**A:** Yes, but that is not the point!

**Q:** (L) What is the point of a brown star? Black body...

**A:** No, silly! Try the most obviously apparent.

**Q:** (L) Well, is it one that just hasn't started cooking yet?

**A:** Opposite.

**Q:** (L) Okay, it has burned so long it is about to run out of gas?

**A:** Yes.

**Q:** (T) It is running out of matter that gives it color?

**A:** Why did we put "brown" in quotes?

**Q:** (L) Because a brown star is assumed to be one that is burning out, but is the opposite?

**A:** No.

**Q:** (L) Because... I don't know.

**A:** How easy is it to see brown against a black background?

**Q:** (T) Not easy at all! That is why they can't see the dark matter...

**A:** That is why scientists dubbed it "brown."

**Q:** (L) How does brown star connect to twin sun theory?

**A:** Guess!

**Q:** (T) Okay. Let's talk about this. For some reason we have to work through this to maintain free will. (L) Is this star small enough that it is orbiting with the planets?

**A:** No, we are leading you to something, if you will be patient.

**Q:** (L) Okay, lead on... we want to know about this. (T) They just asked if we understood what a brown star was.

**A:** Do you?

**Q:** (L) What is the significance of the brown star?

**A:** Dark star.

**Q:** (L) It is a dark star... okay...

**A:** If it is there.

**Q:** (L) Well, will you put me out of my misery and tell me? (T) Wait, a dark star is dark because it doesn't give off light. It is still a star, and acts like a star...

**A:** Yes. And if it has an elliptical orbit... would it, maybe, like, "come and go?"

**Q:** (T) What science, astronomy, has described as double stars, are two stars that are close together with some sort of interactive orbit. But that is not necessarily the only way two stars can exist.

**A:** Close. As you perceive from your vantage point. But how would you like to embark on a bicycle trip between them?

**Q:** (L) So the ones that we are aware of and see can be so far apart that there can be a lot between... (T) So our astronomers have not recognized this possibility?

**A:** Yes they have.

**Q:** (T) They know, but don't talk about it. So, we may have, in this theory, a dark star orbiting...

**A:** And what would happen if you did?

**Q:** (L) Well...

**A:** And it, like, comes and goes?

**Q:** (T) Like every 3600 years?

**A:** Maybe.

**Q:** (T) And maybe this dark star also has some planets orbiting it?

**A:** Ok, change of direction: Oort cloud and comet cluster and sun twin occasionally passing through the former like a bowling ball through pins.

**Q:** (L) How does the dark star passing through the Oort cloud relate to the comet cluster?

**A:** Cause and effect.

**Q:** (L) So, the comet cluster is caused by the dark star smashing through the Oort cloud? (T) Well, not necessarily smashing, but passing close enough for its gravity to change things... (L) But they said "like a bowling ball through pins." (T) The gravity of that star would cause the comets to be flung in all directions. (J) Is the earth like a pin? A bowling pin? (L) No, that's the Oort Cloud.

**A:** Explain what the Oort Cloud is, Laura.

**Q:** (L) Does everybody know what the Oort Cloud is? (J) I don't. {explanation of Oort cloud.} Okay, so we are looking at something...

**A:** Now, think of how your Biblical prophecies speak of a very terrifying period, followed by an apparent renewal of normalcy, followed by the “End.”

**Q:** (T) We learned about a “comet cluster” very early on. Now you are going beyond that and giving us a reason as to why this comet cluster...

**A:** Laura, please clarify exactly what the prophecies say.

**Q:** (L) Well, actually, “The Noah Syndrome” is primarily prophetic exegesis with a little science thrown in to help clarify why such occurrences must be along a “natural” order. [Discussion of primary passages in “Noah.”] In the prophecies it is said: “If those days were not shortened, would no flesh be saved. But, for the elects’ sake, will those days be shortened.” Now, can you tell me what this means?

**A:** Not yet.

**Q:** (T) Where are we? We have a dark star flinging comets like bowling pins...

**A:** Your Biblical prophecies speak of a period of terror and chaos followed by calm, and then, unexpectedly, amidst seeming overwhelming peace and renewal and prosperity, the end.

**Q:** (L) Okay, elucidate, please.

**A:** No, you elucidate, please!

**Q:** (L) Okay, I would say that this “end” is the passing through the “realm border,” the “wave.”

**A:** Yes, but don’t you know of the prophecies we are referencing?

**Q:** (L) Are you talking about the Epistle of Peter where it says the heavens will end with a thunderous crash and the earth will burn up with fire?

**A:** No.

**Q:** (L) Thank God! Are you talking about the book of Daniel where a number is given regarding the time period between the one event and the other?

**A:** Close.

**Q:** (L) Okay. I know where to go to find it and study it. So, we are talking about the number 6.3, as in years?

**A:** Yes, but that is not correct.

**Q:** (T) The number of years is not correct. (L) Okay, is it possible, since you have brought this up on other occasions, through technology, to either skip this event by creating a means of travel to the next realm, or to create a parallel universe...

**A:** No.

**Q:** (L) Well one thing we can establish...

**A:** What would happen if the brown star that is the sun's twin were to get close enough to be illuminated by the sun?

**Q:** (T) Well, if it were close enough to be illuminated, the obvious result is that it would be SEEN. People would panic...

**A:** Yes.

**Q:** (T) Governments would fall...

**A:** And terror and chaos. And when it departs again?

**Q:** (L) Everything will seem to be fine! But, they won't realize that the Oort cloud has been hit! Oh, sugar!

**A:** And then what?

**Q:** (L) It is not the Oort cloud or the comets that is going to cause all this terror and carrying on, it is going to be the seeing of the

illuminated brown star, which will go away, and then no one will see what is coming! And this IS talked about in both the Bible and Nostradamus - but it was incomprehensible before! Okay, how long will it take the comets to get from the Oort cloud to here?

**A:** Let us just say that the cluster travels much faster than the usual cometary itinerary.

**Q:** (T) And this is because they are traveling in the wake of a large sun sized gravity well...

**A:** And we have spoken of the comet cluster before, and we have told you that this time, it rides the Wave.

**Q:** (L) Is the wave the energy from this brown star?

**A:** No.

**Q:** (L) The Wave is the Wave. (T) So, the dark star is going to come through the Oort cloud, and it doesn't have to get too close. Any star that gets that close is TOO close. Its gravity will propel these comets in our direction. And, on top of that, they are being propelled by the Wave from behind, so they are being both pulled and pushed.

**A:** No.

**Q:** (L) Are they being "kicked" and then they get on the wave that is already on the move?

**A:** Yes. This time. You have had the comet cluster before in antiquity, but the wave was last here aeons ago.

**Q:** (L) Is this wave a gravity wave?

**A:** Interrelated.

**Q:** (L) Okay, now... (T) Well, the wave is a form of energy. (L) Yes, they once told us that it was "hyper-kinetic sensate."

**A:** Realm border, this is your quantum factor, Laura, so plug it into “Noah” accordingly, and check out the results.

**Q:** (L) Does this brown or dark star have planetary bodies of its own, other than sharing planets with Sol?

**A:** No.

**Q:** (T) Okay. No correlation to Sitchin and his “planet Nibiru.” (L) If the wave is the quantum factor for the transition of the Solar System, what is the factor for the transition of an atom?

**A:** Electrons emit what?

**Q:** (L) Photons... (T) An electrical charge of some kind. (L) I thought that an electron didn’t have any parts... that it is an elementary particle...

**A:** Right...

**Q:** (L) What the heck does an electron emit? (T) An EM field?

**A:** What did we say about gravity? What did we say?!?

**Q:** (T) What was it? (L) That gravity collects... (T) What you were reading earlier...

**A:** Read it.

**Q:** [Reads segment from previous session about gravity.] (L) Is gravity emitted by an electron?

**A:** Yes.

**Q:** (L) What...

**A:** Electromagnetically.

**Q:** (L) What is it that causes a quantum transition? A collecting and dispersing of gravity. What is it about an atom that causes it to collect or disperse?

**A:** How does the electron fit into the equation of the “atom?”

**Q:** (L) Well, it orbits the nucleus... (T) Planets orbit the Sun. (L) The energy that an electron collects, or any other part of an atom collects, that causes a quantum transition, comes to it from outside of it? A wave?

**A:** How many electrons orbit the nucleus?

**Q:** (L) It depends on the atom. The number of electrons determine what an atom is an atom of... the number of particles it has orbiting...

**A:** Yes.

**Q:** (T) And they orbit in specific shells...

**A:** Yes... And how does the sun relate to this macro-dynamically?

**Q:** (L) Okay, something from the nucleus of the atom acts upon the electrons to cause a transition?

**A:** How many electrons orbit the nucleus?

**Q:** (L) Of the sun? Are you asking how many electrons orbit the nucleus of the Sun? Different atoms have different numbers...

**A:** Of any atom?

**Q:** (L) Okay, it varies.

**A:** From what to what?

**Q:** (L) From one to somewhere in the nineties or hundreds...

**A:** And what determines the number?

**Q:** (L) Well, that is a damn good question! (T) What makes one atom helium and one atom oxygen? How do they know how to become what they are?

**A:** No.

**Q:** (T) Well, what determines the number?

**A:** Is it the composition of the nucleus?

**Q:** (L) Yeah. That's right. We forgot. What causes or determines the number of protons or whatever in the nucleus?

**A:** What composition would cause the orbiting of one electron?

**Q:** (L) One proton?

**A:** Now, think macro-dynamically.

**Q:** (L) Well, you once said that the sun is a window, or transition point to another density. Are you saying that the nucleus of an atom is also a window?

**A:** What we are saying is the sun is a proton and its twin is an electron!

**Q:** (L) Well, I am still trying to get at... the wave causes transitions in the macro-cosmic atom, what causes the microcosmic atom... what causes a quantum jump? What accumulates in an atom that causes it to transition? (T) Is it a case of accumulation, or something being given off?

**A:** Completion of Grand Cycle.

**Q:** (J) It just is. (L) No, no...

**A:** And who says that the Sun's twin appears every 3600 years?

**Q:** (L) Okay, we have the 3600 year comet cluster cycle, the Sun twin is another cycle altogether, and then we have the wave, which is a Grand Cycle. So, we have three things causing a transition in nature?

**A:** Like "biorhythms."

**Q:** (T) And we have a triple bad day coming up! Or a good day, depending on which way you look at it.

**A:** Bad day if you are John D. Rockefeller, good day if you are Mahatma Gandhi.

**Q:** (L) So, does something like a three cycle event also occur in sub-atomic transitions, like the biorhythm?

**A:** Yes.

**Q:** (L) So, there are three factors to be considered... or more than three?

**A:** Either, or.

**Q:** (L) Can it be a random, arbitrary number of events?

**A:** If you wish.

**Q:** (L) Is it partly the observer that adds one of the factors? Consciousness?

**A:** Yes.

**Q:** (T) So, we see three separate cycles coming together here...

**A:** Everything reflects macrodynamically and microdynamically. We suggest you absorb for now; and, fear not! For it is not imminent!

Good Night.

END OF SESSION

## **4.29 August 11, 1996**

Frank, Terry & Jan

**Q:** Hello

**A:** Hoparb

**Q:** And where are you transmitting from tonight?

**A:** Cassiopaea

**Q:** (L) I want to ask a real quick question first, and then just kind of leave everything else open for whatever else can happen. On several occasions with my conversations with Arkadiusz in Poland, and in Germany and in Florence, there have been some real serious computer problems. I would like to know if there is any connection between myself and these electronic failures?

**A:** If we answer this, you will not limit it to one question.

**Q:** (L) Do I have to limit it to one question? (J) You said you would..

**A:** You placed that restriction upon yourself: Its not nice to fool mother nature, or the Cassiopaeans!!

**Q:** (L) All right, well let it go until it runs out. Is there some energy interaction that's causing these electronic failures? Is there an indication of some...

**A:** Yes, and "it just ran out."

**Q:** (L) What just ran out? (T) The question string.

**A:** Yes.

**Q:** (T) You said you'd let it run out, and it just ran out! (J) They're playful tonight! (L) OOOH! So, yes, there's a connection, and that's all I get! (J) Hoisted upon your own petard, as they say! (T) Mirth! Mirth!

**A:** Bingo!

**Q:** (L) Stinkers, stinkers! OK... (T) Shall we run like we did last week, and just let them...

**A:** You would have asked 29 questions about you and “Ark,” and that is a “No-No.”

**Q:** (T) Ah, but would she have asked the 64,000 dollar question in there somewhere?

**A:** Yes!

**Q:** (J) And what would the answer have been!?!? (laughter)

**A:** Open.

**Q:** (L) OK, we’ve been talking earlier this evening about intent, and of course, our own experiences with intent have really been pretty phenomenal. We’ve come to some kind of an idea that intent, when confirmed repeatedly, actually builds force. Is this a correct concept, and is there anything that you can add to it?

**A:** Only until anticipation muddies the picture... tricky one, huh?

**Q:** (L) Is anticipation the act of assuming you know how something is going to happen?

**A:** Follows realization, generally, and unfortunately for you, on 3rd density.

**Q:** (L) Is this a correct assessment of this process?

**A:** Both examples given are correct. You see, once anticipation enters the picture, the intent can no longer be STO.

**Q:** (L) Anticipation is desire for something for self. Is that it?

**A:** Yes.

**Q:** (L) OK, so it’s OK to intend something, or to think in an intentional way, or to hope in an intentional way, for something that

is to serve another, but anticipation defines it as a more personal thing.

**A:** And that brings realization.

**Q:** (L) So, desire to serve others, and to do something because it will help others, brings realization...

**A:** But, realization creates anticipation.

**Q:** (L) Well, how do we navigate this? I mean, this is like walking on a razor's edge. To control your mind to not anticipate, and yet, deal with realization, and yet, still maintain hope... (J) They said it was tricky... (L) This is, this is, um...

**A:** Mental exercises of denial, balanced with pure faith of a non-prejudicial kind.

**Q:** (L) OK, so, in other words, to just accept what is at the moment, appreciate it as it is at the moment, and have faith that the universe and things will happen the way they are supposed to happen, without placing any expectation on how that will be?

**A:** Yes.

**Q:** (L) This is, and I'm not asking about Ark, this is something that he has talked about in terms of shaping the future. He talks about shaping the future as an intentional act of shaping something good, but without defining the moment of measurement. In other words, adding energy to it by intent, but not deciding where, when or how the moment of measurement occurs. When the quantum jump occurs, it occurs on it's own, and in it's own way. Is this the concept he's dealing with here?

**A:** Anticipation.

**Q:** (L) In other words, is what he's talking about anticipation?

**A:** No.

**Q:** (L) Well, what do you mean, anticipation in response to what I said?

**A:** That is the key to shaping the future... Avoiding it.

**Q:** (T) OK, because we're not anticipating in what we're doing...

**A:** Yes.

**Q:** (T) What we're doing is not anticipatory, it's just happening. We were talking about it on the way up, that with interactions with others, we are facilitating, we are creating reality. This is what they all say about reality.

**A:** When it hits you, it stops.

**Q:** (L) When what hits you? (J) The realization. (T) The fact that it's happening.

**A:** Yes unless you cancel out all anticipation.

**Q:** (L) Well, this is very tricky. (J) Well, hang on a second, I have a kind of a corollary question. The way I perceive what has happened with us in the campaign against the microwave towers; the article in the Times, and the editorial, and speaking to the people... The way I view it is that when things like that happen, I look at them, and the synchronicities tell me that I am on the right path. Is that a true statement, that they are an indication that I'm going in the right direction?

**A:** Semi.

**Q:** (T) It's a road sign, an indicator. (J) OK, thank you! That's good, it's an indicator. (L) OK, shaping the future... (J) In what way is it not? The answer was semi; part of it is true...

**A:** We have told you.

**Q:** (L) Well then it seems to me, excuse me in this one, it seems to me that Ark may understand this one better than I do.

**A:** Yes.

**Q:** (L) That's all I wanted to know. (J) So, let him teach you! (T) He'll teach you what you need to learn from him, and you'll teach him what he needs to learn from you! And as a result, you'll both gain!

**A:** Imbalanced upon the former.

**Q:** (L) What was the former? (T) He can teach you more, maybe, than you can teach him? Because he's farther along? Is this correct?

**A:** Close.

**Q:** (L) This guy is, like, out there! (T) This is good! (L) Now, this is a funny little thing, I just want to bring this up. MM called and told me that she had a vision that when Ark arrives, that the Cassiopaeian transmissions will cease, that somehow he is some deep, dark, evil person who will cause everything to just fly apart...

**A:** Baloney!

**Q:** (L) Thank you for that! That was so succinct! That's what I thought myself, but I just thought I'd throw it in there! (J) That's her anticipation! (L) Well, that's what she'd like! (T) Does MM's camera show real Kirlian fields and all that stuff? Is it actually showing the truth?

**A:** Discover.

**Q:** (L) Well, it showed a damn interesting thing when she took a picture of this board! (T) Ah, but is it the truth? (L) Well, they

said it was! (T) They did? (L) They told us, ‘What you are seeing is the actual light picture of a conduit.’

**A:** Do you think, Terry, that all things are either “black” or “White?”

**Q:** (T) Not in those photos! No, I’m only asking because I feel that the pictures are not only influenced by the subject in front of the camera, but also by the subject behind the camera. [Discussion ensued about workings of cameras] (L) OK, is it true that if we were to bring an ordinary camera in here, that we would be able to get some interesting photos from our interaction? (T) I think that would be an ‘open’ or a ‘maybe.’

**A:** No, it would be a “discover”.

**Q:** (L) That was your third choice! (T) Thank you!

**A:** Too much bibble/babble.

**Q:** (L) OK, then we’ll stop bibble-babbling, then! [Planchette began a series of large spirals]

**A:** Crank away!

**Q:** (T) OK, this is one I wanted to ask last week, and couldn’t figure out how to phrase it. I’m not sure now, but I’ll just plunge ahead. I got a copy of ‘Awakening to the Zero Point’, by Greg Baron, while we were in Atlanta, and I’ve read through it. He had a lot to say about the sacred geometries, and especially the circle, and the sphere. A while back we were talking with you about this, and we got to a certain point, and got totally lost. We all kind of put it off to the side for the time being. Is what this fellow has to say in his book about the sacred geometries, and the sphere, is he on to what’s going on here, is this what you were talking about?

**A:** Maybe.

**Q:** (L) Let me ask this. Is there any word that you can give us as a word association as to why my pool pump has decided to die, so that my pool is sitting there green, making me ill?

**A:** How about metal fatigue?

**Q:** (L) So, the pump is gone, it has nothing to do with any... (T) You didn't do that one! (L) God, I hope not! (T) I was going to say a word... how about chlorine? (J) Sometimes, what is, is...

**A:** Sometimes circumstances are just ordinary, 3rd density boring, everyday "stuff."

**Q:** (L) Well, I just wanted to make sure that it was not symbolic of [anything negative in the environment]! (T) Is there any direction you'd like to see us move in tonight?

**A:** How about the good old fashioned standby: UFOs and aliens? That is always a fun one!

**Q:** (L) OK, I've got a question on that. Chloe called today, and in her conversation about the Ra material, she asked me, was I aware that in the Ra material, they designated Cassiopaea as the residence of some real negative, icky, Orion-type STS aliens. Can you make a comment on these [aliens]?

**A:?**

**Q:** (L) Also, the picture of the mantid-type beings in that document that I lent to Shawn has these beings designated as Cassiopaeans. Who are these Cassiopaeans? (T) Before they answer, can I make a comment here? There is no star called Cassiopaea on our star charts. (L) Oh, I know... (T) It's a constellation. So for her to read this in the Ra material and go along with that there's a bunch of people called the Cassiopaeans who are horrible people on a planet someplace called Cassiopaea, there is no place called that. So there can't actually be anyone called Cassiopaeans be-

cause there is no Cassiopaea. (L) OK, can we get commentary on this?

**A:** Sounds good to us!

**Q:** (L) Where do the mantid-type beings come from? The ones that we're aware of?

**A:** The ones you are speaking of come from active human imaginations!

**Q:** (L) Are there mantid-type aliens that we're not aware of?

**A:** Yes, there is damn near everything that you are not aware of!

**Q:** (T) As you said, are there mantids that we are unaware of, and they told us there's damn near everything we're unaware of! It's a big universe! (L) In other words, our awareness is...

**A:** Yes.

**Q:** (L)... extremely limited, from what I've been able to figure out. (T) They told us that in a couple of years, we have 2% now, it will grow to 30 to 40% of the knowledge of the smartest people on the planet, not the universe.

**A:** Yes.

**Q:** (L) So, in other words, what we can know in this level is just like dipping a needle in the ocean and the wetness of the needle is what we know compared to the ocean. (T) Big time! (L) Yes, this is not good! (T) We know one cigarette butt out of the whole tobacco crop!

**A:** That was a good one!

**Q:** (T) What did they say previously about the mantid beings? (J) 'The ones you are speaking of come from active human imaginations.'

**A:** Cassiopaeian variety.

**Q:** (L) Oh, the Cassiopaeian variety is the product of an overactive imagination. OK, since the Ra material is considered to be a kind of primer to the Cassiopaeian material, could you give us a percentage on the accuracy of this material?

**A:** 63

**Q:** (L) 63%, Well, that's pretty good, considering... (J) It's not bad... (T) A lot of it's very good stuff... (L) Can you talk to us a little bit about the concept of Wanderers? Is the Ra concept of Wanderers a valid...

**A:** Yes.

**Q:** (L) OK, is there anything about Wanderers that you can tell us, that would help us to identify them?

**A:** Specifics, please.

**Q:** (L) OK, is it a correct point of reference that Wanderers are individuals who feel alienated in the world system?

**A:** Yes but they can partially adapt.

**Q:** (L) OK, do they also sometimes have physical...

**A:** Revulsion to physicality.

**Q:** (T) Revulsion to physicality? They don't like physicality? But they're here! (J) Just because they're here, they don't have to like it! (L) OK, is that always a clue?

**A:** Yes.

**Q:** (L) Anything else about them that... (J) Wait, I have another question. Revulsion to physicality, does that refer to a dislike of the fact that in 3rd density is all physical, and it's fixed, as opposed to upper densities, where there's variability?

**A:** 3rd density is not “all” physical.

**Q:** (L) Well, there’s spiritual... (J) I understand that, but the physical body itself, is fixed. (L) Well, I don’t think that’s what they’re getting at... (J) That’s what I’m asking. (L) I think that what they’re getting at is like a fine division between somebody who focuses on physical sensation as opposed to spiritual or mental or emotional sensation as being the point of reference.

**A:** Yes.

**Q:** (L) And this is something that I was reading in this book the other day, that he talks about, the body is animal, and the soul is spirit. He says that animal people just seek animal experiences, and they glorify them, and they stimulate their physical emotions.

**A:** 3rd density natives tend to concentrate and, to an extent, revel, in the physical.

**Q:** (T) And boy, they’re reveling right now! (L) Yes. (T) There’s major reveling going on. And it’s intensifying every day. (J) I think the point that I was trying to make was having to stay in 3rd density, would they miss the variability of physicality? (L) Well, Wanderers, remember, are 6th density beings.

**A:** The lack.

**Q:** (T) The lack of physicality?

**A:** Yes. Is missed.

**Q:** (L) They miss the lack of physicality. (J) Right. Exactly. OK, that was what I was getting at. I just didn’t say it right.

**A:** Not so much “miss,” as much as difficulty of adjustment.

**Q:** (J) Yes, like if you went blind, you’d miss being able to see, etc... (T) If you had the freedom of non-physicality, being limited,

you'd miss the non-physical.

**Q:** (L) OK, what's the scoop on this Mars Rock? (T) That's kind of UFO-ish!

**A:** Vague as can be!

**Q:** (L) Is it the Mars Rock that's vague as can be, or is it my question?

**A:** Latter

**Q:** (L) OK, latter, my question. Is this rock from Mars?

**A:** Yes.

**Q:** (L) How long have they known that rocks from Mars are on the planet?

**A:** 12 years.

**Q:**(T) About the same length of time it took them to analyze the soil samples that they got from Mariner probes. (L) OK, Why all of a sudden are they revealing, or releasing this information about this Mars Rock? In such a big and manipulative way? (T) You just said it!

**A:** You have already figured it out yourselves.

**Q:** (L) Well, Sheldon Nidle, the author of 'Becoming a Galactic Human'...

**A:** No.

**Q:** (T) Not Sheldon and the Galactic Humans! (L) Well, I know they said no, but Sheldon has made an announcement which was put out on the Net...

**A:** No.

**Q:** (L) So, there's not going to be a massive UFO landing between August 29th and December 31st of this year? (T) Only if you go and see Independence Day!

**A:** No comment!

**Q:** (L) Well, I just... (T) That's what the press secretary says for Clinton: no comment! 'Can you describe this woman?' 'No comment!' (L) Is that so pusillanimous as to not deserve a comment? OK, well, so we won't have to worry about Sheldon Nidle's aliens coming and taking over... (T) They can come and take Sheldon away! (L) Well, OK, but is this Mars Rock, and is this opening of the doors concept, is this leading up to some definite, overt interaction with aliens? (T) They told us, we know it, yes!

**A:** Gradually.

**Q:** (T) That's what it's all about. They're opening it up, and they're going to take the money... If they want to go to Mars to look for civilizations and stuff, which they're going to lead up to, and back to the moon here, and all this, and they're going to make Hoagland feel really good, because he's right! They've already done that!

**A:** Notice how you heard nothing about the Mars Probes until the rock announcement?

**Q:** (T) This is the new stuff? (L) Is this right?

**A:** The excavation robot spacecraft. One Probe is already on its way, another to follow. No further explanation about "loss" of Mars Explorer.

**Q:** (L) What did happen to the Mars Explorer?

**A:** Blacked out. You see, 'Too risky.' And too much too soon, due to pressure from Hoagland and others.

**Q:** (T) My own opinion is that they've already been there, and they know what's there.

**A:** No. Microbes are easier to swallow than humans in togas!

**Q:** (T) Cleopatra and Antony are not going to go over real big this week! Especially with the Bible scholars. (F) And the scientists! (L) I want to throw in a quick one about this plane crash. Several people have written and asked me. We've discussed it ourselves. There's all of these plane crashes, with the possibility that we are actually in some state of conflict, and that we just don't know about it. It was suggested that they've been shot down by the Lizzies, or something along that line?

**A:** No.

**Q:** (L) OK, well, then forget it. OK... (T) Back to Mars. OK? (L) Forward to Mars.

**A:** Yes.

**Q:** (T) OK, you just mentioned that somebody from this planet already launched a Mars Probe. A new Mars Probe, that no one in public knows about. Because it's never been talked about. So, it's a secret probe. Who does it belong to?

**A:** Was secret US government.

**Q:** (T) Was it something that one of the Shuttle missions put out?

**A:** No.

**Q:** (J) When did it go up?

**A:** September of 1995.

**Q:** (T) Last September, a year ago. So, it's gone for a year. It takes it a year, two years to get there? Maybe not that long. So, it's over half-way there at this point.

**A:** Yes.

**Q:** (T) What's it going to do?

**A:** Next year.

**Q:** (T) Next year for the next probe?

**A:** Yes.

**Q:** (T) Is this going to be one of those public ones? A publicly announced one?

**A:** They both are.

**Q:** (T) What is the purpose of these probes?

**A:** Excavation to display living organisms.

**Q:** (T) Display? (L) Yes, for public consumption. In other words, not only do we have a rock now, that shows evidence that there was... (T) Oh, display, as when they find it and dig it up, they're going to show it on camera! (L) Yes! (T) Katie Couric will interview it! (L) Right! (F) First they said they found no evidence, then they said it was inconclusive... Now, who the hell knows what they found! In revealing things, we'll start with fossilized life, and then move on... (L) So, they're going to display the discovery of living organisms on Mars to take the next step to acclimate...

**A:** Yes.

**Q:** (L) So, in other words, this process is going to be something of an on-going thing, and that all of these people who are cranking around about, you know, alien landings...

**A:** No faces, though.

**Q:** (L) There's not going to be any 'Faces On Mars?' They are not going to show us...

**A:** Won't be revealed, what do you think happened with Mars Explorer?

**Q:** (L) Well, what did happen with the Mars Explorer? (T) Now, now, now, let me...

**A:** Hoagland forced their hand.

**Q:** (T) What do we think happened to the Mars Explorer? I think they switched channels. They just moved it from one communication post to another, and it's doing exactly what it's supposed to be doing. And they did it in such a way, that the NASA people really didn't know what happened, so that when they were asked, they could say, 'We don't know what happened to it!' Because they really don't know what happened! (L) When we're talking about attack, as we were before, as in plane crashes, the Olympics, all these different things - this dealing with these Mars Explorers - is all this stuff, or most of this stuff, coming from the 4th density manipulations of human minds, rather than...

**A:** Yes.

**Q:** (L)... rather than actual, physical entry and doing of deeds? Is that it?

**A:** Yes.

**Q:** (L) OK, so what these people are doing with this Mars Probe, with all of these things, they're being manipulated to do these things, and there's obviously an objective. What is the objective?

**A:** Too complex.

**Q:** (L) Too complex. So, it's not just control, there's control for a reason.

**A:** To explain to you.

**Q:** (T) Because there's 4th density, fifth density and sixth density reasons involved.

**A:** Just 4th.

**Q:** (T) I have a question. They're going to display live organisms, like, how did they put that 'Living organisms'? How big are these living organisms going to be? How advanced?

**A:** Teeny-tiny.

**Q:** (T) So, we're still talking about microscopic organisms here?

**A:** Yes.

**Q:** (J) So, they won't wave at us!

**A:** But these will be alive. Can't you see the progression here? "Don't want to scare Grandma Sally Bible Thumper/Stockmarket Investor!"

**Q:** (L) Do you have any more for us tonight?

**A:** No. Goodbye.

END OF SESSION

## **4.30 August 17, 1996**

Frank, Laura, Terry & Jan

We started this session with a short exchange about the fact that I only had one blank tape left so we needed to be careful not to run over time.

**Q:** (T) Good evening!

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Wokuhia

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (T) Is Ark's computer going to continue to work okay?

**A:** Attention: Please do not restrict session to limit of tape. Just be careful to write answers carefully. Tell Arkady to approach his career/move in more than one way: suggest he contact 'Enterprise Florida,' headquartered in Orlando, and propose that his potential hiring by any of four Florida universities would be a potential boon to State economic development efforts, due to his stature.

[This was actually NOT the case so I don't know where all that came from.]

**Q:** (L) OK, any further on that? (T) They might even have a Web site! Check under Florida Chamber of Commerce. (L) All right, anything further on that?

**A:** Yes. What Terry just said is true. And one should know that while the University of Florida is somewhat "set in it's ways," the same can not be said for the University of Central Florida, which is in Orlando and has a massive, new, research park immediately to the east of its campus, where much research in advanced physics is slated to begin soon. You see, it is the "angle" or approach that one utilizes that determines the degree of success. Also, F.S.U. has recently constructed a super collider. Yes, access in your libraries, if you do not believe... Remind Arkady that in the United States, it is the money that matters, unlike the Poland he grew up in, and the key is to "Sell one's self, as if a commodity!!

[Again, that was not the case and things did not turn out that way.

My guess was that Frank had been doing too much reading in his stock-market journals.]

**Q:** (J) I have a feeling they aren't going to let us ask any questions tonight. Ask them if they're going to let us even ask any questions tonight?

**A:** Yes, but wait a moment... impress upon Arkady to discreetly sell himself as a valuable asset, if he wishes to have things move more quickly and smoothly. We suspect that "Gainesville," may have not appreciated what they are up against.

**Q:** (T) Elaborate 'up against,' please!

**A:** Means that they do not recognize the value... He has been offered a position that is way below his station!

[This was certainly true.]

**Q:** (L) OK, anything further that you would like to convey to him tonight?

**A:** Not at this "time."

**Q:** (L) All right, let's get on to our questions here. Let me ask a quick one about the tetrahedron. Terry, you ask it, because you know more about it. (T) The Tetrahedron, triangle mathematics that Hoagland is working with in conjunction with the Mars/Cydonia region where he supposedly discovered this...

**A:** Energy consolidator. EM Wave capturer.

**Q:** (T) Ok, so it's an EM wave capturer. Does it also expel EM waves?

**A:** Close.

**Q:** (T) From the same points? The 19 points, whatever it is... [He obviously meant the points on the planet that Hoagland talks

about that are located at about 19 Degrees of latitude if you place a tetrahedron inside a sphere.]

**A:** Channels and enhances, when used properly, and in pristine conditions.

**Q:** (T) Hoagland is not talking about... whatever he's talking about, as far as the mathematics go, of the tetrahedral triangles within the sphere, which I'm assuming this planet is calling the sacred geometries, but are physics-type things of different densities, which may not actually be right. OK, this doesn't apply just to Mars, this is, every sphere has these same properties...?

**A:** Yes.

**Q:** (T)... a golfball, a base ball; I know they're not perfect spheres, they have dimples; all the way up to the sun, and so forth and so on, of any size, made out of any material, as long as it's a sphere, it will have the same properties.

**A:** No.

**Q:** (T) OK, it has to have certain kinds of materials?

**A:** No, must be magnetized.

**Q:** (T) OK, it's a magnetized sphere; something that has a magnetic field around it. (L) Is the tetrahedral configuration a property of the magnetism?

**A:** Yes. No.

**Q:** (T) Yes to my question, no to Laura's question?

**A:** Yes.

**Q:** (T) OK, my question is, the sphere has to be able to generate a magnetic field, like the earth has a magnetic field, like Mars generates a magnetic field...

**A:** Or be magnetized by installation of internal magnetic generator.

**Q:** (L) OK, what's the purpose of this? What's the purpose of these tetrahedrons? What are the...

**A:** Purpose is not proper term.

**Q:** (T) That's right. It's not a purpose, it just exists this way. These spheres that are magnetic, or are able to be magnetized, this happens just because they are what they are, and this is how the physics works?

**A:** Reflection of universal balance.

**Q:** (L) OK, they just simply... and is it that something occurs at the points of these triangles that is noticeable, I mean, is it like a power point?

**A:** No.

**Q:** (L) OK, well, this guy Jim [who is in communication with Ark] says that they are designated by different monuments on the planet's surface...

**A:** Nonsense!!!

**Q:** (T) Thank you! (L)... and that they are visual sighting...

**A:** Artificial constructed tetrahedrons are placed on strategic locations on the planet's surface in order to utilize magnetic fields properly.

**Q:** (L) Who places these artificially constructed tetrahedrons at these points?

**A:** The artificial constructors.

**Q:** (L) And who are they?

**A:** Whomever they may be.

**Q:** (T) In other words, they can be anybody. They're artificial constructor, they could be anybody... (L) If people know about them, they can do this...

**A:** No, no, no. Nineteen degrees north and south.

**Q:** (T) Correct, those are the numbers that Hoagland came up with, with his stuff. On most of the planets, and our sun, we seem to have major events happening, or have happened...

**A:** Hawaii.

**Q:** (T) Yes, Hawaii, Puerto Rico... let's see, 19 degrees north and south, Philippines, I think, is somewhere close, on the south side. Major volcanos... (F) Philippines is on the north side, that's not in the Southern Hemisphere... (T) I'd have to pull out a global map to see what the 19 degrees are. On Mars, Cydonia resides at approximately 19 degrees, the Giant volcano, the dead volcano on Mars is approximately 19 degrees, the stuff that they found on Venus, the major things, are at approximately 19 degrees. The sunspots are approximately 19 degrees, the red spot on Jupiter... (L) Is there anything else we want to get on this tetrahedron... Is there anything else we could ask about this subject, that we haven't thought of ourselves... (T) I'm sure there's a lot... (L) Oh, I know... that you could give us?

**A:** Unlimited.

**Q:** (L) Do the tetrahedrons spin within the sphere? Do these power points of the tetrahedron spin?

**A:** Energy fields flow in balance.

**Q:** (T) So they're spinning to keep balance? (J) Like a gyro. [Notice that the Cs did NOT say that anything was spinning, only that energy was flowing.] (T) Is there... now, am I correct in the fact

that there's a direct relationship here to the real Hebrew Star of David, to these tetrahedrals?

**A:** Yes.

**Q:** (T) And that everything that has been done to it for the last 500 years or so, has been done to screw things up?

**A:** Yes.

**Q:** (T) Yes. So that that symbol is not a religious symbol, as such, but a very important... (L)...power symbol?

**A:** Yes.

**Q:** (T) It describes a physics that transcends the densities.

**A:** So is pentagon.

**Q:** (T) So is the Pentagon? (J) A pentagon. (T) The pentagon shape. These are part of what humans describe as the sacred geometries.

**A:** Yes.

**Q:** (T) So, in that 'Bear' book that I have...

**A:** You as Atlanteans knew this, and lived by it in many ways. For example, the pyramid recharges by capturing exactly half the energy points, thus allowing a positive imbalance buildup to be captured, then expended.

**Q:** (L) OK, are we finished, or... Ok, we know we are not finished, but we know we want to cover a couple of things... is there something more about the tetrahedrons that is important for us to know now? (T) That we can pass on to Ark? (L) Yes, essential to know now? A real 'goodie'?

**A:** Open.

**Q:** (T) Send him what we've got now, and we can come up with some more questions... (L) Yes. Until he's here, and can ask questions... (T) Maybe it's something we can tap into... (L) OK, Jan has written down a question that I've been curious about myself lately, so I think we'll just kind of throw it in on the top... that has to do with the unusually high historically recorded lightning strikes in this area. Does this have any correlation to psychic abilities?

**A:** Vaguely constructed inquiry.

**Q:** (L) OK, is there any correlation between the extremely high lightning strikes in this area and our work? In this area?

**A:** Maybe.

**Q:** (T) Is there a correlation to the lightning strikes in this area, in this immediate area; not right here, around this house, but in the Bay area, because it's so built up, because there's so much metal around?

**A:** Maybe.

**A:** (L) Is there any correlation between the lightning strikes and so forth that have been going on, seemingly coincidental moments in the communications I've been having with Ark?

**A:** Lightning has been striking elsewhere a lot more too.

**Q:** (L) So, just in general. There's been more lightning strikes all over the place in general. (T) OK, on the correlations things, to skip from lightning to another question I just thought of. Is there a correlation to the massive power blackouts on the West Coast that have been happening recently, to the government messing around with the HAARP Project, and other related weapons testing systems?

**A:** Not HAARP.

**Q:** (T) OK, not HAARP. Something else that they're messing with?

**(L)** Well, why don't we just ask, what's the cause of the blackouts?

**(T)** OK, what's the cause of the blackouts? Good question!

**A:** 4th density bleed through has many "fun" possibilities.

**Q:** (L) Oh, fun! **(T)** 4th density Bleedthrough? This is part of the bleedthrough from the different bases on the West Coast?

**A:** More or less.

**Q:** (T) Are you aware of the Greenbaum effect? Dr. Greenbaum and his mind control experiments, that we've been looking at lately?

**A:** Yes.

**Q:** Is what's said there factual? I won't say true, but is it factual? Most of it?

**A:** Close.

**Q:** (T) OK, the question is, is the fellow that just shot three professors in San Diego, I think it was, the University, before they read his thesis, because he was afraid they would throw his thesis away, and make it look bad, and flunk him. Was he a Greenbaum subject?

**A:** Yes.

**Q:** (T) Why did they turn him 'on' at that point?

**A:** Not correct concept. What if: those programmed in the so called "Greenbaum" projects are preprogrammed to "go off" all at once, and some "malfunction," and go off early?

**Q:** (L) Oh!!! Can you tell us at approximately what time they're programmed to go off? Because it is a program...

**A:** Nope.

**Q:** (T) No, they can't. Free will!!! (L) OK, can you tell us how many of them there are?

**A:** No.

**Q:** (T) Do you know how many there are?

**A:** Yes.

**Q:** (T) Are you 'tuned in' for..

**A:** Tuned in!?!

**Q:** (T) Mirth! Mirth! (L) OK, because we're going to run out of tape, let's get Jan's last question here. She wants to know if there's any significance to these three Scorpio/Aquarius couples in our circle? As in Terry and Jan, Laura and Arkadiusz, and Margaret and Michael? Well, Margaret and Michael are not really in the circle... (J) Well, all three are known to me... (T) She means finding that there's this Scorpio/Aquarius matchup.

**A:** No. Coincidences are the spice of life for those with higher knowledge.

**Q:** (T) Do you have a question? (L) Well, since things have progressed as far as they have, what do you think of Ark now? Is he the Orion?

**A:** No commentski.

**Q:** (L) I guess you could read that in the way of a yes! (T) Well, we may not be able to read it in the way of a yes. Maybe he knows the Orion. He's bringing him with him.

**A:** Wait and see.

**Q:** (L) OK... (T) I'm excited about him coming now, too! I want him to get here, and talk to him in person. Yes! (L) Wait your

turn!!!! (T) When you get back from your world tour! (L) Right, yeah!

**A:** You are all Orion manufacture.

**Q:** (L) OK, that's cool! (T) I hope they build their cars better than Ford!

**A:** Still in testing phase.

**Q:** (T) Yeah, we're beta models! And somebody's reprogramming us, on top of it all! (L) OK, let me say this. In reading through all these transcripts [that were being transcribed apace], you guys were right. My mind was blown. I was completely blown at all the things that I missed...

**A:** You ain't seen nothin yet!

**Q:** (T) 'Dark star, see you in the morning....' Still can't think of the name of that group! (T) Do you all have anything more to say this evening?

**A:** Do you have any more questions?

**Q:** (L) Well, we've got loads of questions, but we need to get ourselves formulated, we need to get tapes, we need to get organized, we need...

**A:** Oh, by the way, Laura: You may help Ark on the things we mentioned earlier, if he requests, what with your communication skills... and on that note, goodbye.

END OF SESSION

## 4.31 August 24, 1996

Frank, Laura, V

Background: I had been in twice-weekly physical therapy for almost two years following an auto accident in late 1994. I usually didn't mention it in the sessions but at this particular point in time, probably due to the intensive body-work that was being done, I was truly in so much pain that I wondered how I could go on.

**Q:** (L) Hello.

**A:** Hello. Louritha of Cassiopaea and we welcome V, it is good to have your presence!!

**Q:** (L) Why do I have this persistent, overwhelming pain in my shoulder. I am simply unable to do anything with this pain. If it were not so bad, I would not ask, but I am in such constant pain that it is difficult to even concentrate.

**A:** Soft calcium tissues.

**Q:** (V) How can she work that out?

**A:** Through re-energization of the body, combined with cleansing at the same time.

**Q:** (L) Are you talking about fasting?

**A:** A fast would not be good, except one day per each ten.

**Q:** (L) Okay, you say re-energization combined with cleansing. What is the proposed protocol to accomplish this?

**A:** You have been spending too much "time" being static.

**Q:** (L) You are saying that I need to get out and move around?

**A:** 1.5 hours per day. We recommend the first order of business is to clean the pool, then swim 100 circular "laps" each day. Swimming gets the entire body to move and purge, thus your cleansing.

**Q:** (L) Well, speaking of that. I cannot do that until I can afford to replace the pool pump. So, since you guys are so full of all this advice, maybe you will tell me how to do this? That is impossible right now.

**A:** Ask Ark.

**Q:** (L) I can't ask him!

**A:** Why do you think we sent him?

**Q:** (L) You are completely crazy. I couldn't do THAT!!

**A:** Yes you could, and phrase it directly.

**Q:** (L) I can't do that! (V) Let me ask you, if Ark loves you, do you think he wants you to be in the situation you are in? If he loves you that much...

**A:** In that sense, he is as you say, "loaded."

**Q:** (L) I can't DO that! God! Guys, come on!

**A:** No, we are not at 7th density yet, but we appreciate the compliment!!

**Q:** (L) I can't do that! (V) Well, you can't as long as you keep telling yourself you can't! (L) Could you ask a man for money? (V) Yes. (L) You could? (V) If I was in a relationship where there was love, of course I could. And you can! (L) No, I can't. (V) What makes you think he wants you to suffer? If he knew how you are suffering, don't you think he would care? Am I right?

**A:** Yes.

**Q:** (L) Frank! You are pushing that! (F) I AM NOT! (L) Well, I have a hard time asking anyone for anything. (V) Where does that come from? (L) I don't know. (V) How about pride and ego?

A relationship is not about ego. A relationship is about soul connection and love.

**A:** Yes.

**Q:** (V) Thank you! See, I'm getting good! (L) Okay, let me ask why I have such an internal restriction [in respect of asking for help]?

**A:** You do not. You have always had high expectations relating to your own powers, when you let those go, good things happen.

**Q:** (V) Does this relate to the 'I must be perfect' syndrome? Or do you think that it diminishes your worth to need from someone else and to not be the one who is doing the giving? (L) I suppose that it makes me feel worthless to need.

**A:** What do you think he thinks you are?

**Q:** (L) I don't know. What does he think?

**A:** That is not what we asked you. Please answer us.

**Q:** (V) Well...? Think about it.... It is so intense, so fast... (L) What does he think? I don't know. I only know what he says. But, what he says and what he really thinks may be two different things. He says that I am his other half, his completion. That's what he says. Who knows, he may be telling the truth.

**A:** So, where does ego enter into that?

**Q:** (L) I guess it shouldn't.

**A:** Do you think he will reject you if you are honest and open?

**Q:** (L) No.

**A:** Then we suggest you spell out to him your exact circumstances, and hide nothing!

**Q:** (L) You mean I have to tell him that my husband has left me with 5 children and no money and is playing games to force me to take him back or starve? That I have used all the money I had to live on and what [my ex] has given me isn't enough? That is completely humiliating! It makes me look stupid! What kind of a woman would put herself into this situation? Waiting for an insurance settlement which could take God-knows-how-long!

**A:** And how does one adult raise 5 kids these days? Do you not think the truth is better than fiction?

**Q:** (V) That's how you live your life! Based on truth. (L) But I never thought that it would include having to tell someone my personal problems, my financial difficulties! That is going a bit far with this! I expected the insurance money in July... (V) You accept what the C's say, correct? Then, you need to apply it in real life! (L) Guys! You are putting me in an impossible situation! I cannot do this!

**A:** Well, the internet expense angle is there too.

**Q:** (L) Yes. I will soon have to cancel my internet account and I will have to tell him that eventually.

**A:** Which has a funny ring of truth to it!

**Q:** (L) All things considered, how soon before I get the money from the lawsuit?

**A:** Up to you.

**Q:** (L) Now, you said that you 'sent' Ark. I want to know exactly what you meant by that. I don't like to be manipulated!

**A:** "Sent" may not be the exact term, more like nudged.

**Q:** (L) Well, you have certainly been nudging ME in his direction! Are you sure I don't have an attachment in this arm? It is excru-

ciating just now!

**A:** Yes. It is floating calcification.

**Q:** (L) Wonderful. Just what I always needed. More pain. Okay. I am in so much pain I will do just about anything to get out of it. Okay. I will tell him. But I want you to know that I do it under protest. And, if I never hear from him again, well... it's better to know now. V\_\_\_, ask your questions. (V) I have been helping a woman who has cancer. I see her cancer as a sideline even though it is in the lymph system. Is this correct?

**A:** Cancer is always a "sideline."

**Q:** (V) When I was working with her, I felt a lot of energy flow coming up from her solar plexus. Was this the disease energy leaving?

**A:** Constriction easing. If she wants to remain on third density, she must change a 28 year long outlook, and purge feelings, rather than collecting them as a "sponge." Also, dietary changes are needed. We suggest sauerkraut extract and fruit juices and broccoli. She needs colonic therapy, and if diagnosis is "terminal," why are poisonous treatments a consideration? We strongly recommend that you suggest a change in the 28 year long outlook. She must purge and cleanse her mind, body, and soul, as with ALL cancer patients.

**Q:** (V) I want to address another issue: that of charging for Reiki and other similar work. I mean, if this is a spiritual gift...

**A:** Offer the opportunity to give donations in any amount or form as deemed appropriate by the receiver.

**Q:** (L) Okay, I have two quick questions. Last Sunday morning, after the session the previous night, I had a very strange experience similar to what Al-Arabi describes as being in a 'state.' It

was like being taken up into a condition of near madness, Ark was there [in a sort of vision], and then, when [the intense emotion of the visionary state] became unbearable, [I pulled myself back deliberately and fell into a state of] cold, shaking and rocking. I was shivering like I would never get warm and I could FEEL my soul rocking in my body [the same feeling that comes with an OOB]. I would like to know exactly what this was?

**A:** Balancing of half-self.

**Q:** (L) What is a half-self?

**A:** Your starter version, relating to birth karmic imprint.

**Q:** (L) What in the world does THAT mean?

**A:** What you were assigned with at the onset of this incarnation.

**Q:** (L) Do you mean that this was ‘starting’ something? Like a starter in a car?

**A:** No, what you started with. This must be periodically re-balanced at apex of significant junctures.

[None of this made much sense at the time; it was only after reading Mouravieff and then re-reading Gurdjieff that more understanding came in terms of the lower centers and higher centers. I think the “half self” that the Cs referenced above was their way of describing the lower centers. Thus, this was probably an inflow of energy from the higher centers. Trust me, it was almost annihilating.]

**Q:** (L) The next thing that happened was that a few days later, I went unconscious and Ark saw me come in the window [of his office in Wroclaw, Poland]. What happened?

**A:** Learning is fun!

**Q:** (L) Well, my night would not have been complete without that!  
(V) I am interested in more Reiki symbols. Yet, there is nowhere else to learn these things. Can you direct me?

**A:** Vague.

**Q:** (L) Is it possible at this point to learn more Reiki symbols?

**A:** We would be happy to give you one. [Draws symbol] This is called Ohnh tu shayti sunehn.

**Q:** (L) And what energy does this symbol produce or encourage?

**A:** Completes spiritual awakening. And Good Night.

END OF SESSION

## 4.32 August 31, 1996

Frank, Laura, Terry & Jan, V

**Q:** (L) Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Kiorck

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) Does anybody have any questions this evening? (V) Yes, I do. What should I do for this rash? Could you please give me some insight? It feels like I have a chemical burn on my face, and my skin is itching.

**A:** So why is this?

**Q:** (V) I'm thinking it's because of hormones, the reaction to...

**A:** No. No.

**Q:** (V) Why does it only happen to...

**A:** Guess again, and remember, learning is necessary for growth.

**Q:** (V) Well, I notice it happening within the last few months right before I cycle... That's why I guessed that it's due to hormonal fluctuations.

**A:** And what are your usual practices around the cycling?

**Q:** (L) This is getting a little personal, V\_\_\_! You shouldn't have asked this one! (T) It's something you're doing... (J) Yes, what are you doing? That is what I was going to ask! (V) Well...

**A:** OK Laura, hand on, thank you, now, rashes are usually an evidence of toxicity...

**Q:** (V) From a food source?

**A:** We asked you.

**Q:** (L) So V\_\_\_ has some toxicity in her system, and we're fairly certain it's not pot, because she's not smoking it any more... (V) And it's not alcohol, I'm not drinking. (T) Do you get any particular craving for any kind of food that you don't normally eat? (V) That's the thing! I eat chocolate all the time, I drink soda all the time... (T) Is it a food type that's interacting?

**A:** But your "cycles" are not "all the time."

**Q:** (L) So, in other words, things that you eat at that time of the month will affect you negatively... then you need to experiment with it. Is that the solution here, that there's something here that she's taking in that ordinarily doesn't bother her...

**A:** Well, we alluded to "practices," did we not?

**Q:** (L) Is there anything that you do at that particular time of the month that you don't do...

**Q:** (V) (Embarrassed) You guys! Well, I guess... (J) You need to look at what you're doing at that time, and... (L) Just kind of eliminate some things, eat very simply and plainly, and be very careful with your system, physically, mentally and emotionally and spiritually, at that time of the month. (T) You know, just change your whole lifestyle! (Laughter) (L) OK, ok, have you heard enough yet, V\_\_\_? (T) And stay out of San Francisco, too! (L) Let me ask real quick, on another health issue, last week you told me that I should swim circular laps. Is there some particular advantage to these circular laps, as opposed to back and forth across laps?

**A:** Yes.

**Q:** (L) Are you going to tell me what the advantage is?

**A:** Try it.

**Q:** (L) Well, I intend to. (T) Circles. It's spinning. It's the same idea. 33 circles... (L) They told me to do a 100 a day. (V) Not only that, it's a continuous motion. If you go from one end to the other, you have to stop... (J) You're breaking... exactly, that's true. (T) It's one continuous motion all the time. (L) Well I want to take the time to tell you guys that I really appreciate the tiny bit of advice you guys gave me last week; it certainly didn't turn out as I expected...

**A:** Tiny?!?!?

**Q:** (L) Well it was really, really quite outstanding, and it had quite outstanding results. I'm impressed all to heck and back, so... I don't know what to say... (T) Genuflect! (L) Yes! Several times! So, anything further on that?

**A:** Any more questions of faith?

**Q:** (L) No, I don't think so! I think I'd be crazy if I had any! (T) I think you've gotten more than enough feedback on that. (L) Very quickly, let me ask for A (daughter). We have been discussing whether she should, or should not, go to school. I support her either way. There are valid reasons for both. She asked me to ask you guys if you would give her a little guidance on the school issue, and she is open to anything that you may suggest.

**A:** Hmm... This one is difficult because there'll be regrets either way.

**Q:** (L) I know, and my thought is that she should go ahead and go, simply because of the fact that she is so moody a person, that it will make her, by her own willing herself to do it, to get out there and be active and interact with other people, and keep her out of the dumps. That's my feeling about it. She needs to get out of the dumps. (T) She needs to interact with people her own age. (L) Yes...

**A:** Her "dumps" are not caused by that.

**Q:** (L) What are they caused by?

**A:** Her secrets.

**Q:** (L) And what are her secrets?

**A:** Open.

**Q:** (T) That you have to talk to her about. (L) Anybody got any clues? (J) How old is she? (L) 15. (J) She's 15. It could be anything! (T) She's probably jealous of her sister. (L,J&V) No!

**A:** No.

**Q:** (L) Do these secrets have to do with physical things?

**A:** Vague.

**Q:** (L) Are they secrets about the way she thinks or feels?

**A:** Some.

**Q:** (L) Are they secrets about things she's done?

**A:** Not much.

**Q:** (L) Are they secrets from past lives?

**A:** Maybe.

**Q:** (T) She's very sensitive, as in psychic sensitive... (L) Does she need spirit release? (T) Is the interaction with the other people, is she picking up on all their feelings and thoughts and ideas, and it's making her very, very uncomfortable?

**A:** Have you not travelled that path to your satisfaction yet!?

**Q:** (L) Well, that was kind of obscure! (V) Didn't you have secrets when you were a teenager?

**A:** Spirit release.

**Q:** (L) She needs spirit release... (T) No, they mean haven't you travelled that path already? You're not doing spirit release any more, remember? She doesn't need that, no. (L) Yes, everybody's got to do their own... (T) Is she reacting to the divorce? (V) That's what I was thinking. (T) That's got to be hard on her... (V) Aren't secrets just a part of growing up? A natural part of growing up? (J) She's 15, remember.

**A:** No not for everyone. Secrets.

**Q:** (J) She's 15, and she's got secrets...

**A:** No, no, no. Secrets are not for everyone to have and to keep.

**Q:** (L) Is this a seriously disturbing secret, or series of secrets, or...

**A:** Ask A\_ how many secrets she keeps.

**Q:** (L) OK, let's drop it. What's next? (T) The last few where they've led off have led to some very interesting things. (L) Go ahead. (T) Would you all like to start the ball rolling here this evening and point us in a direction you'd like us to go?

**A:** No, you point.

**Q:** (L) Question, this may take us somewhere. I noticed when I was redoing these transcripts for Ark to read that when we were discussing the origin of the Celts, that the question was asked, by me, were they in any way superior to the indigenous people of this planet? And the remark was, that they were sturdier in some way. And then I commented that they didn't appear to be sturdier than, say, some of the big Black people, because Celts are very fair, and very thin-skinned looking, and very delicate. It just seemed to me to be kind of an odd remark to make. However, the response that I received, which I didn't pick up on at the time, which blew me out of the water, was that they were sturdier, but not necessarily on the surface of the planet... (J) No, they didn't say on the surface of the planet. They just said, on the surface. (L) On the surface... Uh huh. So, does that surface mean surface of their appearance, or does that surface mean surface as in underground? That's my question.

**A:** Both.

**Q:** (L) Now, in talking about these large underground cities or enclaves that we've talked about on a couple of occasions, it has been said that these beings come and actually may take human babies. I mean, this is like fairy lore, legends, of different kinds of creatures that come and steal people's babies, and they go and live underground, and sometimes, one or another will escape. Is this what we're talking about here? These kinds of situations, these underground cities and caves and civilizations and so forth?

A: Vague.

Q: (L) Well, I know it's vague... (T) Are the Celts part of these underground civilizations?

A: Yes.

Q: (T) And they came to the surface some time ago...

A: No.

Q: (L) No, they came here, and they were taken underground...

A: No.

Q: (L) No, well, what's the story?

A: Went.

Q: (L) They went underground? Is that it? (T) When did they go underground?

A: Several occasions, the most recent being, on your calendar: 1941 through 1945.

Q: (L) That's when they went underground? 1941 through 1945?

A: Last episode of mass migration, mostly Deutschlanders.

Q: (T) Underground. We're talking underground, as in under the surface of the earth. Is this what we're talking about?

A: Antarctica. Under there.

Q: (T) Under Antarctica, under... Oh, in one of the big... OOOhhh!

A: Entry port.

Q: (T) They went underground in Antarctica, they built a large underground base there, this is where the Germans, as in the Nazi Germans, claimed as Vineland, I think it is, where the older maps that show Antarctica, where the Germans, claimed as Vineland,

I think it is, where the older maps that show Antarctica, where the German territory was claimed, it's in that section that's south of...

**A:** Yes, but they entered through their constructed base, as instructed, then were assimilated.

**Q:** (L) They were assimilated into the population already existent? Underground cities, underground bases?

**A:** Yes.

**Q:** (L) So, they didn't build them, they entered into them as instructed, and were assimilated into the population?

**A:** They did build a base.

**Q:** (T) Well, they'd have to keep expanding! Now, you said instructed... (L) Instructed by whom? (T) They were instructed to go there?

**A:** Those identifying themselves as "Antareans."

**Q:** (L) And who are the Antareans?

**A:** STS Humanoid Orion linkage.

**Q:** (L) What is an STS Orion Linkage? (T) That's the... (L) We have a new concept here. (T) They would be... the... the...the... (V) Mutant Race! (T) Yes! Those that were part of the creation...

**A:** No.

**Q:** (L) What is an STS Humanoid Orion linkage?

[Part of tape seems to be missing here, questions in [brackets] are reconstruction]

**A:** An STS race from Orion that is humanoid.

**Q:** [something about who or how they got hooked up with the Nazis. Probably a question related to the group that “handled” Hitler.]

**A:** The Thule Society originated contact.

**Q:** [something about them “waiting to take over the world”]

**A:** Waiting?

**Q:** [Terry’s question about what Admiral Byrd may have seen over the pole.]

**A:** Yes, but he was led to believe he was chasing what amounted to merely an encampment of detached Nazis.

**Q:** [So Byrd must have SEEN something and was then led off the track...]

**A:** Yes

[Tape resumes here.]

**Q:** (T) ...the U.S. just assumed, and Churchill, between the two of them, was it Roosevelt and Churchill? They didn’t even tell the Russians too much about what they were doing down there. They just assumed that this was a base, another one of their underground bases that was manned by the Nazis, but there wasn’t anything that they could do, because they were too far away, and we were keeping them out of the war. So, there wasn’t much that they could send back. So, they let them come in, and figured they were stranded. They’ve been coming back out...

(V) Are they coming back out now in the shape of the White Supremacists that are like popping up all over the place?

(T) They’ve been coming and going all along. Admiral Byrd was sent down there, supposedly to go to the South Pole, the first Admiral Byrd expedition to the South Pole; but he took a large mili-

tary force with him. He was still a U.S. Admiral at the time. The large military force encountered resistance and got their asses whupped real good down there. But, they kept it real quiet, because nobody knew what was really going on down there. So, they just said, oh, it was a scientific expedition. It was really Captain Picard and the Enterprise going to find a new planet! And in reality, what they'd done was to go down there to root out this base out after the war, and they didn't do real well at all!

(J) Bit off more than they could chew.

(T) They lost a whole lot of people and a whole lot of ships, and a lot of equipment down there. That's why all these bases ring around the outside, all the scientific bases from different countries; Russia, the U.S., Great Britain, all these countries have these scientific bases all along the outer edge of the Antarctic. They're scientific, they use them for study, but they are there to monitor what's going on, that's why they don't go into the Antarctic [interior].

(V) You know, my father was a SeeBee down there.

(T) I'll bet he has some very interesting stories about it.

(V) That's why my father is an alcoholic and can't see straight.

A: Yes.

Q: (L) What do these guys plan on doing?

A: This is where "The Master Race" is being developed.

Q: (L) And what is the timeframe they have planned for this activity?

A: Never mind.

Q: (L) Is Ark going to be able to help us with technology, to help other people, or to protect ourselves in some way? In this really

bizarre stuff going on here on our planet?

**A:** Too much, too soon, my dear. Curiosity killed the cat.

**Q:** (L) Well, satisfaction brought him back!

**A:** Not in this case!!!

**Q:** (T) You've got to let this go along. It's picking up momentum every day, it seems. So, just let it roll along and let it see where it goes. (L) All right, lets... (T) He's coming to protect you. That's what he said.

**A:** Maybe, but there is so, so, so much more in store than that!!!!!!

**Q:** (L) Stop!... Is that an ominous, 'maybe, but there's so, so, so much more in store?' Or is that a positive, there is so, so, so much more in store?

**A:** Why would you think it ominous?

**Q:** (L) Well I don't know.. because I'm scared of what I don't know! (T) Faith, we're back to faith again.

**A:** What have we helped you to discover so far? Would you rather discontinue this operation?

**Q:** (L) Oh, hell no! (T) After two years, you know she's always going to ask those kinds of questions!

**A:** Not two years, eternity.

**Q:** (L) Did I just get zinged? (T) No. No. Mirth! (J) Yes, we haven't had mirth in a while! (T) Just a little mirth there!

**A:** We have helped you build your staircase one step at a time. Because you asked for it. And you asked for it because it was your destiny. We have put you in contact with those of rare ability in order for you to be able to communicate with us. Again, because you desired it, in order to realize your path. By now, you should

recognize the signs... Those who display thinking patterns which in many ways deviate from that which is considered ordinary. The more unusual, the more telling. They have past lives on 3rd density earth, but not recently, but for this one. And they are not oriented to the earth frequency vibrations.

[Group discussion ensued on the last response.]

**Q:** (T) ...It is destiny for you to find out what your path was, you had to make this contact, because it was what you were supposed to do. (L) Are we not talking about Frank in terms of being put in contact with someone who enables me to communicate with you, so you can put me on my path, which is building the staircase, etc, etc. ? Is that not what we've got going here?

**A:** He is one, but not the only one, just the one who awakened your sense of recognition.

**Q:** (L) I know this is probably not the time to ask this question; this is the kind of discover, open find out, open that kind of thing, but it seems to me almost that you are leading up to say something, so maybe I can help you along by asking, what is this staircase, what is this destiny?

**A:** Discover.

**Q:** (L) I knew it was coming! (T) Why don't we ask who else is involved. (L) You ask, I'm trying to... (T) Well, if Frank is one, who else is involved?

**A:** We have given the signs, but they are not necessarily the same with each individual.

**Q:** (L) Well, I know it's kind of a bizarre idea, but... (T) Let me ask this. All this work you've been doing, all this nurturing you've been doing, is Laura a keystone to whole project that you're working on?

**A:** We suggest you avoid anticipatory exercises, as realization comes after the fact.

**Q:** [Frank complains because Laura keeps taking her hand off the planchette and resting it in her lap because of recent pain issues.] (L) Well, I'm in pain, Frank, it's hard for me to sit here at all! Appreciate the fact that I'm in pain.

**A:** Appreciate the fact that you have been given the keys to end all this pain.

[Laura's note: Here, refer to session 27 July 1996 where the Cs made the odd remark about keys.]

**Q:** (L) When you say, 'end all this pain,' it sounds a little more inclusive than just my shoulder hurting! I mean, that sounds rather suggestive.

**A:** Yes.

**Q:** (L) To end all this pain...

**A:** It all goes hand in hand.

**Q:** (T) Yuppies! (L) Well, that's... that's scary! (T) Why? What's scary? It shouldn't be scary, it should be... it should be... (L) Well, you know what I mean! My poor little pitiful conscious mind thinks it's scary! Maybe some other part of me likes it. (T) It should be, um, satisfying to know that! It all goes together. (V) I wonder if hand-in-hand is literal... (L) Uh huh. And that was the big key word, all day long... hand-in-hand, give me your hand, (V) Today? (L) Yes, we're going here, we're going there, we're going to do this, we're going to do that. (J) Ark? (L) Yes. (J) So, do you have the keys to end all this pain? (T) Now, all we have to do, is find the keyring! (L) No, no, no! We have to find the lock! Terry, the lock! We've got to find that sucker! I mean, so what, we've got the keys? What are we going to put them in? (T) Yes, indeed!

We've got the keys! What do we use them on? (J) Where's the door? And where does it go... well, maybe not... (T) Gotta find that door. We'll ask where it goes after we get the door open! (J) Noooo! Let's ask before!! (T) Watch out for the chasm beyond the door!

**A:** Maybe you should swim your self silly.

**Q:** (T) Start doing laps! 100 every day. (L) Who is going to do them with me? (V) I will! (L) All right! You're on! How about tonight? (V) All right, except for every other Tuesday. (T) Every other Tuesday you have to swim by yourself. (V) What if I have a date? (L) No dates!

**A:** Your discipline may be a problem...

**Q:** (L) I do have discipline problems... (V) 'You Vill Svim' (L) Who is going to come and crack the whip over me, make me get in the pool? (T) Be careful, they were already over the house once! (J) Be careful what you ask for! (V) I was thinking of walking in the pool, to help my hip... (L) It does, walking in the pool is very good. (V) Will walking in the pool help my hip get back into where it's supposed to be? Or swimming, for that matter?

**A:** OK.

**Q:** (L) So I'm supposed to swim myself silly... (T) And then laugh a lot... when you get silly. And have fun with it. (L) All right guys... (T) Swim the hundred laps because you want to, not because you have to.

**A:** You cannot imagine the relief less poundage will bring to you.

**Q:** (L) Well, same to you, fella! Well, let me ask this. Is this swimming in circles going to make it go faster?

**A:** Yes.

**Q:** (L) Well, ok, we'll go for it, because I'll tell you what, I'm starving myself to death, and we're not having any movement here the last week or two. (V) Starving yourself to death is only going to lead to ill health. (L) Does anybody have any more questions? Because I'm absolutely miserable here [arm pain]. All right, let's say goodnight. Is there anything you want to impart to us? In your past for us to move towards the future before we shut down for the night?

**A:** You need to be vigilant in your queries. Goodnight.

END OF SESSION

## 4.33 September 21, 1996

Frank, Laura, Jan And Terry

[Note: During the entire session, the sound of frogs croaking in the distance can be heard periodically]

**Q:** (Laura) Hello. And who do we have with us this evening?

**A:** Toyjiia

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (T) Is there any significance to the ID4 movie?

**A:** Sure.

**Q:** (L) What was the primary intention of the makers of this movie? The primary message that they attempted to convey?

**A:** Infuse thinking patterns with [planchette swirled a few times here] concept of aliens.

**Q:** (L) They intended to infuse thinking patterns with concept of aliens... was there any particular slant on aliens, per se, that was seen as desirable in the making of this movie?

**A:** Slant?

**Q:** (L) Slant, in other words, did they wish to present them inaccurately to confuse people, to present them as something to be feared and fought against, or to make them appear so completely erroneous, so that when actual aliens do appear, that they will not be perceived as negative?

**A:** Infuse.

**Q:** (L) Infuse. Just the concept, the concept of aliens in general. OK...

**A:** Part of a larger project.

**Q:** (L) And what is this project?

**A:** Called "Project Awaken."

**Q:** (L) And who is behind, or in charge of, this project?

**A:** Many.

**Q:** (L) Who are the primary group, groups or individuals? I'm sure you're not going to give us individuals, but just the grouping.

**A:** Thor's Pantheon.

**Q:** (L) And what is Thor's Pantheon?

**A:** Subselect trainees for transfer of enlightenment frequency graduation.

**Q:** (L) What is enlightenment frequency graduation?

**A:** Think!

**Q:** (L) Enlightenment frequency graduation... so, subselect trainees...

**A:** Self explanatory.

**Q:** (L) Well, is this group STS or STO?

**A:** Both.

**Q:** (L) OK... (T) Are they working at cross purposes?

**A:** No.

**Q:** (T) They're working together? Bipartisan?

**A:** No.

**Q:** (J) Are they aware of each other? Working on this?

**A:** Yes.

**Q:** (J) Are they screwing each other up? (L) No, that's going in the wrong direction...

**A:** There is more to all of this than you could dream.

**Q:** (T) There's more to all of this...were you referring to... Who are they? Thor's Pantheon. And they're subselect trainees...That's the group behind this movie; OK...

**A:** An army of Aryan psychic projectors.

**Q:** (T) Well, that explains a lot more than Thor's Pantheon of subselect trainees! An army of psychic projectors. (L) And what do they project?

**A:** Themselves... Right in to one's head.

**Q:** (T) Into one's head... this is better than 'Must See TV!' (L) Project right into one's head... is anybody subject to this projecting?

A: Yes.

Q: (L) And, when they project themselves right into someone's head, what does that someone perceive?

A: Inspiration.

Q: (L) Inspiration to what, or to do what?

A: Yes.

Q: (L) Yes? To do what, to do something?

A: And...

Q: (L) To do something, and to understand or perceive something, is that it?

A: Yes.

Q: (J) To believe something? (L) Yes. So, how many are in this army?

A: 1.6 million.

Q: (L) When they're doing this projecting into someone's head, where are they projecting from?

A: Mostly subterranean.

Q: (L) Subterranean, so these are the people of the tunnels, the underground bases and all that sort of thing. Are they 3rd or 4th density beings?

A: Both.

Q: (T) Let me back up to a question here. If they can do all this projecting on their own, what was the point of the movie?

A: No, you misunderstand... This is an intense activity, directed towards influencing the high level creative forces.

**Q:** (T) Projected against? Because this movie, if you've been following the reviews and the people talking about it, this movie has had more repeat business than any movie in years and years and years and years. People have seen it ten and twenty times!  
**(L)** Was there something subliminal in the movie? That opened something?  
**(J)** That's a good question!

**A:** Sure.

**Q:** (L) And was this subliminal activity with the movie designed to create an opening for this further...

**A:** Not for you, but for others.

**Q:** (L) Why? Do you mean me, personally, or us as a group? **(T)** Well the movie didn't affect me.

**A:** Group.

**Q:** (L) What made us immune?

**A:** You already have the knowledge.

**Q:** (T) The movie wasn't meant for us; we already know. The movie was meant for all of those who don't understand.

**A:** Say hello to Gene Roddenberry.

**Q:** (L) Is Gene Roddenberry present?

**A:** No.

**Q:** (L) In other words, say hello to him because he was doing that sort of thing a long time ago?

**A:** Yes.

**Q:** (L) Is Gene Roddenberry one of these people from Thor's Pantheon...

**A:** No.

**Q:** (L) Why did you bring up Gene Roddenberry? (J) Because he was doing it in Star Trek?

**A:** Yes.

**Q:** (T) He was doing a whole different thing with Star Trek... (L) Well, let's not get too far off track...

**A:** It's not the exact "Slant," it's "the concept, stupid."

**Q:** (T) Well, they don't have to get insulting here! (L) They weren't. Ok...

**A:** "It's the economy, stupid."

**Q:** (J) We knew that!! (T) I was just teasing. Mirth!! Mirth! (L) Hold everything. When you say influencing high level creative forces, do you mean as in gathering, what would you call it, gravity waves...

**A:** No.

**Q:** (L) What are these high level creative forces that are needing to be influenced, or desirable of being influenced?

**A:** Those in the creative arts.

**Q:** (L) So in other words, I see, this group is using their projecting ability to influence those in the creative arts to do creative things that will therefore influence the people on the planet. Is that it?

**A:** Yes.

**Q:** (L) And, these individuals are in the underground tunnels, and you say that they are both STS and STO.

**A:** We did not specify "tunnels," you did.

**Q:** (T) They said... how did they put that? Subterranean... (J) Mostly subterranean.(T) ... Underground. In other words,

underground, as in resistance fighters type underground, underground as in ...

A: No.

Q: (T) Not fighters, but the idea that they are part of the underground movement? (L) Subterranean as in literally under the ground?

A: Yes.

Q: (L) OK, but not tunnels, then what?

A: We did not say “no tunnels” either.

Q: (L) Are these individuals living... I know we said the tunnels...

A: The point is: what happens when you assume?

Q: (L) We won't assume. Are there any specific things about this movie other than the general import of opening to the idea of aliens...

A: No.

Q: (L) So there's no specific thing that we can pin down in this movie, and say that this might be an accurate representation of anything? It was just entertainment for that purpose?

A: Enough about the movie, already!

Q: (T) But they were the ones who brought it up! (L) Well, yes, but maybe they want us to get on to the subject of this 'Thor's Pantheon' thing? (T) Well, I want to make sure that we're not missing something... (T) So, we're looking at some Aryan psychic projectors who are trying to stimulate people in a positive way, a la Gene Roddenberry... (L) Now, that's an assumption. Can we say that they are stimulating people in a positive way?

A: Maybe.

**Q:** (J) Can we say that they are stimulating people in a negative way?

**A:** Maybe.

**Q:** (L) So, there's probably a little of both. And you say that we are immune to it because we already have knowledge. Now, when you say we have knowledge, do you mean just knowledge in particular about aliens and alien realities and alien potentials and so forth?

**A:** Yes.

**Q:** (L) Is there something more on this subject of these Aryan psychic projectors that we need to know or investigate?

**A:** Arkadiusz being tracked now.

**Q:** (L) By whom?

**A:** Grays.

**Q:** (L) And what do they plan on doing?

**A:** Open.

**Q:** (L) Is there anything... Why did you tell me that? (T) To tell him?

**A:** Because it is time you talked with him more about aliens. He is not well enough informed !!

**Q:** (L) Well, I sent him the book 'Grand Illusions,' I sent him the Bramley book, and I sent him a Jacques Vallee book. He's presently in the process of reading through these three books. What else do I need to say to him? He's read the transcripts, he read them in a week the whole way through.

**A:** And how much did he comment specifically about aliens.

**Q:** (L) Not a whole lot. Obviously there's something else you wish for me to convey to him. Since I am going to be talking to him on the phone tomorrow...

**A:** The seriousness of the situation... the reality of it... this is not fun and games.

**Q:** (L) What specific thing can I tell him that he could do or... How can he protect himself? Is there any specific knowledge... But he knows these things!

**A:** He has been told, but the awareness is not as sharp as it should be. Ask him where his skepticism lies. All these over the road journeys now have added risk!

**Q:** (L) Well, isn't that true for all of us sitting here?

**A:** More so for him!

**Q:** (L) Why more so for him?

**A:** Because of his position and his knowledge of advanced physics!

**Q:** (L) Will awareness and knowledge...

**A:** The reality must "hit home."

**Q:** (L) Anything further?

**A:** Much more, but you must ask.

**Q:** (L) Has he been abducted before?

**A:** No.

**Q:** (L) He's never been abducted?

**A:** No.

**Q:** (L) Is there some plan to abduct him at the present time?

**A:** It does not work that way.

**Q:** (L) How does it work?

**A:** Too complex.

**Q:** (L) Is there some attempt at the present time to modify his thinking?

**A:** Attempt is not right idea.

**Q:** (L) What is the right idea? Now, wait a minute, stop everything!

END OF SESSION

Jan's note: The session was abruptly stopped by Laura, who was upset by the line being taken. This was partly because she did not recognize the C's reference to the George Bush quote "It's the economy, stupid." She thought that the C's were attacking Terry and then being negative about Ark.

Laura's note: Yes, I just had a very strong reaction to this session; I did not like it one bit.

## **4.34 September 27, 1996**

Frank, Laura

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Have you been listening to our conversation about when Ark may arrive?

**A:** You have not asked for ID.

**Q:** (L) Okay, sorry. Who do we have with us this evening?

**A:** Lanirre.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) Do you have any comment on when and if Ark will arrive?

**A:** No.

**Q:** (L) He is concerned about being able to find a permanent job here. Is this going to be a problem?

**A:** Not if you use your talents, as we told you to!

**Q:** (L) Is there something I am missing that I ought to be doing?

**A:** You “ought” to be exerting more energy toward trawling and communicating and less toward other things.

**Q:** (L) Trawling and communicating with whom?

**A:** Uncovering, researching, job prospects/openings.

**Q:** (L) Via the internet I should go and...

**A:** And written material and “media scanning,” and library, etc... We have told you that this communication has reached its maximum extent.

**Q:** (L) So, you are telling us that we have to do some stuff on our own?

**A:** You, Laura, you!!!

**Q:** (L) Can you give me a couple of hints as to what I am looking for?

**A:** You are not thinking.

**Q:** (L) Alright. I will think about it. I am not happy with the fact that I look 44 years old!

**A:** Vague as can be! How about a new do?

**Q:** (L) You mean my hair?

**A:** One.

**Q:** (L) I want to ask about this terrible ordeal we were going through the past day or two. It seemed that there were clues pointing to it being connected to what happened to me when I was 22 as well as to another lifetime. Is it related?

**A:** In a complex cyclical way.

**Q:** (L) What was the story about this kid named Noah who showed up here, and was 22 years old and suicidal...

**A:** Coincidence.

**Q:** (L) What was accomplished, if anything, by going through this?

**A:** Learning.

**Q:** (L) Was it also a process of releasing stored negative energy?

**A:** No.

**Q:** (L) Nothing else except learning?

**A:** No.

**Q:** (L) I am wondering if it is possible that his traveling and our communications from and to various places reflects connections to karmic events?

**A:** Do not get carried away.

**Q:** (L) I am just wondering because of all the strange things that are happening.

**A:** Everything is a synchronous event.

**Q:** (L) Did Ark and I have a past life together in Florence?

**A:** Density.

**Q:** (L) What do you mean?

**A:** Density.

**Q:** (L) Density what? The question was: did we have a past life as I saw it in Florence?

**A:** Density. Lead you by the hand we do not do.

**Q:** (L) Is there a connection at another density?

**A:** Look.

**Q:** (L) Look what?

**A:** Look, discover.

**Q:** (L) When you say this communication has reached its maximum extent, do you mean it was designed and put together just to bring information, then bring Ark into the picture to benefit by it and do a particular work?

**A:** The communication we mean is the one between you and him.

**Q:** (L) Does that mean we should stop it now? Just break it off?

**A:** You need to spend more time with “Enterprise Florida.” Information is readily available at your fingertips. Look ’em up! I.E. Less lovey dovey with Arky warky and more with jobby wobby, get it?!?

**Q:** (L) Very cute, guys! Another thing I have thought about is selling the house to buy another...

**A:** Wrong move!

**Q:** (L) Okay. I dropped it just now! Won't even think about it!

**A:** Think all you want, just don't do! You arrived at this locator for a reason!!!!

**Q:** (L) I am curious about something... Is Ark in a relationship that seems so similar to the one I was in, and is his dragging on all these years for the same reasons mine did?

**A:** Money.

**Q:** (L) What do you mean?

**A:** Everything divides.

**Q:** (L) I don't understand.

**A:** He has tried to get free, so far no luck.

**Q:** (L) Well, will he have luck on this? Without causing a lot of suffering?

**A:** If creativity prevails, he will succeed.

**Q:** (L) I am sure that she knows something. Is she aware of how unhappy he is?

**A:** Has been for many years.

**Q:** (L) How can she reconcile making him suffer?

**A:** She craves the association with "authority." One could call it the Jaqueline Kennedy Onassis syndrome.

**Q:** (L) You mean she is just there for what she can wring out of him? That's terrible!

**A:** Do you think a factory worker would do when she has a physicist?

**Q:** (L) Well, that means she has just been using him all these years?

**A:** You said it, we didn't.

**Q:** (L) Oh! That's terrible! Last week you said that something needs to 'hit home' with Ark. Was it what has already happened between us?

**A:** Other. He needs to understand the reality of trans- density, interdimensional, interstellar and planetary attack and contact for both STS and STO! One half of him does not yet believe!

**Q:** (L) Is something going to happen?

**A:** Yes.

**Q:** (L) Is it going to be upsetting to him?

**A:** Yes and no.

**Q:** (L) So, he will be able to handle it.

**A:** Yes.

**Q:** (L) Will it happen in Wroclaw, or at his residence?

**A:** Wait and see.

**Q:** (L) Is he married to someone who is there to keep him unaware, to monitor, or to drain his energy?

**A:** Yes. All.

**Q:** (L) Is she controlled by aliens?

**A:** Partly, but that is nothing unusual.

**Q:** (L) Well, that is not good, especially if one does not believe. I certainly did not like the experiences that convinced me.

**A:** Worry not. Listen and be open. Good Night.

**Q:** (L) Good Night.

END OF SESSION

## **4.35 October 1, 1996**

Frank, Laura, Andromeda

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us tonight?

**A:** Vurra.

**Q:** (L) Andromeda has wanted to sit in with us and is here tonight. Is that alright?

**A:** Yes.

**Q:** (L) And I suppose she has a few questions. (A) No.

**A:** Yes.

**Q:** (A) There isn't anything in particular that I want to ask.

**A:** Incorrect.

**Q:** (L) One thing that I know has been bothering her is that she is having trouble concentrating to the point that she cannot read. What is the problem?

**A:** Her mind is on other things.

**Q:** (L) And, what is that.

**A:** Ask her.

**Q:** (L) Well, as we go along, she will think of them. Now, something has happened: Ark has asked for divorce and apparently it was not a pleasant outcome, to say the least. From what he has said, I am thinking that she {his ex} is going to become very vindictive within the next few days. And, what concerns me is that she is going to try to discover who I am by going into his computer.

**A:** Already has tried.

**Q:** (L) And what was the result?

**A:** Nothing, she did not know how to get into proper file. There are passwords. She will try again until no longer able. Also snoops through printed material. But, not proficient in English. {This turned out to be shockingly accurate.}

**Q:** (L) Thank God for small favors. I have the feeling that there is something about this situation... that something very negative is going to happen. The reality of other density controls will 'hit home' in a very unpleasant way.

**A:** Yes.

**Q:** (L) Is there anything I can do to warn him?

**A:** No.

**Q:** (L) And I have no idea what this feeling relates to. Looking at the charts, it seems that whatever she does will be this month, probably in the next few days, because she is building steam. Anger and rage... I don't think he really has any idea who she is, the same way I didn't know the person I was married to... it was all my own illusion. Is this correct?

**A:** It is not “who she is,” it is what works through her by her own choice.

**Q:** (L) So, she is a channel of attack?

**A:** Two more to appear at university in Wroclaw. {This also turned out to be accurate.}

**Q:** (L) Any clues that I can give him?

**A:** One is subordinate, one is authoritative. Also, possibility of {his ex} trying to undermine his position at university with implications of infidelity and adultery... both are seen as more serious breaches in Poland than here and elsewhere when it comes to one of high standing in a university level capacity. {This also turned out to be accurate.}

**Q:** (L) Well, I just have the feeling that she is really wanting to rip him to pieces. I can actually feel it emanating across the ocean.

**A:** We have detailed for you. May actually hasten things, rather than forestall as intended!

**Q:** (L) Is there any more you have to say on this subject?

**A:** Up to you. Warn, as all is not as anticipated in such detail.

**Q:** (L) I need to warn him?

**A:** UFOs monitoring.

**Q:** (L) Monitoring him?

**A:** And the situation. Also, at a human level, “the walls now have ears.”

**Q:** (L) Okay, Andromeda is very worried about the present situation with {name redacted}. What can we do in this situation?

**A:** Vague. Have Andromeda ask, please!!

**Q:** (A) I don't know what to ask.

**A:** Andromeda is holding back, we cannot answer.

**Q:** (L) You have to ask. (A) When are {name redacted} and {name redacted} going to move out and will it help things?

**A:** Not definite. You cannot solve your problems by trying to avoid them.

**Q:** (A) I am not trying to avoid any problems. What do you mean?

**A:** Removing subjects does not resolve them.

**Q:** (L) What are the main subjects that need to be resolved in her mind?

**A:** Interplay and communication and understanding.

**Q:** (L) Anything else that can help?

**A:** Only if she asks.

**Q:** (A) Why do I get depressed?

**A:** Stress causes chemical changes.

**Q:** (A) What are my main sources of stress?

**A:** Inability to see other points of view.

**Q:** (A) Whose points of view?

**A:** All.

**Q:** (A) I try to see everybody's point of view. (L) From your own point of view. (A) No, I try to see what everybody is thinking and feeling, to the best of my ability.

**A:** No.

**Q:** (A) I don't understand. Yes, I do. (L) Can you help?

**A:** No help is desired.

**Q:** (L) Would you think that there is a possibility that you are NOT seeing the other points of view. (A) Sure. It's possible, but I try. Is there any way to improve this?

**A:** Communication.

**Q:** (A) About what? (L) I guess just start talking.

**A:** Specifically, communicate with those that bother you! Resistance is powerful.

**Q:** (A) Resisting what? You are so confusing!

**A:** No.

**Q:** (L) Anything else?

**A:** Only if desired.

**Q:** (L) Is LM's injury serious and will it leave permanent damage?

**A:** All injuries do.

**Q:** (L) Of a major nature?

**A:** Semi.

**Q:** (L) Is he going to die from this as he thinks?

**A:** No.

**Q:** (L) What caused this accident?

**A:** Too complex as to root cause, but direct cause was "passing out."

**Q:** (L) Okay. Tom G passed away, and I would like to know what his state is and could we communicate with him?

**A:** Sleeping to adjust to the reality of afterlife in 5th density.

**Q:** (L) What was the physiological reason for his passing?

**A:** Electrical short circuit.

**Q:** (L) Did he suffer at all?

**A:** No. Did not believe in “hereafter.” Are you aware of this?

**Q:** (L) No, I wasn’t.

**A:** Will awaken, but of course, there is no “time” there.

**Q:** (L) Is there anything I can say or do for Chloe to help her through this?

**A:** Will recover surprisingly quickly.

**Q:** (L) Is it likely that she will move back to Florida?

**A:** Next year.

**Q:** (L) I would really like to do something to make my baby feel better.

**A:** Up to Andromeda.

**Q:** (L) Anything further for any of us?

**A:** No, and Good Night.

END OF SESSION

## **4.36 October 5, 1996**

Frank, Laura, Terry, TomM, Marcie, V

**Q:** (L) Hello

**A:** Hello

**Q:** (L) Who do we have with us this evening?

**A:** Kournia.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) Does anybody want to start with some questions? Do we have an open forum tonight, seeing as there are no questions?

**A:** You always have an open forum.

**Q:** (L) Well, seeing as how we have no specific questions, I will ask this question. I was talking with Roger Santilli, and he has expressed his opinion that the potential opportunities for doing research in the United States are extremely limited. I would like to know if that's necessarily...

**A:** Wrong!

**Q:** (L) Good! I'm glad it's wrong! If it is wrong, can you tell us precisely in what way it is wrong, and how we can look at it to gain a better perspective.

**A:** There are no limits, just controls... The knowledge gives one all the necessary tools to overcome the controls. Do not attempt to formulate words as you write, my dear. Just "Go with the flow"

**Q:** (L) Well, I'm feeling pretty darn warm, the energy is higher than I've seen it in a long time... (T) Energetic little being, isn't he?! (V) I'm having a hard time keeping up... (L) I know, it's fast. Just hang in there, sweetie. (T) That's what we're trying to do! (L) Why are we having...

**A:** No meta. The.

**Q:** (L) No 'meta', 'the controls.' (V) Oh, I see, I had it wrong... Thanks. (L) We've got some real good energy here. I'd like to ask

...

**A:** I see you, you see me.

**Q:** (V) What does that mean?

**A:** What it says.

**Q:** (L) The energy is really good. I like it. OK, guys, we like the energy tonight. Tell us why we have such good energy tonight.

**A:** Tom.

**Q:** (L) And what is there about Tom?

**A:** Not often here.

**Q:** (L) Anything else about it? No. All right, Marcie took a particular type of Reiki initiation or attunement today, and I'd like to know, what was the... she had an event occur during the attunements. I would like to know what this event was. What this condition was that she experienced.

**A:** She should be careful not to "spread her self too thin."

**Q:** (L) And what does that mean?

**A:** One does not need to cram learning, "steady as she goes."

**Q:** (V) They're punctually correct, aren't they? (L) Yes, they are! So, is that in a sense a caution? {V was referring to punctuation, not punctuality.}

**A:** Yes.

**Q:** (L) Can you describe what it was that was taking place with her? Or define it?

**A:** Soul bilocation.

**Q:** (L) So, it was not exactly a state, as the Sufis describe?

**A:** No.

**Q:** (L) And where did she bi-locate to?

**A:** Not easily explainable.

**Q:** (L) Was it to another density or dimension? Or parallel universe or spiritual domain? (T) Norfolk Naval Station? (laughter) Destination of bilocation! (L) Was this a beneficial event for her?

**A:** No. She has been ripping open the fabric too much.

**Q:** (V) Do you know what that means? (TM) The fabric of this dimension? (L) Is T correct? The fabric of this dimension?

**A:** Close. Each soul has its own patterning, which is held in place by the three bodies of existence [planchette swirls a few times] ... “thought center, spirit center and physical center,” there are specific methodologies for adjusting these, and travelling into or out of other planes of existence. When one does not properly utilize these, one tears the fabric of their trilateral continuum when they seek to travel. This can be very problematic, and may lead to the soul being unable to reconnect with the body, thus causing the physical center to perish!!!

**Q:** (L) The man who was giving the attunements, was he aware of what was happening, or what he was doing?

**A:** Aware only of unusual sensates.

**Q:** (L) He did this? You let him touch you? (M) Yes. (L) Oh, Jesus! (M) Sensations, that’s what he said. He was aware of it, he just didn’t know what it was. (T) He felt it, but he had no idea what was going on. (M) He just felt that it was something to do with the attunement. I guess, I mean, I don’t know! (L) Did it have anything to do with the attunement?

**A:** No. It had to do with previous experiments.

**Q:** (L) Why did she see like a past life review?

**A:** You described it well.

**Q:** (L) In other words, when I said that when she separated from her body, she was able to access the past life review, just as if you were in the process of dying. (M) Well, experiments by who? (L) You!

