piecing together thought pattern segments!

Q: (L) If I remember correctly, there have been numerous presentations of the Virgin Mary put forward for disinformation purposes by the STS groups. Is that correct?

A: Yes.

Q: (L) Have there also been presentations of the Virgin Mary put forward by the STO groups?

A: Yes.

Q: (L) So, depending upon the results, and the teaching, that would be what would enable one to determine whether it is STO or STS?

A: Partly.

Q: (L) Is there some other measuring stick that we can use to determine whether teachings are correct or incorrect?

A: Wisdom by way of instincts; all there is is lessons.

Q: (SV) I was thinking about that earlier today. If you are under attack, how do you know if your instincts are correct? (L) Are instincts different from emotions?

A: Yes.

Q: (L) How can you tell the difference between instinctive knowledge and emotional reactions?

A: Emotions involve wishful thinking, instincts are “gut feelings,” psychic in nature, and are stronger. When it is wishful thinking, there is always psychic instinct seeping through which you can access if you use reason and examine your lessons of the past.

Q: (L) Well, for example, the lady at the MUFON meeting on Saturday, her response to Terry’s comments on channeled material as being STS, was that we were focusing on the darkness, or negativity, and that people who focus on darkness or negativity experience same. Could you comment on this please?

A: What do your instincts tell you?

Q: (L) My instincts tell me that she is wanting to believe so strongly and emotionally, that the aliens who have been abducting her are good guys, and that somehow she is so laden with an internal guilt complex that she believes that she deserves that kind of treatment, and that anything that is to the contrary, she rejects as wrong and evil.

A: Okay.

Q: (L) And, furthermore, it occurred to me that a person who really focuses on the darkness with the intention of participation is someone who moves away from the light and goes into the darkness, whereas someone who focuses on the darkness with the intention of diminishing it, keeps the light close to their back, and uses it to energize their own light so that they can illuminate the darkness. Is that correct?

A: Okay.

Q: (L) And, that someone who only looks at light, has their back turned to the darkness, not only are they blinded by the light, but

they are also casting a shadow behind them.

A: “The Emperor is wearing new clothes.”

Q: (L) Am I the one who is thinking the Emperor is wearing new clothes? (F) I would think that anyone who is hung up on the idea that there is nothing but light as long as you are willing to only see light is believing that the Emperor is wearing new clothes. (L) Is Frank correct?

A: Yes.

Q: (L) On Saturday I also met Nova M___ and her husband. They wanted us to take the session over to their house because they don’t smoke and are apparently not willing to submit to our environment. My instinctive reaction to that was “no, forget it.” Since that time, I have had other gut reactions to that, that there was some sort of “power play” going on there.

A: Open.

Q: (L) Would it be alright for us to take the session over to these people’s house?

A: Up to you.

Q: (L) Well, I don’t want to and Frank doesn’t want to. (SV) Well, all of us smoke. It wouldn’t make sense to go somewhere that we can’t smoke and be put outside like something dirty. (L) Yeah! We couldn’t indulge our nasty habits and be dirty and messy and play! Nah! Forget that! (L) In my aura photograph, there is a patch of green on my chest. In Cayce’s book on the subject, he says that light greens represent falsehood. I am very concerned about this.

A: Worry not.

Q: (SV) Well, in your case, it is a deep green next to a clear yellow,

not a pastel or pale green. Maybe you need to eat more fruit!

A: Worry not, you know who and what you are, remember, instinct!!

Q: (L) Well, Frank had a very beautiful aura. Why are others not more positive toward this knowledge?

A: Jealousy.

Q: (L) Well, that was pretty plain. What are others jealous of?

A: Power struggle.

Q: (L) Why are people jealous of us and why do they want to try to control us?

A: Fear being left behind.

Q: (L) Well, nobody is going to be left behind unless they make themselves disagreeable. (SV) Well, I dreamed that we all need to wash our dirty laundry, so I got up and put a load in! (laughter)
(L) Was J__ W__ correct that a person can change their aura by just thinking about it?

A: No.

Q: (SV) It is what you are! (L) Our ability to see or perceive, blue, according to some researchers, is very recent. Natives who live on the Blue Nile describe it as brown, Homer described the Mediterranean as the "Wine dark sea," and Aristotle said there were only three colors in the rainbow: red, yellow and green. Is this true, that the human race, in general, has only recently become able to see blue?

A: Yes.

Q: (L) Is this a reflection of the spirituality of the color blue?

A: Yes.

Q: (L) Obviously there are colors beyond blue, and as we attain greater spirituality, we will be able to see them as well, is this true?

A: Yes.

Q: (SV) When you look at a rainbow you can see a shimmer or haze on either side. (L) Could it be that as a result of constant straining to see at higher frequencies, some people's eyes suffer?

A: Maybe.

Q: (L) Could this be a problem with people in spiritual or personal development?

A: Maybe.

Q: (L) I have read a number of things recently purportedly channeled by the "Great White Brotherhood." I would like to know if there is such a thing?

A: No.

Q: (L) There is no "Great White Brotherhood?" (SV) How come Edgar Cayce talked about it?

A: Not as such.

Q: (L) What is it that they have been calling the "Great White Brotherhood?"

A: ?

Q: (L) What is the Great White Brotherhood that Cayce was referring to?

A: Various STO.

Q: (L) Do they identify themselves as the Great White Brotherhood?

A: Sometimes.

Q: (L) If they are not the “Great White Brotherhood,” what are they?

A: Fourth density STO.

Q: (L) What is their purpose or work?

A: Complex, suggest you wait and see.

Q: (L) Are we going to be contacted by the Great White Brotherhood?

A: Maybe.

Q: (L) What is the origin of the Anasazi tribe that lived in the cliff dwellings?

A: Nothing remarkable.

Q: (SV) I have a book on the Brotherhood... I get all kinds of things in the mail... one is from a guy who is supposed to be an extraterrestrial... I'll have to bring it... (L) What could we use to represent 7th density as a mathematical symbol?

A: Try this: [draws figure eight on side in ellipse]

Q: (L) When you get to the point of the Big Bang, or mass disbursement, what mathematical symbol would represent that? Plus, minus, multiply or divide?

A: NAB

Q: (L) Do you mean? None of the above?

A: Close.

Q: (L) What mathematical operation would represent this?

A: You have not yet discovered.

Q: (L) What kind of mathematical operation would take place at the point of the Big Bang?

A: One continuous cycling.

Q: (L) The transition of seventh density to the density where the cycling begins is from seventh to sixth or from seventh to first?

A: Neither.

Q: (L) Does it go from seventh to all densities simultaneously?

A: Closer.

Q: (L) Can this be expressed mathematically?

A: Maybe. Access your own channel.

Q: (L) What is my own channel?

A: You know.

Q: (L) I thought you were my channel?

A: We are group channel.

Q: (L) How can I access my own channel?

A: You have done it numerous times.

Q: (L) Was this what I was doing the other morning after Roger Santilli was here?

A: Yes.

Q: (L) Am I correct when I say gravity is time?

A: Close.

Q: (L) And gravity is the manifestation of time as put into effect by the limitation of third density consciousness illusion?

A: Closer.

Q: (L) Can this be expressed mathematically?

A: Go for it!

Q: (L) Frank, help me out here! (F) I can't help you out. You've blazed a trail into the woods all by yourself and I don't know how to find you. You have been told you can do it. This is obviously your forte. They told you to go for it. What do you want, a shortcut? (L) I want the formula! (SV) What about the thrill of discovery? (L) What about the agony of defeat? (SV) The agony of defeat... (L) That's what you get after shopping all day! (laughter) (L) I want it so bad! I don't feel capable! (Frank) Of course you are! (SV) If you can think of the question you can access the answer.

A: Time to say goodnight!

Q: (L) Good night.

END OF SESSION

3.28 June 3, 1995

Frank, Laura, Terry and Jan, Tom French, Cherie Diez, SV

Q: (L) Hello.

A: Hello.

Q: (T) I'm running on low energy. (L) Who do we have with us this evening?

A: Sorrillora.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) We have guests this evening; this is Tom and Cherie.

A: Hello Tom and Cherie.

Q: (L) Tom has a question.

A: Surely.

Q: (TF) What happened to my grandfather's watch?

A: Which one?

Q: (L) Which grandfather? (TF) Paternal. (L) Okay, what happened to Tom's paternal grandfather's gold pocket watch?

A: Under water.

Q: (T) Under what water?

A: It is clear with some silt or sand.

Q: (TF) What is that? (L) I don't think you are going to get a name because that is an artificial designation.

A: Visual reference. Shines in the sunlight, slipped off when attention was distracted.

Q: (TF) Did it slip off by itself or did someone take it?

A: Rubbed metal surface.

Q: (TF) Where was my father at the time?

A: At church.

Q: (L) Does that make any sense? (TF) Well, maybe. (T) Do you know where the watch is? (TF) No. (SV) Find out where he went to church and see if there is any water around there. (L) Maybe his father was nowhere near at the time. (TF) My father never went to church; he was an atheist. Did my father have anything to do with the disappearance?

A: No.

Q: (T) Was his father at church? You say his father was at church; Tom says his father didn't go to church. Why was his father at church?

A: Not only reason one goes to a church, think!

Q: (J) It might have been a meeting of some kind... (T) A wedding; a funeral... (TF) You're right. It's not that he never set foot inside a church. (F) He's not that much of an athiest! (T) Especially weddings; there's food after weddings! (TF) Okay, well, one more and then I'll be quiet! Was the watch lost or was it taken?

A: Lost.

Q: (L) Has this bugged you a long time? (TF) Not too long. A while.

(L) I have a question to ask about Tom. Tom had a dream that he shared with me, and I think he wouldn't mind sharing it with the group. Tom?

(TF) In the dream I am on an ocean liner. There are other people on board the ship, but I am not talking to them. I'm not with my friends or family. I am by myself. I among all these people, but I am not with them. It is a long journey. I walk back and forth on deck. Finally we come to a city, a major city, a seaport. I get off the ship; I walk through the city; I walk through the center of the city to the outskirts, into the countryside. The countryside is red; reddish all around. The streets are no longer paved; now they are dirt, red dirt. I come to a big house with a white picket fence under the shadow of a mountain. I know that I am supposed to be in this house. I go inside the house, there are other people there. Again, I am not talking with them when I first get there, and as the days begin to pass I do begin to talk to them and they begin to talk to me. I begin to feel better. Suddenly, in the dream, I realize that when I was first walking through the city toward

the house, I was a dog; in the early days when I had first been in the house, I was being transformed into a human being, and that all the other people in the house were once animals; and that that was why we were at the house, to learn how to become a human being. It had something to do with the power of the mountain. (L) Now, the question I have is: is there some significance to this dream that you can comment on?

A: Not of great significance in a psychic sense, merely a reflection of the subject's awareness of metamorphosis within his own life path.

Q: (L) Well, that was Tom's interpretation and it blew my theory all to hell! (T) What was your theory? (L) Well, I was just sure he was an alien and he came to Earth on this big ship from the Dog Star, Sirius... (J) To Georgia!! (laughter) I liked my interpretation better! (T) Make for a heck of a book! (SV) She's been watching too many of those UfO videos!

A: Active imagination!

Q: (L) Well, I got told! Now, our questions. Why did the Incas and other South American cultures create their cultural environment in mountainous areas where they were forced to terrace to grow food, whereas the European culture developed on level terrain, mined in the mountains... (T) And a lot of them starved because they didn't use the mountains correctly...

A: Mountains were of a different nature in two cases.

Q: (L) So, the mountainous terrain was more fertile in one area than the other; is that the point we are getting at here?

A: Bingo!

Q: (J) That was what I thought. (T) Did the Europeans try terrace farming?

A: No.

Q: (L) Why? (T) Yeah, they built aqueducts, why not terraces?

A: Why should they try something unnecessary?

Q: (T) Why was it unnecessary? (L) No, we know that. They had plenty of arable land that was flat. Why was it necessary in South America? (J) Because they didn't. They had to use what they had.

A: Yes.

Q: (T) Works for me! (L) It was said in a previous transmission that the area around my house was a "multiple reality station." Is this because of our activities, or is this a pre-existing condition of this house and general location?

A: Two questions.

Q: (L) Is this because of our activities?

A: Partially.

Q: (L) Is it also a pre-existing condition of this area?

A: In a roundabout way.

Q: (L) Does this have anything to do with the purported tunnel beneath the house?

A: Ditto last response.

Q: (L) Okay, you say "in a roundabout way." What is the round-about way? What is the relationship?

A: Crustal energy flow patterns.

Q: (Terry) What is crustal energy?

A: Self-explanatory.

Q: (T) Okay, it's the energy that is flowing through the crust we are talking about, or the energy the crust is making... we are talking plate tectonics here? (J) Yes, plate tectonics?

A: Too many comments.

Q: (T) Are we talking plate tectonics?

A: No.

Q: (L) Are we talking about electromagnetism?

A: Close.

Q: (T) How close to electromagnetism? (L) How close can you get? (T) Right! (laughter)

A: Related.

Q: (L) Okay, is this an energy flow pattern that is significantly different at this point in space/time as opposed to, say... (J) Our house?

A: Not correct concept.

Q: (J) It's not related to space and time?

A: You are getting "colder."

Q: (L) It is not related to space/time. Is it related to a gridwork of energy?

A: Not gridwork, more like "halo."

Q: (T) A corona? (L) Like an aura? (J) Is it like an aura?

A: Yes.

Q: (T) The planet's aura?

A: Variations within flow.

Q: (L) Is this particular location beneficial to my residence here?

A: Subjective.

Q: (L) Is it particularly beneficial in terms of this kind of work?

A: Can be.

Q: (J) It is obviously not detrimental. (T) Can it be detrimental?

A: Yes.

Q: (L) In what way? (J) Yes, how is it detrimental?

A: 64000 dollar question!

Q: (T) Now, since we hit the 64,000 dollar question, are you going to give us the 64,000 dollar answer? (L) Why could it be detrimental? Is it because it could be detrimental if a person is following the STO pathway?

A: Maybe.

Q: (L) Could it be detrimental to one following the STS pathway?

A: Maybe.

Q: (T) Okay, the energy flow pattern can be detrimental or beneficial. It's just energy, not positive or negative.

A: This is more complex than your queries allow.

Q: (L) In other words, our questions are not complex enough to get the answer?

A: You are "rushing it" due to company present, now please relax and just behave as always.

Q: (J) She's trying to show off! (L) I am not! (SV) That's what they said! (L) That's not what they said, and I am not the only one asking questions. (T) Let's start over with something simple.

We are talking about the aura or something similar. The planet's aura.

A: Yes.

Q: (T) Okay. We are focusing on this site here in relation to the energy of the planet.

A: Okay.

Q: (T) You have indicated that there is some kind of a correlation between the location and the energy in the planet. The energy in the planet is all the way around the planet and is affected by the planet and everything that goes on around the planet, in the planet, on top of the planet and all over the place. We are one location. As this energy ebbs and flows along it influences the work we are doing here. Am I on track here?

A: Close.

Q: (T) Okay. So, the crustal energy flow patterns, if they ebb, we lose power... we need to draw more power in order to keep the connection?

A: ?

Q: (T) I don't even know what I said! (L) Try it this way. We are talking about an aura. In an aura system in the physical body, it can sometimes reflect both the spiritual and physical state of the person. Is this location similar to a chakra?

A: If you prefer or other.

Q: (L) Similar to a chakra?

A: These are all merely labels.

Q: (L) Okay, so it is like an energy vortex?

A: Okay...

Q: (L) An energy vortex in the body, a chakra in the body, is a place where the body energy interfaces with the universe. Tell us about chakras, Susan. (SV) There are all different kinds. There are the seven major chakras, the ones in the palms, almost every joint in the body has a chakra... (T) What do they do? (L) An interface point? (SV) Yes. (L) Is this what we are talking about here? An interface between this density and other densities?

A: First of all, “chakras” are a little understood and non-proven phenomenon. Now, it just so happens they do exist, but in different form than reported by many in the so called “psychic” community. So you see, you have opened yet another “can of worms.”

Q: (L) Well, Worms Are Us! I knew that question would last all night! Why did I ask it? (SV) Well, let’s go for it! (L) Okay, first worm... (T) Worm One... (J) Worm One... (L) ...what, exactly, is a chakra?

A: An energy field that merges density one, two, three or four with five.

Q: (T) A focus point that merges densities to fifth density contemplation level?

A: Close.

Q: (T) What purpose do we merge to the contemplation level through the chakras?

A: You are all connected with level five on a short wave cycle, reference text.

Q: (L) Does each chakra relate to a color as we have been told?

A: In a sense, but not primary issue.

Q: (L) What is the primary issue?

A: The connection with physical imprint locator.

Q: (L) So, that has to do with this area right here? Are we back to the house?

A: On a physical body, density levels one through four.

Q: (L) So, we are sitting in the middle of a giant chakra, the navel of the world! (J) Better than the armpit of the world.

A: What are you speaking of?

Q: (T) Tallahassee, the armpit of the world! (L) I was just joking, we are not in the navel of the world. We are in a chakra... (T) In order to be at this location... (L) ...is that it?

A: You are drifting and there is much too much thought fragmentation tonight.

Q: (L) Okay. (J) I am wondering if it is related to the storm? (L) Let's take a break. Break

Q: (L) We have a real serious dude tonight. He's not letting us play! (SV) I wonder if there are seven major chakras in the same place as described by others. (L) Okay, we're back.

A: Back?

Q: (L) Well, we really didn't leave, you know. (J) Yeah, we went for a walk! (L) Susan wants to know if there are seven major chakras related to the physical body as has been taught by many sources?

A: It varies according to individuals.

Q: (SV) You mean some people have more chakras than others?

A: Name a "chakra."

Q: (L) Is there a base chakra, the root chakra?

A: We asked you to name one.

Q: (L) Well, we named one. (SV) There's the heart chakra, the third eye, I don't know the Hindu names for them... (L) Name a person?

A: No.

Q: (SV) The lady who wrote "Hands of Light" said that when she does healings, spirit guides...

A: What happens to those who have major body parts missing?

Q: (J) Oooh! (SV) But the etheric field is still there! They have proven that with Kirlian photography...

A: Is that the same thing?

Q: (L) Well, is that which is photographed by Kirlian photography the same thing that makes up the chakras? (SV) Well, you would have the seven major ones... you can't live without a head and torso... (L) What happens when you have organs, the glands related to the chakras, taken out. Women have hysterectomies all the time...

A: Good question!

Q: (SV) But the energy's still there even though the body parts are gone! That's what I have been taught.

A: Who says?

Q: (SV) Do you want to know the names of my instructors?

A: All we are trying to point out to you, is that you are delving into an area where purported fact is not proven, and the entire subject is only slightly understood at your level. It is better to get facts before proclaiming knowledge, lest you make serious mistakes!

Q: (SV) But what about what Barbara Marciniak said about the chakras... she talked about 12 chakras, seven internal and five external? Was Barbara onto something?

A: Vague.

Q: (T) It was not what Barbara was onto, it was the information she was being given. (L) Was the information Barbara was given as far as the chakras, correct as far as it went?

A: Close.

Q: (L) Well, there's a clue. (T) It better be, we gave it to her. (J) True. (T) If they said no... (J) ...we are in a lot of trouble. We had better find something else to do on Saturday night. (L) We could bowl. Canasta, anyone? This would make a great card table. (J) Bridge? (L) I don't know how everyone else feels about it, but maybe we should just read Marciniak on this one for now and drop the subject. (T) They have been saying that the chakras as they have been taught may not be entirely accurate. The information about these energy points is that they do not exist as they have been laid out by others, but that they exist in different people in different places because of the way the energy flows in each individual. They don't always exist in the same place just as the energy vortexes on the planet fluctuate and change. So, within the person the energy changes and fluctuates... (J) Do the chakras move around?

A: They may.

Q: (T) Do different people have different numbers of chakras?

A: Yes.

Q: (T) So, the whole idea of chakra work, not to take anything away from what Susan has been doing, is very much incorrect as it is laid out?

A: Maybe.

Q: (SV) Okay, if you sensitize your hands, could you pick up on this energy on the body? Could you detect the chakras?

A: Maybe.

Q: (T) Will Reiki allow you to find the chakras as they move about?

A: Maybe.

Q: (SV) What about Therapeutic Touch?

A: Maybe.

Q: (SV) I guess maybe I had better find out. (L) How does all of this relate to this house and what we are doing here? (T) We are working on a larger scale now. (L) Does this house have something to do with connecting up chakras in our bodies?

A: You are drifting again.

Q: (T) Is it that this energy will move just like the energy in a body will move. We are working at this point because, at this time, this is where the localized energy is in this area, but that this is going to be moving?

A: Again, you have touched upon a group of subjects that require massive study to accurately explain.

Q: (J) Does this mean that we have to study and learn more before we can even discuss this with you?

A: Close.

Q: (SV) Would Edgar Cayce's material be a good place to start?

A: This is a good place to start, but it will take much "time" and effort.

Q: (L) Are you suggesting that perhaps this is a subject that we don't need to go into?

A: Up to you.

Q: (J) At this point, we don't have enough understanding. (T) Is it something important that we should be looking into?

A: Open.

Q: (L) Let's go onto something else that is more simple. The other night the children saw some lights in the sky. I went out to see what they were talking about and at that point there were no moving lights, but there was a single, pulsating, red light about ten degrees to the right of Jupiter. My initial reaction to it was that it was atmospheric twinkle of a large red star or the planet Mars. There was nothing there the following night. What was it the children saw?

A: Children saw planes and a helicopter.

Q: (L) Well, what was it I saw when I saw this red, pulsating light which did not move for quite some time?

A: Mars.

Q: (L) It was not Mars because it wasn't there the next night.

A: Clouds.

Q: (T) Yeah, there were clouds on Mars that night. (J) Well, lets move on. (L) Well, I thought it was Mars. (J) You were right.

A: You were right.

Q: (J) That's what I just said. (L) Now, we want to know if there is any correlation between movement of UFOs and weather patterns... (J) Specifically, thunderstorms.

A: Correlation?

Q: (L) Okay, can UFOs not fly during thunderstorms, or electrical storms?

A: Incorrect.

Q: (L) Okay, they can fly during thunderstorms?

A: Yes. But “fly” is improper term.

Q: (L) Okay, what do they do during thunderstorms if they don’t fly? (J) They bob and weave! (SV) They are projections, aren’t they? (J) Yeah, I don’t think they are actually here, down in the atmosphere, anyway.

A: Operate.

Q: (T) Well, the real question is: does the thunderstorm interfere in the EM flow between densities?

A: Can.

Q: (L) Can thunderstorms interfere with their projection ability?

A: Yes.

Q: (L) Do thunderstorms or electrical activity inhibit them?

A: Ionization.

Q: (T) Is the fact that there are very few abduction cases, at least I read about, and I’ve read quite a few of them, during thunderstorms, have to do with the thunderstorm interfering with the EM, so that the abduction would be much harder to do, therefore they don’t bother doing it?

A: No.

Q: (T) Can abductions take place during thunderstorms?

A: Yes.

Q: (L) Is there a possibility that thunderstorms possibly enhance this activity?

A: No.

Q: (T) So third density EM disturbances don't disturb fourth density?

A: Can.

Q: (J) Can they control it. (T) Well, I haven't read very many things about abductions during storms. (L) Well, I have read about a few, enough to break it as a rule. (T) Is there some reason that it isn't happening as often during thunderstorms? (J) They don't want to get wet.

A: Can you drive a car during the rain?

Q: (J) Yes, but if it is raining really hard, you avoid it. (L) Is there any particular reason why more abductions and UFO sightings occur at night?

A: Not correct.

Q: (L) So, you mean there is as much activity in the daytime as there is at night?

A: Yes.

Q: (L) Well, that blew that theory. Is it true that the vastness of space is an illusion of our units of space time?

A: Too complex for simple response.

Q: (L) Oh dear. (J) We're just way over our heads tonight, aren't we. (L) Well, let's try this one...

A: Trying too hard to carve impression.

Q: (L) Not really. We want to ask these questions...

A: Yes, really!

Q: (T) Do you have anything to impart to us? (L) Yes, you have the floor. (T) Or the table... (J) Or the walls, or the ceiling...

A: Just ask more simple questions instead of trying to solve major riddles in one session.

Q: (T) Here's an easy one: is the EM wave still circling the Earth?

A: Yes.

Q: (L) I don't want to ask simple questions. (J) Is this affecting the recent tropical storm? (T) Yeah, is the EM wave part of the reason for the storm out here in the Gulf?

A: Close.

Q: (L) I don't think I have any simple questions... (J) What are the Marfa lights?

A: Window to this dimension leaves static.

Q: (T) Is there a window to this dimension... (L) In Marfa?

A: Many windows on Earth.

Q: (J) Is there any correlation between the Marfa lights and the proximity to Carlsbad caverns?

A: Try getting up close to Marfa lights!

Q: (J) Yeah, I know, you can't. As soon as you walk up close, they disappear. (L) How do they know you are walking up to them?

A: Not proper concept.

Q: (L) What is the proper concept? (T) What happens if you get close to them?

A: They appear at other location.

Q: (J) Does the EM from your body repel the light?

A: It is visual reality representation only.

Q: (J) So, they are not really there, you just think you see them?

A: Close.

Q: (T) How close do you have to get to them for something to happen?

A: No.

Q: (T) You don't have to get close to them? Well, you don't have to get close to them, they're just a residue. (J) Are they a refraction of something that is going on someplace else? (T) How far...

A: Close.

Q: (T) They are a refraction of something that is going on someplace else? (L) So, when you get close, you can no longer see them because... (J) ...the angle is wrong. Where are they actually happening, if not there?

A: Somewhere else from viewer.

Q: (J) Thanks! We got that. (T) On the surface or underground?

A: Review two answers past.

Q: (J) Are you referring to the visual reality representation?

A: Yes.

Q: (J) So, they don't really exist in third density?

A: Close.

Q: (J) Are they like a bleed through?

A: Yes.

Q: (T) But the event is not happening where you see the lights... where the observer sees the lights?

A: Terry, pay attention!

Q: (J) He's tired tonight. (L) Okay. Let's ditch that one, then. Now, the general scientific opinion is that the major dying of dinosaurs occurred 65 million years ago. You have given us the figure 27 million years ago. Can you explain the discrepancy?

A: Radio carbon dating is not exact science.

Q: (J) They have said that before. (L) So, you are going to stick with your 27 million?

A: Stick?

Q: (L) We must have somebody who is really on the outer fringes here! (J) Yeah, lighten up!

A: Same could be said for all present!

Q: (J) Same to you, fella! (L) Let's see if I have another fairly simple question here... (J) Don't mean to be testy tonight... (SV) Blame it on the weather. (L) I want to ask my TDARM questions because poor old Roger really stirred my brain... (F) Did he give you those questions? (L) No, but my brain was stimulated and I thought of them and if we could get some answers, it might help his theory a lot. Well, we will ditch them. Maybe Tom and Cherie have another question... (C) When are we going to finish this project?

A: Question should be "if," not when.

Q: (TF) Oh great! Thanks, Cherie! I'm going to have this hanging over me now!

A: Seems to be struggle within organization!

Q: (L) Is there? Are you getting a hassle about it? (TF) Not from

the people that count. But, it's a political organization like any other. (laughter) She can do this because she doesn't have to write this thing! (L) Is there anything you can tell Tom to help make it easier?

A: Tom's future lies in independent career.

Q: (laughter) (J) Just what he wanted to hear! (TF) I may be fired! (L) No, I don't think that's what it means!

A: No.

Q: (L) See, you're not going to be fired!

A: Writing is your "calling" but as author, not journalist, your publication has so far survived being absorbed by the Consortium, but only barely, and that may not be true in the near future!

Q: (L) You do know what the consortium is? (TF) Are they referring to Robert Bass?

A: This is but one portal.

Q: (L) I guess that means they can get in that way or another way. Well...

A: You would not appreciate the changing atmosphere that would accompany a "buy out."

Q: (laughter) (TF) That is an understatement. (J) That means that this project would be their property and you wouldn't be able to use it.

A: There is much more to the puzzle than what appears on the surface!!!!!!

Q: (TF) See what you started with your question! (T) It's all your fault, Cherie! (C) I didn't even ask about the photos! (T) That's

Pulitzer stuff, there!

A: Photos can “disappear!”

Q: (J) Oh great! Oh great! (T) We are moving into the warning stuff, now.

A: Do you remember the curriculum at journalism school, Tom?

Q: (L) I’m sure he does! What’s the point?

A: Question is for Tom.

Q: (TF) Sure, why?

A: Do you suppose there may have been any propaganda?

Q: (TF) I guess that depends on whose point of view. (T) That’s always true.

A: Yours.

Q: (J) Yeah, what was your point of view? (TF) This is not facetious, but the only propaganda I remember was IU basketball! (laughter)

A: Not being aware is a symptom of successful methodology... beware!

Q: (L) I guess that not being aware that you are being propagandized is a symptom of good propaganda! (TF) Yeah, that would be great propaganda! (L) So, what’s your point here?

A: You will soon become disillusioned by events soon to take place. This is good, because it will represent an awakening on your part, as you are a genuine and good hearted and honest soul.

Q: (J) That’s nice! (TF) Whose class had propaganda?

A: Not point, was not class, was general direction of program, which is symptomatic of a much bigger issue.

Q: (C) What events are soon to take place?

A: Take over of employer is imminent!

Q: (T) Whose taking over? (L) They said the Consortium. (T) Are we talking about the overall, total media? (J) Is it just the St. Pete Times or... (T) ...that one they haven't got hold of yet... (L) Publish in a hurry...

A: Yes.

Q: (J) Yes, what? (T) Either publish in a hurry or go for the book and forget the series. (TF) Don't say that in front of Cherie! (T) Her pictures can go in your book. (TF) Don't say that in front of Cherie! (laughter) You can't publish color if it's in a book. (C) If they are in a book they are bad reproductions. (T) Sorry...

A: Your instincts as a reporter are to uncover hidden truths, but beware that you have been trained to uncover only some types of "truth," and not others.

Q: (TF) I want to ask one more question about the watch. Which state of the Union is the body of water located where the watch is?

A: Do not know, as we access visual reference only, and cannot determine artificially designated borders in this instance. If watch were lost next to road sign, for example, it might be different!

Q: (TF) Is the area around the body of water flat or mountainous?

A: Appears to be "broken."

Q: (L) The area appears to be broken?

A: Close.

Q: (L) Rough terrain? (TF) Why was my father in church?

A: Open.

Q: (TF) Was it a ceremony involving one of his children?

A: Maybe.

Q: (T) Maybe is a better answer than “open.” (L) Jan, tell Tom about your Margaret S___ thing. (J) God, I can’t believe you remembered that name! (L) I remember everything I type after I type it!

(J) That’s amazing. Yeah, I had a little thing that I wanted the Cassiopaeans to answer for me, and they had a real hard time visualizing it for me... they just kind of focus in on...

(L) No, they visualized it extremely well; they saw you in a basement with your friends with candles and they described it as some sort of ritual activity. Jan wanted them to tell what she was doing...

(J) Actually, I wanted them to repeat a phrase... we were doing, I guess, some sort of black magic, trying to put the whammy on a biology teacher that nobody liked... (laughter)

(L) Jan has a past...

(T) The thing is, with the channel, they see what we see, they know what we know... what’s in your mind and subconscious...

(L) ...or what you saw...

(T) Anything that is not within the channel itself, they cannot pick up...

(L) Oh, no! They have come through with tons of stuff that’s not in this room or in anybody’s mind in here!

(TF) If they only know what's in ya'll's mind, how can you ask questions about Jesus... how could that be within...

(L) I think what they do is focus on a point in space/time that they access like a computer, but that all of the artificial constructions that we have created to separate and define are like Greek to them.

(J) Well, time is definitely something that man has created because we live on a planet that has days and nights and the passage of seasons. If we lived on a planet that did not have days and nights and passing seasons, we would not have the concept of time. (F) Or, if you were floating around in space...

(J) ...then you wouldn't have up or down either..

(L) The other night I was looking for a bottle of ear drops. We asked the Cassiopaeans where they were. They said: in the bedroom, drawer, white cloth and symbols. Well, I found them in a make-up bag on top of the drawer, the bag being lined with white cloth. And, what is make-up but "symbols?"

(F) That's interesting because I had forgotten about that.

(L) Yes, it is strange what is accessed and how it is represented. Tom, do you think there are going to be changes at the Times?

(TF) No.

(L) Well, you might want to consider getting this thing finished as soon as possible anyway...

A: Will be a "take-over," count on it!

Q: (TF) I guess there could be different kinds of take-overs. (J) Yeah. It could be just a change in management. (L) Okay, Cherie, do you have any other questions? (laughter) (C) I'm thinking. (L) Now that you opened that can of worms... (J) Worms are Us! (TF)

I didn't mean to monopolize this session... (J) You didn't. Don't worry about it! (T) Not at all! (LM) [just coming in the room] What was the question and what was the answer? (L) It was a whole series of them. Cherie asked a question that opened a whole can of worms. (TF) Bottom line is: I have to write quickly! (L) Yes, worms came squirming out all over the place. (J) Changes, take-overs... change of atmosphere... (L) What would you do if that happened? (TF) I don't know... you just have to roll with the punches. (L) Okay, they don't want me to ask any of my time travel questions... (T) I am at zero energy level tonight... (L) That must be what our problem is. Terry is over there zoning out on us. (TF) What do you mean "what your problem is?" (L) Well, when any one of us has low energy, it limits the reception. (J) Why is Terry's energy is so low tonight?

A: Has virus.

Q: (SV) Don't breathe this way! (T) Ebola is here! (L) I was curious about the kamikaze virus I had the other day. It made me think about virii in general. Since virii don't have DNA, is it possible that they could be used to modify DNA?

A: No.

Q: (J) Well, that's good. (TF) They don't have DNA? Do they have RNA? (L) Well, they are missing one or the other... (J) They are cellular parasites... (SV) Are you going to ask more about the tunnels? (L) Were there any ramifications to this virus not apparent on the surface?

A: No.

Q: (L) Okay. (J) When I got home from work the other day. I realized that I was hungry and suddenly I got the shakes and I was real dizzy. I rushed in and made myself a peanut butter and jelly sandwich and drank a glass of milk and it seemed to calm

me down. Was this because I had not eaten?

A: Low blood sugar.

Q: (J) Is that indicative of a condition that I have now?

A: Vague.

Q: (L) Does that mean she has a.)hypoglycemia or b) hyperinsulinism?

A: No, no.

Q: (L) Neither. Was it just a momentary low blood sugar condition from working too long without eating?

A: Yes.

Q: (J) I physically had the shakes and I was dizzy and nauseous.

(TF) What was the Mmmmmmm sound in my father's dreams?

(L) You're big into dreams, huh? (TF) It's a family thing!

A: Was accessing sound waves in alpha state not normally audible.

Q: (TF) Why did he find the dreams so threatening?

A: His interpretation.

Q: (L) Maybe it was something he didn't understand and it scared him.

(TF) Was it related to Germany?

A: No.

Q: (TF) He had a series of dreams one summer, 1943, and it was interesting because his father, the dream analyst, could help him with it.

(F) Was his father a dream analyst?

(TF) Right. The same one that lost the watch.

(L) Was there some kind of antagonism between them?

(TF) Well, he was a Freudian dream analyst, so, yes! (laughter)
Nothing more than the normal father-son stuff.

(L) Is there such a thing as normal father-son stuff?

(SV) I doubt it.

(TF) That's true.

(L) Nothing on this planet is normal, or so it would seem. Well, unless somebody has a real outstanding question they just have to ask, I think we should shut down for the night.

END OF SESSION

3.29 June 6, 1995

Frank, Laura

Q: (L) Hello.

A: Stop.

Q: (L) What does that mean? (F) Don't ask me! (L) Hello!

A: Hello. Azoref from Cassiopaea.

Q: (L) Who was it that said stop?

A: Static.

Q: (L) There was static?

A: Yes.

Q: (L) What was the source of the static?

A: Not important, static always present to some degree.

Q: (L) I want to ask some fairly quick questions.

A: Okay.

Q: (L) With whom were we communicating on Saturday night?

A: Cassiopaea.

Q: (L) Was there any corruption in Saturday night's session?

A: Maybe.

Q: (L) Well, I am not looking for a maybe. I felt somewhat offended by the atmosphere that was generated. We had guests and it was important...

A: If corrupted, came from 3rd level.

Q: (L) Can you only identify the corruption that comes from your level?

A: No.

Q: (L) Was there an element of... I don't want to lead here... my impression was that the group was in a state of tension, is this correct?

A: Yes.

Q: (L) Why?

A: Jan was unhappy because of guests.

Q: (L) Why?

A: Not notified ahead.

Q: (L) Well, I expected Jan and Terry to arrive early enough to tell them and I was saving it until then as a surprise, but they came late so I just figured things could happen as they happened.

A: Jan feels you should keep her "abreast."

Q: (L) Well, essentially, that is how things have been done, but, at the same time, a lot of things happen spontaneously. If it wasn't long distance, I would probably keep her more 'abreast' as you say. And, besides, I am a big girl. I don't need another mother. Frank and I have been doing what we do, more or less directed by our own inner urgings for close to four years now. I don't think we should fix it if it isn't broken!

A: No need for explanation, just answered question for you.

Q: (L) Well, I felt a little strange when I was accused by Jan of "showing off" for our guests, and then the channel reflected this same attitude. What's the story here?

A: If there is strong prejudice by any member or members of level three channel participants it may cause messages to be altered at the point of reception.

Q: (L) Well, then that must be what Jan feels. But, what she doesn't realize is that it was important to me for ALL of us to appear in our best light and that what we are doing to be seen as intelligent and professional. I mean, I didn't ask to be picked for the Times series. But, at the same time, I have certainly paid my dues and worked very hard for a very long time. And, Frank and I have sat here for almost four years in a dedicated and open way when no one else would bother to participate. And that is not even considering the 20 or so years before this that I have obsessively pushed for a breakthrough. I mean, it's not like I just woke up one day and said: "I think we will channel the Cassiopaeans today and go out and find a Times Reporter to write about it!" I spent a lot of time preparing questions and it seemed that whatever was making it through the "prejudiced channel" did not even want to deal with questions that were quite similar to many we have asked in the past – so it seems that the prejudice came through toward me in a specific way.

A: Yes.

Q: (L) Well, if people can be so easily subjected to prejudice and emotional thinking, would that not be considered psychic attack?

A: Result of. Careful not to make hasty moves based upon events which may be transitory in nature.

Q: (L) Well, I feel like we have all been under attack...

A: Attack does not emanate from Terry and Jan.

Q: (L) Well, the whole session seems ruined. Even the answer about the lights in the sky was verifiably wrong. You have said that the channel is “grooved” and cannot be corrupted, yet obviously wrong answers were given, and it seems that you are saying that the attack is “through” Terry and Jan and the garbled emotions they are experiencing, correct?

A: Yes.

Q: (L) Well, even the answer about the lights in the sky. Mars is 120 degrees away from Jupiter... the answers given to Tom and Cherie may have been based on this “prejudice” as you call it... Tom and Cherie were upset by this, I was upset... the whole thing was very upsetting! I need some help here!

A: Patience pays!

Q: (L) Well, do Frank and I have any strong prejudices right now creating any corruption?

A: No.

Q: (L) Well, what about Tom and Cherie’s article?

A: 20 or 30 months.

Q: (L) What about the Times being taken over?

A: Eventually will happen.

Q: (L) Is it imminent?

A: Define imminent.

Q: (L) Within twelve months?

A: Not likely, but possible.

Q: (L) What is the source of the attack on Terry and Jan? If their emotions are being attacked, I don't think it would be possible to get a clear answer to this question with them present...

A: Lizards.

Q: (L) What about the information about Tom's grandfather's watch?

A: Open, if concerned, suggest new session.

Q: (L) Well, that whole thing just left me with a bad taste in my mouth. V__ wants to attend soon. Is that alright?

A: Up to you.

Q: (L) Well, V__ has a lot of "prejudices" which could restrict the information. Is this correct?

A: Maybe.

Q: (L) You understand that I am trying to protect what Frank and I have worked so hard and long to achieve...

A: Of course.

Q: (L) And, I am trying to protect the integrity of the information, and I am trying to protect the reputation of the information. And, if we invite somebody who is, for God's sake, a newspaper reporter, and somebody can come in and blow the whole session

with attitude or prejudice, no matter what the source... do you see my point here?

A: Yes. Suggest Tom and Cherie attend smaller session.

Q: (L) Well, what am I going to do?

A: Follow your instincts, but strongly suggest patience, or attack is successful!!!!

Q: (L) Oh! So, this is a very subtle and concerted effort to break up the group!?!?

A: Yes.

Q: (L) Well, even without the attack syndrome, we all have very strong personalities and there seems to be a control issue going on here too.

A: Part of attack!

Q: (L) Well, how long is this attack going to continue?

A: Open according to learning cycle length.

Q: (L) Should we temporarily suspend the sessions?

A: Up to you.

Q: (L) Would the attack end sooner if we do not suspend the sessions?

A: Maybe.

Q: (L) Would it help to end the attack if I did suspend the sessions?

A: Less likely.

Q: (L) Okay, that's the clue. We shall just carry on.

A: Yes. Goodbye.

END OF SESSION

3.30 June 9, 1995

Frank and Laura

A: Zauto.

Q: (L) Is that your name?

A: Yes.

Q: (L) I like Z names. Where are you from?

A: Cassiopaea.

Q: (L) I have several questions tonight. Are you open for questions?

A: Sure.

Q: (L) The first one is: On Tuesday night, I did a spirit release on a fellow named V__ M__. It seemed to get a little rough. What type of entity were we dealing with?

A: STS

Q: (L) What density level?

A: Fifth. [Demonic.]

Q: (L) Was I successful in freeing V__ from this domination?

A: Open.

Q: (L) Is that STS entity gone for at least this time?

A: From direct attachment.

Q: (L) Is that entity going to try to return?

A: Open.

Q: (L) Does V__ have further attachments at this time?

A: Slight.

Q: (L) So, the next session it will be a cake-walk?

A: Open.

Q: (L) Will it be possible for me to release the attachments to his girl friend at a distance?

A: No.

Q: (L) Should I attempt it?

A: No.

Q: (L) Is there anything about V__ I should know?

A: No.

Q: (L) V__ is worried about her living situation. She was meditating and tried to send light into the apartment near her because the people there are very negative. She felt like something slammed back at her. She would like to know what this was?

A: V__ seeks protection, but does not promote it.

Q: (L) Was it karmically an error to direct light into someone else's living space without their permission?

A: Yes.

Q: (L) Would it have been better to just surround herself with light?

A: Yes.

Q: (L) When I do the next spirit release with V__, would it be alright to have Tom and Cherie present?

A: Up to you.

Q: (L) What about their “prejudices?”

A: Okay.

Q: (L) I went to the doctor for the final check-up. When can I expect a settlement and how much?

A: Open.

Q: (L) Well, how much?

A: Worry not, we have instructed you to have faith in such matters. Otherwise, valuable energy is wasted, and besides, “a watched pot never boils!”

Q: (L) Well, the thing about that is that I wonder if you guys were behind that whole accident thing in order to provide funds to me...

A: Maybe. So have faith!

Q: (L) It is not a lack of faith, just curiosity!

A: Which killed the cat!

Q: (L) But satisfaction brought him back!

A: Oh yeah?

Q: (L) Yeah! And, when I get satisfied I feel good all over! Is the attack still going on?

A: Most likely.

Q: (L) I read in a book about a monster called the “Beast of Gevaudan Who or what was this beast?

A: Other dimensional “window faller.”

Q: (L) You mean it fell into our dimension from another through a dimensional window?

A: Yes.

Q: (L) Well, that would explain a lot of things about it. What about the creature known as “Spring-Heel Jack” who terrorized England some time ago?

A: Same.

Q: (L) What about the Mothman in West Virginia?

A: Same.

Q: (L) So, windows to other dimensions are the explanation for a whole host of strange things?

A: Yes.

Q: (L) Why is [my daughter] so afraid of sleeping in her own bed lately?

A: Simple blossoming of awareness and consciousness evolution.

Q: (L) Why is Frank so tired lately?

A: Depression.

Q: (L) Is there anything I can do to help?

A: Let it “run its course,” karmic in nature.

Q: (L) Well, Frank has such a lovely aura, how can he have such icky karma?

A: Not “icky” karma, has to do with adjustment factors.

Q: (L) As soon as he adjusts in some way, he will stop having these depressions?

A: Not point.

Q: (L) What is the point. I mean, he is suffering. It is awful to have to spend so much time suffering.

A: Adjustment process.

Q: (L) What is he adjusting from to?

A: Not to be answered at this point.

Q: (L) Edgar Cayce said you could just stop karma at any point by opening your awareness and making a decision. Why can't Frank do that? Can anybody do that? Can you just say: "I've had enough," and stop it?

A: No, because not usual circumstance.

Q: (L) Is Frank's karma "special" karma?

A: Subjective. Different.

Q: (L) Different from the usual. Is there any thing that he could do to make it better? Any clue? Any word of encouragement?

A: Won't change until environment does.

Q: (L) Do you mean the environment as in the whole planet, or his personal environment?

A: Former.

Q: (L) Does this mean he is going to have this until we all go to 4th density?

A: Until status quo is abridged.

Q: (L) What is the status quo?

A: Self explanatory.

Q: (L) So, it doesn't mean going into 4th density necessarily, but until the status quo of the planet is abridged, or some change occurs in the status quo?

A: Yes.

Q: (L) So, when some sweeping changes in the status quo of the planet occur, Frank will "come into his own?" Is that correct?

A: Close.

Q: (L) Is this going to happen soon?

A: Open.

Q: (L) I couldn't help myself! Thank you so much!

A: Goodbye.

[Definition of status quo: the existing state of affairs. Abridged: to lessen, reduce in scope; lessen or curtail rights or authority.]

END OF SESSION

3.31 June 10, 1995

Frank Direct Channeling, Laura, SV, Terry and Jan

[Laura induces hypnotic trance in Frank]

Q: (L) Who do we have with us this evening?

A: We are not a single entity; as always, that's not changed.

Q: (L) Is anyone in particular representing, or do you prefer to not designate thus?

A: Well it brings up an interesting point because in your previous sessions using the board, we've noticed that you tend to refer to

us as though we were a single entity. In actuality, that is not the correct way of thinking of us. We are multiple entities in union with each other with a singular voice when communicating with you.

Q: (L) We are all gathered here this evening for this experiment to discover if we can receive information through this method as opposed to the board method. Is there anything we can do to enhance the use of this particular method?

A: Define enhance, please.

Q: (L) Is there anything we can do to make the channel more comfortable, anything to do to make the induction more effective?

A: Is it not effective at this point?

Q: (L) Yes, it seems to be effective, but if there is anything we can or should do to make it better, we would like to know what it is. Any particular induction process that would work better than another aside from getting the numbers straight.

A: That is not necessary at this time.

Q: (L) Okay, then can we begin addressing questions?

A: Certainly.

Q: (L) The first question I have is concerning last Saturday night's session, which nobody seems to have been happy with. We would like to understand why the information seemed to be so garbled and distorted and, quite frankly, incorrect.

A: What makes you feel it was incorrect?

Q: (L) Because one of the answers was that what I was seeing outside was the planet Mars. It could not have been the planet Mars because Mars was 120 degrees away from the planet Jupiter.

A: Perhaps the question was posed in such a way as to receive that response. Suggest you check the material more closely.

Q: (L) It was also said that the children were seeing airplanes and helicopters. When I went out, what I saw was most definitely not a helicopter or an airplane and was only ten degrees away from the planet Jupiter, and was a red, pulsating light. Can you tell me what I saw?

A: Well, if you desire to believe that what you saw was something other than any response given, that's perfectly acceptable. But, when inquiring upon such things as visual reference, one must be prepared for any and all answers.

Q: (L) That seems to be rather evasive.

A: Evasiveness may also indicate a desire to help one learn about oneself and one's environment.

Q: (L) What I saw out there was not an airplane or a helicopter; it was also not the planet Mars. Whatever it was, it was not there the following night or any night subsequent to that. Therefore, it was some sort of object that wasn't of a sort that we usually see, and it baffles me as to why it would be conducive to learning for me to...

A: May we ask a question?

Q: (L) Sure.

A: When seeking to identify visual reference, would it not be wise to be patient with the outcome of the analysis?

Q: (L) Well, sure.

A: You state that what you saw was not a plane or a helicopter. We are interested to know how you can be certain of that?

Q: (L) Because I stood and watched it for a considerable period of time and it never moved.

A: Does that indicate that it was not a helicopter?

Q: (L) Yes, because even helicopters, when they hover, there is some lateral or horizontal movement or motion, and they also have different kinds of lights on them. They don't sit there and look like a single, large, reddish orange, glowing light that pulsates .

A: Okay, well all of these various...

Q: (L) Could you speak more loudly and clearly?

A: We will try to accommodate your request, however circumstances may not make that completely possible. Remember, we are using a different mode which requires cooperation of physical capability and other factors.

Q: (L) Okay. Do you have any further remarks to make about the session last Saturday?

A: No. If you have any questions or further comments?

Q: (L) Anybody else have any further questions about it? (T) Did Tom understand the information that you gave him last week?

A: Could you specify, please?

Q: (T) At the end of the session you spoke to Tom about his university learning and about his work and about the company that he works for and that there was a possibility of takeover in the not-too-distant future. Do you feel that Tom understood what you were talking about?

A: Tom understood the message given, but was resisting the information, which is his prerogative.

Q: (T) What about Cherie? Did she understand?

A: Certainly to the extent that was necessary for her level of development.

Q: (L) Which is?

A: That is a vague question. That is difficult to answer properly, please understand, we do not mean to criticize, but objectivity is necessary for progress with these sessions. When you state a question asking if a subject's level of development is sufficient, that is subjective because who is to determine what is sufficient and what isn't? All are at different levels of development. Do you understand?

Q: (L) Yes.

A: Now, if the question is: "Is Cherie's level of development relative to others present, greater or lesser," the answer would naturally be lesser. Which should not be surprising because the exposure level has been lesser. The same is true for the subject referred to as Tom French. The exposure level has been to a lesser degree there, too, so therefore, naturally, the understanding level is lower, relatively speaking.

Q: (L) In a previous session, comments were made regarding remolecularization, and you gave us a rather cryptic remark, and I quote: "learn 4th level assembly." Could you tell us what 4th level assembly is?

A: That is a fragmented question. The response to the question you are referring to is adequate. However, turning it around and posing a question with no further data to compare it to is not adequate. If you would, please, we ask that you build your question up more carefully. Do you understand?

Q: (L) Yes, and I don't have that particular segment of the tran-

script in hand so I am at a loss as to how to build the question up. (T) Is that particular subject something that we can work with through the board, or is it too complex a set of answers for the board to handle?

A: The problem is never the method. The problem is merely caretaking in discussion, learning, or a question and answer session. For example, if one seeks an answer to a complex question, one must be patient for the absorption of information is most important and missing any part of it will cause the entire answer to be misunderstood or incomplete. Therefore, any method can be used for receiving knowledge about complicated issues, however, patience is the key, otherwise the information will not be properly absorbed.

Q: (L) We have been looking to make contact with a fourth density individual as we were advised and we would like to know if there are any specific ways or means that we can go about seeking out this individual, and how would we recognize said individual if we found them?

A: All of that will fall into place when the situation is right for you.

Q: (T) At the time of that session you advised us that we needed to find this 4th density individual. Are you now saying that...

A: The message given was merely to prepare for eventuality. Remember, knowledge is important because it is protection. Think of it also as a foundation for progression to further knowledge and experience. Therefore, gaining of knowledge can sometimes best be facilitated by giving information which prepares one for more important events in succession, understand?

Q: (T) I believe so. The context of that transmission was that we were under attack and it would be best to facilitate, as I under-

stood the information, to finding this individual. Is the level of attack not that sufficient that we need an immediate intervention by this individual, but that the timing will come on its own, in the future, as we reference time, that this individual will contact us?

A: All of that statement was correct with the exception of the very last part. The individual is not necessarily going to contact you. Most important element of the experience has been the foundation that the original statement allowed. In other words, you are now prepared for the eventual meeting of one of a 4th density STO nature, and because the information was given, you are, in fact, aware of the possibility of this occurring. Therefore, you are more on the look-out for those individuals who may fit that profile, and they are prevalent in your midst, though you were not fully aware of that prior to the information being given.

Q: (L) Are these 4th density STO individuals what is currently being talked about in many circles as “angels?”

A: Incorrect.

Q: (L) Are there, as is being talked about widely, such beings as “angels?”

A: Yes, but they are not of the 4th density.

Q: (L) What is an angel?

A: Sixth density light being in service to others.

Q: (L) Do they appear as humans?

A: May appear as a human projection.

Q: (L) Are they appearing as often as it is conjectured they are at this time period?

A: That is a vague question.

Q: (L) Is it possible for other density STS beings to appear as and project themselves as angels and to be misnamed or mistaken for angels?

A: Certainly.

Q: (L) Is this happening to a certain extent?

A: Very likely. Deception is part of any and all processes directed toward the manipulation of others for purposes of self gain. And, as we have warned, those of the 4th density service to self nature are interested solely in their own advancement, gain or condition, and will facilitate any and all processes which will further this cause including deception of the nature described.

Q: (T) Going back with the 4th density beings that we are interacting with without knowing it yet, now that we are becoming aware of it. Can I be right in the assumption that because they are aware of us which you indicated in that session, and what you have said so far this evening about them, that even though we may not be interacting directly with them, they are, in fact, helping us without our knowing it?

A: Who said that you are not interacting with them directly?

Q: (T) Okay, let me phrase that dif... (J) We are interact... (T) We are not aware that we are interacting with 4th density beings, we still see them as just humans cause we don't know which one...

(J) We don't recognize... (T) We don't recognize them yet. Can I assume that they, if necessary, they are assisting us already?

A: Think carefully, now, do you really not recognize them?

Q: (T) Well, I am trying to become more aware of the people I interact with on a daily basis.

A: Are you not more aware already?

Q: (L) What's the criteria for being a 4th density STO being? (J) Yeah, what's the profile? You mentioned profile before.

A: It depends on what your definition of profile is.

Q: (J) Profile would be a list of criteria, a checklist, if you will. (L) What do they look like, are they this tall, or ... (T) Do they look like that? (L) Do they have any special abilities in manipulating 3rd density reality...

A: Perhaps so, but there may be restrictions as to use of such.

Q: (L) Why would there be restrictions? (J) 4th and 5th...

A: Service to Others orientation means service to others. Usage of unusual powers or abilities, if you will, can cause disruption to those who do not possess these powers or abilities. Also, remember, a 4th density being inhabiting 3rd density, is not inhabiting their own density level, therefore they are in, if you will, foreign territory, which requires, for many reasons which will not be completely described here, that they do not do anything that brings attention to themselves.

Q: (J) You have also said that about 4th density STOs it is difficult for them to maintain in 3rd density. (T) No, STS. (L) STS. (J) What's the difference?

A: The difference is an STO orientation tends to expand one's state of being, STS tends to contract one's state of being.

Q: (L) Are you saying that association with this kind of person can be expanding to the individuals associating with same?

A: Well, that is true, but that is not what the statement meant.

Q: (L) I know, I was just taking it a little further. And, association with an STS... (T) Now, you say we are already interacting with these 4th density beings?

A: Statement...

Q: (J) And that we may be aware of it...

A: Statement was rather a question, do you feel that you are not interacting with 4th density STO individuals? It was a rhetorical question demanding reflection on your part. Your statements in return indicated the possibility did exist that you were. That was all.

Q: (L) Okay. The possibility does exist and this is just to make us aware and keep our eyes open. (J) Can you give us any kind of an indication of a way to recognize such beings?

A: No, what we ask you to do now is ask yourself, and you may use us as a, if you will, sounding board for your discussion, to determine how one may recognize a 4th density STO individual, which will help you to learn, which will help you to progress, and so on.

Q: (L) Would a 4th density STO being be someone who was born in this density in the normal way?

A: You are still asking a question. What we are asking you to do instead is ask yourselves, discuss and come up with the answer.

Q: (T) Well, a Service to Others Being would be someone who is, first off, in service to others. That would be a major indicator.

A: Correct. This is the correct way to go about discovering the answer to this question rather than demanding all of the answers of us. You have the capabilities to pull the answers from within. We are more than happy to assist, but our goal is to help you strengthen yourselves for future use, if you will. It all helps one to advance and progress. All there is is lessons. It's all learning. Therefore, the quickest, the strongest way to learn is to use your own capabilities to that end. Asking us questions is certainly per-

mitted, and helpful, but trying to seek all of the information from this particular source, in the long run, may be detrimental. Now, if you will continue, please...

Q: (L) Well, my idea was that a STO individual would not be someone who was born in the normal way because there would be too great a risk of such an individual losing themselves in the illusion. Therefore, my thought is that a STO being would be somebody who had, maybe, some mystery about their past; or some...

(J) How would we even know that unless we were standing there when they were born or not born...

(T) We have to consider what we would observe...

(L) Well, maybe they would be somebody who wouldn't talk about their childhood?

(T) Not even that... in a group setting or a passing acquaintance we would have to be aware of how they act. How they speak. What kind of compassion they show...

(J) What kind of feeling you get from them...

(T) Yes, it wouldn't so much be a physical thing as an awareness... a connection.

(L) But, on the other hand the thing about feeling is that negative entities can counterfeit feelings or control your feelings and they might induce a negative feeling when you are in the presence of a positive individual just to throw you off track. That would be entirely part of the deception process, wouldn't you think? I mean, we all know...

(J) It's been that way...

(T) But it's something we have to learn account... that's part of the learning process.

(L) So, we can't just say that we could feel it...

(T) Who have you interacted with in the last six months who was outward going, caring giving, offering to do things, to go places, to... to...

(L) Well, just the members of this group as far as I can see and that is limited in many ways...

(J) Yeah, that's true...

(T) Well, maybe one of us is the being. Maybe one of us is a fourth density being.

(L) Well, don't you think we would know it?

(J) No...

(T) Not really. Not if one of us is a fourth density being and has decided that it is not yet time to enter into the dialogue.

(J) Could it not even be...

(T) We have to...

(J) that they are not aware of it?

(T) They are aware ...remember, the Cassiopaeans told us that they are aware of us... they know about us already as a group... they know what we are doing. Maybe not all of them, but those who we need to talk with or need to know already know about us.

(L) Well, in general, I have to say that most of the people I have interacted with in the last year or two have been one experience after another of...

(J) Pure STS...

(L) Yeah. I mean, it has been like a learning thing for me to go and...

(T) Who of those people has offered to do something for you as opposed to taking from you? We are not looking at a whole lot of beings. We are looking at maybe one or two out of the total number that are here that are going to assist us. Or, that we can go to for assistance...

(L) I can't say anybody outside the group. I mean, there have been people who have offered to do this or that, but the price they expected me to pay was a little too high or I found out that they were not telling the truth...

(J) Well, then, that is obviously...

(L) I assume that people mean what they say and...

(T) Let me ask a question... do all 4th density beings that are here on the planet at this time know that they are 4th density beings? Are they aware of who they are and what they are?

A: Well, that is an interesting question because it leads to another question: Are all 4th density STO beings of the same nature, physically, psychically, spiritually, et cetera?

Q: (J) In other words, is there a connection?

A: No, that is not the point being given. The point being given is: Are they all of the same orientation? Or is it possible that they are of different orientation?

Q: (T) Orientation... how so?

A: Physical nature, spiritual nature, psychic nature, awareness of self and destiny?

Q: (T) Just off the top of my head I would have to say that no, they would all be different because they are all different beings

to begin with.

(L) So, they could be short and dark, tall and blond...

(J) I don't think that physicality has anything to do with it...

(T) One of the things I have always felt is that when we are dealing with, in this case, the being we were told to be looking out for was an Orion...

(L) Nordic type...

(J) No, we said Nordic...

(T) When you speak of Orions in New Age and Ufology circles, they automatically flash on the Nordic type... the Aryan, blue-eyed blonde. But that is not necessarily what all Orions look like... that would only be one manifestation. They will not all look the same... they will not look like Semjase from the Pleiadians... they are not all going to look like Fabio, or something because they are going to try to blend into human society across the planet... they can't all look alike. I had a thought that they not only would not look all the same in that type of physical nature, but they would also look different ages in order to blend into whatever setting they were using. In other words, they could be 95 years old or look 95 years old if that is where they felt they needed to be... in finding out who they were. Am I anywhere close to an idea here?

A: Now, the point of our response a while back was to make you aware of the tools that you possess for discovering the answer or answers to your question or questions regarding awareness and identification of 4th density STO beings in your midst, or the possibility of same. And, we have observed that you have made some small progress toward that end. However, one problem that has, if you will, cropped up, is that you have now scattered or separated into two divergent thought patterns on the same

subject. We suggest that you reorient yourselves so that your questions, goals or objectives to be answered are one and the same.

Q: (T) Okay. (J) Well, we started off asking are all of them aware of state and then we went off into what do they look like and how to recognize them... (T) Well, physically, I believe that they would all look different in order to blend. They can't all be the same. (SV) Would they be aware that they are a 4th density being? (J) Yeah, that's, that's... (T) Awareness, the Cassiopaeans have indicated that the awareness may be at different levels.

A: Maybe at different levels, but, more importantly, the orientation of a 4th density STO being or beings may be of a different nature.

Q: (L) Do you mean orientation not in terms of STO versus STS, but orientation regarding what?

A: Nature of physicality, spirituality, psychic ability or awareness.

Q: (L) So, orientation means that they could be a Baptist... (T) A Moslem, catholic...

A: Incorrect...

Q: (T) Spiritual attainment levels... they may be very psychic or they may not be psychic at all...

A: No. You are on the wrong path...

Q: (L) What do you mean by orientation?

A: Nature of being, physically, spiritually, psychically...

Q: (J) They might not be human?

A: That is one possibility. But, there are many others. And, the

subject matter, or the definition of subject matters can be a cross reference. For example have you not heard of the popular written work by one referred to as Ruth Montgomery, known as “Strangers Among Us.”

Q: (T) Yes.

A: And what does that written work detail?

Q: (L) Isn't that the one that is about “Walk-Ins?” (J) I was just going to ask about walk-ins. (SV) No, that's different. (T) No, it's not about walk-ins. (SV) This is about aliens that are here, living amongst us... it could be the butcher, the cashier... I read it so long ago... (T) There's a series of them; she has five or six books.

A: You have the written works confused.

Q: (L) Which one is this?

A: Strangers among us refers to the phenomenon identified by Ruth Montgomery as “Walk-Ins.”

Q: (L) But, you have said in previous sessions that this rarely occurs.

A: Rare is relative.

Q: (SV) Ruth Montgomery also said that sometimes walk-ins don't realize who or what they are.

A: Rare also may be transitory in nature.

Q: (J) You mean walk in and walk back out again?

A: No. Frequency is not necessarily static according to the time line, as you measure time.

Q: (T) I have not done a lot of research on walk-ins, what is the definition of a walk-in?

A: A walk-in, as described by Ruth Montgomery, is a soul that has chosen to take over the body that was vacated by another soul that has chosen, at some level of awareness, to depart for varying reasons. In this way, a higher level entity can enter into the body that was previously occupied by a different level entity, in the form of a soul, that is to say.

Q: (T) A fourth level soul can then enter the body of a third level?

A: Or perhaps a fourth level soul... remember, as we have described to you before, levels one through four, more appropriately density levels one through four, all involve short wave cycle recycling, or, as you refer to it, reincarnation. Because, each and every one of these density levels has a soul and a physical body marriage, as it were, in progressive life experiences. Each and every one of these density levels involves movement to the fifth level of density for contemplation during the cycling process. It is level six, which is the first level where short wave cycle recycling is no longer necessary because there is no more physical orientation. Therefore, all levels, one through four have a soul reflection of the physical body at all times when in physical state. And, therefore, reincarnation of various types, is at various points on the short wave cycle always possible, and, in fact, quite probable. Do you understand?

Q: (T) Somewhat. That's a lot to digest. (J) So, physicality is involved in levels one through four short wave recycling. (L) So, this means that a fourth density being can recycle through fifth density into a third density body?

A: That is one method that can be used, yes.

Q: (L) Can it also be that they can come directly from fourth density into a third density body, just as one of the options?

A: Yes.

Q: (T) As a walk in. (L) And either could be considered a walk in?

A: That is correct.

Q: (T) I'm going off on a tangent on what we have been discussing here... what happens to the soul that's in the body that the walk in takes over? Where does that go?

A: Most likely to the fifth level for recycling and contemplation.

Q: (T) And then returns?

A: Returns, yes.

Q: (L) So, in other words it would behoove us to get this book, reread it to get a clue here... is this advisable?

A: That, of course, is up to you.

Q: (L) We can't keep him under much longer... (T) To be aware of a fourth density being...

A: This is putting the subject under physical stress, more than in most circumstances.

Q: (T) Can any of us be put into a trance under these conditions so that you can use us as a vehicle?

A: That is certainly possible but there are varying degrees of difficulty depending on the individual being used.

Q: (T) Would I make a good relief subject?

A: Again, we ask you to please try to refrain from subjective sequence questions as it is nearly impossible for us to give adequate answers.

Q: (T) I guess it is something we would learn ourselves by trying it. (J) That's right. (L) Okay, we'll get this book and find out what we can from there... (T) Has anybody else encountered anyone that

they have felt an infinity toward who seems to be an open and giving person? (SV) I find many people that... (J) I had an interesting conversation today with Mary B... (T) We had an interesting experience with Brad today... (L) I would like to ask about Victor before we wrap it up. At any point in time, were Frank and I in any danger?

A: Please, be more specific.

Q: (L) At any point in time was there any danger of Frank or I being attacked, attached, or in any way molested by the entity that was attached to or attacking Victor?

A: Well, this possibly would be a danger under normal circumstances, however the knowledge that you have already gained through contact and communication with us as well as your own efforts makes it less of a danger for you than perhaps most others. But, it certainly is true, that there was some interaction there which possibly could have proved to have been less than desirable in its results.

Q: (L) Is there any further attachment of that nature or of that order with this individual, Victor?

A: It certainly is a possibility.

Q: (L) If I did another session with him, would it be safe to have observers who do not have the knowledge I have?

A: Well, again, we regret having to continue to answer questions with what you may believe are evasive maneuvers, but it is important to have clarity when discussing matters such as this, and therefore, we must ask that you please try to be as specific as possible when asking the questions. For example, when you say: "Is it safe to have observers," this implies that if there is a lack of safety present, there may be a calamity of some sort resulting from this, and then one must ask what sort of calamity is accept-

able and what sort is not. This is why we ask that you please be specific. And, we are not trying to irritate you, merely trying to help.

Q: (L) Alright, specifically: Does Victor M. have another heavy duty attachment like the one we dealt with the other night?

A: It is certainly possible that the one you describe as Victor M. may indeed have entities around him that could be described as attachments.

Q: (L) And, if I do another release with him... (T) Would it be wise for her to have someone else there in case it gets out of hand again? (J) If you feel the necessity for it, then do it...

A: Well, all we offer to this subject is that, perhaps it would be wise for more care to be taken in matters such as this when possibilities do exist for complications, than has been taken up to this point. That is probably the best way to answer that question, as we do not wish to hinder development and experience or to improperly steer experience when it is necessary for development. But, it possibly could be helpful to suggest more caution.

Q: (T) A point to be taken: now that you are aware of what could happen... (J) Exactly... (T) that you know now what's... (J) Exactly... (T) that things are getting more intense with these spirit release sessions, especially you know that it would behoove you to have someone else there that is awake and conscious... someone, in addition... don't do it alone anymore... (J) Yes, definitely... (T) And make sure that the person who is with you knows what is going on... (L) And that is going to be the tough one because there are very few people who know what the heck is going on... (T) Knowledge protects... (L) I mean, the only people who have a clue in this area are the people in this room... (T) You knew this was coming by the way things had been going and this was the one that really did it. (J) It was good... (T) You

need to have someone else in the room with you. (L) Is this...

A: Let us stop you right there. Do you not see how discussion, and, as we have frequently referred to it, “Networking,” is an extremely valuable tool.

Q: (L) Now, it does seem to me, that through no real drive on my own part, I have been moved like a chess piece throughout my life, to the point where, at various intervals, I have interacted with spiritual entities. And each interaction has been progressively more complex than the previous interaction. And, it seems that a lot of this has led up to doing the exorcism and spirit release work. Now, during that particular session, it occurred to me that this is really kind of an unpleasant work, and at the same time I understand that not many people can do it. It scares me. I am just wondering if this is something I continue doing or is it okay if I just quit!? (T) That’s up to you... (J) Up to you, Laura... (T) What we are doing here, even though the effects that have been described as the culmination of the work, its ongoing in other places, it isn’t going to happen for many years. But, the learning process had to start some time. This learning process might be very important in the coming times... (L) You mean doing spirit release? (J) Yes... (T) Not only the spirit release, but the channeling... to start doing this on down the road would probably be too late... it’s going to take several years to really understand what is going on and be able to handle oneself in the situations that may arise...

A: The most notable comment we have is that we are happy to see discussion progressing more freely... and what a tremendous amount of learning takes place in interaction and sharing of ideas, notions, feelings. It does tend to advance learning and also a more grooved type of learning, and we have talked about “grooving” before indicating a channel or a pathway which leads more clearly to a desired goal, and therefore, we are pleased to

see this progress being made and hope that our participation has helped to facilitate this process.

Q: (J) We're learning. (T) Your participation is what has made it possible for this learning. (J) I see you as a facilitator. (SV) One thing that Laura said about her fear during the exorcism the other night. It was fear that opened Victor up to attack. If she experiences fear would this also open her up to the same sort of attack?

A: That is a vague complex of ideas...

Q: (J) She had awareness along with the fear. Victor did not have awareness and I think that is the difference. (L) I hope so. (T) The point is, you have now reached the point where you know you cannot continue doing this by yourself. (L) No. (T) The intensity is getting physically dangerous. The last thing you need is to have the cops knocking on the door or kicking the door in and finding bodies laying around! But, the work you are doing is important... it helps other people. The subject is not going to be aware of what is happening. (L) They are helpless... (T) But, the people you are going to have to involve in this from here out are going to have to be aware of what they are getting into. They have to know the level of intensity, the severity of what is going on and the implied danger. (J) Yeah, and aside from the people in this room, how many know that? (T) Opening up people's subconscious and letting it out... you never know what's going to come crawling out of there. (J) Yeah... it's opening up Pandora's box every time! (T) What happens the next time you do this with a subject and the subject turns out to be an STS walk in that doesn't know what they are yet? (L) Ouch. (T) What do you do with that? You don't want to be alone with it. And, Frank, in a trance state, unable to defend himself physically, and have something like that come crawling out. (L) You're right. It can't be done like that again, but there is so much need right... I think we have to bring Frank up

here. We want to thank you for your presence tonight unless you have something further to say.

A: Not unless you have further questions.

Q: (L) Well, we have plenty of questions but Frank has been down long enough and we have to bring him up. We would like you to leave some positive effects, perhaps in the form of suggestions, for his well-being.

A: We would suggest that you be aware of the fact that the subject is the channel and, as such, we are in constant communication with each other, as it were. This we have told you before, therefore, you need not worry about the course of destiny of this particular subject. Do you understand?

Q: (L) I understand, but I also am the one who watches him go through torments and I would like to see that alleviated for him as much as possible.

A: We understand your care and concern, but it may also be true that the torments are a precursor to explosive developments that would not be possible without the “torments” occurring.

Q: (T) We would like to thank you for your assistance.

A: You are most welcome.

Q: (L) We will release then. Good night.

END OF SESSION

3.32 June 17, 1995

Frank Direct Channeling, Laura, SV, Terry and Jan

[Laura inducts Frank into hypnosis.]

Q: (L) When the connection is completed, please indicate by saying “I am ready.” [Pause] Are you ready?

A: Yes.

Q: (L) Okay, we do have questions and I think Terry will start us off this evening. (T) How did FDR die?

A: Due to a cerebral hemorrhage.

Q: (T) It was a natural death, then?

A: Yes. All death is natural.

Q: (T) It was not a death contrived by someone else?

A: We don’t understand the reference.

Q: (T) He wasn’t assassinated in some way?

A: No.

Q: (L) What about Pope John Paul I? The pope who served for one month? Please speak as loudly and clearly as possible.

A: It is the comfort of the subject being used as channel or conduit that is the most important factor in clear speaking and increase of volume. This can be a more useful method for channeling information if all circumstances are optimal levels.

Q: (L) What else can we do for comfort?

A: Placement of object to right of subject’s head is somewhat inhibiting flow of energy. Please place some form of sustaining object or brace to the left subject’s head.

Q: [Adjustments made] (SV) Is that better? (J) I recommend you get him settled before he even goes into trance. (L) I would but he is so hard headed he won’t listen to my suggestions. He says

“I’m fine,” but then he isn’t. Back to the question, what caused the death of the Pope, John Paul I.

A: Unfortunately, as has been indicated by us before, sometimes you ask questions that we will not be able to answer for you. Not because the answers are unknown, but rather because knowing the answers could prove harmful to you.

Q: (T) Well, that is an answer in itself. He didn’t die naturally.

A: Speculation is harmless when compared to irrefutable, confirmed knowledge.

Q: (L) Okay, Susan had a question that we discussed earlier this week as to what is taking place when craft that are described to be belonging to “aliens” begin to strobe as opposed to pulsating or merely blinking or other configurations. In other words, what are the different configurations of light emanations and what do they indicate?

A: It is interesting when you pose multiple questions. Please choose one.

Q: (L) Is there something indicated by a UFO as to its condition or status or proposed activity when it changes its light emanation?

A: That is a confusing thought pattern.

Q: (L) Okay, say a specific UFO is seen. When it is first seen it appears metallic. In a bit it begins to glow with light of some or another color. Then, after a few minutes of glowing, it begins to strobe - flashing a very bright light. What could this indicate?

A: We do not mean to be difficult, but the term “Strobe” is still not completely clear to us. That seems to be an artificial construction of your plane that we are not familiar with.

Q: (L) Well, just moving from a glow to a blinding flashing.

A: Well, you must be aware, first of all, as we have told you before, and as you have, in fact, gained knowledge from other sources prior to your communications with us, the entire subject matter referred to as “UFOs” is extremely varied and multi-faceted in nature and does not represent any one condition, entity, source of entities, mode of transport, density level, or anything else related to these.

Q: (L) So, in other words, we would have to specify a specific sighting and condition in order to obtain an answer to this particular question or type of question?

A: Well, let us ask you, would that not be the wisest course of action?

Q: (J) I think I have a way out of that. Possibly we are referring to the type of sightings that are typical in the Gulf Breeze area where they...

A: Be aware of the fact, please, that the whole Gulf Breeze situation is rather interesting in many ways. And, when we say “rather interesting,” we are being subjective viewing the subjective from your point of view. There is more going on there than meets the eye... again, from your point of view... not from our point of view, for we know what’s going on there. And this brings us to another point that should be taken at this point, no pun intended, that is that your line of questioning, in this particular session, does seem to be developing a pattern; that being trying to find answers to mysteries which, if found, could cause difficulties for you. Example one being Pope John Paul’s death, as you call it, and example two, Gulf Breeze. If you were to know the answers to these questions, we can assure you that it would not be long, as you measure time, before ramifications would result that would not be pleasant for you. This is because all entities concerned with these various subject matters are strictly

STS, and, in fact, involved in practices that, if revealed in their entirety, would be damaging to the efforts of those seeking to serve self in the ways that they are seeking service of self. So, it is not possible for us to go into any great detail about lights seen at Gulf Breeze as it would be possible for you to infer from the information given, various bits and pieces of information, which could lead you to knowledge that it would be best that you not possess currently. Do you understand?

Q: (T) Are you suggesting that sometime in the future that it might be possible and helpful for us to know these things?

A: Well, we sincerely try not to suggest, but rather, communicate, and the communication intent was to indicate that it would be more beneficial, perhaps, to gain awareness of these subjects in detail in what you would describe as your future, than would be the case in what you would describe as your present.

Q: (J) So sometimes knowledge is [Terry interjects and both comments lost] (T) Knowledge without understanding...

A: Incorrect. Knowledge protects, but there is an old saying on your third density world [(J) I know what's coming...] a little bit of knowledge is a dangerous thing... [(J) Got it!] and we will add to that "a little bit of knowledge is no knowledge at all." Understood?

Q: (L) Yes... (J) Is this kind of like along the line of "Knowledge out of context is dangerous."

A: That would be accurate as well.

Q: (L) Well, since we are not going to go anywhere with that question, I have another one... a couple of nights ago I did a session with my son to examine the events that took place on August 16, 1993, over my pool, wherein a couple of UFO-type objects were seen by all of us, kind of casually drifting by. In this hypnosis ses-

sion, after two or three passes through the subject, he indicated that, in fact, that was not merely a sighting of something going overhead, but was actually an abduction situation. Would that be correct?

A: What do you think?

Q: (L) Knowing what I know now, I think so.

A: The reason we ask this is, again we must reiterate, your learning is to be more and more accomplished by utilizing the tools you have within you, and, we are happy to see that you are, indeed, doing this. But you must trust in your own ability to access the information you need through your own efforts.

Q: (L) One remark he made during this session, and this startled me a little, and I would like to get a little amplification on the subject, was that toward the end when I asked what happened, he said that he was “taken apart and beamed back down without benefit of a pain suppressor.” This meant that when he was demolecularized some sort of device that is used to suppress pain was not used, and the process of atomic demolecularization or remolecularization can actually be painful, and can cause distress. Is this correct?

A: Possibly. The whole process of abduction can be stressful, but, to varying degrees and, of course, we must remind you that, as with everything else, it is your own perception of reality that is the most important factor, not some notion of your own perception of reality.

Q: (L) I don't understand what you mean. Is there some device that... does it hurt to be taken to pieces molecularly, beamed aboard a space ship and then sent back. (J) Can this be painful to the body?

A: Well, first of all, you are getting way ahead of yourself. Do you

honestly believe that a beam of light came down and “took you to pieces,” moved your body physically onboard a space vehicle, did some form of examination or some such thing and then re-assembled your entire body without a pain suppressor? Is this what you believe?

Q: (L) Well, he didn't say it happened to me, he said it happened to him. (J) We have never heard the term “Pain suppressor” before. (L) Yes, we have never heard anything about anything like this; and do I believe a beam of light could have come down and disassembled us and reassembled me, and then something was done to me? Well, from what I have studied I would say it is possible. I mean, knowing about the time manipulation capabilities of said entities, it is entirely possible that it could have happened without any awareness of any loss of time whatsoever.

A: Yes, this is true, however, we have told you in previous sessions, in detail, the methodology that is used for what you refer to as “abduction.” And, if you are familiar with the transcripts that you have now created, you know precisely how this is done. Your description of it is not completely correct as referenced in the hypnosis session you speak of, or at least your interpretation of the information given during the hypnosis session given is not correct.

Now, it must be noted here, that when we make such clarifying statements such as “this is not correct” or “that is not correct,” it is unusual for us to do this because the nature of your state of being and all others is one involving various degrees of bonded illusion. Therefore any and all possibilities are present in most instances. However, when two or more of these bonds of the illusion are misaligned, then, indeed, absolute correctness or absolute incorrectness is possible. In this case, there is a misalignment of the bonding. Therefore, it is, in fact, completely incorrect.

And, furthermore, to explain exactly the process again, even though we do very much desire for you to learn, and we sense that perhaps you are getting ahead of yourself in the learning curve, as it were, which is somewhat distressing, but we will worry about that later; the main thing is that you have been told how this process takes place. We will now repeat it. Please do try to retain this knowledge as it is very important not only for what, perhaps, has happened in your reality as you would refer to it as your past, but also in possible variations of your present and in what you refer to as your future. These experiences must be known in their entirety as to what they really are.

You are not normally removed as a physical third density being from one locator to another. What happens is very simple. The time frame is normally frozen, and we use the term “frozen” for lack of a better term. What this means is that your perception of time in your physical locator, third density body, ceases to pass during this period of time that is called “zero time” variously by members of your human race. What happens is that the soul imprint occupying or of that particular host body is removed forcibly, transported to another locator, and remolecularized as a separate physical entity body for purpose of examination, implantation, and other. Then, it is demolecularized - the soul imprint is used for the purpose of duplication process - it is then demolecularized and the soul imprint is replaced in the original body at the original locator. That is the process that takes place.

On occasion, the fourth density beings doing the abduction can actually make a mistake in the time referencing points of the third density illusion. This may create the effect of the appearance of an alternate or duplicate experience, when, in actuality there has only been one experience. This was what happened in your case. As you perceived the passage of two “ships” for lack of a better term, when in actuality, there was only one. That

is because the time frame reference illusion was not completely matched from beginning of event to the end of the event in zero time. Normally, however, that is not a problem.

On rare occasions, the host, or the subject of the abduction can actually find themselves replaced in the time frame illusion in what could appear to be several hours, day, weeks, or even, sadly, years prior to the beginning of the event, which, of course, could cause side effects such as total insanity and other such things. Fortunately that did not occur in your case, but there was some fracturing of the time frame reference illusion. This is why you thought you saw two ships when in actuality you only saw one.

Now, it is most important that you understand that this is not a physical, third density experience in its entirety. There is the soul imprint that all first density, second density, third density, and fourth density beings possess, as you already know; that is extracted. From that soul imprint a duplicate copy or cloning, if you will, which appears on fourth density, can then be made and studied and the soul imprint is then replaced into the original body at whatever density it was taken. This is normally how the process is done.

Most often, if the third density being is removed in total physicality, there is no return of that being to third density. They are permanently removed to fourth density. Most often that is what takes place although on rare occasions there can be return. However, there is no need for this as complete duplication for all purposes of examination, alteration of sensate, and implanting; need not be done on third density; can be done completely in the fourth density duplication process. Do you understand?

Q: (T) How does the implant come back to the third density body that's originally still here?

A: The process we are describing, which involves the remolecu-

larization; it is very complex to try and describe how the fourth density is translated into third density, except that once the duplicate, the fourth density cloning, or duplicate is present, all fourth density realities surrounding that fourth density duplicate will be matched in third density whenever and wherever desired. Because, in effect it is the entire density level which is being exchanged, not just the object contained within.

Q: (L) So, in other words, just as the soul imprint, when it goes into fourth density, can be used as a template to create a carbon copy, so to speak, then anything that is done to the carbon copy then becomes a template that recreates that same manifestation when it is sent back into the third

A: Precisely. With the only variance there being that technology is used to make sure that implants, or added material that comes from fourth density, is such that it will also translate equally into third density through the remolecularization process.

Q: (L) Is there any method that we could or should know about to remove or deactivate implants.

A: No, you are not capable of doing that without causing death of the host. And, by the way, please don't believe those who claim that they can do such things as they cannot.

Q: (L) So, in this particular case, something was done, something occurred here, which affected me. My subsequent physical condition makes me curious as to whether the physical reactions I had for six to nine months, and still have occasionally, following this event, were a third density reaction to the, what you call, fracturing of time. Was this an aberration or was this intentional?

A: My, my my. My, my, my. You take one subject and launch forward into another. You create your own reality, Laura. That

really is impressive! But, of course, incorrect, sorry to say! It does not occur as a result of the “fracturing” of the time frame reference illusion. It occurs as a result, simply and merely, of your psychic impression imprint of the experience itself reflecting back into your third density physical reality. As we have told you before, of course, and we don’t mean to sound snide or condescending, however we are just a bit perturbed that you do not seem to be keeping up with your own transcripts.

Q: (L) Well, since that question was never answered...

A: It was never answered incorrectly in that way. However if you were familiar with the transcripts, you would realize that it was answered.

Q: (L) Well, it just gave me food for thought hearing about the “Time fracturing.” (T) Is the pain that Laura’s son described not what he said it was, but rather the pain that is related when the fourth density being removes the life force?

A: Life force is never removed. The soul is extracted. In answer to your question: Laura’s son is merely expressing the discomfort and distress that most third and second density beings experience when abducted by fourth density service to self entities.

Q: (L) Why did they only abduct Jason and myself and not the girls?

A: Did they?

Q: (L) Well, that is what he said. And, you have said that the girls have not been abducted.

A: Well, I guess that answers the question then.

Q: (L) Well, why? Why only him and me?

A: Why not?

Q: (J) Just random? (L) Was it a random abduction?

A: As we have said before, you have been making progress in learning through your own resources. But, we would hate to see you fall back.

Q: (L) Well, I don't want to fall back and I have no intention of not pursuing this matter through my own resources. But, using myself as a case in point, I am trying to find out a little bit about the nature of the abduction process in general. I mean, is it done randomly or is it done to specific persons for specific reasons? My thought is that maybe specific people are targeted to put them out of commission. But, then, that seems a little egotistical and I don't want to stumble over ego and say that I am being abducted to put me out of commission and somebody else is being abducted randomly.

A: Well, I hope this following statement will not disturb you. Any STS being who possesses a greater power than you do will not have any extreme difficulty in "putting you out of commission" if they so desire. This has happened, of course.

Q: (L) I would like to ask a little bit about synchronicity. I would like to know what is the source of synchronous events. Is it a multiple source or is it something that comes out of the percipient's own mind or... (J) is it random?

A: Imagine a young school child walking along the street, standing beside a rose bush, picking one of the flowers, and asking the flower: "Would you please explain Einstein's theory of relativity to me today." Now, the analogy here is, while humorous, perhaps, is also to point out to you that we admire and appreciate the challenges that you bring to us to answer such complex questions in such a simple form, not to mention such a simple format. However, if we were to answer these accurately and adequately for you when you ask such complicated questions,

it would require a session lasting approximately twenty-four of your days non-stop. Needless to say that this would render the subject rather useless and, of course, yourselves as well. So, we aren't simply not able to answer a question as complex as "What is synchronicity" as it is incredibly complex. It involves aspects in every imaginable state of reality merging together in what could best be described, if seen visually, as a massive mosaic in perfect balance. But, that is not adequate to a response for your question however, hopefully, maybe you can contemplate the visual image presented and help yourself to learn a more complete answer.

Q: (T) Several sessions back when we were discussing "Perpendicular Realities" you were talking about something that happened to me and that I had to look back over my life and analyze my relationships with other people from a certain point up until now and you said that this was a perpendicular reality. What is the definition of a perpendicular reality?

A: The perpendicular reality primarily, though not exclusively, refers to one's life path and how one's life path fits together in the cycle or in a wheel when connected with those of a similar life path. And, oddly enough, relates very closely to the previous question involving synchronicity. If you can picture an inlaid wheel formed by a circle within a circle, and adjoining partitions in a perfect balance, that would be the best representation of perpendicular reality for it does not completely involve one individual's experience, but rather a group of individual's experience for the progression of a greater purpose, if you understand what we mean. This is what we mean when we say: perpendicular reality. Picture again, a circle within a circle adjoined by equally spaced partitions in a perfect cycle. That is perpendicular reality.

Q: (T) You had us draw this symbol and put seven spokes or partitions between the two circles.

A: Correct.

Q: (T) Is seven the optimal number?

A: Seven is always the optimal number. There are seven levels of density. This reflects through all phases of reality.

Q: (T) The people that I interacted with during this time, they also have gone on to do other things that they were supposed to be doing because of their interaction with me in this perpendicular reality that we all existed in?

A: That's correct.

Q: (T) You also said that each of us in this group came from a different perpendicular reality.

A: That is correct.

Q: (T) Is it at this point where we merge our different perpendicular realities in order to learn from each other's experiences?

A: That could be described as correct.

Q: (L) It was said at the time that the inner circle was the connection with this reality and that the outer circle and connecting segments were where the perpendicular reality is "joined with The Wave." Is it implied in that statement that the forming of this conduit through these perpendicular realities is instrumental in bringing forth this wave, bringing forth this change, this dimensional shift, or density shift, and is that something that is being done in other places?

A: We wish to congratulate you for asking six questions in one. [(T) One more question and you would have a perfect perpendicular question!] Mirth!

Q: (L) Are we connected in some way with the Wave, individually and as a group?

A: Well, of course. Everything is connected to the wave.

Q: (L) Are we, by connecting into this wheel, so to speak, activating the wave in some way?

A: We are not clear about your interesting interpretation there, but it is true that you have an interactive relationship with the wave however, as stated before, you are in an interactive relationship with the wave in a sense, in that the wave is a part of your reality, always has been and always will be. And, of course, it does involve your progress through the grand cycle. And the perpendicular reality, again is, of course, an advancement from the core outward which is yet another reflection of all reality and all that exists. Now, we wish to return to the visual representation as mentioned previously. If you notice the core circle connects with all seven sections to the outer circle. Now, picture that outer circle as being an ever expanding circle, and each one of the seven segments as being an ever expanding line. Of course, now, this will expand outward in a circular or cyclical pattern. Please picture visually an expanding outer circle and a non-expanding inner circle. Contemplate that and then please give us your feelings as to what that represents.