**A:** You.

**Q:** (L) So, what was, what happened with this interaction that caused this to trigger right there and then? At that moment? What was the trigger?

**A:** Spirit center stimulus.

**Q:** (L) And what was the stimulus? Was this stimulus...

**A:** The "initiation."

**Q:** (L) The initiation stimulated the spirit center. (M) So, what would they have me do? (L) Well, they aren't going to tell you that! (M) No? (L) You have to make your own mind... (M) What's the proper way to go through these.. If I'm tearing my fabric, how do I not tear my fabric? (L) Slow down?

**A:** By ceasing until it is properly healed.

**Q:** (L) You've got to be healed. (M) Healed of what? (T) Healed at the rips and tears? (L) Well, maybe more than that...

**A:** Yes.

**Q:** (L) All right, healed at the rips and tears. Approximately how long would that take? (T) Until it's done! (L) Oh, stop it!

**A:** Open.

**Q:** (M) Can that beam, can that portal take care of it... (V) Can you suggest how the rips might be healed? Is there... (L) Wait a minute, wait a minute... (V) Sorry!

**A:** It is a natural process.

**Q:** (L) Marcie wants to know, can the portal that she has in her house take care of helping to heal this...

**A:** No.

**Q:** (T) The portal you have in your house? (M) I've got it in my aura, we've seen it on film. (L) Maybe that's part of the tear?(M) I don't know... (TM) Look at the location of it... (M) It sure is huge, and it sure is...

**A:** No.

**Q:** (L) No, it's not part of the tear. (T) Does everybody's house have a portal in it?

**A:** No.

**Q:** (L) She's got it in the photographs. Amazing. You haven't seen these photographs. These photographs will knock you out of the water. (T) I'm still waiting to see the photograph of the board. (L) I sent it to Ark. (T) Awwww, I'm never going to see the photograph of the board!!! (L) No, no, no! Cherie has a copy of it. She's going to make us an enlargement. (M) So, what am I supposed to do with this, can the portal assist in any way, this thing in the aura, will it do me any good, I mean, what's it for, anyway?...

**A:** It can assist you in becoming possessed.

**Q:** (M) Well, that's just wonderful!!! How did it get there? (TM) Somebody did something bad there? (M) The top of my head? (TM) Now, wait a minute, it's in your aura? (M) Yes, it's on the top of my head, it comes right down. (TM) Ohhh!

**A:** No it is not a part of you.

**Q:** (M) OK, so it just kind of likes to hang out in my aura! Loves photographing my aura. It loves to be there, we don't know what it is. (T) Maybe it jumps in your aura because it's photogenic! (V) Can it be resolved with spirit release? (L) No. Any personal advice for her at this point?

**A:** Consolidate classes into three way study groupings.

**Q:** (L) What is a three way study group?

**A:** Combined study of three subjects.

**Q:** (L) All right, combine the study of three subjects, instead of studying them separately. So, what subjects are you teaching? (M) I teach healing, I teach the rays of initiation, and I teach auras. (L) Well I guess they are saying to teach all three of them together! Have them all assemble at the same time, instead of separately. (M) The only one I don't do, that's really combined, I teach about healing and auras, but the other one, the one about rays of initiations, that is a separate class. It doesn't fit in! (L) Well, see if you can work a way to do it, like, an hour on this subject, and then we'll go on to this subject. Like a two-class school. And now we go to this, and do it all in one fell swoop, and that way, you've got about two hours. All right, anything else for her? (T) How about asking where this portal came from? (L) Yes, what was the generative source? The one in her house.

**A:** More than one.

**Q:** (L) OK, there's more than one generative source. So, it's a combination of factors. Is it part of the historical site? The space-time location?

**A:** Yes.

**Q:** (L) Is it part of the metaphysical activities taking part in the house itself?

**A:** Yes.

**Q:** (L) Is it part M herself? And her own mental states?

**A:** Other occupants. More than her.

**Q:** (M) Do they mean live ones or dead ones?

**A:** Both.

**Q:** (M) That's what I thought. (V) How can it be removed? (L) What would be the best technique for her stopping activity and allowing herself to heal, and getting herself on track so that she doesn't get any real... Jesus, can you imagine, if this kind of happened again, and you just checked out ?And couldn't get back?

**A:** Changes in lifestyle.

**Q:** (L) Changes in lifestyle... and what specifically, can you list the several...

**A:** No.

**Q:** (M) Oh, man! (L) You've got to know this yourself! You know them yourself!!! (M) Can you ask them... (L) Just think about this, dear. (TM) The more you deny it, the worse it gets.

**A:** We would like to have the opportunity to discuss other issues at this session besides personal issues, as this drains the channel energy. But, we will accept limited questions from those in particular need.

**Q:** (L) I want to finish for her. Can I ask just one short, maybe a couple added to it; quick ones for Marcie?

**A:** One, please.

**Q:** (L) The question I have is, she is in a situation where she is somewhat obfuscated in her directions. It seems that many sorts of sources seek to...

**A:** Obfuscation is illusion.

**Q:** (L) I know, but what I'm trying to get at for my question is yes, she's got all these illusions that she gets thrown at her. But, it seems to me that a person who gets this much attack...

**A:** Finances would take care of themselves, miracle.

**Q:** (TM) I have a question. What is happening in my car...(L) No!  
(TM) It is just a yes or no question! (L) Well, ok. (TM) Have I been abducted in my car, like Laura suggested?

**A:** Maybe.

**Q:** (TM) Thank you, that's all I wanted to know. (L) Well you should have asked it in a different way! I thought you were going to ask a mechanical question! (laughter) It's been done! I did it!!!! Remember, we asked about LM's truck, and he wanted to argue about it, and the next day, found out it was absolutely correct! He argued with them!!! They diagnosed the problem with his truck, and he argued with them; 'Well they don't know anything about mechanics!' He stomped around and everything. The next day, the guy from across the street comes over and looks at it and says exactly the same thing they did! That's all it needed, just a little rubber thing stuck over a hole. (laughter) Did he believe? No! It didn't matter to him! OK, I do have one question here. I talked to Chloe the other day, and I told her what we got the other night, about {her recently deceased husband} being sleeping, and she wanted to say that she just couldn't accept that, because so many other people have had visitations and visions and dreams and so forth of him wandering around and doing all these good deeds in the other world. Comments, please.

**A:** Not true.

**Q:** (L) It's not true. Then why are all these other people saying that they are seeing TomG or having experiences with him, either in dreams or visual, or whatever, and what are these people seeing and experiencing?

**A:** In short, inflated opinions of ability manifest false reality.

**Q:** (L) So, these various people who think they're psychic have such inflated opinions of their own abilities that they are all calling her up and saying 'I saw him, he spoke to me... he came to me in a dream...' (M) Who is TomG? (L) My girlfriend's husband just died. (V) Is he still sleeping?

**A:** Emotions directing events.

**Q:** (T) They are also just telling her what she wants to hear?

**A:** Yes.

**Q:** (L) So, I think I should just not say anything further about it. I was trying to say it in a more comforting way, but she, I guess, what is it...

**A:** She is under emotional "cloud"

**Q:** (L) OK, we have all given Marcie emotional support. We all love her, and we all see her as an important person who is being attacked from all sides. We are all here, at all times, to help you when you need it. So, therefore, you have advice, you have been promised a miracle, it may have something to do with a phone conversation I had the other day... (M) Yes, that was weird! (L) Now, carry on! (T) Was there something you wanted to speak on this evening? You said there were other issues that you wanted to talk about.

**A:** Wait a minute... V, my dear, your retreat will be tremendously

uplifting and positive!!! Lots of fun, too.

**Q:** (V) Yahoo! Without getting personal, and going into explanations, was the experience that I had after I fell asleep last night past life remembrance?

**A:** No.

**Q:** (V) Can you tell me what it was without going into detail.

**A:** Subconscious mind wandering.

**Q:** (V) Jesus! (L) Well, in her subconscious mind wanderings, was she picking up something in the atmosphere; some thought, or some fear? (V) I can't believe that that would come from me!

**A:** No. Cycling.

**Q:** (L) Can you give her anything more on this? She was very distressed about it... You can pick it up out of my mind if you want. Her mind, whoever's mind.

**A:** No.

**Q:** (L) Is it anything to be concerned about as a prophetic thing?

**A:** No. Why would you say prophecy?

**Q:** (L) Well, she was concerned that it was something that could happen... (V) No, I wasn't concerned in that way... I'm concerned, I'm disgusted by it, and I would be much easier for me to handle if it was some kind of past life memory than if it were something that comes from my psyche. Because it disgusts me.

**A:** Disgust manifested in dream state wanderings always result from repressed situations.

**Q:** (L) Ohhh, I see! Was that something that was in the air and was... (V) Repressed as in my relationship with the person.

**A:** Maybe.

**Q:** (L) Do you want to drop that? {Energy burst from the board} A couple of weeks ago you gave us a warning about Ark travelling on his over the road trips and possible alien monitoring. Is his intention to be fully aware and conscious and not travel at night going to help with this particular situation? This warning?

**A:** Maybe.

**Q:** (L) He is now of the opinion that his awareness of the state of the other person {his ex} as being possibly desirous of undermining his position at the University, that his awareness will forestall or circumvent this. How high a percentage is there of this happening, even with his awareness?

**A:** ? Awareness is not balanced yet.

**Q:** (L) So, his awareness is not complete yet. He is not fully aware of how deep and dark and dooey these aliens can be when they start working through people? Is that it?

**A:** Goin' thru the motions, babe.

**Q:** (L) What? 'Goin thru the motions, babe?' What does that mean? Does that mean anything to anybody?

**A:** What Ark is doing, but, it is the first step to learning.

**Q:** (L) What does this mean? I don't quite get it. I'm being dense here. (T) We told him that this is happening, so yes, he's going thru the motions for you, that he's understanding this... (M) He's got to go through it completely before he understands... (T) ... but it's got to really happen for it to... (L) Is that it? Is Terry on to it here, that it's got to really happen...

**A:** Close.

**Q:** (V) Has he been hauled out, like Marcie and I've been hauled out? (L) Who the hell knows?

**A:** No. Not completely.

**Q:** (V) Marcie and I are just the lucky ones! (T) Such luck! (V) Yeah, right! That was laced with sarcasm!! I do hope you heard that! (T) No, I didn't catch that at all, haha! (L) In terms of this interaction with Roger Santilli, is there anything that would be fruitful to follow in terms of trying to assist him in his work, and in his...

**A:** Let events unfold.

**Q:** (L) It sounds like something is going to unfold. (T) Just let him do what he's going to do. (L) I was talking about our involvement... (T) There's nothing we have to do ... (L) Well, ok, right....

**A:** So were we.

**Q:** (V) What? What does that mean? (L) Ok, they also were talking about our involvement with him... (V) This is like taking notes in classes, you know! This is like practice! This will get me ready for the University! (T) Do we have to spell it out for you? {Extended laughter!} (V) My little finger flies sometimes, Terry, I want to tell you!

**A:** Mind programming.

**Q:** (L) What about mind programming? (T) Is that like Fox and NBC? You know, 'Must See TV'! (V) This is mirth, guys! (L) Mind programming... (T) OK, what about mind programming? (V) In reference to what?

**A:** We thought we would just throw that onto the table.

**Q:** (L) Well, you certainly did! I guess that's what they want us to talk about! (T) Mind programming! As in programming of one's

mind.

**A:** TomM received some most recently.

**Q:** (L) And who did he receive the mind programming from?

**A:** Cultists.

**Q:** (T) What form did it take?

**A:** Negative.

**Q:** (V to TM) Are you aware of this? (T) Not negative or positive, but what form was it presented to him as?

**A:** Hypnotic.

**Q:** (T) Was he awake or asleep at the time?

**A:** Both.

**Q:** (T) No, no. Before the hypnotics, was he awake?

**A:** Yes.

**Q:** (L) Was this a pre-hypnotic trigger?

**A:** No.

**Q:** (L) Was it hypnosis at a distance?

**A:** No.

**Q:** (T) How was it conveyed to him?

**A:** Lights, fires, chants.

**Q:** (V) Were you aware of this? (L) How long has it been since you've hung out with that metaphysical church coven} bunch? (TM) I haven't seen any of them since way back when. (L) Way back when, what is that, a couple of years? (TM) Yes (L) Well,

then that's still recently... (T) Lights, what and chants? (V) (reading) 'lights, fires and chants.' (T) OK, thanks.

A: Yes.

Q: (T) Was he with them...? (L) Oh, yes, he was...

A: Yes.

Q: (L) This is what we were... (T) I just wanted to make sure that this was not a long-distance thing... that they did it from a distance and... (TM) Yes, that they still didn't have their hooks into me. (L) Good question, is this programming still active?

A: Close, though.

Q: (L) Close, though to what?

A: Almost.

Q: (T) ... that this wasn't done from a distance, that he wasn't with them physically, like this, that he was somewhere nearby when they did this... (L) Oh, he was close... (T) He was close to them? (L) Right. (T) But he wasn't...

A: No.

Q: (T) OK, then, they weren't responding to what I was saying. (L) So they were doing lights, fires and chants, and he was not there?

A: Response was to "Hooks"

Q: (L) Are some of the choices he's been making in his life in the last two years the results of this programming?

A: Maybe.

Q: (L) I suppose we better let him read the Greenbaum paper; everybody here has read them, right? (M) That's where all the accidents are coming from...? (T to TM) You haven't read the Green-

baum papers yet? (TM) I don't think so! (T) Welllllll..... (V) It's very enlightening, I'll have you know! (T) There's a person who's thrilled about this one!!! (To Laura) Print them out and give them to him. (TM) I want to know; did I get married as a result of this programming?

A: Yes.

Q: (L) Did I get married as a result of some similar programming?

A: No.

Q: (L) Did M?

A: Yes.

Q: (V) Did I?

A: No.

Q: (T) Did Terry?

A: No.

Q: (T) Did Frank?

A: No.

Q: (L) Frank never got married! (T) Well, I was just making sure that everybody felt like they were in on all this! (M) This Greenbaum program, was it due to my father?

A: Yes.

Q: (M) Thought so! (L) Remember, TomM's father was military, too! (M) Twenty years! {Referring to her father, a Navy SEAL} (T) While I'm tossing it... (TM) Was it done to my father?

A: You were "Greenbaumed." {Directed at Marcie. This turned out to be all too frighteningly true. See the chapter of The Wave entitled "Alligator Alley." That's the story.}

**Q:** (T) Was Jan's friend Margaret Greenbaumed?

**A:** Yes.

**Q:** (T) She's got all the signs... (L) Was TM Greenbaumed?

**A:** No.

**Q:** (V) What about Violette?

**A:** No.

**Q:** (L) What about Frank?

**A:** No.

**Q:** (L) Laura?

**A:** No

**Q:** (L) Terry?

**A:** No

**Q:** (T) Jan?

**A:** No

**Q:** (M) So, I'm the only one here that's been Greenbaumed?

**A:** (TM) So, you got mental programming, but it wasn't Greenbaum? (L) I didn't know that I had mental programming... (TM) They said maybe...

**A:** Laura had more advanced work done on her.

**Q:** (V) That opens up a whole new can of worms. (L) And what do you mean by that?

**A:** Not now.

**Q:** (T) Maybe they want to go on with... (L) No, they've told me before; they're not going to tell me. (M) Were you Greenbaumed? (L) No. Who did this work, can I have that? Can I know that?

**A:** Consortium.

**Q:** (L) Is there any possibility, to some extent, that I have overcome this influence at the present time?

**A:** No. Was partial, then aborted, leaving fragments of trigger response programs that have been in remission.

**Q:** (L) Why was it aborted?

**A:** Because STO forces intervened.

**Q:** (L) And when was this?

**A:** Mid "fifties."

**Q:** (L) So it was when I was three or four years old. (T) I think we should go back to what we were talking about with TM, because they brought it up. (TM) Am I still receiving instructions from the programming? Am I still receiving programming from them?

**A:** Buried for future triggers.

**Q:** (L) Is there anything he can do to deactivate this programming?

**A:** Would take powerful hypnotic work. Beware of stresses of a most personal nature.

**Q:** (L) Do you mean sexual actions, activities might be triggers or connected to this?

**A:** Partly.

**Q:** (T) Work related. All different kinds. Anything could trigger it... (L) They said personal, most personal, though... (T) Well, yes,

(V) Wouldn't it seem like family... (T) Work and jobs are very personal... (L) No. Most personal is physical, you know, emotional... (TM) Family... (T) Your job is financial, financial security. (L) Well, that's right. (V) Is your family going to cause you stress? (TM) Stress, and I have not been able to hold down a job since then. (V) Do you live with your family? (TM) Not any more! (L) Any further clues for him? (T) What was it that they... what was given to TM? What was he told to do, or what was the mind control about? (L) What were the instructions?

**A:** Discover.

**Q:** (T) Is this something TM will be able to discover? Does he have enough information to work on?

**A:** Not by himself.

**Q:** (L) Is his wife and the baby part of the hook?

**A:** Yes.

**Q:** (TM) Is the hook attached to the physical, emotionally, spiritual, or all?

**A:** All.

**Q:** (TM) Is there a physical location where it's attached in all three, in the same place?

**A:** You were particularly vulnerable at the time remember, this particular group has an uncanny ability to get to those who have parental influences with a troubled past. {Phone call interrupted end of transmission, call was from TM's wife, Andrea.}

**Q:** (L) Is she Greenbaumed?

**A:** Yes.

**Q:** (TM) Where did she receive Greenbaum programming? (L)

Don't even ask that until you've read the Greenbaum papers. (TM) Never mind, disregard. (L) You can get all of that just by reading them. (V) Was she just coerced to make this phone call? (L) She was triggered to. (TM) Oh, I know, her father was in the Navy... (L) Why are we not surprised!!!

**A:** Yes. And V's too, but fortunately in too low level a capacity.

**Q:** (L) Does the Greenbaum influence, or interaction last indefinitely throughout a person's life, if something isn't done to terminate or halt it?

**A:** Yes.

**Q:** (L) Mind programming... Where are we going to go with this, guys? (L) Oh, ok, go. What were the programs? The main programs?

**A:** Must not say.

**Q:** (L) Marcie wants to know how extensive the Greenbauming was in her case. Was it extensive?

**A:** Yes and your husband, too!

**Q:** (M) That's just wonderful! More pleasant things this evening! (V) I've been sitting in your position, where I've gotten a bunch of bad news one night, and I know how you feel! (F) It's not really bad news, though, because it's good to know... (V) It protects you to have the knowledge. But, it's tough to hear. (TM) Well, the next time you're doing something, and you don't know why you're doing it, it seems completely stupid, there's a thought... (L) Ask yourself every time, why am I doing what I'm doing? Is it really me doing it, or am I being... (M) Is there anything to cure it? Can anything be done? Now we know with him, it's hypnosis. (T) It is for everybody, I'm afraid. (L) I'm afraid, yes. Reread the Greenbaum speech.

**A:** Awareness is step number one.

**Q:** (TM) Will this Greenbauming be passed on to my son?

**A:** No.

**Q:** (T) It's a process; it's not hereditary. (L) I'm going to ask this. Don't get crazy when I ask it. Is this his son?

**A:** No.

**Q:** (TM) I'm not sure I understand, now. (L) And, since you, I mean, I had a sense of that ummm... is this an alien manipulated pregnancy?

**A:** No.

**Q:** (L) What is the scoop here in terms of that answer.

**A:** No scoop.

**Q:** (TM) Did she sleep with another man?

**A:** When?

**Q:** (TM) Around the time she became pregnant?

**A:** No.

**Q:** (TM) How about before we got married?

**A:** Yes.

**Q:** (V) I'm not understanding for a second here... (L) If it's not his son, then who's son is it? (V) And, if she wasn't sleeping with someone else around the time she got pregnant, then...

**A:** Not what we meant.

**Q:** (L) What did you mean?

**A:** Son not a programming trigger.

**Q:** (L) ...but when you said it was not his son...

**A:** Son not trigger.

**Q:** (L) That's what you meant, so you didn't... his son was not a programming trigger. (V) So that's his flesh and blood son... (M) Oh that, it is a son. (TM) OK, so it's my flesh and blood son, but not a programming trigger.

**A:** Right.

**Q:** (T) Andrea (TM's wife) is the trigger; one of them. (L) Well, TM finds himself, we all, I mean, jeez! What do we do about these difficult situations that we plant ourselves in the middle of, due to programming? Then we have to extricate ourselves, at great cost and pain? Having done it already myself, I know how much pain...

**A:** No need to extricate, if necessary work is done, in some cases.

**Q:** (L) If two people who are married to each other are Greenbaumed, is it possible that they could be programmed to kill each other?

**A:** Maybe, but not always.

**Q:** (TM) Or any two people who have had the programming?

**A:** The programming is mainly intended to produce erratic behavior, for the purpose of "spooking" the population so that they will welcome, and even demand, a totalitarian government.

**Q:** (L) So, the programming is designed to, in other words, when the people are just being erratic...

**A:** Think of the persons who have inexplicably entered various public and private domains, and shot large numbers of people... Now, you have "met" some of these Greenbaum subjects...

**Q:** (L) Let me say this. If this is what we're saying, well, what I'm saying is, that ... Is this Greenbaum programming something that goes along the line of what I've just described a part; a part, I don't think that's all of it...

**A:** In part.

**Q:** (L) Is there also the implanted triggers to activate at a certain point in future time, to create a mass chaos, in the public domain?

**A:** Better to discover that one on your own.

**Q:** (L) Ok, that's another one that's dangerous to know right now... (V) Was the person I met last week, {Name redacted}, was he Greenbaumed? Has he been Greenbaumed. (L) He was bizarre, wasn't he?

**A:** Now, some history... as you know, the CIA and NSA and other agencies are the children of Nazi Gestapo... the SS, which was experiment influenced by Antareans who were practicing for the eventual reintroduction of the Nephelim on to 3rd and or 4th density earth. And the contact with the "Antareans" was initiated by the Thule Society, which groomed its dupe subject, Adolph Hitler to be the all time mind programmed figurehead. Now, in modern times, you have seen, but so far, on a lesser scale: Oswald, Ruby, Demorenschildt, Sirhan Sirhan, James Earl Ray, Arthur Bremer, Farakahan, Menendez, Bundy, Ramirez, Dahmer, etc...

**Q:** (L) Is there any particular individual who is currently being programmed to take a more prominent position in terms of this...

**A:** Later... you must know that Oswald was programmed to be the "patsy." So that he would say many contradictory things. Demorenschildt was both a programmer and programmed. Ruby

was hypnotically programmed to shoot Oswald with an audio prompt, that being the sound of a car horn.

**Q:** (L) The question has been brought up, is there some way or means that one can distinguish or discern a victim of Greenbaum or other mind programming by some clues?

**A:** Not until it is too late.

**Q:** (L) Was SV Greenbaumed?

**A:** Yes.

**Q:** (T) Yes, well, we kind of figured that already... (L) Yes, but I was just checking here... (T) Is JW Greenbaumed?

**A:** Yes.

**Q:** (T) And he carries guns around! Although, I'm not sure he knows how to get the cartridges in! (L) What about MF?

**A:** No.

**Q:** (L) SH?

**A:** No.

**Q:** (L) Anybody else got any likely suspects? (T) EB?

**A:** Now you have touched on a whole other subject, my friend. At least his wife is blissfully ignorant.

**Q:** (L) What have we stumbled upon with EB? Is he a programmer?

**A:** Discover.

**Q:** (T) I think I'd prefer not to! (L) Is there anything further you'd like to add to this subject for our edification before we shut down for the night? (V) I'd like to know if any Presidents have been Greenbaumed? (L) Well, we know some probably have!

**A:** Yes.

**Q:** (T) How many have we had now? Clinton is number what President? (TM) 42.

**A:** Remember, the “Greenbaum method” is one of many in existence.

**Q:** (L) OK, further... (T) What did it say? (V) You’ve got people getting hauled out and abducted, I mean... (L) All kinds of stuff going on. (M) Is (Name redacted) set to go off soon? (L) No, they told you, awareness is the first step in undoing it! Focus on that! You’re aware! How many people are?

**A:** It is a veritable potpourri.

**Q:** (L) Any further for tonight?

**A:** There’s much much much more to discuss about all of this, but if you wish to stop now, that is your choice, and we will continue later. But, it would be helpful if you begin that session on subjects not of a personal nature!

**Q:** (L) Can we plan to pick up on this subject next week?

**A:** Yes.

**Q:** (L) Would to be better if all of those present now, be present for the continuation?

**A:** Sure!

**Q:** (L) Well then, unless there is something else of significant importance to say before we shut down for the night...

**A:** Tom’s wife will object strenuously.

**Q:** (L) Anything else?

**A:** Resist.

**Q:** (L) Anything else? For anyone else? No? I'm ready to say goodbye.

**A:** Goodbye.

END OF SESSION

## **4.37 October 12, 1996**

Frank, Laura, TomM., V

(Tape missing, reconstructed from notes and memory)

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Moretir.

**Q:** And where do you transmit from?

**A:** Cassiopaea.

**Q:** In an earlier session you mentioned that we ought to discuss the matter of mind control...

**A:** Programming is the word you need, not "control."

**Q:** Tom has had some very strange events happening to him and he would like to know if he has been Greenbaumed?

**A:** Tom has not been "Greenbaumed," but mind programmed by those who have ties to a wiccan organization.

**Q:** How does one tell if they have been programmed?

**A:** Pay attention to the signs.

**Q:** (T) What are the effects or intentions of this programming?

**A:** Difficulty keeping up with the demands and pressures of life as well as before his involvement.

**Q:** (T) Any specific signs?

**A:** We gave you one, now for 2: wife “acting up.” Also, parental problems that have already begun.

**Q:** How does one overcome or cancel this programming?

**A:** The same as always: Knowledge protects.

**Q:** In what ways will knowledge help to cancel programming?

**A:** In ways directly affecting Tom.

**Q:** I don’t understand. How can knowledge help to cancel programming?

**A:** So that the awareness can be the foundation for being able to deal with situations, and possibly rectify some of them.

**Q:** (L) Okay, change of subject: On a couple of occasions you mentioned a group called the Antareans. Who were these people or aliens?

**A:** Antareans were the name given by 4th density groups in contact with the Thule Society on third density Earth, before and during World War One.

**Q:** What are they called now?

**A:** There is no one currently labeling themselves as “Antareans,” in contact with anyone now.

**Q:** So, they are no longer here?

**A:** No, not this particular group.

**Q:** Okay, I would like to know why the individual who says he is my cousin, suddenly appeared in my life when I first attended a MUFON meeting after the UFO sighting over my pool? I mean, this was a LOT synchronous. Was he sent to spy on me?

**A:** Not exactly, more like this: was sent to interest you in a diversionary path that would ultimately lead you down a path to 4th density STS.

**Q:** Well, you have said that MF and JW were BOTH involved, yet they seem to hate each other, or say they do. Was this just an attack from another direction, in case the JW attack did not work?

**A:** It was also an effort to separate you from any influences which might dissuade you from your intended interest in JW.

**Q:** (L) Well, was I mind programmed? You said once that I was not Greenbaumed, but that something else was done. What was this?

**A:** The work that was attempted was more intense, but it was aborted because it turned out that your frequency resonance vibration was not proper for that particular type of “experimental” programming.

**Q:** Does this mean that there was something about my vibrations that caused what they were trying to do to result in positive things?

**A:** Possibly, in an off-hand way.

**Q:** You also said that STO intervened and stopped this... does this mean that there is some reason to protect me?

**A:** Okay... learning is an exploration followed by the affirmation of knowing discovery.

**Q:**

A: No comment from “the peanut gallery,” please.

Q:

A: Not “left,” Tom, “leaves.”

Q:

A: One day, you will know this.

Q:

A: Neither.

Q:

A: Closer but not close.

Q:

A: There is more than one issue here.

Q:

A: Part of the equation.

Q:

A: Through Susan.

Q:

A: This is complex, and does not “work” in the way you envision.

Q:

A: You are making positive moves.

Q:

A: Partially.

Q:

A: Both. Careful there!

Q:

A: With what is available.

Q:

A: Your pool.

Q:

A: Impatience.

Q:

A: You are doing just fine.

Q:

A: Is this what you expect?

Q:

A: Not necessary.

Q:

A: Yes, but you are not showing faith or patience.

Q:

A: Ask Anna.

Q:

A: Then what do you think?

Q:

A: Okay.

Q:

A: Not all.

Q:

A: And he is correct!

Q:

A: Never you mind.

Q:

A: Must say this.

Q:

A: Because his situation is complex and precarious.

Q:

A: Sometimes.

Q:

A: He needs you for “fine tuning.”

Q:

A: Discover.

Q:

A: More through your given, and learned, talents.

Q:

A: Not for this session. Good Night.

END OF SESSION

## 4.38 November 23, 1996

Frank, Terry, Jan, Alice, Laura, Ark via computer

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have...

**A:** Tonno.

**Q:** (L) And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) We have quite a variety of questions this evening. The first is regarding the difficulties with UFL and the financial arrangements {referring to Ark's planned travel to the US}. Will this work out so that he can be here the 1st of February, as planned?

**A:** Maybe a slight delay.

**Q:** (L) And the personal finances?

**A:** You will see.

**Q:** (L) You said before that her {Ark's ex} actions would accelerate the legal process.

**A:** In progress.

**Q:** (L) It looks now as though the legal affair will not be over before he comes here... this distresses me.

**A:** These are things you must wait to see.

**Q:** (L) Okay, is there anything you would suggest in regard to any of his situation?

**A:** Slow down for strength of mind.

**Q:** (L) Okay, switch gears. Can you comment on the strange nature of the events of the past two weeks...

**A:** Learning is fun.

**Q:** (L) Was PatrickZ abducted in my house as he claims.

**A:** Probe further and you will know.

**Q:** (L) Okay, talk to P. Why is his mother going off into psychotic behavior?

**A:** Not psychosis, neurosis.

**Q:** (L) Well, then I guess we are supposed to be figuring it out as we go...

**A:** Yup!

**Q:** (T) Is Fearon H dead? {UFO researcher of our acquaintance who went out to investigate Area 51 about 6 months previous to this session.}

**A:** Yes.

**Q:** (L) Did he commit suicide as we were told?

**A:** No.

**Q:** (L) Was he murdered?

**A:** No.

**Q:** (T) Was it an accident?

**A:** No.

**Q:** (L) Well, how does one get hung by the neck if it is not an accident or suicide or murder?

**A:** He was not hung.

**Q:** (T) That's what I figured. But he IS dead?

**A:** Yes.

**Q:** (J) How did he die?

**A:** Stroke.

**Q:** (T) Well, I can believe that. He popped every pill he could find. He was in terrible health. See this thread for additional info: <http://cassiopea.org/forum/index.php?topic=12503.0>

**(T)** What is wrong with my computer?

**A:** Offset files. Tangled web, being fed by incorrect steps to correct. Need to back up all data, then clean drive. Shortcuts won't do it, and it is not as tedious as you think. But not doing it will be! {This suggestion was followed, and worked.}

**Q:** (T) Thank you...

**A:** You are welcome... Minor Cassiopean "glitch," sorry!

**Q:** (T) About Flight 800. Pierre Salinger claims that the info floating around on the internet is accurate. He says that the Navy downed the flight.

**A:** Close. Pierre Salinger is an impeccable journalist and not one to "fly off the handle."

**Q:** (T) Very true. And that is why I am amazed that the rest of the journalism community is attacking him.

**A:** Why should you be amazed? They are "bought and paid for."

**Q:** (T) What did happen to flight 800?

**A:** This was the result of an experiment gone awry. So was KAL "007" in 1983.

**Q:** (L) What was the nature of the experiment?

**A:** Testing of secret impulse guidance system using civilian airliner as an arbitrary “bounce” guidance target. Instead, it became the “homing” target, and a different aircraft became the bouncer. This was because the programmers did not anticipate the lower than expected altitude of the 747. Warning: this must stay in this room for the present!!!!!! The facts will eventually be discussed by others. At that time, the danger is lifted.

{At this point, it has been discussed in the exact same terms as described here in a reputable, national magazine.}

Now, about KAL 007... that one is not dangerous to know. The plane was deliberately instructed to fly off course in order to trigger the Soviet’s Pacific air defense system, to “see what they were made of” in that area. The plane was lost, but the experiment worked. They did not expect them to shoot down a civilian airliner. Now, all moving targets create electronic impulses. These can be “read” by the proper extremely high tech equipment. Older radar guided systems are subject to malfunctions in weather conditions that are severe, as one example. Also, the impulse system is an offshoot of the electromagnetic pulse experiments being carried out at Montauk, Brookings and elsewhere as part of the HAARP project! In connection with Pentagon missile tests, HAARP has many interesting tie-ins, not the least of which is your cell phone towers.

Now, the homing target can be any moving object. It can be whatever is entered on the computer. It can be a squirrel in a tree, a jogger on the beach, a building, whatever you want. The system looks for any moving target in order to establish recognition to the computer, in order to establish recognition of match pattern of pulse. TWA 800 was flying at the exact same altitude that was supposed to be designated for the “drone” craft. The drone plane was farther out at sea. The “bounce” target was to be any moving object in the air within 400 square miles.

**Q:** (L) So, TWA 800, through a series of problems, happened to find itself at the right altitude, a restricted altitude, within the parameters of the experiment. Anything further on this?

**A:** Not for now.

**Q:** (L) Okay, let's move on to Courtney Brown. (T) We all know who he is, and what he is writing about in regard to remote viewing... what is it all about?

**A:** Vague.

**Q:** (T) Is the book Courtney Brown wrote, "Cosmic Voyage," concerning the Martian population...

**A:** It is true that there are underground bases on Mars, but they are Orion STS.

**Q:** (T) Are there Martians as portrayed by Courtney Brown?

**A:** Not exactly. He is portraying the Orion STS as the Martians.

**Q:** (T) Is Courtney Brown a government disinformation agent?

**A:** More as an "agent provocateur."

**Q:** (T) Is he working for the government?

**A:** Not directly, and remember, the government is not one entity.

**Q:** (L) Who is primarily backing Courtney Brown?

**A:** Rockefeller group.

**Q:** (L) Is Mike Lindemann and company part of this Rockefeller group at this time?

**A:** Yes.

**Q:** (L) Linda Howe?

**A:** No.

**Q:** (T) Did Courtney actually do remote viewing to obtain the information in the book?

**A:** Not really. Not needed.

**Q:** (T) Does this mean that the whole story is concocted on his part?

**A:** Semi. Elements of it are factual.

**Q:** (T) Yes. I could see that there were factual elements. I could also see that there was a LOT that was questionable. that conflicts with EVERYTHING else that has come out from other researchers. This is all totally twisted and different.

**A:** Close.

**Q:** (T) Is Courtney able to do remote viewing?

**A:** Yes.

**Q:** (T) But he did not use it with this book?

**A:** No.

**Q:** (T) So, the book was made up the way it is. It is a story. Some factual information, some invented information, some pure BS thrown in to fluff it out. So, the book is NOT an account of work that has come from remote viewing sessions?

**A:** No, but not needed.

**Q:** (L) You have said twice that remote viewing was not “needed.” Where did he get his information?

**A:** Secret sources. Agents of the “nation of the third eye.”

**Q:** (J) What or who - is the “Nation of the Third Eye?”

**A:** Terran civilization under the surface.

**Q:** (L) Now, wait a minute. I remember that when they said the Aryans were brought from Kantek, and that they were “sturdier,” or something like that, and I remarked that it seemed that they would be less sturdy - and the C’s answered “on the surface.” Now, that has always bothered me. I don’t think they meant “surface appearances.” Have the Aryans been glorified as the “master race” because they are more suited to living underground?

**A:** Close. All types there are “Aryan.”

**Q:** (L) Okay, is this a Terran underground civilization that has been ‘managed’ by Orions, or did it develop on its own?

**A:** One at a time.

**Q:** (L) Did the underground civilization develop on its own?

**A:** Yes.

**Q:** (L) Is it managed or manipulated by Orions as well?

**A:** Yes.

**Q:** (L) Are these “managers” Orions from other densities?

**A:** Yes and no.

**Q:** (L) I don’t understand. Are there some that are 4th and some that are 3rd?

**A:** The human types there are “bi-density.”

**Q:** (L) Holy Shiite Moslems!

**A:** Grays and Lizards are 4th density. They can “visit” 3rd density, but they must keep returning to 4th in order to “regenerate.”

**Q:** (T) Are you saying that the human/Aryan types can exist as long as they want in any density?

**A:** In 4th and 3rd.

**Q:** (L) They can move back and forth, existing with equal ease on either density?

**A:** Well, not with “equal ease,” because 4th density is easier, naturally.

**Q:** (T) So, the information Courtney Brown was given to write this quasi fiction book, is about the Aryans and not about the Martians?

**A:** “Martians” is easier to understand for the less well- informed, not to mention any discussion of the densities!

**Q:** (T) Absolutely. Martians are easier to accept. A lot easier to understand than densities! (L) Okay, Third Eye. What is this?

**A:** That is what they call themselves when pressed for an explanation by surface types, such as yourselves. They were the inspiration for Masonic lore and Illuminati, too.

**Q:** (L) Does this “Third Eye” designation have a connotation of third eye abilities as we understand them?

**A:** Psychic.

**Q:** (T) Does Courtney know he has been had?

**A:** He has not been “had.” He is under the employ of those who pull the levers, so to speak.

**Q:** (L) You said “pull the levers.” Is Courtney Brown a robot, Greenbaumed, mind-controlled, implanted, or any or all of the above? (T) Or is he just foolish?

**A:** No. Not so foolish, he does not worry about paying the power bill. As Forest Gump said: “Stupid is as stupid does.”

**Q:** (L) Are you implying that I am foolish or stupid because I DO worry about paying the power bill?

**A:** No, we are not implying that you are stupid, or foolish, for that matter... But, Courtney Brown is not either. Who is he hurting? And, he has hit the jackpot with this one. Knowledge can be procured by reading literature, then analyzing it.

**Q:** (T) Is the time-table that he has given correct?

**A:** Close.

**Q:** (T) So, the powers that be are going to follow this time table and present the Aryans as Martians?

**A:** No.

**Q:** (L) Are the Aryans going to present themselves as Martians?

**A:** Initially. In order for the Terrans to get used to the idea of EBEs.

**Q:** (T) But, they are not the good guys. Beware of Greeks bearing gifts.

**A:** Some of the “good guys” are identical in appearance.

**Q:** (T) Is this a subterfuge on the part of the Aryans so that they can slide in quietly and take over?

**A:** No, they do not need that at all. It is a way for the “government” to introduce everyone to the new reality of the existence of intelligent life all over the place, not just here.

**Q:** (T) So, they have their own agenda, but it is not what Courtney presented in the book.

**A:** It does not matter. The book is a somewhat altered “New Reality 101.”

**Q:** (A) Where should I turn now concerning research subjects?

**A:** Not very specific, but due to the constraints, we will do our best. Suggest focus on larger horizon of current search. You are limiting yourself because of recent trend for more calculation. This is restricting you. Have you delved fully into field generators?

**Q:** (A) Which field to look at? Electromagnetic? Gravitational? Other?

**A:** Of course it is up to you, but why not combine the two, since they are in reality perfectly balanced and “interwoven” in nature!

**Q:** (A) Should I abandon my work on quantum theory?

**A:** Again, as with all, it is up to you. But, if we were you, we would not.

**Q:** (A) Should I look into the electromagnetic rail-guns problem?

**A:** Maybe, but first you must establish a link that you have pondered before but set aside. You set many questions aside. Patience serves the “questor of hidden knowledge” well!

**Q:** (A) Can you be more specific about the link you have in mind?

**A:** Yes, but we will not, because you must do the discovery here, in order for the progress to be reestablished.

**Q:** (A) Is the subject of my research at all important? If so, why?

**A:** Of course it is! You are on a pre-destined mission as you have always instinctively known. Recently though, you have developed a greater awareness of this. Self doubts are merely the result of crises in your personal life. Please do not confuse this with your work.

**Q:** (A) Which branch of physics is closest to understanding of inter-density communications?

**A:** Theoretical.

**Q:** (A) Which branch of mathematics?

**A:** Two of them: calculus and algebra.

**Q:** (A) Should I look into zero-point energy problem?

**A:** That one should be “set aside.” Because it will lead to a “dead end.”

**Q:** (A) Are the extra-dimensions beyond those of space and time relevant?

**A:** What “extra dimensions?”

**Q:** (A) Is time multi-dimensional? If so, is it three- dimensional?

**A:** Not correct concept. Time is not a dimension. This is very complex from your standpoint, but let us just say that time is “selective,” or “variable.”

**Q:** (A) I thank you for tonight. Any other comment to ponder about before the next session?

**A:** Ask, if needed, for a comment on the last responses.

**Q:** (A) Yes, a comment is needed. I am confused about space, time, Einstein’s general relativity, gravitation and electromagnetism.

**A:** Einstein’s Theory of Relativity is only partially correct. That is why we say that there is no “dimension” of time. As far as gravity and electromagnetics are concerned, we suggest a review of the as yet publicly unfinished Unified Field Theory of the same gentleman. Was it completed and put into application in secret? Hmmmmm... And, if so, what are the ramifications? Maybe you could make the same discoveries.

**Q:** (L) Any last comment?

A; Slow down for strength of mind.

END OF SESSION

## 4.39 November 30, 1996

Frank, Laura, Ark (Via Internet) Terry and Jan

A: Hello

Q: (L) Hello, and who do we have with us this evening?

A: Jxoin

Q: (L) And where are you transmitting from tonight?

A: Cassiopaea.

Q: (L) You said previously that time was ‘selective and variable.’ What, exactly, does this mean?

A: By “Selective”, we mean simply to think of time as if it were like your jukebox. There are many selections there, you may play them as you choose. But you need not play them sequentially, unless that is all you know. The selections are always there, are they not?

Q: (L) Well, that is crazy! You can’t just go around having things happening in random order?!

A: Random is in the eyes of the perceiver.

Q: (L) What is it that causes us to only be able to perceive time in a sequential way?

A: DNA restructuring, as in the handiwork of our friends, STS 4th density.

**Q:** (L) Is there any possibility of regaining or restructuring this DNA?

**A:** Was there, will be again. You wanna know all there is to know about time, quantum reality, etcetera? Then it is time for you, and especially Arkadiusz, to study all that you can about the “crop circles,” and closely network with those studying them directly.

**Q:** (L) Why crop circles?

**A:** The answers to all the questions are, or will be there.

**Q:** (L) You said that crop circles represented thoughts from 6th density. What does this mean?

**A:** We are compiling an almanac as well as a manual for the entire Terran population there. The reason we are doing this, is that there are millions who want to know the answers on the eve of the Grand Cycle Transformation. However, there are precious few that have chosen to try this form of communication, thus opening up a conduit.

**Q:** (L) Well, how many people are going to be able to understand?

**A:** But it would not be in form with Prime Level 7 Directive to limit entirely the availability of supreme knowledge!!!

**Q:** (L) So you are trying to put the entire story out there for all the world to see?

**A:** Not “trying,” we are, my dear.

**Q:** (L) Okay, crop circles are a language, so to speak. Are they in some way related to mathematics?

**A:** Mathematics is the one and only true universal language.

**Q:** (L) Well, I just don’t see how they can be decoded.

**A:** In this room is all the mental power needed, with addition of another “room” in Wroclaw, of course, that is needed to “crack” the code of our circles.

**Q:** (L) How do we start?

**A:** All one needs is a foundational point to build a computer program. And we have given you this already.

**Q:** (L) But nobody wants to hear what we have been saying!

**A:** Well, the circles are undeniable in their existence, our communication with you is deniable.

**Q:** (L) Well, if they don’t want to hear it as it is channeled, what makes the crop circles different?

**A:** Not point. If you can crack the code, this becomes an undeniable language that is ongoing, consistent, and demonstrable.

**Q:** (L) So, you mean that if we can show what they mean, have it make sense, and then interpret others as they come into being, or show others how...

**A:** Self explanatory and yes.

**Q:** (L) At one point you mentioned that I needed to learn mathematics, which can be a years long effort. And now, Ark is a mathematician. Was this a clue that Ark was to be part of this?

**A:** Ark was coming into the picture all along. All is eternal, time is selective. We can see the entire jukebox menu selection at all “times.”

[Break, Ark joins group]

**Q:** (L) Ok, Ark has a question: how does one distinguish an authentic crop circle from a fake one?

**A:** Authentic ones are intricate in design and meticulously in meticulous in the detail of their construction. The reality is that there have only been a few “fake” crop circles in the entire history of the phenomenon world wide, any way.

**Q:** (L) Ark asks: to crack the code, is it sufficient to have a collection of pictures? I’m sure he means crop circle pictures.

**A:** Yes, to start with.

**Q:** (L) Ark says, to crack the code, we need an example. Can you point some out? (T) Example, as in crop circle pictures? (L) Well, no, how to crack it, or whatever.

**A:** Please review transcripts.

**Q:** (L) Can you tell us, I’m curious, too. What is it, is it about the using mathematics, or is it about something else?

**A:** You asked for interpretation of specific crop circles pictures before. Remember?!?

**Q:** (Jan) We already did that, I already did the graphics for the ones we asked about last time. I have a whole file with nothing but crop circles. Didn’t you send that to him? That’s what we’re talking about. We need other pictograms to ask about. (T) Oh, I know what we need. It’s not just pictures of crop circles, we need the dimensions of the crop circles as well. You can’t do anything mathwise if you don’t know how big or whatever. (Ark) If Einstein’s relativity is only partly correct, as pointed out last time, and this is because of the variable ‘time’, does this imply that the theory of relativity based on Galilei group is better than that based on Lorentz group?

**A:** Yes.

**Q:** (L) Why?

**A:** Because of the symmetric calculations they used as a basis for their efforts.

**Q:** (T) Where has the Lorentz group gone wrong?

**A:** Too complex to answer.

**Q:** (A) Is entropy the key concept that must be included into the unified field theory in order to include other densities into the equations?

**A:** Need to back up and reflect before proceeding. There is still a “missing link” that is earlier in the process. Any mathematics problem will collapse if there is a missing link.

**Q:** (L) Well if he goes back and finds that missing link, will he then need to include entropy into the equation? Into the theory in order to include other densities?

**A:** Must find link before answer is given, otherwise it is useless information.

**Q:** (A) Can decoding of information from crop circles be automated completely? Can this be done by a computer program, without human intervention, with out work of mind?

**A:** Not likely, and what would be the benefit? Learning is necessary for progress of soul. Remember, we are not here to lead by the hand. We will help, but some answers are for you to decipher, and you have been extraordinarily good at this, my Arkadiusz, since very early childhood. This is how you are building your power center. All there is is lessons and learning is fun. More fun even than teaching.

**Q:** (A) Should I look into sonoluminescence? Are there causal time loops?

**A:** Q1: Yes. Q2: On the right track, now blend or unify. No polar-

ities, please.

**Q:** (T) No polarities? (L) I have no... none of us knows anything. (T) That's absolute. (J) What? (T) Well, if you don't have polarities, then it's absolute. It doesn't matter if the numbers are minus or plus. We're dealing in absolutes. (A) So, cracking the code is to be computer- assisted mind work, that is, human interpretation, assisted by computer program. Which branch of algebra will have to be used for that?

**A:** Not necessary to use algebra here.

**Q:** Anything further on that? We should let him ask, actually...

**A:** Such as?

**Q:** (A) I need guidance here. Can you give me some more specific than just work!

**A:** Please be more specific as to where, or with what, or how you wish to have guidance. All will be well and soon. [A] signs off for the evening]

END OF SESSION

## **4.40 December 8, 1996**

Frank, Laura, Terry, Jan, Alice

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us this evening?

**A:** Honnorra.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) We've been discussing the crop circles, and would like to know if you have any input on that subject? Input on what we've discussed, what we think to this point, and just basically any info?

**A:** Must begin with specific questions.

**Q:** (L) Ok, do the multiple perimeters represent multiple densities?

**A:** Partly.

**Q:** (L) Are the crop circles themselves like antennae, or like homing devices for energy or thought patterns?

**A:** No.

**Q:** (L) Is the chronology of their appearance important?

**A:** Semi.

**Q:** (L) Is their location on the planet, in terms of longitude and latitude, significant?

**A:** Yes and no.

**Q:** (L) In what way yes?

**A:** Location, not latitude and longitude... Those are merely measure markers.

**Q:** (L) If the location is significant, what is it about the location that is significant?

**A:** Magnetic generators of bonding frequency.

**Q:** (L) Are you saying that magnetic generators of bonding frequency are located at those places, are in those places?

**A:** Port through them.

**Q:** (L) OK, location and chronology...

**A:** Why have you not brought up Stonehenge?

**Q:** (L) Well, we talked about Stonehenge before, that it was an energy transducer, so to speak. So, was Stonehenge put there because of the location, or did Stonehenge create... (T) Why don't you just ask what it is about Stonehenge? (L) Okay, what is it about Stonehenge?

**A:** Location attracted those spirit types on the proper frequency, who in turn, placed stones in proper location to receive the coded communications in code telepathically, in order not to have to chase around the countryside reading encoded pictographs.

**Q:** (L) What was the technique used within the circle to receive the information telepathically? [Planchette spiralled in, and spiralled out.]

**A:** Transcendent focused thought wave separation.

**Q:** (L) OK, so that you're saying that moving in a spiral...

**A:** The spiral serves to translate message by slowing down the wave and focusing thought wave transference energy. Utilizes /transduces electromagnetic waves, the conduit, by breaking down signal from universal language of intent into language of phonetic profile. This is for multiple user necessity.

**Q:** (L) Multiple user necessity implies that a number of people must do the spiral. Is that correct?

**A:** No. Must hear and feel and understand precisely the same thing. The molecular structure of the rock, when properly sculpted sing to you.

**Q:** (L) Is there any possibility that Stonehenge still has any capacity along this line?

**A:** Has fragmented energy only.

**Q:** (L) Well, that's what I would imagine. (T) Question. Last week you mentioned that the majority of the crop circles are real, that very few are hoaxes. Am I to believe then, that the method that is used to create the circles that everybody's looking for, that there are multiple methods being used, depending on who or what is available at the time the circle is created? In other words, Doug and Dave may have actually made legitimate crop circles, only they don't know it, because they think they went out and made it their way.

**A:** No.

**Q:** (T) I just wondered if there's multiple things going on here. (L) No, I think it's all... (J) So, is there only one method for a true crop circle?

**A:** Reading instead of listening... decipher rather individually than than comprehend universally... crop circles rather than Stonehenge!!!

**Q:** (L) Are you saying that this is the method to pursue now, since of course Stonehenge is not available?

**A:** How are you gonna pursue. Who is gonna believe you?

**Q:** (L) Is that it? In other words, how are we gonna...

**A:** Ok, folks, let's try to picture Laura and Ark trying to drag 500 ton rocks around New Port Richey?!?

**Q:** (T) Maybe they'll drag themselves!

**A:** No, for that, you must "hit" the right key!

**Q:** (L) Sound. Actually, what I had in mind was just going to England and checking out Stonehenge itself. (T) You can't get near it now unless you've gotten an okay from the government; they've got it all fenced off. (Frank) Why did they do that? (T) Because too many people were going there, like most of the other 'ancient wonders.' They can't let people near them any more, because it's destroying them. (L) They carve their names, and... (T) Well, not just that, the fact that people touch them, the moisture from their skin and like that, it's deteriorating them really bad. All the traffic around it was shaking the ground, they're falling apart faster than the Pyramids are falling apart. (L) I want to switch gears here for a few minutes...

**A:** Up to you.

**Q:** (L) I have to digest it at a certain level, you get to a certain point, and you get an overload. And then I'll be able to come back and ask more about it. One thing that is pressing on my mind, and I really want to get it out of the way, and we'll see what we come to after we have a little break.

[Remainder of session redacted, questions relating to personal legal matters.]

END OF SESSION

## 4.41 December 14, 1996

Frank, Laura, Terry, Jan

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us?

**A:** Usarro.

**Q:** (L) And where are you from?

**A:** Cassiopaea. [Advice to Terry and Jan about upcoming Christmas trip]

**Q:** (L) Ok, and I have been doing a tape a day, I have been an extremely good girl. I just wanted to point that out to you guys. (T) Send Santa! (L) Yes! Send Santa! (J) Well, Santa already came! (L) Oh, I know, but we want millions of dollars here!

**A:** Yes.

**Q:** (L) We want 'Lotto Santa!' (T) Yes, the regular Santa doesn't bring those kinds of things!

**A:** Gotta hava lotto patience!

**Q:** [Groans at bad pun]

**A:** But, patience pays, yes?

**Q:** (L) Oh, yes it does. (T) Now, you've just got to find out what numbers to be patient with! (L) Got any numbers to be patient with? (J) Oh, you know they're not going to tell you that...! (T) ... 6 digits between one and 49. Take your pick, there's 13 million of them!

**Q:** (L) Along the lines of some of the things that I have been working on recently, I'd like to ask if there's any more information you can give to us about the hypnotic-opener- strobe effect, and what it is preventing us from seeing. Is this one of the things that keeps us from expanding into the next density, in terms of awareness?

**A:** Not related to that. You see, the souls that are affected by all these "cloaking" techniques are vibrating on a low level anyway. The point is to block those who are blockable.

**Q:** (T) We're not blockable? (L) Is there anything we can do to avoid this blocking? (T) We're not being blocked...

**A:** You are not blockable.

**Q:** (T) We are not being blocked. We're beyond the blocking.

**A:** If you were, would you be doing this?

**Q:** (T) That type of blocking technique doesn't work on us. There may be other blocking techniques, but that particular stuff doesn't work. We either see or don't see stuff, because we are either meant or not meant to see it. We don't see UFO's anymore, because we don't need to.

**A:** Not necessarily true.

**Q:** (L) OK, what is not necessarily true? Why don't we see them any more?

**A:** Don't does not equal won't. If a Buick does not go by, you don't see that, either! And if you are inside, doing the laundry when Mr. Jones decides to take the old "Electra" for a spin, you do not see him, or his precious car, do you?

**Q:** (L) I don't care, I've seen enough!

**A:** Oh, yes, you do care!!!

**Q:** (L) OK, yes, I care, but I've seen enough, I believe, I believe!!!

**A:** It is not up to you whether you want to see them or not. If they want you to see them, you will!

**Q:** (T) So, if they want us to see them, we'll see them!

**A:** Yes, and they will, and you will!

**Q:** (T) They will and we will... yes, but, there's a blocking technique being used on people to lower the vibrational frequency

to prevent them from seeing them, right?

**A:** The blocking technique is for many things.

**Q:** (T) So that people do not understand what's going on around them.

**A:** Yes.

**Q:** (L) What else?

**A:** That is it, in a nutshell. See and know and think or... See, know and think that which is desired.

**Q:** (L) Yes, and you know it's there. OK, let me jump over to this other subject of the number 33 and the number 11. Is there anything beyond what was given on 11-11-95, that you could add at this time, about any of the mathematics or the use of these numbers?

**A:** Prime numbers are the dwellings of the mystics.

**Q:** (L) What do you mean, "prime numbers are the dwellings of the mystics?"

**A:** Self-explanatory, if you use the tools given you.

**Q:** (L) How can a number be a dwelling?

**A:** Figure of speech. [Planchette spirals several times, vigorously] And how interesting that we have a new "cell" phone company called: "Primeco."

**Q:** (L) And how does a cell phone company called "Primeco" relate to prime numbers being dwellings of mystics?

**A:** Not for us to answer. [Word association by group: encryption, cells of monks, prisons, prime number divisible by one or self]

**Q:** (L) Is encryption the key?

**A:** Oh, there is so much here. One example is: “Snake eyes” is not so good as 7,11, eh?

**Q:** (T) They are all prime numbers, too; seven and eleven. (L) What kinds of documents or writings... or what would be applicable...

**A:** No, Laura you are trying to focus, or limit the concept, my dear. Think of it, what is the Judaic Christian legend for the creation of a woman?

**Q:** (L) That woman was taken from the rib of Adam. That Eve was created from the rib of Adam.

**A:** Ever heard of a “prime rib?”

**Q:** [Groans] (T) I hate being in kindergarten and not knowing what the subject is. Ok, prime rib. We have a prime rib, so...

**A:** What happens in a “Primary.”

**Q:** (L) An election. You narrow down the candidates. What happens in a primary?

**A:** Who gets “picked” to run?

**Q:** (L) Ok, keep on...

**A:** “Prime Directive?”

**Q:** (L) OK.

**A:** “Prime time?”

**Q:** (L) The first, the best... and...

**A:** Not point

**Q:** (L) I know that’s not the point! Is what we’re saying here, is that we can use these prime numbers to derive something out of something else?

**A:** We told you about the mystics.

**Q:** (T) They're using prime numbers to... (L) Oh, ok, I get it. So, mystics... the mystics, the mystical secrets... dwell in the prime numbers if used as a code.

**A:** Name the primary mystical organizations for key to clue system.

**Q:** (L) ...key to clue system?

**A:** Yes.

[We named: Catholicism, Christianity, Judaism, Cabalism, Sufism, The Koran, Mysteries. Laura realized that she had just set aside the book "Understanding Mysticism," it was next to a book on Caballa on the bookcase in the room. Jesuits, Masons, Knights Templar, Rosicrucians]

**Q:** (L) All right. With our little list that we're making, are we on to something, or are we completely off track?

**A:** Yes, now check out those crop circles photos... any prime number combos there?

**Q:** (L) Do you mean in terms of dimension, or do you mean in composition?

**A:** Composition and dimensions... anything you can find. [Discussion: Sacred geometries, all sects listed use prime numbers. John 3:16-19, Corinthians 13. Genesis, Ch.2, verse 22 "rib taken from the man and made woman" - 2 is the only even prime number. Ch 3, v5... "your eyes shall be opened and ye shall be as the gods." (Eating from the Tree of Knowledge)]

**Q:** (T) ...to find a way of decoding it to get an answer, to get something, to get a message, to get something from it... (L) Are we

thinking in any of the lines of something we ought to follow, or are we drifting?

**A:** All are lines you ought to follow. Now, look at the photos on the wall! [Referring to large photocopy of a number of crop circles we had pinned to the wall.]

**Q:** (L) OK, we're looking at them: point out something...

**A:** Count the large spheres in photo three.

**Q:** (L) There are seven.

**A:** Yes.

**Q:** (L) And what does that photo represent?

**A:** Not yet.

**Q:** (T) OK, there are seven large circles; a large central one, and then six outer ones that are smaller. Each of the six smaller circles is connected to the larger circle by a shaft, or a line, or a conduit of some kind.

**A:** Add large and small spheres.

**Q:** (L) OK, there's seven. Add the large to the small and there's seven; add the little teeny ones, there's thirteen; and then even the little teeny-teeny, the little knobs on the ends, there would be six more, so that would be nineteen.

**A:** Yes...

**Q:** (T) So, that's another prime: nineteen is a prime number. (L) OK, they're prime numbers. And... (T) Are they... just as an off-shoot here, do the six circles, the first set surrounding the large circle, are those the sixth density attached to the seventh density?

**A:** No comment.

**Q:** (T) OK now, and then, outside of that are smaller spheres, each one connected one to the next, in a line. We're looking at prime numbers here. What are we looking at? We've got a central one, six outer: large, six outside of that: smaller, six outside of that: tiny... Could, and I'm just thinking off the top of my head here, nothing cast in concrete, is this a representation of... a sphere, getting smaller and smaller... going that way. Or, coming in, this way. Or that way and this way. Like the infinity mirrors...

**A:** If you three-dimensionalize.

**Q:** (L) It would be circles, like balls, like spheres. (T) Ohhh, it's an axis, an x-y-z axis! A three dimensional axis. Three-dimensionally, it would be like this [Holds up hand, forefinger pointed up, thumb pointed to himself, third finger at the horizontal] Larger, smaller, smaller... A three-dimensional axis. Are we going somewhere with this, or am I out in left field again?

**A:** Yes.

**Q:** (T) I'm going somewhere with this?

**A:** Yes.

**Q:** (T) Ahhhh, I now see this as a three-dimensional object as opposed to a flat circle.

**A:** Do that to the others too.

**Q:** (L) OK, we're trying to three-dimensionalize them. Now, tell us where we're supposed to be going here... (J) Well, this first one is a spiral going out... Or a DNA molecule... (T) There's got to be more to it...

**A:** You do not have to figure this all out tonight, just some food for thought.

**Q:** (L) Is there anything else for...

**A:** Ark may be able to three-dimensionalize by computer program already.

**Q:** (L) Yes, well, let us get back to this. The crop circles, as I understand, are related to the code or the mystical prime numbers, the mystical dwellings, and that somehow, putting all of these things together, these different pieces of this puzzle, from so many different directions, will enable us to perceive, or learn, or conceive something that will enable us to do something. Is that correct?

**A:** Close.

**Q:** (L) Is there anything more that we could look at on this subject tonight, because right now, I just need to think about it. You get so much, and you have to digest it. (J) Food for thought!

**A:** Well, you have enough to play with for now, so goodbye.

END OF SESSION

## 4.42 December 21, 1996

Frank, Laura, Alice, VG

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) Who do we have with us tonight?

**A:** Fonorraea.

**Q:** (L) And where are you from?

**A:** Cassiopaea.

**Q:** (L) The first question on my mind before we get to any of these other questions is: who is giving information to Sheldon Nidle

about the photon belt and the mass landings that are supposed to take place on the 31st of December and the 1st of January?

**A:** Sheldon Nidle.

**Q:** (L) It is just coming out of his own head? He is not seeing any beings or channeling anything?

**A:** Okay, close enough.

**Q:** (L) I would like to ask about this fellow Jim, in a somewhat indirect way. This is a person who corresponds with Ark on a variety of subjects {and claims to have inside connections to deep government ops}. This last question that he was asked was: (reading) “Do you know about any possible relation between deep space travel and DNA structure? Or between crop circles coding and CNA coding? Have you ever been told or shown something about DNA? Like relation between time rate and the structure of our genes?” And, here is what Jim replied: “Yes, but I have been warned not to discuss this matter where it is open to unknown ears.” Could you comment on that?

**A:** The best thing for Ark to do is request “closed” correspondence.

**Q:** (L) Does this guy have some knowledge about DNA or crop circles?

**A:** Discover.

**Q:** (L) Okay, Mother, ask your question. (A) There are a lot of things that I want to know, and some, I am sure, are important, but I don't know the sequence that I want to follow.

**A:** Ask away.

**Q:** (A) So many things have happened to me, that I am wondering if something happened to my brain in this life or another that

would explain my thinking.

**A:** More specific, please.

**Q:** (A) Did anything happen in another life that has caused me problems in this life?

**A:** The answer is yes, as with all others.

**Q:** (L) What happened to cause these mental problems?

**A:** Not mental, emotional.

**Q:** (L) Can you tell us a little bit about it?

**A:** Death of a twin in the last lifetime. Farming accident in 1880's.

**Q:** How did this twin die?

**A:** Fell off of the ox-driven combine, driven by father. Was decapitated.

**Q:** (L) Were they male or female twins?

**A:** Male.

**Q:** (L) And what were their names?

**A:** Lucas and Lawrence. Lucas was the one that died.

**Q:** (L) Where was Mother, as Lawrence, at the time?

**A:** In the house.

**Q:** (L) And what kind of emotion has carried over into this lifetime?

**A:** Her longing is insatiable as she is always "looking for love" due to her loss.

**Q:** (L) How old was Lucas when this happened?

**A:** 8 years old.

**Q:** (L) How many years after this accident did Lawrence live?

**A:** 22 years.

**Q:** (L) Have any of the persons of that lifetime returned to interact with her in this life?

**A:** No.

**Q:** (L) Not even the twin?

**A:** Correct.

**Q:** (A) Emotions are not mental, there is a difference? So, my problems now are emotional and not mental?

**A:** Your problems are due to maladjustment.

**Q:** (L) From life to life or just this life?

**A:** They are the same.

**Q:** (V) Did she witness the accident?

**A:** No.

**Q:** (L) Did she see the body after?

**A:** No.

**Q:** (L) Was there any sense of blame or resentment directed toward her by the parents of that time?

**A:** No.

**Q:** (L) Was there any mental or emotional abuse that took place in that lifetime?

**A:** Maybe some, but it is not significant.

**Q:** (L) What steps can she take to resolve this maladjustment?

**A:** Awareness of the root of the problem.

**Q:** (L) Is there any other part to this event that would help her?

**A:** No.

**Q:** (A) So, all the problems that I had as a child were the result of this?

**A:** Some seek an environment of “punishment” in an attempt to resolve left-over issues.

**Q:** (L) Did she have feelings of guilt that her twin had died and she was still alive?

**A:** Yes, but this was not imposed by others.

**Q:** (L) Okay, she felt guilt, and sought an environment that would punish her?

**A:** Close enough for hand grenades.

**Q:** (L) Where was the farm located that this incident occurred?

**A:** Near Cannopolis, North Carolina.

**Q:** (L) Can you give us the family name?

**A:** O’Brien.

**Q:** (A) Let me ask this: all of the experiences that I had as a child were caused by this emotion where I was trying to punish myself. I have spent my lifetime trying to punish myself. Is that right?

**A:** Close. But remember, the point is, you sought out a environment that you perceived to be restrictive and unforgiving. Especially with your father.

**Q:** (L) Was there other karma with her father in this lifetime?

**A:** Maybe, but you are the one, Laura, who can best examine these issues.

**Q:** (L) What about between my mother and myself?

**A:** Ditto.

**Q:** (L) Well, if you guys would just tell me, it would leave me more time to transcribe tapes!

**A:** Learning...

**Q:** (L) Ohhh... (V) Whoops, she's growling [laughter.] (L) Okay. Any particular reason behind the financial difficulties I had today?

**A:** Not really. That will soon be forgotten.

**Q:** (L) Now, time to stop messing around. You said that "prime numbers are the 'dwelling places' of the mystics." I have been poring over this material and it occurs to me that this was put in quotes for a reason, yes?

**A:** We put in quotes what we want further examined.

**Q:** I was thinking that this could be a clue on several levels. Could it be a clue to identify people and interactions?

**A:** Maybe.

**Q:** (L) And, also as a means of decoding coded written material?

**A:** Sometimes.

**Q:** (L) Would this written material be some that is channeled? Or, more formal and general writings of mystics. Could it be, in other words, that they might write in a casual way and not be aware that they are channeling or writing in code?

**A:** Maybe.

**Q:** (L) I dug around about the Templars and have, more or less, come to the conclusion that they were just a smoke screen, and

that something else was going on at the time that WAS important. I also think that they have been resurrected from time to time and dusted off and blamed for all this secret knowledge that is supposedly lost... am I on to something here?

**A:** Close.

**Q:** Who or what brought about the end of the Knights of the Temple?

**A:** Rosicrucians move as a “thief in the night.”

**Q:** (L) But, as I understand it, the Rosicrucians did not come into being until after the end of the Templars...

**A:** No.

**Q:** (L) Do you mean that the information that came out, that pamphlet about “Christian Rosenkreutz,” that is a purported fable, might be correct?

**A:** Yes.

**Q:** (L) Well, goodness sake! The Rosicrucians advertise in magazines!!! Is this worldwide organization that promotes itself so blatantly...

**A:** Well, the “world-wide” order is not all inclusive.

**Q:** (L) Is there an inner circle of this order that is unknown?

**A:** Yes.

**Q:** (L) Are the Rosicrucians connected to the Masons?

**A:** In a roundabout way.

**Q:** (L) Are the Illuminati connected to the Rosicrucians in any way?

**A:** Same.

**Q:** (L) Of the three I have named, which would be considered the one that is closest to the inner circle?

**A:** Not the correct concept.

**Q:** (L) Do the Rosicrucians have writings in their keeping that they, themselves, do not understand?

**A:** Yes. So do the Masons.

**Q:** Would you say that the writings of Albert Pike might be interesting to decode?

**A:** Yes.

**Q:** (L) Is there any particular number sequence that could be used?

**A:** 353535...

**Q:** (L) Is this also a genetic code?

**A:** Much is missing between “point A and point B.”

**Q:** (L) You mean by jumping from documents to DNA?

**A:** Yes.

**Q:** (L) The Priory of Zion, that has been purported to be the progenitor or inheritor of the Templar tradition, is that a mystical organization of great secrecy and import?

**A:** It is a cover for.

**Q:** (L) Another smoke-screen.

**A:** Yes.

**Q:** (L) Getting back to the 353535 code: can you tell me more that will help me get to...

**A:** Better turn it over to Ark.

**Q:** (L) So, I should leave it alone for now?

**A:** Good idea.

**Q:** (L) I will. I wanted to get to this other subject anyway. We know that you have said that time is an illusion in 3rd density reality - that it is the 3rd density illusion - and it is involved with our DNA, which determines how we perceive it. So, it is an illusion. Yet, somehow, this illusion converts at some point into a solid reality via some mode or operation. I would like to know, at what point it converts and how?

**A:** You are off base. Who said it converts?

**Q:** (L) Well, we perceive a damn solid reality! There is STUFF that if you kick it, it hurts!

**A:** That perception is part of the illusion.

**Q:** (L) But, that is obviously not the TOTAL illusion. What else is a part of this illusion? If our perception is part, then there must also be something there to be perceived, correct?

**A:** Yes.

**Q:** (L) Okay, what is it that we are perceiving?

**A:** That which you are programmed to perceive.

**Q:** (L) Is not this perception, these things we perceive as outside ourselves, are they not substance of some sort? Are they not there in some form, even if we perceive them the way we do?

**A:** Of course, but what does this have to do with “time?”

**Q:** (L) I am getting to that! We perceive a world “out there.” Trees, cars, trucks, houses, bricks, boards, blocks, people, dogs etc etc etc.

**A:** You left out backyard barbecues!

**Q:** (laughter) (L) Very funny! We perceive things out there. Of what are they composed?

**A:** Matter.

**Q:** (L) Of what is matter composed?

**A:** Atomic structure.

**Q:** (L) Of what are atoms composed?

**A:** Thoughts.

**Q:** (L) Whose thoughts?

**A:** Yours.

**Q:** (L) Everything?

**A:** Everything.

**Q:** (L) If I perceive something, and everything I perceive is composed of my thoughts, and V\_ is perceiving, is everything her thoughts?

**A:** Yes.

**Q:** (L) What is the difference between her thoughts and my thoughts?

**A:** That is what binds you. You see, it is merely a program.

**Q:** (L) Is it merely a program that we think we are separate individuals?

**A:** Not the point.

**Q:** (L) What is the point? What binds us together? Where does the program come from?

**A:** Where do your programs come from?

**Q:** (L) 7th density? Ourselves? The Lizzies?

**A:** We are asking about the programs in your computer.

**Q:** (L) In my computer? Different places. I get them and load them in. Are programs made - do they exist like 'thought centers' - and do we just load them in ourselves?

**A:** Why have you forgotten? 309,000...

**Q:** (L) Oh. You are talking about the "takeover" by 4th density STS. But, still, the point I am trying to get to is - yes we have DNA - but you can't reprogram DNA if there is not DNA there to begin with. If there is not something to load the program into. What is the substance of this reality that we exist in?

**A:** You just answered.

**Q:** (L) I don't understand.

**A:** You can't load it into something if there isn't something there to begin with.

**Q:** (L) Fine! What is this something that is there to begin with?

**A:** Your previous DNA structure.

**Q:** (L) Where did the previous DNA structure come from?

**A:** The previous program.

**Q:** (L) Where did that program come from?

**A:** Review.

**Q:** (L) Well, you once said that it was necessary to be on a planet that had a star that was getting ready to go supernova in order to molecularize physical bodies. What I want to know is: what is this process whereby thought becomes manifest as matter?

**A:** This is too complicated for this medium. You need another method. Something that allows for greater word usage.

**Q: (L)** But, just a clue: how does thought become matter?

**A:** Bilaterally.

**Q: (L)** What do you mean by “bilaterally?”

**A:** Dual emergence.

**Q: (L)** Emergence into what and what?

**A:** Not “into what and what,” but rather, “from what and to what.”

**Q: (L)** What emerges from what?

**A:** The beginning emerges from the end, and vice versa.

**Q: (L)** And what is the beginning and what is the end?

**A:** Union with the One.

**Q: (L)** What is the One?

**A:** 7th density, i.e.: all that is, and is not.

**Q: (L)** Now, we have managed to dance around the whole thing, and I still do not know how matter comes to be or how time...

**A:** No.

**Q: (L)** How can I get where I want to go?

**A:** You have the basics.

**Q: (L)** Can you give me a couple more basics?

**A:** There are no more.

**Q: (L)** I once asked you if time was gravity?

**A:** Is a fence the ground?

**Q:** (L) Is gravity God?

**A:** No.

**Q:** (L) Is gravity 7th density?

**A:** No.

**Q:** (L) Where does gravity emanate from?

**A:** Thought center.

**Q:** (L) You have mentioned thought centers of many occasions. Is there more than one?

**A:** All are one and all.

**Q:** (L) If you have a thought center, how do thought centers related to 7th density, the One?

**A:** Exactly!

**Q:** (L) Are thought centers 7th density?

**A:** All is.

**Q:** (L) All is thought centers?

**A:** No. All is 7th density.

**Q:** (L) I think you know where I am trying to go with this and I wish you would help me out just a little...

**A:** We are.

**Q:** (L) Okay. Time is an illusion. Wonderful! You have compared time to a fence...

**A:** No. We compared your allusion to ours.

**Q:** (L) Let's work with this allusion. Let us say that the ground is 7th density. How would we picture time in relation to this ground?

**A:** As the soil.

**Q:** (L) Related to the soil, how do WE relate?

**A:** Too vague.

**Q:** (L) How do created beings get painted into this picture?

**A:** Time is your illusion.

**Q:** (L) Yet, on one other occasion, you said that time does exist at other densities, only that it is "selective," you can pick the time. Is that correct?

**A:** If you want to call it time, but it would not be the same, would it?

**Q:** (L) Okay. I am stumped. I can't go any further now. On another subject, Ark read that phosphorus is in DNA structure. Could you comment?

**A:** How about if you comment on the relationship of phosphorous to you?

**Q:** (L) I don't know. Is there some relationship between phosphorous and carbon?

**A:** Well, that is not where we were leading.

**Q:** (L) Well, phosphorous is an essential element for the brain.

**A:** Okay.

**Q:** (L) That is about all I know about it. I don't know enough about phosphorous.

**A:** So, then why not save this until later?

**Q:** (L) Next question: if there were a sufficient number of people who were working on learning how to create an alternate reality or universe, would it seem to them that there was no real “shift” between the former one and the new one, except an internal shift of thought?

**A:** That is one possibility.

**Q:** (L) If we decided that we wanted a different world, could we, as even a small group, create that kind of world and have it seem that we hadn’t...

**A:** We have told you thus.

**Q:** (L) Is it possible that there are persons on the planet, here for some purpose, and that purpose is - say the negativity on the planet increases to such an extent that many people will become so sick of it that they are ready to exercise their free will and make a change and they will then be open to learn from those who have come with this intent to help and teach?

**A:** Okay.

**Q:** (L) Well, when this WAVE hits, is that going to increase the potential for the creation of a new reality, or realm?

**A:** Better review.

**Q:** (L) I am trying to get somewhere in particular and am trying to build the questions step by step...

**A:** Ask Ark.

**Q:** (L) What do you want me to ask Ark?

**A:** Some of these questions, to see what he thinks.

**Q:** (L) Tell me why he is going to know these answers?

**A:** It is more fun to ponder the answers, rather than the whys and wherefores.

**Q:** (L) You guys are making me a little crazy tonight.

**A:** Do you want to invite Ark to the discussion?

**Q:** (L) Of course. (A) What is the function of DNA, other than coding protein production?

**A:** Conductor of electricity.

**Q:** (L) Is that the only other function?

**A:** Well, as you know, electrical energy can have nearly endless applications. Examples... radio waves, neuro-transceiver for thought pattern programs facilitated through electromagnetic wave transmission, etc. Method used for creation and maintenance of program illusions, such as the perception of linear time as reality.

**Q:** (L) Is that it?

**A:** Send that.

**Q:** (A) Should I follow the Newtonian electrodynamics thread?

**A:** It is up to you to follow that which you are guided to follow. This is elementary. If we were in your "shoes," we would shelve it.

**Q:** (A) Should I study the cold fusion problem?

**A:** Not in area of search.

**Q:** (L) Any further comment about cold fusion?

**A:** No.

**Q:** (L) What is cold fusion?

**A:** Theoretical, some recently claimed breakthroughs of dubious validity, though.

**Q:** (A) Which part of a human extends into 4th density?

**A:** That which is effected by pituitary gland.

**Q:** (L) And what is that?

**A:** Psychic.

**Q:** (A) Are there some particular DNA sequences that facilitate transmission between densities?

**A:** Addition of strands.

**Q:** (L) How do you get added strands?

**A:** You don't get, you receive.

**Q:** (L) Where are they received from?

**A:** Interaction with upcoming wave, if vibration is aligned.

**Q:** (L) How do you know if this is happening?

**A:** Psychophysiological changes manifest.

**Q:** (L) Such as what?

**A:** Isn't Ark a part of this discussion?

**Q:** (L) Alright! I get the point! I was just trying to help. (A) I would like to know if there is a separate field beyond electromagnetism and gravitation, something similar to the Sheldrake concept of a morphological field or morphogenetic field?

**A:** Yes, and it is very close to that. It is apparent that Sheldrake was "in tune," as are you, Arkadiusz. But you must have faith in your thoughts, as sometimes they are assisted.

**Q:** (A) When you speak of an upcoming wave, it is a wave of what?

**A:** Think of it as a wave of reflection from the beginning and end point.

**Q:** (L) Can you clarify that in more 3rd density terms?

**A:** No, see what the response is. It is his question, after all!

**Q:** (A) Is DNA acting as a superconductor?

**A:** Yes!!!

**Q:** (L) Any other comments?

**A:** No.

**Q:** (A) [regarding wave] But what vibrates? Energy? Aether?

**A:** Energy and aether are directly symbiotic.

**Q:** (A) And when it vibrates, then in which dimension?

**A:** The density 3 and 4 at transition junction.

**Q:** (A) If not in linear time, then in what?

**A:** Cyclical "time."

**Q:** (A) What measures the distance between one crest and another?

**A:** Ending/beginning of cycle.

**Q:** (A) Trying to understand the universe in terms of a triality, matter - geometry - information. Is it the right idea?

**A:** If one thinks of matter as "living" rather than "dead."

**Q:** (L) Is that it?

**A:** Ark questioned.

**Q:** (L) Well, excuse me for trying to help here! (A) Is DNA superconducting?

**A:** Variably.

**Q:** (A) What is electricity?

**A:** In what sense?

**Q:** (A) What is elementary charge?

**A:** Elementary means basic construct, whether directly from the natural “state,” or indirectly.

**Q:** (A) What type of entity?

**A:** Purely substantive, as in a binder.

**Q:** (A) A warp?

**A:** “Warp” is incomplete concept. Remember what we said about theory of relativity.

**Q:** (A) Must I understand the nature of superconductivity? It seems to me that I must.

**A:** Yes and yes, definitely.

**Q:** (A) Is it correct? Is it in my reach?

**A:** Yes. We already answered.

**Q:** (A) That means Nobel Prize, definitely, yes?

**A:** We hate to say this, but... Wait and see!!! Good Night!

END OF SESSION

Note: Cannapolis, now Kannapolis. Early published name variations include Cannon-opolis and Cannapolis. A widely accepted origin of the word Kannapolis comes from the combination of

the Greek words “kanna” (reeds, not looms) and “polis” (city), which some believed meant “City of Looms”.

## 4.43 December 28, 1996

Frank, Laura, Alice, VG, AAM1, Ark via computer

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Torren from Cassiopaea.

**Q:** Have you not been the representative in previous sessions?

**A:** Remember, individual monikers are for your familiarity only.

**Q:** Okay, thank you. I have a list of questions that I would like to get through fairly quickly, if possible. The first one is for VG. She is concerned about her health and would like to have a clue.

**A:** Study nutrition, then see doctor.

**Q:** Is there anything specifically wrong that is urgent?

**A:** See last response.

**Q:** (V) It's too bad my doctor is an idiot.

**A:** Then choose another.

**Q:** Is there any one thing she could do at this point that would help? (V) I have been bruising a lot.

**A:** Iron supplements help, but do not limit to that.

**Q:** (V) Is ‘ruten’ in conjunction with iron important?

**A:** What did we say 3 questions back?

**Q:** (V) I had a very disturbing dream last night? Was it processing, or a facade. I was looking at things and fixing myself. And the night before, I dreamed that Laura came swooping in to save me from something that was scaring me to death. I woke up with my heart pounding...

**A:** Best to work to purge negative influences in your life.

**Q:** (L) The dream was doing that?

**A:** No. That is our suggestion for VG.

**Q:** What negative influences does VG need to purge?

**A:** Those which have tentacles leading to her representation of the past.

**Q:** What is her representation of the past?

**A:** That which in 3rd density is viewed as past.

**Q:** (V) Was the dream last night... I was observing and looking what I perceived as sentences and paragraphs, very logically and meticulously I was breaking things down into logical segments - once I was done doing that, I was fixing myself -my hair, my nails. Was this a positive dream? What did this dream represent?

**A:** When one must decipher the clues in one's life, it takes patience and reflection. As in one looking before leaping.

**Q:** (V) Back in October, I was supposed to go to a retreat that you said would be positive and uplifting. But it was cancelled at the last minute. What happened?

**A:** The vibrations were not in sync.

**Q:** Was everybody cancelled, or was it just me?

**A:** From the point of view of the experience, the result is the same.

**Q:** Will she go on this retreat ultimately?

**A:** An opportunity will present itself.

**Q:** VG also had an experience the other day where she was feeling very powerful pulling sensations toward a certain person in her past. What was stimulating those sensations?

**A:** Physical cycle stimuli.

**Q:** (V) As in menstrual cycle?

**A:** Menstrual is superimposed by hormonal, is it not?

**Q:** Was something outside of her stimulating the hormones?

**A:** Not needed.

**Q:** How can she deal with this kind of stress?

**A:** Spiritual awareness heightening.

**Q:** (V) How do you achieve heightening of spiritual awareness?

**A:** This is a good vehicle, for example.

**Q:** (L) Does general acquisition of knowledge on any and all subjects also heighten spiritual awareness?

**A:** Yes.

**Q:** So, if you are not doing it here, it does not necessarily matter, because every minute you spend learning and thinking and examining, you are heightening spiritual awareness.

**A:** Yes.

**Q:** Okay, I had a dream about Chloe and Tommy, and Tommy had come back to life. We were on a trip in separate vehicles, and

had stopped at a restaurant. Tommy had gone to the men's room and had been gone for a long time. Chloe asked me to help her find him, and I knew where he was, but she tried the door and said it was stuck and wanted me to help. I told her that it was not stuck, it was locked and, to prove it, I got the key, which somehow I had, though I had to take it off my van key ring; it was a 'master key.' And, when I unlocked the door for her, she discovered that Tommy was dead, on the toilet. This was very disturbing to me. Can you tell me anything about this dream? I was thinking, that since it was so clear, that it might have been prophetic.

**A:** You will learn the meaning profile of this and other dreams so well that it will be akin to reading from a road map... Patience, my dear!

**Q:** Okay, can I ask about my other dream - about Frank and Ark and I - we were driving down the road and the school was involved - something about 'locker number 43' - there were piles of notebooks, and I had the key to get all this information...

**A:** See last response.

**Q:** Okay, is the phone company going to accept the credit card?

**A:** All will work itself out.

**Q:** Well, if they don't, we are in a mess because it was my stupid idea to do it this way... and if they don't, my phone will be turned off and I won't even be able to contact him at all to let him know what is going on...

**A:** And if that happened, what do you think Ark would do?

**Q:** Well, there isn't much he could do!

**A:** Nonsense!! You know he would "move heaven and earth" to solve the crisis, pronto!!!

**Q:** Well, that is comforting... but I don't see how it could be done. Now, there IS something that worries me a LOT... that Ark will come and not like me...

**A:** Why do you think this?

**Q:** Well, because I am so fat.

**A:** Have you led him to believe that you were skinny?

**Q:** No. I told him a lot of times that I am too fat.

**A:** If you are worried about what Ark will think about your physical appearance, you have nothing to fear, if you have nothing to "hide," no pun intended!

**Q:** Well, I want to buy some clothes... and I want to get my final divorce paper work done... will I be able to settle with the insurance company before Ark comes so I can do these things?

**A:** Wait and see. Worry not.

**Q:** Well, you keep saying this, and I just don't see how anything can happen the way you say it is going to happen. I am nearly going out of my mind with worry. But...

**A:** And when have we been wrong?

**Q:** Not YET!

**A:** How many demonstrations do you need?!? We told you to tell Ark everything way back, as you measure time, if you recall. You were suspicious then, but you did follow the suggestion, and see what happened? We will not be joyous if you are not able to develop greater faith.

**Q:** Well, that makes me feel like I HAVE to have faith or I will let everyone down.

**A:** No, you do not “have” to do anything... It is just that it will be disappointing if you become blocked.

**Q:** Okay, but there was something else that happened then. When I told Ark all those things, he went to the bank and discovered that he had been wiped out... she took every damn dime. So, where did faith get us then?

**A:** No. When we suggested it, it was well before that event. And, she did not take “every damn dime.”

**Q:** Well, close enough. Never mind. I don’t want to know any more on that subject. Okay, change of subject: what is the source of the apparition – allegedly of the Virgin Mary - on the building down in Clearwater?

**A:** “Apparitions” are not important as to their “source” but rather their result.

**Q:** Well, is it STS or STO or just a chemical anomaly? But you say that is not important - the result is. What is the result.

**A:** Have you not witnessed it?

**Q:** Well, I can’t tell what is in the hearts and minds of people, all I see is a lot of people making money off of it. How can I know whether...

**A:** Then you must think that the result of the UFO/Alien phenomenon is that a “bunch of people are running around and buying silly rocks.”

**Q:** (F) Obviously there are a lot of different results. Most could be buying the silly rocks, but others could be learning from it either for STS or STO. (L) So, the results of anything is strictly the result of the configuration of the individual?

**A:** Yes.

**Q:** But it still begs the question: Is it truly an apparition of the Virgin Mary?

**A:** Well, is it possible for you to differentiate between that which is an apparition, and that which is not. And does it really matter? Or, is “apparition,” merely a classification? Or a “label?”

**Q:** (V) Is it really there?

**A:** Are you? Are we? Is George Bush? Or is he an apparition?

**Q:** (V) AAM1 wanted to ask about her upset stomach and the pain she has had for the past few days.

**A:** Ask her to ask.

**Q:** (AAM1) Why is my stomach in such a bad state the last couple of days?

**A:** Not your terminology.

**Q:** (AAM1) Why has my stomach been so upset the past week or two, whenever I eat, and why do I have these headaches with it?

**A:** What else has happened in the past “week or so?”

**Q:** (AAM1) You are asking me? I don’t know.

**A:** We are asking you to ask aloud, and more importantly, ask yourself, for therein lies your answer!

**Q:** (AAM1) What is the remedy to correct it?

**A:** What is the underlying cause?!?!

**Q:** (AAM1) I’m confused. I’m asking questions and they are asking me questions. (V) Are you stressed over something major?  
**(AAM1)** I’m always stressed.

**A:** No.

**Q:** (AAM1) It's not stress?

**A:** Your response was incorrect. When you said "I'm always stressed." Really??? This much??? We don't think so!!!

**Q:** (L) Does it have to do with Patrick? (AAM1) Does it have to do with my dislike of Patricia and Shayna?

**A:** Partly.

**Q:** (AAM1) I dislike them intensely. What is the other part?

**A:** Work related. Career direction related.

**Q:** (AAM1) I also dislike my job. Is the other part of my physical problem, the fact that I see my job as a dead end?

**A:** Yes.

**Q:** (AAM1) What can I do to correct this?

**A:** See the bigger picture.

**Q:** (AAM1) I don't understand that. It is not clear enough for me.

**A:** Current events will mean little, eventually. "This too, shall pass."

**Q:** (AAM1) Is one of the solutions to steer clear of Patrick's family?

**A:** Then, all your life, you will need to "steer clear" of a lot of things. Better to learn to let "bad" things fall off your back, as in the proverbial duck's water!

**Q:** (L) I don't understand. You told ME to avoid these people!

**A:** You react differently.

**Q:** (L) Well... I can be around them... it doesn't bother me. I just don't choose to because I don't want their vibrations all over me.  
(AAM1) I don't have to talk to them, do I?

**A:** That is not the point. One does not need to let others bother them, if one can learn to regulate absorption. Not unsolvable.

**Q:** (AAM1) How can I take steps to get to the point where I can deal with them, but not so that they make me sick? It is very difficult for me to do this. It literally makes me sick.

**A:** Learn to laugh at that which currently disturbs you. After all, it is comical, when you think of it. Stop taking everything so seriously!!!

**Q:** (AAM1) I always thought that I was able to deal with everything, but these people absolutely nauseate me. And, then I get mad at myself because I react to them. Usually I wouldn't react to them. I would not even acknowledge their existence! (L) What makes it so personal? (AAM1) They are so low on the evolutionary scale, that they don't even see their own evil. They think that if anyone else sees the disgusting way they behave as wrong, that there is something wrong with that person, and not them!

**A:** Then, picture them as squawking dodo birds.

**Q:** (AAM1) It is very difficult.

**A:** Not if you try.

**Q:** (AAM1) What steps should I take to relieve my work stress? Do I need to start looking for another job? Is there something I can do there to make it less stressful?

**A:** All are good possibilities, but, look at these things as joyous challenges, rather than drudgeries.

**Q:** (AAM1) Am I in danger of being replaced in my job? Are they looking to replace me?

**A:** What danger? Is this the chairmanship of Ford Motor Company??

**Q:** (AAM1) Is Patrick at the point where he can see his mother and sister as people with shortcomings, or will he always be blindly devoted and unable to see their faults?

**A:** Too many thought patterns at once.

**Q:** (AAM1) Is Patrick at the point now where he can clearly see what his mother is doing? See her faults?

**A:** Best way for one to “see” faults is for one not to be reminded by others.

**Q:** (AAM1) Will he ever be able to be healthy and break away from her control, and go out on his own?

**A:** Well, that is quite a “wish list,” but see last response.

**Q:** (AAM1) Then, the best way for me to deal with this is to cut off all connection with Patrick and his family, correct?

**A:** We would never limit your options thusly!

**Q:** (L) Why is Patrick being dragged through the mud this way, if that is what is happening?

**A:** Why is attack, and the particular victim, ever important?

**Q:** (L) Is it because Patrick is supposed to learn to overcome these things?

**A:** Close enough.

**Q:** (L) Okay, so Patrick has to learn on this, and the best way you can help him is by backing off. (AAM1) From Patrick, too?

**A:** When one protests, one facilitates the building of barriers that are an integral part of the attack. For one to have revelation, one must “step back,” and view the picture without prejudice!

**Q:** (AAM1) Well, I think that my lesson in all of this is that I need to learn that there are going to be people in this world that I will need to deal with, and I need to learn how to do it now. The world is full of these kinds of people.

**A:** Or that you can deal with them without letting it affect you.

**Q:** (AAM1) It is very difficult. (V) Is Patrick this important?  
**(AAM1)** The thing is after I got him off the drugs, after all of this happened, it really wasn't him anymore, it was me. I felt that something was happening... usually people don't affect me like this...  
**(L)** Did you hear what you just said? **(AAM1)** What?  
**(L)** "When I got him off the drugs." **(AAM1)** Is that bad? **(L)** He didn't do it himself. **(AAM1)** I know he didn't. And he knows he didn't. He tried before... **(L)** Is it any good this way? That he didn't do it himself? **(AAM1)** I think so. While he was on them, his Mom and his sister had complete control of him. He is 300 per cent better... the only difference between Patrick and his family is that he knows there is a problem and he wants to get help. **(L)** I think he thrives on the continuous drama of it. Crisis after crisis. Drama Queen City! Is there a karmic relationship between Patrick and AAM1?

**A:** Yes.

**Q:** Can you tell us what it is?

**A:** Let it unfold. Remember, all there is is lessons.

**Q:** Will you tell us the number of lifetimes they have had together?

**A:** Oh, how about 4?

**Q:** Well, that is not much. (V) Would exploring this help now?

**A:** Maybe, "Mom" has that talent. Go "under" to rise above.

**Q:** (AAM1) Okay, thank you. I have to go to bed.

**A:** Good Night AAM1.

**Q:** Now, we have a question from Ark... for his sister. Can you find her?

**A:** We can “find” anybody.

**Q:** Okay, she would like to...

**A:** But she wants us to advise her regarding business decisions... hmmm, seems she is quite capable, a good organizer and very pragmatic. Better advice could be reserved for other arenas.

**Q:** Such as?

**A:** Quest for knowledge.

**Q:** So she should be asking about spiritual matters and not material things?

**A:** Yes. She is a dynamic business woman... for us to advise at this juncture could harm, as we would not wish to be a crutch for those currently most capable.

**Q:** Anything that you wish us to convey to her?

**A:** Does channeling when in garden.

**Q:** She does?

**A:** Advanced.

**Q:** What do you mean?

**A:** This particular subject. Remember, souls of alike frequency vibration often travel together. Tell her to go ahead as already intentioned, it will work just fine.

**Q:** Anything else for her?

**A:** Nope.

**Q:** (A) Years ago in Hamburg, while working on unified field theory I had the impression I am being watched. Was it indeed the case?

**A:** Yes.

**Q:** (L) By whom?

**A:** Not yet.

**Q:** (A) Was my idea of that time sound and worthwhile to pursue further now?

**A:** Yes.

**Q:** (L) Is there any general comment you can make to Ark about any of these things?

**A:** Isn't it fun, Ark, to have heightened awareness... To be able to piece together more and more?

**Q:** (L) Ark wants to know about Hoagland...

**A:** Let Ark ask in form he chooses.

**Q:** (Ark) Should I seek contact with Hoagland concerning the paper by Modanese?

**A:** Best approach is to groove the contact with Hoagland enough so as to have open forum with him and have free exchange of ideas on all possible subjects. Suggest you make him aware of how your particular field, background and angle of experience can further quest.

**Q:** (Ark) Is following this link a) safe b) right?

**A:** Well, safety is not determined by what is followed, but rather how followed.

**Q:** (L) Okay, while we are waiting for Ark's response, I have a question. I am BURNING up! What is the reason for this unbearable heat I am suffering?

**A:** Heat means 4th density bleedthrough.

**Q:** I am about to die of heat, and I know it is cold in here. When you say 4th density bleedthrough, what do you mean?

**A:** Oozing of faint reflections of new reality.

**Q:** Do you mean new or altered or changed bodies?

**A:** Review.

**Q:** (V) Are the night sweats connected?

**A:** Maybe.

**Q:** (V) Are the night sweats I have hormonal?

**A:** Maybe.

**Q:** (V) How come I can't get a straight answer?

**A:** Seek and find, tis fun!

**Q:** (L) Back some time ago, I went unconscious in the chair, nearly passed out, anyway, and Ark sent me a message and said that he SAW me THERE! What happened?

**A:** Haven't you learned?

**Q:** Well... is there any activity a person could do to stimulate their DNA to become superconductive?

**A:** No need. You would like to find an activity to stimulate {your youngest child} to grow up faster?

**Q:** Of course not! She's just a BABY! She needs to have fun! Oh, I get it. Okay. Now, Frank had a funny feeling about MM {Green-

baum programmed individual} the other day. Was he getting a message about her?

A: Yes.

Q: Did she know I was cancelling her for some reason other than the excuse I gave?

A: She had some suspicion.

Q: Is there some danger to us at this time from her, as Frank perceives?

A: Yes. Always be vigilant and proceed with caution!

Q: (V) Has she come by to spy on us? (L) Does it matter? (V) Well, it does if she is crazy and has a gun! Can you define this danger?

A: There are many possibilities.

Q: Well, can you list the top three?

A: Physical, psychic, spiritual.

Q: (V) You mean she would...

A: Be open to all possibilities as pathways of attack.

Q: Is it true that when Ark is here, that our protection level will increase exponentially?

A: Yes.

Q: (V) All of us?

A: Any and all.

Q: (Ark) I am confused about time. You said relativistic physics must be redone because it assumes unnecessary symmetry. What symmetry do you have in mind?

**A:** Unnecessary symmetry? You asked about a particular project or theorem being examined, and those involved. We said that it was on the right track, so long as the symmetrical aspects were dropped as an absolute. Meaning the framework of the project was too narrowly focused.

**Q:** (Ark) You suggest that what I was trying to do in Hamburg was a worthwhile pursuit, but I was assuming even more symmetry than Einstein's relativity.

**A:** Then don't assume. Remember, symmetry, by its very nature, combines both realms of possibility. It is all inclusive, rather than inharmoniously exclusive.

**Q:** (Ark) Is there some anti-gravitational effect in the levitron toy?

**A:** Not "in" the levitron toy. Rather "through" the toy. The toy is just the vehicle.

**Q:** (L) Well, should we spend 40 bucks on this thing? (V) How does it work? (L) I don't know!

**A:** Antigravity is deceptively simple.

**Q:** (L) So, the guy who is advertising it is not cheating?

**A:** Not correct concept.

**Q:** What is the correct concept?

**A:** See last response for clue.

**Q:** (L) So, you aren't going to tell me any more about it?

**A:** Ark is the questioner, yes?

**Q:** (L) Okay. Well, he thanks everyone... and says good night. (Alice) I fell recently and would like to know what caused me to fall in the driveway?

**A:** Vertigo.

**Q:** (Alice) Is it a continuing ailment?

**A:** Intermittent.

**Q:** (Alice) When I had that terrible pain in my foot, in church, what caused that?

**A:** Thrombosis.

**Q:** (Alice) I seem to be having trouble with my memory... is this related to the emotional issues you told me about?

**A:** Check dietary considerations. These can either enhance or forestall the ageing process.

**Q:** (Alice) What is wrong with my leg?

**A:** Circulatory disruptions; see previous response.

**Q:** (Alice) Will my eyes get any better?

**A:** Ditto.

**Q:** (V) My grandmother recently died. How is she?

**A:** Okay.

**Q:** (V) I know that was a lame question, but is there any opportunity of speaking to her? (L) No! I'm not gonna channel your grandmother! I don't even know her! You can ask about her... (V) Is there a message for me from my grandmother?

**A:** Maybe, at another juncture.

**Q:** (L) Why another time?

**A:** She is not ready now.

**Q:** (V) Is she sleeping as you described Tom?

**A:** There, time exists not.

**Q:** (L) But you said she is not ready NOW, but then you say time exists not? What is the deal here?

**A:** What was the first word of the previous response?

**Q:** (V) Ok, there as opposed to here. Where is she?

**A:** Fifth density.

**Q:** (L) Why do I not want to channel other entities... that was a strong response that just sort of jumped out... is it correct?

**A:** Yes.

**Q:** (L) Why?

**A:** It would be like trudging through the saw palmetto bush thickets, at night, barefoot!

**Q:** (L) Well, that is a good way to step on a rattlesnake!

**A:** Maybe.

**Q:** (V) Has 4th density earth been in existence as long as 3rd density earth?

**A:** Not correct concept.

**Q:** (V) Does 4th density earth exist?

**A:** Yes.

**Q:** (V) And there are human beings...

**A:** All exists always.

**Q:** (L) Where is the 4th density earth, aside from being in 4th density?

**A:** Another realm.

**Q:** (L) Are there 4th density US existing NOW on this 4th density earth?

**A:** Yes. Us.

**Q:** (V) When you are on 4th density and look at the Sun, do you see the same thing we see here? When you look at the Moon, do you have the same visual experience?

**A:** No. Awareness is broader.

**Q:** (L) Well, what would you see when looking at the Sun?

**A:** Entire visual spectrum.

**Q:** (L) You mean we would be able to see all the things that we can now only see with instruments? Like the corona, the solar wind, et cetera?

**A:** The entire sphere from all possible angles of realization?

**Q:** (L) Would we be able to HEAR the Sun?

**A:** If chosen.

**Q:** (L) What does the Sun sound like?

**A:** Not answerable.

**Q:** (L) Do planets and Suns talk to each other? Are they angels and archangels?

**A:** Laura, let us not go over the “deep end.” (laughter) Boys are all snails and puppy dog tails... Girls are really sugar and spice, and everything nice...

**Q:** (L) So, you are making fun of me!

**A:** Sure, why not?

**Q:** (L) Well, are there such things as archangels?

**A:** Maybe.

**Q:** (L) Well, if there are such things as archangels, how would we perceive them?

**A:** Too complex.

**Q:** Okay, do different individuals have connections to different archangels? (V) Yes, are our souls born from different archangel realms?

**A:** No. The soul was never created. Was/Is/Always will be.

**Q:** (V) Well, I can't grasp that... I mean, creation... (L) There is no creation, All just IS. (F) Well, there are cycles. (V) Well, where does the substance come from. (L) Doesn't come from anywhere. Just thoughts in the mind of God. I mean, what else does God have to do for eternity but dream? We are the dream. (V) Can you comment on my struggle to understand this?

**A:** What is the struggle? It will come. Okay, folds, for now, Good Night.

END OF SESSION

# Chapter 5

## 1997

### 5.1 January 4, 1997

Frank, Laura, Terry, Jan

**Q:** Hello.

**A:** Hello.

**Q:** What name shall we use this evening?

**A:** Njorrg.

**Q:** [attempts to pronounce]

**A:** Pron: Ny or g; “Knee or gee.”

**Q:** (L) Okay! Where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) Since we were discussing it, may I ask about the Kryon material?

**A:** If you wish.

**Q:** (L) Can we be more specific. Is the Kryon source one from a higher density?

**A:** “Source” of most things in your density is, in one way or another, from a higher density.

**Q:** (L) Okay, I understand that, but what I want to know is this particular source a Being from a higher density who calls itself Kryon?

**A:** Infer as you see fit!

**Q:** (J) If you excuse the expression, you have to consider the source. (L) Now, it occurred to me tonight while writing to J, and it rather jumped into my mind while thinking how best to answer his questions, that it was very strange that Val was virtually begging me for every session I had transcribed, and I sent them to him as they were done, he called every week to discuss them, and then suddenly silence, no responses, and virtually in the next week after the last contact, he produces Alex Collier and the Andromedans. And, the funny thing I thought about recently is that Andromeda was the daughter of Cassiopia! The only thing is, there is a core of information in the Andromedan stuff that is so similar, but it is wrapped in 3rd density garbage. Is it possible that the reason for this strange interaction is that the material I sent him has been, shall we say, borrowed?

**A:** Influences derived from our messages to you are to be seen more and more due to your widespread sharing of same.

**Q:** (L) Well, I am not objecting... I just want people to hear it, so I don't really mind...

**A:** Good, perhaps, but... there is much opportunity for corrup-

tion!

**Q:** (L) Well, that is certainly true, considering the stuff that is coming back to me about the “Wave.” But, all my internet postings are dated, so it would be fairly easy to track. We have some questions here: Physicists talk about multi-dimensional universes. The idea is that our 3 dimensional space and 1 dimensional time is an illusion of plane beings, while the true universe has more dimensions perpendicular to the above ones. Physicists have different guesses here: 5, 6, 7, 11, 256. How many dimensions does the true universe have?

**A:** Not correct concept. Should be: How many universes does the “true” dimension have?

**Q:** (L) Alright, then. I think that from a previous session we were told that the number of universes was not countable. Is that correct?

**A:** Infinite, maybe, but more to the point: variable and selective.

**Q:** (L) Is it that there can be more at one time and less at another?

**A:** No.

**Q:** (L) Does this mean that any potential universe can be selected at any time to be the ONE that is cued? (T) No, the “jukebox” idea relates to time. Explain variable and selective, please?

**A:** For those who know how, universes can be created at will in order to transmodify reality merge.

**Q:** (L) What is a reality merge?

**A:** What does it sound like?

**Q:** (T) Merging of realities from one universe into another? A creating of a new reality which is then merged with the old to create

a new universe. (L) Maybe it means the realities of different people merge to create a sort of “mutual universe?” Like the idea “you create your own reality?”

**A:** Terry is closer, Laura is playing “left field.”

**Q:** (L) The next question: The Cs, Andromedans and others talk about ‘densities.’ We are supposed to live in 3rd density. Does this number 3 have anything to do with 3 space dimensions?

**A:** Close. Means: Original definition closer to 3rd level of experience, relating material/ethereal spectrum, but denizens of Terra Locator came up with “Third Dimensional” explanation due to influences upon the subconscious mind from soul memory connection to Akashic record.

**Q:** (L) J talks about dimensions, densities and states. What about states? (T) Yeah, there’s Georgia and Arkansas... no, that’s not really a state...

**A:** You forgot poor little Rhode Island! Tsk tsk! Mirth!

**Q:** (L) Okay, does “state” refer to some state of being that entities can exist in?

**A:** On this, consult psychological text books for more information, if you are so inclined as this is the only area where this term applies.

**Q:** (L) Well, J has come up with the number 384 dimensions which comes from some obscure formula... he also says that these dimensions differ by entropy and that the next dimension above us is a superconducting dimension, that there are dark and light dimensions, forward and time back dimensions. Aside from the fact that we have already disposed of the NUMBER of dimensions...

**A:** We suggest that J create a universe thusly.

**Q:** (L) Okay, do densities differ by entropy?

**A:** No, but maybe by “atrophy.”

**Q:** (L) Now, do we have densities that are superconducting?

**A:** ???

**Q:** (L) Do you mean that we need to discover in this area? Are there dark and light densities?

**A:** This line is not productive to your quest.

**Q:** (T) Well, this J does not seem to be able to grasp the idea that time is not a dimension, it is just a localized variable. (L) The C’s said once that 4th density is “going with the speed of light.” I think I remember that you said that there was NO speed of light there because “speed” was a 3rd density concept.

**A:** Please... we are drifting! Tell A that “aether” is Terran material science’s attempt to address ether. The trouble is, there is simply no way to physicalize a plane of existence which is composed entirely of consciousness. It is the union of perfect balance between the two “states” or planes, that is the foundation and essence of all creation/reality. You cannot have one without the other!

**Q:** (L) When you say the two states or planes, you are saying the physical state and the state of consciousness...

**A:** Yes.

**Q:** (L) And you can’t have one without the other. And the state of consciousness and the state of material existence are so completely connected, that both are infinite? One cannot exist without the other..

**A:** Yes, connected, intertwined, bonded... Merged.

**Q:** (T) A structure of the universe that holds the levels together...

everything is connected. The consciousness of 6th density is perfectly bonded and balanced with 3rd density, and the quasi physical level of 4th density, and the totally physical levels 3 through 1, and the total ONE of 7th, and whatever 5th is. (L) We have four levels of physical expression, so to speak, going from the really solid, minimal consciousness level 1 to....

**A:** Yes, but the Terran scientists have been programmed to believe that nothing can exist unless it can be measured, estimated, calculated and represented in some way in the physical material plane. Not true!!!!!!! For example: We are in NO WAY physical.

**Q:** (L) Well, I also want to know why you refer to a technological device that supposedly transports someone from one density to another, as a ‘Trans Dimensional Remolecularizer?’

**A:** In order to reconstruct 3rd density into 4th density physical, other dimensions must be utilized in the process. Remember, we are talking about exact duplicates which are merged.

**Q:** (L) But, a little while ago you said there was a single dimension and many universes, and now you are saying utilizing another dimension, so the terminology is getting to be a little bit confusing... (T) It is like a program loading onto a computer. Some programs just load straight in. Others need to create a space on the hard drive to put files that they need to LOAD the program, but are not PART of the program, and when it is finished loading, it erases all the ‘loading instructions.’ The hard drive is still the hard drive, but for a time, the program used a sector of the hard drive, and created a temporary dimension, let’s say. (L) Is this what we are looking at here?

**A:** Close. And remember, we said ‘true’ dimension!

**Q:** (L) So, it is like one hard drive, many programs, loading instructions for new programs that are then erased, etc. If there is

one “true dimension,” and infinite universes within it, does one particular universe exist, of and by itself, at any given time, until it is merged into a new one, or is there within this one true dimension, multiple universes as real as ours is, to which we could go, and could be there alongside ours, so to speak?

**A:** Yes to the latter.

**Q:** (L) And, can infinite numbers of “dimensions” exist within each level of density, even if temporary?

**A:** Yes. If you want to go back and change “history,” either for individuals or for universal perception, you must first create an alternate universe to do it. Your 4th density STS “friends” have been doing this a lot.

**Q:** (L) If you, being a general term, create an alternate universe, does the former one continue to exist, or does the former one merge into the new one?

**A:** Both.

**Q:** (L) If the former one continues to exist, does it exist and evolve on its own, disassociated with the second one, or this offshoot?

**A:** Clarify.

**Q:** (T) The universe you are in: you are going along and say, “I think I will create a new Universe.” You do it, and move to it, and you bring your universe with you. That is the merging of realities. But, when you move to the new universe, you are no longer in the original one which continues along on its own. The pattern of the old universe, you bring into the new one, and when you become part of the new universe you have just created, you are no longer part of the old one you just left. It just goes along with everybody else there. (L) Is this correct?

**A:** Sort of... remember, one can create all ranges of types of alternate possibilities.

**Q:** (L) So you could create a new universe with a new “past,” even?

**A:** Yes.

**Q:** (L) So, in that way, both actually occur and you can change the whole thing?

**A:** When merged, the former never existed.

**Q:** (T) Not for the person creating the new universe, but the former will continue for everybody else.

**A:** Close.

**Q:** (L) So, for the person creating a new universe, the former never existed, but the other beings who are satisfied with that old universe, and “go” with it, are still continuing along as though...

**A:** Your 3rd density mind restrictions limit the scope of your comprehension in this area.

**Q:** (L) If you decide you don’t like your present universe, and you work like crazy to learn how to create a new one, and you do it, do you, essentially, forget that you did this? And why you did this? And forget the other universe?

**A:** If you wish.

**Q:** (L) So you can or you can’t... (T) Going by what you just said: “an unhappy universe,” is that because your perceiving the universe you are in as being unhappy because that is the way you are and where you are at, in terms of learning, and by creating a new universe, you are simply wishing to change the way the universe is around you, and really its not the universe that has a problem, but you...

**A:** Off track.

**Q:** (L) So, the universe you are in, is what it is, and you are in it for some reason... (T) You're in it to learn lessons... just to change the universe because you don't want to learn the lessons you've chosen to learn... (L) Or, you have learned them and thereby CAN change the universe... (T) When you learn, you just move on automatically, you don't have to change the universe. The universe will change for you.

**A:** Deja vu comes to you compliments of 4th density STS.

**Q:** (L) Is deja vu a result of some sensation of the universe having changed?

**A:** Or... some sensation of reality bridging.

**Q:** (T) As you move into the new one, you have leftovers?

**A:** No.

**Q:** (L) What is reality bridging?

**A:** What does it sound like?

**Q:** (L) Is it somewhat like merging universes? (T) A bridge is something you put between two things...

**A:** You wish to limit, wait till 4th density, when the word will be obsolete!

**Q:** (L) That still doesn't help me to understand deja vu as a "sensation of reality bridging." Is deja vu because something comes into our reality from another?

**A:** One possibility..

**Q:** (T) Didn't we talk about this? That it is a bleedthrough from other dimensions... that when we think we have been someplace before, it is because in another dimension we have...

**A:** Yes.

**Q:** (L) If you are now in a particular universe that has been created and merged by 4th density STS, and there is still the old universe existing, and you feel a connection, or a bridging, because some alternate self is in that alternate universe, living through some experience... or a similar thing?

**A:** No limits of possibilities.

**Q:** (L) So it can be any and all of those things, and bridging realities of “past” and “future,” as well. Is it possible to change the past within a discrete universe, or does every change imply a new or alternate universe?

**A:** Discrete does not get it.

**Q:** (L) Well, within a particular, selected one of the universes, can you go back in time, within that universe, change the past, and have it change everything forward, still within that selected universe, like a domino effect?

**A:** In such a case, yes.

**Q:** (L) But, you said that if you want to change the past, you have to create an alternate universe... (T) No, you asked about changing the past, and they said you have to create a temporary place to work from, a position from which you can manipulate the reality...

**A:** That is for specialized activities.

**Q:** (L) So that creating of an alternate universe was for special things, and not for a general historic change?

**A:** What was described is not the same as an “alternate universe.”

**Q:** (L) It is a temporary file that will go away when you are finished loading the program. And that is not creating an alternate

universe, but rather a temporary dimension...

**A:** Close.

**Q:** (L) In our particular universe, what is the primary mode? Are we constantly shifting and merging universe to universe, or is our past being changed and reacting like the domino effect... at least in the past few years... (T) But, we wouldn't know if the past has been changed because we wouldn't see it...

**A:** Measurements are inadequate.

**Q:** (L) How does that relate to my question? Which is happening? Is our singular universe being changed as in a domino effect, or is it continuously being merged with a new one and another and another... (T) What you are asking for is a measurement. (L) Is it that any and all possibilities and will and do take place?

**A:** Closer.

**Q:** (L) Can you clarify that any further for me?

**A:** No, because you would simply not grasp it.

**Q:** (T) It is part of the infrastructure of the universe which we are in no way capable of understanding at this point. We can't even get quarks right.

**A:** Yes.

**Q:** (L) Are the words "universe" and "dimension" synonymous?

**A:** Yes and no.

**Q:** (L) In what sense yes?

**A:** For you, these are "grey" areas, and no matter how hard you try, until your perception shifts fundamentally, you ain't gonna get it!

**Q:** (J) I guess it is a question of faith. (L) Are all universes “Free Will” universes?

**A:** If chosen.

**Q:** (L) Are there universes where everything is predestined?

**A:** Within the framework of a cyclical separation bond.

**Q:** (L) What is a “cyclical separation bond?” I think I’m getting in over my head...

**A:** Only because “you ARE in over your heads.”

**Q:** (L) But you didn’t tell me what a cyclical separation bond is!

**A:** And if we do, you will ask: “What do you mean by that?”

**Q:** (L) Well, you are right about that. (J) It’s like a little kid asking: “Daddy, why is there air?” (L) Are there universes where time goes in the other direction, as in universes of anti-matter?

**A:** Why do you ask this?

**Q:** (T) They have been telling us all along that there is no such thing as time except as we perceive it. (L) Well, I guess I just meant “anti-matter” universe. Okay, there are 4 physical densities...

**A:** No, three.

**Q:** (L) Okay, there are 3 physical densities, and the 4th is...

**A:** One is variable. Three Ethereal.

**Q:** (L) Okay, three that are physical, three ethereal, and one in between that is both.

**A:** Close.

**Q:** (L) Do you go from 4th to 5th repeatedly until you are ready to go to 6th, or do you go to 6th from 4th, or to 6th from 5th?

**A:** Because of already given data, that is elementary my dear, Martin, elementary!

**Q:** (L) I am NOT Martin anymore! So there!

**A:** You are in an alternate reality.

**Q:** (L) Oh, God! I don't even want to THINK about that! That's horrible! Does this mean that when you gave me the word "NEW," you perhaps meant a new universe? A new reality? (T) Well, you are because you have changed. But we're not.

**A:** Why does Njorrg always get the tough assignments?!?

**Q:** (T) Because you are lucky!

**A:** Mirth iz goot!

**Q:** (L) Stop laughing guys... is the entire universal system, everything combined, similar to a dissipative structure, or is any part of it similar to this?

**A:** No.

**Q:** (L) Okay, in a general sense, and I know you are pulling out your hair with me, if you had hair to pull, is there something that you can tell us about what it is, other than awareness, that determines your density level, like a transition point, like a flower breaking open, or something erupting through a membrane, or is it something that occurs more gradually? All of a sudden you hit a point of awareness and "POP," there you are?!

**A:** Too much.

**Q:** (L) Is awareness the only thing that determines what density one exists in?

**A:** No.

**Q:** (L) What else? (T) The way you make Christmas cookies...

**A:** Awareness is the bond that unites the reality.

**Q:** (L) You have said that the heat I feel is a “growing of fibers” or a “bleedthrough” of the new reality, is that an effect that is happening in a gradual way? (T) It has to do with the approach of the wave... (L) I don’t quite know how to ask this...

**A:** Because you do not quite know how to understand the answers.

**Q:** (L) You have said that gravity is the binder of all reality.

**A:** Yes.

**Q:** And now you talk about perception bonding.

**A:** Yes. Now, try to picture how gravity is the binder of all reality!!!

**Q:** (L) If gravity is the binder, is gravity consciousness?

**A:** Not exactly. Did you know that there is no “right” or “left” in 4th density through 7th density? If you can picture this exactly, then you may be able to understand the responses to all the questions you are asking. If not, best “give it a rest.” Because it will only be productive learning when you ponder and reflect/review “later.”

**Q:** (A) The C’s told Ruggero that our equations, that is physicists, are only one seventh of the total. How should I interpret it? Literally? That each of our equations should get an index, 1 thru 7, and be modified appropriately?

**A:** One possibility. Ruggero was limiting to realm already partly charted. Time to say Good Night. You are fatigued.

END OF SESSION

## 5.2 January 10, 1997

Frank, Laura, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Lomorra.

**Q:** And where are you from?

**A:** Cassiopaea.

**Q:** Is it alright if we have a short, private session tonight?

**A:** Certainly!

**Q:** Some of these questions may be rather moot, but I would like to get some feedback. The first is about Frank's diet. Has he received the correct diagnosis? {He had been having gall bladder attacks or something similar.}

**A:** Okay.

**Q:** Is there anything about his diet that should be added or subtracted that he is not presently doing?

**A:** Not as of yet.

**Q:** So, he is doing what he needs to be doing?

**A:** And gauge by response.

**Q:** Now, anything in particular that I ought to do about my diet right now?

**A:** Be specific.

**Q:** Um, is it alright to fast at the intervals I have been doing?

**A:** Okay.

**Q:** Well, when I do eat I eat salads and so forth, so I think I am alright. Now, last night I had a very strange experience where it seemed that I was out of the body and doing backflips. Was this an OOBE?

**A:** You have had these before.

**Q:** Was this what was happening last night?

**A:** Yes.

**Q:** Well, it was fun last night! Is there any danger in medical tests using radioactive isotopes, either by mouth or injected? Any particular danger?

**A:** Only if repetitive.

**Q:** So, having them at intervals over the years is NOT gonna give a person brain cancer or whatever?

**A:** Effect is similar to the radioactive exposure one receives from smoking.

**Q:** Now, Ark is having another hearing in the upcoming week {he was in Poland} and he has learned from his attorney that {his soon-to-be-ex} has consulted this woman attorney. But, he had the idea that she was delaying the hearing so that the dye would wear off her hair so she could create a dramatic effect... is this the case?

**A:** If so, who do you suppose will buy it?

**Q:** Well, nobody, I guess. Is this hearing going to make any progress in the case?

**A:** Progress is measured in various ways.

**Q:** I know that, but I want to know a general time frame in which this will be accomplished.

**A:** Do you expect us to?

**Q:** I would LIKE to have a CLUE! Maybe not a time frame, but a CLUE!

**A:** It will not come faster if we tell you this. This is a good lesson for all involved. When completed, you will understand things much more clearly than you do now!

**Q:** Well, okay. I would like to find out about my own case. I have NOT heard a word from this attorney. Is there anything I could do that I have NOT thought of?

**A:** Have you contacted them every three days?

**Q:** No, not every three days. I was waiting to see what they were gonna do. Are you suggesting I should contact them every three days?

**A:** What happens to the proverbial squeaky wheel?

**Q:** In contacting them, what should be the approach: accusative, or what?

**A:** No “what’s the update guys?” Simply presenting yourself often enough will make you far more valuable in the “settlement bin.”

**Q:** Why don’t I just fire these guys and settle directly with the insurance company?

**A:** Not a good idea. Without legal assistance, you would be considered a “suspect” by the insurance company!!

**Q:** Okay. We have talked a little bit about the Gulf Breeze Conference THIS Spring being the one we are supposed to go to rather than the one last year... This time, of course, Ark would be with us...

**A:** Yes, convince Ark to “foot the bill,” which he will do with happiness!

**Q:** Yes, I know he would like to go... but, there is a limit to how much we can spend...

**A:** Won't be that expensive.

**Q:** I had a dream the other night about {my ex}. When he was here to sign those papers the other day, he seemed to not even be connected to reality. Then I had a dream about him coming into the house and acting like a zombie and then walking up to a door and bashing his face against the door frame until it was bloody. This was so strange. I told Ark and he was concerned that {my ex} would go off the deep end. Can you tell me anything about this? What is the present condition of L?

**A:** We will just say, now would be a good “time” to be kind to {him}!!!

**Q:** When I am kind to him, he takes it the wrong way...

**A:** Won't anymore. And remember, there are varying ways for one to be kind.

**Q:** Anything further on his condition?

**A:** Is in a state of deterioration.

**Q:** If I am kind to him, will it help him to get better?

**A:** Will help to avoid all sorts of negative consequences.

**Q:** Is that consequences toward me and the children, or just him specifically?

**A:** Either/or.

**Q:** Anymore on this? This is causing me to be concerned!

**A:** Were you not before?

**Q:** Yes, I have been concerned on an ongoing basis. It seems that no matter what I do, he takes it the wrong way.

**A:** Adjust your methodology, and make intentions clear!

**Q:** Is Ark gonna have the same problem with {his soon-to-be-ex}?

**A:** No.

**Q:** When you say {my ex} is deteriorating, do you mean mentally or physically?

**A:** Both.

**Q:** When he fell, did he fall because the attachment that was affecting me left and went to him?

**A:** No.

**Q:** Does he have a permanent brain injury as a result?

**A:** Yes.

**Q:** Is this brain injury something that is deteriorating?

**A:** Not the injury, the after-effects.

**Q:** What were the after-effects that are deteriorating?

**A:** Subdural hematoma recurrence.

**Q:** What effects can this cause?

**A:** Many.

**Q:** Oh, dear. Aside from just being kind, is there something I can do to help?

**A:** Suggest that he see a specialist/change physicians... Not getting adequate help, either on “home front,” or professionally.

**Q:** Okay. Anything further that we should know this evening?

**A:** No.

**Q:** Mother has a couple of questions. (Alice) Since you told me about the past life experience, and that all of my problems have been emotional, have all the mistakes that I have made been because that is what I INTENDED to do in this life?

**A:** Scrambled.

**Q:** Are you saying her question was scrambled, or that her life was scrambled?

**A:** Question.

**Q:** (A) You straighten it. (L) No, you have to do it. That’s part of the learning process. (A) Well, how was it scrambled? Were all the mistakes I have made in this life part of a plan?

**A:** No. Mistakes are made by choice, plan is merely “blueprint.”

**Q:** So, she had a blueprint, and the mistakes were made by choice because she made the wrong choices?

**A:** Yes.

**Q:** Well, I think that what she is trying to deal with here is her guilt. She wants to know why she has lived her whole life making these mistakes and messing everything up every time she made a choice to do something?

**A:** Must be specific as to mistakes, always!

**Q:** You must name specific mistakes and ask about them individually. (A) Well, I am not prepared to do that. It is a blur. Just like they said, everything in my head is scrambled.

**A:** Not prepared due to “shyness.” Remember, we told you about the unfulfilled quest for love, acceptance, approval and to be “needed.” The reason for the failure of the quest is being hasty, impatient and stubborn.

**Q:** Well, Mother has the most annoying habit of interrupting people when they speak, because she assumes all the time that she knows what is going to be said, and, in fact, she is rarely right, and would receive ALL the information that she wants if she would just be quiet and listen. Sort of the idea of the old saying: we have two ears and one mouth so we can listen twice as much as we talk.

**A:** Judge not, lest ye...

**Q:** I understand that, but I am trying to help her to get to the issue here...

**A:** She must do this on her own.

**Q:** Okay, any more questions? (A) Well you know I have! (L) Well, I can't help you. (A) I don't know where to start now. (L) Well, start at the point where they left you. They said you are hasty, impatient and stubborn. Ask Why? And how can you overcome it? (A) Why have I been so hasty, impatient and stubborn?

**A:** Because of past life programming. You see, this is the challenge for all those in third density existences. Some learn in any given lifetime, and some do not!

**Q:** (A) But, I had never heard of it!

**A:** Not necessary. Just follow “the signs.”

**Q:** (A) Is it that I am so stubborn that I cannot see?

**A:** Have been; less so now.

**Q:** (A) How can I get out of this mess?

**A:** Silly question.

**Q:** (A) I didn't mean it to be silly. (L) Well, you have to want to and work at it. It is NOT easy. (A) Well, I've never SEEN any signs. (L) Oh, don't start THAT. You have had PLENTY of signs! (A) Well, is this past life experience that you described before, the same one that is at the root of the stubbornness and hastiness?

**A:** Yes.

**Q:** (A) Can you add anything to what was told to clarify?

**A:** No, not necessary.

**Q:** (L) Can you give her one or two hints or clues as to where she could start to release some of this toxic emotion she lives with?

**A:** That is part of the lesson, but it really should be obvious.

**Q:** (A) Is this toxic emotion the problem?

**A:** Yes.

**Q:** What else? (A) Well, I can't think how to ask anymore questions... (L) Then you should try to digest what you have. Okay, that's it.

END OF SESSION

## 5.3 January 11, 1997

The Wave Chapter 18: All There Is Is Lessons, or A Trip to “Alligator Alley”<sup>1</sup>

Present: Laura, Frank, Terry, Jan, Guest “M”

**Q:** (Laura) Hello, and what name shall we use this evening?

**A:** Hello. Yonnuro.

**Q:** (Laura) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (Laura) We have M here with us this evening, as well as the usual crew. V is absent, her parents are visiting. We have been discussing...

**A:** Discuss prophecy, maybe?

**Q:** (Laura) No, we weren't discussing prophecy... (Terry) Well, no, maybe they want us to discuss prophecy...

**A:** Sure, why not?

**Q:** (Terry) Well, since they/we brought it up... (Laura) All right, give us a point to start on the subject of prophecy, and do any of the bizarre events...

**A:** Well, it is important, you know. You have one here tonight who has been badly misled, controlled and programmed. In grave, grave danger. Another who attempted contact today... likewise.

**Q:** (Terry) Start at the beginning, and we'll start with M, and work on to J.

---

<sup>1</sup><http://cassiopaea.org/2010/05/12/the-wave-chapter-18-all-there-is-is-lessons-or-a-trip-to-alligator-alley/>

**A:** Must change at once!!!!

**Q:** (Laura) Change what?

**A:** Directions

**Q:** (Laura) Change directions in what?

**A:** Studies, life situations, etc... This is one who was recognized as having great potential for ultimate 4th density STO change over at a very early stage, thus attack was instituted then, and has slowly and steadily increased, with ultimate goal of total elimination. Sadly, that goal is on verge of realization?

**Q:** (Terry) Who is this guy (Name deleted - the man in touch with "M" who she was obsessing over)?

**A:** Is this really germane?

**Q:** (Laura) Well, that's what I really thought... (Terry) Is this guy involved?

**A:** No! What is important is the subject has been programmed to lead a life designed to "open the wrong doors." And when this transpires, with one of these target subjects, if they don't get help, or more importantly, do not listen to the guidelines, they are destroyed as part of a grand plan. {Discussion about marriage partners and close relations, including children, that can drain one's energy.}

**Q:** Is this what we are talking about?

**A:** Close. Those are not the only dangers. You asked about the "visitor." Well, what about that?? And what about your son's illness. What about the woman from across the street? What about Wilma, and her son? And the possible connection between him and your husband? And what if your husband worked for the

“secret government?” And what about your father, and who he worked for? What does it all mean?

{Discussion about M}

**Q:** (Terry) Anything more about M?

**A:** Only if she asks.

**Q:** (M) What about January 26th, and why did he want me to spend the night with him?

**A:** There goes that door again!

**Q:** (Laura) Wrong door! (M) Well, I wasn't even the one who opened it, was I? (Laura) By thinking about it, and thinking there might be something to it, is opening it. We're talking about mental blocking. (Terry) You have to decide how to deal with him, because he's just one of the things, just the latest... don't let yourself alone with him, at any time. Because you don't know what he wants. I'm not just talking about murder and rape, but you don't know what his powers may be. (M) Well, he's already... no, I don't! (Terry) If he's leaching energy from you, you don't want that. Definitely, you don't want that! (Laura) You said something about her son's illness... would you care to comment on that...

**A:** Part of the attack.

**Q:** (Laura) Aside from eliminating her entirely, do they have any intentions towards her son?

**A:** Not needed.

**Q:** (Laura) What does that mean, 'not needed'?

**A:** Open.

**Q:** (Laura) They don't need any intentions because they've already done something?

**A:** Open.

**Q:** (Terry) They're not going to touch that one! That's for you ...  
**(M)** A lot of people, I sort of feel like, they eliminated me, I mean, him and I are so joined. We're very joined. It's unusual. **(Laura)** OK, got any more...

**A:** And if you "head for the hills," all we can say is: see you in 5th density!

**Q:** **(Laura)** If heading for the hills is not the solution... **(Jan)** Then what is?

**A:** Look within, not without!

**Q:** **(Laura)** Your own internal power. Mental blocking. Is that it; mental blocking, the 4th density principle?

**A:** Close.

**Q:** **(Laura)** Go on, dig for details. See if you can get some details.  
**(M)** What can I say, I don't even know how to word it... Across the street, what did they have to do with any of this, I'm wondering?  
**(Laura)** They already told you that... secret government connections... Greenbaum connections...  
**(M)** Across the street? **(Laura)** The woman... they mentioned her in connection with your husband, in connection with the guy Randy, in connection with your father, in connection with the guy... So, I mean, when you ask about the January 26th, you're asking about something about a secret government guy who's messing with your mind, so it's... there's not even any point in asking about it. Know that already, and just block it. **(M)** Don't speak to him, basically. I know that...  
**(M)** Other 4th density people recognize 4th density people, am I correct?

**A:** Sometimes.

**Q:** **(Laura)** Sometimes they do, and sometimes they don't. If

they're incarnated in physical bodies, they may not, until they're awake. But, 4th density to 4th density, no...

**A:** No, what are you talking about.

**Q:** (Laura) Oh, that's what they meant. Their question mark meant what are you talking about? 4th density people recognize other 4th density people. (Terry) Just keep elaborating... (M) Well, this dude comes on with a lot of capabilities, a lot of similar things that I have. (Laura) It doesn't mean he's a 4th density person... (M) No... (Laura) No, it means he was programmed to make it look that way. How do you know you've got these abilities? Ok, you know you've heard something... (M) I've seen him at work... and I want to know; is he 4th density?

**A:** Open.

**Q:** (Laura) In other words, could be... Yes, he has that different frequency... (M) He feels different, and mental blocking angers him. (Laura) It doesn't matter. It's all on 4th density... (Terry) If mental blocking him angers him, then you know something... (M) Yes, but I don't know if I'll be happy with what I'll know... (Laura) Weel it dosen;t matter, because he can't hurt you, because your mental blocking will prevent it.

**A:** Why do you care?

**Q:** (Laura) He can't do anything. Can't you understand? The mental blocking stops them! (Terry) It throws them. They're programmed. You throw them something they're not programmed for, they don't know what to do. This guy we ran into in Las Vegas was up to... making not-so-veiled threats. When the shield went up, and... (Laura) Tell them what you said to the guy. (Terry) Something along the lines of: 'Hey, we don't have a problem here, do we?' The shield went up, although I didn't know it, and I was looking at him, and I said, 'Hey, we got a problem here?' And we

glared at each other. (Laura) Yes, he glared at him with his eyes. Have we got a problem here? (Terry) ‘Do we have... I don’t think we have...’ and this guy glared back, and we glared for about 30 seconds, and all of a sudden, he backed down, and I could see in his eyes, this confusion. All of a sudden, he shook his head, he didn’t know what to do. He didn’t know what to say. If it was a Vegas mobster, he’d have been waiting somewhere and probably blown us both away. That’s what they do out there. This was way beyond weird Vegas mobster people. And this guy would have been low-level muscle. (M) Well, I’ve already done things to get him to leave. I’ve done things, and he gets up and gets confused, and doesn’t know what to say, and goes... (Terry) You see! Confusion! That’s it! They don’t know what to do. Because they’re not programmed to do that. (Jan) They’re only programmed for certain responses. (Terry) As long as you respond according to program, they continue. If you don’t respond the way they expect... Now, this isn’t all of them! This is just the programmed people. (Laura) According to their wishful thinking...(Terry) Just like reading in the literature about the grays. That the grays do their thing, and if you do something weird, they get confused. They don’t know what to do; it’s outside of their program. (M) He’s telling me these things, and you try to be nice, and I’m not going to do any of these things with him, and I’m listening to him; ‘Oh, yes, uhuh, yeah’, and I’m going through all that, but there’s no way I would do any of the things like that. (Laura) Well, let’s ask them. What does he want from her?

**A:** Why do you care?

**Q:** (Laura) Why do you care, if you know what he is and what he’s doing, what does it matter what he wants? (M) Why? (Jan) So, does it matter? (M) It doesn’t matter... (Terry) You’re curious, and that’s the first step to giving permission. Don’t...

**A:** Yes.

**Q:** (Terry) It doesn't matter. I don't care what that guy in Vegas thought or wanted. He's gone. That's all I care about. (Laura) You're curious about the negative. Don't even be curious. (Terry) Don't care. We were out of that hotel so fast when he left... Well, he didn't leave, we left. He was still sitting there, and I got up and... I'm pulling her behind me, we're zig-zagging through the slot machines, through this whole casino, in and out of the rows, up and down, back and forth, going back towards the exit. I took her deep into the casino and back out again. I'm looking to make sure. And the first turn we made, I looked back, and he wasn't at the bar any more. He got up and left, or was gone like seconds after we got up and left. We hit that door, and I gave the doorman about ten bucks to get us a cab now, and get us the h\*\*l out of here. I don't care what he wanted, anything like that. Don't... that's the first thing, curiosity... You know the old saying, curiosity killed the cat... (M) If you run them out, and you never know, ok, and say, 'They're gone!' you're still going to be curious why. You know you got rid of them, but you always wonder, in the back of your mind, why... I mean, I do! (Jan) Well, there are some things it's best not to know!

**A:** Opens another door.

**Q:** (Terry) All you've got to know... (Laura) We're talking about mental stuff... (Terry) All you've got to know when you've gotten rid of one of them is that they had a purpose, and that you stopped them, and then get outta there! (M) Mind blocks. What kind of mind blocks? (Laura) The first thing is awareness...

**A:** Specific.

**Q:** (Laura) Specific... in other words, specific to the person? (M) Yes! (Laura) Specific to the event? (M) Specific to the energy? (Laura) And, in other words, being aware, all the time, is this correct? Being aware at all times who is, and who is not being

used against you?

**A:** Yes.

**Q:** (Laura) And, when somebody... Even if, even if...

**A:** Learn the signs.

**Q:** (Laura) Learn the signs... that people give off when they're being used as portals, or by 4th density. They may not be a 4th density being, but anybody can be a door... at any time. Anybody. And when you learn the signs, and when you learn the behaviors, and these are not like it's written in a book... They need to be specific to your life. (Terry) Go with... follow what your essence of who you are tells you to do. (M) So, most of the people that I'm around, not necessarily the people in this room, but, most of the people I'm around right now, are doors?

**A:** Well, learn the signs, and you don't have to ask that.

**Q:** (Laura) OK, what are the signs? We've kind of learned by hard experience, but could you kind of boil them down into... (Terry) That's probably how you learn, by hard experience... (Laura) Yes, because it's like... yes. OK, but go ahead... (Terry) You've got to... I don't think they're going to answer that one. (M) Is there any big, basic signs? Anything basic, or like a... (Laura) A commonality... (Terry) You just got a basic sign from this guy... you picked up strange energy. That's a biggie right there.

**A:** No, just realize that if it does not fit, do not wear it.

**Q:** (Terry) That's right. The signs can be anything. (M) Right... (Terry) My sign, the first sign with the guy with the Camaro, he popped the hood and there was no steam.

{Break}

**Q:** (Terry) Ask if there's anything else for M. She has to ask.

**A:** No. Tell Ark that we strongly suggest that he drop Tel Aviv from his itinerary. There is a grave aura of danger over the locator of Israel. Something big, big, big is going to happen there. We can not say exactly “when”, and will not say exactly what, but it will be decidedly negative!!!!

{Ensuing discussion was lost because the tape was turned off and not turned on until after this question was asked.}

**Q:** ... all right, how do we phrase this question... if every decision splits... (Terry) Now, they heard the question, let them answer. Or, what’s the commentary?

**A:** Close.

**Q:** (Terry) Well, that’s a one-word answer! (Laura) Yeah, you guys cheated! (Terry) That’s what they said; infinite. Infinite is infinite. (Laura) Then, I had an idea that when we think hard, meditate and make conscious choice, then more universe is created along this path, than along the other. I’ve said it... so that you’re balancing the good universe choice creations, making more of them, than there are of the mindless, thoughtless, just choosing because you don’t know any better... (Terry) Well, isn’t that what the lizards are doing? (Laura) Yes, it is... (Terry) They’re manipulating it to make negative. But, they can never make more than there is, more negative than positive, because the universe is constantly seeking balance. So, every place they make a negative, there’s some place else that becomes a positive. You can never make more. You can try.

**A:** True.

**Q:** (Terry) Although, they’re working on the false premise that they can do this. (Laura) ‘Wishful thinking.’

**A:** No, they are working on that false premise that they can seal realms into “4th” density and 3rd, 2nd, 1st STS for eternity.

{Ensuing discussion was lost because the tape was turned off and not turned on until after this question was asked.}

**A:** No, not physicality through all densities, just 4th through 1st density STS.

**Q:** (Laura) Ohhh!! (Terry) They don't care if it's physical or not. They're in 4th. They just want to seal them off and keep them STS to feed off of them. (Jan) Ohhh, they want their own little garden! They want their own little 'suck'garden.

**A:** "Eternity" is the key word there. It is where the wishful thinking comes into play.

**Q:** (Terry) Any more? (Laura) Eternity. In other words... in other words... (Terry) Well, there's no such thing as eternity. (Laura) Well, yes, there's eternity, but there's no 'time.' (Terry) Time isn't anything. (Laura) No, it's not. Anything further you'd like to tell Ark?

**A:** First, communicate to him.

**Q:** (Laura) All right. I'll tell him. Let's shut down here... (Terry) Wait, we have to ask about the other person that's in grave danger, was it JW? (Laura) Oh, right. Ask the question. (Terry) Who is the second person that is in grave danger that you alluded to?

**A:** It is not that he is in grave danger. It is that he has been badly misled.

**Q:** (Laura) OK, she was the one who was in grave danger, and he was the one who has been badly misled. OK. (Alice) Who? Ark? (Laura) No, JW. (Terry) Well, we don't know that. Who is this?

**A:** JW.

{JW was an individual who was totally convinced in the Nibiru/Annunaki scenario as promoted by Sitchin. You could

even say he was Sitchin's biggest fan.}

**Q:** (Terry) OK, is there anything that you want to tell him? (Laura) Ha! Don't even try! (Jan) How would you begin? (Terry) No, no, no, no! Let's see, is there anything that you would tell him?

**A:** No.

**Q:** (Terry) Is there anything that he can do that he can do to get out of being misled? (Laura) It's choice!

**A:** Choice.

**Q:** (Laura) It's his choice to be misled. You choose to believe what's the physical reality that you believe in, or you choose to believe the ethereal reality by faith, it's his choice. (Terry) Well, I got by what you said originally that he could come to harm here very shortly.

**A:** Maybe.

**Q:** (Terry) Is he in the same kind of danger that M is in?

**A:** A little beyond that.

**Q:** (Terry) So, that's pretty bad! (Jan) Yes, I guess!

**A:** Open.

**Q:** (Laura) Well, the bad thing about it is, I'm even wondering if they mean totally eliminated in physical terms, because what they are really trying to do is to get a person, even if it's under deception, to make a choice for their side, so that they can accrue their energy. I mean, it's like the currency, each person they collect to, you know, go with their propaganda, becomes a soul in their pocket... so to speak. And J, I'd have to say, is perilously close to making that choice. Because he is so firmly into the 3rd density reality. I mean, he can't even let go of the Nephilim, and the Annunaki being on the planet Nibiru, and being strictly

physical overlords and masters, that evolved, and blah blah blah. (Terry) Well, they aren't going to leave him here when they... (Laura) Is this the primary issue here; that it is really a war for souls?

**A:** Best way to get souls is to remove bodies.

**Q:** (Laura) So, if they get souls... (Terry) Is J dealing with somebody he should be really careful of?

**A:** Quite a few, actually.

**Q:** (Terry) Is it still on the level of the in-your-face attack?

**A:** All sorts.

**Q:** (Terry) What does J need to do? (Laura) Well, they're not going to tell you that...

**A:** Purge and begin anew.

**Q:** (Laura) What are you going to do? Call him up and tell him about this? Do you think he'd listen? (Terry) No, I was going to let you tell him the next time he calls. Tell him, listen up J, this is what the C's said... (Laura) Ha! (Terry) ... and, you know, deal with it! (Laura) I'll be the one in grave danger then! (Terry) No, tell him, you're perilously close to a big disaster, deal with it!

**A:** We suggest you forget about that!! No kidding!!!

**Q:** (Terry) Well, I thought we could help him one more time! (Laura) Is there anything else? It's late, and we need to close this up.

**A:** Ok. Goodbye.

END OF SESSION

## 5.4 January 17, 1997

Present: Laura, Frank, Terry and Jan

**Q:** Good evening,

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Yloloh.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (Laura) Ok, we had an interesting session last Saturday with M attending, at which time the statement was made, 'in grave, grave danger.' However, it was separated from what was addressed to her. I would like to know who, precisely, was in grave, grave danger?

**A:** All.

**Q:** (Laura) Now, you say all were in danger. From what source were we all in danger, at that particular time?

**A:** Her.

**Q:** (Laura) We were in danger from her. In what way...

**A:** The vibrations surrounding same.

**Q:** (Laura) That was my feeling, that it wasn't her that was in danger, so much as it was us...

**A:** No, her, too.

**Q:** (Laura) Ok, she was, too... (Jan) ...from her own actions...

**A:** And is.

**Q:** (Laura) ...and is; she is still. (Terry) Are we still?

**A:** Not as much, if you are vigilant and aware.

**Q:** (Laura) Ok, vigilant and aware as in looking for what in particular? If anything?

**A:** Attack programs.

**Q:** (Laura) Attack programs, so these would be attack programs in other persons as well as possibly in ourselves?

**A:** And other things.

**Q:** Is there anything more in the way of vigilance and awareness that we can or ought to know at this time?

**A:** You should already know.

**Q:** (Laura) I think we do, we're working on being pretty aware. Frank had that whole channeled experience about danger and warnings, and then she came. She called me the next day, and essentially did not want to hear any of it. She simply is so resistant to realizing the danger she is in, and I just don't have the time to deal with it if she can't open her mind. I told her that she was walking the wrong way, doing the wrong things, that she was in grave danger, and she hung up on me.

**A:** See what transpires...

**Q:** Next thing is, I have been looking at astrological charts, and I know you said that, 'all will be well, and soon,' is how you put it, in terms of Ark's situation and where his finances are concerned. However, it looks like it's going to drag on even longer, except that when I look at the chart, it looks like something significant is going to happen, in her quarter, but I would like to know if what I am seeing there, is... and I'm not going to go into specifics here, but, is what I'm seeing when I look at the charts correct?

**A:** Adventure is born of uncertainty and discovery!

**Q:** (Laura) Oh, you are just so cute!

**A:** Oh, Yeah!?

**Q:** (Terry) ... and they are running out of people in the local meta-physical community to send here.

**A:** See last response.

**Q:** (Terry) Ok, thank you. (Laura) Anybody, but anybody, can be manipulated. You've just got to keep your eyes open here. Ok, let me ask a real quick one here for (Name redacted). She would like to know: is (Name redacted) the way he is deliberately, or is it because he can't help himself?

**A:** What has her/your learning taught?

**Q:** Yes, well, I know that. (Terry) Is there an SVGA monitor in Laura's future.

**A:** Sure, why not?

**Q:** (Terry) Let's see, last week we concentrated on MM, and you were all busy trying to keep us out of trouble.

**A:** We would very much like to "concentrate" on things of worldly/universal import. What do you suppose happens when the mantle stops, or slows, and the crust does not?

**Q:** (Laura) Frank had a dream about this the other night, too. (Terry) About the mantle slowing? Okay, if the mantle slows and the crust doesn't... (Laura) It's like walking around the room, carrying a bowl of soup, and then stopping... (Terry) It sloshes over because the crust keeps moving... water in all of the oceans is going to slosh...

**A:** No sloshing.

**Q:** (Laura) Okay, what happens when the... is it that there will be lots of earthquakes?

**A:** Maybe, but what is the bigger picture?

**Q:** (Laura) The bigger picture is that the earth changes its orbital position, velocity... (Terry) No. The bigger picture is that life on earth gets pretty well wiped out.

**A:** No.

**Q:** (Laura) It exchanges energy potentials with other bodies?

**A:** No.

**Q:** (Jan) Gravity changes...

**A:** Warmer...

**Q:** (Laura) Gravity changes, ok... gravity lessens...

**A:** What have we hinted about gravity.

**Q:** (Laura) Oh, gravity is the binder... (Terry) and is the one truth of the universe.

**A:** Element.

**Q:** (Terry) The element. Gravity is the one true element. This is what you're saying?

**A:** Close.

**Q:** (Laura) So, if gravity is lessened, and it is the binder, then, everything... ohhh, I see what you're getting at! (Jan) Yes, gravity is the binder. Without gravity, it just all falls apart...

**A:** Not "Falls apart," my dear, it all "opens up!"

**Q:** (Laura) And when it opens up what happens?

**A:** Change.

**Q:** (Laura) So, in other words, this cosmic event is the catalyst for the change in those human beings who are ready and prepared to experience it in a positive way...

**A:** Well, sort of, but... Remember... There is no “supernatural” or “paranormal,” only natural and normal. Your ‘Noah Syndrome’ implied, originally, a discrimination between “wicked” and good. Being ready does not recognize such distinctions!

**Q:** (Laura) What does being ready imply?

**A:** Being on the verge of transformation to next density level, be it STO or STS. So, you see, the transformation maintains the balance!

**Q:** (Terry) And the balance is always maintained. (Laura) What time is it? (Jan) Five after twelve. (Laura) OK, we’ve got about 15 minutes...

**A:** Why only 15 minutes?

**Q:** (Laura) Because Terry’s shivering.

**A:** Terry won’t shiver if he pictures golden light enveloping him.

**Q:** (Terry) It won’t help; I’m still 3rd density in the golden light!  
(Laura) Also, I am very tired. This has been a very long day.

**A:** Time to consider construction of psychomantium.

**Q:** (Laura) What is a ‘psychomantium?’

**A:** Use Latin knowledge. {Group discusses possible definitions}

**Q:** (Laura) Is that it? Something that’s in your mind?

**A:** No.

**Q:** (Laura) Is it something that you use your mind to direct or control or power?

**A:** Chamber for viewing other realms, possible futures and entities residing in other densities. Need clear depth... such as large polished mirror on stand, which can be adjusted as to angle... walls must be completely covered in black, so as to eliminate reflection... soft, low, indirect lighting.

**Q:** (Laura) Wasn't it Dr. Moody that did the life-after-death thing? (Terry) He's got a room with the mirror with the black velvet walls and the comfortable chair that you can look in the mirror without seeing yourself...

**A:** Yes, and it is real and it works. In the clear depths, you can even see us, on occasion!

**Q:** (Laura) Didn't we ask once about what this guy was doing, having people staring into a mirror, that it was opening them up to attachment, and was that not confirmed?

**A:** Attachment is merely a function born from a lack of knowledge... something you have enough of now so as not to worry.

**Q:** (Terry) This psychomantium, isn't it in essence a way of opening up a doorway to other realities and other levels and densities?

**A:** Yes.

**Q:** (Terry) Is that something you really want to do?

**A:** Yes.

**Q:** (Terry) Why?

**A:** Because you are ready now... and besides, what do you think you are doing here?!?

**Q:** (Laura) Is it a doorway that can be as Castaneda described it, where something can walk in, or walk out?

**A:** Possible... but... if you recall, what was the missing factor with Castaneda's story?

**Q:** (Laura) He didn't have knowledge. Is that it?

**A:** Not enough.

**Q:** (Laura) Is this something that can or ought to be done as a group, or singly... what's the deal?

**A:** Both.

**Q:** (Terry) So we're going to really construct one of those here? (Laura) Do we really want to do this at this house? Don't we want to buy something out in the country, where people won't be watching our bizarre behavior? (Terry) It doesn't really matter, we're watching everybody else's bizarre behavior, how bizarre can it be?

**A:** They won't watch, unless you invite them in.

**Q:** (Laura) Ok, we've got all of these little things that need to be done; we've got a hole in the cellar that needs to be dug, that's still sitting there, we've got a pool that's supposed to be built, now we're supposed to build a psychomantium.

**A:** This is not a daunting or costly project... materials: felt of the type you used for your charts, mirror and soft light, or candles. {Terry describes a portable version that can be set up when using, and taken down when not needed.}

**Q:** (Laura) Is this basically the way that it is done, as Terry has described it?

**A:** Yes.

**Q:** (Laura) How long is it necessary to sit and stare into the mirror before one experiences...

**A:** Varies, but not long.

**Q:** (Terry) It's going to vary from person to person... (Laura) OK, what advantage is there to using a psychomantium to using the board, I mean, is it going to replace the board?

**A:** No. Visualizations clarify and unite images.

**Q:** (Laura) Ok, what images would we wish, or would be suggested to unite and clarify, and particularly in the term unite? You've used the term 'unite' on a number of occasions, and in unusual ways.

**A:** Anything and everything in transcripts, for example... and all else.

**Q:** (Laura) Okay, so we would be able to see all of the things told about in the transcripts. Would we also be able to, by seeing a 4th density reality, be able to generate some sort of unification between ourselves, in some sense, and this new reality ?

**A:** Yes.

**Q:** (Laura) Is this part of the way and means of bonding oneself to 4th density reality.

**A:** Helps.

**Q:** (Laura) Can one also use this to visit other parts of the globe in real time?

**A:** Yes.

**Q:** (Terry) Visit the past and the future?

**A:** Yes.

**Q:** (Terry) There's other things on the other side. Can they come through?

**A:** Only if used ignorantly.

**Q:** (Laura) Is it the mental blocking technique that we are familiar with what prevents entry of something else?

**A:** Close.

**Q:** (Jan) ‘Knowledge protects!’ (Terry) Well, this is easier than digging out under the pool, and building a reflecting pool, and finding 75 square feet to build a labyrinth. (Laura) It sounds like a damned amusement park! (Jan) Yeah, ‘LauraWorld’!!! (Terry) It would give a whole new meaning to an ‘E’ ticket ride!

**A:** “Amusement” denotes fun!

**Q:** (Laura) Ok, guys, it’s late and Ark is waiting.

**A:** Goodbye.

END OF SESSION

## 5.5 January 25, 1997

Frank, Laura, Terry and Jan, Alice, guest Terry A.

**Q:** (Laura) Hello.

**A:** Hello.

**Q:** And who do we have with us this evening, what name shall we use?

**A:** Torra

**Q:** (Laura) Okay, and where are you transmitting from?

**A:** Cassiopaea.

**Q:** (Laura) Ok. We have a guest with us this evening; Terry, our therapist. He has some questions he would like to ask, if that is all right?

**A:** Well of course, when would you expect us to say “no”?

**Q:** (Terry A.) I just want to know what the pressure is that I feel whenever feel energy in someone. What is that I’m feeling?

**A:** Terry must be indoctrinated into the art of precise questioning. Be forthright my boy, shyness simply will not do!

**Q:** (Laura) Okay, ask direct, precise questions.

**A:** In detail!

**Q:** (T) Start with a general question and see how the answer goes, and you can start to fine-tune how the questions work. It’s a process that you have to learn how to do. It took us years to do it. And we still don’t do it right all the time.(Terry A) Does the pressure I feel in my head have any significance?

**A:** Yes.

**Q:** (Terry A.) Am I picking up on the other person’s energy? In a meridian type of way?

**A:** Well yes, but meridian??

**Q:** (Laura) Well, the first answer to your compound question was yes, but the other part was not meridian.

**A:** What do you know about electromagnetism?

**Q:** (Terry A. ) Just the basics, you know, with energy fields, with the globe.

**A:** How does this relate to humans?

**Q:** (Terry A.) Well, the human body is made up of an energy flow; every living thing has its own energy flow... (Laura) I have a way that I think might get at what you're after. Terry is aware, that yes, he's picking up on the other person's energy. I think what he's...

**A:** Please let Terry ask, this is important! Thank you!

**Q:** (Terry A.) Does it have anything to do with a past life, me picking up, being able to pick up anything from my past life?

**A:** One step at a time...

**Q:** (Laura) Back up to electromagnetism.

**A:** The field you speak of is not possessed, it is "borrowed."

**Q:** (Laura) Is he borrowing the other person's field?

**A:** No.

**Q:** (L) How is the field borrowed? (Terry A.) Going back to creation, is this energy field, is the electromagnetic field passed on from one generation of beings...

**A:** No.

**Q:** (Terry A.) ... to the next generation...? (Laura) No... (Jan) Is it a continuous field? (Terry R) We're getting off the topic now. It's about the interrelation of Terry's field and his patient's field, that's what we got to, it's electromagnetic interaction...

**A:** Terry made reference to this field in such a way as to suggest that it is indigenous to human beings, it is not. It is borrowed.

**Q:** (Terry R) The source is everywhere. (Laura) Ok, so he made reference to this field as though each individual had one; the field is borrowed. Where is the field borrowed from?

**A:** Density number 7.

**Q:** (Laura) Okay, that's the highest density, number 7. That's "God." (Terry R) The "Creator."

**A:** No, it is "union with the one."

**Q:** (Terry A.) Does it represent itself being manifested just in life? Does it stand for life? Is it an example of the life? Of living? Something that's living?

**A:** Not well put, but, what it is is the animation force of consciousness at all levels and in all representations.

**Q:** (Laura) Okay... (Terry R) What I'm getting is that as Terry is doing his work, he is able to tap the universal life force, the energy field, the universal energy frequencies...that he's tapping into these.

**A:** Not germane. All "tap" in this way, but how many "feel" it in some way?!?

**Q:** (Terry A.) Why do I feel it, and other people don't?

**A:** Closer to the transformation for 4th density.

**Q:** (Terry A.) Can I utilize this feeling to help those that I come in contact with, that I really feel the strong inclination, or feel the strong force, to be able to help them to balance their bodies?

**A:** Whoa! Wait a minute! Can an infant utilize a "747?"

**Q:** (Terry R) Well, in a way, he is utilizing it... (Jan) You're here... being aware of it...

**A:** No.

**Q:** (Laura) No, he's not utilizing it? (Terry A.) When I use the acupuncture, I'm just releasing energy blockages within the person?

**A:** No. Terry. You are sensing what all experience when in contact with others. You see in the history of your life are rather drastic changes in mental , emotional and psychic awareness, to say nothing of attitude and awareness. This is symptomatic of the change in frequency resonance vibration. The things that used to interest you do not anymore, and vice versa. One way this is manifest is a decrease in interests of a material or physical nature. One's libido tends to decrease, for but one example.

**Q:** (Laura) Will his awareness of this contact continue to increase?

**A:** Yes.

**Q:** (Terry A. ) At times, I have even not only sensed with the feeling in my head, but I have also seen colors... Is there a relation of the colors that I have seen to the electromagnetic field?

**A:** Yes, but seeing auras is mainly a sign of approaching wave, i.e. density change over.

**Q:** (Laura) Well, that's good, because that means you're in tune with what's happening! (Terry A.) Is there any past-life connection with this being able to sense this?

**A:** Not really.

**Q:** (Laura) How about with your liking for the work? Terry seems to have an instinctive knowledge of how to do the acupuncture, and the...

**A:** This was result of change during this lifetime. Do you wish to share with the group what you were like as an adolescent and as a young adult... and the drastic changes between then and now? We think they might find this interesting!

**Q:** (Jan) Woo hoo! (Terry A.) My awareness of this, does it have anything to do with when I had polio when I was three years old?

**A:** No, but that opened a channel during the periods of high fever and pain.

**Q:** (Laura) Did you have high fever and pain? (Terry A.) Yes, it was like 106 temperature, and paralyzed both legs and my right side. (Laura) So Terry's had some real bodacious experiences!

**A:** We told you! There's more, but let him tell as he feels appropriate.

**Q:** (Terry R) The change didn't have to be all at once; it could have been gradual after all of that... (Jan) Well, it's all a series of events... (Terry A.) And after all of the stress and the nervous breakdowns, the three hospital visits... (Laura) You were just trying to, I guess... well, it sounds like all of us, we've all been there! Trying to be normal in a world...we just don't fit! (Terry A.) No. Is it that we don't fit, or the rest of the world don't fit? (Laura) Well, it's their world... well, we chose to come here, but ... (Terry R) Sure we belong here, it's our world too! (Terry A.) Is the path, jobwise, that I'm on now, is it one that I should continue?

**A:** Leads to interesting things, prepare for some unusual experiences, dreams, visions and greater consciousness and awareness.

**Q:** (Terry A.) The phone call that I received last night from SV, should that position there be avoided? The contact with her?

**A:** Open.

**Q:** (Laura) That's up to you, you've got to make the decision. I would say that, taking an example from our experiences... It's funny that she would suddenly call you up, out of the blue... (Jan) If that is the S I think you're referring to? Steer clear, that's my advice. (Laura) They won't tell you that one; you've got to make your own mind up! (Jan) Yes, but we can tell you! (Terry A.) I'll just go by what I feel... (Jan) Which is? (Terry R) How well do you

know S? (Terry A.) There was always something there, whenever I worked on her, kind of like, almost like a sucking, you know. It felt like she was sucking the energy out of me. (Jan) Very astute of you, yes. Too bad we didn't sense that. (Frank) We did. (Laura) Let me ask real quick, is there anything... Terry worked on me the other day, and is there anything further that he can do to repair whatever I did in that fall? (Long pause before response)

**A:** Wait and see.

**Q:** (Terry R) They thought about it before they answered that one! (Laura) Stinkers! They won't tell me! (Jan) I've got a question. Are we through with... (Laura) I don't know, Terry A., are you feeling more puzzled than before, or are you feeling... (Terry A.) No. I'm kind of cleared up a little bit, like what you and I talked about before, about having to go through a bunch, and I was wondering if there was any correlation with the phone call and all... (Laura) Yes, I would say so, one way or another. (Jan) I want to ask about the experiences that I've been having the past week or so, in the fact that I've not been as emotional as I have been in the past... (Terry R) Like the week before! (Jan)...like the week before, right! Does it have anything to do with the nutritional supplements that I have been taking, the vitamins and such?

**A:** Some, but remember, all things physical and ethereal are interconnected.

**Q:** (Laura) Well, if all things physical and ethereal are interconnected, what ethereal effect has she experienced that reduced the physical/emotional experience? (Jan) Yes, I haven't been having the crying jags for about two weeks now. (Laura) What has changed ethereally?

**A:** Too complex.

**Q:** (Laura) But something has changed, apparently. Okay, is this

something she has to find out on her own, by self-analysis, or observing the signs?

**A:** You got it!

**Q:** (Jan) Does it have anything to do with being in a premenopausal situation?

**A:** More than likely.

**Q:** (Jan) Okay, thank you very much, I appreciate that.

**A:** You're welcome.

**Q:** (Alice) What did they say about Terry being able to help you?  
(Laura) They said "Wait and see." They weren't going to tell me anything.

**A:** Wrong. We were not going to tell you that.

**Q:** (Laura) "That," not "anything." Picky, ain't they? (Terry A.) Will the acupuncture help Jan with the emotional problems that she's having? The ups and downs?

**A:** Learning is fun!

**Q:** (Laura) Try it and see! (Jan) Sometimes I feel like they drop into a Mr. Roger's Neighborhood kind of thing! (Terry R) "Will you be my friend...?!?"

**A:** Sure we will. After all, we are you in the "future."

(Break)

**Q:** (Jan) I'd like to ask about the feeling I had coming over the Courtney Campbell Bridge on Thursday afternoon. What was the reason for the feeling of dread that I had?

**A:** Fear strikes when one has momentary realizations of the trapping boundaries of physicality.

**Q:** (Jan) I haven't felt that way on a road since I had to drive on Rte. 10 up in NJ. It was a concrete-divided highway, and I had to speed because I was late. White knuckled fear, with the divider right outside the window! (Laura) I had that feeling once; I looked in my rear view and saw nothing but grille. We were coming through Malfunction Junction in Tampa, and I was going fast, but he was going faster! (Jan) Yes! (Laura) Did her feeling have anything to do with this conjunction that apparently occurred on Thursday?

**A:** No.

**Q:** (Laura) Was there anything further to her feeling, to her sensation?

**A:** No.

**Q:** (Laura) Was there any significance to this astrological conjunction that occurred on Thursday? I mean aside from normal conjunctive significances.

**A:** No.

**Q:** (Laura) OK, then all of the hoopla about that on the net and in the metaphysical world is basically more of the same "bored, let's start a rumor," routine.

**A:** Yes.

**Q:** (Laura) Okay, so then I read that one right. No big deal on that one. Ark has mentioned that this conference he is attending is at a University that is founded and funded by Americans, in Hungary, and the primary recipients of the invitations, and I mean the primary ones - he was an exception - are Russian. And here are all these Russians running around, as he put it, being exposed extensively to the virtues of the American way of life. I would like to know, the one thing that occurred to me was that in-

stitutes of higher learning, places where the propaganda is being disseminated... well, can you make any comment on this particular situation?

**A:** Specifics.

**Q:** (Laura) OK, why was Ark invited, along with all these Russians?

**A:** His standing.

**Q:** Why are all the Russians invited?

**A:** Their value.

**Q:** (Laura) Their value as what, or in what?

**A:** Exactly.

**Q:** (Laura) All right, clarify! (Terry R) We're buying them to keep other countries from buying them! (Laura) Is that it? (Terry R) It's political. (Laura) We're buying them to keep other countries from buying them? (Terry R) If we don't...

**A:** More like "they are being bought to make sure that they are not not bought."

**Q:** (Terry) All these Russians are now out of work, and they don't want them going to China, they don't want them going to who knows where...

**A:** No, Terry. There are no countries, only souls.

**Q:** (Laura) OK. I get it. They are being bought to make sure that they are bought so that they won't think or do anything on their own, or individually. In other words... (Jan) They are being shut up...

**A:** That is the goal, though not always realized.

**Q:** (Laura) OK, so it's "Buy 'em and tell 'em what to think!" (Terry R) Yes, that's it. They don't want them freelancing. There's too many of them out there already. (Laura) Ok. Now, I was a little curious as to this rumor that was being spread about Ark, that he was a member of the Church of Scientology. (Jan) What? Oh, because they know he's coming here to Florida. (Laura) Yes, she {his ex-wife} must know about this, because the University bought his tickets and everything. Is she the source of this rumor?

**A:** Lawyers investigate.

**Q:** (Laura) Did she have lawyers investigate what he was doing? And where he was going and who he was in touch with?

**A:** Close.

**Q:** (Laura) So she knows he's coming here?

**A:** Yes.

**Q:** (Laura) Does she know about me?

**A:** No.

**Q:** (Laura) Ok, will there be more problems from that source?

**A:** What would you anticipate?

**Q:** (Laura) Well, you told us not to anticipate, to deal with things as they come. (Jan) Yes, but you have a pretty good idea.... (Terry) Laura, here's a thought for you. She took his money. Now she's got lawyers. That's where his money's going. When he finally gets his money back, it's going to be minus the lawyer fees. Which will be most of his money. (Laura) Oh, if she keeps doing what she's doing, she won't have any money left, and then she'll really be in the soup. She'll be cutting off her nose to spite

her face! OK, about how much of his money has she spent so far on lawyers and private detectives and so forth?

**A:** Open.

**Q:** (Terry) She's going to spend it all. (Laura) Okay, since you did predict this, since it did come true, is there anything else further that you can volunteer at this time?

**A:** Ark needs to be more on guard than he is. He does not even yet completely comprehend how much fury he hath. He would not be "in for more" to as great an extent if only he would be more vigilant. But we fear that his Achilles heel is that he underestimates too much, even when he says that he doesn't.

**Q:** (Laura) What could he do, in terms of actual concrete action, at this point...

**A:** Actual concrete actions fall into place naturally if one has adequate knowledge and/or awareness.

**Q:** (Laura) What knowledge or awareness does he need to have emphasized in order to have the proper concrete action?

**A:** See last three responses.

**Q:** (Laura) So, in other words, he needs to realize that this woman... (Frank) Well, wait a minute now, what are they saying? (Terry) That's going to be hard for him to be aware of what's going on around him; he's a scientist. He gets focused.

**A:** But he is not your "typical" scientist in that and many other respects.

**Q:** (Laura) Is there anything I can say to him that will help this situation?

**A:** What we have just said to you.

**Q:** (Laura) Anything else on this?

**A:** If you ask...

**Q:** (Laura) Well, can anybody think of anything else? (Terry) Is the government watching him?

**A:** Yes.

**Q:** (Terry) Is he aware of it?

**A:** No.

**Q:** (Laura) Are they reading our e-mails?

**A:** Open.

**Q:**(Terry) Well, if they're not, NSA is! (Alice) Ask if there's anything that he has omitted that is important in this case. (Laura) In the sense of filing suit against her, which would be the most effective, civil or criminal, in terms of halting her actions?

**A:** This too, is a learning experience.

**Q:** (Laura) Is what he is learning just how dark the darkness can be?

**A:** Partly.

**Q:** (Laura) And what is the other part of it?

**A:** Many other parts.

**Q:** (Laura) Is anything going to prevent him from arriving on the 11th?

**A:** Maybe.

**Q:** (Terry) Is the US government watching him? Or at least have taken note of his actions? Think about it; he was invited to the conference.

**A:** That may be true long before any of this!

**Q:** (Terry) They're watching him because he's a top rated European scientist; they watch everybody. But, just think; he was invited to the conference, and you asked why was he invited to the conference, besides for his expertise?

**A:** If you beg for advice in this matter, we will say only this: perhaps best to concentrate all, and we do mean all, energies upon this matter and the seriousness therein during communications. There will be "time" for matters more akin to the "future," and of the heart, at a later juncture. Needs to understand the dangers that lurk, and that are potentially extreme, once and for all!!!!

**Q:** (Laura) If we concentrate all energies on this matter, which matter in specific... (Terry) Ark getting here... (Laura) I know, but of the..

**A:** And of the divorce and of attack in general. What have we told you about who is subject to the greatest attack and why?

**Q:** (Laura) Those that are on the path are subject to the greatest attack, and that's why; they're on the path to find out how to overcome all this stuff. Is that it?

**A:** No.

**Q:** (Terry) The Feds, and the scientific community want to make sure that Ark's not doing something behind their back that they should be aware of at this point. Are we right about the papers, and the passport and the credit card?

**A:** Partially.

**Q:** (Laura) What happened to the passport and the credit card?

{See Adventures for background: Adventures With Cassiopaea -

Chapter 8<sup>2</sup>}

**A:** Examination, encoding, and alteration for purposes of monitoring.

**Q:** (Laura) Where did they remove them? Where were they taken? Where was he when they were taken?

**A:** Seated in crowded setting.

**Q:** (Jan) When were they replaced? (Laura) They weren't replaced, they were given back to him at the desk. (Jan) Oh, that's right! (Laura) Who took them? (Jan) Who returned them?

**A:** Agent from Alpha 1

**Q:** (Terry) Probably a government program. (Jan) Theirs, or ours? (Laura) They're all the same.

**A:** Both.

**Q:** (Laura) Ok, would it be advisable for him to try and have these cards replaced?

**A:** No!!!

**Q:** (Terry) It won't matter. Besides, if he does that, then they'll know he knows! Then, they'll just give him another set that's marked!

**A:** Knowledge protects and... ignorance endangers!

**Q:** (Laura) And what else was it about that whole situation that we wanted to know? Was Ark trying to communicate to me that he was in danger when he was telling me about the cards and paperwork, or that he was aware of the situation?

**A:** Sensed something awry, but misdiagnosed, partially.

---

<sup>2</sup><http://www.cassiopea.com/cassiopea/adventures050.htm>

**Q:** (Jan) Why was the phone call to him in his room so interrogatory?

**A:** To gauge awareness.

**Q:** (Laura) Are they monitoring my phone calls to him there, every day?

**A:** Yes.

**Q:** (Terry) They even monitor phone calls to Canada and back, and we're buddies. We're all the same country, it's a cross-border, and they monitor them. (Jan) Are they monitoring all your phone calls? (Laura) Probably.

**A:** Sometimes "they" even monitor these communications. Long ago, we told you how technology now existent makes such things as phone taps, for but one example, totally, completely, and ridiculously obsolete.

**Q:** (Laura) Should I try to tell him anything, either by the phone, or by e-mail, about this?

**A:** Pointless.

**Q:** (Terry) You don't have to. He has to be aware of it on his own, and from what you've already told us, he's aware. The scientology thing has to have really blown him away... where would that come from?

**A:** Assumptions. Awareness needs to be increased. And, we must tell you that "secret world government" technologies are approximately 150 years in advance of anything that you have access to.

**Q:** (Laura) Why is it pointless for me to try to communicate any of this to him? Why did you reply 'pointless' to that?

**A:** Not what we said. It is not pointless to warn him to smarten up on the vigilance and caution scales. Just pointless to try to

direct him with details, or practice “subterfuge.” After all, when your mind can be read like the morning newspaper, what is the point?

**Q:** (Laura) Have the lawyers or investigators that {his ex-wife} has hired monitored our Internet communications? Or our phone calls? Do they have access to those?

**A:** Not the lawyers, but maybe things “get around.”

**Q:** (Jan) It’s like the old “telephone game”... (Laura) How would they get around? He’s the only one that knows about me, except his lawyer, and his mother, and his sister. (Terry) There’s about 500 spooks between here and there! (Laura) Things get around...

**A:** Is that not enough to enlighten you?

**Q:** (Terry) Things get around... The lawyers and the ex-wife are not the big point, they’re just part of it. (Jan) Well, it’s kind of like starting a rumor, somebody overheard something, and... (Laura) Are the spooks loosely, or not so loosely, using {his ex-wife}? (Jan) Oh, good thought!

**A:** Maybe, but the sister and/or the mother tells the daughter who tells the wife who tells the lawyers who tell the investigators who tell...

**Q:** (Jan) ...and so on, and so on, and so on.... (Terry) And hey, he’s coming to the Clearwater area. (Laura) Where is the Scientology bit coming from?

**A:** Lawyers via investigators... was it misdiagnosis, or convenient plan to be utilized later?

**Q:** (Laura) Can he trust his own attorney?

**A:** Can you trust yours?

**Q:** (Laura) Only because they want to make money.

**A:** OK.

**Q:** (Terry) Remember what the character in ‘Primal Fear’ said: “I don’t care, I can’t care, if you’re innocent or guilty; whether you did it or not, I’m your mother, your father, your sister, your brother, you talk to no one else but me, I’m your lawyer...” (Laura) Is there any action that he can take that will put a stop to this Scientology rumor, and will...

**A:** See previous answer to similar questions.

**Q:** (Laura) Ok, they said that he will see any concrete actions that need to be taken once his awareness is pumped up, right?

**A:** Yes.

**Q:** (Laura) Is there any more information you can give us tonight, for Ark, for ourselves?

**A:** No

**Q:** Then goodnight and thank you.

**A:** Goodbye.

END OF SESSION

## **5.6 February 1, 1997**

Present: Laura, Frank, Terry, Jan, V

{Discussion before the session was Terry talking about all kinds of new star wars type weapons he’d been reading about and possible influence and/or purposes for such weapons.}

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Wonnapa.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** Have you been listening to our discussion?

**A:** Yes.

**Q:** Do you have any commentary you would like to make on the subject?

**A:** Well, more specific than that, please!

**Q:** Well, I'm not going to ask any questions about munitions. I don't know anything about munitions, and I couldn't ask any intelligent questions...

**A:** Your conversation covered a whole lot more than just munitions.

**Q:** Yes, it did. Now... (T) What did they ask? What did the discussion cover? (J) ... our conversation 'covered a whole lot more than munitions.' (T) Yup, it did! (L) OK, well, if we've got these... these... well, I don't even want to get on the subject, because I just... it... (T) Then, well, let's talk about something else.

**A:** Yes, we do suggest you do get on to the subject.

**Q:** (L) All right, then, you guys go ahead and ask your questions, because you know what to ask... They want you to get on to the subject...

**A:** No, Laura, you do too!

**Q:** (L) Well, I don't...

**A:** You don't know anything about Illuminati? Or secret government? Or future plans to institute changes?

**Q:** (T) Yep, that's what we were talking about...

**A:** Or, how this may, let us make that WILL, affect you?!? It would be wise to learn, discuss, and network quite a bit about this, for your own good!! Especially since we have noticed a distinct change in your "tone" since Arkadiusz came into your life... you have become somewhat "euphoric" about this turn of events, and your perspective on the prospects for your future. But it would be most decidedly unwise to let your temporary feelings obstruct the bigger picture, especially since the addition of Arkadiusz will have a stunningly profound effect on the course of events and all that implies with regards to the coming of the wave and the turmoil that will precede it!!!

{The group stops to discuss the message. Tape turned off.}

**Q:** (T)... and it's not that we're anchoring it in New Port Richey...  
**(L)** It's the planet... **(T)** ...we're anchoring it to the planet. And, there are other groups, anchoring frequencies. Maybe different frequencies, maybe the same frequency. They alluded to that, too, they said that there were other groups... **(V)** Yes, that's something I was wondering about, for the last month, was one of the first times that I sat with you and Frank, they had said, what, that there were about ten people on the planet, that they were...  
**(L)** They said about 100. And they said that 10 were getting similar... **(V)** I was wondering whether that's grown in the last two or three years... **(J)** Good question! **(T)** Well, I think the Gulf Breeze Six people were hooked into it and they didn't make it. A lot of the groups are not going to make it. **(V)** Well, a good way to gauge is to observe the interaction... **(T)** They can't depend on just one group to do it. They've got to have a whole bunch of different groups trying to do it. That way, at least one will make a con-

nection. The more the merrier. The more groups, the stronger it becomes. (L) The whole thing is, is to survive. I mean, after we've had some of the bizarre things...

**A:** Start the flow again, Laura.

**Q:** (L) Which flow?

**A:** You don't know !?! They said, incredulously...

**Q:** (T) The frequency, the flow, what we've just been talking about. (L) OK... (T) Start the flow again. Is that what you're talking about?

**A:** Yes.

**Q:** When Ark gets here, this particular group is going to increase...?

**A:** We meant to restart questions...

**Q:** (L) OK, start the flow...

**A:** ... regarding the subjects at hand.

**Q:** (L) OK, they want me to start the flow again... (T) Start the questions... (L) All right. To start the flow of the energy, let me ask this: You have said, on a number of occasions, that somehow, some way, what we are doing is going to play some role in these upcoming changes, turmoil, etc. And then, you've also, on other occasions, made allusions to secret government, and to the Illuminati, and so on and so forth. And you have also said that our knowledge is going to increase to, I think it was 30 to 35% of what the Illuminati possesses, but that would be like individually, each of us individually, so added together, it would be a lot more than that. Can we think, or ask, if there's going to be a general tendency for our activities to be more closely scrutinized in the not too distant future?

**A:** What do you think?

**Q:** (L & T) Of course! (L) Let me ask; is there going to be any attempt to further attack or harm us in any way?

**A:** Well, let us put it this way: the future is fluid, as you know. Knowledge protects you. But, it would be wise to picture these letters appearing on a screen somewhere, at the same moment that they are uttered!

**Q:** (L) Is it the uttering that... (T) Uttering, or spelled on the board? (L) ...'the moment they are uttered'... is it the uttering that is the key. {The fact that I speak them aloud.}

**A:** Does not matter, in all reality. The key is what the expectation is as to how they are intended to be put to use.

{Discussion about outside monitoring possibilities.}

**Q:** (T) Remind me; I've got another observation to make about the people on the other end... (L) Is there an internal configuration or frequency level that makes it so that the persons who are selected to do this monitoring, or to be involved in any of this kind of activity, such as you have described, as in the words appearing on the screen, etc., so that they are definitely selected because of their STS orientation?

**A:** This process takes place naturally. Now, a warning for you. Frequency resonance modulations of vibration rate can be altered or modified from outside if one is not cautious and/or aware enough, and thus takes necessary precautions.

{Discussion about potential corruption of information by those monitoring.}

**Q:** (L) Well, OK, we know that. So, in other words, not only the information channel...

**A:** Yours can, ours cannot!

{Tape off}

**Q:** ...and they're letting them go and do it, because they figure it's going to be great, because everybody'll think it's just TV, it's just phony. And they are hoping it won't go. The whole thing all goes together. It's all linked together. Somebody's watching this stuff, it's disseminated through their organization, too. (L) I want to ask a question...

**A:** Now, remember technology can be used to “zap” you in a number of ways. For example... beware of any episodes of sudden storminess that may occur between you and Ark.

{Tape off and examples discussed.}

**Q:** (J) ... arguments that just jump up out of nowhere... (L) We're aware of that... (T) That's something to keep in mind. (L) What...? (J) It's been happening to us... (T) How many attacks have been generated to stop us? Lots! How many attacks have not happened, simply because this information is being disseminated amongst them? How many allies do we have there? (L) Probably a few. (T) It's growing... (L) I mean, Terry and...

**A:** Maybe, but alliances that develop within the confines of certain “agencies” may be treated rather harshly.

**Q:** (L) Let me ask this quick, before anything else happens, just hold everything. I want to get it in. I have had, in the last couple of weeks, three very difficult falls, almost as if something was done. Now, Ark and TA perceive this as a deliberate attack on me physically. Is it, in fact, an attack on me physically?

**A:** Yes.

**Q:** (L) What is the purpose of these... well, it's pretty obvious. It's to put me out of commission. Is this the chief way that I generally

get attacked?

**A:** Yes. And we are warning you now !!! Do not get distracted any further by worrying over details of preparations to this house for Arkadiusz's arrival. This is ridiculously unnecessary, and furthermore, diverts your energy and awareness to such an extent that it can leave you open to even the ultimate "hit" !!!!

{Tape was turned off to discuss safety measures. Never turned back on. Last two questions lost.}

**Q:**

**A:** OK.

**Q:**

**A:** Goodbye.

END OF SESSION

## **5.7 February 12, 1997**

Frank, Laura, Ark, Alice

{The first session where Ark was physically present.}

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Wardleh.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) Alright, questions...

**A:** You are the one has the questions!!

**Q:** (L) Me?

**A:** Did we mean singular? Or plural?

**Q:** (L) Ask a question. (A) Me? I didn't think about a question... I can't think of one...

**A:** Arkadiusz, you have racing thoughts, thus making you tired and wide awake at the same "time."

**Q:** (A) Yes...

**A:** We see those thoughts... Be not reluctant to seek relief. A question not asked leads to a problem unresolved, as all your many years of training, education, research, and networking have taught you.

**Q:** (A) My first question is: I want to understand what is this "predestined mission," what it consists of?

**A:** It consists of following the path that has confronted you.

**Q:** (A) Okay...

**A:** We do not tell you of your predestined mission, because then it is no longer "predestined." You learn by experience, and as you sense, you are on the threshold of a rather profound experience.

**Q:** (L) What kind of experience? (A) Yes! What kind?

**A:** We could well ask you the same!

**Q:** (A) So, we don't know what kind of experience...

**A:** Yes we do!!

**Q:** (L) We who? We here or we/you on 6th density?

**A:** What do you think?

**Q:** (L) Quit teasing me! (A) What do I think? Okay... (L) Is this experience going to be something that involves interacting with external sources, an internal experience, a learning experience, can you give me a hint here? (A) Yes...

**A:** We would prefer Arkadiusz ask these questions... We were always most impressed with his skills in this area. Do you remember being caught in a cold rain on the “long walk,” and how through your upset, you had an insight that “opened a new door?” We remember 1966 as a turning point. Well, this is another, Arkadiusz, and the emotions feel strangely familiar, but this time you have the aid of others on 3rd density.

**Q:** (A) Umhm. I would like to know if physics is of any use, or if this is something completely different. I am supposed to concentrate upon what WE are supposed to concentrate on, and does this require abilities in physics or some completely different abilities?

**A:** Can you not combine?

**Q:** (A) Okay. I could combine. But what are the other abilities? I have no idea.

**A:** Not so, my Arkadiusz. You have reluctance, much like a small child learning to walk. But no lack of ideas. Before, when fear crept into the picture, you had the wisdom not to “look back,” even though you had the temptation to do this. Look what has happened!

**Q:** (A) Okay, I don't believe there are any dangers because I think I know how to avoid danger; I think they are illusions. I don't want to be... I just... I don't believe them. I'm safe. I don't believe that there are dangers which I do not see. Now, are there any dangers that I am not aware of? Something new?