Q: (L) Does it represent an expansion of our knowledge and consciousness?

A: That's part of it.

Q: (L) Does it represent also expanding influence of what and who we are on that which is around us?

A: That is correct.

Q: (L) Does it also represent a more...

A: Oops! We detected a slippage of your visual representation! Contemplate, if you will, the ever-expanding outer circle and the

non-expanding inner circle, and, of course, the seven partitions also moving outwardly. What type of shape does that form in your mind's eye?

Q: (L) A wheel?

A: Is that all?

Q: (T) A pie?

A: Keep going.

Q: (L) An eye.

A: Now we are starting to turn it into a sphere! Why would it turn into a sphere?

Q: (L) How can it turn into a sphere?

A: How can it not!

Q: (SV) It is going in ALL directions, not just flat...

A: Is a straight line a straight line or a...

Q: (L) Oh, you're not talking about a circle?

A: We are talking about a circle. What becomes of a circle if you expand it outward forever?

Q: (J) It disappears.

A: It disappears? How can it disappear? Where does it disappear to? We ask you that, Jan? Jan?

Q: (J) Visually, as the outer circle expands, the inner circle becomes smaller and smaller until it disappears. As you continue to expand out with the outer circle, the inner circle disappears.

A: But where does it disappear to?

Q: (J) A black hole?

A: A black hole. Well, that's a possibility. But, we really didn't want you to concentrate so heavily on the smaller circle, now did we? It's the outer circle.

Q: (T) The outer circle is used to encompass more and more.

A: And what shape does it begin to take on? I want you to look at this outer circle expanding outward!

Q: (J) Are we to assume that the seven spokes remain the same size in relation to the circle?

A: Well, answer that question for yourself.

Q: (L) Okay, we are looking at it as a plane representation. As a flat surface.

A: Well, what happens to a flat surface if you extend it outward forever?

Q: (L) Well, we don't know. That, that... (SV) It keeps on going.

A: It keeps on going?

Q: (L) Yeah, bigger and flatter!

A: It does? What happens to a line if you extend it forever and ever?

Q: (Laura and Susan) It keeps on going.

A: It does?

Q: (L) Um hmmm!

A: Where does it go to?

Q: (SV) Forever. (J) Back to itself. (L) We don't know that.

A: Oh, someone said "Back to itself."

Q: (J) Like a snake taking hold of its own tail.

A: Why don't we know that?

Q: (L) Because we don't. It is conjectured that space is curved...

A: "Because we don't know. Now, why don't we know?"

Q: (L) Because we haven't been there.

A: Had Columbus been outside of Italy and Spain?

Q: (L) Okay, we are going to assume that if it keeps on expanding it will eventually come back to itself...

A: No, no, no wait! We asked a question!

Q: (L) Well, of course Columbus had an idea that there was something but he hadn't been there, no. But he went and checked it out.

A: Did he have just an idea?

Q: (L) Well, pretty much, I guess.

A: Hmm. That's not the way we remember it. The way we remember it is that he had instinct and imagination and when he married his instinct with imagination, it became reality. And, when it became reality, he had created a reality which he was fully confident would be manifest in the physical third density reality. It wasn't that he was confident. He knew it to be so. He didn't stop himself by adding prejudice to the equation which is what you are doing when you say: "Well, we don't know what happens because we have never been there!" Think logically, please. We have told you so many times that everything is a grand cycle. If it's a grand cycle, we have told you about circles within circles. We have told you about cycles. We have told you about short wave cycles and long wave cycles. Now, after all this information that you have asked of us, which we have more than happily given to you, would you expect that a straight line would

just go out forever and ever and ever as a straight line? How could it possibly do that? What happens if you take, on your third density earth, and you draw a straight line to the East or to the West or to the North or to the South...

Q: (J) It comes all the way back to itself.

A: Right...

Q: (L) Okay, so we're living in a big globe!

A: Are we?

Q: (L) Well, that is what it sounds like, a big circle?

A: Oh, my, my, my. You need more study and learning, my dear. Need more study. Even your Albert Einstein had a theory about what happened.

Q: (L) Yes, but that was just a theory.

A: Oh, well I guess then it must be dropped. We'll never know. It's just a theory. Well, we'll just forget about it.

Q: (T) I'm still expanding the circle... (SV) Me too.

A: Very good, that was the idea. It keeps going and going and going.

Q: (L) Well, mine does too, but it hasn't come back and met anything. So, what's the point?

A: Does there need to be a point?

Q: (L) Of course!

A: Who says? We are trying to help you learn. When do you expect to shut down this process?

Q: (J) Never. (L) Gee, I hope never.

A: Then there never is a point!

Q: (J) Point taken! (L) There is no point. [Laughter.] Well, if you expand the circle outward and continue expanding it in all directions, it pulls the seven spokes with it which encompasses more and more space in a cross section, and then turn that circle, you have a sphere.

A: Precisely. But Laura says that means we are living in a big globe. And, maybe we are.

Q: (T) Well, it wouldn't be a big globe, so to speak, it would only be a big globe within the circle. If the circle continues to expand, it would just continue to go outward and outward and the globe would become bigger and bigger and bigger... (L) You're making me nervous... (T) But it goes outward forever... cause there is no end to going out...

A: There isn't?

Q: (SV) Nope.

A: Well, then maybe there's no beginning.

Q: (T) Well, there wouldn't be a beginning, just a big, open void. An infinite void...

A: If there's no end and no beginning, then what do you have?

Q: (L) No point. (J) The here and now.

A: The here and now which is also the future and the past. Everything that was, is and will be, all at once. This is why only a very few of your third density persons have been able to understand space travel, because even though traveling into space in your third density is every bit as third density as lying on your bed at night in your comfortable home, the time reference is taken away. Something that you hold very close to your bosom

as if it were your mother. And, it is the biggest illusion that you have. We have repeatedly told you over and over that there is no time, and yet, of course, you have been so brainwashed into this concept that you cannot get rid of it no matter what you do, now can you? Imagine going out into space. You'd be lost when confronted with reality that everything is completely all at one? Would you not? Picture yourself floating around in space!

Q: (L) I don't want to. (J) There is also no space! (T) Does the sphere keep expanding... as the circle expands and you turn the circle 180°, you get a sphere. As the sphere continues to expand it, you take a point on the outer edge of the sphere in order to take the sphere about itself, you get a donut, an ever expanding inner tube. (L) With a black hole in the middle! (SV) Why does it have to be a black hole? (J) It's a spiral. (T) If you take that and twist it, you get an even larger inner tube. It just continues to expand and encompasses more space...

A: And now, when you merge densities, or traverse densities, what you have is the merging of physical reality and ethereal reality, which involves thought form versus physicality. When you can merge those perfectly, what you realize then, is that the reason there is no beginning and no end is merely because there is no need for you to contemplate a beginning or an end after you have completed your development. When you are at union with the One at Seventh density, that is when you have accomplished this and then there is no longer any need for difference between physical and ethereal forms.

Q: (L) On the subject of time as we discussed the other day: we talked about the fact that at the constant of light there is no time, there is no matter, there is no gravity, but that any unit, infinitesimally small to the downward side of the constant of light, suddenly there is gravity and suddenly there is matter. And we asked what is it that congeals this matter out of the

energy of light, so to speak, and I believe that the answer we received was that it was consciousness from 7th level. From our perspective, would it be possible to achieve this constant and move through to the other side of it, or at least stay fixed with it, without de-materializing? Is the speed of light interconnected with the state of no time and no gravity?

A: No in an absolute sense, in a third density sense.

Q: (L) Okay, if you are in fourth density, for example, does everything move at the speed of light and is that why there is no time there and no gravity?

A: No. That is an incorrect concept... [(T) There is no speed of light, light is everywhere.] Precisely. There is no speed of light in fourth density because there is no need for any "speed." Speed, itself, is a third density concept. You remember, all there is is lessons. That's it! There's nothing else. It is all for your perception. For our perception. For all consciousness. That's all there is.

Q: (L) Well, I am still trying to get a handle on what it is, what is the source of this gravity, this state of time because they seem to be so intimately connected.

A: Let us ask you a question now: Do you remember going to school?

Q: (L) Yes.

A: What did you do in third grade?

Q: (L) A lot of things. I learned cursive writing. I learned to multiply and divide.

A: Do you remember what you did in first grade?

Q: (L) Yes.

A: Please name one.

Q: (L) I learned to count in several ways. To add and subtract. I learned to read and write. (T) Did you learn to multiply and divide in first grade? (L) No.

A: Okay. When you were in the process of learning to multiply and divide, did you drop your pen or pencil and steadfastly return in your mind to first grade and try and figure out why you had to learn the alphabet?

Q: (L) No.

A: Why not?

Q: (L) Because I already knew it.

A: You already knew it. In other words, you did not need to learn the alphabet because you already knew it. Correct?

Q: (L) Yes.

A: Are you going to need to learn about the speed of light when there is no longer a speed of light?

Q: (L) Well, that is what I am trying to do. Once you learn it, maybe you are not subject to it's lessons anymore. I mean, you get concepts presented, you absorb them, practice them, they become part of you and then you go to the next thing.

A: Yes, but you are asking about the speed of light as relates to fourth density and above density levels and we are telling you that there is no speed of light there because there is no need for that, because once you reach fourth density level, you have learned the lessons of third density level.

Q: (L) Well, if a person on third density gets into some kind of vehicle and achieves light speed, does that automatically translate them into fourth density?

A: Could you please point out one of these vehicles?

Q: (L) Well, we don't have any... yet.

A: Do you expect to have any before you go to fourth density?

Q: (L) No.

A: Then the lesson is learned, yes?

Q: (L) Sort of.

A: If you trust in what we are saying, which is in response to what you are asking, then the lesson is learned. Now, contemplate, because all there is is lessons.

Q: (L) Well, you talk about time being an illusion, time being something we hold dear to us like a mother, and that sort of thing, and I would be perfectly happy to let go of time...

A: You do! Let go!

Q: (L) Well, it is one thing to want to do it in your mind and another thing altogether to do it in your system, your internal operating system.

A: Your internal operating system?

Q: (T) Is that DOS or WARM?

A: Could you please explain what an internal operating system is?

Q: (L) I guess it is the subconscious mind.

A: It is?

Q: (L) Maybe.

A: My, my.

Q: (T) The subconscious mind has no idea of time. (J) Time is an artificial constraint... (L) For example: a person can have a belief about prosperity in their conscious mind and can talk about it and say affirmations and all kinds of positive things for themselves, and yet, for some reason that individual continually lives on the edge of poverty because something keeps happening that they keep screwing up to keep themselves at the level of poverty. And, when you start digging around in their subconscious mind you find out that somewhere there is the belief in poverty or there is a past life connection where they feel they need or deserve to be poor, so, their internal operating system takes precedence over their conscious beliefs and thoughts. That is what I am talking about here.

A: Yes, but what is your point.

Q: (L) The point is that you may say that you would like to get rid of time and you may understand it conceptually, but something internal keeps you tied to it. How do you get rid of that internal connection?

A: Something internal keeps you tied to it?

Q: (J) Like circadian rhythms, it's physical.

A: We feel you are missing the point.

Q: (L) Well, maybe I am.

A: You see, we speak to all of you when we say this. It's now time for you, as individuals, to try to move away, as much as possible, not to force yourselves, of course, but to try and move away at your own pace as much as possible, from the constraints of third density. You have all learned lessons to the level where you are more than ready to begin to prepare for fourth density. Third density involves a level of physicality and restriction and restraint and all of the things that go along with those, that you

no longer need. So, therefore, even though we understand that at times it may feel comfortable to cling to this, there is time for you, and there is that word again, it is time for you to consider moving ahead and get ready for fourth density and not to be concerned with such things as time or how to free yourself from the illusion of time. That really is not important. That's like the third grade student delving into mathematics and stopping everything to go back and contemplate the ABC's and why it isn't CBA or BAC. There really is no point. It is what it is. They are what they are.

Q: (L) That is what I want to know, what is it?

A: Why do you need to know this?

Q: (L) Because I am curious. What is time?

A: We have already told you that it is a non-existent, artificial creation of illusion for the point of learning at the level where you are at or were, and once you have left that level, you no longer need it.

Q: (T) Maybe one of the lessons is to learn not to worry about time. Once you learn that time is not real... (SV) Tell that to your boss!

A: If something is not real, is there any concern in worrying about what it is?

Q: (T) Not, for me.

A: Imagine a conversation between two people: Billy and Gene. Billy says to Gene, "There is no such thing as time." Gene says, "Oh, really? But I want to know what it is." Billy says, "But I just told you there is no such thing. Time does not exist. It is not real in any form, in any frame of reference, in any form of reality, any level of density. It simply does not exist." And, Gene says: "Oh, that's interesting. Now, again, what is this time?"

Q: (L) Point taken. (T) Do you wear a watch? (L) No. (SV) I have to because of my schedule. (T) But, you wear the watch because other people believe in time? (SV) Yes. (T) And that is out of courtesy for their belief, not your belief.

A: That is precisely correct. While you are still in this third density it is still necessary for you to conform, to a certain extent, to the ways of others who are more comfortable within the realm of third density. But, as we have stated previously, perhaps it is “time” for you to begin preparing for fourth density and not concern yourself any more than is absolutely necessary with all the wheres and whys and what-fors of third density reality. This truly is behind you, now, and we know that because we can see from all levels six through one and back again in full cycle.

Q: (L) Going along with that statement, and this is going to have to be the last question; preparing for fourth density: not too long ago I asked a question about the purpose of this group and the answer was that if we knew, or, more specifically if I knew, I would become “unglued.” Was that meant literally?

A: Oh, yes certainly. Every single bone in your body is going to unglue itself from every other.

Q: (J) You are going to turn into a puddle. (L) Well, since you are saying that it is time for us to begin preparing for fourth density, maybe it is time to deal with that question?

A: Well, perhaps you are trying to steer us, now. This is amusing because, of course, you sought our help, now I guess you are going to put us in your place and vice versa. But, actually, in a way, that is what is already happening, because, again, we must remind, that we are you in the future and we have already experienced all that you are experiencing. And, of course, we are experiencing as it is always being experienced. But, it is important to note that you have been making progress despite our occasional

chidings, and we are very proud of the progress you have been making. Also, we want to remind you again not to worry about the extent of the progress or the direction it is taking. Just let it happen. All knowledge that it is absolutely necessary for you to gain to sustain this progress will be gained at the appropriate point in ... [chorus] TIME. Therefore, not to worry as it will all fall into place, as we have told you. Now, we do not feel that you are ready, as yet, to know what your ultimate purpose is, nor is it necessary for you to know, and it certainly would not be helpful in any way, so we ask again that you please not worry about that because when the “time” comes for you to know, you will.

Q: (SV) I want to ask one question: If there is no time, there is no past and no future; there are no past lives and no future lives, there is no such thing as reincarnation, then how can you be us...

A: Yes, there is reincarnation. You are getting ahead of yourself there. We never said there is no reincarnation.

Q: (SV) But, if there is no time? (J) It is our perception of it. (L) It is all happening simultaneously. We are having all of these lifetimes at once. (SV) Is there a way that we can connect ourselves with all our other selves?

A: Picture it this way: we will access some of your memory banks and give you another reference which, interestingly enough, fits very closely with the perpendicular reality wheel that we described earlier. You know what a slide projector looks like? To give you some feeling of what this expanded nature of reality really is, picture yourself watching a big slide presentation with a big slide wheel on the projector. At any given point along the way you are watching one particular slide. But, all the rest of the slides are present on the wheel, are they not? And, of course, this fits in with the perpendicular reality, which fits in with the circles within circles and cycles within

cycles, which also fits in the Grand Cycle, which also fits in with what we have told you before: All there is is lessons. That's all there is and we ask that you enjoy them as you are watching the slide presentation...

Q: (J) In that analogy, the light that shines through the slide, as it projects it upon the screen, is our perception?

A: And, if you look back at the center of the projector, you see the origin and essence of all creation itself, which, is level seven where you are in union with the One.

Q: (T) Can we ask one more quick question? NASA has announced that the space telescope, Hubble, has detected clusters of comets, is this, in effect, the beginning of the government's of the world preparing the people for what is to come?

A: It certainly is a possibility, but, again, you are accessing a very touchy area. Too much knowledge for you to gather in this particular area would not be beneficial.

END OF SESSION

3.33 July 8, 1995

Frank, Laura, Terry, Jan, SV, Tom French and Cherie Diez.

Q: Hello.

A: Yes.

Q: (L) Who do we have with us?

A: Tqv.

Q: (L) What does TQV mean?

A: Was interrupted. [We were using a new table which required several adjustments. We finally gave up and got out the old table.]

Q: (L) Okay, what is your name, please.

A: Tora.

Q: (L) And, where are you from?

A: Cassiopaea.

Q: (L) As you can see, we are doing the board this evening.

A: Yes.

Q: (L) We think it is a little more convivial. When Frank is zonked out, he can't participate.

A: Yes.

Q: (L) Okay, we have a number of questions. Is it alright to start questioning now?

A: Yes.

Q: (L) Is there a Jewish conspiracy to subjugate the world?

A: Not Jewish, we have told of this extensively before, curious that you should need review so soon!

Q: (L) The only reason I ask this question is because JW was here for a long time today and [Laughter and groans] I whipped out my Dachau memorial book and laid it in his lap and we got into the thing, and he is just so convinced that there is a Jewish conspiracy to dominate and rule the world that I just thought I would throw the question out to see what further comments might be made about it other than the obvious. Thank you so much for that response. Next question: In reading about crop circles; I know that we have been told that they come from sixth density,

but I would like to know the exact mode or mechanism by which they are made. Is it like electromagnetic imprinting, is it like a whirlwind. Can you tell us a little bit about how they are actually physically created?

A: Field transfer.

Q: (L) What kind of field?

A: Magnetic.

Q: (L) Are they transferred directly from sixth density to third density?

A: No.

Q: (L) Are they manifested by an object that has come into third density, such as a craft of some sort?

A: No.

Q: (L) Can you give us a clue here?

A: We can give “clue.”

Q: (L) Okay, what is the clue?

A: See Hoagland.

Q: (L) What does Hoagland say? (T) He says that basically what we see in this density is a 3rd dimension reflection of 4th dimension and that it can be seen mathematically by looking at the cloud patterns on the different planets. If there was not another dimension above us, circular would be circular and the circular motion of the clouds would be maintained, but if it is a transfer from fourth density to third density, when you are looking at a fourth density object, what the third density version of it would look like would show a hexagonal figure with angles to it, and that the photographs from the Voyager Probe that show that the

cloud patterns from the North and South poles of most of the planets are not circular, they are hexagonal. (L) Okay, in sixth density, what are crop circles?

A: Thoughts.

Q: (L) Who is thinking these thoughts?

A: Yours truly.

Q: (L) Okay, if they are thoughts... (J) They are messages so they could be thoughts before they are messages. (T) Well, they have described sixth density as pure energy, therefore there is nothing physical in sixth density to reflect back through the densities. So the only thing that can come from there to here is thought. Because, that is all there is there. (L) So, it is a field transfer of thought. (T) So, when sixth density thinks and they pass that down, most likely skipping fifth density to fourth density, and then stepping down from fourth to third, we end up with a three dimensional crop circle. But what does a crop circle look like in fourth density?

A: "Look" is not point.

Q: (L) What is the point?

A: You need visual stimuli in order to remember.

Q: (L) Oh! (J) What did it say, you need visual... ? (L) So, in other words, these are thoughts designed to make us remember by looking at them?

A: Yours is a physical dependent existence.

Q: (J) Yes! (L) Okay, if we made diagrams of the crop circles, and put them up on the wall and looked at them or meditated on them, would they do anything to our brains, our electromagnetic patterns, or would they bring up information from within

for us?

A: Not likely.

Q: (L) Well, what are we supposed to do with them?

A: Nothing in particular.

Q: (L) Are they doing something to us? (T) I had a feeling it was going that way...

A: Wait and see.

Q: (L) Okay. We have been talking a bit about the maze on the floor of Chartres Cathedral...

A: Your media resists, why? Suggest discussion.

Q: (L) The media resists crop circles and I know this is so because when I went to the Library to research them, there was not a single, solitary book, magazine or article on the subject of crop circles in the entire county system.

(J) There wasn't anything in Barnes and Noble either.

(L) Now, the two books on the subject I do have, I had to order special. Why would the media resist crop circles?

(Susan) The same reason they resist everything else. (

F) But, they don't resist everything else as much as crop circles.

(T) Are we looking at this from the wrong perspective? They're not resisting or overlooking them any more than anybody else does. We were just told that crop circles themselves were not important to us.

(F) I don't think that is what they meant.

(L) I said what are we supposed to DO with them, and they said nothing in particular.

(F) And then you asked if they were going to have any effect on us and they said “Wait and see.”

(T) Could this be because no one is supposed to pay any attention to them? Is this part of it. Maybe we are looking for something that is not there by saying “Oh, the media does not recognize them and do a bunch of stories about them and alert everybody to them. Maybe they are not supposed to. Maybe the circles are supposed to work on their own without major attention.

(F) I don’t think so.

(L) Here is something I got of the net recently. “To some people, the circles which began appearing about a decade ago represent the handiwork of extraterrestrial invaders or crafty tradesmen bent on mischief after an evening at the pub, or even hordes of graduate students driven by mad professors. To others, the circles suggest the action of microwave generated ball lightning, numerous whirlwinds or some other peculiar atmospheric phenomena. These scenarios apparently suffered a severe blow late last summer when two elderly landscape painters, David and Doug admitted to creating many of the giant, circular wheat field patterns that cropped up over the last decade in southern England. The chuckling hoaxers proudly displayed the wooden planks, ball of string, and primitive sighting device they claimed they had used to construct the circles.

But this newspaper orchestrated, widely publicized admission didn’t settle the whole mystery. Gerald Hawkins, a retired astronomer who now divides his time between an apartment in Washington and a farm in Woodville, felt compelled to write last September to Dave and Doug, asking how they managed to discover and incorporate a number of ingenious, previously unknown, geometric theorems of a type that appear in antique textbooks, into their “artwork” in the crops. He concluded his

letter as follows: “The media did not give you credit for the unusual cleverness behind the designs and the patterns.”

And then he says that he is finding ratios of small whole numbers that precisely match the ratios defining diatomic scale. These ratios produce the eight tones of an octave in the musical scale corresponding to the keys on the piano. That was surprise number one, he said. He began looking for geometrical relationships among the circles, rings and lines and then he found that measurements reveal that the ratio of the diameter of the large circles is drawn so that it passes through the centers of the three original circles to the diameter of one of the original circles, and is close to 4 to 3. What he discovered were geometric relationships which simply are not taught anymore in the modern math. And yet, essentially he says that these guys that came forward and claimed that they did it could not possibly have done it.

(F) Well, the thing that is so strange to me is that since 1992 there hasn't been any reporting in the American media about this phenomenon at all. (Laura to Tom) Is there any way you could check that? [Tom is a reporter with a major newspaper.]

(TF) I already have. (L) You have? What have you found?

(TF) There's not a lot.

(L) What is it and what does it say? When?

(TF) I didn't notice the dates. I didn't notice if there was any turned out after 1992...

(F) There's not...

(TF) I liked my photo so much I had someone check it out. One of the librarians. Some things you call up you get material that is that thick... {Indicates large file thickness} this is only this thick. [Indicates tiny file thickness]

(L) So, there is something?

(TF) But I don't know what years any of it is.

(F) Well, it is not after 1992, I can assure you because I have been keeping very close track.

(TF) I know it hasn't been in the news. I don't remember seeing anything in the news for several years.

(F) It hasn't been here, but it has been in Britain.

(TF) Right!

(F) It is very strange when we are hooked up to the cable news channels that there has been a television black-out on it here. The other thing is Linda Howe showed the new ones from 1994 and they are more spectacular than any that have appeared. Now, if these artists are still going around doing this...

(T) This is strange, Michael made me copies of Cornet's lecture and Linda Howe's lecture [on crop circles]. When I played the tapes, the Cornet tape was fine. Mike's equipment is good. But the Linda Howe lecture didn't record. I have two hours of black with flashes of light crisscrossing the tape. I called Mike and told him and he said, oh boy, I did it late at night and must have hit the wrong switch.

(L) Well, I hate to get paranoid, but, do you suppose this Dave and Doug were set up to make this claim so that the media would have an answer they could tout and then just drop the whole thing? If so, why?

(F) Because it's too frightening. I remember in 1991 and 1992 this thing was heating up and heating up.

(TF) That's true.

(F) It was unusual because this type of subject matter is usually not attended by the mainstream media to any great extent. When there is a big UFO wave there might be a little blurb about strange lights reported by various people. This subject was actually focused upon by all of the major networks, it was on all of the major wire services, it was everywhere. All of a sudden, these two drunken artists appeared and they all said: "Oh! That's it! Okay, forget about it." That was so strange because my impression of journalists has always been, at least it used to be, that they want to dig up the truth, and here, mere placebo, surface type explanations that don't explain anything and which are not adequate, suddenly caused them to lose interest. It would be like Watergate: "Oh, the 18 minute gap... well, Mary what's-her-name stepped on the pedal. Oh, okay, no problem!" Obviously that didn't happen! This just didn't make logical sense for those of us who had looked at the crop circles, and even people who don't follow this type of subject matter closely, who I have talked to, people who brush off the subject of UFOs, have told me that this explanation just doesn't add up! These two guys did all of this under the noses of thousands of researchers who were trying like the dickens to see anything that happened in the middle of the night - in the middle of this, a simple, ridiculous if you get right down to it, explanation is offered and the whole subject is brushed off?!

(J) And, the explanation would only work if the crop circles were within their physical reach logistically speaking.

(F) Well, not only that, if you have ever calculated what is involved, they started in 1973 with just a handful throughout the summer and by 1992 it was hundreds all over the planet. These guys would have to be working non-stop, 24 hours a day, flying all around the globe... (laughter) ...and I thought, how can they accept this brush-off explanation? The other thing is, you would

expect, obviously if that were the true explanation, as crazy as it seems, if they could actually, physically do this all by themselves, which is physically and mathematically impossible, but never mind that; it has happened since then. If these two guys are pulling a hoax and nobody is going to pay any more attention, why would they bother to continue to do it each and every summer since that time. Wouldn't somebody catch them by now? There are just a hundred arguments against this explanation that come to mind. Yet, in this country it is completely ignored. My own theory is that it is too sensitive an issue. Here is something that can be photographed.

(L) It proves that there is somebody else out there.

(F) It doesn't prove it...

(J) there's something else going on...

(F) I don't think it proves it, but it makes it very hard to ignore. As I have stated before, my father was a physicist and he was also a skeptic. A very brilliant man... when we would see on television... I remember one night in particular, we saw a very comprehensive segment on crop circles, and he actually got angry when I pointed out to him that this phenomenon seemed awfully bizarre, awfully intense, widespread and so on. He tried to brush it off: "Oh, I think it is a fad," were the words he used. This is a scientist!

(L) He dove headfirst into the deepest river in the world! Denial.

(F) Like a whirlwind is going to form a pattern like an intricate geometric figure? Come on! Sure! He grasped that whirlwind theory and when I pointed out to him that this was not logical, he got angry which I perceived as fear. Being very defensive because it stabbed into the heart of his whole life's work.

(L) That right there is the answer, culturally speaking.

(F) Exactly!

(L) It stabs into the heart of materialism.

(F) In this country somebody does not want this to be reported on because you can't brush it off. You can brush off UFOs... well, not if you really study the issue, but if you don't pay too much attention to it you can brush it off...

(J) Because there is no physical evidence. You have evidence with crop circles. They are there. You can see them.

(L) And, they are astonishing! Just to look at them is astonishing!

(F) Any of them, really, except for the very simplest ones, I mean, just using pure, simple logic, who would have the time, the energy, the expertise to do these things...

(J) And to do it in the dark, without any light...

(F) And in just short periods of time! It just doesn't make sense. Just imagine, Mr. French, it is your assignment to go out into the wheat fields of England, in the dark and to make this intricate figure...

(TF) I would ask them to do it for me and show me how they did it!

(F) Right!

(Susan) I don't know if it was Sightings or Encounters, but one time they had a segment on crop circles in Mexico, and they even appear on rock cliffs...

(F) Yes, and it's happening in Puerto Rico. And, the alleged report on this one was that Army type vehicles came in and destroyed it so people couldn't see it. Which leads me to believe, with my suspicious mind, that somebody doesn't want this stuff going on, for whatever reason.

(L) Yes, what are you going to do with a population that suddenly asks you: “Well, you’re in charge; what is this? What’s going on?” And, you can’t answer them. You have lost credibility as the authority.

(F) And, none of the answers you can come up with are safe. It offends the church because they can’t explain it. It offends the scientific community because they can’t explain it.

(L) Yes, the church calls everything they can’t explain “The Work of the Devil.”

(T) Which one?

(L) We think we have come up with an answer. Are we anywhere on the right track?

A: Maybe.

Q: (L) Anything further you would like to add to what we have said?

A: No.

Q: (L) Well, we have really kind of worn out the subject at this point. Going on to the labyrinth at Chartres Cathedral, we have the idea to reproduce this and use it. (J) Is this in the same line as the concept of the spiral and spinning?

A: Maybe.

Q: (L) Which figure would be the most advantageous to use, the spiral, the cho ku rei or the labyrinth?

A: You did not ask preliminaries.

Q: (L) What is the source of this labyrinth?

A: Open.

Q: (L) What preliminaries do you want? Who built it?

A: Open.

Q: (L) What preliminaries do you want?

A: We would ask the same of you.

Q: (J) Great! (L) What we want to know about this particular figure is if it is beneficial to walk, to use...

A: Okay, now we are on the right track! Up to you to discover.

Q: (L) So, you are not going to give us anything on the spiral, we have to play with it.

A: And experiment, that is one method for learning.

Q: (T) Well, it wasn't a real good question as to whether or not I was going to do anything with it as a group, I was already going to do something with it. (L) Well, then they are not going to tell us anything if that is already in the works. (T) I knew it as soon as I picked up the book, I said "We've got to do this. This is not a choice here, this is something we've got to do." (L) Okay, is there any information you can give us about this figure. What does it mean? [Displays written glyph given to Jan by Ken Eagle Feather.]

A: Creator implies importance.

Q: (L) So, the person who drew this implied importance?

A: Yes.

Q: (L) Is it, in fact, important or significant?

A: Open.

Q: (T) What do the symbols mean? (L) Well, the sideways figure eight is the symbol for eternity, this is just a triangle... (J) Is it an

equation... (T) Is it a formula?

A: One question at a time.

Q: (L) Is it a formula?

A: The creation is, because it was created.

Q: (T) What does the triangle symbolize?

A: You are not grasping message.

Q: (J) I guess not. (L) Well, I got that the guy who drew it wanted it to be seen as mysterious and wanted to imply that there was something important and mysterious about it when, in fact, it is just a meaningless drawing?

A: Yes.

Q: (T) Okay, so it has no meaning whatsoever?

A: Incorrect.

Q: (L) It has meaning, the meaning the person who drew it implied into it. In terms of being a mathematical formula, I can tell you right now that it is not that.

A: Ask creator for meaning.

Q: (T) So, only the person who drew it knows what it means. (L) Because he is the one who drew it. Without the meaning he gave it, it has none.

A: Yes.

Q: (L) Next question. Are you still with us?

A: As always.

Q: (L) Thank you. There is a phenomenon going on today where a lot of people have accused their parents of childhood abuse

which is later proven to be false, and it causes a lot of problems. This has led to a lot of problems about the practice of hypnosis...

A: Preconceived notions by biased therapists, i.e. the improperly used power of suggestion.

Q: (L) This has led to much speculation that all UFO abduction memories are false memories, and that hypnosis, itself, in general is a useless or flawed technique. Is there any possibility that many of the people who think that they have been abducted by aliens are merely responding to the suggestions of the therapists?

A: Two concepts at once.

Q: (L) Is there any possibility that certain people think they have been abducted and they have not?

A: Yes.

Q: (L) Is it possible for a therapist to suggest these ideas into someone's mind through hypnosis and have them...

A: Yes.

Q: (T) It can work the other way around, too. (L) What do you mean?

A: What do you mean?

Q: (T) You asked if some people who think they have been abducted were actually abused and they said "yes." (L) No, that's not what I asked. (T) What did you ask. (L) I asked if some people thought they had been abducted who had not been abducted, or if some people thought they had been abducted and the idea had been planted in their mind by the therapist. And, they said "yes." (T) Okay, have some people who thought they have been

abused not been abused. The same question only using the word abused, instead of abducted?

A: Already answered yes.

Q: (L) But, the next question is: Are there some people who have been abducted who think they have been abused?

A: All combinations exist.

Q: (L) Is there any... (T) It depends on the therapist and what the therapist believes as to the results of the therapy... (J) Yeah, are relying heavily on Freud?

A: No. Depends upon actions of therapist, not beliefs.

Q: (L) Is there any particular personality type that is more likely to be abducted than another?

A: Ridiculously open question.

Q: (L) Well, I didn't want to lead! (J) We have an anniversary coming up. (L) Yeah, I know. The sixteenth. (J) No, I mean OUR anniversary, Terry's and mine. (L) Oh. (J) Your anniversary is on the 16th and ours is on the 17th.

A: Same.

Q: (L) What do you mean, "same?" (J) Well, you would have started on the evening of the 16th but worked into the early hours of the 17th.

A: Yes.

Q: (J) Good grasp of Time! (L) Okay, back to the question. What I want to know is; in all of the articles I have been reading about abduction, there are many that claim that persons who experience abduction are of such and such a personality type, i.e. fantasy prone. Well, I am definitely not a fantasy prone personality

and I don't think the others here are either.

A: What is a "personality type?"

Q: (L) Well, I don't really think there is such a thing if you want to get down to it. (T) Let's just say that the personality types are something developed by individual researchers to pigeonhole people for statistical analysis. It really has nothing to do with abduction itself. (J) Or anything else.

A: Good one, Terry!

Q: (L) I was talking to my cousin the other night when I was up in the boondocks, and we were talking about abductions and UFOs and space/time and so forth. He made the remark that he thought that it was very likely that there was another universe where this one "ends" in which the constant of light was the "minimum." Is this a valid or usable concept?

A: Too simplified.

Q: (T) What did they tell us before about the speed of light? That the speed of light is a "time" measurement and time only exists in our illusion, therefore there is no speed of light. (L) So, there would be a state where the constant was not a "speed" but just what is. There is no speed of light because there is no time.

A: All imaginable combinations exist because they are imagined!

Q: (J) I like that. (L) Okay, on December 9, 1965, there was a reported UFO crash at Kecksburg, Pennsylvania. This was purported by the military to be a crash of a Soviet spy satellite. There is a lot of stuff that has gone around about this and it was even portrayed on "X-Files." Was the event that occurred on December 9, 1965, in Kecksburg, Pennsylvania, a crash of a UFO?

A: Define please "UFO?"

Q: (L) A UFO as in “Alien space craft.”

A: Close.

Q: (L) It was not a Soviet spy satellite?

A: No.

Q: (L) Now, you say “close.” What, specifically, was it?

A: We have taught you new methods of imaging, we are patiently waiting for you to use them!

Q: (L) What do you mean “new methods of imaging?” (T) To talk about it? (L) We don’t know enough about it... that’s all we know. (T) Well, working with what we know about it we could probably talk it out and figure out what it was.

A: Density 1, 2, 3, 4, 5, 6, now, how does the concept of “craft” apply here?

Q: (L) Was it a projection? A trans-dimensional atomically re-molecularized object?

A: Closer.

Q: (L) Piloted by, I would assume, the Grays? (T) Not necessarily.

A: ! If you prefer.

Q: (T) Well, if it was a craft as they have been telling us, brought in from 4th density, it would be the Lizards or someone else of the other side, the [Orion} Union.

A: The point is the mode of transfer.

Q: (L) Okay, so it may be that it didn’t crash there, it was... did something happen and something came through the dimensional curtain? Is that it? (T) Well, it didn’t crash, it landed! Or

materialized, or became solid. (L) I think NORAD tracked it. (J) It was seen as a fireball.

A: Colder.

Q: (T) Okay, this is just a theory, a thought, just something I am throwing out here, nothing positive... the military was “Johnny on the spot.” They made a big production of hauling it out of there and threatening everyone. What if it was put there, or sent here for them? No that it crashed, but it was something being sent from there to there and the Uncle came and picked it up?

A: No.

Q: (L) The point is the “mode of transfer.” (T) The point is that it was “cross density.” (J) Well, we know that they all are “cross density.” (T) No, not all of them, some of them come from this density. (L) The point is the “mode of transfer.” What are they trying to say? (T) It was materialized here from 4th density. It didn’t fly here. (L) Okay, it was not a UFO because it never “flew.” (T) The trail that was seen coming in was it materializing into the atmosphere. (L) Actually, it was materializing in the same spot, the atmosphere moved. (T) There was a visible path left... (J) I think we should stop using the term “UFO.”

A: Isn’t this fun?!

Q: [Laughter and groans] (L) Okay, what is the point? (T) The point is the “mode of transport.” (L) Okay, it was projected through the dimensional curtain; it was a time traveler..

A: The point is why look for “nuts and bolts.” Do you want to join Gene and his cronies? [Gene is MUFON person with extreme materialist view of UFOs. They all come from other planets, period.]

Q: (L) So, in other words... are you saying that something happened and the military went in and DIDN’T get anything?

A: No.

Q: (T) Okay, we are trying to figure out the “mode of transport” and why it was significant. (L) Was this something that the military knew was going to happen at that place and that time?

A: Maybe, but still not issue behind this query.

Q: (L) Well, what is the issue? I just wanted to know if the blasted thing was a UFO or a spy satellite? Was it not a crash? (T) It was REPORTED as a crash, but we don’t know if it crashed or landed. (J) We don’t know what really happened. (L) Was it a crash of a craft?

A: What defines “crash?”

Q: (L) Did it do something it didn’t want to do? (laughter) A crash is when you go bongo-zongo without intending to.

A: Do thought forms crash?

Q: (L) I guess not. (J) Okay! It was a thought form; it came through the density and yet they hauled something away on a truck. What did they haul away on a truck? Or, did they haul away something?

A: Yes.

Q: (L) What did they haul away? (Susan) Thoughtform! (laughter)

A: Sorry! 64,000 dollar question!

Q: (L) I hate it when they do that! (T) What did they haul away. They hauled away an object...

A: How do you learn if we don’t?

Q: (J) What?

A: Do “that!”

Q: (J) I guess the point is that we don’t really know what the military moved!

(L) We don’t know if they hauled anything away at all. It is all rumor.

(J) Exactly.

(T) The only thing known is that on December 9, the residents of Kecksburg, PA saw something come down, or thought they saw something come down...

(J) A light come down...

(T) They saw the military come in...

(J) And they saw something come out...

(T) And they saw the military take something away...

(J) So, what does that tell you?

(T) There are residents who said they saw a large, metallic object in the woods, and we only know what they said they saw... Most of the town and the police department and the fire department did see the military come in because they commandeered the fire department...

(L) Okay, here’s what we know (reading): “The case in question involves the alleged crash of the so-called ‘Kecksburg UFO’ recently featured in magazines and even re-enacted on television. The ‘acorn’ shaped object supposedly fell to the ground in Western Pennsylvania on December 9, 1965. As the story goes, Air Force search teams cordoned off the wooded area and hauled a large object away. It was later reportedly seen at the Wright Patterson Air Force Base near Dayton, Ohio...” (How come everything goes to Wright-Pat, for God’s sake! What a boring place!)

“One suggested identity for the mysterious intruder was the Soviet Cosmos 96 satellite which actually did fall back into the atmosphere that day. But, according to Air Force spokesmen, that craft had plummeted 12 hours earlier over another part of the planet. It was a shame, of course, because Cosmos 96 would have been a wonderful UFO...

“In May of 1991 the Pittsburg Press decided to verify the Air Force claims on its own. Toward that end, reporters obtained official space tracking data from the archives of NORAD at Cheyenne Mountain. The decades old data finally arrived in the form of 8 snapshots of the satellite’s orbital position. The last snapshot, when projected forward into space and time by a leading satellite watcher who does not want his name revealed, seemed to confirm the official Air Force account. But, going on a hunch and tapping my own expertise in space operation and satellite sleuthing, I decided to check the data myself. The released tracking data could not be positively identified with pieces of the failed probe. Why in the world would our government lie?

“In the 1960’s U.S. Military intelligence agencies, interested in enemy technology, were eagerly collecting all the Soviet missile and space debris that they could find. International law required that the debris be returned to the country of origin. The hardware of Cosmos 96 was it’s special missile warning shielding; too valuable to give back. Hardline skeptics still doubt that anything at all landed in Pennsylvania. Robert Young, an investigator from Harrisburg, keeps finding new ‘holes’ in the claims of witnesses. ‘I am now more convinced than ever that nothing came down in Kecksburg,’ he says. And, arch-skeptic, Phillip Klass...” [Hooray, Phil!] “...attributes the NORAD data to foul-ups, not cover-up.

“But those of us who study the relationship between U.S. Military Intelligence and the former Soviet Union, still wonder, after all, what better camouflage than to let people think the fallen ob-

ject was NOT a Soviet Probe, but, rather, a flying saucer. The Russians would never suspect; the Air Force laboratories could examine the specimen at leisure and, if suspicion lingered, UFO buffs could be counted on to maintain the phony cover story protecting the real truth.”

And that is all we know about the purported Kecksburg landing.

(T) Why would anyone fly in a small, acorn-shaped capsule?

(L) They wouldn't want to fly in it. And, remember, it can appear very small on the outside but be huge on the inside.

(T) And, they hauled something away that may or may not have... whatever it was, it went over! Something went over at that time. My folks saw it when it passed over the Great Lakes! I missed it. I was over at a friend's house. We walked out of the house ten minutes after it happened and everybody was saying: “Did you see that! Did you see that!” How about this: The mode is the important thing. Let's just lump all non-human types under the word “alien.”

(J) Let's use “non-terrestrial.”

(T) No, you can't use “non-terrestrial.” Could this have been a human experiment using technology from WWII, from the Einstein work, the Philadelphia Experiment Work, could they have been messing with something and it came down where it wasn't supposed to?

(L) Good question!

(T) It was described as a small acorn-shaped capsule, a lot like what we were shooting up at that time on rockets... (J) That's right! (L) Is Terry on to something here?

A: Maybe...

Q: (T) Was this a continuation of the Philadelphia and Montauk work?

A: Now this poses some interesting questions, does it not?

Q: (T) Yes it does. That was 30 years ago!

A: Do you want to be the ones who tear away the veil?

Q: (T) Sure! I'm always into veil tearing!

A: Are you sure that is wise?

Q: (T) If we don't start tearing some veils away from some of these questions, we are not going to be able to progress much farther. You keep toying with this and then you tell us it is too dangerous.

A: Not point. It is okay to learn truths for yourselves, is it wise to do it for all others?

Q: (L) Is this another one of the things we can't tell. (T) No, I think that was more aimed at the fact that it is okay for ME to learn truths, but do I want to expose you all here... (L) No, I think it is more that other people don't want to know it... (J) Or aren't ready. (L) If the government is, in fact... (T) Well, that was 30 years ago, and if it was a...

A: Who is the "government?"

Q: (T) Well, I suppose that if we saw a list of names of who is the real government, we wouldn't know who any of them were! They are certainly never on the ballot.

(L) Okay, what we have so far is that this was not a UFO in the sense of being a craft, but that it may have been an object that the government was playing with in their own little experiments in moving things through space-time... (J) And they weren't real good at it. (L) They screwed up! Okay, next question: Is it possible

to create resistance to abduction by generating sound? Like an internal sound?

A: Vague.

Q: (L) Well, this article I was reading said that different people used several techniques where they think it has helped them to halt or avoid abduction by “aliens.” One is to generate an “internal” sound, a high-pitched “thought hum,” and another is to invoke angelic spirits such as the Archangel Michael, and another is to “Just Say No,” and these people think they have avoided being abducted thereby. Are any of these usable techniques?

A: Potpourri.

Q: (T) Sweet smelling dried flowers are potpourri.

A: Sage, salt, oohm, any other rituals you like?

Q: (L) In other words, nothing works? (T) It’s not going to stop them! I keep a heavy shield around the house and all that stuff and they still get through!

A: How about the hula hoop dance with green peppers stuck up your nose! [Hilarious laughter]

Q: (T) Thirty-three times! Mirth! [Tom French sits at board]

(TF) Frank, what is it you feel that you do here?

(L) Ecstasy! Sorry!

(Frank) Well, you will feel it shortly. It is not like you feel anything, really.

(L) When you put your fingers on, usually just two, you want to put them on lightly but firmly. You don’t want to create any drag, yet you want contact. Most people usually put too much pressure

or not enough and it either leaves them behind or they stop the motion.

[Returning to topic of resisting abduction] Well, the rest of the UFO loonies are not going to want to hear this because they all like to think that they have all kinds of techniques of resistance and they have these psychotronic weapons and machines, and they think they are all-powerful with tricks up their sleeves...

(T) Mike has a UFO detector in a cigarette pack.

(TF) What?!

(L) Yeah. Mike F, our nemesis.

(T) He has an electronic thing he carries around in a cigarette pack which he says beeps or something when UFOs are in the area!

(Frank) It is funny that you should mention that because when we were at the MUFON meeting in Clearwater, I did hear a distinct, high-pitched beep coming from him.

(TF) Who did he say it to?

(L) Oh, he's told everybody!

(J) Is it anything like a B.S. detector?

(TF) Now, if I start reading out the lyrics from "Born to Run," you know there's something wrong.

(T) It's a lizard. [Discussion of lizards, roaches and toads]

(L) Alright, now, reading about the Linda Cortile case, the woman supposedly abducted out of a high-rise apartment building; rumored to have taken place in the sight of Javier Perez de Cuellar and his bodyguards and driver. (TF) The U.N. guy. (L) Was the man who witnessed this really Javier?

A: Yes, but not only one.

Q: (L) So, there were others? Okay, of the two people who were supposed to be the bodyguards of the “VIP,” one of them exhibited some extremely bizarre behavior after this event. What was the cause of this bizarre behavior? Was it him trying to freak-out Linda Cortile, or was he simply freaked out himself?

A: Simple shock.

Q: (L) So, he was having a hard time dealing with it himself. During the discussion of this case, it seems that this particular incident really involved a mass abduction because a number of women in the neighborhood have subsequently claimed that they not only were abducted at the same time on the same night, but that during the course of time that they were being taken to this craft, they saw other women walking out on the street together. Was this, in fact, a mass abduction?

A: Some was hysteria.

Q: (L) Do mass abductions ever occur?

A: Open.

Q: (L) Did Linda Cortile make up any of this story.

A: Open.

Q: (T) Is Budd Hopkins ever going to come out with the story?

A: Open.

Q: (L) I read a recent article by a woman named Dr. Hulda Clark, and she claims that all cancer, depending upon certain variations, is caused by parasites.

A: No.

Q: (L) Well, if Hulda Clark's theory isn't it, what is the cause of cancer?

A: There are many causes.

Q: (L) Well, the reason I asked is because TG has had to go back to Houston for tests because of pain in his arm. Is this, or is he heading toward, a recurrence of his cancer?

A: Yes.

Q: (L) Is there anything that can be done in that situation? [Tom suggests that he and Frank work alone and Laura removes her fingers.]

A: Open.

Q: (Susan) In the bodywork I have been doing, I have found myself doing a lot of spiraling on people's bodies. I have been getting great results, but I was wondering about the difference between moving clockwise and counter-clockwise?

A: Careful!

Q: (Susan) Well, I better not do that anymore! (L) No, they just said to be careful. (Susan) Well, is there any difference between clockwise and counter-clockwise?

A: Suggest learn more.

Q: (Susan) How do I learn. (Tom to Frank) Do you feel it moving and your fingers sort of follow or do you feel something generating through your fingers telling them where to go? (F) No, I don't feel anything generating through my fingers. (L) No, none of us feels anything at this point. Which is not to say that the fingers involved are not moving the planchette [plastic disk]. It is just wholly unconscious.

A: Need energy flow.

Q: (L) I guess they are saying that they need the energy flow of the different people or that the movement is an energy flow through us. There have been occasions where the planchette has flown off the table out from under everybody's fingers. Anything else, Sue? (Susan) Yes, from whom do I get this training?

A: Look, listen, open!

Q: (L) Okay, you can experiment on me!

A: Carefully.

Q: (Susan) Is there any danger in doing this?

A: Maybe.

Q: (T) Is it because the spiral pattern creates an energy flow that is too strong for the person?

A: Close.

Q: (T) Has this technique been used before?

A: Yes.

Q: (T) Is it being used now by anyone besides Susan?

A: Yes.

Q: (T) Is this someone in our area?

A: Open.

Q: (L) Any other questions? (TF) Last time I asked about the mountain dream. I would like to know if there was anything behind my father's "M" dreams? Dreams in which he was repeatedly terrorized by the letter "M." (L) You asked that the last time and I think they said it had something to do with the war.

A: Open.

Q: (L) Anything before we shut down? (T) What was the purpose of the attack that we were under? (L) The purpose?

A: Already told you this.

Q: (T) Here? (L) It's in the transcript. (J) Yes. It's in the transcript, did you read it? And I thought it was very interesting. I didn't realize that you guys were doing the session, and right at the point where it says "Terry needs to discuss..." the phone rang and it was us calling. (L) That whole issue was

A: To discover.

Q: (L) They said at that time that the attack was to break up the group and that all attack was essentially rooted in attack on faith. Did you read that part? (T) Yes, but it didn't make sense. (L) Well, they said if you look back over the pattern, all attack is an attack on faith.

A: Yes.

Q: (T) What faith were they attacking?

A: Open. Discover.

Q: (T) Was I being prevented from learning something about the information gathering process?

A: Up to you to discover.

Q: (L) Well, it will sort itself out. (T) It wasn't an attack on the group. And it wasn't an attack on me that would really make a difference one way or another. Was it a practice attack? (TF) Who was behind the mask at the Veiled Prophet Ball? It is a coming out ball in St. Louis for debutantes. (L) Is it someone who is dressed up? (TF) They are just there and preside over the ball.

A: Victor Moeller.

Q: (TF) This is before I was born. (J) Interesting that they give a name! (TF) Can't get much more specific than that! It was 1958.

A: Goodnight.

END OF SESSION

3.34 July 19, 1995

Frank Direct Channeling, Laura, SV

Q: When the connection is complete will you indicate by saying "I am ready." Are you ready?

A: Yes. [Positional adjustments made]

Q: (L) We have several questions this evening. Who do we have with us?

A: You keep requesting a name. Remember this mode of communication has different qualities and different necessities, therefore identification by name is not necessary.

Q: (L) What is the protocol?

A: Protocol is not the word. Protocol suggests restriction. There is no restriction here. It is merely a different mode of communication.

Q: (L) Why does there seem to be difficulty in transmission right now? [Frank is talking very low and slowly.]

A: That is your perception only.

Q: (L) Ordinarily the voice is strong and clear...?

A: Your perception, however the voice will become stronger and clearer as the session progresses as has been the case in each of

the previous sessions using this particular type of communication, also one possible problem may be physical blockages of the sound wave paths.

Q: (L) Caused by what?

A: The physical obstructions in front of the pathway. [We make adjustments with pillows.]

Q: (L) Is that better?

A: The results will be up to you to determine.

Q: (L) Alright. Our first question is: In a previous session we were given a small dissertation on the process of abduction. It was described for us in some detail. Now, what we would like to know is, if our souls are abducted from our bodies and then used as a pattern for remolecularization in fourth density, is there ever, at any time, a remolecularized clone that is retained in fourth density even after the soul has been returned to its original body?

A: No, it's not possible.

Q: (L) So, they don't keep a pattern or clone of any of us after they have abducted us, "they" being a general term?

A: No.

Q: (L) Okay. Is any process used to affect us at a distance from fourth density?

A: That question is vague.

Q: (L) Do any of the STS beings have the ability to cause us physical problems, or mental or emotional problems when not in direct contact with us?

A: Certainly.

Q: (L) How is this done?

A: A number of different methods used.

Q: (L) Can you describe the most frequently used methods?

A: That's a non-applicable question.

Q: (L) What do you mean?

A: There is no frequency determination by way of mathematical calculation.

Q: (L) So any and all methods may be used at any given time?

A: That is correct.

Q: (L) Could you give us one or two examples of how this is done?

A: There are many: sound wave manipulation of the ultra high frequency range would be one.

Q: (L) What do these sound waves in the ultra high frequencies do?

A: They can alter chemical balances within the body of the subject, thereby also the brain, using the physical path to cause distress by altering these chemical imbalances into place.

Q: (L) Do these ultra-high frequency sound waves ever carry messages in terms of pre-coded suggestions that are triggered by these waves?

A: Messages are not carried in ultra-high frequency sound waves. Now, you are talking about an entirely different method.

Q: (L) Could you describe this method to us?

A: This would be very complex and time consuming for you, but also, there is one more method used than what your mental capacities are able to perceive.

Q: (L) And what is that?

A: There's no possibility for an adequate response since the information would not be perceptible for you.

Q: (L) I don't understand. You say there is one more method that would be beyond our ability to perceive...

A: That's correct. If you cannot perceive it, how can you expect to understand it?

Q: (L) Well, perhaps if we were helped to understand it we would learn to perceive it and could thereby negate it.

A: The best analogy would be trying to explain calculus to a two-year old. Would this be possible?

Q: (L) To a very clever individual, possibly.

A: And would it be possible for the two-year-old human to perceive calculus correctly?

Q: (L) If the two-year-old human was extremely bright.

A: Well, now you are adding conditions into a situation which were not there to begin with.

Q: (L) Well, my question is: why mention something that is non-perceivable and unexplainable if it cannot be discussed?

A: It still can be documented, can it not?

Q: (L) Well, how do we document it?

A: Exactly as given.

Q: (L) If we don't know what we are looking for, how can we document it?

A: Exactly as explained. There is one method which cannot be perceived by you. Is it not possible to document that as such?

Q: (L) If documentation is simply writing that there is one method that we cannot perceive.

A: Precisely.

Q: (L) And then others will come along and ask: “What is it?” And we will have no answer. Not even a remote estimation of what it could possibly be. And that is a highly unsatisfactory condition to be in, to have a hint...

A: It is? What about all the other answers that were once questions?

Q: (L) Well, they are far more satisfactory since they have now become knowledge.

A: How did they become knowledge?

Q: (L) By being answered.

A: And how did they exist before they became answers?

Q: (L) As questions.

A: Correct.

Q: (L) And, our question is: What is this other method?

A: It is not perceivable by you.

Q: (L) What are the mechanics of it if it is not perceivable?

A: That’s part of what you cannot perceive. Do you not see that there is a question here for you to begin to study yourself, and this is the only way that it can be done, by planting a seed, as it were, for you then to follow until it eventually leads to the answer. But, in order for you to receive the answer, you need information in between the question and the answer which is not yet available to you because conditions do not exist currently that will allow for that in between information to be available.

Q: (L) Alright then, moving on to another subject, how are pre-coded information signals sent?

A: Would you clarify, please?

Q: (L) Well, before we got off onto this subject, the suggestion was that messages could be sent via sound-wave focusing.

A: No, sound wave focusing is designed to alter body and brain chemistry in order to alter such things as feelings, emotions, and so forth, which then may lead to the altering of mental thought patterns. But messages are not sent by ultra-high frequency sound waves.

Q: (L) How are they sent?

A: Messages are sent by something called Free Formal Imaging.

Q: (L) And what does that describe?

A: That describes the transference of thought.

Q: (L) And how is that done? At what frequency is it done?

A: Not correct concept. There is no “Frequency” as such involved. There is methodology that, again, unfortunately, you do not understand. However, since you seek answers to all questions, the only possible way to explain is to simply say a thought is formed in one realm and sent to a second realm, which is yours.

Q: (L) Okay. Can it be sent to a directed target?

A: Absolutely.

Q: (L) Now, the question has arisen that, since other dimensional beings have the ability to kidnap or abduct or forcibly extract souls, do they also have the capability of manipulating our soul essences after they have left our bodies during the transition to fifth density?

A: Not correct.

Q: (L) They do not?

A: No, you see when your physical body expires, and you enter fifth density, this is done one way and one way only: by passing through a conduit which opens specifically for the purpose of transference from third density to fifth density. Now, something often referred to in your terminology as a silver thread, is like a closed line which opens when this conduit is needed. That's rather awkward, but it's the only way to describe it. So that when the physical body terminates, this line is opened forming a conduit through which the soul passes naturally. However, part of the existence of this conduit is that it is absolutely impenetrable by any force from any density level. Therefore, souls in the process of transferring from third density to fifth density are not in any way able to be molested or tampered with. And it should be mentioned here, also, that the soul imprint of the physical body always has a connection to fifth density and that is through the so-called "silver thread." That always exists as the third density soul's doorway to fifth density. It can be opened at a moment's notice whenever needed. When it is opened it becomes a conduit. Through that conduit the soul passes. And it is not subject to interference by anything. This is not a deliberate construction, it is merely the natural process similar to what could be described as the protection mechanisms existing on second level density for creatures which are not capable of protecting themselves through their own conscious thought processes. For example, your turtle is contained within a shell that protects it. That shell is impenetrable by any natural forces, therefore nothing that is natural can harm that turtle. However, the same can exist for any creature when it is connected by the silver thread to fifth density. Once it is passing through the conduit produced by the opening of the silver thread, then, of course, it cannot be

tampered with. Do you understand?

Q: (L) Yes, but why do so many souls, when they leave the body, not traverse this conduit, and why do they stay earthbound, and why do they attach to other bodies? Why does this condition exist?

A: That is a complicated question, however the best answer is choice is involved there for those souls who wish not to leave the plane of third density. The only possibility to do this is to be detached from the now expired physical body but still be within the third density plane, which, of course, is not natural, but nonetheless can occur. In situations such as this, though it has been incorrectly reported, the silver thread is still attached and still remains a thread rather than a conduit. The soul is still attached to the silver thread but detached from the host body which has now expired. So the effect is very similar to being consciously aware of third density surroundings without a third density unit to accompany. Do you understand?

Q: (L) Yes. Okay...

A: Also, please be aware of the fact that once the soul leaves the confines of the physical body, the illusion of time passage is no longer apparent even when the soul remains on the third density plane. Therefore, it appears to that soul that no time whatsoever has passed. And, we mention this merely for you to contemplate all of the various meanings behind this.

Q: (L) Okay. Now, earlier we had a discussion about crime, the involvement in crime of black people versus white people, and, looking at the numbers, it seems that there is an inordinate number of black people involved in crime or criminal activities, or negatively oriented behavior than white people; the figures are really outstanding: blacks are eight times more likely to commit crimes than whites. And many of the explanations that are used,

such as poverty or discrimination do not seem to account for this disparity, considering the poverty and discrimination exhibited toward many other ethnic groups with no such relationship. Is there something significant in this fact, and is there some reason why this condition exists?

A: Perhaps you should try one question at a time.

Q: (L) Why do blacks commit more crimes than whites?

A: That is too broad spectrum a concept to be answered simply. Please try to break down the question into several parts so that the answers can adequately explain.

Q: (L) Can you suggest a way for me to break it down; it is a difficult subject?

A: Normally this is not the procedure, however, one suggestion may be, for example, to ask, first of all, what is it that causes individuals to commit crimes; secondly, is there any connection between one's race and national origin or physical state of being and one's proclivity to commit crimes, etc. In other words, this is a broad spectrum subject. In order for it to be answered adequately, it must be broken down into many consecutive questions.

Q: (L) What is it that causes individuals to commit crimes?

A: Well, now you see, that too, has many answers. We will choose one and then let you contemplate. One answer is, of course, as we mentioned previously, the alteration of blood, body and brain chemistry through the use of ultra- high frequency sound waves. Of course, as you can well imagine, one effect that this may have would be what you would refer to as anti-social behavior. Do you not see this?

Q: (L) I do. Okay, is there anything about a person of a particular

race or body type which makes them more susceptible to this manipulation than another race or person?

A: Well now, that brings into question the physical differences between races, including the obvious body chemistry differences, a subject that has not been adequately explored on the third density level of existence. For example, it is very obvious the different “races” as it is called, are human beings that have different chemical make-up in their bodies. Would you not say this?

Q: (L) I would say that might be probable.

A: Now, if one takes this one step further, perhaps if one race has a brain chemistry make-up or blood chemistry make-up that can alter the emotions in such a way so as to commit what is called anti-social behavior, at least in social environment to which you are accustomed, then this, perhaps, would explain why there may be a higher percentage of crimes committed by persons of a particular race as opposed to persons of a different particular race.

Q: (L) Are there any specific chemicals that we could isolate or name that would be involved with this condition?

A: Tumoxifene.

Q: (L) And, what is that?

A: A hormone secreted by the pituitary gland. You’ll find this particular hormone to be in high concentrations in persons of what is referred to as the Negro race.

Q: (L) And why does this hormone make a person susceptible to these ultra-high frequency sound waves, so that they exhibit anti-social behavior?

A: That’s actually a question that skips over some necessary ingredients, however the best way to answer that is that when this

hormone is in high abundance, then one's aggressive nature is heightened, since it already exists in higher levels within individuals of the Negro race, it does not require much alteration to increase it to what would be referred to as the danger level. Therefore, aggressive or anti-social behavior can be more easily facilitated in those of the Negro race, and those of other races.

Q: (L) Is it possible, or does it happen, that people of the other races, white, Hispanic, or oriental, to have individuals born into those races, who, by some fluke, have higher levels of this hormone?

A: Are you asking: "Do some individuals of other races besides the Negro race have high levels of that hormone?" Well, obviously each individual situation is different. It is averages that make up the important composition.

Q: (L) So, this is what we could call, in a general sense, the "Crime Hormone?"

A: It is certainly one of them, anyway. Although, aggressive behavior does not necessarily translate into criminal behavior.

Q: (L) True. What is it in the blacks that tends to make aggressive behavior translate into crime?

A: That question is not answerable when put in that way. Please reverse and ask a more basic foundational question.

Q: (L) Well individuals such as members of the Celtic background are historically and evidentially quite aggressive, yet they do not as frequently, in fact less frequently, commit crimes as a result of their aggression. Why is this?

A: Well, there is more than one answer, of course. Everyone's chemical nature or make-up is oriented toward their native environments. Of course, if one thinks of the Negro race as

having lived for many thousands, in fact millions, of years in the general climate and environmental situation they are native to, then perhaps it could be said that a greater level of Tumoxifene would be needed for survival in that environment. Now, when removed from that environment to an entirely different environment whereby such chemical balance is not correct for the new environment, then increased amounts of this chemical may produce aggressive behavior of one or two particular types. Whereas other races or cultures, when exposed to any stimuli which causes increases or changes in various brain chemistry, this may cause aggressive behavior of a different sort which can be channeled into more acceptable pursuits within the given society.

Q: (L) Is there anything that can be done chemically to alter this aggression or crime hormone to reduce it or to convert its effects into other behavior?

A: That's an extremely complicated question because any tampering with chemistry of the brain is similar to what you would describe in cliché as shooting in the dark at this point in your development, because you do not understand all of the intricacies involved. Therefore, it is very difficult also to positively answer that question when put in that form.

Q: (L) Is there any form that question could be put into where it could be answered more simply?

A: That is up to the one asking the questions to determine. Obviously the answer is yes, but if you are asking how to formulate the question, we cannot do that for you because that is part of your learning process. If we now are reduced to asking or rather telling, how to ask questions, this is rather like leading you by the hand, is it not?

Q: (L) Yes. Is there a simple, practical action that could be taken

to assist members of the black race in reducing this aggressive behavior?

A: Well, again, you keep asking nearly impossible questions because, you must realize that this is not a simple black and white issue, no pun intended. What it is is trying to answer an extremely difficult question with very simple answers and this will not work because there are so many different directions involved here. There is just an impossible number of difficulties involved in trying to deal with this. Apparently you don't see that it is not something where one can simply formulate an injection, for example, and line up all the members of the black race for this injection. Can you imagine the extreme difficulty in even trying to contemplate such a thing? And, all of the resistance that would be received from every imaginable corner of your society at even the mere suggestion of such a thought? Obviously this is a problem that will only be taken care of at a later time, as you measure time, when the shift from 3rd density to 4th density takes place. There really is no point in trying to climb backwards up the side of a mountain with nothing but your slippery bare feet and hands to work with. That is what you would be trying to do if you tried to answer such a problem so simply.

Q: (L) Okay. I would like to know who was responsible for the vision seen by the Emperor Constantine which caused him to convert to Christianity and impose Christianity on his world?

A: The answer to that is, mainly and primarily, merely that the Emperor Constantine had been predestined to do such a thing by the planning process that exists in fifth density prior to the reemergence of a soul in third density.

Q: (L) Is there any particular significance to the fact that the imposition of Christianity on the area of Constantine's reign also

brought on the Dark Ages?

A: Possibly.

Q: (L) Do you have any comments on that?

A: No, not really.

Q: (L) What is the true significance of the Masonic Apron?

A: In what way?

Q: (L) There are hieroglyphics and carvings from ancient Egypt showing high priests wearing aprons and there are many secret societies down through the ages for centuries and possibly even further back than that where the initiates wore aprons. Now, the aprons have been either white cloth or sheepskin. What is the significance of the apron? Why an apron?

A: It is simply a tradition born of ritual.

Q: (L) What was the origin of this tradition? What did it symbolize to put on the apron?

A: Perhaps it could best be described as attempts to shield from negative or evil spirits.

Q: (L) Okay, Susan and I did some research on all our past sessions and we came to the realization that after other people began coming regularly there was a significant increase, in fact a doubling, of the number of answers received through this source, that were basically refusals to answer, as in: up to you, open, maybe, close, and so forth. In general, what we noticed was a great reduction in the level and type of information we were being given. Could you give us a reason for this?

A: The best answer to that is that when you have a greater and greater number of subjects present for any formal channeling sessions, of course the mental energy and the thought waves are

more of a conflicting nature, and of course the answers must be carefully given in order to avoid conflict that is unnecessary by the observers or within the ranks of the observers, so, therefore, some questions are better left unanswered if it is felt or known that the true answers will cause grave distress by some who are receiving them. And, the more subjects you have present, the more likely that this situation is to be apparent. Therefore, sometimes questions must be either passed over or each individual subject must find a way to answer the question for themselves that they feel comfortable with.

Q: (L) That seems to say that the way that is most conducive to receiving information is to limit the number of individuals present, thereby limiting the amount of conflicting thought patterns.

A: That is one possible outlook.

Q: (L) Does it require a state of absolute openness to receive the information?

A: No, it does not, however to receive absolute information in uninterrupted flow, such a state would be required. But, such states are very rare on third density.

Q: (L) Well, it seemed to me that in the initial six months or so that we were receiving the information, that the information was much more open and the answers were more open. It seems that when I ask questions I ask because I really want to HEAR what may be said without putting any expectations on it whatsoever. I have realized that with all of the enormous work I have done in this life, that I have not been able to figure out the answers, and I am ready to shut up and listen... When other people ask questions, it often seems that they are just asking just to confirm the answer they have already formed in their own mind against whatever answer may come through.

A: This is a correct perception on your part, however such prejudice as described is something that all on third density are guilty of to a greater or lesser extent at various question and answer opportunities. Therefore if you were to study the answers more thoroughly, you might also find that there are varying degrees of what you describe as openness or willingness to dispense information even during those sessions where fewer people were present.

Q: (L) That is true. The thing is, from my point of view, to continually strive to reduce the number of prejudices, to expand and broaden the willingness to hear the information, and to not have a preconceived notion of what the answer is going to be. In the initial stages, of course, I was testing and examining what kinds of answers came through and what the parameters were, and I actually think, interestingly, that even with my, more or less rigid testing process, that better and more complete answers were given than were given in later sessions where others were present.

A: It's possible.

Q: (L) What would be the reason for this?

A: We have already described this in the previous answer. The more subjects you have present, the more opportunity for prejudice, obviously.

Q: (L) Okay, recently I went to a neurologist, Dr. Vincent D_. Now, it seems that Dr. D_ was quite animated and indicated that he felt like he had met me before even though he knew that he hadn't. There seemed to have been some very strong subliminal psychic interaction between myself and him. Could you give me a clue as to why this was?

A: There may have been some karmic interaction there.

Q: (L) Will this involve any interaction in the future?

A: That is obviously up to you to find out.

Q: (L) Well, Susan and I have been talking and she is baffled as to what to do for me therapeutically. Can you help?

A: That, of course, is a very complicated situation, however, one of the possibilities is the nerve passages can be altered by physical stresses caused by a number of different factors stemming from activities undertaken in the past, for example buildup of scar tissue around the musculature of the extremities and appendages, has perhaps blocked the natural flow of electricity which then pass from the center of the nervous of system to the extremities. This can cause some starvation of necessary passages of electrical elements through the nerve passageways which, in turn then, may cause a certain degree of starvation to those same extremities through lack of proper oxygenation. Alleviation is difficult because it requires several steps. The best suggestion is a gradual but steady improvement in health as facilitated by a number of different programs to reverse damage having been caused. The information to facilitate this is available to you.

Q: (L) It is reversible?

A: It is reversible. All damage is always reversible until either the physical host body in part or in whole is terminated.

Q: (L) Is Susan's manipulation of the tissues and electrical currents through her various techniques, is this beneficial at this time?

A: It is beneficial, however, it is very likely more will be needed. We mean more types of activities in order to facilitate complete improvement.

Q: (SV) But, the main problem is the scar tissue?

A: Any form of blockages which block the proper firing of the neurons, thus preventing oxygenation which takes place as a result, including the build-up of scar tissue.

END OF SESSION

3.35 July 23, 1995

Frank Direct channeling, Laura, SV, Terry and Jan

Q: (L) When you are ready please indicate.

A: Okay.

Q: (L) We have a number of questions and I think Jan wants to lead off this evening. (J) First off, who do we have with us?

A: Curious that you should ask that? What is the expected answer?

Q: (J) A name.

A: You still desire a name. We'll say: Toren.

Q: (J) If it doesn't matter, it doesn't matter.

A: What matters is what matters to you and our desire to comply.

Q: (L) Toren, the first thing on my mind is an experience I had several nights ago. It seemed as though there was some sort of interaction between myself and something "other." Could you tell me what this experience was?

A: Was eclipsing of the realities.

Q: (L) What is an eclipsing of the realities?

A: It is when energy centers conflict.

Q: (L) What energy centers are conflicting?

A: Thought energy centers.

Q: (L) Whose thoughts?

A: Ahh, we're getting ahead of ourselves, are we not? Thoughts are the basis of all creation. After all, without thought nothing would exist. Now would it?

Q: (L) True.

A: Therefore, energy centers conflicting involve thought patterns. You could refer to it as an intersecting of thought pattern energies.

Q: (L) Could you be a little more explicit.

A: We sense you are leading. The true effort to gain knowledge should always be to be open to any response, any question. Therefore asking to be more specific is assuming that the answer is not explicit.

Q: (L) Well, it seemed to me that something happened to me that blanked out a period of my experience, and you say this was an eclipsing of energies caused by an intersecting of thought centers. Now, this intersecting of thought centers, did this occur within my body or within my environment?

A: They are one and the same.

Q: (L) Was this eclipsing of thought centers brought on by any of my activities?

A: Well, again we must ask you to slow down in your own perceptions for just a moment, for one sees the truest of answers when one is open to all possible responses and is not prejudiced. And

again, unfortunately we sense a leading in your seeking of answers which indicates prejudice which is perfectly alright, however one would assume that one seeks the truest of all possible answers and prejudice does not allow that. So, if it would be possible, please try to ask questions that do not lead to any particular type of conclusion.

Q: (L) Can I ask about my specific perceptions of the event?

A: That is what you are already doing. We sense that you desire the truest of all possible answers and if one desires the truest of all possible answers, one must avoid expressing one's own perceptions to any great degree and simply allow the answers to flow. The best advice to accomplish this is a step-by-step approach - to ask the simplest of questions with the least amount of prejudice attached.

Q: (L) Alright. I was lying in bed worrying about being able to get to sleep. The next thing I knew, I came to myself feeling that I was being floated off my bed. Was I?

A: No. When you say "I" you are referring to your whole person. There is more than one factor involved with one's being to any particular definition.

Q: (L) Was some part of my being separated from another part of my being?

A: Yes.

Q: (L) Was this an attempt to extract my soul or astral body?

A: Attempt is not probably the proper term.

Q: (L) In other words...

A: It is more just an activity taking place. Attempt implies effort rather than the nature present in a conflicting of energies and

thought centers.

Q: (L) I also seemed to be aware of several dark, spider-like figures lined up by the side of the bed, was this an accurate impression.

A: Those could be described as specific thought center projections.

Q: (L) I seemed to be fighting and resisting this activity.

A: That was your choice.

Q: (L) Was I successful?

A: Now, we are back to leading again.

Q: (L) Alright, was this the ending of an abduction that had already taken place?

A: Not the proper terminology. It was the conclusion to an event, not necessarily what one would refer to as an abduction, but more what one would refer to as an interaction.

Q: (L) What was the nature of the interaction?

A: The conflicting of energies related to thought center impulses.

Q: (L) Where are these thought centers located?

A: Well, that is difficult to answer because that is assuming that thought centers are located. And, of course this is a concept area in which you are not fully familiar as of yet. So, an attempt to answer this in any way that would make sense to you would probably not be fruitful. We suggest slowing down and carefully formulating questions.

Q: (L) At what level of density do these thought centers have their primary focus?

A: Thought centers do not have primary focus in any level of density. This is precisely the point. You are not completely familiar with the reality of what thoughts are. We have spoken to you on many levels and have detailed many areas involving density level, but thoughts are quite a different thing because they pass through all density levels at once. Now, let us ask you this. Do you not now see how that would be possible?

Q: (L) Yes. But what I am trying to do is identify these conflicting thought centers. If two thought centers, or more, conflict, then my idea would be that they are in opposition.

A: Correct.

Q: (L) And, what I want to know is, was this in opposition to me, or was this an opposition in which I simply was caught in the middle, so to speak.

A: Well, you are drifting away from the true nature of your experience, because you are making suppositions. And we are not trying to scold you, we are merely trying to guide you and this is not always easy. But, let it be known again that the simplest way for you to gather knowledge on this particular subject matter is to ask the simplest questions without prejudice.

Q: (L) Okay, you said I wasn't abducted, that an event of some sort occurred. What was the event?

A: We have already described this, but the problem that you are having is that you are assuming that the description we are giving is more complicated than this. It is not.

Q: (L) Did I leave my body?

A: I'm very sorry to tell you that you are drifting again.

Q: (L) Well, I am trying to ask simple questions.

A: The problem is that you are pre-supposing answers. Please limit prejudice.

Q: (L) What is my prejudice, what is my presupposition?

A: Well, just to give you an example: how do you know that you ever “leave” your body? The question is not: do you ever leave your body, its how do you know that you do?

Q: (L) I guess you don’t.

A: Let us give you a parallel. If you saw a rainbow in the sky and that rainbow was later no longer visible, would you then say: “Did that rainbow spill onto the mountain?”

Q: (L) I don’t get it. No I wouldn’t because I would know that the rainbow is the refracting of light on water or ice in the atmosphere.

A: That’s what you know. But, then again how do you know that anything you know is, in fact, the true representation of reality?

Q: (L) We don’t.

A: The only way to solve this problem when asking about a complicated issue is to ask very simple step-by-step questions without prejudice. In order to do that, one must pause and reflect, and take one’s time, as it were, to formulate the questions carefully in order to make sure that they are very simple, step-by-step questions and not questions containing prejudice.

Q: (L) Okay, in the experience I felt a paralysis of my body, what caused this paralysis.

A: Yes. Separation of awareness. Which is defined as any point along the pathway where one’s awareness becomes so totally focused on one thought sector that all other levels of awareness are temporarily receded, thereby making it impossible to become

aware of one's physical reality along with one's mental reality. This gives the impression of what is referred to as paralysis. Do you understand?

Q: (L) Yes. And what stimulates this total focus of awareness?

A: An event which sidetracks, temporarily, the mental processes.

Q: (L) And what event can sidetrack the mental processes to this extent?

A: Any number.

Q: (L) In this particular case, what was it?

A: It was an eclipsing of energies caused by conflicting thought centers.

Q: (L) What energies were being eclipsed?

A: Whenever two opposing units of reality intersect, this causes what can be referred to as friction, which, for an immeasurable amount of what you would refer to as time, which is, of course, non-existent, creates a non-existence, or a stopping of the movements of all functions. This is what we would know as conflict. In between, or through any intersecting, opposite entities, we always find zero time, zero movement, zero transference, zero exchange. Now think about this. Think about this carefully.

Q: (L) Does this mean that I was, essentially, in a condition of non-existence?

A: Well, non-existence is not really the proper term, but non-fluid existence would be more to the point. Do you understand?

Q: (L) Yes. Frozen, as it were?

A: Frozen, as it were.

Q: (L) Was there any benefit to me from this experience?

A: All experiences have potential for benefit.

Q: (L) Was there any detriment from this experience?

A: All experiences have potential for detriment. Now, do you see the parallels. We are talking about any opposing forces in nature, when they come together, the result can go all the way to the extreme of one side or all the way to the extreme of the other. Or, it can remain perfectly, symmetrically in balance in the middle, or partially in balance on one side or another. Therefore all potentials are realized at intersecting points in reality.

Q: (L) Was one of the energies that was intersecting with another energy, the energy that constitutes who and what I am?

A: Well, now, you are drifting again.

Q: (L) Was one of the thought centers me?

A: That is presupposing that you, what is defined as you, or how you define yourself as “me” is of and by itself a thought center.

Q: (L) Well, I am trying to find this out by asking these questions. I am not presupposing here, I am just trying to find out what is going on here!

A: Part of what is you is a thought center but not all of what is you is a thought center. So, therefore it is incorrect to say: “Was one of these conflicting energies or thought centers me?”

Q: (L) Was one of these conflicting thought centers or energies some part of me?

A: Yes.

Q: (L) And was it eclipsed by interacting with a thought center energy that was part of or all of something or someone else?

A: Or, was what happened a conflicting of one energy thought

center that was a part of your thought process and another energy thought center that was another part of your thought process? We will ask you that question and allow you to contemplate.

Q: (L) Was it?

A: We will ask you that question and allow you to contemplate.

Q: (L) Does it ever happen that individuals who perceive or think they perceive themselves to have experienced an “abduction,” to actually be interacting with some part of themselves?

A: That would be a very good possibility. Now, before you ask another question, stop and contemplate for a moment: what possibilities does this open up? Is there any limit? And if there is, what is that? Is it not an area worth exploring?

Q: (L) Okay, help me out here...

A: For example, just one example for you to digest. What if the abduction scenario could take place where your soul projection, in what you perceive as the future, can come back and abduct your soul projection in what you perceive as the present?

Q: (L) Oh, dear! Does this happen?

A: This is a question for you to ask yourself and contemplate.

Q: (L) Why would I do that to myself? (J) To gain knowledge of the future.

A: Are there not a great many possible answers?

Q: (L) Well, this seemed to be a very frightening and negative experience. If that is the case: a. maybe that is just my perception, or b. then, in the future I am not a very nice person! (J) Or maybe the future isn't very pleasant. And the knowledge that you gained of it is unpleasant.

A: Or is it one possible future, but not all possible futures? And is the pathway of free will not connected to all of this?

Q: (L) God! I hope so.

A: Now do you see the benefit in slowing down and not having prejudices when asking questions of great import? You see when you speed too quickly in the process of learning and gathering knowledge, it is like skipping down the road without pausing to reflect on the ground beneath you. One misses the gold coins and the gemstones contained within the cracks in the road.

Q: (L) Let's pause for a moment. [leaves room]

A: Does anyone else inquiries.

Q: (J) I think I'll wait until Laura gets back.

A: If that is your choice.

Q: (SV) Laura is in great conflict with herself; I know this for a fact. Can we help her or is this something she has to do on her own?

A: How do you know this for a fact?

Q: (SV) When I am doing bodywork on her, it is how I perceive, what I hear and what I feel and see.

A: We suggest that you explore that further.

Q: [Laura returns] (L) Now, getting back to this eclipsing of energies. Is an eclipsing of energies, such as we are discussing, is this something that can and does happen to everyone at one or many points in their existence where choices are made.

A: We regret to inform you that you are speeding up and jumping ahead of yourself.

Q: (L) Okay, when this experience occurred, am I to assume that some part of myself, a future self perhaps, of course they are all simultaneous but just for the sake of reference, came back and interacted with my present self for some purpose of exchange?

A: Well this is a question best left for your own exploration as you will gain more knowledge by contemplating it by yourself rather than seeking the answers here. But a suggestion is to be made that you do that as you will gain much, very much knowledge by contemplating these very questions on your own and networking with others as you do so. Be not frustrated for the answers to be gained through your own contemplation will be truly illuminating to you and the experience to follow will be worth a thousand lifetimes of pleasure and joy.

Q: (L) Okay, just a few days prior to this experience, I experienced a couple of headaches brought on by marital interactions. I would like to know what was the source of this sudden, extreme pain.

A: Have you not answered that for yourself already?

Q: (L) Not satisfactorily.

A: No. It is that you perceive it as being not satisfactory.

Q: (L) Well, I have a couple of choices and I haven't selected one as being the one.

A: Well, then select one.

Q: (L) What if I select the wrong one?

A: You won't.

Q: (L) Okay, also seemingly tied in with this experience, because all of these things have happened in a circle, was an experience when Susan was doing some bodywork on me and I suddenly

saw a flash of myself tied to a crossed beam, crossed in the shape of an X, in expectation of being devoured by a lion that was working on tearing my arm off at the shoulder. Was this an opening up of a doorway to another life?

A: How does one normally access that information?

Q: (L) Well, it is normally done through hypnosis, but since there is nobody around to hypnotize ME, then I usually get left out in the cold on that one.

A: You say there is no one around to hypnotize you?

Q: (L) Who?

A: We asked you the question.

Q: (L) Well, it seems that way.

A: Very interesting. Hmm. Apparently the world is much more limited than we thought it was.

Q: (T) Was Frank's dream significant?

A: Before we answer that question, we heard one of you say "pick on Laura night." That is not the point of any of this. The point is to help you to gain true knowledge which can only be done by opening up your own channels. We are more than happy to assist you in any way possible in doing this, however, it would be detrimental to you to focus entirely on our assistance rather than on your own abilities which are truly and completely unlimited. Now, as far as the perception of being picked on, as you describe it, this is merely a perception. The process of learning is sometimes difficult when the greatest amount of progress is being made and we commend Laura for making efforts to learn that are sincere and persistent. There is no reason to ever perceive that she, or anyone else present, is being picked on when one is learning, when one is attempting to gain true knowledge,

this may be perceived as difficult, however, it is, in the long run, very beneficial. And again, while we may seem to scold, we caution that we do not scold, we merely direct when asked to direct. And, if we sense that one's mental energies are diverting or dispersing, oftentimes we return with what seems to be a rather sharp answer merely in an effort to refocus one's attention. Because that is the way with which all of you are familiar for that purpose. As you will now know as you access your memories, it is instinctive in your minds and in your souls. We suggest that you pause and reflect on this because you will see, if you do, the truth in what we have said.

Q: (L) Speaking of truths, we had a discussion earlier, and we are somewhat curious as to whether the law of free will would require that some of the information we receive through this source be a) distorted, b) false?

A: Well, we do not wish to close off any possibilities for an answer to that question, but we will suggest that if there is any falseness, perhaps one possible answer as to why would revolve around what we were speaking of earlier, which is prejudice. Prejudice may be contained within the question itself or it may be contained within the expected answer. Either one can interrupt or divert the flow of energy in such a way as to produce varying degrees of what one would perceive as correctness of response.

Q: (L) So, prejudice on the part of anyone in the room as to what the answer should or should not be, or could or could not be, can, in effect, create an answer?

A: It can divert the energy flow as we mentioned earlier when you asked about your own experience. If you recall, we cautioned you repeatedly not to involve prejudice either in your questions or in your expected responses. This was an effort on our part to help you to gain valuable information and to help

you to learn how to gather valuable information, thus leading to an extensive expansion of your own knowledge base. Again we also cautioned you not to perceive our efforts as scolding, but as assistance.

Q: (L) So, the prejudice was my assumption as to what did or did not happen, that it was an “Abduction,” or whatever and my questions were framed on that assumption? And, I wanted to hear answers that confirmed my perceptions?

A: Yes.

Q: (L) Where else can prejudice enter in?

A: Well, you have described the most important possibilities. And your own reflections, your own perusal of your own thought centers can and will produce any and all possible answers.

Q: (L) Could prejudice that inhibits or deflects the information also originate from spirit attachments on any or all of us?

A: That is possible, though very doubtful.

Q: (L) If one or any of us had an attachment which altered our thinking or emotions, could our altered thinking or feeling create the prejudice which would deflect the information.

A: Well, it is doubtful that there is any limit to the possibilities. There are only varying degrees of potential. However, again, we caution against any prejudice when asking a question either of yourself, or of you accessing of the universal bank of knowledge which is always there at your disposal. For, example, when you say “Spirit attachment,” that is presuming, or again, expressing prejudice, that such a thing exists, or that it exists in such a way to be a common problem. Either one of those two possibilities, on the path of prejudice, is present. For example, what is spirit attachment?

Q: (L) What is spirit attachment?

A: No, we asked you first.

Q: (L) Well, my thought is that it is just as it has been described and exhibited throughout centuries of interaction.

A: Who described and exhibited it?

Q: (L) Many individuals have exhibited it and it has been described by doctors, psychiatrists, priests, shamans, psychologists, exorcists, my own experience working with it; and I don't say that it is necessarily another entity or being, although it may identify itself as such, my thought is that it is entirely possible that it could just be something, some energy that is packed or contained within that person, that is of that nature, and takes on a life of its own, perhaps.

A: That's good.

Q: (L) My thought also is that when one goes through the actions of spirit release, it really doesn't matter if it is cousin Harold who has come to live in your left shoulder or whether it is years of anger, packed in your right hip or past life pain in your heart, none of those things really matter. What matters is: does the technique work to release you from it?

A: That's a nice theory, but we suggest further study. Because, in truth, as you know, deep within yourself, you cannot know that these things are actual. And, if they are actual, in what segment of reality they reside. You can only suppose that their existence is as you have described.

Q: (L) Well, I said that it doesn't matter what they are, it just matters that the releasing process works. (J) Or that you perceive that it works. (L) It gives you a script to make changes in yourself.

A: The original question we asked was: How this relates to the prejudice that affects the energy flows of informational dispensation.

Q: (L) Well, if a person has the attachment energy, whatever it is, can that type of prejudice or that type of energy create prejudice which then restricts the energy?

A: Well, that is certainly one possibility. But, as we said, we suggest further study.

Q: (L) Study in terms of books or in terms of working with individuals?

A: All of the above and then some.

Q: (T) Was Frank's dream significant?

A: May we ask that you be more specific in your question?

Q: (T) The dream that Frank relayed to us earlier this evening about there being another force, another entity or group of entities involved in what's happening.

A: Well, that is not the area we wanted you to be more specific with. We are aware of the dream as described, but we are asking you to be more specific about the term "significant" because...

Q: (T) Well, is it important to what we are doing? Was it factual information?

A: Again we caution that you not be prejudiced in the formation of your questions because the terms "important" and "significant" imply a generalization of levels of intensity of reality, that they can be seen differently from different vantage points. In other words, what is important to one is not important to another. What is significant to one is not significant to another. It all can be confused as to what is important and significant and

what the definitions of important and significant are. Therefore, we ask you to remove those two terms, carefully ponder the question, and re-ask it in more specific terms.

Q: (L) What was the source of the information Frank received in his dream?

A: Well, actually that is jumping ahead of the previous thought pattern as expressed by a different individual, which creates confusion and also restricts the energy flow by diverting it.

Q: (T) Is the word 'accurate' acceptable?

A: Acceptable for what?

Q: (T) In reference to the question.

A: We ask you to carefully formulate the question you wish to ask, and then ask it in complete form.

Q: (T) Is there another force involved in what is happening on the planet, that is manipulating the Reptoid beings the way they are manipulating humans?

A: We do not wish to appear to be scolding, but we are trying to help you to gain knowledge. And, as we have stated previously, the formulation of questions is very important in this process. It has been asked previously, in this particular session, if anything can cause the response to questions to be other than factual in the best definition of what factual is. And, the answer given was any degree of prejudice or expectation of response. Therefore, we must caution you again, to please try to refrain from having any prejudice or expectation of response. And, prejudice can be, again, in one sense, a presupposition of existence. Do you follow.