**A:** It would be nice if those on third density could always be aware of all dangers which exist, but, then again, the learning would be hindered, would it not?

**Q:** (A) Okay. It is nothing. Essentially nothing. They are just avoiding answering questions. This much I could explain myself. I asked if there was anything new, anything that I am NOT aware of!

**A:** You are presently in less danger because of your physical locator.

**Q:** (A) Okay, so that's new. Why?

**A:** Why, you ask? Well, because the grooved vectors of attack for you lie in the locators where you have established your principle connections.

**Q:** (A) I want to know if they can tell me what I should really do during these two months that I am supposed to be here? That I should work on this problem of phase of the wave... of whatever wave... electromagnetic or gravity or whatever... phase... phase...

**A:** The answers for this connection will come to you with surprising clarity, and will “unfold in front” of you with greater and greater intensity with each passing day.

**Q:** (A) Okay. Very good. This is something that will be going on. (L) Then why did you ask? (A) Because I thought that there would be.... (L) Because you thought they were going to just hand it to you on a little silver tray... (A) No, no, no! I wanted a hint! But there is no hint! (L) Well, they did say “unfold” and “in front of you.” (A) Sure! In front of me and not behind me! (L) Well, let me ask: is there a hidden meaning in those terms? Unfold in front?

**A:** Maybe.

**Q:** (A) There are clues in front of me. Waiting for me. Very good.

Perhaps I should not ask any more. Okay, I pass. Because there is nothing complete... I mean this was a complete question. I thought that there would be a complete answer.

**A:** You hold back questions which you would love to have answered. The clarity of the response is based upon the level of specificity of the question!

**Q:** (A) So, they are asking me what are these questions. Genes, unified field theory, relativity and time. Okay, those are the questions. What else. On the one hand, it looks like that what one needs is to do something clearly spiritual. To be spiritual and one doesn't do this by equations and mathematics. And the suggestion was, and what I understood was, that there is no use for physics or mathematics... (L) Who said that? Not the C's! They have said that mathematics is VERY important! (A) Yessss... okay. This is what they said. But when I asked them what kind of mathematics... they said something which... I mean, the technical answer to this question... (F) Well, maybe if they gave you answers that did not make sense at first, you ought to examine it further and you may discover important lying under there. It's like a treasure hunt. Buried treasure. We don't learn if they just give us answers. Yes, they may be very specific, and maybe more specific than we think. But, the answers in and of themselves have to be examined very closely. (A) Ummhmm.

**Q:** (L) Let me ask a question. Earlier they said something about being on the threshold of an experience. And now they say something is going to unfold in front of you. Are the two responses "threshold" and "unfold in front of you," connected?

**A:** Of course!!!

**Q:** (L) Okay, he is on the threshold of some kind of experience. Is there some way that we might identify this experience? Is it going to be so outstanding that you can't miss it? Or, is it going

to be something that you have to pay attention to or you might miss it?

**A:** What does “threshold” imply?

**Q:** (L) Well, a door. It’s a door. Does this mean he is going to go through a door, psychically, spiritually, physically? Going to someone’s house?

**A:** It does not just imply a “door,” but also one’s positioning, and a sense of inevitability.

**Q:** (L) Is there something I can do to help?

**A:** Have you not helped already?

**Q:** (L) But, I mean specifically in this “threshold” and “unfolding” experience?

**A:** Yes! And, by the way, Arkadiusz, science is most spiritual indeed!

**Q:** (L) Well, considering certain other elements, I was just wondering if our pathways are supposed to now be parallel or diverge... how they relate from this point...

**A:** Seems to us that your pathways are intertwining!

**Q:** (L) The use of the word “intertwining” is curious. You used that in regard to the relationship between EM and gravity. Is there a parallel?

**A:** If you wish.

**Q:** (L) Well, I am tired, Ark is tired, so is there anything further you would like to tell us this evening?

**A:** Combine energies in pursuit of answers, and the rest falls into place.

**Q:** (L) One last question: you say “combine energies.” Is there any reason why this will facilitate the pursuit of answers?

**A:** Complementary souls.

**Q:** (L) Okay. Thank you and good night.

**A:** Good night.

END OF SESSION

## **5.8 February 22, 1997**

Frank, Ark, Laura, Terry, Jan, VG.

**Q:** Hello, and who do we have, what name shall we use this evening?

**A:** Opponoa.

**Q:** (L) And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) Ok, we have several things that we discussed earlier, is there anything you wish to say before we launch into questions?

**A:** Underground bases see dramatic budget increase.

**Q:** (L) Ok, why do they have a budget increase?

**A:** Because there is much more activity to come.

**Q:** (L) Ok, what kind of activity?

**A:** Broad range.

**Q:** (L) Can you list, say, the top three?

**A:** Experimentation, utilization and implementation.

**Q:** (L & T) Of what?

**A:** Human “resources.” Plan falling into place for “harvest.”

**Q:** (T) The new underground bases, along with all the old ones are for the coming harvest?

**A:** And other purposes of STS forces’ plans.

**Q:** (T) And other STS plans... (L) What is this thing called ‘The Harvest’?

**A:** What do you think?

**Q:** (L) Well, is that harvest in a negative event, or harvest in a positive one? I mean, as in the harvesting of the wheats and the tares...

**A:** Either/or.

**Q:** (L) Ok, now you say the plans are falling into place. What specific events of the past, say, several weeks, or months, whatever period of time set aside, are these plans that are falling into place? I mean, what’s the key in the lock?

**A:** Have you been paying attention, as we have always suggested you should?

**Q:** (L) Of course! I just asked you because I wanted you to enumerate! Of course I’m paying attention!

**A:** Lately, there has been diversion for you.

**Q:** (L) Well, it doesn’t mean I’m asleep! (VG) Can I ask a question? If this is because there’s much more activity, and things are dramatically increasing, what has come to them, or whatever...

**A:** VG mentioned the weather. Was that a bit “nippy” for you in central Europe in December and January, Arkadiusz?

**Q:** (T) VG mentioned the weather, and the changes in it. What was the name of that movie we watched up in Tallahassee, I forgot the name of it...

{T then spoke about a science fiction movie we saw. Aliens were here among us, and were plotting to affect the weather in such a way as to make the planet uninhabitable for us, but perfect for them. Naturally, there was secrecy and cover-ups. Then the subject moved to the cell phone towers that were noted in rural areas of North Florida. This then lead to a question about the cell phone towers. First part of question lost.}

**Q:** (T)...transmit to us and back... what can be transmitted? Can the negative energy be focused through these microwave towers? (VG) And what was the correlation between the strange weather and the harvesting? (L) Because we were told that the weather changes were due to the energy buildup of the wave. That was two years ago. And it had nothing to do with the 'harvest.' (T) But it could also be that HAARP adds to it. (J) Ok, well, let's ask... (L) Well, they would love for us to think that HAARP has something to do with weather. 'Yes, we're having bizarre weather. Let's blame it on HAARP!' because we're going to think about HAARP... What a perfect... (T) Well, HAARP has a lot more to do than just the weather. They can put all the energy-based stuff that they've been experimenting on in one place, because they can do whatever they want, just by changing the frequencies... (J) Or, even just continue to mess the weather up, to continue to create negative vibrations, worry and uncertainty... (VG) I guess the point I'm trying to get at is, are these weather changes promoting some changes in the physical body, that's making the physical body more 'harvestable?' (T) Could very well be. (L) Well, it's all interconnected, but I wouldn't say that one is the cause of the other, just to say that they occur... (T) But why, as we were talking about earlier, is all this weird stuff going on all

through the media?

**A:** We told you that “HAARP” was being designated for capturing and modulating electromagnetic fields for the purpose of total control of brainwave patterns in order to establish a system of complete “order on the surface of the planet” in either 3rd or 4th density.

**Q:** (L) Is HAARP in operation at the present time?

**A:** Yes, in its early stages.

**Q:** (T) Is the spreading of all these communication towers out across the country the equivalent of a HAARP program on a continental scale?

**A:** Back up system.

**Q:** (L) So, they don’t need the towers to operate the HAARP system, but they are there as the backup?

**A:** Towers serve dual and lateral purposes.

**Q:** (T) Local and regional authorities can use the towers to track people, amongst other things. (L) Is the weather being controlled or changed or in any way affected by HAARP?

**A:** Climate is being influenced by three factors, and soon a fourth.

**Q:** (L) All right, I’ll take the bait; give me the three factors, and also the fourth!.

**A:** 1) Wave approach. 2) Chlorofluorocarbon increase in atmosphere, thus affecting ozone layer. 3) Change in the planet’s axis rotation orientation. 4) Artificial tampering by 3rd and 4th density STS forces in a number of different ways. Be vigilant. Be observant. Be cautious in your planning and be aware. Do not let emotional anomalies cloud your knowledge base. This is not a “time” to let one’s guard down. Be especially careful of travel to

unfamiliar locators, as well as sleeping in unfamiliar surroundings!!! You are being watched. Or, at least, it is best to assume you are, and act, think, and prepare accordingly. Remember what you have been warned about concerning attack. As you learn more and know more, you become more interesting... and, when your ranks swell, you are more vulnerable unless you are more aware!!

**Q:** (L) All right, were those given in the order in which they are occurring? The fourth being the one that's coming later?

**A:** Maybe, but remember this: a change in the speed of the rotation may not be reported while it is imperceptible except by instrumentation. Equator is slightly "wider" than the polar zones. But, this discrepancy is decreasing slowly currently. One change to occur in 21st Century is sudden glacial rebound, over Eurasia first, then North America. Ice ages develop much, much, much faster than thought. [Discussion of new scientific theory recently presented that the earth is expanding.]

**Q:** (T) Is the Earth expanding? That's just putting it bluntly, but, is the Earth expanding, how did you put that? (A) Yes, that's the theory: the idea is that the continents move away because the Earth is expanding, and this is much faster than you know, than geologists were thinking.

**A:** Continental "drift" is caused by the continual though variable, propelling of gases from the interior to the surface, mainly at points of magnetic significance.

**Q:** (J) What causes the change in the axis?

**A:** By slow down of rotation. Earth alternately heats up and cools down in interior.

**Q:** (L) Why does it do that? What's the cause of this?

**A:** Part of cycle related to energy exerted upon surface by the frequency resonance vibrational profile of humans and others.

**Q:** (T) Now we took it off on a tangent. (L) Well, we need to wrap it up soon here. Is there anything further on this harvest, or on the planetary changes that we need to get to at this point?

**A:** Ask.

**Q:** (T) Ok, let's go back to the beginning of the session, when we were talking about the acceleration/expansion on underground bases in preparation for the harvest. Is that world-wide, we're talking here?

**A:** Yes, but United States is focus, due to particularly cooperative power structure profile.

**Q:** (T) Do we want to ask about the power structure profile? (L) No, we know what that is; they agreed to work with them. But, what I would like to know is what particular steps are being taken, what particular activities are being stepped up?

**A:** Acquisition, staging, testing of planned activity.

**Q:** (L) And what is the planned activity?

**A:** Control of absolutely everything.

**Q:** (L) Well, swell! (T) That's the one world government! That's what they want! (L) OK, is there anything in particular that we can do to...

**A:** Knowledge protects, ignorance endangers. Awareness makes you less vulnerable, both directly and indirectly. Heard anything about synthetic blood, and blood and plasma alteration lately?

**Q:**(L) There's a can of worms for you! All right, I'll bite! Go ahead, tell us about the synthetic blood and the blood plasma. (T) There's probably been a lot of research into that...

**A:** Less “mutes” needed.

**Q:** (L) Cattle Mutilations. They don’t need as many cattle mutilations. (T) It’s the same idea as when they grew all the crystals for the stealth technology. Before they grew enough crystals to do what they had to do, you couldn’t get any of the beryl, the aquamarine gemstones. They disappeared from the market. That’s why aqua shot up in price. Several years ago, it used to cost \$50 to \$100 for a nice piece of aqua; it shot up to several hundred dollars... (L) Well, look what happened to topaz, same thing; the price was unbelievable. (Alice) But why? What are they using it for? (T) The beryl was being used, they have a certain crystal structure, that is reflective to light and electromagnetics. Heat is dispersed very evenly through them, that’s why stonecutters like to cut those stones so much, because they disperse the heat and don’t shatter as often while being cut. It’s because of the composite material that they use to build the frames of the Stealth fighters and who knows what else. When they first began experimenting and working with it, they couldn’t grow artificial beryl fast enough for what they needed, so they took as much as they could get of the natural stone. We discovered this because we were talking to someone at one of the gem and lapidary shows here locally, and they told us why there wasn’t any aquamarine out anywhere. They said the government had gone out and bought up tons and tons of this stuff all over the world. They were crushing it up and mixing it with the composite materials used on the skins of the Stealth planes.

**A:** Bio and cyber/genetic humanoid types now increasing exponentially in general population. You may have already encountered one or two during the past 10 days.

**Q:** (L) You, who? You, as in me, you as in Frank, who?

**A:** Reflect upon activities, and power and influence centers for

answer.

**Q:** (L) Well, we will reflect on that over the next week, but we're going to have to say goodnight for now.

**A:** If you wish. Goodbye.

END OF SESSION

L's Note: During the specified 10 day period, there had been a LOT of activity relating to finances, insurance, driver's license bureau, the purchase of an automobile, etc. A attended a conference at UFL, interacted with numerous Uni officials... so, there is such a lot of ground covered that it is hard to think which it might be. However, one of my guesses would be the attorney who handled the paperwork for the loan for the car. His nickname is "Chip." Other than that funny connection, nothing else comes to mind.

## **5.9 March 1, 1997**

Present: Laura, Frank, Arkadiusz, Terry, Jan and Alice

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Honaza.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (T) You had a question about transmitting from Cassiopaea, Arkadiusz. What was the question? **(A)** I think the question was,

why do they need a particular place in the universe to transmit from?

**A:** We transmit “through” the opening that is presented in the locator you represent as Cassiopaea, due to the strong radio pulses aligned from Cassiopaea, due to pulsar from neutron star 300 light years behind it, as seen from your locator. {Planchette spirals briefly} This facilitates a clear channel transmission from 6th density to 3rd density.

**Q:** (A) I would like to know how long it takes for the transmission to come from Cassiopaea to Earth.

**A:** “Zero” time.

**Q:** (A) ‘Zero time...’ They transmit, using what? Electromagnetics, gravity, or what?

**A:** Both. They are interconnected, or you could say “unified”.

**Q:** (A) Zero time? Because of what? Because of... structure of space/time? Of warp?

**A:** Space and time are selective and flexible.

**Q:** (A) What is behind that? What is... what is the medium behind which the transmission goes?

**A:** If there were a medium, your puzzlement would be justified, but, there is not. You see, when one utilizes zero time, there is zero space as well.

**Q:** (J) If there is zero space, and zero time, why does it need to be fixed at a specific location here in 3rd density.

**A:** It does not, for “transmission purposes.” The need for a specific locator, as expressed previously, as you perceive it, was due to vibrational frequencies helpful to your psychic awareness profile. What causes pulsars, Arkadiusz?

**Q:** (A) What causes pulsars? A good question... (L) Do you know?  
(A) Some nuclear reactions...

**A:** Neutron “stars.”

**Q:** (A) A neutron star is a pulsar. The question is, what is so particular about neutron stars, because anything which is not understood...

**A:** Quantum physics...

**Q:** (T) The answer to what causes neutron stars is in quantum physics? Or, is to be found in quantum physics? Is that what they’re saying? (A) Or it is known...

**A:** Yes.

**Q:** (L) OK, so, if you look up pulsars, it will tell you, I guess... (A) OK...

**A:** What was the key premise to your “Noah Syndrome”

**Q:** (L) The key premise? Transformation...

**A:** By what means, what causative factor.

**Q:** (L) Well, the causative factor was bodies of the solar system interacting and exchanging energies. The energies exchanged by the bodies of the solar system having a profound effect upon the life on any of those bodies, such as people on the planet Earth. The emanations of the sun, if the sun were to increase its vibration or its surface, a teeny tiny little bit, the Earth would be so charged with electricity, that... I mean, one solar flare, and everything goes haywire. If the sun oscillates inside - they measure oscillations in it; they have all different periods - what if it has a really major oscillation, like every 3,600 years or so? Because they’ve measured them in terms of minutes, days, months, years. You have the 11 year cycle, there’s the 22 year cycle. There’s a

whole bunch of different cycles of oscillations in the sun, what if it has a really big one? And what if, when it does that, it pulses? And when it pulses, it so charges the solar system with electricity that all the bodies in the solar system just go haywire! (T) Is that the base premise of... (L) That's the base premise of 'The Noah Syndrome.' (T) OK, folks, there you have it, the base premise of the 'Noah Syndrome' is that the sun pulses regularly.

**A:** A pulsar pulses at an extremely rapid rate.

**Q:** (T) It creates a frequency... (L) Well, everything's frequency...

**A:** Yes.

**Q:** (T) Well, this was a specific frequency they were looking for. The rate of vibration is the rate of frequency. And it creates a frequency that they said was something that would be beneficial to... (L) No, this location is the beneficial thing, right here, this house.

**A:** No.

**Q:** (A) But, I do not understand. The frequency...

**A:** Your planetary realm.

**Q:** (L) OK, your planetary realm is what they were referring to. (A) OK, there is something about pulsar, because it brings these pulses with a certain frequency. But, of course, it is not these pulses that are important for transmission, because the pulses take hundreds of years to get here. This we know. (L) But, the pulsar is the window... (A) It's a window... (L) The window between densities. (A) Yes, but what is the pulsar that is so specific that it makes a window? Is it this frequency? Or, is it something else? Which physical phenomenon is responsible for making this window? Can we specify, something more exactly than saying that it's just quantum physics?

**A:** What is the nature of neutron stars, supernovae, “black holes,” et cetera?

**Q:** (L) You go in a black hole, and you come out a pulsar?!

**A:** All are the junction of matter/antimatter... the borderline between realities as you know them... material realms/etheric realms, density level junctures, realities. One can pass through these windows with ease; remember, the stars and planets are windows too.

**Q:** (L) And stars and planets were described as being giant atoms. Is an atom a window?

**A:** Yes.

**Q:** (A) Is a proton a window?

**A:** Yes.

**Q:** (A) OK, so it is. And it’s massive, so let me ask. Is photon a window, too?

**A:** Yes.

**Q:** (L) Is gravity something from the center of the window to a reflective opposite in the ethereal realm, rather than the attraction between objects in this material realm?

**A:** Gravity is the “binder” common to all imaginable existence. That is all you really need to know.

**Q:** (L) Okay, binder. Does gravity bind in the same way that weak hydrogen bonds bind the DNA strands?

**A:** No.

**Q:** OK, then, does gravity bind the way the phosphate bond binds the carbon atom?

**A:** These are material. The missing link for all you folks is that gravity is as much antimatter as matter!!

**Q:** (A) I would like to ask, not now, but maybe later, about the, is this the concept that our space/time is the boundary of a domain? Is that correct picture?

**A:** Yes.

**Q:** (A) All right, Then, concerning this gravity, and the antimatter, is it a correct picture that there are two such domains; positive and negative one, and the gravity has something to do with the exchange between the positive and negative?

**A:** Gravity is the “fuel,” or “life blood” of absolutely everything that exists!!!

**Q:** (A) What is the mathematical description, the correct mathematical description of that? (L) You want the formula? (A) Yes!! I want the formula!!!! {General laughter} No! I want the concept!

**A:** That is why you were placed where you were placed!

**Q:** (A) What does that mean? I’m placed here... for me, or for us? (T) Could you be more specific about that? {General laughter} Heck of a time to get cryptic here! I mean, we’re rolling, now!

**A:** Would you not like to discover this formula?

**Q:** (L) Well, yes, we’d like to discover this formula; it would be a lot of fun. (A) Of course! Sure! (L) We could even break out a bottle of wine! (T) But, if they’d like to spell it out, that’d be OK, too!! (laughter) I think that what they said is because what’s going to happen is, you’re going to get the formula. Wasn’t the question about the formula just prior to that? That’s why you were placed where you were placed...

**A:** Ark wanted the first step, or guidance to a possible formula. It

is a shame, but others in your “density” have already discovered this, but it is a deadly secret!!

**Q:** (A) I need to review this unified field theory? (T) What is the deadly secret? That others have discovered this?

**A:** No.

**Q:** (T) OK, that’s good!

**A:** The possible methods of utilization of technology springing forth from the formula.

**Q:** (T) Can we possibly ask what this technology is? (L) Is this right, what we’ve recorded here?

**A:** Yes, of course!

**Q:** (A) OK, now, I don’t understand something. Because at some point they wanted me, more or less, to look into this unified field theory, and to rediscover what Einstein or whoever did. So, they want us to discover, the secret, yes?

**A:** We want you to discover it for your own benefit.

**Q:** (T) The learning is in the discovery.

**A:** Not necessary to telegraph the “discovery”.

**Q:** (L) Don’t tell anybody about the discovery. (A) Sure, yes. (L) So, we’re supposed to use it... time travel, anyone? I think you’re getting close to it, anyway... (A) I want something more specific...

**A:** Yes.

**Q:** OK, now, there are several unified field theories. One, that is by Einstein. One, by Weyl, a unified field theory by Schrodinger, theory on time and space and the affine connections... I mean, there are many of them. Any clue?

**A:** No clue.

**Q:** (T) 'No clue.' Nicely worded, though! (A) OK. Let's ask about these 'twistors'. Do they have anything to do with that?

**A:** {Planchette spirals} Maybe.

**Q:** (L to A) Now, remember. Whenever I asked them about you, they said they weren't going to tell me anything. They're not going to tell you... (A) What! They will not?! (L) No, they will not. You're doing it already. You're doing it!

**A:** When you learn, you grow. When you grow, you progress. When you progress, you transform.

**Q:** (L) GIVE ME THE FORMULA!!! {Laughter} (A) No, no, no. Let me try. Because, okay... the unified field theory is a classical theory. And now, there's this quantum business which is so important now. Is it true that this classical, unified field theory will explain quantum theory? Is this true? Is this correct, what Einstein had dreamed, once?

**A:** What do your instincts tell you?

**Q:** (A) Okay, my instincts tell me that I should sit down at a desk and compute, rather than sitting here... {laughs} (A) Yes, yes, that is clear. OK. Sure, do it yourself.

**A:** Sorry, but we want to see you discover.

**Q:** (L) They want to see you at that desk, computing. That's what they want to see. (A) OK, now, I want to change a little bit the topic. Because I have this seminar next week, Wednesday the fifth. Something has to be prepared for this is there any particular advice for me? How to...

**A:** Specifically...?

**Q:** (A) A specific question, do I have? (L) Do you already know what you want to talk about? (A) I know what I will talk about, but... it's a question of how to present it, so that it makes just the right... (L) What are the options? (A) I can present it as something revolutionary, or as something simple. So, these are the options.

**A:** Revolutionary.

**Q:** (A) OK. (L) Ask a specific question, get a specific answer. Except about formulas...! (A) OK, it would not be fun at all if I would be taught a formula... Anyhow, I would not believe... (L) Exactly, so you'd still have to prove it yourself, anyway... (A) Right! (L) So, what would be the point?!? (J) Where's the fun in that?

**A:** Exactly.

**Q:** (L) Now, A got an email from some organization called The Institute of New Physics, informing him they were financiers, and was he interested in joining? Could you tell us who or what is behind this Institute of New Physics?

**A:** Well, perhaps it would be better to help you to tell yourselves. Where did the message come from?

**Q:** (L) We don't know... (A) No, there is something, because there is, some info - GAIN - and I looked on the Web, and there are many institutions which have "Gain," you know, in their name. And I don't know if this is just one... (L) Well, don't you think it's kind of funny that it has "gain" in the name, and you're in Gainesville? (J) Yes, that's what I thought, too... (T) 'WWW dot... well, no it's email, so it would be... (J) Oh, 'gain', and they're financiers...

**A:** What do financiers do?

**Q:** (L) What do financiers do? They give you money. They finance you... (J) They help you 'gain'... (L) Yes.

**A:** Do they do this for no reason...?

**Q:** (L) Of course they don't do this for no reason! They have an ulterior motive. They want something.

**A:** AHAHAH!

**Q:** (L) Ahah!?! (T) Yes, they're the money store! (L) Well, all right. We'll play it by ear, and see what they want...

**A:** Do they have an agenda?

**Q:** (L) Of course! No doubt, they have an agenda. Everybody that's been writing to us lately has an agenda! You know, we've been getting these...

**A:** What may this be?

**Q:** (L) Well, their agenda... (J) They want something from him, obviously. (A) When I get back to Poland, they said that they will have some printed material on this New Institute ready, that we could read, that they will send it to me... (T) Where is the New Institute located? They didn't say? (A) No, they didn't say. (J) Oohh, I think you have a right to know that! (L) Well, I'd say, just let it float, and see what they say... (J) They had to wait until you were back in Poland before they'd send you anything? (A) Well, if this is just in the stage of organization, so perhaps, it's a big something, which until now, was working in a certain field, getting money from, I don't know, from something, and now, they want to expand and to invest in nanotechnology, or whatever.

**A:** When you are getting close to something, there are always those who wish to distract, disrupt and track for later plans... Anything worth getting must be sought.

**Q:** (L) Yes. Anything worth getting must be sought. 'Sought'; it's a funny word. It is; s-o-u-g-h-t? I mean, is it 'seek, sack, sought?' (Alice) Something like that. (L) As in 'think, thank, thunk'? Or 'drink, drank, drunk'? (J) Or 'fink, fank, funk'? (L) How about

‘wink, wank, wunk’? {laughter}

**A:** “Jump, Jamp, Jimp.”

**Q:** (L) Dmitri, the Bulgarian guy from Sophia, who claims to be practiced in the art of PK, and... (T) This is another email? (L) Yes. (T) Oh, my lord, they’re coming out now! {Laughter} (A) Yes, yes, yes. (T) Have you ever heard of this gentleman? (L) Well, he’s just an ordinary bloke, the man on the street kind of guy. But he just has this unusual interest, he claims to have had... (A) He’s got this story... (L) ... he claims to have had a near-death experience, after which, I’m not entirely sure what... (A) Yes, he started to see everything coming to him in advance. (L) Yes, that’s right, he had like a three minute... (T) OK, that’s the same story, one of the effects that Brinkley was experiencing... (L) Yes, that’s right. Dannion Brinkley... (T) With his near-death experience, was that he was, he knew, he was seeing things and hearing things happen before they happened. He was answering the questions that hadn’t been asked yet.

**A:** A shame it was not two hours in advance.

**Q:** (T) As opposed to seeing the future only two minutes in advance. (L) Yes, damned inconvenient! Two minutes just doesn’t give you enough time to prepare for anything!

**A:** Or play the “lotto.”

**Q:** (L) Right! Two or three minutes doesn’t give you time to get down there to play! (T) You have to stand outside the Circle K and hope they don’t arrest you for loitering! Football teams can stretch two minutes to a couple of hours! (L) Right! So, in other words, it’s... well, they didn’t give us an answer about this guy in Sophia. (T) Well, we didn’t get to asking the question about him yet... (L) Well I mean, you know these are what I would call semi-sarcastic remarks!

**A:** Yes.

**Q:** (T) So, are we to take it that just let Dmitri float along also, along with the Institute? (L) Well, we don't have to let all of them float, you know!

**A:** Up to you.

**Q:** (L) Well, of course we know it's up to us! But, I would say that their remarks on that subject, you know, it's like I said. The guy is... if he had something that was so wonderful, why isn't he out there, doing something? Why does he want you to make him a machine that's going to turn him into a... (A) This is true, because he said he went for two years to the States, looking for asylum, and then after that, he went back. (L) And it was a disaster. (A) Yes, it was a disaster, so probably he confessed that he has liabilities, so probably he was investigated...

**A:** No; this is Bulgaria, so it was a disasterovicho!

**Q:** (L) So, there you are! And he said he never finished school, and he never really said why. (A) But, what is strange is that he writes perfect English. (L) It is bizarre, isn't it? (A) Yes, it is. (T) He writes perfect English? (L) Yes, and for me it was like reading in English... (A) And everything makes sense, yes, you see... (L) But, I'm reading it in English, like reading it in American English.

**A:** So, what does that tell you?

**Q:** (L) It tells me that he's maybe not being completely up front about everything. In fact, he's maybe not being... OK, right there, you said that he duplicated the Dannion Brinkley story. Well, I haven't read that book, so I don't know that.

**A:** Always be on the look out for deception.

**Q:** (L) Well, we're always on the lookout for it. We don't want to, you know, assume it, but we look for it. Yes, I guess when things

don't fit... I want to ask... OK, we've got a whole bunch of DNA, in these funny- looking double strands. And, according to the book, only 2% is actually used, and the other 98% of it is what these 'experts' are pleased to call 'junk.' They call it junk. Now, I would like to know, is there any way to activate this other DNA?

**A:** Won't it be activated on its own?

**Q:** (L) 'Won't it be activated on its own'? Will it? (J) I think that's what they've said... I think the question is what it does... what it codes... (J) Ask if there's a way to activate it?

**A:** 4th density.

**Q:** (L) On 4th density. OK. You asked one time for me to comment upon the connection of phosphorus to the body, so I discovered that phosphorus plays an important part or role in the DNA, and also the 3-5 code, so, I would like to know if the addition of phosphorus to the diet would enhance some of the DNA to the point where... (T) ...it would activate...

**A:** Maybe it would "enhance" SHC.

**Q:** (L) What did it say? SHC? (T) What is SHC?

**A:** Spontaneous Human Combustion.

**Q:** (J) OK, well, maybe that's not such a good idea... (L) Well, that would make sense... phosphorus... (J) Yes, it would! {Laughter} (T) If you really want to make a show, take a little magnesium with it! Whoah! (J) Then you'd have a 'Highlander' quickening! (F) I just had this image of Laura deciding she's going to answer 'Not really! I'll have you know, my diet now includes 90% more phosphorus than it did any time previously!' And all of a sudden, flames start shooting out... {laughter} (T) Now that your finger can hold flame, it's a bad time to quit smoking, you know! No lighters anymore! {Laughter} And you'll never be lost in a cave!

(F) Between that and Carlos Castaneda snapping back from... it could be dangerous. Experiment not when you don't know what you're doing! (L) OK, no phosphorous. (T) Anything interesting going to happen in Gulf Breeze? Of course, that depends on what I define as interesting. (L) Yes, Terry, you have to be more specific than that...

**A:** We see distinct possibility of major nuclear accident at Oak Ridge, Tennessee.

**Q:** (T) What's that got to do with Gulf Breeze? (J) I don't know. (L) They weren't talking about Gulf Breeze... (T) I guess not! Thanks, I feel really wanted now! (L) OK a major nuclear accident in Tennessee. I know that this is a really, really unacceptable question, but do we have a, in terms of 'photon belts' being fields of probability, do we have a time frame for this? Somewhere in there?

**A:** Near.

**Q:** (T) About the same time as the Gulf Breeze conference, this month? (L) Maybe that's what triggered it...

**A:** Possibly.

**Q:** (L) Anybody know anybody in Oak Ridge? I don't.

**A:** Radioactive fallout over East Tennessee and Western North Carolina and Virginia.

**Q:** (T) Yes, we know people in Western North Carolina... (L) Yes, we do. In Waynesville. (L) Where is Oak Ridge? (T) Near Knoxville, close to the Tennessee/North Carolina border, probably not more than 50 miles from the border. By Knoxville. (F) There is a breeder reactor right there... (J) That's where the whole dang thing started. (T) What kind of accident is this going to be? Is this going to be a big explosion, a fire? Is it going to be like Chernobyl, or is somebody going to accidentally release

radiation into the air?

**A:** First of all, it is possible, not definite. Second, if it happens, it will be bad!!

**Q:** (T) Is Crystal River in operation?

**A:** No.

**Q:** (T) Well, that's the story, that it's not been in operation. It's been down for a year, and they're going to be down for another year. I was reading in the paper, who knows how true this all is, that the US Energy Department is using the private reactors for breeding tritium. They're on a big rush to get as much tritium as they can. (F) For what? (T) Nuclear weapons, or something with nuclear weapons, something to do with nukes. Or as a byproduct for something else that they're using it for. It said that they were using a private power company reactor up in West Virginia, I think, and one other one out west, along with their labs. (L) Let's say good night here. Anything we need to ask or ought to know, that we haven't asked at this point? Aside from this?

**A:** Maybe, but good-bye.

END OF SESSION

## **5.10 March 15, 1997**

Frank, VG, Alice, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Torra.

**Q:** And where do you transmit from?

**A:** Cassiopaea.

**Q:** (L) In the natural state, we know that a photon can have an interaction which causes it to split into positron and an electron. In the natural state, do electrons come from photons?

**A:** No.

**Q:** Okay. In the natural state, where do electrons come from?

**A:** Aether boundary with material continuum.

**Q:** Where does the proton come from?

**A:** 7th density.

**Q:** So, a proton comes from seventh density, but the electron does not.

**A:** Not mutually exclusive.

**Q:** In a substance that conducts electricity, say an electrical wire, you have a circuit where, essentially, electrons get passed from atom to atom along this pathway. And, yet, they don't run out, and they don't really get used, it is only the resistance that causes heat that causes the incandescence...

**A:** Gravity center of planet is also "window" to all other density levels and dimensional planes of existence, which is why electrically charged atoms "ground" in order to pass on to other planes through gravity binder.

**Q:** Getting back to my question of the passing of electrons along a circuit: what force is it that initiates the passing of one electron to another atom that manifests as electricity?

**A:** Electrical energy is merely "tapped," collected, trapped, then channeled.

**Q:** If it is tapped, where is it tapped from?

**A:** Collecting electrons.

**Q:** What is a collecting electron?

**A:** Not “a” collecting electron. It is collecting them.

**Q:** What is collecting the electrons?

**A:** The utilizers. Electrons are “free” energy.

**Q:** Okay, but where... I am thinking that in an electrical circuit, the electrons that are there, are the ones that are started with, the ones that are passed along, and the ones that are still there when the circuit is broken and the passing of electrons stops. Am I wrong?

**A:** Yes.

**Q:** Okay... then...

**A:** There is no beginning or end.

**Q:** Then electricity is, in essence, a flow of electrons?

**A:** Yes.

**Q:** You say they are tapped. Where are they tapped from? What is the source of these free electrons?

**A:** All materials. All matter. All aether.

**Q:** The electrons of the conductor itself are being passed along, and this is the manifestation of the flow of electricity?

**A:** Maybe.

**Q:** In what sense am I not correct?

**A:** Limiting concept to “conductor.”

**Q:** Electrical energy will be present in everything. But in some particular substances, such as those things we call conductors, the electrical energy is, as you said, collected, trapped and channeled, which then is a useful activity because it creates light and runs machines and so forth...

**A:** Primitive.

**Q:** Okay. It is primitive. We understand that. When electricity moves in what would be considered a superconductor, how is it different from an ordinary conductor, such as a copper wire?

**A:** Accelerates flow, thus separating electrons, thus “exciting” process.

**Q:** What qualities does the superconductor have that contributes to this accelerating of flow?

**A:** Cycling magnetic pulse.

**Q:** What creates a cycling magnetic pulse?

**A:** Matter within gravity vacuum.

**Q:** How do you create a gravity vacuum?

**A:** In this case, it is created unintentionally as a byproduct of superconductivity.

**Q:** You said that a superconductor separates the electrons, thus exciting the flow. What do you mean by separating?

**A:** From each other.

**Q:** How is that different from a normal electric flow?

**A:** Not as widely separated.

**Q:** Is this separation of electrons a key to this process?

**A:** Yes.

**Q:** What additional conditions or qualities contribute to the separating of electrons?

**A:** Ask yourself now, what conditions define a superconductor?

**Q:** (L) What defines a superconductor? (A) Zero resistance. (V) Is that without gravity? (A) No heat. (L) How does one achieve zero resistance?

**A:** Artificial construct.

**Q:** Do you mean that it is an artificial idea, or that the only thing that would have zero resistance would be something that is artificially constructed.

**A:** Both.

**Q:** So, there is no actual possibility for a true superconductor with absolutely zero resistance? But that the resistance can be reduced to a very low level.

**A:** Close.

**Q:** Does cold necessarily have something to do with superconductivity?

**A:** What conditions exist in outer space?

**Q:** Well it is VERY cold... (A) It is almost a vacuum. (L) No gravity. (A) No, there is gravity, but only that. What I think we must ask is what is the relation between superconductivity and gravity. There was something mentioned... what was that about aether?

**A:** Nonmaterial realm of existence.

**Q:** (L) In other words, consciousness. Okay, you mentioned a cycling magnetic pulse that was an unintentional byproduct of superconductivity, and something about matter within a gravity vacuum... Could you define a cycling magnetic pulse?

**A:** Self explanatory.

**Q:** You said it was derived from matter within a gravity vacuum. Does that mean that superconductivity creates a gravity vacuum?

**A:** Yes.

**Q:** (A) Where? Within the superconductor or outside?

**A:** Within.

**Q:** (A) According to what we know, it also creates an electromagnetic vacuum. Is it correct that there is no magnetic field within the superconductor?

**A:** We have stated before that these two properties are interwoven.

**Q:** (L) Electromagnetism and gravity. So, if there is no gravity, there is no electromagnetism. But then where is the magnetic pulse?

**A:** Pulse exists outside of gravity vacuum, but within superconductor. Picture a tube structure.

**Q:** Is the superconducting state within the gravity vacuum or within the EM pulse?

**A:** All inclusive. Normal structure for channeling electron flow within a conductor is a solid “tube,” within superconductor, it is a “hollow” tube structure, thus evidence of vacuum.

**Q:** Does this hollow tube structure have any bearing on what you described as the separating of electrons?

**A:** It is a manifestation of same.

**Q:** So, in order to have a superconductor, one ought to have a temperature similar to the temperature in space, as well as possibly

a chemical construction that is similar to the ambient properties of space, only greatly condensed, would that be it?

**A:** Close.

**Q:** (A) Do they mean there is zero gravity without superconductor? They say a vacuum which means what? No gravity?

**A:** Within.

**Q:** (A) No gravity within.

**A:** Not “no,” just far less, and fragmented in nature.

**Q:** (A) But, on the other hand they say vacuum... (L) But Honey, there is no such thing as a perfect vacuum! (A) Yes. You are right. Okay. (A) I want to understand this 7th density. The protons come from 7th density? Or they are windows to 7th density or... what? (L) You said that protons come from seventh density. In exactly what sense did you mean that?

**A:** In the ultimate sense.

**Q:** So, a proton is a little manifestation of the consciousness of God?

**A:** No.

**Q:** Well, that would be what I would understand as the ultimate sense. Correct me please.

**A:** Too complex.

**Q:** (L) Okay. (F)Spider! (A) Indeed! A spider! {It seems that at this precise moment, a spider descended from the ceiling on a thread of spider silk.} (L) Teensy weensy spider...(A) It's a spy! (F) Yes, but a second density one. (A) But it has a lot of protons! (F) That's its connection with 7th density. {The spider is rescued

and put elsewhere.} (L) Now, back to the questions. Could you just give me a clue on this proton business?

**A:** Ask.

**Q:** Okay, a proton is matched by an electron... (V) Does 7th density delegate how many protons come down or are available at any given time? (L) I think that would be a question that would take us way beyond where we are now...

**A:** Yes it would.

**Q:** (L) Just calm down V. I have a spider web on my hand. Okay. The protons. (V) Aren't protons just smaller bits of energy. (L) A proton is a fermion. (A) Yes. A proton is a fermion. Okay, there is a question with this proton. Is it something eternal, or is it something that decays? If it is seventh density... How long does a proton live?

**A:** Atomic explosion blends density window.

**Q:** (A) What do they mean blend? It explodes! Blend with what?

**A:** Where do protons fit into the atomic chain reaction equation?

**Q:** (L) What happens to protons in an atomic chain reaction? (A) Okay. I will have to check. I will have to take a look. But what does it have to do with this? (L) Well, if a proton is from 7th density, it is obviously a window. (A) Yes, a window. A very small window. (V) I have to leave. (L) Okay, we will stop for now and come back to the atomic chain reaction after we know how to ask the questions. Let me ask very quickly what made me so violently sick last night?

**A:** Ptomaine, bad gravy or sauce.

**Q:** (L) The last few nights I have been having very strange things happening to me while I sleep. Waking startled or fighting or

feeling something touching me... What is going on?

**A:** Burial ground.

**Q:** You mean the place we are staying used to be a burial ground?

**A:** 400 years ago.

**Q:** Swell! Just what I needed to hear! Is there anything I can do to limit this activity?

**A:** No,

**Q:** Is it particularly harmful or just annoying?

**A:** More the latter.

**Q:** (L) How come it bothers me and not Ark?

**A:** Sensitivity profile.

**Q:** Any general advice? (A) Let's ask if there is anything we should do before going to this Gulf Breeze {UFO conference}?

**A:** Get plenty of rest.

**Q:** Get plenty of rest?! We know that. Is it advisable to go to this particular conference?

**A:** Yes.

**Q:** Anything else?

**A:** Up to you.

**Q:** Then we thank you and say good night.

**A:** Good night.

END OF SESSION

## 5.11 March 29, 1997

Frank, Terry, Jan, Ark, Laura

**Q:** Hello

**A:** Hello

**Q:** And what name shall we use this evening?

**A:** Sannorri

**Q:** And where are we transmitting from?

**A:** We do not know where “you” are transmitting from, but we are translating the density communicators through that locator you know as Cassiopaea!!

**Q:** (Terry) Does that mean we are talking to the Cassies, or are we talking to someone else? They never did like that before!

**A:** Variety is the spice of life.

**Q:** (Laura) Well, we have a variety, we have a new person! We’re allowed to do it, so can they, I guess!

**A:** Yes.

**Q:** (Laura) All right, now, let me get my questions. The first question I want to ask tonight is about Susan Brana of Gain Systems who has been corresponding back and forth with Ark... OK, what is the source of the funding behind them? {Sue Brana and Gain Systems was the same person who funded Nick Begich to write “Angels Don’t Play this HAARP. She had approached us about doing some”secret work” in relation to “developing technology from crop circles”.}

**A:** We know this, but, any guesses?

**Q:** (Laura) OK, they want us to play 20 questions. Do we have any guesses?

**A:** Ask Lindemann.

**Q:** (Laura) Well, we know who's behind it now... Rockefeller! So we're talking Rockybucks and his bunch.

**A:** Are we? Or, is that unsubstantiated rumor?

**Q:** (Laura) Well, yes, it could be unsubstantiated rumor, we don't know that it's the Rockefellers behind Lindemann. OK, let me ask this. Is it the United States government?

**A:** There is no such.

**Q:** (Laura) Well, let me try this another way. Is this SB a legitimate source of funding for..

**A:** It is "legitimate," as it can indeed provide unlimited funds. But, the real question is: Do you want to take advantage?

**Q:** (Jan) What is the price tag attached?

**A:** Depends upon results of experimentation.

**Q:** (Laura) No, I asked what's the price tag? Does it depend upon the results of our experimentation, or theirs?

**A:** Ours.

**Q:** (Laura) Yes.

**A:** If you discover something truly "earthshaking," well...

**Q:** (Laura) In other words, if we discover something truly earthshaking, the price might be very high. Is that it?

**A:** Maybe. Or, you could be sequestered.

**Q:** (Terry) In other words, put out, taken away... caged and used! (Ark) Anybody can be sequestered away from what is necessary...

**A:** It is possibility. {Checked gauss meter - didn't seem to be registering, and was adjusted}

**Q:** (Laura) OK, do you have any other comments to make about SB? What did they say now, that maybe the same funding as Lindemann was behind them also. How about, what would you call it... the Quorum. Is the Quorum behind it?

**A:** Yes.

**Q:** (Laura) OK, is the Quorum the group we're supposed to be looking for? (Terry) We have to go back and ask about the Quorum. We've got so many characters, it's worse than X-Files!

**A:** No, more interesting.

**Q:** (Terry) Yes, it is, definitely!

**A:** World banking conglomerate.

**Q:** (Terry) World bank. (Laura) I do not wish to be 'owned' in that way...

**A:** Not easy to avoid.

**Q:** (Laura) Well, I know it's not easy to avoid.

**A:** Will become even more difficult soon.

**Q:** (Laura) Well, they didn't say impossible... they just said difficult. But, on the other hand, I don't know if I want to do more difficult... well, we've got so much difficult... (Terry) ...That it's easy now!

**A:** Many interesting things to happen.

**Q:** (Laura) To happen? Where, when, how, why, and to whom?

**A:** You. And everyone else in your realm... Expect revelations.

**Q:** (Laura) All right. Well. Ark has to get on a plane the week after next...

**A:** Not long in Poland.

**Q:** (Laura) Why?

**A:** Circumstances intervene. Has been a change in positions at University... Some interesting developments with regard to marriage.

**Q:** (Laura) When you say interesting, do you mean interesting in the sense of positive and less stressful? {Ark had been involved in a protracted divorce action.}

**A:** Both.

**Q:** (Laura) Both? OK, not going to worry about that. The next big question is...

**A:** Mean both positive and negative.

**Q:** (Laura) Both positive and negative! Wonderful! On to the next question. We would like to know why there was such an upsurge in the number of visitors to the Web page?

**A:** Because of current events.

**Q:** (Laura) Do you mean current events as in the suicides of all the people over the Hale Bopp thing?

**A:** Yes.

**Q:** (Laura) And what was the initiating reason for them to come to that particular Web page? They did some sort of a Web page search, and what did they find, I mean, what was the key?

**A:** Varied.

**Q:** (Laura) OK, on the former occasion when {name redacted} brought this little gadget {The gauss meter} to the Library and it was dancing around all over the place, can you tell me why {Gauss meter moves at this point.} it was moving so vigorously at that particular time, and yet is moving only a little bit now?

**A:** Em wave can be refracted by surroundings.

**Q:** (Laura) OK, can you make this needle move, at the present time, upon request? To any extent at all?

**A:** No. Wave makes needle move, not us.

**Q:** (Laura) OK, and what makes the wave? What is the source of the wave, the EM, if it's not you? {The placement of the gauss meter was adjusted to touch the edge of the board}

**A:** EM wave is side effect of channeling process.

**Q:** (Laura) OK, let me ask this question. In talking about time, I would like to ask, in relation to time, what is memory?

**A:** More specific.

**Q:** (Laura) You want me to be more specific, well, let me put it this way. Some understanding of time refers to it as the 'now', the ever-present now. Well, a lot of people remember a lot of other 'nows,' some people don't remember any 'nows' at all, and it seems like memory is almost like a reverse function of anticipation. Anticipation being almost like a memory of the 'future' and memory being like a reverse anticipation into the past. So, what I would like to know is if time is merely a 'now', what is memory?

**A:** Conscious and subconscious record of perceptions.

**Q:** (Laura) Ok. If memory is subconscious or conscious recording of perceptions, when one accumulates a sufficient amount of memory, does one then become ‘timeless’?

**A:** One is always timeless.

**Q:** (Laura) OK, but does one then become aware of one’s timelessness?

**A:** In 4th density.

**Q:** (Laura) OK. Does an electron have a memory?

**A:** Electron is borrowed unit of 7th density.

**Q:** (Laura) All right, in the picture of the crop circle you designated as being ‘Atomic Structure’, there was the concentric circles and then these three things on the outside corners of the triangle, one being zigzag, one being plain and round, and the other one kind of like a wheel, it had like little divisions. Would the zig-zaggy one be the electron?

**A:** Not correct concept atomic structure unifies elemental atoms.

**Q:** (Laura) What is an elemental atom, as opposed to an ordinary atom?

**A:** Elemental defines singular body of structure. Within, as in: “element of.” Electron is element of atomic structure.

**Q:** (Laura) Is there anything about an atom that holds memory?

**A:** Memory is subjective, atom is not.

**Q:** (Laura) Well, some atoms seem to be somewhat subjective.

**A:** No, it is your interpretation.

**Q:** (Laura) There was a call here to the house from the New York Times, supposedly somebody who was from the New York Times,

I would like to know, why this person called?

**A:** Wanted your “spin” on “Heaven’s Gate.”

**Q:** (Terry) Are there going to be repercussions throughout the, how shall I put this, the community of people, even though they are not related to this, who are doing things like this, over this Heavens Gate, Solar Temple mess?

**A:** Temporary.

**Q:** (Terry) Until they find something else to latch onto. (Laura) That’s right. (Jan) This week’s ‘mind candy.’ (Laura) Exactly. That’s a good term for it. Anything that we need to know that I haven’t asked? That I ought to have asked? That I would like you to consider as having been asked? (Terry) That’s a good way to put it! (Laura) Anything that you wish to convey to us, consider the question asked!

**A:** Energies at your Gainesville locator.

**Q:** (Terry) What about the energies there?

**A:** Negative.

**Q:** (Laura) Yes, it’s pretty and all, but...

**A:** No. The house!

**Q:** (Terry) What’s causing the negative energy at this house?

**A:** Poltergeist.

**Q:** (Laura) Will we be all right for the little time we have left?

**A:** Maybe.

**Q:** (Ark) Yes, but the last time we asked about that, they said that it was an old cemetery, but that it was not important. (Jan) Ask if that has changed.

**A:** Yes. Beware of possible leg fracture.

**Q:** (Laura) For who?

**A:** Laura.

**Q:** (Laura) Well, obviously, it's not going to be you, Ark! I'm the one that's always falling! So, it's obviously a good idea for me to go and stay in the office all day long.

**A:** It is a good idea for you to watch yourself!!

**Q:** (Jan) Carry around a mirror! (Laura) That's a good one! (Jan) I'm trying to stay awake here! Sorry about that. (Terry) Anything at all you would like to impart to us this evening?

**A:** No. Goodbye.

END OF SESSION

As it turned out, the father of the owner of the house where we were staying in Gainesville came to fix some plumbing a few days after this session and fell and broke his leg. I had been being super careful myself, but it looked like the "leg-breaking energy" had to go somewhere!

## **5.12 April 5, 1997**

Frank, Alice, Tom F {St. Pete Times writer}, Cherie {St. Pete Times photographer}, Tom H, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Marra.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** (L) My first question is: If memory is conscious and subconscious record of perception, as you have stated, and there occurs a “reality merge,” as you also described previously, some sort of time manipulation, does this automatically change individual perceptions?

**A:** Perceptions “leap” into place according to markers in the eternally present continuum.

**Q:** What are these markers?

**A:** Experiential breaks in the perceptual realm of continuance.

**Q:** Markers are experiential breaks. So, one experiences breaks and they become markers... perceptions leap into place... is this saying that, when there is a perception of a break, that some part of the psyche seeks to bridge this break by leaping into some sort of ...

**A:** The definition of the previous responses will become clear for you only after some reflection, my dear!

**Q:** Umm... does this leaping of perception occur for everyone as a group, or are some people immune to it?

**A:** !Como!?! What, said the perplexed ones, incredulously!

**Q:** Okay, you said that memory is subjective and an atom is not. If memory is subjective, what you have just been describing means that each and every person has a slightly different perspective, even if they are involved with the same incident or the same time sequence.

**A:** Of course!

**Q:** But it also implies...

**A:** That is the treasury of learning.

**Q:** Who is the treasurer?

**A:** The learner.

**Q:** But still, what you said still implies that an atom has an objective existence. Is this correct?

**A:** Yes.

**Q:** Would you please tell us what constitutes objectivity?

**A:** The effort on the part of the observer to leave prejudice “at the door.”

**Q:** How does the effort on the part of the observer to leave prejudice at the door relate to the objective existence of an atom?

**A:** An atom, as with absolutely everything else, cannot exist without an observer.

**Q:** So, in the case of the objectivity of an atom, if the human observers are not objective, where is the observer who makes the atom objective, or does the atom not exist if there is no observer?

**A:** Yes. to the latter comment.

**Q:** Yes to which part?

**A:** The latter comment.

**Q:** So there must be an observer. Must the observer be human?

**A:** The observer must be a consciousness.

**Q:** If you say that an atom has an objective existence, yet it only exists if it is perceived by a consciousness, then an atom does not have an objective existence, correct?

**A:** No.

**Q:** Okay, what is the distinction? You say that objectivity is the ATTEMPT on the part of the observer to leave prejudice at the door.

**A:** Without consciousness, there is neither objective or subjective!!

**Q:** So the crux is the attempt to leave prejudice at the door in the same manner as one would be non-anticipatory in order to create?

**A:** Yes.

**Q:** Well, that is a VERY tricky... (A) Is consciousness objective?

**A:** Consciousness is objective, until it has the capacity to choose to be otherwise.

**Q:** (L) What is the stimulus for the change, for the giving of the capacity to choose?

**A:** The introduction of prejudice.

**Q:** In a cosmic sense, cosmic consciousness, in the sense of The One Unified Consciousness, what is the stimulus there for the ability to choose?

**A:** When the journey has reached union with The One, all such lessons have been completed.

**Q:** But, that doesn't answer the question.

**A:** Yes, it does!

**Q:** A little change of subject. Last night I had a bizarre experience, I don't think I would call it a dream, but it was similar to what happened a couple of weeks ago. Out of this experience, I was only able to bring up two words: "Three dominoes", which

seemed to be extremely important. But now, they make no sense at all. Could you give me some clue as to what the three dominoes means and what these experiences are that I am having?

**A:** One possible meaning: 3 Dominos pizza outlets in Gainesville!

**Q:** Alright, what is another possible meaning?

**A:** Three dominos missing from your dominos set.

**Q:** Okay, another one?

**A:** Your turn!

**Q:** Whatever it was, it was from a very deep level of the subconscious and I knew that if I did not get it out, I would lose it. Okay, when these events occur...

**A:** Not an important dream, Laura.

**Q:** Well, maybe it was not an important dream, but it was accompanied by some very serious ... what was I doing? (A) You were fighting. (L) And that was what I was doing before. Struggling and fighting. And, to my knowledge, I have never done this before in my life. I am considered a monophasic sleeper. (A) How do you know? (L) Because I have been told. I used to go to sleep in one position and wake up in exactly the same way, and not even the covers would be messed up.

**A:** House is "affected."

**Q:** This house is affected?

**A:** No.

**Q:** The house we were in in Gainesville?

**A:** Yes.

**Q:** Did it carry over from there?

**A:** Yes.

**Q:** What is it related to?

**A:** Oakwood Drive.

**Q:** The house we used to live in out in the country...

**A:** Turned around in bed.

**Q:** That refers to the night I woke up and found myself reversed in the bed, my nightgown wet from the knees down, and there was simply no way I could have turned around because I was sleeping against the wall and there just wasn't enough space. Are you saying I am having memories of this coming to the surface?

**A:** Motor memories.

**Q:** Memories in the body?

**A:** Close.

**Q:** A and I were talking the other night about the symbol that appeared in {Laura's ex-husband's} driveway {on Oakwood Drive} many years ago.

**A:** Winged Sceptor.

**Q:** (A) We wanted to know why you related it to Grays, but would not say whether an abduction had taken place, and later you said that L {Laura's ex} had never been abducted. So, how does that relate? What is the connection?

**A:** Connections are not necessarily "time tracked."

**Q:** Well, Ark remarked that it may not have related to L at all, but that was a message to us in the present. What was the message and who was it for?

**A:** Not a message. A marker.

**Q:** Is this a marker in the same sense as you described relating to memory awhile ago?

**A:** Close.

**Q:** Who was this marker supposed to affect?

**A:** Not correct concept.

**Q:** What is the correct concept?

**A:** All events are synchronous only when perception becomes a catalyst for learning.

**Q:** (TH) What is the meaning of synchronous in this context?

**A:** Only discovered when the lesson is completed.

**Q:** (TH) Do they mean that all events exist somewhere outside of time and that we just experience them sequentially?

**A:** Close, Tom.

**Q:** And why were we discussing that particular item at that house in Gainesville... {TF's notebook computer indicates that its batteries are getting low by saying: Hasta la vista, Baby!} (TH) There's your answer! Deus et machina! (L) Why did the discussion of this symbol come up, and more or less synchronistically related to my battling dreams, and then you mentioned motor memory and the incident at Oakwood Drive...

**A:** Contemplate. Please do not leave just yet, Mr. French!

**Q:** Why do you not wish Tom to leave?

**A:** We may have some things to say to him.

**Q:** What?

**A:** Not yet.

**Q:** Cherie is the one who has to go. She is having allergic reactions to smoke.

**A:** Really? What do you feel about things, about changes we referenced for you in our last communication to you?

**Q:** (TF) It was necessary. Glad that it... that last year's over.

**A:** It is not over.

**Q:** (TF) Yes, there are some more things to do...

**A:** There are many changes yet to come.

**Q:** (TF) That's true. (L) Is Tom going to feel positive about at least 50% of them?

**A:** About 100%. When the conclusion is reached you see, Tom, this "struggle," or "challenge," relating to the perceptions of the coming ending/beginning of the millennium, was really a doorway opened by your subconscious to begin the necessary process of examining the metamorphosis of your own being.

**Q:** (TF) So, I had subconscious motivations of my own when I decided to follow this subject? It was for me?

**A:** Yes.

**Q:** (TF) Well, there has certainly been a lot of pain involved.

**A:** With pain comes renewal.

**Q:** (TF) What about the sickness I had at the beginning of the year?

**A:** Purging of built up "poisons" of an emotional/spiritual nature.

**Q:** (TF) I can certainly see that! Yes, that's very true. But, you have indicated more. What more can happen?

**A:** Now, finally, you will be able to move ahead and make significant progress, including ways not yet imagined!

**Q:** (C) What about for me?

**A:** Ask specifically.

**Q:** (C) Is the next year going to be like last year?

**A:** Well, obviously not. Beware of those who possess a nature of thinking there are plans set in concrete, and require the participation of you!

**Q:** (C) I don't understand. Give me a hint.

**A:** There is one close to you who believes your participation is necessary for their success or happiness. Look for disruption in efforts to sever legal bonds.

**Q:** (L) We would like to be able to talk to Max Planck, and Nicola Tesla, too. Do you think you could arrange it like you arranged for us to talk to Sandra?

**A:** Possibly, but the energies are scattered on the timeless plane of 5th density when there is no personal acquaintance.

**Q:** (TH) Well, we are acquainted with Planck's Constant! (L) Yes, there you go!

**A:** No, there you don't go.

**Q:** So, you are saying that it can be done, but that it will take a little doing?

**A:** Yes.

**Q:** Apparently Sandra and Keith could come through because of psychic links. Could you like, make an appointment with Max and Tesla so we could talk to them? Can we assume that they are still there, they have not reincarnated?

**A:** Appointment? Get real! That dimension is timeless, i.e. essence extensions for your beings are “still” there, too!

**Q:** Well, on that note, we will say good night and save the chat with Planck for a later session.

**A:** Good night.

END OF SESSION

## 5.13 April 12, 1997

Frank, Alice, Melissa (friend of VG), VG, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wosarriea.

**Q:** And where do you transmit from?

**A:** Cassiopaea.

**Q:** We have a guest this evening, Melissa, and I have a number of questions that I have been jotting down during the week. But, I guess we need to ask the question that is bugging VG so she can calm down over there.

**A:** Crash.

**Q:** Yes, the recent plane crash in Colorado. Can you tell us what happened?

**A:** Pilot became outed, plane continued on a course as plotted by magnetometers employed by ground based radar and control systems.

**Q:** What do you mean by “pilot became outed?”

**A:** Consciousness terminated.

**Q:** Naturally or by actions of an outside source?

**A:** Watch future reports for clues.

**Q:** (V) Well, I wanted to know if it had anything to do with UFOs.  
(L) That was where I was heading, but they said to watch for clues.

**A:** Wait and see.

{Wikipedia says about the crash: “Craig David Button (November 24, 1964<sup>[^1]</sup> - April 2, 1997) was a United States Air Force pilot who died when he crashed an A-10 Thunderbolt II aircraft in mysterious circumstances on April 2, 1997. During the incident, Captain Button inexplicably flew hundreds of miles off-course without radio contact, appeared to maneuver purposefully and did not attempt to eject before the crash. His death is regarded as a suicide because no other theory explains the events. His aircraft carried live bombs which were never recovered. It took three weeks to find the crash site. During that time, there was widespread public speculation about Captain Button’s intentions and whereabouts.

Craig Button’s father, Richard Button, was a retired Air Force Lieutenant Colonel. His mother, Joan Button, was a devoted Jehovah’s Witness.

Hurlburt Field at Eglin Air Force Base (home of the Air Force Special Operations Command) is named after Craig Button’s uncle, Donald Wilson Hurlburt, who was a B-17 pilot in World War II.

Captain Button was in his single-seat A-10 Thunderbolt II attack aircraft when it took off on a training mission with two other A-10s from Davis-Monthan Air Force Base in Tucson, Arizona. His

jet was armed with four Mk-82 bombs, 60 magnesium flares, 120 metal chaff canisters and 575 rounds of 30-millimeter ammunition. This training mission would have been the first time Captain Button dropped live ordnance.

Near Gila Bend, Arizona, Captain Button unexpectedly broke formation after receiving in-flight refueling. He flew in a northeasterly direction towards the Four Corners area of Colorado, New Mexico, Arizona and Utah. His jet was spotted numerous times by observers on the ground. One observer, an off-duty pilot, said the jet appeared to maneuver around bad weather. This observation suggested to the Air Force that the aircraft was being flown manually and purposefully. The flight was tracked by radar in Phoenix, Albuquerque and Denver. But because Captain Button's transponder was turned off, the aircraft was only tracked, not identified. It was only after analyzing radar data later that investigators were able to track Button's flight.

The jet zig-zagged near the end of its flight. It was last spotted in the air about 100 miles (160 km) west of Denver.<sup>[18]</sup> The jet impacted terrain about 15 miles (24 km) SW of Vail, Colorado, on Gold Dust Peak (39°28'44N 106°35'40 W) in a remote part of Eagle County. The Air Force concluded the jet probably had two to five minutes of fuel remaining when it crashed.<sup>[19]</sup> The impact occurred at about 13,200 feet (4,000 m) of elevation, just 100 feet (30 m) below the summit. The debris field was over a quarter-mile-square area (0.64 km<sup>2</sup>). Pieces of the canopy and cockpit went over a ridge.

The search for the crash site was conducted by the US Air Force, Colorado Air National Guard and the Civil Air Patrol. A U-2 reconnaissance plane from Beale Air Force Base in California overflew the area and identified five possible sites. Twenty days after Button's aircraft disappeared, an Air Force TH-53A helicopter spotted metal fragments in the snow on Gold Dust Peak. Steep terrain,

bad weather, high winds, deep snow, rock slides and avalanches hampered access to the site. Rodents were even found to be chewing through the ropes of recovery personnel. It was several more days before the wreckage was confirmed to be Captain Button's missing A-10. It took another four months to recover the human remains.

The four 500-pound Mk-82 bombs were never found despite an exhaustive search involving metal detectors and ground-penetrating radar. The bombs were designed to survive a crash and the Air Force expected to find them at the site. Furthermore, the aircraft's bomb racks were recovered in the wreckage, and they indicated that the bombs had not been released. Yet, more than four dozen witnesses reported hearing loud explosions in Northern Arizona and also near Telluride and Aspen in Colorado. However, no evidence was found to support the idea that Button released the weapons where the explosions were heard. The Mk-82 bombs can throw shrapnel more than a mile (1.6 km), and the crash site was less than 4000 feet (1.2 km) from a deep alpine lake.”}

**Q:** (L) Next question: I would like to know what is the “Council of Nine,” as I have read about in several books. Now, there was an ancient council of nine, and then there is the one talked about by Phyllis Schlemmer, and it is supposed to be group of aliens located somewhere in North Dakota, or something like that. Are there any references on the council of nine that you can give us?

**A:** Partial deception.

**Q:** Partial deception in the ancient references, or the modern ones?

**A:** Take ancient references and interpret modern accounts according to current events profile.

**Q:** Okay. I can do that. Onto the other questions. One of the ancient apocryphal texts recounts the story that Joseph, husband of Mary, the mother of Jesus, described the night that Jesus was born and in that account, he described an event that could only be “frozen time.” In other words, he said that time stopped. He described people sitting at dinner with their food half-way to their mouths, arms frozen, jaws frozen in the act of chewing, and the same effect with cattle and so forth. But, that he was on his way to get a midwife when this occurred. Did, in fact, time stop at the time of the birth of Jesus?

**A:** Time “stops” for many at many times according to their individual sensitivity levels.

**Q:** According to sensitivity level. Why does sensitivity level have something to do with time stopping?

**A:** It has stopped for you too.

**Q:** Does it ever stop for the whole planet at once?

**A:** It never “started.”

**Q:** It’s just perception. This is a funny question: I have a red birthmark on the back of my head, in the hair, my brother has one, and I noticed that Ark has one, too. What is the significance of this birthmark, if any?

**A:** Later.

**Q:** Okay. Not gonna answer that. Now, I would like to know who the Olmecs were.

**A:** Be more specific.

**Q:** Okay, what is the genetic origin of the Olmecs?

**A:** Basically the same as yours.

**Q:** In some of the ancient carvings of the Olmecs, they were always carved with a cleft in their foreheads. Did this represent an actual physical cleft?

**A:** Designation in the art work is for “The Nation of the Third Eye.”

**Q:** We have talked about the Nation of the Third Eye before. What is the third eye and how does one activate it?

**A:** What do you think?

**Q:** Well, what I think may be erroneous. Is it the pineal gland?

**A:** May be part of the picture.

**Q:** Is the third eye something one can use to view their reality?

**A:** Ditto.

**Q:** What is the best method for activating it?

**A:** This is a good one, for example.

**Q:** Oh, you mean channeling. There was an ancient custom of skull trepanation. Why were ancient peoples volunteering to have their heads cut open in droves?

**A:** Trying to locate the source of the mystery.

**Q:** Did any of them succeed with this operation?

**A:** We seriously doubt it.

**Q:** Well, well. What was the origin of the practice of human sacrifice?

**A:** We have answered many of these inquiries for you before, in so many ways.

**Q:** Yes, I know. But, I don't think I ever asked this question directly, though there are allusions to it.

**A:** Allusions provide pieces to the mosaic, thus empowering your learning channel.

**Q:** Why are you hitting all the letters off to the side tonight?

**A:** Energy fields vary according to electromagnetic condition variances in the atmosphere surrounding your 3rd density locator.

**Q:** What is the source of this present variance?

**A:** Solar flare.

**Q:** (V) So the recent solar flare is having an impact! And the news people said it was not big enough to be experienced in any way. (L) One of the things I was doing last night was a little web search on the word "Braná," because we have a particular interest in finding out if there is any significance to this. I found some very interesting things about this word. I discovered that it was an Old English word for a blackbird or crow. It can also be a name in Yugoslavia and Russia. It was also the name of a great Irish king. Anything further you can add to that list?

**A:** What does this tell you?

**Q:** Well, that maybe the source of funding {Sue Brana and Gain Systems mentioned in previous session – they wanted to fund Ark's research on crop circles} is not in this country. Maybe Russia?

**A:** Beware of unexpected assistance.

**Q:** We can be wary and still utilize it, can't we?

**A:** Up to you.

**Q:** If, in fact, there is a power mad clique running the world, what difference would it make if you got money from one country or another?

**A:** That is not the point: who is “running” the “power mad clique?”

**Q:** (L) So... (V) The Lizzies, the Lizzies...

**A:** Okay...

**Q:** So you are essentially indicating in a roundabout way that we ought to ditch this offer?

**A:** Not so. We are indicating in a straightforward way that you should strive for objectivity at all times, and especially at junctures such as this, and not let subjectivity or emotions or hastily thought of ideas or decisions rule you!

**Q:** Could it also be possible that this source, this “Brana,” is in contact with the alleged Orion group?

**A:** Excuse us?

**Q:** I mean the Quorum as you have described?

**A:** Always be vigilant so as not to perceive a tangled web as a neatly constructed loop

**Q:** The suggestion was made in another session that we need to devote some time and energy to the crop circle problem.

**A:** Yes...

**Q:** And finding funding to do this in the correct way, as in networking and so on, is difficult, to say the least.

**A:** Patience pays... “Haste makes waste.”

**Q:** Well, we would not be doing it primarily to develop technology, but for information of a more cosmic or theoretical nature. Now, whether that would lead to technology is another question.

**A:** Review from whence and how this offer originated before you “leap into it,” lest you become the fish that is attracted to the really shiny and tasty looking lure!

**Q:** Well, then...

**A:** Review for insight... it will come!

**Q:** Who was responsible for the lost luggage? {Ark had returned to Poland and his luggage was “lost”. It was not “found” until a day or two later, and then it was erroneously delivered to his ex-wife’s apartment.}

**A:** Polish authorities. Now, in addendum to previous discussion: Ask and you shall receive. Receive without asking, and you shall be deceived!

**Q:** Ask and you shall receive. In what direction should we focus the asking without risk of being deceived?

**A:** Suggest you start by approaching channels you have some knowledge of, and in whom you have some degree of trust! Contact Colin Andrews, maybe? But, keep all options and avenues for research and funding open.

**Q:** Is this the most we can get on this for now?

**A:** Probably...

**Q:** Let me go back to the luggage. The Polish authorities, as in which branch?

**A:** Secret police.

**Q:** What were they looking for? Just anything?

**A:** Yes.

**Q:** Did they satisfy themselves that there was nothing subversive in there?

**A:** Yes.

**Q:** Why, then, did they cause the luggage to be delivered where it was?

**A:** Honest mistake.

**Q:** (L) Was this mistake stimulated by the Lizzies?

**A:** In that vein, there is little in your STS locator that is not, ultimately.

**Q:** What was the reaction of the recipient of the luggage? {Ark's ex-wife. She apparently was able to open the luggage, steal several items, and replace the lead customs' seal. One of the items stolen was a tape recording L made for Ark. Another was Ark's research journal. And finally, a collection of one-of-a-kind photographs L had given to Ark which his ex-wife apparently destroyed.}

**A:** Stunned.

**Q:** Was I correct when I thought that there was rushing off to find someone to translate the tape?

**A:** Well, it was more like rushing off to "find my lawyer."

**Q:** Is this information going to be used in a detrimental way against him?

**A:** Yes.

{It was. She claimed to never have seen the items that were stolen, but later included paragraphs from Ark's research journal in a court filing.}

**Q:** Is the luggage going to be returned?

**A:** Wait and see... “Stay tuned, fasten your seatbelts,” etc...

{Ark had to go and retrieve it.}

**Q:** Anything further you can give to help me sleep tonight?

**A:** Ask...

**Q:** Is it going to prolong the proceedings?

**A:** Open.

**Q:** Will she show up at the hearing?

**A:** Will most likely ask for a delay, based upon “new information,” to be entered into evidence.

{She did that, exactly.}

**Q:** Would it be a good idea for him to suggest that he can get an American divorce?

**A:** Good idea!!

**Q:** Should it be let out so that she will hear of it?

**A:** Why not proceed discreetly?

**Q:** Would it be advisable to pursue the money issue? {Ark’s ex-wife had emptied his bank accounts the day after he told her he wanted a divorce. She claimed to the court that she could not return half the money because she had given it all to the Catholic Church to “buy masses” for Ark’s sinning soul. We later learned that this was a lie.}

**A:** It might be advisable for A to simply concentrate upon his new beginning as opposed to the old, dead past...

**Q:** Does that mean that he will not be able to get the legal affairs straightened out in Poland?

**A:** This is a complicated situation which will unfold in a proper way if handled in a positive, forward looking manner.

**Q:** Forward looking would be looking to the future?

**A:** Yes.

**Q:** Does that mean looking out for some of his interests?

**A:** See previous response.

**Q:** My original thought was that he should just walk away from it, let her have it. There are other opportunities.

**A:** Look ahead, not back.

**Q:** I think that the pictures and tape will be gone when he gets the luggage back. {I was right.}

**A:** Wait and see.

**Q:** Why was she stunned at what was in the luggage?

**A:** Think of all that was in the luggage, and you will know the answer to that question.

**Q:** Was it the pictures?

**A:** See previous answer, obsession aideth not, my dear!

**Q:** I am not obsessed! I am curious.

**A:** Worry not, just sit back and enjoy the show!

**Q:** I can't enjoy myself if I think she is going to make him suffer! {She sure tried.}

**A:** No more on this!

**Q:** Okay, recently when I asked about reality merges, and you talked about reality bridges, and at another time we talked about Frank's life changing at the time that "reality is abridged." Is there a relationship between those concepts?

**A:** Of course!

**Q:** You mentioned important junctures. Do these junctures relate to time markers as you have also mentioned?

**A:** Yes.

**Q:** Is it so that when one makes a certain choice or decision, one can either enter or exit, or both, one universal construct or another?

**A:** Maybe.

**Q:** Okay, if one makes certain extremely significant choices in one's life, at certain significant junctures, does that change one's reality in a complete way?

**A:** Just remember this: as we have told you before, network, meditate, learn and strive for answers, and ask for what you need. Always be in control of your own ship...

**Q:** (M) There is a symbol that always comes to my mind, and I would like to know what this symbol means? [draws symbol which looks like two spirals back to back.]

**A:** The duality of body and spirit... the two perfectly interlock for those in the physical/material planes. One reflects the other always in the timeless existence of all creation!

**Q:** What is the origin of that symbol?

**A:** Symbols always naturally evolve of pure consciousness thought form.

**Q:** Anything further on that symbol?

**A:** No.

**Q:** Can it be used for anything?

**A:** Learning, the empowerment that arises from the acquisition of knowledge.

**Q:** We thank you, and good night.

**A:** Good night.

END OF SESSION

## **5.14 April 19, 1997**

Frank, Laura

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have this evening?

**A:** Yopanno.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** Am I on the right track with the “bloodline” research?

**A:** Sure.

**Q:** Am I going to discover some more startling things with this “bloodline” research?

**A:** Discovery is the fruit of inquiry.

**Q:** Am I correct in my assessment that the origin of the Grail stories was the story of the Head of Bran?

**A:** But what was the “origin” of Brahma?

**Q:** Well, from the way I am interpreting what I have found, I have two possibilities: One is the Celts from Kantek, and two: a Nephilim hybrid.

**A:** Could be one and the same.

**Q:** Well, from what you have said in prior sessions, these bloodlines can be of positive or negative orientation, a duality, and that they lead to super-secret power sources. Is that correct?

**A:** Well, the duality is existent concomitantly through all bloodlines, but in the so-called celts, it is more pronounced, therefore, there are more vivid power cells and centers.

**Q:** Are these cells and centers that you talk about, are they something that is located in the body or a part of the spirit-body connection...

**A:** The extant body.

**Q:** What do you mean by “extant” body?

**A:** Existent/external.

**Q:** Okay, I will keep digging. How can I find if there is going to be a connection between the Aryan/Jewish bloodline of Jesus and the Merovingian/Plantagenet bloodline? Does it exist?

**A:** Only to the extent of the shared origins of the essenes and the celts.

**Q:** A mentioned that he used to think that he was Jewish. Is he, or half?

**A:** If you are going to find anything, you need not be foretold.

**Q:** Am I going to find anything?

**A:** Just do it.

**Q:** I did a little card reading while he was going to see his daughter for the first time in almost 6 months, and I pulled up one card that said “sickness unto death.” And, I had asked what would be the result on me of this meeting with his daughter, and this is what it said. I was very upset because I had the dream about dying when I was up in Gainesville. Can you tell me anything? I was upset!

**A:** Cards mean only what the vibrations provide.

**Q:** Were my vibrations that I was going to get sick and die, or that our relationship was going to get sick and die, the daughter was going to be sick and die, or A or A or...

**A:** Every physical vehicle experiences “sickness unto death.”

**Q:** My question was: what would be the result of this meeting with his daughter. Now, you are worrying me.

**A:** Why worry? Do you not see that which you have accomplished up to now, through desire begetting sheer will, begetting realization?!?

**Q:** Could I have been picking up vibrations of A having someone put some sort of hex on me?

**A:** What difference does it make?

**Q:** Well, once before when someone did this, you said I was sick because these dark forces were concentrated on me.

**A:** What is our most famous saying?

**Q:** Knowledge protects.... Well, does having knowledge of her nature provide protection?

**A:** You are not realizing your power.

**Q:** So, I don't even need that?

**A:** No,

**Q:** Okay. Now, I thought about it and reasoned it out, and am nearly positive that she took the pictures, tape and Brana letters. The pictures I can understand. Either to spite me or him, or to use in a negative way. Or is there another option? I am not seeking confirmation, just trying to settle it so I can get away from it.

**A:** Then it is settled, so go away from it!

**Q:** Well, what I am really trying to get to is this: some of those pictures were irreplaceable. I would like to recover them. Can you suggest something?

**A:** Let the pieces fall into place.

{Personal questions with no general value for others redacted.}

**Q:** Is it important for me to go to Europe in any way? To do anything significant?

**A:** No.

**Q:** Is there any significant reason to go other than to be with him?

**A:** Learning.

**Q:** I need a word of wisdom. A clue to follow....

**A:** Blue water, white skies.

**Q:** What does that mean?

**A:** You asked for a clue!

**Q:** Oh! Okay. Thanks and good night.

**A:** Good night.

END OF SESSION

## 5.15 May 3, 1997

Frank, Alice, TomK, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And what name shall we use this evening?

**A:** Jimmorra.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** I have quite a number of questions this evening. The first one is: is it possible for a person to be used as a monitor, to monitor other people's activities through their eyes and ears?

**A:** Possible, but hardly necessary.

**Q:** You once said that PZ was like a monitor, that wherever she went, she monitored aural frequencies for whoever had put the implant into her. Was this an unusual situation?

**A:** Most likely.

**Q:** Last week we did not have a session, but went through the notes I have been making since I was in Gainesville. Frank became very tired and went home. I was not tired. I would like to ask about this. Usually, Frank is not tired, and I am the one that is exhausted. I would like to ask about this. Is there some sort of energy exchange that takes place during channeling?

**A:** Not in that way.

**Q:** Well, both Terry and Jan commented on this, and I would like to know if there is any relationship of this reversal to the fact that we did not do a session?

**A:** Terry and Jan's comments in this case should be viewed with caution, as they may be nebulous in their intent.

**Q:** When you say nebulous... my perception was that they wanted to develop a separate channel, as before.

**A:** They wanted to pursue their own idea of casting doubts upon Frank.

**Q:** Well, not only was that going on, but I was sharing the information that I had gathered in response to clues given in the material, and I had the impression that it was not interesting to them. Yet, I thought that the fact that clues in the material had led to such discoveries was extremely important...

**A:** Interesting to some includes only that which casts the spotlight upon themselves.

**Q:** Okay. I have the idea. Now, let me ask about the really strange things that I have been discovering. I am sure that I am not even halfway through it. But, let me ask this: am I correct in my thinking that following the genetic clues is part of the key...

**A:** Connect the dots and when you have finished, you will have a "Gaugin."

**Q:** Hmmm... (A) In other words, a masterpiece... (L) Okay, we know that the bloodline is important by virtue of being of the Nordic or Celtic heritage. In going through the transcripts, I came across numerous instances where a "sect" was mysteriously mentioned over and over again. I am thinking that this sect, as you call it, is this organization that we refer to as the "Quorum."

**A:** What is “sect” the root word of?

**Q:** Sector, section, (T) sectarian... (A) A branch... (L) Anything else you want to add to that?

**A:** Ask away.

**Q:** Does this other group that you have mentioned, the Nation of the Third Eye, are they one and the same?

**A:** The Third Eye expands vision into the unseen.

**Q:** Seeing the unseen. You mentioned once before that the “Rosicrucians act as a thief in the night.” You also mentioned that I ought to dig into the Rosicrucians, and I went to the University library, and it was essentially missing...

**A:** Connect the Rosicrucians to your favorite island by the “beech.” Horticulturally, please, and family.

**Q:** Oak Island?

**A:** Yup! Then, connect the Pyrenees to the Canaries.

**Q:** Okay, a “thief in the night.” The destruction of the Templars...

**A:** Research the history of the Canary Islands for clue.

**Q:** Is there any connection to the fact that those guys at the University of Tenerife were communicating back in February and March? Might there be more to this connection?

**A:** Maybe, but do you know the history of this place?

**Q:** Well, no I don't. That one slipped by. I will follow that one... You also once before said that when a certain 7 people assembled into a perpendicular reality, that the learning would be exponential. I am sure we are not there yet, but I am wondering if this information I have discovered about bloodlines and potential activation of DNA has any connection to that idea?

**A:** Build your staircase one step at a time.

**Q:** Reading through the session of May 23, last year, when Tom was also here, and the issue of his being in O'Brien was addressed, you asked who had begged him to stay there, then there was a remark about an EM vector. The way I understood it is that a person can be an EM vector. Is that possible?

**A:** Vector means focuser of direction.

**Q:** Could that mean that EM waves can be vectored by a human being simply by their presence? I also noticed that several of us have been involved with persons and relationships that seem designed to confuse, defuse, and otherwise distort our learning, as well as drain our energy. Basically, keeping us so stressed that we cannot fulfill our potential. Is there some significance to this observation?

**A:** That is elementary, my dear Knight!

**Q:** One of the things I have learned is that these individuals seem to attach via some sort of psychic hook that enters through our reactions of pity. Can you comment on the nature of pity?

**A:** Pity those who pity.

**Q:** But, the ones who are being pitied, who generate sensations of pity, do not really pity anybody but themselves.

**A:** Yes...?

**Q:** Then, is it true as my son said, when you give pity, when you send love and light to those in darkness, or those who complain and want to be "saved" without effort on their own part, when you are kind in the face of abuse and manipulation, that you essentially are giving power to their further disintegration, or contraction into self-ishness? That you are powering their descent into STS?

**A:** You know the answer!

**Q:** Yes. I have seen it over and over again. Were the individuals in our lives selected for the extremely subtle nature of their abilities to evoke pity, or were we programmed to respond to pity so that we were blind to something that was obvious to other people?

**A:** Neither. You were selected to interact with those who would trigger a hypnotic response that would ultimately lead to a drain of energy.

**Q:** (T) Well, it is a fact, because my energy is sure drained. (L) What is the purpose of this draining of energy?

**A:** What do you think?

**Q:** (T) So you can't concentrate or do anything. You can't get anywhere with anything.

**A:** Or, at least not the important things.

**Q:** (T) Is that why my concentration is so low?

**A:** Yes.

**Q:** (T) Is L a robot type?

**A:** You are dealing with a no-win situation!!

**Q:** It is a no win situation...

**A:** As you know.

**Q:** (T) So, if I don't get out, I will just keep going down. Is it the area or the person?

**A:** Both. One is wrapped within the other.

**Q:** (L) Why is it that it seems to be one of the primary things about us that prevents us from acting against such situations, is our

fear of hurting another person? That was the chief thing that kept me in my marriage for so long. And, only when I knew that it was hurting the kids more to stay, did I have the power to get out. Why are we so afraid of hurting someone's feelings if they are hurting us?

**A:** Not correct concept. You do not need to “act against them,” you need to act in favor of your destiny.

**Q:** But, when you do that, these persons make you so completely miserable that there seems to be no other choice but a parting of the ways.

**A:** Yes, but that is not “acting against.” Quite the contrary. In fact, remember, it takes two to tango, and if you are both tangoing when the dance hall bursts into flames, you both get burned!!!

**Q:** Why is it that when one tries to extricate from such a “tango,” why is there is such violent resistance to letting you go when it is obvious, clearly obvious, that they do not have any feeling for you as a human being?

**A:** It is not “they.” We are talking about conduits of attack.

**Q:** What is it that makes them susceptible to becoming conduits of attack?

**A:** All STS are candidates for this. There are only about 6 billion of you though.

**Q:** Okay, all people can be conduits of attack. (L) Would just coming down and working with us on Saturdays, on a regular basis, help him to get his concentration back?

**A:** Making the necessary changes would.

**Q:** Is it true that being in the presence of such people, that one is under the influence of an energy, an emanation from them phys-

ically, that befuddles the mind and makes it almost impossible to think ones' way out of the situation?

**A:** It is the draining of energy that befuddles the mind.

**Q:** Where does this energy drain to?

**A:** 4th density STS.

**Q:** They drain our energy from us and 4th density STS harvests it from them?

**A:** "They" do nothing!!!! 4th density STS does it all through them!

**Q:** (T) Well, I would like to know what is it in us that makes us attracted to such people.

**A:** It was the idea of 4th density STS.

**Q:** That means that they can control your thoughts and emotions, put ideas into your head, and you think it is a good idea to "save" someone. You don't know. It is taught in our religions and culture to give until it hurts, and, in fact, to give because it hurts. The whole situation is designed and controlled from another level. Any further comment on this subject?

**A:** Once you have truly learned the program, just plug it in.

**Q:** I guess once you have truly learned what is being said here, just plug it in...

**A:** No. We mean that all you have to do is learn the patterns of behavior, the subtle signs, and you will always have the ability of avoiding it. Your own as well as others.

**Q:** So, once you have learned the program from this person, you will be able to avoid getting into another, similar one. (T) But, I should have learned it from H. I did the same thing twice. (L) Well, when you are wounded, it is hard to see clearly.

**A:** The signs were present, but you did not read them.

**Q:** (L to Tom) You ignored it.

**A:** No, he did not yet know the program. Anticipate not!

**Q:** I guess that means that when you are thinking that you can change another person, or that changing something about what you are doing naturally will help them, you are anticipating.

**A:** Or that it would be different that it turned out to be.

**Q:** Well, you knew that there was a lot wrong in the beginning, but you thought that it would be different. Ark's mother is sick. Will she be better soon?

**A:** Wait and see.

**Q:** He is carrying a very heavy burden just now, and I am concerned for him.

**A:** Does this surprise you? Unfortunately, Ark still does not completely know this program.

**Q:** Are you suggesting that this sickness of his mother's has been caused from 4th density STS?

**A:** Lesson number 1: Always expect attack. Lesson number 2: Know the modes of same. Lesson number 3: Know how to counteract same.

**Q:** When a person is sick, old and one's mother... the only thing to do is take care of it. But, I guess that it is true that anything that tends to cause interference in doing what one is here to do could be considered attack. Whether it is your mother being sick, or your kid falling off a bicycle and breaking his arm. It is all related to lack of vigilance on the part of the one who is the conduit of attack.

**A:** When you are under attack, expect the unexpected, if it is going to cause problems...

**Q:** So, if there is something that can cause problems, expect it to happen.

**A:** But, if you expect it, you learn how to “head it off,” thus neutralizing it. This is called vigilance, which is rooted in knowledge. And, what does knowledge do?

**Q:** Protects! Is there anything I can do to help?

**A:** How so?

**Q:** Well, I don't know. I guess that a person just has to come to the full realization that virtually everything that happens on the planet - no exceptions - is a symbol of some interaction of STS vs STO energy at higher levels.

**A:** Yes, and that is not as of yet realized. It must be part of a natural learning process.

**Q:** Well, I guess that all of us tend to keep one or another area sacrosanct and think that it is not subject to attack, or that we can use logic and 3rd density thinking to explain it. Until a person realizes that attack can come through even one's self, wives and husbands, children and parents, friends, virtually ANYBODY - NOBODY is exempt.

**A:** The block is a lack of faith in the concept. Remember, when one has been indoctrinated by religion, culture and/or science, they are predisposed to view all things in the sense of the measureable physical reality exclusively.

**Q:** Well, in Ark's case, is something going to happen for him that will give him a view under the surface, so to speak?

**A:** Please do not anticipate. This is a logjam of “quantum” pro-

portions.

**Q:** Well, I think he is cured of thinking that certain people can be helped.

**A:** But he is not cured of his lack of faith in the reality of non-physical attack.

**Q:** Speaking of non-physical attack, I went through some things this morning that were rather unpleasant. I later discovered that at the same time I was experiencing this, there was communication from the Brana woman. Is there a connection between his correspondence with her and my feeling that an elephant is sitting on my chest? When this happens, I actually feel like my spirit is being compressed in a painful way. Is there a relationship between this and the Brana person.

**A:** Maybe.

**Q:** Is there any relationship between the Brana correspondence and the fact that Jim also wrote to him and JW, the spook, called me today?

**A:** Maybe.

**Q:** Is there any relationship between all of these portals of attack, and the things I have been discovering in the past week or so?

**A:** Maybe.

**Q:** Can you tell me anything about this at all?

**A:** If it does not need to be answered, that may mean that it has already been answered, simply because, though you have much still to learn, you have learned so much already, my dear. And, on that note, good night.

**Q:** Good night.

END OF SESSION

## 5.16 May 21, 1997

Frank, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Xyorra.

**Q:** And where do you transmit from?

**A:** Cassiopaea.

**Q:** I have a whole bunch of questions: First, in the past week, Dimi, Jim and SJB contacted Ark. I simultaneously had another of those experiences where I felt that an elephant was sitting on me, or compressing me. I have a theory that there is some sort of frequency wave that activates 'agents' and their preimplanted programs to contact their 'target,' and that the frequency is what I perceive as the 'compression.' Is this possible?

**A:** Yes. Notice how contact intensifies post-put off?

**Q:** What? What is 'post-put off'?

**A:** After Ark delivered message indicating declining interest.

**Q:** Oh, I see. Is the sensation I experience strictly related to a frequency? I mean, I was thinking that I was having this feeling because force was being taken by them from me through his bond to me, that his response to them closed the circuit. Would I have suffered whether he responded or not?

**A:** Waves unify significant events.

**Q:** Well, what does that mean?

**A:** It is interrelated.

**Q:** Would a blank wall, termination of contact, minimize my suffering?

**A:** Only you can tell.

**Q:** Well, he knows who and what they are, and there is also the view that by continuing interaction, it prevents OTHER portals from being opened. In other words, the devil you know is better than the devil you don't know.

**A:** Oh yeah?!?

**Q:** So, this does not prevent others from coming along?

**A:** Unless one prevents fires by watching only the matches.

**Q:** What are the matches?

**A:** That is not the point. Does one prevent sinking just by looking out for icebergs?

**Q:** No, one steers away from them. Is that what you mean?

**A:** Oh... We see... Then you must mean by inference that the only cause of sinking is icebergs, yes??

**Q:** Oh. So, there is a lot more that can cause one to sink than icebergs. Well, I was just concerned about the fact that there has been repeated events of this kind. It seems that I get the horrible feeling of being compressed even before they contact him... and then it just snowballs. And, it always seems to come at about the time I have my period, when I am most vulnerable and least capable of coping with such things.

**A:** When your periods cease, the contacts will not. Yes.

**Q:** Yes to what?

**A:** It is soon now.

**Q:** Well, Dimi claims to be able to do repeatable, controlled PK. What kind of PK is he talking about since he is so adamant about not talking about it?