Q: (L) So, we don't even know if the Lizzies exist or not.

A: Well, we have previously given you information that such en-

tities do exist. However, the question is not tantamount to the existence of what is described or referred to as Lizzies, therefore it would be best to leave that out of the question until confirmation that such entities exist and that they are an important part of the question being asked. Please bear with us and be patient. The results gained will be beneficial for all.

Q: (T) I don't understand... Is there another force involved with the events on this planet, in third density, that we have not yet discussed in previous sessions?

A: Perhaps it would help to have a review of what forces it is you have in mind. And then, once those forces have been described, we can answer your question more completely and, more importantly, more accurately.

Q: (L) May I ask a question?

A: You may always ask a question.

Q: (L) Was Frank's dream an accurate representation of the interplay of energies on the planet at the present?

A: Well, as described to those present, in general terms, it was moving in the right direction, however, the information given was somewhat splintered or fractured. There was not beneficial cohesiveness due to the fact that the subject referred to, did not have complete recall of the information given. It could be considered a basic guideline, but not a complete database.

Q: (L) Could you give for us, at this time in toto, the information that was given to Frank in the dream?

A: Well, yes that would be conceivable, however it would require your attendance for approximately 52 units as you measure hours of time, to give an adequate breakdown of the information previously given to Frank. And, we believe that you

would be unwilling to participate for that length of time, or that you would be able to physically hold up.

Q: (L) Can I give post-hypnotic suggestions to Frank that he would remember all of this?

A: Certainly.

Q: (L) May I ask if Frank's exposition as to why I seem to be under such severe attack was correct?

A: That is difficult to answer because it is close, as we are accessing the thought patterns, to being factual. However, there are conflicting thought patterns. The thoughts coming from you in this particular instance are confused. If you could be more specific, it would be helpful.

Q: (L) Then, just let me ask it straight. Why have I been under such severe physical, material, and emotional attack in the past 6 months. Frank thinks that I am under such attack because I work and move too fast in the gathering and attempts at dissemination of information; that I charge ahead and do things, thereby exposing myself to retaliatory attacks.

A: That has the potential for being partially correct in the sense that you disseminate information, perhaps less carefully than you should. The gathering of information holds no potential for attack from any particular realm. However, dissemination DOES, because those whom become aware, become empowered. And, in any struggle between opposing forces, there is always danger in allowing anyone to become empowered without realization of the ramifications.

Q: (L) So, I can continue to seek information, as long as I keep it to myself?

A: You have free will to do that which you please. But, when you

are framing it in terms of the question: where is the danger, this presupposes that you are concerned about dangers to yourself. And, if this be the case, we will be happy to give advice where and when needed.

Q: (L) Well, right now it is needed. I am almost completely debilitated physically and materially, which creates a severe barrier to focus and concentration, and also my ability to assist other people.

A: Well then, perhaps it is true that you should be careful as to how you disseminate the information and how you disseminate knowledge gained, and where, and when. This is not to say that you must stop, but rather to think carefully before you do it, as to what the ramifications will be. And then your instincts will lead you in the proper direction. The dangers are always that when one proceeds too quickly, the instincts may be overrun and become confused with other thought pattern energies, and thereby opening one up to attack and other unpleasant possibilities.

Q: (L) Well, if I promise not to tell, make a vow, can't we just stop all this other?

A: It is not necessary to stop, it is just to be careful as to how one does it. The flow of information is never a harmful thing. As we have previously described, the Service to Self involves the constriction and restriction of energies, and the focusing within. The Service to Others orientation involves an outward flow of energies, the focus being from within to without. Therefore, the passage of information, or dissemination is very helpful and is of Service to Others orientation. But, one must also be aware of the dangers involved. One must not lose control of the flow and the possibilities that can result. This is where you need to be more careful. You need to regulate. And, attack can come from any number of sources for any number of reasons. It is not

always for the same reason. And, of course, there is the short wave and long wave cycle. The short wave cycle is one which closes rather quickly. The long wave cycle is one that closes more slowly, therefore take a longer amount of time, as you perceive it, to close. Therefore it also involves a more complicated issue. This is just one example as to how attack can be the result of what we were just describing.

Q: (L) Can attack be a left over from another cycle?

A: That is one possibility, certainly.

Q: (L) Can you give us any advice as to how to navigate our way out of such situations?

A: That is a VERY vague thought concept.

Q: (L) Well, Frank and I both seem to repeatedly face the financial flow issue, and it seems to be one of the primary modes of attack against us at this point. How can we overcome this?

A: Are you asking us how to make more money?

Q: (L) Yeah!

A: My dear Laura! You are already in position of literally thousands of possibilities to accomplish that end, are you not?

Q: (L) Everything takes money!

A: There goes that prejudice again. We have given much food for thought in that area to help you to learn, to contemplate, to meditate.

Q: (L) It is rather difficult to do that when one is worried.

A: That is interesting. You can't meditate or contemplate when you are worried about your next meal. I guess then that this

means that no one on third density has ever been able to contemplate or meditate while worrying what was going to be eaten at the next meal. Hmmmmmm.

Q: (L) The point is that a constant state of worry, another crisis every day, the perpetual worry, eventually wears a person down to the point where one can no longer focus on any other issues.

A: Perhaps one can solve the crises by focusing on other issues? You see, when you constrict the flow, you constrict the channel. And when you constrict the channel, you close down possibilities. And, you make it difficult, if not impossible for you to see that which is there. In other words, the obvious becomes oblivious because of constriction of the flow. This is why we have recommended against all rituals, because ritual restricts the flow, thereby restricting the possibilities. And, what you are describing is a situation of “dire straits,” as you call it, and financial pressures of great magnitude which is restricting you. But actually, it is your concentration on same that is restricting, not the situation itself. And we realize that it is difficult for you to focus your attentions, or, more importantly to open up the flow of the channel. But, it is certainly not impossible. Especially for an individual as strong as yourself. It is what you choose to do, not what you **MUST** do. It is what you **CHOOSE** to do.

Q: (L) So, you are saying that this situation is a result of my own constriction, rather than as a result of attack?

A: No, the situation can be a result of anything or any numbers of things. But, the sought after resolution to it may be impeded by your own choice to concentrate on the problem, rather than opening up the channels to seek the solution. We never suggested that you were solely responsible for creating your own financial situation, only that you may be partially responsible for preventing a resolution to the problem, that is all.

Q: (L) Is that also the case with Frank?

A: Of course.

Q: (L) Anything further on that subject? You say ‘opening the channel...’

A: And not concentrating on the problem, but rather the solution by opening the flow. The answers come to you when you open the flow.

Q: (L) And what might that answer be?

A: That is for you to discover!

Q: (L) That’s what I thought. (T) What is the cosmic wheel?

A: Cosmic wheel? Whatever gave you the idea that there was a “cosmic wheel?”

Q: (T) It was just something that popped into my head awhile ago.

A: Well, our best suggestion is: when anything pops into your head, to follow it as far as you can, because therein lies your answer. Do you not do that?

Q: (T) As far as I can...

A: As far as you can? What prevents you from doing that?

Q: (T) Well, thank you for your answers tonight.

A: Have you then answered your own question?

Q: (T) Several of them. Thank you.

A: You are most welcome.

END OF SESSION

3.36 August 5, 1995

I've been remiss in getting the sessions up in order due to being so busy, but due to a question about DMSO in another thread, thought I would put up the one where that was discussed out of sequence.

The main thing to note about this session is that it was direct channeling with "Frank". He was hypnotized and all answers came through him alone. As we know from later events, this makes the information in this session questionable. This does not mean that everything that ever came this way is wrong, but it all needs to be looked at with the question: "could there be a reason to skew the answer?" I think it will be obvious, as was the case with all of the direct channeling sessions, that there was a tendency to be circuitous and even obfuscatory in the mode of answering. I will place any further notes in {curly brackets}.

I skipped transcribing the induction. There was no introduction giving a contact "name" as is usual in all other sessions.

Frank, Laura, SV

Q: (L) S__ has some questions about a real estate purchase she wishes to make. May we ask questions related to this?

A: Yes.

Q: (L) Is the house that S__ is considering buying, located at {address deleted}, as good a deal as it seems to be in terms of price.

A: That is subjective. Subjective reasoning is involved.

Q: (L) Is there anything being hidden by the seller that needs to be looked into?

A: The seller's main concern is profit. Also there is some mech-

anism involved with the transfer which may tend to maximize profit for the seller. This has to do with time, calendar dates.

Q: (L) Is there anything further that you can give us on that which would help S__ to settle down and relax a little?

A: The problem is not with the buyer, its a situation where the seller can make the sale and either realize a larger profit or a smaller profit within the same purchase price structure. So, therefore, the buyer is unaffected.

Q: (L) So, the seller has a deadline to meet to maximize his profit?

A: Yes. The sale is unaffected from the standpoint of the buyer, either way.

Q: (L) So S__ can safely participate in the closing and not be concerned about the seller's issues?

A: Absolutely correct. The perception of deceit pertains to maneuverings of the seller to create maximum profit potential, which is NOT contingent on the buyer.

Q: (S) Is the house sound? It's not infested with termites or radon gas or anything, is it?

A: That is quite a venue. These are subjective questions to an extent. It certainly should not be expected to collapse.

{Note here that questions about termites or radon gas are NOT "subjective". I felt that this was evasion of the question.}

Q: (L) S__ had another question regarding another issue...

A: S__ has many questions and needs to ask them herself.

Q: (S) Okay. This is concerning my birth date and place. On my adoption papers I was told one birth date...

A: Did you not want to ask further questions about the property you are preparing to purchase?

Q: (S) Of course! But I don't want to wear out the subject.

A: There is no possibility of wearing out the subject.

{This struck me as an odd answer since it had already been said that questions about the house were "subjective". }

Q: (S) Laura and I have a lot of plans for this house. We want to hold classes... some of the things we plan ... such as spirit release... this energy won't hang around the house will it?

A: Such occurrences have nothing to do with the structure in which it occurs. Such things are merely a manifestation of the occurrence itself, and how any such efforts are undertaken, as opposed to the structure in which they take place.

Q: (L) So SRT can be safely done without fear of harboring any of that energy in the house?

A: SRT may be safely done or unsafely done according to the procedures employed, and those employing them. The structure within which they are done is not in any way related to these issues. And the same holds true for this particular structure in question.

Q: (L) S__ has said that she would rather I did not borrow money on my house, that she would like to lend me the money I need at the moment until I get my insurance settlement. Is this a workable plan? I don't want her to be short in any way in her situation. I don't want it to be detrimental to S__ to extend herself in that way.

A: One area where one must be most cautious is in the borrowing of money.

Q: (L) I am aware of that, and that is why I am asking.

A: The question that you ask cannot be answered as you desire, not because the answers are not known, but rather because lessons learned on your karmic pathway cannot be shown to you before they occur. And, decisions such as these are suggested to be based on past experience combined with a period of reflection, and if you choose to follow the pathway of borrowing, it is strongly suggested that all parties involved understand the possible variables, and reflect upon the results of all possible variables.

Q: (L) You mean by simply handling it as business ?

A: That is not really the point. The point involves more emotional learning processes that can be painful. However, also, it is possible to avoid painful experiences by careful and precise reflection on all possible events and any given situation that can result, prior to undertaking any efforts. In other words, openly and honestly discuss all possible angles where emotional concerns are involved. These are the danger zones that invariably crop up whenever large sums of money are borrowed or lent between individuals who have an emotional bond. It is not the financial aspects at the root of any painful lessons, it is the emotional angles. If it is possible for you to discuss any and all possible variables, and what effects can be anticipated within each, then you may proceed to do what you feel is best, with the comfort and knowledge that you have gone to the utmost extreme to consider ALL possible variables.

{This was as much a non-answer as any we've ever gotten. A lot of words, not much substance to them.}

Q: (S) There is another question, if I get this house, I noticed that there were bugs. I don't like bugs. At an earlier session you talked about an automatic bug zapper. I know it is not harmful

to humans. But, I have a cat and I may be getting a dog. Are they more susceptible to this frequency of this device? Will it affect their nervous system in the long run, or mine, or anyone else's?

A: Please be aware that in the state of being that you currently occupy, and in the environment in which you currently reside, as third density beings, there are many environmental stresses upon your physical being, which you often overlook. And, focus on any particular one is rather pointless without focusing on the remainder. So, therefore, perhaps it is wise not to focus on any at all unless you wish to choose the other path, which is to attempt to focus on all, and this can be most difficult. So, as you are zeroing in, as it were, on one area, such as electronic anti-pest devices, is understandable, but rather futile unless you also wish to focus on food intake, smoking, the pollutants of mechanical devices, of sunlight, the thinning of the ozone, vibrations from sound pollution and a myriad of other consequences that you normally overlook and put out of your mind. It is not necessary to become worried about any given environmental occurrence.

{This answer was also troubling. It was as much as saying “don't worry that you are swimming in a sea of poison, be happy!” A better answer would have been a direct response as to whether the device had negative aspects as asked and pointing out that one has to just do the best they can avoiding toxicity and trust that as they learn, they will be able to do more in that line. That has, in fact, been our experience. It was as though giving a direct answer to anything that might actually be helpful was not in the purview of “Frank” or whoever or whatever was speaking through him at this time.}

Q: (L) So, it is six of one, half dozen of the other. Bug spray, bug zappers, or bugs - take your pick.

A: Exactly. But the reason for the lengthy answer is to stimulate

reflection on a wider range of subjects of a similar nature, rather than just a simple answer to a single question.

{It was also evidence of not giving when asked which, again, was troubling.}

Q: (S) But me, as one individual, I can't do anything about the ozone layer or sound pollution... (L) That's not the point. There are all kinds of devices you can buy to produce ozone, and devices to eliminate sound pollution in your home. So, if you are going to worry about the bug zapper, you ought to worry about it all. (S) Well, I HAVE been thinking about that also! On my adoption certificate it says one date. You have told me another date, and we have figured both of them astrologically. Neither one seems correct. Can you tell me the exact birth date, time and place.

A: First of all, remember that reading of astrological charts requires total objectivity to obtain accuracy. And, again, when there is an emotional bond between the reader and the one being read, it is difficult to achieve this. Therefore, interpretations can be somewhat off. This is the first issue that must be settled. Also, please try to avoid any desired results, but rather be open to any and all possibilities when reading charts of those with whom there is an emotional bond. As far as the date, time, and place, the word "Mankato" comes; also the number 12, and 3:06 a.m.

Q: (L) We have one other question that is personal. Can you describe the action of DMSO on the body tissues, and can it be detrimental?

A: Please define "detrimental."

Q: (L) Just leave it and describe the action on the tissues.

{I was getting a little testy here myself.}

A: Pores of the skin are stimulated to open up in ways in which they do not normally open up, due to chemical reaction that is taking place between the oils that are normally present on the skin, and the chemical compound in the DMSO, which allows for rapid absorbing of the chemical compounds into the skin, to such an extent that nerve endings are equally stimulated to produce the desired result that is what could be described as numbness. But, one must remember that this numbness is merely a result of deadening the nerve endings as opposed to any medicinal treatment of the cause of the discomfort. Therefore, it is not particularly helpful for one to use the product described if the desired result is long term treatment and healing. It is merely short-term comfort on a temporary basis, then this is feasible, however, it is not advisable for long term health.

{This description is not very accurate. The benefits of DMSO are well described. Certainly, it is not a cure-all, but rather, and solving the problems that it is being used to treat is desirable, but here again, one must ask: is there any reason for this answer to be skewed? Like to discourage me from using something that might have helped me a great deal?}

Q: (L) The studies done on DMSO say that it bonds with the water molecules and passes quickly through the cells, forcing the cells to restructure in their original pattern, and that also it can carry into the tissues any other agent that is put with it. So, if you wish to apply an antibiotic to a specific area of the body, you mix it with the DMSO and apply it there and then do not have to treat the entire body with the antibiotic just to get it to a particular area. Is any of this correct?

A: Well, we choose to pose the question to you: Such intricate processes as described, makes one wonder how such a compound would be widely available, given the nature of political and economic restrictions in your 3rd density environment.

{It isn't "widely available." This sounded like a "damage control" question. I had responded to an inaccurate description of the action of DMSO with a more accurate one and "Frank" was apparently back-pedaling.}

Q: (L) Well, it is sold for veterinary use...

A: Again: How could such a compound be available for your use, if indeed, it has the results that you describe? We have answered the question. And, it is possible for you, given your inquisitive nature, to come up with a reliable and trustworthy chemical analysis through efforts of your own which would verify our statement: it is merely the result of nerve endings being numbed, as it were, which eases the pain. Now, we ask you to reflect upon this for a moment, again not merely to answer this one simple question regarding one relatively minor subject, but rather also to answer the entire nature of things in your environment. Would you expect anything that produces the results that you describe, to be readily available to you?

{More backpedaling, damage control, obfuscation.}

Q: (L) Well, I don't know. One does have to buy it from a veterinary source... so it is not exactly in the supermarket!

A: Then why can't you buy, for example, plutonium from such sources?

{This is an obvious straw-man argument and definitely not worthy of the Cs. There was way too much "Frank" and way too little Cs in this entire session.}

Q: (L) Well, plutonium is more rare.

A: But we are not discussing rarity of a substance, we are discussing results purported to arise from the use of DMSO. And you describe rather fantastic results involving some rather fantastic

chemical reactions which begs the question “why would such a compound such as this be even remotely available to the average individual in your environment, when other compounds that are KNOWN to produce various chemical reactions that would be beneficial are NOT available. Again, we refer back to the economic and political structure of your third density environment when posing such a question.

Q: (L) Are you saying that it is almost impossible to get anything that is good or useful in this environment? Are there no “good guys” out there putting things out that are good for us?

A: What do you think?

Q: (L) I certainly hope so!

A: Remember, for quite some period of time now, as you measure time, we have tried to inform you to the effect that your third density environment has been completely controlled and will be controlled by forces that seek only to serve themselves for a period, as you would measure time, exceeding 309,000 years. And, many, many times in your current life existence, you have reflected upon the questions involving the beneficial or otherwise existence of individuals or an individual IN this environment, the pros and cons of continuing such existence, and what is involved with it. And, you have correctly perceived the conclusion that this is, primarily, a negative experience. But, not that good things do not come from a negative experience, but that the basic indicator that it is a negative experience, should also indicate to you that it is an experience related to a chain of command involving Service to Self. And, therefore, Service to Self is a manipulative action rather than an openly beneficial action. It is a withdrawing and taking motion rather than an expanding motion. And these statements can answer for you, not only simple questions about one chemical compound, but the very nature of

your existence to begin with as well.

{I wonder if here, in the response above, the Cs were finding a way to send me a message as to what I was dealing with in this session? This certainly described most of the session exchanges!}

Q: (L) This leads to a couple of our other questions. What is the criteria to be a 4th density candidate?

A: There is no criteria. A criteria implies a judgment system which implies that an individual or individuals are watching over the progress of other individuals. It is merely part of the natural process of learning, which you are in total control of from beginning to end, in one sense. In that sense, you choose to be in the environment you are in, which does not indicate any recommendation of the environment by any higher source, or, conversely, any condemnation of the environment by any higher source, but merely the existence of the environment and your choice to exist within it. Therefore, being a candidate merely means that you have chosen to be a candidate for ANY level of density, be it first, second, etc. It is a choice of the self to continue that learning pathway.

{This almost directly contradicts the previous response about the control system in our environment.}

Q: (L) Okay, the question has arisen: at the time of the transition to 4th density, is there going to be any assistance to those who are newly arrived in that density, or does the knowledge of that density come automatically?

A: Neither. When one arrives in 4th density, it is one's choice to find one's way just as it is in the other densities. There is no one waiting there to assist you. That would be an illusion. It is you assisting yourself as you choose to do it, the way you choose to do it.

Q: (L) There was a discussion the other day and it made me curious. It seems that some people simply do not have the capacity to understand certain concepts. Is this a function of vibrational frequency?

{I decided to move the discussion to a more abstract area to see if there would be a relaxation of the sensation of tension that existed up to this point.}

A: That is not quite hitting at the subject matter in the way in which you desire to answer the question. In other words, it is a parallel understanding pattern. It is not vibrational frequency that determines ability to conceive of any particular notion. Vibrational frequency involves the groove, or pattern, that one has chosen in general terms. But, to give you an example, there are those who are of very LOW, as you would measure, vibrational frequency, who are able to conceive of extremely complicated issues and have also discovered extremely precise, complicated, and intricate answers to very complex notions and problems from your standpoint in the illusion. But, the frequency vibrational level has more to do with the emotional path that leads either to Service to Self at its greatest possible expression, or Service to Others at its greatest possible expression, not with intellectual capacity. So it is possible for a completely STS individual at any density level to be completely cognizant of all existence, just as it is possible for a completely STO individual to be completely cognizant of all existence. It has nothing to do with vibrational frequency because that is the emotional pathway.

{I would say that this was accurate enough. But I have an agenda behind my question that emerges in the next one. I'm "testing". In the following question, I deliberately sought to put "Frank" at ease by suggesting that I was NOT asking about him at all.}

Q: (L) The reason I ask this is because I have noticed that certain persons can skew the incoming material in the direction of their particular prejudices because of their emotional attachment to these prejudices. And I am sure that my own prejudices have an influence as well. But, I notice that very often the understanding of the material by others is quite different from what Frank and I understand. It seems that we all hear something different. Does this indicate a vibrational differential which could be considered a lack of rapport, or some other phenomenon of which I am not aware?

A: The only phenomenon that is present here that is in any way related to the situation you describe is what could be termed intellectual capacity, which is not related directly to vibrational frequency. Think, if you will, in your lifetime have you ever met either a) an individual that you did not perceive to be particularly intellectually developed, who was, nevertheless, of a very kind and loving and giving nature; or b) an individual whom you perceive to have great intellectual capacity who was, nevertheless, extremely selfish and non-giving and not generous and not concerned about anyone's well being but their own?

{And he fell into the trap describing himself exactly.}

Q: (L) Yes. I know exactly what you mean. But there is still some gap that I am trying to fathom here. I have a little theory that people who are en rapport tend to think in similar ways or with similar patterns, even if at different levels. And I think that because of emotional similarity or identity of purpose or orientation, that they might almost begin to think as one mind or move as one body, to work as a unit. Why is this not happening? Why the disparity?

A: The real issue involved is one of intellectual capacity, which, in and of itself, can lead to all sorts of emotional entanglements

and frictions. It does not require a differential in vibrational frequency level to produce the types of symptoms that you describe. It is merely intellectual capacity that is inferior rather than the vibrational frequency level. Again, this vibrational frequency level involves nature of being and emotion, not intelligence.

{In the next question, I'm again putting "Frank" off the scent of what I am after.}

Q: (L) I have done a little bit of an assessment on the subject, Frank and I have discussed in all possible ways, and we cannot come up with any reason why persons who are exposed to correct grammar and syntax cannot just pick it up sort of by osmosis so that it is not so jarring to the ears of those who DO care about words and that they are pronounced and used correctly .

A: Intellectual capacity.

Q: (L) Well, it shouldn't take a whole lot of brains to hear what others are saying and to at least imitate it!

A: The greater the intellectual capacity, the greater the chance that each and every facet of intellect will be available for use, growth and stimulation. The lesser the intellectual capacity, the greater the chance that some will not be available. And, the examples you cite of the ability to learn proper grammar by mimicry or understand correct pronunciation and syntax, may merely be the closing off of that particular facet of intellectual capacity, rather than any vibrational frequency level differential. And, it is important for you to be aware of this so that you do not make subjective judgments of an individual or individuals, thinking that they are inferior in intent or desire as opposed to intellectual capacity. Granted that it is an irritant for you and others. But, one way to ease the irritation within yourself is to come to a true and complete understanding of the cause of the irritation. Once you have understood that, then it

becomes less irritating. Especially if the cause is one which can be excused or forgiven.

{At this point, Frank is totally at ease and “showing off” his access to knowledge/information, so to say. Thus, the information is significantly more useful. And so, I decide to hit another point as a test.}

Q: (L) Well, that leads me to the next question: the use of words that I find personally offensive. Is this also something that I should excuse? I mean the use of words that relate to body parts, body functions that are very private, and so forth, used as adjectives and adverbs in ordinary speech about ordinary subjects. What is considered to be extreme slang or pornographic language.

A: Well, you should be aware that fighting off such occurrences is rather futile in the particular point in space time that your awareness is emanating from, because it is a part of the environment to an extreme extent at this point. And, whereas it is true that these are symptomatic of negative energy transfer, there is little to nothing that you can do to affect or change any of these.

Q: (L) I don't have to contribute to that negative energy.

A: This is certainly very true. And it would seem that you are not, as a general rule, doing so. However, perhaps it would be helpful, again, for you to understand that it is more a question of changes occurring in the 3rd density environment right now, that you will notice a great many things that you will perceive to be objectionable or distressing, or even frightening in their nature. It is your advanced state of perception and your intellectual capacity, which is also advanced compared against others in your realm, that allows you to have a deeper understanding of all of this. But, and this is understandable, you tend to become, perhaps, too emotionally involved in each individual occurrence,

when, after all, it is all part of the bigger picture that is going on around you. And, it would probably be better to focus your attention on this bigger picture rather than the individual distressing elements contained within.

{Now, notice above the not-so-subtle ego stroke. Remember, this is following my “alignment” with Frank in previous questions, the “we’re hermanos” maneuver.}

Q: (L) I understand how it is in the rest of the world, and that there is nothing I can do about these things, nor would I try. But, in my own personal environment I do not wish to contribute to that negative energy and I don’t think that it is out of line for all members of a group dedicated to bringing in positive energy of knowledge for change not contribute to that energy in their personal lives as well.

A: This is certainly understandable. But, something that you should be aware of is, to a great extent, you have already achieved removal of those things which are objectionable, and therefore dwelling this may not be helpful. The use of such words as you have described, which again, as we reiterate, is indeed symptomatic of changes occurring within the 3rd density level in your particular point in space time, and is a negative energy transfer, one of countless overall, while it is true that this is the nature of what you describe, you have been largely, even if not 100 per cent, successful in removing that particular problem from your environment and from the group you describe, therefore, if there is an occasional contamination, it may be overlooked when compared against your overall success in removing such elements.

Q: (L) I agree. I would like to move on. I would like to know if putting a book together consisting of our experiences and what we have learned in this group and project would be a successful

pursuit?

A: Well, that is up to you. But, we do caution that, due to your lack of credentials, and by this, we mean as perceived in the illusion, it may be difficult for you to reach your desired goals, in the time frame that you may desire, which would be discouraging for you. This problem can be alleviated by the one you have mentioned, Tom French, and you might help him to help himself get the project finished by a true understanding of the nature of the obstacles he is facing.

{Tom French was a constant thorn in Frank's side. He many times suggested to me: "Tom should interview MEeeee... I can set him straight." And when Tom did not show particular interest in interviewing Frank, except briefly on one occasion, he railed at Tom's "stupidity" for not seeing what an opportunity he was missing to learn the secrets of the Universe from Frank. So, him being brought up here, more or less out of the blue, not having been mentioned by me in this session, is indicative of part of the problem here. Frank was feeling anger and resentment and this was acting strongly on this session because, as I said, not all direct channeling was useless.}

Q: (L) Okay. Can you offer any suggestions as to what to DO with the masses of information we have received?

A: Well, so far you have done an extremely admirable amount of "getting the word out" as you would call it, in the past calendar year, as you measure time, by merely following your instincts. And, it would not be appropriate for us to interfere with this learning pattern by making suggestions or answering that question as you, in fact, desire it to be answered, because it is not necessary. You are making plenty of progress. There is no need for you to deviate from any patterns of movement in this area.

Q: (L) Well, I very much want to get financially stable so that I can take certain steps...

A: We caution you: compare your current status, and reflect upon the progress that you have made in the last two years, and ask yourself if you have truly suffered in this time period, or have all your necessities always been provided, even if at the last minute. And, if this is indeed true, then the knowledge that we have given you that the financial stability that you seek will, indeed, eventually come your way, why then be concerned?

Q: (L) I also think that Frank is being overworked and underpaid.

A: All there is is lessons.

Q: (L) Well, if I don't make some changes I am going to fall into a hole.

A: When has the hole ever consumed you?

Q: (L) Well, it is on the verge of it.

A: When has it ever consumed you?

Q: (L) Never.

A: Do you expect that to change?

Q: (L) No.

A: You have, in fact, advised others who have complained about similar situations, that there is no need to worry, because, as you put it, "the Lord will provide." And if, indeed, you do have faith in this very simple principle, why then would your faith deviate at this particular point?

Q: (L) Because sometimes I just don't know what to do and I feel like I am being devoured by stress that I cannot handle.

A: We do not believe that this is, in fact, a factual statement, but rather an emotionally tainted statement, which we are not condemning. It certainly is understandable, but it is also helpful to understand it for what it is. Previously you have described options that were available to you, it is your choice, then, to seek them out and turn them into answers. Do you not feel that options are available to you?

Q: (L) Well, yes. But none that are terribly pleasant. And there is risk involved.

A: Describe for us please, any thing in your realm that does not involve risk?

{That topic was okay as far as it went, and accurate enough, but no real answer given - the feeling of tension returned, so I shifted gears again to see if a different direction would be more fruitful.}

Q: (L) Okay, I am really curious to discover something about the ancient legend of the Hyperboreans?

A: There is a masking there. It is an incorrect description.

Q: (L) What do you mean? There was a race supposedly called the Hyperboreans...

A: That is a masking.

Q: (L) What is a masking?

A: A masking is an incorrect description of an historical event or condition.

Q: (L) What was the true event or condition that is masked as the Hyperboreans?

A: There have been, in your third density environment, at various points in space-time, residing on the surface of your planet, and also within its atmosphere, which structure has changed

repeatedly, and, in fact, underneath the surface of your physical environment in 3rd density, a great many types of races of humans, some of whom are currently existing in your environment, and some of whom are not. And, also alternate humans. In other words, human-like 3rd density beings who could not be accurately described as humans as you know them. And, also there has been interaction with 4th density beings who pose as 3rd density beings, and 3rd density beings who have, at times in your history, have been able to temporarily and at will interact with 4th density in such a way as to present themselves as 4th density beings. So, we are describing here a virtual potpourri of history involving intelligent life within some realm or condition of your environment. To zero in on any group and give them a name at this point is not really appropriate as names connote approval, but, in fact, may merely be a stamp.

{This was probably the best info of the entire session.}

Q: (L) Okay. Is that all?

A: That's up to you.

Q: (L) The Hyperboreans were described as a race that lived in the far North, living in a tropical pocket near the North Pole surrounded by mountains of ice. They were supposedly semi-transparent and supposedly something forced them to move among other humans, and they interbred with them. The legend is that every 5th generation, following the maternal line, produces an individual of exceptional beauty and intelligence. So, it is thought in some places that people who are exceptionally beautiful and intelligent are the result of the Hyperborean genetics. Also, the Hyperboreans were supposed to be the predecessors of the Celts.

A: That is such a pleasant story! Mmmmm.

Q: (L) I liked it!

A: Unfortunately, it does not reflect fact. But, fantasy is always fun.

Q: (L) Was there a race that lived in the area of the North Pole?

A: Well, there is a group currently living in the area of the North Pole.

Q: (L) Who is that?

A: Eskimos.

{This was supposed to be funny, I think.}

Q: (L) Okay. Do any secret libraries containing all the secret wisdom of our history exist anywhere on the planet?

A: No. The secrets that you are alluding to are contained within mental structures in psychic realms, some of which you have little or no conception of. There is no need to record anything in any form that could be placed in any library. It is all done verbally and through mental telepathy.

Q: (L) Who and what were the Mayans?

A: The Mayans were a transitory people who still exist in the lands that you refer to as Central America. And who have certain physical features that are not consistent with the rest of human beings on 3rd density Earth environment, due to their interactions, in the past, as you measure time, with beings of other density levels.

{More good info and probably accurate since there is no emotional attachment.}

Q: (L) What beings would those be?

A: Well, we have described 4th density STS beings on many occasions.

Q: (L) The Lizard Beings?

A: Indeed.

Q: (L) Who was Arajuna of Tiahuanaco?

A: Well, we believe that you are referring to one of approximately eight hybrids that ruled the area currently referred to as Central America. Hybrids being a 4th density to 3rd density transfer experiment from the Lizard race to the human race, which was abandoned after approximately 240 years of experimentation by the Lizard Beings, due to the lack of success for sustaining physical duplication, or reproduction of the race. It was one of several attempts by the Lizard Beings to directly transmit their souls into 3rd density environment for permanent placement there. And, of course it is no longer perceived as necessary by them because their intention is to rule 3rd density beings in 4th density when they arrive there.

{More good info and probably accurate since there is no emotional attachment.}

Q: (L) Who built the city of Tiahuanaco?

A: The Lizard Beings in cooperation with humans.

{More good info and probably accurate since there is no emotional attachment.}

Q: (L) When was it built?

A: Varying time frames since it seems to have been destroyed at two points. We have to estimate an average of 8,000 years prior to the current time, as you measure it.

{More good info and probably accurate since there is no emotional attachment.}

Q: (L) Who built the statues at Damien in Kabul?

A: An early Persian race, 3rd density in nature.

Q: (L) Does the Agartha exist?

A: No.

END OF SESSION

3.37 August 12, 1995

Direct Channeling with Frank, Laura, SV

The usual caveats about the direct channeling sessions apply though this was one of the better ones.

Trance induced.

Q: Are you ready to receive questions?

A: Yes.

[Suggestions given for clarity of communication.]

Q: (L) Do you have any messages to give S or myself at this time?

A: No.

Q: (L) Okay. Then we'll get to our questions. My first question is: What is the source of the Vedas? The Hindu system of philosophy?

A: There is more than one source.

Q: (L) What is the general source, positive or...?

A: A very vague question.

Q: (L) Was it a group of people that put them together over centuries, or was it channeled information, or...?

A: It came into being as a result of meditation.

Q: (L) And what race of people was responsible for this information?

A: Caucasian.

Q: (L) What period of time were the Vedas received.

A: Varying bits and pieces of information which later was organized into packages labeled as it is.

Q: (L) From what realm did this meditated information issue?

A: The realm of the subconscious mind.

Q: (L) Are any of the Vedas information that was given to man by extra-terrestrials?

A: Not as you would define it.

Q: (L) From what types of beings, or what level of density did this information issue from?

A: Third.

Q: (L) Can you give us anything more on that in a general sense?

A: If you ask.

Q: (L) What is the percentage of accuracy of the information given in the Vedas? Overall?

A: Accurate at what level?

Q: (L) Third Density.

A: Accurate to what extent and in what way?

Q: (L) Well, in a general sense, as a way of living one's life and perceiving the universe.

A: That's an extremely difficult question to answer as accuracy in determining such things as perceiving the universe and living one's life is entirely open to interpretation as anyone can resolve accuracy by relating to the parallel universe which is appropriate for the information given. And, as we have stated in the past, it is possible to create parallel universes through thought energy, and once they are created naturally, they correspond naturally to the interpretation given for them.

Q: (L) Is there any benefit to be obtained through the use of mantras?

A: Especially when the mind says there is. Remember, most all power necessary for altering reality and physicality is contained within the belief center of the mind. This is something you will understand more closely when you reach 4th density reality where physicality is no longer a prison, but is instead, your home, for you to alter as you please. In your current state, you have the misinterpretation of believing that reality is finite and therein lies your difficulty with finite physical existence. We are surprised that you are still not able to completely grasp this concept.

Q: (L) Well, I think I have a good grasp of this concept, but I am asking questions to obtain answers for others to comprehend.

A: That is not being completely honest.

Q: (L) Close enough. Is it true that recitation of mantras can effect spirit release or exorcism?

A: If you please.

Q: (L) Last week, the remark was made, regarding spirit release and exorcism, that if it is done properly, by the right person, that there is no side effects or eventualities that would bring detrimental conditions to the individuals and location involved. What was meant by “done correctly?” What is the correct format or mode for exorcism?

A: Correct manner involves honesty and understanding that one has complete faith and awareness of the activities pursued. In other words, when one performs an act which they proclaim to be having a desired result, and they do not have faith in their own actions as, in fact, producing the desired result, then the effort will collapse because of their lack of faith. Whereas when one has complete faith and multi-density understanding, their activities are indeed truth and useful as prescribed and this is the correct way to pursue them.

Q: (L) Isn't faith a difficult commodity to acquire?

A: Not at all. When you have found something of truth you will receive demonstrations which locks in your faith.

Q: (L) I see. What is the criteria for the “correct person” to be performing exorcism or spirit release?

A: The same as the previous answer.

Q: (SV) I have a question. Jan and Terry have been taking sort of lessons from a Buddhist monk. Could this possibly help them, or us, to go within or help with issues?

A: Any method employed can be helpful for, as you say, resolving issues or with coming up with answers, if indeed the effort is sincere and the seeking is genuine, rather than just going through the motions, as it were.

Q: (L) Several weeks ago we did a spirit viewing of Terry and Jan,

and there was something seen that obscured Terry, and something seen within. We later did a direct spirit release and nothing that was similar to what had been observed remotely revealed or exposed itself. Why was this?

A: Complicated, complex.

Q: (L) Was there error in what was seen?

A: No.

Q: (L) Was what was seen there when we did the release with Terry?

A: That is not the correct issue.

Q: (L) What is the correct issue?

A: Variability of circumstance.

Q: (L) So, in the circumstance he was in while being viewed, there was what was there, and when the circumstances changed, it was no longer present?

A: Not exactly. Two different types of activities involved. One was viewing from afar, one was spirit release. These are two separate types of activities employing the psychic or ethereal channeling process, therefore points of view can be altered by a number of factors, including emotional blocks or change of circumstances, just to name two.

Q: (L) In a previous session we asked the question: Had anyone ever been in our group or was anyone here, who had been sent to disrupt the group, or stop the channel. The answer was given that there was a good chance, but this was something we had to learn on our own. Now, we have discussed this from many different directions, and it seems to appear that part of this potential

for disruption came through, if not from, Terry and or Jan as you have previously stated.

A: Well, again you are simplifying a complex issue, seeking a broad, general answer to questions that would be better served by breaking them down into simpler questions.

Q: (L) Were Terry and Jan sent to our group to disrupt it?

A: No.

Q: (L) Well, the answer seemed to indicate that someone was, and if it wasn't them, then it must be one of us?

A: No.

Q: (L) Was it someone else at some other time?

A: It is not someone in the sense of any third density physical being as it is someone attached to a third density physical being which can change from being to being as conditions warrant. Why should you think that any given physical individual contains exactly the same surroundings and attachments at all times? Obviously, this can change. Therefore, if there is attack, would it not be far more effective to launch the attack through anyone and everyone present at any given time, in order to maintain the attack. It is rather naive to assume that it so limited that physical removal of any given third density being, will preclude all possibilities for attack if and when one has identified an attack mode resulting from the presence of said being.

Q: (L) Are some people more susceptible to attack modes than others?

A: Well, again, there is a variable issue rather than a static issue involved here.

Q: (L) Well, if I remember correctly, when I asked the original

question, I believe I specified a 3rd density person, and not something ephemeral.

A: If you are asking is it possible for a third density being to seek consciously to disrupt activities, yes, certainly this is possible. Has it happened as of yet? No. Does that mean it cannot happen? No. Does that mean it will happen? It's always a good chance for your activities are of the type which would bring about attack of any and all sorts. Therefore, you must be on the lookout. However. It is also wise not to become obsessed with any particular mode of attack as many, many, many types can be employed. Types that you may not even think of.

Q: (L) Okay. Well, could my sensitivities to atmosphere, attitudes and so forth be a form of attack on myself?

A: Can be. The attack may not be consciously emanating from the physical third density being as in the case of any and all third density beings.

Q: (L) What I meant to inquire is: is my emotional reaction to this distorted?

A: Could be, and if it is, then obviously the attack is successful.

Q: (L) How can I determine this?

A: By being completely open and communicating with all parties at all times. Keeping secrets can only lead to failure.

Q: (L) Well, are Terry and Jan significantly important to this group? I try to talk to them, but it seems that their emotions either block them from hearing me, or their attitudes and responses put a period to my attempts to discuss issues. I find it almost unbearable to be constantly interrupted and this is a constant with the both of them... if they are not trying to outtalk each other.

A: Well, again, we suggest that you try to avoid subjective inquiries. We ask that you pause and ask yourself if there is anyway that those you refer to as Terry and Jan, and any and all parties to any extent, can ever be of any benefit to any and all involved before you pass judgment.

Q: (L) Well, I don't quite get the meaning there. Frank's the channel. Obviously that is an important function. Without the channel there is obviously no group. Right?

A: Correct.

Q: (L) Okay, so therefore, in a very real sense, no other of us is all that significant?

A: Incorrect.

Q: (L) Why is that?

A: Vague.

Q: (L) Can we define our roles?

A: It is up to each and everyone of you to define your roles as whatever role you see yourself fulfilling, and also to communicate those to each other. If this is done, it can bring a much clearer picture of the situation to each one of you, and also avoid the possibility that misunderstandings, conflicts of interest, as is possible when there is a lack of communication in any situation. See, this is one of many modes of attack employed very successfully by those who wish to see efforts cease, and the attack is most ingenious because it involves playing with the subconscious mind where 92 % of all thought processes originate in third density.

Q: (L) Well, it has not been my perception that Terry and Jan are open to honest communication. They are quite willing to point

out other people's problems, but they do not want to hear it if someone else has a problem with them.

A: Then it would seem that it is not an open forum.

Q: (L) How can you have an open forum with someone who is not honest with themselves?

A: Subjective.

Q: (L) Of course its subjective. Isn't it significant that since they have arrived in the group that the level of information has deteriorated and the occurrence of vague and non-answers?

A: Be careful not to read incorrect mechanical approaches as defective characteristics or personality or nature. It is important to differentiate between that which is alterable, curable, or can be helped, with that which is incurable, unalterable, and cannot be helped. Also, realize too, that as third density STS beings, it is very easy for any and all of you, each and every one of you, to fall into the trap, which is, of course, one form of attack coming from 4th density STS; to fall into the trap of seeking to serve self even when in cooperation with or in forum with others. This can cause, ultimately, a derailing, of any and all activities designed to improve situations or generate wide-spread assistance.

Q: (L) Earlier today, while talking with this fellow, Ram, the Vedic astrologer, he proposed that the Vedic idea of who and what the Lizard Beings were was correct and that this is the activation of the sexual principle, or kundalini within us. Any kind of UFO or alien activity is merely the reflection of what is inside all of us. Is this a correct assessment?

A: Part of the answer to that question, if you refer back to the answers to the earlier questions, is of a similar nature. But, in truth, the best way to most adequately answer those questions

is to ask yourself what do you believe, based on the knowledge that you have collected and have been given.

Q: (L) Well, I sometimes wonder if they are not part of ourselves, in a parallel universe, and they emerge into our world and interact with us in a negative way. And, that the stories of alien human interaction are really just stories of human performance of mechanical operations, guided by negative aspects of their own being in another dimension or density. Would this not be a distinct possibility.

A: Not in the sense that you are thinking. Remember, it is always wise to review all the previously gathered information whenever any new ideas appear before you. This is true not only in this particular instance, but also all others as well. For example, how often would mere thought patterns, or realities emerging from a parallel universe, appear in desert locations and be retrieved by third density beings for study in the third density realm? Now, if indeed you believe that this has happened, and it HAS, one must contemplate the meaning such and how it relates to one's proposal that the whole issue involves much higher levels of density on the etheric plane, and, or, interdimensional capabilities that cannot be measured within the realm of third density. These theories, certainly, are part of the answer, but merely a part of the answer, and none of them represents the entire answer. And we caution very strongly that you avoid falling into the trap of believing too strongly in any one explanation that appears, as this too, is a form of attack which can lead to destructive consequences.

Q: (L) So, there are actual, material, alien craft that have been captured or retrieved by the government and studied?

A: Do you have any doubt of this?

Q: (L) Well, sometimes I wonder if the whole thing is cooked up by the government just to make us all crazy!

A: Well that's an interesting concept, but we can assure you, that that is not, in any way, correct.

Q: (L) Well, if these craft emerge into our reality from fourth density, as I assume some of them do, how do they stay here? Do they become absolutely physically material and do they remain here?

A: If they malfunction in third density, they then become frozen in third density. Very simple.

Q: (L) And, does the same hold true for the beings?

A: Precisely.

Q: (L) So, in a very real sense, they are very real and physical...

A: They are very real and physical in fourth density, too. The difference is that fourth density physicality is not the same as third density physicality. But that is not to say that there is no physicality in fourth density. In order to completely remove all attachment to physicality, one must reach sixth density or higher. Everything below that involves some aspect of physicality or attachment to physicality; as in fifth density, the contemplation zone, which is simply a recycling of those from 1st through 4th densities, in the etheric plane. They are brought back down and recycled into one of the physical realms. Each density level one through four, involves lesser and lesser physicality, as you know it, but nevertheless there still is physicality. Third density physicality, however, remains constant on third density when a being or a craft or an instrument of any kind manufactured or conceived in fourth density arrives in third density, it is able to navigate through third density in fourth density reality. However, when it malfunctions, whatever is left of it remains in third density. Those reports of objects or of any physical structure whatsoever, be it a being or a construct, disappearing from third density to fourth density, in each and every case, involves an object or a

being, or a construct, which is not in the process of malfunctioning. It is still fully operational at its fourth density realm. It is merely visiting third density which has a limited capacity, as you measure time in its passage, therefore it does, indeed, remove itself naturally, at some point, to fourth density. However, if it malfunctions or is in any way broken or altered, it will remain in third density.

Q: (L) So, if someone removes an implant, the best way to keep it here would be to smash it?

A: If someone removes an implant it is no longer functioning as it was designed to function.

Q: (L) Okay. So we have some real things happening, and a possibility that a film was taken of this interaction with these malfunctioning fourth density beings and craft. And, supposedly, this film is going to be shown on television. Is this film of this autopsy, and examination of craft remains, a true filming of same, or is it a fake, or fraud?

A: Well, one would suggest that for the maximum amount of learning, that the film be witnessed by those seeking the truth, in order to determine for themselves whether or not it is factual, as such will be possible upon viewing.

Q: (L) Well, I certainly intend to do that. Now, I want to slide in a personal question. Regarding my present living conditions, I would like to know if this is karmic?

A: All difficulties in personal life are karmic in one way or another. Especially those involving interactions with other souled beings. And the closer the interactions, the more karmic they are. This you already know.

Q: (L) Well, the difficult thing is to know what is the best thing to do.

A: Learning images is the process that is ongoing throughout all existence, and is achieved by one action or another. Any and all actions, any and all possible actions, any and all directions of actions facilitate continued learning. Therefore, it is not possible in the ultimate sense, to make mistakes. But, one must experience whatever is karmic to its full extent. The choices made reflect choices made prior to entering the physical plane of third density, combined with the opportunities that present themselves with the variability of reality in its fluid state. Therefore, the decisions to be made will present themselves when they are to be made, and it is only one's ability to accept interpretation objectively that determines whether the learning process will deliver greater or lesser degrees of pain.

Q: (L) Why does learning have to be painful?

A: It doesn't.

Q: (L) Well, it seems that it invariably is for me.

A: That is according to the perceptions of the experiencer, not according to any absolute criteria.

Q: (L) We would like to know a bit more on the subject of rituals, which you have warned us are restricting on many levels. Why is this?

A: If one believes in one's activities sincerely, to the greatest extent, they certainly will produce SOME benefit, at SOME level. But, merely following patterns for the sake of following patterns, does not produce sincerity and faith necessary for ultimate benefits to result. So, therefore, as always, one must search from within, rather than from without, to answer that question. Do you understand? To give you an example, to be certain, you meet this all the time. If you read material in the pages of a book that advises one form of ritual or another, and you follow that form

of ritual because you have read words printed on the pages, does that really give you the true sense of satisfaction and accomplishment within yourself to the greatest extent possible? Whereas, if you, yourself, were to develop an activity which one or another could interpret or define as a ritual, but it comes from within you, it feels RIGHT to you, and you have a sincere and complete faith in it, whatever it may be, does that feel right to you?

Q: (L) Yes.

A: Have we answered the question, then?

Q: (L) Yes, thank you.

A: We will say good night, then.

END OF SESSION

3.38 September 9, 1995

Frank, Laura, SV, Tom French, Cherie Diez

This, too, ended up being a direct channeling session, but again, it seems to be rather good. In fact, it is one of the better informational sessions.

Q: (L) Hello.

A: Other.

Q: (L) What do you mean by “other?”

A: Re: discover other.

Q: (L) Okay, who do we have with us this evening?

A: Other.

Q: (L) You are someone other than the Cassiopaeans?

A: No.

Q: (L) Do you wish us to pursue this through trance channeling or with the board?

A: Trance. You have graduated, why do you wish to backtrack?

Q: (L) Well, for this evening, I would prefer to use the board. Is that alright? [To Tom and Cherie] Is it alright with you if we use the trance medium? They do not seem to want to do it through the board tonight. (T) Whatever is usual.

[Frank is put into trance state]

Q: Now, could you talk to us a little bit about the purported “Photon Belt?”

A: The key issue remains one of interpretation. The messages are genuine; interpretations are variable in their accuracy. So, when one speaks of the “Photon Belt,” one may really be thinking of a concept and giving it a name.

Q: (L) So, you mean that various persons are seeing something and only describing it within the limits of their knowledge?

A: At one level, yes.

Q: (L) Any further comments on that?

A: Comments best serve when they are formulated as replies to direct and specific questions.

Q: (L) Was there a harmonic convergence as was advertised within the metaphysical community?

A: For those who believed there was a harmonic convergence, indeed there was a harmonic convergence.

Q: (L) Did anything of a material nature happen on or to the planet to enhance or change the energy?

A: Did you notice any changes?

Q: (L) No. Except that it seems that things have gotten worse, if anything.

A: Did you notice any clear, obvious, material changes?

Q: (L) No. But that could just be me. I could just be a stubborn and skeptical person.

A: Did anyone else in the room notice any clear or obvious changes?

Q: (S) What date was it? (L) 8/8/88, I believe. (S) I thought it had something to do with 11/11 ninety- something...

A: Well, obviously if the recollection of the calendar date is difficult, one would suppose that material changes did not take place. For, if they had, would you not remember the calendar date ascribed to them?

Q: (L) Yes. The claim has further been made that, for a month, following the harmonic convergence that no abductions were taking place. Is this true?

A: No. There has been no cessation in what you term to be abduction in quite some time as you measure it.

Q: (L) Well, on the subject of abduction: we watched a film on television, Monday the 28th, that was a purported video of an alien autopsy, or, more correctly, an autopsy on an alien body. Was this, in fact, an alien?

A: How do you define “alien?”

Q: (L) Was it a being other than a naturally born human on this planet as we know human beings?

A: That is correct.

Q: (L) It was other than a naturally born human?

A: Correct.

Q: (L) Okay. What kind of a being was this?

A: Hybrid.

Q: (L) What was it a hybrid of - combining what elements?

A: Cybergentic creatures you refer to as “Grays,” and earth human such as yourself, third density. So, in essence, it was a hybridization of a 3rd density and 4th density being.

Q: (L) Okay, was this a 4th density being?

A: No. If you listen to the response - it was a 3rd and 4th density being.

Q: (L) How can a being be both 3rd and 4th density?

A: It is the environmental surroundings that count, not the structure of the individual. The same is true, for you. After all, you have read literature stating that your world or planet is in the process of ascending from 3rd to 4th density, have you not?

Q: (L) Yes.

A: And this literature has also stated that this is an ongoing process, has it not?

Q: (L) Yes.

A: Then, one must wonder, if it is an ongoing process, how would it be possible, if it is not possible, for a being to be in both 3rd and 4th density at one time... Also, if you will recall from review

material, you are currently living in the same environment as 2nd and 1st density level beings. Is this not true?

Q: (L) Yes.

A: At least that is what you have been told. So, therefore, it is possible for a being to be in 3rd and 4th density. And as we have also told you, when 4th density beings visit 3rd density environment, they are, in effect, 3rd density beings, and vice versa. The so-called abduction takes place, especially if it is a physical abduction, the subject becomes temporarily 4th density, because it is the environment that counts. And the key factor there is awareness, not physical or material structure.

Q: (L) I have a paper here that talks about the Grays and says that they have two brains: an anterior brain and a posterior brain; and that if you shoot one - this is what it says, I am not suggesting that I want to shoot anybody - that if you shoot one, and only shoot one part of the brain, that it does not die; that you have to shoot it in a special way and get both brains in order to kill one. Is this a correct concept?

A: Well, it is rather puzzling. Brings up a lot of questions. One question that comes to mind is: why would one seek to shoot anything.

Q: (L) Well, I didn't suggest that I wished to, this is just what this paper says here.

A: The physical description is accurate in terms of one variety of what is referred to as the Grays. It does have an anterior brain. However, this is secondary to all other issues. And, also we would suggest that it would not be advisable to seek to cause physical harm to any particular species. Therefore, it may be advisable to disregard the information contained in the work that you are describing.

Q: (L) It also says that the Grays have to be very close to a person to telepathically link with that person. Is this correct?

A: Close? No, as we have described to you before, there are technological processes involved which do not require close physical proximity as you measure it. But, this is very complicated. It follows dimensional windows and that sort of thing, which you do not fully understand, therefore it would not be advisable to go into that in great detail. But, the general answer to that question is no.

Q: (L) It also says that they implant some sort of crystal on the optic nerve of humans that is 2 to 4 microns in diameter and that this crystal is tuned to the frequency of the individual's implanting it, which allows them to establish a mental frequency for communication. Is that anywhere along the line of what you are talking about?

A: Physical implantations do occur. The precise locations vary according to the desired effects. And when it comes to the interactions between the human species in 3rd density, and other STS issues in 4th density, there are a variety of mechanisms in use as well as a variety of directives and objectives. For example, some implants are used merely for tracking. Others are used to alter consciousness, and still others are designed to be mind altering or motor altering mechanisms. Each of these has a different structure and a different material content according to which is being employed and for what purpose. The particular function you are describing there has been used, or, rather, something similar, though we are not completely familiar with that which you have described. So, we suggest that this may be fabrication to some extent, or expansion of accurate information. But, in any case, it is true that implants do get implanted for various reasons.

Q: (L) Shifting gears back to the alien autopsy: can you access the

information and indicate whether this hybrid being was one that was obtained from a crash that occurred at Roswell, New Mexico in 1947?

A: The crash did not occur at Roswell. It was in a desert area, approximately 157 miles to the West by Northwest, of the Roswell location. The Roswell location that you are familiar with, did not include either a craft or any bodies or living beings. It was merely a debris field. The actual crash occurred some distance away. The crash site, a desert location, closer to Los Alamos, Mexico, and there, the craft, which had malfunctioned over Roswell, thus leaving behind the debris field, had, in fact crashed. This is where the bodies and living beings were recovered along with what was remaining of the craft. And, yes, the being in the film you have seen DID come from there.

Q: (L) How many beings were on that craft?

A: Four.

Q: (L) Were they all hybrids?

A: Correct. It also may be noted, and you can check this with the official record as has been interpreted by those in your environment who have studied the subject, this was a specialized mission which was initiated by those referred to as the Lizard Beings using human/hybrid combinations, the hybrid element being that referred to as the Gray type, it was an experiment partly as what could be interpreted or translated to mean a reconnaissance mission, and partly testing the environmental conditions that existed in that area at the time as a result of the nuclear explosions that had occurred in the region in the recent past, as measured from that particular point in time. The effort was to determine effects on both the living Gray species and of, course, the Reptilian or Lizard species, as they have a similar genetic make-up in some ways that we will not get into just now. But,

the idea was to test the effects upon both the human genes, or genetic structure, and the Gray genetic structure which, in turn, is connected the Lizard genetic structure if you understand the concept. That was one objective. Another objective, of course, was basic reconnaissance.

Q: (L) Okay. The next question: Are any of the Grays what one might call “good guys?”

A: That is a subjective interpretation any way you look at it. For, after all, what is good and what is bad?

Q: (L) The definition that has been given is STS and STO. So, are any of the Grays STO beings?

A: Well, again, if we can review for just a moment. It is subjective to refer to either STS or STO as either good or bad. It merely means Service to Self and Service to Others. Now, the determination as to whether it is good or bad is made by the observer. It depends on your point of view. It depends on your objective. It depends on a lot of things. One is merely service to self. This is inward turning. The other is Service to Others which is outward expanding. It is part of the balance which makes up that which we refer to as the Universe.

Q: (L) Are any of the Grays STO?

A: In very rare instances, Gray beings have crossed over into the STO realm, but in their natural environment, they are, in fact, STS, as they were constructed to be.

Q: (L) How does it occur that they cross over into the STO environment?

A: Simply by natural circumstance, in the same general way that it occurs that human beings in the 3rd density STS environment can, under certain circumstances, rise to the STO level. Very rare.

Q: (L) Well, if the Grays are cyber-genetic probes of the Lizard Beings, and, in effect soulless, does this mean that some of the Lizard beings are also STO?

A: Well, first, no being that is given intelligence to think on its own is, in fact, completely soul-less. It does have some soul imprint; or what could be loosely referred to as soul imprint. This may be a collection of psychic energies that are available in the general vicinity. And this is stretching somewhat so that you can understand the basic ideas, even though in reality it is all far more complex than that. But, in any case, there is really no such thing as being completely soul-less, whether it be a natural intelligence or an artificially constructed intelligence. And, one of the very most interesting things about that from your perspective, is that your technology on 3rd density, which we might add, has been aided somewhat by interactions with those that you might refer to as “aliens,” is now reaching a level whereby the artificially created intelligences can, in fact, begin to develop, or attract some soul imprint energy. If you follow what we are saying. For example: your computers, which are now on the verge of reaching the level whereby they can think by themselves, will begin to develop faint soul imprint.

Q: (L) That’s not a pleasant thought.

A: Now, to answer your question: Are the Reptilian beings, or Lizard beings, STO. Of course, some can cross over into STO. However, their natural environment is STS as they have chosen. But, whether or not any of the cyber-genetic Gray beings cross over into STO, and or the Lizard Beings cross over into STO, these are not connected to one another, these two concepts: they are independent.

Q: (L) I understand. Okay, would you say there is any percentage, any fairly measurable percentage of Lizard beings that are STO?

A: It is VERY, VERY small. EXTREMELY small. Hardly worth mentioning.

Q: (L) What about the Grays?

A: That might be slightly higher, but again, it is very small, relatively speaking.

Q: (L) Is there another race of beings that are manipulating or using the Lizard beings?

A: Could you elaborate?

Q: (L) Are the Lizard Beings agents for some other group?

A: Well that is a rather simple question. But, there are levels of authority in 4th density STS environment. And these are determined by intellectual and physical prowess, as always, in STS. The “pecking order” as you call it. So, therefore, we could state that at the bottom are those you are familiar with as the Gray beings, and in the middle are those you would call the Lizard Beings, and above that are others that you are not so familiar with.

Q: (L) Who are they?

A: The most commonly known, of course, are the Orion STS.

Q: (L) What do they look like?

A: They are, in fact, humanoid in structure, resembling large human beings.

Q: (L) And we don't see them that often?

A: Well, of course you know by now, that the ones most frequently seen on 3rd density level, are the Gray beings. All other equally less frequently seen.

Q: (L) Okay, what is their purpose in all this abduction activity?

A: We request that you make your questions as specific as possible in this subject area.

Q: (L) Do these Orion STS ever participate in abductions?

A: The abductions are primarily performed by the Gray beings. However, others can and will and in fact have abducted. But when this occurs, the nature of the abduction is different.

Q: (L) Are there any positive Extra-terrestrials from the area of Sirius interacting with human beings at the present time?

A: Well, now! First off, it is important for you to know that the term you use: Extra Terrestrial, which of course, is one of the most correct terms used at your level, all that is NOT of the Earth is Extra- Terrestrial. And, for those on your surface earth environment to refer to themselves as the supreme species, or alone in the universe, or the one and only in the cosmos, is laughable in the extreme. It is akin to a microbe on a grain of sand referring to itself as the only form of life on the beach. Would it not? Now, when you ask are there any beings in the vicinity of Sirius, it would be something like that same microbe, located on the grain of sand, on the beach, which is, of course, but one of the beaches located on the surface of the earth, after all, asking if there is, in fact, any life located over in the vicinity of that seashell...

Q: (L) But I asked if there were any interacting with Earth...

A: And we are answering that question. We have chosen to take this opportunity to put things into better focus for you, and we are hoping that these messages will be heard by others, and not just you. While YOU may understand these concepts perfectly well, not all do. Certainly you know that? Therefore, that is why we are giving this information. Now, to answer your question: Are there any beings who reside in the vicinity of Sirius who are positively oriented, or STO as it were, again it is difficult to an-

swer that because we do not know how to define the “vicinity of Sirius.” But, if you mean within a light year or so of Sirius, as you measure distance, then we can say there are no such beings in that area in 3rd density. But that leaves open 4th through 6th density. So, you see, as you already know, but we wish to reinforce this, there is so much to contemplate here that it is laughable when those around you refer to certain areas or star systems and claim that there are beings from here or there or wherever, and that their objective is this or that or the other. Because if you knew the TRUE nature of the universe, of All of the universe, of all possible realms, you would also know that any and all things are possible, and, in fact, DO exist! You must NOT forget this.

Q: (L) So, in other words, these people are right?

A: All of these people are right, and all of these people are wrong. Because it is silly to point to some section of the sky, to ascribe any area as being the “Home” of this that or the other.

Q: (L) But what if that is, in fact, the case? The Orions live in some star system in Orion, right?

A: So are you.

Q: (L) Well, we aren’t living there now! [Actually, as I later learned, we DO live in the “Orion Arm” of our galaxy.]

A: That’s not the point. If you were to stay in 3rd density and view your star, which you know as the sun, from another point in your galaxy, it would appear to be a part of the Orion system. Would it not?

Q: (L) Probably.

A: Well, now perhaps you are beginning to understand what we are talking about??? At one level, and in one sense.

Q: (L) Well, how do these beings get here crossing such vast reaches of space?

A: As we have told you, there are seven levels of density which involves, among other things, not only state of being physically, spiritually and etherically, and materially, but also, more importantly, state of awareness. You see, state of awareness is the key element to all existence in creation. You have undoubtedly remembered that we have told you that this is, after all, a grand illusion, have you not? So, therefore, if it is a grand illusion, what is more important, physical structure or state of awareness???

Q: (L) State of awareness?

A: Exactly. Now, when we go from the measuring system, which of course has been nicely formulated so that you can understand it, of density levels one through seven, the key concept, of course, is state of awareness. All the way through. So, once you rise to a higher state of awareness, such things as physical limitation evaporate. And, when they evaporate, vast distances, as you perceive them, become non-existent. So, just because you are unable to see and understand has absolutely no bearing whatsoever on what is or is not possible. Except within your own level of density. And this is what almost no one on your current level of density is able to understand. If you can understand it and convey it to them, you will be performing the greatest service that your kind has ever seen. Think about that for a moment. Let it seep into your consciousness. Analyze it. Dissect it. Look at it carefully and then put it back together again.

Q: (L) What is it that limits our awareness?

A: Your environment. And it is the environment that you have chosen. By your level of progress. And that is what limits everything. As you rise to higher levels of density, limitations are removed.

Q: (L) What creates this environment of limitation?

A: It is the grand illusion which is there for the purpose of learning.

Q: (L) And who put the illusion into place?

A: The Creator who is also the Created. Which is also you and us and all. As we have told you, we are you and vice versa. And so is everything else.

Q: (L) Is the key that it is all illusion?

A: Basically, yes.

Q: (L) So, essentially...

A: As we have told you before, if you will be patient just a moment, the universe is merely a school. And, a school is there for all to learn. That is why everything exists. There is no other reason. Now, if only you understood the true depth of that statement, you would begin to start to see, and experience for yourself, all the levels of density that it is possible to experience, all the dimensions that it is possible to experience, all awareness. When an individual understands that statement to its greatest possible depth, that individual becomes illumined. And, certainly you have heard of that. And, for one moment, which lasts for all eternity, that individual knows absolutely everything that there is to know.

Q: (L) So, you are saying that the path to illumination is knowledge and not love?

A: That is correct.

Q: (L) Is it also correct that emotion can be used to mislead, that is emotions that are twisted and generated strictly from the flesh or false programming?

A: Emotion that limits is an impediment to progress. Emotion is also necessary to make progress in 3rd density. It is natural. When you begin to separate limiting emotions based on assumptions from emotions that open one to unlimited possibilities, that means you are preparing for the next density.

Q: (L) What about Love?

A: What about it?

Q: (L) There are many teachings that are promulgated that Love is the key, the answer. They say that illumination and knowledge and what-not can all be achieved through love.

A: The problem is not the term “love,” the problem is the interpretation of the term. Those on third density have a tendency to confuse the issue horribly. After all, they confuse many things as love. When the actual definition of love as you know it is not correct either. It is not necessarily a feeling that one has that can also be interpreted as an emotion, but rather, as we have told you before, the essence of light which is knowledge is love, and this has been corrupted when it is said that love leads to illumination. Love is Light is Knowledge. Love makes no sense when common definitions are used as they are in your environment. To love you must know. And to know is to have light. And to have light is to love. And to have knowledge is to love.

Q: (L) The other night I met a young woman named Roxanne C____. Can you access anything to help her?

A: At this time we choose to abstain from making any comments about the nature of individuals in your environment. Also, we would strongly suggest, as this has been rather intense information session, that you may wish to terminate at this time.

Q: (L) One very quick question: The problem with my eyes. I have had a lot of trouble with them, using many medicines. Some

people have told me that this indicates a genetic mutation and a developing ability to see on many levels?

A: This you must discover. Before you become frustrated, if, indeed you are going to begin seeing at another density level, it must be a discovery process for the greatest learning potential. For us to give you previews would not necessarily be in your best interest.

Q: (L) Last night we were supposed to meet several people at a restaurant, but we lost them in traffic. Was this “losing” somewhat symbolic?

A: Perhaps. But, again, we do not wish to comment on interactions between yourself and other individuals, as the purpose for this particular session was informational and not judgments concerning others in your realm.

END OF SESSION

3.39 September 12, 1995

Frank and Laura

Q: Hello.

A: Hi!

Q: (L) Who do we have with us this evening?

A: Decorra.

Q: (L) And where are you from, Decorra?

A: Cassiopaea.

Q: (L) OK, now, it's been a while since we've done this on the

board, and I have several questions that are pretty important that I want to ask. Are you open for questions this evening?

A: Yes.

Q: (L) First of all, do Frank or I at the present time have any attachments of a negative nature?

A: No.

Q: (L) Do we have any attachments at all?

A: Variable.

Q: (L) Does that mean they come and go, or they can come and go?

A: Yes to question 2.

Q: (L) OK, yes to question 2. OK, now, there are several new people who have contacted me and want me to do various things for them. In many respects it looks like a very positive involvement, but there have been some very strange things that have happened, and I have been handling them the best way I know how. Can we ask some questions about this situation and how I've handled it so far?

A: Yes.

Q: (L) The first thing is, Roxanne C__. Roxanne has basically got some really good ideas, but I think she's got something blocking her from perceiving what is truly going on. She wants so badly to believe in the fairy tales that she ends up mixing things together in an emotional attempt to deal with it all. This is fine, as far as I am concerned, but anybody who can't look at their own "stuff" is extremely hard for me to deal with. What is the story here?

A: All involved are portals, beware!!

Q: (L) Do you mean beware as in maybe I should just walk away from this group?

A: Up to you.

Q: (L) OK, my instincts...

A: Remember where was initial link?

Q: (L) Initial link? At MUFON?

A: Who?

Q: (L) Martie T__'s?

A: Yes.

Q: (L) OK..

A: Aura field is uniform.

Q: (L) Whose aura field is uniform?

A: All in question, do you not see similarities in your personality profiles reading? Examine, review and reflect!

Q: (L) Come on Frank, ask some questions here. Help me out! Personality profile? Well, that's of the different people involved...

A: Similarities?

Q: (L) Do you mean similarities between the people involved in that group?

A: Aural field reads as identical.

Q: (L) And are their personality profiles and aura readings different from, say, mine and Frank's?

A: What do you think?

Q: (L) What do you think, Frank? (F) I don't know what they are talking about. (L) Well, they're talking about profiles, aural profiles, I guess that's a way of reading a person. (F) Yes, but I... (L) Well, does that mean that Frank and I are so different that there's nobody that we can interact with?

A: Did we say that?

Q: (L) Of course not. OK, so in other words this is a mine-field and we really have to tread carefully through it, is that it?

A: You have been warned, how you proceed from here is up to you.

Q: (L) Does this guy Barry, who keeps wanting me to commit to some kind of deal with him, and who keeps saying he is going to do this and that, is he?

A: The answer to that is easily discernible.

Q: (L) The answer to that is easily discernible? Well, it's hard for us to... I mean, he could be just a Howard Hughes kind of guy! Easily discernible.....In other words, what you see on the surface... would that be what they would mean? Easily discernible....

A: Ask him directly!

Q: (F) You may if you desire... I don't want to! (L) What is Martie after in this whole interaction?

A: \$\$\$\$\$\$\$\$\$

Q: (F): Well, why don't they just say 'Money'? (L) They like to be creative.

A: Mirth.

Q: (L) Gotta have mirth, Frank! What does Barry want out of this whole interaction?

A: To be liked and needed.

Q: (L) What does Roxanne want out of this whole interaction? [Laughter from Frank, response not verbalized]

A: The same as Martie T___.

Q: (L) What does Frank want out of this whole interaction, including the newsletter?

A: Ask him, he is here.

Q: (F) What do I want? I haven't a clue! (L) What do I want out of all this interaction?... read my deepest, darkest recesses!

A: You see the newsletter as a mode of transport to fulfillment of your goals.

Q: (L) And what are my goals?

A: To be the leader of your cause.

Q: (F) Is that true? (L) Maybe. Remembering, of course, that my primary drive is to get the Cassiopaeon material out there and 'save the world,' so to speak. (F) Ask them if it will work. (L) Will it work?

A: Open.

Q: (L) So Martie wants money, Barry wants to be liked and loved and needed. (F) That makes sense. (L) And, is it true that I can utilize the wants and needs of these people to create a vehicle for the cause of dispensing knowledge?

A: But will the "vehicle" ever break down, or "get stuck in the mud". [Laura's note: As events turned out, the whole situation turned very ugly with various persons attacking others and I

opted to step out of it and decline the editorship of the newsletter, the lectures I was asked to give, and a whole bunch of other stuff.]

Q: (L) Should I just get in touch with this publisher that Roxanne knows and just deal with putting the material out in book form?

A: Would not that be: 1) more direct 2) less cumbersome, and 3) less fraught with potential danger?

Q: (L) OK, so getting the material out in book form is...

A: We answered thusly because you thought for yourself.

Q: (L) Is giving the lectures, as I've planned to give this lecture about my personal experience, this is not so much about the material, a good way to promote the Cassiopaeon material and a good way to get out and do things?

A: Lecture?

Q: (L) Well, you know, the talk I'm going to give on Saturday night at the Earth Angels Bookstore, where I'm going to talk to these people about whatever is... basically about our experiences, about synchronicity and the coming of the...

A: Well intentioned crowd, but open to deceptive attack.

Q: (L) Should I cancel this lecture?

A: Up to you. [Laura's note: I did cancel the lecture after I saw the way the people involved were interacting.]

Q: (L) Approximately how many people would show up if I don't cancel?

A: 15.

Q: (L) Fifteen people. Well, it's not worth being attacked for, is it?
(F) I don't know if I would cancel at this point, I'd say up to you,

but, my gut instinct is that it's not going to do anything. (L) Don't waste my time? (F) Well, isn't she [Martie] getting these people to pay her money? (L) Uhuh. (F) Well, then that's what the sum total probably of what you'll get out of it. (L) Yeah, and I only get a third of it, and she's letting some people in free. (L) Has Frank assessed this person Barry in a correct way?

A: See what happens when we plant the seed, then encourage you to "Till the soil?"

Q: (L) So Barry is basically living on his credit, is that it?

A: Open

Q: (L) Well, it's not right for Roxanne to be constantly asking him for money. He is probably giving to her on his credit! How much in debt is he right now?

A: Not your concern. Look, listen, learn.

Q: (L) Well, I think.. I don't want to waste my time with these people then. They are all just playing games with each other. (F) I agree. It's a shame, but it's another deception, which is a form of attack. Leads you down the primrose path to get you all tangled up, to slow down the progress. And apparently it was an excellent idea when you said just contact the publisher and go down that pathway. (L) OK, now, let's ask real quick, this David Hudson tape, about what he calls the Philosopher's Stone. What is this substance that David Hudson has discovered? We watched the video about it; I'm sure you guys watched it with us, so, what is this stuff?

A: Watch developments there only from a distance.

Q: (L) Is taking this substance [monoatomic gold] as he is talking about, is it dangerous, as I kind of think it is?

A: Possibly.

Q: (L) So, in other words, I should not get involved in that, either?

A: Up to you.

Q: (L) I know it's up to me, but you said to watch it from a distance, so I'm assuming that is a clue...

A: Yes.

Q: (L) OK, my feeling is that there is some negative energy behind that, even though he is trying to be a positive person and do positive things, and that...

A: This is often true!

Q: (L) I think that taking something like that to transform your consciousness without doing the work or having it occur naturally is black magic. That's what I think. (F) It's too easy... (L) I think trying to initiate yourself ... (F) I read over the years bits and pieces from various different sources that all the things he described in there are possible for those who are willing to sacrifice, to us would appear to be an extreme extent ethereal and spiritual level, such as some of those in India, and all that... (L) I don't think you even have to sacrifice so much as have the desire and the natural destiny and (F) Well, did Jesus take this gold powder? (L) Did Jesus take this powder?

A: No.

Q: (L) Did Adolph Hitler take this kind of powder, or something similar?

A: Yes.

Q: (F): That paints a rather bleak picture, doesn't it? (L) Could this powder be utilized to transform a person to a very positive entity doing great good? I just don't think it's right.

A: Or could it be utilized to transform an entire race of beings into hypnotic submission !!!!!!!!!!!!!

Q: (F): Wow! (L) Put it in the water. (F) Or even just advertise it as the “Manna from Heaven” and get the biggest corporations in the world to ... I mean, you know that if this guy were not meant to spread this stuff all around, by now he’d be running into roadblocks, you wouldn’t be allowed to get tapes like that. That was one thing I was suspicious of, like why he hasn’t even been stopped, if it’s really as wonderful as... I mean it just doesn’t fit. Anything that’s really, really good, and it’s going to go against the... remember who runs this world, and has for 309 thousand years, are they just going to sit back and say “Oh, yeah, we’ll just let this gold powder get spread round everywhere, and get totally defeated,” just like that? I don’t think so! (L) Oh, that’s a scary thought! Boy, I’m sure glad you guys are out there!

A: Okay.

Q: (L) Holy Frijoles! Well, I guess, unless you have Do you have something you would like to tell us or communicate to us at the present time?

A: Reflect upon messages received and goodbye.

{Discussion follows} (L) Thank you very much.

(F) Once you progress to the level of enlightenment, and you are no longer in these bodies, you don’t need orgasm, do you?

(L) I guess not.

(F): And if it’s not an orgasm, then why call it an orgasm. I mean, he’s saying, “Oh, it’s not the same thing, it’s wonderful, it feels the same...it’s more pure,” and all that...

(L) Right.

(F): BS! I don't buy that. I don't buy it.

(L) I don't buy into the Keys of Enoch stuff either because he starts off right away with talking about the guilt thing...

(F) Naughty, naughty...

(L) and the bad guys have to be transformed. I mean, they just can't deal with the fact that that's the way it is, and it's got to be that way, all the way up, all the way through, all the way around, forever. Dark, Light.

(F) Right.

(L) That's it.

(F) Now, JD doesn't seem to have a problem about that. Nobody had a problem understanding that, but somehow they all thought this was of the light, but I just don't buy the idea that all you have to do is drink this powder, or eat this powder, and you are going to become light beings, and you're going to bi-locate, and all these wonderful things, and just walk on water, and all that. It just doesn't add up. You know, that's, once again, it's a short-cut. And there are no short cuts. End of Session

END OF SESSION

3.40 September 16, 1995

Frank, Laura, Roxanne C

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us?

A: Sorra.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) We have a guest this evening. And we have a few questions that I want to ask before we get launched off into some other subjects. First thing is, I had a pretty sick feeling in response to this whole situation with Martie T__, and I did cancel the talk at the book store she is associated with. I know you are not going to tell me whether I did the right thing or the wrong thing, however, I would like to know if there are any implications regarding this situation that I do not, at present, see?

A: Implications?

Q: (L) Well, in other words, was there someone who would have been there that I should have made a connection with? Did I fail by not going through with it even though it was so distasteful to me?

A: If distasteful, how would you fail by not appearing?

Q: (L) Well, sometimes I wonder if we are not supposed to overcome our emotional reactions to things and just do things that are emotionally distasteful in spite of our own feelings. Isn't that correct?

A: You are aware of the nature of your instincts. The nature of...

Q: (L) What are you trying to tell me here? Am I being dense?

A: What are you always telling others?

Q: (L) Listen to your instincts. Yes. And my instincts told me that this was not a good place to go nor a good group to have any involvement with.

A: Have you not then answered your own question?

Q: (L) Okay. Last night Terry called me and said that on Wednesday night he began channeling the Cassiopaeans directly in his [Buddhist] meditation class. The way he described his experience almost sounded like a physical possession. Can you come through with physical sensations? Was Terry channeling YOU, the Cassiopaeans or a similar source?

A: We must have been watching a different “channel!”

Q: (L) Who was being channeled?

A: Ask Terry!

Q: (L) Well, he said he was channeling YOU!

A: Ask him after a few more sessions.

Q: (L) Is there some danger that can be experienced if one goes to a class and the meditation teacher instructs everyone to stare into a mirror and channel the first thing that comes along?

A: Maybe, but there is some danger in all things at 3rd density.

Q: (RC) You need to find out who he was tapping into. Was it his higher self?

A: Ask him later.

Q: (L) Roxanne has some questions... okay?

A: It is as always.

Q: (RC) I have some personal questions and some non-personal questions.

A: Don't screen, please, that is restriction!!

Q: (RC) Okay. If Aramaic was ancient Hebrew, was it the language spoken in Atlantis?

A: No.

Q: (RC) Did the Hawk, or the Hoovids bring this language to Earth?

A: No.

Q: (RC) By scanning the Zohar, does this mean that the fire letters will ignite ancient memory, thus bringing the truth to the surface?

A: These are “cult thought patterns.”

Q: (RC) It has come to my attention that most of the places where the word for “God” is used in Zohar as well as in the Old Testament, it is used in its feminine form. Does this imply that the Queen of Heaven... who is Isis?

A: Isis is a vanguard.

Q: (RC) What is a vanguard?

A: A symbol of energy patterns that lead transformations of cultures during border periods.

Q: (RC) Is the word “Jesus” derivative of Isis or Zeus?

A: Neither, Jesus is moniker only.

Q: (RC) What is moniker? What do you mean? Don't you have to pray in the name of Jesus for protection?

A: Prayers are not necessary for protection once channel, or more appropriately, conduit is properly grooved!

Q: (RC) The recent movie: “The Prophecy,” produced by Maxwell, is she of the light, and what purpose is behind sending this glimpse of this holographic image to earth now? Will the movie awaken people to the reality of the Holy War? And whose message is being served through this film?

A: Several questions, crisscrossing thought patterns.

Q: (RC) Whose message is being served by this film?

A: What do your instincts tell you?

Q: (RC) My instincts tell me both sides...

A: Okay.

Q: (RC) I just wanted to know if there was any specific force behind...

A: We are?

Q: (L) Oh, they may not be confirming...

A: What do your instincts tell you???

Q: (RC) It was about the fallen angels – Lucifer. (L) have you read who the C's say Lucifer is? (RC) One of the fallen angels? The angel of light? It is a LOT to go through...

A: Before we can answer some things, you must ask other things.

Q: (RC) Will there be another war in heaven between the angels?

A: Assumptions are fun to deal with.

Q: (L) You are assuming that there are angels and that they are fighting a war. (RC) Well, in a metaphorical sense.

A: And you are assuming there is a “heaven.”

Q: (RC) Yes. Are you saying that there is no heaven? No paradise? I don't believe that. (L) There is 5th density. (RC) Well, we are getting into semantics here.

A: “Heaven” is a concept more than semantics. Some think the 3rd density environment known popularly as Leavenworth is heaven, for one example. Could be called “Heavenworth!”

Q: (laughter) (L) This person Barry... [planchette begins to move]

A: Ask we are just energizing. Ask... ask!

Q: (L) Alright, I'm asking! Is Barry possessed????

A: Vague question.

Q: (L) Is Barry attached by discarnates?

A: Transitory.

Q: (L) Does he have a serious case of 5th density or demonic possession?

A: [Spinning] No.

Q: (L) Well, what is the problem with Barry? Why is he saying such terrible things about Roxanne?

A: Not appropriate.

Q: (L) For me to ask or you to answer? Did I do the right thing in this matter?

A: All there is is lessons.

Q: (L) This was a lesson, obviously. I guess it is not appropriate for me to ask any personal questions about him. Maybe it would be okay for you since you were personally involved. (RC) Is Barry a spy?

A: Spy? Clarify, please.

Q: (RC) Is Barry a spy for the Gray aliens?

A: Well, are you aware of the modus operandi commonly employed, and the technical aspects of same???

Q: (RC) Yes. Has he been used by the dark...

A: Define your understanding.

Q: (RC) They spy through implants or CDROM? He absorbs information and then they download it from him?

A: In other words, unconscious manipulation.

Q: (L) Is that it?

A: Now, please reveal your reading on the situation.

Q: (RC) I think he is being used by them unconsciously as well as consciously. (L) My question would be what is the purpose of this activity?

A: One step at a time!

Q: (RC) Is he a spy for the CIA?

A: Assumptions prevail!

Q: (L) Maybe you have assumptions and they are having trouble transmitting through them? (RC) I don't think he is a spy for the CIA.

A: Not the point.

Q: (RC) What is the point?

A: CIA?

Q: (L) Do you mean why worry about the CIA when there are other things to worry about? (RC) Why has everything he has done in my life turned to trouble?

A: These are the questions that prompt reflection, reflection prompts analysis, analysis prompts conclusions, which builds knowledge, which fosters protection!!!

Q: (RC) Will Barry be free of this or will he go for the rest of his life in this darkness?

A: Up to Barry.

Q: (RC) Will he do anything more to hurt me?

A: Are you learning? If you are learning, are you gaining knowledge?

Q: (RC) Well, I know about that but I want to know if he is going to cause me more trouble?

A: (L) What does it matter what he says, if you have the knowledge which protects?

Q: (RC) Well, that's kind of like beating a dead horse here...

A: Network.

Q: (RC) I was shown that I lived in Nazi Germany and I was one of the children used for experiments. I was also shown that I chose this for myself. I want to know why? (L) How were you shown this? In a dream? (RC) Lots of dreams, I have had psychics tell me about it...

A: Learning is best accomplished when the student is not restricted by others.

Q: (L) What do you mean? I guess I should keep my mouth shut.

A: What do you suppose? We do not ask that you "keep your mouth shut," just suggesting helpful guidelines for maximum learning.

Q: (RC) Okay, I KNOW this from a variety of sources. I don't have to explain them all... all I want to know is why. And, I know that my DNA was interfered with and I want to know if that has been carried into my present body and is this being fixed?

A: Physical manifestations normally only carry over in spirit body, and are a discovery process for advancement. They are chosen by the soul during contemplation on 5th density.

Q: (RC) So, that means that what I have been through in this life physically, has been to bring me to the realization of what happened before?

A: Essentially.

Q: (RC) I was also told that there was a woman who was very protective of me during my last life in Nazi Germany. Have I met this soul yet?

A: No.

Q: (RC) Was she a mother or sister?

A: Neither.

Q: (RC) Were we related?

A: No.

Q: (RC) Am I going to meet her?

A: Wait and see!

Q: (RC) What is my relationship to Frank and Laura from any past life connections?

A: Discover.

Q: (L) Did I know Roxanne in my past life in Germany?

A: Maybe.

Q: (L) Now, I was looking at the [astrological] charts, just to see what kind of matches there were and it was a lot. (RC) According to astrology, that shows a past life connection. I feel also that something went on in Egypt.

A: Who were you?

Q: (L) You mean me?

A: Yes.

Q: (L) I was just German woman... (RC) I was wondering about Egypt?

A: But we are still in Germany!

Q: (L) All I know was that I committed suicide, name was Helga, I think...

A: Who was your husband?

Q: (L) I don't know. He was Jewish. Is that what you are getting at?

A: Okay. Who were your children?

Q: (L) Was my husband then the person who was my boyfriend years ago - GM?

A: Not issue.

Q: (RC) They asked who were the children. Was I one of your children?

A: Discover.

Q: (L) What was Roxanne's name in that lifetime?

A: When we say discover, we mean for you to use your given talents to learn, not to have us lead you by the hand every step of the way. If we were to do that, we would cheat you out of an opportunity to gain knowledge, and more importantly, understanding. Thus, we would be abridging free will!

Q: (RC) Was my name Rachel?

A: How do you examine past lives?

Q: (L) Hypnosis.

A: Bingo!

Q: (RC) So, I need hypnosis? Can I be put under hypnosis? (L) I'm sure you can. You told Frank and me about several past lives before...?

A: Because the individual circumstances were not the same.

Q: (L) Who are the "Bird Tribes" talked about in legend and more recently in several popular books?

A: Varies.

Q: (RC) Who are the Hoovids?

A: Transplanetary.

Q: (RC) Did the Hoovids become the Hebrews?

A: No. Hebrews do not stem from single grouping.

Q: (L) Are or were the Hebrews a separate racial group?

A: Not necessarily.

Q: (L) What was the origin of the Hebrew People?

A: Genetic construct.

Q: (L) Who did this genetic construct?

A: Guess.

Q: The Atlanteans?

A: Not that simple.

Q: (L) The lizzies?

A: How about joint effort?

Q: (RC) The Sirians and the Pleiadians?

A: Getting colder.

Q: (L) The Orion Union?

A: Okay, but include C.O.C. How does one restrain density 2 companion?

Q: (L) Chain? Chain of Command? Are there any actual inhabited planets in the Pleiades?

A: Yes.

Q: (RC) What about the Sirians?

A: Yes.

Q: (L) Alright, the Orions created the Hebrews. What was the purpose for which this genetic variation was created?

A: Manipulation.

Q: (L) Who was Yahweh?

A: False teacher.

Q: (RC) Who was Jehovah?

A: Moniker variance of previous answer.

Q: (L) And what was the desired result of the Hebrew genetic manipulation?

A: Further control through the fostering of mistrust and hostility, leading to enslavement and warring. ... Also accomplished renewed and invigorated 3rd to 4th density “feeding.”

Q: (RC) The Tetragrammaton, which is a code for the name of God in the Old Testament, who or what does this code represent?

A: Be careful not to get caught up in ancient deceptions, but ostensibly it “means” I Am The One.

Q: (RC) The “I Am The One,” according to my research, is another word for “Isis.” Let’s ask about the “birth goddesses” talked about by Zecharia Sitchin. (L) Is there such a thing as these “birth goddesses?”

A: Whoa, wait a minute, what did we just advise???

Q: (RC) Don’t get caught up in ancient deceptions? (L) We asked about this once before and were told that it was just the ancient way of describing genetic experiments. (RC) Okay, why is it that Hebrew, being so specific in participles in terms of gender qualities, how come, in the Old Testament, there are feminine connotations for the names of God, and also feminine connotations for God being in HER palaces? As well as masculine?

A: Why not? If it works, do it.

Q: (RC) Is the “I Am The One” a feminine force?

A: My Dear, you seem to be stuck upon gender classifications. Now this is understandable, but prepare yourself for a long winded explanation here, since there appears to be no other way. On density levels 5 through 7 there is no duality. The “God Force” emanates “down” from 7th density and permeates all densities. It recognizes no classifications related to duality, since it is perfectly blended, thus in permanent balance.

Q: (RC) But the gender names are in the original texts?

A: This is true, but the original texts were also deceptive in nature.

Q: (RC) How many children have I been used for that are alien hybrids?

A: To answer this question would alter your chosen path of learning, so therefore must be deferred.

Q: (RC) I have already gotten this in my meditations, so maybe they can help me on it. I have been given names in Hebrew in my recent meditations that have stuck in my head; one the word for “government” and the other for “state” or “politics.” Does this mean that I am meant to be working in politics or for the government? Which government? Is this my destiny?