**A:** Not important. Maybe he can do repeatable, controlled B.S.

**Q:** Okay, some time ago when I had the ‘3 dominos’ dream, or experience. I asked you about this, and you said it was not an important dream. Yet, it led to an incredible series of discoveries. Why did you say it was not important?

**A:** What was important, the dream or the discoveries?

**Q:** Well, of course the discoveries... and there really were no dominos... but it gave me a teensy idea that helped with all the rest... and one thing led to another to another...

**A:** Dream was not important until fulfilled.

**Q:** Anyway, I found at the same longitude as Oak Island, a place with the name “Percee.” This led to Fontainebleau, Chartres, and Coll du Perche and Moulins la Marche. Then, the ‘blue waters and white skies’ led to lake Geneva and Point Perce. And this was the third ‘Percy’...

**A:** Devour newspapers for any recent news re: Percy.

**Q:** Okay. So, then I had the thought that ‘Percy’ was the center of an incredibly complex web. It was like what you had described for me before: mosaic consciousness. I could see connections no matter which way I looked. I mean, literally everything connects... alchemy, Rosicrucians, Masons, physics, genetics, escha-

tology, Cassiopaea, prime numbers, Medusa, Perseus... I mean, it is the most incredible thing I have ever seen in my life...

**A:** So far...

**Q:** Okay. But, that led to the idea of the universe being like a sort of spider web, with the spider being at the center... kind of an expanded and more complex 'perpendicular reality' idea. All the levels connected by the threads, or conduits... the gravity binder from the spider in the center... am I onto something here?

**A:** Stay tuned...

**Q:** I hate it when you do that!

**A:** But you love it when you discover!

**Q:** Well, that is certainly true. But, one of the things I was thinking about was: If one were to stand on some spot on this mountain, Point Perce, near Geneva, and faced in the direction of Coll du Perche and Moulins la Marche, the compass heading would be 315. And, a day or so after I had thought this and mentioned it, Ark found a paper in a journal, and the number was 33, page 315, I believe. So, I am wondering if this is another clue that has been confirmed this way and what would I see if I did such a thing?

**A:** Discover?

**Q:** Does it have anything to do with the Frankenstein dream, which seemed to contain all the basic elements of the following weeks' discoveries. Does it have something to do with putting something in a particular place in one life to come back for it in another? Or, is it that all the clues...

**A:** You should know by now that all this will be revealed as appropriate.

**Q:** Okay. Now, the 64,000 dollar question... tunnels, longitude

of Oak Island, leading to Pointe Perce, Mont Blanc and the St. Bernard Tunnel, and St. Bernard wrote the rules for the Templars... and then, Tenerife, the Canaries and the latitude of 28:30 connected to the spider in the King James version of Proverbs 30:28... and that leads directly to New Port Richey. Therefore, is there some connection between the location of this house and something on the Canary Islands?

**A:** You have made much progress, expect more, if vigilant and persistent!

**Q:** Well, you know I am that! Well, at the time the question was 'could the position of my house over a tunnel be detrimental?' And the answer was 'yes.' Then, the question was 'how?' which led to the answer 'That is the 64,000 dollar question. So, is there any further that I can have at this time?'

**A:** Detrimental is subjective, according to unfolding events and choices.

**Q:** So, it was a question at that time, the BIG question as to what I was going to choose to do...

**A:** Close.

**Q:** At that time, it was also said that there was a vortex here that merges levels 1,2,3, and 4 with density 5. And, you said that the primary issue about this was 'the physical imprint locator.' What is this?

**A:** Forces that tune and influence participants on the various above mentioned density levels.

**Q:** The other night, I guess at the time that the Jim, Dimi, and SJB thing was brewing, I had a terrible dream of a person trying to break into my house... that {my youngest daughter} had followed V\*\*\* out, and I had to get her back, and this put me in danger...

then, I was afraid that he was going to start trying to kill us while we were in the house by shooting through the walls. Ark, Frank and Tom did not seem to be quite as alarmed as I was... I woke up with my heart nearly beating out of my chest and covered with a cold sweat, and somewhat paralyzed. I recognize this sort of dream from before. Was it just 1) a dream, 2) a warning, 3) a screen memory of some other event? It was very frightening.

**A:** Choose selection two above. Always be aware of your significance as the possessor and potential purveyor of unusually high level knowledge store. And, what that means to those who would prefer that it not be.

**Q:** Is there more I could do in terms of protecting my children? That is where I am most vulnerable and I am not sure that they understand the seriousness of the situation.

**A:** What do signs keep telling you? Who took what positions and behaviors in the dream? Well?

**Q:** Yes... I realize that it was because of going out to do something ordinary... not thinking... while Ark and Tom and Frank were distracted... and I was just concerned about {my daughter}...

**A:** And what role did V\*\*\* play?

**Q:** I see. Like the Pied Piper?

**A:** Or maybe programmed decoy, due to FRV?

**Q:** What is FRV?

**A:** Frequency Resonance Vibration.

**Q:** Is there any danger to {Andromeda} and {Atriedes} with these kids and church people they have been around the past few weeks?

**A:** What do you think?!? It is a vulnerable age for anyone, much more so for the children of one on path to super consciousness, and in contact with those who provide advice and data...

**Q:** Well, this church group makes me very uneasy. What can I say to them to make them understand how very vulnerable I am through them?

**A:** Tell them the truth as you would tell others, of more mature stature.

**Q:** Any other advice where they are concerned? This whole situation absolutely gives me the willies.

{The tape stopped recording for some reason at this point. I asked about the missing tapes and they indicated that they WERE taken by some person who had been in my house with the idea to use them to harm me in some way. The C's would not tell me who, saying that this would lead me off in a futile and harmful direction. Then, they pointed out that I should be always aware of keeping the tapes very secure from now on. Next, I asked about the missing program and was told that this was done from "outside" also, though not by human agent. And then they gave a rather lengthy closing statement about pursuing the search in the Canaries... to learn every single detail of the history of this place... }

END OF SESSION

## 5.17 May 31, 1997

Frank, Laura, Alice.

**Q:** Now, I have a couple of questions for Ark, first of all, and then will get on to my questions. The first question is...

**A:** You did not ask: “Hello.”

**Q:** I’m sorry! Hello!

**A:** In a bit of a rush, are we?

**Q:** And who do we have with us this evening?

**A:** Zollanah.

**Q:** And where are you transmitting from?

**A:** Cassiopaea.

**Q:** Okay, I am not so much in a rush as I want to fit as much in as I can. First question: You say that EM is interwoven with gravity. Santilli says that EM and gravity are the same. But, then there is light. Light is EM radiation. If so, then how is it that gravity, which is interwoven with EM, travels faster than EM, that is: supercedes light speed?

**A:** Gravity does not “travel.”

**Q:** Well, when you say that gravity ‘supercedes’ light speed, what exactly do you mean?

**A:** Gravity is equally located in all realms at once, in space/time.

**Q:** Now, the possible answer is that gravity travels as a phase, while light travels as a ‘bunch’ of waves. Is this the correct understanding?

**A:** The gravity wave is merely a “ripple” in the omnipresent fabric; the base energy facilitator.

**Q:** What is a fabric base facilitator?

**A:** Gravity is the fabric, and energy facilitator as well.

**Q:** If gravity is the fabric, base and facilitator, what is being facilitated?

**A:** You read it wrong. It is base, as in “basic” energy facilitator.

**Q:** How does gravity facilitate... (A) What does it facilitate?

**A:** We have told you before that gravity is the foundational force of absolutely everything!!! This means at all density levels, all dimensions... It is the “stuff” of all existence. Without it, nothing would exist. Your thoughts are based in gravity, too!!

**Q:** Okay, you said that light is the energy expression of gravity. How does light manifest at 7th density?

**A:** Light is seventh density.

**Q:** Well, so light is 7th density. And you said that light is the energy expression of gravity. And you said that gravity is God. So, does this also mean that light is gravity?

**A:** No.

**Q:** Okay, what is the distinction between gravity and light?

**A:** What is the distinction between concrete and cement?

**Q:** Well, I am not entirely sure. I think cement is a concentrated stuff and that concrete has sand and rocks and so forth mixed with it to make it work better. And it has water mixed with it. How does light manifest on 6th density? Can you give me a relationship?

**A:** Vague.

**Q:** Well, I know it’s vague! You say that light is 7th density. You say that gravity is God, and God and 7th density are the same, and...

**A:** No. 7th density is “union with the One.”

**Q:** What is the distinction between union with the One and God?

**A:** Only at 7th density is God unified.

**Q:** When God ‘disunifies,’ or ‘destabilizes,’ or ‘dispersed,’ where, and I know ‘where’ is not the right term, what density is then manifested?

**A:** Wrong concept totally.

**Q:** What is the RIGHT concept?

**A:** Well, first of all, God does not destabilize or disperse, for that matter. Purge the linear inner concept.

**Q:** Okay, I am purging. All just simply is. At 7th density there is union with the One. At 6th density there is... what? An equal balance of dark and light, or being and non-being, is that correct?

**A:** Pure consciousness no need to physicalise.

**Q:** And, I think that there are the 3 ethereal densities, and the 3 material densities, and the middle density, the variable physical/ethereal density...

**A:** Close.

**Q:** And these densities are only distinguishable by virtue of the nearness to union with the One, is that correct?

**A:** Nearness?

**Q:** Well, you know I don’t mean it in a that sense... Help me out here!

**A:** No, you are doing just fine.

**Q:** Now, I am seeing it sort of like the perpendicular reality image. The circle in the center, and the outraying perpendicular realities which go out and out and out, and eventually come back to the center, because the gravity in the center brings them back. Something happens in a concentric circle sort of way, or in the

idea of the shells of an atom sort of way, that distinguishes shells, or states of being, in relation to this center and these perpendicular realities. What is the level of shells, the realm levels, what is the relationship between the perpendicular reality and its moving outward that distinguishes it at certain relational points from the center itself? I understand that it is consciousness, but we are also dealing with non-being. Being and non-being. What is the relationship of these perpendicular realities to the seven realms of existence?

**A:** Not essentially correct. Perpendicular reality is knowledge/awareness/being matrix. Realms are merely experiential divisions based upon consciousness energy directors.

**Q:** What are consciousness energy directors?

**A:** Compare yourself to your backyard denizen. How do each of you view calculus?

**Q:** Well, I don't know exactly what calculus is, but I know it is important. I never thought I was able to learn such things, so I didn't try. But, I think it is important, and someday I will know something about it. I am sure that the dog would not only think it is not useful, he would not even be aware of it. How does that relate to consciousness energy directors?

**A:** All in nature seeks balance. One day, so to speak, "Percy" will indeed have an opinion of calculus.

**Q:** Okay, so consciousness energy directors are like a horizontal reality in relation to the perpendicular ones?

**A:** Slots, my dear, slots.

**Q:** Are these slots comparable to the appearing and disappearing of electrons in the shells of an atom?

**A:** Not the point. You are still trying to use 3rd density awareness

to measure the reality parameters of all other density levels... Talk about your square peg and your round hole! Tell Arkadiusz to trust in gravity waves to be merely his pathway to higher understanding, not the means to an end.

**Q:** Now you have mentioned these ‘slots.’ What are these slots, and how does one move from one slot to another?

**A:** Picture this: you have 7 sizes of marbles. You have 7 widths of slots. Where do the marbles “fit in.”

**Q:** Do the marbles represent units of consciousness?

**A:** Close. Or, divisions of consciousness level energy resonance profiles.

**Q:** Do these divisions of consciousness grow and change?

**A:** Yes.

**Q:** And they grow and change through acquiring knowledge, is that correct?

**A:** Basically.

**Q:** And acquiring knowledge is akin to acquiring energy? Or light? Light energy?

**A:** Not exactly. That would be like saying that “filling up” at the gas station is akin to acquiring speed.

**Q:** So, knowledge and light are like the gas for the car, but speed comes from utilization?

**A:** Yes.

**Q:** And utilization means...

**A:** Knowledge application which generates energy, which, in turn, generates light.

**Q:** So, when one of these marbles is in a slot, does it fill up with gas which then enables it to move to another slot?

**A:** What!?!

**Q:** Well, I'm using your analogy!

**A:** No, you are mixing analogies!

**Q:** Let me back up then, and regroup. We have marbles in slots...

**A:** What causes the marbles to go into the slots? Gas?!??

**Q:** Okay. Where do they get the gas from?

**A:** That was an entirely different analogy, used only as a retort to an erroneous assumption, nothing more!

**Q:** Let me back up again. Marbles in slots. What are the slots?

**A:** An analogy to depict realms for you.

**Q:** Do the marbles move from one slot to another?

**A:** When, and only when, they have acquired the proper fit.

**Q:** Oh. How do they acquire the proper fit?

**A:** How do you?

**Q:** I guess you grow?

**A:** Okay.

**Q:** Let me change gears because I am getting in so deep that I don't even know which way to go just now. My brain is having trouble coping. Ark wants to know if the 1925-27 theory is better than the later attempts?

**A:** Better in the sense of less political corruption. Coping is only necessary when one is not open.

**Q:** Well, I am open, but I have to sit down and type it out and think about it to know where to go with it...

**A:** And what happens when you do this?

**Q:** Well, I absorb it. And then it leads to other questions. Is that okay?

**A:** Okay.

**Q:** Here is this purported letter from a Carlos Allende to Dr. Jessup. Now, whether Carlos was a real person or not, what I want to know is if the information is somewhat accurate? Is it a reliable source of information?

**A:** Is that not obvious?

**Q:** I thought it was. He said that Einstein did computations on cycles of human civilization and progress, compared to the growth of man's general character and development, and that this horrified him. Now, this is the very thing you suggested I do to find clues. And, I am doing it. It says here that Einstein was doing the same thing. Is this correct?

**A:** Yes.

**Q:** What horrified him?

**A:** The discovery of variability of physicality, and all that that implies, when one knows all that Einstein knew up to that point.

**Q:** So, 4th density blew him away!

**A:** And the other density levels. One begins with the premise that the material realm is the "whole shooting match," discovers it is not, must rethink everything.

**Q:** So, it hit Einstein like a ton of bricks. Change gears: Ark has been having a problem sleeping at night and staying awake in

the office. The building is a number 9, but there is also the Max Planck Institute across the street. Is it the number 9, or the Max Planck Institute across the street?

**A:** Well, we vote for Max!

**Q:** So, what are they doing over there in that building that is affecting him?

**A:** Better question: What are “they” doing on 4th density that is affecting him?

**Q:** Since that is a better question, what ARE they doing on 4th density that is affecting Ark?

**A:** Guess.

**Q:** Is he being abducted from this building?

**A:** No.

**Q:** Are they STS or STO?

**A:** STS.

**Q:** Are they zapping him with some kind of frequency modulation?

**A:** Close.

**Q:** Why is it more effective in that building than in the basement or at his hotel?

**A:** Because of Max.

**Q:** Okay, they are using whatever is going on in that building to zap Ark. Anything else they are doing there?

**A:** Yes.

**Q:** Could you tell me what?

A: No.

Q: Is there anything else they are doing to Ark?

A: Yes.

Q: Can you tell me?

A: Body chemistry alteration.

Q: In what sense is there body chemistry alteration going on?

A: Brain wave factors.

Q: Is there something he can do for protection?

A: He soon will leave the area.

Q: Well, during the time he is there, how much damage can they do?

A: Probably not much.

Q: Is there any other step he can take other than going to the library or staying in his hotel?

A: Good idea!

Q: Anything else?

A: One shot of whiskey per day will help.

Q: Well, that is a bizarre thing to say! A shot of whiskey?! That will help his brain chemistry?

A: Some.

Q: What is this altering of his brain chemistry designed to do?

A: Befuddle.

Q: Well, I think it is working. Any other suggestion? Come on, we are you in the past! Help us out here!

**A:** Then you will know in the “future.”

**Q:** Well, then, since I know in the future, why don't I tell me in the past anything else that will help besides staying in the hotel, or the basement, and drinking a shot of whiskey a day?

**A:** No need.

**Q:** And you are not going to tell us what they are doing over there in the Max Planck Institute?

**A:** As Carlos Allende would say: “If you knew, you would die of shock.”

**Q:** That is NOT friendly! I don't want to know things that are not friendly. Now, you have got me so startled that I don't even know if the path I am following in researching the history and the other things is even worthwhile or useful.

**A:** Oh, you bet it is!!!!

**Q:** Is the historical research going to gradually bring me to this knowledge that would cause me to now ‘die of shock?’

**A:** Maybe.

**Q:** In the information I now have on the Canaries, I found that a strange icon appeared on the island long before the conquest, long before any missionaries or Europeans arrived. The natives were the big, blond types. They said that they knew this icon was divine because following its appearance, there were processions of angels, or divine beings, up and down the beach where it appeared, lights, smells, chanting and singing and so forth. How did the statue of the Virgin of Candelaria arrive on the beach at Tenerife?

**A:** Teleportation.

**Q:** Who teleported it there?

A: The “Celts.”

Q: Celts in the sense of the Druids?

A: Or in the sense of Atlanteans.

Q: Now, you said before that Atlanteans were not Celts, is that correct?

A: No.

Q: The Atlanteans were Celts?

A: “Celts, Druids,” etc... are merely latter day designations.

Q: Let’s back up here. You said that the Celts came from Kantek. They were transported by the Lizzies... brought here, correct?

A: Yes.

Q: When the Lizzies did this, how many Celts were physically brought here?

A: Hundreds of millions.

Q: How long, in our terms, did it take to bring these Celts to this planet? Or, is this ongoing?

A: Well, in the sense that you measure it, let us say about a week.

Q: Did they transport them in ships, that is some sort of structure. That is, did they load them up, move them into 4th density, reemerge here in 3rd density, or something like that?

A: Close.

Q: And they unloaded them in the area of the Caucasus, is that correct?

A: And regions surrounding.

Q: And, that was what, 79 to 80 thousand years ago?

**A:** Over 80,000.

**Q:** As I understand it, Atlantis was already quite a developed civilization at that time, is that correct?

**A:** Yes, but regions change with waves of immigration, or conquest... witness your own lands.

**Q:** You also said once that there was a nuclear war in India and that this was what was being discussed in the Vedas when it talks about the 'blue-skinned' people who weren't really blue because they were Celts, and they were flying in aircraft, and they were engaged in this war, etc. Who were the Celts at war with?

**A:** The Paranthas.

**Q:** Now, wait a minute! Who are the Paranthas?! Do we have a new player here?

**A:** Not new.

**Q:** Do we know them by another name?

**A:** Choose.

**Q:** The Atlanteans? Were the Celts of India at war with the Atlanteans in the Atlantic?

**A:** Atlantis was merely a home base of an advanced civilisation of 3 races of humans occupying different sections of a huge Island empire, which, in itself, underwent 3 incarnations over a 100,000 year period as you would measure it.

**Q:** The 3 races were the Celts... and who were the second and third?

**A:** Or Kantekkians.

**Q:** Are the Kantekkians different from the Celts?

**A:** Only in the sense of long term racial and genetic blending.

**Q:** So, Atlantis had the Kantekkians and who else?

**A:** Race you would call “Native Americans,” and a third, no longer existing race, somewhat resembling Australian or Guinean aborigines, only lighter in complexion.

**Q:** Was this third group destroyed by the other two?

**A:** One of the 3 cataclysms.

**Q:** Paranthas. Who were the Paranthas?

**A:** Nation of race mentioned above.

**Q:** So, the Paranthas were the antecedents of the Abos of Australia?

**A:** Yes, and compare to now existing peoples of India, Pakistan, Sri Lanka, Australia, and New Guinea for similarities, bearing in mind genetic mixing and dilution.

**Q:** Were the Vedas written by the Paranthas or written by the Celts?

**A:** Descendants of Parantha, as per “Divine guidance.”

**Q:** That explains a LOT. I was just thinking about it the other day. If these people in India are related to the Celts, as philologists would have us believe due to language roots, there is no way I can understand this because they are simply NOTHING like them in any way. ... Okay, I think that you said that this nuclear war happened something like 50,000 years ago. We have taken care of a couple of points; we have 3 races on Atlantis, Celts all over the place... did the Celts conquer the Atlanteans?

**A:** No.

**Q:** Did they just move in and hang out?

**A:** They took over the Northern section.

**Q:** At the same time, there were Celts in the Caucasus, along the Baltic, in Ireland, England and Europe...

**A:** Ireland, England, etc. was later.

**Q:** But there were in the Norse lands, as Sweden, Norway and Denmark, they were along the Baltic, and they were in the Caucasus?

**A:** Some above mentioned areas were ice covered.

**Q:** When the philologists track the language roots, they arrive at the Kurgan region, north and west of the Caucasus. Is that where the Celts went when Atlantis was destroyed?

**A:** Close.

**Q:** Were the Celts the tall blonds known as the ‘Sons of Anak,’ who ruled over the Sumerians as described by Sitchen?

**A:** “Celts” are what remains of the original prototype.

**Q:** Okay. Kantekkians. When did...

**A:** Gravity differences account for the height difference

**Q:** When did the Kantekkians, or Celts or whatever arrive on the Canary Islands?

**A:** 12,000 years ago.

**Q:** Did they arrive there from Atlantis directly?

**A:** Close.

**Q:** Where from?

**A:** Confused by trauma.

**Q:** What does that mean?

**A:** Guess.

**Q:** Did they come from underground?

**A:** Some.

**Q:** Were they part of the underground race?

**A:** No Laura. What “trauma” do you think we are referring to??

**Q:** The comet cluster? The Flood of Noah?

**A:** Close enough.

**Q:** When did the Celts or Kantekkians first take up residence in the British Isles?

**A:** Same. 12,000 years ago.

**Q:** Were the Picts also Celts?

**A:** No, Atlantean. Remember, “Celt” is latter day moniker.

**Q:** Were the Picts Kantekkians?

**A:** Originally.

**Q:** Was Abraham a Kantekkian? Was the story of Abraham the story of the Kantekkians being brought to Earth?

**A:** No.

**Q:** Was Abraham a Kantekkian or a derivation?

**A:** Latter. But, so are you.

**Q:** Were the Jews that were genetically engineered and then planted in the Middle East... what year was this?

**A:** 130,000 years ago.

**Q:** Good grief! Have they managed to retain any racial purity for that long?

**A:** No.

**Q:** Cayce talks about the division in Atlantis between the “Sons of One” and the “Sons of Belial.” Was this a racial division or a philosophical/ religious division?

**A:** It was the latter two, and before that, the former one.

**Q:** When it was a racial division, which group was it?

**A:** The Sons of Belial were the Kantekkians.

**Q:** Well! That is not good!

**A:** Subjective... you are not bodies, you are souls.

**Q:** You said that there is a group with whom you have been in contact since they were on Kantek. Is this group the Druids?

**A:** No. We will not as of yet identify.

**Q:** Well, I came to the conclusion that the Rosicrucians are just the new incarnation of the Druids. I mean, the Druids disappeared and the Rosicrucians appeared not too long afterward.

**A:** Partially.

**Q:** Julius Caesar had a standard policy of religious toleration. The only exception seems to have been the Druids. He was determined to stamp them out. Why?

**A:** Their mysterious powers.

**Q:** Where did they get these mysterious powers?

**A:** Knowledge passed down.

**Q:** Were the ‘angelic beings’ that appeared on the Canaries Druids or Rosicrucians?

**A:** They were 4th density.

**Q:** Were they STS or STO?

**A:** Both.

**Q:** Do the STS and STO hang out together?

**A:** Do you hang out with all types of your realm?

**Q:** Well, in these processions of beings that the Guanches of the island saw, were they STS or STO?

**A:** Both.

**Q:** You mean they would see one and then another?

**A:** Close.

**Q:** Okay, something that has been bothering me: the Celtic/Kantekkian propensity for head hunting. There are several explanations offered for this, but none of them really makes sense to me. It is almost like a genetic thing for them to cut off heads of their enemies and heroes...

**A:** Why do you clasp hands?

**Q:** When you meet someone?

**A:** No. We mean in prayer.

**Q:** Oh, my! You mean they cut off heads to accrue negative energy to themselves? Power?

**A:** Foundationally.

**Q:** So, it is really kind of like that show on television: "The Highlander." Is that what you mean?

**A:** Research for answer. And, on that note...

**Q:** But I have more questions! I'm not done yet!

**A:** Good Night...

END OF SESSION

## 5.18 June 7, 1997

Frank, Laura, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have this evening?

**A:** Uthurrah.

**Q:** And where do you transmit from?

**A:** Cassiopaea.

**Q:** Okay, I have a whole lot of questions, but is there anything you would like to address before I get started?

**A:** Better to just ask away.

**Q:** Alright. I want to clear up some quick ones before I get into the more complicated subjects. Left from last week: We talked about the statue of the Virgin of Candelaria, and the mode of its appearance. But, I want to know what year it arrived on the Canaries?

**A:** No year was measured then.

**Q:** Well, I know the Guanches did not, but related to the Spaniards who arrived later and who learned about it, when was it?

**A:** Maybe 1198 would be good.

**Q:** Now, I notice that the Celtic name for the town of St. Albans is Verulamium, and that is where Henry Percy, son of Hotspur,

was killed in battle. I also notice that Sir Francis Bacon was Lord Verulam, and he was thought to be not only a Rosicrucian, but also the author of the Shakespearean plays, as well as some of the Rosicrucian manifestos...

**A:** Check out Alton Towers, for clues.

**Q:** Okay, I will do that. Thank you. Okay. Now, there is a thing called the GONG project on Tenerife. My feeling is that it is a mask for something else.

**A:** Close.

**Q:** What, precisely, is the GONG project doing?

**A:** Magnetic frequency. Measurements for possible future use.

**Q:** Future use for what purpose?

**A:** Discovery. Oh, you are so “brilliant.”

**Q:** Is brilliant the code word for the discovery here?

**A:** You will see.

**Q:** You guys are so funny! Next: Is there any relation between the dietary restrictions of the Jews and the instructions for animal sacrifice on the alter as delivered in the book of Leviticus, and the present day cattle mutilations and possible use of humans for food?

**A:** Disconnected variables.

**Q:** Okay, let's back up: is there any relationship between the instructions for animal sacrifice and the cattle mutes?

**A:** Only in the general sense of enzyme actions upon leukocytes.

**Q:** Does that mean that the instructions for preparation of sacrificial animals were designed to prepare them for alien ‘food?’

**A:** More for energy transfer.

**Q:** Do you mean energy transfer in the a) sense of the transfer of the energy of the animal through the sacrifice, or b) the transfer of the energy of the human performing the sacrifice into the animal, and then through the animal to the alien (and I am using the term alien in its broadest sense) ?

**A:** Why not both?

**Q:** The next thing is the dietary restrictions. Many cultures eat rabbits and pigs, in specific, those of Aryan extraction. The rabbit was sacred to Athena, and the Celts ate a LOT of pork. Yet, here these items are restricted from the diet of the Jews. Is there any relation between the diet as outlined here, and the Aryan genetic tendencies to conquest and domination?

**A:** Trichinosis used to be nonexistent in Aryan types... But, mixing of genetic factors eliminated this.

**Q:** So, the Jews were susceptible to trichonosis, and the Aryans were not?

**A:** Originally.

**Q:** So, it was necessary for the Jews not to eat the pork, but not for the Aryans, and the mixing caused susceptibility. In a general sense, are strong Aryan genetics indicative of the necessity for the consumption of meat?

**A:** In a sense, but pescadorial features substitute semi-adequately.

**Q:** Pescadorial. Semi-adequately. What needed to be added so that the substitution would be not just semi-adequate, but totally adequate?

**A:** Iron/protein levels.

**Q:** So, it is the iron that the Celts need? Well, that brings me to the next question: In all the Celtic folklore when they talk about ‘fairies,’ which are obviously other density beings very similar to our modern ‘Gray alien,’ these fairy/slash aliens insist that no iron come near them in any way. It was also said that bringing iron into contact with someone thought to be a ‘changeling’ would prove whether or not they were because if they were, they would disappear instantly. Also, the instructions for the building of the Temple of Solomon included restrictions on the use of iron in either the preparation of the materials or the putting together of the building itself, even down to the rejection of the use of iron nails in any part. What is the significance of this restriction on the use of iron by these other density beings, whoever they are?

**A:** Bloodline trails.

**Q:** Are you saying that... I don’t understand... not even well enough to frame another question...

**A:** You will, my dear, oh will you!

**Q:** If it was necessary for the Aryans to have iron... okay, maybe the iron is something that interacts...

**A:** What about iron as an element?

**Q:** Okay, let’s see: {consults dictionary} Iron â€“derived from early Celt ‘iserno,’ via Illyrian ‘eisarno’ from the IndoEuropean base ‘eis,’ which means to ‘move vigorously; strong, holy.’ It is a white, malleable, ductile, metallic chemical element that can be readily magnetized, rusts rapidly in moist or salty air, and is vital to plant and animal life; it is the most common and important of all metals, and its alloys, as steel, are extensively used. Symbol: Fe; atomic weight:55.847; atomic number: 26; specific gravity: 7.86; melting point: 1535 degrees Centigrade; boiling point 3,000 degrees C. The electron shells are thus: 2,14,8,2. Iron is an ele-

ment of blood, hemoglobin, and is easily magnetized... there is some new work about iron and magnetite in the brains of people who are psychic or have ‘abduction’ experiences... is it the magnetism?

**A:** Yes....

**Q:** Is it something that holds one more firmly in 3rd density, and the elimination of it enables one to switch densities... or..

**A:** Tis magnetite that acts as a conduit, and perhaps, just perhaps, allows for transference back and forth at will?!? And what about the legend about the alchemists? Is not the key term there really transformation?!? And has not the “smoke screen” really been delivered so effectively by all the concentration upon the substance?!? And does not this remind one indeed of all the misguided concentration upon substance rather than meaning that one finds so regularly on 3rd density??

**Q:** I get it! So, it is the magnetite in the body, that collects and holds the charge, and it has absolutely nothing to do with an external substance at all! Is that it?

**A:** You are getting “warmer.”

**Q:** Am I right, we need more iron for magnetite, or am I completely off base here?

**A:** You are right, but, do not underestimate the significance of that just delivered! What better deception than to divert the meaning of alchemy, by focusing upon substance, then addicting those souls bound to 3rd density to the substance?

**Q:** Okay, it is the magnetite that acts as a conduit. And the concentration is upon the substance, that is, the magnetite. Let me conjecture that the thing that is believed to be distilled out of the alchemical operations is magnetite, is that correct?

**A:** No, because no need, if not deceived by other efforts.

**Q:** Were these other efforts involved with sexual function?

**A:** More like the results of same.

**Q:** Okay, they were concentrating on...

**A:** Today's version of the deception could be your favorite and mine, "monoatomic gold."

**Q:** Oh, the David Hudson fiasco...

**A:** There too, one is lead astray by substance... Remember our little dissertation about all the really big bangs?

**Q:** Yes.... I remember... and I got a lot of flack from that... The three days of darkness, et cetera... the implications... let's back up...

**A:** Oh my, oh my, we can turn this powder into gold!! And if you eat enough of it, you will have orgasms forever as a light being... Oh my, oh my!!

**Q:** Good point! Getting people addicted to the substance by these claims...

**A:** How addicted is Marti?

**Q:** Yes. She is the one who is really promoting the David Hudson thing...

**A:** Did she want to have orgasms in heaven, or what!?!?

**Q:** That's true! That was her idea of heaven - the Hindu lingam and yoni in perpetual motion! Is there something else on this now, or can we move on?

**A:** Up to you.

**Q:** Well, my night would not have been complete unless you said that! Now, Johan wanted to know the connection between himself and the group here?

**A:** Wait and see.

**Q:** Well, I can assure you that he would be very happy to hear something a little more verbose than that!! Is there going to be more interaction?

**A:** See last response.

**Q:** Well, is there anything you can SAY to Johan? Like acknowledge his existence?

**A:** Okay! Acknowledged! Now, wait and see!

**Q:** You guys are TOO MUCH! Next: Cayce remarked in one of his vague dissertations - and for those who accuse the C's of being vague, they ought to read Cayce, since he was a MASTER of vague! He could talk for pages and say NOTHING! - anyway he said that there were a lot of Atlanteans incarnating between the years 1909 and 1930. He described them as having strong minds and emotions as well as an 'engorgement' of carnal influences, self-indulgence and high technical ability. He also warned that there was the possibility repeating the errors of the past. Now, these are the people who have set up the world as we have it today. My question is: are we facing a replay of the Atlantean situation, in karmic terms?

**A:** Well, these cycles do replay from an energy standpoint, but there is always the opportunity to learn and thusly, to advance. Was not his proclamation for those born between 1909 and 1930?? And, if so, what is the significance of when it was delivered, if the orientation was one of the "present" tense?

**Q:** So, it was possible that he was referring to the Hitler, WWII

situation.

**A:** Or just not referring to those of a later “date” because it was not germane? {Seems to be a deliberate misspelling of “germane”}

**Q:** Okay. Who are the ‘philosophers of Dancar?’

**A:** Philosophers who ride around in Dan’s car.

**Q:** That was a serious question! Where and what is Dancar?

**A:** Why do you suppose the response was light hearted?

**Q:** Well, come on! What is Dan’s car?

**A:** We ask you to define as best you can.

**Q:** A ‘car’ belonging to Dan. The subject was talked about in the 18th century.

**A:** Yes.

**Q:** To what place were they referring when they talked about Dancar?

**A:** British.

**Q:** Why would they call it Dancar?

**A:** Locator.

**Q:** There is no place called Dancar.

**A:** No?

**Q:** Supposedly, Christian Rosencruetz was initiated by the ‘philosophers of Dancar.’ I want to know where this blasted place is! Okay, skip it. One of the Rosicrucian manifestos said: ‘God has sent messengers and signs in the heavens, namely the new stars in Serpentarius and Cygnus, to show that a great

council of the elect is to take place.’ What do they mean by a ‘great council of the elect?’

**A:** Pyrenees.

**Q:** Okay, the purported enclave of the alchemists... Why was it signified by new stars in Serpentarius and Cygnus? What do they represent?

**A:** Novae.

**Q:** Okay, what is the role of Nitric Oxide in the human body?

**A:** Incomplete request.

**Q:** Okay, in the neurological system?

**A:** Opens up the pleasure center.

**Q:** Are you talking about the amygdala?

**A:** Maybe.

**Q:** The neocortex?

**A:** No.

**Q:** The reptilian brain?

**A:** Maybe.

**Q:** Okay, the family name you gave me for the immediate past life in Germany was ‘Gerspringer.’ {or Springer} I have been searching through the genealogies, and am wondering if the ‘ger’ here was not a prefix sort of like ‘von?’

**A:** Prefixes are added and dropped at will in monikers.

**Q:** So, I might be looking for ‘Springer,’ in fact, rather than ‘ger’ or ‘von’ Springer? What was the nationality of Gerhard?

**A:** Deutschlender.

**Q:** In a previous session where you introduced the concept of perpendicular realities, you stated that (T) was connected to a particular reality called 'Neormm.' You also designated the 'thought center' of STS as Ormethion. I noticed the similarity of the names. Is there a relationship?

**A:** The orm is close to orimulsion. Look it up.

**Q:** Well, what I am asking is about the possible relationship between Neormm and Ormethion...

**A:** Our answers have meaning best not to presuppose!

**Q:** Alright. That reminds me. There are a lot of people teaching that there are divisions of being as spirit, soul, consciousness, et cetera. What is the difference between the spirit and the soul?

**A:** Semantics.

**Q:** In reading the Celtic legends, I discovered that Cassiopaea was equated with Danu, or Don, as in Tuatha de Danaan, or the court of the goddess Danu. So, in other words, the supreme goddess of the Aryans was Cassiopaea. And, Cassiopaea is found in the zodiacal area of Aries, the 'lamb,' where Cephus the 'rock' and 'king' is also found, as well as Perseus, 'he who breaks' and serpentarius. {Just noticed that the previous question about the supernova in Serpentarius could be a reference to the supernova in Cassiopeia by this grouping method.} The image is of Perseus overcoming the serpent, and the ancient Celtic engravings of the horned god show him gripping two serpents by the throat. I would like to understand the symbology here...

**A:** You are on the right track.

**Q:** What is the symbology of the 'breaking of rocks,' as in the alchemical texts, as well as related to Perseus as 'he who breaks?'

**A:** Occurs at a time when rocks break, as in the electromagnetic

impulses that emanate from earthbound rocks when sheared by tectonic forces, and much more importantly, the possible utilization of said forces whether naturally or otherwise induced.

**Q:** Before we take our break, can you say any more about this ubiquitous ‘she’ of the Celts, Cassiopaea, and the relationship to the Aryans?

**A:** Better continue your search, as this is how you learn and build power!

**Q:** When you said I needed to find a ‘superhypnotist’ to break the locks on the knowledge placed in my superconsciousness, and then you suggested a ‘spin’ doctor, and now Ark’s actions while I was sleeping brought out some of the keys to large pieces of the puzzle and the connections, am I on the right track when I think that the actions we are taking in searching out these pieces of the puzzle, putting them together, and the amazing discoveries that have taken place as we go along, is the action of the ‘breaking’ of these locks?

**A:** Likely.

[ Break ]

**Q:** Okay, now that we have read the letter from Colin Andrews, I would like to say that I had a very funny feeling about this as I was going to sleep last night. Is there anything you can tell me about this. I know I am asking for something that you are not gonna tell me!

**A:** Expect to see Andrews in your house, if that is your pursuit, in “future.”

**Q:** Well, is there going to be any chance of checking out any crop circles in person?

**A:** If you wish, but not necessary, and may hinder purpose.

**Q:** Okay, I will drop it. No crop circles for me!

**A:** If you want to, then by all means, do it! But, let not your focus be exclusive.

**Q:** Alright. I need to work on the transcripts and editing and so forth.

**A:** We meant that if you travel to Angle Terra, open your eyes, ears, and mind.

**Q:** Today, the exchange was as follows: Ark wrote: C's once said that EM was an expression of gravitational energy. I said: they said that light is an energy expression of gravity, that EM was the same as gravity, or, more precisely, intertwined. And, this would incline me to believe that the total spectrum of EM is the 'stuff' of the 'balloon,' that is the balance to the 'non-balloon,' of gravity, being that which emerges out of non-being, and that the various separations of EM into waves such as light, radio, and other frequencies are energy expressions. In other words, EM IS the unstable gravity wave, so to speak. Was this correct?

**A:** Close.

**Q:** Is ethereal existence the 'non-balloon.'

**A:** Closer.

**Q:** And EM is intertwined. That is, EM is 'being' and ethereal existence is non-being?

**A:** No. EM is being and ethereal existence is thinking...

**Q:** Absolute non-being is the origin of gravity. It emerges out of the absoluteness of non-being, and what emerges out of gravity is EM?

**A:** Where did you get this "absoluteness of non-being?"

**Q:** Well, non-being that is so ‘non’ that is is NON!

**A:** That is ALL, maybe?

**Q:** I guess so.

**A:** Is non really nano?

**Q:** I don’t know. Is that a clue?

**A:** ?

**Q:** Well, then I said: If the varieties of waves of the EM spectrum are unstable gravity waves, then they could be added together which could arrive at some total factor of electromagnetism, which then, if reversed, would express the existence of gravity?

**A:** On the right track, or “rail” as in “railgun.”

**Q:** Well, I can’t go any further with that because I know nothing about railguns, not even what they are. Now, let me read this text:

“I have recently come into possession of a paper on magneto-gravitics and field resonance systems, presented by A.C. Holt from NASA Johnson Space Center to the American Institute of Aeronautics and Astronautics’ 16th Joint Propulsion Conference, June 30-July 2, 1980. Holt presents a project using an already existing system known as the Coherent Field and Energy Resonance System (CoFERS) [probably located at Los Alamos Labs’ High Magnetic Field Research Laboratory]. CoFERS utilizes a toroidal-shaped energy guide with megagauss magnetic field sources located along radius vectors equally spaced around the toroid. CoFERS is shaped like a thick flying disc. Holt goes on to say:”By conveying an object’s normal space-time energy pattern to an energy pattern which differs substantially from the normal pattern, the gravitational forces acting on the object are changed. The object’s new pattern interacts with the

surrounding space-time and virtual energy patterns, such that the interactive forces are substantially altered. The alteration of the characteristics of the continuous field of force results in the apparent motion of the object *through space-time.*” [...]

“Since the gravitational forces acting on the propulsion system can be quickly altered to achieve the desired motion, the *spacecraft* can make right-angle turns at very-high velocities without adversely affecting the crew or system elements. The effective gravitational field the *spacecraft/ aircraft* experiences can be nearly simultaneously reoriented at a 90-degree angle, resulting in a smooth continuous motion as far as the occupants are concerned.” [ ... ]

“The gravimagnetic system is perhaps best suited for use in and around ... a large mass such as the Earth.”

“While the gravimagnetic system is likely to be the first field-dependent propulsion system developed, the field resonance system will **bring stellar and galactic travel out of the realm of science fiction.** The field resonance system artificially generates an energy pattern which precisely matches or resonates with a virtual pattern associated with a distant space-time point. According to the model, if a fundamental or precise resonance is established, (using hydromagnetic wave fine-tuning techniques), the spacecraft will be very strongly and equally repelled by surrounding virtual patterns. At the same time, through the virtual many-dimensional structure of space-time, a very strong attraction with the virtual pattern of a distant space-time point will exist. ...this combination of very strong forces will result in the translocation of the spacecraft from its initial position through the many-dimensional virtual structure to the distant space-time point. [ ... ]

“A space-time ‘jump’ already appears to be supported by astro-

physical research.”

Having read this text, my thought is that it is very similar to what I was talking about earlier today, and which was explicated by Karl von Eckertshausen in regards to the ‘violin allegory.’ That is, that a violin string tuned to a particular pitch, if plucked, will cause the identical string on another violin across the room tuned to the same pitch to sound also. However, it seems that what they are doing here is setting up a ‘pitch’ in this object which actually exists somewhere else. And, by creating this resonance, it ‘becomes’ or disappears from this point in space/time where its resonance is no longer appropriate, and reappears at the point in space/time where the ‘tuned resonance’ actually exists. It is both virtual and real. The question is: Is this text on the right track, and am I understanding it correctly?

**A:** Propulsion system for 3rd and 4th density Alien spacecraft.

**Q:** That is the propulsion system?

**A:** Very close, yes.

**Q:** Is my understanding close to correct?

**A:** Well, that is a clever anecdotal parallel as it matches conceptually, which is really the point, isn’t it?

**Q:** The point? Are you saying that the anecdote is more to the point than what this paper is saying?

**A:** In terms of consciousness, which is why everything exists ultimately, and with gravity as the “glue” that holds all on physical and ethereal planes together!

**Q:** Is the object to ‘dematerialize’ or is the object to transpose something that is material to some other point in space/time? I mean, when you collapse the gravity wave, is it necessarily that

the object or person ‘dematerializes’ or ‘disappears’ from this point...

**A:** Break the veil of “time,” and dematerialization is no longer necessary, because one enters the realm of pure consciousness, where the illusion of physicality serves no longer, a purpose.

**Q:** Is it an issue for one to be able to retain internal coherence if one is no longer in a physical state?

**A:** Internal coherence can only be guaranteed in a purely non-physical “state.” And this state is really only a state of mind, anyway!!

**Q:** If one were to travel in this manner, would it not be a temptation to not return to the physical reality?

**A:** If one goes bowling, is it a temptation to not return to the parking lot?

**Q:** I guess if your only choice was the parking lot, I guess you would want to stay, but if going to the parking lot meant getting in your car and going home, then no. Now, glue. The thing is that one has to ‘unglue’ oneself? Is that the point?

**A:** No.

**Q:** Well, if gravity is what holds material and ethereal existence together, and you are going from material into ethereal states...

**A:** By your definition, you would be unglued, since you perceive the physical, and thus are not completely stuck.

**Q:** So, you still have the ability to perceive the physical reality and the physical world when you are traveling this way, therefore you are not completely ‘stuck.’ However, we have talked about people who do get completely ‘stuck,’ is this correct?

**A:** Close.

**Q:** Ark did some reading on the Einstein thing, the letters to Kaluza, and there did not seem to be anything that E did in the period mentioned that would make one tend to think that there was a UFT from him in that time. But, Kaluza DID have an interesting idea about a 5 dimensional cylinder UFT which Einstein thought was quite startling. Yet, it seems that Einstein somewhat delayed Kaluza's presentation. What struck me was the word 'cylinder' which reminded me of the earlier session where I asked if the Germans had developed a time machine and you said 'yes,' and that it was in Antarctica, and that 'they' were 'exploring the loop of the cylinder.' You said that the loop of the cylinder was a 4th thru 6th density profile. Could you give me some elaboration on this cylinder, the loop of the cylinder, and whether it was Kaluza who did the UFT and not Einstein?

**A:** Cylinder is really a double loop, is it not? And meditate if you will on the true meaning of this!

**Q:** Is it true that Kaluza had the theory and Einstein didn't?

**A:** Maybe it is that Einstein first hypothesized, and others were then commissioned for the purpose of completion in order to lead to application.

**Q:** Ark says: When I asked the question 'how many dimensions has the real world,' the C's answer was 'the correct question is how many worlds has the true dimension.' And they never answered if the Kaluza Klein ideas are right or wrong. And, I wrote a book on that kind of geometry. We need to know it. It is essential for progress.'

**A:** If one needs to find a house, is it not necessary to know the path to get there?

**Q:** So, what's your point?

**A:** See Ark's question and declaration for the point!

**Q:** Oh, so that is it. Ark writes: “Gravity is a bond of everything. In mathematics there is a concept of a connection that translates as ‘cohesion.’ Connection is the fundamental of Eddington’s 1920 UFT, and later the UFT of Einstein and Schrodinger is based exclusively on this mathematical object, ‘connection.’ The idea of the connection is simple: it allows for the connecting of distant things. It allows us to keep track of the direction while traveling from one point to another point. Could you comment on the Einstein-Schrodinger theory?”

**A:** Need more specific demand.

**Q:** I don’t know how to ask it. Is this mathematical idea of ‘connection’ the same as the mathematical expression of gravity?

**A:** It does not quite fit, because of a failure in the formula which involved a simple juxtaposition of characters, thus easily overlooked in final result.

**Q:** Well, I can’t even ask the next question on this because I don’t know what we are talking about. In my limited understanding of the 7 density levels, 3 and 3 with the blending density in the middle, is there a relationship between 1 and 7, 2 and 6, 3 and 5 in terms of balancing in some sense?

**A:** Nature presents polarization, because of the balance of cyclical balance evident.

**Q:** Can I try to make some conjectures and maybe understand this better? Let’s start with the relationship between 1st and 7th... if 7th is where the light emanates from, and 1st is where it congeals as matter, then...

**A:** You are drifting a bit. There need not be a relationship when all is relative.

**Q:** That is what Ark said, essentially, I think. Okay. There are two

more things I want to cover tonight. The first is my map here of Tenerife. See the map? {Points to map on table.} What does it make you think of? After all this time of discussing the Canaries, I have this detailed map here. And, apparently somewhere along here is where the statue was found. Here is the cave where it was kept. And along here the processions...

**A:** It?? How about they? And, we feel you might now be best served by researching a “modern day” connection for these things, such as UFOs, Roswell, and the underground zones, and what purpose they serve.

**Q:** Okay. Leave off the Canary Islands. But, one more little thing here... This is the inscription on the statue of the Virgin of Candelaria. Can you offer any suggestions for decoding this?

**A:** Try the “3/5 principle”... Let your search be joyous as always... We must depart for now, Good Night.

END OF SESSION

## 5.19 June 14, 1997

Frank, Laura, Alice.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Nimommarah.

**Q:** And where do transmit from?

**A:** Cassiopaea.

**Q:** Ark says: Please ask: “last time the C’s made a remark about ‘juxtaposition’ and ‘failure in the formula.’ Can they let me know which formula, and can they let me know through a code that will precisely address my knowledge and experience.” Okay, which formula did you mean?

**A:** Formula revealed by obvious juxtaposition, when one observes again using knowledge recently gained and compares with that known then!

**Q:** Are you talking about the juxtaposition of Einstein to Kaluza?

**A:** Learning is accomplished through discovery.

**Q:** Anything else you can give that will address Ark’s knowledge and experience, concerning the failure in the formula?

**A:** The failure is deceptively simple... “Old makes new again.” Equilateral versus hypotenuse.

**Q:** Anything else?

**A:** See what comes of this.

**Q:** Did something unusual happen to C\*\*\* and I when we were riding back from North Carolina and the window in the car exploded?

**A:** Was the window exploding not unusual?

**Q:** Well, of course it was. But, what I am trying to get at is, was this evidence of some activity of which we were unconscious at the time?

**A:** How does that which you have learned about electromagnetism tell you what you seek?

**Q:** It tells me that there was, undoubtedly, a breaking of the realm curtain, and that something unusual did take place. But, at the

time, you said that I should talk to C\*\*\* and she remembered a number of unusual incidents from her childhood. Could you comment on your remark of the time that she would make some extraordinary discoveries by probing?

A: Have her probe.

Q: Well, we talked about it, she probed...

A: Have her do the probing, please!

Q: (C\*\*\*) [via telephone] Something happened at that time, out of the ordinary. Were we taken out of the time sequence?

A: How do you define “time sequence?”

Q: (C\*\*\*) A time sequence is how we have agreed to define a measurement of time on this earth. A consecutive order of events that we call time...

A: Not true!

Q: (C\*\*\*) Then, did some event occur that we are unaware of in our conscious mind?

A: What do you think?

Q: (C\*\*\*) At the time she didn't think about it at all, but now she doesn't know.

A: You mean to say that you actually have no opinion?!?

Q: (C\*\*\*) [speaking to Frank...]

A: Not so!

Q: (Frank) They answered you before you finished saying that you have no opinion. Before you say anything, stop and think. Do you really have no opinion? You are being challenged on that. (C\*\*\*) I find it hard to believe ...

**A:** Who are “they?”

**Q:** (C\*\*\*) I find it hard to believe because I do not know what the purpose would be... what they would want us for... I don’t know...

**A:** Really?

**Q:** (C\*\*\*) I read some of the transcripts about good guys and bad guys, and there are a lot of different players, and you don’t know which are involved, if any.

**A:** But what do you feel?

**Q:** (C\*\*\*) I don’t feel afraid. I want to know if there is a plan that I am involved in with Laura...

**A:** Again, what do your instincts tell you? You have always been one who was powerfully in touch with your feelings, your insights and your sense of “right and wrong.”

**Q:** (C\*\*\*) I have noticed that when Laura and I discuss a subject, we both seem to grasp ideas more quickly...

**A:** And...

**Q:** (C\*\*\*) And that seems like a valuable thing.

**A:** But we are drifting away from the matter at hand. We ask you again to please reveal your deeply held feelings with regard to the question of that which caused the window to explode. What do you think it was?

**Q:** (C\*\*\*) Originally I thought it was malfunction of the window defroster which I had just turned on. Since that time, and since I have read some of the transcripts, I am open to considering the fact that there could have been another cause.

**A:** So, what other cause could there have been?

**Q:** (C\*\*\*) I guess I would... suppose we could have been taken out of our time sequence, given a task to perform, given information, been encoded in some way, been directed in some way, and then returned.

**A:** My, my! That is quite a lot to ponder. But, is that what your instincts tell you? Please reveal your inner thoughts, as you almost did earlier. You see, C\*\*\*, we can help you to be able to discover amazing truths about the vast continuum of all creation, which is actually locked up within your own mind, if only we can first get on the right “track.”

**Q:** (C\*\*\*) I feel that it WAS significant, if nothing other than to get our attention.

**A:** Interesting... Now then... what amazing progress can be made when one merely expresses themselves!! You see, by simply stating your feelings, you have opened the door to the mosaic reality. Others have taken considerably longer to get to that point.

**Q:** (C\*\*\*) By mosaic reality I assume that you are saying there are many levels to this situation?

**A:** Yes, but to every situation!

**Q:** (C\*\*\*) When Laura and I discuss a situation together, we seem to create and reach new pathways that may take either one of us longer to reach on our own. I feel this comes from many lifetimes of working together.

**A:** Whoa... Wait a minute, C\*\*\*! One at a time, as you have expressed three profound thought patterns there. First, why do you suppose you and Laura are able to reach conclusions so much better “as a team,” rather than separately?

**Q:** (C\*\*\*) That isn’t exactly what I said, and that isn’t exactly what I meant. I meant that we are better able to do this as... we seem to

lead each other into new thought patterns... perhaps our thinking complements each other. Let me think another minute. I haven't thought so hard in a while...

**A:** Thinking is not so “hard” as you “think!”

**Q:** (C\*\*\*) Why are we able to reach conclusions? Do you think of us as a team?

**A:** We ask you.

**Q:** (Laura) It seems to have something to do with WHY we can reach conclusions as a team...

**A:** Cat got your tongue?

**Q:** (C\*\*\*) I had never considered why we thought well together...

**A:** When was “never?”

**Q:** (Laura) If you think about it now, it's as good as ever. (C\*\*\*) Boy, Laura, what do you think? (Laura) You are asking me?

**A:** Boy, C\*\*\*, what do YOU “think.”

**Q:** (Frank) That's the second time they have put ‘think’ in quotes. (C\*\*\*) I am questioning assumptions that I had taken for granted.

**A:** Then you must be “thinking otherwise.” Just let it flow, my dear, there will not be grades given out after this session!

**Q:** (C\*\*\*) Why do I think that Laura and I reach conclusions better together. Because I get excited about things when I am talking to her, and my mind seems to leap ahead, and I sense the same thing happening with her.

**A:** But, why is that?

**Q:** (Laura) They aren't gonna let her go! (Frank) We have all been through the same wringer... especially Laura! (C\*\*\*) Because we

have similar interests and backgrounds in areas of our study...

**A:** Oh, my dear C\*\*\*, you make it sound so elementary, my dear C\*\*\*, elementary!

**Q:** (Laura) What?! (Frank) So, it's more complicated than that?

**A:** More complicated? Yes. And simpler, too!

**Q:** (Laura) Okay, hold everything, earlier C\*\*\* and I were talking on the phone about mythological figures possibly representing group souls. That is, on our level of 3rd density, groups of individuals who are separated by flesh, might be extensions of group souls at a higher level...

**A:** Who does Zeus represent?

**Q:** (Laura) Zeus. (Frank) The father of the gods?

**A:** And the implication is...?

**Q:** (Laura) Who are the gods that he is the father is... (Frank) C\*\*\* is glad that you are in the hot seat... (Laura) Implications? That is too much for me right now!

**A:** No.

**Q:** (Laura) Yes it is! It requires thinking! The implication of Zeus representing... does Zeus represent 7th density?

**A:** Or does Zeus represent the grasping for 7th density?

**Q:** (Laura) Are we saying grasping in ways that are not suitable?

**A:** No grasping is "not suitable."

**Q:** (Laura) Okay. Are we all pieces of ... are there groups and groups and groups that are pieces of a larger whole, or larger wholes, and they can only graduate when they assemble?

**A:** More to the point would be that that makes the progress speed up for most of those involved in such a process.

**Q:** (Laura) Is it necessary to interact with other souls that are resonating...

**A:** Laura, give C\*\*\* a chance to absorb and respond with her two cents. After all, it is her “nickel.”

**Q:** (C\*\*\*) Are Laura and I part of a group soul or group entity?

**A:** What do you think?

**Q:** (C\*\*\*) Yes.

**A:** And...

**Q:** (C\*\*\*) I think that we are part of a group soul... whatever that means, we have a purpose; I think we have a similar interest, and that is to discover the truth. And it is also to advance ourselves.

**A:** And...

**Q:** (C\*\*\*) When one group advances, then it filters down to others...

**A:** How does it “filter down?”

**Q:** (C\*\*\*) Because I believe that all are connected.

**A:** How so?

**Q:** (Laura) I get it! The Zeus thing. The whole Zeus thing, the bearing of children, the moving out in all these various ways, manifestations or patterns as defined by the ‘children’ through all the various levels, so that it eventually all comes back around to 7th density.

**A:** And what does it mean when it “comes back around?”

**Q:** (Laura) Union with the One. And it all just keeps going around and around.

**A:** And C\*\*\* says...

**Q:** (C\*\*\*) You mean, what happens when we all get back to 7th density?

**A:** We mean what do you think?

**Q:** (C\*\*\*) If we are patterned after the myths of Zeus, and we have gone forth, and there are lots of scatterings of fragments upon the earth having many experiences, and as we grow and advance, we come to the truth and the full meaning, we merge back together again with all of the wisdom of all of these experiences.

**A:** Yes, but is not just the “Earth.”

**Q:** (C\*\*\*) That’s why I say we go into another level...

**A:** But, C\*\*\*, what of those not on the Earth?

**Q:** (C\*\*\*) They are in the same process.

**A:** Yes.

**Q:** (C\*\*\*) Do they have different myths?

**A:** They have different everything... But, in the final analysis, it is really just the same!

**Q:** (C\*\*\*) Then I would say that when everyone graduates from their finite, physical existences, then they occupy the same space at a different vibration, and go onto other lessons and experiences and advances that I cannot conceive of at the moment.

**A:** But what is “the moment?”

**Q:** (C\*\*\*) The moment? I haven’t thought that far ahead yet!

**A:** Or have you, but you simply do not perceive it as such?

**Q:** (C\*\*\*) Probably so. How many people are in this particular group that Laura and I are in, for the purpose of this work?

**A:** Up to you to discover.

**Q:** (C\*\*\*) Well, I thought I'd give it a shot! (Laura) Does it have anything to do with the three dominos, the three slices of pizza, the three dominos missing from the set?

**A:** Not really, but we do understand that Dominos does make good pizza!

**Q:** (Laura) Why do you keep referring to the pizzas. Is there something in Italy? [pause] You aren't going to answer me, are you?

**A:** No.

**Q:** (Laura) Well, I wasn't being facetious!

**A:** But we were! Mirth!

**Q:** (C\*\*\*) Happy to be of service! (Laura) Yes! We are going crazy down here trying to figure all this out and you guys are just joking around up there on 6th density!

**A:** No need to "go crazy."

**Q:** (C\*\*\*) Did the window explode just to get our attention?

**A:** What about the mosaic?

**Q:** (Laura) Are you saying that she needs to start gathering the pieces and putting the mosaic together?

**A:** Close. Or memorize concept and actualize.

**Q:** (Laura) Okay, opening the door to the mosaic, memorizing that concept, and actualizing. Okay, the tape is almost gone. Any further comment before we say good night?

**A:** Suggest you expand your study of the Canaries to include any possible connections to the “Roswell Incident.”

**Q:** (C\*\*\*) Thinking is electrical. Does a person leave an electrical echo and can certain combinations produce harmony which is cumulative and exponential, thereby certain group’s thinking can produce more than others, or individually?

**A:** Close. Now, for C\*\*\*. Suggestion: Combine frequencies to witness the development of a directed wave effect; packs a potent “punch.”

**Q:** (C\*\*\*) And is this related to the group of seven? Seven pieces of pizza?

**A:** Certainly! See what letting it flow does, C\*\*\*?

**Q:** [Question as to whether dominos is an acronym for anything]

**A:** Could be... And if so, be on the lookout for others.

**Q:** (C\*\*\*) Can we make good pizza?

**A:** If you use the right ingredients.

**Q:** (C\*\*\*) What does that mean?

**A:** Recipes.

**Q:** (Laura) In closing, what to do about the Marcie issue. Is she crazy enough to be dangerous?

**A:** Dangerous ones best avoided. Knowledge protects.

END OF SESSION

## **5.20 June 21, 1997**

Frank, Laura, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Himmani.

**Q:** And where do you transmit from?

**A:** Cassiopaea is where we transmit through.

**Q:** I'm sorry. Through, not from. {A little OCD about it, are we?} Okay, well I guess you know that you have been named as a correspondent in a divorce trial! I guess that is one claim to fame that was never expected!

**A:** Divorce is a concept long since conquered here, as you would measure time, that is.

**Q:** I was just teasing you! Now, let me get Ark's questions first so that I am sure that they get done tonight. It seems that SJB has suddenly become willing to finance Crop Circle research after hearing a guy on the Art Bell show say that one was a 'power plant' for a UFO.

**A:** Really?!? Then we suggest he write back and demand in writing that there be no "strings" attached, and gauge the response accordingly.

**Q:** Okay. Sounds like the right thing to do. If they are sincere, they will accept such a condition. If they are not, then they won't. Next: I would like for you to diagnose the notebook that is giving him a LOT of trouble...

**A:** Diagnosis is not necessary... New notebook is.

**Q:** I guess that means that the problem is so serious that it would be futile to try and fix it. Okay, next question. We have received

an acknowledgement of the interest in the “chair” position of the physics department over at UCF. Now, I know that this is more of an administrative position, and not precisely what Ark is looking for, so I was wondering if we should pursue this in some more focused way? Is it desirable, and if so, what additional things could we do to enhance the possible opening of the right place for him?

**A:** Of course it is desirable... Did we not suggest this as one avenue? Now, contact an immigration attorney, and if first one responds lamely, contact another... Make your clout known.

**Q:** What do you mean by clout? I have no ‘clout!’

**A:** Clout is cranial.

**Q:** Am I supposed to do this or is Ark?

**A:** Both. If you make the right moves, you will be eminently successful. But be careful not to stumble due to lapses into mental laziness and/or impulsiveness.

**Q:** You mean patient perseverance?

**A:** And thorough.

**Q:** Okay. I think that helps. We will take care of it and see where it goes. Now, I was trying to relate the Canaries to Roswell, and noted the funny numbers of lines of latitude. I really didn’t WANT to read any more about this subject, but I dug out all the stuff sent to me by Stan Friedman. And, while I was reading, I was looking at the map and locating the various sites mentioned by him. It seems that the actual ‘crash’ did not take place AT Roswell. It was nearer to Corona. And, near Corona is a place called ‘Socorro,’ and there is a Socorro on the Canaries, also, which is almost exactly where this statue of the Virgin was found. C\*\*\*\* and I looked it up and it means ‘succor.’ The inscription

on the painting of the Magdalene that is in the church at Rennes le Chateau talks about the ‘tears of the virgin’ washing away sin and is a plea for ‘succor.’ And this painting is modeled on the painting of St. Anthony, the hermit, who is shown being tempted by creatures that can only be described as ‘aliens.’ Now, there is also a Magdalena, a St. Anthony, and even a Pearce on the map near this crash site. And when I drew little lines connecting them all, they enclosed this plain of San Augustin....

**A:** And who was Saint Augustine/San Augustin... Augustus, Augustine Monks, etc?

**Q:** Oh! Well, I never thought about that! I was going after St. Anthony and the Magdalene... St. Augustine was one of the early church ‘fathers’ who wrote a lot of things that became established church doctrine in general.

**A:** Or established early church “whitewash.” What was “Corona?” Who was “Ranier?” Also, interesting that you should be contacted by Valerian... Has he ever explored Ranier?

**Q:** Well, I don’t think it is particularly interesting since I sent my little essay on genetics to several people and he was one of them. I don’t think there is anything useful or interesting there at all. He is on a completely different wavelength, I think.

**A:** Strong minds stimulate discoveries when energies can be merged, and egos can be left “at the door...” Albeit temporarily.

**Q:** Okay. I will try to leave my ego out of it and share, but I don’t think it was important...

**A:** Yes it was!

**Q:** Change of subject: I am tracking the clues through the various languages and alphabets. I would like to know which of these alphabets, Runic, Greek, or Etruscan, preceded the others, and

from which the others are derived?

**A:** Etruscan.

**Q:** Well, who were the Etruscans?

**A:** Templar carriers.

**Q:** What does that mean?

**A:** Seek and ye shall find.

**Q:** Well, how am I supposed to do that? I can't find anything else on the Etruscans!

**A:** No.

**Q:** What do you mean 'no?' You mean there is more out there on the Etruscans?

**A:** Yes.

**Q:** Okay. What are Templar carriers?

**A:** Penitent Avian Lords.

**Q:** What does that mean?

**A:** For your search. All is drawn from some more ancient form.

**Q:** Okay, let's leave that for now. I was digging into the Sanskrit alphabet and found that it says that it was essentially 'invented' by the great Hindu grammarian, Panani, which means that it may simply be arbitrary. And, for some reason, digging into it further does not seem to interest me...

**A:** Because you have not yet connected these dots.

**Q:** Oh, so it will be part of the picture eventually. Well, okay. We will deal with it when it comes up. Next: I notice that Sargon the Great is sort of an unknown person in historical terms. He is the

first great 'Akkadian' king of Sumeria, but no one knows exactly where the term 'Akkadian' came from nor where 'Akkad' even was. Who was this Sargon?

**A:** Deep level punctuator.

**Q:** What?!? What does THAT mean?

**A:** What does it imply?

**Q:** Well, punctuation is a way of dealing with language, grammar...

**A:** Beginning or end.

**Q:** You guys are making me completely crazy! I will never figure all of this out!

**A:** All is within your grasp.

**Q:** Well, I think that a HUGE key is in the tracking of the languages...

**A:** The roots of all languages are identical...

**Q:** What do you mean?

**A:** Your origin.

**Q:** You mean Atlantis?

**A:** Is that your origin?

**Q:** You mean Orion?

**A:** Interesting the word root similarity, yes?

**Q:** Well, the word root similarities of a LOT of things are VERY interesting! It is AMAZING the things I have discovered by tracking word roots...

**A:** The architects of your languages left clues aplenty. And, you have the rare opportunity to learn far more of this by being taught to speak and understand other languages. WE suggest you work to penetrate the STS implanted resistance in this area.

**Q:** One thing I do want to understand, since it is involved in all of this, is the idea of the ‘Shepherd.’ All of the ancient legends and stories and myths lead, ultimately, to something about the ‘shepherd,’ or the ‘Shepherd King.’

**A:** Shepherd is most likely to be struck by lightning, due to staff, and thus “enlightened,” or “illumined!!”

**Q:** Funny spelling! But, what is the contrast between the concept of the shepherd and the agriculturalist? This goes back to the very roots of everything? There is Cain and Abel, Jacob and Esau, Isaac and Ishmael...

**A:** Are not you “abel” to figure this out?

**Q:** Well, I have some ideas about it, but some of them seem so bizarre! For example: the first letter of the Greek alphabet is alpha, which has the ‘a’ sound, and the first letter of the Elder Futhark is a rune with an ‘f’ sound. However, they both claim to represent ‘cattle,’ or ‘movable’ goods...

**A:** Have you not learned to explore your ideas without prejudice?

**Q:** Yes, to a great extent. But every once in a while I get really stuck because some of the things that are emerging from this are so incredible that I just get stopped and need a kick to get over the block... C\*\*\* and I have talked about creating a database for the ancient things and putting together some clear plastic overlays on which we are going to chart the key elements and try to put a ‘body’ together, so to speak... We want to see what repeats over and over, and how it repeats...

**A:** Good!

**Q:** Well, we want to do it, but I don't know how we are going to do it at a distance... hopefully she will get her computer...

**A:** Watch for C\*\*\* to soon be “bugged” by “hauntings.”

**Q:** What kind of hauntings? Does it have to do with her increasing awareness? That she is going to blow open the veil and there will be EM bursts?

**A:** Maybe, but the Carolina mountains are unforgiving to those lonely and faint of heart!

**Q:** Why is that?

**A:** It is complicated, but the root is naturally magnetic influences, which in turn lead to mining activities by those of EBE STS 4th density nature, in turn leading to the development of those proverbial underground passages, and/or bases.

**A:** Well, I'm not gonna tell her THAT! Lama Singh told her that this place was a former home of hers during Atlantean times and that is why they bought it and built their house there. He said that the North Carolina mountains are a part of old Atlantis. It was a dream of theirs to retire there!

**A:** By now, you must have discovered that Singh was not always “singing the right tune.”

**Q:** Well, yes. He is very good, but a lot of missing pieces and vagueness there. I know this from my own readings from him. Did that property or anything about being in the mountains have anything to do with the development of Tommy's cancer?

**A:** If so, only in an offhand way.

**Q:** Considering that C\*\*\* just told me that he would have probably lost his arm had he lived, that is an interesting way of putting

it. I would like to be able to tell her something, but I just don't think I can. She is still too vulnerable right now.

**A:** Correct. Watch developments and advise post-development. C\*\*\* is skeptical of our existence. But then again, Arkadiusz once held deeply cloaked reservations of a similar nature, and now look at him... And by the way, this is still in process... See now what happens to C\*\*\*!!

**Q:** Well, I should admit that I have also held my own reservations... and may still. But, there are just some things that are so obscure that there is no way possible, even with all our reading and experience, that either of us could have all of this stuffed away in our subconscious minds. And the predictions and 'inside' information are beyond amazing. I guess that you guys are working at about 100% on the accuracy rating, allowing for translational latitude and prejudice in OUR minds! So, I have fewer reservations than before. Additionally, you seem to be able to predict the actions of others with incredible insight, time after time... And, while on this, any more predictions just now?

**A:** Not needed... yet...

**Q:** (A) I want to ask why I broke my shoulder back in 1979?

**A:** Alice, my dear, we have been patient with all of you. But we think the "time" has now arrived to move beyond using this conduit as a forum for personal STS oriented inquiry. We are talking about matters of importance to the realm of all of creation in its entirety. With all due respect, love and guidance, creation will survive the various vagaries of your shoulder!

**Q:** (L) Frank and I spent quite a while explaining how such things can be symbols of spiritual position and attitude. Were we on the right track in our advising on this?

**A:** Close.

**Q:** I do have a simple question for her. Is the keeping of notes an exercise that will open certain channels of her mind, that she is currently unable to see?

**A:** Yes, slowly.

**Q:** So, it is a matter of perseverance and faith that she will be enabled to see more as time goes on?

**A:** Yes.

**Q:** Back in 1995 when we did a session with Roxanne present, I was re-reading this yesterday because Ark is in Dijon where this guy Moshe is, and the night of that session was when I had the vision of his face, and also when I mentioned the dream where I was getting married and this was so bizarre an idea to me at that time. Roxanne was focused on her agenda about female gods and the Elohim, and it seems that she simply shut off any ability for you to communicate to her at all. So, in re-reading this session, it seems that you were talking on a completely different level, to me alone, and that it was almost in code. She wanted to talk about the French Revolution, and you were talking about my past life in Germany... and now Ark is in France... and there was the vision... and that was when you brought up Moshe... and Moshe is in France... is there a connection?

**A:** Maybe.

**Q:** Am I correct that you were talking to me on a level that I was not even aware of at the time?

**A:** Could be!

**Q:** Can you help me out here? I would like to know about this Moshe thing. You not only brought up the name, but you brought up a lot of other things. And it seems that this was the opening of a door of moving me in a certain direction. I don't even know

how to ask about this because it is so strange...

**A:** Then it should be shelved.

**Q:** Is this one of those things you are going to avoid?

**A:** Alfalfa fields in Rhineland yield as of yet undreamed of treasures.

**Q:** Where are these alfalfa fields?

**A:** Near tracks well worn.

**Q:** Another clue, please?

**A:** Nope, that is enough for now!!

**Q:** You guys are gonna drive me crazy! Do you mean Rhineland as in Germany proper?

**A:** We do not mean Rhineland, Wisconsin... Or do we?!? Who is to tell?

**Q:** Who?

**A:** The searcher, the sepulcher, the one who carries the staff in constant search for greener pastures.

**Q:** Oh my! You are being VERY obscure tonight! Just the fun things I like, too! Now, I think I will be pretty busy this week on this, but is there anything that can be expanded, or any additional clues for me or Ark?

**A:** Last clue for tonight: Look for the vibratory frequency light. Good Night.

**Q:** Good Night.

END OF SESSION

## 5.21 June 28, 1997

Frank, Laura, Alice (Laura's mother)

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wixxom.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Alright. I guess you have been listening to our discussion about Mr. {William} Mann. Now, he may be perfectly okay, and we are just discussing it. But, I did send a copy of last week's transcript to Val {Valerian AKA John Grace}, and a nice little note with it, because he was mentioned... and I sent also the note telling him that I had made an error by not emphasizing the spiritual aspect of the DNA alterations... and so on. But, there has been nothing but a resounding silence. We have heard nothing.

**A:** In this case, the silence is noteworthy. In the case of Valerian, it is those with which he is directly acquainted and/or associated that is of greatest importance!

**Q:** Do you want to give another clue on that?

**A:** He is interesting, but those with whom he is acquainted and associated are even more interesting!!

**Q:** Well, I had the feeling, at one point, that Val was upset because I told him that I thought that the writings of the so-called Michael Telemachus were his own writings - which, of course, I meant as a compliment - but I think he was shaken that I could see through

him.

**A:** Egos are a problem, yes, but suggest we not throw the infant out with the suds.

**Q:** Okay. Well, I won't. But, he is completely turned off to us...

**A:** Then turn him back on! The information in his sphere of influence is of "blockbuster" like significance. We suspect an intellectual intercourse of the kind to which you have become accustomed with some of these beings would boost your knowledge/awareness base atomically!

**Q:** Well, I have done all I could when I could. I think that his problem is that he knows that we have access to information that makes it hard for him to stay concealed. When he read the session which identified the source of the KRLD document and evaluated its accuracy, both of which were correct, he was upset because his secrets were no longer secrets. He doesn't like it because we know.

**A:** How do you know that this is what happened?

**Q:** Because, I had phone conversations with him. He was all defensive on the subject of the KRLD papers... I had a very strong impression that he was disturbed and his ego was offended; he had too many secrets. He didn't like the fact that you could see through his secrets. This concerned him!

**A:** "Concern" then can easily be turned to "intrigue" with a tad of nurturing.

**Q:** Well. I will work on it. But, I can't just bug the guy. If he is not interested, he is NOT interested!

**A:** Who says it would be "bugging" him. Suggest something simple and non-judgmental like: Dear Val, here are some passages delivered from the Cassiopaeans during one of our sessions. Just

wanted to hear what you and/or others you are acquainted with think. Regards, Lark. That outta get the ball “rolling.”

**Q:** Okay. Back to Mr. Mann. He says that he has found, through applications of “mystery” teachings, and certain personal enlightenments, as well as the application of sacred geometry principles, the exact location on earth where one can transcend space and time, as he puts it. Is there such a place?

**A:** There are “points” where this process is facilitated more easily, but it is the process which is most key, not the locator. It has to do with magnetic field meridian conjunctions.

**Q:** Okay, he suggested that I look at Pouisson’s painting ‘Winter,’ for clues.

**A:** Yes, go see the painting mentioned. There are strong connections between this and both the Denver International Airport Murals, and the suggestions we gave you for your inground pool design!

**Q:** Well, he described it as a figure of Noah clinging to a horse between two pillars. Other than the alchemical symbols I have discovered through etymology and philology, for the horse, what other implications does this figure suggest?

**A:** Maybe it is something about either the notation of the “knight,” or the gas nebula in Orion. By the way, Laura, have you contemplated the life of your father and what led him to his drug addiction and destruction? Hmmmm? Big clues to be found there?? And, if so, what? What indeed!!

**Q:** What are you talking about?! Does this have anything to do with the ‘arm problem’ as described in the Matrix material, his arm, my arm, Tommy’s arm, Mother’s arm?

**A:** Quest, my dear, quest! Clues, as you know by now, make learn-

ing an explosively significant experience!

**Q:** Okay. Mann says: “May I suggest that you check out the story of the killing of Dagobert II, the last of the Merovingian kings. He died after being pierced through the eye, hence the etymological name, one of the keys of Solomon: ‘Perc(e)y(e). Notice the hidden fifth element, the letter ‘e.’” He is saying that Percy is represented in another context, by Dagobert, the Merovingian king, or vice versa. Is Percy an allegory for “pierced eye?”

**A:** If one so chooses.

**Q:** Well, that is ambiguous! But, I have found MANY altogether different meanings that lead back to far more ancient secrets than this silly chasing after an earthly monarch. In one sense, it means horse, or is an allegory of an altogether different sort, relating to the Persian origin of certain gnostic teachings.

**A:** Then you have answered the question.

**Q:** What are the origins of the “keys of Solomon?”

**A:** Did we neglect to cover “keys?”

**Q:** No, we talked about keys, but I want to get specific here.

**A:** Did you not do a root search? Keys of Solomon. Keys of Enoch. Florida Keys. So many keys! And why, by the way, is there a “Key” bank?

**Q:** I don’t know! Are you going to give me a clue?

**A:** Is that not what we just did?

**Q:** So, it is another part of the disinformation program of the Consortium/Beast complex to distract and mislead. Okay. Now, I have found this strange connection with Springe, Germany, near Bielefeld, and the strange crop circle that appeared with the buried plates; connected to the actual location of the “Roswell,”

UFO crash, the plains of San Augustin, the Order of Preachers, Mary Magdalene, Tenerife, and the Virgin of Candelaria. Is this all related as I am thinking?

**A:** But of course! But, you are not yet finished. Wait until you get to the point where you can begin to connect what you have learned from all the various clues!

**Q:** My interpretation of the difference between the Shepherd and the Agriculturalist, the essential conflict of Cain and Abel, is that the Shepherd feeds others, and operates within the natural cycles. He partakes with acceptance and without attempts to control nature. The agriculturalist, on the other hand, seeks to control and extract every last bit of energy from wherever he is operating, and manipulates the environment, usually to its detriment. It is an unnatural cycle. This is the essence of STS vs. STO. Is this the concept I am looking for?

**A:** Partially. And what kind of ranch did Mac Brazel live on?

**Q:** Well, a sheep ranch. So, that is another connection to Roswell. And, even the name 'Brazel,' is curious. This whole event is an allegory. Getting back to the Shepherd, some of the clues have led me to the 23rd psalm... comment?

**A:** But of course!

**Q:** Okay. Now, I have an idea that the allegory of the Grail is that it is related to the "head." The head is composed of a core group of seven, which then creates the body via exponential increase in knowledge and energy. Is this correct as far as it goes?

**A:** Semi.

**Q:** Did Prince Henry Sinclair come to the New World? {As claimed by William Mann.}

**A:** Maybe those who suggest as much are confusing matters of the soul with matters of the flesh.

**Q:** So, it, too, is an allegory. Are there living representatives of the Merovingian dynasty?

**A:** Why not?

**Q:** Well, they claim that they are the direct descendants of Christ through Mary Magdalene. But, getting back to the subject of Percy and knight. Through Gaelic we relate Percy to Perch, to March, to horse, to Mer, to sea, to “Mary,” and then knight goes back again to juga and yogi, which then comes forward to Jadczyk, and all of them relate to genetics. And then we come back to the issue of my father, as a Knight, and my own ancestors, Henry Percy and Elizabeth Mortimer. The Mortimers were the Earls of March, and the carriers of the only extant line of the Welsh kings. So, back to my father. Realizing of course, that he was a fraternal twin, he had black hair and brown eyes, and his brother was red haired and blue eyed, which makes for an unusual situation to start with. Was there something else unusual about his birth?

**A:** Yes.

**Q:** And what was this?

**A:** It was “conscripted.”

**Q:** Do you mean that one or the other of the twins was implanted?

**A:** Well, maybe you should research “conscript.”

**Q:** I will. Anything else?

**A:** His life was really unusual. Go ask Alice.

**Q:** Well, we know he was brilliant, but could not control his addictions. Like he had two personalities.

**A:** It goes so much, much deeper than that, Laura.

**Q:** Well, what could be the possible explanation for his reversals in behavior?

**A:** Examine!

**Q:** Okay. If the line of the Percys' comes through my mother, what are we looking for through the Knights? What came together here in my parents? It is beginning to look like something was 'engineered' for some definite purpose?

**A:** Yes. And we suggest you research this!

**Q:** I was only able to take the Knight line back to Abel Knight who came to America from York, in the mid 1600s. Is there some connection in York?

**A:** Further research is needed, and it is easier than you think.

**Q:** Okay, you also suggested that I research Alton Towers. I did. All I could find was that Alton Towers is, for God's sake, an amusement park! It is the DisneyWorld of England! What am I gonna find at Alton Towers?

**A:** Look into this.

**Q:** Well, alright. Now, what does my father's irrational behavior have to do with me?

**A:** !?!

**Q:** You said 'much, much deeper.' And 'why.' Why he had this problem. We are looking for 'why.'

**A:** Partly.

**Q:** Give me a clues! I have no idea. Is it something in the genetic line or something in him and his life? Does it have something to do with the genetic line?

**A:** possibly... or bloodline?

**Q:** Is bloodline something that is distinct or different from genetics or DNA?

**A:** Symbiotic relationship. Was there a military connection?

**Q:** Oh, you mean the fact that my father was a chemist and was in the Navy? Does this have anything to do with my 12 day disappearance when I was three?

**A:** Maybe?

**Q:** Was something done to him when he was in the Navy?

**A:** Hmmmmmmmmm? Now connect “Jack” with “Cecil.”

**Q:** Well, Cecil was the fellow who kidnapped me. And, when he was arrested, the Navy came and took him away saying he was “incompetent to stand trial” because he had “escaped from a Navy hospital.” And that essentially ended any hope of finding out where I was taken or why. I just don’t see. How does this relate to St. Augustine, the Canaries, to Oak Island - all of this? What are we doing here?

**A:** St. Albans.

**Q:** And there is more! My God! We aren’t happy with Mary Magdalene and St. Augustine, and St. Anthony! Now we also have St. Albans! Of course I know that it is the place where there was a battle and one of the Percy’s was killed there. It was also called Verulamian in the Celtic days, and Francis Bacon was Lord Verulam and some suspect that he was the son of Elizabeth I. But, there are only so many hours in the day, guys! I need some help here! I was hoping that I would be getting some help with the research...

**A:** Remain open to all, and look for others. But, suggest you “pick

their brains” more thoroughly before you offer up your own information, thus allowing for less troublesome emotionally oriented rapids crossing. Enough until next time!

END OF SESSION

## 5.22 July 5, 1997

Frank, Laura, Alice, Violette

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Woxsom.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Do you have any opening remarks before we get started?

**A:** “Shoot.”

**Q:** Violette wants to start with a couple of health related questions.

**A:** Go ahead, Violette.

**Q:** (V) I have been studying the nutrition books and have come to some conclusions. Can you tell me if I am on the right course here?

**A:** Yes.

**Q:** (Violette) Can you offer any more insight?

**A:** Iron bars. Not the metallic kind. Nutrition “bars” as in granola, for example.

**Q:** (Violette) In my dream last night I had a mouth full of nasty stuff and I was spitting it out. Am I correct in my understanding that I am getting rid of ugly stuff?

**A:** Guilt purges.

**Q:** (Violette) I’m getting rid of guilt?

**A:** Or attempting.

**Q:** (Laura) Anything else for Violette?

**A:** More energy?

**Q:** (Violette) I have felt low on energy. I have been very exhausted. Do you mean put more energy into clearing?

**A:** Then rearrange food intake schedule. In other words, “flip/flop.”

**Q:** (Violette) You mean to eat earlier in the day rather than later in the day?

**A:** Yes!

**Q:** (Violette) Was the acupuncture Laura did help me to sleep better?

**A:** The main function of acupuncture, if applied correctly, is to unblock energy pathways through the physical vehicle, albeit temporarily. Needs to be a uniform application. We suggest avoiding a “surgical approach,” as this may merely cause a transference of blockage.

**Q:** (Laura) What do you mean by ‘surgical approach?’

**A:** The pinpointing of particular nerve/energy intersectional points, as opposed to a general all around treatment profile. If one receives acupuncture, it should be a complete treatment, not localized only. We were not necessarily referring to your most recent treatment.

**Q:** (Laura) Did Terry do entire meridians on you? (Violette) I don't know. Are you talking about the last time Terry worked on me?

**A:** More than once.

**Q:** (Laura) We would like to know if Terry has had our best interests at heart when working on us? Considering the incident that occurred at Violette's?

**A:** "Agents wear many hats!"

**Q:** (Laura) Is that in quotes because we are supposed to figure that one out?

**A:** Good idea.

**Q:** (Laura) Well, after that one incident, I don't think we need to read the whole book! Has he done us harm?

**A:** Was on the agenda.

**Q:** (Laura) It was on the agenda to do us harm. (Alice) That's hard to believe!

**A:** But true!

**Q:** (Laura) Which brings me to the question. What are we going to do about Mother's manipulated emotional states that eventually, after a time, simply drive me over the brink of rationality? I don't like this!

**A:** Allow path to continue.

**Q:** (Laura) Is there any bit of advice that would help in this situation. She does not seem to hear a word I say.

**A:** Reading is a good teacher so long as the material is apropos.

**Q:** (Laura) Well, I have been giving her things to read... (Alice) Is there anything I can do to help my sleeping problem?

**A:** See last response.

**Q:** (Laura) If you are awake, read. When you get sleepy, go to sleep. (Alice) But then I get waked up. (Laura) Then read again! (Alice) Will it work?

**A:** Yes. Did you suggest that we would recommend something that would not? Skip the novels... now is the “time” for non-fiction.

**Q:** (Laura) Yesterday we heard from William Mann, and he asked about the Newman machine. Now, this is a very interesting device, Ark says after checking it out.

**A:** Newman machine is “time machine.”

**Q:** (Laura) Well, it seems that it could run my house for very little money!

**A:** But, there are forces that will, and do, block its use.

**Q:** (Laura) Okay, then we will do it privately and quietly.

**A:** How do you propose to do it “privately and quietly?”

**Q:** (Laura) Well, just install it and say nothing!

**A:** And you expect this to be under the table?

**Q:** (Laura) Are you discouraging us from any dabbling with the Newman machine?

**A:** Not discouraging, just giving you “the facts of life.”

**Q:** (Laura) This couple of weeks that Ark spent in Dijon were miserable. What was the fundamental reason for these conditions and this misery?

**A:** Near ELF transmitter. Also the water supply is loaded with fluoride.

**Q:** (Laura) Okay, I did some research on the Emerald Tablets and discovered...

**A:** Is this all you want to know about this? We suppose if we told you “Laura, a great big rock is about to fall on your head,” then you would say: “okay, now moving right along, about the Emerald tablets...”

**Q:** (Laura) Well, that was about Dijon. He is gone from Dijon now. Whatever it was in Gottingen, you said he would be gone soon and not to worry. So... he is no longer near the ELF transmitter... he is no longer drinking the water..

**A:** Fluoride is toxic, and deposits in fatty tissues, and lymph system. Aside from the obvious possible negative consequences, it can make one more susceptible to electromagnetic wave frequencies that are designed to make one open to mind alteration!

**Q:** (Laura) Okay. You have my undivided attention. How does he get the fluoride out of his system?

**A:** Recommend daily ingestion of Goldenseal root, as well as vinegar and garlic in moderation, along with up to an hour per every two days of light aerobic exercise.

**Q:** (Laura) Would half an hour per day be alright?

**A:** One hour every other day. Light at first.

**Q:** (Laura) Well, this sounds serious. Anything else that will help?

**A:** This is a good start.

**Q:** (Laura) Well, now I am all upset.

**A:** Arkadiusz, or as we like to call him, Arkady, is the primary target of your trio, for now. Great potential dangers lurk...

**Q:** (Laura) So this really is like the grail hunt. He has to go through a magic forest, chop heads off dragons, keep his eyes open and not be lead astray by deceptive images and tricks... the whole thing!

**A:** Where to get the influence for the inspiration behind that story?

**Q:** (Laura) Are you asking me?

**A:** Yes.

**Q:** (Laura) I don't know. What do you mean. Talk about confused thought patterns!

**A:** No, not so confusing.

**Q:** (Laura) Well, that leads to some of my other questions about what we are doing...

**A:** Imagine how much your cause would be damaged without him? Where would your ambition for the quest go? You must be extremely vigilant when it comes to him and his safety. He still does not completely fathom the depths of the situation. Until he is here, thus more protected, and it will not be easy to get him here, danger awaits the greeting of each new day. Vigilance! Vigilance! Vigilance!!!!

**Q:** (Laura) That is completely depressing. Help me out here!

**A:** Now... Calm down! No need for depression. Would you rather be left with a lack of knowledge, and in an ever increasing state of false security oriented oblivion, only to be struck by light-

ning?!? Of course not!!! So remember... Knowledge protects, ignorance endangers!!

**Q:** (Laura) Well, you said that it was going to be difficult to get him here. The arrangements have already been made. Are you saying difficult in a general sense, or is there going to be some major move made, some plan going on at other levels, or behind the scenes, to prevent him?

**A:** There always is that. Have you not seen the evidence already? Must be aware. Think of it as a war. Expect every possible move/or occurrence. Victory comes from being forewarned, and therefore, forearmed.

**Q:** (Laura) Is that, as Frank said, the key? To turn up the vigilance volume to maximum?

**A:** Always. Don't be like the sentry who fell into a peaceful, pleasure filled, dreamy sleep while on watch! He did not even feel the blade as it pierced his heart!

**Q:** (Laura) Well, that is NOT friendly. Now I really AM depressed! Tell me: is what we are doing so important that this kind of energy has to be concentrated on us?

**A:** Yes.

**Q:** (Laura) Can we quit?

**A:** No. Too late! Look at it this way: make it your goal to succeed, then you have not to fear.

**Q:** (Laura) Is there any connection between the dangers of Dijon, the dangers now, and the interaction with Moshe?

**A:** Connection? Not exactly, except that Arkadiusz must be made aware that dangers lurk everywhere, potentially. He has spent a lifetime building a strong sense of security, based upon his own

natural self assured state of being. But now is the “time” to learn that this is not enough.

**Q:** (Laura) Is there any specific danger in Florence that you can point out, or back in Wroclaw?

**A:** No specific dangers. Just remember: there are forces “out there” that wish to see your project, and you, fail. You two have both previously felt the sting of these forces acutely. He has not so much, until now.

**Q:** (Laura) I have the feeling that this has been a recurring drama in other lives, preparing us for this period?

**A:** Recurrences of this type are usually intermittent in nature.

**Q:** (Laura) Anything further on this?

**A:** We could go on and on. The point is: warn Arkadiusz! Knowledge protects...

**Q:** (Laura) Well, I certainly will. Could this William Mann be part of the attack forces?

**A:** Anyone and everyone could be. Remember, they work through persons, they are not normally the persons themselves.

**Q:** (Laura) Well, all my other questions have sort of become entirely insignificant. But, I will try to get a few in before the tape runs out. This William Mann has made some sort of connection to the ruins of a fort, or some megalithic type thing, related to the number 64 - though I had a rather different idea about the number 64 - but he thinks this all relates to a point where one can transcend space and time. Now, let me break it down. What is the ruin? The old fort?

**A:** Viking oriented.

**Q:** Can you tell me the approximate year when it was built?

**A:** 1102.

**Q:** Does it have any relationship to the Templars?

**A:** No.

**Q:** Does this relative he speaks of, who was supposed to be Grand Master of the Templars, is this related to the Templars WE are looking for, or is that the Templar organization that is part of the smokescreen?

**A:** The main energy here is moniker related.

**Q:** So, you mean they just formed a group and called themselves Templars?

**A:** Close.

**Q:** Can you clarify this?

**A:** Monikers are designed to deceive or divert those who are de-ceivable or divertable.

**Q:** Okay. I am not going to get into all of this, but I would like to know the significance of the Fisher King?

**A:** Do you mean of the person or of the designation?

**Q:** The designation, first.

**A:** The one who resides within a circular continuum.

**Q:** What about the significance of the person?

**A:** Transcendental.

**Q:** What is a circular continuum?

**A:** Trapped within the grasp of one's own significance, to the exclusion of the acquisition of a broader knowledge base and understanding.

**Q:** Another thing: I researched the word Emerald, and that it is derived from the word orient, which is Orion, and that they go back to words from which we also derive Aurora and gold. Is there something about the element gold, such as the atomic number, or anything, that is a specific frequency of light that is important?

**A:** Gold, when heated to its liquidation temperature, gives off energy waves which, when properly channeled, open the door to higher density experience. Clue to this is in the way that gold can be an effective transceiver of radio waves and transdimensional communications.

**Q:** Okay. In the original grail stories, St. Anthony was a later insertion to the scenario via Rennes le Chateau. The original hermit was St. Augustine. I find this to be strange, since Jesus was supposed to be born in the reign of Augustus, and many strange things have happened in the month of August to us...

**A:** Perseid. Connection? What is it?

**Q:** Are the Perseids part of the remains of Kantek?

**A:** Refer to data given re: comets, Oort Cloud, and twin/dark star phenomenon. Then interface with legend or legends.

**Q:** Okay. I will. Is there a significant relationship between the story of Achilles Heel, and Jacob, the Supplanter? Jacob means "he who seizes by the heel." And, Jacob obtained the birthright by deception. That whole story is strange!

**A:** This reference merely means heel, as in the last line of defense, last trailing physical part of the subject. Thus, it is seized when one has let their guard down, before being completely departed from the realm of danger.

**Q:** Okay. Well. I think that this is all for tonight as I have had

all I can handle for one night. So, unless you have something urgent...

**A:** No, it will wait. Good Night.

END OF SESSION

## 5.23 July 12, 1997

Frank, Laura, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Deotton.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** In this underground bases book I have been reading, there are two old miners telling a story about falling through a hole in a mine into a city of gold with mummified soldiers sitting around a huge table, and a 98 foot tall, solid gold statue. I would like to know if this was just a story these guys made up?

**A:** Fable.

**Q:** So, they did not fall through a mine shaft into a city of gold in the Panamint Mountains?

**A:** The area around Death Valley does have many underground mysterious mysteries, but many have heard the legends.

**Q:** Okay. Just a general legend being repeated and embellished. I thought so. Now, I noticed when looking at the map that there

is a place called “China Lake Naval Weapons Center” right next to Death Valley. I mean, aside from the fact that it is a NAVAL station nowhere near water, is this connected in anyway to these underground bases or cities?

**A:** In a circuitous way.

**Q:** I also notice that Edwards Air Force Base is a little to the South of there, and my guess is that these bases are connected to this underground tunnel system, these underground bases or cities. Am I going in the right direction?

**A:** Draw a line on the map to connect Death Valley, Edwards, and the Antelope Valley. Then connect with Mount Shasta, Mount Rainier, Back to Las Vegas, on to Sedona, over to the Archuleta Mesa, then on up to the Denver Airport.

**Q:** Well, speaking of the Denver Airport, Chloe may be going there soon because Samantha NOW has cancer to top off her lifetime of ongoing miseries. So, Chloe may be going out there. So, she will be close. Any comments?

**A:** Then have Chloe go to that airport, observe carefully, then report back her findings. Very important, because the murals there are directly connected to what you are studying carefully right now. Superclues to be found there, which can point to monstrous future plans of 4th density STS and much, much more. Be wary if Chloe resists the idea... This means something! Obviously it is not a hardship for her. But strongly suggest you keep your findings to within the group!

**Q:** Well, then, is it safe to go? I mean, has Samantha suddenly developed this “condition” just to lure Chloe out there? Does she really have as serious a condition as she says? Will she lose her nose?

**A:** It has been “blown out of proportion.”

**Q:** Very cute! Well, I think that since Chloe talked to her about her bad choices, and she has had to admit that she is repeating these bad choices, that now she needs another excuse to perpetuate her choices, and that she can't otherwise complain about all these men being bad to her.

**A:** More or less.

**Q:** So, it could be a way of sustaining control of what SHE wants, while still getting sympathy?

**A:** Maybe.

**Q:** Is there any chance she will lose her nose?

**A:** No.

**Q:** Does she have cancer?

**A:** Yes. But, it is a good opportunity for Chloe to observe the murals, the atmosphere of the airport, and report back.

**Q:** Okay, in this relief painting done by Berenger Saunier in the church at Rennes le Chateau, Mary Magdalene is depicted as gazing hopefully or reverently at a tree branch formed into a cross, stuck in the ground. What kind of tree is it?

**A:** The "tree of life."

**Q:** Well, I had a different idea... some people say it is an acacia tree. Are you saying it is not a genus, horticulturally?

**A:** Genus is family tree.

**Q:** And what family is it a family tree for?

**A:** Check your Magna for lesson.

**Q:** My magna? What in the world? Okay, "blue apples:" Stones or grapes?

**A:** Why not both?

**Q:** Okay! I can accept that! What was Berenger Sauniere collecting all those rocks for?

**A:** What about conductor?

**Q:** What do you mean?

**A:** What conducts.

**Q:** Was he building a little Stonehenge?

**A:** Have you researched the power of Stonehenge, and how it relates... where it fits in?

**Q:** Yes, we are bit by bit collecting things...

**A:** Well? And crop circles? Amazing connections... And what of "The Rosy Cross?"

**Q:** Well, this is what we are looking at! I have even discovered that Sir Francis Bacon's name is even derived from "beech," and that his Latin signature has the gematria number of 17 - and January 17 is the feast day of St. Anthony, who replaced St. Augustine in this affair somewhat... and I have connected the Rosicrucians all over the blasted planet, for crying out loud! And, who is who here? Just who are the good guys?

**A:** Airports are used by both.

**Q:** Well, what is THAT supposed to mean?

**A:** Transdimensional Atomic Remolecularizer.

**Q:** You mean there is a TDARM at the Denver Airport?

**A:** Not that simple... and much, much deeper meaning. Did you catch the latest report about Neanderthals and DNA and how it relates to you?

**Q:** Yes, I read it. But it seems that they have decided that this proves their screwy theory about the origins of mankind in deepest Africa.

**A:** Not “so screwy.” Just the relating of the info.

**Q:** Well, I notice that there is a LOT of heating up of things lately. Gerald Ford admitted to altering the Warren Report, the Mars probe is admitting that there was once a LOT more water on Mars than could be “locked up” in permafrost as Sagan suggested. Good grief! I said that over 10 years ago! Yes, it took about 40 days for all the water on Mars to settle out of our atmosphere after Mars took a close swing and the Earth grabbed it’s water.

**A:** Admissions of such types can be made when it is “convenient.” Expect a veritable plethora... And massive numbers of UFO documentaries to be seen on TV...

**Q:** Okay. I have been looking for a “Percy” in the paper, but the only one I have found was the attorney for the Shabazz kid who killed his grandmother by setting fire to their apartment.

**A:** Keep eyes and mind open.

**Q:** What was the Eleusian mystery? Is this what we are supposed to be tracking back to? I mean, this is sort of where I have ended up?

**A:** One leg of the table.

**Q:** Okay, what is this P-S related to that appears on the stone slab from the Rennes le Chateau churchyard? Everybody is talking about the “Priory of Sion.” But, what does this P-S mean? Is that it?

**A:** Look into ancient tongues...

**Q:** Ancient tongues? Get me a little closer to it!

**A:** Swords, daggers pierce...

**Q:** Is this P-S something about “Percy?” Swords, daggers, pierce... Damascus? Damascus steel?

**A:** Search for learning.

**Q:** Okay. Now, I have got this “Et in Arcadia ego” rearranged to “Tiena arca Ida geo.” Am I onto something here, or am I nowhere near it?

**A:** Close.

**Q:** And we have the Rho-Chi for Rosy Cross, and we have the Ida, which is Tejeda on Tenerife, and we have the REDDIS, which I am interpreting as Rhedae, or Rhea, which is another name for Ceres or Demeter, and REGIS as Dionysus, one being the earth and the other being the spirit, and the CELLIS being the feminine principle, and the Arcis being the masculine principle... and then we have this Prae-cum which is above the spider image. Why is the arrow pointing from the P-S down to the spider? What is the spider?

**A:** You know of the spider!

**Q:** Well, yes, but I know what I know, but I don’t know if I am getting anywhere!

**A:** You will when you connect “the dots.”

**Q:** Connect the dots... My God! Swords, daggers.... I GET IT!

**A:** It is the “destiny!”

**Q:** Yeah! I just got the image of the “Piercing of the spider,” rather like pinning it to a piece of paper as a specimen where it can no longer spin its web and entrap!!!

**Q:** Okay, here is Ark's first question: "if the general view of the situation that I wrote you,"bird's-eye view" is correct?"

**A:** Why not? The thought would not be so "nagging" if were not so!

**Q:** "Or, perhaps, I am missing some important point(s), and if so what is(are) this point(s)?"

**A:** When one is on a quest for true learning and higher knowledge, there are no "missing points," only those not yet discovered!

**Q:** "How 'long' will they still be able to use the Cassiopaeian transmitter, should we start to take some steps thinking of the future when the transmission point will have to be moved? Or, perhaps, this is not something we have to worry about in advance? I would like to know.... I do not like to be taken by surprise"....

**A:** No need to worry!

**Q:** Is there anything that you can say to help him with his worries? He is probably gonna worry anyway...

**A:** "If one has the will of a Lion, one does not have the fate of a mouse!"

**Q:** Very cute! I liked that one! But, now, you took the wind out of my sails with the answer about the destiny. But, in my perception of this arrangement on this stone, is it that the two sides need to be united, is that correct? Or is the Arrow from the P-S pointing at the spider a divider of two opposing groups?

**A:** Open for your discovery!

**Q:** Oh, you guys are BAD to me tonight!

**A:** No, we be berry berry good to Lawra! {Multiple letter o in "good" as given.}

**Q:** Okay, the night before last, I heard a noise and something was trying to push me out of my body. I more or less “threw” mental force and it went away, and at that exact moment I saw a lizard run across my window. It really freaked me out! Who was in my room pushing me out of my body?

**A:** Who do you think?

**Q:** Well, obviously, it was a Lizzie because the universe gave me that clever little sign. But, what was the purpose of that little exercise in mental domination?

**A:** Needs no purpose, just is!

**Q:** What was the influence that caused our little “event” of the past few days?

**A:** S waves.

**Q:** What is an S wave?

**A:** Look it up.

**Q:** Who was being subjected to the S waves?

**A:** Ark.

**Q:** Was this having an effect because of the events in Dijon?

**A:** Semi.

**Q:** Well, what other factor is involved?

**A:** Arkadiusz is strong willed. Must be to be seeker of worlds. To paraphrase: “I am become ONE... Creator of worlds.” And, on that contemplative note, good night.

END OF SESSION

## 5.24 July 19, 1997

Frank, Laura, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Feorrallah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** As you know, there is a flood in Poland, and Ark has to go back, there is so much that must be done, but the government offices may be closed, the court session may be delayed indefinitely, God knows what is going to happen. What is the source of this dreadful disaster in Poland?

**A:** Soporific screen alterations of the magnetic belt overlay.

**Q:** And what is causing these screen alterations of the magnetic belt overlay?

**A:** Influences of Acquiim.

**Q:** What is Acquiim?

**A:** 4th density overseer.

**Q:** Does that mean soporific screen alteration?

**A:** Soporific/phosphorous.

**Q:** What is the purpose of this screen alteration?

**A:** Deterrence of colinear wave reading consciousness units.

**Q:** What is a ‘colinear wave reading consciousness unit?’

**A:** Suggest you “look in the mirror.”

**Q:** Well! I don’t know if I like being a colinear wave reading consciousness unit!

**A:** Why not?

**Q:** Because I don’t like feeling responsible for all these people who are suffering in this disaster!

**A:** Responsible? Are you altering the weather?

**Q:** Well, no. But, if they will go to that extent to thwart us, is it safe for him to go back?

**A:** If he takes precautions.

**Q:** Can you suggest some of these precautions?

**A:** Drive not. Travel by rail only if such travel does not include the possibility of having to evacuate the train and walk on or near live electrical current conduits.

**Q:** Anything else?

**A:** Guns do exist in Poland, unlike some other European countries.

**Q:** What more?

**A:** Total awareness at all moments is hypercritical.

**Q:** Are the members of his family alright?

**A:** So far.

**Q:** How long will it take before this flood business has come to a halt?

**A:** Open.

**Q:** Are all the government offices going to be closed?

**A:** No.

**Q:** Will the divorce hearing proceed?

**A:** Eventually.

**Q:** How many days will we be out of communication?

**A:** Not point. Just remember that anticipation is the “mother of preparation,” and defense.

**Q:** So, anticipate or expect to be out of communication for some time...

**A:** No, it is for Arkady to be prepared!

**Q:** Are there any good guys who can come in and help? I mean, good grief! A flood no less! How come we haven't been afflicted with that sort of thing here?

**A:** No need as we have told you, it is Ark who is the vulnerable link, therefore, the attack goeth there.

**Q:** Is there anything WE can do to help?

**A:** Get the message through to expect the unexpected; feel vulnerable, and do not ever assume invincibility. Knowledge protects, and ignorance endangers... does it ever!!!

**Q:** Well, anything else?

**A:** Must beware of agents near.

**Q:** Can you give any clues about these agents near?

**A:** Have “look,” if one is looking.

**Q:** What kind of look?

**A:** Consult fiction for the truth.

**Q:** You mean like spy stories? If they look like a spy, they are one?

**A:** Close.

**Q:** Anything else? This is going to be a rough period!

**A:** Not if aware and prepared, and not caught up in fantasies.

**Q:** What kind of fantasies?

**A:** Energy wasted upon unnecessary communiques.

**Q:** So, he should not exert himself to be in contact with me if it might put him in danger? Is that it?

**A:** No, for the time being, suggest you cancel the “mushiness.”

**Q:** Alright. Anything further?

**A:** No.

**Q:** I will be in a bad way through this ordeal until he gets here, so...

**A:** Better to be in “a bad way,” than a pedestrian on the widow’s walk.

**Q:** Is there anything that we can do for protection?

**A:** We have told you! Be forearmed by being forewarned! Be careful that he does not believe the message.

**Q:** In other words, he needs to really believe what you are saying?

**A:** More important: what is a false sense of security?

**Q:** So, if he receives a message that he is secure and that all is okay, then is when he must be most aware?

**A:** One must not ever feel “secure,” but think of it. When is one ever secure?

**Q:** Alright, Ark did have a question about the S waves. He discovered that there were a number of earthquakes, in Italy and other places, off the coast of Africa, in Japan, all around the time that he was, as you designated, under the influence of those S waves. What he wanted to know, in a general way, is there a way to identify... is there a time parameter; do these waves begin affecting a person days before...

**A:** Yes, but remember: they can, like all else, be initiates.

**Q:** Be initiates? What do you mean?

**A:** Define “to initiate.”

**Q:** They can be starters, or beginnings... in that particular case, how long had he been influenced by these S waves in advance of the event?

**A:** 5 days.

**Q:** So, it is something that happened 5 days prior, or had been going on for 5 days prior to that event that we are to look for?

**A:** Not unless you understand electromagnetism within the framework of quantum parallel reality matrix.

**Q:** Well, that is out of my depth tonight! In a previous session I asked a question about the ‘sons of Belial’ and the ‘sons of the law of One,’ as explicated by Edgar Cayce, and whether these were philosophical or racial divisions. You said that they were initially racial, and then philosophical and religious. Now, from putting the information about religions together throughout the centuries, I am coming to a rather difficult realization that the whole monotheistic idea, which is obviously the basic concept of the ‘sons of the law of One,’ is the most clever and devious and cunning means of control I have ever encountered in my life. No matter where it comes from, the religionists say “we have the

ONE god, WE are his agents, you pay us your money, and we'll tell him to be nice to you in the next world!"

**A:** Clever if one is deceived. Silly truffle if one is not.

**Q:** Well, I know! But, uncovering this deception, this lie that the 'power' is 'out there' is unbelievable. So, the Kantekians were the 'Sons of Belial,' which is not the negative thing that I interpreted it as at the time. So, the 'Sons of the Law of One,' was perverted to the monotheistic Judaism, which then was then transformed into the Christian religious mythos, and has been an ongoing theme since Atlantean times.

**A:** Woven of those who portray the lights.

**Q:** And that is always the way it has been. They appear as 'angels of light.' And, essentially, everything in history has been rewritten by this group.

**A:** Under the influence of others. And whom do you suppose?

**Q:** Well, the Orion STS.

**A:** Sending pillars of light and chariots of fire to deliver the message.

**Q:** Well, I found some connections between some tombs in Rome, Nicolas Poussin, and some tombs in England, the processions of 'angels' on the Canary Islands. The connection seems to be these funny lights, or Candles, with 'peculiar wicks,' as they are described, which are 'eternal flames.' I am wondering if this is what you meant by connecting them by the frequency of light?

**A:** "Eternal flame" adorns the tomb of JFK. Connection?

**Q:** Yes. I also found the Solloi priesthood and the priestesses called Peleiades. They seem to be involved with urns, birds, tinkling bells, urns that can be struck and which then set up a partic-

ular resonance in other urns, oak trees, and some other peculiar references that relate to laurel trees...

**A:** Siren song.

**Q:** What about the siren song?

**A:** Greek mythology.

**Q:** I know that. What about it? What do the sirens represent?

**A:** Laura, my dear, if you really want to reveal “many beautiful and amazing things,” all you need to do is remember the triad, the trilogy, the trinity, and look always for the triplicative connecting clue profile. Connect the threes... do not rest until you have found three beautifully balancing meanings!!

**Q:** So, in everything there are three aspects?

**A:** And why? Because it is the realm of the three that you occupy. In order to possess the keys to the next level, just master the Third Man Theme, then move on with grace and anticipation.

**Q:** In a previous session you also said that the Guanches were confused by a trauma, which was why they did not have a clear story about their origins. So, I was thinking about it and wondering if they were actual Atlanteans, and that the Canary Islands were an intact part of Atlantis, and that the Guanches did not actually travel from anywhere... they were there all along. That the Canaries is an actual area of Atlantis that survived and that the Guanches survived with it.

**A:** Close.

**Q:** Is there some mystery or secret about how they got there?

**A:** In what context?

**Q:** I asked before, and you said ‘guess,’ and I guessed the flood of

Noah, and you said ‘close.’ You said they were traumatized. I just wanted to know where they came from. They have a tradition that 60 of them arrived...

**A:** You are close enough to lay the foundations of your castle.

**Q:** Okay. Change gears: Why is the rooster, or the crowing of the rooster, associated with the idea of underground cities, civilizations, or bases?

**A:** What causes the rooster to crow?

**Q:** Light. But, how is light related to an underground city?

**A:** Tis not just light, but the emergence of light from the depths of the darkness.

**Q:** Are there such things as ‘DEROS,’ as described in this underground bases book?

**A:** Detrimental Robots.

**Q:** Are DEROS part of the underground city/bases scenario?

**A:** Yup.

**Q:** Something you said about the dietary restrictions... about tracking bloodlines. Do dietary restrictions make it easier to track the Jews because of this? Can 4th density track their genetics because of their dietary restrictions?

**A:** Foolishness!! 4th density beings have no difficulty identifying anyone on 3rd density. Dietary restrictions you speak of are relating to making the body chemistry less attractive for consumption.

**Q:** You mean consumption as in being eaten?

**A:** Yes.

**Q:** So, maybe we should all eat like Jews?

**A:** Maybe.

**Q:** Do you mean that 4h density STS likes particularly to eat Aryans?

**A:** Only the reptilian types.

**Q:** But, they don't like to eat Jews, is that it?

**A:** They most prefer children with high body fat content.

**Q:** What do the Orions eat?

**A:** Crystalline tablets, which are aspirated through oral demolecularization.

**Q:** Are these crystalline tablets like rocks, like our idea of crystals?

**A:** Picture a sparkling polished oval bead.

**Q:** What is the chemical composition?

**A:** Quartz at the 3rd power compared to Terran samples.

**Q:** Well, we notice that things are really heating up. Weather, government exposure and confessions of this and that...

**A:** Massive alien/UFO coverage, some fictionalized, some not.

**Q:** Okay, I just thought of this: getting back to our earlier questions, would you suggest that Ark avoid going back to Poland altogether?

**A:** Avoidance may avoid objective also.

**Q:** Okay. That is understood. I want to ask about what, precisely, this soporific/phosphorous screen of the magnetic belt overlay is.

**A:** And have you communicate it thus? No.

**Q:** When you said ‘colinear wave reading consciousness units,’ and ‘look in the mirror,’ was that a clue that Ark and I are mirror image consciousness units?

**A:** Not exactly.

**Q:** Well, in a previous session, you said something about being a ‘half soul,’ and my assumption was that he was a half-soul and I was a half-soul, and together we made a whole soul. But, since that time, I have wondered about this...

**A:** No one is unto themselves a half soul.

**Q:** Okay, what would give me a more clear understanding about ‘half soul balancing?’

**A:** The soul as read as a unit of completion. It is the communication which completes the whole in each.

**Q:** What are the potentials of colinear wave reading consciousness units?

**A:** Specifics.

**Q:** Well, if an overseer in 4th density wishes to prevent unification of same, there must be some reason; that there is something that the 4th density STS would not like to see happen. What is it?

**A:** Is that not self-evident?

**Q:** So, does that mean that it is important for us to be physically together to do whatever this is?

**A:** Tis preferable.

**Q:** I had a dream the other night. As Ark and I were leaving the park in my dream, I looked up and saw a mosaic on the side of the mountain. It had seven sharks, one above the other, the

lowest being pale almost to the point of transparency, and the highest being very dark and intense in color. There was a HUGE sperm whale to the upper left, he was in the posture of whipping around, his eye had caught the sharks, and his mouth was open and he was going to swallow them all in a single gulp. What was the meaning of the whale and the sharks?

**A:** Logic.

**Q:** Are you telling me to use logic, or that the meaning IS logic?

**A:** Logic says to you: examine!

**Q:** The other part of the dream was that I disappeared and reemerged from a cleft in a rock. I was cleaning... he went to investigate... and he returned and was crying and all this water was flowing out of there like a spring... What was the significance of this?

**A:** Trace minerals interact with deeply held secrets.

**Q:** The other night you said something about what I had found as being one leg of the table. How many legs does the table have?

**A:** Search for answer. When found in literature, profound meanings enclose compartment.

**Q:** Well, what about my 'Araignee at Icod?' I liked it, even if it is wrong!

**A:** Keep effort aligned.

**Q:** Ark has a question. He wants to know if you can give us one other location of a TDARM from which we can derive a relationship?

**A:** TDARMS do not have fixed locators, Oak Island is a buried relic; therefore the exception that verifies the rule.

**Q:** Okay, now what about this diagram that Tony Smith has made from the Pyramid and the phi ratio, that he has interpreted as a map...

**A:** Must use a spherical relief, with formula applied, to discover.

**Q:** You said something about ‘undreamed of treasures in Rhineland,’ and then something about ‘Rhineland.’ Did you mean this William Mann being the Rhineland? Or, was that a reference to the TV show Frank watched the other night about the buried treasure that seems to be missing?

**A:** Learning energizes you, Laura. Can you ever remember being so energized?

**Q:** Well, no. Well, is this reference to Alton Towers that Ark found on the internet, about psychic projectors. That was the only unusual thing we have found about this. Are we talking about some sort of place where they have rotating shifts of psychic projectors?

**A:** As you know... fiction is often the guise for the deliverance of the deepest of truths. And, on that note, good night.

END OF SESSION

## 5.25 July 26, 1997

Laura, Frank, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Jopalla.

**Q:** Where do you transmit through?

**A:** Cassiopaea.

**Q:** Before we get started on all our other stuff, is there anything you would like to address to Ark in the present situation?

**A:** First of all, this is for you: your son's asthmatic allergic reaction is being seriously aggravated by airborne canine hair particulate matter at this time!

**Q:** Thank you very much. We will take care of it.

**A:** Good, and you are welcome. We suggest you limit his contact with the dog for the next 8 days.

**Q:** Well, Percy is in the kitchen because he gets so hysterical when there is thunder. Why does he get so frantic?

**A:** Sensitive to ozone.

**Q:** That brings up another thought: in several cases of the flying boomerangs, collies were involved. And, subsequent to my own sighting, I lost my collie within 3 months. He just started wasting away and died and nothing we did helped. What is the connection, if any?

**A:** Genetic biological manufacturing defect leaves open absorption of unusually high levels of collateral radiation.

**Q:** But why is it that so many people who have seen these boomerangs seem to have collies?

**A:** That is not always the case.

**Q:** Well, but a significant number! I wonder if there is something genetic in the people who prefer collies. Remember, collies are a Celtic dog!

**A:** Indeed!!

**Q:** Okay, let's get to some of these questions... let's do some quick ones first. Would you comment on the fact that RhoChi is a mirror image of ChiRho, as though Rosy Cross were a mirror image of Christianity... added to this the fact that Dionysos, in the Titian painting, looks like he is stepping out of a mirror... also, the mirrors that showed up in the Etruscan book Ark sent, and the Well of Hagar which turned out to be Beer-lahai-roi, or the well of the living mirror... very funny things popping up after you mentioned the word mirror last week! Could you comment?

**A:** Better check the "leaflets..."

**Q:** Leaflet...? (T) Young leaf?

**A:** Patch of Zion.

**Q:** Okay, help me out here...

**A:** We are...

**Q:** Do you mean the 'budding olive tree'?

**A:** If you explore the caverns to which the wanderers go in the sides of cliffs in order to seek refuge from deluge, you will know...

**Q:** Obviously something will be discovered on this. I am taking it as a clue to work on. Do you mean the caves all along the cliffs on the Canary Islands where the Virgin of Candelaria was found?

**A:** Yes. Page 33?

**Q:** Could you comment on Paran Sikarios? Did I hit the jackpot on that one?

**A:** Expect not to "hit the jackpot" so early in the quest, my dear. What would you do in such a retirement?

**Q:** Well, I certainly don't think it is the ULTIMATE jackpot. I am just talking about a small coup here!

**A:** Coup d'etat?

**Q:** Now, all these Masons are very hot on the Sinclair family and the Rosslyn Chapel. They are certain that their guys came to America, because in this chapel, built supposedly by a Master Mason, there are carvings of corn, as in maize, and aloe vera plants. This is evidence, to them, that Prince Henry the Navigator and all the Templars and all that...

**A:** Nonsense!

**Q:** Well, then, what IS the explanation for these carvings in Rosslyn Chapel?

**A:** Visitors yes, but the Masonic creed is intertwined with ancient order of Essenes, arising out of ancient Egypt, from the secret knowledge stored at the base of the Sphinx, as left there by "Atlantean" survivors.

**Q:** Does anybody in the Masonic order know anything?

**A:** Yes.

**Q:** Well, how high do you have to go to get to know anything?

**A:** Page 33. Blond and blue-eyed, of course! Before genetic alteration, one branch stood eleven feet tall.

**Q:** Speaking of these tall guys, William Wallace's life was sort of symbolic, in my mind, and he was supposed to have been over 6 and a half feet tall. During the time that all that mess was going on over in Scotland with Wallace and the Bruce, the Templars were being dissolved in France...

**A:** Dissolved?!? We think not! They merely went "underground."

**Q:** Is that literally or figuratively?

**A:** Why not both?

**Q:** Well, there are Templar organizations that some Mason's claim to be in contact with.

**A:** And where do you suppose these are?

**Q:** Underground?

**A:** Bingo!

**Q:** Okay. The Templars were formed in Jerusalem. They were there for quite a while with no record of doing any of the things that the group supposedly intended to do. There are a lot of rumors... what were they doing in Jerusalem?

**A:** Templars held the secret of levitation.

**Q:** Is this something... and I am talking about the 9 guys in Jerusalem... did they discover some document in Jerusalem that gave them this secret?

**A:** Yes.

**Q:** And is this how they were able to get so much support from certain royal houses and so forth?

**A:** It is time for you to study Kaballah again, but be careful!!

**Q:** Okay. I have several books on the subject. I will start tomorrow. Now, when the Templars were arrested, they were accused of worshipping a head, or skull, and also the god Baphomet. Were these spurious accusations designed to defame them?

**A:** Skull was of pure crystal.

**Q:** What is the definition of the god 'Baphomet,' if they did, indeed, worship such?

**A:** The holder of the Trent.

**Q:** What is THAT?

**A:** Seek.

**Q:** What is the meaning of 'The Widow's Son?' The implication?

**A:** Stalks path of wisdom incarnate.

**Q:** Why is this described as a Widow's son? This was the appellation of Perceval...

**A:** Perceval was knighted in the court of seven.

**Q:** The court of seven what?

**A:** Swords points signify crystal transmitter of truth beholden.

**Q:** What is the relationship between Perceval, Paron Sikarios, the Assassini, and Ishmael, the son of Hagar, at the well of the mirror?

**A:** Spear of Destiny.

**Q:** Are the Ishmaelis the carriers of the true bloodline, and the line of Isaac and Jacob, the Supplanter, the carriers of the monotheistic covenant, are the false line?

**A:** Close.

**Q:** Are the Ishmaelis also the carriers of the knowledge of levitation, the cult of the head or the skull...

**A:** Try to connect to the Templars.

**Q:** Did the Templars discover the secrets of the Ishmaelis, the Assassini, and is this what they carried into Europe, and then underground?

**A:** Buried in Galle.

**Q:** Okay, discovered that one of the Percy estates was called 'Alnwick,' which startled me a bit after tracking wicks all over the place. But, what is the meaning of 'Alnwick?'

**A:** Discover. Invert. Allan. Check Hebrew root of Allan.

**Q:** The Counts of Flanders and Champagne were the sponsors of Chretien de Troyes who wrote the original Grail stories in which Perceval figures so prominently. These guys were also connected with the Templars. Well, it seems that the Templars were not the only ones getting picked on during certain periods. The Percy family has had much MORE than its share! Why?

**A:** You will be “picked on” too, if you learn too many secrets!!

**Q:** So, the Percys DID know something. I understand that the Percy family has a collection of 62 alchemical manuscripts... which is actually how I found out about Alnwick - I was tracking these alchemical texts....

**A:** But if you go there, do not ask for the key!

**Q:** Does the current head of the family know the secret?

**A:** Getting “warmer.”

**Q:** Has this person also been pursuing the secret?

**A:** Pour suivant.

**Q:** What does that mean, Frank? (F) For, to follow. (T) Why did you say that in French?

**A:** Look for clues, and do not have expectations!

[Break. Group watches video: Riverdance.]

**Q:** Hi guys! Did you like the movie?

**A:** We do not need to have such presentations, since we have all presence awareness!

**Q:** Well, gosh! Lighten up! (T) Well, they must be able to see the original! (L) Indeed. How close are these dances to the original

Celtic dances?

**A:** Half.

**Q:** Considering everything, that is a lot. What about these dances would make them more original?

**A:** Floating.

**Q:** Holy Shi'ite Moslems! No wonder Caesar went bananas! But, why the stylized rigidity of the arms? **A:** Has to do with sound through chemical enzyme based utilization for power purposes.

**Q:** How does the stiff-arm posture relate to sound?

**A:** Chemical transmitter flow.

**Q:** You mean that something flowed through their arms and out their hands to enhance levitation?

**A:** Close.

**Q:** Well, I just saw it! If you think about it, the Reiki energy, after initiation, produces a LOT of heat... and that tracks back to Sanskrit, which is Indo-european, and that is Celtic root. Also, the Celtic folklore talks about the enormous heat of certain heroes who had to be plunged into very cold water several times so that they could cool down enough to put clothes on. Add to that the fact that the Celts went into battle naked because they would go into the 'furor' and produce so much heat that they could not tolerate clothing. And, what about the heat of the 'states' that I experience from time to time? The C's identified that as a 'reflection' of the connection to 4th density. That is a truly bizarre state because the heat is so intense it is almost unbearable, yet does not even show on a thermometer, and to anyone else who touches me, I am not hot. Yet the internal heat is unbelievable. So, yeah... the power flows through the hands...

**A:** Close.

**Q:** So, this 4th density energy flow makes us feel this tremendous heat that does not register physically?

**A:** Reflection of it.

**Q:** Is the watching of these dances or listening to this music helpful in unlocking ancient genetic memories?

**A:** In person, not through reproduction. Wearing of silk will enhance the EM effect.

**Q:** Well, that makes sense. The alchemists talked about this also. Now, Terry wanted to ask if there was any relation between Hapsburg and Hotspur?

**A:** No.

**Q:** Why was astrology absent from the myths of ancient Greece?

**A:** Not absent, “Stalinized.”

**Q:** What does that mean?

**A:** Soviets removed Stalin from the history books when he fell from popularity. So, Greeks, Astrology... “Stalinized”...

**Q:** Why?

**A:** Deadly secrets would be revealed.

**Q:** Revealed to whom?

**A:** You.

**Q:** If we could find the pieces and put them together, they would show us the drama and the connection between 3rd and 4th density?

**A:** You would have to use the original astrology, before cosmic changes of a planetary nature; there was no Venus, for one example, and earth was oriented differently axially speaking.

**Q:** And the destruction of Kantek. This was the last whitewash, the writings of Homer and so forth were put place... is there any source where we can get closer to these myths that will help us to figure out who is REALLY on first?

**A:** Check the Isle of Man.

**Q:** (T) Are there more points to be plotted other than the ones you gave us last week?

**A:** Plot those first.

**Q:** Okay, we did. Is there something significant about the plotting? Are we supposed to see something here?

**A:** Yes.

**Q:** So, there is something there that we aren't seeing.

**A:** No rushes to judgment.

**Q:** Are there any additional points?

**A:** Wait and see.

**Q:** You once said that the Bible was written by Greek enforcers, and now you have just said that the myths were Stalinized. It also struck me that there were no ghosts or spirits in the Greek texts. These texts portray the Greeks as worshippers of the physical world. They were astonished at Pythagoras' belief in reincarnation...

**A:** You have been reading altered texts.

**Q:** Well, I know that. I have copies of some of the oldest known documents on the planet. Where am I going to get something

that is remotely accurate?

**A:** The Hague.

**Q:** What about the Essenes and the Dead Sea Scrolls?

**A:** Kaballah.

**Q:** What is so explosive in the Dead Sea Scrolls that they cannot release them?

**A:** Wait and see.

**Q:** Okay. This one book I just read, the guys came across the Mandeans who talked about a star called “Merica,” and from this, these geniuses deduced that the Templars sailed to America! What DID happen to the Templar fleet?

**A:** Sail to underworld.

**Q:** You previously talked about ‘undreamed of treasure in alfalfa fields of Rhineland.’ Is this a physical, spiritual or knowledge based treasure?

**A:** It is all three.

**Q:** Who put this treasure in the alfalfa fields of Rhineland?

**A:** Discover. And so, to you, good night.

END OF SESSION

## **5.26 August 9, 1997**

Frank, Laura, Alice {Laura’s mother}.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Uturrah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Alright - we have a number of questions tonight. Is there anything you wish to address to any of us before we get started?

**A:** Ask.

**Q:** Well, we had T & J here the week before last. Immediately after, everyone in the house who was NOT sick became ill, myself included. Once before, you remarked that certain of my EM bursts could cause illness, particularly in the children. I am wondering if this had anything to do with this sickness. Did my reaction to the presence of T & J cause one of these bursts?

**A:** No.

**Q:** What is the source of this sickness which just does not want to go away?

**A:** Virogen called "L Plasmodic benten."

**Q:** What was the source of transmission?

**A:** Oxygen, and flesh and cutlery.

**Q:** (A) Does that mean in the kitchen? The kids sharing utensils?

**A:** Yes.

**Q:** Any further comment on it or advice about it?

**A:** No.

**Q:** (A) Are we all going to be okay?

**A:** Maybe. Wash hands more!!

**Q:** Well, I do it all the time. (A) But the kids don't. (L) Well, I will have to keep after them.

**A:** Yes.

**Q:** Is there anything I could give to A\*\*\*\*\* to help her? She has coughed terribly throughout this sickness.

**A:** Must "outgrow" the tendency to gag.

**Q:** I would like to announce that the web page is started. Do you have any comments or special requests?

**A:** Think carefully before broadcasting any and all information received.

**Q:** Well, we will do that. Are there any particular categories that you would suggest we withhold or restrict?

**A:** Anything that relates to "earth shaking" data, especially relative to secrets some do not want uncovered.

**Q:** Does this mean such things as the Denver Airport, HAARP, the Nephilim, and underground cities?

**A:** Just look before you leap!

**Q:** Okay. We will just talk about general things such as principles and guidelines for living?

**A:** Restrict not as to subject matter, just individual bytes.

**Q:** Nevertheless, getting back to the original subject. I felt some restriction with T & J present. Was this imagined or actual?

**A:** Both.

**Q:** What was the nature of the restriction?

**A:** Clash of wills.

**Q:** Whose wills were clashing?

**A:** Yours and theirs.

**Q:** And what is their will focused upon?

**A:** Themselves.

**Q:** In the past, you encouraged association with them...

**A:** And we still do!

**Q:** Why?

**A:** Because the best way to get used to the heat is to spend time in the kitchen. The field you have been directed to is chock full of those who would make Terry and Jan seem like Ma and Pa Kettle!!!

**Q:** What do you mean ‘the field?’

**A:** What do you think?!?

**Q:** Well, I just want to sit at home and channel the information, publish it, and not have to deal with the unpleasant parts!

**A:** Lots o’luck!!!

**Q:** What is that supposed to mean?

**A:** If you live by the sword, do not expect to sleep on the couch!

**Q:** Talk about your mixed metaphors!!! What the heck is THAT supposed to mean? Now listen, you guys are the ones who got me into all this!

**A:** Negative!

**Q:** I asked before... can’t we just quit now, and you said it was too late...

**A:** Correct.

**Q:** You mean if I did absolutely NOTHING further, stuff would still happen to me?

**A:** Yes.

**Q:** (F) Yes. If you decide to quit, soon there would be four guys in three piece suits at your door saying: “why have you stopped channeling?” (L) Great! One side wants me to quit, and the other side doesn’t! Don’t worry, they will come to your door, too, Frank! Now, getting back to my questions. Ark and I have inquired into the process of him divorcing here... It seems that the only thing we can do is this. What are the chances of his divorce coming through before he leaves?

**A:** Slim.

**Q:** Is there anything you could advise that would help the process so we could get married right away?

**A:** Proceed.

**Q:** You mean, as we are doing?

**A:** Yes.

**Q:** What about the filing of action against her for the stolen funds? We don’t think it is a good idea because there is something she could bring up against him...

{Clarification: Ark’s ex-wife told him that if he started any legal action against her, she would broadcast the fact that he had been a member of the Communist party and had been debriefed by the security police on numerous occasions after his stays at various research facilities. She did not realize that this was a common occurrence for any scientist in Poland who traveled abroad. Also, this was not something that Ark was keeping secret.

In Poland, you didn’t get a decent job if you were not a member

of the Communist Party. After years of resisting, Ark had been advised by his Ph.D. supervisor to just join and give it lip-service like everyone else did. So, he did, and then, after his appointment as professor at the Uni, began to work as a dissident against the Communists. On one occasion, he was involved in a student protest for Solidarity where the Uni was occupied against the police. After this, he went abroad and when Poland was put under martial law due to Solidarity protests, he could not return because he was under threat of arrest. After the marshal law has been suspended and Ark was able to return to Poland, he resigned his membership in the party (as so many others had done and were doing).

However, after the fall of Communism in Poland, there was a lot of finger-pointing and jockeying for position with this person and that person accusing others of having been a “loyal communist” and thus, against Solidarity. The emotions were so high that just the accusation was enough to cause great difficulties for the individual and the facts did not seem to matter. This was a very real and dirty threat. So, even though Ark’s ex had literally stolen everything that was supposed to have been divided equally (she emptied all the bank accounts and hid the money), all we were interested in was him getting the divorce finalized and leaving the country. At one point, his ex tried to pay a doctor to declare him mentally incompetent and drug him to prevent his leaving. The plan was uncovered, and he managed to avoid the trap.}

**A:** Smart move!!!

**Q:** What are the chances of her using this item against him anyway?

**A:** Would do so only if threatened criminally.

**Q:** Okay. That answers that. Well, all else seems to be proceeding. We are keeping our eyes open. I am almost done with all the

tapes... {transcribing} I just want to know if there is ANY thing he could do, any maneuver, to get that court to act?

A: Not really.

{As it finally turned out, Ark got his divorce in Florida in 1998 and one month later, we married.}

Q: Well, if I have my way, once he comes... we don't ever want to be apart this way again...

A: Good.

Q: Anything else we ought to be doing about the job situation?

A: Not as of yet.

Q: Okay, I was reading something that related to mirrors. What was said was: "Negative existence is the silence behind the sound, the blank canvas beneath the painting, the darkness into which light shines. Emptiness is the stillness against which time moves. Negative existence enables a man to be what he is. It is the mirror of mirrors. Non-anticipation is non-interference, and allows the most perfect reflection of creation." I thought that this was a nice way to express it. Could you comment on that and how it applies to other things you have told us?

A: Build a psychomantium.

Q: We are going to. As soon as Ark gets here...

A: Answers re: divorce, career, et cetera, come through that medium, as they are personal and thought center reflective.

Q: So, maybe I will build it BEFORE he gets here...

A: Or, use the mirror, and Ark too.

Q: Ark could also use the mirror?

**A:** In a darkened room, mirror pointed away from your reflection, indirect light, preferably candle, meditate...

**Q:** Anything further? I can just do it in my room?

**A:** To start.

**Q:** How long will I have to meditate?

**A:** Open.

**Q:** Approximately? Day after day, or the first time?

**A:** Try it.

**Q:** Okay. Now, next question: I understand that Libra was added to the zodiac and broke Scorpio and Virgo apart. Were there originally 10 or 11 signs in the zodiac?

**A:** Originally?

**Q:** You know what I mean!

**A:** There have been many combinations.

**Q:** Well, when did the present 12 sign zodiac begin to be established as it is?

**A:** 1302 A.D.

**Q:** And how many signs were there before that?

**A:** 11

**Q:** That's what I thought. What is the source of the oldest zodiac available to us?

**A:** Atlantis.

**Q:** Well, fine, what is the oldest extant source in terms of writings?

**A:** Egypt.

**Q:** Well, that could really have an effect on one's astrology!

**A:** The art of astrology lies within the interpretations of the astrologer, and if accurate, it is because of psychic talents. Same as with all methods, they are merely mediums.

**Q:** Next question: is there any relationship between the fact that Roger de Mortimer, the carrier of the last of the line of the Welsh kings, was the lover of Isabella of France, who was the daughter of Philip the Fair, the destroyer of the Templars, and the murder of Edward II, the first of the English Prince of Wales?

**A:** Templars are a setup, insofar as persecution is concerned. Remember your "historical records" can be distorted, in order to throw off future inquiries, such as your own.

**Q:** I know that. I have already figured that one out! But, it seems that no one else has made this connection. I mean, the bloodlines that converge in the Percys and the Mortimers are incredible!

**A:** You should know that these bloodlines become parasitically infected, harassed and tinkered with whenever a quantum leap of awareness is imminent.

**Q:** Whenever a quantum leap...

**A:** Such as "now."

**Q:** Did Isabella and Mortimer have a child while they were in hiding in France?

**A:** No. Here is something for you to digest: Why is it that your scientists have overlooked the obvious when they insist that alien beings cannot travel to earth from a distant system???

**Q:** And what is this obvious thing?

**A:** Even if speed of light travel, or “faster,” were not possible, and it is, of course, there is no reason why an alien race could not construct a space “ark,” living for many generations on it. They could travel great distances through time and space, looking for a suitable world for conquest. Upon finding such, they could then install this ark in a distant orbit, build bases upon various solid planes in that solar system, and proceed to patiently manipulate the chosen civilizations to develop a suitable technological infrastructure. And then, after the instituting of a long, slow, and grand mind programming project, simply step in and take it over once the situation was suitable.

**Q:** Is this, in fact, what has happened, or is happening?

**A:** It could well be, and maybe now it is the time for you to learn about the details.

**Q:** Well, would such a race be 3rd or 4th density in orientation?

**A:** Why not elements of both?

**Q:** What is the most likely place that such a race would have originated from?

**A:** Oh, maybe Orion, for example?

**Q:** Okay. If such a race did, in fact, travel to this location in space/time, how many generations have come and gone on their space ark during this period of travel, assuming, of course, that such a thing has happened?

**A:** Maybe 12.

**Q:** Okay, that implies that they have rather extended life spans...

**A:** Yes...

**Q:** Assuming this to be the case, what are their lifespans?

**A:** 2,000 of your years.

**Q:** Okay, assuming such a bunch have traveled...

**A:** When in space, that is...

**Q:** And what is the span when on terra firma?

**A:** 800 years.

**Q:** Well, has it not occurred to them that staying in space might not be better?

**A:** No. Planets are much more “comfortable.”

**Q:** Okay... imagining that such a group has traveled here...

**A:** We told you of upcoming conflicts... Maybe we meant the same as your Bible, and other references. Speak of... The “final” battle between “good and evil...” Sounds a bit cosmic, when you think of it, does it not?

**Q:** Does this mean that there is more than one group that has traveled here in their space arks?

**A:** Could well be another approaching, as well as “reinforcements” for either/or, as well as non-involved, but interested observers of various types who appreciate history from the sidelines.

**Q:** Well, SWELL! There goes my peaceful life!

**A:** You never had one!

**Q:** Well, I was planning on one! Is this one of those items we should NOT put on the net, or are you addressing it because you want it on the net?

**A:** We will leave that until a bit later.

**Q:** Any other comment?

**A:** You chose to be incarnated now, with some foreknowledge of what was to come. Reference your dreams of space attack.

**Q:** Okay, what racial types are we talking about relating to these hypothetical aliens?

**A:** Three basic constructs. Nordic, Reptilian, and Greys. Many variations of type 3, and 3 variations of type 1 and 2.

**Q:** Well, what racial types are the ‘good guys?’

**A:** Nordics, in affiliation with 6th density “guides.”

**Q:** And that’s the only good guys?

**A:** That’s all you need.

**Q:** Wonderful! So, if it is a Grey or Lizzie, you know they aren’t the nice guys. But, if it is tall and blond, you need to ask questions!

**A:** All is subjective when it comes to nice and not nice. Some on 2nd density would think of you as “not nice,” to say the least!!!

**Q:** That’s for sure! Especially the roaches! Maybe we ought to get in touch with some of these good guys...

**A:** When the “time” is right.

**Q:** Speaking of time - any further comments?

**A:** Just pay attention to the signs, please! It is not helpful to place yourself in a vacuum of awareness.

**Q:** I don’t think I am in a vacuum of awareness. Now, this Jason Dunlap is printing a lot of stuff that reminds me of the Hale Bopp incident. There is a lot being said about the sightings out in the South West area. They are saying that this is the ‘new’ imminent invasion or mass landing. Can you comment on this activity?

**A:** Prelude to the biggest “flap” ever.

**Q:** And where will this flap be located?

**A:** Earth.

**Q:** When is it going to begin?

**A:** Starting already.

**Q:** Is this biggest flap going to be just a flap, or is it going to be an invasion?

**A:** Not yet.

**Q:** Not an invasion?

**A:** Yes.

**Q:** So, it will just be inciting people to frenzies of speculation...

**A:** Invasion happens when programming is complete...

**Q:** What programming?

**A:** See Bible, “Lucid” book, Matrix Material, “Bringers of the Dawn,” and many other sources, then cross reference...

**Q:** Well, if something is fairly imminent, we are not gonna have time to do all the things you have suggested that we do!

**A:** Yes you will, most likely.

**Q:** Well, we are supposed to build a pool, a maze, a psychoman-tium, to build a database, get a Nobel Prize... a LOT of things in the works here.... This just sort of takes the heart right out of me!

**A:** Not so!

**Q:** Well, are we going to have time to do all these things?

**A:** All these things were suggested for this reason, among others.

**Q:** So, all the things you have suggested are to get us ready for this event?

**A:** Yes.

**Q:** Well, we better get moving! We don't have time to mess around!

**A:** You will proceed as needed, you cannot force these events or alter the Grand Destiny.

**Q:** I do NOT like the sound of that! I want to go home!

**A:** The alternative is less appetising.

**Q:** Sure! I don't want to be lunch!

**A:** Reincarnation on a 3rd density earth as a "cave person" amidst rubble and a glowing red sky, as the perpetual cold wind whistles...

**Q:** Why is the sky glowing red?

**A:** Contemplate.

**Q:** Of course! Comet dust! Sure, everybody knows THAT! Wonderful!!! Anything further?

**A:** Stay tuned for all pertinent information.

**Q:** Anything more about the web page?

**A:** It is yours to create... Good Night.

END OF SESSION

## **5.27 August 16, 1997**

Frank, Laura, Andromeda

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Kiloaea.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I noticed in Genesis Chapter 33, verse 11, it says that Jacob, who wrestled with the angel the previous night and was on his way to see his brother Esau, who he had tricked into giving up his blessing years before, “gave Esau the blessing”. What was this? The birthright from his father or the blessing Jacob received from the angel?

**A:** Trampled leaves of wrath.

**Q:** This is what Jacob gave to Esau?

**A:** Yes, and what is the “core” meaning there?

**Q:** I don’t know. What is the core meaning?

**A:** Leaves are of the Tree of Apples, from whence we get the proverbial “grapes of wrath,” the Blue Apples incarnate!

**Q:** Why are these leaves ‘trampled?’

**A:** Removes chlorophyll.

**Q:** What is the significance of the chlorophyll?

**A:** When the chlorophyll dies, the autumnal equinox is at hand.

**Q:** Did this signify something about the autumnal equinox?

**A:** Discover what the significance is, my Dear!

**Q:** Why did Jacob then deceive his brother again? He was to travel and meet him in Edom, but then went in the other direction as soon as Esau was on his way.

**A:** Refer to last answer, and cross reference.

**Q:** After wrestling with the ‘angel,’ Jacob was renamed ‘Israel,’ which means ‘he will rule as a god.’ This tends to make me think that this angel whom Jacob seems to have conjured, did something. What was this being that Jacob wrestled with?

**A:** Elohim provides the conventional response.

**Q:** And you have told us about the Elohim. Okay. I will look it up. What did it mean when it said that the ‘angel touched him in the hollow of the thigh,’ which did something to him. What was meant by the ‘hollow of the thigh?’

**A:** Branch.

**Q:** You mean genetic? His gonads?

**A:** No.

**Q:** What do you mean?

**A:** Ponder. If you ponder this, lightbulbs will illuminate.

**Q:** Well, I don’t think I am going to get any more on it. Now, next question: in playing with my 11 house zodiac, it became apparent that, in order for it to work properly, the circle must be converted from 360 degrees to 330 degrees. Now, this made me think about the degrees in a circle. With a 360 degree circle, the total as well as all the cardinal points are numbers that total 9. Frank and I have examined this idea of numbers having some sort of ‘frequency’ effect on all things, and it seems to be true in a VERY deep sense. So, all our measurements on our globe are based on the number 9, and this is NOT a friendly number! The ancient

gods were known as ‘they who measure,’ and this imposition of a 360 degree circle on our world, and a 12 sign zodiac, is part of a system that imposes a frequency or vibration on our reality that is quite destructive. It perpetuates the negative existence. Am I getting close to the proper understanding here?

**A:** The proper understanding is more important than how it was reached.

**Q:** So, it is the conclusion. But, the deeper I go, the more I see that this world is REALLY controlled by these negative beings! They really have us under their thumbs.

**A:** Do they?? If so, then how is it that you can communicate with us?

**Q:** Well, obviously, not completely. They like to THINK they do. But, working with my zodiac, I can’t decide where the year ought to begin. Supposedly the Egyptians began the year in the summer, Midsummer. But, it seems to me that it ought to begin in the winter at the winter solstice. But, then, it is backwards in the Southern Hemisphere. So, which of the solstices or equinoxes would be the proper one for the beginning of the year?

**A:** Begin as you see fit, everyone else has.

**Q:** That’s the truth! Okay, we have this Orion Mystery book. It seems to have quite a bit of discussion on the shafts that hint at something you mentioned a long time ago. They say that the fellows who originally measured the shafts were in error and their measurements are accurate now. But, you mentioned that the shafts change position, so the previous, as well as the current measurements could BOTH be correct. Is that so?

**A:** Ultrasound reading showed inner chambers change in position.

**Q:** What were the functions of the so-called air shafts of these chambers. It seems that the southern shaft of the Queen's chamber orients to Sirius, and the southern shaft of the King's chamber orients to Orion, but only at certain times. What was the function of the orientation to these stars?

**A:** Stand within airshaft of the queen's chamber, and you shall not age.

**Q:** You can't do that... they are only about 22 cm square. And, the queen's chamber air shaft does not even open to the outside. And, up in this shaft, they have discovered a little door which has not, to my knowledge, been opened yet. Nevertheless, one could not stand in these shafts.

**A:** Why not?

**Q:** Because they are only 22 cm square!

**A:** You are allowing third density supposition to creep in.

**Q:** Why were they oriented to Orion and Sirius?

**A:** What do you think?

**Q:** I don't know! I don't think stellar radiation could have anything to do with it. And, the authors of this book think that it is a time marker. It shows the exact orientation at about 2400 B.C. and then at about 10,400 B.C.... What is the significance of this?

**A:** Discover.

**Q:** Ouspensky thought that the Grand Gallery held the key to the whole pyramid...

**A:** No.

**Q:** What IS the key to the pyramid?

**A:** Use the math as given.

**Q:** Okay, what was the purpose of the Grand Gallery?

**A:** Energy collector.

**Q:** What were the notches in the floor for?

**A:** Note the sequence.

**Q:** The Queen's chamber is lined with limestone, the King's chamber is lined with black granite. Why the difference?

**A:** Perfection in methods of sound wave construction.

**Q:** What do you mean?

**A:** Where do you suppose the black granite was excavated?

**Q:** I don't know. Not from there, for sure.

**A:** Okay, so what does this mean?

**Q:** I don't know. I thought there might be a difference in the purposes of the room because of the different construction. But, what you seem to be saying is that it was due to improved techniques of construction. So, the Queen's chamber must have been built first. Did they use the Queen's chamber to perfect the methods so that they could then build the Kings' chamber?

**A:** Important thing here is the method, not the purpose.

**Q:** What brought about the perfection in sound wave construction methods?

**A:** Increased knowledge.

**Q:** How long, from start to finish, did it take to build this pyramid?

**A:** 6 months.

**Q:** And their knowledge was so significantly increased from the building of the Queen's chamber, within this period, that the

King's chamber could then be built differently?

A: Yes.

Q: Was the Queen's chamber finished first?

A: Yes.

Q: Was it then used to increase the knowledge?

A: Close.

Q: What is behind the little door in the Southern Shaft?

A: Secrets of the Parthenon.

Q: What are the secrets of the Parthenon?

A: You will see.

Q: How will I see?

A: With your mind's eye.

Q: Speaking of seeing, I have been practicing a little bit with the mirror. Am I supposed to see something IN the mirror, or IN my mind?

A: Both.

Q: So, at some point the mirror will become like a television for me?

A: With proper lighting.

Q: I have been putting the candle on the floor so that I don't actually see it. So far, nothing.

A: Keep going.

Q: When I finally DO see something, is it going to freak me out completely?

**A:** Up to you.

**Q:** There is also supposed to be a secret chamber of Thoth at Heliopolis, that was only to be opened by three as-yet- unborn-kings... so Cheops was told. Is or was there a secret chamber of Thoth at Heliopolis?

**A:** Maybe.

**Q:** Who were or are the 3 unborn kings?

**A:** Not so much people as trends.

**Q:** Okay, like the beasts of Daniel and Revelation. Why were the pyramids in three different sizes?

**A:** Construction refining.

**Q:** Why were they set on a Southwest axis with one of them off-set slightly?

**A:** Magnetic points of locus.

**Q:** Did this have anything to do with symbolizing the belt of Orion?

**A:** Yes.

**Q:** What was the 'Benben' stone?

**A:** Laboratory.

**Q:** Well, nobody really knows, but they think it was like a pyramidal object, and it has been represented as being on top of an obelisk. Why?

**A:** Energy.

**Q:** What do you mean?

**A:** It produces energy.

Q: What kind?

A: EM.

Q: Who currently has the Benben stone?

A: It is buried.

Q: Where?

A: In Sinai.

Q: Who buried it?

A: Saphorus.

Q: Who was that?

A: Top director of Ahragh creed.

Q: What is that?

A: These are tales best left to the discoverer, not the demanderer.

Q: Why are there no inscriptions on the pyramids themselves?

A: Because it was not needed.

Q: When was the pyramid closed?

A: It is not closed, if you have the key.

Q: Who were the first to break into it?

A: Arabs.

Q: Which reminds me: who REALLY burned the library at Alexandria, since I have heard two stories, one that the Christians did it and the other that the Arabs did it. Which?

A: Neither.

Q: Who DID burn it?

**A:** Sword keepers of “the lock.”

**Q:** Who are the Sword Keepers of the Lock?

**A:** Has to do with Illuminati.

**Q:** What was their purpose in burning this library?

**A:** What is the purpose in burning ANY library?

**Q:** To destroy knowledge. Prevent other people from having access to it. Why was the high priest of the Egyptian rites called “Chief of the Observers?”

**A:** Self-explanatory.

**Q:** Well, not really. What, precisely, is he supposed to be observing?

**A:** All who observe, learn.

**Q:** Why was the site at Giza chosen for the pyramids?

**A:** We suspect you have decided to “chuck” your quest, and have us “lead you by the hand,” and therefore, we will refrain from assisting you in this “short-cut” process, as it would not help you ultimately. You have overwhelming, uncontrollable curiosity, but patience pays, my Dear, and “haste makes waste.”

**Q:** Okay. But, I had gone through all this material and had assembled all these questions. I thought this was okay, because I always think that I am not doing enough because I don’t know enough yet. I just think I ought to learn faster.

**A:** You cannot expect the answers to outpace the questions!

**Q:** Alright. Let me just say: I notice that Giza, the Canary Islands, Mt. Everest, and right here where we are sitting, are all along the same parallel - rather close, in fact. The same line of latitude.

**A:** Good observation.

**Q:** Anything else about that?

**A:** Any pyramids on the same latitude as Wroclaw?

**Q:** Well, I don't know! Are there? Never mind, you are gonna say 'discover!'

**A:** Yup.

**Q:** What was the function of the King's chamber?

**A:** Balancer to Queen's chamber.

**Q:** What was the niche in the Queen's chamber, that resembles the crack in the stone in the Arcadian Shepherd's painting, as well as the window in the St. Anthony painting. What was this for?

**A:** Mind accelerator.

**Q:** Was there like a chair there where you could sit, and the energy converged there?

**A:** Close.

**Q:** One thing that has been driving me nuts is the repeated representation of knees. I mean, they are everywhere. In the zodiac of Dendara there is even a leg with the knee joint as a constellation. And in the Bacchus and Ariadne painting, someone is brandishing a leg. What is it with this knee. I know that the word is related to genes, and that the word 'patella' is related to the root of platter, and thus 'grail,' all of these funny ideas are connected to the knee. Even my name!

**A:** Yes, so leave it until you have more pieces.

**Q:** You mean, I will get more pieces and this will make sense?

**A:** Yes.

**Q:** Well, I am lost in a sea of puzzle pieces and I have not even begun to try to assemble them!

**A:** Step by step.

**Q:** We have the phoenix, cranes, herons, doves, ravens, and all are related somehow to speech or writing. Why are all these birds related this way?

**A:** Pass the test.

**Q:** What do you mean 'pass the test'?

**A:** Discover.

**Q:** Well, writing is related to the words for cutting and inscribing and even shearing and sharks. You called the Etruscans 'Penitant Avian Lords,' who were also 'Templar Carriers.' Is this related to these bird images? Then related to speech, writing and shearing?

**A:** Pass the test.

**Q:** So, if you are writing, and you pass the test, then you can be a phoenix, dove or whatever?

**A:** Discover.

**Q:** Ark suggested that the Etruscans may have gotten their alphabet as a mirror image. Could it be that they lived on the 'other side' of the mirror?

**A:** Latter is closer.

**Q:** The 'Opening of the Mouth' ceremony which seems to be the focus of the pyramid texts, the ritual that the authors of this book say that the pyramids were built as a site for, what was this ritual? They say that, on a certain day and time, when the stars were aligned properly, that the dead king would be taken into

the pyramid, wrapped up as a mummy, stood up, and that his son and successor would open his mouth with some sort of implement to 'free his soul' so that it could fly out the shafts and become a star in Orion. Obviously this cannot be the answer.

**A:** No.

**Q:** What was the Opening of the Mouth, performed on the dead Osiris, by Horus his son, said to be done by an adze of iron...

**A:** Merging of souls, or at least it was hoped.

**Q:** Why was it performed with this specifically mentioned iron adze and the 'iron fingers' of the four 'sons of Horus'?

**A:** What does iron do, if it does not conduct?

**Q:** It can also be a magnet, and magnets have poles. What did the Lotus flower, or the four sons represent?

**A:** Open.

**Q:** Now, supposedly, this area, Giza, was originally called Rostau. It took me awhile to realize that this is, literally, Ros-Tau, or Rose-Cross.

**A:** Yet another connection, but why?

**Q:** Well, I don't know! Rostau! That was even before it was called Giza. That is ANCIENT!

**A:** Yes.

**Q:** Okay, there was an implement found in the pyramid when it was opened. It was an implement that was metal and looked like the Aries symbol. What was this instrument for?

**A:** Sceptor.

**Q:** Why this shape? What was the original purpose for the archetype of such a sceptor?

**A:** Duality of energy flow balance.

**Q:** Was this opening of the mouth, this idea of merging of souls, related to the symbolic 'kiss of the Templars'?

**A:** No, but it is food for thought for you.

**Q:** Hmmmm... okay. Okay. Food for thought. There was also a granite ball found in the pyramid...

**A:** Spherical shape serves as its own gravity to balance trapper.

**Q:** Now, the authors of this book connect the belt of Orion to the phallus, which they connect to the Benben stone, which they then connect to this 'transferring of the kingship' from Osiris to Horus in the symbolic opening of the mouth. Nevertheless, this has a genetic connotation in my mind. Well, one thought led to another, and I connected the three stars of the belt of Orion to the three gonads of the Nephilim. Does this mean that the pyramid can tell us how often the Nephilim come here?

**A:** No.

**Q:** Is there any connection between the three stars of the belt of Orion and the three gonads of the Nephilim?

**A:** No.

**Q:** Okay, is the pyramid also telling us cycles of 'return'?

**A:** Maybe, but you should study it more.

**Q:** Certainly I will. Ark is going to try to get the Pyramid Texts for us. Which reminds me, what was the frequent reference to the 'fields of reeds' in these texts?

**A:** Reeds occupy shallow waters.

**Q:** Why shallow waters? What significance?

**A:** Climate was different then, and on that note, Good Night!

**Q:** But I have more questions!!!! Okay, Good Night!

END OF SESSION

## 5.28 August 22, 1997

Frank, Laura, Alice.

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Gorrora.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have a couple of personal questions, and I apologize, but it seems that I need a little advice. Would it cause any detrimental setbacks for me to transfer my accident {lawsuit} from Abrahamson to this woman attorney I talked to the other day?

**A:** Not if you follow it closely, and know every detail “up to the minute.”

**Q:** This gal sounded cooperative. I explained that I had kept out of Abrahamson’s way because I was trusting him to handle it. But, I don’t want Abrahamson to come raving after me either!

**A:** Keep your new attorney on top of the situation... Rest not until it is advisable.

**Q:** What does that mean?

**A:** Vigilance is your shield, complacency is your vulnerability.

**Q:** Well, should I just leave it with Abrahamson?

**A:** That would cost you!

**Q:** Okay. Now, since he is not going to settle as he indicated, and I do not have the funds to get the kids ready for school, I have been thinking about refinancing the note on the house to do so, and also to get some extra for investment purposes as was advised when Sue was here...

**A:** Not wise in this case.

**Q:** Why? You told Sue to borrow money and invest and she would become wealthy.

**A:** Every situation is different. Besides, the sum you are discussing is woefully inadequate. When we advised {Sue} as we did, the markets were valued at slightly over one half of the current value. Individual issues have increased as much as 10,000 percent during this same period. Were you aware of this?

**Q:** Well, no. Is it unwise to do this mortgage altogether?

**A:** Only if you are not extremely careful.

**Q:** In what respect? Is there something in particular I need to watch out for?

**A:** Spending the borrowed sum unwisely.

**Q:** Well, I just want you to know that there is no way my son can go to school with one pair of pants, and that one has holes in it!!!

**A:** Pants are fine. So are clothes, but the enticements are many, and you know what they say about “payback.”

**Q:** Well, maybe I will just forget a mortgage, and keep the kids at home.

**A:** Why do they need to go to school?

**Q:** Well, Ark thinks they ought to.

**A:** Does Arkadiusz have a complete grasp of the American Public Education system of 1997?

**Q:** I don't think so. I have tried to explain it, but there is really no way it can be conveyed.

**A:** Your instincts have led you to this point on this issue, is it time to "pass the baton?" Well??

**Q:** Well, alright. But his instincts are very good on things too! But, if he really KNEW... I mean, even John K\_\_\_\_, who is PART of the system, in a sense...

**A:** What U.S. high school did Arkadiusz attend?

**Q:** Well... he didn't, of course. He REALLY has no idea of the mind controlled zombies running this system...

**A:** What was drug oriented, gang related peer pressure like in Poland in the 1950s?!?

**Q:** Okay. We got a nice letter from UCF. Are they as interested as I think they are?

**A:** Yes.

**Q:** We have pretty much done our homework on this...

**A:** On the right track!

**Q:** They even wrote to him before the advertising period was closed. (F) They probably wanted to give him an extra window of opportunity...

**A:** Yes.

**Q:** Okay, Chloe is probably in Colorado by now. Can you give us a clue as to her reaction to the Denver Airport?

**A:** Headaches, for one.

**Q:** Well, how will she feel about the murals?

**A:** Uneasiness. Strange men starkly observing her photographic efforts...

**Q:** Is she gonna get freaked out?

**A:** Maybe.

**Q:** Anything else about Chloe's trip?

**A:** Wait and see... stay tuned...

**Q:** Okay. Now, we are onto the subject of our friendly local volcano down on Montserrat. What is it up to?

**A:** Seismic swarms... Much fear and concern by officials; muted...

**Q:** Can you give us an idea about what this volcano is going to do? What are the percentages in favor of a cataclysmic eruption in the near future?

**A:** Look to geologic map patterning for answer.

**Q:** What in particular should we be looking for?

**A:** Sequences, locators, historical telltale hints and signs. The signs always point the way for those who bother to read.

**Q:** Is there something about sequences of locators? Is it like a moving series in a general direction or pattern?

**A:** Yes.

**Q:** What general way does the sequence move? East to West? What?

**A:** Reverberatory.

**Q:** So, if something occurs in one place...

**A:** Like the wavelets in a small pool of water.

**Q:** Well, where does the stone drop?

**A:** Look to 18 degrees North and South.

**Q:** What, in specific, is at 18 degrees, that we need to see?

**A:** Magnetic colliders that balance.

**Q:** What do they balance? Magnetic fields of the earth?

**A:** Close.

**Q:** Would there be specific points along this 18 degree line, and if so, how many lines of longitude apart would they be?

**A:** Think of a parallelogram.

**Q:** What is this parallelogram going to tell us?

**A:** Cosmic "puncture points."

**Q:** You mean like cosmic windows?

**A:** Closer.

**Q:** And these parallelograms are located along the 18 degree lines of latitude.

**A:** Yes.

**Q:** And these parallelogram windows... do they straddle this line, or are they above or below it?

**A:** Near, as measured on the surface.

**Q:** Where do they originate from? Within the globe, or externally?

**A:** Both, as in positive/negative charge.

**Q:** What is within the globe, the positive or negative?

**A:** Think of static electricity to “ground” your answer.

**Q:** How many of these parallelograms are there along this 18 degree line of latitude?

**A:** Four shooting energy bars.

**Q:** Where are they shooting energy to, space?

**A:** And back.

**Q:** Okay...

**A:** Like a double double-helix, centered at core of the planet.

**Q:** Do you mean a double helix that winds from the core and touches the surface at the outer turns and then winds back again?

**A:** Need not “wind.” The “strands” can be perfectly straight in orientation.

**Q:** Well, I thought that a helix implied a spiral shape... Are the ends of it at the core and go to the surface, not winding around the surface...

**A:** Close. Do not you see Laura. If you were to draw this correctly, you would unite the very core of any sphere with all of creation?

**Q:** Well, I am having a hard time creating a mental image here!

**A:** We will represent it for you. {Planchette inscribes four lines from center of board to each of four corners and back.} Now, geometrically expand and interpolate.

**Q:** So, you have four lines leading out from the center. And each line represents a ‘double helix.’

**A:** Close.

**Q:** So, this line is really a double line...? How do we include the hydrogen bonds?

**A:** Bonds are not necessary, as we are not speaking of DNA.

**Q:** So, it does have a positive and negative line?

**A:** Yes.

**Q:** Is this just lines, or conduits of energy, or is it segmented in some way?

**A:** Conduit which radiates cosmic balancing principle.

**Q:** Okay, and each point where these conduits reach the surface, expresses as a parallelogram shaped area on the surface?

**A:** Close.

**Q:** And all of these double lines, or conduits, come out in the general area of 18 degrees of latitude.

**A:** Yes.

**Q:** So, those are the points we are looking for to find activity, to then relate to other points around the globe?

**A:** In cyclical sequence. Your “El Nino” ties into this too! Why do you think the ocean water warms up so much, where it does, and cyclically at regular intervals?

**Q:** Seems to me that hurricanes form along this line right off the coast of Africa... are we gonna have any serious hurricanes the rest of this year?

**A:** El Nino will take its toll.

**Q:** Well, El Nino suppresses them.

**A:** Yes.

**Q:** (F) Well, also, when El Nino is active, the winter storms in the Southern U.S. are also ferocious. (L) So, we are gonna have a nasty winter? (F) Probably. (L) Is this winter gonna be really cold and nasty?

**A:** Yes.

**Q:** Well, now that we have experienced a LOT of learning on the subject of this volcano...

**A:** It could happen!! Watch closely!

**Q:** Did Cayce mistake this volcano for Pele?

**A:** Maybe, maybe not!

**Q:** Swell! If it does blow, will we hear it here?

**A:** Wait and see.

**Q:** Is it that when one goes in one of these parallelograms, that the others activate also?

**A:** Reverberate... 1... 2... 3...

**Q:** Well, I want to know why I am feeling so dizzy and lightheaded right now! I feel like I am pressing against the top of my skull trying to get out of my body!

**A:** Volcanic magnetic flush.

**Q:** Good thing I'm not any closer to it! I'm even feeling sick to my stomach! (A) Maybe that means it is close to erupting.

**A:** Maybe.

**Q:** I heard it has been quiet for the past 4 days. That is NOT a good sign! Just because it gets quiet doesn't mean it is gonna quit! (F) I think those people ought to swim away if that is the only way they can leave! If they wait for the British government to dust itself off and DO something! (L) Okay, now, I have been thinking that since the last series of obstructions are in the process of stabilizing, maybe there are other surprises and unexpected events around the corner...

**A:** Maybe for Arkadiusz.

**Q:** What kind of surprise might this be?

**A:** Mount "Anna" may erupt.

**Q:** Very cute! And, if so, what kind of eruption?

**A:** Cataclysmic.

**Q:** Well, SWELL! How about another clue!

**A:** Just be vigilant!

**Q:** Is that it?

**A:** To be forewarned is to be forearmed.

**Q:** Okay, well... anything we need to know tonight? Any other advice... finances, or whatever?

**A:** Has been given. Good Night.

END OF SESSION

## **5.29 September 6, 1997**

Terry, Jan, Alice, Frank, Laura, Anna H.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Plianni.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Is it alright if we ask a couple of personal questions first?

**A:** But of course!

**Q:** Jan wants to know about the trip she and Terry made to New York...

**A:** Wrong mental approach for trip in preparatory phase.

**Q:** (J) What phase do you mean? We went too soon?

**A:** And ideas “askew.” Why did you look upon it as a business trip? You were so uptight and argumentative!! Want to tear this marriage apart?!? Then try another one of those.

**Q:** How can Jan stop being so uptight?

**A:** Tis the two of them, not just Jan.

**Q:** We don’t want to get into marital things here...

**A:** Then why ask the question?

**Q:** (J) That wasn’t the answer I was expecting. We were trying to figure out why Terry’s Aunt acted the way she did...

**A:** Vibrations affect all concerned. Next trip... we suggest pleasure only. Have you noticed how all your trips are for business? Unleash the pursestrings for fun and stop worrying about money.

**Q:** (T) Should Jan call Tracy?

**A:** Yes.

**Q:** (L) Okay, {Ark's}e divorce: the judge has refused to change the hearing date so that it is before he leaves... his idea is that we should wait for this hearing since it is only 9 days and something may be accomplished.

**A:** Stumbling blocks await.

**Q:** In other words, stumbling blocks if he waits for the hearing?

**A:** Your best bet is to concentrate upon the developments of Arkadiusz's career and not expend so much energy on a situation designed to destroy your work.

**Q:** Anything else you want me to tell him about the divorce or the hearing or anything?

**A:** Oooh yes!!!

**Q:** Do it!

**A:** You know, my dear, there are legal and other powers in this country which can supercede the "corruption and shenanigans" taking place in Poland involving this case. All one needs to do is to mine and trawl for same, then utilize properly. The one mistake Arkadiusz is still making is that he is still too trusting of the system to which he is most familiar.

**Q:** Is there some further - if he stays for this hearing will something happen that will cause him to have to stay longer?

**A:** Well, it is not so much that "something will happen," as that the merry-go-round will just turn and turn...

**Q:** (T) Perhaps he should suggest that he can oversee a student

exchange program and use this as leverage to get them to cooperate with him...

**A:** Just mine and trawl!!!

**Q:** Well, we have Fernando...

**A:** Push him.

**Q:** Fernando?

**A:** Yes. And light candles that will burn so as to reveal opportunity where it counts!

**Q:** Why the reference to candles? Is there a deeper meaning to this?

**A:** What do candles do when lit? In the darkened chamber?

**Q:** Well, they illuminate it. Anything else on that subject?

**A:** Build a sphere of influence.

**Q:** What?! (T) Contact your congressman!

**A:** No.

**Q:** Well, what do you mean?

**A:** Who benefits from the proverbial “feather in the cap?”

**Q:** Well, UCF...

**A:** And... Who profits? Who derives gain from publicity?

**Q:** You mean the university where he is right now? I don’t understand...

**A:** No!!!

**Q:** State of Florida?

**A:** And...

**Q:** Enterprise Florida?

**A:** And... Anyone or anything that climbs one more rung up...

**Q:** (T) Everyone who has something to gain from having him here.

**A:** Bingo!

**Q:** (T) Bilirakis... Bill Young...

**A:** Be careful with politicians!!! They are just as likely to bite as to pat.

**Q:** AH questions about the sale of her house.

**A:** Remember, Anna, numbers can elicit magical responses when arranged properly.

[Questions about network marketing scheme AH involved in, omitted as of no interest.]

**Q:** We would like to know if there is any significance to the fact that Mother Theresa and Princess Diana both died within a week of each other?

**A:** Vague.

**Q:** Why didn't you tell us that Princess Diana was going to get killed in an auto accident? That's pretty big news!

**A:** You would not have benefitted, and, besides, it was not predetermined. Just one possible future.

**Q:** Why was this particular future the one that manifested?

**A:** Because it was chosen.

**Q:** Why?

**A:** No escape any other way.

**Q:** For who?

**A:** Diana.

**Q:** Escape from what or who?

**A:** Judgement.

**Q:** Judgement by whom?

**A:** You pick. She was damned if she did and damned if she did not.

**Q:** (T) Let me ask: is she dead?

**A:** Yes.

**Q:** Was there any factor involved in her death that could be connected to any secret groups on the planet that wish to bring down the monarchy?

**A:** No.

**Q:** So, this wasn't part of a plot to bring down the monarchy?

**A:** Soul mates.

**Q:** She and Dodi were soul mates?

**A:** Yes.

**Q:** And they decided to leave together...

**A:** Yes, at another level.

**Q:** Is there any special significance to the fact that they were soul mates?

**A:** No, only way out, and valuable lessons learned by everyone else.

**Q:** So, this was a gift?

**A:** And STO. And the same with Mother Theresa who waited for the proper timing, so that others would notice what you did.

**Q:** (T) Well, things usually happen in threes... who is next?

**A:** "Usually threes" is an old wives tale.

**Q:** So, from one perspective, the death of the Princess is nothing more than a tragic accident?

**A:** We did not say that.

**Q:** So, she chose this because it was the only way out... (T) Was she helped along? Was there more to it than choosing the time and the way?

**A:** There always is.

**Q:** Can you list some of the other factors involved?

**A:** Lessons, that is all there is!!

**Q:** (T) Was she murdered?

**A:** Would murderer agree to be crushed to death?? What future is there in that line of work?

**Q:** Well, there are some Middle Easterners who think there is a LOT of future in that line of work... suicide bombers and so forth as well as persons programmed to do that sort of thing... Was anybody or any other thing behind this?

**A:** No.

**Q:** Was the driver drunk?

**A:** Yes.

**Q:** (AH) Would she like to tell us something?

**A:** Statement as such would not benefit this work.

**Q:** Did Dodi give Diana the purported ring as an engagement ring?

**A:** Yes, but that is incidental to the “bigger picture.”

**Q:** What IS the bigger picture?

**A:** STO.

**Q:** You are saying that this was an STO act? (T) That’s what they said...

**A:** No.

**Q:** That’s not what they said. They said that this act would make others realize what they did and would start thinking about STO.

**A:** Yes.

**Q:** Are you saying that this was done by Diana as a service to others?

**A:** Part.

**Q:** I get the feeling that there is something we are not getting here...

**A:** Maybe we are waiting for you to figure it out on your own!

**Q:** When I read the article by Rupert Cornwell and there was a paragraph that was identical to what I had written on the original web-page, and then he made the remark about the circle of daggers surrounding Prince Charles, that he was in the center of a circle of sharp daggers... that struck me as a rather bizarre thing to say. With all the theories going around about the various families and bloodlines killing each other off from time to time... and this is connected with all this other underground business, CIA, KGB, God knows what else... Is the way the press plays the

event a capitalizing on a circumstance on behalf of such conspiratorial groups?

**A:** If so, that is nothing new.

**Q:** Was this Cornwell saying in this article that the “dagger men” are gathered around Charles and that they are going to use this event to bring him down?

**A:** No.

**Q:** (T) Were the deaths, in addition to generating feelings of STO, also to speed up the process of the changing of the systems, the entering the new realms...

**A:** Close.

**Q:** There is still something we are not getting. And, they are waiting for me to figure it out - okay. But, give me a clue!

**A:** You will do so when it is appropriate.

**Q:** Okay, there is an issue here and it is just not the appropriate time to address it. Jan asked about the significance of the circle of daggers...

**A:** Circles are always significant.

**Q:** (T) Well, the only way out of a circle of daggers is through the center... (L) Or up... (T) The daggers may not be pointed at him to take him out but to limit him... or to move him to the center... (L) Once before you told...

**A:** Seven.

**Q:** Seven what?

**A:** Ask your question.

**Q:** Well, I was going to ask... once before you told us that the monarchy in England was going to come to a halt and that Charles would never be king... what are the probabilities that one of the sons will?

**A:** Are you trying to coerce a response?

**Q:** No, I'm just trying to be sneaky!

**A:** Well, forget it!!!

**Q:** (T) Does this have to do with getting Charles... is this whole thing designed to get Charles to take charge the way he is supposed to... to get his center back...

**A:** You are making a mountain where the universe sees a molehill.

**Q:** Okay, change gears: I read the other day that the word "Isca-riot" means "from Sikarios," and this connects the Jesus story di-rectly to my Paran Sikarios... the Percys, piercing, PS, etc. Could you comment on the fact that Judas Iscariot was "from Sikarios." Was he a member of the Paran Sikarios, the Assassini, a dagger man?

**A:** You are not to be told some things yet, because of your ten-dency to share before realizing the ramifications it can bring to your doorstep.

**Q:** Anything else for tonight?

**A:** No, Goodbye.

END OF SESSION

## 5.30 September 13, 1997

Frank, Violette, Alice, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Mannah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Well, you must be aware that I wrote a letter to the Polish Embassy this past week explaining to them Ark's situation and how detrimental this was, based on your advice last week, 'creating a sphere of influence' sort of thing. Could you indicate whether this is going to create a chain reaction of some sort, and if so, what sort it will be?

**A:** You are assuming...

**Q:** I am assuming what? I just asked if it was going to create a chain reaction, and if so, what sort? **A:** Maybe you should keep mining and trolling.

**Q:** So, I was making an assumption that this was along the line of your advice?

**A:** It was, but more sources needed.

**Q:** Ummm... could you give me a hint on that. I sent a letter to Fernando and haven't heard anything back from him...

**A:** Keep at it, but make sure it is right places, lest you spill the beans.

**Q:** Let me ask this: what I have written to the embassy is not going to cause Ark any trouble, is it?

**A:** We hope not!

**Q:** Is there a possibility that it could?

**A:** What would be your guess? Would you think it a good idea to call “911” to report that someone is trying to steal your cache of cocaine?

**Q:** Jeez! So, in other words, you are saying I screwed up?!

**A:** No, when one is learning important lessons, it is not a “screw up.”

**Q:** It’s a screw up if something seriously detrimental happens to Ark because of what I did. Now you have me worried. My neck is going to start tightening up and hurting again!

**A:** Well, my dear, it is better you learn with minor problems to look before you leap, than with explosively major ones down the road.

**Q:** Alright, help me out here, give me a clue as to how to get out of this mess!

**A:** It is more of a bugbite... Sometimes one scratches, and sometimes not. And if one scratches, fortunately, it is only rarely then that it gets infected...

**Q:** It is like a bugbite, don’t scratch it?

**A:** No. To the Poles, it is like a bugbite. But we suggest you not bite the Poles again.

**Q:** Well, the whole thing about the rescheduling of the court date just screams of ‘tampering.’ He is scheduled to come here on the 12th, and the courts know this and rescheduled for the 20th. He’s

not staying for it! You see what I am saying here? This is why I wrote, to complain about this obvious maneuvering of the legal system and see if there was not something that could be done!

**A:** You have missed the obvious!

**Q:** What is the obvious? The obvious thing is that he has no career...

**A:** “Brain Drain” does not feather the cap of the one drained. Brain “gain” does feather the cap of the one who gains!!!

**Q:** I know! I think that sometimes you guys say things that are like dangling little baits, and I jump for this bait the same way I jumped for the ceiling to put this damn thing on my ceiling to do this psychomantium, caused a serious injury, and has now caused a problem because I wrote to this embassy - I can't just write to some strange person.... what are you talking about here?

**A:** Look before you leap.

**Q:** Yeah! I am gonna stop listening to you guys. All you do is get me in trouble!

**A:** That is ridiculous, and you know it! We did not tell you to write to the Polish Embassy!

**Q:** Well they were the only ones who could solve what seemed to me to be the apparent problem which is to help him to get his divorce. They are going to have to be approached and dealt with...

**A:** No, no, no. Use liaisons within benefitting party.

**Q:** Don't you think it would be a black mark against him in terms of him being considered for the job for them to know the situation about his divorce, that he is having problems?

**A:** The American Embassy is located in Warsaw.

**Q:** Should he go to the American Embassy, or should I write to the American Embassy?

**A:** Either/or. The State of Florida has many trade and economic development offices located in European cities.

**Q:** Should Ark go to the American Embassy in Warsaw?

**A:** Not a bad idea, and you could contact them.

**Q:** Alright. Let's get off the subject...

**A:** Build your sphere with those who will not want to pop it.

**Q:** Is there any damage control I can do right now?

**A:** With any luck you will not need it. Usually in a case like this, the offending parties will believe their most effective defence is to ignore the inquest.

**Q:** Is there anything further on this subject, I am so stressed out on it and my neck is completely seized up now. Okay, these people, this Reni and Seila Santana up in Canada - they claim to be channeling some bizarre critters... 'to document to you of the veracity of what I have just stated, I have attached to this letter an extract of the book 'Beware of the wolf in the bushes of delight...'

(F) I can't picture what a person who has these thoughts actually looks like... reminds me of Bob Racine.

(L) {Reading} 'Undoubtedly the majority contend(sic) themselves with enforcing less strict regime upon the backs of their scientists by strictly employing channels in the helping of them out... Neutral source, of course, for eclipted among the starseed are among those traitors to the cause who without adept permission from the high council have portrayed as to be of the gray mission from time to time. Then the information brought down under circumstances such as these, will leave the scientists more or less with

an imbalance of thoughts rather than attaining to the full scope of memorandum of which is their right to come out front with their desire of learning intricate designing would label them indeed within the crucible of possibilities therewith leading them into a much needed and fuller encompassing of facts therein.'

(F) That sounds like somebody who thinks that if you string together a bunch of important sounding words, it will make sense...

(L) Well, it gets better! {Reads} 'We would offer a bigotry in the light of expiring your greatest potential escapading in the form of doctrinal theory. We will always advise whether or not we will be willing to work within their planetary action decidedly for the good of mankind. And there are some of which we are willing to take action in order to prove a helpmeet too.' (F) What the heck does any of that mean? It just means absolutely nothing!

(L) 'Make of the surenes that ye, each one be of the showing of this document herewith written for them too. Thank you all for your attention on this midriff of informational data. Hatonn out on frequency table 9.3 faraplex record time.'

(V) That's my favorite! 'Faraplex!'

(F) I don't know why you are so confounded on this term 'faraplex.' It is a sister of 'godspark!'

(L) {Reads more}'We should let you know that we have reasons to believe that our webpage is being tampered with by others who have our file transfer program and password... obviously the blinkingsop matter must be the elite's most desperately kept secret and dangerous to the upper echelon of the world...' Oh my god!

(F) That is too hopelessly bad to even qualify as disinformation and, at the same time, if any upper echelon in the world is wast-

ing their time checking that out, then we have nothing to worry about!

(L) Well, tell me, what is going on with these people?

A: Static.

Q: Where does this static emanate from?

A: Mind of the communicator.

Q: Are you saying from the minds of the people who are writing this?

A: There is only one.

Q: There is only one, and this one person takes two roles and pretends to be two people?

A: Close enough.

Q: (V) Is this a psychotic person?

A: No, this is a harmless waif.

Q: (V) So there's no such thing as a 'faraplex?' I'm so disappointed!

A: Mirth! "Faraplex" is a shopping center built by Farakahn. Try hot lemon salve for your neck.

Q: (V) Well, I KNEW I'd heard the word before! (L) I never heard of lemon salve. Where do I get it or how do I make it?

A: Cloth wrapped sponge soaked in hot lemon juice.

Q: Yesterday Ark said he found an ad for an opening for research in quantum computers at some lab in North Carolina. He wants to know if there is any future for us in pursuing such a thing.

**A:** Up to you, yes, but remember, such enterprises can be most decidedly temporary!

**Q:** (V) I want to know what it is - the secret potion in the lemon and the sponge - and how it is going to help relieve this problem with the neck? (A) Ask if it will help my neck?

**A:** Ascorbic acid penetrates and cleanses and soothes.

**Q:** I want to get back to Reni and Seila. You said that it was one person. Male or female?

**A:** Male.

**Q:** And this guy has an alternate personality that is a female?

**A:** This male is a “computer nerd” with a need to be loved/admired.

**Q:** Let me ask quickly, does giving Reiki to a person who has a bacterial or viral infection increase the potential of the infection? What is the effect?

**A:** Broad inquiry, but Reiki is best suited to conditions not microbially induced.

**Q:** Is it the case that you are actually feeding the microbes with energy?

**A:** Can, or effects can cancel each other out.

**Q:** What about when you are dealing with cancer... not, cancers are not microbial necessarily... but some have been shown to be microbial...

**A:** Microbially triggered.

**Q:** So cancers are microbially triggered?

**A:** Some.

**Q:** (V) As we practice Reiki, how do we know if we are doing the person more harm than good? How do we decide if we are going to make them sicker or better?

**A:** Ask if they are suffering from infection.

**Q:** What if they don't know? There are a lot of times that a person doesn't know.

**A:** True, but odds are in your favor.

**Q:** (V) So the viruses cannot be treated by etherical healing? Is there any method that will work other than Reiki?

**A:** Prayer.

**Q:** I know this has been a rather non-productive session, but I would still like to ask if there is anything you can see that we need to know, that we haven't asked, that we ought to ask, in which case I would like to ask that you would tell us anyway!

**A:** Nolo contendere.

**Q:** Is that the answer, or are you just being funny with me?

**A:** Latter.

**Q:** No contest. Okay, if there is nothing else, then we will say goodnight... I am so miserable! What is going on with this pain?

**A:** Maybe some ongoing DNA evolvment.

**Q:** What does DNA have to do with pain in the shoulder and neck, especially when you get it as a result of being stupid leap-  
ing about on piles of pillows on the bed like a lunatic...

**A:** Good Night!

END OF SESSION

## 5.31 September 20, 1997

Frank, Anna H., Alice, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Vialli.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I want to start off tonight with a question that has been bugging me all week: I want to know why whales sing?

**A:** Communication.

**Q:** They sing to communicate. I kind of figured that. Is this an elaborate and complicated form of communication?

**A:** Yes.

**Q:** Is it as complicated as a spoken language such as what we know?

**A:** More so.

**Q:** Is there any key you could give us as to how to interpret this language?

**A:** You would need to think in an entirely different way.

**Q:** What way would this be? Is it an image based language, or is it tone based? Do the tones evoke images or concepts and ideas?