A: Well, again, we know the answer to that, but must let you discover in order to learn.

Q: (RC) Am I being called to serve? Is it a government on Earth or..

A: One interpretation, but not the only one. Remember, “government” is nebulous, and dreams can be pathfinders and dreams can be warnings!!!

Q: (RC) How many lifetimes have I spent on Earth - I already know the answer, someone told me, I just want to know...

A: 87.

Q: (RC) Not 445? That’s it? So, I’m not really from here?

A: Would you rather we add a few?

Q: (RC) So, I am not really from this planet?

A: No one is, ultimately. Remember, you are eternal, one through three are not.

Q: (L) Did Roxanne have other lifetimes on other planets in 3rd density?

A: Discover.

Q: (RC) I was told, based on the lines in my palm, that I had lived 445 times. So there is a huge discrepancy. (L) Well, you are talking palmistry now, and that is Frank’s bailiwick, you know. He is

the most gifted palmist you may ever encounter. (F) Let me tell you right now, you can't read anything about past lives in the palm. (RC) That's not what this woman says. The left hand is the past, the right is the present. And the lines on the side are like the age rings in a tree trunk. (F) No. Let me explain...

[break for palmistry discussion.]

Q: (L) Roxanne is planning to move to Arizona and has made some arrangements to set about doing this. Is she going to be able to write her book when she is out there and get that accomplished?

A: Open.

Q: (RC) It depends on me. (L) Is she going to be able to find the right house?

A: Open.

Q: (L) In a general overview, what was the purpose of this interaction with the Martie T__ bunch, Barry, J.D., David Hudson, Roxanne, Barbara, etc???

A: You have already gained some insight.

Q: (L) Does Roxanne have any attachments?

A: Discover.

Q: (L) Roxanne went to a psychic, CU, who did a spirit release for her. Was this successful?

A: Why do you wish us to answer that?

Q: (L) It seemed like a good subject to cover, that it might be helpful.

A: Discover.

Q: (RC) What about the dream that I had about the three slugs coming off of me? Were these three slugs Barry, B__ and M__?

A: Energy pattern essence, rather than individuals per se.

Q: (RC) Do I still need spirit release?

A: Yes. Okay.

Q: (RC) How many times have I been abducted?

A: 20.

Q: (RC) Were most of those in childhood or more recent?

A: Both.

Q: (L) When was the most recent? (RC) Within the past 8 years?

A: Yes.

Q: (RC) So most of them were within the past 8 years?

A: No. Just most recent.

Q: (L) Why have they abducted her less than some we have heard about?

A: Less?

Q: (L) Well, some people seem to have a lot more, and 20 does not seem like a lot.

A: Abductions take many forms.

Q: (L) I dreamed the other night that I got married, and there was a big party, dancing, the limousine and so on... flowers, happiness. In my dream, I heard a voice saying that the wedding would be on a Saturday the 14th, following Friday the 13th, could you tell me anything about this dream?

A: No.

Q: (L) Any other questions? (RC) I'm not going to ask because they didn't really answer what I wanted to hear. I do have 3 questions about the past. What was my role during the French Revolution? I know that I was there then because I have glimpses.

A: Who is David Hufnagel?

Q: (RC) David was my first love. Why the name Hufnagel? Was that my name in France?

A: David's original name was Hufnagel.

Q: (RC) That was my first boyfriend in South Africa. His name now is Harris.

A: No, changed his name.

Q: (L) What does that have to do with the French Revolution?
(RC) He was there, right?

A: We are receiving strong wave pattern surrounding subject we chose to cover, thus we interrupted inquiries!

Q: (L) Okay, anything further on that?

A: Moshe in Israel.

Q: (RC) Who is Moshe in Israel?

A: Moshe is IN Israel.

Q: (RC) There are a lot of Moshes in Israel! Is this someone I know or knew?

A: Yes.

Q: (RC) Is it connected to my ex-husband?

A: Maybe. We are not sure. Israel: saw you with grays in physical, access memory, Moshe too.

Q: (L) Do you mean that David Hufnagel saw Roxanne during an abduction?

A: No. Country of Israel. Another connector to abduction experience.

Q: (L) Well, maybe you were abducted in Israel and saw these people there... in the physical... and these people saw it...

A: No. David is elsewhere.

Q: (RC) Is this David my old boyfriend?

A: Yes.

Q: (RC) And that is who I was with in the French Revolution, which is what started all these questions.

A: Maybe.

Q: (RC) Am I going to see him again?

A: Open.

Q: (RC) I was abducted while I was with him?

A: Well yes, but Israel biggest abduction.

Q: (L) R was abducted while with David, but in Israel she experienced the biggest abduction? (RC) I was with him in Israel... and we were together in South Africa.

A: Abduction with David was in South Africa.

Q: (L) What is meant by the biggest abduction was in Israel?

A: Physical retrieval.

Q: (L) Was it biggest in the sense that it was the biggest abduction experience of her life?

A: Yes.

Q: (RC) Was it on Mount Sinai?

A: No.

Q: (RC) I had an out of body experience when I was there. Was it out in the desert, the Negev?

A: Yes.

Q: (L) What was done to her during this abduction?

A: Open.

Q: (L) Who was doing the abduction?

A: Grays.

Q: (RC) Is that when I was pregnant?

A: Yes.

Q: (L) How many times have you been pregnant? (RC) Five, I think. How many times?

A: Open.

Q: (RC) This makes sense because my migraines started in South Africa... I lost my virginity in the Negev... so that is probably when they started abducting me - it's the whole sexual thing, right?

A: Yes.

Q: (RC) And the guy died... (L) That's interesting... Okay, change of subject. Back when we were talking about the pit on Oak Island, and you asked me to do some research on it, the answers I came up with were that the responsible group were alchemists. Is this correct.

A: Yes.

Q: (L) Was one of the alchemists involved Nicholas Flamel?

A: Yes.

Q: (L) Is it true that there is an enclave of alchemists that live somewhere in the Pyrenees...

A: Yes.

Q: (L) Is this the group that you referred to as “The Quorum” in a previous session?

A: Partly.

Q: (L) Do these alchemists use this power as talked about by David Hudson to enhance their longevity and their physical health?

A: And to control.

Q: (L) Are there people in this enclave who live for literally hundreds, if not thousands, of years?

A: Open.

Q: (L) How does this monoatomic gold control others?

A: Too complex to answer tonight, as energy is waning.

Q: (L) Should we just say good night?

A: Good bye.

END OF SESSION

3.41 September 24, 1995

Frank, Laura, Susan V, Roxanne C, Simon B

Q: Hello.

A: Hello. We have been listening.

Q: (RC) Who are you??

A: Vorra.

Q: (L) And where are you from?

A: We transmit via the radio source in Cassiopaea.

Q: (L) Okay, a year ago we talked about the quorum and I did not understand. Now, what I would like to know is, is the understanding I have acquired in the past two weeks regarding this group...

A: You need some review.

Q: (L) Okay.

A: Not just about the “Quorum,” but about many important subjects, and tonight, we intend to have some free flowing energy, if you don’t mind. In other words, we may supersede questions, when appropriate. However, it may be necessary for you to begin the process by asking a question.

Q: (L) I am curious about what I call the “Scottish Question.” Why is it that every time I start a paper trail on any issue of conspiracy, there always seems to be a link to Scotland and Scots?

A: “Celtic,” what does it mean?

Q: (L) Well, the word “kilt” comes from “Celtic,” but no one seems to know where they originated... they just sort of appeared on the landscape, so to speak.

A: Exactly!

Q: (L) Are you going to tell us?

A: No, not just as of yet.

Q: (L) So, there is some interesting connection! (RC) Does it mean “warrior race?”

A: If you prefer! We have close affiliation with the “Northern Peoples.” Why? Because we were in regular, direct contact with them on Kantek, before they were “lifted” to Earth by Orion STS.

Q: (L) If you were in direct contact with them, how come they were in cahoots with the Orion STS bunch?

A: Who says they are in “kahoots?”

Q: (L) Weren’t they rescued by the Orion STS?

A: Yes. But one need not be in “kahoots” to be rescued!!!

Q: (L) Well, if the Orion STS brought the Celts here, they must have brought them for their own purposes, am I correct?

A: Essentially, but herein lies the reason why you need a review. You see, you have some gaps in your knowledge base which are caused by channeling, absorbing and analyzing information out of sequence with what we have given you and mixing it all together!

Q: (L) Okay, what’s my problem?

A: You are doing wonderfully, my dear, but it is difficult for you to keep up this way, because your natural drive for the truth makes you impatient, and therefore you tend to fill in the gaps with simple reasoning and assumptions. While these are often correct, they can tend to allow you to get ahead of yourself.

Q: (L) Okay, square one: Is the quorum composed of humans who have been alchemists, who are presently in possession of a substance called “the elixir of life” and which David Hudson calls “monoatomic gold?”

A: And much, much more! Monoatomic gold is but one minor issue here. Why get lead astray by focusing upon it solely. It would be akin to focusing on the fact that “Batman” can fly! Is that the only important thing that “Batman” does in the story? Is it?

Q: (L) Of course not! (R) Batman fights crime!

A: What we mean is that alchemy is but one minor piece of the puzzle.

Q: (L) Okay, I understand. But, understanding the alchemical connection, and its potential for extending life and opening certain abilities, makes it more feasible to think of a group that has been present steadily and consistently for many thousands of years on earth.

A: They are not the only ones!

Q: (L) Oh! I knew I was opening a can of worms!

A: Let us go to the root.

Q: (L) What is the root?

A: Who, or what made you?

Q: (RC) The Creator. (L) Prime Creator.

A: How? And who is Prime Creator?

Q: (L) Everything, I guess.

A: You are “Prime Creator.”

Q: (L) Well, we know we are... (RC) We are creators, but we aren’t the Prime Creator...

A: Prime Creator Manifests IN you.

Q: (L) Okay, so at the root is Prime Creator.

A: But... who was secondary?

Q: (RC) The Sons of God? The Elohim?

A: Who is that? Remember, your various legends are “seen through a veil.”

Q: (L) Okay, the secondary creators are the ones interacting with us directly?

A: Okay.

Q: (L) Is this the source of the stimulation to discover knowledge?

A: Basically, but, let us take this step by step.

Q: (RC) Okay, getting back to the Celts, were the Pleiadians the secondary creators who brought in the Celts?

A: Review what we have just said!

Q: (L) They said it was the Orions. Are the Orions these secondary creators? (RC) Well, I read that it was the Pleiadians. And the Hebrews were originally the Hoovids who came from Sirius...

A: Here comes a shocker for you... one day, in 4th density, it will be your descendants mission to carry on the tradition and assignment of seeding the 3rd density universe, once you have the adequate knowledge!!!

Q: (L) If the Orion STS brought the Celts here, were the Celts, while they lived on Kantek, in the form they are in now?

A: They were lighter in appearance.

Q: (L) You have told us on other occasions that the Semitic peoples were remnants of the Atlanteans, and yet they are quite unlike...

A: Whoa!! Wait a minute, let's not get ahead of ourselves. First things first. What Roxanne said was not entirely factual. Remember, there is much disinformation to weed through.

Q: (RC) What did I say that was not factual?

A: In this part of your 3rd and 4th density universe, specifically your "galaxy" it is the region known as Orion that is the one and only indigenous home of human type beings... reflect on this! Indigenous home base, not sole locator. What you are most in need of review of is the accurate profile of "alien" data.

Q: (RC) I thought that humans originated in Lyra and then a war broke out there and they ended up in Orion.

A: Lyra is not inhabited. There have been homes in all places, but some were/are transitory, and some are not. Pay attention to Orion! This is your ancestral home, and your eventual destination. Here is the absolutely accurately accurate profile of Orion to follow: This is the most heavily populated region of your Milky Way galaxy! This is a region that extends across 3rd and 4th density space for a distance as vast as the distance between your locator and it. There are 3,444 inhabited "worlds" in this region. Some are planets as you know them. Some are artificially constructed planetoids. Some are floating space barges. And some are "satellites." There are primary homes, travelling stations and incubator laboratories all in 2nd, 3rd and 4th densities. There are overseer zones in 5th and 6th densities. Approximately one half is STO and one half is STS. Together, along with many other colonies, located elsewhere, this is called, in translation, Orion Federation. Orions created grays in 5 varieties, as cyber-genetic beings, and installed them on Zeta Reticuli 1, 2, 3, and 4, as well as on 2 planets orbiting Barnard's Star. The Reptilians also inhabit 6 planets in the Orion region in 4th density, and are owned by the Orion STS as slaves, and, in some cases, pets!!! The name

“Orion” is the actual native name, and was brought to earth directly. Study the legend of the “god” of Orion for parallels.

Q: (L) Are the Orion STS the infamous red-headed Nordic aliens?

A: Yes, and all other humanoid combinations.

Q: (L) Okay, if it started with the Nordic types, and that is where the other humanoid combinations came from, what genetic combinations were used for human beings? Black people, for instance, since they are so unlike “Nordics?”

A: The Nordic genes were mixed with the gene pool already available on Earth, known as Neanderthal.

Q: (L) What was the genetic combination used to obtain the Oriental races?

A: Orientals come from a region known in your legends as “Lemuria,” and are a previous hybridization from 7 genetic code structures from within Orion Union, designed to best fit the earth climate and cosmic ray environment then existent on earth.

Q: (L) Okay, what about the Semitic and Mediterranean peoples?

A: Each time a new flock was “planted,” it was engineered to be best suited to the environment where it was planted. Aryans are the only exception, as they had to be moved to earth in an emergency.

Q: (L) If races are engineered on earth to be “best suited,” what factors are being drawn from or considered regarding the Semitic race?

A: They are not engineered on earth, but in Orion lab as all others. They were “Planted” in the Middle East.

Q: (L) What genetic type were the Atlanteans?

A: They were the same as the “Native Americans.”

Q: (L) What were the roots of the Native American type? Was there a basic type that was here on the planet and was then taken to an Orion lab and genetically modified and then planted?

A: No!!! Have you been paying attention?!?!

Q: (L) What did I miss? Why do some Native Americans believe they come from the Pleiades?

A: Where are the Pleiades?

Q: (L) Well, near Orion. (RC) Oh, okay. So, they are considering the Pleiades part of Orion. What about Sirius?

A: Sirius is confused as a locator because it appears in similar location in the sky in the northern hemisphere. The American Indians were confused in the translation because of similar seeming location due to vantage point.

Q: (L) Okay. (RC) Well, but Sirius is clearly Sirius! It's the brightest star in the sky... it's in all the legends! (L) Well, it could be that it is not just misinterpretation, but deliberate disinformation? (RC) How could it be translated wrong? This is not clear! The star charts are very specific!

A: How have YOU translated YOUR legends wrong?

Q: (F) I think the point is that it is clear that we, in our present culture, are easily able to get things very wrong, even from the more recent times; so it is not a great consideration to think that the more ancient legends can also be distorted, embellished, and misrepresented.

A: Review what we said at the beginning of this session.

Q: (L) Did the Dogon come from Sirius?

A: All humanoid types originated in Orion region, there are and have been and will continue to be literally millions of colonies.

Q: (RC) Well, Sirius has a green sky, not a blue sky like we do. (L) The star?! (RC) Well, no, the planets... Yes, Sirius has a green atmosphere... a light green. (F) Well, I prefer blue! (L) If a lot of the information that is being propagated these days is confusion or disinformation, what is the purpose of all this?

A: You answered yourself: Confusion and disinformation.

Q: (L) I have a theory that the truth, in any large degree, will not be known until just prior to some sort of transition...

A: You expect “truth” then?

Q: (RC) Absolutely! (L) Considering how things are from observation, this may be unrealistic...

A: All there is is lessons, no short cuts!

Q: (L) I want to get back on my question that you have not answered... I want to know who, exactly, and why, exactly, genetically engineered the Semitic people, and why there is such an adversarial attitude between them and the Celts and Aryans.

A: It is not just between the Jews and Celts, if you will take notice. Besides, it is the individual aural profile that counts and not groupings or classifications. But, to answer your question: there are many reasons both from on and off the planet.

Q: (L) Why was Hitler so determined, beyond all reason, even to his own self-destruction, to annihilate the Jews?

A: Many reasons and very complex. But, remember, while still a child, Hitler made a conscious choice to align himself with the “forces of darkness,” in order to fulfill his desires for conquest

and to unite the Germanic peoples. Henceforth, he was totally controlled, mind, body, and soul, by STS forces.

Q: (L) So, what were the purposes of the STS forces that were controlling Hitler causing him to desire to annihilate an entire group of people?

A: To create an adequate “breeding ground” for the reintroduction of the Nephelim, for the purpose of total control of the 3rd density earth prior to elevation to 4th density, where such conquest is more difficult and less certain!

Q: (L) Do you mean “breeding ground” in the sense of genetic breeding?

A: Yes. Third density.

Q: (L) Did they accomplish this goal?

A: No.

Q: (L) So, the creation of the Germanic “Master Race” was what they were going after, to create this “breeding ground?”

A: Yes.

Q: (L) And, getting rid of the Jews was significant? Couldn't a Germanic master race be created without destroying another group?

A: No.

Q: Why?

A: Because of 4th density prior encoding mission destiny profile.

Q: (L) What does that mean?

A: This means encoding to activate after elevation to 4th density, thus if not eliminated, negates Nephelim domination and absorption. Jews were prior encoded to carry out mission after conver-

sion, though on individual basis. The Nazis did not exactly know why they were being driven to destroy them, because they were being controlled from 4th density STS. But, Hitler communicated directly with Lizards, and Orion STS, and was instructed on how to create the “master race.”

Q: (L) And they were going to use this as their basis to introduce a new blend of the Nephilim... (RC) And the New World Order... their version of it. (L) Well, what is the plan now?

A: We cannot tell you this yet, as you would seek to reveal it prematurely, leading to your destruction!!!!

Q: (F) Yes, Laura, I keep telling you that your curiosity is going to bring strange men to the door who are going to say: “Come with us, please!” (L) Well, I can’t help it! Meanwhile, back to the Celts: obviously if the Lizard Beings thought that the Aryans/Celts were a good breeding ground for this “Nephilim Master Race,” then it must be because there is something genetically inherent in them that makes them desirable in this sense. Is this correct?

A: No, not in the sense you are thinking. We suggest that you rephrase this question after careful reflection on the implications.

END OF SESSION

3.42 October 7, 1995

Frank, Laura, SV, Nova M

[The tape from this session was destroyed and this is the best reconstruction possible from the notes. The answers are exactly as given, but the questions are as close as I can remember them. The ones I do not remember are left blank.]

A: Hello.

Q: And who do we have with us this evening?

A: Tomorria of Cassiopaea.

Q:

A: Channel.

Q:

A: No, it is just merely the point at which we must review for you the modus as opposed to the locus. You have begun to lose sight of the fact that Cassiopaea is a channeling point for three level density transfer, not our “home,” as such.

Q: (L) The constellation of Cassiopeia is the third density level transfer point?

A: Yes, but 3 level, not 3rd level. And kindly please excuse young one, as is risky at this point!!

Q: [Child is sent to bed.] (L) So, you are saying that Cassiopeia is the point where three density levels converge?

A: Yes.

Q: (L) I have thought about my question from the last session and I want to ask it this way: You have said that Hitler received instructions from higher density beings about creating a ‘Master Race.’ Why were the Aryan genetic types seen to be more desirable for creation of this Germanic ‘master race?’

A: Both similarity and ancestral link most unblemished from Orion 3rd and 4th density stock.

Q: (L) So they were essentially trying to breed a group of people like themselves?

A: Yes.

Q: Didn't it occur to them that they could do this more easily?

A: Not point. How would you suggest creation?

Q: (L) Okay. They were preparing this breeding ground, so to speak. Obviously this was for the introduction of some other genetic strain. What was this?

A: Nephilim.

Q: (L) Well, if the Nephilim are coming in ships, 36 million of them, why bother to create half-breeds here?

A: Yes, but having an "advance party" makes 3rd density conquest much easier.

Q: (L) So, this Master Race was supposed to get everything ready...

A: Yes.

Q: (L) Okay, what is it about the Semitic genes that was considered to be so undesirable in the creation of this 'Master Race'?

A: Would blemish genetic characteristics inclined to ruthlessness and domination.

Q: (L) So, you are saying that there is something, some genetic tendency or set of genes in the Semitic type that would counteract this?

A: Close.

Q: (L) But isn't the nature of a person determined by their soul and not the physical body?

A: Partially, remember, aural profile and karmic reference merges with physical structure.

Q: (L) So you are saying that particular genetic conditions are a physical reflection of a spiritual orientation? That the soul must match itself to the genetics, even if only in potential?

A: Yes, precisely.

Q: (L) So a person's potential for spiritual advancement or unfoldment is, to a great extent, dependent upon their genes?

A: Natural process marries with systematic construct when present.

Q: (L) Well, if that is the case, and the aliens are abducting people and altering their genes, can they not alter the genes so that higher level souls simply cannot come in?

A: Not incarnative process, natural biological processes. Incarnative involves strictly ethereal at 5th density and lower, and thus is enveloped in triple cycle "veil" of transfer which is impregnable by any means. However, any and all 1st, 2nd, 3rd, and 4th processes can be manipulated at will and to any degree if technology is sufficient.

Q: (L) Getting back to what you said at the beginning, is it possible that all other channeled material that is designated as this or that 'alien group' comes through a 'transfer point' and then is corrupted so that the person receiving it believes that it is from an actual alien race?

A: Yes, remember, Matrix material, like all others, contains confused concepts at some points. Antareans, Arcturians, and Casiopeans refers more to the transfer locator for channel groove rather than residence. Some have come in after the fact and planted fables regarding "races" of beings living in, and traveling from, various places as referenced from your perspective.

Q: (L) Well, who are all these groups giving this information?

A: Many different groups and individuals. Now, there are indeed actual residential locators mentioned in various writings which are factual. Orion, obviously, Zeta Reticuli, Rigel, Barnard's Star, Sirius Region, though not the actual astronomic body as mentioned.

Q: (L) Who are the 'Orange' aliens mentioned as being the 'Council of Nine?'

A: Orange is reference to hair color.

[Personal Questions and answers for Nova M redacted]

Q: (L) Now, we have wondered about obtaining and taking some of this Monoatomic Gold.

A: Are you serious? How about some small helpings of arsenic, anyone?

[NM leaves.]

Q: Question about upcoming UFO conference, whether we should try to go or not.

A: We have message for you, but if NM must leave, no need to hold her back, as message is for group. Review:; what did we say about weather. Why do you suppose "Opal" occurred at time, place reference point?

Q: (L) To put a stop to the UFO conference in Gulf Breeze? Does this mean we ought to stay home?

A: Up to you, but, suggest deferment, we could tell you of titanic battle!!!!

Q: (L) So, hurricanes are a reflection of battles at higher levels? Did the good guys win?

A: Yes, but not concluded, and we fear for those drawn to locator because of sinister plans by 4th density STS.

Q: (L) Plans such as what? More weather phenomena or something more direct?

A: Both, several options open to them, and in works; monstrous hurricane to hit during conference, or tornado strikes Embassy Suites hotel, or bomb blast levels conference center, of mass abductions and mental controls initiated in order to cause dissention and possibly violence, followed by extreme factionalization.

[Strangely, in a weird sort of way, the above sounds very much like the events of 9-11 and all that followed, though the location and context is different. One wonders if this was a bleed-through of that future reality in some sense? After all, 9-11 was still six years in the future at the time of this session and if it was already in the planning stage, it may have been that the venue and MO had not been entirely finalized.]

Q: (L) So, there is the possibility that something really positive could come from the connections made at the conference. Was this directed at us specifically?

A: Yes, why do you suppose it has been disrupted as of now? And have you noticed that the hurricanes have been increasing in October, rather than decreasing as would normally be true?

Q: (L) Well, then, I guess we will be staying home.

A: Free will.

Q: (L) Okay, that's it for tonight. Good Night.

END OF SESSION

3.43 October 14, 1995

Frank, Laura, Susan V, Terry and Jan, Tom K

Discussion about “Matrix Books” preceded start of session. Laura had just been lent copies of them from Roxanne C...

Q: Hello.

A: Hello. Matrix material.

Q: (T) Matrix material?

A: Yes.

Q: (T): Who is the person who did this? (L) Many. It’s a compilation of many things. There are a lot of people who did the Matrix material. (T): Does it say that somewhere? (L) Yes. (T): Because I haven’t looked at any of it yet. (L) One guy has edited it together and arranged it into about 4,000 pages or so... (T) 4,000 pages, and we’ve only got 300? And we can’t edit it (ours)? And he did 4,000? (L) Well... (SV) It took him fifteen years. (T) When was it written? (L) The last one came out in 1992 or 1994. (T) When did the first one come out? (L) 1988. (F) A lot of it is just copies of documents and stuff... (L) Like photocopies of newspaper clippings and stuff like that, but it’s arranged in quite a comprehensive order. (SV) A lot of it is really scary. (L) I want to ask about one thing from the Matrix material. I want to know who and what are the “Esseseni?”

A: Hybrids, new.

Q: (L) They are new hybrids? And what are they a hybridization of? What are the sources of the material for the hybridization?.

A: Humans and grays.

Q: (L) Are the Esseseni positively oriented beings, as has been

suggested by some?

A: Split.

Q: (T): Some STS, some STO?

A: Yes.

Q: (L) OK, now we have a visitor this evening, my brother, and he is really just kind of on the periphery...

A: Tom Knight.

Q: (L) And he is just on the periphery of this subject, more or less, but he does have a couple of questions he would like to ask, and one of the questions is: has he himself ever been abducted by aliens in this lifetime?

A: Complex.

Q: (L) Complex? OK, then does that mean yes or no? I know it's complex, but...

A: Ships are vulnerable to ELF and "Zero time transfer."

Q: (L) So, are you suggesting that any abductions that took place, took place while he was on board a ship?

A: Maybe.

Q: (T): Were you in the Navy? (L) He's retired. (T): How long? 20 years? That's a long time! What did you serve on, what kind of ships? (TK): AEGIS Cruiser, I was just on one ship, that was just the last five years or so... (L) He spent almost his entire Navy career on land, which is quite a feat. (T) Yeah, that is pretty good! Were his abductions... did they take place while he was on the ship, on the cruiser? I know that's what you said, I'm just clarifying...

A: We see "Bahrain."

Q: (L) We re you in Bahrain? (T) Somewhere in the Gulf? (TK) We were only in Bahrain one night. (T) That's all it takes! (L) Like getting pregnant, you know! It only takes once! (TK) What did those suckers do to me? (L) He wants to know what they did!

A: Examine. You must remember, different branches of your military services have underlying code mechanisms to determine their classification status for "secret" duty, including study of personnel, this is all very complex... Now, "U.S. Navy is status 2", which means among other things, that it is married to a class 2 "Cooperation Agency", the O.N.I. All technical personnel are approached during their service, and asked to perform tasks for secret government. If they accept, they are "brought under classified management."

Q: (T): Whoa! (L) What was that class 2 term? Class 2 agency? (J) U.S. Navy is status 2.

A: No. Classified management. And it is O.N.I.

Q: (L) Carry on with your answer. I'm sure there's more.

A: ???

Q: (L) Oh, you want us to ask the questions. Why was he abducted. (J) Or was he abducted?

A: Examined, as with all others on ship.

Q: (L) So, in other words, it was simply... (T) Your standard abduction and examination... OK, what was the whole thing about the O.N.I. and Naval intelligence... and the classifications and all that stuff about being approached, what did that have to do with the abduction?

A: Nothing.

Q: (L) That was just information they were giving us. (T): Was

the Navy aware of what was happening?

A: Segmented.

Q: (T): They knew some, but not all. (TK) Some know and some don't.

A: Yes.

Q: (T): That's what I meant, did the Navy know that Tom was abducted? Those that were supposed to, did they know?

A: Some in Navy are cooks.

Q: (SV): Cooks wouldn't have a high information...(T) That's what Steven Segal said in "Under Siege" - "I'm just the cook, you know!" He wasn't really a cook. (L) Maybe that was an allusion to that movie. (T) Could be -some are "cooks". (L) Was that an allusion to that movie?

A: No, but we like it!

Q: (TK): They like the movie, huh? (J) They like the reference! (L) OK, back when I was really little... (TK) I WAS a cook in the Navy in the beginning... (L) Yeah, I think it's funny that they made that reference. (J) That was mirth. (L) When I had that experience when I was really little, and I know that there was interaction with an alien, and that I remember it clearly in my conscious mind, and my brother was there also in the room, was he also abducted at that time?

A: No, but why leave subject so fast? (L) OK, they want to talk about the Navy, obviously. OK, we can talk about the Navy. (TK) What about ol' Tricky Dick W__? F. Richard W__ (L) Who was he? (TK) He was just one of my captains.

A: What about him?

Q: (L) You have to ask specific questions, because it's like a computer system, it only answers when you key in the correct questions. Ask a specific question. (TK): Why do they want to stay on the subject of the Navy? (T) OK, you gave us some information about Navy being connected to Navy Intelligence... (J) Wait a minute, what about W___, ask about W___. (T) ...and the way things are there. Is it... are we asking more about the information you just gave us? We'll get on W___ in a second. Are we supposed to be asking more about what you just gave us? About the Navy and Naval Intelligence?

A: Ask what you please.

Q: (T) OK, what is it, they gave us Navy connected to Naval Intelligence... (L) Are all military personnel routinely abducted and studied by aliens?

A: No.

Q: (L) Are all military personnel routinely abducted and studied by the military itself?

A: No.

Q: (L) What is the classification that the person has to fall into in order to be abducted and studied by the military?

A: What makes you think "classifications" correlates with abductions?

Q: (TK) It's not the classification, it's gotta be the type of person... (J) And how easy it would be...

A: Yes.

Q: (TK) And how easy it would be to influence....

A: Of course.

Q: (TK) How easy it would be to influence, also? (J) It's gotta be case by case...

A: And many other factors.

Q: (TK) It would have to have something to do with what they could do for the abductors. I mean, they have to be in a position to help them... (T) Just exactly what I was trying to phrase as a question. (L) Is that a correct assumption?

A: Yes. STS.

Q: (T): STS; Service to Self..

A: Vibrational frequency.

Q: (L) OK, so if the person has an STS vibrational frequency, that already predisposes them to abduction. Is that correct?

A: Some.

Q: (T) OK, that's a factor. There's more than one agenda involved with abductions. Are the military personnel that are being abducted, is that a specific agenda that is being followed?

A: Artificial classifications, such as military designations, are important to human groups only.

Q: (L) So in other words... (J) I've got a question. Isn't it true that in order to become part of the military, you have to go through boot camp, the indoctrination to the point where you're going to follow orders without questioning, and that that mind-set would lend itself more towards... (TK) The Marines are about the only ones that even try to get people to follow orders without question any more. The Navy has all but given up on that. (J) That's interesting. I didn't know that. I just assumed that all military. (TK) Well, it's not a time of war so it's not necessary right now.

A: Yes. Some have always "faked" such blind allegiance anyway.

Q: (J): Ooh, interesting statement. (TK) I basically faked it, I... (J) Kind of like, go with the flow?

A: You were not alone.

Q: (TK) Oh, yeah! There were a bunch of us. “Yeah, sure, tell us what to do. If it’s in our interest, if we’re going to stay alive, we’ll do it; if you’re going to kill us, forget it!” I used to tell them on the ship, that if those suckers ever catch me, I’m going to tell them everything I know. I said, they aren’t going to have to torture me long...

(T) Besides, when you torture me, I tend to scream a lot and not tell you too much, so I’ll just tell you and let’s skip the torture.

(TK) So when I refused to go up for ESWS, I was kind of an outcast, I wasn’t in the club anymore...

(L) What happened?

(J) : That’s when you were asked, and you said no?

(TK) When they wanted me to go up for ESWS, it’s a pin, and I told them I wasn’t going to ...

Q (L) What is it?

(TK) Enlisted Surface Warfare Specialist.

(T) Aha, that’s when you were asked!

(J) And you said no.

(TK) That’s something that everybody in the Navy can go up for, but you have to be ... I don’t know, If I hadn’t been thinking about getting out, I might have gone up for it. This captain put it in such a way, he said, “Well, if you’ll work on your ESWS and get that pin, I’ll see to it that you get good marks and make chief...”, which to me was like saying, well, if you don’t do it, you’re not going to

make chief. I said Sorry, bud! Sorry, I'm not going to do it, I don't respond to that kind of stuff. (L) It must be genetic! (TK) That's when I became an outcast from the club. (T) Is that when Tom became an outcast?

A: Not correct concept, not outcast, just deemed not SG material.

Q: (L) What's SG?

A: Secret Government.

Q: (TK) Darn! (J) You had your chance Tom, and you blew it! (T) That's when they asked you. (TK) Oh! Dickie, I'm sorry! (J) No, you're not! (TK) Never did like ol' F. Richard! (J) Yeah, let's get back to F. Richard. (L) F. Richard... (TK) Was F. Richard initiated? Was he one of the secret government agents?

A: No.

Q: (L) Was he brownnosing to try to get there?

A: Was a "conduit."

Q: (L) He was a conduit for them. (TK) Tell you what, F. Richard was one person I would not have wanted to go to war with...

A: There are several steps that must be followed.

Q: (L) Steps that must be followed for what? (T) To become part of the secret government?

A: Yes.

Q: (J) You have to know the handshake... (T) I can't get my foot in my ear, I'm sorry! (laughter)

A: Viet Nam MIA's, where do you suppose they are now?

Q: (L) Well, I'm hoping you're going to tell us! (T) Some of them... (TK) Have they been abducted? (T) Some of them got blown up

so badly that they couldn't be found, so they were listed as MIAs, because they couldn't mark them as KIAs. Some of them are deserters, some of them... well, deserters would fall into several classifications, which I won't bother getting into. Some of them went into the drug trade. (TK) Some of them just decided they liked it better over there. (T) Yeah, there's that, and some of them, I would imagine, have been either abducted or swapped, moved into the secret government. (L) Is all of this correct?

A: Yes.

Q: (T): That's why they can't tell people where they are... (TK) Are we supposed to still be on the military subject? (J) Who knows?

A: KIA's... Are a Separate subject!! KIA's, how many really were?

Q:(T) How many of the 60,000 really were killed? How many of them are listed as dead when they're not? Intelligence... (TK) Tell you what, they could recruit... There were so many different kinds of people that went over there, they could have recruited a bunch... (J): Yeah, that's true. (L) OK, now, are you going to give us a hint as to where they are and what they're doing right now? Are these some of the people working in these underground places?

A: Yes..Yes...Yes.

Q: (L) That's where those personnel are coming from... their lives, they have died the philosopher's death.

A: And many other places, times. etc...

Q: (TK) Wars all through the ages. How many are we talking about? (L) What kind of a number are we talking about here?

A: Since your imagination center is on low frequency tonight, suppose we have to spell it all out for you, but at least it is fun to watch the impact, like "A ton of bricks" falling on your heads!!

Q: (L) Go ahead, spell it out for us. How many are we talking about here?

A: W.W.II, 72,355, still alive where????

Q: (L) Is that the correct figure?... (T) Now, wait a minute...

A: Yes.

Q: (T): That's how many people the secret government has snatched up? (J) From W.W.II. (SV) That's not talking Korea... (TK) That's out of something like 40 million... (L) Frank, how many? (F) Total People in W.W.II was 70 to 80 million... (TK) Military casualties... . we're not talking about just U.S. military, either, we're talking about total, anybody.... (T): Are you talking about total... all killed in action in W.W.II? (L) No, they said... read it.... (J) "W.W.II, 72,355 still alive. Where???" (L) Still alive! (T) That were supposedly killed in action...

A: Yes.

Q: (T): From all branches of the service.

A: Yes.

Q: (TK): These people aren't aging; they're still in action and ready to go...

A: Precisely, my friends!!!

Q: (J) OK, that's just W.W.II...(TK) How about Korea, Vietnam, etc... (L) All right, what's the figure from Korea? (TK) What difference does it make? (L) Well, that's true! (SV): We want to know.

A: 6,734.

Q: (TK) Yeah, considering the fact that I don't think we really lost that many... (T) No, we didn't have that many losses in Korea.

(TK) How about the Gulf War?

A: Yes. 55.

Q: (T): Yeah, there was about 55 thousand casualties in Korea, in the four years of Korea. Really it was 3 1/2 years in Korea. So 6,000 means about a little over 10% of them aren't really dead.

A: 23,469.

Q: (L) What was that? (J): Vietnam, that was Vietnam.... (T) 23,000 of the 66,000...

A: Yes.

Q: (T): ...are still alive?

A: Yes.

Q: (T): So you've got 23,000 from...

A: Some are body duplicate soul receptacle replacements.

[Change in tape sides; first few sentences of next question segment were lost.]

Q: (T) They're moving big time fast right now. (J) They have just around 100,000 with those three figures they gave us. (T) Well, now, that's just three wars. We didn't ask about...

(TK) That's three wars. That doesn't count... (J) How about WWI, how about Gulf War... (TK) Well, the Gulf War, there weren't that many casualties... (T) About a dozen. (TK) But the other side did...

(T) Yes, we're only asking about the U.S. How about others? Yes, you're right, how about other military...

(J) We have no way of knowing. Have they ever released figures? We don't know.

(TK) They've got a military right now, and it's not just a military, these are elite. I'll bet you, they're elite. I mean, they've been recruited.

(J) They've been asked the question, and they said yes!

(T) Yes, this is not some guy hunking a gun in a foxhole just for the heck of it. These are specialists.

(TK) The CIA was siphoning people off in 'Nam right and left.

(T) Yes, and a lot of these squads that are running around don't exist. A lot of this stuff..

(TK) Yes, like these Black Ops, whatever they call it, and all this stuff. This "New World Order" is about to come about. You know what, there isn't any way to stop it.

(T) Oh, no, we can't stop it.

(TK) You can fight back and try to survive on your own, but there's no way to stop the New World Order.

(T) The only way to get through this is the old Lao Tzu or whoever, the Chinese military philosopher, who said "The wheat stalk that survives is the one that bends with the wind."

(TK): "Yes, I'll do whatever you say."

(T) There's no way to stop it. All these people who are talking about going out and going to fight it, they aren't going to fight it. They can't. They can't win.

(F) Well, they are already being diverted.

(TK) On top of everything else, these are the elite. I mean, these are the ones that have been recruited, and they are the elite. Now, most military organizations are going to fall right into this, because the government.... Admitted, there's gong to be a lot of

deserters from the military, I mean there's some people, like, if I was in the military, and they started rounding people up in the U.S., I'd say, "Sorry, this is where I came in..."

(T) This is why this Koernke guy up in the Michigan militia group has been talking about the foreign UN troops, because the military, the government that's ready to come into power, this one world government knows that you can't subdue any country with their own troops.

(TK) It can't be done.

(T) That's why they're sending American troops to all these other countries.

(F) And all the other countries are sending troops here.

(J) Well, what about the guy who wouldn't put on the U.N. uniform?

(T) Yes, that was mentioned in the paper again today, in passing. This guy knew.

(TK) Well, really, the only thing a person can do is like you were saying, go with the flow... Basically, you've got to. Up to a point, at least.

(T) It's easier to fight it by going with the flow than it is to fight it by going against it.

(F) Who is going to stand up in the line of fire and say "I refuse!" They'd blow him away...

(TK): What, if anything, can be done about this "New World Order?"

A: Too complex to answer, need specific questions.

Q: (T): I want to ask a couple of questions off the subject, on a

different subject, and then we can get back to this. I want to see Tom sit over here. He's tuned on this. He's catching the answers before they spell out. I want you to come sit over here, if you want to. But not right now, I want to ask a couple of questions first. This is off the subject, we'll come back to it later. A few weeks ago, at Luc's meditation, did I channel you guys?

A: Well, you channeled, but we must warn you that some soul groupings and aural frequency vibrational associations can leave one open to less than STO influences...

Q: (T) But was it you... was it us?

A: Up to you to discover.

Q: (L) OK, thank you. Now, second question, what is Judy C channeling?

A: Rape victim.

Q: (T) OK, she's channeling a rape victim? (J) Or she is a rape victim?

A: Both.

Q: (T) Are the lizards influencing her in some way?

A: Yes..

Q: (T) Is she possessed?

A: Open.

Q: (T) Well, she's got the whole slew... **Q** (L) They said she's channeling a rape victim, that's pretty much possession... (T) That's what the lizards want... (L) Sure, they are the ones that leave people wounded, so these kinds of things can happen, you know, like going up to somebody and cutting them open with a knife, and then sprinkling dirt and bacteria on it so they can get infected.

They do it to the soul level ... (T) Is there anything that we can do to help her? (L) Terry, you know better than to ask something like that...

A: Judy must follow her own path.

Q: (L) Now, read that back, what they answered the first question about the channeling... you channeled someone... “You channeled, but we must warn you that some soul groupings and aural frequency vibrational associations can leave one open to less than STO influences...” (L) That’s what I wanted to get... Some soul groupings and aural frequency vibrational associations - In other words, be real damn careful who you hang out with when you get in that situation [meditation, opening up]... (T) In other words, you’re referring to the rest of the grouping involved with working with Luc. (J) Including Judy and anybody else...

A: Open.

Q: (L) They’re not going to tell you what to do, (T). (T) Well, I know that... I know that. That’s why I keep my shields up solid in there. (L) OK, now, is that it, or do you want to ask more about that? (T) Should we stop doing the work with Luc? (J) They’re not going to tell you....

A: Up to you.

Q: (T): OK.... (L) But remember... stop Everything! Hold everything! It just jumped in my head, whatever, remember when I asked the question, and it was the time you guys called on the phone that night, and we were talking about... (T) quitting the job... (L)... and I was saying, is he going to get into the financial soup? Because I was worried about your income, because you had quit that job. And I was concerned about that, is he going to get into that soup, and they said, “Soup comes in all flavors!” And, if you think about it, having the time that you’ve had available,

not working, and seeking to fill this time with various activities, can be in a sense jumping into a chicken noodle, or minestrone, whatever. (T) Very good point, yup. (L) All right, Tom are you ready to take a turn? Let Terry have a rest. (J) That's a very good point, because his job was what kept us from being able to do it, because he wasn't available to do it.

[Tom sits at the table.]

(L) A ha, I see. All right, Tom, the thing is to just place your fingers very lightly on it... like this... just two fingers in contact. You keep the contact firm enough, but not too heavy to weight it. OK, now, the question you had asked was "Is there anything that can be done about... is there anything you can do about this New World Order business. So think of some specific questions.

(J) I want to get back to that body duplicate soul receptacle replacement thing... (L) OK, hang onto that, we'll get back to it, don't let it get away.

(TK) I can't think of a specific.. I mean...

(L) How about, should people move into groups in isolated areas?

(J) We've gone through that, it's old territory..

(L) I mean, that's, you know, an opening... an opening question. You can go from there. What is the primary focus that one should...

A: We have already answered...

Q: (L) We know that, but we're just looking for an opening for questions here. (TK) What was that? (J)'We have already answered... (L) We know that, it's in the transcripts. (J) A long, long thing about that. (L) It doesn't matter where you are, but who you are, is what they said. And that is pretty much what you were saying, it doesn't matter about the abduction, it only matters who

you are. (TK) Are most of the survivalists kind dangerous? The kind you should stay away from?

A: Off the mark..

Q: (L) In other words, they're off the mark, they don't understand, it's a spiritual question.

(TK) They're looking at the wrong thing.

(T) Also, right now, if you're considering survivalist groups, you have to keep in mind, they're under attack right now.

(TK) Oh, yeah, the government's after them.

(T) Between Oklahoma and this thing with Amtrak out in Arizona, militias are under heavy attack.

A: Being lead in to a trap.

Q: (L) I suspected that at one time. They're all being led into a trap. (T) Well, they've got guns right now... (J) Maybe guns aren't going to change anything...

A: Good intentions.

Q: (L) They've got good intentions... (TK) Started off with good intentions... They've got to be infiltrated, and it's been tainted at the very least.

(J) Maybe it's the idea of putting all the ones together with the same mind set so you know where they are.

(T) Their usefulness to the One World Government people has come to an end. It brought the conservative grouping into power in this country.

A: Not yet.

Q: (TK) Their usefulness isn't over yet, but... (T) Well, there's usefulness and there's usefulness... (J) But getting close. (L) OK, in those terms, what is the single most important thing that we as individuals should focus on in order to prepare ourselves for whatever events may occur? (J) Follow your own path...

A: No single thing.

Q: (TK) Is what Terry was saying earlier, like the thing... with the reed bending and going with the flow, is that the idea?

A: Close. Watch, look, listen.

Q: (J) Got it, knowledge is power. (T) I gotta tell you, from the Cleveland experience, if you let your mind wander, you end up in a very bad position. (J) Pay attention. (T) Even if there's a lesson... boy, I learned that one quick!

A: Alertness.

Q: (L) And that does not involve anesthetizing your mind with anything. (TK) Probably wouldn't hurt if you had any guns or anything, to keep them hidden, would it?

A: Messengers are all around. Look, listen.

Q: (L) Well, can I ask, what was the particular thing that... I mean, just out of curiosity... (TK) Is it going to be necessary to stockpile supplies, or anything along those lines? (L) That's all in the transcripts.

A: Third density.

Q: (L) That's third density thinking. (J) Guns aren't going to help. (TK) I'm not really worried about that. No, they're not going to help, but... (T) Does Tom know what third and fourth density is? (L) Yes. Is there any particular reason why Tom is here tonight,

or came tonight? I mean, I know he has an ostensible reason for coming down, but is there any other underlying reason?

A: Look, discover.

Q: (L) OK, guys, let's take a break, my back is getting really stiff. Can we, or do you have something you want to get right now? (TK) Jan had something. (L) OK, you wanted to do about the... Is your hand sweating? (TK) Uhuh. (L) That's interesting. That's some of the heat, huh? (J) Yes, they said that the...

A: After break.

Q: (T): Ask them how many Civil War veterans were taken?

[BREAK]

Q: (L) OK, guys, we're back. Hello. Terry wants to know, are there any Civil War veterans or killed in action involved in this scenario that we were discussing earlier?

A: Tom energy fragmented by ritual. [Laura gave Tom Reiki initiation during break.]

Q: (L) So should he sit out until his energy settles down... We did the Reiki initiation. (F) Oh, that's where you disappeared off to? (L) OK, you sit out until your energy stabilizes, and I would suggest that you sit there and put your hands on yourself and make that energy flow to get all the little electrons flowing in the same direction. (TK) I thought it was going faster with him over there anyway. (T) Well, we've been doing it for a year now... (F) Whenever anybody new comes in, it slows down. (T) It usually takes awhile to build it up. (F) That's normal. (L) OK, now back to Terry's question. Are there any Civil War individuals involved in this project, these underground tunnels or bases or whatever? (T): KIA's of the Civil War?

A: A few.

Q: (T): Well, the farther back you go, the specialties weren't developed. But a specialist is a specialist, no matter what the war.

A: Not point.

Q: (L) I think the point is who they are. Now, in the Matrix material, there's a section extracted from the L. Ron Hubbard teachings that talks about technical abilities to jerk people's souls out of their bodies, insert other souls, reprogram the memories, essentially that there is no congruency...

A: False.

Q: (L) OK, so the jerking out and the manipulating of souls as described by L. Ron Hubbard is false? In a general sense?

A: Yes.

Q: (L) OK, now, you said a moment ago that some of these bodies were used as receptacles, soul receptacles. When you say soul receptacles, do you mean soul receptacles for whom?

A: Replacements for dead bodies, i.e. duplicated.

Q: (L) So, in other words, they make replacements for dead people and put their souls in a replacement body, so that they can continue living on, is that it?

A: Yes.

Q: (L) Do they ever use dead bodies and re-animate them and then put other souls in them?

A: No. (T): Now, wait now, you're saying some of them... I'm lost now. (TK) Is there a limit to how long they can be dead? (L) They make...

A: For example: a soldier is KIA, his body is duplicated, his soul is replaced into new body, then he is "reprogrammed for service"

to aliens and S.G. [Secret Government]

Q: (L) Where does the new body coming from? (TK) Cloned, basically. (SV) I would think so...

A: It is duplicate of old body.

Q: (T) Where do they get the duplicate? (L) Where do they get the material for the duplicate? I know that's a dumb question, I know the answer.

A: TDARM.

Q: (L) OK, that's it. (J) It's in the air, same thing. [TDARM is Trans Dimensional Atomic ReMolecularization] (T) Otherwise known in Star Trek as a 'Replicator'. (TK) Does somebody have to die in a certain way before they can do this?

A: No.

A: (TK): Is there a time limit on how long they can be dead?

A: No.

Q: (T): Well, because when your physical body dies, your soul body continues on. Your soul doesn't die, so they always have it. (L) They don't want to take your body out of the graveyard, because they're not concerned about the body.

A: Zero time.

Q: (T): Because there's no time... (L) They use the frequency vibration of the soul pattern, they take it into another density, use their TDARM technology to cause a molecular re-assembly; in other words, the atoms begin to whirl and assemble around it in the pattern that it had before, and then it is a full-fledged body, and then they insert it back through the time doorway into 3D again. Is that correct?

A: Close.

Q: (T): Are all these [listed] KIA's, are they dead KIA's, when they go, that you were talking about? I mean, are they really dead?
(TK) Were they dead when this was done?

A: ?

Q: (T): OK, you said... let's use Vietnam. You said there were 23,000 KIA's of the 60,000 that actually were not killed in action. True? Yes?

A: Were killed, then reanimated.

Q: (L) We're not talking about physical bodies here, are we?

A: Yes.

Q: (L) OK, there are some that were killed in action that the actual bodies were reanimated? (J) As long as they weren't blown up in a land mine, yeah. (L) There were actually bodies that were actually reanimated, is that correct?

A: Some, but most were duplicated.

Q: (L) Now this leads to the immediate question: Is there some potentiality that is created by dying in a violent manner; i.e., in war, in an atmosphere of war, that makes one susceptible to this particular type of activity, as opposed to just people dying in an ordinary sense? (J) Negative energy...

A: No.

Q: (T): No, because violent death like that, we have violent death all the time without being in a war; car crashes, fires, explosions...

A: War makes covert actions so easy.

Q: (T) Well, no, it's not like car crashes, the violent part of it, I don't think has anything to do with it. It's just that the cover of a war, is easier to take the bodies. What I'm trying to understand...

(TK) They're not wanting people to realize ... They're not wanting to just take them out of the graves, because if you did, it would be more noticed.

(T) These are real bodies, they were dead. In other words, the people were dead, they were taken, and reanimated, or... (L) Some were reanimated bodies... (T) ...some were remolecularized... (J) If they were messed up... (L) Were some of these bodies taken, like dead bodies of somebody who just died... were the bodies picked up, taken into another density for this remolecularization patterning?

A: Yes.

Q: (L) OK, so they had to have an actual body for the pattern. (T) Was the original body... (TK) Did they actually get the bodies before anybody actually... (T) Before they were recovered, yes. Were the original bodies returned once the duplication was done?

A: More than one type of situation.

Q: (L) So, in other words, it could be sometimes, yeah, they were, and sometimes, no, they weren't. (J) It would be case by case. (T) Were some of these supposed "killed in action's" actually not killed? Were they still alive when they were removed?

A: All possibilities.

Q: (L) So this is in a sense a "crime of opportunity." (J) It's a supermarket of opportunities. (T) Some were just taken by the secret government when they were alive, some were dead and brought back in new bodies to continue on, and they were considered

dead, but they're all considered dead. (SV) Laura, what about the "Triple Veil" when you go to 5D?

A: Taken by aliens, not SG. Secret Government aware to some extent, but not in control of operation.

Q: (L) OK, now this brings up the question about... We were told that there was, and this was... last week we asked about this thing about the death... and we were told that there was an impenetrable triple veil that prevents some of this "L.Ron Hubbard" type of activity, that he describes happening. How can this be reconciled? Well, the explanation that I see is that it happens that they do this before they go into the tunnel, into the light. They catch them in the transition before they go to 5D. Is that correct?

A: Time adjustment.

Q: (L) Does that mean that they know that they're going to, and they go back in just before they die, or just at the moment of death, or...???

A: Close.

Q: (T): Now, what are the aliens doing with these bodies? With the humans that they replicate and duplicate and reanimate? What are they doing with them?

A: Serve them.

Q: (T) So these humans are becoming servants for the aliens?

A: Workers.

Q: (T) They're slaves. (L) Now, this leads me to a question that I have thought about asking on many occasions. In terms of finite numbers, how many of these STS aliens of any different group, or any combination of groups all together, do we have operating on this planet at the present time?

A: Specify.

Q: (L) OK, how many Lizzies are operating on the planet?

A: 300,000.

Q: (L) OK, how many Oranges?

A: 62,530.

Q: (L) How many grays?

A: 2,750,000.

Q: (L) This is not a pretty picture! (J) No s**t. (L) Are most of these inhabiting alternate dimensions or densities most of the time? I mean, it would be kind of crowded otherwise!

A: Back and forth.

Q: (J): Just like they said in the very beginning. (T) When you asked how many of them are here; in third density? (L) On the planet...

A: And others.

Q: (L) I didn't specify the density. Just in our immediate planetary area. (T) That's how many of them are working this project. (L) Now, I'm sure that there are... here, hand me this little booklet here. We have here some drawings of supposed alien servants. This one right here is called a Rigelian servant. [The booklet says] It's a proto-synthezoid, in other words, a cyber-genetic. Is this an accurate representation of this being, and does this being actually exist?

A: Yes.

Q: (L) Well, that's friendly. (SV) Which one is that? [Looks at drawing.] Oooh, I don't want to see him... (L) Now, this one here...

(T) Oh, lightning bolt man!. (L) Does this one actually exist? This mutative clone form?

A: Yes.

Q: (L) OK, this one here, this little Tah-hay being...

A: Yes.

Q: (T): ET! (L) OK, they said he was real? Yes. OK, now this one is a real pleasant looking fellow... [S'pth]

A: Yes. Occupies Dulce base.

Q: (T): Can we make it easy and just ask if everything in the book is real? (L) No, because if there's anything, I want to put a note on it. [Reading] "This is a cloned synthezoid form," in other words a cyber-genetic, "whose specific job is to act as controllers. They are plus or minus four feet tall." This is, I think, your standard gray. It's just that the drawing is kind of crappy-looking. (T) Wait, the face... the eyes are smaller on the thing but the face is a lot like the one in the Autopsy film. (L) This is a lot like what I had in my bedroom, only all swathed in black. OK, now, this is what they call a replica. [Reading] "They are proto-synthezoid form of human whose specific job is as a special outside agent. Observation: Face and body change shape at will." This is like in the X-File thing where the guy... the shape changer. Is this a correct concept? Is this basically a... I mean of course you have to draw them in an ambiguous way...

A: Close.

Q: (L) Is there anything you can tell us about this in particular? Any hint or clue?

A: ?

Q: (L) OK, we'd have to ask questions. OK, these are the servants

from Zeta Reticuli One... (T) Are these the Men in Black?

Q: (L) No, remember, the Men in Black... (T): OK, just thought I'd check... (L) Just cross- checking here... (T): Terminator Model IV here... Mr. liquid metal. (L) OK, these servants from Zeta Reticuli One... this is another version of the one. I would also assume that these are the servants at the Dulce base?

A: Laura board. [Laura was holding book and did not have her fingers on the planchette.]

Q: (L) I'm assuming that this is another version of the ones that occupy the Dulce base. Is that correct?

A: No.

Q: (L) What are these guys?

A: Floaters.

Q: (L) OK, these are floaters. Let me just comment so that... (T) Floaters? As in how floaters? (L) I would say it was like somebody in a job... (T): Trouble shooters, they go from place to place... (L) OK, these are real friendly looking. .. I love these guys! (T) Are those the "Blues?" (L) The THROOB! (T) Are these the little short stubby blues that Whitley was into.. (L) Plus or minus four feet tall... Yeah, I think so. It says here "They are originally from the Draco Constellation and their job is to complete research. They are plus or minus four feet tall. Are these accurately represented here, both in terms and drawing?

A: Yes.

Q: (T): Are these the ones that Whitley Strieber has seen?

A: Maybe.

Q: (L) OK, now, the degenerative clone form, which is the bottom image, is this also an accurate representation?

A: Close.

Q: (L) What is the color of the skin of these friendly- looking little guys?

A: Variable.

Q: (L) OK, I think there may be one more... Ha, ha! Are you guys ready for this one? This is a Cassiopaeian! (T) Well, I don't think that's a Cassiopaeian! (J) Let me see... Oh, lovely! (T) Cassiopaea, I couldn't find a star called Cassiopaea... (L) There isn't. (T) Well, I know that. (L) Well, he's being sarcastic. OK, this is one called "a race of insectoids from Cassiopaea, whose specific job is genetic research". Is this an accurate description and drawing of this critter?

A: Yes.

Q: (T): Is Cassiopaea a star? (L) No. (T) What is Cassiopaea? (L) It's a constellation. (T) I know it's a constellation, but they say they're from Cassiopaea. You can't be from Cassiopaea... (L) Oh, right, that's right. What star in Cassiopaea?

A: Region.

Q: (L) It's in the Cassiopaea region. Is there any star in particular that you would identify as their home star? They have to have a planet with a home star somewhere, so where is their home star?

A: No.

Q: (L) They don't have to have a home planet? In other words, they could be riding the wave? (SV) Well, are they coming here? (L) Are these guys coming here?

A: All are already.

Q: (L) OK, hang on... (T): What about the one below? What's the one below? (L) Well, that's just a biological android. "The Nordics and Oranges normally use inorganic, high-tech servants." Is this an accurate representation of an inorganic, high-tech. ..

A: Yes.

Q: (T): What are all the hieroglyphics? (L) It's supposed to be one of their alien languages. What does this business say here?

A: Scrambled.

Q: (L) It's scrambled. So it's a combination of the various different languages they have back there.

A: Yes.

Q: (L) Somebody just put the various different symbols together, because it looks like two or three different languages. OK, well, that answered those questions.

(SV) Laura, are you going to get a copy of that for us? (L) Yes, I'll make copies for all of you. (SV) That's so if I meet one of those guys in my dreams, I won't get scared... Well, I won't be AS scared! (J) Speaking of being scared...

(TK) Doesn't seem to me like there's too much to worry about... (T) It's all supposed to be fun! (L) Yeah, they've told us it would be ecstasy dealing with it. (T) This is fun! It's a challenge, and we're supposed to enjoy this as the challenge that it is. (TK) Seems to me it's something you've got to take as it comes, and deal with it! (T) That's about it. (J) Roll with the punches.

A: Yes.

Q: (J): Speaking of being scared, I've had a couple more situations where I wake up screaming and have no idea why. Any input to that? I've had that happen about two or three times.

A: Discover.

Q: (L) You've got to do hypnosis. They've been saying that a lot lately. That's what they told Nova M. over and over again... Discover, discover, discover. Did she tell you anything about the session? (T) The session? No. (TK) Are we asking all the wrong questions here? (J) Naaah!

A: There are no such.

Q: (J) There are no wrong questions. (L) I guess whatever occurs to you to ask, as you wind your way around through the maze, trying to get to the heart of it, is appropriate. I mean, what occurs to you to ask? (J) It's all knowledge... (T) Whatever comes to you is something you should ask. (L) Once you read the entire transcripts... Now, I really shouldn't have given it to you the way I did. I should have edited out all diddles. Because you could have gotten to the meat of it. But, you've got to go through some of that because... (J) It's all part of the learning process. Even the garbage is. (L) Yeah, because, you know, there'll be two pages of somebody asking questions about their own personal stuff, and then all of a sudden there'll come three or four paragraphs of such tremendous impact that you just kind of go "Oh, my god"... (T) As you read through the personal stuff, there's information there, too... (L) There's stuff buried there, too... (T) There's all kinds of stuff in there... (J) I don't think you can edit it out, Laura, to be honest with you... I think Andrew was right, just leave it right as it is.

(TK) But what can... are there questions you can ask, and answers you can get that will make a difference one way or the other? (J) Just keep asking, I guess. (T) Well, really, what we end up doing is just shooting a lot of different questions out until we get something where we're getting answers, and then we work on it for a while, until we can't handle it any more... (L) Sometimes, we don't even know what's going to open a door. Some of the most

innocuous questions have opened the door to some of the most incredible information which has blown us away.

A: Ask.

Q: (L) So ask. (T) Go ahead, there's no such thing as a wrong question. The thing is, we all ask questions that turn out to be silly. We all get embarrassed, so don't worry about it. They handle that real well for us.

(TK)I don't know, this seems like... what difference does it really make, knowing some of this stuff? (J) Because just being aware of it... (TK) Being aware, yeah, OK, I can understand. (J) Sometimes, that's all there is... (L) Also, they've told us, that the more knowledge we actually accumulate, it actually changes your frequency and adds volume and bulk and power and force to who and what you are, at a fundamental level. Not physically, but psychically. In other words, when you come up to some... if you are a person who's full of knowledge, I mean, what does it say in the Bible? "My people perish for a lack of knowledge..." and it says, "you shall know the truth, and the truth shall set you free." And the more knowledge you have, the bigger you are, in a cosmic and psychic sense, the more powerful you are, and...

A: Suggest more questions about the goings on at underground facilities. Jan and Terry were visitors involuntary when went to Albuquerque and Las Vegas!

Q: (J) Oh, really! (T) Read it back, I lost it after visitors. (L) You were in an underground base? (T) We were in a front door of an underground base. We were in Carlsbad Caverns, and I know that there's a government facility at the other end of it, and they won't talk about it. (J) Is that what they mean? (T) You're talking about Carlsbad?

A: Abducted.

Q: (T): When we were in Albuquerque?

A: Yes.

Q: (J) And Las Vegas? (T) When we were in Las Vegas, also?

A: Met alien there.

Q: (L) Oh, you met an alien when you were in Las Vegas! (J) Does that have anything to do with the fact that the pictures didn't come out from our wedding?

A: Barfly.

Q: (T): Ohhhhh... (J) I know exactly what you are talking about.

A: Disguised humanoid gray species four. Rigelian. Orion union STS.

Q: (T) Why did he talk to us? Why did he approach us? I know exactly...

A: Spying on you and aural frequency reading, had you not been as strong, would have suffered permanent abduction because of your studies

Q: (L) Now, right there is a point. Everybody take note of this. What is there about strength that makes one inaccessible to permanent abduction?

A: Strength is of character, i.e. if STO candidate, not likely to be victim.

Q: (L) Not likely to be victim... OK, but what.. (T) STO candidate... (L) I know, but that's... it says when... well, what is it that makes a person... We know that it means being an STO candidate, but what is the thing inside one that stops them... I mean, is this something that is a core ingredient of certain human beings? Is this

like something inside them that blocks this manipulation and victimization?

A: Soul pattern.

Q: (L) So in other words, there is something about us, or within us, that literally they cannot touch or harm, is that correct?

A: Basically, but difficult to facilitate.

Q: (L) OK, in other words, this is something that is in us, that creates an inherent barrier, but not necessarily something that we can, at this level of density, reach in, grab out as a weapon, and wave around, as in facilitate?

A: Can, but intricate to do consciously.

Q: (L) Is this some quality or ability that we can work at? I don't think meditation is the answer, this is something that I've come to think... Is this a state of focused awareness, whole body awareness, internal and external, basically whole body awareness... (J) Going with instinct...

A: Helpful.

Q: (L) Is there something we can do to develop this to the highest degree possible, while in these bodies, in this density?

A: Wait for 4.

Q: (L) Wait for 4? 4th density?

A: Yes.

Q: (T) We can't develop it ourselves, but if we... (J) We can start the process... (T) It's a case of not developing it, it's a case of that, if you can do it, it does it all by itself, you don't think about it... (L) It's an innate thing... (T) It's a do, it's an involuntary, it's there, it works when it needs to work. Is this the idea?

A: Network western experiences for learning purposes please. Knowledge is protection.

[Briefly, Terry related the story where he and Jan met the barfly at Vegas World, after having gone downtown to get their marriage license. They had taken a taxi to City Hall, and foolishly decided to walk back to the Strip, in 116 degree weather. They made it as far south as Vegas World, and stopped at the bar inside to cool off. Jan was close to heat prostration, and the barmaid gave her glasses of iced water and an iced towel to put on her neck. They were getting ready to go back out and hail a cab back to Bally's, when they were approached by the "Barfly," who started asking all sorts of personal questions, and seemed to be acting drunk when he wasn't really intoxicated. He became belligerent when Terry refused to show him his Florida drivers license, but switched to disorientation when Terry made the statement "We don't have a problem, here, do we?! Everything's cool, everything's OK! I'll buy you a beer?" While staring the guy down and putting the force of his personality behind the question/statement.]

Q: (T) Before we get too far into this, I want to ask them where we were taken. Because after that, as far as I know, nothing else happened. We just went on about our business, and we didn't see him again... (L) In this story that Terry has just recounted, what instant represents the turning point of resistance?

A: The statement.

Q: (L) What statement? (T) "We don't have a problem, here, do we?! Everything's cool, everything's OK! I'll buy you a beer?"

A: Yes.

Q: (T): Because that's when he got confused... (J) You totally nullified the... (SV) Yeah, from the glaring and staring at each other...

(T) He was escalating this to a point, and I don't know, it just came to me that the best way to do this was to just stop it right there...

A: Grays and their associates are thrown off by energy flow diversions or thought pattern interruptions.

Q: (SV) That's exactly what they said in Matrix I! (T) Another thing that comes to mind while I'm thinking about it, before it turned ugly, he was leading up to going someplace. (J) Very vaguely, but yes. (T) He was leading up toward, "We ought to get together and go someplace." I think that's when I really shut the whole thing off. (L) OK, now, in this episode where Terry and Jan were taken to an underground base, can you identify the location of the underground facility?

A: Socorro, NM

Q: (J) We were in Socorro, weren't we? (T) We went through Socorro... We stopped at the geological school. (L) OK, what was done to them when they were in this underground facility?

A: Quick exam.

Q: (T) Did we pass? I'm not good on quick exams! Which of the nights in Albuquerque was it we were taken?

A: Second.

Q: (T) We got there Friday afternoon, that would have been Saturday... (L) Who was in charge of this base, this facility? What group?

A: Orion Union STS.

Q: (T) Why did they take us? I know, a quick exam, but why? Because we happened to be there, and we were close by? (L) They said a minute ago because of your studies. (T) Well, they could have taken us in Florida.

A: Yes.

Q: (L) They said because of your studies. Well, you happened to be near a base, I guess. Not everybody goes to these bases, you know, these underground facilities. They get taken to ships.... (T) Did we get taken to the base because we happened to be close by at the time when they grabbed us? Was it an opportunity for them?

A: Close.

Q: (T) Did they know we were coming out there?

A: Yes.

Q: (T) Why did they follow up with a spy afterwards?

A: Test.

Q: (T) What kind of test? (J) I think we passed... (L) I think that if you'd failed, they said a minute ago, you'd have been permanently abducted.

A: Already answered.

Q: (L) It's an aural reading... read the section back about aural reading... (T) You mean that what they were looking at was to see whether we were STS or STO?

A: Partly.

Q: (L) And if they had been permanently abducted at that point in time, what would have happened to them?

A: Body part utilization.

Q: (T): You mean I'd be part of some - body? (TK) Basically, what that means is that you wouldn't have been any good to them as a person, but the parts would have been all right. (T) Well, if they would have taken us and utilized us as body parts, but they didn't

take us... (J) They couldn't take us because you were strong... (T) So they took us... what was the purpose of the examination beforehand? I know, quick exam, was it to find out whether our body parts were good? I'm trying to make... get the connection between the... because there was no reason to... If they had taken us... (L) If they had taken you, why didn't they keep you?

A: Too complex to explain in this forum.

Q: (L) In other words, we're really getting tired here. I do have an idea about that. Is there not something internal that prevents them from going too far during an abduction, i.e. like maybe, if you want to call it that, a guardian angel or protective energy, and then they try to put an implant in, and then create a situation where they can bypass that... Oh, I know! Is this what Michael Topper was writing about in his article, "Channels and the Positive/Negative," where he talks about the "obedience factor" of the STS? If they can get you to obey something, you have given your permission.

A: Close.

Q: (L) This article is so... OK, I think we're going to close up for tonight, because we're so whipped... are you whipped? (F) Well, I'm tired, yeah. (L) OK. Is there anything you want to say to anyone before we close up the shop for tonight? Is there any message for Tom, who is getting ready to go back up North tomorrow? Or for any of us in general?

A: No.

Q: (L) Anything you want to ask before we go? OK, then, we'll say goodnight, and we thank you for being with us.

A: Good-bye.

END OF SESSION

3.44 October 21, 1995

Frank, Laura, SV, LM [Laura's husband at that time]

Q: Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Yzgorra.

Q: (L) And where are you from, Yzgorra?

A: Cassiopaea.

Q: (SV) How do you pronounce that name? (L): Wy-za-gorra? Is that correct, would you pronounce the "Y" as an "I" ?

A: Yes.

Q: (L) OK, We would like to ask our questions.

A: Remember, Cassiopaea is our transmission point, not our home.

Q: (L) OK, we remember. We were talking just a few minutes ago about the symbol that appeared that was similar to a crop circle on LM's] driveway, and we would like to know if you can access for us the source of that symbol. Who put that symbol there?

A: Grey alien species number 4.

Q: (LM) What made them come to my house?

A: Complex.

Q: (L) Can you just give a little indication? We won't go into it too deeply, but, just a little indication?

A: No.

Q: (L) Is there some significance to this that we should ask it at a later time?

A: Up to you.

Q: (L) OK, why can't we know this?

A: Too complicated for receptors.

Q: (L) OK, was this sign put there, just in a general sense, as a wake-up call to LM?

A: No.

Q: (L) Was it put there as a warning?

A: No.

Q: (L) Did the putting of it there manifest a certain energy at that location?

A: Maybe.

Q: (L) Did the putting of that sign there, or the interaction of that event cause changes in his life? Or stimulate changes?

A: Vague.

Q: (L) Well, let me put it this way, were the changes in his life shortly after that, as a result of that interaction?

A: Interrelated, not causative.

Q: (L) OK, was anybody abducted at that time?

A: Open.

Q: (L) OK, they're not going to tell us any more about it. (LM) What does 'open' mean? (L) That they're not going to tell us any more about it. (LM) Why? (SV) It's too complicated... (L) It's either too complicated, or it's something you can't hear right now because

it would violate your free will to know it in advance. (LM) Well, if it was either, some of it was, they'd say yes or no. See what I'm saying? (L) It's not that simplistic. OK, we want to talk about the... Well, let me ask this - am I right in the feeling that I have that living out in that area was for me, how do I put it, a very transformative experience?

A: Not because of locator.

Q: (L) Well, I have very often had feelings that there were, like, some real unpleasant spirits in that area. hanging around there. Am I correct in that? Real unpleasant energies...

A: Do you suppose said entities are restricted by 3rd density constraints.

Q: (L) Well, no, so what does that mean?

A: Discover.

Q: (L) OK, are you saying that such entities as I felt were present there may not have been just specifically located there, but it was possible for them to be anywhere?

A: Maybe.

Q: (SV) That's probably what the Lizzies thought about us! (L) Well, I want to check that out. They'd probably just stomp us. (SV) Well, the Nephilim do...

[Break for coffee]

Q: (L) We're back. I want to talk about the Roswell video that we've all watched. Now Terry continues to insist that it was not Roswell, that there's something... He just can't get into it. I would like to know if that video is of alien beings that were retrieved from the crash of Roswell.

A: Yes.

Q: (L) OK. Why did so many people report seeing aliens that had only four fingers and [toes], you know, like the standard greys?

A: Multiple subjects.

A: OK, so there was more than one type of alien on that one craft?

A: Yes.

Q: (L) OK, the story that came from the camera man who shot the video was that there were these four beings. One was dead, and three were standing outside the craft, crying and clutching boxes to their chests. Is this an accurate...

A: Yes.

Q: (L) What were those boxes?

A: Storage of translation matrix group to individual, emotion stabilization units.

Q: (L) What is a translation Matrix?

A: Translates foreign thought patterns, not needed except in emergency loss of electromagnetic grid wave.

Q: (L) OK, what is an emotion stabilization unit used for?

A: Variety of uses, mostly for survival by neutralizing thoughts of harm by emotionally charged beings, not accustomed to shocking turn of events.

Q: (L) Were the harmful thoughts that they were designed to neutralize, thoughts of other beings?

A: Yes.

Q: (L) Well, they didn't work very well, did they?

A: Did not have chance to activate.

Q: (L) OK, so if they had had the opportunity to activate these boxes, they would have been more or less able to extricate themselves from this unpleasant situation?

A: Not extricate, lessen negative aspects.

Q: (L) OK, how many beings were in this particular craft that crashed?

A: 21.

Q: (L) How come the reports say there were only four?

A: Reports are suppressed and fragmented, as far fewer individuals witnessed interior of craft!!

Q: (L) OK, was this two crafts striking each other, or was it one craft malfunctioning?

A: Two.

Q: (L) OK, it was two craft hitting each other? Is that correct?

A: No.

Q: (L) There were two complete craft that came down?

A: Bouncing off ionized waves between two craft traveling in tandem.

Q: (L) OK, was one of these craft totally destroyed?

A: Yes.

Q: (L) And all the beings in the one that was totally destroyed were incinerated, or blown to bits, is that correct?

A: Close.

Q: (L) Did some of them eject?

A: 4th density.

Q: (L) OK, they knew it was coming and they went into 4th density?

A: No.

Q: (L) They were 4th density beings, and therefore when they blew to bits, they disappeared, is that it?

A: Close.

Q: (L) OK, now of the 21 that were in the craft that was captured, so to speak, there were four outside the craft when it was approached, is that correct?

A: Yes.

Q: (L) Then that would mean that there were 17 inside... Of these 21 beings, how many were greys, the standard grey lizzie-probe type being?

A: Most.

Q: (L) Were there other kinds of beings in there?

A: Human.

Q: (L) There was one human in there also?

A: 5.

Q: (L) There were 5 humans inside? So we have... (LM) Why? (L) Why were those humans in the craft?

A: Retrieval and study specimens, two big foot types.

Q: (L) Does that mean that the humans that they had in there were retrieval and study specimens, or otherwise known as abductees?

A: Deceased.

Q: (L) Oh, they were dead humans. Wonderful. Did they abduct them dead? Or did they abduct them alive?

A: No.

Q: (L) Did they abduct them alive and then kill them?

A: No.

Q: (L) Were they dead as a result of the crash?

A: No.

Q: (L) Well, then, what's the story here, I mean, what other choices do I have?

A: Retrieved.

Q: (L) Ohh, these were beings that had been retrieved at death and remolecularized? Is that what you are referring to, what we discussed before?

A: 3rd density.

Q: (L) Were they remolecularized in third density? Is that what you are saying?

A: Retrieved in 3rd density.

Q: (L) OK, tell me once again what it means for a being, a human to be retrieved.

A: Picked up after expiration.

Q: (L) OK, so they picked up dead bodies, is that it?

A: Yes.

Q: (LM) Why? (L) To study them. OK, did they plan to reanimate these corpses?

A: Open.

Q: (L) Do they ever pick up dead bodies, you know, right after, and reanimate them?

A: Yes.

Q: (L) When they pick them up and reanimate them, do they reanimate them with the souls that left them? Do they like, catch the soul and put it back in?

A: No.

Q: (L) When they reanimate them, do they reanimate them with an alien soul?

A: Multiple possibilities.

Q: (L) If they reanimate them, is it possible to reanimate them with no soul?

A: Yes.

Q: (L) OK, when they reanimate them with no soul, do they have kind of like a zombie-like situation?

A: No.

Q: (L) Well, could you give us a little more information on this particular aspect? If they reanimate them with no soul, what is the animating force or energy?

A: Indistinguishable from other humans.

Q: (L) They're indistinguishable from other humans. (LM) How is that possible?

A: Technology makes all things possible!!!

Q: (L) Of course, you are talking about 4th density technology?

A: Yes.

Q: (L) Now, a reanimated corpse that has been animated by infusion of some form of an energy pattern... (SV) Is it ‘chi’ energy, maybe? (L) What if the reanimated corpse dies again, I mean, you have got to understand here, that we perceive the soul as being the animating force of the physical body, and when the soul is gone, the body dies. Is that correct?

A: You are making assumptions based on limited data.

Q: (L) OK, well, will you expand my database by telling me how a corpse can be reanimated if not done by a... if not with a soul?

A: Complex technology, using electronic bio-generation frequency matching, combined with extremely high frequency radio beacon transmitters for tracking and control of all functions, including thought pattern mimic and emotional frequency vibrational rate modulation!!!!

Q: (L) If they’re doing this, does it make the physical body...

A: Yes.

Q: (L) The blood, the heartbeat and everything...

A: All functions, including cellular, duplicated.

Q: (SV) What about the aura? (L) Would a being such as this still have an aura?

A: Projected.

Q: (L) OK, that would be projected, along with all of the frequencies, and everything else. Now... (SV) Are there a lot of dead people walking around?

A: This is method used for subjects discussed in “Matrix Material” instead of “Robots”, as suggested.

Q: (L) Is there any way that a normal person would be able to identify such a being?

A: No.

Q: (L) Approximately how many of this type of being are walking around on our planet, acting like normal people?

A: 2,000,000.

Q: (L) Approximately 2 million?

A: Yes.

Q: (L) OK...

A: You, Laura, have come in contact with 7 of them!

Q: (L) Who are they?

A: Discover.

Q: (L) Can you give me a clue, has it been within the last... (SV) Am I one of them? (laughter) Well, you never know! (L) Are any of us one of them?

A: Discover.

Q: (SV) Ask if you've done spirit release on any of these seven? (L) Has this contact happened within the past year?

A: Open.

Q: (L) Are you going to tell me anything about it at all? If there is any question I could ask to get any information concerning this, consider it asked.

A: Who is nutritionist?

Q: (SV) Who do you know that's a nutritionist? Isn't she a nutritionist, the one that wrote that book? (L) Do you mean Susan

S__?

A: Yes.

Q: (LM) I find that hard to believe. (F) Is Susan S__ a robot? (LM) When did she die?

A: Open. All it takes is a “hospital visit.”

[Laura’s note: To my knowledge, Susan S__ has been hospitalized for surgery at least twice.]

Q: (LM) Then what happens? (SV) All what takes? (LM) It doesn’t make sense. (L) Maybe there’s a death certificate for her...

A: Yes it does.

Q: (L) Does this mean if one goes into a hospital for surgery, that it’s possible for them to die and be reanimated in this manner? Without anybody being aware of what happened?

A: Yes.

Q: (LM) Why? (L) Well, we know why, because they’re creating a force, you know, putting it in place all over the planet so they can take over... We already know that! Is that correct?

A: Open.

Q: (LM) What’s open mean? (L) Open means that’s not absolutely determined yet, at this time, that’s not something that they’re just... it could be, yes. (L) So, you’re saying that Susan S__ was one of these robotoids, is that what you ’re saying?

A: We gave you one for your own knowledge and protection, but cannot give you others at this juncture.

[Laura’s note: Does this mean they can be given at another time, after a particular, destined interaction takes place?]

Q: (L) Is it up to me to figure out what characteristics these individuals have, in order to...

A: Based upon data given, yes.

Q: (L) OK, is one of the - I mean, I'm clicking [through mental data files] right now - one of the characteristics I think, that these kind of individuals might have, since they have this projected emotional frequency, would be a repeating emotional pattern, that they just simply, in spite of seeming intelligence, do not seem to learn from anything; that it just repeats over and over again, is that a clue?

A: Yes.

Q: (SV) Wait a minute, was that her idea, that we should eat like the monkeys do? (L) Yes. (SV) And then you've read about... saw the Jane Goodall film that talked about the fact that monkeys like to eat... (L) Other monkeys, yes. (SV) And what did she say when you told her about that? (L) She said, , "Well, I'll just say:" and she changed the entire paragraph to read "That in the wild, primates eat primarily vegetation with some amounts of protein," and no specification as to where the protein came from. That's really stretching it. (SV) She should have just left it out... (LM) That doesn't make any sense... (L) Now, there are some strange things about her, I'll have to admit that. OK, then, this same inability to get a clue about what's going on... OK, that's a clue, right there. Is there any kind of instinctual sensation that one would get about these types of individuals?

A: Bland.

Q: (L) That they're bland in some way? Is that it, that these individuals are bland individuals?

A: Spend inordinate amounts of "time" in solitude.

Q: (L) Well, that means Frank's one! Frank's kind of bland! And he spends a lot of time in solitude. (SV) A lot of people do! (L) So, is Frank one?

A: No.

Q: (LM) So, if you put a lead shield up around him, he'd collapse! (L) We're teasing you, Frank! I didn't mean it! (SV) He's not bland, though! Frank's anything but bland! (L) Is my husband one?

A: No.

Q: (SV) Am I one? (L) Of course not! Don't be silly! Now, let's stop a second. Now, we had several questions, and one of the questions was...

A: Bland is not universal in this situation, just a clue for you to identify individual.

Q: (L) OK, one is a nutritionist, one is very bland. Is that what we're getting at?

A: No.

Q: (L) OK, bland is just part of it.

A: Not key component, more likely to be spreading of disinformation.

Q: OK, is John W__ one?

A: Open.

Q: (L) Well, John W__ has got some stuff, because, I tell you what, you tell him something logically, it's almost like he's got a pre-set program that runs, and the minute you get to the point where you almost might possibly think he can get the connection because your evidence and logic are overwhelming... then it just shuts down and he repeats the program. And it just amazes me

that people can be that way. OK, have we... I guess you're not going to tell us any more about this. Do these beings know what they are?

A: Not conscious beings!

Q: (L) They're not conscious beings, so, they just react to you as though they are being remote controlled. (SV) So, if you told one of them what they were...

A: Are being remote controlled.

Q: (L) OK, do we have any more questions on this subject? (SV) So, if you told one of them what they were, they'd agree with you? (L) No, they'd probably disagree with you. (SV) Yes, being remote controlled... (L) Whoever is in charge would not want you to know it, so they'd naturally deny it vehemently. (SV) Then they'd probably come and get you... (L) Yes, no doubt about that. Now, what is the purpose of putting 2 million of these kind of critters on the planet? Can you give us a clue?

A: Wait and see.

Q: (L) Why is Terry so determined to criticize or break down or discredit in one way or another this autopsy video?

A: Serving emotional agenda.

Q: (L) And what is his emotional agenda in this case?

A: Supports strongly held beliefs.

Q: (L) OK, and these strongly held belief are that what... What are these strongly held beliefs that he has that he's trying to support this way?

A: Not important.

Q: (L) OK, so Terry's beliefs are not important to this issue. I want

to ask one insert question here before we go on to other things here. I have a book called “Freemasonry and The Ancient Egyptians”, it’s got a black cover. I can’t find it anywhere. I want to know, did I lend it out to someone?

A: Discover.

Q: (L) I’m trying to, and I can’t, my mind, my memory is just shot since that accident. I’m telling you, I can’t hold on to some things that I just used to really be able to hang on to. Can you tell me, can you give me some kind of indication where this book might be found?

A: You can find it.

Q: (L) I can find it, in other words, it’s in my house somewhere?

A: We do not help you learn by “leading” by the hand, book is easily accessible.

Q: (L) OK, so, it’s around someplace. (SV) Maybe it’s in your room. Maybe the kids have it. (L) I cleaned my room today. (SV) Maybe one of the kids have it. (L) It may be in my room. I bet I know where it is. It’s under my dresser, and I’ll look for it later. [Laura’s note: My daughter had borrowed without mention. When I started asking for help to find it, it was returned.] OK, where is the Ark of the Covenant currently located?

A: Alternative 3.

Q: (L) Alternative 3 is the plan to take all the people, all the smart guys, all the elite, off the planet and leave everybody else here to blow up, isn’t it?

A: Maybe.

Q: (L) Where is it currently located?

A: Maybe not. Discover.

Q: (L) We're trying to discover through our interaction with you! How else can we discover something as obscure as this? I mean, that's a pretty darned obscure question, I would think. (SV) Who's in charge of Alternative 3, Laura? (L) That's too complicated.... (SV) Well, maybe they have it, whoever's in charge of it. (L) well, are you going to tell us anything about it?

A: Study alternative 3 to find answer!

Q: (L) OK, the Matrix Material says that Henry Kissinger is the current head of MJ12. Is this correct?

A: No.

Q: (L) Is he just a red herring, so to speak?

A: Yes. MJ12 is no longer MJ12.

Q: (L) What is MJ12 now known as?

A: Institute of Higher Learning.

Q: (L) Are you talking about Brookings Lab, or Brookhaven?

A: Not really.

Q: (L) Is it a specific institute of higher learning?

A: Yes.

[Later note: after studying Alternative 3, it appears that it is probably Princeton.]

Q: (L) The other night, when we were talking about the underground laboratories and the taking of the MIA and KIA individuals from W.W.II, that would seem to imply that the underground tunnel system and the alien activity that has been going on there has been going on a lot longer than since 1947, is this correct?

A: Yes, but in much less intensive form.

Q: (L) OK, it's gotten a lot more intensive since 1947 or thereabouts. Well, the thing that I want to know: is there any relationship between these underground laboratories and facilities and our cultural concept of Hell ?

A: Not in such a simplistic sense.

Q: (L) Well, I'm just curious as to whether the concept of Hell being underground, where people were tortured and worked on and all kinds of miseries going on arose from some people who escaped from, or psychically intuited...

A: Link, but not unified.

Q: (L) Is there a Hell?

A: No.

Q: (L) I'd like to know what the prophecies that were given to the children at Fatima tell about the planet, the prophecies that are supposedly sealed up in possession of the Catholic Church.

A: False.

Q: (L) OK, then, they were false, so we don't have to worry about them, in any event, is that what you're saying?

A: Yes.

Q: (L) This underground tunnel that's under my house, is this underground tunnel just a link, or is it occupied a great deal of the time?

A: Fragmented inquiry.

Q: (L) What I want to know, is this tunnel that's under the house, which you have said is straight down under my house, is it a tunnel... is there like a laboratory under the house, or is it just a tunnel that's used for traveling from one facility to another?

A: Closer to latter.

Q: (L) Closer to a traveling point. (SV) What about the base over at Anclote? (L) Does the tunnel under my house go to Anclote base?

A: Portal.

Q: (L) Which is a portal? The base at Anclote?

A: Yes.

Q: (L) So that's just a portal. Is it a large facility? You said it was a small facility. Is it just a portal, or is there a working facility there?

A: Portal.

Q: (L) When I had [Candy] under hypnosis and I told her to travel along psychically and to read the minds of the aliens, and ask them, or inquire of them what the purpose of the implants were, the response she got was that it was like connecting a bunch of speakers, and once all the speakers were connected, then the stereo was turned on. What does this mean?

A: Unit group mind. Activation.

Q: (L) So what will happen when they, as she said, turn on the stereo?

A: Wait and See.

Q: (L) Well, earlier today I was thinking to myself that they way I feel right now must be very similar to the way animals in the forest feel on the opening day of hunting season. I mean, it's like every so many thousands of years, it's hunting season on planet Earth.

A: You are aware, 2nd density is not.

Q: (L) Is it still, in a sense, like hunting season? Are they just here... I mean, according to this Matrix material, they plan on decimating our entire planet, either with disease, or taking over their bodies...

A: Some is disinformation, and your energy is draining rapidly now, so must go for now. Good bye.

END OF SESSION

3.45 November 4, 1995

Frank, Laura, Susan V, Terry and Jan

Keep in mind while reading this session that this was 6 years before 9-11-01. A lot of things that we could not imagine have become realities since then, including the increasing control of populations and travel restrictions.

Q: Hello.

A: Hello. Poojoy.

Q: (Laura) Is that your name?

A: No.

Q: (L) What is Poojoy? What does it relate to? Could you clarify that, please?

A: Must it relate?

Q: (L) What is your name?

A: Naphoron.

Q: (L) Can you identify anything about yourself?

A: From Cassiopaea, my dear! There is no longer a reason to fear the presence of others, the channel is too thoroughly grooved for corrupted influences to appear... though you still doubt!

Q: (L) I don't doubt, I just check. I have several questions here, and I don't necessarily want to do them in the order they are written down.

A: "Checking" equals doubt.

Q: (L) OK, got you! We have a few short questions before we get into anything deep and heavy. The first question I want to ask is: there's a rumor going around that the STS alien bases, as in Dulce, and all the other alien bases around out West, have been moved to Paris, Washington and Buenos Aires. Is this, in fact, true?

A: All angles of the story open to corruption, by disinformation.

Q: (L) Are the STS alien bases in the Western part of the U.S. being moved somewhere?

A: We just told you!!!

Q: (L) In other words, what you said was no?

A: ! No. No.

Q: (L) 'We just told you' ...

A: That all angles are wrong!!

Q: (L) All angles. OK, in other words, no point in asking any other questions about it, because all angles are disinformation. Is that correct?

A: Wrong!

Q: (L) They're all wrong. (T) No...

A: No.

Q: (T) Your answer was all wrong.

A: Yes.

Q: (T) Read it back, what did they say? (J) “All angles of story open to corruption by disinformation.” (L) That’s kind of an ambiguous answer! (J) Yes, but it’s true! (T) Well, you said that the story itself was wrong. That’s not correct.

A: Search, don’t jump over vital subject matter!!! Patience!!! This is not a relay race!

Q: (L) OK, in other words, all angles... (T) You said “Are all the bases moving to Paris, Buenos Aires and Washington?” (SV) Maybe they’re expanding... (T) They said, “All angles of story open to corruption, by disinformation.” (J) So some of it is right. (T) So it’s open to it, it’s not actually corrupted, it’s open to corruption. Then what did it say? (J) Then it said “we just told you.”

A: Problem here involves assumptions.

Q: (L) OK, then, let me tell you the rest of the story. The story is that the Pleiadians are bombarding the underground bases with vibronics. I heard this from two sources.... The Konicov’s and Roxanne C.

(T) Now, wait a minute. Who did you get it from first?

(L) Roxanne.

(T) Now, what did she tell you?

(L) Well, she told me that the Pleiadian ships were supposedly above the earth bombarding these bases with these vibronics, which is a high-pitched sound, which is causing the shifts in the time and the ability of the STS aliens’ to function, and this was

the humming sound that's being heard by the people out in New Mexico.

(T) Are these the Billy Meier Pleiadians?

(L) I guess so. They're the ones that are supposed to be "The Good Guys," right?

(T) Well, that's open to....

(L) Right, exactly. And as a result of this, the STS, the "Bad Guys", and the underground bases, are moving their operations under large cities, i.e. Paris, Washington and Buenos Aires., because then they will have a human shield, because the Pleiadians won't be bombarding these large cities full of people with this stuff. Now, that's the story.

(T) Well, that's an assumption on their part. (J) Who's to say that they won't? (T) RC told you. Where did she get that from?

(L) I think it's on the Internet.

(J) Oh, good lord, right there! (T) OK, she may have gotten this from the Internet. Or she also may have gotten this from that friend of hers, that Virgil Armstrong guy who she talks to all the time. Virgil Armstrong - New releases¹

(L) Yes.

(T) OK, now, what did the Konicov's say?

(L) Susy asked if I had heard that all the alien bases are being moved to Paris. That was as far as she knew.

(T) Like as if you would get a fax from the aliens saying, "We're moving, please forward our mail, we're having a garage sale."

¹<https://web.archive.org/web/20000609101943/http://www.2012.com.au/VAcad.html>

(L) Well, she asked me to please ask about it.

(T) OK, now, where did she get that from?

(L) One of the people, apparently it's one of these channel people that she publishes, called her and told her. This was the information that they had. So this may be coming from like, the Ashtar Command, you know. i.e. Lissa Royal or Yvonne Cole.

(T) So there's not really a chance that they got it from each other?

(L) No, because Roxanne has had no contact with the Konicovs.

(J) So, it is two separate sources...

(L) Right, widely separated; Michigan and Florida.

(F) Yes, but, if they're both on the Internet...

(L) But Susy's not on the Internet.

(T) Yes, but one of the other ones may be on the Internet. If it came off the Internet, the Internet is subject to all kinds of questions... I don't trust a heck of a lot off the networks. I'm sorry, because I know what to expect out there. It's the same thing that happened to Linda Howe, who got hit in the face with it, and then acted really surprised, like: "It couldn't happen here!" Well, I know why... nobody bothered to tell her that it's like that out there! OK, now, before we go any farther, you said "Is this true, that they're moving them to these places?" Did one of them say these cities?

(L) Yes, Roxanne said the three cities, and Suzy named Paris.

(J) So, there's a hit on Paris. (T) Well, Paris would be a bad place for them to move it, because Paris is where people are bombing themselves crazy.

(L) Well, she says these Paris bombings are a result of the STS bases being moved there.

(T) Well, that means that the Pleiadians would go ahead and do it anyway, because they are already doing destruction to the city anyway. They can't hurt it any more. OK, let's review ... they said what?

(J) "All angles of story open to corruption by disinformation."

(T) OK, all angles of story... OK, you've got two angles of the story here.

(L) Well, several. The Pleiadians, the vibronics, the different cities....

(T) No, no, you've got two sources, two angles...

(L) Yes and...

(T) That may be open to corruption.

(L) Would these people necessarily be the angles?

(T) Yes, and where they got it from may be corrupt. Maybe somebody threw it out there just for the fun of it. Anybody having fun with us, in general. OK, then you said that that must mean the story is false, because they said that it is disinformation, and they came back and said... (L) Don't make assumptions... (T) "All angles"... and you said something, and they said "Wrong," and you said the assumption was wrong, and they said, no your answer was wrong. And they said 'Yes'. The answer was wrong.

(J) "Search, and don't jump over vital subject matter.. Patience, this is not a relay race!"

(T) The question is: what is the vital subject matter? The alien bases moving, or the sources of the information that you've got-

ten this from? Or the sources your sources got it from? OK, what is it we're supposed to be looking at?

A: Alien "bases."

Q: (T) OK, now, why did you put the word bases in quotes?

A: Assume, and you make an ass out of u and me!

Q: (T) Why did they say that? Because I asked why they put the word bases in quotes? (L) Because we're assuming that the aliens have bases? I think that's what they mean... (T) Well, we may or may not be assuming that the aliens have bases. Why did you say assuming makes an ass out of u and me?

A: Because you have never adequately discussed the question of the bases with us.

Q: (T) OK, now you're making a statement that we have not adequately discussed the bases with you, and I will agree, we have not discussed the bases with you, but you are saying that we are making an assumption that the bases exist. Only, the last time we met, you made the statement that Jan and I had been taken to a base. Are you changing what you said?

A: Assumption is not that bases exist, but rather, all other angles to the story.

Q: (T) OK, that's what I'm trying to get at. All other angles is what we're supposed to be looking at. Not the bases, which we haven't discussed, in detail, and not whether they're being moved or not, not whether they exist or not, but the angles that the story is coming from. Is this what you are saying?

A: Angles, period.

Q: (T) OK, what is it about the angles that we're missing in your comment, about angles? (L) Well, I think what they're saying is

that we need to be asking different, specific questions, and those become the angles...

A: Yes.

Q: (T) Now, these are questions about the bases, not about the information about the bases that Laura just related, but questions of our own about the bases?

A: Yes.

Q: (J) Not discussing the sources... (T) We're not talking about the sources...

A: Right.

Q: (T) OK, I just want to get this straight, so I can follow this. I know some of our conversations have gotten rambling... We've skimmed over things, and moved on to other things in order to get a lot of stuff in. OK, let's talk about the bases. (L) What's the first, most significant thing about the bases we need to know?

A: No, suggest point blank.

Q: (T) OK, point-blank questions. Do these bases exist? Let's start with yes or no answers.

A: Yes.

Q: (L) How many are there? (T) Are there bases in the United States of America?

A: Close.

Q: (T) There are no bases within the boundaries of the Continental U.S.? (L) No, they are in other dimensions and densities, is that correct?

A: Yes.

Q: (T) They can be entered through entranceways within the United States and other places within the world?

A: Transdensity.

Q: (L) OK, transdensity points...

A: No. Bases are.

Q: (L) Bases are transdensity. (T) So the bases are transdensity, in other words they exist throughout the densities in the same location. No, no, that won't be right... (L) they exist in a transdensity state. (T) So they exist in third...

A: Yes.

Q: (T) They exist in third, fourth, whatever...all at the same time. (L) Maybe they could come in to our density when necessary and then go out of our density when necessary.

A: No.

Q: (L) They are in another density.

A: No.

Q: (L) They are in another dimension. (T) They are in all densities...

A: Trans.

Q: (L) They transit at all densities?

A: Start at three.

Q: (L) They start at three... (T) They go through four, five is not the density they can go into, so they go through six...

A: Assume.

Q: (L) Assume; you're assuming... (T) No, I'm asking, they start at three, you say; where do they go from there?

A: To five.

Q: (L) Three to five. (T) They cover three, four and five?

A: Yes.

Q: (T) Why do they cover five? You've said that five is the level of contemplation... (L) Why not? That makes sense, to have one there, too.

A: Yes.

Q: (L) They can take them through there. They work there. (T) Well, I need to understand this, they've said different things about the fifth density, in different sessions. OK,

A: No.

Q: (L) I'll tell you, hold on. One of the things that came through: it was the session when I was asking questions about [my son's] experiences under hypnosis, so it was back fairly early on. And I asked a series of questions about what he perceived. Now, he had an alien abduction experience that he described in another lifetime, seemingly. He described what amounted to having this screen thing put over his face, and the red dots, and the programming and the beings in the silver robes standing around, and then being shunted through this tunnel, and finding himself in this dark space where there were all these black-hole things all around him. I asked, was this an alien abduction in another lifetime and they said no, it was a fifth density life review. I said, are some of these beings we perceive as aliens, and some of these experiences we perceive as alien abductions, actually events or experiences on fifth density? And they said yes.

(J) Life review... that's real important.

(L) Right. So what they're saying is, and when they're talking about taking souls on the battlefield, and so forth, obviously we have fifth density "alien" and they've said that the term is used loosely. I mean, we might perceive them as alien, but they were fifth density workers, so to speak. That was their job, to do whatever it was they did, or they perceived it as their job. So that, to have these bases transit the densities up through fifth, would make perfect sense because of the kind of work they're doing. Is that...

A: There is so much extremely vital stuff about this subject, that it would be wise to stay with it until completion.

Q: (T) We plan on staying with it, we're trying to understand this...

(L) You remember when my brother was here, they kept wanting us to come back to the subject of the bases. And we didn't, we wandered off.

(T) Our problem is, we wander a lot of the time. We're worse than Carl Sagan as a group here. We wander off on tangent ideas, and go from one thing to the next. We never stay on a subject. OK, the bases are trans-density bases; they go from the third density to the fifth; they exist in the third, fourth and fifth density all at the same time, is this correct so far?

A: Close.

Q: (T) Now, when a being, a soul, whatever, is in the base, do they exist in all three densities at the same time?

A: No.

Q: (L) Hold on, I've got an idea...

A: When you are in a skyscraper, do you exist on all floors at the same time?

Q: (J) No, but you have got to know where the elevator is! (L) Is there something like an elevator that can move you, if you're in these locations, from one density to another, and experience these bases, these trans-density bases, at different levels?

A: It is an elevator!

Q: (L) OK, so these bases are points... it IS an elevator, so these bases may be places that if you are taken to them, are in them, that through these portals, or trans-density bases, you are thereby able to transit the densities?

A: You are able anyway.

Q: (L) OK, but are these specific locations... OK, it is an elevator... (T) Well, not an elevator as we perceive an elevator... (J) Conceptually, yes. It's a conveyance, it's a method.

A: No.

Q: (T) No, that it isn't an elevator as we perceive it? (L) Is it an elevator for...

A: Literally.

Q: (L) It is literally an elevator?

A: Yes.

Q: (L) So you go there to get on to go to different densities?

A: Yes.

Q: (T) So, it is that easy?

A: Yes.

Q: (L) So you go to these bases, to go to different densities...

A: Although, it is possible to enter 4th and 5th in other ways too!

Q: (L) OK, are these beings, these other density beings, creating and utilizing these bases for mass movement of beings or artifacts, from one density to another? Is that what they're doing here?

A: No. They live on 4th, so they construct 4th density bases.

Q: (L) I'm getting it... So, the fourth density beings construct fourth density bases. These fourth density bases then somehow interface with third density in a certain point in space-time, and they then influence third density beings to build third density bases at this interface point, and through these interface points they are able to move back and forth between densities. Is this getting close to the idea?

A: The only ones who need to use this approach are 3rd D.

Q: (L) OK, so these are fourth density... (J) They are for our use? They are for third density being use.(L) OK, so our people have built these bases, using technology, perhaps... OK, let's take it one step at a time. Are these bases constructed by third density beings?

A: Partially.

Q: (L) Are they constructed by third and fourth density beings?

A: Yes.

Q: (L) Are they constructed for the use of third density beings?

A: No.

Q: (L) Are they constructed... (T) Are the third density bases constructed for the use of third density beings?

A: Both.

Q: (T) Both third and fourth. OK, and there's a way for the fourth

density beings, an elevator, to move from fourth to third; from their fourth density base to the third density base.

A: Vice Versa.

Q: (L) They said they were built for us, not for them.

A: No.

Q: (L) OK, they were built by us to allow us to get there...?

A: No.

Q: (L) Then, I lost it! (T) They were built so that they can have a place to move and operate in third density even though their main base is in fourth density. They come here, and interact with third density beings, and do their third density stuff while they're here, because they can exist there, because fourth density spills over into it through the other bases. (L) OK, so when people go to these bases, and see aliens and humans interacting together, are they in fourth density, or third density?

A: Both.

Q: (L) Either or. OK. The next question is... (T) Both? Now, wait, they can either be in third or fourth. But you said, if you see them interacting together... (L) Are they both at once?

A: Mostly on 4th.

Q: (T) OK, so the bases in third density here, are bases for whomever is working with the fourth density beings, that they can exist in it over long periods of time. The fourth density beings can come through to this density, by use of the base.. . [Dogs start howling in the back yard, distracting the session.] ... Now, I've lost my train of thought. OK, we've got a base, bases that exist: Third, fourth and fifth, and they can transit between third, fourth and fifth... The bases are STS bases, let's establish

that. (L) That's an assumption...let's ask. (T) Are the bases STS bases?

A: Mostly.

Q: (T) So there may be STO bases, as well?

A: This is complex.

Q: (T) Because the STO beings interact with the STS beings because of the balance and the fact that STO beings serve themselves by serving others, and therefore they will serve STS beings as well as STO beings, because they're serving? Because they've been asked, because they're doing it to serve others. So there are STO beings operating bases also. (L) Is that correct? (T) Or close?

A: Much more complex.

Q: (T) I assume it's much more complex, but that's the general idea...

A: No.

Q: (L) OK, try this: Are there separate bases operated or built or constructed or somehow occupied or utilized or whatever by STO beings alone?

A: OK, time for us to teach patience. We are going to illuminate you! Why do you suppose there are roads around Dulce NM where people have become confused when traveling on them? Because the 4th density vibrational frequency emanating from the nearby base more and more frequently resonates on surface.

Q: (L) OK, continue.

A: Then going to 4th density: road seems straight as seen in 4th density, when curved in 3rd.

Q: (J) It seems straight when seen in 4th, but it's actually curved in 3rd? (SV) In other words, accidents! (J) It changes configuration from 3rd to 4th! (T) When people drive those roads out there, as the fourth density seeps out through, and is seeping out farther and farther, they become confused because they're moving between 3rd and 4th. As the road curves in 3rd, and the car, which is in 3rd, should be curving with the road, the driver sees the road as straight, and drives off the road, because he's confused by what he sees.

A: Exactly.

Q: (J) It's all about perception! (T) Now, we're back to perception of reality!

A: In 4th, you see full circle from any vantage point.

Q: (L) We talked about that before. (T) So the road looks straight, because you're seeing it from all angles, therefore, instead of it being curved on one, you're seeing it every way, so the road is now straight. But, it's not really straight in 3rd, and you drive off the road. (L) OK, continue on with what you were saying...

A: The entire New Mexico region is on verge of moving to 4th density permanently!

Q: (L) OK...

A: Because of the bases.

Q: (L) So, in other words, the rumors of the bases being moved, being filtered down from other densities, through some of the distorted channels, is in essence, somewhat correct... (J) Because they need to have the base in third density! (L) Only, they're not moving them to Paris, Washington or Buenos Aires, they're moving to 4th density.

A: Close but the bases are already there, pity the host regions. Why do you think there is so much activity seen there!

Q: (L) Does this mean that when that whole region goes to 4th density, that it's going to, for all intents and purposes, disappear from 3rd?

A: No.

Q: (T) OK, answer your earlier question, then. Why is there so much UFO activity there? Tell me.

A: Bleed through.

Q: (L) So they're flying around in 4th density... (T)...and they're showing up here in 3rd because...

A: Wait 'til shift is complete.

Q: (L) Do you mean the shift of New Mexico? Or the total shift?
(T) I think they're making the sarcastic statement: "Wait till shift is complete... We ain't seen nuthin yet!!" We're just beginning to.

A: Yes.

Q: (T) Now, this opens up some questions. First question. You made the statement "But the bases are in 4th density." What happens when the 3rd density base, which is vibrating itself into 4th density, runs into the 4th density base that's already there?

A: Merge.

Q: (T) They become one base?

A: They already are.

Q: (T) What do you mean by "They will merge?"

A: To same density.

Q: (T) OK, now, is this moving of the third density location a side effect of the bases? Harmonic resonance, and all that, as in the beginning of the Matrix [books]? Are we talking about the fact that it's been there so long, that that section of third density is now resonating itself to the fourth density frequencies, and that this is not exactly what they wanted it to do, but it's a side-effect of the fact that they're there?

A: Yes.

Q: (T) Did they know that it was going to happen?

A: The 4th density STS did, but not 3rd.

Q: (T) One of the little surprises they weren't told about before the deal was cut? (J) If I may ask my question now: You've got these third density bases that are going to move to fourth density. Are they going to need to re-establish another third density base to continue their work? To replace the one that's gone?

A: Why? The whole "territory" will be in 4th then. Tremendous reality shock will occur when it crosses the border.

Q: (L) How will we in third perceive it? (J) We won't! (L) Now, wait, don't make assumptions here! How will we in third perceive it? Let's play make-believe here. What are they going to say?

A: Tremendous reality shock when cross border.

Q: (L) Are you saying that this whole region will go into fourth density when the Realm Border crossing occurs, or is it going to happen shortly?

A: Before!

Q: (L) OK, this is going to be a tremendous reality shock to us, in third density? (J) I guess! (SV) Well, New Mexico's not going to

be there any more! (L) Well, now, how are we going to perceive it? That's what I want to know! Are we going to see a big hole in our world? Are we going to see a vast, empty desert?

A: New Mexico will still be there, but suggest review driving skills, for but one example!

[Jan's note: New Mexico's vehicle license plate does say "Land of Enchantment."]

Q: (T) New Mexico will still exist, but the perception, when you drive into it, is going to change completely, because you've moved into a different density?

A: Cooking will be fun too!

Q: (T) Because it's fourth density. (L) Wait, now, stop a minute here... (T) This is not something that can be covered up very easily...

(L) Now, hold on, back up. What will we perceive... I mean, what is it going to say on the news? Everybody in New Mexico disappeared? (J) Or they all go nuts... (T) I would hazard to guess...

A: News blackout.

Q: (T) They're not going to say anything. Now, what is the government's response? I'm sure they will do something like ... "An underground nuclear facility for old rods," and they have to block the whole state off...

(L) That's tangential.

(J) They're going to have to keep people out!

(T) How will they explain it? They will not let anybody in!

(L) But they still have... What I'm getting at is... That's begging the question! The question is, what will... (T) It will look like New

Mexico! (J) It will be different every time... (L) But the question is, will there be people there? Will there be buildings there? If you fly over it, if you could fly over it, would you see a landscape? Would you see cities? (T) It will look like New Mexico... (L) They didn't say that!!!

A: This requires 1,000 answers!

Q: (L) In other words, there is an issue here! (T) Yes, there is, and there's another issue. That's only one base. OK, we're talking bases...

A: Colossal issue.

Q: (L) My question is a colossal issue here. What's going on here? This is the whole thing. (T) My question, I think, is important, too. There's more than one base. If one is doing it... (L) Well, they said the whole territory... (T) Not New Mexico; there are bases in South America, there's supposedly a base off the coast of Florida... (L) OK, is this going to happen to all the bases? (T) There are bases all over the world...(L) But New Mexico is where they're hearing all that "business." (T) They're hearing the "noise" in a lot of places around the world. (L) OK, are there other bases and areas around the world where this is going to happen?

A: Yes.

Q: (L) Is it going to happen simultaneously?

A: No.

Q: (L) It'll happen as it develops... (T) The same way it developed out there. (L) In other words, they'll move their activities to the other locations, once one place... (T) No...

A: No.

Q: (J) Yes, because I asked, and they said no! (T) The bases were not all established at the same time. The base out there is becoming affected.... (L) The oldest...

(T) We don't know if this is the oldest, we don't know about other places in the world where nobody can go. We don't know what's going on in Russia, and in China, in Africa, in the middle of the rain forests, what's happened there... But, as the bases, as our perception of time goes by, each of these bases will experience the same thing, in their due time.

(L) This brings to mind a couple of questions we discussed a couple of weeks ago, when my brother was here. After we had talked about the underground bases, and the soldier effect, and the taking of the souls out, and so on and so forth, and I don't know if we got into it effectively or not, but I don't think so. Is there some connection between these bases and their activities and a concept that has emerged in our culture, of Hell being underground?

A: No.

Q: (L) OK, is there some connection between these bases going into fourth density and the idea of some of the ancient prophetic literature that the...

A: Bases are partially 4th density already, and always have been. It is the surroundings that are in for a massive change.

Q: (T) OK, now, this brings up an interesting concept. Two interesting concepts. When Roger Santilli was here, we talked about his compatriots messing around with this stuff on a small scale. This is on a massive scale that's getting out of hand on purpose.

(L) And they mentioned that these things had been being done by whom, and blah, blah, blah...

(T) Yes, now, the question is, they told us that the Lizzies want

to control us, not in third, but in fourth density. They've also told us that this wave realm border is coming, which is our human chance to move to fourth density on our own and escape, if we can do it, as a group, the Lizzie's control. The Lizzies have brought fourth density to us before the realm border gets here. Everybody who's in a fourth density area, like the New Mexico people, like you were just asking, what happens to everybody, gets transferred into fourth density, where they are controlled by STS, fourth density, in physicality, right on up there, before the wave gets here, before they understand what's really happening to them...

(L) That's what I was trying to say earlier...

(T) It wasn't coming out well, but that's it, right?

(L) The ancient prophecies, where they talk about taking out the negative, and that this amounts to the taking out of the tares, the weeds, the chaff.

(T) It's not only in this location, it's in many locations, so they're going to grab... (L) Gathering them together ... (T) ...a whole bunch of humans by way of these bases that they told the different governments a lie about the purpose of the bases. The bases weren't for any of this other stuff that they told them. The bases were there specifically to generate the resonance effect within the area. (J) And spread it... (T) Yes, well, they knew it would grow, therefore they can grab everybody within the area. In New Mexico, depending on how big an area, they're hearing it out to Taos and as far southeast as Albuquerque. That's a big city. There's a lot of people there, in that area of northern New Mexico. To the north of that, they can take out Las Vegas, which is another large city. Plus the tourist areas throughout the National Parks. Now, the bases have been in out of the way places. The information, or disinformation, is that, the bases

would be moved under large cities. Is the experiment that they have performed, and they calculated out, to see if this works on a sparse area first? And then, to move to large population areas, and do it again, and on a second level of experiment, accelerate it?

(L) OK, let's ask. Is that the idea, that they're trying this there, and then move to the large cities for the same purpose? (J) Like trying it out in Boston...

A: No. Remember, you are moving to the density 4 anyway.

Q: (J) My question is, in the case of the New Mexico locality, is this a "contained" event?

A: Regional "blip".

Q: (J) OK, so it is contained, it would not spread. (T) Well, it's not big enough to spread. But it is bigger than what Santilli's buddies are messing with. (L) OK, is there anything happening under the cities of Buenos Aires, Washington and Paris? Along these lines?

A: There are things "happening" under all cities.

Q: (L) OK, I know you said "things", but I said along these lines.

A: Yes.

Q: (T) Is what I said, what we postulated earlier, is this their idea, is this the Lizzie's idea? The fourth density beings' idea? To gather us up before the wave gets here and then they can make their move?

A: No need.

Q: (L) OK, let me ask it this way. Is this event going to take all the people with it into fourth density STS? I mean, all the people who go with this event?

A: No. People will not “go.”

Q: (J) People will not “go.” It will be like those people that were trying to retrieve the planes, and every time it changed, their realities kept on changing. (T) Is this like the people, the flight 19 stuff?

A: No.

Q: (L) What’s going to happen to the people in the region? (T) That was an Atlantean thing, they flew into the Atlantean power pyramids... (J) No, that’s not what I meant... I’m not talking about the guys on the planes, I’m talking about the people that were trying to retrieve them, and they kept on changing back and forth from dimension to dimension... (L) What’s going to happen to the people in the New Mexico area?

A: Nothing.

Q: (L) So, if the region disappears... (T) It’s not disappearing. It’s just shifting... (L) So if the region goes into fourth density, will the people living there also be in fourth density?

A: Yes.

Q: (T) Will they notice that anything is different? Will they, not us, they? Those who are within it?

A: Are you kidding?

Q: (L) I guess they will. (T) Well, I don’t know, that’s why I’m asking. (J) Their perception is going to change! (T) But, how can their perception change if they’re not going into fourth density? (L) No, they said they are going in to fourth density! But they’re not “going” anywhere (J) There will be no traveling involved. (T) We’re not “going” anywhere, we’re shifting our frequencies up to the next density, not moving from where we are.

A: Picture driving down a highway, suddenly you notice auras surrounding everything.... Being able to see around corners, going inside little cottages which become mansions, when viewed from inside... Going inside a building in Albuquerque and going out the back door into Las Vegas, going to sleep as a female, and waking up male... Flying in a plane for half an hour and landing at the same place 5 weeks later...

Q: (J) [reads previous passage and says:] Perception is “BEING,” and changes all the time! (T) That’s “variability of physicality!” (SV) Albuquerque... That’s where the University of New Mexico is! Can you imagine that whole campus...! (T) Can you imagine the poor casino operators when “chance” no longer plays a chance....?

[Break]

Q: (T) How is this changing of the densities, in that large and major a way, affecting the wave? They said that the scientists, messing in a small way, are affecting us and the wave. How is this, on a large scale, doing?

A: No relation.

Q: (L) No, it wasn’t that the scientists were affecting the wave, they had no effect on the wave, they were affecting the curtain between densities, which is a totally different thing from the wave, which is an oncoming thing. (T) But, does it speed it up, what does it do? What is the effect?

A: No.

Q: (L) No effect. Let me ask this. Is there any possibility that this regional movement to fourth density is going to manifest in third density as some sort of cataclysmic activity?

A: No.

Q: (L) OK, is this perception of reality imposed on us from outside, or...

A: Not imposed upon.

Q: (L) OK, what is it that determines... I mean, I know awareness determines, but if a whole region is going to go, is it because all of the people occupying that region are at a level that they can change their awareness?

A: No.

Q: (T) It's not going because of that. It's going because the bases are being used to manipulate. (L) OK...

A: No.

Q: (T) It's a side-effect of the bases...

A: Yes.

Q: (T) it has nothing to do with anybody being ready to go... or anything else but as a side effect?

A: Also atomic bomb blasts.

Q: (J) Oh, Los Alamos bomb blast!

A: Blasts.

Q: (T) OK, now, how about the French, and their atomic bomb testing in the South Pacific? Is this activity accelerating some sort of transition, or opening of a doorway...?

A: Maybe.

Q: (T) OK. As the bases reach these points of side effect, of transition from third to fourth, each one in itself is localized. But, do many of them together form a much larger shift over a larger geographical area?

A: We told you it was regional.

Q: (J) Yes, each one is regional, but do you reach a point where... is there a saturation point? (T) Is there a cumulative affect over each region? (J) As they go? (T) In other words, if you've got one whole...

A: No, we meant SW US region.

Q: (L) OK, this South West region, this is imminent in this area? Is that correct?

A: Imminent?

Q: (L) OK, it's already happening, is that it? (T) It's in progress.

A: Yes.

Q: (L) OK, what else were we asking? Can people come in and out of it?

A: Yes.

Q: (L) Can you get back out of it? (T) How well can you drive and cook?

A: Yes.

Q: (T) You said other bases are going to experience, or are experiencing this same effect.

A: Yes.

Q: (T) Are there other bases that are experiencing, have experienced this effect, previous to the Dulce base?

A: Yes.

Q: (T) As these bases experience these effects, in different places on the geographical surface of the planet, do the effects become cumulative? (L) They said only the SW United States... (T) I know,

I'm approaching this from another direction here. As this happens, will this ultimately take in the whole planet?

A: No. Wave.

Q: (L) The wave will take in the whole planet. (J) It'll be a Swiss-cheese effect? With more and more holes as they go on... (T) News blackouts will not keep people from hearing about this. How's the power structure going to handle all of this?

A: ?

Q: (L) How indeed? That's a good question. The power structure already knows it's happening, because it's happened in other places already. This isn't the first place. (J) That's what the disinformation is for.

(T) Disinformation is fine in remote places where nobody can reach, like Outer Mongolia, or the middle of the Brazilian Rain Forest. When it happens in downtown Albuquerque, or Las Vegas, or off the coast of Florida, and you can't go to Orlando or Miami anymore, somebody's going to notice!

(J) Where is Miami or Orlando on the timetable, that's what I'd like to know! (L) Interestingly, Jan just said something that keyed in a good question. If time is involved in this, is it possible that when something goes into fourth density, that if we were traveling to that area, that we would arrive in that area at a different point in time? And that we would say... (T) As we perceive time...

A: Yes.

Q: (L) Very good question.

A: 4th density frees one from the illusion of "time" as you WILL to perceive it.

Q: (L) OK, if you're freed from the illusion of time, going into

fourth density, would you then go into one of these regions and perceive a time period and sequence of events as you expect to perceive it?

A: As you WILL to perceive it.

Q: (L) So, in other words, there may be some people on the planet, because of their fixity of will, and perception, at third density, who will not perceive anything change? Is that correct?

A: No.

Q: (L) So, anybody will, something will be different. OK. (J) What they do with that information, that's a different story... (T) You know, these areas will become bigger tourist attractions than any that are out there now! People will flock to them... (L) Is that possible?

A: No.

Q: (T) It's an "E" ticket ride! When the word gets out that people can go to that area of New Mexico and experience true strangeness, it's going to draw a lot of people.

A: Not that simple... Picture driving to reach New Mexico by car and "skipping" over and arriving in San Diego instead, or... driving to the grocery store in Santa Fe, and winding up in Moscow, instead.

Q: (L) So, in other words, this is going to create a situation where people on the planet are going to become very confused and upset over this situation. (J) Yes, have you ever tried going shopping in Moscow? (T) They're going to draw a lot of people when they find out that happens! (L) And being forced to expand their perception and awareness because of the anomalous events!

A: Imagine being an N.S.A. official and shivering at the prospect!

Q: (L) N.S.A. National Security Agency... Why would you shiver at the prospect...(SV) of being one of them? With all this going on?

A: Concealment.

Q: (J) In other words, trying to cover up what's going on!

(T) Well, they're not going to be able to cover up what's going on. That's what I'm getting at. And because of what's going on, it's going to draw people to the effect...

(L) If something like this happens, obviously, what they're going to have to do is institute some kind of martial law, so they can cover it up! Or else, they'll lose everything!

(T) They're going to have to restrict travel...

(L) Well, yes, we know that, but they don't!

(T) They're going to have to, at the minimum, restrict all travel through those areas. The only way they're going to do that, is either impose martial law, or come up with some kind of MAJOR disaster to keep people out, like I said, "buried, spent fuel rods are leaking contamination over NW New Mexico, no one allowed in." But, they just told us that those who are inside can get out. So how are they going to keep those who are inside from coming out, especially if they come out all over the world when they leave?

(J) People will be talking a mile a minute about all the stuff...

(T) People are going to find out, they're not going to be able to cover it...

(L) Well, they're going to find out about all the stuff. They'll be picking them up every time they hear about one, but of course, it will be like trying to move the bucket from leak to leak to leak...

(T) From place to place, and it's not the only place it's happening!

(L) ...and it's going to be leaking so many places.

(L) They said they were going to teach us. Let's ask if there is any major, further information on these bases, that we need to know. (J) Is there one around this area that's going to do this? (T) It's off the coast of Florida, they told us that. It's out in the Gulf. (L) Is our off-the-coast base going to do this? (T) If it [New Mexico] covers an area as far as Las Vegas, and through there, it's going to cover us. (L) Is our base going to...

A: Not of same intensity.

Q: (J) Less or more? Which direction?

A: Less.

Q: (L) Is there... (T) Why would it be less? Because the base is smaller? (L) Because it's smaller, they told us it was smaller. They said 'Small base near here'. (T) Well, that's just the one near here. What about the one out in the Triangle? (L) Yes, we didn't ask about the Triangle!

A: Panhandle, too.

Q: (L) Is the Panhandle less, or will they have the same thing happen as Dulce?

A: By that time, the wave will arrive.

Q: (L) Is there anything about these bases and this subject matter that you wish to teach us further at this time?

A: Suggest direct channeling for this subject.

Q: (L) Well, you know how we feel about the direct channeling, that there is too much personal filtering involved. This way, none of us knows anything...

A: Faith must enter the picture somewhere, lest you fall behind. Some subjects are too complex to be properly discussed through this medium.

Q: (L) OK, we'll save this discussion of the bases for a direct channeling session. The only thing is, in a direct channeling session it is... There are some things about it that are disturbing. It tends, after doing it several weeks in a row, to become, it begins to sound pompous. (SV) Let's ask. (L) Why is it after doing it several times in a row, it begins to sound pompous, information begins to get skewed, why is that?

A: Perceptions are a fun challenge.

Q: (L) That's easy for you to say, because, when the answer comes back that... (J) You're not "perceptually challenged!"

A: It is easy for you to say many things.

Q: (L) Well, the thing is, when absolutely incorrect information comes out, I have a difficult time dealing with that.

A: How do you determine correctness?

Q: (L) Well in that particular instance, I was told that a certain thing that I saw in the sky was the planet Mars, and the planet Mars was so far away from that spot, that it was absolutely incorrect. I mean, the planet Mars was 120 degrees away from Jupiter. And yet, you said that they were 10 degrees apart; that what I saw that was 10 degrees away from Jupiter was Mars. Unless Mars traveled 110 degrees across the sky in one day, then that was incorrect information. There's no two ways about it!

A: Wrong!!!

Q: (L) No, it's not!

A: It is!!!

Q: (L) What is wrong? That Mars didn't travel 110 degrees? Because that is exactly what you said, that it was Mars. I went back, I read over the session!

A: You were in a 4th density flap.

Q: (L) Well, fine and dandy! If I'm in a 4th density flap, that's an easy answer for... any answer that seems to be at variance with what's happening here. I mean, do you get my point here?

A: Yes. But you are still mistaken.

Q: (L) Why am I the one that's mistaken? Why can't you be mistaken?

A: We can, but not on this one! Remember, you felt strange during this experience. And besides, you asked us for the information, we must present it to you as it is.

Q: (L) You're saying that I felt weird or strange or unusual at that occasion, I don't remember saying that I felt strange or unusual, are you trying to put words in my mouth?

A: Who said that? You said that.

Q: (L) OK, you didn't say that I said that. You said that I said that I felt strange or unusual. I don't remember that I said that. I don't remember feeling strange or unusual.

A: OK.

Q: (SV) How many other times during direct channeling was wrong information given? (L) A lot of the other information is unverifiable. (J) How much of this is unverifiable? (L) Well, that's what I'm saying. When there's a point such as that... (T) Well, when they shut down the southwest and declare martial law and keep everybody out, then we'll know that there's some truth to it. (J) Is there a base in the "Show Me" state? They'll have a great time! (T) Is there a base near Denver?

A: Yes.

Q: (T) Let's think about the Scallion map of the future continent. The "Cities of Enlightenment" that are on his map. There's one in Denver, there's one near Albuquerque, there's one near Tallahassee... (L) Doing the direct channeling is so excruciatingly boring.

A: We only suggested it for complex issues.

Q: (L) I suppose we can handle it in small doses. Let me ask about a dream I had the other night, about being on safari, and then being given some information, followed by an event where it seemed like something shot out of my side. And then two days ago I was in the bathroom and noticed there was a deep puncture wound in that area that was somewhat healed. Could you tell me what this represented, or what's the story here, or what happened?

A: Another session.

Q: (L) Then let's say goodnight.

A: Good night.

(L) Well. I had a whole list of questions that we didn't get to ask. And we only asked one question on my list. I'm going to be more careful what I open with! I'm going to be sure I don't ask something that's just full of implications!

(SV) Well, how do you know what question is going to be full of implications? Anyway, what are you going to tell the Konicov's?

(T) "Don't go to Albuquerque!"

END OF SESSION

3.46 November 11, 1995

Frank, Laura, Susan V

Considering the direction the Cs took in this session, it's interesting that it was held on 11-11.

Q: Hello.

A: Hello.

Q: (L) Who do we have with us?

A: Lynostieah

Q: (L) And where are you from?

A: The translation point of focus is Cassiopaea.

Q: (L) Is there a reason you use the term "translation?" Is it because the information is translated from one density to another?

A: Close.

Q: (L) Is that the point where the energy "shifts" densities?

A: Close.

Q: (L) I noticed that in the beginning of these transmission that the language was very formalized, and that as time has gone by, the language used has become more colloquial. Why is this?

A: Formalized? Colloquial? Define your judgments, please!

Q: (L) Well, what I meant was, that in the beginning it seemed that certain colloquial expressions that we are accustomed to were unclear to you. And now, not only is there great familiarity with our expressions, but you seem to often come up with rather clever and original witty sayings.

A: Familiarity breeds contentment!

Q: (L) Okay. I want to get on with the questions for tonight...

A: Do you not wish to reflect upon our witticism?

Q: (L) (laughter) Yes! I thought that was a very clever witticism!

A: It seemed as if you were not impressed?!? Give us a break, Laura?!? We're only sixth density!

Q: (L) As we say, "I love a sixth density light being with a sense of humor!" Now, the main thing I wanted to ask about is the references I come across in tons of reading, that the number 33 is somehow significant. Could you tell us the significance, in esoteric terms, or in terms of secret societies, of the number 33. There is the cipher of Roger Bacon, based on the number 33, the 33rd degree masons...

A: As usual, we do not just give you the answers, we help you to teach yourself!! Now, take 11 and contemplate...

Q: (L) Well, three times eleven is thirty-three.

A: Yes, but what about 11?

Q: (L) Well, eleven is supposed to be one of the prime, or divine power numbers. In Kaballah, 11 is the power number...

A: Yes...

Q: (L) Eleven is 10 plus 1; it is divisible only by itself and by 1. I can't think of anything else. I am an 11 in numerology... I am also a 22. What else is there to the number 11?

A: Astrology.

Q: (L) Well, in astrology, the eleventh sign is Aquarius, my name is an eleven, my birthday is a 22 which is twice eleven, and I am an Aquarian. The eleventh house is friends, hopes, dreams and wishes, and also adopted children. Aquarius the Waterbearer, the dispenser of knowledge. Does 11 have something to do with dispensing of knowledge?

A: Now, 3rd house.

Q: (L) Gemini. Okay. Gemini and Aquarius. Third house is how the mind works, communication, relations with neighbors and siblings, education, local travel, how one speaks. Gemini is known as the “consummate man.” Somewhat shallow and interested in the things of material life. It is also the divine number of creation. So, what’s the connection here?

A: Matrix.

Q: (L) Is there something about this in the Matrix material?

A: No.

Q: (L) This IS a matrix. The third house and the eleventh house create a matrix?

A: Foundation.

Q: (L) In terms of cosmic things, Gemini is in June, Aquarius is in February... (S) Isn’t the third house also about teaching? And, we are friends here and we are being taught...

A: This is not about you.

Q: (L) Okay. This is not about us. I am just trying to relate it. Gemini is in June, Aquarius is in February. Gemini is the physical man, and Aquarius is the spiritual man?

A: Yin Yang.

Q: (L) So Gemini is the physical man and Aquarius is the spiritual man... yin yang... is that the...

A: Yes...

Q: (L) So 33 could represent the transformation of the physical man to the divine man through the action of secret or hidden teachings... and those who have gone through this process represent themselves with the number 33, which means that they

started out oriented to the flesh and then became...

A: Medusa 11.

Q: (L) Medusa 11? What does Medusa have to do with it? (S) What about spinning 33 times? (L) Please tell me how Medusa relates here?

A: Heads.

Q: (L) Heads. Medusa. 11. Were there eleven snakes on the head of Medusa or eleven heads? This is really obscure... you need to help me out here.

A: We are.

Q: (L) Do I need to read the Medusa legend to understand?

A: No.

Q: (L) Medusa. Heads. 11. Is there something about the mythical Medusa that we need to see here?

A: 11 squared divided by pi.

Q: (L) By pi. 11 squared divided by pi. What does this result bring us to?

[Laura's note: Above, I assumed that the Cs meant 'pi' no 'phi' since I really wasn't all that familiar with phi as a mathematical idea so this is the point where things get frustrating. I'm operating on wrong assumptions.]

A: 33.infinity.

Q: (L) Well, we don't get 33 out of this... we get 3.3166 etc if we divide the square root of 11 by pi. Divided by phi... what in the heck is phi? Okay, if we divide pi into 11, we get 3.5 infinity, but not 33.

A: 1 times 1

Q: (L) Oh. You weren't saying 11 times 11, you were saying 1 times 1.

A: No.

Q: (L) 1 times 1 is what? 1.

A: 5 minus 3.

Q: (L) Okay, that's 2.

A: 2 minus 1.

Q: (L) Okay, that's 1. I don't get it. A math genius I am NOT. What is the concept here?

A: Look: 3 5 3 5 3 5.

Q: (L) What is the 3 5 sequence?

A: 5 minus 3.

Q: (L) Okay, we have strange math. But, you can do anything with numbers because they correspond to the universe at deep levels...

A: Is code.

Q: (L) What does this code relate to? Is it letters or some written work?

A: Infinite power.

[Laura's note: It is obvious now that the Cs were talking about a phi spiral, Fibonacci Sequence, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144, etc., Golden Ratio: The ratio between two consecutive numbers in the Fibonacci Series tends to the Golden Number Φ : 0.618... or 1.618; The ratio of each successive pair of numbers in the sequence approximates phi (1.618. . .), as 5 divided by 3 is

1.666..., and 8 divided by 5 is 1.60. but I was ignorant of all that at the time. Poor Cs were SOO frustrated I think.]

Q: (L) How is infinite power acquired by knowing this code? If you don't know the correspondences, how can you use a numerical code?

A: Lord of Serpent promises its followers infinite power which they must seek infinite knowledge to gain, for which they pledge allegiance infinitely, for which they possess for all eternity, so long as they find infinite wisdom, for which they search for all infinity.

Q: (L) Well, that is a round robin... a circle you can't get out of!

A: And therein you have the deception! Remember, those who seek to serve self with supreme power, are doomed only to serve others who seek to serve self, and can only see that which they want to see.

Q: (L) The thought that occurs to me, as we are talking here, is that the STS pathway consists of an individual who wants to serve themselves - they are selfish and egocentric -they want to impel others to serve them; they want to enslave others; and they find ways to manipulate others to serve them. But, they end up being impelled by some higher being than they are. Because they have been tricked into believing that by so doing, they are actually drawing power to themselves through the teachings, including the popular religions which promote being "saved" by simply believing and giving up your power. And, then, you have a whole pyramid of people TAKING by trickery and deception, from others. The taker gets taken from in the end. A pyramid where all those on the bottom, the majority, have no one to take from, so they get absorbed into the next level higher, until you get to the apex and everything disappears. In the STO mode, you have those who only give. And, if they are involved with other

STO persons, everyone has and no one is at the bottom or at the top, in a void. In the end, it seems like everyone ends up serving someone else anyway, and the principle is the INTENT. But in STO, it is more like a circle, a balance, no one is left without.

A: Balance, yin-yang.

Q: (L) Obviously the 33 represents the Serpent, the Medusa, and so forth...

A: You mentioned pyramid, interesting... And what is the geometric one-dimensional figure that corresponds?

Q: (L) Well, the triangle. And, if you have a triangle point up you have 3, joined to a triangle pointing down, you have 3, you have a 33. Is that something like what we are getting at here?

A: Yes.

Q: (L) Is there a connection between the number 33 and the Great Pyramid in Egypt?

A: Yes.

Q: (L) And what is that connection? Is it that the builders of the pyramid participated in this secret society activity?

A: Yes. And what symbol did you see in “Matrix,” for Serpents and Grays?

Q: (L) You are talking about the triangle with the Serpent’s head in it?

A: Yes.

Q: (L) Are we talking in terms of this 33 relating to a group of “aliens,” or a group of humans with advanced knowledge and abilities?

A: Either/or.

Q: (L) Is this what has been referred to in the Bramley book [Gods of Eden] as the Brotherhood of the Serpent or Snake?

A: Yes.

Q: (L) Is this also what you have referred to as the Quorum?

A: Close.

Q: (L) So, we have a bunch of people who are playing with mathematics, and playing with higher knowledge, basically as a keep busy activity to distract them at the human level from the fact that they are being manipulated at a higher level. Is this what is going on? Or, do they consciously know what they are doing? Is it a distraction or a conscious choice?

A: Both.

Q: (L) If I were to name some names, could you identify if named individuals were involved in this secret group?

A: It would not be in your best interests.

Q: (L) Is there anything more on this 33 number that I should look at now?

A: No. You need to contemplate.

Q: (L) The next question in the list is: You indicated that we should study the legend of Orion, and I looked it up in several sources, and basically the legend is of the perfect man, who fell in love with a woman, and her jealous father caused him to be blinded. The only cure was to gaze at the light, the goddess Aurora, to regain his sight. Can you tell us how this relates to the idea that Orion was the indigenous home of humans?

A: It is up to you to look for answers.

Q: (L) There was an interesting reference in one of the books of

the relationship of Orion to Scorpio, that Orion's bow is drawn at Scorpio. And, at one other point, you said that the physical bodies of mankind were molecularized, and ARE being molecularized, on a planet called D'Ankhiar, which is in the constellation Scorpio.

A: Yes.

Q: (L) What is the relationship of Orion to Scorpio? The Orion "bad guys," shooting at Scorpio which is the place of origin of the physical manifestation of the human race...

A: Bad guys?

Q: (L) Forget I said bad guys. "Shooting at Scorpio." Is there any relationship, symbolically, to the fact that the human bodies...

A: It is all interrelated.

Q: (L) The killing of Osiris, according to the legend, occurred on either the 28th day of Scorpio, or in the 28th year of his life. What is the symbology of the number 28, if any?

A: None.

Q: (L) This book describes the Nordic aliens as having blood with a different chemical base than ours...

A: This is trivial disinformation, "Nordic" Physiology is identical to yours, with the exception being their cranium, which averages 3 per cent larger. Discuss for insight. Must end session.

Q: (L) Thank you.

END OF SESSION

3.47 November 18, 1995

Frank, Laura, Terry and Jan

This is another session that is far more interesting in retrospect, after 9-11-01 when all of the elements discussed herein appear to have come into play. Plus, I would suggest that the direction this session took was triggered by the words “terrorist bombings”.

Q: (L) Hello.

A: Yes.

Q: (L) Who do we have with us?

A: Rindr.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) We have several questions... are we ready?

A: Certainly.

Q: (L) Is there any relationship between all of the terrorist bombings that have been taking place in Paris recently, and any stepped up alien activity?

A: Open.

Q: (L) Is there anything we can obtain on that subject by formulation of correct questions?

A: USAir-194 crash; United Air crash, Colorado Springs; Connection? Get voice recorder tape transcripts.

Q: (L) Is this in some way related to the question about the Paris bombing?

A: No.

Q: (T) This is related to what they were talking about last week, the bases turning 4th density, a plane flew into it and crashed.

A: Assumption! Strobe lights are used for 3rd density mind control.

Q: (L) Strobe lights located where?

A: Not a question asked with much thought!

Q: (L) You are right. I was just trying to open the subject. (T) What does strobe lights used for mind control have to do with the air crash?

A: Just let it flow. As you will see, past sessions of this nature have yielded best results for you. We have picked up your thought waves, which are progress oriented, and are trying to assist you in your increased learning and progress frequency wave. You see, this increases the energy level!!

Q: (L) Okay. We will just let it flow, then.

A: It is advisable to ask questions, but be unconcerned with the nature or content of the answers beforehand.

Q: (L) Do you wish us to go back to the statement about strobe lights being used to control minds, and pick up and go from there?

A: Best not to continuously ask us for advice on how to ask the questions, or if this or that is okay, but rather just “shoot from the hip.”

Q: (L) Okay. You mentioned the strobe lights. Are these strobe lights that are used to control minds, are these something that we would or might come in contact with on a daily basis?

A: Do you not already know? We didn't say: some strobe lights, we said: strobe lights, i.e. all inclusive!

Q: (T) Strobe lights come in many forms and types. TV is a strobe light. Computer screens are a strobe light. Light bulbs strobe. Fluorescents strobe. Streetlights strobe.

A: Police cars, ambulances, fire trucks... How long has this been true? Have you noticed any changes lately??!!??

Q: (F) Twenty years ago there were no strobe lights on any of those vehicles mentioned. They had the old flasher type lights. Now, more and more and more there are strobe lights appearing in all kinds of places. (L) And now, they even have them on school buses! (T) And the regular city buses have them too, now. (L) Okay, is the strobing of a strobe light, set at a certain frequency in order to do certain things?

A: Hypnotic opener.

Q: (L) Can we say that this is something we are being acclimated to, so that other things that happen to us in terms of our interactions... it just keeps one in a continual state of hypnosis?

A: Assumptions restrict the flow!

Q: (L) What is the purpose of the hypnotic opener being used in this way?

A: You don't notice the craft.

Q: (L) Ohhhhhhhh! So we may be being continuously flown over by alien craft...

A: Assumption!

Q: (L) Sorry! (T) Okay, we don't notice the craft because we see the strobes. They are hypnotic openers and are inducing a hypnotic effect...

A: Assumption!

Q: (T) Okay, continue, then.

A: Well, ask a question, then!

Q: (L) Okay, they are telling us not to assume, but to ask. (T) Okay, what craft are we NOT seeing?

A: Opener. Is precursor to suggestion, which is auditory in nature.

Q: (T) What suggestion?

A: Put on your thinking caps. Networking is not making assumptions. Bold unilateral statement of “fact” is.

Q: (T) Oh. Phrase your statements in the form of a question! I’d like “Hypnotic Openers” for \$200, Alex! Cosmic Jeopardy! (L) Okay, you said the “suggestion is auditory in nature.” If this is the case, where is the suggestion coming from auditorily?

A: Where do you normally receive auditory suggestions from?

Q: (L) Radio, television... (T) Telephone... (L) Is that what we are talking about?

A: Yes.

Q: (L) If you encounter a strobe while driving, or you are sitting in front of your television, then the suggestions can be put into you better because of this hypnotically opened state? Is that it?

A: Yes.

Q: (L) What are these suggestions designed to do, to suggest? In a general sense?

A: Review.

Q: (L) Not see the craft?

A: Yes.

Q: (T) Do we get these signals from the radio in the car even if it is turned off?

A: Depends upon whether or not there is another source.

Q: (T) Another source such as?

A: ELP, for example.

Q: (L) What is "ELP?"

A: Extremely Low Pulse.

Q: (T) ELF, Extremely Low Frequency, and ELP, Extremely Low Pulse - is this the same thing?

A: Sometimes.

Q: (T) This would be an external pulse or frequency?

A: Yes.

Q: (T) Would it be originating from the source of the strobe?

A: No. They act in unison.

Q: (T) Two separate sources acting in unison?

A: Close.

Q: (L) And this process prevents us from seeing something, such as craft flying in our skies at any given time?

A: Or maybe see them as something else.

Q: (L) Now, we have to stop for a minute because I want to tell you something. In the past few months, I have really been watching the sky carefully every opportunity I get. On 3 or 4 separate occasions I have seen what I thought was an ordinary airplane, and I would watch it carefully and then scan to the left or right,

and when I looked back at the place where this plane should be, based on observable speed and direction, there would be NOTHING there. I have stood there and searched and searched and found nothing. These things just VANISHED. I knew I had seen it, I knew I wasn't crazy, I knew it couldn't have gone away that completely - and having it happen several times has just really unsettled me. What are the implications of this, other than the fact that we could be completely overflowed at all times for any number of purposes and be, as a mass of people, completely unaware of it?

A: Yes, monoatomic gold!

Q: (L) And what does the reference to monoatomic gold mean?

A: Total entrapment of the being, mind, body and soul.

Q: (T) That's what Hudson said... on the video.

A: Strobes use minute gold filament.

Q: (L) How can that compare with taking monoatomic gold internally?

A: What composes minute filament, do you suppose? Hint, it ain't from Fort Knox!

Q: (T) Monoatomic gold.

A: Bingo. You see, this has extraordinary properties.

Q: (T) I'm sure it does! The thing is, if it does what Hudson says it does, the power structure would have shut him down - he wouldn't have gotten this far with it. So, if they are letting him do it, it's because it doesn't do what he says it does, it does the opposite. Which is what he said. When you take the stuff for so many days, you complete the program, it restructures your genes. Isn't that what happened to us before? Do we want to do

it again? (L) And, wasn't it said that LIGHT was used to cancel certain DNA factors? (J) Exactly! (L) Okay, how do we block this kind of control?

A: You don't.

Q: (L) Let me ask this, Chuck D volunteered to act as my bodyguard and went with me to do the lecture down in St. Petersburg last night. He asked an interesting question. It was, if we know what he thinks we know, and if we are building the kind of strength that he thinks we are building, and getting factual information about all such things, why hasn't somebody, either on 3rd density or 4th density, seen fit to stop us, or block us, or whatever. Of course, I did explain to him the level of attack and obfuscation and many other things we have had to face... but, in another sense he was asking very plainly why has something physical not been done to, as he put it, "take us out?"

A: The powers that be want slow release of information.

Q: (L) Does this include the 4th density STS?

A: No, but they don't see that which they do not wish to see.

Q: (L) They don't see us as a threat?

A: More like an annoyance. By the way, why is not Chuck more participatory???

Q: (L) Is that a rhetorical question? Or, are you asking me?

A: Either, or.

Q: (L) Chuck is very curious. But, why don't you tell us?

A: Be more direct in your informational campaign, Laura, rather than trying to stimulate reactions by way of roundabout actions and statements.

Q: (L) Are you saying I should be more direct with Chuck, specifically?

A: Direct appeals always work much better, but you have a fear based aversion to them, which is related to early childhood interactions with your mother. We are trying to aid you with a bit of insight to assist you in your progress.

[break]

Q: (L) Okay, I want to ask about the experience I had the other night - are you still there?

A: Why do you always ask that, do you expect us to take a coffee break?

Q: (L) Okay, I had what seemed to be an OBE the other night. Was I actually having one?

A: Was an “all intensive ooze” of the solar realm.

Q: (L) What? (T) You asked! (F) Well, now THAT’S completely clear! (L) Sarcasm will get you nowhere, guys! (T) That’s about as clear as ooze! (L) Okay, what is an “all intensive ooze” of the solar realm?

A: Realms are compartmentalized at graduated levels, like everything else. The root basis of the study of Astrology is the “unified entity realm,” which relates to the effect that local cosmic bodies have upon the body and soul of third density beings in any given locator.

Q: (L) So, what does this mean in terms of what I experienced? I felt that I was moving in and out of my body over and over, sort of like doing an exercise.

A: Solar activity occurring when your experience took place was such that, based on your “solar return,” had the effect of partially

separating your soul from your body. Now, just for fun, why not check your chart for that day, and see if the aspects were a little more favorable for expiration of the body potential than usual?

Q: (L) Now that I have been able to play with it a little, will I experience it again, or can I?

A: Well, it is always experienced at least once in the lifetime of a human being, but for most people, it occurs at the conclusion.

Q: [much laughter] (L) You mean I died? Or was this what people experience when they die?

A: Yes, but you got to come back in time for dinner!

Q: (F) I guess that's mirth! (L) So, that wasn't just an OBE, it was a separation of the soul from the body? Is that the same as astral projection?

A: No.

Q: (L) Do people who have OBE's experience this?

A: With "astal projection" the consciousness level is not as intense because of "the silver cord" and the shroud of third density awareness.

Q: (L) You guys just don't know how intense this experience was. I was SO conscious of EVERYTHING. (T) More conscious than you have ever been before, right? (L) I have to say yes. I was playing with what was happening to me and having fun. I noticed every little sensation. The separating from the body produces a sizzling sound, a sort of electrical sizzle, and it changes as you move in and out of the body. I knew what I was doing. (T) In astral projection, the soul is still connected to the body. In this case, was Laura's soul completely separated from her physical body?

A: Not completely, but the part that was, was.

Q: (L) Well, I did sort of keep a toe in. (T) This is almost the same thing that Dannion Brinkley described in his book. So, if Laura had lost complete connection, would she have died at this point?

A: Yes.

[break]

Q: (L) I had a safari dream. I dreamed we all went to Africa, and I got some information there, something was given to me, and I put it in my pocket on the right side. And then, just a few days later I had the experience where I felt a danger, something probing in the direction of my mind, and a protective device shot up out of my lower right abdomen, like a rocket. And the next day, I noticed a small, deep, wound at that spot. What was this?

A: Energy surge.

Q: (L) Why out of the area of the ovary?

A: Magnetic plane weakness there.

Q: (L) So, is it beneficial to be able to do this.

A: Maybe.

Q: (L) Is this something I learned in this dream, that we can all learn to do in some way?

A: No need.

Q: (L) Well, it seems that having the body automatically erect defenses when a threat is felt is a pretty handy talent to have.

A: Sure, in 4th density.

Q: (L) Was this a 4th density action, or ability?

A: Close.

Q: (L) Did something actually exit my body and leave that wound?

A: Already answered.

Q: (L) Okay, it was an energy surge. Did this energy surge leave a wound in my body?

A: Yes.

Q: (L) Where did the energy surge emanate from?

A: Learn naturally as you evolve. Good Night

END OF SESSION

3.48 November 25, 1995

Frank, Laura, Susan V

Terry and Jan had announced that they weren't happy with the Cs and were going to start their own experiment with another fellow, Andrew B, who happened to also be a self-proclaimed black magician of the Golden Dawn variety. I had already noted a distinct negative energy in some sessions (particularly those that were direct channeling), when they were present. At other times, the energy was very good. And, as things turned out years later, T & J may very well have been a balancing influence overall.

Q: (L) Okay, we have some questions for tonight...

A: What, no greeting?

Q: (L) Hello, how are you?

A: Fine, thank you, how are you?

Q: (L) We are fine. A little bit frazzled, but I am sure you are aware of that.

A: Yes.

Q: (L) In terms of this frazzled state, would you care to address that or do we need to ask questions?

A: Who are we?

Q: (L) Sorry. Who do we have with us tonight?

A: Jilliore.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Getting back to the subject, should we ask questions, or do you have something to address to the issue?

A: Up to you.

Q: (L) I would like for you to address the issue in a general way.

A: Learning can be a painstaking task.

Q: (L) Yeah. It is painful! We have been really learning. And one of the things we have been learning is that some people are sometimes detrimental to the process here. Can you comment on this?

A: Those you refer to must learn what they must learn.

Q: (L) They are on their own learning path?

A: As are all others.

Q: I don't have any bad feelings about any of it, but at the same time, I am not emotionally equipped for turmoil just now. I have enough of my own. I was curious if Andrew B was planning on

pursuing the issue of channeling on his own or in company with T&J?

A: Yes.

Q: (L) Andrew has said that he can only validate material such as this by bringing it in himself, and T&J seem to be of the same mind at the moment. Will they be able to connect in a similar way?

A: They will channel that which their frequency vibrational level dictates.

Q: (L) Okay. Enough on that. (F) I am just curious as to how long this experiment will last? But, that is probably unimportant. (L) It will last as long as it lasts and not a minute longer! (F) Exactly!

A: If you wish, you may maintain contact, and ask for updates in a friendly and informative way. The results will amuse you, if nothing else.

Q: (L) Enough. The other day I experienced one of those extended pre-sleep states, and it seemed that I was in a class and there was someone explaining things to me. What they were telling me was that during this Christmas season [the Christmas season of the dream], certain steps would be taken by those controlling the economy, and that after Christmas, in January and February, a whole lot of stuff was going to be put into motion to send the economy into a dive of major proportions. It was not clear that it was THIS year, but that it was right after a Christmas. Can you tell me where this information was coming from, and what was I experiencing?

A: This is a long and complicated subject, but we will do our best to explain it. What you were seeing was one possible future. The economy of our 3rd density world is entirely manufactured. The forces that control it are both 3rd density and 4th density. There

are conflicting opinions in the 3rd density sector right now as to when, where, and how to institute an economic depression. This has been “in the works” for quite some “time” as you measure it. So far, the forces arguing against institution of a collapse have prevailed. How long this condition will be maintained is open to many outcomes. Also, please be aware that the state of the economy is entirely an illusion. In other words, the world economy performs solely based upon what the population is told to believe.

Q: (L) Well, that is all fine and good except for one fact that I have been observing lately, and that is that prices continue to go up, and wages for the average person do not. I watch prices, and they have been jumping in a very erratic and frightening way. I know for a fact that people simply cannot afford to live. A large segment of the population cannot, that is.

A: Nobody who obeys the “rules” can afford to “live,” but if you refuse to play the game as you are told to, you will do quite well, indeed.

Q: (L) Okay. What do you mean by not playing by the rules? What rules?

A: The best way for us to answer that is for you to think out loud, and wait for our responses.

Q: (S) Rule one would be working at a regular job, 9 to 5, or 40 hours, whichever, and saving all your money and putting it in the bank.

A: Wait, one at a time.

Q: (L) Okay. The first one is that you have to have a “regular job.”

A: “Trap” number one!

Q: (S) Rule number two is that you have to save your money.

A: You save your money by multiplying it, not storing it.

Q: (L) Are you saying that putting it in a bank is “storing” it?

A: Yes.

Q: (L) Are you saying that money is only “saved” if it is multiplied?

A: Yes. When you store it in the bank, you are helping the Brotherhood AKA Illuminati AKA Antichrist multiply it for itself, all you get is the “crumbs” left over. And, the Antichrist can “call it in” anytime it wants to!

Q: (L) One of the most popular ways to make money by investing is in the stock market. But, it seems to me that the stock market is also part of the Antichrist system and investing there would also amount to only getting “crumbs.”

A: Yes and no. Not all stocks traded publicly are under direct control of the Illuminati.

Q: (L) Are you suggesting the stock market as a means of multiplying money?

A: We are not suggesting anything specific, we are just laying the groundwork. With the general clues we give you, you will figure out the details yourselves, which is tantamount to learning, which is how you progress as souls.

Q: (L) You said we should multiply our money and that storing it is not making it work for you....

A: If you notice, all successful business people do this. They multiply their money, expand their horizons, continuously. They multiply their money by multiplying their output, thus their intake likewise. And the process is never ending, because they understand instinctively that it is part of a cycle. For the intake to

continue, it must not be only retained, but must increase in order to keep pace with the ever spiraling cycle of increase and expansion. And, for this to happen, the output must be expanded accordingly. When it stops, it collapses. And this is how the Illuminati AKA The Brotherhood AKA The Antichrist creates a “Panic,” by stemming the flow, even only slightly, and then broadcasting the created impression aggressively.

Q: (S) Well, investing is fine if you have money, but Laura and Frank don’t have any money to invest. What would be a way for them to do this?

A: One example would be to share their experiences, insights, and learnings. One way to replicate such would be to publish, for example.

Q: (L) I know you are 6th density light beings and we are just 3rd density humans, and it is hard for us to continue what we are doing when under constant attack from all directions, internally and externally. I don’t see how we can tell about all these experiences without risking further problems.

A: The work has not been stopped and will not be. You have been told that publishing all or parts of your work is merely “a phone call away,” but, as of yet, you have not had faith in that statement, and you have problems asking for what you want for fear of creating the wrong “impression,” which is in your head and also a part of the attack process. We have lead you to this position, but you know what they say: “You can lead a horse to water...”

Q: (L) Phone call? Let me say that I have sent out piles of material and talked to people until I am perfectly exhausted. YOU tell me who to call and I will be happy to do it!

A: You have expended an enormous amount of energy commu-

nicating with many sources, but most of these are fruitless. Now, think, who was it that told you how to get published???

Q: (L) I have talked to Ken E___, talked to Roxanne, sent sections of manuscript... what more am I supposed to do?

A: As we said, you have a problem approaching the situation directly. For example, say: “I want to be published, please help me get it done!!!”

Q: (F) How?

A: We have told you to network!! This works wonders!!! When you write letters, they get filed in the “circular file.” Ask those who have been published how they did it and how to do it. Don’t be afraid of impressions.

Q: (L) Well, publishing still seems like a distant thing.

A: No. Ask Valerian. Ask him to help you get published, point blank, no beating around the bush. He will be very receptive if you offer him a “cut of the action.” In fact, that is what he is waiting for!

Q: (L) Okay. That takes care of Frank and me, what about Sue?

A: Susan is part of the picture for as long as she wishes to be. Good night.

END OF SESSION

3.49 December 2, 1995

Frank, Laura

Q: (L) Hello, is anyone there? Do you still love us?

A: Silly Billy!

Q: (L) Well, sometimes one needs a little reassurance! Who do we have with us tonight?

A: Rommolah Cassiopaea.

Q: (L) As you know, T&J were here last night and I felt a lot of very strange sensations, as though there was something very dark that came in with them. My stomach was actually hurting. What is going on?

A: Specifics.

Q: (L) Is there some negative energy there?

A: Is chided.

Q: (L) What does that mean?

A: As your learning center library.

Q: (L) Okay, the dictionary says: to scold, to reprove mildly. Who is scolding him?

A: These are the circumstances unfolding.

Q: (L) The circumstances unfolding are going to chide him or are in the act of chiding him?

A: The latter.

Q: (L) Well, I sort of felt an energy that was NOT him, but that was following him and came in with him. I even thought I heard it say: "He's ours!"

A: If attached, it is a "fluid" situation.

Q: (L) Well, they were both talking about plans to start another channeling group with Andrew B__ and then another still after they move away, because they are now talking about moving to Tallahassee. So, obviously they do not now, nor does it seem that

they ever had, any intentions of being permanent group members. Or did I misunderstand?

A: Obviously.

Q: (L) Well, I am sorry that they feel this way. I have essentially prepared all my life to do this, and so has Frank. They have helped a lot.

A: Group would have too many chiefs and not enough indians.

Q: (L) Now, this situation going on with Roxanne has made me think that I ought to decline editing her magazine. Any comment?

A: Beware not to misread. Roxanne is strongly influenced in her behavior by biological cycles.

Q: (L) So, I should just let it pass?

A: Yes.

Q: (L) Well, I thought the magazine was a good idea...

A: Let the “flow” guide you in decisions regarding your actions.

Q: (L) That is pretty much what I try to do. Well, if Roxanne is being influenced by biology, and Terry is being chided, what is happening to me? I mean, I get dumped on by one, and then less than 12 hours later I get dumped on by the other, and then my husband dumps on me on top of all of it and it is just more than I can handle.

A: Suggest ventilation of room. Ionizing factors level balance.

Q: (L) [Open windows] Do the ionizing factors have anything to do with the people who have been in this room in the past few days?

A: All connects. You may close the windows later for comfort after balance is restored.

Q: (L) When we did the session on October 21st, we were talking about robotoid type people, or reanimated humans, and that this is what is done rather than cloning and replacing. Then you said I had been in contact with 7 of these, and we identified one of them. Then, we talked about profiles, and it was indicated that a “bland” personality might have something to do with identification. You also said that you could not identify the others right at that moment. Can you now do so?

A: Search your “files.” Learning is sometimes best accomplished by study and exploration.

Q: (L) Can I have a couple more clues as to what I am looking for? You mentioned being in a hospital..

A: Non-emotive. There are other clues which you can discover by your own study. It would not be advantageous for us to give you further information on this subject. Speculation about this particular subject will throw you off track.

Q: (L) Is the subject as important as I think it might be?

A: Ultimately, but not yet!!

Q: (L) I did an interview that was taped and broadcast on a local television station. I am curious as to whether that will lead to any further similar activity?

A: Like a pot on rising boil.

Q: (L) Let’s get off the personal things and onto interesting things.

A: Thank you!

Q: (L) Did the Germans construct a time machine during WWII?

A: Yes.

Q: (L) They actually did it?

A: Ja.

Q: (L) Were the German experiments in time travel carried to the U.S. after the war?

A: In splintered form.

Q: (L) Did the U.S. take possession of a time machine constructed by the Germans?

A: No.

Q: (L) Why not?

A: Was taken elsewhere.

Q: (L) Where?

A: Mausenberg, Neufriedland.

Q: (L) Still in Germany?

A: Nein!

Q: (L) Where is Mausenberg?

A: Antarktikiandt.

Q: (L) Who is in control of or running this machine?

A: Klaus Grimmschackler.

Q: (L) I didn't mean a specific person, a group. Americans or Germans?

A: Deutsche.

Q: (L) Did they use this machine to transport themselves there and also in time?

A: Has been performed in Glophen in gestalt, bit, yie aire das gluppen und werstalt de vir seinderfor bidde.

Q: (L) Why are you giving this so that we don't understand?

A: Sorry, got the transmissions mixed up due to subject matter.

Q: (L) Getting back to this German time machine: did the Germans capture a crashed, or retrieve a crashed, UFO during the war?

A: Yes.

Q: (L) Who was flying that craft - excuse me - OPERATING that craft?

A: Grays.

Q: (L) Were the Germans able to back engineer and construct other craft similar to the one they captured?

A: Did not need to. They got the information on such things from channeled sources.

Q: (L) Did the Germans get the information from the Vrill Society?

A: Partly. Also Thule Society.

Q: (L) These individuals who have this time machine in Antarctica, what are they doing with it or what do they plan to do with it?

A: Exploring time sectors through loop of cylinder.

Q: (L) What is a loop of cylinder?

A: Complex, but is profile in 4th through 6th density.

Q: (L) Are there any particular goals that they have in doing this "time exploration?"

A: Not up to present, as you measure it.

Q: (L) Well, if they escaped and took this time machine to Antarctica, are they working with any of the so-called “aliens?”

A: 4th density STS.

Q: (L) Are these Germans and their time machine, any part of the plan to take over earth when it moves into 4th density.

A: Maybe.

Q: (L) Are the Germans behind any of the conspiracies in the US?

A: No.

Q: (L) So there is a maverick German element, but to focus on that as being the foundational aspect of this phenomenon, is to focus on the wrong thing?

A: Maybe.

Q: (L) Among the things that were discussed among the Germans in the Thule Society and the Vril Society, was the “Black Sun That Illuminates the Interior.” Can you tell us what this “Black Sun” is?

A: Ultimate destiny of STS orientation.

Q: (L) Is this Black Sun an actual astronomical phenomenon?

A: In essence.

Q: (L) What would we know this Black Sun as? A black hole?

A: Good possibility.

Q: (L) A little off to the side, but is there any Japanese connection here?

A: Only to extent of level of participation in “secret” world government.

Q: (L) Terry has a theory that the United States is so greatly in debt to the Japanese, and that they are going to default on their obligation and cause the Japanese government to fail, and that the Japanese and some others are going to be played as the “bad guys,” once again, as they were in WWII. Is this a plan in the making?

A: No.

Q: (L) Why did the X-Files have an implied Japanese experimental conspiracy blamed for the UFO/alien activity in the United States? Why are they presenting the Japanese as the Bad Guys?

A: Remember, the “X-Files” has a fictional basis.

Q: (L) I saw a film at Roxannes’s house last month where very strange UFO’s were seen, and she called them Merkabahs. They were like gigantic, translucent, living creatures - sort of like jelly fish - and they would appear and fade... what were these things?

A: 6th density manifestations through realm precursor wave influence pockets.

Q: (L) It seemed that the person who was filming these things could literally call them up. How was he able to do that?

A: Magnetic trine of loco-points on grid matrix interact with thought form projections.

Q: (L) Does this mean that there is something extraordinary about the person?

A: Just from subconscious parallel transformation standpoint.

Q: (L) Is there some way we could manifest one of these critters if we wanted to?

A: Would be exceedingly difficult, as loco-matrix is not currently in your favor.

Q: (L) So, it is partly a function of location, a grid, if you will?

A: Yes.

Q: (L) Speaking of that, Roxanne wants to move to Sedona, and she says that one of reasons she wants to do this is because “Florida is low density,” in her opinion, and “Lizzieland,” and full of negative entities and energies. Is this an accurate assessment?

A: What do you think?

Q: (L) Well, I sometimes wonder... I am sure I could be a better person...

A: All could always be better, but judgments made in haste as an emotional reaction to events, and generalized in nature, are bound to be rife with emotionally induced prejudice.

Q: (L) Does this mean that it is possible that she is jumping out of the frying pan into the fire by moving off to “alien-land” out there in the Southwest?

A: Of course! As you well know!

Q: (L) I feel sorry that she feels this way, and that she is possibly putting herself into danger because she does not seem to be thinking clearly right now, and there does not seem to be anything I can do or say. She is just adamant that Florida is a horrible place because of what happened to her here. In a way, I feel insulted.

A: Use your instincts to guide you in your associations.

Q: (L) Now, switching gears: while watching the alien autopsy film, we saw a massive organ that occupies the whole center of

the abdominal cavity. What was that?

A: Heart/liver.

Q: (L) A combination of both in one?

A: Yes.

Q: (L) They also carefully removed a solid or hard object which they then put in a small container. What was this object?

A: Crystal transceiver.

Q: (L) What was all the loose matter?

A: Organic tissue. Not important.

Q: (L) Was it a female or a male?

A: Both and neither.

Q: (L) Was it a being that could reproduce sexually?

A: No.

Q: (L) What kind of nourishment was required by that being?

A: Saline gelatin globules.

Q: (L) Did it eat as we do, through the mouth?

A: Cordates.

Q: (L) What? What is that?

A: Applications using biological microforms to metastasize through primary glandular channels. [See note at end.]

Q: (L) Did that being use oxygen as in breathing?

A: Yes.

Q: (L) Where were the lungs?

A: Side of dorsal cavity.

Q: (L) I have read about a species of Gray aliens that are VERY tall and have “rows of teeth.” I assume that this means more than one row of teeth. What are they?

A: Biogenetic constructs.

Q: (L) You said once before that there was 16 species or groups on both sides of the “conflict” on the planet. That is, STS and STO. Have we known or experienced any interactions with other so called “good guys?”

A: Not as of yet.

Q: (L) Can you tell me anything about young Dom, who seems to be surprisingly well-informed for one so young?

A: Discovery and observation, bearing in mind previous learnings in order to build profile.

Q: (L) Who and what are the Mantid type beings that were seen in Mexico and purportedly caught on film?

A: Elapiddorian.

Q: (L) Where are they from?

A: Orion.

Q: (L) What are they here for?

A: Interaction study, are project of Minturians, as they resemble physical profile. Is study to determine compatibility with 3rd density surface equation.

Q: (L) They are trying to learn if they can manifest on Earth?

A: After realm border crossing.

Q: (L) Just when is this realm border crossing gonna happen?

A: Open!

Q: (L) I tried! Now, tell me about Val.

A: Learn through active pursuit of contact and observation.

Q: (L) Do you think he would ever come to a session?

A: Maybe.

Q: (L) This year the UFO conference in Gulf Breeze is in the Spring. Is this the one we are supposed to go to?

A: Yes.

Q: (L) Why is my husband being such a jerk lately? I know that is a personal question, but I can't handle the stress.

A: Jerk is subjective.

Q: (L) I know. But I need some advice.

A: Just combine spiritual resources... and Good Night!

END OF SESSION

Chordates form a phylum of creatures that are based on a bilateral body plan, and is defined by having at some stage in their lives all of the following:

A notochord, in other words a fairly stiff rod of cartilage that extends along the inside of the body. Among the vertebrate subgroup of chordates the notochord develops into the spine, and in wholly aquatic species this helps the animal to swim by flexing its tail.

A dorsal neural tube. In fish and other vertebrates this develops into the spinal cord, the main communications trunk of the nervous system.

Pharyngeal slits. The pharynx is the part of the throat immediately behind the mouth. In fish the slits are modified to form gills, but in some other chordates they are part of a filter-feeding system that extracts particles of food from the water in which the animals live.

Post-anal tail. A muscular tail that extends backwards behind the anus.

An endostyle. This is a groove in the ventral wall of the pharynx. In filter-feeding species it produces mucus to gather food particles, which helps in transporting food to the esophagus. It also stores iodine, and may be a precursor of the vertebrate thyroid gland.

3.50 December 12, 1995

Frank, Laura, Susan V

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Tira.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) I am sorry but I have some personal questions tonight before we get started with other things. I would like to know what is the reason for this terrible depression I have been experiencing for so long now. I am sick of it.

A: It is a crushing attack.

Q: (L) Where is it coming from?

A: 4th density STS.

Q: (L) What can I do to break it before it breaks me?

A: Counteract.

Q: (L) By what? How do you counteract the things that are just beyond one's ability to deal with?

A: How is the attack represented in 3rd density for you?

Q: (L) How? Because it seems that my husband does not love me. I do not feel safe or in any way able to function as a wife and mother with this feeling, and I know that it must be a misperception on my part, but I cannot help but feel this way. How can I get over this feeling that he is constantly trying to break me into pieces [psychologically]? Not only do I have to bear the constant burden of the children with no support, the house, managing everything, but I also am continuously sniped at by him. None of my feelings are ever considered. I feel like I am being shoved over and buried by a bulldozer. Is that what you want to know?

A: You are diverting by secession.

Q: (L) What do you mean?

A: What is the definition of "to secede?"

Q: (L) To leave a union. To step out. To break a union.

A: Attack is not countered by following objectives of attack.

Q: (L) What are the objectives of this attack aside from crushing me?

A: Secession at an inappropriate juncture to throw plans askew.

Q: (L) What plans would be thrown askew by secession at this point?

A: Voice.

Q: (L) What?

A: And all other.

Q: (L) Well, I just feel that I would plunge into a pit if I had to secede, as you put it.

A: Suggest ignoring “snipes” and other unpleasantness, as it is not of your being, thus should not be taken “to heart,” and when taken thusly, causes emotional disturbances which manifests as depression and related maladies. These ailments tend to grow in scope and intensity, thereby causing severe damage to plans and activities aimed at executing ones “mission.”

Q: (L) That’s all fine and good. But, just exactly what is the mission?

A: You are awakening to it just fine, thank you!

Q: (L) Are you saying that all this constant discussing and taking things apart and talking about them and thinking about all these things is actually getting us somewhere?

A: Absolutely!!!!

Q: (L) Well, let’s get on with the questions. Is the magazine or some other mode of getting information out part of this “mission?”

A: When you have learned, you have energized yourself.

Q: (L) What does that mean in relation to the question?

A: Lead by the hand? No way, Jose‘!

Q: (L) Frank and I discussed a name for the magazine last night and we came up with - and who knows how - Aurora to symbolize the dawn, waking up... that sort of thing. Where in the world did this come from?

A: Refer to the previous 2 answers.

Q: (L) Any comments?

A: No need, you are doing just fine by yourselves.

Q: (L) (S) What did you expect them to say? "Atta girl!?" (laughter) Will the magazine support itself?

A: We are not going to answer that as it would violate level one directive.

Q: (L) What is a "level one directive?"

A: Refer to last answer.

Q: (L) Well, fine! I want to know! Is there some place that gives out orders?

A: You will know when it is right, and not before!

Q: (L) I want you guys to know that I sometimes feel a wee tiny bit like a pawn on a chessboard!

A: You should, you inhabit 3rd density STS environment.

Q: (L) I was at least hoping that if I was a pawn, that some of the players were good guys. Is that asking too much?

A: Yes.

Q: (L) To which statement?

A: Good guys don't play chess.

Q: (L) But there have been so many strange events, so many synchronous events. Is that the good guys helping or the bad guys leading me astray?

A: Neither. It is Nature running its course.

Q: (L) Okay. One of the sensations I have experienced is that I have had it up to the eyebrows with the negative energies and experiences of 3rd density, and I have thought lately that this feeling of having had enough, in an absolute sense, is one of the primary motivators for wanting to find one's way out of this trap we are in. I want out of it. Is this part of this "nature" as you call it?

A: Yes.

Q: (L) When a group of people...

A: When you see the futility of the limitations of 3rd density life, it means you are ready to graduate. Notice those who wallow in it.

Q: (L) Some people obviously wallow in extreme materiality. And there seems to be another kind that is more subtle, which has to do with saying that you want to grow and become enlightened, and yet such a person is unable to pierce the veil of their own illusions about how to become enlightened, and this illusion is the wallowing...

A: Wallowing takes many forms.

Q: (L) Among the things I have noticed is the type of person who says: "This is my LAST life! Swami So-and-so told me!" And they are wallowing in the enjoyment of the adulation they receive from their followers who believe that sort of thing can be known.

A: Sometimes, but avoid stereotyping, because sometimes they are correct!!!

Q: (L) Okay. I am not trying to stereotype.

A: More often, the sign is someone who does not feel alienated by the obvious traps and limitations of 3rd density.

Q: (L) Well, that says a lot. One of the questions on the list is: In many of the Sumerian drawings and literature, the gods, the Annunaki, are described as eating a plant that grew at the bottom of the ocean, and this plant was the source of eternal life.

A: Nonsense! The source of eternal life is existence!

Q: (L) Well, the point was that there was some sort of food that these beings ate that was unusual or different that somehow enhanced their abilities to an extreme degree...

A: Totally false and you should know it!! All so-called “special powers” come from non-physical sources!!!

Q: (L) Carlos Castaneda talks about the “Eagle’s emanations,” the Eagle being, I suppose, Prime Creator that emanates down through all the densities, and that the Nagual who can “see,” sees the Eagle as a large black and white object. Are they seeing the source, or are they seeing something on just another density?

A: Source? There is no such thing.

Q: (L) You mean there is no Prime Creator, no origin or source of our existence?

A: You are Prime Creator.

Q: (L) But that is so esoteric... I am talking about...

A: The point is: stop filling your consciousness with monotheistic philosophies planted long ago to imprison your being. Can’t you see it by now, after all you have learned, that there is no source, there is no leader, there is no basis, there is no overseer, etc... You literally possess, within your consciousness profile, all the power

that exists within all of creation!?! You absolutely have all that exists, ever has, or ever will, contained within your mind. All you have to do is learn how to use it, and at that moment, you will literally, literally, be all that is, was, and ever will be!!!!!!!

Q: (L) That is all fine and dandy and sounds wonderful, except for one little item. You also say that the monotheistic concepts were IMPOSED on us to prevent us from knowing this. So, if we are all that is, how can something exist that can impose something so unpleasant on us?

A: Choices follow desire based imbalances.

Q: (L) If that is the case, why can't any one just turn off the lights, end the illusion, and everything becomes nothing?

A: Well, first of all, everything does not become nothing. Secondly, some have already become everything.

Q: (L) Terrific! And I understand that we are digging our way out of this particular illusion. And that is rather profound a thing to say to someone still stuck in the mire. I really want to find out, but it is hard. I have to think about that for a while. So, let me ask some questions for my daughter. A__ wants to know what the core of Jupiter consists of?

A: Basal. In 3rd density it is known as irridium.

Q: (L) What is the diameter of the solid core?

A: 3 microns.

Q: (L) Are you saying that Jupiter is gassy and slushy all the way through?

A: Yes.

Q: (L) So Sitchin and others may not be correct in saying that Jupiter has an earth sized solid core?

A: If that is what they are saying , but remember, Jupiter, Saturn and others resonate to vibrational levels greater than Earth. You are looking directly at density 4 when you view Jupiter, which is why photos of it from up close appear “surreal,” more like drawings.

Q: (L) Do beings inhabit Jupiter?

A: 5th density and up.

Q: (L) Are there any organic beings on Jupiter?

A: Organic is 3rd density concept.

Q: (L) So the probe will not detect any life?

A: No.

Q: (L) Is this probe that is going to plunge into Jupiter disturb anything there in any way?

A: No.

Q: (L) What is the internal 3rd density temperature of Jupiter?

A: 7000 degrees K.

Q: (L) What is the primary chemical composition?

A: Ammonia, hydrogen and nitrous oxide.

Q: (L) There is a rumor going around that a large object coming our way, that is a gigantic, intelligently controlled space craft, loaded with Lizzies. Could you comment on this please?

A: Comet cluster. Sitchin believes it is a “planet.”

Q: (L) In terms of this comet cluster, how many bodies are in this cluster as a discrete unit?

A: Variable.

Q: (L) What is the ETA?

A: Open.

Q: (L) Why is it open? Why can't we look at it and determine the factors, the direction, trajectory, velocity...

A: If you could, you would be interrupted in your learning cycle.

Q: (L) What exactly does THAT mean? (F) Because you would never do anything else because all you would think about is the day the comet is coming! (L) Well, speaking of that, I have had 3 death dreams and Frank has had one. I would like to inquire about them.

A: No comment. And Good Night.

END OF SESSION

3.51 December 16, 1995

Frank, Laura, SV

We had attended a Christmas party and, after a couple of drinks and snacks, decided we'd rather go home and chat with the Cs. Since I am a teetotaler all year and only take token drinks during holidays, that couple of drinks had an effect on me as you can see from the opening!

Q: (L) Hello.

A: Hello.

Q: (L) (L) I am slightly inebriated, in case you guys can't guess that already!

A: Okay.

Q: (L) Who do we have with us tonight?

A: Wimorio.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Of course we realize that this is just the point of transmission and that you don't LIVE there... Now, first of all...

A: Pretty bracelet.

Q: (L) Well! Thank you! My little son made it out of Christmas ribbon.

A: Little?

Q: (L) Of course we know he is not LITTLE, but he is still my little baby. My first question is about the economic situation we have discussed before [this evening]. All the things we have discussed among ourselves about this, relating to what was given about the economy before, could you tell us whether our views are at all accurate?

A: Accuracy is relative to juncture with possible futures.

Q: (L) We know there are several possible futures, but we think that a particular one is becoming more likely...

A: Refer to two sessions ago for answer to this.

Q: (L) We are still dealing with this by eliminating the myths, whether or not there is going to be an economic collapse we think that creative financial management is the way to go...

A: Yes.

Q: (L) Using these ideas, is Susan going to be able to manage her resources so that she has a higher return?

A: Yes. Susan is an innocent person when it comes to areas of investment and finance. Her current status was arrived at as the result of consults with others who did not necessarily have her best interests in mind!

Q: (S) I just want to be sure that if anything happens to my mom that I will be able to take care of her.

A: Move mother into living will. Does she wish to be kept alive by artificial means?

Q: (S) Definitely not. (L) Is that all for Susan?

A: Not yet. T Bills, commodities market, registered CD's, penny-stocks relating to conservation companies, such as offshoots of TRW and Georgia Pacific, etc. Do it now!!! Get some silver too, and liquidate remainder. Suggest 20 per cent in the form of new 100 dollar bills for safekeeping, the new currency only!! February 1996 bills issue. Place into safe along with silver.

Q: (L) How much in silver?

A: Up to her, also suggest a novelty gold coin or two.

Q: (L) (F) What commodities?

A: Grain futures and pork bellies best. Pork and other swine futures.

Q: (L) You said that my life would be straightened out and that this would happen through the internet. In fact, you said that my life would change suddenly and drastically...

A: Yes.

Q: (L) Yet, all I have experienced has been the most oppressive internal and external attack imaginable...

A: Benefits follow oppressiveness, what is it that you tell to others?? The darkness always precedes the dawn!

Q: (L) Well, I don't know which way to turn. I am not in a position to do anything about any of it just now.

A: Ask for help, silly!

Q: (L) I don't like to ask for help.

A: You have to.

Q: (L) That reminds me: Frank shouted at me tonight. (F) You shouted at me, too! (L) I didn't shout at you! And you shouted at me first! (F) I said I was sorry. And so did you. You forgot about it for a while. Why sulk now? (L) Because I want to sulk! Okay, we have taken care of Susan's questions, and we have decided to just let Laura suffer in the soup...

A: No.

Q: (L) What about Frank's situation?

A: Soon to improve.

Q: (L) I ran into Pat Z recently, can you comment?

[Woman who came for hypnosis session on the night that giant black boomerang type UFOs were seen in several places in our area, including over my house.]

A: Keep in touch with her, lest she "wane" in your regard.

Q: (L) I received an e-mail from a fellow who experienced something similar to what happened to me which you called an "eclipsing of realities."