**A:** It is psionic/practical wave modulation through flange scopotic transmisson.

**Q:** Could you define your use of psionic for me?

**A:** Seeing, hearing, feeling, absorption and response in simultaneous thought wave profile.

**Q:** Okay. What do whales talk about?

**A:** Not correct concept.

**Q:** What is the correct concept?

**A:** Total thought transference.

**Q:** What subjects interest whales enough that they exert energy to transfer those thoughts?

**A:** No need for “subjects” when one has total simultaneous comprehension.

**Q:** What do whales feel about human beings?

**A:** Wrong idea again!! You are not grasping this!!!

**Q:** I know that! I’m trying to... how do they feel about human beings?!

**A:** Each whale is able to absorb all truths that exist past, present and future at all “times.”

**Q:** Well then, they are pretty awesome creatures and humans ought not to be hunting them down and killing them!

**A:** Lesson profiles interject experience.

**Q:** Who gets the experience interjected, us or them? We must be the ones getting the lesson here...

**A:** All there is is lessons.

**Q:** If there is anything else you want to tell us about whales, because obviously I am not understanding here. Are dolphins sim-

ilar in make-up and ability?

**A:** Not “yet.”

**Q:** They are down on the scale from whales. I think that whales are absolutely awesome. Are whale souls sort of like a composite soul - sort of like a bunch of dolphin souls make up a whale soul?

**A:** No.

**Q:** Is a whale soul always a whale soul from the beginning?

**A:** Whale is unified soul.

**Q:** Unified from what to what?

**A:** All whales share the same soul!

**Q:** Are human beings like that or moving in that direction, becoming unified soul?

**A:** Fragmented.

**Q:** Human beings are a fragmented soul. Were we once a unified soul?

**A:** Once and future.

**Q:** When one is a unified soul, then obviously all the experiences of the former fragments become everyone’s experience, so to speak. Is that correct?

**A:** Close.

**Q:** Anna wants to ask a question. She feels very drawn to South Carolina...

**A:** Anna should be the one to ask us.

**Q:** (A) Because I am so drawn to the area, I wonder if I had a past life in South Carolina?

**A:** No.

**Q:** (A) What past life with Luther, my husband, if any?

**A:** Before we get to that, you should beware; forces can be employed to either direct or misdirect 3rd density beings...

**Q:** (A) What do you mean by that? I don't understand...

**A:** When one is "drawn," who or what is doing the "drawing" and why?

**Q:** (A) You are talking now about South Carolina, I was just asking about my husband... what kind of past life I had with him...

**A:** We told you, "before we get to that."

**Q:** So, that was about the South Carolina issue and not your husband...

**A:** Just for your information: South Carolina is extraordinarily seismically unstable!

**Q:** (A) So that means that I should not move... (L) Oh, they won't tell you what to do! (A) So this place where the property is is not safe?

**A:** If things on your planet do indeed "heat up," as is certainly one possible future scenario from your viewpoint, it might not be a bad idea to avoid standing directly on the "burners."

**Q:** So, you are saying that South Carolina is one of the burners that might get turned on when things heat up?

**A:** Where one finds faults, one shall find slippage.

**Q:** (F) I have heard that the most recent ideas say that the fault system that runs under the Caribbean including Montserrat, for example, juts off to the Northwest at about Charleston and then cuts under the Appalachians connecting to the New Madrid fault

in Missouri in a sort of direct line from Charleston to there. (A) What year are they predicting? (F) Well, they aren't predicting anything, but they have been saying for years that there are a number of places in the Eastern United States that have been forgotten because all the attention has been on California. But, historically speaking, there have been earthquakes in several places in the Central Eastern US, some of which were worse than ANY recorded on the West Coast. (L) Okay, so they brought the subject up of being 'drawn' to this place, and the question was asked as to who or what was doing the drawing and, of course, why? I would say that...

**A:** Anna ask, please.

**Q:** (A) The place where we have the property is not safe?

**A:** "Safety" is a relative term.

**Q:** (L) No place is completely safe, but some places are safer than others. You say that something is drawing you there... I think I would go in that direction...

**A:** Anna ask, please.

**Q:** (A) Okay, I don't understand...

**A:** If one is "drawn," why is this??

**Q:** (A) I am drawn there because we have the property there.

**A:** What if you had property in Bangladesh? Would you then be drawn there instead?

**Q:** (L) They are trying to make you think. Why are you drawn there.

**A:** Is it really just because you own property there?

**Q:** (A) It is not only that. I like it there. Why does my husband like it so much too?

**A:** Ask yourself this.

**Q:** (A) There are the four seasons and nice weather.

**A:** Is South Carolina the only place with “nice weather?”

**Q:** (A) No, but we have looked all over. The city is so nice. It is beautiful there. I love it. We have looked all over - California, Arizona - it is just meant to be. We are drawn there, no matter what. What is drawing me to South Carolina?

**A:** Forces unseen.

**Q:** (A) Unseen forces are drawing me there? What kind of forces?

**A:** 4th density.

**Q:** (A) Well, anyway, I’m not going to think about it now. Is it possible to sell the house this month?

**A:** Of course.

**Q:** (L) You can sell anything if you drop the price enough. (A) The company that I am working with, am I going to be happy with them?

**A:** Vague.

**Q:** (A) RJ Morgan. The work. Long term?

**A:** If you “play your cards right.”

**Q:** (A) Well, that’s true. (L) Okay, let’s get to the question about the military crashes. There have been 4 crashes of military planes in the past week. Were any of these crashes related to the activity of negative forces?

**A:** Yes. But then again, the entire concept and working reality of the “military” is directly related to “negative forces.”

**Q:** Were any of these plane crashes, in specific, more unusual than the others in terms of the reasons for the crash?

**A:** Stealth fighter contains some alien inspired technology.

**Q:** Did this alien technology contribute to the crash of this plane?

**A:** In an indirect way.

**Q:** Frank has described the crash of the stealth bomber. What caused this crash?

**A:** Gyromagnetic imbalance induced by frame material bleedthrough transdensity.

**Q:** Are you saying that the frame material of the stealth bomber is a transdensity material?

**A:** Yes.

**Q:** And that there was a bleedthrough of a controlling influence from another density that upset the gyro...

**A:** Close.

**Q:** Was this deliberate on the part of the 4th density beings to cause this crash?

**A:** No.

**Q:** Was it a normal reaction because it was passing in and out of higher density airspace? Was there 4th density bleedthrough in the area?

**A:** Close. And interference near you is disrupting this communication.

**Q:** What interference?

**A:** Children.

**Q:** [Children are sent to bed] Why does the influence of the children interfere with the communication? The noise or their auric profiles?

**A:** Both.

**Q:** What is going to make my arm feel better. The pain is really getting out of control.

**A:** How did the salve work?

**Q:** It helps. Should I just continue using it. I had a lot of relief, but then, as today progressed, it seized up again. Is the primary source the neck, the shoulder or the arm?

**A:** Neck.

**Q:** On these crashed airplanes, were any of the others the result of 4th density bleedthrough?

**A:** No.

**Q:** Okay, I got an e-mail from Val Valerian. He was interested in the Diana thing and how that relates to the Pandora's Box business and the Denver Airport, so he wrote something, but I found that this was basically something that someone else had posted on the web. Anyway, he claimed to be a descendant of Anne Boleyn, is this correct?

**A:** Open.

**Q:** Well, let me say this: the only descendant of Anne Boleyn that is known is Queen Elizabeth I who, supposedly died without issue. So, I don't understand how anyone could be a descendant of Anne Boleyn without coming through Elizabeth. Did Anne Boleyn have any other children besides Elizabeth?

A: Yes.

Q: Who?

A: Look and you shall find clue.

Q: Did she have this other child before or after Elizabeth?

A: Before.

Q: And who was the father of this other child?

A: Henry VIII.

Q: Well, why do we never hear about this other child?

A: Why do you never hear about so many things?

Q: Was this a child that was born before their marriage, and therefore illegitimate?

A: Close.

Q: Was it male or female?

A: Female.

Q: Well, that is bizarre! Was Sir Francis Bacon the son of Elizabeth as was rumored?

A: No.

Q: But there was another daughter of Anne and Henry?

A: Yes.

Q: It wasn't Jane Grey?

A: No.

Q: But if I read the history, I will figure out who it was?

A: Yes. And on that note... good night.

END OF SESSION

## 5.32 October 4, 1997

Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Lororra.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have a few questions on the subject of Cassiopaea. On several occasions you have described Cassiopaea or the Cassiopaeans, the unified thought form light beings that transmit through Cassiopaea, as being the 'front line of the universe's system of natural balance.' On another occasion when Roxanne was here, she was asking questions about Isis and you said that Isis was a 'vanguard.' Now, it seems to me that something that is at the front line is also a vanguard - that the definitions are interchangeable, or similar. In reading through all the various myths and legends, it occurs to me that the similarity between the imagery of Queen Cassiopaea and Isis is quite striking. What is the relationship between Queen Cassiopaea, archetypally speaking, and Isis?

**A:** Subliminal.

**Q:** It is subliminal? The other thing I noticed about the word 'Isis' is that it can be slightly altered to make 'I Zeus.' And, Perseus can be 'per Zeus' and Persia can be made to say 'per ziu.' One of the

oldest etymological roots for the word 'God' is 'ziu' from which we get 'deu.' These all represent the English translation of 'for God,' with Perceval being 'per ziu val' or 'strong for God.' Could you comment on these relationships?

**A:** Interconnected by trilingual learning curve.

**Q:** Any further comments?

**A:** No.

**Q:** I also noticed that the word 'Osiris' could also be slightly modified to say 'of Sirius.' Comment, please.

**A:** Sirius was regarded highly in your "past."

**Q:** What was the foundation of this regard for Sirius?

**A:** "From whence cometh, is seen that which knows no limitation."

**Q:** Could you elaborate on that?

**A:** Could, but will not.

**Q:** Why?

**A:** Because you can!

**Q:** In reading the transcripts, I came across a reference to a 'pact' made by a group of STS individuals, and it was called 'Rosteem,' and that this was the origin of the Rosicrucians. In the book 'The Orion Mystery,' it talks about the fact that Giza was formerly known as RosTau, which is 'Rose Cross.' Essentially, I would like to understand the symbology of the Rose affixed to the Cross. It seems to me that the imagery of Jesus nailed to the Cross is actually the Rose affixed to the Cross. How does Jesus relate to the Rose?

**A:** No, it is from the Rose arose the Cross.

**Q:** Oh.... I see...

**A:** Said the blind man.

**Q:** Elaborate, please. Are you saying that what I am seeing is not correct?

**A:** No, mirth!

**Q:** It is from the Rose that the Cross arose... and, therefore, the cross symbolizes...

**A:** Ask.

**Q:** What does the cross symbolize?

**A:** The symbology is not the issue. It is the effect.

**Q:** What is the effect of the cross?

**A:** All that has followed it.

**Q:** Could you list some of these to give me a clue?

**A:** You know these.

**Q:** In the same vein, I have noticed that there are two classes of arachnids. There are scorpions and there are spiders. The zodiac was changed by taking the pincers away from the Scorpion and creating out of them the sign of Libra. This image was one of a woman holding a balance scales, usually blindfolded. This was done within recorded history, but was probably formalized through the occult traditions of Kaballa. Now, in trying to figure out who has on what color hat, if there is such a thing, I have come to a tentative conclusion that the spider, or spinner of webs, is the Rosicrucian encampment, and that the Scorpion represents the seeker of wisdom... because, in fact, the word for Scorpio comes from the same root as that which means to pierce or unveil. Therefore, the Scorpion is also Perseus, per Ziu, or 'for

God.’ And the Rosicrucians are the ‘other,’ so to speak. Can you elaborate on this for me? Or comment?

**A:** What a tangled web we spin, when we must not let you in.

**Q:** So, the Rose is the Spider?

**A:** Different objective.

**Q:** So, the Rose, with its thorns... can you help me with this Rose image... is the Rose the Scorpion?

**A:** No. Different objective... Rose is a stand alone symbol.

**Q:** So, the Rose can be used by either side, is that it?

**A:** Maybe.

**Q:** Another derivation of the word root of Scorpio is ‘skopos,’ or ‘to see.’ You said that the human race was seeded on a planet in the constellation Scorpio, and, therefore, when the zodiac was set up and the clues were laid out, it seems to me that the insertion of the sign of Libra was designed to take power away from human beings, to take their hands away, to prevent them from seeing, to make them defenseless. Is this imagery close?

**A:** On track.

**Q:** And the Scorpion is represented in four ways: the scorpion, the lizard, the eagle and the dove. So, there are four levels of experience. Also, Minerva/Athena was the daughter of Zeus alone. She was known as the ‘tamer of horses,’ and was a Virgin Goddess. She was also known as ‘Parthenos’ meaning separation. Is this part of the imagery of the creation of Eve from the rib of Adam, so to speak, or the separation of knowledge from soul, or the veil between the world of 3rd density and 4th density?

**A:** Close.

**Q:** Along this same line, in the astrological symbology, the different stars are designated as being located on different parts of the body in a rather arbitrary way that does not seem to necessarily have a lot to do with the actual configuration of the stars themselves. King Cepheus in the sign of Aries, the consort of Cassiopea, has a star in the right shoulder. The name of this star in Arabic means 'redeemer. In the imagery of the crucifixion, Jesus is depicted as carrying the cross on his shoulder as if to say that he is the old king who must die to make way for the new one... Additionally, many of us have been experiencing the pain in the shoulder, arm, and shoulder-blade for some time. You have, on occasion, related this to DNA changes. Is it that certain individuals are connected to other densities through the windows of the stars in certain constellations, and the clues are found in the location of the stars in the figures of the constellations relating to the areas of the body where pockets in the etheric field are points of activation of DNA, and that these relate to certain pains and discomforts?

**A:** Okay.

**Q:** Is that okay as in I am onto something?

**A:** Maybe...

**Q:** Can you help me out a little here?

**A:** Too do so would compromise your discoveries.

**Q:** Are the body pains in these areas related?

**A:** To...?

**Q:** Obviously this is a big one... it relates directly to the crossed shin bones, the skull, the shoulder blades, knees, elbows and a lot of other symbology... the exposed breast of the Masonic initiate. In the Bible where it says that Jesus was scourged, it is actu-

ally a word that usually means the pressing and squeezing that cause milk to express from the breast. On page 33 of 'Bringers of the Dawn,' Barbara Marciniak writes: 'there have been different portals on earth that have allowed different species, creator gods from space, to insert themselves. One of the huge portals that presently being fought over is the portal of the Middle East. If you think back over the history of the Earth, you will realize how many dramas of religion and civilization have been introduced in that portal. It's a huge portal with a radius of 1,000 miles or so. This is why there is so much activity in the Middle East. This is the portal that the Lizzies use.' Could you comment on that information. Are there other portals that are that large which are used by positive entities?

**A:** Portal is dual.

**Q:** So any can use it. Is it correct that this is a large portal over the Middle East?

**A:** Statements made in publication are close, but not absolute.

**Q:** Is this idea of portals extremely significant. Are they fought over?

**A:** Yes, but you do not need to explore these truths, until you have learned more.

**Q:** Okay. Marciniak also says that there are benevolent Lizzies. You once said that the incidence of benevolent Lizzies was so rare as to be not worth mentioning. Is it true that there are benevolent Lizzies as she says?

**A:** There are benevolences evident even in the darkest circles.

**Q:** Is the Rose symbolic of Prime Creator and the Cross the conflict between STS and STO?

**A:** No.

**Q:** Anything you CAN tell me?

**A:** You are so inquisitive, you will uncover all you seek, even without us telling you directly.

**Q:** Alright. Once before you talked about Mexico. Could you give us an update on Mexico?

**A:** Vague.

**Q:** Okay, we have been invited there for a little visit, and I just wanted to make sure that travel there would be safe.

**A:** Okay for some.

**Q:** When you say that, what do you mean precisely?

**A:** Many meanings.

**Q:** You say it is okay for some, okay for Ark and me?

**A:** Many possibilities...

**Q:** Of what kind? From what I understand they have some major research going on over there of some kind...

**A:** They do. But it is a challenge for a third density vehicle to remain unscathed.

**Q:** Okay, that leads to my next question: last Friday night's event with my daughter, Anna. Was this what you meant when you said that "Mt. Anna may erupt cataclysmically?" Was this MY Anna?

**A:** Notice the proliferation of namesakes?

**Q:** Yes.

**A:** What connections?!? Hmm...

**Q:** I don't know. Are you going to help me out here? What is the connection?

**A:** Why was name given?

**Q:** Well, her name is Arianna, and we called her Anna because it was short and easy...

**A:** You were nudged thusly... synchronicity.

**Q:** There is something you are trying to say. Is more than ONE Mt. Anna going to erupt?

**A:** Why not all?

**Q:** Was this "eruption" with my Anna all there is going to be in that area? I mean, I don't think I could take much more!

**A:** Yes, but there are underlying factors begging further examination.

**Q:** What are a couple of these factors? I need something to follow?

**A:** Deep psychic connector profile. Those who sleep with grand thoughts present vulnerability beyond the same as that seen from the combination of all others!

**Q:** Are you saying that my Anna sleeps with grand thoughts?

**A:** Yes.

**Q:** What can I do to help her?

**A:** Needs major examination by those of supreme and legitimate psychic power.

**Q:** Can you suggest?

**A:** You will find through inimitable sources.

**Q:** Well, I need something to help her soon because what happened last Friday night nearly killed me... were these kids abducted?

**A:** What have you been told?

**Q:** That the 4th density STS will try to hurt me anyway they can. Let me ask this, how much actual alcohol did Anna drink?

**A:** See last response.

**Q:** Well, from what the kids said, I would have to say yes. Has she been programmed in some way?

**A:** You are being cloaked.

**Q:** What am I being cloaked by?

**A:** Connected forces.

**Q:** Well, give me a clue! I have been so concerned that Ark be protected that I got hit on my blind side.

**A:** And if Ark wishes to travel widely in your accompaniment, perhaps he will realize that a coupling solitude is not wise under the circumstances! We meant everything we said in response to your inquiry to and about Mexico, and in ways you may not have thought about!

**Q:** Do you mean that Ark and I should not travel to Mexico and leave the children?

**A:** Level 1 warning: if you do travel alone, you will return to a house with one less resident!!!

**Q:** Does that mean if we travel anywhere?

**A:** All such exercises are extremely risky right now. You must see that attack increases as one nears certain knowledge plateaus, but once reached, danger evaporates.

**Q:** Are any of the other children, besides Anna...

**A:** We will tell you this. And then we hope you will remember it. And we do this because of our love and concern. What you do with this direct infusion of knowledge is your choice. But we only do this when your mission is directly threatened. When attack is greatest, those most threatening to STS forces receive extremely powerful and direct programming designed to cause them to destroy themselves. The same can happen to those most sensitive who are near to the potential discoverers. You have seen this before. It shall return at periodic intervals.

**Q:** Is that all you want to say on this?

**A:** For now.

**Q:** I have noticed a slowdown in my awareness expansion. Is there anything I can or should do to get myself back on track?

**A:** Not to worry, all things cycle.

**Q:** Anything further?

**A:** We suggest you discuss tonight's messages. Goodbye.

END OF SESSION

## **5.33 October 7, 1997**

Laura, Frank, Anna

(Note: there are two Anna's mentioned in this session, one is Ark's ex-wife, the other is my daughter AKA Andromeda on the forum.)

**Q:** Who do we have with us this evening?

**A:** Aldronn.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** My first question: Is there any chance that actions will be taken against Ark before he leaves by the scheduled itinerary?

**A:** You must realize that actions have already been taken against Arkadiusz, continue to be taken against Arkadiusz, and will be taken Arkadiusz, as has been determined and has been in process for an eternity. Remember, all events as you perceive them are merely from the standpoint of your perception. There is no past or future. All is one.

**Q:** In specific, are there any plans in place to attempt to prevent him from getting on the plane to come here?

**A:** Not as such. First of all, one must know, in the consciousness of those in the flesh who surround Arkadiusz, there is no great awareness of the consequences to be derived from the intended travel plans. Therefore, this is not viewed as a critical juncture. However, the plans that may be undertaken, and are being undertaken, and have been undertaken, to prevent a union between yourself and Arkadiusz are always in process, and are given energy by Arkadiusz's desire to retain a residency foothold in the land of his birth in this incarnation. It is this emotional attachment that feeds the energy which is thusly used against him. This may be breaking down now, but it is none too soon.

**Q:** Could you outline what intentions are in process through his daughter and Anna?

**A:** There is no definite plan as you perceive it. It is a constantly changing situation. The one and only goal is to continue to imprison his mind as it has been. For this purpose, it is like chasing a moving target, as you would put it.

**Q:** Can you tell me what was done with the items stolen from his luggage?

**A:** The property is still in the possession of the one who stole it.

**Q:** Will I ever get it back?

**A:** No.

**Q:** So, it is a waste of time to try?

**A:** Not only a waste of time, a waste of energy. Energy is far more important because it DOES exist and time does not.

**Q:** Would it be advisable for him to try to leave and come early, or is it okay to stay with the schedule?

**A:** That is not something that is of critical importance, but the wisest course of action would be to maintain the strength needed to follow through with the plans already in place. This may take an increase in energy expenditure.

**Q:** How can we do this?

**A:** We cannot do this. Only Arkadiusz can facilitate that.

**Q:** How?

**A:** As we have already mentioned earlier, there is an emotional factor involved, which one can understand if one has a sympathetic outlook, as we do. Leaving one's homeland with the possibility of never returning is, for anyone who is in 3rd density reality, an extraordinarily traumatic event. And, as such, normally 3rd density beings make every attempt to retain an attachment in order to satisfy the emotional need to not completely depart, especially when there are other 3rd density beings in that physical locator remaining behind. No matter what you have been told in conversation, the desire to retain residency in the homeland of Arkadiusz is very great indeed. You have not been told

the extent of this desire. You have, in fact, been led to believe that the desire is minimal. This is not the case. Do you not see this?

**Q:** Yes.

**A:** Now, situations are unfolding that will determine exactly what direction events will follow. But, of course, one must always be aware of the fact that there is no past and no future and the present incorporates all realities.

**Q:** What are the probabilities for these events?

**A:** That would be an improper question to answer, as the course of events are easily controllable by those involved.

**Q:** So, it amounts to the fact that Anna is forcing a choice between me and his homeland?

**A:** No. Her objectives, as she perceives them, even though they are not entirely her own, are to retain possession of him, possession of material goods to be derived by possession of him, and possession of currency, which is connected inexorably to him and his reality. Her objectives are not, as you perceive them, to force him to choose between his homeland and you. The dilemma of choosing between his homeland and you is within Arkadiusz himself.

**Q:** Does his daughter really believe he is crazy?

**A:** Well, the term “crazy” is nebulous at best. But, his daughter has been influenced by Anna to believe as she does. Her concern also is derived from STS desires; desires that are financial and emotional in nature. There is also a fear of a separation which feeds the STS desires of Anna, so that the two work in tandem to the same end, all of which is influenced from higher density levels, namely Density level 4 STS.

**Q:** Change of subject: Two Fridays ago my Anna was in the hospital. I am having some difficulty understanding what happened. Can you tell me exactly what DID occur in that event?

**A:** We suggest that you ask the questions in detail and be patient in order to build a picture which you can analyze effectively.

**Q:** Okay, the children said that they were on their way home, that they stopped to visit with these other kids, but were planning on coming home almost immediately, but decided that it would be okay if they just took a taste of this liquor that was offered to them. How much actual alcohol did Anna drink of her own volition?

**A:** First of all, before we address that, you yourself know that questions can begin to receive answers on the foundation of one's own intuition. Analyze, please, the framing of your question, in order to begin to see the answer.

**Q:** Well, considering that she says she was on her way home, and she said that she told her brother he ought to only have a taste, and he agrees that she said this, I can't understand why she would take more than a taste herself. But, she says that she took a taste and then woke up in the hospital, and does not remember what happened.

**A:** Okay. Did you understand our statement and its true meaning?

**Q:** No, I guess I didn't.

**A:** As you, yourself, know, especially with one of elevated psychic abilities such as yourself, intuition plays a role in forming the foundation of answers to questions; answers sought. Ability, as is often stated, to get "to the bottom" of an issue, is very greatly dependent upon, first and foremost, one's intuition. You have very strong intuition.

**Q:** I have TWO intuitions, in regard to this, and I am torn between the two.

**A:** We will address that momentarily, but first we must get over one hurdle before attempting to get over the next. Your intuition is very strong, yes?

**Q:** Yes.

**A:** Okay, now picture yourself in a forest clearing. In that clearing you are surrounded by a pack of wolves. These wolves, in your mind, represent a blockage. The blockage is emotion. Emotion is a necessary component of life in 3rd density. It can be of great assistance, and it can also be a hindrance. Normally, in critical situations close to the 3rd density individual's existence, these emotions serve temporarily as hindrances. So, we ask you to picture these wolves surrounding you. And, as wolves will do when addressed in a calm voice, when one takes a deep breath internally and externally, and asks the wolves in a calming, reassuring voice, to simply go back into the forest, that all is well, then the wolves turn and retreat, as wolves will do. This removes the hindering aspect of emotion, which allows intuition to become stronger. Then, in turn, one's intuitions are not "torn." Do you see this effect.

**Q:** Yes.

**A:** Now that we have crossed the first hurdle, we will address the second hurdle by asking of you what intuition remains?

**Q:** The intuition that remains is that, somehow, for some reason, she actually drank that much alcohol.

**A:** Now, please be aware of the fact, which you already know, ingestion of alcohol for any 3rd density being, amongst other things, produces memory loss, correct?

**Q:** Yes.

**A:** Now, you have part of the answer. The other half of the answer involves another individual also in residence in your house.

**Q:** Her brother, Jason.

**A:** Correct. There we see deception.

**Q:** Okay. Why is he deceiving me?

**A:** Torn emotions. Fear. Desire to remain faithful. Desire for protection. All, of course, illusory, but very real to those experiencing them. Also, we see that there was ingestion of alcohol there that impaired judgment. Though not nearly as much.

**Q:** While Anna was in the hospital, did she leave her body?

**A:** Not as such that one would consciously remember, because, normally, when trauma is a precipitating factor, other physiological events must take place first for such an event to transpire. While there was a cessation of respiration, there was no cessation of cardiac function, and no cessation of brain wave activity. Normally at least one or two of these are present for a 3rd density being to experience out-of-body transfer.

**Q:** Did she pick up any attachments while she was in the hospital?

**A:** The only reason for the answer to be negative to that question, is because of the EXTREME efforts applied on her behalf by other 3rd density beings which prevented such an occurrence.

**Q:** Did she have an attachment prior to that time?

**A:** Attachments can, of course, be present, but need not be permanent in nature. There have been attachments periodically, with the one referred to as Anna, and she is more susceptible to a number of negative factors than the others in her presence.

But, fortunately, there has also been protection of a higher order that has balanced out this effect up until now.

**Q:** Why is she more susceptible than other people?

**A:** Sensitivity is greater. And, when we speak of sensitivity, of course, we are speaking of more than just 3rd level. We are speaking of 4th level and 5th level as well. And, it should also be mentioned that those with a higher mission profile receive greater attack, but also greater protection.

**Q:** Why does she often have feelings of uselessness and futility?

**A:** Refer to the last two responses.

**Q:** So it is because of attack?

**A:** No...

**Q:** Because of sensitivity?

**A:** Yes, in fact, while the sensitivities are indirectly related, are not the same thing.

**Q:** Is there anything she can do, herself, to be happier and more content?

**A:** One, to recognize the sensitivity as being a natural state of being and part of the mission profile, second: be unafraid to explore it and the greater meanings behind it; number three, once numbers one and two are accomplished: proceed forward upon greater realization of the mission profile.

**Q:** And what is the mission profile?

**A:** That is part of the lesson process.

**Q:** Was there any influence from other persons or entities at the time that this incident took place?

**A:** Well, you should know by now that such influence is always present. However, it is reflected most often through 3rd density entities.

**Q:** Which particular entities stimulated this event?

**A:** Your question is vague.

**Q:** You are saying that such influence comes through 3rd density entities...

**A:** No... we are saying that it is most readily recognized as being through 3rd density entities.

**Q:** Were any of the companions or people present, were any of them under the control of 4th density entities desiring to cause pain or problems for me or Anna?

**A:** Certainly! This is always the consideration in all situations. This vulnerability must be recognized before it can be dealt with.

**Q:** So, she needs to recognize that she is an object of attack?

**A:** Not only does she need to recognize that, but all others of influence over her, or through her, or who have her best interests in mind, need to recognize it too.

**Q:** What level of danger is she in at the present time?

**A:** The danger is decreased for the moment, but of course, the vulnerability is always there. One needs to recognize this, not ignore it, not pretend that it will go away, not pretend that it does not exist.

**Q:** (Anna) So there was no actual alien interference? No one was abducted that night?

**A:** Not as abductions are popularly known and perceived, no.

**Q:** (Anna) So what happened was I went in, I drank and passed out?

**A:** Close enough.

**Q:** (Anna) How much did I actually drink?

**A:** The actual quantity is not important. It has been documented. One can mathematically calculate the amount from the documentation and other factors. But, of course, one must remember, when alcohol is ingested, it can be deceiving, and, as it is ingested, it causes impairment of mental and emotional functioning which causes reduced awareness of the amount ingested. Therefore, large amounts can be ingested without the realization of same. In your case, the memory loss is directly related to brain cell damage caused by this ingestion. So, an erasure has occurred after the fact, that is deep enough that it is not retrievable through hypnotherapy or other means.

**Q:** So, she actually destroyed some of her brain cells?

**A:** Most definitely. A very large quantity. Not that the function cannot be replaced, of course, but it is a well- documented fact that alcohol has this effect.

**Q:** Is there any guidance as to how she can be more careful and how to recognize any influence that could lead to danger?

**A:** Well, this is rather like trying to find a magic bullet. The problem here is more broad and cannot be addressed in such simple terms as to ask for pointers. There are many emotional factors, spiritual factors, lack of awareness, there is resistance, lack of knowledge, emotional blocking; and this is not occurring with just Anna, but also others in her midst. And these are issues that will take much effort over the course of “time,” to address. However, we feel that, for the time being, the critical danger has passed. There is not to be another incident of this

nature any time soon. But, the underlying issues must still be addressed. These issues involve rebellion, perception of not being understood, sensitivity we spoke of earlier, lack of communication, lack of awareness on the part of others of the very multi-faceted factors involved, all must be addressed. One must be patient because one is dealing with a higher-level soul occupying a 3rd density body. This higher level soul is “higher” than the others you perceive to be your children. They are all at different levels, and this one is at the highest level. Therefore, one cannot address problems quickly and with impatience. This is simply not possible and must not be attempted any further. Patience is absolutely of extreme importance here, because the rewards are enormous.

**Q:** (Anna) I seem to have some sort of emotional attachment to Patrick. Is he a bad influence?

**A:** Influences do not reside, ultimately, in those perceived as 3rd density. So, when one asks about “good influences,” or “bad influences,” then one is lacking the perception needed to understand the scope of the situation.

**Q:** (Anna) Will associating with him bring me further emotional pain?

**A:** Any emotional pain that you feel will be, in greatest part determined by you, yourself. You have enormous power, but it is unrealized as of yet. As for Laura, greater awareness is needed on your part, for protection of your children. The attack will rotate from one to the next, to the next to the next. Anna has already survived this particular round of attack, now it shall move to another.

**Q:** How can I tell?

**A:** What did we speak of earlier?

**Q:** How can I prevent it?

**A:** We wish for you to answer the question.

**Q:** Well, you have talked about a lot of things...

**A:** If you don't answer the question, understanding is not achieved. What did we speak of earlier?

**Q:** Jason? (Anna) Intuition.

**A:** Now you see an example of the power that we say exists in Anna, does indeed exist in Anna. She has the correct answer, even though much "time" has passed. What did we say about intuition?

**Q:** Get rid of emotion and use intuition.

**A:** The emotions can not be gotten rid of. Emotions must be controlled. We spoke of the circling of wolves in the forest clearing. Wolves are part of nature. One must not want to be rid of wolves, only to interact with them in a positive manner. That is why we told you to ask the wolves to return to the forest, as there is no reason to encircle you. Emotion is necessary for 3rd density existence. It can be an assistance, or it can be a hindrance. Allow it to be an assistant, and you can accomplish a great deal. Allow it to be a hindrance, and you will not see what is there to be seen.

**Q:** I very often have intuitions about the children, and I tell them that I do not want them to go here or there or do this or that. I don't want to be an overbearing or controlling parent. Yet, when I put my foot down, based on my intuitions, I am accused of these very things.

**A:** Obviously that is not the answer, then. Is there anywhere in existence a question that does not have an answer?

**Q:** I don't think so.

**A:** Then you think correctly, because every question has an answer. However, the first attempt at an answer is not always successful. That does not mean that there is not an answer to be had.

**Q:** For, example, the night of this event, I had strong feelings that she should not go. I tried to think of some reason that she should not go, and there was not a reasonable way to say this, and I knew that if I just put my foot down and forbid her to go out at all, she would feel anger and resentment that would only fuel the fire of rebellion. It would have created more problems than it would have solved.

**A:** Then, what would you say would have been a positive course of action based upon the fact that you had an intuition?

**Q:** To keep her home.

**A:** Well, that is the short answer to the question.

**Q:** Explain to her that I had a bad feeling about her going? I have explained these sorts of things over and over again. They don't want to hear it. They accuse me of just wanting to control them this way. (Anna) You have so many intuitions! They can't always be right. (L) We live in a very dangerous situation.

**A:** Now, what do you suppose is the key to this dilemma? Could it be effective communication?

**Q:** I try to communicate. They don't want to listen. They don't want to believe...

**A:** Well, if you try one form of communication and it does not work, what would you suggest would be the best course of action.

**Q:** I have tried every approach that I can possibly think of. It is like complete and total resistance.

**A:** There is resistance occurring right now. Obviously you have not tried “everything” you can think of. You, yourself, would admit that there is no such thing as limitation... All there is is lessons. Lessons are extremely valuable and the learning process never ceases. One gains when one recognizes these facts and puts them to effective use.

**Q:** Well, we have all been under attack physically. Health related issues are a constant source of concern.

**A:** Naturally. The attack is going to be greatest at critical junctures of your existence, as we have stated consistently and persistently for over 3 years of your time perception. Should you expect anything less, we think not.

**Q:** What can we do to ameliorate this health attack. We have tried everything that has been advised, and then some.

**A:** Unfortunately, the health attack in this instance is directly related to the circulation of air in this particular residence.

**Q:** We have dealt with that. I have changed the filters, opened the house and turned off the system, introduced anti-bacterial agents into the duct-work... everything.

**A:** There is, deep within the air-circulating system, an area of moisture with foreign material in it, that is near the center of the duct network. You will need to contact someone who can find this offensive area and remove it, as it has been collecting and recycling low-level 2nd density particulate matter and microbial organisms.

**Q:** Would it help to turn it off for a week or so?

**A:** This would be a healthy alternative. Your fear of grass pollen is exaggerated.

**Q:** Alright, we will turn it off for a week and use fans.

**A:** You will notice an improvement in your health almost immediately. It will commence and continue. Besides, awareness should point out to you the obvious, that there is less production of grass pollen in the air now than at other times of the year, so that there is less to fear.

**Q:** Okay, the other night it was remarked that there was some connection to all the names of Ann and Anna around me.

**A:** Well, the statement was made simply to reflect the synchronicity which is always a tell-tale signal of changes apparent and imminent. Changes which are not necessarily to be perceived as either positive or negative, but changes nonetheless. Here, three individuals with whom you have had either direct or indirect association, all with the same moniker.

**Q:** Is there anything further that you can tell me about the children for protection?

**A:** Can you recall what we have said?

**Q:** To use intuition and that the attack will rotate.

**A:** Correct. It is your awareness that is the foundation of protection. Let not your awareness be concentrated too heavily in one area or another. You have had the tendency to do that. All there is is lessons.

**Q:** Would it be advisable for them to go to school?

**A:** Such considerations are minor in the big picture. The awareness is more important from the aspect of danger which results from attack. Where the attack comes from and exactly into what situation it is framed is of secondary importance. It is the awareness that such attack can and will occur that is of primary importance. And, further, in your situation, since you have 5 children, our statement that the attack will rotate from one to the next, to

the next, is one that it is greatly advisable that you do not forget. And, from that your intuition will lead you to where protection is most needed next, as long as the emotions serve as an assistant and not as a hindrance.

**Q:** Why did I have so many children?

**A:** This is what you chose to do at several levels.

**Q:** It is a very great responsibility.

**A:** It is a great responsibility, but you have learned many lessons as a result. Prior to this incarnation you requested a “fast track,” as the popular parlance would indicate, for ascension to the next level. You were told, as all were who request this, that such a challenge would be difficult, indeed. And, as is your soul imprint characteristic, you responded that, in your opinion, the challenge was not nearly as great as others perceived it. But, of course, those others giving the message were of higher density and, therefore, by nature, had much greater awareness and knowledge.

**Q:** Are you saying I have bitten off more than I can chew?

**A:** Well, that would be rather presumptive, would it not? After all, the chewing process has not been completed, now has it?

**Q:** No. But it is a very great worry and concern that never goes away.

**A:** Well, this has never been any different, has it?

**Q:** No. How many of my children were with me in the immediate past life in Germany?

**A:** Well, that is not of great importance, but since you seek the answer, it is one.

**Q:** Which one?

**A:** Your intuition will tell you that. Which one?

**Q:** Anna. Is there anything further for Ark, or Anna or for me, at this time?

**A:** When you phrase a question in such a way, it is quite vague, and we find it amusing each time.

**Q:** I know... let me think...

**A:** No... when it comes to Arkadiusz, the greatest danger there is also emotional. No surprise. Emotions can assist or hinder. He has already expressed to you in an off-hand or roundabout way, the fears that he has of leaving all behind. Those fears have always been there, but have been moderated by the secret intention of never completely severing the ties to his homeland. This is something of which you have not been completely aware, as it has been purposely kept from you. The result of such actions, as in all other such situations, is exactly what you are seeing played out right now. This, too, should be quite clear to you. Everything that he is suffering, and has been suffering, is fed by the energy that he gives it as a result of these conflicting emotions and, more importantly, his inability, or shall we say, lack of willingness, to completely and openly share these emotions and the energy he is feeding them with you. There is a fear on his part that it two-sided. There is the fear, on the one hand, of leaving in such a way that he can never go back, and the fear on the other side, of being punished by you for expressing such a fear. So, in his desire to keep peace, he has kept this from you. Now, it is all piling on top of him. And, ultimately, if he wishes to cease the attack, or lessen it to the extent that he can move forward, then the only choice that he has, and he is being pushed to this awareness by his own resistance, is to simply leave and sever ALL ties. This is something that he is only just now becoming aware of. But, it is still not known whether this will be accomplished or not. It is

completely up to him

**Q:** Anything for Anna?

**A:** As we have stated, the greatest danger has passed for now. And, as we have stated, there is resistance to the awareness of the fact that sensitivity is greater and power potential is greater, and ability is greater, that the soul is stronger because it has experienced more incarnations, and all of these other factors. This is a difficult time, as it is for all in 3rd density at this stage of life, as there are pressures coming from elsewhere in 3rd density and 4th density. And, this is the final stage of the blossoming of the soul in each incarnation. Therefore, there is resistance, even resistance to these words. It is all part of the learning process.

**Q:** Well, I have observed that whatever we resist seems to cause us to suffer.

**A:** This is true, but suffering comes in differing degrees.

**Q:** And, it all seems to relate to our resistance to who and what we REALLY are and to doing things from a higher level of direction rather than the emotional programming.

**A:** That is true. All is lesson, and each lesson is one more step on the road to union with the One.

**Q:** I feel that my learning is at a standstill.

**A:** Standstills are not really of great concern as long as they are merely rest stops on the pathway to greater knowledge or growth. We have told you before, and others, to watch the signposts along the way, to read the signs and understand their meanings. If you do that, you will be far ahead of the battle. And, "battle" is the appropriate term, because battle is what results from attack, attack that is resisted in a progressive and positive manner. Therefore, one wants to be ahead of the battle

if at all possible, and the tools for that are the signposts, and the signposts are EVERYWHERE! Intuition is one, synchronicity is another. You have enough power, knowledge and awareness already to recognize the signposts. It is only the emotions that can cause them to be clouded over. And this is only if the emotions which are a natural state of being for 3rd density existence, serve as a hindrance instead of an assistant. And that is the primary lesson for now: to take those emotions, which are perfectly natural, and employ them as assistance. Once emotions have been used positively, progress to 4th density STO is possible. The existence of emotions will moderate as progression through 4th density STO occurs. While that may not seem possible to you, or something that you can grasp at this time, you will understand it eventually.

**Q:** Is there anything I can do to help Ark with any of this?

**A:** No, as we have told you, in this particular instance, it is his energy, which is all inclusive and exclusive. In other words, only HE can do what must be done if he truly seeks to reach the goals that he has stated for himself. You cannot, in any way assist or interfere or alter the situation.

**Q:** Should I tell him all of this?

**A:** We will leave that to you to determine. We cannot lead you by the hand.

**Q:** Is it advisable for him to send the letters from myself and Terry and Jan?

**A:** Well, we will allow you to practice your intuition.

**Q:** Well, the only reason he is NOT sending them is, I think, because he is concerned with how events will go there in the future.

**A:** Well, have you not gone a long way to answer the question?

**Q:** I guess. We thank you very much. I feel very sad that Ark is having to deal with such emotional pain, particularly where his daughter is involved. That would crush me.

**A:** Well, that is natural and understandable, but we ask you to look at the bigger picture, what has transpired over the last 14 and a half months is a major shift in your awareness and his awareness, it is a major shift in your experience, it is a landmark, a stepping-stone, a sign- post, all in one. And, it is a pathway that was chosen, is chosen and shall be chosen. Therefore, the sadness that is part of the mosaic is something that is existent, but there is no need to dwell upon it, but only to deal with it effectively and positively and progressively. And, this too, shall pass. All choices are made. All there is is lessons.

**Q:** Well, this is all quite a lot to digest, so thank you again for being with us.

**A:** You are most welcome. We will always be here for you.

**Q:** Good night.

END OF SESSION

## **5.34 November 1, 1997**

Frank, Alice, Terry, Jan, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Biominia.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have here the Denver Airport Pictures which Chloe took on her trip and perhaps we would like to have a little bit of an interpretation on this very bizarre figure here. Is it supposed to be looked at this way or reversed?

**A:** Either.

**Q:** Could you give us a little interpretation on that picture; it's about the strangest thing I've ever seen... well, no it's not, but it's right up there! {Laughter}

Figure 5.1: Denver1.jpg

**A:** It is a rectagon.

**Q:** What is a rectagon?

**A:** Picture uniting numerous rectangular principles of photo optic representation.

**Q:** What's the point?

**A:** If one gazes at it long enough, they will involuntarily be placed into an alpha state.

**Q:** Okay. If they go into an alpha state, is there some other kind of message that the picture then conveys?

**A:** That is not the point!

**Q:** What is the point?

**A:** They then are open to programming of a level one order!

**Q:** (Ark) Does the scale of the picture matter?

**A:** It works better when one gazes at the mural itself, rather than a photographic representation of same. There are magnetic factors at the Denver Airport which play into the situation.

**Q:** What kind of magnetic factors?

**A:** Artificially contoured wave-like beams.

**Q:** These beams have a magnetic effect?

**A:** Magnetism.

**Q:** (Ark) If gazing at this picture produces an alpha state, how long does it last?

**A:** Indefinite.

**Q:** (T) How long do you have to look at the picture?

**A:** Each individual responds differently.

**Q:** (T) Does repeated exposure ... is it cumulative?

**A:** No.

**Q:** When you say indefinite in terms of time, do you mean it can vary from individual to individual?

**A:** Indefinite because the subsequent program is the determining factor.

**Q:** How does the program get installed? Is there something there at the airport that installs the program? That works in conjunction with the murals? Is the programming in the pictures? Or is it in some carrier wave? Or is it in the individual themselves, and the murals simply activate it?

**A:** Originates from underneath the complex.

**Q:** And it has something to do with the beams?

**A:** Yes.

**Q:** So, in other words, Chloe may have been subjected to some of this programming by going there and spending so much time looking for the murals?

**A:** In her case, no, because you warned her, therefore her conscious state was in the “awareness mode.”

**Q:** (Ark) Is any one of these photographs, or any one element, more significant than the others? Anything we ought to pay more attention?

**A:** All are equally important. But, pay attention to the tiny details. You will see that the discovery process is neverending.

**Q:** (T) I searched the web to see if there was any way to order sets of pictures of these murals and there just isn't anything. (L) Yes, Chloe said that there was nothing in the gift shops there either. (T) I asked her and she said that she did not actually go in the gift

shops because she doesn't do tourist things. (L) Okay, what is this picture? (Holds up photo.)

Figure 5.2: Denver2.jpg

**A:** This is a pictorial representation of an essence of a concept.

**Q:** Essence of the concept of what?

**A:** Overt control.

**Q:** So, does this mean that overt control is NOT going to be used, since this huge ugly figure is lying there seemingly dead?

**A:** Phasic.

**Q:** It will be in phases. (T) Is Alex Christopher's general idea of the meanings of these paintings correct?

**A:** Close.

**Q:** (T) Is my take on what she said close?

Figure 5.3: Denver2\_detail.jpg

**A:** Yes.

**Q:** (T) So this overcoming of evil is just one of the phases...

**A:** You should learn what you can, discreetly, about masonic principles.

**Q:** (Ark) I would like to know if the Cassiopaeans, together with other STO, are participating in some of this programming?

**A:** There is no need for us to participate in programming.

**Q:** Why is that?

**A:** Because we do not violate free will directive!

**Q:** (T) It's 3rd and 4th STS that does it.

**A:** 4th, mostly.

**Q:** Now, we have been in a little bit of a pause mode for the past couple of months in terms of working, and now I have had this terrible blow with my computer... What caused my computer to crash?

**A:** Manipulative interference.

**Q:** By who or what?

**A:** 4th density STS.

**Q:** What was the actual mode of this interference? Was it just that the guy blew up the computer?

**A:** Agents and agencies are omnipresent. You were moving in a direction whereby the knowledge gained would be most compromising, if shared. We have suggested before that this forum was better served as an educational realm for you, rather than one from which to launch upon an effort to educate all others.

**Q:** Which particular line that I was following caused the problem?

**A:** Discretion opens the door to security.

**Q:** (Ark) Regarding this manipulative interference, what means can we use to prevent such interference in the future, if there are such means?

**A:** Patience with “glitches.” Remember: who do you trust?

**Q:** No one. Who to trust the computer to or in general?

**A:** Both. Next time, be not so quick to take computer to be worked on.

**Q:** That was the week from Hell. The cat got killed and we had a rather cool response from UCF... just kind of a really bummed out week. And I lost my ring! And I was sick!

**A:** Too many.

**Q:** Can you tell me where I will find my ring or if I will find my ring?

**A:** You will.

**Q:** Are we going to be safe going to Gainesville, the kids and everything else?

**A:** For now.

**Q:** Is there anything we need to do relating to UCF other than what we have already planned?

**A:** Good things take effort to achieve... bad things are easily obtainable.

**Q:** (Ark) I want to know to what extent I was responsible for the computer crash...

A: 0.

Q: [Discussion of computer crash.]

A: Patience, Laura, is not your strong suit.

Q: Well, this event just took all the wind out of me. It is like falling out of a tree onto your back. I am just totally devastated by it. I have almost lost my will to work.

A: Then the 4th density STS are winning!

Q: I'll recover. Just give me a little time. (Ark) I really want to know where and how the 4th density STS interfaced with 3rd density to cause the computer destruction.

A: Repair.

Q: You mean the repair man?

A: Yes.

Q: (Ark) Who was behind it?

A: We have described for you before the Orion STS.

Q: Are these Lizzies or humanoid types?

A: There is something akin to a "chain of command."

Q: So it could be a human who is influenced by implants and thought control via a Lizzie who is controlled by an Orion... (Ark) Can you see any other impending danger?

A: One needs to always expect danger.

Q: (Ark) General rules for everyone.

A: No! This means you more than any others!

Q: Why did they say that?

**A:** Arkadiusz made reference to “general terms.”

**Q:** Oh, so they were talking specifically to you!

**A:** And you, too, Laura!

**Q:** Thanks a lot.

**Q:** (T) Frank and I got off Scot free that time!

**A:** No!

**Q:** Could you give a general indication of which direction any or all of us ought to go in the upcoming months in terms of research, or any particular clue that might come our way? What to do? Which way to go?

**A:** Ridiculously vague question!

**Q:** I know, but I tried to fly it! (T) I would say to keep doing what you are doing and don't let outside influences sway you from your path.

**A:** Good.

**Q:** (Ark) Is there anything that I am doing wrong now?

**A:** Vague.

**Q:** (J) But, not ‘ridiculously’ vague! (L) Okay, you have a couple of teaching positions offered. Is either one of them optimal or should we pursue something in a different direction?

**A:** Patience pays best.

**Q:** Does that mean that he should not accept either of these and wait for something else. But, he can't do that. He has to give an answer now.

**A:** All there is is lessons.

**Q:** Okay, so he'll teach! (Ark) Okay, I want to know why this Susan Brana is being silent? (L) I think she was a fraud to begin with. (Ark) Okay, I want to know if that is the case.

**A:** Opportunity to mislead.

**Q:** (Ark) Was or is?

**A:** Both. Would have lead to trap.

**Q:** (T) Yes, that whole situation was amazing. The search I did on that word brought up so much strange stuff! (L) Yes, indeed. It blew open a huge door to a TON of stuff!

**A:** Expect tentacles to attempt to reach from Poland.

**Q:** What kind?

**A:** Legal and economic.

**Q:** Well, if they reach over here, we'll chop them off! (T) That's what you do with tentacles!

**A:** Not so easy as that.

**Q:** Okay, you brought it up, it must be an issue, so what do you want to tell us about it?

**A:** Redouble efforts here.

**Q:** Along what line? (T) Legal and economic?

**A:** Yes.

**Q:** I don't know what else to do. We are just waiting for time to pass so he can file. I do expect SOMETHING to happen because they were not expecting him to leave when he did and it was probably awhile before they even knew he was gone and they had a perfectly good hospital scenario set up. Okay, you said to

redouble legal and economic efforts... is there something I am missing?

A: Patience pays.

Q: Is it possible to go to Mexico and get a divorce? Fairly quickly? Is this what you are talking about? I know that you can get a divorce about anywhere and make it stick anywhere else with a good lawyer.

A: Yes.

Q: Yes to the lawyer?

A: Yes. Vigilance.

Q: So, we need to see Fernando.

A: Up to you, but, not a bad idea.

Q: (A) Does the redoubling of economic efforts mean anything more than looking for a job?

A: Just be on the lookout for efforts to undermine coming from Poland.

Q: Okay, we are on the lookout. Is it from any source other than Anna?

A: Blended. Good night.

END OF SESSION

## **5.35 November 8, 1997**

Frank, Ark, Laura

Q: Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Napponiz.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** You once made a remark that, to use the source for personal issues, would cause it to become an STS corrupted source. Now, of necessity, it seems, and that may just be my perspective, but it seems that we have used this source some percentage of the time for personal issues and questions. Has that, in any way, corrupted the flow of information and tended to sway it in the direction of the STS mode?

**A:** Only when excessive.

**Q:** And, I am hoping that you will warn us if, at any point, it becomes excessive and we need to bring it to a halt; as you have in the past.

**A:** Yes. Ark, more pressure, please.

**Q:** We have had a couple of interesting events recently on our travels, the most recent being the blowout of the tire on the interstate after we both had some sort of premonition the previous day. And, on the same day of the flat tire, and it seemed to be connected, we had two encounters with people who questioned us about the UFO bumper stickers. One of these people even came up and asked Ark if he was an alien. Okay, these were two very unusual incidents. Was the blow out of the tire some kind of attack or interference?

**A:** Not directly.

**Q:** Was the blow out of the tire some sort of symbolic event and was there some sort of meaning or lesson in this?

**A:** Attack is one of “blanket coverage” mode.

**Q:** Well, once before you stated that I was being ‘cloaked,’ and now you use the term ‘blanket coverage.’ Could you please tell me what is being implied or indicated here?

**A:** No need to assume nuances. Next portal: French. You should not let this one “get away” from you, lest it result in unnecessary heartache/heartbreak.

**Q:** When you say that I should not let this one ‘get away,’ what do you mean?

**A:** Neglect? Opens the door to full bore attack... Possibility of tragedy, if one who is in delicate state, as in the twins of Gemini, should be driven to drastic ends.

**Q:** Does this mean that we should try to prevent him from publishing anything about us at all?

**A:** What it means is: keep a very close watch on the situation.

**Q:** We are talking about Tom French and the article, right?

**A:** You have misgivings about this lately, and yet, you do nothing. This is a disturbing trend developing.

**Q:** After I agreed that he could write about me, and he has spent all this time these past two years doing the interviews and so forth, I am not even sure that I could stop it. And, I don’t want to be in an adversarial mode with him because then what he writes would be negative.

**A:** Did he not promise you perusal of copy prior to publishing?

**Q:** Yes he did, and I will call and remind him of that, or I will

write to him right away. I am supposed to have some degree of control or input.

**A:** This would be “forgotten” if not communicated, i.e.: neglected.

**Q:** What, in particular should I look for to request that it be omitted or changed?

**A:** You will know what would cause harm to innocent persons.

**Q:** Anything further on that subject? Okay, I guess that ‘blanket coverage’ and being ‘cloaked’ just means being attacked from any and all directions that are available.

**A:** Close.

**Q:** Was there any particular significance to the two funny encounters we had on the day we had the blow-out?

**A:** Well, what do you think?

**Q:** I don’t know what to think. Both of them were bizarre, but the second one was the most bizarre because the van was running hot, we stopped to check the oil, the guy came up and asked Ark if he was an alien, the van had nothing wrong with it, and ran fine when we got back on the road. It was really funny.

**A:** You are being watched like never before. And we have warned you before that this was serious. Still your vigilance is not “up to par!!”

**Q:** (A) Why did I run off the road at that particular moment? Was it because I was tired?

**A:** Must be more like a soldier, less like a picknicker.

**Q:** What more can we do? And still be living in the real world? We could lock ourselves in the house with Uzis. We could mount a turret gun on top of the van.

**A:** It is mental, psychic... not as much material.

**Q:** (A) So, what can I do to avoid such slips of attention?

**A:** If one is a soldier in the trenches, just how much “daydreaming” does one do when the shells are exploding all around??

**Q:** Okay, I think we have gotten the point. Is there something else on this subject?

**A:** Good. Soon you will need to “be on your toes” to an extraordinary level!

**Q:** Are there any further things I can do to increase the safety factor where the children are concerned?

**A:** This requires much discussion, as you are losing the battle there. As you know by now, the attack seeks the weakest link in the chain for the greatest assault. And for you, the children are a very weak link, indeed...

**Q:** In what sense? Why?

**A:** In many “senses,” and because of the last response.

**Q:** Is it because of the remark about discussion? That we need to discuss more with the children?

**A:** Weak link.

**Q:** Because of the weak link. I see. Let me just point out that I am only a human being, a third density person, and I really don't like to have to spend all my time in a state of constant fear that something bad is going to happen to one of my children...

**A:** Not fear, when one is vigilant.

**Q:** The point I am getting at is that it is fine for me to be vigilant and aware, but if I tell them things, they DO have free will and

can act against their own best interests. I am afraid that they will ignore my warnings. I live in constant fear of that.

**A:** Not if you discuss it with them “on the level.”

**Q:** So, we need to discuss with the children more, and level with them...

**A:** Avoid condescending approach.

**Q:** Well, I don’t think I have ever treated my children in a condescending way. I have always treated them like human beings with brains.

**A:** Who are human beings with brains in a subordinate position?

**Q:** I understand.

**A:** Discussion requires feedback and free associative dialogue.

**Q:** Just let me point out that if we spend all our time discussing with the children all the dangers of the world, watching out for all these dangers ourselves, thinking about it and analyzing it, then there will be very little time left to work. Does this project just consist of staying alive?

**A:** Wrong!!!

**Q:** There is a whole lot involved in just staying alive here.

**A:** Groove the channel, and it becomes “second nature.”

**Q:** (A) I would like to know if this ‘soon’ is a question of a week, a month, a year...

**A:** Indefinite.

**Q:** Can you tell us what it relates to?

**A:** All possibilities, including those dramas which are played out on the grandest of all stages.

**Q:** The grandest of all stages? Life? What is this?

**A:** Stages implies viewership, as well as participation.

**Q:** So ‘grandest’ would be a lot of viewers and a lot of participation? Are you talking about volume here?

**A:** Getting “warmer.”

**Q:** I’m such a whiner. I just want to go and live a nice quiet life and grow roses in the country.

**A:** There was a time, recently, Laura, when you craved and anticipated otherwise.

**Q:** Yes, I’m sorry. Sometimes I am just tired. Now, change of subject: MicroData has accused me of stealing their harddrive! No mention of all the terrible things they did to my computer and the video card they stole... could you give me a pointer on how to handle these people?

**A:** Soon, you will need to learn the art of non-confrontational association.

**Q:** Well, I’m not the one who created this situation!

**A:** We were not speaking of any one instance.

**Q:** Okay, we have been talking about whether or not we need to get another car, whether or not we may need to sell this house if Ark gets a job in Orlando, and whether we should get this mortgage to get the house fixed so that a) if we stay in it, it will be comfortable, or b) if we have to sell it, it will be more saleable, so I would like to know what your advice on this is since this gal has worked so hard to put this mortgage deal together? Would it be advisable to refinance the house and do the repairs?

**A:** Green light.

**Q:** Does that mean to do it?

**A:** Sure.

**Q:** Will we be able to make the payments?

**A:** Yes.

**Q:** Is it possible, or has it happened, that someone from Poland has contacted the UCF people to spread lies or cause problems?

**A:** Main thing you should concern yourself with is the future with respect to this, and related subjects.

**Q:** If someone over there has contacted UCF to say nasty things, it definitely would have an effect on the future. In what respect are you urging us to be concerned with the future?

**A:** Just be vigilant!

**Q:** Well, we also sent the cv to USF...

**A:** When you re-read these transcripts, the meanings and messages will be clear.

**Q:** Last week I asked some questions and you indicated that you could not answer them and I had the impression that it was because of other persons present. Is that the case?

**A:** Maybe.

**Q:** Also, in a past session you made a comment 'pass the test.' I would like to know to what test this comment referred? What test must we pass in order to move to the next level of knowledge?

**A:** This you will know when you reach it.

**Q:** Alright...

**A:** Do you wish many repeat incarnations in 3rd density?

**Q:** Of course not! I want OUT of this density!

**A:** Then expect testing aplenty.

**Q:** (A) I want to know about this guy who wrote about the sun cycles... is he just another crackpot?

**A:** Detailed.

**Q:** This fellow sent some information that was talking about planetary catastrophe related to solar maximums which is, essentially, the same thing I thought of back in 1985...

**A:** On right track.

**Q:** But then, when Ark asked for more information, the guy launched off on being the prophet of God and so forth...

**A:** Cloak.

**Q:** The religion thing is a cloak?

**A:** Yes.

**Q:** Does HE know it is a cloak?

**A:** Yes.

**Q:** So he knows it and is using it...

**A:** Protection device. Throws off "dogs."

**Q:** Well, that is all fine and good, but he also wants to offer instructions to people about how to survive such an event, which he proceeds to do, and then launches off into the religion thing. So, if he is cloaking, he is doing a very good job of it because it seems pretty real.

**A:** Mixed.

**Q:** (A) Also, he sends a description of a machine he invented which he wants me to help him build. Is this the most important thing about this?

**A:** No. Investigate further.

**Q:** I suggested that Ark ought to tell the guy to go and look at the C's web page and if he can handle that, go from there... but, of course, Ark does better if he doesn't follow my advice...

**A:** Okay.

**Q:** Okay that he doesn't follow my advice?

**A:** For tonight, good bye.

END OF SESSION

## **5.36 November 15, 1997**

Terry, Jan, Alice, Frank, Ark & Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wiappahn.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I guess you have been listening to our discussion, so let's dispose of the burning question at the moment: is it safe at the present time for us to travel to Mexico?

**A:** More specific data.

**Q:** We are invited for a conference from November 30th to December 5th. But, the idea was to stay for two weeks. The conference is not in Mexico City, but when we come back, we will probably come through there.

**A:** Ciudad de Mexico.

**Q:** Well, essentially, that is all we know. We know we will be flying American Airlines, but we don't know the flight number yet.

**A:** When you ask: "is it safe," the very nature of the question is vague.

**Q:** I understand. More to the point, I am concerned about being gone so long from the children; will things be safe here at the house, how can I minimize the risks HERE?

**A:** Take two with you.

**Q:** Which two?

**A:** Which do you think?

**Q:** Arielle and Amy would be the ones I would take, I should think.

**A:** Anna.

**Q:** Arielle and Anna?

**A:** Yes.

**Q:** Amy would be safe at home?

**A:** She is more durable.

**Q:** We had already decided we would not go because of the safety issue where the children are concerned, but there is a new issue that has arisen in the past few days... the idea that Ark might be

able to get a Mexican divorce while we are there. Is it possible, considering all the things that Fernando had to say on the subject, that we COULD go there and get the divorce?

**A:** Of course! And marriage too, if you wish. Remember, ceremonies can be held any time. Legalities must be addressed “when opportunity knocks.”

**Q:** Okay, any advice for the trip in a general way?

**A:** Ask.

**Q:** (T) Is there anything particular that Ark and Laura need to know about this trip?

**A:** Ask for details.

**Q:** (T) Can we have some details? Are there details about where the conference is going to be that they should be aware of?

**A:** Not what we meant.

**Q:** (L) Will we have any problems on the plane? Will the plane have any problems?

**A:** Not at all likely.

**Q:** Are there any problems we should look out for, any dangerous conditions, in the hotel?

**A:** No.

**Q:** (T) Are there any details about dangers and conditions...

**A:** Avoid wandering...

**Q:** (T) Is there anything you would like to convey about Arielle and Anna and what they should or should not be doing besides avoiding wandering?

**A:** Fortify.

**Q:** Fortify physically...

**A:** Yes.

**Q:** Vitamins and herbs....

**A:** Yes.

**Q:** (T) What about mentally and emotionally?

**A:** Not as critical.

**Q:** Will there be anything or anybody in particular that we should look for in terms of either connections or to be wary of spies and spooks?

**A:** Nada de particular.

**Q:** You encouraged us to ask about details. Is there...

**A:** Be health conscious. Avoid invitations for "side trips."

**Q:** (T) What about side trips on their own? (A&L) We don't want to...

**A:** Good.

**Q:** (A) There is the question that we should contact the Mexican Embassy here to ask about the legal details. So, should we do this?

**A:** Cannot hurt, but could confuse.

**Q:** (T) If you go in the pool at the hotel, don't float on your back looking up at the objects in the sky... Mexico City is filled with UFOs... (L) We'll take pictures...

**A:** Yes, Many UFOs in Mexico. Cuernavaca is Earth's most intense window area.

**Q:** Why is that?

**A:** Complicated, but magnetic/volcanic influences contribute to the presence of a supervortex...

**Q:** (L) Well, if we can't take any side trips, what is the best thing for me and the girls to do while Ark is in the lectures?

**A:** Explore audio/visual opportunities as in data available for perusal. Biblioteca.

**Q:** (T) You will have to keep a close eye on the girls so they don't wander off...

**A:** They won't.

**Q:** Have we covered the subject sufficiently? (T) What can they do to protect themselves in the middle of a massive UFO vortex?

**A:** Awareness.

**Q:** (T) Who knows, you may actually see some!

**A:** Suggest you do as Mexicans do, and be "camera-ready."

**Q:** (A) Now, I want to ask about C\_\_\_. I decided to ignore his religion problem and to ignore his cold fusion, and to ask him about his new physics. Is any of this important, or can it have some value to me? (L) Remembering, of course, what he wrote the other day... (A) Yes.

**A:** You can do better.

**Q:** Why did you say that the guy's religious fanaticism is just a mask or a cloak, and we wrote to him and got blasted all to heck and back last Tuesday...

**A:** Because of the learning value.

**Q:** (A) So, we learned something.

**A:** Yes.

**Q:** (A) Alright, I would like to know something about the death of this guy, Marinov. Is Marinov dead?

**A:** Yes.

**Q:** Did he commit suicide?

**A:** No.

**Q:** Was he physically pushed from the fire escape?

**A:** He was a victim of highly sophisticated post hypnotic suggestion/mind control.

**Q:** Who was responsible for installing the post hypnotic suggestion?

**A:** Chain of Command.

**Q:** Okay, the STS chain of command. In human terms, who was involved?

**A:** M1.

**Q:** What's M1?

**A:** British Intelligence.

**Q:** (A) What was the main reason for his death?

**A:** Revelations too "sensitive," would cause "instabilities."

**Q:** Instabilities in what?

**A:** Power structure/control.

**Q:** What kind of revelation?

**A:** Theoretical physics.

**Q:** In what specific area?

**A:** "Unified Field Theory."

**Q:** (A) I am not aware that he was working in this direction. He was more experimental than theoretical, but he was collaborating with other guys. In particular, I would like to know if this Pappas knows the same as Marinov did?

**A:** Not completely, or he would be dead, too.

**Q:** (T) What was this guy's breakthrough in Unified Field Theory? I know they are not gonna tell us, but maybe they can point us in the right direction. (L) Well, they put that in quotes, so I don't know...

**A:** Merger.

**Q:** (A) I want to know if it is safe for me to contact this Pappas and ask questions?

**A:** Up to a point. Better to use faculties you possess for your own discoveries.

**Q:** (T) Did the gentleman who just passed away learn something about the merging of Unified Field Theories? (L) Or merging of factors...

**A:** The problem is that these scientists are often too eager to share and reveal. Remember: it is most difficult to win a Nobel Prize when one's residence is a tomb.

**Q:** Is it true that there was a luminous spot on the pavement where Marinov died?

**A:** Yes.

**Q:** Why?

**A:** Residue of substance used in mind control procedure.

**Q:** What was this substance? And what was it used for?

**A:** Phosphorescent Sulphate Ammonia Chloride. Ammonium Chloride with correct formulation, can be injected intravascularly in order to induce a state of super-suggestibility when utilized in conjunction with pre-existent hypnotic programming.

**Q:** Alright, a subject I hypnotized some years ago described being abducted, taken to an underground facility nearby, and having some sort of glowing green fluid introduced intravenously. Was this a similar substance?

**A:** Close.

**Q:** I think that I remember something similar being described by Karla Turner.

**A:** Obviously, the residual on the sidewalk was there as a result of blunt trauma to the skull.

**Q:** He jumped because of the programming and the blunt trauma was the result of his head hitting the sidewalk...

**A:** Yes.

**Q:** (T) Are these ideas, the programming that is carried on this way that is described here, that was described by Laura's subject, that is described in the Karla Turner book, and that is making something of a stir in other arenas, is this within the realm of the military abduction scenario, or covert operation abductions. Are these all related to human abductors rather than alien?

**A:** Yes, to some extent.

**Q:** Yes, well S\_\_ described her abductors as being military guys and NOT aliens... (T) Yes, and she was taken out there by Anclote to the little base....

**A:** No coincidence, the former Stauffer Chemical plant nearby!

**Q:** (A) There was another guy who was in contact with both Marinov and Pappas, and with whom I was also in contact, his name is A\_\_\_, does he know essentially the same as Marinov?

**A:** Close.

**Q:** (A) The guy whose book we have, G\_\_\_, it seems to me that he knows more than any of them?

**A:** Ask specifics.

**Q:** (A) Does G\_\_\_ know the details of the Unified Field Theory that is hidden from the rest of us?

**A:** More...

**Q:** He knows more... Why don't you guys just quit messing around and give us the UFT?

**A:** No. Because, then somebody would kill you.

**Q:** Alright, then, I don't want to know! Sorry I asked!

**A:** You will discover on your own, when you are ready.

**Q:** In our own experiments with, ummm.... discovering ways and means of getting beneath the surface of what is going on here on the planet, are we headed in right direction and are we making progress?

**A:** Yes.

**Q:** Is there anything we could add to the process?

**A:** Yes, discover! Okay, "time" to go. Good Night!

END OF SESSION

## 5.37 November 22, 1997

Frank Laura, Ark, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Anastasia.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have made arrangements to go to Mexico and it seems that the only possible glitch would be that we might not be able to get Ark's visa in time to go. Is there any advice you can give as to how to expedite this matter?

**A:** Speed it up at Mexican consulate; explain it re: the economic development angle.

**Q:** What do you mean, the 'economic development angle'?

**A:** Arkadiusz's presence there will be beneficial to their country.

**Q:** Well, that's not gonna work! The guys there already told us that we must not mention anything official or about the conference at all, being a physicist or connected to the university, or you will get into such a red tape tangle that you will NEVER get out of it! And you will NEVER get a visa if you mention anything other than the fact that you are strictly a tourist!

**A:** If you say so.

**Q:** Well, that is what the guy told us. And he has done it a time or two.

**A:** Then consult further with him.

**Q:** Well, you don't have to be huffy. The thing is, I just wanted to make the visa go smoothly. Is there any trick to that?

**A:** Payola.

**Q:** Okay, if we have to, we will bribe somebody. Who are we supposed to bribe?

**A:** Xavier.

**Q:** Whoever that is! Anything further about the Mexico trip? Is Amy going to be alright here?

**A:** Yes.

**Q:** Is Jason going to be alright here?

**A:** Maybe.

**Q:** So, what can I do to enhance the chances of Jason being alright here?

**A:** Elect Aletheia.

**Q:** To do what?

**A:** Be his guardian for hire.

**Q:** Jeez! Everybody has to be bribed these days! Anything else about this trip? Should we go with the rental car or take the van?

**A:** Okay.

**Q:** Which, one or two?

**A:** Two.

**Q:** Take the van.

**A:** No, both.

**Q:** Both what?

**A:** Both options regarding van.

**Q:** Okay. I learned the other day that the University of Montpellier was founded in 1289 and that among the individuals who attended this university was Albertus Magnus, Thomas Aquinas, Roger Bacon, Arnold of Villanova and Ramon Llul, as well as Michel Nostredame. Now, aside from the fact that all these people attended, they all seem to be somehow connected to the city of Cologne. In fact, Albertus Magnus moved to the city of Cologne, and he was the teacher of Thomas Aquinas and they both wrote about a ‘talking head’ and, apparently, Albertus Magnus performed something of a miracle along the Rhine in a field... was this, by any chance, an alfalfa field?

**A:** Yes.

**Q:** And, is this OUR alfalfa field?

**A:** Close.

**Q:** It is said that 3 years is the normal time required for the master work when proceeding by the ‘white path,’ or the ‘humid way.’ Is this, essentially true? Three years for the transformation?

**A:** Here, “time” serves as an illusion.

**Q:** Raymond Lully was rumored to have transformed a great deal of base metal into gold for Edward II of England. Did Raymond transmute for Edward in 1311 or 1312?

**A:** Only method which will accomplish this uses high pitched melodic sounds, brought forth while in a trance state.

**Q:** Brought forth from what, the human voice?

**A:** From the center of within.

**Q:** Well, back to my question, did Raymond transmute gold for Edward, because there was supposedly some special treatment given Lully by Edward, and we know that Edward II was the arch enemy...

**A:** If you learn to concentrate on the present for such answers, the dividends realized will far exceed expectations.

**Q:** Well, then, getting back to the present: John K\_\_\_ did a little spying for us over at UCF and learned that the selection was narrowed down to four candidates and nobody knows who they are. Supposedly they are being interviewed next week. I don't know how that can be, since it is the beginning of Thanksgiving Week. But, be that the case, we still have not heard anything from them. Any advice further on that?

**A:** As always, when in doubt, go to the source.

**Q:** What source? You are the source. We can't ask them anything because it is politically incorrect.

**A:** We will not either, as it is ethereally incorrect.

**Q:** I don't know what will happen here... Oh, John Dee supposedly had a vision of the Angel Uriel who gave him a highly polished black stone which was convex, and into which he gazed to communicate with other realms. This sounds very much like a psychomantium. Okay, these beings would appear on the surface of the stone and reveal all the secrets of the future. This was not an imaginary stone because it now resides in the British Museum. However, he later hooked up with Edward Kelly who was, apparently, a complete con-artist. What kind of beings did Dee and Kelly conjure through their polished stone?

**A:** Fourth Density.

**Q:** STS or STO?

A: Both.

Q: Was Eugenius Philalethes the nom de plume for Thomas Vaughan?

A: Yes.

Q: What is the 'prime matter' of the alchemical process?

A: H<sub>2</sub>O.

Q: What? (Ark) Water can be in different states.

A: Heavy water.

Q: What is heavy water? (Ark) Instead of normal hydrogen, you have hydrogen atoms with two neutrons. It is used in atomic plants. (L) Okay, if that is the prime matter, what is the philosophical mercury that goes with it?

A: Wrong "track."

Q: What is the right track?

A: See several answers back.

Q: It is not etherally correct to answer this?

A: No, sound, Laura, sound! See Leedskallen.

Q: How does one produce this sound?

A: We have given you the pieces, now "fit them in."

Q: Well, they say that prime matter is that which is created by God and is firmly captured within you, yourself, and that any creature of God deprived of it will die. So, I have come to the idea that this prime matter is blood, which is connected to the hemoglobin molecule, which is...

A: What is the human body composed of? 77 per cent... what?

**Q:** Well, water...

**A:** Bingo!

**Q:** Well, how does one change the water in one's body to heavy water, and what kind of effect does that have on the system?

**A:** See previous responses!

**Q:** How does one make the water in the body into heavy water?

**A:** See previous responses!

**Q:** Is it as simple as going into a trance an humming 'oom?'

**A:** On the right track, but short of destination.

**Q:** Does it have something to do with the bones... using the bones in the body as resonators?

**A:** Just review when convenient. Guessing will derail you.

**Q:** I need a clue about this sound...

**A:** You have been given this.

**Q:** Well, I thought about the DNA, marrow, blood, hemoglobin, magnetite, and the fact that blood is manufactured in the marrow of the bones, and the symbolism of the skull and crossbones which is also the symbol of the Rosie Cross, and the image of the blood of the pelican - so it just made me think that blood was important. Does blood have something to do with this internal sound or does the sound change the blood?

**A:** No more on this.

**Q:** Anything else for any of us tonight? We are all really tired.

**A:** Okay, good night.

END OF SESSION

## 5.38 December 31, 1997

Ark, Laura, Frank, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Yxtorra.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** The immediate business at hand is that I feel that I am being taken advantage of by the contractor working on my house. I know that you guys said to go ahead and get the work done on my house, but I don't think this guy is gonna do it. He's got the money and I am left holding the bag.

**A:** Then be a "pest."

**Q:** You mean harass, fuss and complain?

**A:** No, keep after him. What about those "squeaky wheels?"

**Q:** Well, if I do that, do we see the energy surrounding the situation, that the work will be done right, it will be finished, and I will be happy with the work?

**A:** Two out of three; you choose.

**Q:** Okay, anything about the situation to keep my eye open for particularly?

**A:** License.

**Q:** His license? Get his license number? Anything else?

**A:** No.

**Q:** Okay, the next issue, we have now given him all our money and we are now broke and we have a lot of stuff to take care of in January. What do you see, or can you give us any pointers in terms of employment or income potential that we can activate at the moment?

**A:** Lesson learned is why you gave all your money prior to job; follows!!

**Q:** Okay, the lesson is learned. Now, advice!

**A:** Wrong! You are hasty by nature.

**Q:** Well, he doesn't have ALL the money, there is still money in escrow...

**A:** How many prospects interviewed?

**Q:** In terms of what? Contractors or job?

**A:** Yes.

**Q:** Job?

**A:** Both.

**Q:** Well, on the contractor business, I called a lot of companies that would not work on my house because of its age. I am confused!

**A:** Only you can confuse you.

**Q:** (Ark) Can you add anything to this subject, something that we can do that we didn't think about?

**A:** Only if you prompt.

**Q:** (Ark) I don't know how. (Laura) Are we going to hear from UCF?

**A:** You should take the “bull by the horns.” It is wrong for you to think you are not in control, ultimately.

**Q:** Okay, in terms of contact, what bull are you speaking of?

**A:** Obtaining position.

**Q:** Well, we were going to do something back at the end of November, but you said ‘patience pays.’ So, we have been waiting to see what would come about. So, we haven’t made any definite moves, thinking that something would open, however we see that we need to do something here.

**A:** November was November. Patience was needed in order to avoid mistiming faux pas.

**Q:** Okay, so now is the time to contact and say something?

**A:** Yes.

**Q:** Any other suggestions?

**A:** Be powerful; sell thyself.

**Q:** I want to ask if the falling of the picture and the stopping of the clock was as a result of Ark’s mother coming and giving us a message?

**A:** Yes.

**Q:** Is she alright?

**A:** Yes.

**Q:** Did she finish what she was supposed to do?

**A:** Too complex a concept for this medium.

**Q:** Since we haven’t had a session since we went to Mexico, I would like to point out that we were not able to get the divorce in Mexico, nor were we able to arrange any other kind of legal

maneuver. So, why did you encourage us to go? We didn't accomplish anything except spending money!

**A:** Nonsense!

**Q:** Well, what can YOU say we accomplished except that Ark gave his lecture and we messed around and had a good time...

**A:** Yes...

**Q:** Is anything going to come out of this trip to Mexico that we don't yet see?

**A:** Wait and see.

**Q:** And, we did not see any ufos except maybe that little blip on the photograph I took from the plane window. We looked and asked around some, but no ufos! I was very disappointed!

**A:** Silly woman! You know better! What you saw and what you perceive in your 3rd density conscious memory are two different things! Why was Anna ill? Why the nosebleed?

**Q:** We didn't mention to anybody that she had a nosebleed and she never had a nosebleed before. We figured it was just from being on the plane. Okay, so what happened?

**A:** Hypnotist. Not you.

**Q:** Take her to a hypnotist that is not me?

**A:** Yes. And you too.

**Q:** Well, I was sick when we got there that night. I was so sick I was shaking. I had to go to bed. Okay, anything else you want to say about Mexico?

**A:** Not unless you ask.

**Q:** Let me ask one question: did something happen in Miami, in the air, or after we got there?

**A:** Yes.

**Q:** In Miami?

**A:** Find out.

**Q:** (Ark) How can we find out without going to hypnotist?

**A:** Not likely.

**Q:** They said for me not to do it. Why?

**A:** Impartiality needed.

**Q:** (Ark) I would like to know if it is at all relevant, because a lot of things happen that are irrelevant for the future?

**A:** It is. [break for New Year's]

**Q:** It is now 1998. Do you guys have any predictions or comments for the new year?

**A:** In Pensacola, for but one example, it is still only 1997.

**Q:** Very cute! Okay, so it is not new year around the entire globe, and you have made your point about time. However, soon, everyone will agree that it is 1998, and then it will be, in fact, 1998. So, do you have, for those waiting with baited breath, anything to say about the upcoming year. Of course, I know all the psychics and channels are busily posting all their direful predictions about photon belts, null zones and whatever... a whole new series of dates for this will come, I expect...

**A:** Are you not yet tiring of such drivel?

**Q:** Yes, I am extremely tired of such drivel, but you have given some very good predictions in the past, and some that were dead

wrong. And, speaking of dead wrong predictions, let me ask: on one occasion you said that the number of people left alive after the flood of Noah was 19 million and on another occasion you said 119 million. Now which is the correct figure?

**A:** Either.

**Q:** Well, it can't be either!

**A:** Yes it can... all is as the perceiver perceives.

**Q:** I think I liked you better when you were a little more linear!

**A:** We never were. As that is not for you. Not any more than it is for the company executive to don diapers!

**Q:** Yes, but... I feel like we are going around in circles and we get vague answers. Yes, we understand the necessity for such answers in some cases, but there are other things going on that we would like to deal with in a little more direct manner.

**A:** You get into trouble when you presuppose the nature of the answers to the questions.

**Q:** Well, it still comes back down to...

**A:** No, no... get your mother to read!

**Q:** (Alice) You want me to read back the answers? To go back?

**A:** Nature.

**Q:** (A) We have this idea to put some of the sessions on the internet. Is it a good idea?

**A:** Okay, but book deal looks more prosperous if it includes participation by all three of you. Internet, when utilized cautiously and properly leads to this. Ark's credibility enhanced, not diluted.

**Q:** So, in other words... Ark's credibility enhanced? Utilize Ark's credibility? Is that what you mean?

**A:** No.

**Q:** (A) I think that the idea is that I could be afraid that using my name in this context could dilute my credibility, and they say it is not the case...

**A:** Yes.

**Q:** (A) Okay, this was one question...

**A:** You are burgeoning quantum physicist, and, as such, have the opportunity to be the "trailblazer."

**Q:** (A) Yes, there was this physicist working with Ra, why did he die, what was behind that?

**A:** Ask yourself about what you suspect.

**Q:** (A) I am asking myself about what I suspect, and I suspect that he was silenced like Marinov. Is that the case?

**A:** Intuition is a necessary and valuable tool in trailblazing.

**Q:** (A) The next thing is that we were discussing putting some of the information about the death of Marinov onto the Skywatch...

**A:** Who tried to suppress you?

**Q:** Nobody, but my intuition is that we should not.

**A:** Right. Ark knows caution is the friend of sustenance. Laura knows "tossing caution to the four winds" as her compatriot! Balance equals perfection.

**Q:** But! How can you balance between telling and NOT telling about Marinov to Skywatch. (A) Balance means putting something, but not necessarily that....

**A:** Does Laura wish to have dear loved ones kidnapped?

**Q:** No, I DON'T want to have my loved ones kidnapped!

**A:** Be cautious and patient.

**Q:** (A) I want to interrogate you guys for a while. Are you ready?

**A:** When are we not?

**Q:** Good. Now, at some point you said when we asked about the Ra Material, you gave the number that it was 63 per cent accurate. Do you confirm this now?

**A:** Yes.

**Q:** Now, I want to know exactly how you got this number 63, how you computed it, why is it 63 and not 62 or 64?

**A:** The divination process always breaks down to mathematical processes, as this is the only true universal language.

**Q:** But, I want to know what mathematical process you were using to get this number 63?!

**A:** Add the total number of words published, divide the sum total by the number reflecting accurate conceptualizations.

**Q:** Okay, if we have 100 words, and 25 are used in the description of a concept that is accurate, is that what you mean?

**A:** Close.

**Q:** Okay, how do you determine an accurate conceptualization?  
(A) How do you determine if a given word is accurate?

**A:** By the verity of the issuer.

**Q:** So, words, even though words can mean different things, the verity of the speaker can give...

**A:** Yes, because if monitored in a state of pure non- prejudice, the accuracy level will be perceived correctly.

**Q:** (A) Can we go, word by word, through Ra material, remove the incorrect words and leave only what is correct?

**A:** Not necessary for reason just given.

**Q:** (A) Okay, I want to read a sentence: ‘The first, the Great Pyramid was formed approximately 6,000 of your years ago.’ I want to go through this word by word. The word ‘the,’ accurate or inaccurate?

**A:** Accurate.

**Q:** ‘First.’

**A:** Inaccurate.

**Q:** ‘The.’

**A:** Neuter.

**Q:** ‘Great.’

**A:** Accurate, in this case because of conventional agreement.

**Q:** Now, you describe a word as neutral, but in the mathematical algorithm you gave for computing the numbers, you didn’t mention neutral words, so, what do you do with neutral words?

**A:** They belong to the 37 percent as they cannot be counted subjectively as accurate.

**Q:** ‘was’

**A:** Accurate.

**Q:** ‘formed’

**A:** Accurate.

**Q:** ‘approximately’

**A:** Accurate.

**Q:** 6,000

**A:** Accurate.

**Q:** ‘Of.’

**A:** Neuter.

**Q:** ‘Your.’

**A:** Accurate.

**Q:** ‘years.’

**A:** Accurate.

**Q:** Okay, if we apply the same formula to the C’s, your material, what percentage would you give?

**A:** Not up to us to measure.

**Q:** Okay, you gave, concerning the pyramid the following sentence: ‘The Great Pyramid was built by Atlantis 10,643 years ago.’ Is it accurate?

**A:** Not as you state.

**Q:** The question was: what year was it built, and the answer was 10,640 years ago. And it is inaccurate? Is it also inaccurate when we read original transcripts. (L) Yes, I think there is a problem. You confirmed the Ra material on a point that contradicts what you gave yourselves!

**A:** Problem is not with “us,” problem is trying to compare to different frames of reference.

**Q:** Okay, let’s read the sentence word by word...

**A:** Not point, as you have not even achieved an accurate reading as pertains to literacy. Remember!!: “Frames of reference.” Look for clues in terms of definition.

**Q:** I don’t understand what you are saying. Either it was built 10,643 years ago or it was built 6,000 years ago.

**A:** Stupidity is enhanced by haste.

**Q:** (A) In this material...

**A:** Formed/built... you think it means the same thing, eh???

**Q:** It was built before it was formed? (A) According to this Ra material, was never built at all, it was formed by thoughts... Well, we are talking about facts, numbers.

**A:** If your house at 6322 Montana Avenue is remodeled, then it takes a new form. Now, reread sentences in question carefully.

**Q:** ‘The first, the Great Pyramid, was formed approximately 6,000 of your years ago. Then, in sequence, after this performing by thought of the building or architecture of the great pyramid, using the more local or earthly material rather than thought form material to build other pyramidal structures.’ Now, C’s say: ‘The Great Pyramid was built by Atlanteans 10,643 years ago.’ The problem with this sentence is, we are not specific - we know we mean the Great Pyramid at Gizah. Okay...

**A:** No, Laura, no no no no !!!!! If your house is remodeled in 1998, is that when it was built?

**Q:** No, that is not when it was built. Did the sentence you took out of the text say Atlanteans? (A) Yes, first you asked when and then by whom...

**A:** Atlantean Descendants, not Atlanteans!!

**Q:** (A) No... once it was said by descendants, and once it was said by Atlanteans. (We check and find that it did say 'Atlantean descendants and NOT Atlanteans.) Can we use this process to analyze all the material?

**A:** You can, but senior citizenship awaits its completion.

**Q:** Is there some issue about asking this question of accuracy that needs to be addressed? One main thing is: the presence of certain persons. Some sessions were more accurate than others depending upon who was present...

**A:** You got it!!!

**Q:** Therefore, it would be difficult to assess an accuracy rating for the C's themselves...

**A:** Bingo!

**Q:** But, we CAN assess the material itself, keeping in mind that some parts can be more accurate than others...

**A:** 71.7.

**Q:** Okay, that takes into account corruption from different people, typos, reconstruction, and so forth. And, the same applies to the Ra Material... (A) Okay, suppose I have a sentence that the Great Pyramid was built 10,000 years ago, but really it was built yesterday, and you would give 70 per cent accuracy to this statement.

**A:** No.

**Q:** But only one word is inaccurate...

**A:** You are searching for a concrete formula within a vacuum of abstraction. The only way to get an accurate measurement is to wait until you can include the sum total of all the words, then determine accuracy as a percentage of the total. With the total of

all words, and each individual word as the unit of measurement.  
And on that note, until the next time, Good Night.

END OF SESSION

# Chapter 6

## 1998

### 6.1 January 17, 1998

They proceeded to tear off the roof. It started to rain. Day after day went by with no roof appearing because, of course, they couldn't put it ON in the rain! The contractor then came inside and started building the new stairs. At that point, he showed me the contract saying that I was to give him the second payment as soon as the stairs were built. Never mind that the roof was still off and it was raining and the whole inside of the house was covered with black soot from old tar paper/roofing.

Well, asking for the second lump sum payment (that I had to sign off on) was kind of an affront since absolutely nothing had been done except build a skeleton stair and tear off our roof and we were freezing!!! I had already made up my mind I was going to fire him, but I had no idea what I was going to do with the mess I was in.

Meanwhile, my eldest daughter had a THIRD auto accident and

her car - which we had just bought her the previous February - was totaled. She was lucky that she wasn't killed. The first accident happened when some crazy person tried to run her off the road and the second one was also VERY suspicious.

MEANWHILE, a whole lot of job issues were coming up and our finances were not very secure, to say the least.

So, for anybody who ever finds themselves in a maelstrom of difficulties, don't despair... we've been there!

Frank, Laura, Ark, Alice

**Q:** It's been a long time. Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Lopsiatza.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** As you know we have...

**A:** This is not a good board.

**Q:** I know. Should we work with the plain Ouija board? Would you prefer that? {I couldn't find the good board because the house was in such a mess with all furniture pushed to the center of rooms, covered with plastic to protect it from the rain and tarry mess leaking in everywhere.}

**A:** Up to you.

**Q:** First question: why are we in the middle of such a horrible mess? Things were supposed to get better?!

**A:** Do you not expect there to be turmoil in accompaniment with a level one quantum life change?

**Q:** A level one quantum life change? Do you mean the change we have already effected, or the change we HOPE to effect?

**A:** Both and transition between.

**Q:** So, this is a level one quantum life change of some sort. Let me ask you, we are having some sort of panic about the job situation as it seems that the one in Orlando has not panned out, UFL does not have any permanent positions, nor does there seem to be anything at USF. So far, nothing. In a couple of months, we will be looking at unemployment here!

**A:** All will be resolved. Key is to sell oneself re: ones assets in terms of what value they project upon the Florida University System, and by proxy; the State itself. Remember, your audience can only see the “actor on the stage” when the spotlight has been properly focused upon him. Also, the audience does not attend if the “play” is not properly advertised. We also suggest you rattle the bushes with your immigration attorneys in order to get the necessary processes speeded up there. If they will not perform, then find others!

**Q:** We have done all kinds of things!

**A:** Recontact “Enterprise Florida.”

**Q:** Alright. I’ll see what happens. Now, on {my daughter’s} car. What happened to this guy who hit her car? It destroyed her car and thereby her life.

**A:** Did no such thing.

**Q:** Well, I know that! But she is crying and thinks her life is over. We are completely lucky, in my opinion, to have her still with us. Why three accidents in a year’s time?

**A:** The dark forces always attack the weakest, or most vulnerable, links in the chain.

**Q:** Did the guy actually fall asleep?

**A:** Close. Hypnotic state.

**Q:** Alright. What can I do, any of us, my daughter, or whoever, to derive the proper lesson from my daughter's car being totaled?

**A:** Refer to standard response.

**Q:** Knowledge Protects.

**A:** Yes.

**Q:** Okay, anything in particular about the line of attack through this construction project?

**A:** No.

**Q:** Well, when I fire this guy, is he gonna give me a hard time?

**A:** Some.

He did; when I stopped payment on his check, he suddenly discovered that he had a telephone (I had been calling him every day but he was never available.)

**Q:** Ark discovered, when he got paid on Friday, that they had changed the deal on him. It's like everything over the past few months is turning around on us. They play the switch routine all over the place.