A: It was an abduction by cyber-genetic probes whose origin, or more correctly, "station," is the 5th planet around Betelgeuse, known as A.Hur in Orion federation 4th density STS.

Q: (L) What was the purpose of this abduction?

A: Screen for compatibility for placement on shune, platter, within Mark Status 3.

Q: (L) What does that mean? Placement on “shune, platter”?

A: It is a demarcation status for compatibility of future “worker” status.

Q: (L) So, “shune” is a word used for that?

A: Close. Ask P if he has had headaches and or blackouts.

Q: (L) Was my experience the same thing?

A: No. It is the “same” from your view point only.

Q: (L) Is there any advice I can give P?

A: Tell him to keep in touch with you for more information.

Q: (L) Why haven't I heard from Val?

A: “Push buttons” more. Ask for more contact. Time to go. Good Night.

END OF SESSION

3.52 December 31, 1995

Frank, Laura, Susan V

The majority of this tape was indecipherable due to a constant static that drowned out most of the words. This is the best reconstruction possible.

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us?

A: Vira.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) We have a number of questions we want to cover tonight. The first thing is, in the early stages of this channeling process we talked about what it was we were supposed to be doing. We were told that the first thing we needed to do was “establish a clear channel.” Obviously, it has taken about a year to do that. I have wondered, after numerous incidents, if it might not be better for us to stop having guests at the sessions, and to simply work in a private way and then pass the information out to others. Would this help to maintain the clarity of the channel?

A: Partially.

Q: (L) Which part is correct?

A: Suitable “third party” on board is helpful.

Q: (L) Well, aside from someone to take the notes, who would be the “suitable” third party on the board? Since Terry and Jan have decided to start another channel with Andrew and Jan, and have even talked about moving to Tallahassee and starting a group there...?

A: Up to you to discover.

Q: (L) The next thing that was identified that we must do was to establish a “forum.” What is this forum supposed to be in?

A: These are all questions to which you must discover the answers by learning, therefore, no further discussion is now bene-

ficial.

Q: (L) Now the next thing was that a direction would open and that there was something amazing and wonderful just around the corner that I would recognize instantly and which would help me to know what to do. Has this already occurred and did I miss something?

A: Wait and see.

Q: (L) In one session, I asked what was the internal motivation inside me and you responded “to be a leader of your cause.” Well, my motivation then and now, as I understand it, is to find truth and share it with those who ask for it, and to do this in a rather quiet and private way.

A: Leaders come in a variety of “packages.”

Q: (L) I was recently invited to give a talk to the ISCNI, that is, the Institute for the Study of Contact with Non-human Intelligence. I am rather curious as to the reaction of the head of this organization, Mike Lindemann? Was he shocked by some of the things I said?

A: Intrigued would be more accurately descriptive, but nonetheless, Lindemann and the others would best serve the “cause” if they loosen any rigidities that they may have found themselves “grooving into,” as this is an area that definitely does not lend itself to manifestations of rigidity in any way, shape, or form, whatsoever!!!

Q: (L) I think they are getting a little rigid because they are under pressure from the scientific community and they feel they have to prove something. But, observable elements of the phenomenon of aliens have gone so far that trying to prove anything scientifically becomes moot. We don’t have time for double-blind experiments. We don’t have time to wait for FDA

approval! Based upon the energies surrounding the subject, is Lindemann going to respond?

A: Make him do so. Persist and express the same thoughts you did here! Help him and others to see that they are dealing with a phenomenon that is better studied in a way that stresses an open learning forum, not a “scientific” study methodology. In all its forms, not just the “physical” agenda that is primarily sought by some and in fact, it is through the ethereal plane and methodologies that the clues and some of the answers lie for physical as well as ethereal factors. Tell Michael this verbatim: “You once had a more open mind, Michael, what happened?” Some of his most frustrating recent events in his life relate directly to this!! Trust your insights, they are assisted learning matrix.

Good Night.

Chapter 4

1996

4.1 January 7, 1996

Frank, Laura, Pat Z

Q: (L) Hello

A: Oops!

Q: (L) And who do we have this evening?

A: Turrin.

Q: (L) And where are you communicating from?

A: Cassiopaea.

Q: (L) We have Pat with us tonight...

A: Hello Pat

Q: (L) Now, with all of us here, we would like to ask why the black, flying boomerangs showed up on the night Pat first came for hypnosis?

A: Examine issue carefully.

Q: (L) The first thing we thought about it was that this was a, if not necessarily rare, at least rarely observed type of craft, and the event itself was rare... is this correct?

A: It is rare.

Q: (L) If it is rare for it to occur in response to a hypnosis session, which person were the UFO's particularly interested in?

A: It was not a person, but information that is hidden in the subconscious memory of Patricia.

Q: (L) Were they wanting to get this information?

A: No. To monitor what would be revealed.

Q: (L) Does this mean that Pat has information programmed into her before birth that she needs to access?

A: No. Abductions.

Q: (L) They wanted to see if anything would be revealed about their abductions of her?

A: Yes.

Q: (L) Okay, since she is here, can we ask who abducted her?

A: Grays.

Q: (L) How many times has she been abducted?

A: 4. Snow scene was only 3rd density.

Q: (P) Does that mean that the snow scene was only in this realm?

A: No. Abduction which occurred there was strictly physical.

Q: (L) Okay, the abduction that occurred in the snow was a physical abduction. Perhaps the others were not. Were they physical

also?

A: The others were 4th density. 3rd density abduction only occurs rarely, and is of great import.

Q: (L) What is of great import that is connected to this abduction?

A: Review.

Q: (P) Was my son abducted?

A: Frozen.

Q: (L) Why did they want Pat so bad that they would take her physically?

A: Do you have any ideas?

Q: (L) Yes, I have ideas. Maybe Pat has ideas and knowledge that she could access to work against these beings?

A: But real reason is more fundamental.

Q: (L) Were they abducting Pat to harvest eggs?

A: No.

Q: (L) To harvest energy?

A: Would you like to learn or play “20 questions?”

Q: (L) I would like to learn and get to the bottom of this.

A: You answered your own enquiry earlier.

Q: (L) Because she had information they wanted to get from her?

A: No, no, no.

Q: (L) What did I say?

A: Exposure.

Q: (L) Oh, they fear that she will act in some way to expose them...

A: Government proximities!

Q: (L) Oh! When I was talking earlier about people who have someone working for the government, such people tend to be abducted more. And just because Pat was married to a scientist who worked at JPL doesn't mean she knew anything. Does she know something?

A: Not what she knew.

Q: (L) Was it because of where she lived?

A: Because of proximity to consortium activity.

Q: (P) Was that activity in the tunnel? {Pat is referring to the underground base where her husband worked on secret research.}

A: Implanted for possible future activation.

Q: (L) So, because of your proximity to the people you were living around and interacting with, you had an implant designed to control you if need be. (P) Was this related to what was going on under the mountain? (L) What mountain? What's under the mountain? (P) Just ask.

A: Not locator, personnel are factored.

Q: (L) Okay, it is not where you were so much as who you were in contact with.

A: Yes.

Q: (L) Was it her husband?

A: Perhaps.

Q: (L) Maybe that is why there is a higher rate of abduction among family members of government employees, so that they

can be activated or controlled? (P) But my husband wasn't really working on anything secret.

A: He had access to sensitive facilities.

Q: (L) Did he have a security clearance or was he friends with others who did? (P) I had a security clearance. (L) So, P had an implant put in. An actual, physical implant. Where is it?

A: Behind sinus cavity.

Q: (L) What is this implant designed to do?

A: Activate behavioral control reflex and thought pattern generation and alteration.

Q: (P) Is that why I can't remember anything?

A: Some.

Q: (L) Did you ever have headaches or nose or ear problems? (P) No, but I do have this memory problem in a big way. (L) What is the main part of the memory problem P has? Can you give us any more on that?

A: No.

Q: (L) So, can I say that this UFO appeared over my house on the night P was under hypnosis, to reinforce the implant so that she would not be able...

A: To monitor.

Q: (L) If P had revealed the details of her abduction, would there have been any repercussions?

A: Not in this case.

Q: (L) Are there cases when persons reveal details of their abductions, that there are repercussions?

A: Varied.

Q: (L) So, if P had gone to anyone, these craft would have appeared?

A: Yes.

Q: (L) You have already told us that this is extremely rare. Did P have an abduction experience of unusual significance?

A: 3rd density.

Q: (L) Okay, what else was unusual?

A: Discover.

Q: (P) Does this have anything to do with Camp David?

A: Not the issue, its personnel!

Q: (L) Did you know somebody? Was it that she knew someone or interacted with someone in particular?

A: Many others!

Q: (P) If I started naming people, could we get to it?

A: Not necessary.

Q: (L) Well, there is an issue here that we need to get to. (P) Do the planes have anything to do with it?

A: It is up to P, the extent she wishes to retrieve and divulge, the many unusual experiences that were met, by P, with unusual indifference.

Q: (P) The first thing unusual was the geographic location of our house. Directly West of us was the mountain that housed all the communications to be used in the event of nuclear war. We were 13 miles North of Camp David. And, while we lived there, many,

many things took place at Camp David that were of global significance. And, we built a barn in 1982 and had bought the house in 1976, and never, in all the years that I lived there, did I ever notice these planes until we built the barn. If I had a stick in my hand, I could have touched them, that's how low they flew. Right over my barn. The same day every week. And there was always two of them, and they never had a single marking on them. And, they were propeller planes. And I wondered: what in the hell is this country doing flying planes, unmarked, propeller driven, and so low, over this area? This continued until we moved from that house. So, these planes came twice a week from 1982 until 1989. (L) What were these planes?

A: Search to learn.

Q: (L) Well, obviously we need to discuss this to develop our synapses. (P) Well, after the first couple of times, I sort of just said: "Well, there are the planes." So, what else is new?

A: Indifference.

Q: (P) I thought the planes had something to do with the mountain. Did they?

A: Maybe.

Q: (P) We knew they were flying under radar. Now, that I am thinking about this, nobody else ever talked about these planes. It was like we were the only people that ever saw them, or people who were at our house saw them too. My best friend who lived right up the road never saw them. I asked her: "Did you see the planes?" and she said "What planes?" I mean, she was seven acres away and nothing in between!

A: Unusual experiences mount!

Q: (P) Vic also noticed these things and he would always say - he

was less indifferent than I was - he would say: “what in the hell are those planes and what are they doing?” (L) Why was P so indifferent? (P) Well, it didn’t affect MY life, except that I was damn mad that it upset my horses. But then, the horses got used to them too, and they became indifferent! {laughter} Well, they came so often, twice a week - “it’s Wednesday, the planes will be here!”

A: More... continue probing...

Q: (P) The planes came from East to West, and in the West was the mountain...

A: Catoclin.

Q: (P) That is the name of the mountain. (L) What is it? (P) The tunnel where all these facilities were... under Catoclin Mountain. Camp David is near, too.

A: And MUCH ELSE! Mount Weather, Virginia. And why did you live in area... helicopters?

Q: (P) Is it because of Fort Detrick?

A: What brought you to Maryland?

Q: (P) Fort Detrick. (L) What does Mount Weather mean? (P) The underground tunnel - everybody in town called it The Tunnel - but there was nothing around there to ever give anybody the slightest clue as to what it was. In fact, I lived there for quite a long time before I knew it existed. And, on top of the mountain there was a weather station... (L) But, what about Fort Detrick? (P) Vic was doing electron microscopy - cancer research.

A: REALLY?

Q: (P) It was a photographic lab. (L) Do the instruments on top of the mountain have anything to do with these planes?

A: So what?

Q: (L) Does it have anything to do with those antennae that are reported as being connected to that project, that alter space/time?

A: Helicopters, Pat? We are asking you!

Q: (P) Well, the helicopters in Frederick went over our house every time the president was at Camp David. But, that was our house in Walkersville not in Emmetsburg. When we first moved to Maryland. Sometimes the helicopters were unmarked...

A: You see, P is resistant due to experiences, things don't "phase" her easily, programming, etc.

Q: (L) So, all of these things happening around her, the planes, the mountain, the helicopters... (P) But the helicopters, I knew it was the President either going to or coming from Camp David.

A: Resistant, not resisting.

Q: (L) Is the term "resistant" a clue?

A: All is a clue here!

Q: (L) Since P has only been abducted 4 times, can this mean that she is resistant to that?

A: No.

Q: (P) Isn't that just my personality, that if it doesn't affect me I don't bother with it?

A: Yes.

Q: (P) I don't get bothered about things that...

A: Shoot somebody in front of P, and she says: "Oh well, that's life" so, to discover spectacular things, one must be patient and

probe carefully, no hasty assumptions, please!! There is to be retrieved, revealed, studied.

Q: (P) Well, the helicopters went back and forth to Camp David. The President was supposed to be in them. And his entourage. There was only 3 helicopters. (L) Are these the helicopters referred to?

A: No. Let P digest it, and report back later.

Q: (L) At the time we had all those sightings around here on the night we did that session with P, why did so many other people see them?

A: Window was “blast.”

Q: (L) Are there any craft over us at this time?

A: ?

Q: (L) Okay, we have the magazine ready to go out and the articles are somewhat controversial. Can we have an indication as to whether there will be a positive response to this issue or not?

A: Wait and see.

Q: (L) Will it be possible to “channel” online as Mike Lindemann has suggested?

A: Sure!

Q: (L) P is having some serious problems at the present time, can you help her with these?

A: Networking works!!!

Q: (P) Is there a light at the end of the tunnel?

A: Networking works!!!!

Q: (L) So, if she becomes involved in a network of some sort, things will sort out for her?

A: What do you think networking is, Laura?

Q: (L) Well, just what we have been doing... (P) How can you network a federal contract?

A: Share ideas, ask others for their experiences and opinions.

Q: (L) Pat says her shop cannot support the salaries for three people. And her Federal transcription business has gone kaput since the budget ran out and congress has not passed a new one.

A: What harm is there in aggressively pursuing government contracts, what have you to lose? Even if it fails dramatically, what, then, have you lost? If someone has the capacity to do so in business, the ultimate advice is to diversify, not eliminate, in other words, “leave no stone unturned!!” Suggest chase state and local government work as a buffer. Networking works P, you have always solved dilemmas, you go into “automatic pilot” during crises, so why do you ask?

Q: (L) Can you give us a clue about when the budget battle is going to end?

A: It is in the process of ending. Monday will start to refire the machine, though it will be awhile before it runs at full steam again. Backlogs create opportunity.

Q: (P) But, the backlogs can't begin until the budget is passed and signed.

A: Will happen in quick succession. You need to concentrate on straightening your personal situation.

Q: (P) What does that mean? (L) It means that until you can do something else, concentrate on that.

A: Mercury retrograde favors continuances, not beginnings.

Q: (P) I would like to know about the apparitions of the Virgin Mary at Conyers, GA, as well as this book “Mary’s Message to the World” and all the other messages about the End Times that are coming out all over?

A: The forces at work here are far too clever to be accurately anticipated so easily. You never know what twists and turns will follow, and they are aware of prophetic and philosophical patternings and usually shift course to fool and discourage those who believe in fixed futures.

Q: (L) (L) Anything further for tonight?

A: Goodbye.

END OF SESSION

4.2 January 9, 1996

Frank, Laura

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us tonight?

A: Xiooira

Q: (L) Is that anything like exhilaration?

A: Close.

Q: (L) Well, if it is like exhilaration, I am all for it. And where are you from?

A: Cassiopaea.

Q: (L) Tonight I have a question for a friend. V***** was over today and wanted me to ask if her son is involved in some cult type activities?

A: More like “kiddie gang.”

Q: (L) She said she has noticed things missing. Are they using any of her personal items to try and put a “hex” on her, if even in a kiddie way?

A: No.

Q: (L) Is the action she is taking, which is to try to get him into a hospital drug treatment facility; can you make any comments on this?

A: Futile.

Q: (L) Is there anything that she could do that would be helpful at this point?

A: Son follows in “shoes” of parents.

Q: (L) So, she needs to look at her past to know what would alter his behavior. Whatever would have worked with her will work for him, is that it?

A: And David.

Q: (L) Any other advice for her at this time?

A: Best to let kid salt his oats and take his lumps.

Q: (L) Okay, P will be here on Saturday, so we will leave a lot of my questions for then. I don’t quite know how to ask this. It has become increasingly obvious to me that there is some sort of connection where JO {an unsolved murder of a local 13 year old girl;

Absolutely NO cluea} was concerned, some synchronous connections between that murder and my so-called “awakening,” if you want to call it that. And I also noticed a connection between the life pattern, or change in life pattern, of Ted Bundy and certain UFO sightings, and cattle mutilations that were in his area of the country. Now, we have another girl who has come up missing at the same time P and I were discussing the JO case, and this new case has a lot of things that seem to be common to that case. I see that there is an issue here that I would like to get to the bottom of; can you help?

A: Vague.

Q: (L) I know that is vague. Did my involvement with the JO case {I was asked by law enforcement official to try to come up with some clues or hints through astrology and psychic impressions} have anything to do with opening the door of my mind to other phenomena, particularly UFOs and aliens?

A: Possible.

Q: (L) You can't give me a clear answer on that?

A: Learn!

Q: (L) Okay. I had dreams about it. The work that I did on the case astrologically, the dreams I had about it, as well as certain impressions I received, convinced me that a particular individual was the killer. Was that an opening of my instinctual awareness in some way?

A: Maybe.

Q: (L) Was there some soul connection between myself and JO?

A: No.

Q: (L) Was there some connection between JO's murder and

“alien” activity?

A: There is always this connection in one way or another, at one plane convergence or another.

Q: (L) Was the murder of JO a “mini-plane convergence?”

A: What did we just say?

Q: (L) It seemed to me that was what you said, and I was trying to clarify it. Is that, in fact, a plane convergence, where one person’s plane of reality converges with another person’s plane of reality, and one or the other gets annihilated?

A: 4th, 5th and 3rd density is involved.

Q: (L) Is this true with all murders?

A: Discover and yes.

Q: (L) Was my interaction into that reality a sort of entering into a point of plane convergence?

A: Flirting with the edges.

Q: (L) So, when a person is working on a murder investigation, or thinking about it, or applying thoughts, talents, instincts or whatever to the solving of this kind of puzzle, they are interacting with a plane convergence?

A: This represents one manifestation of the always present desire to return “home” to 5th density.

Q: (L) Okay. Well. Now, I want to get to the 64,000 dollar question. In the JO case, was my conclusion correct?

A: “Correctness” takes many forms and provides a window to many conventions.

Q: (L) (F) What does that mean? (L) I don't know. My evaluation was that {redacted} was also the killer. Is that correct?

A: Learn.

Q: (L) Was the man who killed JO known to her?

A: We recall advising a cautious approach, in order to insure that your lessons are learned not only accurately, but painlessly as well.

Q: (L) Could you suggest, just to get me on track here, a form of question that would be a "cautious" question? Then I can frame subsequent questions on that model.

A: The issue here is not how to "frame" a question in such a way as to lure us into answering in the way you desire, but for you to learn most effectively. Do not have prejudice that there is only one thing to be learned from each response. "You never know what there is to be learned when you inquire with innocence and freedom from supposition."

{Break to listen to response.}

Q: (L) I just played the tape back and it is all muddy. Could you tell us why we are having this problem with the tape?

A: Telekinetic wave transfer.

Q: (L) What is this telekinetic wave transferring?

A: Evolving energy.

Q: (L) Given off by us?

A: Both to and from.

Q: (L) From us to you?

A: You and others, not us.

Q: (L) Who are these others?

A: 4th density eavesdroppers, P's involvement should "heat things up."

Q: (L) Is P's involvement going to be beneficial to this work?

A: Yes, but also expect anomalies.

Q: (L) That is interesting. Are you going to tell me who killed JO? I am willing to give up my conclusion if necessary.

A: Learn. Review our previous response.

Q: (L) I would love to, but much of the answer was lost in the static.

A: It can be deciphered.

Q: (L) Okay. Learn. Was there something about Ted Bundy, and the fact that his life seemed to disintegrate at the same time a lot of UFOs were sighted?

A: Yes.

Q: (L) Was Ted Bundy abducted?

A: Yes.

Q: (L) Was Ted Bundy programmed to do what he did?

A: Yes.

Q: (L) What was the purpose behind that programming?

A: We must withhold answer for the present.

Q: (L) Okay. Bundy described his murdering urges as a "pressure building inside" him that he couldn't overcome, and it seemed to cause him to stop being "human," as we think of it. That seems to me to be an example of an implant being able to overcome a

person's social behavior, or controls over anti-social tendencies. Is this also what happened to the person who killed JO?

A: Maybe.

Q: (L) Is there a connection between the newly missing girl, CB, and JO?

A: You are doing well in your probing of the knowledge within on this issue, we suggest continuance, after all, learning is fun!

Q: (L) So, it seems to me that there was a connection between the appearance of CB and JO. Could it be that the individual who killed one or both of them was programmed to respond to this particular type facial characteristic? Could that be part of the programming?

A: End subject.

Q: (L) What do you mean?

A: We have helped you all that is necessary for now on this matter. It is beneficial for you to continue on your own for growth.

Q: (L) Can I ask just one or two more LITTLE questions in a different direction? I mean, this is like walking away and leaving me in the dark!

A: No it is not!

Q: (L) I would like to be able to solve this because the families are in pain and have asked for help.

A: Why don't you trust your incredible abilities? If we answer for you now, you will be helpless when it becomes necessary for you to perform this function on a regular basis, as it will be!!!!

Q: (L) Well, frankly, I don't want to be involved in any more murder investigations. It is too upsetting. Am I supposed to DO this

sort of thing regularly???

A: Not same arena.

Q: (L) Well, then how do you mean “perform this function?”

A: No, seeing the unseen.

Q: (L) Okay, shift gears. I received a rather nasty letter from Jason D. He said he was getting tired of listening to the C’s trash his favorite channel o’choice. After all, he IS the one who ASKED me!

A: He will come around if he follows his instincts. JM.

Q: (L) Yes! That reminds me that I wanted to ask you about him. He wanted me to ask you if I should pull him out of school.

A: What do you think?

Q: (L) I think he is miserable, but he does not want to “give up” or be viewed as a “quitter,” or a baby. He is torn between his misery and disgust with the system, and his desire for peace. I would like to know why that kid attacked him the other day?

A: Attack.

Q: (L) You mean stimulated through 4th density?

A: Yes.

Q: (L) Is there anything I can do to help protect him?

A: What do you think?

Q: (L) Well. I don’t know what to think.

A: Don’t avoid the issue, it is of paramount importance!

Q: (L) Yes, I think I ought to take {my son} out of school. There is just too much attack going on from all directions, and that is

ONE that I can close off.

A: Instincts preserve 3rd density experience.

Q: (L) What does that mean? You say that the issue is of paramount importance. Why?

A: Instincts preserve 3rd density existence.

Q: (L) There is some threat to his existence in 3rd density if I DON'T do something right away?

A: Yes.

Q: (L) Is this threat from outside sources?

A: Yes.

Q: (L) So I need to pull him out of school NOW.

A: Follow instincts.

Q: (L) That's clear enough for me. I have the feeling J is here for a purpose and that is why he has so much difficulty interacting with persons who are not as concerned about things as he is. Is this correct?

A: Yes.

Q: (L) Now, I want to ask my Sheldon Nidle channeling question?

A: Suggest you not waste energy on this.

Q: (L) There are a lot of people who are convinced by Sheldon Nidle that there is going to be a photon belt and a mass landing of UFOs in the fall of this year. Is this, in fact, going to occur?

A: People are very convinced by Bo and Peep. {Reference to Heaven's Gate cult? We hadn't even heard of them at this point in time.}

Q: (L) Okay, I won't put any more energy in that. Thanks for the assist tonight. Good Night.

A: Good Night.

END OF SESSION

4.3 January 13, 1996

Frank, Laura, PZ, PkZ

{This is one of several sessions that were made almost unintelligible due to static. This had never occurred with the particular machine used in over 2 years, and only occurred in seeming relationship to the interaction of P. In fact, during THIS session, two recorders were used, and BOTH tapes were nearly ruined. PZ is the individual who I did my first "alien abduction" hypnosis session with. PkZ is her son.}

Q: Hello.

A: Hello.

Q: What name do we use this evening?

A: Yommor.

Q: And where do you transmit from?

A: Cassiopaea.

Q: Okay, we have P and Pk here with us this evening. I would like to ask, as the first question, about the invitation to do online "chats" and channeling through Mike Lindemann's ISCNI, is this an acceptable mode of communication for this source, because, if so, we think we can figure out a way to do it.

A: Okay.

Q: Is this a desirable forum?

A: Yes.

Q: I have worked on preparing a little biographical sketch about the Cs, and would like to know if it is acceptable as is?

A: This is up to you!

Q: What is going on with Val Valerian? He was calling every week, and I have not heard from him in almost a week.

A: He lost track of time.

Q: Why did he lose track of time?

A: Busy with many projects. You must contact him because we see his desk topped with mounds of “stuff.” He is interested, but just not for some period. {short pause} Isis has uterine or cervical abrasion from birth process.

{Isis was L’s dog which had given birth to 5 puppies, 2 of which died a short time after birth because Isis was unable to care for them. It had been several days, and Isis had been moved into the kitchen for warmth, but had been “down” for several days. This comment was volunteered with no question asked.}

Q: What can I do to help her?

A: Vitamins A, D, E and a solution of Goldenseal root to be placed in food. {These instructions were carried out and Isis recovered completely within 10 days, with definite improvement noted after 2 days.}

Q: Next question: I guess I ought to let P ask about it. (P) A man came to our shop last Monday and ordered a phenomenal amount of work and promised more work in the future if he is satisfied.

A: Good intentions. Is like a “self-styled” wheeler dealer.

Q: (P) Does he have the money to back up his “good intentions?”

A: Strings projects along... Kiting, as in checks. Repeat: good intentions.

Q: (S) There are people who know they will have their pay on Friday, and they write checks on Thursday. (P) Yes, but it really is against the law. If it is not in the bank when you write the check, you are breaking the law.

A: Beware of errors in timing... suggest that you be conservative in the processing of especially big orders. Take the checks to bank of writer to cash, when possible, and beware of out of area checks... Steady in decisions regarding monumental tasks, do not attempt to tackle large projects unless you are certain of the efficacy of fund transfers offered.

Q: (P) Next question: How does one determine if they are channeling a 3rd density dead dude, or a higher density being?

A: Corrections and clarifications needed: “Dead Dudes” are 5th density beings. Either they are stuck in 3rd density, or they are communicating from 5th density, not 3rd density!! They are not 3rd density! 1st density includes all physical matter below the level of consciousness. 6th density is uniform in the level pattern of lightness, as there is complete balance on this density level, and the lightness is represented as knowledge. 7th density is union with the one... it is timeless in every sense of the word, as its “essence” radiates through all that exists in all possible awareness realms. The light one sees at the termination of each conscious physical manifestation is the union, itself. Remember, 4th density is the first that includes variable physicality!! Ponder this carefully!!! And, remember, there is only one “God,” and that the creator includes all that is created and vice

versa!

Q: (P) {Three names were given of scientists who worked for the U.S. government, asking if they were part of the reason P had been abducted and implanted as was described in a previous session attended by P. All three names were lost in static bursts, but the response to all three names was “yes.” The last name was recorded in the notes and was Bob Nathan @ JPL. Then, the following remark was made.}

A: Big involvement there! Microwave technology has many applications. Laser, ELF, electromagnetic.

Q: (P) Was Vic’s last assignment... {remainder of question lost in static. Vic was P’s husband who had worked on secret government research at an underground facility and was now dying.}

A: Was used, but not consistently.

Q: (P) Was what Vic was told about the job he was doing a complete lie, or was it the truth?

A: Close, but a few details off.

Q: (P) Was it because he was too strong willed to be controlled by an implant, that he was retired?

A: He was trained in applications, not reversal of command instructions.

Q: (P) Does that mean that he wouldn’t have sold out to the ones who put in the implant, that he was loyal to his employer?

A: Not quite correct concept, it means that he could not be relied upon to reverse “course” upon activation of subliminal instructions.

Q: (P) How could I be used to monitor personnel when I never noticed anything as being unusual?

A: Very complex, in fact, parallel subject. P is “locator probe” for the purpose of monitoring those in her midst. Telling is not important, reading is. Besides, most of the work performed did not involve conscious awareness.

Q: (L) Is this still going on?

A: Partly, but also, P could be used as a probe to monitor all events taking place at JPL and other laboratories by examining aural imprints of her husband and others with whom she was acquainted. All events leave permanent imprints upon aural energy fields. This explains, for example, some sightings and apparitions. “Ghosts” are sometimes merely spontaneous activations of the aural records of the natural surroundings.

Q: (P) {Question lost in static burst.}

A: No, P, the “blue thing” you saw was not an aural imprint reading, it was a 4th density craft partially transferred into 3rd density. Your deep subconscious memory remembers much, much more.

Q: (L) Pk wants to know about the “sound” he hears in his head that he was describing earlier.

A: It is Pk.

Q: (L) You mean his own internal sound?

A: Close.

Q: (Pk) What does it mean?

A: Discover.

Q: (P) Does the knife incident have anything to do with it? The memory of Pk cutting his thumb with a knife, immediately after the blue light?

A: Yes.

Q: (P) What did the knife have to do with it?

A: Screen memory. Good Night.

END OF SESSION

4.4 January 20, 1996

Frank, Laura, PZ, PkZ, SZ, SV, MM, Wilma

Q: (L) Hello. We have a lot of guests tonight!

A: Hello. No need to direct traffic.

Q: (L) What name shall we use tonight?

A: Yodnor.

Q: (L) And where do you transmit from?

A: Cassiopaea.

Q: (L) MM is here tonight with her aura camera. Is it possible to take a picture of us while channeling, and will anything show up?

A: Try it and see.

Q: (L) We certainly will, but we want to ask a question before we get started on that. There are rumors out that Betelgeuse has gone supernova and it can be seen with a telescope, but not yet with the naked eye. When did this occur?

A: You better check the data.

Q: (L) Okay. Is this going to have any effect on us?

A: No.

Q: (L) Is it going to have any effect on us in an ethereal sense?

A: No.

Q: (L) Is it just something that has happened that is going to be interesting to look at?

A: Open.

Q: (L) We are going to take a little break and let MM set up the camera. {Camera is set up, metal plates are arranged so that L puts right hand on one and F puts left hand on one, and their other hands are kept on the planchette.} (L) Hi, guys! What do you think of all this equipment?

A: Yes, neat!

Q: {Preparations being made for aura photos. L and F draped in black cloth.} (S) Laura, you have something stuck in your hair! (F) It's a pen. (S) She's always got things stuck in her hair. No telling what else is in there! (P) Yeah. It's pretty wild tonight. You look like a witch! (L) Well, you people are so nice tonight!

A: Which?

Q: {Laughter.} (L) Okay, everybody... settle down! We had some plans for questions tonight.

A: Okay.

Q: (L) Yes, does anybody remember the questions? Where is the list? W, ask a question because I just went blank! {Laughter}

A: Ask W. {Laughter}

Q: (L) We were curious as to what was photographed by MM and S when they were in Central America? There was some fuzzy image on the photo. Chichen Itza, I believe.

A: Aural imprints.

Q: (L) Of what? {Aura photo taken of F}

A: Representations in zero space/time of members of “Quan” sect of supreme spiritualists who vacated the body simultaneously.

Q: (W) Well, I am just coming in in the middle and I don’t know what has been asked before. Who is the most likely candidate to be elected president this year?

A: Well, this is not of great importance, as the president does not make the decisions, but it is likely to be Dole, as the points are aligning now. But, there is a lot to be seen between now and then. Future is open.

Q: (MM) Let me move the camera around, I want to get one of L now. (S) Look at F’s photo. It looks like there is a hand around his arm! (F) It doesn’t look like anything to me. (MM) I am going to try to get one of the middle of the board where their hands are. (L) Guys! Are you here and ready for a mug shot?

A: Yes.

Q: (MM) Take a deep breath and hold... {aura photo of L is taken}
(L) {looking at aura photo of self} This is very strange, guys. How come I am not in this picture and F shows up in his? Why have I physically disappeared?

A: Learning builds spiritual growth, and awareness “solidifies” knowledge.

Q: (L) Okay, guys, smile for the camera! {Aura photo of board is taken with L’s and F’s fingers on planchette.} (L) Okay, but that does not explain why I disappeared.

A: Because the energy field enclosure was unifying you with the conduit, as is usual during channeling sessions between 3rd and

Figure 4.1: A1.jpg

6th density level communications.

Q: {Photo of board develops, and geometric figure appears to sounds of amazement from group} (L) What is this geometric figure?

Figure 4.2: a2cs.jpg

A: Was a visual representation of the conduit, indeed!!! The reason for such clear luminescence is that thought centers were clear and open in you at the moment of the photograph. In other words, there was an imbalance of energy coming from 6th density transmission point. So, what you are viewing is 100 per cent pure light energy of uncorrupted knowledge transmitted through you. This has never been seen in 3rd density ever before. You do not completely realize the ramifications of this yet, but you will. We have made history here tonight folks!!!!

{Break while more individual aura photos are taken. When fin-

ished, MM and W pack equipment and depart. Discussion of grammar.}

Q: (L) I would like you to comment on our discussion on grammar. Does acquiring knowledge in a spiritual sense assist in the development of knowledge in other areas, such as communication?

A: Correctness in all areas, as agreed upon by convention, can only serve to help or improve or strengthen all processes.

Q: (P) I would like to know what I can do to improve my memory?

A: You have sleep disorders that are “short circuiting what would ordinarily be utterly spectacular psychic and mental abilities. When you were very young, your senses were 10 times sharper. But then, the”interferences began.”

Q: (P) That is absolutely true. I have had a sleep problem for years. (L) Is there anything P can do to overcome this? Physically or otherwise?

A: Cleansing of a very intensive nature; hypnotic regression; spirit release and dietary adjustments. Also, stress inducing life circumstances of a very “ordinary” nature must all be deviated! Ordinary, in this instance, means not of an ethereal nature directly.

Q: (P) Well, I have taken several steps in that direction.

A: Some, but it is like putting a “bandaid” on a gunshot wound.

Q: (P) What is the implant I have made of?

A: Silicon based micron definitive construct.

Q: (P) Is this why I have this scar?

A: Scar is manifestation of scar in being.

Q: (S) I have been having some serious problems with joint pain in my fingers and I would like to know what to do to make this better because I think that taking pain pills is something that hides the symptoms and does nothing for the cause.

A: Not true, S, sometimes pain killers cure cause as well as symptom. This is simply reversal of therapy. The symptom dies, thus cutting off the energy flow of the causative problem. Then the root cause dies if its “fuel supply” is interrupted for an adequate duration.

Q: (L) Will this work on me?

A: You need to utilize herbal therapies and nerve or neural blocking techniques, such as self hypnosis and Reiki and acupuncture.

Q: (L) Well, I have been having a HORRIBLE pain in my leg that makes me unable to walk without a cane. What is causing this pain?

A: Tissue nodular grains passing through vascular region affected by mild thrombosis. Try nutragina and roots of water based plants such as spirulina, for starters.

Q: (L) Isn't neutrogina a soap? {I was assuming that “neutrogina” was what the Cs meant, but they spelled out “nutragina” which may be something else entirely.}

A: Base is edible and topical.

Q: (L) Anything else on that?

A: Chlorella.

Q: (L) Where do I get that?

A: Leafy green vegetables.

Q: (L) P has been having almost an identical pain in HER leg, is it a similar condition?

A: Psychological pressures register in the physical. When acute psychological pressures are evident.

Q: (L) (P) When is this acute pressure going to end?

A: Open. We recommend ginseng and guarana also for herbal remedies for displaced fatigue.

Q: (L) I am getting tired.

A: Good Night.

END OF SESSION

4.5 January 27, 1996

Frank, Laura, PZ, PkZ, SV

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us?

A: Sorria.

Q: (L) And where do you transmit from?

A: Cassiopaea.

Q: (L) If you will bear with us tonight, we would like to ask a couple of health related questions.

A: Yes.

Q: (L) First, is this sickness that I am experiencing part of an 'attack'?

A: As always.

Q: (L) Is there anything I can do to terminate this kind of attack?

A: No. Prevent? Yes!

Q: (L) What can one do to prevent these kinds of attack?

A: Always watch all portals! Those around you are all portals always!

Q: (L) So, we are all portals. If everybody is a portal, it seems that you could spend all your time watching all of them and never get anything else done!

A: Incorrect, when portals are activated, you will know if you are watching!!! Your problem has been “falling down on the job,” especially not being aware of the danger presented by those closest to you. You tend to expect attack to always come from more or less disassociated parties, and you frequently confuse issues: mode and source!

Q: (L) Well, is this especially true as we are on the verge of getting the magazine out and getting some things out on the internet?

A: Of course, that should be obvious.

Q: (L) Does that also include P’s aches and pains every time we try to get the work done?

A: Yes, and expect more.

Q: (L) Well, I am so sick that I am ready to throw in the towel.

A: Throw in the towel?!? It’s too late!! And besides, your life will dramatically improve if you persevere, as we have told you.

Q: (L) Susan has had several dreams about a storm coming and having to batten down the hatches and relocating...

A: Susan must inquire.

Q: (S) In my dream, it was either a physical move, or a moving on to something. Am I moving out of town in a physical way, is it a spiritual moving on, or am I moving in a different direction in terms of my path?

A: That is four questions at once.

Q: (S) Am I going to be leaving the area?

A: Do you desire to?

Q: (S) No, I don't.

A: Then why would you expect that you would?

Q: (S) Well, that's what the dream was, but I know it's symbolic. Do you think maybe I could be moving on, hopefully spiritually? What does it mean, my moving on or relocating?

A: Vague.

Q: (S) Well, I just wonder in what way... (L) Susan has said that she thinks this dream means she is going to die...

A: Susan, ask your questions directly, please! If you "beat around the bush," we will also!

Q: (S) Will I be moving into 5th density soon?

A: What is "soon?"

Q: (S) Will it be sometime this year?

A: Only if you do something that might best be described as "ill advised."

Q: (S) Because of all these dreams about me moving on, could it have something to do with, like, in an earlier session you said that I was a, um, I was held over in 5th density as a learning

channel. Now, I must have been learning important to be held over as many times as I was. Will whatever I was learning in 5th density come in handy in this lifetime, maybe?

A: What do you think you have been doing for the past year, as you measure “time?” And, what is “moving on?”

Q: (S) Progressing?

A: Yes!!

Q: (S) You mean that what I am learning here, the knowledge I am getting here?

A: That is beside the point, somewhat.

Q: (S) The only other thing is therapy... is it the channeling?

A: Both, and more to come.

Q: (S) Well, I feel like I am just wasting my time in doing the therapy...

A: Let it flow, Susan, don't worry about what all the twists and turns along the way mean... It is the destination that matters, and that is not for you to know yet.

Q: (S) In all these dreams, I am repeatedly packing up to move. (L) Why are you worried about it? Let it flow. (S) Because I have never had dreams that repeated over and over. This is a first for me...

A: Have you ever had other “firsts?”

Q: (S) Yes...

A: Did you panic over those?

Q: (S) Sometimes.

A: And what happened?

Q: (S) I survived.

A: So...?

Q: (S) I just learn from them and grow from them... (L) And don't we just answer our own questions? (P) I have a question... the lady who took the aura pictures the other night told me that I can astrally project. Is this true?

A: Everyone can.

Q: (Pk) Am I special?

A: Vague.

Q: (Pk) America has a flag, does Cassiopaea have a symbol? I want a symbol for my magazine... I mean your magazine...

A: We have given two.

Q: (L) The wheel with seven spokes and the triple pyramid with the circle. (P) Together?

A: No. Ask more, Patrick, as two very recent events have served to blast open your learning channel.

Q: (Pk) Then they must know exactly what I am going to ask. I want to know if they can put something in my subconscious for the cover design. I need proof.

A: Proof, what is that?

Q: (Pk) What is proof? Never mind. I'm afraid to ask.

A: Ask, what do you think we will do? Disintegrate you where you sit?

Q: (Pk) The rumbling... does everybody have this... the rumbling sound in my head?

A: Vague, but we will answer if “everyone” were to choose to have it, then everyone would have it.

Q: (L) What is it that Patrick perceives as a rumbling in his head. Apparently, when he turns it on, it has a pronounced effect on his aura.

A: Turn on a radio between channels, and what do you hear?

Q: (L) Static. (Pk) Buzzing. More than one channel? (L) What are the channels?

A: That is not the issue. Turn on a radio that has its tuner between channels, and what do you hear???

Q: (L) You hear static. And this would imply that the radio could be tuned.

A: Yes.

Q: (Pk) And that is what I need to work on?

A: If you wish.

Q: (L) I don’t know too many people who can turn this on and off...

A: But you know people who have it “on” all the time, and always tuned.

Q: (L) I guess. (Pk) Does it have anything to do with why the aliens did not abduct me back in 1987 on the road trip through Pennsylvania.

A: That is not important.

Q: (L) Yes. They wanted his mom, not him! (Pk) Do I have an implant?

A: No.

Q: (Pk) Will I have an implant?

A: ?

Q: (L) Sheldon Nidle has written a book called “Becoming a Galactic Human.” He has said that the Earth is going to go into a photon belt sometime this summer, that there is going to be 3 days of darkness, and the poo is going to hit the fan, so to speak, the aliens are going to land in the late summer or the fall, and they are all coming here to help us. Could you comment on these predictions?

A: No.

Q: (L) Is a fleet of aliens going to land on Earth and be announced by the media in 1996?

A: No.

Q: (P) In 1997?

A: No.

Q: (L) Could you comment on the source of this book: “Three days of Darkness,” by Divine Mercy?

A: Source?!?

Q: (L) Well, is there going to be 3 days of darkness in 1998 like it says?

A: Why does this continue to be such a popular notion? And, why is everyone so obsessed with, are you ready for this, trivia...? Does it matter if there is three days of darkness?!? Do you think that is the “be all and end all?” What about the reasons for such a thing?... at all levels, the ramifications? It’s like describing an atomic war in prophecy by saying: “Oh my, oh my, there is going to be three hours of a lot of big bangs, oh my!!”

Q: (L) Well, you didn't say it wasn't going to happen in the fall of 1998. Is it?

A: First of all, as we have warned you repeatedly, it is literally impossible to attach artificially conceived calendar dates to any sort of prophecy or prediction for the many reasons that we have detailed for you numerous times. {Note: the 'fluid' nature of the future. Probability, etc.} And we have not said that this was going to happen.

Q: (L) I know that you are saying that this 3 days of darkness is trivial considering the stupendous things that are involved in realm crossings. But, a lot of these people are interpreting this as just 3 days of darkness.. then wake up in paradise. I would like to have some sort of response to this question.

A: Trust us to lead you when and how it is appropriate. You should already know that to attempt apply 3rd density study and interpretations to 4th density events and realities is useless in the extreme... This is why UFO researchers keep getting 3 new questions for every 1 answer they seek with their "research." If you will trust us, we will always give you not only the most correct answers to each and every inquiry, but also the most profound answers. If the individual does not understand, then that means they are either prejudiced, or not properly tuned in.

Q: (L) Previously you told us about the Southwest region of the United States becoming 4th density. Will the people who live there become 4th density beings? Or will they be 3rd density beings in 3rd density?

A: Some of both bleed-in and bleed-out.

Q: (L) Recently Frank had an experience where he heard me calling him as he was going in his door. Then, he heard {my son} talking to him here in my kitchen when {son} was up in bed. He

was worried that it meant something had happened, but it was apparently nothing of the sort. So, what was it?

A: Increased awareness of ethereal imprints.

Q: (L) When I was standing at the washer the other night, I heard someone clap their hands very loudly right behind me. Nobody was there.

A: Same.

Q: (L) You said earlier that if I just persevere that my life will improve dramatically and immediately. So, when you say this, do you mean really sudden and in a big way?

A: Open.

Q: (L) Are you going to give me any clues on this?

A: No.

Q: (Pk) Do you ever laugh?

A: Yes.

Q: (Pk) Do you miss being in 3rd density?

A: Do you miss being in 2nd? Or first?

Q: (Pk) Are you laughing at us?

A: Yes. And no, Pk, we were 3rd density beings in fact we are you in the “future!” We were you, and we are you, and we were 3rd density. Do you understand the significance of the last statement, or would you rather just brush it off? We are you and we were you and we were 3rd density but we are not now 3rd density and you are not yet 6th density.

Q: (L) How do you spend your ‘time?’

A: Teaching, sharing, assisting.

Q: (L) What do you do for fun?

A: That is fun!

Q: (PZ) With each other?

A: No.

Q: (PZ) With who?

A: Densities 1,2,3,4,5.

Q: (PZ) Do we all have a guardian angel? Each and every one of us? One to a person?

A: Not correct concept.

Q: (L) What is the correct concept?

A: Not possible for you to comprehend.

Q: (L) How do we get assistance from higher realms?

A: By asking and...

Q: (L) What is the limit to the kind of assistance we can receive?

A: Limit?!? We live within a realm that includes no such thing!!!

Q: (L) Well, the ‘angel thing’ is pretty big nowadays. There are an awful lot of angels running around. My first thought was: ‘what better way for the bad guys to deceive than to appear as angels.’

A: Not true!!! STS CAN appear as entities incorrectly perceived as “angels,” but if it is really a sixth density being, incorrect perception is not possible.

Q: (L) I don’t understand. There are a LOT of beings who deceive people. They produce phenomena, they do any number of things including making people ‘feel good,’ have dreams, and all that.

What do you mean that incorrect perception is not possible? It happens all the time!

A: No.

Q: (L) Well, what is the story here?

A: Your perception abilities are short-circuiting due to vibrational interaction.

Q: (L) If you there is anywhere in you a question about what you are perceiving, then that question is an indication that all the rest of what you are perceiving could be false?

A: Part of the equation.

Q: (L) So, if it is really a 6th density being, it will blow you away to such an extent that there is NO question?

A: Yes.

Q: (L) Now, what is the other part of the equation?

A: Well, why do you question us? First of all, you question us because the communication is limited at this point... you are not yet prepared for stronger envelopment.

Q: (PZ) So, I should continue to pray?

A: All goes to 6th density.

Q: (PZ) Okay, let's say that I have a little child who is dying of leukemia, and I am praying with everything in me, and the child dies anyway. I don't get it. What's the deal here?

A: Wrong. If child dies, that is your lesson profile.

Q: (PZ) Well, why isn't my lesson profile with this particular situation that is going on in my life right now, why isn't it continuing? I thought that maybe I need to...

A: Is it over yet, Pat?

Q: (PZ) No, it isn't over yet, but...

A: So, what is your question, if it is not yet concluded?

Q: (PZ) Can you feel what I am thinking?

A: Yes.

Q: (PZ) So, why do I need to ask?

A: Because we never interfere with free will.

Q: (PZ) If I continue to pray, things will continue to get better?

A: Things will stay on their intended course.

Q: (PZ) Are you telling me that my life has been predestined?

A: No. If you continue to pray, there is no chance of your lessons being interrupted or deferred. Clarify.

Q: (PZ) Well, that sounds like it is going to continue, it is not going to stop.

A: No, clarify means to solidify your understanding of the answer.

Q: (PZ) Well, I don't understand. (L) I think it is pretty clear that the things you are experiencing are part of the lessons.

A: Whatever that is... i.e.: que sera sera.

Q: (PZ) But then, we are back to predestiny?

A: No, lessons.

Q: (PZ) Well, how many damn lessons do you have to get?

A: As many "damn" lessons as you need!

Q: (S) What about the prayers that are directed to Jesus?

A: Jesus is one of us in “special service” sector.

Q: (L) Like a “green beret?”

A: No, more like a “beige beret.”

Q: (L) What is a ‘beige beret?’

A: Just our term.

Q: (PZ) Well, I have just always wondered if this praying business is a bunch of malarkey. (L) Oh, no. (PZ) If I pray a rosary, I am praying to the Virgin Mary. Who is she? Where is she?

A: “She” is here too.

Q: (PZ) Does that prayer go directly to her and does she then send you out to do whatever?

A: She is not really a she. And when you write to “Ann Landers,” does she really see it? And Good night.

END OF SESSION

4.6 February 3, 1996

Frank, Laura, SV, PZ, SZ, MM, Sandra, Tom F., Cherie D., PkZ

Q: (L) Hello.

A: Words mean little.

Q: (L) What does that mean?

A: Your commentary.

Q: (L) My commentary?

A: SV’s.

Q: (L) Okay, who do we have with us this evening?

A: Vostokokki.

Q: (L) Where are you transmitting from?

A: Cass.

Q: (L) Why are you not spelling Cassiopaea as is usual?

A: We have addressed this in prior sessions. Please review.

Q: (L) We have several questions tonight. Do you have any particular messages for anyone here first?

A: The need to deliver messages flows naturally, there is no way to “choreograph” it by requesting a specific “time” for this procedure. And, please tell SV to relay specifically when we place words in quotes!!!! It is annoying to not get messages properly transmitted when it is important for each entity receiving to absorb every detail of the given messages as it is intended. We have up until now not said anything about this, in the hopes that she would learn this by herself, but alas, she has not. Therefore, we regret the necessary reprimand. Sorry SV, but now please be aware that you have been told, and do not make this error ever again!

Q: (L) Goodness! All I did was ask if there was a message for anyone!

A: But it is important for you to continue at the same steady pace.

Q: (L) Can I continue with the questions now?

A: Obviously, it is always possible to do all that you desire to attempt.

Q: (L) First question: there were rumors on the internet that a respected scientist described a ‘ship’ in orbit around the planet

Saturn, which was said to be as large as the planet Earth. And, supposedly, he said that the photographs from the space probe that sent back the pictures of Saturn's rings, showed this ship clearly with portholes in it. Is this thing seen in orbit around Saturn, described by this NASA scientist on television, which I cannot confirm because I did not see it; is it, in fact, an artificially constructed craft of some sort?

A: No.

Q: (L) What was being seen?

A: It was an artificially constructed tale.

Q: (L) Okay, there is a fellow, TF, who has been hanging around PZ's print shop, who has a VERY strange story about his past and present. The funny thing is, all the odd things about his story that we were discussing recently, he explained point by point the following day as though he had been listening to our conversation and knew of our doubts and suspicions. Who is this guy and what are his objectives where PZ is concerned?

A: Best not to discuss issues which threaten to interfere with free will directive. Suggest you stay "on your toes" with this one!

Q: (L) Is there anything about this that you can tell us that does not interfere with free will?

A: Have you not thought to gently inquire of the individual in question? And if not, why not? Generally, those involved in a ruse, be it simple or complex, are uncomfortable with graduated incremental disclosure!

Q: (L) Is one of the reasons you cannot discuss this more freely because we have such a large group this evening?

A: Who says we are not discussing it freely? Subtle answers that require effort to dissect, promote intensified learning.

Q: (L) Okay. I made the observation that if the fellow was a government spy, he would certainly have had a better cover story than the one presented. Am I on the right track?

A: Maybe.

Q: (L) And, sometimes it seems that alien programmed or controlled individuals do not have stories that make sense, or are consistent, because maybe there is some lack in their understanding of human culture. Am I on the right track here?

A: Sometimes is not all times.

Q: (L) Well, the guy is really HUGE and has size 17 feet... he looks like a Nephilim to me! Am I on the right track?

A: It would be more fun if he had size "35" feet!

Q: (L) Who has size 35 feet?

A: If you meet them, "give us a call!"

Q: (L) Are you joking with me? All kidding aside...

A: You need to be aware of all "guys."

Q: (L) Does PZ have anything to be afraid of?

A: What have we told you about knowledge as opposed to ignorance?!?

Q: (L) PZ wants to know what his intentions are.

A: Review answer two.

Q: (PZ) Was he paranoid about the questions we were asking a week prior to tonight?

A: What happens to those who become uncomfortable?

Q: (L) Well, they get out of the situation. So, start grilling him...

A: Not “grill.” We suggest subtle approach, or grill him “rotisserie” style.

Q: (L) Tonight, it seems that everyone wants to know who or what is this El Chupacabras?

A: We were not finished with the other subject. That is weighing heavily on some minds present here. Ask, that is how one learns!!

Q: (PZ) Do I have any reason to be concerned about my actions regarding him, that I called to check on him with the police and reported him to the State Attorneys office?

A: Possibly.

Q: (PZ) Is it possible that there are ‘moles’ in the tiny little police department here?

A: Open.

Q: (PZ) Do I need to get a bodyguard?

A: You are straying, please review.

Q: (L) Was it a clue that if she stays “on her toes” he won’t step on here with his size 17 feet?

A: No.

Q: (PZ) Pk seems to believe everything he says.

A: Ask Pk.

Q: (L) What do you think, Pk? (Pk) I think he does a little bit of double-talk, but not as much as everybody thinks.

A: That is not the issue.

Q: (L) Is the specific issue whether this guy has any alien connections...

A: No, that is not it.

Q: (PZ) Is he monitoring us?

A: Review answer two.

Q: (L) It must be the one about inquiring in subtle ways.

A: Now, ask yourself (PZ): How likely is it that anyone with a tremendous ability to supposedly create such massive amounts of income, would just “walk in the door” and offer you a partnership in an endeavor that is going to produce such riches, as the person in question has described to you? If this individual has such tremendous acumen, why would he want to share the “bounty?” Remember the old saying: if something sounds too good to be true...

Q: (L) Okay, can we ask now about El Chupacabras?

A: It is what it is.

Q: (L) It is a ‘goatsucker.’ Where does it come from?

A: Review transcripts re: “window fallers.”

Q: (L) If it is a window faller, does it come from another density, or a lateral dimension?

A: Closer to the latter.

Q: (L) Okay, so it is like a horizontal dimension. What allowed it to enter our realm?

A: This is complex, but best described as “EM wave bursts along frequency border variation.”

Q: (L) Is there some way to capture or stop this creature?

A: You do not yet completely understand all the “mechanics” of the window faller phenomenon. The physicality is entirely tran-

sitory and partially dependent upon consciousness variabilities, as well as expectations of witnesses.

Q: (L) Does the energy of the fear of the witness enable the creature to continue its existence? Does it feed on the excitement and fear, and is that what makes it manifest?

A: Close, but off a little. It is the other way around, and retrofactored by one half.

Q: (L) What do you mean by that?

A: It is mutual, rather than unilateral. Also, remember that a window falling represents a cross-energizing of realities, equally represented from each “dimension” in question. In other words, because the dimensional curtain has been “torn,” half of one and half of the other contributes to the whole reality.

Q: (L) Does this mean that something from our reality is also scaring something in that other reality?

A: No, it does not “work” that way at all.

Q: (L) Is there any possibility that this mutual creature is going to turn its attention from animals to humans?

A: Ditto last answer. And review response prior to that!

Q: (L) Okay, now, there are a lot of current teachings that say that the ‘dregs’ of other planets are being sent to Earth to ‘refine’ them, so to speak, and that this is why the human race is so divided and antagonistic... that the interactions are supposed to result in annihilation of the weak and survival of the strong in both physical and spiritual terms.

A: First of all, confusion abounds here due to incorrect interpretations of the last subject discussed. Dimensions are not densities!!!! Dimensions are strictly the result of the universal con-

consciousness as manifested in the imagination sector of thought. Density means level of development as measured in terms of closeness to union with The One... Cycle. So, obviously, the “chupacabras” is a manifestation of human consciousness, and, human beings are a manifestation of the Chupacabras consciousness. Get it? Now, a shocker for you: You would not exist if someone didn’t “dream you up.”

Q: (L) Who dreamed me up?

A: Not important just yet. You literally are the “figments” of someone’s imagination, and nothing more!!!

Q: (L) You mean God dreams and brings us into existence?

A: Remember, “God” is really all existence in creation, in other words, all consciousness. This is because all existence in creation is consciousness, and vice versa.

Q: (L) So, the issues of racial superiority that are brought up in the Urantia book can be answered by ‘anything is possible?’

A: Close, but remember, all there is is lessons!

Q: (L) Is it true that the ‘dregs’ of other planets are being sent to earth?

A: That would be subjective.

Q: (MM) I would like to know if the Cassiopaeans are familiar with the entity that was on the three dimensional level known as Paramahansa Yogananda?

A: Third density, not three dimensional. And yes, but this entity had many aliases: Thorn, Christian, Mobson Singh, etc.

Q: (MM) Where is Paramahansa now?

A: Fifth Density.

Q: (MM) Is he the Avatar? {An “avatar” is claimed to be a manifestation of a deity in bodily form on earth.}

A: That is a subjective, artificial concept of the self-styled variety.

Q: (MM) Who came up with the concept? (W) I don’t know. I read it in a book somewhere. (L) So, someone said he is now an Avatar?

A: Is Debbie a “shaman,” is Billy a “hero,” is Oscar a “blade runner?”

Q: (L) I read Yogananda’s book and it seemed that he might be a very holy person. He seemed to have very loving concepts and practices in his life. (MM) I just wanted to know where he is now. (L) Fifth density, they said. (MM) Does fifth density have anything to do with Venus?

A: That is not a proper conceptualization.

Q: (L) Well, fifth density is the contemplation and recycling ‘zone.’ (MM) Well, at the centers, the ashrams and shrines, people swear that he appears to them. I was curious also about the entity in my home.

A: This is a hanger-on from visit with W at her domain. It is an E.energy seeking renewal.

Q: (L) Is MM’s critter an STS or STO entity?

A: Open.

Q: (L) How does it make you feel? (MM) I am tired all the time. (L) How can she get rid of it?

A: Spirit release.

Q: (MM) Was it attached to W first?

A: Yes.

Q: (MM) Is this what set off my fire alarm?

A: Energy therefrom.

{Break}

Q: (L) Sandra wants to know about her uncle who just died in January. (S) Where is he? {Sandra, herself, died a few months after this session.}

A: He is at 5th density.

Q: (S) Is he having a hard time adjusting?

A: No, but remember, there is no “time” there.

Q: (S) Many members of the family have reported having visions and dreams of him. What are these caused by?

A: Various processes.

Q: (L) I guess you have to ask about specific ones. Are any of these caused by Uncle Andrew himself visiting?

A: That is too simplified.

Q: (L) I guess you have to specify...

A: No, you don't understand. We meant that your comment was too simplified. The question is: are any of these manifestations Uncle Andrew?

Q: (S) He appeared to his oldest daughter ...

A: The concept is faulty.

Q: (L) The idea of any of them being Andrew, I guess. (S) So, the appearances are all their own expectations?

A: No, not always, but we are trying to teach.

Q: (S) Is he at peace?

A: Yes. Do you want to learn, or would you prefer to assume?

Q: (L) What are these manifestations?

A: They are 5th density thought projection energy waves.

Q: (L) So, his family are picking up these 5th density thought energy waves.

A: You are not following well.

Q: (S) So, when the family members are seeing negative things, it is just their own guilt?

A: There is no time on 5th density. All event sequences happen eternally and for an instant only at once.

Q: (L) How does that relate to the question?

A: Because you asked if he was at peace, and if he was “adjusting.” Do you not see that by the “time” you realize someone is “dead,” they have already, in essence, experienced their entire 5th density incarnation recycling, learning and contemplative experience in “zero time?!”

Q: (L) Sandra wants to know how many times she has been ‘recycled’ as a human being?

A: 84.

Q: (S) I knew it! That’s why this body is breaking down in pieces!
(PZ) What about me?

A: 73.

Q: (L) SZ?

A: 73.

Q: (L) PZ?

A: 65.

Q: (PZ) Have S*** {her daughter} and I known each other in another life?

A: Yes, all have and do. Number of incarnations does not pre-determine schedule for graduation. And you, my dear, are too fatigued, so Good Night.

END OF SESSION

4.7 February 8, 1996

Frank, Laura, SV

Q: (L) Who do we have with us tonight?

A: Wikijia.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) Last Saturday night we had a very large group of people here and I experienced very unpleasant sensations. I would like to know the source of these?

A: The question is vague.

Q: (L) Was the channel corrupted?

A: Not corrupted, diluted. Static EM discharge from two entity sectors.

Q: (L) What is the source of these entity sectors?

A: We have explained in detail these structure of this in prior sessions.

Q: (L) Was this due to the presence of any one or more persons in the room?

A: One but two.

Q: (L) One person but two entities?

A: Yes.

Q: (L) Who was the one person?

A: Open.

Q: (L) Well you said, at the time, that (name deleted) had an attachment and needed spirit release, is this the same person?

A: You learn by answering, using your own learnings, not from ceaseless confirmations by us.

Q: (L) Well, I am obviously not learning too well, because I was dead wrong on the missing girl, and you were telling me about my “amazing abilities” which were not so amazing in that case! {A missing girl case similar to the missing girl a few years earlier who was found murdered. There were similarities between that previous case and this most recent one, but this one turned out to be a runaway.}

A: All who have amazing abilities must too guard against corruptive forces from within and without having to do with prejudice, assumption, and the anticipatory desires involving patterning presumption. i.e. keep an open mind, always!!!

Q: (L) Well, this leads me to the situation with the mothers: can you give us any immediate advice on this. A clue as to how to settle this situation. {My mother and SV’s mother had moved into a house together and it was not working out, to put it mildly.}

A: Advice was given; not followed!

Q: (L) What advice was given that was not followed? (SV) Only about the living will for my mom.

A: Did we identify source of the advice?

Q: (L) What is the source of the advice?

A: Transposed by Susan!!!

Q: (L) Do you mean the advice Frank gave Susan?

A: First things first! Please, Susan, try to be accurate!

Q: (L) Well, the situation is gummy right now...

A: You were warned, Susan! Please, please, please, please, when you call or cry out for help and or guidance, know that we will always, always, always answer. It is up to you to be aware and then trust and follow. If your deep-seated stubbornness prevents this, it will result in nothing short of your total undoing! This is because we never give such warnings, except when Vitally necessary! This applies to all others present equally as well!!

Q: (L) Well, remember that you don't want to work your way into your own undoing, I guess, so you ought to begin to overcome your stubbornness about not facing things that need to be dealt with, and doing it. And, from what they are saying, you will get all the support you will need from us and them if you just ask. (SV) Lesson learned, I hope. (L) This is a tough subject, any more on it?

A: Up to you.

Q: (L) Is there anything further you can add?

A: The situation will resolve naturally as all situations do...

Q: (L) Is there any advice you can give for mom so that she is better able to cope with the situation?

A: Reading will help relieve her stress. She can get the correct materials herself.

Q: (L to SV) So, I guess it is up to you to see that she gets time to relax and read. Okay, next issue: the computer problem. Is it an attack to prevent the magazine?

A: Could be viewed as such.

Q: (L) Is it going to be resolved quickly?

A: Yes.

Q: (L) Is our involvement with PZ fortuitous or potentially disastrous?

A: Either.

Q: (L) You said before, that when we got things going that everything would improve suddenly and dramatically, and immediately. We understood that to mean getting online dialogues going and also getting the magazine out. Are we going to be able to do this soon?

A: As soon as needed.

Q: (L) Thank you. Good Night.

A: Good Night.

END OF SESSION

4.8 February 17, 1996

Frank, Laura, SV

Q: (L) Hello.

A: Hello.

Q: (L) We have several questions on the list I would like to get to before anyone else gets here. Actually, SV has some questions about her investing strategy.

A: Who are we?

Q: (L) I'm sorry. Who do we have with us tonight?

A: Piliannah.

Q: (L) And where do you transmit from?

A: Cassiopaea.

Q: (L) Okay, now that we are connected...

A: Ask specific questions.

Q: (L) In rereading the session on the economy and investing and so forth, I was wondering if we are, at least, on schedule or the right track?

A: Yes.

Q: (L) One thing noted was, 'if you play by the rules, you cannot survive, if you don't play by the rules, you will do quite well, indeed.' What specific rules do you mean?

A: Vague. Review the text.

Q: (L) Well, one of the rules was 'working very hard and earning your bread by the sweat of your brow.' You said that was trap number one...

A: No, working for someone else; not how "hard" one does it.

Q: (L) The other thing was about investing. You said that storing it in banks was useless, and you suggested to invest...

A: These were suggestions, not limitations.

Q: (L) You also suggested publishing...

A: We suggested you ask directly to be published.

Q: (L) I talked to Val, and he has apparently become enamored of Drunvalo Melchizidek, and Frank De Marco bounced back the material.

A: That is two only, and of neither did you ask directly and with humility. Remember, sophistication and the upkeep of an appearance of “stature or professionalism” are to be avoided here! Forget “images,” and concentrate on intent with sincerity. You are very skilled at “getting your point across,” if you are sufficiently motivated to do so. Do not let self-importance interfere!

Q: (L) What are you talking about!?! Do you have any idea how much work I have done? How much I have sent out? The numbers of people?!

A: Just ask: Please publish this work.

Q: (L) I do not think you are grasping the situation here! There are two choices: a publishing house that pays you or a publishing house YOU pay!

A: You have not contacted all sources.

Q: (L) Of course I haven't contacted ALL!!! Do you have any idea how much money it costs to mail out that manuscript? There is no way I could possibly send it out to them all! You are being completely unrealistic for 3rd density here!

A: Then, network.

Q: (L) This is ridiculous! You don't know what you are talking about. You are in 6th density, this is 3rd density. (S) No, look at that computer. There are a lot of people who know other people.

Surely somebody knows somebody who works for a publisher?
(L) Sue, you aren't getting it... I have a file of rejection letters. Do you want to see them?

A: What text did you send?

Q: (L) Noah, it is the only thing that is in readable form.

A: Who says?

Q: (L) Well, for goodness sake, you ought to know that the transcripts are not suitable to send out to anyone in the chopped up and scattered shape they are in!

A: Avoid prejudice!

Q: (L) So, what you are talking about is sending out the transcripts of the sessions. Is that it?

A: Yes.

Q: (L) Well, that's not what I was talking about! If you guys know so much, how come you didn't know that?

A: We did.

Q: (L) Well, "tales are easy to sew, when the past is yours only to know!"

A: Good one!

Q: (L) Yeah, I got it from you!

A: If you ask to be published, you will be published! Also, we suggest it not be piecemeal, but all inclusive! And use your networking skills.

Q: (S) Look at how many people write to you asking questions...

A: It need not be further "organized." We have done that for you. Just have faith!!!! We have told you, we do not give false advice.

Q: (L) I am confused here.

A: Then inquire.

Q: (L) We were thinking that putting out the magazine with PZ was the way to go. And, all the other things that could go in there... Is that a vain assumption?

A: Things, maybe, but not a book. Magazine is “cool,” but not the book. Publish the book elsewhere!

Q: (L) Well, since you could give me the name of a chiropractor, why can't you give me the name of a publisher?

A: Because it violates learning directive. But note: it is close at “hand.”

Q: (L) I don't get it.

A: What do you spend so much “time” doing with your hands?

Q: (L) I type... letters to people on the net...

A: Light bulb?

Q: (S) Bright idea! (L) No, it has to be more complicated than that.

A: Look for a directory of publishers, and their mail addresses, for example.

Q: (L) Well, I have had enough on that subject. That's enough.

A: No, it is not!!!

Q: (L) Okay. I look for a directory of publishers... then what?

A: What do you think?

Q: (L) Anything else?

A: Ask.

Q: (L) Well, how will I know the right one when I find them? I can't just send it out all over the place!

A: No.

Q: (L) What else is there?

A: Much else... You know how you like treasure hunts, Laura?!? Then learn to like this one.

Q: (L) Okay, what is the next clue in this treasure hunt?

A: Network!!! Do you yet understand what we mean when we say that? Yet?

Q: (L) I guess that means that you share information on the net?

A: Yes. And... Read John Naisbitt. We have direct communications with him, too!

Q: (L) Who is he?

A: "Megatrends."

Q: (L) Oh, I have the book. Are you telling me that you communicate with him?

A: Yes. Now, read chapter headings!!!

Q: (L) Okay: 'Industrial Society to an Information Society,' 'Force Technology, to High Tech,' 'National Economy to World Economy,' 'Short Term to Long Term,' 'Centralization to Decentralization,' 'Institutional Help to Self Help,' 'Hierarchies to Networking,' etc... Page 211, interesting numbers. Okay, anything else you want to add?

A: In your "spare time," read and absorb, and look for the clues there. This will allow you to use your resources more efficiently, thus quickly achieving goals.

Q: (L) Okay. (F) With an open mind. No prejudice!

A: Yup.

Q: (L) Can I ask my other questions? Some people on the net want me to ask about this HAARP thing... seems to be some sort of antennae thing...

A: Disguise for something else.

Q: (L) What is that something else?

A: Project to apply EM wave theories to the transference of perimeters.

Q: (L) What does that mean?

A: If utilised as designed, will allow for controlled invisibility and easy movement between density levels on surface of planet as well as subterraneously.

Q: (L) Who is in charge of building this thing?

A: More than one entity.

Q: (L) What groups?

A: INVELCO is one guise as well as UNICON and banking interest.

Q: (L) Who is in disguise as INVELCO and UNICON? Are they just dummy companies for cover?

A: Close.

Q: (L) Can you tell us if this is a human organization or aliens, or a combination?

A: Human at surface level.

Q: (L) Whose idea was this project?

A: Not applicable.

Q: (L) Is there more you can tell us about this?

A: It has nothing to do with weather or climate. These things are emanating from 4th density, as we have told you before.

Q: (L) Is this something like a Transdimensional Atomic Remolecularizer?

A: No.

Q: (L) Is it something like what you said about the whole South West going into 4th density?

A: No.

Q: (L) So, HAARP has nothing to do with the weather?

A: And also EM associated with same as reported.

Q: (L) So, when is this HAARP thing scheduled to go into operation?

A: Open.

Q: (L) Is it currently in operation?

A: Experimental.

Q: (L) How long have they been working on this thing?

A: Since the 1920s.

Q: (L) What?! The 1920s?

A: Yes.

Q: (L) Well, that certainly is strange. Change gears. I read the other day about an association between UFOs and breaking things. Is there?

A: Some, yes.

Q: (L) In the experiences that I had myself, where a lot of things either broke in some strange relation to me, or disappeared, and specifically the incident when CG and I were coming back from North Carolina and the window in the car exploded, were any of these events related to UFO activity?

A: Maybe.

Q: (L) Well, CG wanted me to ask about the trip. Could you comment on that?

A: Maybe you should continue to probe CG to see what other experiences she has had, and why? There is much hidden there.

Q: (L) Well, I recounted to her the flash of memory I had of the incident that happened back in 1987 when I woke up and the house was surrounded by a super bright light. My first thought was that there was a whole bunch of trucks and cars surrounding the house with their lights shining on it, that it was people my husband knew, therefore he should handle it. I thought it was a joke and decided that I didn't need to worry about it. Later I woke up, reversed in the bed, the bottom half of my gown was wet, and instead of going nuts about this, I crawled out of the bed, which was against a wall, and turned around and crawled back in and went to sleep. I told this to Chloe, and pointed out to her how exceedingly crazy a thing it was. To know that there was all this light shining on your house, and to just go back to sleep, and then to wake up in such an odd condition, and think nothing of it... just sweep it under the rug. This happened around the same time the things were breaking. What happened?

A: What do you think?

Q: (L) Well, it could have been a dream. It could just be a very lucid dream.

A: Seems dreams do tend to reverse one's position on the bed, as

a general rule, don't they?

Q: (L) Well, no need to be funny. The fact that my physical body was reversed and I was wet would indicate an actual physical abduction, I guess.

A: Yup.

Q: (L) Well, haven't you said that actual physical abductions are somewhat rare?

A: Yes.

Q: (L) That was when my hands started going numb, the horrible headaches began...

A: Probe CG, to see what things she is repressing.

Q: (L) She did tell me that she was beginning to see some things... We will leave that. On the news the other night, there was a new type of AIDS reported. Where did it come from?

A: Mutation of virus.

Q: (L) The story is that it came from Thailand, is this true?

A: Maybe.

Q: (L) Is it already in the U.S.?

A: No.

Q: (L) Well, it is supposed to be 8 times more contagious...

A: But still transmitted in the same mode.

Q: (L) Is AIDS transmissible by, for example, insects?

A: No.

Q: (L) By any means other than what is taught?

A: No.

Q: (L) How many people have died of true AIDS in the U.S.?

A: 189,000

Q: (L) How many people have it at present?

A: Approx 1 million are HIV positive. Only 39 per cent will ever develop AIDS.

Q: (L) Anything that I ought to have asked that I did not? Can you tell me anything that will help?

A: Proceed with caution, as publishing soon to “explode.”

Q: (L) We do have this online ‘chat’ with Mike Lindemann on IS-CNI tomorrow night. Any advice?

A: Keep to the point, use simple English, avoid excessive verbiage, or concepts not universally understood, unless accompanied by an adequate explanation.

Q: (L) Okay, I guess we just press on with the networking and the magazine for now... hope it creates some cash flow because all that paper and printing is costing me an arm and a leg!

A: Soon to be solved!!

Q: (L) Well, I need to know if I am pouring money into a useless project here!

A: No you don’t! Discovery is fun!

Q: (L) Is anything unusual going to happen at the conference next month?

A: Wait and see!

Q: (L) Thank you and good night.

A: Good Night.

END OF SESSION

4.9 February 21, 1996

Frank, Laura, SV

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us?

A: Yona.

Q: (L) Where are you transmitting from?

A: Cassiopaea.

Q: (L) SV has some issues tonight, and I guess that the first one is that she is concerned about flying to Gulf Breeze. She wants to know: Is the plane we are taking safe?

A: Why would you expect otherwise?

Q: (S) Well, the Lizzies could come along and blow the plane out of the air!

A: “Lizzies” could come along and blow up your cars.

Q: (L) Do we have any protection from them?

A: Knowledge/awareness acts as a shield, as we have told you.

Q: (L) Well, speaking of that, SV had questions about investment back in December and you described a strategy...

A: One possible course of action, but not exclusive in nature.

Q: (L) A couple of weeks ago you said “advice was given” that SV didn’t follow. You then said that when she calls on you for advice, that it was up to her as to whether she chose to trust and follow the advice. Then you said that if her “deep seated stubbornness” prevented this, it would result in her “total undoing.” She wants to know what advice you gave that she did not follow?

A: All.

Q: (L) She thought she was handling it.

A: You left portals “unwatched.”

Q: (S) What portals were these?

A: Emotions in motion.

Q: (S) Relating to what?

A: Ask yourself.

Q: (L) Well, my thought is that it has to do with her mother.

A: What specifically?

Q: (L) Well, her mother and her emotions relating to her mother?

A: Interconnected.

Q: (S) I have been concerned.

A: What about potential for discourse?

Q: (S) What do you mean, discourse? (L) Discourse or discord?

A: Either/or.

Q: (L) We knew there was potential for discord. (S) Yes, we talked about it.

A: And what did you, Susan, do to prevent discord? Does talking about it amongst yourselves solve it?

Q: (L) What did Susan not do?

A: Ask Susan!!

Q: (S) I talked with them...

A: Talking about weeds does not solve a bug problem, does it?!

Q: (L) What do you mean?

A: Think! Avoidance does not solve!

Q: (L) Did you ever say to them that you would put them back in the home if they did not cooperate? (S) No, I never said that. (L) So, you just talked about the weeds, and did not address the bugs. And, your mom and Dick are so devious and manipulative that you really have to tell them in a firm way about the consequences of their behavior and what you WILL do if it continues. And, you have to make it stick. You are just simply avoiding the whole issue. (S) Well, I am going to take them to my house on Saturday and ask them how they feel... (F) That's not going to solve the problem. Of course they are going to lie to you about everything and continue exactly as they are doing. (L) SV, that is not dealing with YOUR issues with your mother. Her control over you. You need to break that!

A: Yes.

Q: (L) Is that what SV has not done?

A: Partly.

Q: What else?

A: Discuss for learning purposes!

Q: (L) I have been getting the strong feeling that SV should not be taking any more risks with her finances. SV paid off all her debts

with her capital instead of investing it to make more money. Was that a good idea?

A: What is a “good idea?”

Q: (L) Well, she no longer has any investment capital, and if anything happens to her mother.. (S) I only have about 8K left, but I believe that I should just do the best with what I have... maybe I won't have tons of money coming in, but a little here and a little there...

A: Okay, here comes one last financial suggestion: take one half of your remaining capital and buy gold.

Q: (S) Gold or gold options?

A: Up to you.

Q: (L) So, you are saying that now the whole deal has changed?

A: Well of course, the situation has changed due to change in circumstances brought about by SV's choices.

Q: (L) Would it be advisable for her to get the cash out of her credit line for investment?

A: We advised on this. It is up to her.

Q: (L) And, there is another thing: she is always stressed because of the place she works. (S) Well, I can't take the time to go to every single chiropractor for stuff like that...

A: Take time and go to one single computer terminal! And you can't presume “stuff like that!”

Q: (S) I want to know what you mean about 'deep-seated stubbornness?

A: We mean what we said, self-explanatory.

Q: (S) I think everybody is stubborn in one way or another. (L) Let's change the subject. I have been getting a lot of mail on the internet from the portions of transcript that I have posted.

A: Tip of the ice-berg.

Q: (L) Well, if it keeps up, I will need a secretary because it seems that all I do is write answers to questions or send copies of answers to questions to people asking the same questions...

A: What fun!

Q: (L) I am trying to keep up with all of it and I am being worn out. I am working 18 hours a day... I am trying to keep up with all the stuff that is coming in...

A: And those of wisdom, know to follow paths most easily grooved.

Q: (L) I have written to a LOT of people about the publishing... when am I going to find what I am looking for? I am amazed at how many people want to read the material after I have sent out these excerpts.

A: Then you should know our response.

Q: (L) Wait and see?

A: Bingo!! Did we not tell you, did we not advise you about the network??!???

Q: (L) Of course...

A: And what did you do?

Q: (L) Well, I did it as soon as I could...

A: And what happened?

Q: (L) The Lizzies tried to kill me! {laughter}

A: The Lizard Force, i.e. STS, has been attacking you since day one. We have been advising you only for 1.5 years, as you measure it.

Q: (L) The situation is such that I am running out of force from working against this constant oppression and opposition. Can you tell me if I will ever have some peace of mind so that I can continue to function?

A: Have we?

{Background for next question: Headless Valley is a specific region (Lat: 61.25 Long: -124.5) of the South Nahanni River valley (Canada) said to encompass a lost world complete with tropical forests, murderously savage natives, and a myriad of mysterious creatures ranging from 'Bear Dogs' to Sasquatch. The legend of Headless Valley is unusual in that it is fairly modern, having originated in 1908, following the discovery of two decapitated miners in the region of the South Nahanni River. Since that time, several other disappearances and murders have been documented in the region. See also: The Valley Of The Headless Men¹}

Q: (L) I guess. Okay, there is some valley in Canada that is supposed to be very mysterious and it seems that no one will go to the area any more because they all end up dead with their heads cut off. Who is doing this? Is there some Indians or cave people or what?

A: STS beings, density 4.

Q: (L) Oh, goodness! Well, I think that I ought to ask something else because I have this feeling that there is something right around the corner, or something just out of my line of sight that I do not see. I guess I am asking for unknown knowledge.

¹<http://raven-talesoftheweird.blogspot.com/2011/02/valley-of-headless-men.html>

A: Knowledge of an unknown nature is not knowledge.

Q: (L) Okay. Anything else from anybody? SV, I guess you know what you are supposed to do now... you screwed up big time... (S) Well, I was always taught that...

A: Rules. Good Night.

END OF SESSION

4.10 February 24, 1996

Frank, Laura, SV, PZ, SZ, MM, W

{Another cranky session probably due to the presence of the guests. I think it was mostly Cs influence, and they were probably less forthcoming because the individuals present were not really asking.}

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Vorta.

Q: (L) And where do you transmit from?

A: Cassiopaea.

Q: (L) First item: it seems that everyone in this room has been experiencing some sort of major, cumulative problems, all on the same day. Would you comment on this, please?

A: Exception.

Q: (L) What exception?

A: Frank. Move board over to left. Your left. {adjustment made} More. {further adjustment.} OK. Better centered.

Q: Can you comment on SV's situation since she is the most upset?

A: Not unless you ask specifics.

Q: (S) I know I am under attack and I am going to deal with it the best way I can. It's hard, but there is nothing else I can do. I knew I was coming under attack because the clock that does not work was humming again and that is always a sure sign.

A: Concealment causes bereavement.

Q: (L) Who is bereaved?

A: Who is concealing?

Q: (L) Are you trying to hide your emotional state? (S) Of course. It's my problem. (L) Well, remember what they told me: when I hurt, everyone else suffers. (S) But, if I don't tell anyone else, then no one else has to suffer.

A: Networking provides solutions, and not just on the computer!!!

Q: (S) Well, I am upset with everything about my mother. I know it is my own fault... If I had left them at the home, everything would have been fine.

A: No.

Q: (S) Well, it's not fine now. Everybody is upset. Everybody is miserable. (F) It is certainly not a good situation. (S) I want to know about this clock. Is it really a warning signal as I think it is?

A: What do you think? Remember, you learn on an exponential curve, once you have become "tuned in." This means that

you become increasingly able to access the universal consciousness. Please learn to trust your increasing awareness. All who are present here are at one point or another on that cycle, or one point or another on that cycle of progression, some further along than others. If you properly network without prejudice, you may all wind up at the same point on this cycle. We also mean that you can access the universal consciousness to find the answers to otherwise unseen truths, such as the clock vibrating as a sign of increased 4th density STS presence, for but one example.

Q: (L) Well, along this line, MM has a very strange object appearing in “aura photographs” in her house and, more or less with her. It appears to be a column of light, or a luminescent tube of some sort. What is it?

A: Represents conduit created by presence at locator which is in direct communication with higher density levels. And, in fact, there is some degree of convergence between same.

Q: (L) What presence are we talking about?

A: Many and varied.

Q: (L) And this is also a convergence point of densities?

A: Not exactly; convergence is taking place to some degree.

Q: (L) Are these presences STS or STO?

A: Both.

Q: (L) It is like a portal?

A: Not a portal, it is a conduit. A portal is an opening allowing influences to manifest from higher density levels and downward. A conduit is a “two way street.”

Q: (W) What do they want MM to do?

A: That is not the correct concept. Correction: A conduit develops both because of locator and... the entities present. It is not locator fixed.

Q: (L) What should MM do in regard to this opening and these presences?

A: Nothing in particular... But it is up to MM to decide how to handle the situation.

Q: (L) Are any of these presences connected to the statue?

A: Yes.

Q: (L) What kind of entity is connected with the statue?

A: Fifth density holdover.

Q: (L) Why is this being there?

A: Chooses to be. And no, Laura, it is not a Lizard!!!

Q: (L) Well, then what is it?

A: Didn't we just tell you?

Q: (L) Yes. We were talking about that earlier. How dead dudes can attach to things or people or houses or whatever. How are we going to solve this?

A: What needs to be solved?

Q: (L) Can she use this conduit?

A: Of course. And has already!!! If she had not, the conduit would not exist!

Q: (MM) How can I use it more effectively?

A: This would violate learning directive.

Q: (MM) What is the connection between the statue and myself?

A: All is interconnected. Please refer to our first few responses of this session!

Q: (L) She can use it to access universal consciousness?

A: Yes.

Q: (L) Well, what can she do to maximize the STO presence and minimize the STS use of the conduit?

A: Oh Laura, my dear, seems you need a refresher course in the transcripts. Maybe suggest you read them and relax and privately listen to the ones you have not as of yet transcribed a little more. This would be extremely helpful in your many and increasing communications via the “net” as well. Remember, we help you to unlock answers that have been placed in your super-consciousness files from before the “time” of the birth of your physical body. Also, false information is worse than no information at all. Now, for PZ: Please denote quote marks in your reading back of the answers, in order to preserve the greatest possible meaning! Thank you!

Q: (MM) What is happening to me when I feel I am being touched in a sleep or semi-sleep state?

A: Various entities.

Q: (MM) What is their purpose for doing this?

A: Too vague to explain and this is learning material. Consult karmic references.

Q: (MM) I would like to ask about my karma with W?

A: Remember two things: Number one, there are better ways to access this information than to expect us to lead you by the hand, this is not learning. Number two, Too many personal questions begin to restrict the channel!

Q: (L) Mike Lindemann asked us if we would be interested in utilizing ISCNI as a forum for the material. Is this an acceptable forum?

A: Okay.

Q: (L) You also said that publishing would “explode.” Can you give us any more on that?

A: Is this “personal data night?”

Q: (L) Well, I didn’t think it was personal data. I have a number of questions from people all over the world that I need to get answered, and it seems that people are interested, and I would like to get the material out there.

A: We have advised on this subject already, and patience is a virtue which builds strength!

Q: (L) Mike Lindeman has proposed that we submit the channeling to ‘rigorous testing.’

A: Mike Lindemann does not channel, now does he? What sort of rigorous testing does he propose?

Q: (L) He didn’t say. I guess they want short-term predictions and all sorts of little tests...

A: Precisely, now what does this tell you?

Q: It tells us that he wants proof.

A: Third density “proof” does not apply, as we have explained again and again. Now, listen very carefully: if proof of that type were possible, what do you suppose would happen to free will, and thusly to learning, Karmic Directive Level One?

Q: (L) Well, I guess that if there is proof, you are believing in the proof and not the spirit of the thing. You are placing your re-

liance upon a material thing. You have lost your free will. Someone has violated your free will by the act of PROVING something to you.

A: If anyone CHOOSES to believe, that is their prerogative!

Q: (PZ) {unintelligible but sarcastic sounding remark}

A: You did not completely understand the previous response, Pat. And what would constitute proof?

Q: (L) Predictions that came true, answers that were verifiable about a number of things.

A: Those would still be dismissed by a great many as mere coincidences. We have already given predictions, will continue to do so, but, remember, “time” does not exist. This is a 3rd density illusion. We don not play in that sandbox and cannot and never will. The primary reason for our communication is to help you to learn by teaching yourselves to learn, thereby strengthening your soul energy, and assisting your advancement.

Q: (L) Are you saying that your primary reason is just to teach us? This small group?

A: Because you asked for help.

Q: (L) So, you came through because we asked. Is this material being given to others, or is it designed to or intended to be shared with others?

A: If they ask in the necessary way. Otherwise, the sharing of the messages we give to you will teach millions of others.

Q: (L) What is the ‘necessary way?’

A: How “long did it take you?”

Q: (L) Well, it took all our lives and a LOT of hard work.

A: Okay, now what did we mean when we referred to “millions of others?”

Q: (L) Are you saying that this information will be transmitted in some way to millions of others?

A: In what way?

Q: (L) Well, the only thing I can think of is through books.

A: Bingo!!

Q: (W) That’s a lot of work.

A: The work has been ongoing, W!

Q: (W) Well, it all has to be typed, and edited, and correlated and put in a cohesive form, and it will be a couple of years....

A: All will be taken care of, and no, W!

Q: (L) Well, that’s a clue! A concession! (W) Well, I was thinking of the time frame and so many things are getting ready to happen any time now. It seems like the information needs to get out there soon or it will be obsolete.

A: Prejudice serves no purpose! Also, who says that the information is going to be obsolete?

Q: (PZ) What is the matter with just making photocopies and binding it?

A: Wait and see. And don’t be surprised if events supercede such options.

Q: (L) Well, that’s a clue! I wonder what they mean?

A: Wait and see?

Q: (W) I would like to know about this comet that is being talked about on the internet that people say is going to crash into the

Earth on April 7th...

A: Nonsense!!!

Q: (L) Well, I am curious about PZs and MM and Ws mysterious phone calls, and the strange guy who has been stalking PZ being seen peering in the window at Frank's job. Are all of these things interconnected.

A: No comment. All of these things can be discovered by utilising the methods we have taught you and the talents you possess and have learned elsewhere.

Q: (L) Well, group, have we answered all these questions yet?

A: Facetiousness is humorous, so long as all present understand intent!

Q: (L) Recently I heard a clapping sound behind my back, and I spun around and there was no one there. Gene B mentioned hearing the "clapping" sounds behind him when he was meditating once. I understand that this is like breaking the sound barrier when something comes through from another density...

A: Not "sound" barrier, just "barrier" will do!

Q: (L) Well, in regard to PZ's situation...

A: PZ has had "situations" going on for some time, as you measure it.

Q: (L) Well, considering her husband's work, her own work, her security clearances... and that it is very common to get the funny phone calls and now W has also had these phone calls...

A: Greys.

Q: (L) Well, there was a woman on television who had claimed that she was being abducted. She left a voice activated tape

recorder on her night table, and during the night a strange, metallic sounding voice was recorded which said: ‘don’t wake up,’ and it was the strangest thing you ever heard. And, Karla Turner had the same sort of thing going on with her. (MM to W) Should we tell them who this was that was calling? (L) Who, God? (MM) No. Go ahead. (W) I can only tell you who he claimed to be. He died in 1952. It was Paramahansa. (MM) Yes. I went out and found a tape of Yogananda, and it was HIS voice! And then the tape fried my karaoke machine. (L) Well, it either was, or it wasn’t. Was the voice that of Yogananda? Can we ask?

A: You can ask.

Q: (L) Well, was it?

A: Was it?

Q: (L) Well, where is Yogananda now?

A: Fifth density.

Q: (L) So, Yogananda is in 5th density. Cayce once said that he would return in 1998 as a ‘liberator.’ Did he mean that he would be born in 1998, or ‘activate’ in 1998?

A: That is not important.

Q: (L) Now, my memory for dates and times has always been, at best, a little vague. But, lately, it has been really bad. What is the cause of this loss of ability to keep a sequential record of what one does, who one sees, etc? It is really strange.

A: It is not strange. As one “ages” the illusion of time passage begins to deteriorate because your “higher mind” begins to understand the illusion.

Q: (L) I was reading some of the transcripts earlier today. One of the things I read was about the Nephilim and their interactions

with human beings and about other planets and molecularization, etc. Then, I was reading about the planet Kantek. Are there any human beings, on Earth, at the present time, who carry in them the Nephilim genes?

A: Yes.

Q: (L) MM has a six foot tall daughter. I have a kid who is pretty tall. Could this be a manifestation of Nephilim genes?

A: Maybe, maybe not.

Q: (L) Is there any way one can tell?

A: Would you want to?

Q: (L) Yes.

A: No you wouldn't!

Q: (L) Would these Nephilim genetics be passed down in the natural way, or would they be the result of genetic manipulation by genetically altering a fetus and then putting it back?

A: No to latter. One clue: double Y chromosomes.

Q: (W) That's male...

A: Nephilim were.

Q: (L) They, were male. Women are a double X, men are XY.

A: Prisons are filled with double Y's with monstrous personality disorders, almost always Caucasian and over- sized. Also, "bikers" often carry the gene. We suggest you not share this in a general way on the net!!!

Q: (L) On TV they interviewed a serial killer. He was HUGE! He described killing. The shrink who was analyzing said he did it because he wanted to get caught. I did NOT get that feeling. I

think he did it just because it was what he did. Bikers often carry the gene... and this is why they form 'gangs.' Nephelim. Bikers. Big. Caucasian. My, my, my. Is there any other clue you can give?

A: Nephelim are not currently on your world, just trace residuals.

Q: (L) Trace residuals in people. And there are supposed to be 36 million of them coming...

A: With the wave.

Q: (L) That reminds me: is it possible that this comet cluster you have talked about exists in 4th density?

A: No.

Q: (L) The comet cluster is in 3rd density?

A: Transcends 3rd and 4th.

Q: (L) Okay, so it is both in 3rd and 4th...

A: It will be visible to you.

Q: (L) Well, everyone is having fits over Hale Bopp, is it related?

A: ? Many space objects currently or recently visible are mysterious.

Q: (F) Well, on the news last night they reported that something had been sighted in 1991 and 1992 that had not reappeared... they thought it was a comet, then they said it wasn't that, and they also said it appeared to be pulsating. Even the astronomers were at a loss about this thing that has disappeared. (PZ) Is this thing that was seen in 1991 and 1992 going to be part of this wave?

A: No.

Q: (PZ) I understand that they are building the largest telescope ever on top of a mountain in Peru. Is this telescope going to have the ability to forewarn about the wave?

A: There is the ability to forewarn of the comet cluster, but not the wave as it is not visible. Question is whether or not warnings will be given due to clandestine and political factors.

Q: (W) Well, they already have the technology and are searching the skies with the SETI telescope in Puerto Rico.

A: SETI Schmetti, W! SETI stands for “search for extra terrestrial intelligence,” now why don’t you all start a search for a method to invent indoor plumbing?

Q: (W) Well, you know, Carl Sagan... (L) Oh, I know. And they are always asking for money. Every time I get their mail-outs I write across the top: “They are already here! When will you guys wake up?!” And I send it back. Does Carl Sagan know that we have already been ‘invaded?’

A: Close.

Q: (L) So, he is just lying?

A: Open.

Q: (L) Is there anything we ought to cover that we haven’t asked at this point? (MM) Yes. Was it Yogananda?

A: Learning is fun. Otherwise, you would still be riding your bicycles, complete with training wheels, and on that note, Good Night.

Q: Good Night. Thank You.

END OF SESSION

4.11 March 10, 1996

Frank, Laura

Q: I have a number of questions that I want to get into tonight. Frank and I have been discussing the nature of attack. The first thing I would like to ask is: I did a hypnosis session with MM and utilized some of the Greenbaum techniques. She responded in the affirmative. I was told that she had several alter personalities: “masterprogrammer, gatekeeper, Alpha, Beta, Theta and Delta, zero,” and that there were over 3,000 installed programs. Were these responses valid?

A: Validity is subjective.

Q: Does MM have over 3,000 of these “programs?”

A: Be careful of data which originates from sources which mislead.

Q: Which is the misleading source?

A: May mislead.

Q: Which is misleading: MM or the Greenbaum text?

A: No its the center of origin.

Q: That which I perceive as a negative attachment?

A: This “subject” appears to be fragmented.

Q: So, MM is suffering from MPD?

A: Not that simple.

Q: Are her fragments caused by abductions?

A: She has had abductions and the like, but not the issue here. She is “searching,” and when one is searching...

Session interrupted by long distance phone call and never resumed.

4.12 March 13, 1996

Frank, Laura

Q: (L) Hello.

A: Hello.

Q: (L) Who do we have with us tonight?

A: Vinxyoh.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) You once said that you are always with us. If so, then you must have heard the earlier discussion to the effect that, since we have been doing this project, the magazine and all that, it seems to bring on the most awful attacks from every imaginable corner. I am really tired. I get it from the people out there, and I get it here at home. I'm tired of the dramas, I am tired of the complaints and aggravation. I am tired of doing all the work, and everybody else just coming up with more problems for me to solve. I am tired of being sick. I am tired of pain. I am tired of not knowing the answers. I am just tired. I am ready to stop. To quit. To just sit in my room and vegetate. Any comment?

A: What do you want to know?

Q: (L) I want to know, if all of this activation of Murphy's law is going to stop.

A: This is not the problem.

Q: (L) Well, for beings who are supposed to be able to read minds, you aren't helping much! Why don't you just read my mind and tell me what I need to know?

A: You need to read your own mind!

Q: (L) Considering the state of mind I am in right now, that almost sounds like a facetious answer!

A: No.

Q: (L) What is in my mind?

A: Ask yourself. Discover.

Q: (L) Well, the closest I can come is to say that I am suffering from the most serious loss of faith I can ever remember experiencing. SV and her mother. PZ and the games with getting the magazine printed. The school board. The lunatics at ISCNI. Mike Lindemann...

A: We warned you that there would be attack.

Q: (L) I am at the point that I don't want any more attack. We can stop the channeling, the writing, the internet... everything. I just want to quit.

A: And what do you think that would do for you?

Q: (L) Well, maybe some of the attack would stop.

A: And maybe not!!

Q: (L) Then I need you to tell me what I can do. I am drowning here! I need to know how to shield myself.

A: Re-aim direction somewhat.

Q: (L) Toward what?

A: Ask yourself.

Q: (L) Obviously, since the magazine has been so incredibly stressful, doing everything with no help. I guess I will have to give it up.

A: If you wish, or perhaps change format?

Q: (L) Change the format to what?

A: Anything that brings less stress.

Q: (L) Well, the whole point of doing it was to create a vehicle for the transcripts. And that seems to be what is causing the stress, because people just don't want to hear it!

A: That is not true, it is how it is presented!!

Q: (L) We sent it out to hundreds of addresses. I have a mailing list. It cost a fortune for the bulk mail permit and the postage, not to mention the printing. I sent one to D and Val and tons of other people. D told me the other night that Val called him and said that he just didn't want anything to do with the material because it was so choppy and disorganized. It was a mess.

A: If the magazine is just our messages, would not this be less stressful?

Q: (L) Well, there won't be another issue if it is going to be this stressful. My point was to get enough in there so that a broad range of people would be interested and subscribe.

A: Is your "point" the only one?

Q: (L) Of course not! But I'm the one who has fallen heir to this and I am just doing the best I can without a whole Hell of a lot of help!

A: Because you wish to direct without guidance.

Q: (L) Now wait a minute! That is NOT fair. I have asked for

guidance and was told to figure it out myself. This is what I did according to what I thought was the best way to do it!

A: We are trying to help you, not hinder, but you must be willing to understand what is being said. And this requires willingness to have faith and really be guided. Not good to “get lost,” as can happen when other problems intercede, such as prejudice and the lack of conduit mindset, i.e. obsession.

Q: (L) This is precisely what I am getting at here. How does one maintain a conduit mindset, or lack of obsession, or any of these other things; those are not the problems, those are only the results of the problems. The problems are the attack, such as the situation with my mother, SV and all of her problems, the kids, the husband, the magazine, PZ and Pk...

A: Try to avoid encumbrances, when at all possible. Also, suggest that you try to stop trying to solve problems for others, especially when your instincts tell you this! Remember, all are on a different learning “schedule,” or path.

Q: (L) Well, that is all fine and good, but when other people’s problems interfere with getting the work done, the magazine out, and having peace of mind, so that I can focus, it is hard for me to not try and help and solve these problems!

A: Now, give an example of how one’s problems interfere with getting the magazine published, please.

Q: (L) Well, PZ’s kid in the print shop, being unable to keep any part of the process straight, much less keep his head on straight, caused me to have to go down there repeatedly and work like a lunatic physically assembling copy just so it would be done in time. And this was AFTER spending 18 hours a day typing or formatting! I can assure you that, had I not done so, there would be no magazine... meanwhile SV is acting like a jerk because her

mother is acting like a jerk... come on! You guys can see this stuff!!!

A: We can also “see” what you cannot!

Q: (L) Which is why I am sitting here asking. And why I asked you before... and all you gave me was ‘open,’ and ‘up to you’ and ‘wait and see.’ And now, I am physically exhausted, worn out, I have been constantly sick for months... You could have just told us! SV could have left her mother in the nursing home! I just want to crawl into a hole and QUIT!!!

A: If we had told you that, you would not have learned!!!

Q: (L) You could have just told me that SV was a flake to begin with, and that she would cause me all this grief!

A: Subjective.

Q: (L) I know it is subjective and I don’t really mean it that way, but if SV had been doing what was her own responsibility and not continuously crying to me on the phone, or coming over here and putting guilt trips on me... then I could have handled what I needed to... and she hasn’t done a damn thing she didn’t want to do, and I am the one that’s paying for it!

A: If you had done nothing, the situation would have solved itself.

Q: (L) I hate to tell you this, but not helping people when they call and ask for help sounds like a pretty STS position.

A: No.

Q: (L) I’m sorry, but that is what it sounds like. To say to somebody: ‘that’s your problem, sayonara!’ Doesn’t sound very helpful to me!

A: That is not what needs to be said.

Q: (L) I am very offended by a lot of things that have happened. I am very offended by the fact that when I asked SV to do one tiny little thing for me, which was to go to the store after I had been up for over 24 hours doing lay-out, and get me a ream of paper... she couldn't do it because she had a stiff neck. And, she said this to me! Me, with pus running out of my eyes. And I am offended by PZ and her hours and hours of complaining, and any single thing that she could do herself to straighten her own affairs, she completely ignores it, or does the opposite. And SV did not handle her mother with the result that my mother was calling me on the phone and essentially saying, you got me into this, it is terrible, and what are you gonna do? And, in a sense, she was right. I felt responsible. I believed SV, SV lied to me, and everything got completely screwed up.

A: If your focus had been on the project only, none of these problems would have resulted. And, furthermore, this is not an STS stance. Nothing of the sort!!! If you listen to your inner "voice," it is easy to differentiate between an actual request for helpful assistance, and just another trap, otherwise known as a portal of attack.

Q: (L) Well, do you understand the rock and the hard place concept? I was not in a position to help my mother, and I am still human. And, I didn't like seeing SV's mother suffer and do without, either. It seemed like such an ideal solution.

A: Interesting alternative: what if you had suggested to SV that her mother move in with her?

Q: (L) I did suggest that.

A: And...

Q: (L) Well, we said that she would have to give up her job and her life to take care of her mother and she couldn't do it.

A: And this is the crux: if that were true, SV then would have had to have found an alternative which was always open to her. Also, your mother had other alternatives open to her, but chose to “sit back” and let you handle it, as you have always done. This is a karmic circle, which, though difficult, accelerates the learning process, thus soul progress and karmic advancement.

Q: (L) Well, I felt some sense of obligation to help SV because she was always buying me and the kids things and bringing them over and insisting that I keep them. What were her motives?

A: “Buying your friendship.” Still continues...

Q: (L) Well, there are other things here that are related to this issue here. I was not able to buy some of those things, and she knew it. I was sinking a LOT of money in the magazine, and that leads to another problem. Finances. And this seems to be an ongoing portal of attack here! A whole lot of problems would be solved if I did not have to worry about survival!

A: We have told you we would help with the finances, and have, and will continue to do so.

Q: (L) Okay, is the magazine, as it is done, going to work out and carry itself forward?

A: We suggest being open to alterations.

Q: (L) It can be altered next time... but not now, it is printed.

A: Okay. How a book can be created... just concentrate on editing our messages, and nothing else, with each issue, unless camera ready “canned” copy, and at the end, just consolidate for publisher!!

Q: (L) Okay. I already thought of that. Okay. Before we stop for the night, I want to ask one question that is unrelated to all we have been discussing. I asked once before about ‘nephilim

genes,' and you said 'you don't want to know.' So, let me make a statement. We already know that people get used for 'lunch' or experiments, to be tossed into the blender, milked for emotional energy, made to suffer in infinite ways for infinite reasons. And, we are not talking about something to which I am very much attached, in terms of these missing babies of mine, because it was a long time ago. But, what I would like to know is, what is it about these nephilim children when I asked if I had children with Nephilim genes that made you respond that way...?

A: What specifically?

Q: (L) I don't know. So, we will shelve it. I am exhausted. Good Night.

A: Goodbye.

END OF SESSION

4.13 March 23, 1996

Laura, Frank, V

[The very beginning of the second side of the tape has a noise anomaly as follows; it starts out sounding like the taped voices are soft, far away and coming from the bottom of a well. This clears up; the voices are clearer and nearer. Then, they sound far away and faint again. This continues; on the tape recorder's speakers you can actually "hear" the rotation from one speaker to the other. It almost sounds like either the microphone or the people speaking are actually 'spinning' around each other. It was checked out on another tape recorder, one with only one speaker, and it is not on the other side of the tape, so it is not a physical aberration of the tape itself, or my tape recorder. Transcriber, JR.]

Q: (L) Hello. Is anybody there?

A: Fopilion from Cassiopaea.

Q: (L) Good evening to you, we are glad you came to join us. We have some situations we want to look at, and then we want to ask some questions of a more universal nature. Is that all right for the evening?

A: Maybe.

Q: (L) What's the maybe refer to?

A: Your inquiry.

Q: (L) The first inquiry I have is our situation relating to SV, and the different clues that we have received, and the different observations that I have made myself, and the discussions or the networking interactions that we have had on the subject. Can you tell us anything in a general way, or do we really have to ask specific questions about the subject?

A: SV is storehouse of vital information, clue for you was in name, but you failed to notice!

Q: (L) OK, but SV...

A: This is why the frustration is for you; nothing of value comes without a price!!

Q: (L) Number one, SV has lied to us. Number two, it seems that she began to demonstrate emotional affect only after we had discussed the fact that there was a serious lack of emotional affect, after you had told us that these robot people are people who spend a lot of time alone and have...

A: The price, my dear, continues... {Referring to previous answer: "nothing of value comes without a price!!"}

Q: (V) By continuing the relationship?

A: The Nordic Covenant was a duality.

Q: (L) SV comes from that area where that Nordic covenant, what is it, Minnesota, she's from Minnesota? Oh, I never made that connection! Holy Frijoles! 'Nordic Covenant was a duality' ... so, when you made mention of the Nordic Covenant, and the banking scandal, was that a double-layered statement to us?

A: Maybe, but you are missing the point! All persons of Nordic heritage hold secret power centers, can be of darkness, or of light... SV is of Teutonic bloodline leading directly to such super power source such as Thule Society and others, and she is aware of her powers and mission. It is of positive orientation. However, you are being tested by 4th through 6th density forces to determine if you have the strength and wisdom for continuance!

Q: (L) The whole thing just doesn't make sense... I mean, with that nasty red aura she has...

A: Red aura needs much further study on your part. Your sources for such information could be deceiving you.

Q: (L) Well then...

A: And we are the Cassiopaeans, but it is of your will to live as you desire.

Q: (L) Well... Then why was she told by you guys, that if she didn't do certain things that it would lead to her total undoing?

A: Go back and study that message again, with assistance of tape, and with mind open to all angles. Check intent, however, malice is in absence. Notice the difference. The duality of covenant!!!

Q: (L) Well, Frank is of Nordic extraction. Is he a member of this covenant, also?

A: Maybe.

Q: (F) If so, it's news to me. (Laughs) (L) Do you say she is aware of her mission?

A: Some are.

Q: (L) Is her mother something in the way to block her from performing her mission?

A: Mother is inconsequential.

Q: (V) Her mother, her adopted mother... inconsequential. Ok, so does...

A: Curious how background is murky, yes!

Q: (L) Yes, that is curious. (V) Something tells me that this can go further... (L) Well, yes, but they were also talking about her birth, and her adoption, and all that kind of thing in another session. Stuff that's so unclear, she doesn't know anything about it, and claims she doesn't. So strange... Is SV a 'walk-in'?

A: Not correct terminology.

Q: (L) Well, then what is the correct terminology? What is SV?

A: Birthright.

Q: (L) Now, what does that mean?

A: Discover.

Q: (L) Are you saying that when we make mention of the Nordic Covenant and the Thule Society, that there's some possibility that SV has been programmed, or has layers of programs, and that some part of her program knows what she's doing, and maybe other parts don't?

A: Yes, but this is not a negative thing.

Q: (L) Okay, now let me go a little bit deeper. Could SV be what you described as a robot person, but programmed for a positive purpose?

A: No, robot “people” do not have bloodlines.

Q: (L) So, this is something that’s programmed genetically in a bloodline?

A: Not exactly, those that have the bloodline have the corresponding soul alignment.

Q: (L) We are talking about a genetic bloodline that activates certain abilities and genes that interface with the corresponding soul that has prepared for this manifestation of the bloodline?

A: Yes.

Q: (L) Is there any significance to the fact that SV spent all of those years living with the Outlaws Motorcycle gang and this covenant?

A: Yes, and that is what has led and is leading to the destruction of the “Outlaws,” a group associated directly with 4th density STS.

Q: (V) Her presence there caused them to break up? This was a good thing. Is this what is meant here? That her presence was uplifting to them? (L) Well, it’s not uplifting them, it’s breaking them; they are all going to jail!

A: Yes and because of circumstances planted by “Agent SV.” This is why the perceived lack of emotion connected with that whole situation. SV is the bravest human you have ever known! All evidence to the contrary is veil; part of the testing process.

Q: (L) If we’re being tested, why are you telling us? (V) So that you do not fail?

A: Yes.

Q: (L) Is SV aware that this is going on?

A: Vital that you do not fail.

Q: (V) Is SV aware that ...

A: Yes.

Q: (V) Is there a pivotal word that might break this open to a clearer understanding?

A: Discover.

Q: (L) Now, when we were flying back home, {from UFO conference in Gulf Breeze} and we were flying through that storm, was that storm, which began before we left, and we flew through it on the way back, was that a byproduct or bleedthrough of a battle between the forces?

A: Yes.

Q: (L) Was it trying to harm us in any way, because we had to fly through it, and couldn't fly over it? I mean, even the pilot was worried, and he had been flying for years!

A: Yes.

Q: (L) What brought it to an end?

A: SV. Notice how "unaffected" she was?!?

Q: (L) I told you that the whole thing about being scared was a fake! (F) Yes, she was scared on the way up, when there was nothing to be scared of, and on the way back, when we were bouncing around like a pinball in a pinball machine, she's sleeping, I'm getting sick, and Laura's going 'Ride em, cowboy!!!!' {All laughed}

(L) Ok, so how are we supposed to react to this situation?

A: Up to you.

Q: (L) OK, we knew that was coming. It wouldn't have been a good night without it! (V) Some things never change, huh? (L) Well Frank seems to think there's a whole lot more there in terms of background than she was letting on. Is that correct?

A: Maybe.

Q: (L) Well, ok, I'm going to trust you guys, and I'm going to go with the flow, and I'm going to assume that you are right, and I'm going to assume that this is for the best and for the good, and I'm going to stop my knee jerk reactions, and stop worrying about such things.

A: Suggest you look before you leap. All can be wrong in their quick judgments, whether the result be acceptance or rejection. All is not as it seems... Remember, those that come into your group, or your circle of influence can be different than you think.

Q: (L) You said we were being tested. Tested for what?

A: Continuance.

Q: (L) Continuance of what?

A: All.

Q: (L) Continuance of all. Ok, and we are being tested through SV?

A: Currently.

Q: (L) Are you saying that what we have been considering attacks were just tests?

A: The ones associated with SV. And no, all with that name are not of this orientation, but this clue was installed for you.

Q: (L) Are you saying that SV is our 4th density Nordic?

A: ?

Q: (V) Maybe just by the purpose of her being, she's vital for you!
(L) OK, Whitley Streiber wrote back and told me that he was familiar with this school that I experienced in the dream and I think I asked you guys about this once, and you said I needed to discover some more about it. He says that he is familiar with all of it...

A: All is not as delivered.

Q: (L) He says that he is one of the patriarchal dudes who was teaching...

A: Ditto.

Q: (L) Well, my feeling is that this was a school on an astral level, it was a school of a higher density, that it was not ever a physical, 3rd density school. That was my impression of it, and that I was being sent forth from another density, to experience, after being instructed by this group of patriarchal type beings. {They were actually seen as more like how one would imagine Greek Philosophers} Is that correct?

A: Yes.

Q: (L) So, the school that Whitley describes, and him thinking that he is one of the higher density beings, he's misinterpreting this as a physical school. Is that correct?

A: Maybe.

Q: (L) Is he, is he, well... They're not going to answer that one, are they? Why do I even bother thinking that I'm going to slide that one by...

A: Now, for the remainder of this session, we wish to address the so called earth changes for your benefit, as you are stuck here. Those present need to be equi... [Sound anomaly on tape begins

here, on second side.] ...pped to stop buying into popular deceptions once and for all! Reread Bramley.

Q: (L) Funny I took him off the shelf today... (V) What's Bramley about? (L) Well, hold on. Do you want me to read it right now?

A: No.

Q: (L) Ok, address the subject.

A: All such changes are caused by three things and three things only! 1) Human endeavors. 2) Cosmic objects falling upon or too near earth. 3) Planetary orbital aberrations.

Q: (L) All right, carry on.

A: Don't believe any of the nonsense you hear from other sources. It is designed to facilitate mass programming and deception.

Q: (L) Ok, okay.

A: Just as your bible says; "You will know not the day, nor the hour." This means there is no warning. None. No clue. No prophecy. And these events... [anomaly starts again here, briefly.] are of the "past" as well. [and ends here.]

Q: (V) What events of the past, as well?

A: Cosmic and "man made" cataclysms.

Q: (L) Well, since you put 'man-made' at the top of the list, am I to infer that perhaps some of the activities of the consortium, the secret government, are going to precipitate some of these events?

A: No.

Q: (L) Yes. Okay, is there any more that you want to say on this? Go ahead, you have the floor. Please.

A: Ask away.

Q: (L) Well, you've said that there's a comet cluster that's coming this way. Is that still correct?

A: Yes.

Q: (L) Is this body that has been called Hale-Bopp, is this that comet cluster?

A: No.

Q: (L) Is this comet cluster that's coming, and you've indicated that it could arrive anywhere between 18 years, something like that, is that correct?

A: Maybe.

Q: (L) Now, is this something that can be seen from a great way off?

A: No.

Q: (L) Is this something that's going to impact our particular immediate location, and appear suddenly, as this comet that has flown overhead just did? Nobody saw it until a very short time ago, and all of a sudden everybody sees it?

A: The cluster is a symptom, not the focus.

Q: (V) What is the focus?

A: Wave, remember, is "realm border" crossing... what does this imply? Consult your knowledge base for Latin roots and proceed.

Q: (L) So, the Latin root of realm is regimen, which means a domain or rulership or a system for the improvement of health. Does this mean that, and as I assume we are now moving into the STO realm, now, out of the STS realm?

A: Partly.

Q: (L) And also, can I infer from this, that the comet cluster exists in the other realm?

A: Partly.

Q: (L) Well, previously, you had said that the comet cluster would come before the realm border. Which indicated that the comet...

A: Yes.

Q: (L) Well, how can something so... you said it appears to be one single large body, and that our government knows that it's on it's way, and that apparently somebody has spotted it. Which direction is it coming from?

A: Direction?

Q: (L) Well, the comet cluster. That comet cluster, is, I am assuming, a real body, in third density experience, right? A part of a real cluster of bodies in third density experience. Is that correct?

A: Cluster can approach from all directions.

Q: (L) So, can I infer from what has been said, that we are going to move into this comet cluster, as into a realm?

A: Border changes rules.

Q: (L) But if we run into the comet cluster before we cross the border, then, I mean, I would understand if we were going into the realm border first...

A: Part in part out.

Q: (L) OK, is this so-called HAARP project instrumental in any of these realm border changes, these realm changes?

A: All is interconnected, as usual.

Q: (L) Anybody got any questions on this? What is the thing that is going on nowadays... let me ask about this. Roxanne sent me some information about the Do-ma, or space goddesses who rule the grays, supposedly. Apparently there is a whole group of people, including government officials, involved in this Do-ma cult.

A: Yeah, right!

Q: (L) Well, that was my feeling. I sent...

A: Deception is everywhere! Scrambled brains, anyone?

Q: (L) Gotcha. I sent several chunks of the Cassiopaeian transcripts off to {Hampton Roads publishers}. As I was requested to...

A: Wait and see.

Q: (L) In a nutshell, could you tell us what the re-emerging goddess images represent, nowadays? (V) Programming?

A: Close.

Q: (L) Frank, is there anything you need to know? (V) I just want to know if they have anything they want to share with me, that's all. They know what all my questions are.

A: Open to all possibilities. Rigidity does not pay!

Q: (V) What are they talking about? (L) I guess that last comment was for everybody. Be open to all possibilities. OK, well, we'll stop for the night. Goodnight.

A: Good-bye.

END OF SESSION

[Laura's note: After the termination of the session, I had doubts about some things relating to SV, so I asked for the C's to come back and comment.]

Q: Hello. Are you there. I am not comfortable with this information about SV. It seems to be contradictory to everything I can observe and feel.

A: Hiklu Cassiopaea. Worry not further! Discomfort is not necessarily danger, and is indicative of growth and learning. So, proceed and celebrate!!

END OF SESSION

4.14 March 29, 1996

Frank, Laura

Q: Hello.

A: Hello.

Q: (L) Who do we have with us this evening?

A: Womol.

Q: (L) And where are you from?

A: Cassiopaea.

Q: (L) In the past week I have been going through some fairly severe trauma because of certain ideas and realizations I have been forced to face...

A: Stress, yes, trauma, no.

Q: (L) Well, it has felt traumatic to me. The first question I would like to ask is: in reading and analyzing the Bluebeard fairytale as a map of consciousness, am I correct in my understanding, that I am basically living the life of Bluebeard's wife?

A: Close enough for now.

Q: (L) My application of this map of consciousness, so to speak, is not only in the area of my marriage, but also a number of other interactions. Is this correct as I understand it?

A: Maybe.

Q: (L) What part is the maybe?

A: Learning is a complex process, answers follow study.

Q: (L) I studied the situation at length. One of the first things I determined was that my assessment on...

A: Interference from blossomer nearby.

Q: (L) Do you mean right now?

A: Yes.

Q: (L) {Child was discovered nearby, sent to bed.} What kind of interference do you get from a 'blossomer,' as you call them?

A: Soul discharges caused by efforts made by influences attracted by channel attempting to take over body of child in order to experience sensation of total euphoria!!

Q: (L) So, as a general rule, is this euphoria produced by watching television?

A: Can be enhanced. Warning!! Littlest one is most susceptible to total possession by extremely STS oriented forces during sessions, and must be kept away at all costs!!!! There have been instances where perceived health disturbances by this one and others have been, in reality, up to 30 percent possession! Lungs are the "weak link," and it is your psychic abilities that have caused the troubles in the past.

Q: (L) You mean that what I am doing is causing problems for my children?

A: No.

Q: (L) Then why have my psychic abilities caused health troubles in the past?

A: Because you were less aware at that point, and your abilities went into a surge.

Q: (L) Well, it seems to me that I have a strong tendency to manifest my psychic and emotional state physically; not only in my own body, but also in manifestations and events around me.

A: Yes.

Q: (L) Back when we first moved into this house, we had a burglar break in during the night. I have always been troubled by the fact that a strange man broke into my house, the symbology of it. The other night, I was reading about dreams of people breaking into one's house being a warning that there is extreme danger from the deep subconscious. These dreams always have a strong physiological manifestation. Well, I had an 'intruder dream,' and it WAS like this. But then, I thought about the actual intruder being a psychically manifested warning in the flesh.

A: Yes.

Q: (L) Was the fact that it could manifest in a physical way any kind of indication of the seriousness of the threat?

A: Yes.

Q: (L) Is there any particular thing that I ought or could do to further protect the children?

A: Open, but suggestion would be to organize more.

Q: (L) In what sense?

A: The children.

Q: (L) I don't understand. Do you mean being more strict in terms of regimen?

A: Close.

Q: (L) In the sense of bedtime rituals or something? Prayers?

A: Maybe, but also other.

Q: (L) Limiting watching television?

A: We have told you some things...

Q: (L) Okay...

A: Imagine an interruption that leads to problems.

Q: (L) Are you saying that 'idle hands are the Devil's tools'?

A: No, because free will is paramount.

Q: (L) Just give me more of a hint.

A: Organize.

Q: (L) Send them to bed before we channel?

A: Up to you.

Q: (L) Is A__ also susceptible?

A: Not blossoming.

Q: (L) Are they alright in their bedrooms?

A: Yes.

Q: (L) Does it have something to do with physical distance?

A: Awareness.

Q: (L) Are you saying that their awareness of what we are doing establishes the connection?

A: Close.

Q: (L) And I should organize them more. So, I should have them ready and in bed before we work.

A: Yes.

Q: (L) Back to my question: the intruder dream the other night was VERY disturbing. In the dream, I tried to wake my husband to tell him that some one or some thing was in our house, I discovered that he was paralyzed. He was like my friend Keith... can you help me with this image?

A: Learning is fun!

Q: (L) Well, it was not fun! My heart was about to pound out of my chest, and I ended up sitting in a chair half the night. There was a realization that I have been being drained by a lot of people for a long time...

A: Yours to look and discover. Not ours to help you “cheat!”

Q: (L) No cheating, huh. I can't look at the answers in the back of the book. Okay, let me ask you this: is there any significance to the fact that L's mother's maiden name was Rheindress?

A: Open.

Q: (L) Well, you are not helping! I have been seeing things so completely differently lately. I even see that you have given all sorts of clues about this that just went over my head...

A: Laura, please learn just to trust your expanding insights. They will bring you to ever increasing knowledge and ability. But, you want us to lead you by the hand. All this can do is ultimately lead this channel and conduit into an STS vehicle!

Q: (L) That is not what I am trying to do here! I am trying to expand on a learning experience to help other people.

A: You have the ability to do that all on your own!! Cannot you see this yet?

Q: (L) I am still in the process of making major changes in my life based on such insights...

A: And, how do you feel when you make a decision to make one of these changes?

Q: (L) It hurts to make some decisions, even if I feel that it is the right thing to do. It can be painful and scary.

A: Relief?

Q: (L) Definitely relief!

A: And...

Q: (L) I have some little hope that maybe something else will happen to help with the work if I make sure that my own life is clean. I am cutting off my financial support, and that is frightening. But, right now, I had another thought... I recently received some information about the Denver Airport. It seems that there is confirmation that this Airport does have some connection to something very mysterious. And, you brought this up in the very first contact. Is there something more on this?

A: Wait and see.

Q: (L) I also learned that the sighting of flying boomerangs over in England, quite some years back, was also accompanied by messages that came through a board to some kids in a town some distance away, and that those messages were very similar to some of what we have received. In fact, the opening messages were warnings about alien bases! I am very curious about that. There were so many things about that particular case that are so similar in dynamics... When something very negative happens in the

Earth, does it necessarily make an opening for a balancing of positive energy?

A: Maybe.

Q: (L) Can you tell me anything else about it? The Clapham Wood incident back in the 70's?

A: No.

Q: (L) Well, that is not helping me.

A: It is, but not as you think. Stonehenge power. Vortex. Magnetic principles understood by you when you occupied other bodies, ask Hilliard, ole boy.

Q: (L) There have been a number of hints that Hilliard has some knowledge that he may be withholding. Does he have knowledge that is important, and how can I persuade him to tell me?

A: Massive, and probe directly after promising absolute confidence... and don't break it!!!

Q: (L) Okay, I will. Well, back to the situation. I am between a rock and a hard place.

A: Not really.

Q: (L) Easy for you to say.

A: Wait and see.

Q: (L) Well, rereading back over the transcripts, there seems to be some very interesting stuff about the Thule Society and some things about a Nordic Covenant, and this seems to be very mysterious and connected with activities going on in Antarctica. Well, I read the place where it was said that the Lizard beings were slaves and pets of the Orions. That seems to be extremely significant.

A: When you get money, pay someone to transcribe.

Q: (L) I will do it myself as quickly as possible... SV was supposed to help me with this... but obviously she is fading from the picture here...

A: Maybe, maybe not, you are not completely in control of all possible factors.

Q: (L) Well, however things work, I don't really care right now. As soon as I can see again, I will get back to transcribing. I have sent some samples out to a couple of places. I have had some VERY positive responses...

A: Have fun!

Q: (L) What is that supposed to mean? I don't like the sound of that! The other day when you said 'celebrate!' all I did was suffer!

A: Stop suffering!

Q: (L) I can't help it! I feel so sorry for L___! He is a master at being a victim! It tears me apart! Back to my questions. Is the Nordic Covenant what has charge of this genetic project to prepare a 'breeding ground' for the Nephilim?

A: No.

Q: (L) What does the Nordic Covenant do?

A: Discover.

Q: (L) How am I supposed to do that? I can see myself going up to somebody: "Hi! Are you a member of the Nordic Covenant? I'd like to know what is going on in your head?! What do you think about?" Right! Well, I am tired. Anything else for the protection of the children?

A: We have told you.

Q: (L) Anything I need to know about my situation? I feel pretty desperate.

A: Has it been “desperate” before?

Q: (L) Yes.

A: Did you turn into dust?

Q: (L) No, but I thought I would!

A: What about your settlement?

Q: (L) God knows when that will happen! You won’t tell me!

A: If we did, you’d become a “softie.”

Q: (L) It seems that over the course of time, you have turned us more and more in the direction of learning on our own. Does this mean that it is winding down to come to a halt?

A: No.

Q: (L) Can you tell me what this means?

A: You needed more assistance earlier.

Q: (L) Well, am I correct in the MPD idea regarding SV?

A: Pursue with an open mind and cross check all analyses.

Q: (L) Okay. I am concerned about the baby. Should I do a spirit release for her?

A: Why?

Q: (L) Well, her lungs seem to be pretty reactive right now. She is having a rough time right now.

A: Regulate diet, it is abysmal!!

Q: (L) What about her diet?

A: Sugar, out!!! Fats reduced, leafy vegetables increased, sleep coordinated.

{Except for the sugar part, this was not very good advice.}

Q: (L) Okay, speaking of diet... the Atkins diet seems to be logical... but it increases fats and proteins.

A: Waistline okay, heart smart?! Naah!

{Again, not very good diet advice, IMO.}

Q: (L) You talked once about passing a test, that I was being tested in some way... that this had something to do with SV... I would like to know if this was the test?

A: Open.

Q: (L) Well, I have to get up early, and my mind is drifting, so I will say good night.

A: Good night.

END OF SESSION

4.15 April 24, 1996

Frank, Laura

Notice the comment added to this session regarding “thrombosis”.

Q: (L) Hello. Is it okay to work in this room since [my daughter] has taken our work room tonight?

A: Necessities produce changes.

Q: (L) And who do we have with us tonight?

A: Siril.

Q: (L) And where are you transmitting from?

A: Cassiopaea.

Q: (L) I would like to deal with certain issues relating to the progress of this “mission” or “project” as you have described it. As you know, we have experienced serious disruptions and “attack” in recent months. I came to a conclusion that my husband is a robot person. But, I am not going to ask you to confirm or deny that. I came to that idea through information in the transcripts. What I do want to know is: is it likely now that much of the attack will cease since that energy has been removed from my environment?

A: Maybe, but not necessarily in the ways you think!

Q: (L) Well, since I have been through such a terrible ordeal in the past year, what is there to encourage me?

A: Vague.

Q: (L) Okay, is my husband a robot person?

A: Listen. Open.

Q: (L) What do I need to listen to?

A: See.

Q: (L) Am I going to see something?

A: Robot or not, all are programmed.

Q: (L) All are programmed including myself and Frank?

A: Yes.

Q: (L) Well, considering a lot of my internal experiences, I had already come to this conclusion. What is the objective of this programming?

A: It is too complex to explain yet.

Q: (L) What was the source or cause of the complete loss of my voice for several weeks?

A: Q plasma bacterial infection. Ask Wu.

Q: (L) You mean Dr. Vu?

A: Yes. Pronounced Wu in southern oriental inflective tone.

[Yes, it IS Wu, and I DID ask. This is a definition of an “unknown” or “unidentifiable” bacteria which the medical profession labels “quelle” to indicate its unknown origin.]

Q: (L) I was analyzing some of the material regarding the recent episode with SV and her mother. To this point, she still has done none of the things that you advised her to do in response to her requests for advice. I told her that I was very angry that she took so much of my time and energy and still did none of the things advised, resulting in EVERYONE being upset. Now, I had someone call me and tell me that SV was involved in some sort of coven or very dark organization. I just have a very difficult time believing this. How can she speak so disparagingly of such things and then, be a part of such? Yet, the source of the information knew things that “clicked” and could not possibly have been said unless this was true. Is it possible that SV could have multiple personalities and one of her other “selves” is doing this? As in Greenbaum?

A: Sure!

Q: (L) Is it possible for either Frank or I to be involved in such and not be aware of it?

A: Yes, but it is not that.

Q: (L) Does that mean that there IS some other thing that we are involved in, in some other aspects of our selves, that we are not aware of?

A: Close.

Q: (L) Is this something that happens in altered states or in sleep states?

A: Not happens, happened.

Q: (L) Something that happened in the past?

A: Laura, you need to consult a powerful, practiced, effective hypnotherapist to unlock these questions for you.

Q: (L) Is this something I could do for Frank in the meantime? Obviously Frank could have a big piece of the puzzle locked up in there...

A: Both of you and others. The locks have been installed in such a way that it is literally impossible for you to unlock them, as they were installed with full knowledge of present circumstances.

Q: (L) Who installed these locks?

A: Supremely powerful STS consortium!!

Q: (L) And what circumstances were they aware of, as you have mentioned, when they installed these locks?

A: All.

Q: (L) You are the Cassiopaeans, correct?

A: Yes.

Q: (L) And you are STO?

A: Yes.

Q: (L) And you are telling us that we have locks on knowledge installed in us, installed by supremely powerful STS consortium. Can we not, in our conscious state, reject this programming, and ask you to inform us of this information?

A: Not possible!

Q: (L) What is not possible?

A: What you just asked.

Q: (L) You mean we can't change our minds, or you can't inform us?

A: Incorrect analysis.

Q: (L) Give me the correct analysis.

A: You cannot unlock, and we cannot tell you details of what, or why.

Q: (L) Why can you not tell us?

A: Free will violation, and endangerment of you if done thusly.

Q: (L) Is there some way to do it that does not endanger us?

A: We have told you.

Q: (L) Is it a danger to us to NOT unlock these things?

A: In a sense.

Q: (L) When I was kidnapped at the age of 3 or 4 in Jacksonville, how many days was I missing. My mother simply has a blank about it, which amazes her.

A: 12 days.

Q: (L) Who was it that kidnapped me?

A: Jan.

Q: (L) Who was Jan?

A: Corps member.

Q: (L) What corps is this?

A: Select division of economic legion under control of G5.

Q: (L) Economic legion? What is G5?

A: Intel.

Q: (L) What was the purpose of this kidnapping?

A: To install self-destruct programming.

Q: (L) So, this Jan was known to us as “Cecil Brien.”

A: Yes.

Q: (L) And he more or less overwhelmed my mother and persuaded her to marry him just to get at me? I find this to be incredible!

A: It was easy at the time. She was vulnerable.

Q: (L) So, I have a “self-destruct” program. And Frank has one also?

A: Similar, but not an exact copy so as to mask.

Q: (L) Was Frank abducted in a similar fashion?

A: Close, but not exactly.

Q: (L) Was Frank’s pneumonia when he was a child, that nearly killed him, part of this self-destruct program?

A: Yes.

Q: (L) Was Frank’s father also programmed?

A: Semi.

Q: (L) Well. I think we can safely assume that every member of our families have had some sort of program installed, if only to facilitate our programming. This whole situation is beginning to sound inexpressibly grim.

A: Grim?!? You have lived decades after these episodes! How many brethren? Multiples of millions!

Q: (L) That is why I am saying it is pretty damn grim...

A: And it is part of a natural process, do not forget.

Q: (L) Well, we need some help from the good guys. Or, is it that unless we can figure it out we are stuck?

A: No.

Q: (L) It sounds so dreadful. We need some help here. I am becoming VERY tired.

A: You only need knowledge.

Q: (L) Have any of my children been programmed?

A: Open.

Q: (L) My daughter A___ has been going through a terrible time. I have taken her to the doctors several times. Can you tell me what is wrong with her?

A: Desire for acceptance.

Q: (L) What will help?

A: Patience. She is headstrong.

Q: (L) You can say THAT again! Recently I talked to a fellow who was telling me about discovering the trainload of Nazi treasures in a cave in the Harz Mountains. He was asking for investors. If

I were to get my [insurance] settlement in time, ought I to invest in this?

A: Does herpetologist study his/her subject by travelling naked into a snake pit?

Q: (L) Okay, that settles that. What about the settlement?

A: Your settlement is being delayed by those purporting to be on your side.

Q: (L) Is [my ex] going to give me any further problem?

A: Not if you “cut him loose” completely.

Q: (L) What does that mean?

A: Give him ultimate freedom.

Q: (L) Well, I want to have a little direction here.

A: Concentrate on settlement. This can be a problem solver if handled wisely, a curse if not so! Use some of the funds to locate a “super-hypnotherapist.”

Q: (L) Who might this person be? A clue?

A: No.

Q: (L) Is there some progress that we can make on our own?

A: Yes.

Q: (L) Give me a clue... I want something that will blow me off my chair and enrich my life which is so grim... produce knowledge that will protect me...

A: Won't succeed until locks are blown off in proper way.

Q: (L) Well, I hope I survive until then.

A: Refer to previous answer.

Q: (L) If you guys were here, I'd throw something at you!

A: We'd dodge!

Q: (L) Well, you see my problem here... I guess I just want to know that there is someone out there who cares...

A: You should by now.

Q: (L) Then you guys ought to get behind my lawyer and jack him up...

A: We do, through you.

Q: (L) Tell me about DF, who is supposed to be part of the intel network?

A: Not so.

Q: (L) What is not so?

A: Intel.

Q: (L) You mean, the claimed intelligence connection?

A: "Remember the Brockinton!"

Q: (L) Well, DF does not go around exactly claiming he is connected like Andrew B does...

A: Intel does not spew on the internet.

Q: (L) So, we have a LOT of stuff locked up inside and all we have to do is find the key...

A: Yes, exactly.

Q: (L) Anything else...

A: Beware of cardiac concerns. Not what is, what may be.

Q: (L) What specifically?

A: Possible thrombosis in future.

Q: (L) What can I do to avoid such?

A: Many things, but most important is your attitude. You must decrease your anger.

[Laura's note: I was, in fact, very angry at my ex. However, it is interesting that this issue of heart concerns/thrombosis was brought up at this moment because within just a few days of this session, my close friend, Sandra, suffered a thrombosis that caused cardiac arrest and her death. This suggests that some information that gets "picked out" can relate to someone close rather than to the individual specified. It also highlights the peculiar "impressionistic" nature of psychic transmissions.]

Q: (L) Well, I thought I had basically done with that when I asked [ex] for divorce? What am I angry about?

A: Much, but especially dark past occurrences, some locked, some not.

Q: (L) What past occurrences?

A: What was done to you.

Q: (L) You mean the kidnapping and possible alien interference?

A: And other.

Q: (L) Do you mean [my ex]?

A: Not mainly.

Q: (L) Well, can I ask this: did [my ex] ever, at any point in our marriage, care for me at all?

A: The way he does.

Q: (L) That says it all. But, what are they talking about? What was done to me?

A: Violations.

Q: (L) In the process of programming me to destroy myself, was I physically and sexually violated? I have absolutely NO memory of ANY of that. Are you talking about when I was a child?

A: Yes. And other.

Q: (L) Can you tell me what ages?

A: 2,4,7,10,17,22,44

Q: (L) When I was 2, I was abducted?

A: Yes.

Q: (L) And when I was 4? I was kidnapped and programmed?

A: Yes.

Q: (L) And when I was 7 I was abducted?

A: Yes, and...

Q: (L) I was programmed then, too?

A: Yes.

Q: (L) When I was 10... Abducted?

A: Yes...

Q: (L) Well, I am just going to have to think about all this... Looks like a good lotto number!

A: Open.

Q: (L) [That was a joke.] Don't you guys believe in FUN?

A: Yes. Good Night.

END OF SESSION

4.16 April 28, 1996

Frank, Pat Z, Laura.

This was an interesting session night. If you refer back to the immediately previous session of 24 April, you'll note the reference to cardiac concerns. On the 25th of April, my close friend, Sandra, suffered cardiac arrest probably due to thrombosis. She was found by a janitor cleaning the offices where she was working late. She was supposed to stop by my house that evening, but never showed up. I figured something came up and she would call me. When another day went by and I had not heard from her, I called to find out what was going on and learned about her collapse, that she was in the hospital, but that she had been found too late; she was on total life support only until all of the family could assemble.

With the permission of the family, I was allowed in to see her. I spent some time talking to her and found it hard to believe that she was gone because her eyelids would flicker and her fingers would move when I talked to her. Anyway, I was very distressed and that night I determined to either try to communicate with her or ask the Cs about her. So, the first part of this session was dedicated to that. Unfortunately, the tape was lost and all I have are the handwritten notes of the responses, but I will try to reconstruct the session below. It was around midnight when we began.

Q: Hello.

A: Hello. You wanted to contact Sandra?

Q: Who do we have with us tonight?

A: Yturso.

Q: And where are you communicating from?

A: Cassiopaea.

Q: I would like to know if it is possible to communicate with Sandra?

A: Maybe. If you wish to speak with her, we must “step out of the way”.

Q:

A: With, not “to.”

Q: Is there any chance that she will recover?

A: No.

Q:

A: In order for you to contact her in any way, we must leave!! Temporarily, of course!

Q: Is it safe for you to give up the channel?

A: Yes.

Q: Well, I’m a little skeptical.

A: Try it.

Q: How will I know it’s really Sandra?

A: Discover

Q: Okay, let’s try it.

A: Done!

Q: Sandra, are you there?

A: Yes.

Q: When I was talking to you at the hospital, were you trying to respond to me?

A: No.

Here there followed a series of “no” responses that indicated that Sandra was not coming back to her body. I asked her how she felt”

A: Good. I’m just getting started!

Then, more or less out of the blue the following came:

A: Don’t shoot! Let the young girl go!

Q: What do you mean?

A: You’ll see. Station. Radio.

That was rather puzzling and since it didn’t seem to be anything but static, we didn’t pursue it. It was only on the following day that we learned that the Port Arthur, Tasmania, massacre was taking place at exactly that time.

Q: Are you having problems communicating?

A: My first time. I’m better on the other side of the board. [Sandra had sat with us to communicate with Cs on a number of occasions.]

Q: I asked something about whether she was in and out of her body.

A: Yesterday was last time. I just came in for a little while.

Several “no” answers which I think were about whether she suffered any pain. Then I asked her what was she thinking about when she suffered the “event”.

A: Dinner.

Q: What did it feel like?

A: Felt like fainting. I had a funny feeling in my stomach. Weak in the arms, then a tingling in my fingers. Then lights flickered then flash then a popping in my head then a dream. Then I saw myself on the floor. I felt good.

Q: Were you afraid?

A: No. I thought, well of course I'm dead, who wouldn't be after all that?

Q: Then I asked her something about whether she was stuck or could she go into the light.

A: No, Laura. You really don't know about this. I am in the light.

Q: I just don't want you to get stuck anywhere.

A: When have I ever been stuck? This is fun! There is no right or wrong here either. This is like a school. This is fun! Do you know when I last had fun?

Q: I said something about how much I would miss her.

A: Laura, don't be a spoilsport!

Q: Here I asked how could I be sure that I was talking to Sandra.

A: Figures in file cabinet. Think. Tom was mad.

This referred to a practical joke she and I pulled when we worked together at the state welfare office, HRS. We had put little dress-making mink heads and tails in a file folder, sticking out like the whole critter was in there, and then sent the secretary to get a file that would be found in that drawer. When she opened it, she threw a whole stack of files she was carrying into the air and ran

screaming from the room. And yes, the lead worker, Tom, was really upset with us. No one else in the room (F and P) knew about this.

Q: I said something like I couldn't be sure...

A: Oh, Laura, I'm doing my best! Do you want my fingerprints?

At this point, I said my farewells with great sadness and we let Sandra go and then asked for the Cs to return.

~~~

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Vordkon.

**Q:** (L) And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) As you know, we just had a little chat with Sandra and we thank you for that. Now, we have been discussing a lot of different things here, and the main thing that I have been focusing on is the trap of emotions. I would like to know if this trap is foisted upon us from external sources?

**A:** The formula is "foisted."

**Q:** (L) What is the formula?

**A:** Set pattern, like a maze.

**Q:** (L) Okay. And what is the most effective way to get out of this maze of emotional control?

**A:** Calculate.

**Q:** (L) Is there anything that can be done when one is in process of extricating oneself from an emotional trap to cut off or ease the pain of it? It quite literally hurts.

**A:** No need to ease.

**Q:** (L) Well, once you have done it and gone through it, or, more particularly, once you see that it is a trap, it doesn't hurt anymore - or lessens. Another thing is that we all have been affected by being sucked into emotional traps, seemingly since birth. Is this common for all people?

**A:** All? No, most, yes.

**Q:** (L) Would it be a fair statement to say that people who have potential to do very positive things in terms of clearing away and understanding the reality in which we exist, might be primary targets for this emotional turmoil?

**A:** Yes.

**Q:** (L) Can you tell us what might be the characteristics of a person who is not caught in the emotional trap?

**A:** Embracing? No. Uniting? Yes.

**Q:** (L) Ah! So, you are saying that people who can clear the emotional traps can unite in a higher emotional sense?

**A:** Emotions are chemicals only.

**Q:** (L) So, if emotions are chemical only, is it true that when one is in physical proximity to certain people, that perhaps their frequency vibrations cause these chemicals to be stimulated or generated within us?

**A:** Okay.

**Q:** (L) And, that it takes great force of will and mental power to counteract this physical action?

**A:** No, just practice.

**Q:** (L) Okay, once you have done it a few times in small ways, you can build up to big ones?

**A:** Not quite correct concept.

**Q:** (L) I was reading this piece sent to us on the internet where this Cosmic Awareness source talks about people who deliberately have [incarnated] because, since the good guys really can't interfere from the outside, because it would violate free will, that many of them incarnate and thereby partake of the physical experience, and then wake up and are able to do the things that are needed on the planet. The object being to try to make sure that they will awaken to their purpose, and that emotions and emotional traps are used repeatedly and continuously to try to prevent them from awakening. What I am getting at is: what are the things that we can do to awaken? You have told us many times that we need to awaken. Obviously we are not fully awakened. We are aware of that. Is there some other thing we can do?

**A:** Let it happen naturally. If you are on a path, do you seek to jump up into the air and fly to the end of the path? If you did, you would regret missing the "rest of the path."

**Q:** (L) A lot of very strange things have been happening... Sandra and her heart attack, [my daughter] and her [broken] ankle, the terrible sicknesses I have had in the past months, [my other daughter] talking about the things that have happened in her experiences... it seems like, to me, that the situation in terms of attack is really heating up. Can you comment on this?

**A:** No.

**Q:** (L) Well, thanks a lot! Can we ask questions about it?

**A:** Yes.

**Q:** (L) Well, my eye infections, the ear problems, the loss of my voice for so long... were these part of the attack process?

**A:** Yes.

**Q:** (L) My mother also fell down and has a black eye. I am trying to find the portal? What is the portal through which all this attack is coming?

**A:** Discover.

**Q:** (L) Did we already discover it in part, i.e. SV and her mother and that situation?

**A:** No.

**Q:** (L) Are you saying that SV is not a portal?

**A:** People are not portals!!! They are only victims of the things that come through the portals. Otherwise, many could describe you as a “portal.”

**Q:** (L) Well, I never said that I wasn't. Speaking of that...

**A:** When you concentrate on the people as portals, you falsely direct negative energy upon the soul units themselves. Rather like treating acne with the therapy to be found in a shotgun!

**Q:** (L) What is the appropriate response when you are in a situation and you know that the person is being victimized, yes, by the forces coming through the portal, but their victimization is causing you a great deal of problems? What is the appropriate response here?

**A:** How do you view those afflicted with disease? Do you throw rocks at them?!?

**Q:** (L) Well, no, you don't throw rocks at them...

**A:** What do you do, then?

**Q:** (L) Well, a person with a disease: you send or take them to a doctor or suggest that they go to a doctor.

**A:** For what purpose?

**Q:** (L) To discover the diagnosis of the disease, to obtain medicine, to either relieve the symptoms or cure the disease.

**A:** Bingo!

**Q:** (L) We are talking about people who won't even admit they have a disease! How do you tell someone to go to a doctor when they don't think they are sick? Most people do NOT believe that they are subject to control or manipulation from other densities! You have told a number of people that they were going to be subjected to attack and manipulation and they have blithely said 'Oh, there is nothing in our lives that would permit that...'

**A:** Denial is not incurable until you give up. Patience combined with kind invitations to participate in the learning process eventually allows the victim to awaken, thus to be open to cure. This helps you to build the "army" you seek. Isolation cures nothing. Thereby stifling progress, as any and all will ultimately be seen as "portals." Rather like "spinning one's wheels," yes??

**Q:** (L) So, in other words, you are saying I should remain married to my husband, I should have SV and other disruptive and destructive people over here constantly to 'participate' in the learning process?

**A:** The point is not to rigidly adhere to specific lifestyles, nor maintain exact patterning of behavior, merely to not close doors completely and permanently.

**Q:** (L) Okay, if a person were, say, a robot person, when a person becomes a robot person, what happens to the soul of the robot person?

**A:** Same process.

**Q:** (L) As what?

**A:** Death.

**Q:** (L) So, a person can die and leave their body, their body can be taken over and reanimated and controlled to function and do a lot of things for a long time. Meanwhile, the original soul has completely departed to 5th density ready to recycle?

**A:** Yes, but body is replaced, not reanimated.

**Q:** (L) Is this what happened to [my ex] when he had that surgery back in 1981?

**A:** We caution that, even though you have met 7 “robots,” in your entire lifetime, not to “see” them under every bush or around every corner. You have met so many people in your life. We gave you one, and only one!!

**Q:** (L) What was the source of the dream where this was stated to me quite clearly?

**A:** Dreams are the best forum for disinformation that exists.

**Q:** (L) Okay. I can see that. But, at the same time they are also one of the best ways to get information from the subconscious and the higher conscious, is this not true?

**A:** We have mentioned dualities a lot!!

**Q:** (L) Skipping the disinformation part, and just getting to the analysis part, the story of Bluebeard... I am still of the opinion,

robot person or not, I am doing the right thing. Is it possible that, even in this situation, that I am caught up in an emotional trap?

**A:** Sure. This learning thing is anything but easy!

**Q:** (L) Yes, that's all fine and dandy, but we are talking about breaking up my whole life here...

**A:** Maybe, maybe not.

**Q:** (L) What good is channeling if it does not help you to make decisions once in a while. Once in a while, I say. Not all the time. Or to help clarify things! To put additional light on it instead of muddying the water!

**A:** We are not "muddying" the water," only you can do that!

**Q:** (L) Well, enough of that...

**A:** No, not enough of that. And a much needed pointer for you: answers to questions of global or universal significance provide for a greater personal learning than direct personal inquiries. If you disagree, check transcripts and especially un-transcribed sessions for validation! You will see, my dear!!

**Q:** (L) Well, that is why I said that was enough of that because I don't want to talk about my personal stuff anymore. I did think that the thing about the robot people was pretty significant, but obviously it is not that significant or important. There's two million of them on the planet, and I have been told that I have encountered seven. I did think that this was a pretty high ratio of robot people for one person to encounter...

**A:** Yes, but your life path has been unusual. And you have met 4588 people personally!

**Q:** (L) How many people has Frank met?

**A:** 2754.

**Q:** (L) How many were robots?

**A:** 3.

**Q:** (L) How many has Pat met?

**A:** 3856.

**Q:** (L) How many robots?

**A:** 1.

**Q:** (L) So, why seven for me - yeah, we know the path is unusual...

**A:** Yes.

**Q:** (L) Can you tell me in what sense it is unusual?

**A:** Can't you?

**Q:** (L) Well, I thought I would trick you into telling me...

**A:** No tricks, we only treat.

**Q:** (L) Oh, okay... (P) Will they tell us who are the robots we have met? (L) Probably not...

**A:** Susan S\_\_\_.

**Q:** (L) That was the one they named before... no cigar.

**A:** What better disguise? A nudist!

**Q:** (L) That was funny! I tell you, the Emperor has no clothes! (P) Won't you tell me who it is that I have met?

**A:** Nope.

**Q:** (L) I am so tired now that I cannot formulate a legitimate, reasonable, intelligent or coherent question of global or universal significance; we will say goodnight.

**A:** Good Night.

END OF SESSION

## 4.17 May 4, 1996

Frank, Tom H, Tom K, Laura

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Lorra.

**Q:** (L) And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) One of the things we talked about the last time Tom was here was about the underground bases and military interference in civilian affairs and civilian interface with military affairs. What further can you tell us about this?

**A:** Ask specific questions, please.

**Q:** (L) One of the questions we were dealing with was the use of warfare to create situations in which bodies could be taken...

**A:** Warfare has many “uses.”

**Q:** (L) Could you list for us some of the most common uses of warfare?

**A:** Generation of environment to facilitate inconspicuous replacement of gene pool. Factors in paradigm shift through stimulation of conception activity, replacement of key personnel according to frequency vibration pre-readings...

**Q:** (TH) Who or what in the gene pool is being replaced? (TK) Whoever they want replaced. (L) Well, you know how it is in the movies... everybody is indiscriminately making love before they go into battle... (F) Yes... they said ‘factors in paradigm shift through stimulation of conception activity...’ (L) ‘Replacement of key personnel according to frequency vibration pre-readings...’ Okay: do you mean to say that war...

**A:** Creates “environment” for unnoticed genetic modifications because of greatly heightened exchange of both physical and ethereal factors.

**Q:** (L) What do you mean by “replacement of key personnel?” Key personnel according to whose definition?

**A:** 4th density STS.

**Q:** (L) Are these key personnel human?

**A:** Yes.

**Q:** (L) When you say replacement, do you mean something as simple as someone dying, such as a head of state, and being replaced by another person who comes to power? That would be the simplest scenario that would fit this explanation.

**A:** Your scenario is not simple.

**Q:** (L) I mean simple in terms of the machinations...

**A:** Both.

**Q:** (L) Would it also be that key personnel could also be replaced as in duplication?

**A:** Yes. And removing to secret activity realm. Enough wars have taken place to effectively create entire new “underground race” of humans, both from direct capture followed by “reeducation,” and spawning activity using these persons and others.

**Q:** (L) What do you mean by spawning activity?

**A:** Those captured have reproduced offspring, these never having seen your world.

**Q:** (L) Are you saying... (TK) They have given birth and these children have never seen our world... (L) How can an entire race of people, or groups of people, live under the surface of this planet, without the whole 6 billion of the rest of us on top, or at least a large number, realizing that there is anything going on? This is so wild an idea...

**A:** No. How much space exists underground, as opposed to that on the surface?

**Q:** (L) A lot, I suppose. You aren't saying that the earth is hollow, are you?

**A:** No, not exactly.

**Q:** (L) Well, how deep is the deepest of these underground cities?

**A:** 3,108 miles.

**Q:** (L) That's pretty deep! But wouldn't it be too hot at that depth?

**A:** No. Temperature averages 68 degrees F.

**Q:** (TK) That's pretty comfortable! (L) How do they have light?

**A:** Magnetic resonance.

**Q:** (L) Well, aren't they subject to being crushed by earthquakes?

**A:** No, earthquakes are not felt deep underground!!

**Q:** (L) Does any of this underground civilization activity have any relation to this massive underground base the Russians are building?

**A:** No.

**Q:** (TK) Is any of this under the ocean?

**A:** Yes.

**Q:** (TK) Well, we'll never explore all of what is under the ocean. (L) It just staggers the mind to think about it. What do they want these people for?

**A:** To replace you.

**Q:** (TK) And why? Because they can control them better. Right?

**A:** Completely.

**Q:** (L) Do these people being bred and raised in these underground cities have souls?

**A:** Yes, most.

**Q:** (TK) Are they just like us only raised differently?

**A:** More complicated than that.

**Q:** (L) How long have they been doing this?

**A:** 14,000 years, approximately.

**Q:** (L) If they have been doing it that long, obviously the ones they have taken at the beginning have croaked and are of no use to replace anybody on the earth unless they have been replacing people from time to time for various reasons...

**A:** No, their technology makes yours look like Neanderthal by comparison! Hibernation tubes... One heartbeat per hour, for example.

**Q:** (TH) That means that for every year we live, they would live 4200 years... (L) Does any of this have anything to do with that crazy pit at Oak Island?

**A:** In an offhand way.

**Q:** (L) How do we fit into all of this? (TK) We don't!

**A:** You have been the "preparation committee."

**Q:** (L) What have we been doing? Is it part of the plan for us to destroy the planet, destroy the ozone layer, pollute the seas and so forth to make it more habitable for them?

**A:** Those things are inconsequential and easily repaired.

**Q:** (TK) With their technology, they can fix all of that. (L) This is really horrible, you know! To think of all this... (TK) Apparently, from what I am understanding, they can't just come in and wipe us out and replace us, because the 'rules' won't allow it.

**A:** Yet the natural cycles within the framework of the natural order of things will allow all these things to fall into place.

**Q:** (L) Is there some law within the realm of these beings, sort of like the law of gravity, that prevents them from just coming in and taking over?

**A:** No.

**Q:** (TK) I don't think it is like the law of gravity...

**A:** What "law" is there that inhibits you from manipulating 2nd density beings at will?!?

**Q:** (L) Well, I don't go out and deliberately hurt or manipulate anything or anybody. (TK) Of course, in our handling of these 'critters,' we are conserving them in some ways so that we will have an ongoing food supply... I think there are rules to the game. It's like a chess game. They can't just come in and change things, it has to progress in some way. But, there are loopholes and they can sneak in and manipulate and get away with some things... (TH) Then, there aren't rules - there are just guidelines.

**A:** Two important points there: 1) When we said “you,” we meant 3rd density collectively. 2) You missed our statement about the natural cycle and order of things almost completely. We suggest you reread and ponder.. Also, what if your race is manipulated to destroy yourselves, or, just hang around until the next natural cataclysm?

**Q:** (TK) Well, it seems like there is another side that is trying to prevent them from gaining control.

(L) Well, from what I understand, the only thing the good guys are able to do is, because of free will, they have to wait to be asked for help, and the only they thing they can really do is give information.

(F) Well, this is valuable if used by the right people at the right time.

(TK) You have to come up with the right questions, too. You have to have enough information to be able to come up with the right questions. I am sure the information is there. You have one group with all these people underground and they want to take over the planet. This group likes being 4th density - they don't want to advance. They want to block advancement. Then, you have the group that want to advance, they want the natural order to proceed. This negative group wants to stay there and keep everyone they can there.

(L) And because they deplete themselves and diminish in numbers, they keep having to supply their needs and existence.

(TK) If, by some odd chance, the earth is the only place where people come to advance, then sooner or later it is going to stop, if these other guys take over, then it will just stop... implode.

(TH) I know! The earth is a 4th density theme park!

(L) We already thought of that... we all have an 'E' ticket ride!

(TK) Obviously we have the information, but we haven't really dug deep enough; we don't know the questions that we need to ask. Is this true?

A: No.

Q: (TK) Is what I was saying close to the truth?

A: Yes. Total truth is elusive.

Q: (TK) So, what I said was the gist of what is going on here. So, we have to figure out what we are supposed to do so that the earth can be maintained...

A: You will do what you will do.

Q: (TK) This is true.

A: Do you, in general, control 2nd density beings on earth?

Q: (L) Yes.

A: So, what is "fair" about that?

Q: (L) Nothing.

A: Okay, so what is the difference?!?!???

Q: (TK) So, basically, we control 2nd density, and 4th density controls us. There are the good guys and bad guys. (L) And we will do what we will do. Either we choose to align ourselves with the good guys, or with the bad guys.

A: It's up to you.

Q: (TK) However, if too many people align themselves with the bad guys, then the balance tips in their favor, and there is no more advancement, so there has to be education so that people will know...

**A:** Tom, you are close, but you are missing the point.

**Q:** (L) What is the point?

**A:** The point is, there “has to be” nothing. You will do what you will do. You choose. We have told you this repeatedly, but you still suffer from self-centered perspective.

**Q:** (TK) Everybody is worried about themselves. They all want to be saved and not worry about others.

**A:** More to the point, everybody in an STS realm views themselves as somehow “special, chosen, or protected.” This is simply not so!!

**Q:** (TK) What is going to happen, is going to happen. The people...

**A:** The body does not matter. It is the soul that either progresses or digresses, just ask Sandra!

**Q:** (L) Did Sandra progress or digress?

**A:** Open.

**Q:** (L) So, in other words, we could just sit around and live our lives and have a good time and not worry about a damn thing. Is that the point?

**A:** No.

**Q:** (L) It's our choices?

**A:** Yes.

**Q:** (TK) The point is it's going to happen...

**A:** But, nobody is there to intervene on your behalf as many would like to believe.

**Q:** (L) So, we are here on this planet, and we will either make it or we won't, just like Dorothy and Toto in Oz, based on our own

ability to figure it out, to overcome the odds, the witch, monkeys and soldiers... (TK) Maybe what they are trying to do is give people the information, or make the information available so that people can make the choice, do they want to stay...

**A:** We are not “trying” to do anything. We are here to answer questions if asked. We cannot interfere.

**Q:** (TK) Yes, the non-interference idea is pretty clear and understandable. So, they cannot interfere...

**A:** And, even when we answer, you may not believe, it is up to you!

**Q:** (L) So, we are really on our own!

**A:** You always have been, and so have we, and all others, too!!

**Q:** (TK) I guess then, it is a matter of asking the right questions so that you will know what course of action to take. I mean, do you want to advance? Do you want to go to 4th density? Or do you want to go higher? Or do you want to stay here? How can you make an informed choice if you don't know the true conditions and what your options are?

(L) Is it that the religions that have been generated and foisted on the human race, have been designed to give people a feeling of complacency or faith in something outside themselves, and that this prevents them from seeking knowledge, opening their eyes, facing the facts of their existence, and therefore keeps them in bondage?

**A:** Its just obstacles, as always. You employ those too, for your 2nd density friends!!

**Q:** (TK) What state of mind do you have to have to want to advance?

(F) Well, you know you are on the path when you can see that the words don't match the facts of life. Think of all the people you have met with whom you may have had a philosophical conversation. How many will say: Oh, all I need is the Bible. That's all I pay any attention to.

(TK) I don't have many philosophical conversations with people because I rarely agree with anything that is said.

(F) Well, you must have decided on this because you tried it and found it didn't work.

(TK) I have a real problem... yes, the Bible has been around for a long time, and religion has been around for a long time... but I have a real problem believing something that is so obviously produced by humans with agendas of their own!

(F) But most people that you tell that to will say: Oh, no! People didn't write the Bible, God did! Or, they could be a complete atheist and believe only in the religion of science.

(TK) I believe that a person is supposed to live by rules and treat people with respect and honor life... and some of the ideas of religion are good... but they just go over the edge.

(F) That is how they suck people in. Mix lies with the truth.

(L) Yes, a lie sandwiched between two truths makes it easier to swallow.

(F) Yes, if it was ALL false, the vast majority of people would have figured it out immediately. Or, very quickly.

(TK) The vast majority don't care. They just want to be led like sheep. They don't want any responsibility.

(F) And what happens to the vast majority of cattle? They munch away in their pasture until time to get in the truck to go to the

butcher.

(TK) Well, after all my years in the military, I have gotten to the point that I just don't trust anybody with authority.

(F) And, if you talk to the religious types, they will say: "Oh, I don't have any answers... I just follow the Bible".

(L) Not only do they not have any answers, they don't have any questions, either. And, I think that is the clue: the people who are still asking questions after wading through all the religions and mystical mumbo-jumbo. The ones who think they have found the ultimate answer are - well - lunch!

(TK) The whole purpose of life, it seems to me, is to obtain knowledge and advance. You are stuck on this level until you figure it out. But what are you supposed to figure out?

(L) I think that the knowing is the doing.

(TH) "Ye shall know the truth and the truth shall set you free." It's in the Bible!!!

(L) Is the knowing the key?

A: Yes.

Q: (L) I think that knowing changes your frequency. Is that true?

A: Yes.

Q: (L) The acknowledging and the seeing?

A: Yes.

Q: (L) What did they tell us once... it's not where you are, but who you are and what you see that counts. (TK) So, we aren't gonna change what happens. There is no way we can have any appreciable effect on the underground armies... it is just a matter of changing ourselves and whoever else we can share with.

**A:** Correct, the cow has no effect on the health of the livestock industry...

**Q:** (TK) The cow has no effect on the herd. One cow doesn't... or even a lot of cows.

(F) But there might be one or two cows that follow one that breaks out of the herd.

(TK) Yes, you might be able to affect somebody else's life, but not the whole group. So, worrying about the underground stuff, is immaterial.

(L) But, knowing about it is.

(TK) All that survivalists, the militias and so forth. It is a complete waste of time.

(F) It is good to know what is going on.

(TK) But, could you know if you had an implant? (L) Yes... (TK) How, by asking?

(L) Well, that and examining your life and comparing with others. When you read the material, you find a lot of clues. It really opens your eyes.

(TK) Isn't the implant and the brainwashing a little bit past the interference that the 4th density STS should be allowed?

(L) We have learned that knowing you have an implant and what it can do, you then can cancel it out by choices. Those who believe that their implant is for their own good, are, of course, completely subject to them.

(TK) Have I ever been abducted?

**A:** Ask Tom about your kidnapping... Tom must learn.

**Q:** (L) What could be done...

**A:** Why do you suppose Tom “chose” to enter the Navy?

**Q:** (L) Because he was manipulated to do so?

**A:** Was led.

**Q:** (L) What things happened in the Navy?

**A:** Ask Tom.

**Q:** (L) It seems that he has been living rather on the surface... have you just gone along from day to day without thinking too much about it? (TK) Ummhmm.

**A:** No. That is what your “memory” tells you.

**Q:** (TK) I am getting a headache. (L) That’s interesting. Why does he get the headaches?

**A:** Research the problem in order to learn. If we told you the answers to all these things, at this point, you would just shrug your shoulders and forget about it.

**Q:** (L) Is the shrugging of the shoulders a programmed response in him?

**A:** To an extent.

**Q:** (L) Okay, he mentioned the headaches beginning when he went on a particular camping trip. And, he is now trying to remember it, and it is causing him pain.

**A:** Hypnosis.

**Q:** (TK) The worst headache I ever had was when we were on our way to Japan and stopped in Hawaii. I went over to another ship to get some hydraulic fluid... on the way back, as I was coming back on the ship, I had a headache that was so bad I couldn’t even tolerate light or sound. (L) You mean the kind where it hurts even to breathe? (TK) Ummhmm. (L) Well, I started having those after

I woke up one night reversed in my bed with the bottom half of my nightgown wet. I know what they are like. Unbelievable pain.

**A:** Yes.

**Q:** (TK) Yes, nothing helps. (L) Can you give Tom a little help here?

**A:** Sorry. Tom is at the point where it will not help him for us to “give him a little bit.”

**Q:** (F) Well, they never gave us point blank answers either. (L) Well, of all the people who have come to the sessions, he is the first who has immediately understood what is going on and what it means. (F) Most everyone else thinks they already know the answers... (L) Getting back to the underground bases, is the HAARP project connected to these underground bases.

**A:** Not directly.

**Q:** (L) You once said that HAARP was something that was to be used to “transfer perimeters.” I am assuming that this means to manipulate space, time and density.

**A:** Yes.

**Q:** (L) Is it possible that they are planning to use this to bring up the Atlantean crystals to utilize?

**A:** Not so much to “bring up,” as to utilize.

**Q:** (L) Is there anything to BRH’s idea about the “harmonics,” that it must be ready to function on a certain day and time?

**A:** No.

**Q:** (L) In terms of what we understand - I know you aren’t gonna answer it that way - if Tom tries to bring up the memories and

understand, the headaches ought to go away... (TK) I haven't had any since I have been out of the Navy.

A: O'Brien is "lyin'"

Q: (L) What is is about O'Brien?

A: Discover. Why is Tom there, of all places?!?

Q: (L) Is there something in that area, some frequency from the earth, some electromagnetics or something, that can tend to...

A: Maybe, maybe, maybe, maybe....

Q: (L) It keeps a person quiescent and in the dark?

A: Stalling frequency... And by the way, can anyone come up with a purpose for the existence of Camp Blanding? Well??...

Q: (TK) Ask about Dave Wh\_\_\_... he lives nearby...

A: First, some blockbuster stuff for the Knighted ones... Look upon a detailed map, and reflect, remember lonely journeys from long ago, and begin to unlock shattering mysteries which will lead to revelations opening the door to the greatest learning burst yet!!

Q: (F) Oh, my. A LOT of questions... (L) Was there more than one journey to Camp Blanding?

A: No.

Q: (L) Only one?

A: For you.

Q: (L) More than one for Tom?

A: ?

**Q:** (L) You said “knighted ones,” as though there were some significance to the name...

**A:** Discover...

**Q:** (L) Is there some genetic engineering here?

**A:** No, not in the sense you are thinking. But, all are in some sense.

**Q:** (L) Why did my mother marry men who kept affecting our lives in such terrible ways?

**A:** Ask her.

**Q:** (L) She has no answer. She is baffled herself.

**A:** So, get her to discover. That is where the clues lie.

**Q:** (L) So, the clues lie with some of these people... We remember the trip with one of them - to North Carolina - when we were taken to school...

**A:** Why did he insist you go to boarding school? And why did your mother acquiesce?

**Q:** (L) All this comes back to the original question, why Tom is in O'Brien, near Camp Blanding...

**A:** EM waves curdle the mind producing complacency in the face of contrived misery. Numbs the mind through isolationist influences. Why are you there, Tom? Who begged you to stay there? EM waves emanate from?? Suggest you, Laura, go to library and research Camp Blanding. You may find a “black hole,” so to speak!!

**Q:** (L) A black hole. Okay. Well, there is sure a lot of stuff that has gone on in our lives for which there is simply no rational

explanation. (TK) They sure have been giving a lot of stuff tonight without a lot of questions...

**A:** Visits through trees, forests, leading to a perfectly square clearing...

**Q:** (L) Hmmmm. Is Aunt H one of the generators of EM frequencies?

**A:** No, she is merely an unwitting agent.

**Q:** (L) Well, L is very isolationist in her tendencies. Is that a result of being in that area?

**A:** Same.

**Q:** (L) Well, what I REALLY want to know is WHY have we had all of these CRAZY things happen in our lives, and all of these people ranged all around us seemingly placed there, or manipulated deliberately to affect us negatively. I mean, am I wrong, or is this not a VERY unusual and crazy situation?

**A:** Why do you think?

**Q:** (L) Well, I have no idea!

**A:** Because you are of the extremely rare and few who have the abilities to put the puzzle together.

**Q:** (L) So, what are we supposed to do? (TK) Discover.

**A:** Yes. And, for tonight, good night.

END OF SESSION

## **4.18 May 25, 1996**

Frank, Laura, SV

**Q:** (L) Hello. [And the exact instant the planchette began to move, the outflow hose from the pool pump burst and began to shoot water straight into the air making the sound of a downpour on the roof of the house. We all rushed out to see, a temporary repair was made, and we came back in and settled to begin again.

**Q:** (L) Hello.

**A:** Hello and hello.

**Q:** (L) Who do we have with us this evening?

**A:** Yxorra.

**Q:** (L) And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) That was strange. Can you tell me what was the meaning of the bursting of the pool hose as we began a few minutes ago?

**A:** Weakened plastic fibers.

**Q:** (L) I expect so. But it was so synchronous that it happened at that precise instant!

**A:** Coincidence.

**Q:** (L) Well, I don't think there are coincidences. Who are you kidding?

**A:** We are not kidding.

**Q:** (L) Well, okay. We have several issues just now...

**A:** Flute.

**Q:** (L) What does that mean?

**A:** You have one.

**Q:** (L) I don't have a flute. Tell me about the flute.

A: Ponder.

Q: (L) Flute as in playing a tune? Another clue?

A: No.

Q: (L) And you want me to stop and ponder this right now? Well, you play music on a flute. Usually you play happy music on a flute.

A: Not point. On or not.

Q: (L) You guys are being really obscure tonight. Is flute significant in some way?

A: Maybe.

Q: (L) Is there another word or two you can give me for a clue?

A: D.

Q: (L) Fluted?

A: Yes.

Q: (L) Does 'fluted' have anything to do with 'grooving'?

A: Columns.

Q: (L) What columns are we talking about?

A: Ionic.

Q: (L) Why are we talking about Ionic fluted columns?

A: Because they are a link to previous direct contact between humans and density 4 STO!

Q: (L) Okay, Ionic columns fluted and grooved...

A: Plastic hoses, fluted and grooved.

**Q:** (L) Well, you are getting more and more obscure. How do we establish this direct link between us and 4th density STO through the concept of fluting, and grooving, and columns?

**A:** Magnetic telemetry profile.

[Telemetry is the automated communications process by which measurements are made and other data collected at remote or inaccessible points and transmitted to receiving equipment for monitoring and analysis. The word is derived from Greek roots: tele = remote, and metron = measure.]

**Q:** (L) Are you suggesting that the hose with the water rushing through it can transmit something from 4th density STO to us?

**A:** Transceive.

**Q:** (L) The original Ionic column structure was a hollow tube?

**A:** Not the point.

**Q:** (L) It is the fluting, grooving and spiralling that are important?

**A:** Yes.

**Q:** (L) Okay, once you mentioned that I ought to move the pool and install a maze, or spiral. Well, I am hoping to get some money from the insurance company soon, and I was thinking about putting in an in-ground pool as part of my improvements. Couldn't I have the spiral inlaid in the bottom of the pool in tile.

**A:** Good. Suggest that you install a triple Ionic column with top beam and base, as the Romans and Greeks did, near the deep end. Two sided triangle when seen from above, flat top of beam, no gables. 1.3 meters between bases of the three columns. Columns 1.6 meters tall. Base set at 30 degree angle. Center column placed to the East of the pool. Use pure spiral, counterclockwise, corresponding to Northern hemisphere of the planet.

**Q:** (L) Okay, once we have set this up, what is it going to do for us?

**A:** Empower 4th through 6th density STO channel transceiver.

**Q:** (L) Well, I guess I need to make some really big bucks to do this!

**A:** Yes.

**Q:** (L) Well, will I be able to do this soon?

**A:** That is up to you. If you follow guidance, yes.

**Q:** (L) Okay, BRH AKA D4 wanted me to ask a question for him. He has recently been in touch with a guy who claims to be a magician after the ilk of Aliester Crowley...

**A:** D4 has not followed our guidance. If D4 seeks answers, it is not wise for him to ignore “leads,” and seek inappropriate pathways instead!

**Q:** (L) Well... there is nothing I can do. He keeps sending me stuff from “Cosmic Awareness” and says “Gee, I wish the C’s could churn out stuff like this...” And yet, this Cosmic Awareness talked a lot about 1996 being the year when there was going to be a mass landing and a bunch of other stuff that obviously did NOT happen... so, what do you want here? Verbose and fancy, or clues that must be worked out? It is incredibly frustrating! Why would we want to churn out crap like that?

**A:** Push the man’s buttons.

**Q:** (L) Well, what do you mean?

**A:** Mount Palomar.

**Q:** (L) Oh, you really want him to go out to Mount Palomar?

**A:** And no, his contact is not a magician... Lay off the mind altering substances, D4, or else you will lose it!!!

**Q:** (L) But, D4 says that he no longer uses drugs, so what do you mean?

**A:** Ask D4. When you say “drugs are bad,” do you expect those who want you to like them to admit to partaking?

**Q:** (L) Of course not. I guess I am too hard on that subject. Now, as you know, [my ex] was here earlier and we had a discussion. I would like to know if there is any chance that he will be able to open his mind and get help.

**A:** Open.

**Q:** (L) He really needs help. Is there anything that you can tell me that will ease my mind?

**A:** Worry not.

**Q:** (L) I know you say that, but sometimes it is really HARD! Okay, once we build our little columns and pool and other toys, what then ought we to do once we are in this pool?

**A:** Up to you.

**Q:** (L) Any particular exercises?

**A:** No.

**Q:** (L) Just BE in the pool?

**A:** Yes.

**Q:** (L) And then what?

**A:** Wait and see!

**Q:** (L) You are just making my night! (S) I don't want to sound paranoid, but all the reports about mind programming... is it as

widespread as we have been lead to believe? That it could be the guy next door, and a certain color, or word or sound could set them off?

**A:** Vague.

**Q:** (L) That's not exactly vague. What is the percentage of programmed people?

**A:** 2 out of every 100.

**Q:** (L) How many are programmed by human means?

**A:** 12 per cent of the .02 per cent.

**Q:** (L) So, out of every 1,000 people, there are 20 that are programmed, and 18 of these are programmed by aliens, as in 4th density STS?

**A:** Understand that 4th density is physical, indeed. You are drifting further and further toward an ethereal only perception/theoretical position.

**Q:** (L) You are saying that the humans working on these kinds of things... and...

**A:** No, Laura, we are saying that there is really a very strong “nuts and bolts” reality to this phenomenon, and don't ignore it!

[What was missing from our understanding was the broad, overall, influence of society and culture as programming agents. Such systems can be created and maintained by a small elite, operate totally naturally within the world system, and only limited, direct hyperdimensional influence is even required.]

**Q:** (L) Gotcha! We were watching television, and they showed a video of a man and his daughter who videotaped a very large object in the sky, and it was there for a long time, and I also understand that someone else taped it from another location. It

was a long, white, tubular object. It was estimated to be about a mile long, because they figured this out by the perspectives from the two tapes, sort of by parallax, and it had moving lights on it, and it just hovered, or sat there for a very long time. What in the world was this thing?

**A:** A “mother” ship of Orion STS scanning vectors of the reality continuum fabric.

**Q:** (L) Well, they talked about a report of a similar happening at this very same spot, only it was 78 years previous to this. Was there a connection?

**A:** Yes. Space/time coordinates linkage.

**Q:** (L) Was this ship doing anything other than what you have said?

**A:** No.

**Q:** (L) Does a mother ship carry a lot of small ships?

**A:** Yes.

**Q:** (L) How many can be carried in one mother ship?

**A:** 150,000

**Q:** (L) Holy Shi'ite Moslems! What size are they? And, we have to remember that these ships are bigger inside, as a rule, because of some sort of strange principal at that level.

**A:** Exactly, remember, there is variability of physicality on 4th density, but not lack of physicality.

**Q:** (L) There was apparently a sighting in Gulf Breeze either last night or the night before. The triangular ships with the orange lights. Were they human or alien?

**A:** Alien.

**Q:** (L) Who did they belong to?

**A:** Same.

**Q:** (L) Why are there so many kinds of alien ships?

**A:** See previous statements. VOP.

**Q:** (L) Variability of physicality. Okay, I have also been reading about cattle mutilations, that specific parts of the body are taken...

**A:** Rumen.

**Q:** (L) What is that?

**A:** Cattle part.

[The rumen, also known as a paunch, forms the larger part of the reticulorumen, which is the first chamber in the alimentary canal of ruminant animals.]

**Q:** (L) Why do they take an eyeball? What do they want only one eyeball?

**A:** Study soul pattern.

**Q:** (L) Can you study a soul pattern through an eyeball?

**A:** Like a tape recorder.

**Q:** (L) Why do they take part of a lip?

**A:** DNA library.

**Q:** (L) Well, how many eyes and DNA libraries do they need. This is happening a lot.

**A:** Some is copy cat by “secret government.”

**Q:** (L) I have heard a recent rumor that the Chupacabras makes three puncture marks, and that one of them extends all the way

up into the brain. Is this true?

**A:** No.

**Q:** (L) Are the stories being heard from the SW and Mexico, and even from South Florida, are they all the Chupacabras?

**A:** Some.

**Q:** (L) How many people in the United States have implants?

**A:** 2 per cent.

**Q:** (L) Why did I lose my voice recently?

**A:** Inflamed vocal cords. Suggest you go buy, then read, Oeschler book for enhanced learning. Okay for now, Good Night.

END OF SESSION

## 4.19 May 27, 1996

Frank, Laura, SV

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us tonight.

**A:** Soroca.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) We would like to ask some more questions about the architectural project mentioned the other night. [^Swimming pool, session 25 May 1996] We were given the height and distance

apart of the three column structure, would it be okay to build this on the perimeter of the existing pool?

**A:** No. You must wait until you have the financial resources to construct an inground pool. The spiral must be below ground level by at least 1 meter, must be constructed of blue, gold ceramic tile perfectly cut and even. Columns cannot be purchased as prefabricated. Must be constructed onsite. Cap should be 18 centimeters in height, 2 meters in length, same dimensions for cap and base.

**Q:** (L) Can or should we do this with our own hands?

**A:** Hire a contractor... you are not adequately skilled.

**Q:** (L) How many grooves in each column?

**A:** Diameter of columns should be 10 to 14 centimeters, width of fluting should be 2 centimeters. Use illustrations of authentic ionic columns as a guide.

**Q:** (L) The counter-clockwise spiral of tile, how many turns?

**A:** Turns not important. Width should be 1.6 meters.

**Q:** (L) Blue tile with gold border?

**A:** Mixed blue and gold.

**Q:** (L) Blue with specks of gold?

**A:** Close. Translucent.

**Q:** (L) Is azure an appropriate blue?

**A:** Close.

**Q:** (L) Should anything be incorporated into the cement mix to pour the columns?

**A:** No.

**Q:** (L) Should the columns be hollow and used for flowing water?

**A:** No. Place fountain or hydrable pond in front of columns.

**Q:** (L) Pool shape: square on one end then rounded at one end. Rectangular with a curved end. [planchette is drawing shape of pool] (Curved end to follow guide of columns at end).

**A:** The fountain should be in between and the spiral in the middle of the pool.

**Q:** (L) Are you having fun designing a 3rd density pool?

**A:** 6th density is always “fun!”

**Q:** (L) What about the turns on the spirals at the top of the columns?

**A:** Up to you.

**Q:** (L) Is this pool meant to be built here, on this property?

**A:** Up to you.

**Q:** (L) Well... (S) Had you planned on moving? (L) Well, I hadn't planned on it, but that is a strange answer. I guess I will do whatever presents itself as the right thing to do. (S) Well, you have to get the money first...

**A:** SV, invest now!

**Q:** (S) What should I invest in?

**A:** Market.

**Q:** (S) Penny stocks? Should I sell my gold?

**A:** No.

**Q:** (S) I could get advances on my credit cards... What kinds of stocks?

**A:** All the reference materials you need are at your disposal. Magazines, newsletters, “papers,” etc.

**Q:** (S) I am getting an investment magazine, but I haven’t really been reading it because of everything else...

**A:** Is “everything else” earning you money?

**Q:** (L) Okay guys, you gave advice before that SV did not follow, can you be more specific now that her situation is changed?

**A:** If we did that, she would balk.

**Q:** (S) I would not balk!

**A:** Yes you would!

**Q:** (S) In order to go to Argus tomorrow...

**A:** We did not say to go to Argus tomorrow. “Now” means without unreasonable delay. The reference materials as well as networking will provide you with all the answers you need. [This was delivered VERY fast and strong!] Use your mind to find low priced stocks in the areas of conservation, environmental protection and medical, telecommunication and computer technology... Also, information processing, such as software development, etc...Precious metals and related is a good area too.

**Q:** (S) Well, I was brought up to not borrow money and to keep all the bills paid first... then if there is anything left over...

**A:** SV, for heaven’s sake, why limit yourself? When you exercise your credit lines and use the capital borrowed, as long as you have a steady income, the worst that can happen is you store your money. The best that can happen is that you become wealthy... So, why sell yourself short?!?

**Q:** (L) Are you saying that she should extend her credit, use the borrowed capital to invest, and that she will make money?

**A:** Yes. Now: All three of you are uniquely oriented toward generating unearned income at a meteoric level.

**Q:** (L) Is this something that requires an interaction between the three of us, or is it individual?

**A:** Are three gold bars worth more than one? Laura! Turn over stones, sell apples, do whatever you have to do to get your computer refitted to accommodate the internet, including the online market system, as soon as absolutely possible!!!!!!

**Q:** (L) Well, I am not really in a position to spend that money right now! And what do you mean to ‘turn over stones and sell apples?’

**A:** Figures of speech! Do what you have to do... take care of the mechanics, my Dear, the rest will fall into place...

**Q:** (L) Well, I don’t know how we got off onto this thing about making money... what is all of this making of money supposed to do for us? (S) Build the pool...

**A:** And other...

**Q:** (L) Now, back to some of my other questions: I want to know why Frank used to pound the ground with a stick when he was a child, a habit that caused his parents to think he needed to see a psychiatrist...

**A:** Channel.

**Q:** (L) But it was such an odd way to go about it. What did this particular activity do to create or alter or modify a channel - or... (S) Maybe he was “grooving” himself?

**A:** All of the above... Did you not study hypnotic states?

**Q:** (L) But he described it as such a random rhythm... the changing... the running about to pound the ground here and there...

**A:** It was not random.

**Q:** (L) Was there something on another density that this activity represented?

**A:** No, it just opened the channel.

**Q:** (L) Okay. What is going on with Pat Z... I am just completely baffled by this behavior...

**A:** She thinks you are “out to lunch.”

**Q:** (L) Well... why?

**A:** Her conditioning.

**Q:** (L) Well, she seems to be going down the tubes fast...

**A:** Yes.

**Q:** (L) And there is nothing I can do about it... I feel sorry for her.

**A:** She hoped that you would be a money maker for her, and so, she put up with your “eccentricities...”

**Q:** (L) Well, I sort of figured that out finally.

**A:** Beware! Tom French has a similar thought pattern!

**Q:** (L) I have been thinking that I ought to write to Tom and ask him to just write me OUT of the whole project...

**A:** Suggest you not waste “time” on your suggestion, and make certain it includes all others.

**Q:** (L) What suggestion? Suggest that I not waste time in contacting TF?

**A:** Yes.

**Q:** (L) Then I will just e-mail him...

**A:** And.

**Q:** (L) What do you mean by “include all others?”

**A:** Who else has Tom French met through you?

**Q:** (L) Well.... okay. (F) Why were you thinking about that? (L) Well, I don't know... I went to a psychiatrist recently for stress [following break-up of marriage]... and I am wondering if going again is going to help me deal with all the things going on right now...

**A:** Yes...

**Q:** (L) Okay, SV's sister and niece are coming, and I have the feeling that this is going to be a serious disruption?

**A:** Yes.

**Q:** (S) Is there anything I can do to minimize it?

**A:** Take control, after all, it is your house!

**Q:** (S) I know that...

**A:** But you don't do it!!! Okay, folks, Good Night!

END OF SESSION

## 4.20 June 1, 1996

Frank, Laura, SV

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us this evening?

**A:** Viror.

**Q:** (L) And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) Frank and I would like to have a comment on our dispute.

**A:** Ask.

**Q:** (F) I don't know what to ask. (L) Well, Frank says that violence is NEVER an appropriate response to words no matter how hurtful the words may be.

**A:** Okay.

**Q:** (L) I say that under some circumstances, it may be the only response.

**A:** Why do you say that?

**Q:** (L) Because there do exist situations where words are used repeatedly to harm another. One example is the Nazi propaganda machine. If someone had shot Goebbels, it might have saved a lot of people from dying.

**A:** No.

**Q:** (L) Well, of course. There would have been someone else. Still, the point is, words can be used to destroy, and words of power can be used to kill. Sometimes words can be a lot more hurtful to the soul than physical acts.

**A:** Not directly.

**Q:** (L) Well, directly, or indirectly, it still amounts to the same thing.

**A:** No.

**Q:** (L) Well, I know you are not going to agree with me.

**A:** This is a subject that demands further exploration, in order to bring about a definitive answer.

**Q:** (L) Go ahead. Explain it to me.

**A:** Words only have power if the receiver believes they do.

**Q:** (L) But, in many cases, that belief exists.

**A:** The power to control belief lies exclusively within the receiver.

**Q:** (L) Let me put it this way: Frank often says things that are not precisely soothing to the soul, to say the least. Most often, I ignore them. But, sometimes I am not in an ignoring mood, and my response is no more violent toward him than his toward me. I merely speak metaphorically. When I do, I am only saying "Stop doing that!" in a figurative way. But, he finds this to be as irritating to him as what he says that irritates me...

**A:** And...

**Q:** (L) Well, that is about it. I have lately been verbally attacked by numerous individuals... so I am not in a mood to tolerate much in this line from those around me.

**A:** And if this irritates you, it is because you allow it to.

**Q:** (L) Fine and dandy. And it is true, and I know it. Which is why I am beginning to think that I ought to simply do nothing, because my feelings are too sensitive.

**A:** And do you really believe that that is an unalterable condition?

**Q:** (L) Well, why should I be the one who is obliged to become less sensitive, and other people are not obliged to become more thoughtful about what they say?

**A:** You cannot control others.

**Q:** (L) I don't want to control anyone. I am just saying that the obvious thing is for me to simply withdraw into my own little world of reading and thinking and writing, and if nothing ever comes of any of it, it is utterly immaterial to me.

**A:** That is your choice, but not a wise one!!!

**Q:** (L) Well, you say that, but it is, as several people have pointed out to me, only since we have begun this channeling project that all these dreadful things have happened in my life. My life is a shambles!

**A:** "Dreadful is subjective."

**Q:** (L) I would say that the physical things that have happened to me, the collapse of my marriage, the things that have happened to my children, are pretty damn dreadful, subjectively or otherwise!

**A:** Before these changes began to manifest, you were deeper into the "deadly illusion" than you are now. Emergence is, by its very nature, uncomfortable. But, it has and will, empower you, we promise!!!!!!!!!!

**Q:** (L) It is a very trying time now. I am having a difficult time just coping.

**A:** And there have been others, and will be others, but that does not mean that the rewards will be slight.

**Q:** (L) Well...

**A:** You are on a path of destiny, and there is no turning back now.

**Q:** (S) What happened in specific? (L) Well, I was trying to explain some of the material to several people, and the end result was that they decided that I was possessed and that the C's were evil

because they say that we have to figure things out ourselves in order to graduate to the next level. Including my husband. [In short, I experienced a whole lot of verbal abuse.]

**A:** Why does this bother you? It does not bother us. They can all decide that we are the “Queens of Satan,” if they wish. It is free will.

**Q:** (L) I don’t like the implied hardness... I am not a hard person.

- **A:** It is not hardness. The “feelings” you describe are related to ego, and by relation, pride, two things that were deliberately implanted into the 3rd density human psyche by the 4th density STS 309,000 years ago, as you measure time. Refer to the transcripts with regard to DNA alteration and the occipital ridge. Believe it or not, you, Laura, will be rid of these, eventually. It is not what some individuals respond to you that matters. It is sharing the information that counts. Also, remember, these persons do not perceive your feelings and sensitivities as keenly as you do, nor do you perceive theirs, likewise.

**Q:** (L) There is someone who wants to ask some questions...

**A:** We are not finished with this subject. Also, it is important to note that, in most cases in which you have suffered “attack” from those on the internet, you were not directly conveying the information we have given to you. You were presenting thoughts that you claimed as your own, or knowledge that you have gathered strictly through your own efforts, thus, it was responded to in kind. This you must expect if you are going to plant the bulk of the credit upon yourself, then you open up yourself to direct criticism. This is not wise if you are not prepared for negative reactions. Third density beings will always perceive knowledge that is being given to them before they are ready to receive it as “preaching,” and they resent this because of the very same ego re-

lated issues we discussed earlier. So, suggestion: better to frame knowledge transference with a preamble such as, “this is what was given to me, it is up to you to decide for yourself whether or not you are comfortable with accepting it, or not.”

**Q:** (L) Well, that is NOT true, by ANY stretch of the imagination. I don't want to talk about it anymore with you. You are being completely wrong! Talk about assumptions!

END OF SESSION

Laura's note: I was very angry during this session because it was clear to me that Frank's perceptions and influence dominated. The last answer of the Cs where they said “You were presenting thoughts that you claimed as your own, or knowledge that you have gathered strictly through your own efforts” was absolutely not true. This session might relate back to the previous session (27 May 1996) where it was suggested that I ask Tom French to cancel his writing project about me and my work. It was becoming abundantly clear that Frank was extremely jealous of this and his jealousy came through not only in his verbal harassment of me, but also in the above session.

At the same time, the response marked with the asterisk above seems relatively clean and accurate based on subsequent learning and events.

## 4.21 June 9, 1996

Frank, Laura

The first part of this session was extremely unpleasant and I think that was due to the nature of the questions sent in by others. There was also a certain feeling of impatience with ignorance that I felt was emanating from Frank.

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us this evening?

**A:** Ehou.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) I have several questions that have been submitted by other people...

**A:** Ask.

**Q:** (L) The first one is from Phillip P., for whom we have asked a couple of questions in the past. He wrote and called to tell me that his sister had hand prints, bruises, and the description was very similar to the ones I saw on Scarlett H\_\_'s legs. Also, the sister had 3 little puncture marks in a triangular pattern on her ankle. He would like to know what happened to her.

**A:** What does Phillip think?

**Q:** (L) Well, he just wanted to have a brief run-down on this. He thinks she was abducted, and I tend to agree.

**A:** The point here is that learning involves reaching the stage where confirmation by a third party is no longer needed, once one has adequate knowledge.

**Q:** (L) I know that. But, Phillip just wanted to know that he could ask a question and get an answer specifically for him. I guess he just wanted to think that somebody out there in the cosmos cares about Phillip P. and his sister.

**A:** Nobody does.

**Q:** (L) Nobody cares about Phillip and his sister?

**A:** Nobody “cares” about individual units of the universal consciousness.

**Q:** (L) We realize that, but we, as units in bodies of flesh...

**A:** One must get past the idea that there is some sort of “cheer-leading squad” attached to individual consciousness units if one is to progress... it just doesn’t work that way!

**Q:** (L) Well, does this mean to just forget the rest of the questions?

**A:** No. All questions have great value if the answers are comprehended.

**Q:** (L) Is there anything you CAN tell Phillip for his sister? What are the three puncture marks on her ankle?

**A:** You know this.

**Q:** (L) Was this a sampling device, or an implanting device, an energy drain, or a monitor?

**A:** Maybe.

**Q:** (L) Since this also happened with Scarlett, the three fingered hand prints on the backs of the calves - what kind of beings leave these marks?

**A:** We are regressing.

**Q:** (L) I just wanted to ask a question for the guy, get something, and go on to more interesting subjects, for God’s sake! I don’t think this is worth the amount of time and energy that it is taking. I don’t even think it will be useful to the guy. I just want an answer for the guy!

**A:** And you have one!

**Q:** (L) Phillip has another question for this David, who would like to know what happened to them in January, 1991, outside of Athens, Ohio; and who was “Tim?” They saw a UFO speed past them and stop behind a hill and they have never seen Tim since.

**A:** Very vague and directionless as presented.

**Q:** (L) That is all I have on that, so let’s move on. Who was Tim?

**A:** Pick up.

**Q:** (L) They saw a UFO speed down towards them and then stop behind a hill. What do you mean by pick up?

**A:** Someone who was.

**Q:** (L) Picked up as in picked up by the UFO?

**A:** No.

**Q:** (L) Picked up as in sexual or a hitchhiker?

**A:** The latter.

**Q:** (L) Did Tim have any connection to the UFO?

**A:** Yes and no.

**Q:** (L) What is the yes part?

**A:** Everyone has some connection to UFOs.

**Q:** (L) What is the no, that he had no connection to this one in specific?

**A:** In the sense that your inquiry suggests.

**Q:** (L) Was there an abduction that took place when they saw this?

**A:** No.

**Q:** (L) Did any unusual event occur in connection to this UFO?

**A:** No.

**Q:** (L) Was what they saw a UFO?

**A:** No.

**Q:** (L) Well, that settles that. Bob Tietz, publisher of Bill Baldwin's book, writes and asks: what can the C's tell me about Dr. Mahlon Loomis. Have the C's been in contact with him?

**A:** No.

**Q:** (L) Alright. If the C's are not in contact, do you know who is?

**A:** These questions are difficult to deal with because the questioner is making assumptions.

**Q:** (L) Is the assumption that there is anything or anyone at higher levels in contact with this Dr. Mahlon Loomis?

**A:** Yes. And there are no such.

**Q:** (L) Is Dr. Loomis putting him on?

**A:** No, he is "out to lunch."

Laura's note: At the time, I had no clue who Mahlon Loomis was. Here are a few assembled snips from the Wikipedia Bio:

Mahlon Loomis (21 July 1826 - 13 October 1886) was a dentist, the inventor of artificial teeth (patent #10,847 May 2, 1854), and the earliest inventor of wireless communication (patent #129,971 July 30, 1872). He claimed to have transmitted signals in October 1866 between two Blue Ridge Mountain-tops 14 miles apart in Virginia, using kites as antennas, but without having identified the names of independent witnesses. Loomis was actively promoting his idea of using atmospheric electricity for telegraph communication. Loomis noted that transmission was

possible only when the kites were flown to the same altitude above ground, which seemed to confirm his hypothesis that he was completing a DC circuit through layers of the atmosphere that he hypothesized carried such currents.

**Q:** (L) Okay! Next question: Do the C's know the whereabouts of one Jessica Goode?

**A:** Yes, deceased.

[I have no clue who this Jessica Goode was/is.]

**Q:** (L) You just said that Dr. Loomis is out to lunch, can you explain the process whereby he is given data?

**A:** This happens to those who fall prey to lower level contacts, believing them to be otherwise.

Laura's note: Obviously, the Cs were out to lunch on this one!

**Q:** (L) Bob asks: Do the C's know of an entity claiming to be a Sirian named Anitra?

**A:** Yes.

**Q:** (L) If so, what can they tell me about the information that Anitra, or any Sirian, is communicating?

**A:** Hocus pocus.

**Q:** (L) Tell us about the Sirians?

**A:** There aren't any.

**Q:** (L) Why are all these people coming along and claiming to be Sirians?

**A:** Why are all these people coming along claiming to be Jesus?

The above exchange is pretty reasonable.

**Q:** (L) Do you know an Andalusian named Lucatron?

**A:** Yes.

**Q:** (L) Who is this Andalusian, and what can you tell him about the information coming from this source?

**A:** This “Andalusian” is delusional.

**Q:** (L) Can you express an opinion about Swedish genes, and any specific properties of these genes?

**A:** Yes. They tend to produce blonds with the greatest of proficiency.

**Q:** (L) Are there any specific properties to those genes that are of specific interest to aliens or extraterrestrials?

**A:** Only that which we have already told you, that this was the last “race” to be seeded on earth in 3rd density.

**Q:** (L) Okay. D4 is apparently still mucking about in the mire a bit. His questions were: 1) I had a very serious chat with God, in which I asked the following questions. First, who is this Melchizidek fellow and why is Jesus said to be a priest after the order of Melchizidek? Who was this Melchizidek who was said to have received tithes from Abraham?

**A:** False prophet.

**Q:** (L) Why is Jesus described as being a priest after the order of Melchizidek?

**A:** We told you that 70 per cent of the Bible is false.

**Q:** (L) Well, 70 per cent would equal an amount that could consist of the entire old testament.

**A:** Yes.

**Q:** (L) Did Abraham pay tithes to Melchizidek?

**A:** No.

**Q:** (L) Did a Melchizidek live at the time of the patriarch Abraham?

**A:** Yes.

**Q:** (L) It was said that he was the priest king of Salem, which became Jerusalem, and that he had neither father nor mother, and that he came into being by his own will. Are any of these parts of the story correct?

**A:** No.

**Q:** (L) D4's next question: what did Paul say during his out of body experience, and why were these things not 'lawful for a man to speak?'

**A:** Jesus said: "Give to Caesar that which is Caesars."

**Q:** (L) How does that apply to this question?

**A:** Ponder for learning.

Laura's note: This last exchange above takes on an all-new meaning in light of the recent (2013) discoveries that point to Julius Caesar having been the real "Jesus".

**Q:** (L) D4 asks: what did the seven peals of thunder say and why was John commanded to seal up the things which the 7 peals of thunder have spoken? Well, he would know a lot about these things if he would read "Noah."

**A:** This is an exercise in futility!

**Q:** (L) What, asking these questions, or dealing with these people?

**A:** There is much hope for D4, but he must discover it for himself.

**Q:** (L) Okay. Let's toss that. My question is: is the information we are receiving similar to what Al-Arabi calls an 'opening?'

**A:** Yes.

**Q:** (L) You say that you are unified thought forms in the realm of knowledge.

**A:** Yes.

**Q:** (L) Al-Arabi describes unified thought forms as being the 'names of God.' His explication seems to be so identical to things you tell us that I wonder...

**A:** We are all the names of God. Remember, this is a conduit. This means that both termination/origination points are of equal value, importance.

**Q:** (L) So, it is a blending of the aspects of God?

**A:** No.

**Q:** (L) What do you mean?

**A:** Does this mean that we are a part of this?

**A:** Yes.

**Q:** (L) So, it has to do with...

**A:** Don't deify us. And, be sure all others with which you communicate understand this too!

**Q:** (L) What quality in us, what thing, enabled us to make contact. Because, obviously a lot of people try and get garbage.

**A:** You asked.

**Q:** (L) A lot of people ask!

**A:** No they don't, they command.

**Q:** (L) Well, a lot of people do ask or beg or plead, but they get all discombobulated with the answers.

**A:** No, they command. Think about it. You did not beg or plead... that is commanding. After J.W. left, purification began.

**Q:** (L) This recent 'awakening' or period of seeing things with such clarity, as they really were, and the whole picture of the interactions between people and how truly ugly it can be. I plunged into a terrible depression. I needed to get my balance from seeing so much all at once. Can you explain to me what was going on?

**A:** Growth.

**Q:** (L) I tried to share this perception with other people, and almost without exception, when I said to people that I was finally seeing things in their true state and it was NOT a pretty picture, they all said "well, you are obviously seeing this through the eyes of some major spirit possession!" Why would they say this?

**A:** First of all, it is not correct to perceive "everything in such darkness and gloom, etc." That is merely the result of a cocoon of falsehood being removed. Celebrate the balance. Don't mourn the death of an illusion of an imbalance.

**Q:** (L) Where do I go from here? Where do we all go?

**A:** Everywhere.

**Q:** (L) We were talking earlier about sleeping and dreaming. It seems to me that sleeping cannot be an evolutionary benefit, because sleeping would not evolve as something beneficial, because when you are asleep, you are completely vulnerable to any munching monster that passes by. Therefore, it is not conducive to evolution to sleep. And, I think there is some other

reason for this thing we call sleeping. Obviously it is not to rest the brain, because the brain is as active asleep as when awake. And the bodily functions...

**A:** Bodies may get munched; souls don't, however!

**Q:** (L) Okay, yes, but still it makes me think that there is something to this sleeping business that does not meet the eye in strictly physical terms. Nobody seems to know why we sleep. You made a remark once that dreams were a prime opportunity for the implanting of negative information and suggestions. This makes me think that we are even more vulnerable during sleep than previously thought. Are we induced to sleep genetically for the purpose of control by other density beings? Could you comment?

**A:** Ask specifics.

**Q:** (L) Is it essential, in an evolutionary sense, for the human body to sleep?

**A:** Yes.

**Q:** (L) Why is it that carnivores need more sleep than herbivores, and on down?

**A:** Physicality, my dear, physicality.

**Q:** (L) What is it about physicality that necessitates sleep? What are we doing while we are sleeping?

**A:** Body recharge.

**Q:** (L) Where is the body being recharged from or what is it being recharged by?

**A:** Rest.

**Q:** (L) What is the soul doing while the body is sleeping?

**A:** Same, it taxes the soul greatly to be embodied.

**Q:** (L) Is this why, when people suffer sleep deprivation, they go psychotic?

**A:** Yes.

**Q:** (L) Why are the results of sleep deprivation, psychosis, delirium tremens, and psychedelic drugs and some mystical states so similar in their expressions and manifestations? What is being seen?

**A:** Openings.

**Q:** (L) Well, if doing without sleep provides an opening, what is it an opening to?

**A:** Density levels 4 and up.

**Q:** (L) It would seem to me - well, why is this not good?

**A:** Who said it wasn't?

**Q:** (L) Well, apparently a lot of people who have psychotic episodes, literally go out of their minds. They can no longer function in this world. They LOCK them up!

**A:** Yes...

**Q:** (L) Why does melatonin induce these openings?

**A:** Gentle hallucinogen.

**Q:** (L) SV's mother took it and got all discombobulated with it!

**A:** Perception is key. If you really "dig" 3rd density, it makes you uncomfortable to see into the higher densities.

**Q:** (L) Can one use something like this and grow accustomed to the higher densities?

**A:** Ask Timothy Leary.

**Q:** (S) It's too late now! He's in 5 D! (L) Ask him for us.

**A:** We did, and he liked it a lot!

**Q:** (L) Did all of his use of hallucinogenics make it easier for him to transition?

**A:** Yes.

**Q:** (L) Where is he now?

**A:** 5th density.

**Q:** (L) Moving along... recently I read "On the Trail of the Assassins," by Jim Garrison, the New Orleans attorney. This is the book about his investigation into the Kennedy assassination. I know that we asked one or two questions about this earlier, but I think that now, with expanded perspective, we could ask a few more. Was the purported Cuban agenda what was really behind the assassination of JFK?

**A:** Not in its entirety.

**Q:** (L) Was there, in fact, any connection between this murder and JFK planning to reveal the government's knowledge of alien interaction?

**A:** Maybe, or that was feared, based upon a sophisticated psychological profiling system.

**Q:** (L) One thing that we noticed was that Lee Oswald was 'sheep dipped' in many areas around the country, well before the election of Kennedy. Why would this be the case?

**A:** Consortium.

**Q:** (L) What was the intention in using Oswald in this way? Was it just to have a handy person around, or did they already know,

in advance, that Kennedy would be elected and that they would assassinate him?

**A:** Time alteration.

**Q:** (L) Do you mean time alteration in the sense that these events did NOT actually occur at the noted times, or that they were able to go back in time and do this to put more confusion into the picture?

**A:** Latter, see Montauk.

**Q:** (L) Obviously the consortium was operating through the FBI, the CIA, the Mafia, and God knows who else, but, can you tell us who fired the shot that caused JFK's death?

**A:** No, because it would put you in grave danger.

**Q:** (L) Speaking of Montauk, Roxanne quoted at length some information received from some Native American about Montauk being used to change the weather on the planet, and also sending out energy waves to generate anger and other negative emotions. Is this one of the used for the HAARP assembly?

**A:** No.

**Q:** (L) Once before you said that the HAARP assembly was a continuation of the Montauk project, and was being used to 'transfer perimeters.' I guess this meant space/time travel, correct?

**A:** Yes. And resurrect Atlantean crystal principle.

**Q:** (L) Do they plan to actually attempt to bring up the Atlantean crystals?

**A:** No.

**Q:** (L) Do they plan to use this for mind control?

**A:** And other uses.

**Q:** (L) Can you give us a few of these uses?

**A:** Technical.

**Q:** (L) Is the HAARP assembly in operation now?

**A:** No.

**Q:** (L) Is there an estimated date of its activation?

**A:** No.

**Q:** (L) Is there anything you can tell us about when and if it will go into operation?

**A:** No.

**Q:** (L) Is there anything further you can tell us about this HAARP project?

**A:** Time to read Bielek.

**Q:** (L) But didn't you tell us that Bielek was a disinformation artist?

**A:** Yes, but can you weed?

**Q:** (L) Now, Admiral Boorda recently committed suicide...

**A:** Time to read Oeschler.

**Q:** (L) Did Admiral Boorda really commit suicide?

**A:** Yes. Culmination, as is usually the case.

**Q:** (L) A culmination of other things?

**A:** Yes.

**Q:** (L) Did any of this have to do with human/alien interactions?

**A:** No. He was not aware of any of that.

**Q:** (L) What about Vince Foster? Did he commit suicide?

**A:** Yes.

**Q:** (L) For the reasons proposed?

**A:** Partly.

**Q:** (L) What was the main reason?

**A:** Depression.

**Q:** (L) Back to Kennedy, people say that Marilyn Monroe committed suicide, some say she was murdered. Was she murdered?

**A:** Yes.

**Q:** (L) Was she murdered by the Kennedy's or someone else?

**A:** Both.

**Q:** (L) Was it because she was going to reveal things?

**A:** Yes.

**Q:** (L) Can you tell us what?

**A:** Any and all, but it does not matter, because the "bottom line" was that she knew too much.

**Q:** (L) Next, Aliester Crowley, who claimed to be the most evil man on the planet: was he capable of doing the things he claimed in his magical operations?

**A:** No.

**Q:** (L) Was he used by other people?

**A:** Yes, and for now, good night!

END OF SESSION

## 4.22 June 15, 1996

Frank, Laura, SV

There are a few oddities about this session that deserve comment. First of all, this was the topic that, 19 days later, after it was shared on the internet, would attract the attention of Ark Jadczyk. Secondly, notice the mention of my book “The Noah Syndrome” which is, effectively, about my search for “the Ark.” At this particular moment in time, as we were conducting this session, Ark was in Florence, Italy, sitting on a megalith, writing in his journal about “gravity waves.”

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have this evening?

**A:** Uquoppe.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) As you know, I have been studying the Sufi teachings, and I am discovering so many similarities in these Sufi “unveilings” to what we have been receiving through this source, that I am really quite amazed, to say the least. So, my question is: could what we are doing here be considered an ongoing, incremental, “unveiling,” as they call it?

**A:** Yes.

**Q:** (L) Now, from what I am reading, in the process of unveiling, at certain points, when the knowledge base has been sufficiently expanded, inner unveilings then begin to occur. Is this part of the present process?

**A:** Maybe.

**Q:** (L) My experience has been, over the past couple of years, that whenever there is a significant increase in knowledge, that it is sort of cyclical - I go through a depression before I can assimilate - and it is like an inner transformation from one level to another. Is there something we can do, and if so, is it desirable, to increase or facilitate this process in some way?

**A:** It is a natural process, let it be.

**Q:** (L) One of the things that Al-Arabi writes about is the ontological level of being. Concentric circles, so to speak, of states of being. And, each state merely defines relationships. At each higher level you are closer to a direct relationship with the core of existence, and on the outer edges, you are in closer relationship with matter. This accurately explicates the 7 densities you have described for us. He also talks about the “outraying” and the “inward moving” toward knowledge. My thought was that certain beings, such as 4th density STS, and other STS beings of 3rd density, who think that they are creating a situation where they will accrue power to themselves, may, in fact, be part of the “outraying” or dispersion into matter. Is this a correct perception?

**A:** Close.

**Q:** (L) Al-Arabi says, and this echoes what you have said, that you can stay in the illusion where you are, you can move downward or upward. Is this, in part, whichever direction you choose, a function of your position on the cycle?

**A:** It is more complex than that.

**Q:** (L) Well, I am sure of that. Al-Arabi presents a very complex analysis and he probably didn't know it all either... Nevertheless,

it almost word-for-word reflects things that have been given directly to us through this communication.

**A:** Now, learn, read, research all you can about unstable gravity waves.

**Q:** (L) Okay. Unstable gravity waves. I'll see what I can find. Is there something more about this?

**A:** Meditate too!

**Q:** (L) Yes. Well, they have been telling us to meditate. Have you been meditating, Frank? (F) Not lately.

**A:** We mean for you, Laura, to meditate about unstable gravity waves as part of research.

**Q:** (L) Okay. Would it be alright to ask a few more questions about the Sufis?

**A:** Not unless you wish to get off the track.

**Q:** (L) That would be off the track from the way we are moving at present?

**A:** Not until you have memorized Sufi teachings to the extent that you can cross reference with Bible and similar works.

**Q:** (L) Okay. So, we are onto something with the Sufi teachings. But, we don't need to get off the track. I guess that they did with the Koran what some other mystics have done with the Bible. It is clear that there is something under the surface of it, but it is corrupted and twisted. And, I was convinced by seeing this underlying pattern that it was possible to penetrate the veil, and that gave me the impetus to push for a breakthrough.

**A:** Unstable gravity waves unlock as yet unknown secrets of quantum physics to make the picture crystal clear.

**Q:** (L) Can we free associate about these gravity waves since no bookstores are open at this hour? Gravity seems to be a property of matter. Is that correct?

**A:** And....

**Q:** (L) And hmmm....

**A:** And antimatter!

**Q:** (L) Is the gravity that is a property of antimatter “antigravity?” Or, is it just gravity on the other side, so to speak?

**A:** Binder.

**Q:** (L) Okay. Gravity is the binder. Is gravity the binder of matter?

**A:** And...

**Q:** (L) Is gravity a property of light?

**A:** Not the issue.

**Q:** (L) What is the issue? Can you help me out here, Frank?

**A:** Gravity binds all that is physical with all that is ethereal through unstable gravity waves!!!

**Q:** (L) Is antimatter ethereal existence?

**A:** Pathway to.

**Q:** (L) Okay.

**A:** Doorway to.

**Q:** (L) Are unstable gravity waves... no, hold everything... do unstable gravity waves emanate from 7th density?

**A:** Throughout.

**Q:** (L) Do they emanate from any particular density?

**A:** That is just the point, there is none.

**Q:** (L) There are no unstable gravity waves?

**A:** Wrong...

**Q:** (L) There is no emanation point?

**A:** Yes.

**Q:** (L) So, they are a property or attribute of the existence of matter, and the binder of matter to ethereal ideation?

**A:** Sort of, but they are a property of anti-matter, too!

**Q:** (L) So, through unstable gravity waves, you can access other densities?

**A:** Everything.

**Q:** (L) Can you generate them mechanically?

**A:** Generation is really collecting and dispersing.

**Q:** (L) Okay, what kind of a device would collect and disperse gravity waves? Is this what spirals do?

**A:** On the way to.

**Q:** (L) So, if were to focus on collecting unstable gravity waves...

**A:** When you wrote "Noah" where did you place gravity?

**Q:** (L) I thought that gravity was an indicator of the consumption of electricity; that gravity was a byproduct of a continuous flow of electrical energy...

**A:** Gravity is no byproduct! It is the central ingredient of all existence!

**Q:** (L) I was evaluating by electric flow and consumption... and I was thinking that electricity was evidence of some sort of con-

sciousness, and that gravity was evidence that a planet that had it, had life...

**A:** We have told you before that planets and stars are windows. And where does it go?

**Q:** (L) The windows?

**A:** The gravity.

**Q:** (L) Oh. Gravity must go into the ethereal dimensions or densities. I mean, you have my head going in so many different directions that I feel like I have popcorn in there.

**A:** Good!

**Q:** (L) Well, where does gravity go. The sun is a window. Even our planet must be a window!

**A:** You have it too!!

**Q:** (L) So, gravity is the unifying principle... the thing that keeps things together, like the way all the fat pulls together in a bowl of soup.

**A:** Gravity is all there is.

**Q:** (L) Is light the emanation of gravity?

**A:** No.

**Q:** (L) What is light?

**A:** Gravity.

**Q:** (L) Is gravity the same as the strong and weak nuclear forces?

**A:** Gravity is "God."

**Q:** (L) But, I thought God was light?

**A:** If gravity is everything, what isn't it? Light is energy expression generated by gravity.

**Q:** (L) Is gravity the "light that cannot be seen," as the Sufis call it: the Source.

**A:** Please name something that is not gravity.

**Q:** (L) Well, if gravity is everything, there is nothing that is not gravity. Fine. What is absolute nothingness?

**A:** A mere thought.

**Q:** (L) So, there is no such thing as non-existence?

**A:** Yes, there is.

**Q:** (L) Do thoughts produce gravity?

**A:** Yes.

**Q:** (L) Does sound produce gravity?

**A:** Yes.

**Q:** (L) Can sound manipulate gravity?

**A:** Yes.

**Q:** (L) Can it be done with the human voice?

**A:** Yes.

**Q:** (L) Can it be done tonally or by power through thought?

**A:** Both.

**Q:** (L) Then, is there also specific sound configurations involved?

**A:** Gravity is manipulated by sound when thought manipulated by gravity chooses to produce sound which manipulates gravity.

**Q:** (L) Now, did the fellow who built the Coral Castle spin in his airplane seat while thinking his manipulations into place?

**A:** No. He spun when gravity chose to manipulate him to spin in order to manipulate gravity.

**Q:** (L) Does gravity have consciousness?

**A:** Yes.

**Q:** (L) Is it ever possible for the individual to do the choosing, or is it gravity that IS him that chose?

**A:** The gravity that was inside him was all the gravity in existence.

**Q:** (L) Well, I thought the Sufis were tough! (F) Well, it's probably because of your studies that this door opened. (L) Good grief! What have I done! Alright. I am confused.

**A:** No you are not.

**Q:** (L) Then, just put it this way: I am befuddled and overloaded.

**A:** Befuddling is fun!

**Q:** (L) Well, I guess that if any of this is going to be of particular significance to us, then we will certainly find out the details as we go along.

**A:** How many times do we have to tell you?!?!

**Q:** (L) Learning is fun! Right!

**A:** The entire sum total of all existence exists within each of you, and vice versa.

**Q:** (L) Then what is the explanation for the “manyness” that we perceive?

**A:** Perception of 3rd density.

**Q:** (L) So, the entire universe is inside me... okay, that's... I understand. Oddly enough, I do. The problem is accessing it, stripping away the veils.

**A:** That is the fun part.

**Q:** (L) So, the fellow who built the Coral Castle was able to access this. Consistently or only intermittently?

**A:** Partially.

**Q:** (L) According to what I understand, at the speed of light, there is no mass, no time, and no gravity. How can this be?

**A:** No mass, no time, but yes, gravity.

**Q:** (L) A photon has gravity?

**A:** Gravity supersedes light speed.

**Q:** (L) Gravity waves are faster than light?

**A:** Yes.

**Q:** (L) What would make a gravity wave unstable?

**A:** Utilization.

**Q:** (L) I feel like I am missing a really big point here...

**A:** You are, but you can only find it at your own pace.

**Q:** (L) Well, I think I need to do some reading and research so that I can come back to this.

**A:** And, on that note, good night.

END OF SESSION

## 4.23 June 22, 1996

Frank, Laura, SV, VG

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Firson.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) Tonight, I would like to ask about 5th density. How does the “dividing line” between the 4 physical densities and 5th function?

**A:** Recycling zone, one must have direct contact in perfect balance with those on 6th density in order to fulfill the need for contemplation/ learning phase while in between incarnations of 1st through 4th densities.

**Q:** (L) When a person finishes all their experiences on 1st through 4th density, do they then remain at 5th for a period before moving to 6th.

**A:** Yes.

**Q:** (L) When you die in 3rd and go to 5th, do you pass through or see 4th?

**A:** No.

**Q:** (L) When you are in 5th density, is part of your service to be a guide? Are there two kinds of beings on 5th: those who are there for the recycling, and those whose level it simply IS?

**A:** No. All are as one in timeless understanding of all there is.

**Q:** (L) If, at 5th density a person has timeless understanding, what is it about them that determines that they will “recycle” as opposed to moving to 6th from 5th?

**A:** Contemplation reveals needed destiny.

**Q:** (L) So, being united with other beings on 5th, you come to some sort of understanding about your lessons....

**A:** Balanced. And this, my dear, is another example of gravity as the binder of all creation... “The Great Equalizer!”

**Q:** (L) In this picture in my mind, the cycle moves out, in dispersion, begins to accrete and return to the source. Is this correct?

**A:** Close.

**Q:** (L) Is it, in fact, that exactly half of all that exists, is moving into imbalance, while the other half is moving into balance?

**A:** Close.

**Q:** (L) All the cosmos? All that exists?

**A:** Yes.

**Q:** (L) Is it possible that one area of the cosmos has more of the balance seeking energy while another has more of that which is seeking imbalance?

**A:** Oh yes!

**Q:** (L) Is the Earth one of those areas that is more imbalanced than balanced at the present time?

**A:** Yes, but rapidly moving back toward balance.

**Q:** (L) Is the Realm Border part of this balancing?

**A:** Yes.

**Q: (V)** A few weeks ago several of us began to suffer from internal heat, insomnia, and other things. What was this?

**A:** Image. Deep conjunction of fibrous linkage in DNA structure.

**Q: (V)** Well, I want to know if it is in my mind that I get so hot, or does my body temperature actually elevate?

**A:** Only on 4th.

**Q: (V)** I don't understand.

**A:** Bleedthrough, get used to those!

**Q: (L)** Does this mean we are actually experiencing a bleedthrough of 4th density?

**A:** Image.

**Q: (V)** Are the little flashes of light I see also a manifestation of this?

**A:** Maybe so, but try to concentrate on the ethereal significance, rather than the physical.

**Q: (L)** When you say "deep conjunction of fibrous linkage," does this mean that we are conjoining with a linkage to a 4th density body that is growing, developing?

**A:** Slowly, but surely. Now, get ready for a message: We have told you before that the upcoming "changes" relate to the spiritual and awareness factors rather than the much publicized physical. Symbolism is always a necessary tool in teaching. But, the trick is to read the hidden lessons represented by the symbology, not to get hung up on the literal meanings of the symbols!

**Q: (L)** You say that the symbology has to do with hidden meanings. The symbology that you used was "image" and "deep fibrous linkage" of DNA. Now, is that a physical, symbolic image?

**A:** Yes.

**Q:** (L) What is your definition of “image?” We have many.

**A:** Learning is fun, Laura, as you have repeatedly found!

**Q:** (L) Well, I am so hot now that I really want to know! And, how come I am always the one who gets assigned the job of figuring everything out?

**A:** Because you have asked for the “power” to figure out the most important issues in all of reality. And, we have been assisting you in your empowerment.

**Q:** (L) Image. DNA linkage. (V) “Power” was in quotes.

**A:** Leave that alone for now, you will know soon enough.

**Q:** (V) Is this 4th density body something that already exists so that we could communicate with it?

**A:** Habeas Corpus?

**Q:** (V) Well, they just said... (L) Well, what they must mean is that you ARE it - you are transforming little by little and all of the unpleasant little side-effects are just part of it.

**A:** Yes.

**Q:** (V) Righteous! (L) Terry showed me a couple of acupuncture points that seem to induce an altered state. Is this, as he says, a way to open the door to the subconscious?

**A:** Stimulates endorphins.

**Q:** (L) Is there any point on the body that CAN be used to assist in opening the gate to the subconscious?

**A:** No such assistance is needed. First, we would like to suggest that you seek a “spin” doctor for your quest!!

**Q:** (L) Would a “spin” doctor be a Sufi master?

**A:** One example.

Laura’s note: As I mentioned in a note to the session 15 June 1996, the arrival of Ark on the scene was just days away. At the time of this session, only 12 days, and a physicist is certainly a “spin doctor.”

**Q:** (L) Yes. We are supposed to do several things involved with spinning.

**A:** Hilliard. Leedskallen. Coral Castle.

**Q:** (L) Well, they are really pushing on this gravity thing. Can I ask a question on another subject?

**A:** You can ask about the Easter Bunny, if you wish.

**Q:** (L) Is 3rd density awareness the only density with perception of time?

**A:** No.

**Q:** (L) Well, what others?

**A:** 4,5,6,7.

**Q:** (L) But I thought that time perception was an illusion?

**A:** YOUR perception of it is an illusion. Remember the example of the dogs and cats riding in a car?

**Q:** (L) Yes. Ouspensky and the horse. So, time, as an essential thing, DOES exist?

**A:** But not as you know it. When we refer to “timelessness,” we are speaking from the standpoint of your familiarity only.

**Q:** (L) Does time then exist, and does space have a limit?

**A:** You are getting confused because your inborn linear perception is clouding the image your efforts are trying to produce.

**Q:** (L) Okay, let's go back to the "balancing" of Earth. How can this be done?

**A:** Vague question.

**Q:** (L) Let me try this: the "buckets of love and light" group say that it is going to be balanced because everyone is going to think nice thoughts, and all of their buckets of love and light are going to eventually reach a critical mass and spill over onto all the rest of humanity and all of the bad guys are going to be transformed into good guys. This is the standard version. Is this what you mean?

**A:** No.

**Q:** (L) Swell! Is the energy that is being manifested in the positive, on and around the planet, is it going to reduce the level of negativity in the beings existing on the planet?

**A:** This is not the point. When "Earth" becomes a 4th density realm, all the forces, both STS and STO shall be in direct contact with one another... It will be a "level playing field," thus, balanced.

**Q:** (V) I am wondering about the significance of the quoted words. Is it some kind of code?

**A:** Maybe you should go back to the beginning, and arrange all our quoted statements in sequential order?

**Q:** (L) Do you mean ALL the transcripts?

**A:** Yup!

**Q:** (F) Well, they mentioned twice to be careful about putting in the designated quotes. (L) One of the crop circles you interpreted

was an “astronomical twin phenomenon.” What is an astronomical twin phenomenon?

**A:** Many perfectly synchronous meanings.

**Q:** (L) Synchronicity is involved. Does this have something to do with “image?”

**A:** Duplicity of, as in “Alice through the looking glass.”

**Q:** (L) Double images. Does this relate to matter and antimatter?

**A:** Yes, and...

**Q:** (L) Gravity and manifesting on one side and manifesting a mirror image on the other..

**A:** Yes, and...

**Q:** (L) And images of 4th density bodies with tenuous fibers connecting to DNA as in manifesting imaginal bodies on 4th density?

**A:** Astronomical.

**Q:** (L) Okay, that relates to stars and planets... astronomical in terms of another universe, an alternate universe composed of antimatter?

**A:** Yes, and....

**Q:** (L) And is this alternate universe going to merge with our universe...

**A:** No.

**Q:** (L) Is this alternate universe of antimatter the point from which phenomena occur or are manifested in our universe?

**A:** More like doorway or “conduit.”

**Q:** (L) Is this alternate universe the means by which we must travel to 4th density? Is it like a veil, or an abyss of some sort?

**A:** Think of it as the highway.

**Q:** (L) So, we must travel through this universe of antimatter in order to reach 4th density?

**A:** No.

**Q:** (L) Is something going to happen in terms of interacting with this antimatter in order to bring about some sort of transition?

**A:** No. Realm Border is traveling wave.

**Q:** (L) Okay, you say “traveling wave,” and then you say that antimatter is the highway. Does this mean moving through antimatter or interacting in some way with antimatter via the impetus of the traveling wave, or realm border?

**A:** Bends space/time, this is where your unstable gravity waves can be utilized.

**Q:** (L) Utilizing antimatter by creating an EM field, which destabilizes the gravity wave, allows antimatter to unite with matter, creating a portal through which space/time can be bent, or traveled through via this “bending.” In other words, producing an EM field, bringing in the antimatter, IS the bending of space/time? Is that it?

**A:** Yes.

**Q:** (V) Is there a portal for each person, or one large portal?

**A:** No.

**Q:** (V) So we move through a portal in masses?

**A:** No.

**Q:** (L) Is this generating of EM fields to destabilize the gravity wave what the HAARP assembly is designed and built for?

**A:** No.

**Q:** (V) If there are not personal portals for one person, or portals for groups of people...

**A:** Portal is where you desire it to be.

**Q:** (V) So it could just be a state of mind?

**A:** No. With proper technology you can create a portal where desired. There are unlimited options.

**Q:** (L) Proper technology. Unstable gravity waves. And once you told us to study Tesla coils.... antimatter... destabilizing the gravity waves through EM generation allows the antimatter to interact with matter which then creates a portal... is it in the antimatter universe that all this traveling back and forth is done by aliens when they abduct people?

**A:** Close. They transport through it, but most abductions take place in either 3rd or 4th density.

**Q:** (L) Is this movement through the antimatter universe, is this what people perceive in their abductions as the "wall of fire?" The coming apart? The demolecularizing?

**A:** No. That is TransDimensional Atomic Remolecularization.

**Q:** (L) Okay, if a person were passing into the antimatter universe, how would they perceive it?

**A:** They wouldn't.

**Q:** (L) Why?

**A:** No space; no time.

**Q:** (L) Antimatter universe has no space and no time... so, the antimatter universe is possibly where the poor guys of flight 19 are?

**A:** Yes.

**Q:** (L) And you can get stuck in this place?

**A:** Yes. And if you are in a time warp cocoon, you are hyperconscious, i.e. you perceive “zero time” as if it were literally millions of years, that is if the cycle is connected or closed, as in “Philadelphia Experiment.” And, on that note, good night.

END OF SESSION

## 4.24 June 29, 1996

Frank, Laura, SV

**Q:** (L) Hello.

**A:** Hello. We are the Cassiopaean transmitting 6th density beings of light, and for purposes of an identifier for your familiarity pattern, we will label this consciousness unit “Jarrah.”

**Q:** (L) Well, that is an interesting opening. I guess you have been tuned in during the week and have been aware of the stuff going on in my head. I would like to get directly to my questions as they have developed during the past few days. The first thing is in regard to the Santilli session: is awareness equal to gravity?

**A:** It is a part therein.

**Q:** (L) Does accumulation of knowledge and awareness correspond to an increase in gravity?

**A:** No.

**Q:** (L) You said that energy can change the value of the density. The value of the density, as I understand it, is either plus or minus. Does this mean that pumping energy into 3rd density from another realm of space/time can intensify the gravity to such a state that it changes its unit and becomes antimatter?

**A:** No.

**Q:** (L) You said that EM was the same as gravity. Does an increase in EM, the collection of EM or the production of an EM wave, does this increase gravity on those things or objects or persons subjected to it?

**A:** Gravity does not ever get increased or decreased, it is merely collected and dispersed.

**Q:** (L) If gravity is collected and dispersed, and planets and stars are windows, and you say that human beings “have” gravity, does that mean that the human beings, or the life forms on a given planet or in a given solar system, are the collectors of this gravity?

**A:** No. Gravity is the collector of human beings and all else! Make “collector” singular.

**Q:** (L) Is STO the equivalent of dispersing gravity?

**A:** No, STO is a REFLECTION of the existence of gravity dispersal.

**Q:** (L) Is STS also dispersal of gravity?

**A:** No. Collection is reflected. STS is reflection or reflected by collection of gravity.

**Q:** (L) You said that changing the unit involves movement to another density. You also said that antimatter realm is the door to, or the pathway to, ethereal existence. Is 4th density, therefore, an antimatter universe?

**A:** No.

**Q:** (L) Do the beings in 4th density manifest in an antimatter state?

**A:** Both.

**Q:** (L) Is 4th density a density where both matter and antimatter are in balance?

**A:** Not in balance, in evidence.

**Q:** (L) So matter and antimatter are both available for utilization by individuals according to will and awareness?

**A:** Close. Antimatter and matter are balanced everywhere.

**Q:** (L) What effect does collection of gravity - you said gravity was collecting human beings - what effect...

**A:** No, we did not say that. You don't learn when you "skip over" the material.

**Q:** (L) What did I skip over? You said that "gravity is the collector of human beings?"

**A:** Yes, but all else is the key. When one says that, there is no differentiation.

**Q:** (L) Yes, well I am asking these questions at OUR level here. What effects does gravity have on the body?

**A:** Too complicated. Try breaking your question down.

**Q:** (L) You say that increasing awareness was "a part therein," of gravity. So, if a person is increasing awareness, do they also increase in gravity?

**A:** No.

**Q:** (L) What is the relationship between the increasing awareness and gravity?

**A:** Nothing direct.

**Q:** (L) I am trying to find out what effect increasing awareness has on human beings in relation to this unstable gravity wave you have mentioned, as well as the oncoming “wave.”

**A:** You are trying to “marry” two parallels.

**Q:** (L) We have two parallels... okay... so if one is exponential increasing in awareness, the sign of the units of bodily energy does not change?

**A:** You are still attempting to generate.

**Q:** (L) Well, I am just trying to get a grip on some ideas here...

**A:** Then change the thought pattern. Gravity is the “stuff” of all existence, therefore it has an unchanging property of quantity.

**Q:** (L) So, gravity is not being “used,” per se?

**A:** Close.

**Q:** (L) You said that light was an energy expression of gravity. Then you said...

**A:** You can utilize gravity, but you cannot “use” it. You cannot increase or decrease that which is in perfectly balanced static state.

**Q:** (L) So, gravity is in a perfectly “static” state. Yet, it can be “utilized.” Can you make clear for me the transition from the static state to transition. What occurs?

**A:** There is no transition, just application.

**Q:** (L) What occurs from the perfectly static state to the application mode? Is anybody following me?

**A:** No, including us!

**Q:** (L) Wonderful! What I am trying to get at is, 1) gravity exists in a static state; 2) light is an energy expression of gravity, therefore it is utilization? Correct?

**A:** No. Light is an expression of gravitational energy.

**Q:** (L) Well, when one has an expression, it expresses onto, into, or to something somewhere...

**A:** It does?

**Q:** (L) Well...

**A:** If a tree falls in the forest, and nothing is there to hear it, does it make a sound?

**Q:** (L) You are saying that gravity is everywhere in balance and static, and then you say that utilization causes unstable gravity waves. And then you say that gravity is God, and that God is all creation, and we are a part of all creation, and, therefore, we are of God, and gravity. So, what I am trying to get at here is what is the thing, the event, the manifestation, the mode of utilization that takes gravity from a perfectly static state to an unstable state, if you are saying it is always perfectly balanced. That does not make sense to me.

**A:** Instability does not automatically mean non-static. Unstable waves can be static in their instability.

**Q:** (L) None of this makes a whole lot of sense. I thought I was beginning to understand it, and obviously I don't have a clue. Let's try a different direction. You said that the universe consists of

equal amounts of matter and antimatter. Are the first three densities, densities of matter?

**A:** And antimatter.

**Q:** (L) Are there equal amounts of matter and antimatter at all densities?

**A:** Yes. Remember, density refers to one's conscious awareness only. Once one is aware, all [many spirals of the planchette] conforms to that awareness.

**Q:** (L) What is it about the oncoming wave that is going to make any given person aware?

**A:** Not yet... First: your prophets have always used 3rd density symbology to try to convey 4th density realities. You are attempting to gather 3rd density answers to explain 4th through 7th density principles. This is why you are getting frustrated, because it doesn't "mesh."

**Q:** (L) Are manifestations in 3rd density loci of collection of gravity?

**A:** In part. But, so are manifestations on all densities.

**Q:** (L) Okay. So, if...

**A:** What do you suppose the opposite of gravity is?

**Q:** (L) Antigravity?

**A:** Yes.

**Q:** (L) So, if all that exists were like a blown up balloon, and the surface of the balloon represents the static state of gravity, 7th density maybe... and it begins to bump out in different places... and all these little bumps are loci of manifestation of various densities - and this is very simplified, I am just trying to get an image

- is this getting, even very simplistically, an idea that I can work with?

**A:** As long as you have an “anti-balloon” too.

**Q:** (L) So, can we make the outer surface of the balloon a balloon, and the inner surface or the air the “anti-balloon?”

**A:** No.

**Q:** (L) Two balloons next to one another?

**A:** No. A non-balloon.

**Q:** (L) A non-balloon? You are making me CRAZY! You are saying that NOTHING exists! We are just not even HERE!

**A:** No.

**Q:** (L) Well, for God’s SAKE! Help me out with a visual on this! Okay, a balloon in front of a mirror, the reflection of the balloon is the “non-balloon.”

**A:** No.

**Q:** (L) The non-balloon is when the balloon switches off - but it does it so fast you are not aware of it - like a pulsation...? I mean, I am desperate here!

**A:** You see, my dear, when you arrive at 4th density, then you will see.

**Q:** (L) Well, how in the heck am I supposed to get there if I can’t “get it?”

**A:** Who says you have to “get it” before you get there?

**Q:** (L) Well, that leads back to: what is the wave going to do to expand this awareness? Because, if the wave is what “gets you there,” what makes this so?

**A:** No. It is like this: After you have completed all your lessons in “third grade,” where do you go?

**Q:** (L) So, it is a question of...

**A:** Answer, please.

**Q:** (L) You go to fourth grade.

**A:** Okay, now, do you have to already be in 4th grade in order to be allowed to go there? Answer.

**Q:** (L) No. But you have to know all the 3rd density things...

**A:** Yes. More apropos: you have to have learned all of the lessons.

**Q:** (L) What kind of lessons are we talking about here?

**A:** Karmic and simple understandings.

**Q:** (L) What are the key elements of these understandings, and are they fairly universal?

**A:** They are universal.

**Q:** (L) What are they?

**A:** We cannot tell you that.

**Q:** (L) Do they have to do with discovering the MEANINGS of the symbology of 3rd density existence, seeing behind the veil... and reacting to things according to choice? Giving each thing or person or event its due?

**A:** Okay. But you cannot force the issue. When you have learned, you have learned!

**Q:** (L) I just want to make sure that I am doing the most I can do. I don't want to have to come back to 3rd density. If I can accelerate things a little...

**A:** You cannot, so just enjoy the ride. Learning is fun!

**Q:** (L) Now, you told me research and meditate upon unstable gravity waves. And, that once I understood this, quantum physics would be perfectly clear to me, and basically everything would be perfectly clear. Now, I have been struggling with this...

**A:** That is just the point, Laura! When it is a struggle, you are not learning. So stop struggling and meditate. i.e. enjoy the ride.

**Q:** (L) So, you say that if I am struggling I am not doing it right. Well, I struggled with myself to get out of my marriage, and that was and still is a struggle. Was that an erroneous approach?

**A:** Yes, because all that happened would have happened anyway.

**Q:** (L) So, it was the wrong approach?

**A:** Yes.

**Q:** (L) What was the right approach? Wait for him to choose to leave?

**A:** ?

**Q:** (L) Well, at this point, I was brought to the point of death.

**A:** That is not the point, but yes, if you had not struggled to be something other than who you are while IN the relationship, and struggled to make the relationship work every time it came to a point of termination, it would have happened sooner.

**Q:** (L) When we went through the transcript to get some of the quoted words, there was a sequence that came out: "Time caused alpha level suffering." Is there such a thing?

**A:** Maybe. Mix and match.

**Q:** (L) You mean in putting the words and phrases together?

**A:** Yes, but don't struggle with it! You try too hard when you feel upset with others, this is why see: ISCNI, LM, D4, and others...

**Q:** (L) So, you are saying that I should not do anything that makes something inside me feel compressed or denied...

**A:** Do without expectations. When you conform or change your behavior in the expectation of creating a change in others, then you are expecting something. So, do it. See what happens. But be patient and see what happens!

**Q:** (L) Okay, let me ask about a dream. My daughter and I both had dreams night before last. The nature of both dreams were very similar, although the participants were different. Was this some sort of prophetic energy?

**A:** Natural cycles caused psychic "link."

**Q:** (L) You mean as in hormonal cycles?

**A:** Yes. And good night.

END OF SESSION

## 4.25 July 14, 1996

Frank, Laura, V, MM

It had been two weeks since the previous session on June 29. Ark first wrote to me on July 5th and there was instant recognition on both sides. However, I was keeping things low key and to myself, though I tried to see if I could indirectly get some guidance as you will see below in my question about the book I read when I was 11 about the Polish Underground.

**Q:** [Last bit of discussion prior to session beginning.] (L) I am just wondering if a lot of things are going to happen that may

not be necessarily multi-density, or 'other density,' in the strictest of terms, but may in fact be simply actions of 'human agents' of these beings on other densities. That it will not so much be a 'space invasion' as more like the Nazis under the control of 4th density STS? Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Derom.

**Q:** (L) And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) Has there been some participation in the discussion we have been having?

**A:** Monitoring, not participation.

**Q:** (L) Would you care to comment, or shall we just ask our questions?

**A:** Ask specific questions, as always.

**Q:** (L) Then let's start with some basic things. First of all, I have had some contact with a physicist who is interested in the material. And, because of this, I was motivated to pick up a book I had read many years ago about the German occupation of Poland, {The Story of a Secret State by Jan Karski} and there were some very strange things said in this book, and some funny synchronous numbers... It just seemed to be a prototype of the present reality in global terms. My question is: is there some synchronous implication between this contact, the reading of this book when I was 11 years old, and the material we have received through this source?

**A:** Open.

**Q:** (L) You have said that the Holocaust was basically a ‘practice run’ for the ultimate space invasion. Is this invasion supposed to take place as an actual ‘aliens invading the planet’ scenario, or...

**A:** Too many thought patterns at once. Step by step, please.

**Q:** (L) Let’s boil it down. Was Hitler’s agenda a practice run for a future scenario?

**A:** Close. Was a “testing” of the will.

**Q:** (L) Whose will was being tested?

**A:** Yours.

**Q:** (L) Me specifically, or the planet?

**A:** Latter.

**Q:** (L) In terms of this scenario, is there some lesson that we can learn about what may or may not occur through this book I have mentioned?

**A:** Maybe, but suggest you learn to blend mosaic consciousness.

**Q:** (L) What is mosaic consciousness?

**A:** Thinking in internally spherical terms, rather than using linear “point blank” approach. The whole picture is seen by seeing the whole scene.

**Q:** (L) Well, I guess that is why I get into so many thought patterns...

**A:** Picture yourself as being at the center of a mosaic.

**Q:** (L) Okay, I know what you are saying, but I just don’t think that there is any way I can DO this!

**A:** Yes you can!

**Q:** (L) Okay. Okay. This whole situation, this Polish connection, this German connection, the American and alien things, the soldier/Nephilim thing, these are all manifestations of a Realm Border Crossing, am I correct?

**A:** Close.

**Q:** (L) And some of the manifestations of a Realm Border Crossing are that some people graduate or transition to 4th density, that their awareness changes, everything changes, the playing field is leveled. So, what happened in Germany was a 'practice run' but what is going to happen is that the 'playing field' is going to be leveled, so it will not be exactly the same scenario, is this a correct assessment?

**A:** Maybe. Alright, my dear, you want the facts, so we will give them to you, and hopefully you will comprehend. If not now, then when necessary maybe... Fact number one: All there is is lessons. Fact two: this is one big school. Fact three: Timing as you perceive it, is never, NEVER definite. Fact four: What is to happen, as you state it, is a ways off, and will not occur until you have reached that point on the learning cycle, and you are not close yet. Now ponder before more facts are given!!

**Q:** (L) Okay, this being one infinite school, and we all seem to be wandering around in the darkness...

**A:** Fact five: The learning cycle is variable, and progress along it is determined by events and circumstances as they unfold.

**Q:** (L) So, the events and circumstances of our lives, individually and collectively, can indicate where we are on this learning cycle? And we are asking to have things told to us, or revealed to us about things which are, in themselves, the necessary lessons? And it would be virtually useless to be told about them since they must be experienced?

**A:** Partly correct. If you want hints, then hints shall we give. But, if you are looking for a “road map?,” forgetitski!!

**Q:** (L) Okay, we want some hints. And [the physicist] Ark wants some hints, too! He wants to know if we can invent a tool that enhances free will?

**A:** No tool is needed because of facts 3, 4, and 5.

**Q:** (L) Ummm... So, when a person is being hypnotized and controlled from outside, because that is the matter of concern we were discussing earlier, they are hypnotized and controlled until they learn to stop it?

**A:** Yes.

**Q:** (L) So, using the analogy of the pig sty, they just have to wallow in it and suffer until they have had enough?

**A:** Using your analogy of the bicycle: Is there a tool which makes it unnecessary for the child to learn how to ride the bicycle in order to know how to ride it?!?

**Q:** (MM) Don't you get more free will by assimilating knowledge?

**A:** Yes!! Yes!!

**Q:** (L) So, in other words, knowledge and awareness makes you aware that you have free will, and also makes you aware of what actions actually ARE acts of free will, and therefore, when you know or suspect the difference between the lies and deception and truth, then you are in a position to be in control of your life?

**A:** Yes.

**Q:** (L) Ark also wants to ask... well, his problem is faith, as he said it to me.

**A:** Faith comes also from knowledge, and as we have stated before... False knowledge is worse than no knowledge at all!!!!

**Q:** (L) So, it is important to take each and every thing that is being learned or analyzed, and take it completely apart and dig in every direction around it, and even in related directions, to FULLY ascertain that it is true? As C.S. Lewis said, knowledge is like a rope... as long as you are using it to tie up a box, it doesn't matter whether it is perfect or not, but if you have to use it to hang over a precipice, then it behooves you to make absolutely certain that it is strong enough to support your weight.

**A:** Yes.

**Q:** (L) Okay, Ark asks about this: "In 1979, Project Phoenix, with the assistance of the Grays, was successful in producing a mind amplifier." Is this true?

**A:** Nope!

**Q:** (L) Okay! That was pretty precise! Next: "Is it possible that, under drug influence, psychics, or those with mental capabilities above the norm, can be hooked up to some type of machine and are enabled thereby to create some type of physical form?"

**A:** Possible. Now review: The "Greys" are cyber-genetic probes of the "Lizard" beings, so just exactly who is doing the assisting? And who is behind the Lizard types?? Could it be your ancestors, perhaps!?!

**Q:** (L) It says here [reads text]: "The fire within man that is characterized as passion is the secret that can be utilized. The secret to all things is passion. With passion all things are possible. The amplification experiments of the Phoenix Project have been explained as having amplified brain waves. In fact, it amplified the passion of the subject. It was that 'inner will' of the subject that was amplified, that inner spirit within all of us is that driving

force is manifested as electrical energy. Master that force and you cannot be controlled, the universe is yours. Master the inner spirit and you shall master the physical.” Comments please.

**A:** First things first: Who is doing the assisting? And how is the assisting being done?!!!!!!???

**Q:** (L) Well, they say that the Grays are assisting the Consortium, this is the Hopi material... Who is doing the assisting? Hmmmm... give me a clue... I think that the Nordic aliens are controlling the Lizards, who created the Grays, which are probes of the Lizards, and are purportedly assisting the Consortium...

**A:** Assisting? Or maybe influencing?!? And if so, how so?!? And, is not this the whole point? Are you not ultimately influenced always?!? In EVERYTHING you do? We have stated thus numerous times... So, please let us not get off the track, okay?

**Q:** (L) In other words, as long as we are in the pigsty, we are in the pigsty, and until we get OUT of it, we are IN it?

**A:** Until you reach that point on the learning cycle.

**Q:** (MM) What is this chemical they use with these psychics, per se, is it the ‘akashic chemical?’

**A:** That information you refer to is false in its entirety!

**Q:** (L) So, does that mean that the whole thing is false?

**A:** “Passion” does not set one “free,” quite the opposite!

**Q:** (L) But what if your passion is for knowledge?

**A:** That is not passion, it is soul questing.

**Q:** (L) What is it that gives some people this drive, this steamroller effect that they are determined to get to the absolute bottom of

everything and strip away every lie until there is nothing left but the naked truth? What is the source of this desire?

**A:** Wrong concept. It is simply that one is at that point on the learning cycle. At that point, no drive is needed.

**Q:** (L) So, you more or less are there because some critical mass has been reached that ‘jumps’ you to the point where seeking truth is simply who you are? It defines the parameters of your being.

(MM) Are these learning cycles similar to the layers... all over the earth, remember the red dust all over the earth?

**A:** No.

**Q:** (L) Is it more like a 360 degree circle, and each person is at a different point on the circle, and the whole thing cycles, and you never change relative to the people behind and in front of you, and the only real thing you can do to help anyone is to move the circle by moving yourself, thereby pushing the one ahead of you up, and pulling the one behind you into your previous place? And where you are on the cycle determines what you do?

**A:** It is a single cycle, yes. There is only one learning cycle, and where you are upon it, determines your EXPERIENCES, and vice versa.

[Notice that they did not negate my concept above that the only way to move was to help the person ahead of you and behind you.]

**Q:** (L) Is there ever any point where lines connect from one point on the cycle so that you can ‘jump’ from one point to another? Like a wormhole in space or something?

**A:** Refer to facts 1 and 2 and 3.

**Q:** (L) So, no short cuts?

**A:** Now, refer to 3,4 and 5.

**Q:** (L) So, certain events and circumstances could help a person to make 'leaps?'

**A:** No "leap," acceleration.

**Q:** (L) One thing, previously when we were talking about unstable gravity waves, and I asked what caused them to become unstable, you said 'utilization,' and that STO was dispersion, and STS was 'collection' of gravity. I have made a few conjectures about this and would like to ask, does this mean that in giving to others, even if what you are giving is a withholding of assistance because you know that assistance would only prolong the lesson, is dispersing gravity, and exerting mental or other control over others, even if one is unaware that they are attaching energy drains to another, is collecting gravity?

**A:** Close.

**Q:** (L) So, when you collect gravity, you become like a black hole, you cave in on yourself?

**A:** Ultimately.

**Q:** (L) And it seems to me that one of the objects of what we are doing is releasing the gravity collected in ourselves?

**A:** If that is your choice, or if that is your path.

**Q:** (L) Is choice as intimately connected with the path as I am understanding it? Is it just simply part of how you are configured in your soul essence?

**A:** Close.

**Q:** (L) And there are people for whom STS is simply their choice. It is their path.

**A:** Close.

**Q:** (L) So, it is a judgment and a disservice to try to convert someone to your path, even if you perceive the end result of the path they are on, that it leads to dissolution? It is still their path?

**A:** Yes.

**Q:** (L) And, if you send 'buckets of love and light' to such a one, and that is their path, you are violating their free will?

**A:** You might as well send "buckets" of vomit as that is how they will react.

**Q:** (MM) Why send anything? Just be neutral?

**A:** Judgment is STS.

**Q:** (L) You told us before that stars and planets are portals, or openings into other densities. Is it possible that this oncoming wave, this Realm Border Crossing will be accessed through these types of portals, that it is not something that is actually in our 'space,' but that it would emanate through stars and planets? Am I onto something here?

**A:** You may be starting down a long path.

**Q:** (L) So, it is complex. When I was re-reading Noah...

**A:** Just remember: All prophecies attached to calendar dates are useless unless you wish to be sucked up by the 4th density STS forces!

**Q:** (L) Speaking of being sucked up by 4th density STS forces, MM was told by her local Hindu gathering that she was vacuuming up

their energies. What kind of an interaction was this? Why were they so uncomfortable?

**A:** Because they wished to be worshipped.

**Q:** (L) They wished to suck her energy, because being worshipped is the equivalent of sucking energy?

**A:** Close.

**Q:** (L) Now, I am curious about the doggie image that was on the aura photo that MM took?

**A:** In these times, 2nd density creatures will collect more and more attachments.

**Q:** (L) Are these attachments like other entities?

**A:** Yes, and others.

**Q:** (L) When they are collecting these attachments, are they collecting them from us, as in protecting?

**A:** No.

**Q:** (L) Are they being used to collect attachments to be detrimental to us?

**A:** Yes.

**Q:** (L) You mean we are gonna have to do depossessions on our dogs, too? (V) Holy Toledo!

**A:** That won't work.

**Q:** (L) Why are our animals picking up attachments?

**A:** Because of vibrational frequency intensifications.

**Q:** (L) Is there something we could do? I mean, are we supposed to get rid of pets?

**A:** We would never suggest something as harsh as this. However, beware: 3rd density STS orientation includes the thought of “dominion” over 2nd density, and this is merely a continuation of the energy buildups of the approach of the wave... Some of the lessons are interesting indeed. When you assume that capture and imprisonment of those of lesser capacity than you is for “the good,” why should not you expect those of greater capacity than you to assume the same regarding you?!?

**Q:** (MM) Well, I want to know what is the deal with this portal in my house?

**A:** Before we discuss that, we would like you to ponder further the previously given responses. We suspect there is much to be gained from insights lurking there. Now: Portals... ionic column... hmmm...

**Q:** (V) Are portals archetypal?

**A:** Are they? Hmmm....

**Q:** (MM) So, my column is an ionic column? (L) I don't think that is exactly what they mean. I think that they are saying that an ionic column represents a portal into the next density. It is an archetype.

**A:** Third density facsimile.

**Q:** (V) So, this is how we choose to see it with our eyes? (L) I think they mean that it is a representation, that it follows in its form the 4th density form, only it is material here.

**A:** And 5th density, etc...

**Q:** (L) Okay, MM's portal. She has been experimenting with it, with this trans-density transceiver..

**A:** No, she does not have a trans-density transceiver, she has a

portal presence.

**Q:** (L) What is the function of a portal presence?

**A:** Function is not the correct concept.

**Q:** What is it?

**A:** The presence of a portal.

**Q:** (L) Is this portal that is present related to any person in her house, or related to the area.

**A:** It is.

**Q:** (L) Which.

**A:** It just is.

**Q:** (L) Was it there before she moved there?

**A:** That is not important.

**Q:** (L) What is important?

**A:** Ask yourself that. Awareness.

**Q:** (L) On the one hand you could think it is a good thing and be wrong, and on the other hand you could think it is a bad thing, and miss a good thing?

**A:** Learning is fun.

**Q:** (MM) I'm getting ready to work with it in meditation. But, I have been working with it and finding out more about it, and I was just wondering....

**A:** Hey lady, don't you get it yet?

**Q:** (V) Who is 'hey lady?' It must be me...

**A:** No.

**Q:** (V) That is very odd? (MM) I was wondering if it goes to other densities?

**A:** Yes, but so what? This does too.

**Q:** (L) Why was this portal represented by a completely different figure?

**A:** None.

**Q:** (L) Is she supposed to channel through this portal?

**A:** The portal is not “importalent!”

**Q:** (L) I guess that implies intent... The portal is not important, what is important is what is going on inside you. And only you can know that.

**A:** On that note, Good Night.

END OF SESSION

The Cs did not seem very happy with MM and her “portal.”

## **4.26 July 21, 1996**

Frank, Laura, Terry, Jan

I had been keeping Terry and Jan informed about the sessions and other developments and after Ark’s arrival on the virtual scene, their interest was revived to a certain extent. (They had also indicated that their channeling experiment with Andrew B was going nowhere.) However, they (and Frank) spent something like 6 hours repeating to me that Ark must be an agent and I had to be very careful. I appreciated their concern and decided that maybe we ought to ask a few questions along that line. However, the Cs were having none of that! It was almost comical

that I was trying to get a hint and they were determined to give nothing at all on this topic. As later events proved, it's obvious in retrospect why: some things are predestined events and must be entered into and managed entirely on one's own. Also, there was the fact that they had been giving me clues all along but because I had been so depressed, I had not kept up with transcribing the sessions and could not review them so as to see those hints. Obviously, the "fatal mistake" referenced below would have been to listen to Terry, Jan and Frank in respect of Ark.

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us tonight?

**A:** Vimom.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) Is there any sinister intent toward me by AJ? His thoughts toward me?

**A:** Too many, fragmented.

**Q:** (L) His thoughts?

**A:** No. Your questions.

**Q:** (L) Okay, more specific: I am having a dialogue with a man who contacted me via the internet.

**A:** Yes.

**Q:** (L) And it seems that there are a lot of synchronous events happening in conjunction with this.

**A:** Maybe.

**Q:** (L) Is it possible that some of these seemingly synchronous events are being created to deceive me?

**A:** Sure it is possible!

**Q:** (L) What does AJ feel toward me.

**A:** “Feel” is not the point!

**Q:** (L) What is the point? What are his intentions?

**A:** Multiple.

**Q:** (L) Could you tell me at least two primary ones?

**A:** No we will not.

**Q:** (L) Can you give me any of them?

**A:** How do you learn?

**Q:** (L) I know. But, I am also somewhat fragile and don't want to dive into the soup!

**A:** By using the powers existent within your mind, which are unlimited, as we have told you.

**Q:** (L) I know you are not going to give me a roadmap, but you can give me a hint! What are the extent of the hints you can give me about this?

**A:** One and only hint: always transcribe and review material from the sessions if you wish to learn properly, and avoid possibly fatal mistakes!!!

**Q:** (L) So, that is the one and only hint. I will start back on the transcribing.

**A:** Little by little makes a seemingly daunting task seem effortless. Learning is enhanced by timeless, enhanced pondering.

**Q:** (L) How do you enhance pondering?

**A:** With patience... You see, Laura, it is better to be the tortoise than the hare!

**Q:** (L) Why did my air conditioner break down today when I was talking about the heat to AJ?

**A:** Maybe it is time to enhance your pondering. Drastic measures are only necessary when one's stubbornness places one upon the precipice!

**Q:** (L) Well, if you guys did that, I hope you thought of the fact that there won't be any sessions until it gets fixed!

**A:** Do we need sessions?!?

**Q:** (L) No, you don't, but don't we?

**A:** What good are they when the messages are lost?

**Q:** (J) What is the significance of Terry's and my presence here tonight? Is it significant?

**A:** Yes! And road maps available at the Mobil station.

**Q:** (L) Well, we're glad to see you too!

**A:** Thank you! And likewise.

**Q:** (J) Well, how about a hint?

**A:** Answers are known. Doubt is sometimes relieved by pause.

**Q:** (J) Well, I think we ought to take a hiatus and get all the sessions transcribed.

**A:** Do it step by step. Do not attempt a marathon here. "Time" is not of the essence!

**Q:** (L) Well, then I will just do them as I go along, is that what you mean?

**A:** Partially. You need review, study, contemplation.

**Q:** (L) What I need is a vacation and less stress!

**A:** We would say that too! There are untold treasure troves locked up in those transcripts. You will be “blown away” by that which you have forgotten!!

**Q:** (L) Well, then we have a plan! Carry on!

**A:** Okay, folks, good night!

END OF SESSION

## **4.27 July 27, 1996**

Frank, Laura

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Wonikha.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) I am worried about my daughter. Is she alright? [She was out later than usual and hadn't called. I was a nervous wreck.]

**A:** Yes.

**Q:** (L) Will she be home soon?

**A:** Open.

**Q:** (L) Well, I worry about her lately.

**A:** She must experience that which she must experience.

**Q:** (L) That's true for everyone, even children.

**A:** Sort of.

**Q:** (L) I have been going crazy wondering about AJ. Can I please ask some questions?

**A:** You may ask whatever you wish.

**Q:** (L) Well, one day it is one way, and I think I know what is happening, and the next day it is like something grips him and the whole mood changes. Can you tell me what is going on?

**A:** Why?

**Q:** (L) What is it that I said that caused him to be so cool to me?

**A:** Are you learning?

**Q:** (L) Probably. I think I am. But what is in his mind? What have I said or done?

**A:** Not important.

**Q:** (L) What is important here? Is it important at all?

**A:** Wait and see.

**Q:** (L) Is there anything I can ask? What is going on with me? I am an emotional wreck... Is the past life connection that I perceive part of this?

**A:** Do you learn when we lead you by the hand? You have all the necessary tools to discover this.

**Q:** (L) Well, I thought YOU were one of those tools! That you are here to help us...

**A:** But not by giving the answers to “Level One” questions.

**Q:** (L) Just one thing I would like to know is, what is the source of this emotional energy that is practically tearing me apart? Is it coming from outside or inside me?

**A:** The one thing we would like to know is: how much transcribing have you been doing?

**Q:** (L) I have been going through the notebooks and reading, I have been sorting things... I am getting ready to start typing...

**A:** The “answers” are there.

**Q:** (L) Well, one thing I came across was a mention almost two years again that something would happen, and one would have instant recognition, but the others may doubt. For me, it was instant recognition. But, recognition, by definition, is to know someone again. So, I think maybe that you were using the term recognition because you were talking about a person and not an event, necessarily.

**A:** And learning helps you in immeasurable ways.

**Q:** (L) One last question, if there is a question that I could ask, to which I could receive a clue, consider it asked... I am baffled!

**A:** Baffled yes, but buffeted, no.

**Q:** (L) So, I am not being buffeted by something outside, I am being baffled from inside.

**A:** Yes.

**Q:** (L) Is AJ taking energy from me in some way? [This was what Frank had suggested.]

A: Open.

Q: (L) Is that all you can give me?

A: Maybe.

Q: (L) What are his thoughts and intentions toward me?

A: No.

Q: (L) Well, you have answered this kind of question before! You have told me about so many other people! How come you won't answer me about him?

A: It is not appropriate.

Q: (L) Why is it not appropriate? I am just trying to understand! I am in such a whirlwind inside... pleeeeeeease....

A: Wait and see.

Q: (L) Does that mean good or bad?

A: It means what is Anna doing with those keys?

Q: (L) What are you talking about? Anna doesn't have any keys!? I am exhausted, and you are being too obscure. Is there some clue as to how to conduct myself. Is he in any danger by talking about coming here?

A: No more than usual.

Q: (L) He believes that we can do things, that they can be done, that we can have a positive effect [for humanity].

A: Then focus on that!

Q: (L) Well, how did we get sidetracked on this other thing? Is that a form of attack?

A: Maybe.

**Q:** (L) Well, I don't want to put him in any danger.

**A:** There are ways.

**Q:** (L) Is there anything we can do with this gravity wave business? He is also very interested in this.

**A:** Then work on that with him!! Review the transcripts and that which has not yet transcribed.

**Q:** (L) Okay. I will start.

**A:** But slowly.

**Q:** (L) Okay, slowly but surely. And I am tired. So, good night and sorry this was such a short visit.

**A:** Short but sweet. Good night.

END OF SESSION

Note: The odd question "what is Anna doing with those keys" made no sense to me at the time but that was because I didn't know that Ark's soon to be ex-wife was named Anna. I thought that the remark was about my daughter of the same name. However, it seems that the following remarks may have relevance since "keys" are what is needed to open locks and it seems to be suggested that Ark was the key or set of keys:

24 Feb 96

**Q:** (L) Well, what can she do to maximize the STO presence and minimize the STS use of the conduit?

**A:** Oh Laura, my dear, seems you need a refresher course in the transcripts. Maybe suggest you read them and relax and privately listen to the ones you have not as of yet transcribed a little more. This would be extremely helpful in your many and increasing communications via the "net" as well. Remember, we

help you to unlock answers that have been placed in your super-consciousness files from before the “time” of the birth of your physical body. Also, false information is worse than no information at all.

Note in the above the reference to communications via the net in relation to “unlocking”; I met Ark via my communications on the internet.

24 April 96

**Q:** (L) Does that mean that there IS some other thing that we are involved in, in some other aspects of our selves, that we are not aware of?

**A:** Close.

**Q:** (L) Is this something that happens in altered states or in sleep states?

**A:** Not happens, happened.

**Q:** (L) Something that happened in the past?

**A:** Laura, you need to consult a powerful, practiced, effective hypnotherapist to unlock these questions for you. ...

**Q:** (L) And you are telling us that we have locks on knowledge installed in us, installed by supremely powerful STS consortium. Can we not, in our conscious state, reject this programming, and ask you to inform us of this information?

**A:** Not possible!

**Q:** (L) What is not possible?

**A:** What you just asked.

**Q:** (L) You mean we can't change our minds, or you can't inform us?

**A:** Incorrect analysis.

**Q:** (L) Give me the correct analysis.

**A:** You cannot unlock, and we cannot tell you details of what, or why.

**Q:** (L) Why can you not tell us?

**A:** Free will violation, and endangerment of you if done thusly.

**Q:** (L) Is there some way to do it that does not endanger us?

**A:** We have told you.

**Q:** (L) Is it a danger to us to NOT unlock these things?

**A:** In a sense.

4 May 96

**A:** First, some blockbuster stuff for the Knighted ones... Look upon a detailed map, and reflect, remember lonely journeys from long ago, and begin to unlock shattering mysteries which will lead to revelations opening the door to the greatest learning burst yet!!

15 June 96

**A:** Unstable gravity waves unlock as yet unknown secrets of quantum physics to make the picture crystal clear. ...

**Q:** (L) Now, did the fellow who built the Coral Castle spin in his airplane seat while thinking his manipulations into place?

**A:** No. He spun when gravity chose to manipulate him to spin in order to manipulate gravity.

22 June 96

**Q:** (L) Is there any point on the body that CAN be used to assist in opening the gate to the subconscious?

**A:** No such assistance is needed. First, we would like to suggest that you seek a “spin” doctor for your quest!!

**Q:** (L) Would a “spin” doctor be a Sufi master?

**A:** One example.

**Q:** (L) Yes. We are supposed to do several things involved with spinning.

**A:** Hilliard. Leedskallen. Coral Castle.

**Q:** (L) Well, they are really pushing on this gravity thing.

31 August 1996

**Q:** [Frank complains because Laura keeps taking her hand off the planchette and resting it in her lap because of recent pain issues.] (L) Well, I’m in pain, Frank, it’s hard for me to sit here at all! Appreciate the fact that I’m in pain.

**A:** Appreciate the fact that you have been given the keys to end all this pain.

**Q:** (L) When you say, ‘end all this pain,’ it sounds a little more inclusive than just my shoulder hurting! I mean, that sounds rather suggestive.

**A:** Yes.

## 4.28 August 3, 1996

Frank, Laura, Terry, Jan

{On July 5th, 1996, I received my first email from Ark. Considering the number of agents we had experienced in the two years since the Cs had begun communicating, I was being cautious.}

**Q:** (T) I think we ought to take a road trip. (L) Where to? (T) Down to Homestead, the Coral Castle. (L) Yes, I want to do that too. Okay, Hello!

**A:** Hello.

**Q:** What name will we use tonight?

**A:** Jopoye.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) Before I give up the floor to everyone else, I would like to know if you have any comment about AJ? My experience here is so strange, and I don't want to be caught in a trap...

**A:** New.

**Q:** (L) New what? What does that mean?

**A:** What it is.

**Q:** (T) New as in "renewed?"

**A:** Yes.

**Q:** (L) Beginning?

**A:** See how one simple word causes you to use your minds?

**Q:** (T) Yes.

**A:** And if we had given you a long and eloquent response, as you desired, you would not have!

**Q:** (L) Any more words on this subject?

A: No, thank you!

Q: (L) Let me just ask this ONE LITTLE THING... I am trying so hard to restrain myself - like the tortoise - but sometimes I am overwhelmed. Can you advise me on my conduct? It is such a struggle...

A: Discover.

Q: (L) AJ used some of the material in a lecture today, given in Germany. Were you aware of this?

A: Aware, yes.

Q: (L) I wonder if he is one of the less than 100 “aware ones” on the planet that you have told us about?

A: You have just said too much for us to answer.

Q: (L) Because it would violate free will?

A: Or because it was “mishmash.”

Q: (L) Okay. No more questions for me! They aren’t going to tell me anything anyway! That is clear!

A: Oh yeah?

Q: (L) So, what are you going to tell me?

A: Discover!

Q: (T) Okay, word association. What words will get the answers we are looking for?

A: Sensible questions.

Q: (L) Well, you ask the questions, T. (T) I am often at a loss as to what to ask. I am never sure whether I am asking dumb questions or smart questions.

**A:** We will let you know.

**Q:** (T) I want to ask a personal question to start with. As you know, we have been proceeding in our campaign against the construction of a cellular tower across the street from us. We are feeling good about it. Shall we continue with what we are doing, in the way we are doing it? I don't know exactly how to ask this so you won't answer "discover, open, up to you, or whatever." (L) All of the above, Terry. You just answered your own question!

**A:** What you are doing is what you must do, or you would not be doing it!

**Q:** (T) Well, we are having fun, and it is helping our neighbors.

**A:** Instincts guide one to lessons.

**Q:** (L) This is kind of an off-the-wall question that just popped into my head. Did we ever ask anything about Hale-Bopp?

**A:** Yes.

**Q:** (L) Is Hale-Bopp going to turn planet Earth into a super-conductor?

**A:** No.

**Q:** (L) Is Hale-Bopp the herald of the transition into 4th density?

**A:** No.

**Q:** (L) Is Hale-Bopp going to do anything other than pass by with a nice night-time show?

**A:** No.

**Q:** (T) Is all the brouhaha over Hale-Bopp a smoke screen?

**A:** No.

**Q:** (L) Well, what is it then?

**A:** Hale-Bopp: Flopp!

**Q:** (T) Oh! The Kahoutek of the nineties! (J) The cosmic OJ Simpson trial! Something to keep us busy...

**A:** Since you have broached the subject: are you familiar with the “twin sun” theory?

**Q:** (L) No. What is it? (T) Referring to our sun and the possibility of Jupiter being a sun in the making?

**A:** No.

**Q:** (T) Okay, what is the twin sun theory?

**A:** Theory that the sun is really a double star.

**Q:** (L) Well, if it is a double star, how come we don’t see the other one? Where is the other one and why don’t we see it? (T) I don’t think I have ever heard of that, have you? (F) It seems vaguely familiar for some reason. (L) Is this factual, correct?

**A:** Wait a moment...

**Q:** (T) They are bringing in their twin sun expert... (L) No doubt! {planchette spins numerous times.}

**A:** Now, where were we?

**Q:** (L) We were talking about the twin sun phenomenon...

**A:** Theory.

**Q:** (T) Which is that sol is one part of a twin system?

**A:** Yes.

**Q:** (L) Is this theory correct?

**A:** Not yet, you are “jumping the gun.”

**Q:** (T) Okay. You brought this up. You indicated that, yes, our sun is one part of a dual system...

**A:** Yes...

**Q:** (T) ...and that there is another star, another sun here...

**A:** Yes...

**Q:** (L) Can we see it? (T) Can we see it at this point in time?

**A:** Can you?

**Q:** (L) No. Not that I am aware of. Is the reason we cannot see it because it is always on the other side of the sun from us? That it orbits in such a way that we can never see it?

**A:** Orbits, yes, assuming it is there, however, we did not confirm that, now did we?

**Q:** (L) No, you didn't, but you DID bring it up! (T) Let's go back to the beginning. Okay, you brought up the twin sun theory and then indicated that our sun is one of two suns in this solar system...

**A:** Maybe.

**Q:** (T) The sun that we designate as sol is one member...

**A:** Maybe.

**Q:** (T) Is Sol two stars combined?

**A:** No. What is "dark" matter, and what are dark stars?

**Q:** (L) Are dark stars something like black holes?

**A:** No.

**Q:** (L) Are they... (T) I think it would be a star that has collapsed upon itself and the gravitational field of the star no longer allows

light to escape.

**A:** No.

**Q:** (T) Okay, that is a black hole.

**A:** Yes.

**Q:** (T) Dark matter, that I have read about, is what the astronomical community calls all the loose stuff floating around out in the cosmos that must exist because of the equations, but they can't see it.

**A:** Yes.

**Q:** (T) Would dark stars be part of this?

**A:** Yes.

**Q:** (T) So there is dark matter and dark stars?

**A:** Yes.

**Q:** (T) The dark matter they cannot see because it is dark.

**A:** Yes. How about "Brown stars?"

**Q:** (T) Okay, Brown stars I have heard of. There is yellow, red, blue, green... Okay, our star burns as a yellow star because of the matter it is composed of - hydrogen, etc.

**A:** Close.

**Q:** (T) Other stars burn different colors in the visible spectrum because of the make-up of the star...

**A:** Yes, but not "brown" ones.

**Q:** (T) Brown ones are not brown because of the make-up...

**A:** Okay, you have white, red, yellow, and blue...

**Q:** (L) Do those colors represent temperature?

**A:** Partially, but that is not the point!

**Q:** (L) Is Hale-Bopp a brown star?

**A:** No.

**Q:** (T) No. Hale-Bopp has nothing to do with this discussion. Hale-Bopp is just another flop. Okay, Brown stars. The colors we see are part temperature and part material... (L) How about the spectral shift which determines direction?