**A:** Fight for your rights. Go to the source of original promise and get clarification. Get K\*\*\*\* {Ark's colleague} in on this as ally.

**Q:** Okay. Any advice on how to go about getting the permits I need?

**A:** Look at easement.

**Q:** What?

**A:** Reexamine courthouse records for interesting anomalies which should work in your favor.

I did and it turned out that the contractor not only did NOT have a license, he also had a criminal record for domestic violence and cocaine abuse. This worked in my favor in terms of getting some slack from the county regarding permits and inspections, etc AND the bank agreed to allow me to take over the job of contractor, which I did.

**Q:** I don't understand. Any other clue on that? Well, back to the job situation: (A) When I was coming here I hoped that I will do some work and you guys will be helping us and that we will doing things that are important, and, until now, with all this teaching that I have, the fact is that its as if all the forces work in such a way that I can do just nothing, not even what I was doing before. Is there any hope?

**A:** Yes, of course. But you must accept that it will unfold step by step, and you will not have the luxury of knowing well ahead of time what will happen. All is lessons. You may choose to look upon it as adventure or as torture... Have faith and get more sleep!! The lack of this is breeding a chemical imbalance within, thus leading to depression.

**Q:** (A) Well, I always like to be sure, and maybe I should take some steps before the end of life happens?

**A:** Sarcasm becomes you not! All will work out well for you, and we would not say this if we did not know it to be so.

**Q:** There is a meaning and definition in this attempt to integrate this into physics, and because the concept of density seems to have something to do with psychic and consciousness, I cannot find, until now, how to put it, how to relate it...

**A:** It has to do with perception, and the ability to perceive, which is in larger measure determined by genetic makeup. Your realm is created by your ability to understand it. The wave comes as so many seek “graduation.”

**Q:** Are you saying that we are actually, in a sense, creating the wave?

**A:** And vice versa.

**Q:** Are these densities something that can be defined in terms of physics, as in divisions of reality that some significant change occurs at, say, the boundary of one density that signifies the beginning of the other?

**A:** This, as with so much else is so difficult for you to understand because of your limited view point. Remember, you see the densities below yours perfectly well. But they do not perceive yours as what you are.

**Q:** (A) They said that, in physics, we have one seventh of the equation... (L) When they said that, they were talking about matter and the direction in time of an anti-particle, which was referred to as the one-seventh. (A) But, what I mean is, animals, minerals, they are described by just one physics that we learn in school. We do not see that this is a different density.

**A:** Only because you know it is there. You cannot measure that which is above your level! Of perception, when you are using measuring tools which only can measure that which you perceive.

**Q:** (A) We are the form makers. I mean it's not Nature that is creating, it is us seeing order in potential disorder. And we see more order than animals, so it seems. Is this what is meant by higher density, being able to see more order?

**A:** Well, close, maybe, but you are attempting to employ a mirror to see outside.

**Q:** What we are trying to understand is: you have described seven densities. Three physical densities, three ethereal densities, and the one in the middle, the variable density. What we are trying to find out here is some way to express this mathematically. Some way to understand this in the universal language of mathematics. Because, if we could do that, mathematically speaking, that would help our understanding and perceptual abilities.

**A:** Yes, but first you must unravel the part of the puzzle which has nothing to do with mathematics. You would have your best luck finding the mathematical formula while in a “dreamstate,” or under hypnosis, or in meditation before a psychomantium.

**Q:** (A to L) What about this Dianne business. You are talking to her. I have doubts about this - if you are not revealing too much. Who is she really? If this is not somebody who hides behind this and tries to get something out of you? Question is: is my uneasiness justified?

**A:** It is always wise to be cautious. When contacted by someone new, it is best to find out about their personal lives and background in order to gauge trustworthiness.

**Q:** But, what about this Dianne L\*\*\*\*?

**A:** Ask her! {at this point a low flying helicopter apparently begins to circle overhead and this sound continues until the end of the session.}

**Q:** (A) Now, I want to come back to physics. We have this paper from the French guy Chardin, who speaks about anti-gravity and relates it to a double structure of the universe; that anti-matter is just located, not in our universe, but in another universe...

{Sound of helicopter on tape for the next few seconds}

**A:** The two are exchangeable, much like an ion exchanger.

**Q:** (A) The two are exchangeable, but it's about us. We are apparently are made of matter rather than anti-matter, or there is another us that is made of anti-matter? I don't think that we are exchangeable. We are apparently living in a universe of matter rather than anti-matter.

**A:** Exchangeable.

**Q:** (A) The loop dimension of Kaluza-Klein... when I was asking about extra-dimensions, the answer was that there were no 'extra' dimensions, but forget terminology, there is this theory of Kaluza-Klein that there is this loop dimension, this 5th dimension and the question is: this is a way toward UFT, and I would like to have a hint if adding this loop, or cylinder dimension, is the right step? {Helicopter sound continues.}

**A:** Yes.

**Q:** (A) Okay, that is enough.

**A:** Okay, we sense probing of you now, or interference, so must go, Good Night.

END OF SESSION

## 6.2 January 24, 1998

Frank, Laura, Ark, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

A: Azaha.

Q: And where do you transmit through?

A: Cassiopaea.

Q: We have several things this evening, the first one being: why did {my daughter} decide to move out the way she did?

A: Hormonal.

Q: Where is she?

A: With others.

Q: I know she is with others.

A: Check records of phone equipment.

Q: Well, I just would like to know that she is alright.

A: Yes.

Q: I would also like to know why she decided to do this in a way that would hurt me?

A: Was not objective.

Q: On another subject, this little baby that is missing, Sabrina... the parents seem to be believable. Did aliens abduct the Aisenberg baby?

A: No.

Q: What happened to Sabrina Aisenberg?

A: Accidental death.

Q: What caused the accident?

A: Dropped.

Q: Who dropped her?

**A:** Not to be revealed. You can figure it out!

**Q:** Okay.

**Q:** (A) I want to ask about the photographer. (L) Yes, the one who took {my other daughter's} photograph. Was he who he said he was? {A newspaper photographer had approached one of my daughters and asked to take her photo.}

**A:** Close.

**Q:** Did he have any ulterior motives?

**A:** No.

**Q:** We have been discussing the campaign to work on a public relations project here. As we have discussed it, is it okay to push forward?

**A:** Better with universities.

**Q:** What do you mean?

**A:** Contact them first.

**Q:** Okay, I wrote a letter to USF. Do you mean all the other universities in the State System?

**A:** UCF and USF and FIT.

**Q:** What is FIT?

**A:** Florida Institute of Technology.

**Q:** Alright, contact them first and then carry through with project.

**A:** Yes.

**Q:** In other words, give them an opportunity and don't upstage them?

**A:** Yes! We said to rattle the bushes, not mow them down!

**Q:** Alright. Along the same lines of the Sabrina Aisenberg issue, I was reading a book about Churchill and Hitler and Rudolf Hess. It seems that this writer was saying that the man in Spandau Prison was NOT Rudolf Hess. Is that correct?

**A:** Yes.

**Q:** What happened to Rudolf Hess?

**A:** Died in plane crash in Scotland.

**Q:** He died? Was this the reported crash landing?

**A:** Yes.

**Q:** He DIED in that crash?

**A:** Yes.

**Q:** Who was the guy who parachuted out?

**A:** Did not.

**Q:** They made up the whole story?

**A:** No, just Hess survival, for propaganda value.

**Q:** Well that is a bizarre thing to say about it. But, it is also another option that the writer of that book did NOT consider. But what about the farmer who saw a guy parachute out of the plane?

**A:** So they say.

**Q:** Well, I guess they could have set the whole thing up. That would be even MORE devious!

**A:** Real Hess would never have relented to abuse.

**Q:** Hmmm. Did Hess actually fly to Scotland?

**A:** Yes.

**Q:** Did Hitler know and was he in on it?

**A:** Yes.

**Q:** So, they had to make Hitler think Hess survived in order to fool him into thinking that whatever the plan was, was working?

**A:** Hitler believed Hess had gone mad, or had indeed died.

**Q:** Well, this is a bizarre question, but I have to ask it. Was Hitler a homosexual?

**A:** No.

**Q:** Well, this book suggests that he had an unusual relationship with Rudolf Hess. But, others said that he was completely ascetic in ALL ways.

**A:** Book is wrong in other ways too.

**Q:** Well, I thought the whole thing was interesting. Did Hitler have any offspring?

**A:** No.

**Q:** Well, this book sort of portrays Hitler as not such a bad guy and Churchill is the real bad guy.

**A:** Disinformation for purposes of deception.

**Q:** Alright. Speaking of disinformation, there is a little statement attributed to former astronaut Edgar Mitchell, sent out in the Skywatch mailing in which he says that ‘manmade craft that have the flight capabilities or characteristics, that are generally attributed to UFOs, DO EXIST, but NOT as part of military arsenals.’ Is this true?

**A:** Not what he says.

**Q:** What do you mean? That I stated it inaccurately?

**A:** Yes.

**Q:** Well, what IS the truth in this case?

**A:** Not man made.

**Q:** Well, you are right. He did NOT say manmade. He was saying that the technology DID exist. (A) He was speaking about reverse engineering, suggesting that we were able to reproduce the technology, and reverse engineering implies that it is done here on Earth. Of course, that does NOT imply that there is no help from somewhere else.

**A:** Close. Reread.

**Q:** Okay, I would say that it was phrased VERY carefully. (A) The next thing that he said was that to build these craft or whatever, no fancy things wormholes or time loops or other dimensions are necessary, which implies that it is all third density technology. Was he correct in this respect?

**A:** Did not say all 3rd density.

**Q:** He was sort of implying this, but he implied that it was all standard physics and engineering.

**A:** 3 and 4. Reread.

**Q:** Okay, we will. Is he a person who is in the know about the things he was speaking?

**A:** Close to that.

**Q:** (A) Now, I want to ask about this English anti-gravity guy, who died at the age of 76 after he contacted NASA and after all his experiments that imply he produced anti-gravity. I suspect that

his death was not all natural. Eric Laithwaite. Did he discover the secret of antigravity?

A: To an extent.

Q: Was his death, shall we say, assisted?

A: Yes.

Q: Why haven't we heard from Sue Brana?

A: No longer interested, as you resisted trap.

Q: So, it was a trap. Am I correct in thinking that they, as a group, do not really exist in the US, but that they are in Europe?

A: Exist as extension.

Q: (A) So, it is an extension of KGB or whatever. (L) As an extension of what?

A: NSA.

Q: Okay, so we resisted that trap. Out of how many?

A: Watch, look, listen.

Q: (A) I want to know what was the purpose of this trap? What was it supposed to achieve?

A: De-energize you in psychic maze. Cause you to go on a "wild goose chase."

Q: (A) Why would they want me to go on a wild goose chase rather than get me to work with them? (L) I guess they don't want you to work with them...

A: Or find anything significant.

Q: Next item: we have discovered that you can possibly get a divorce in the Dominican Republic by signing a power of attorney

and having an attorney represent you there and that you can establish a single status, but not settle property. Can this, in fact, be done?

**A:** Better look into it further.

**Q:** Alright. Is the divorce in Florida the best way to go at this point?

**A:** Okay, but we cannot lead you by the hand.

**Q:** I know that. I am just thinking about the various options and which might have the least glitches? I guess that we can control the glitches right out of any process.

**A:** Yes.

**Q:** (A) The only thing we need to know is anything that will end this bad period as soon as possible.

**A:** Okay, good night.

**Q:** Now, wait a minute! That was a question! You can't just say 'hasta la vista!'

**A:** Darkest before dawn.

**Q:** Well, it has definitely been very dark.

**A:** Faith! Good night.

END OF SESSION

## **6.3 January 31, 1998**

Frank, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Oorg.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Tonight we are very tired and we have a few quick questions. Ark feels like his time is being wasted. Can we have a little insight on this situation?

**A:** More specific.

**Q:** We he is spending so much time teaching that he has no time for his other work, and the mess in the house and the demands of the kids - me - all seems to be keeping him from doing what little of his work he COULD do when he is not teaching.

**A:** May need to “go it alone” for awhile.

**Q:** He may need to do this?

**A:** Yes. Would help, otherwise, problems will increase.

**Q:** You are saying that I should drive him to Gainesville, leave him there, come home and take care of the house and kids?

**A:** Or similar. Remember, we do not tell you what to do. Only make suggestions.

**Q:** Can you tell us why the situation is as it is just now?

**A:** Attack.

**Q:** Well, if the attack is designed to keep us apart, they are winning...

**A:** Not to keep you apart.

**Q:** (A) I have a theory that this is just what the C's were telling us - that this is just a test - to make everything just as difficult as possible - so that we are tired and have too much to do - that it is just a test...

**A:** Close, interrelated.

**Q:** Can you give any direction of things that can be done to alleviate the job stress?

**A:** Will resolve itself.

**Q:** Can you tell me who, in fact, was the person who called the police last week? {There had been a situation of extreme rebellion among the kids and I told them that if they did not obey the rules of the house, they could just pack their bags and go live with their father. A short time later, the police arrived at the door saying there had been a report of "abuse." It was clear that one of the kids called the police in an effort to exert control over us. We know now that the kids had called their older sister who was living away from home and it was she who called the police. So, for anyone having problems with their children, with creating a new family after divorce, just know that we went through all that in the extremes and survived. All the children love Ark dearly now, and they are all glad now that we stuck to our guns and didn't tolerate all the emotional games and blackmail they tried to pull on us.}

**A:** Open.

**Q:** Why do you say 'open'?

**A:** Because to say otherwise would stimulate unwise reactions born of fiery emotions.

**Q:** (A) I would like to know if there is any imminent financial catastrophe which we can still somehow prevent?

A: No catastrophe.

Q: Okay, so I should take Ark up to Gainesville and come back...

A: USF.

Q: Well, I wrote to Betty Castor, but we haven't heard anything back...

A: You will.

Q: I hope so. (A) Did they mention USF because we should do something beyond what has been done?

A: Always.

Q: I don't know what else to do...

A: Beware of negative health effects deriving from Mexican silver.

Q: Such as?

A: Blood abnormalities.

Q: Is that just me, Ark, A\*\*\*, A\*\* - we all have Mexican silver?

A: All.

Q: What are we supposed to do? Not wear it?

A: Good idea!

Q: (A) That's possible. Better late... than not at all. (L) Any other little 'jewels' of wisdom? (A) I want to ask about monopoles. Do monopoles exist?

A: Yes.

Q: My thought was that if monopoles exist, the only way they can exist is that if somewhere, under some conditions, the opposite of

the pole exists... I mean they cannot exist in third density without being a duality... (A) Yes...

**A:** And third density cloaks so many truths.

**Q:** Do you say cloaks in the sense that it cloaks the monopoles from our observation?

**A:** Measureability.

**Q:** Cloaks them from our measureability.

**A:** Psychomantium.

**Q:** Okay, is a psychomantium something that utilizes monopoles? When you use the mirror are you seeing the other 'half' of them?

**A:** Window to many vistas.

**Q:** Well, I am working on it! I have to get the house put together first! (A) And to get the house put together first we gotta work on these monopoles, get the Nobel Prize for these monopoles...

**A:** Spreading yourself too thin.

**Q:** I know I am spreading myself too thin.

**A:** But, you are happier now.

**Q:** Except for {my daughter}. I am very unhappy about {her}. I want to cry about it all the time.

**A:** Always has been the conflicted one; karmic.

**Q:** What is the nature of the karma?

**A:** Role reversal.

**Q:** Back to monopoles. (A) Long ago you advised that I should return to something that I was doing long ago, and that I abandoned, like many other things. Monopoles was one of the things,

and recently I discovered another, automata. The universe is like a computer and, in the beginning, there was the ‘word.’ Should I just do the monopoles temporarily and finish, or is it something that is worthwhile to pursue? Help, please.

**A:** You need study time.

**Q:** What is the clue to be derived from ‘study time’?

**A:** Both efforts bring results when pursued simultaneously. Weekends provide this, so do evenings soon to be in new environment, if pursue correctly. Basically on the right track, just have patience and faith. Now, we suggest that future sessions delve more fully into matters of universal importance, then personal problems dissolve, or at least ease! Thank you and Good Night.

END OF SESSION

## 6.4 February 21, 1998

Frank, Laura, Ark, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Sycoritia.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have a couple of books tonight and Ark has some questions... (A) I have a question, it is not quite personal since with

us, personal is mixed up with universal, so I had the idea to send a letter to G\*\*\* B\*\*\* of Enterprise Florida and I am not sure if he was the correct person to send it to, so I would like to have advice?

**A:** Yes.

**Q:** Anything else concerning this Enterprise Florida business that I could miss?

**A:** We have told you, and most in particular, Laura, to simply “stay on top” of the situation, and success will result. Suggest Laura contact editor of Florida Trend Magazine, both for networking purposes, as well as to drum up support. Of course, the first and foremost thing is to complete divorce action. We suggest you turn up the heat there. And please do not say you have done all you can, because we do not mention these things when such is the case.

**Q:** Okay, that is one thing. I want to ask about this internet business that I am now doing. I am opening myself a little bit more and I don’t want to make any mistakes. The question is rather rhetorical because I believe I am doing this correctly, but just in case, I want to make sure that it is in line. Is it?

**A:** So far...

**Q:** Now, I have some scientific questions, namely I would like to have some advice. Because time is finite and I have so much to do and so little time and so many topics - I would like to ask if I list the topics one by one if you will give me a number or estimate of priority of each particular topic so that I will know which to start with and what comes later. Can I have such help?

**A:** Your talent lies in building the mathematical equations which qualify your theorems and quantify your solutions. What we do is advise in ways that do not interrupt learning, or interfere with

free will. On the other hand, Arkadiusz, you have accomplished much in the past with your philosophy activities and reflections in journal form. No need to “slack off” now, just because life appears to be on a “sweeter” track!

**Q:** Okay, the first item on the list is dealing with this rail-gun business and it was here where I was planning to start. What priority does this have with the ‘project’?

**A:** The rail-gun is useful if only as an employment oriented “door-opener” for you.

**Q:** I found that this Bulgarian guy who died, this Marinov...

**A:** Electromagnetic accelerator.

**Q:** Does it concern this Marinov, he wrote an equation which is something unusual and he claims that the equation which physics is using is wrong, false, so this comment about electromagnetic accelerator refers to the paper by Marinov?

**A:** Close.

**Q:** Next, I have sono-luminescence. Which was set apart. What is it? What is its priority with respect to the electromagnetic...

**A:** Dual reality structure.

**Q:** I can also work on anti-gravity... (L) I have a perfect way we can organize this list... I will show you later. (A) Okay, then we stop this business.

**A:** No.

**Q:** (A) Okay, we DON'T stop this business. Anti-gravity, I already asked about the French guy, and I have already started to think about anti-gravity. Should I jump with full speed into anti-gravity now? What is its priority?

**A:** Slowly, hot subject.

**Q:** Okay, I will do it slowly. What about the time machine by Newman? It's related to the UFT business, time loops, time travel... also, I can jump on this...

**A:** Look for Von Neumann.

**Q:** Von Neumann?! Okay, I read a book about Von Neumann, and what struck me was that he was an extremely bright man with a sharp mind, but somehow a little bit tragic, and I could not find any trace that he did anything unusual except in the subject of automata and artificial life and such things. Your advice to look into Von Neumann, is it relating to this business or in his presumed participation in the Philadelphia Experiment?

**A:** Good! Now you are "tracking."

**Q:** Now, magnetic monopoles. Again, there is the possibility of following this link... is it a priority or just a sidepiece?

**A:** Laura has had much success in revealing encrypted information... it even raises one's FRV. You need a "recharging, my dear." All this attack has sapped ye!

**Q:** (L) In what sense, or any specific mode of recharging?

**A:** You and Ark must get on the right "track."

**Q:** Are you meaning 'track' as in 'treadmill'?

**A:** The time for deciphering is not now.

**Q:** (L) Speaking of this attack, I don't want to go off on this subject because it is personal, but do you have a few words about how to handle this complete lunatic who is really trying to cause me problems?

**A:** See last 3 responses.

**Q:** (A) Okay, on January 17 the session ended when you said that there was probing of me, or interference. What kind of probing do I have to avoid and how?

**A:** By STS fourth density.

**Q:** How can I resist this? Is it bad for me when they probe? What should I do? (L) They probe everybody. It's just that when you know about it and can tell when they are doing it, it blocks it.

**A:** Yes. KP, IE.

**Q:** Knowledge Protects, Ignorance Endangers. Okay, we have this book about health that claims to have the answer to all physical problems {Hulda Clark's book}. Is it in fact the case that parasites are the root cause of many illnesses such as diabetes, high blood pressure, seizures, chronic fatigue, migraines, Alzheimer's, Parkinson's, multiple sclerosis, etc. etc. which can be simply investigated and cured with her handy little zapper? Is this the case?

**A:** Partly.

**Q:** What part is she NOT talking about?

**A:** Not correct concept.

**Q:** (A) Which of these listed things are really caused by parasites and which not?

**A:** Not correct concept. All mentioned are often wholly or partially caused by various parasitical entities, but not always.

**Q:** Can this zapper that she describes, either home built or purchased from someone else, be effective in killing these parasites?

**A:** Yes.

**Q:** How often do you need to use it?

**A:** Varies according to individual circumstances. If you look closely to the text of that book, you will see the earmarks of channeling of STO NHI root basis.

**Q:** Okay, thank you. Now, in this other book, 'The White Goddess' about the Triple Goddess, alphabets, trees, which this author tracks back to the goddess Danu who Rhys identifies as Casiopaea... but, in this particular section, it brings up something about which I have been EXTREMELY curious... the lame king, the wounded thigh, and the heel issue which is connected to the thigh issue... the thigh of Zeus and the heel of Achilles. Well, it seems that a LOT of heros or 'gods' had this thigh or heel issue and that later, the divine right of kings was connected to this and often a king was ritually lamed. It seems that the wound in the thigh led to an inability to place the heel on the ground which then led to a tabu against the king putting his feet on the ground altogether. Why the ban against the king putting his feet on the ground? Why did the heel have to be protected from contact with the earth?

**A:** In order to interrupt grounding of chakras.

**Q:** What happens when the chakras are grounded?

**A:** What happens to you?

**Q:** Well, a circuit is closed and energy flows out of you. When you are grounded energy flows out of you or through you...

**A:** Or in.

**Q:** Why?

**A:** Would you do Reiki with high heels on?

**Q:** No. You take your shoes off.

**A:** Why?

**Q:** So that you complete the circuit so the the energy comes into you to give to another person.

**A:** Yes.

**Q:** So, if you have a king whose feet are not allowed to touch the ground, that becomes an altogether STS mode of existence, I would think...

**A:** Puppetry, as one sees today.

**Q:** Then, when the individual has been lamed, they have become a puppet.

**A:** Yes, and who is the puppeteer?

**Q:** They have become part of the Chain of Command... STS.

**A:** Yes.

**Q:** Okay, now I want to ask about this secret name of God this guy is supposed to have deciphered from this poem...

**A:** Just a moniker, as with all others.

**Q:** Yes, I know, but he writes that someone described the chanting of these vowels in this particular order by Egyptian priests as being so melodic that it seemed as though musical instruments were being played. So, I remembered what you said about the 'melodic' sound that must be produced from the 'center' of within, as you put it, and I thought that this series of vowels might be what could move objects with sound.

**A:** Then maybe you should attempt this?!?

**Q:** (A) Are you joking?

**A:** Maybe and maybe not.

**Q:** Okay, I will! Anything else? I think we have about covered it for tonight...

**A:** Leaves on cover...

**Q:** (A) What about them?

**A:** Oak.

**Q:** Yes...

**A:** Is Beechnut a company?

**Q:** Interesting thought. Okay. Anything else?

**A:** Just Good Night!

END OF SESSION

## **6.5 February 28, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Winyonna.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Alright, now, just to settle our little dispute: was the video about the abduction in Lake County, Minnesota, true? {The MacPherson video.)

**A:** No.

**Q:** Was it based on a factual case?

**A:** No.

{I don't know about this response. I was pretty impressed with the film!}

**Q:** Okay, then let's forget the whole thing! Now, we have been having sort of exciting events in the last week. Do you have any comments... um, As it has turned out, predictions made over the last year or two years have been really piling up thick and fast after the turn of the year. We have been having the attack from Poland, you know, the tentacles, and we have made some response to the situation. Can you tell us if this response is going to bring any negative ramifications in our direction?

{Ark's ex-wife began defaming us to his old colleagues and this defamation began to spread. She accused him of being a member of a Scientology-like cult. CoS has a very bad reputation as a dangerous cult in Europe. This was our first experience with this sort of thing and it is interesting to note that it was actually started by a vindictive ex-wife. What we did was simply to tell the story of what actually happened, what this woman actually was like and did, to everyone who was interested.}

**A:** Maybe.

**Q:** What could they be?

**A:** Severing of ties.

**Q:** What kind of severing of ties?

**A:** Poland.

**Q:** Ties to Poland? Well, we have always understood that this is a possibility. However, there is also... (A) The last time the advice was that we should add some heat, and this is what happened,

and we would like to know if what we did was correct. I believe we did not make any mistakes.

**A:** Just because ties may be severed does not mean that mistakes have been made.

**Q:** Well, just adding a little bit of heat started the whole thing... I mean, Ark sent that rather normal letter to {a former colleague at the University of Wroclaw} and he printed it and gave it to her and she retaliated with what she did, and we responded to that... it was just from a LITTLE bit of heat! I am curious: {one of Ark's friends at the Uni} said she was running down the corridor and I am curious as to why she was running?

**A:** Under pressure in general, due to circumstances.

**Q:** What was the reaction to my e-mails?

{I wrote her an email and told her plainly that she had just shot herself in the foot as far as any spousal support was concerned; that she should give up any idea of getting a single dime out of either of us forever.}

**A:** Does not completely comprehend linguistic peculiarities.

**Q:** But, is the general gist of what I said understood?

**A:** Close. Letters not properly translated.

**Q:** Maybe we had better re-translate and re-send? Should we?

**A:** Suggestion is avoid local colloquialisms and slang in written communiques, as these do not maintain their meanings when converted from one language to another!

**Q:** Okay, we will avoid using slang. (A) But there will be no chances to use these devices because, as far as I understand, the conversation is over. (L) Now, about the cataclysmic eruption of

Mt. Anna... since these other things, one by one, have been happening, though not necessarily within what we would consider a reasonable time frame...

**A:** Wait and see!!! And remember: time does not exist.

**Q:** Well, I just want to know what suddenly got ahold of this guy {Ark's former colleague at the Uni} to get rid of the Cassiopaeans from the web pages. I know what I think, but I would like to know why? Was he manipulated to do this or did it originate inside him?

**A:** Both.

**Q:** Why?

**A:** You know.

**Q:** What Ark said: jealousy and so forth. What is going to be the reaction when they discover that all of Ark's pages are gone?

{This former colleague was appointed to a director position and demanded that Ark remove any mention of me or the Cs from Ark's personal, Uni website. So, Ark simply put up a notice that he was being censored and removed ALL his pages from the Uni server.}

**A:** Befuddlement.

**Q:** Are they really that dumb?

**A:** Open.

**Q:** (A) Last time I was asking about the content of the web pages, and I was told that up to now, it was okay. I have added some material, and, because everything is sensitive, I want to be sure, again, that I have not made a mistake up to this point. Any advice or warning, please?

**A:** You have not made a mistake up to this point. Keep going, as your frequency is especially conducive to discovery at present.

**Q:** So, the act of thinking and writing is a form of discovery, or can lead to discovery. (A) I want to ask about this criminal prosecution business, which I think we should keep as a last...

**A:** Beware: danger can result from this.

**Q:** Are you saying that danger can result from starting the criminal prosecution against her, because of something she can or would do?

**A:** Because of potential events in general.

**Q:** Can you give me an example of what you mean by danger in this sense? I mean, she stole this money, and the one thing he has NOT done to get her off her butt and give him a divorce, is start this criminal prosecution. He has threatened it, but she doesn't...

**A:** Once started, uncontrollable.

**Q:** Well, we know that. (A) But the point is that then: the courts start to look into everything... sources of money... and they dig and dig...

**A:** Yes. Look before you leap.

**Q:** Well, if we wait until after the divorce, after we are married, after he has citizenship, what about then?

**A:** Same.

**Q:** In other words, this is something that we just simply do not want to do. We can threaten and...

**A:** Not what we said.

**Q:** You didn't say not to do it?

**A:** We do not lead “by the hand.”

**Q:** (A) We can do it, but it is a danger. (L) I’m just dying with curiosity about what is going on over there and what is gonna happen next... and what about poor P\*\*\* {Ark’s former student taken in by the manipulations of Ark’s ex-wife} ... I feel sorry for him. He was just being used...

**A:** P\*\*\* will be alright.

**Q:** (A) Poor M\*\*\* {Ark’s colleague and friend} is afraid that she will throw acid in his face! Ask if we should do something about this {building contractor}... (L) I have an appointment with an attorney... and with the divorce attorney... and we have the form for the VISA... (A) I want to ask about this job situation because, at present, the situation is unstable and there is a chance that I will get no teaching and that would be very bad. Am I doing everything I can in Gainesville, or should I be more energetic. Am I making any mistakes there?

**A:** No.

**Q:** (L) I want to know something about this weird weather. There have been a LOT of sightings in Gulf Breeze and falling fireballs out in Colorado, strange weather, but, to open the door to this, is there anymore to be said about the increased UFO activity and the weather and all the other things going on at present?

**A:** Review early transcripts and predictions, leaving aside “time” frames.

**Q:** One of the earlier sessions made the statement ‘space invasion in 4 to 6 years.’ That was said in 1994, which is 4 years ago. What is the deal on the space invasion situation?

**A:** Lessons are to be learned by observation closely.

**Q:** So, you are not going to give us any more on this idea of the space invasion?

**A:** See last answer, then wait and see.

**Q:** Well, I just keep wondering: are we supposed to be DOING something?

**A:** What you are doing... Carefully re-read transcripts in regard to questions about special efforts and whether they should be undertaken or not.

**Q:** Well, if you try to force things, you just mess it all up. You are supposed to be patient and let things fall into place...

**A:** Close

**Q:** Well, we are getting close to getting the house ready so we can have our psychomantium in the other room. Hopefully we won't be invaded and wiped out before that happens.

**A:** Major dramatic change comes with addition of psychomantium.

**Q:** Well, okay, we are pushing for it. I gotta REALLY get this house finished!

**A:** Will be finished smoothly now... and on that note, Good Night.

END OF SESSION

## **6.6 March 14, 1998**

Frank, Alice, VG, Ark, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Yalun.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Now, VG is here this evening and has said that she will have to go home early, so let's deal with her questions first. (V) Well, after last night and our conversation, I am not so sure that...

**A:** VG would be better served if not so anxious to leave.

**Q:** (V) I am not anxious to leave. I guess one question I have: there were blood tests done on me; were they correct? Were the results correct results?

**A:** Some.

**Q:** (V) Can you tell me what was incorrect?

**A:** Cholesterol.

**Q:** (V) That was the one thing they identified on the blood test as being, you know, not normal. So, is my cholesterol more abnormal or less abnormal than they identified?

**A:** Higher.

**Q:** (V) Okay, I understand that I need to control this through diet. Is cholesterol as imminent and frightening as they say for our bodies, high levels?

**A:** HDL and LDL, two different categorizations.

**Q:** (V) Oh, okay. They were saying that the good cholesterol was high right along with the poor cholesterol. Is that what you are talking about, higher?

**A:** Yes.

**Q:** (V) Okay. Ummm... I have a prescription to get an ultrasound done on my gallbladder. Now, since I have zapped {Using Hulda Clark zapper} for two days it has not been bothering me as much, and I am thinking that there is probably no sense in trying to get something done that I don't have the money for anyway... ummm... I guess what I wanted to ask is it really important to have it done - is there something there that can be identified - if there's not, I don't want to do it. Is there something there to be identified? Stones...

**A:** Identification is in the hands of the identifiers.

**Q:** (V) Okay, let me put it into your hands. Can you identify a problem with my gallbladder inasmuch as what my symptoms are?

**A:** Sludge and stasis in biliary system, not just gallbladder.

**Q:** (V) I don't understand stasis... I understand sludge... (L) Well, sludge would be making it backed up and stasis would mean that it is static... not flowing properly - it's building up. (V) Has the zapper in the last few days helped this because I have certainly felt better?

**A:** "Zapper" tends to temporarily alleviate bacteria, virae and living organisms of a parasitic nature, which aggravates above mentioned problems. But, it is advisable to initiate further actions in order to get longer term relief and improvement.

**Q:** (L) Can I ask a question: If she doesn't initiate further actions, what would be the result?

**A:** It is possible that cholecystitis could develop at some point. It is also even possible that severe hepatic problems or even hematic problems could follow.

**Q:** (L) Hepatic is liver, hematic is blood. I don't know what chole-

cystitis is... (F) Inflammation of the gallbladder or infection of the gallbladder. (V) Well, but my blood tests came back with no elevated white blood cell count - no infection. (F) They said possible at some time in the future. You're asking what would happen in the future if nothing is done... (V) No, that's what she asked... (F) Well, then you ask what will happen (V) That's what she asked... (F) But that's always true of anybody who has a gallbladder problem... if they don't do anything it could eventually lead to that. (L) They are saying that hers is the sludge in the liver, the stasis in the liver more than the gallbladder. They are saying you could get gallbladder trouble more seriously. (F) They are also saying hepatitis which is a LOT more severe. (A) I guess what she wants to know is what to do about it. (V) Right. You say it is advisable to initiate further actions. Can you advise me what those further actions might be?

**A:** One's compatriots provide answers, do they not?

**Q:** (V) They're talking about you. (L) Is it advisable... earlier V asked if it was okay to be zapping while we are having the session, will that interrupt any of the energy flow, or is it alright?

**A:** Okay.

**Q:** (V) Now, out of curiosity, from what I understand from what we have looked at with the acupuncture and the meridians, that the liver - the meridian that runs through the liver and the gallbladder - also goes with the meridian that goes with the female hormone system. Now, I have noticed that when I am cycling and before I cycle, this pain is more severe at that time, and after the cycle the pain is not as severe. Is there a correlation? Doctors won't tell you there's a correlation.

**A:** Your "cycling" puts your physiological system under some stress, therefore lowering your physiobiological immune response.

**Q:** (L) Let me ask this: VG has decided, because this is what people are telling her, including the doctors, that she is going through menopause and that this is the cause of... (V) I know the symptoms I have... (L) wait a minute (V) I have never had a doctor tell me that... (L) She believes she is going through menopause. She is quite young to be going through menopause. Now, what I am wondering is if this other problem might not be creating the symptoms that she is interpreting as menopause since the systems are connected via the meridian?

**A:** “Menopause” is often affected by other factors. It is possible for 3rd density humans to delay this to greatly advanced age, if they know how.

**Q:** (V) Well, I don’t know why somebody would want to do that. (L) There are a LOT of reasons, because once you stop, there are certain powers of creativity in realms besides the physical, that you no longer have, and no further advancement in any of the realms is then possible in that body. When you menopause, you END certain advancement potentials... (V) I understand you, Laura. What I was told this week is that they are finding that women who have had tubal ligations are in fact experiencing menopause early. Now, when I had my tubal ligation done, I was told that there was absolutely no side effects from this. Is it true that tubal ligation will bring on menopause at a quicker rate?

**A:** It IS true that one is wise not to trust bold proclamations from your “mainstream” medical system, as these are motivated by intense STS energy. Also, they have proven to be wrong far more often than right. It is perhaps wise for one to reserve visits and consultations with the above mentioned “establishment” to the instances of physical trauma, and life threatening emergencies, as this is the “place” for said entities. Chronic conditions and wellness, prevention, etc., these are the realms of the homeopaths and Naturopaths, all paths inspired by 4th density STO.

**Q:** (V) But, I asked ya'll if menopause is brought on early by tubal ligation. (L) You also made the remark that they promised you that it didn't have any side effects, and what they are basically saying to you is that they lied to you. (V) I figured that out. After I had my tubal ligation I had horrendous PMS. (L) They also said that thalidomide had no side effects. (F) They said everything has no side effects. (V) Then, can we address the question? Does tubal ligation cause the onset of early menopause. (L) You just quoted them as saying that this was so. (V) Quoted who? (L) You just said that they are now finding that this is... (V) That's what I am trying to ask them if what they are telling me is true or not?

**A:** What does lesson in previous answer tell you?

**Q:** (V) That they were wrong the first time so they're probably wrong the second time... I don't know. It was a fairly simple question! (L) But if the answer is just handed to you, you won't learn anything about how to protect yourself the next time... they want you to think. (V) Well what they're saying in this... allow me to think on my own. (L) Okay. (V) In saying this... is it all lies? (L) They were the ones, the doctors, who were saying there were no side effects. Now they are saying that there are side effects. Who is saying now that there are side effects? (V) Women are yelling and screaming about it. (L) So, that is the difference. (V) She identified when she was doing her examination, that the cervix was exhibiting exact signs of... why am I even asking this? ...exhibiting exact signs of estrogen deficiency. Can you tell me am I suffering from estrogen deficiency, because something is causing huge night sweats, insomnia...

**A:** My dear, all of these maladies are correctable and you are close to the heart of an enormous and expanding knowledge base that will prolong your current 3rd density existence if only you will allow the lessons to "click" into place. Networking with those in your presence now has already proven to be an explosively

positive and expansive experience for you. It is potentially beneficial to millions who will be contacted through networks that are yet to be realized. So, trust... watch... look... listen... and learn... Grow and expand, evolve and transform and rejoice with the quadrillion times quadrillions to benefit from this sharing!!!

**Q:** (V) My god, that was spastic on there! (L) Yeah, it was trying to fly off the board! (F) Quadrillions times quadrillions? That's a lot! (L) Maybe they are just talking about individual cells! (F) Maybe they are talking about civilizations! (L) Stars, maybe! Why stop with Earth! (V) Well, you know, there is something going on with me lately, and that might be what that 'click' is about. I feel like I am standing aside a future. (L) You need to make a choice of some sort? (V) No, I don't know that it's a choice, it's like I feel I need to change my vibration, or change something to be able to move into that that I've seen. I don't know. I'd really like to ask about this "despairicin" thing. That hilarious little visual I got this morning about the bottle of "despairicin", what in heavens name... where did that come from? Did that come from my mind; did it come from energy leaving? The despair leaving? That was just too funny. It was funny. It was hilarious. What is the base of that?

**A:** Think!

**Q:** (V) Well, I would like to think that I was getting rid of something - despair and pills? Oh! In taking herbals I'm...

**A:** Maybe Despairicin is like a 4th density "antibiotic" for the treatment of despair. If so, perhaps one would be wise to embrace it, rather than to flush it. Better luck next "time."

**Q:** (V) So, when I flushed my bottle of despairicin, it actually got flushed and left my presence? That's what they are saying. I just didn't think it was real. How in the heck was I supposed to know? In the 3rd density, despair is not a good thing. Nobody wants it...

(L) Sounds like there is an issue there. Ask about the despair, what it is related to. (V) Can you share with me about this despair?

**A:** Perhaps it would be better if you were to share with us!

**Q:** (V) Well, what is the despair? (L) Are you feeling despair and not wanting to bring it up, maybe? (V) I think it is more of a feeling like its... you know... I've been in despair for quite awhile now - just raising my son... its like I don't know any other way to be. It's like not knowing any security. It's like me saying I have never known a day of security in my life I'm almost forty years old, and that does not feel good. (L) And you don't feel it now with D\*\*\*\*? {Current boyfriend.} (V) It's not up to him to validate the person I am. (L) Nobody said that was the issue. (V) What's your point then? (L) I just asked you if you don't feel more secure with D\*\*\*? You didn't answer.

**A:** Security is found within, but it dwells within and without.

**Q:** (V) It's hard to put it into words how I feel. I'm sure that's why it's just fluttering underneath there instead of coming out... god help me if it ever comes out, how will I react? I don't know what to say. (L) Well, perhaps there is a past life karmic dynamic that, if you knew it, it would open up your thinking on it. I don't know. (V) Are you saying is the despair from a past life? (L) No, I am suggesting that as a point of beginning for questions so you can start to narrow it down and get to the main issue. You just have to start somewhere. (V) Well, I think that if that was being shown to me, then its an issue... (L) Then start asking questions... (V) I don't know how! (L) Well, start simply... is the despair related to a past life or the current life... just start narrowing it down somehow. (V) Do I feel this despair due to past life issues or due to this life?

**A:** Both.

**Q:** (V) Does this stem from my relationship with my mother?

**A:** Like another “slide” in the slide projector carrousel.

**Q:** (V) What? I don’t know what that means. (L) Maybe it means that this is just one of many issues in this carrousel.. (V) of despair... my carrousel of despair.. (L) in the carrousel of many lifetime issues?

**A:** Close.

**Q:** (V) One of my biggest despairing things right now is my disgust with humanity and what they are doing, and how nasty it is... but that’s probably just another slide in the carrousel. So, it’s both. It’s past life and present life. It’s pretty ingrained. {Laughs} (L) Stop a second now. You just talked about humanity and your disgust with them, ummm... (V) We talked about this... (L) Let me finish. Do you look upon a small child who soils his pants as disgusting? (V) We’ve had this conversation... time and time again... (L) Did your mother look on you as a disgusting object? (V) I don’t know, and you know what, I wonder... (L) Where do you get this despair and disgust with humanity when you KNOW that they can’t help being the way they are, like a small child who soils his pants, and there is nothing you can do about it? (F) Besides, its like saying ‘oh my god! That kindergarten class over there... they are so horrible and disgusting... I can’t live with myself because of that... the only people who have any right to live are the PhD’s of the planet.’ That’s just where humanity happens to be... Sure, it’s discouraging if you want to look at it that way, but, on the other hand, it’s just where it happens to be. (L) And, just like the carrousel, you can’t be in the position you are unless the other slides are in their position. Like a circle. You are where you are. You can’t be where you are unless there is somebody behind or ahead of you. If they don’t exist, you can’t either. Even if they are disgusting... (V) It’s the lack of caring I don’t understand... I just

don't understand. (L) This is the way they are. (V) I am not happy with them and I am not happy with myself, either. (L) Well, there you have a problem! (V) If I chose to be on this planet for a reason, what in the hell is the reason? (L) Better figure it out! (V) And I haven't been trying? (L) I think you have. (V) What is your point in saying that? (L) Why are you so sensitive with everything that everyone says as though it were a personal attack? {V was particularly prickly throughout this whole session.} (V) Because that is what it feels like. (L) Why don't you just relax and let other people be and talk just like they let you? It was said as a joke! (V) I am not doing well with jokes lately. It's not just you, it's everybody. (L) I know, and you dump on me and everybody around you; your professors at school, D\*\*\*\*, Frank, we are all getting dumped on... (V) Frank, when is the last time I dumped on you? (F) The last time I was in your presence... sorry, but its true. (A) Well I have a question: are we supposed to be happy in this life? (L) Well, if you are not, you aren't doing it right. (A) Is that true?

**A:** No, it is not.

**Q:** (L) Well, I think that no matter what happens a person ought to have a good nature about it.

**A:** Each has individual karmic lesson profile.

**Q:** (L) Okay, I see the point. (A) Now wait a minute... let me ask... (L) Well, don't divert from V as she is still working on her issues... (V) No, I think we're done. (A) She says that she's unhappy, and I'm unhappy... (L) And both of you dump on everybody around you... (Ark) And neither of you will take responsibility for it... (A) VG is in the same boat. Am I supposed to be unhappy in this lifetime?

**A:** Ask yourself, Alice.

**Q:** (L) Remember you asked them before. They told you about your quest, and they told you what was between you and your quest. You were already told that, if you achieve your quest. They already told you that it is your own stubbornness and inflexibility that prevents you from achieving it. (A) Is what Laura says right?

**A:** Close, but we said it first!

**Q:** (L) Yeah, I was just quoting them... they need attribution! (A) Well, let me think a minute. (L) I want to get V's despair taken care of. (V) I don't think I can hear anymore...

**A:** Yes you can, and it would be wise if you did. You see, VG, there is nothing preventing you, or anyone else for that matter, from falling into the correct slot of their balanced contentment learning profile, but simply advancing that carousel until the correct slot aligns, then just falling, or "sliding" into place!

**Q:** (L) You use this allegory; what would consist of advancing the carousel?

**A:** Discover... because learning is fun!

**Q:** (L) Is there a physiological relationship to this carousel, or is it just strictly psychic, psychological, or learning related?

**A:** Hide and seek, locate and retrieve.

**Q:** (L) In other words, when we have feelings and issues, walking away from them and avoiding them is the thing that allows them to persist. Finding them and pinning them down like a bug specimen is what gives you control over them?

**A:** When was the last time you pinned a bug?

**Q:** (L) Okay, it was a lousy analogy. The only bug I usually pin is myself. I am pretty brutal with myself.

**A:** And sometimes, others too.

**Q:** (L) Yes. I'm guilty. (A) Did you ever see a slide carousel? (V) Every Saturday night. It was a sixties thing. The sixties was a sixties thing. (L) Melmac dinnerware and terrazo floors. (V) Avocado green and harvest gold. What's a terrazo floor? (L) Concrete with rocks imbedded in it. Let's get back to this despair. You are so unhappy you just gotta do something about it. You have every reason in the world to be ecstatically happy. (V) Well, I'll tell you, I was standing at the kitchen sink earlier making my lunch, and I started laughing for no reason. I was standing there laughing hysterically for no reason with tears running down my face; I could not stop. D\*\*\*\*'s in the other room making noises. I don't know what to say. I don't know what you want me to say. I'm frustrated and feel like I'm being pinned against the wall. And that's exactly how I feel. I don't know what else to tell you...

**A:** Why.

**Q:** (V) Because I feel like I'm being attacked! You're yelling at me! You're raising your voice! {No evidence of any 'yelling' or raising of voice on tape. The entire discussion was quite calm.} You are trying to make me say something that I don't know how to say!

**A:** Why do you not know how to say it?

**Q:** (V) I don't know. If I knew, then I wouldn't be having this problem, would I? (L) Why do you feel attacked, when most other people usually feel attacked by you? (V) You know, I didn't realize that you felt attacked by me, Laura, or Frank. (L) Yes. (V) In what way? (L) Well, I often feel like how D\*\*\* described it the other day: 'I got up this morning and told myself that I have to manage to figure out how to not make VG mad today.' (V) I don't know what to tell you.

**A:** Well then, look at your situation and verbally reveal what it is

that you have to be despairing about.

**Q:** (V) Lack of security. That's the only thing I can say.

**A:** And where is the weakest link in the security "chain?"

**Q:** (V) I guess not having a great financial base. Not having my own home leads to insecurity. Not knowing whether my car is going to break down every day leads to insecurity.

**A:** All of these are easily resolvable.

**Q:** (V) Get a job. Right? What else is gonna solve that?

**A:** Who is working and who is in process of being educated. And if one is complaining about ones future, then you can always trade places once tasks are completed.

**Q:** (V) Who is working as in D\*\*\* is working and I am pursuing an education, is that what you mean?

**A:** We asked you.

**Q:** (L) There you are. You go to school now and work when you finish so D\*\*\* can go to school. (V) You know what, he says he doesn't care! He sat and told my mother that "there is no need for her to work, she needs to finish school". (L) And I have been saying the same thing. You have worked too hard and come too far to get caught on a snag now! Why do you feel different? Do you? (V) Yes, I do! I feel like I am not doing my share, I suppose. Before he came my share was very little because I had things put in place where I don't have to pay 400 a month rent, I paid 9 dollars a month rent. (F) What's different about that now? (V) What's different is when we move, I no longer have that. When we move, we're moving to a place that's gonna cost more. Am I not going to be responsible for half of the bills, half of the utilities? That's how I feel. (L) Why do you have to move? You can't stay where you are and save money until you finish school? (V)

Stay in that one bedroom apartment? No! It's too small! It's way too small! It's just too small for two adults and two cats. It's just too small a place. (L) Can't you find something cheaper than 400 a month?

**A:** Answer provided in previous response.

**Q:** (V) So, I should just stuff my feelings and stop complaining and then everybody will be happy? I don't understand.

**A:** Not point. Now all we are trying to do here is help you get your carrousel unstuck, VG. But we do not lead by the hand. You have no reason to feel guilty, so cut it out. Just resume your path and rejoice in each lesson learned.

**Q:** (V) Who said anything about feeling guilty? Did I say I felt guilty? (L) Yes, you said you felt guilty; that you were not doing your share... that's the whole thing behind it here. You feel like you have to do half the whole thing. (V) Why is guilt such a huge issue with me? Where does that come from?

**A:** Source is not important, solution is.

**Q:** (L) What solutions could you find to make it easier to stay in the little apartment until you finish your education, or find something that is cheaper?

**A:** Not issue here Laura. VG is dealing with issues centering around fulfillment of quests. Guilt is a vicious cycle, until one learns to let it go. Such sacrifices are not the issue in this case at all!!! There is no need for that. VG is afraid others have sacrificed too much already, therefore should not be asked for further energy output at this time. However, what she does not realize is that an increased energy output in an economic sense will be the pathway for one to grow and prosper.

**Q:** (L) So, it's D\*\*\*y's energy expenditure in the economic area

that will be the pathway for growth and prosperity? (V) Is that it?

**A:** Yes.

**Q:** (L) So, you are supposed to let him work while you finish school and you are not supposed to feel guilty about it. Then, if you want, you can go to work and he can go to school. (V) I don't understand... I'm getting a headache. I don't understand where any of this comes from. Okay, it doesn't matter where it comes from...

**A:** You mistakenly feel that you have made D\*\*\* sacrifice to be with you here. Not so!

**Q:** (V) Well, I know that's true. I tried to apologize before he even got here. I did!

**A:** Did it occur to you that D\*\*\* would never have made this move if he did not want to?!?!?

**Q:** (V) Of course! But that doesn't change anything in my head!

**A:** Why does it not?

**Q:** (V) I just don't have a whole lot of trust. (L) You mean in D\*\*\*?! (V) In anybody! Because when you trust somebody, you get your butt burned!

**A:** Only when you trust those not to be trusted!

**Q:** (V) Is that supposed to resemble mirth?

**A:** It is supposed to resemble truth!

**Q:** (L) Is there any one thing that VG could think, do, say, fantasize, imagine, practice, take as a pill, something to get her over this hump? Some therapy?

**A:** Listen to learn, learn to listen!

**Q:** (L) Maybe that is the crux of the matter? (V) Ummhmm! Are you saying that I am being just a little stubborn?!

**A:** Stubbornness is a sign of being blocked. So get that slide out of the projector and get on with the show!

**Q:** (L) How does one get the slide out of the projector? (V) Well, if I visualize in meditation the carrousel, and all the things, and pull them out and toss them away, is that a way to deal with it?

**A:** We have already identified the slide for you.

**Q:** (V) I'm still not getting it. (L) Well, there's the guilt slide... (V) Oh, we've talked about so many unattractive things this evening... there's the stubborn slide... that's the one keeping the show from going on. So you are saying that when I go into visualization, it's gonna be right there and it will pop out... and I can blow it away? (L) How about just stop what you are doing? (V) Okay, I'll start on that tomorrow morning! Not being stubborn means letting go of everything! (Ark) No, it means being flexible. (V) {Yelling} How am I not flexible? (Ark) Well, one should always try to be a little bit more flexible, even me. (V) Well, that makes it alright, I guess! Right here! {indicates backside} I'm almost forty years old, this is the way I am. That's not an excuse! (F) Yes, 'I've always had my foot stuck in a cement block - it's just the way I am.' (L) Sure, no reason to break it loose now! {laughter} I mean, you have suffered all these years... no reason to stop suffering now! (V) But the thing is, when I let go... I get burned. It's the same thing with TA... {VG was persuaded to undress for a therapy treatment and the therapist made improper advances.}

**A:** Burning does not come from letting go, burning comes from stubbornly hanging on.

**Q:** (L) What did you let go of with T and being flexible about that

got you burned? I don't get that at all. Being psychologically flexible is what brought that on? (V) I think I was being physically flexible because of the lack of the clothing. (L) That is a completely different thing from letting go of guilt and being flexible toward other people. (V) I trusted him. I trusted him for a good reason. Because, for what I thought was a good reason. (L) But, the thing is, where you were being stubborn at that time, and still are to some extent, is accepting the fact that anybody and everybody, me, Frank, your friend I\*\*, you, ANYBODY at any given time can be used as a means of attack. Anybody can fail at any time, but you don't throw the baby out with the bathwater. You have this stubborn idea that this or that person must be perfect or nothing. All or nothing, perfect or unacceptable - even yourself - and that is one of the things you are being stubborn about. (V) I don't understand. (L) Frank, tell her what I am saying. (V) When I was interacting with T, I was not stubborn. I was flexible... (L) You are missing the point... (F) Let me try... how do you know you were not being stubborn? Have you covered all the areas... (V) Because I was more flexible than I have ever been... (F) No, no, no... have you... (V) Well, for god's sake, Frank... I... (F) Have you covered all the areas in that situation in which you could have been inflexible or stubbornly hanging on and not letting go. Obviously, that situation, like all other situations, was not totally cut and dried that you a) boom, trusted T and b) boom, there was a problem. It could not have been that simple. There was more going on there just like there always is in every situation. (V) Okay, I see what you are saying... Laura brought that up too, that maybe there was past life issues there. (F) Whether it was past life or not, there were many things going on, and both of you had many issues, and it wasn't just a betrayal of trust as you have described it. {End of tape. VG leaves, session continues.} Tape three:

Q: (A) Well, you have to realize that you have done all you could

to help VG, so there is no point in doing anymore. (L) Alright, VG has gone home, rather unhappy with having to look at these issues, and Ark thinks that she has recorded things and will come to an understanding in her own time. I just don't know. I wish there was some magic pill she could take that would open her eyes so that she could see that, just like all of us at one time or another, she is being her own worst enemy. Any comment?

**A:** But, there is not. Not for VG or any others.

**Q:** We are working on the web pages, so we would like a weekly checkup.

**A:** You are doing fine so far.

**Q:** And we have purchased the psychomantium mirror. I practiced last night. How long is it gonna be before I see something?

**A:** As soon as you are content to see or not to see.

**Q:** Yes, I know that I have to get there - non-anticipation. I was getting close. I was seeing little flashes of light and movement, almost like looking at something going on in a fog. (Ark) How does one get information using this medium? (L) I don't know! Should you do it with a question in your mind, or just wait to see what comes without direction?

**A:** Best to experiment for stronger learning.

**Q:** I don't like the sound of that! My strongest learning comes when I really do something stupid!

**A:** Not always, and on that note, Good Night.

END OF SESSION

## 6.7 March 21, 1998

Frank, Alice, Ark, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wonnon.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have a couple of my own questions that I want to ask real quickly: I have this situation going on with this contractor and the attorney has sent a demand letter. Meanwhile, I received a letter from the roofing materials company attorney threatening to foreclose on my house for 1,000 dollars. {The contractor bought the materials in my name and did not pay the bill. It was a shock, for sure!} Of the things that I have thought of doing, I want this guy to pay my money back - what are my chances?

**A:** Vague.

**Q:** I can take the guy to pieces with publicity, writing letters, going to the state attorney, but I don't want to put that kind of energy into it just to take somebody to pieces. I would like to put just enough energy into it to get my money back.

**A:** Okay.

**Q:** So, of the several courses of action open to me, which one has the highest probability of getting me a return of my money?

**A:** We do not direct your actions thusly. If we did, you would not learn!

**Q:** Alright, forget it then. I guess I have to give energy to it in some way. I was hoping it would resolve itself, but it seems that now I have to put more energy into defending my position.

**A:** Defense does not require so much energy if the defender perceives their stance as justified.

**Q:** Yes, I am justified. But now I have to pay more money to an attorney, I have to spend more time writing letters, I have to spend more time and energy and money, because they have put me in a position where I have to defend myself because of these letters threatening to foreclose on my house. And all for a thousand dollars worth of shingles that have already been paid for. {I had paid the money to the contractor.}

**A:** Truly stated, but what is your inquiry?

**Q:** I want to figure the exact maneuver to make this guy pay for the shingles...

**A:** You possess the power to do this already.

**Q:** Which way best to use it: a) through an attorney suing him, b) through publicity, c) through trying to deal with him directly or indirectly on a personal basis without involving publicity or an attorney, threatening to do so or not threatening to do so?

**A:** The dilemma you describe is not so nebulous as you claim.

**Q:** Okay. I am not claiming it to be nebulous. I just want to be economical with my energy. I don't want to spend time and money on a lawsuit when publicity might be better, and I don't want to spend time and money on either of them if I can put pressure on the guy directly and have that be more effective. If I use the lawsuit...

**A:** Then have you not answered your question?

**Q:** My question was: what were the probabilities of this being effective.

**A:** And what was our original answer?

**Q:** That you do not lead by the hand, that if you do, I do not learn. Fine and dandy! This is not one of those. This is a tactical question. I want to plan tactics.

**A:** If we spell out “probabilities,” your tactical planning will be skewed accordingly, and you will not learn skills that will be vital to you in the future.

**Q:** Thanks a lot! I don’t want to talk to you anymore! (A) I’ve got a question...

**A:** Surely you did not expect us to say: “Laura, my dear, you can effectively crush those bastards if you follow the following steps...”

**Q:** Well, actually, yes, something along that line would have been very useful! Yes! What comes after the three dots? Step one, two and three! I want them to at least pay for my shingles! If nothing else, that! Alright, forget it! I will handle it myself. Sorry I even brought it up! Why do I bother?! (AK) I have read that you say that I am in a learning process, and that I am still scrambled, but that it is getting better, is that right? (L) Did they say that? (AK) That’s what I understand. {Reads section of transcript} Okay, they were saying that your question was scrambled and you asked me to fix it and I said that you have to do it, that’s part of the learning process. You said: ‘how is it scrambled?’ How was your question scrambled. Then, ‘were all the mistakes I have made in this life part of a plan?’ and they said ‘no, mistakes are made by choice, plan is the blueprint.’ So, she had a blueprint, the mistakes were made by choice because she made the wrong choices?

**A:** Yes.

**Q:** Then, you have to deal with specific mistakes. So, I don't know what you are talking about. (AK) Well, they have told me that my emotions are all scrambled and everything else was scrambled. (L) You are mixing metaphors and you can't do that. (AK) You have said: 'just follow the signs.' My question about this...

**A:** One does not follow the signs until one sees them... One does not see the signs until one looks for them.

**Q:** (AK) I'm pretty well scrambled right now, but my question is: am I making progress?

**A:** Yes.

**Q:** (AK) What I am seeing now is maybe some signs. I want to know about this apartment I saw... if I take it, will there be money enough for me to pay, or should I back off?

**A:** Alice, these questions are very simply answered by following your instincts and the lessons already learned upon the "road well travelled."

**Q:** Every time you have moved you have only been running away from yourself. Every time you have done it, you have been unhappy for one reason or another and have hit the wall. That is the road well travelled in your case. You would rather go somewhere else than change. It has always been that way. The very thing you said about Jack, that he would not change anything about himself for anyone is true of you more particularly. (AK) Is what Laura says right?

**A:** Close.

**Q:** It is a road well travelled, and you know the destination... (AK) Okay. Anything else?

**A:** One wonders if you have explored the motivations behind the desire to move, and more importantly, the benefits supposedly derived thereof.

**Q:** (AK) Well, I guess that is all they have to say on that. (L) I have a question: what happened to Ark's bags? The bags in the mail? {Ark shipped 11 bags of books and papers from Poland to the U.S. Only two of them ever arrived.}

**A:** Swiped.

**Q:** By whom? You mean we will never get them? All his stuff?

**A:** Try subordinate.

**Q:** Well, they got mailed. So, somebody in the post office. Was it in the Polish post office or American?

**A:** Which seems most likely to you?

**Q:** Well, we hardly ever lose any mail in America. It is so rare as to be almost unheard of.

**A:** In Poland, there is fragmented discipline, and the desperate quest by some for quick financial satisfaction.

**Q:** So, I guess we can give up waiting for the bags. What about my earring. I have been so sick... where did I lose the earring?

**A:** Will show up in crevice during decor rearrangement.

**Q:** Well, we went to all kinds of places that day... it could be at any one of them...

**A:** Or house or van.

**Q:** Well, we will see. I am just sick about it. Now, I have tried the psychomantium. So far, no luck. I don't think it is gonna work.

**A:** Head must be clear, has not been so far.

**Q:** Well, how can my head be clear when you won't give me the answers about how to take care of this contractor guy and all the other things going on so that I can clear my head?! I have all these worries! I know! I'm just joking!

**A:** Good!

**Q:** (A) In my opinion, this mirror is too narrow, it is not the right shape and it will not work even if the head is clear... (L) I LOVE this mirror! (A) I know that you like this mirror...

**A:** Mirror is fine.

**Q:** (L) SEE?! (A) So, the problem is in the head! Too wide a head?! You must narrow the head! (L) Ark has been working on his pages, I can't work on that now because the computer has been in the shop. I would like to ask you guys, and all other guys in sixth, fifth, and fourth density, to please protect my computer while it is in the shop! All it needs is a modem! Control their minds, sing angelic music, just PLEASE don't let them destroy my files!

**A:** Destruction does not occur if correct place is chosen.

**Q:** Well, it is going back to the factory - it is under warranty. So, maybe it will be okay. (A) Yes, you will get it back and the modem will not be repaired! (L) It better be! (A) I want to ask if there is something I should do... am I correct that NASA was looking into my application, my pages?

**A:** Yes.

**Q:** (A) Can I have some... {laughter}

**A:** Careful...

**Q:** (A) Okay, I have to be careful... we are going to Orlando and I am going to have the seminar and I think I know what to say, but still, before, I want to have some advice concerning some-

thing that is perhaps not coming to my mind that may prove to be important. Is there anything? Am I missing something? Have I not given enough attention to some point that may have consequences?

**A:** Be assertive as if on a treasure hunt...

**Q:** (A) On a treasure hunt? One is not supposed to be assertive?!  
(L) I don't know... (A) I am on a treasure hunt, yes... and I am supposed to be assertive? To find a treasure, I must be assertive because these guys like assertive people, and assertive people in America are the ones who have chances, yes?

**A:** You are good at discovery.

**Q:** (A) What discovery? (L) I guess at figuring out what the answers mean...

**A:** Yes.

**Q:** (A) Okay, now let me ask about this Andy Graham business, because this guy was so... his reaction to my HoneyBee's piece on reincarnation was so unbelievable, that I suspect there is something... is he a military... is this just something to forget, or is there something there really unusual and we are on dangerous ground. Why did this guy react so unusually?

**A:** Why did he react?

**Q:** That's what we are asking you!

{There is a note at the end that the tape was turned off and nothing further on this session. I'll be digging through the boxes of session notes to see if anything was written down and will amend this session when I find it.}

## 6.8 April 4, 1998

Frank, Laura, Ark, AH(guest), Alice

{Unless otherwise designated, Laura is asking all questions.}

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Yaponil.

Q: And where do you transmit through?

A: Cassiopaea.

Q: First question tonight: why are there so many depictions of ancient gods with horns on their heads?

A: To keep evil spirits at bay. Was symbolism.

Q: What was it a symbol of?

A: Head is prime chakric entrance route.

Q: So, why did they wear horns?

A: Symbolism of illustrations only.

Q: But what did the horns do?

A: Horns like a "picket fence."

Q: Obviously a fence is to keep something out. Was this the idea?

A: Yes.

Q: Did it work?

**A:** We are saying that this is symbolic only. Gods did not really have horns.

**Q:** I know that. That is not the issue I am trying to get at here. The issue is...

**A:** Then why would you ask “did it work?”

**Q:** Well, I wanted to know what it was symbolic of? I wanted to know what was going on behind the symbolism. Now, if I am going to...

**A:** The symbolism represents the imagination of the illustrator.

**Q:** Okay. Just as an aside, what function do horns serve on a deer?

**A:** Protects bucks from head injury during territorial “bucking.”

**Q:** Why does the bee symbol appear repeatedly in the ancient literature as a symbol of royalty?

**A:** Pollen.

**Q:** What about the pollen?

**A:** Is alchemical compound.

**Q:** Okay, I get the connection. In the studies of the Triple Goddess, I came across some interesting things. You suggested that I should research the Third Man Theme. I have discovered that the origin of the word ‘man’ meant a female - the goddess. The oldest word for the male of the species was ‘wer’ as in ‘werewolf.’ So, the Third Man Theme could mean actually, the Triple Goddess. Am I correct?

**A:** Close, if viewed through “sheets of rain.”

**Q:** Okay. Tracking the Triple Goddess back to the oldest references, we get to KaliMa. There are all kinds of derivations of this name, but the thing that strikes me is the relationship to the

goddess Kell, or Kella, as well as to the word kell, Celts, and how this might be transformed into the word 'Cassiopaea.' Can you comment on this?

**A:** Do not the Celts like "kelly" green?!?

**Q:** Yes. So. What does 'green' have to do with it?

**A:** Keep searching... learning is accomplished thusly, and learning is fun!

**Q:** Yes. I know. Okay, if that is related to Celts, then it must also relate to the Goddess 'Car' which would make the 'philosophers of Dancar' the philosophers of the Goddess Car, the equine term for 'mother' being 'dam' which could easily be converted to 'Dan,' not to mention the relation to the Goddess Danae...

**A:** Need now to turn you research to Malta.

**Q:** Oh God! Alright. The three aspects of the goddess: in the story of Perseus, there was Cassiopaea, Andromeda, and Medusa... the three aspects, the mother, the virgin, and the crone. But, in this story, Perseus manages to cut the head off the crone. In other stories, the crone always manages to win. Is there any particular reason why Perseus cuts off the head of Medusa? Was this transposed? Was the Medusa merely another aspect?

**A:** Serpentine.

**Q:** What about serpentine? Representative of the serpent race or the Lizzies?

**A:** Eden.

**Q:** Was the story of Perseus the story of Eden? Was Medusa the representative of the serpent of Eden?

**A:** Not quite.

**Q:** What are you alluding to that I am not getting? I feel that I am out of sync with this conversation.

**A:** Out of sync only occurs when presupposition reigns supreme.

**Q:** Well, it is not reigning supreme. The problem is: in the oldest religions, it is the Goddess, the Mother, the endless sea of potential of unassumed experience that was the Goddess. There was unconditional love in the beginning. But then, the patriarchal view twisted it and it became violent and ugly and restrictive. And, from the patriarchal view came the 'redeeming son' when before, it was the redemption of the Goddess' blood. So, what I want to know is: what happened to create the patriarchal system? How was the Goddess suppressed?

**A:** All has been distorted and suppressed, so why not this?

**Q:** You once mentioned 'Greek Enforcers' who wrote the New Testament. Where did these Greek Enforcers come from?

**A:** Order of Thelon.

**Q:** Never heard of it. On another occasion you called the Nephilim 'enforcers.' Is there any relation between this order of Thelon and the Nephilim?

**A:** Maybe...

**Q:** Where is the headquarters of this group?

**A:** Sicinthos.

**Q:** Is that a place? Never heard of it.

**A:** Yes.

**Q:** Okay. Next question: the White Mare Goddess image that prefigured the Omega symbol, what is this related to?

**A:** Transcends.

**Q:** The White Mare transcends something?

**A:** Transcendental.

**Q:** What is the relationship of the White Mare to the symbolism of the knight? The knight on the horse is repeatedly used in alchemical symbolism.

**A:** Rites.

**Q:** One of the rites in question is that the making of the knight involves touching both shoulders with the end of a sword which is actually a symbolic beheading. Why is the knight symbolically beheaded?

**A:** Blast open limitations of encasing spirit in body.

**Q:** Alright, I have been practicing with the psychomantium. I once had a little flash of light. Another time there was the sensation of pressure and of course the rising heat. Are there any actions that I can take that will optimize the process?

**A:** Blacken the room.

**Q:** So, it will help to be in a completely blackened room?

**A:** Oh yes!!

**Q:** So, that will make a difference. You did say that there would be a dramatic change once the psychomantium was in place. Now, I haven't seen any dramatic changes and I am almost afraid to ask because the last time you said something like that I was in an automobile accident!

**A:** That was not the change we were speaking of... We suggest you direct your gaze ahead and a little to the left!

**Q:** On this job situation, we are getting down to the wire, so a clue would be nice...

**A:** All will be well.

**Q:** Well, you can see things we can't. Now, we have an appointment to do the paperwork for the divorce {Ark's}. Anything particular that you would like to mention that might need special attention in this process? Or, is all okay?

**A:** Okay.

**Q:** Well, you know, we are spending a fortune on this house. Every day. It is getting ridiculous!

**A:** Yes, which means that the flow increases.

**Q:** Swell! It is EASY for you to say that kind of stuff! You aren't the one adding up the numbers!

**A:** When you spend to progress, you prosper.

**Q:** (A) It's magic. When you spend you create a vacuum...

**A:** No, it is nature.

**Q:** Anything else?

**A:** AH.

**Q:** (AH) Will I sell the house this month? Would it be good to sell it this month?

**A:** One should be careful not to hitch their cart to the wrong horse.

**Q:** (AH) What do you mean by that?

**A:** Analyze.

**Q:** Maybe they are talking about the wrong realtor?

**A:** No.

**Q:** Well, where she wants to get is to sell her house... (A) Maybe it is the reason for selling the house?

**A:** We have advised before on this.

**Q:** (A) I am hesitating in contacting these government agencies for grants. I am not sure that it is a good idea.

**A:** Why would it hurt?

**Q:** A very quick one for D\*\*\* and VG - apparently VG is on a self-destruct mode... is there anything you can say about this?

**A:** Job.

**Q:** What? Is she this way because D\*\*\* is working in my house?

**A:** He will be better suited when working elsewhere.

**Q:** So, it will serve him better to work elsewhere? Should I let him go and we finish on our own?

**A:** What we said is that he will be...

**Q:** He will be working elsewhere.

**A:** When he is...

**Q:** I don't get it.

**A:** When he is working at a more structured employment location, this will lead to better quarters, thus less familiarity, thus less contempt.

**Q:** Anything that we ought to ask that we have not asked?

**A:** No.

**Q:** Then, good night.

**A:** Good night.

END OF SESSION

## 6.9 April 11, 1998

Laura, Ark, Frank, Alice

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Anamom.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I would like to ask about {Laura's son} friend Chris. Is there anything you can tell about his condition? {Laura's son's best friend was in an auto accident and had been in a coma and was just in the process of returning. The extent of brain damage was not yet known.}

**A:** Please to be more specific.

**Q:** Is there anything that could be done for him that isn't being done that could help him to improve more rapidly?

**A:** Sponges with nutrient compounds applied as salves.

**Q:** What nutrients did you have in mind?

**A:** Carrot juice and B-complex vitamins.

**Q:** Is he going to have full recovery continuing the way he is going at present?

**A:** Most likely.

**Q:** Okay...

**A:** Suggest you review predictions made in very early transcripts for remarkable correlations to current events. As we said then, it is the time frame which is impossible to pinpoint in any sort of prophecy.

**Q:** Do you mean the storms in Florida and Alabama and Georgia?

**A:** Tornadoes.

**Q:** Does this mean that there is also going to be tornadoes in Texas? Is there anything that this relates to in specific? Does it go with the Denver Airport business?

**A:** Just review and contemplate.

**Q:** What is the story behind the 64 year cycle that I recently stumbled across? What is this cycle?

**A:** Divide and multiply for micro and macro dynamic patternings.

**Q:** Ummm, in reading this funny book I just finished {I believe it was "Fingerprints of the Gods" by Graham Hancock}, I discovered that there is the tradition of the Ark of the Covenant being in Ethiopia. This guy did a bunch of research on it, and it seems possible that it is there, and that it may even be active. Is it, in fact, in the church of St. Mary of Zion in Ethiopia?

**A:** No.

**Q:** Where is it?

**A:** If we were to reveal this to you, it would be akin to giving a hand grenade to a baby!!

**Q:** Well, I just thought I would ask! What I found out was that this wonderful Hakluyt Society that chronicled the funny business

in the Canary Islands {which I had read previously, and which claimed that the Ark of the covenant was there} also kept track of the goings on in Ethiopia. One of the things they told about was the carrying of the Ark in procession by red or blond headed guys. And there was the Croix Patte of the Templars on a number of objects in Ethiopia. The Rose Croix. Did we have Templars there, or what was going on? Was the Ark there and was it then taken somewhere else?

**A:** The Ark of the Covenant is not what you think it is.

**Q:** You guys said that it was a power cell. I don't have some sort of romantic idea of it. I can accept that. But there are all these stories about it and a lot of people have mythologized it. What do you mean by saying such a thing. What is the Ark?

**A:** See Oak Island.

{Trans-dimensional Atomic Remolecularizer?}

**Q:** It seems that the Templars were in charge of building the Cathedral at Chartres, and there is a tableaux on one of the porches of Melchizedek and the Queen of Sheba. Equidistant between them is the Ark of the Covenant in a cart. Melchizedek is holding a cup that is supposed to be the Holy Grail. Inside this cup is a cylindrical object of stone. What is this?

**A:** Greater sight.

**Q:** What?! (A) Is it a symbol or a device?

**A:** Why cannot it be both?

**Q:** (A) It can be both, but is it both?

**A:** Yes.

**Q:** (A) So, it is a device for greater sight like a crystal ball, yes?

**A:** Only when utilized exactly precisely.

**Q:** How do you execute something with this device?

**A:** Why should one wish to “execute” someone with this device?

**Q:** We don’t understand...

**A:** Laura did say “execute.”

**Q:** You were using the phraseology of my question to give a clue, I suppose... Okay, in 1306 a mission from the Ethiopian King went to visit Pope Clement V. Exactly one year later the Templars were arrested. What did the Pope and the Ethiopian king and all the others talk about at that meeting?

**A:** Whether or not orders were being realized. Goodnight.

END OF SESSION

## **6.10 April 18, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us?

**A:** Kionna.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (A) I was exchanging e-mail with a Spanish guy, and this Spanish guy was a funny guy, he was very interested in this Cassiopaeian business. But, he wanted to have a proof of some

kind. I was trying to explain to him that it was impossible to have proof. So, I was asking myself why I cannot ask even a simple mathematical question. I am sure I would not get an answer, and I would like to know why?

**A:** Because, as you know, mathematics is a concrete field of study, as opposed to an abstract one. Oh yes, there is theoretical mathematics, and some types of mathematics involve variable interpretation. But... in general terms, we are speaking of a scientific field which connects concepts in order to uncover truths. Therefore, to employ mathematical communication in this conduit would likely rob one of the free will initiative in respect to learning.

**Q:** (A) I don't understand. For instance, if I ask for the square root of seven, why can't you answer. Don't you know or don't you want to tell me?

**A:** Do you know it?

**Q:** (A) I don't know it right off hand, but I can compute it in two minutes. Then I will know it.

**A:** Then there is no need to tell you, is there?

**Q:** (A) There is no need to tell me, but that is the idea. Okay, I want to ask about jobs. First of all, I am trying all possible options...

**A:** We wish to reiterate something further on this subject Arkadiusz, and for anyone else in need of the following message: we are not communicating with you in order to "prove" our existence. If one has faith and is willing to learn, to explore new realms and to discover what will one "day" be commonplace awareness profile, then no "proof" is necessary. If, on the other hand, one is of the opposite psychic orientation, then no amount of proof is adequate.

**Q:** (A) Yes, I think it is like the story of the crocodile skin where

you can make wishes, and with every wish it becomes smaller. And, you are told that when it becomes too small, then you die. And, of course, you try, and say 'let me do one more wish...' and that is it. Once you make the choice to ask and not do the work, then it becomes easier and easier and you want more and more... and your own will and force becomes smaller and smaller..

(L) I think that the most important thing that has come out of this channeling is that sometimes the C's sort of trick me into trying something and they pique my curiosity and I go out and DO something that results in a learning experience that is truly awesome. And the important thing is, getting out and doing the work actually makes you stronger. And, like you just said, each time you make the choice to NOT go after the answer yourself, to try and get it the easy way, it makes you weaker and lessens who you are. It is sort of a nonlinear principle that can lead to all kinds of things.

(A) Anyhow, apart from asking the questions that I CAN answer, there is this question of whether they are able, at all, to answer mathematical questions? Why are they not able to use mathematical language... I did not get it.

(L) Well, if they gave us the math that told us these conceptual truths, we would have lost something HUGE in the way of strength and free will. Like those sources that supposedly gave the secrets of the bomb... and other sources that just give and give all sorts of things and you can clearly see the deterioration of those involved...

(F) Yes, and the crucial point is the robbing of free will INITIATIVE.

(L) So, it is a VERY SUBTLE thing.

(A) Yes, I understand that if they give a precise answer, then you

are given the answer and have not connected the concepts that bring the math together. But, now there is the question of a job. I am a little bit confused. First of all, should I keep contacting... (L) Are we gonna starve to death?

**A:** The answer is: no.

**Q:** (A) Should I keep contacting this Army and Navy bunch? I am not sure. Can you help me?

**A:** Ask a specific question, please.

**Q:** (A) I am asking specific question. I don't know, because I don't have any experience, what does involve in applying for and getting a grant from the Army or Navy? Should I do it, continue, or forget it?

**A:** What do your instincts tell you?

**Q:** (A) Instinct tells me that I should try all possible opportunities in order that we should not starve to death, and also that one should be careful in selling oneself.

**A:** Well Arkadiusz, a loan shark is one of those "all possible opportunities."

**Q:** (A) Well, I don't want to have my legs broken... But I could...

**A:** Do you know the risks that may lurk behind the cloak of the military? One possible source of funding could include the Rockefeller Foundation. But, of course, there are ulterior motives there.

**Q:** (A) Well, there are a couple of possibilities that I will be finding out more about in the next week, but as for a permanent job, which is what I am looking for... well, I don't know...

**A:** You are on the right path, just be patient. But remember, a permanent job may yet develop!

**Q:** We are just a little concerned because time is getting a little short, here!

**A:** And “time” has gotten short before, has it not?

**Q:** (A) Yes. (L) I want you to tell me why I am dying of the heat in here!

**A:** Because you are highly fatigued and your biorythms are at a triple low.

**Q:** Are we going to have any problems getting the divorce here in Florida?

**A:** Much less.

**Q:** That tells me that there are going to be some problems. Anything that we should take care of in advance?

**A:** You are doing well.

**Q:** Are you done with your job questions? (A) Yes, they don't want to answer so there is no point in asking. (L) I was reading some blurbs about Jesus on a mailing list. There are a lot of different ideas flying around. I realize that, in an earlier session, we asked about Jesus and you gave us a particular set of answers. I also know that you gave us a ‘noise to signal’ ratio about the accuracy of the information and how this relates to free will, and the problems of interference from various persons who are present have all been addressed. So, all things being considered, when we originally asked the questions about Jesus, I had the feeling that there was a lot of emotion weighing on those answers. Is that correct?

**A:** Maybe.

**Q:** Were the answers and information given about Jesus accurate?

**A:** Mostly.

**Q:** So, you are saying that a man named Jesinavarah lived in Palestine at about that period, was a teacher, achieved christhood, and was taken up into a UFO and is in another dimensional time warp doing some kind of work... is that the case?

**A:** Yes. Replicated consciousness.

**Q:** And you also said something about Christ returning. Is that also true?

**A:** Discover.

**Q:** Was there anything about what was previously said about Jesus that was glaringly inaccurate?

**A:** Not glaringly, just naturally.

**Q:** Okay. You said that he was taken up and is doing this replicating. All these other people are saying that he went here and there and is buried here or there. Is any of this true?

**A:** No.

**Q:** Who is responsible for these stories? Some of them are quite old.

**A:** Many.

**Q:** What is the purpose of these stories?

**A:** Mixed.

**Q:** Is there any particular group of people that is seeking to obfuscate or confuse this issue?

**A:** Maybe.

**Q:** Who might that be?

A: Telltale signs lead you to the signpost.

Q: So, this could be a positive thing?

A: Partly.

Q: Why is VG not speaking to me?

A: Because she envisions you “filling D\*\*\*’s mind with mush.”

Q: Why have I not heard from Terry and Jan?

A: Busy rearranging their lives.

Q: I haven’t asked about this, but you did tell them that it was a serious breach for them to move too far away based on their own pre-life plans and the delicate balance of energies. Put this together with the two dreams I had about Terry dying, I am just wondering if there is some connection between the dreams of Terry dying and your warning to them to not make this move?

A: Maybe.

Q: Anything else you want to say about that?

A: No.

Q: I didn’t think so. Okay, I want to get the psychomantium set up soon...

A: Good !!!!!!!!!!!!!!!

Q: Could you rush any of the benefits in advance of this?

A: No.

Q: You mean I have to get it set up and working?

A: Yes. Okay, that’s all folks!!

END OF SESSION

## 6.11 May 2, 1998

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have this evening with us?

**A:** Ixthorria.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have some questions about this job situation. There is this Kanev, and we spent 4 or 5 hours there yesterday, and it could be something important, but it might be months and months before any money can be made. This is one possibility of making some money. Working with this program that writes web pages. Could we have a two or three word reaction to that?

**A:** Why is it for “next to nothing?”

**Q:** Well, because the two guys who have created this program are just getting started, they haven’t marketed it yet, they haven’t got it going yet, they have a fledgling company, supposedly, they have a lot of big plans, we don’t know all the details, for some people these things work out, for some people they don’t. Look at Microsoft!

**A:** Do they expect assistance for a pittance?

**Q:** Yes, that is pretty much what it amounts to.

**A:** One would expect one to question them as to how they expect their assistant, a rare find by the way, to pay the bills?

**Q:** Well, Ark thinks that he can learn something from this program...

**A:** If Ark presses, there will be capitulation, due to Slavic familiarity.

**Q:** These guys don't have anything, I don't think. They are working out of their bedroom in a little shack on a back street in Alachua! What good is pressing them going to do?!

**A:** Ever heard of venture capitalists?

**Q:** Yes, I have, but the thing is that we have to have money THIS month. Venture capitalists and all that are fine and dandy...

**A:** Ask and ye shall receive.

**Q:** Okay...

**A:** Laura, whenever you have asked, you have received!

**Q:** I don't know who to ask!

**A:** So then you never will, yes?

**Q:** No. Okay, there is the other job... the one with Constellation... what about this possibility? Doing some sort of classified pattern recognition, building atomic detectors, or something, and it would be close... and it is basically the Enterprise Florida thing...

**A:** Will hire. Good money.

{They did, it was.}

**Q:** Well, that is funny. You never made predictions before, why now?

**A:** Not a prediction, a fact. You see, as before, we have always assured you that you would be provided for.

**Q:** Well, I would really like to finish the work on the house and I don't have the money to do any more. (Frank develops headache. Pause, discussion about mother.) Okay, since you gave mother advice about going down the primrose path and she did it anyway...

**A:** She is okay.

**Q:** Alright. I don't have enough energy to split myself between this house and responsibilities and her in another location... what about Terry and Jan who are going to be going into the antique business in Tallahassee with another couple of friends of theirs... any comment?

**A:** All there is is lessons.

**Q:** Who was Joseph of Arimathea?

**A:** A disciple of the unibound.

**Q:** What's a 'unibound?'

**A:** Singular thought.

**Q:** What is the unibound?

**A:** Transcendant discipline.

**Q:** And what does one do if one is a participant?

**A:** Up to 96 hours of clear channel meditation.

**Q:** Okay, so Joseph was a disciple of this... is this an individual or a concept?

**A:** Each.

**Q:** What was Joseph's role, if any, in relation to the 'Holy Grail?'

**A:** None.

**Q:** Who created the legends of the Holy Grail and Joseph of Arimathea bringing it to a) France, or b) England? Who was behind the creating of this group of legends?

**A:** Not a group of legends.

**Q:** Why was the 12th century the focal point for the propagation of the grail legends, the troubadours, the whole thing?

**A:** Beginning of “Renaissance.”

**Q:** The story is, and there are even some very old legends in France itself, that there are caves or places where Joseph and Mary Magdalene spent the night, or lived, or whatever. Did Joseph of Arimathea actually travel to France and then to England later, with Mary Magdalene or other followers of Jesus?

**A:** No.

**Q:** Did he travel to France alone?

**A:** No.

**Q:** What is the source of these stories? What is the point of these stories?

**A:** Deflection.

**Q:** Deflection of what to what or from what?

**A:** Truth from recipient.

**Q:** Okay. Did somebody travel to France carrying some sort of object, or a person who was this ‘object,’ so to speak, as the ‘holy bloodline,’ or whatever?

**A:** Maybe it was carried by those most capable.

**Q:** And who would be those most capable?

**A:** Check the geographic link.

**Q:** I am getting completely confused. I don't have a single clue about what is going on here or even what we are talking about now!

**A:** Where are the Pyrenees?

**Q:** On the border between France and Spain.

**A:** Who lives there?

**Q:** The Basques, among others. Is that who we are getting at? Or the Alchemists? These beings...

**A:** Close.

**Q:** The Rosicrucians? So, what does that have to do with this bloodline and Holy Grail business, and Joseph of Arimathea and Mary Magdalene... I mean, did Mary Magdalene exist as a person?

**A:** Yes.

**Q:** Was she the wife of Jesus?

**A:** No.

**Q:** Did Jesus have a wife?

**A:** Yes.

**Q:** Who was his wife?

**A:** Anatylenia.

**Q:** Who was this person?

**A:** The wife of Jesus.

**Q:** What was her background, her nationality?

**A:** Nazarene.

**Q:** Does that mean that she was from the east?

**A:** Possibly, if viewed that way.

**Q:** Did they have any children?

**A:** Yes.

**Q:** How many?

**A:** Three.

**Q:** What was the family name?

**A:** Marnohk.

**Q:** What did his wife do when he ascended into the state of hyperconsciousness which you have previously described?

**A:** Awaited her turn to transition.

**Q:** Did she continue to live in the same general area, or did she move to Europe.

**A:** Same.

**Q:** So, all these stories being made up about all these people and dramatic scenarios...

**A:** It is not the people but the message, the artifacts hold the key.

**Q:** What artifacts? Where are these artifacts?

**A:** France, Spain, Canary Islands and Morocco.

**Q:** What kind of artifacts are they? Things that still exist?

**A:** Yes.

**Q:** Is there any possibility that I am going to be able to find out about, or even actually FIND these artifacts?

**A:** Of course!!

**Q:** Does anyone else know about these artifacts?

**A:** Others are “on the trail.”

**Q:** Is one of these artifacts the ‘Virgin of Candelaria’ that appeared in the Canary Islands?

**A:** Related.

**Q:** Okay, well, I haven’t learned anything about Morocco yet...

**A:** Best to get “on the trail of...”

**Q:** On the trail of what? Trail of the Lonesome Pine, Trail of the Assassin... the Assassini?

**A:** Look for major conjunctions.

**Q:** Any more clues you want to give on that? Are we supposed to actually physically go to these places?

**A:** What does “Casablanca” mean in Spanish?

**Q:** White House.

**A:** Yes...

**Q:** Related to the White House in Washington?

**A:** On the trail...

**Q:** You once said something about ‘undreamed of treasures buried in Alfalfa fields in Rhineland.’ I have puzzled over this and puzzled over this and gone in ten different directions, and I still don’t have a real handle on it. Can you help me out here? Is this related to the crystal skull supposedly in the possession of the Templars that they supposedly buried in Gaul that the Templars had?

**A:** Need a better “handl” on it.

**Q:** George Friedrich? (A) No... (L) Well that is a funny spelling. You also said something about records being in the Hague. How am I supposed to check records in the Hague? The only way is to go there...

**A:** Travel for you is okay in small doses.

**Q:** We have our psychomantium built. I am of the opinion that the candle must be obscured completely and you should only be able to see the black depth of the mirror. If you put the candle in front, all you see is the candle... you see the candle light on the walls. You said very plainly: clear depth, indirect lighting only, that nothing ought to be seen, no walls, no reflection, nothing. Frank says that we should put the candle in front.

**A:** Must be able to distinguish mirror.

**Q:** Okay, that is gonna be difficult.

**A:** Try the swivel mirror.

**Q:** Well, Ark says that it is not wide enough - it is too narrow. He didn't like it.

**A:** Try it. If straight on, and tilted upward, should work.

**Q:** How long is it gonna take me... can you give me an estimate? Say, a theoretical person like myself, in my position, condition, and all things considered, how long would it take that person to see something?

**A:** As soon as their psyche is clear of anticipation/prejudice.

**Q:** With me, that could be a LOOOOONG time!

**A:** Or it could be a short time.

**Q:** Yes, but you have given me such a build up over the last couple of years - that seems impossible...

A: No.

Q: Well, it is gonna be hard...

A: No.

Q: (A) I want to ask about this first job - should I spend time in this HTML business? (L) I think you should tell them that you have to do something that will pay or you won't do it. Either they will decide to hook up with somebody they can pay, or they won't.

A: But they feel more familiar with Ark.

Q: What does them feeling familiar have to do with anything?

A: Trust.

Q: So, maybe that means they will pay you. I don't know.

A: Why do you suppose?

Q: I don't know and I am too tired to think right now.

A: Okay then, goodbye.

END OF SESSION

## **6.12 May 9, 1998**

Laura, Ark, Frank

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Xiorran.

Q: And where do you transmit through?

**A:** Cassiopaea.

**Q:** First question: what is wrong with my ear?

**A:** Bacterial infection.

**Q:** Is it just in the canal or the inner ear?

**A:** Middle and outer.

**Q:** I have some antibiotic drops. Will that be sufficient?

**A:** No.

**Q:** You mean, I will have to take antibiotics?

**A:** Yes.

**Q:** Which would be the antibiotic of choice?

**A:** Check reference material for that which specifies otitis media.

**Q:** Okay, Frank was concerned about the zapper {Hulda Clark zapper}... we know that it is built pretty much according to the design in the book, but does it make a difference as to whether you deliver the charge from these little plates directly onto your skin, or through the...

**A:** Not quite strong enough.

**Q:** How could we make it stronger?

**A:** Conductor is not flush with secondary conducting media.

**Q:** What does that mean?

**A:** Needs conductivity enhancement.

**Q:** We can use silver wire?

**A:** Suggest also using proper or appropriate gel. But be careful!! We are talking about a "fine line" here.

**Q:** (A) I want to ask if replacing the wire with a silver wire will help. This is what one does with sensitive receivers.

**A:** Refer to last response.

**Q:** Do we need the hand grips or is it okay as it is?

**A:** Immaterial.

**Q:** Would it be beneficial or useful in anyway to clip it to acupuncture needles to clear blockages in meridians?

**A:** No. Be very careful with acupuncture!!! One wrong move can cause great harm. Also, the procedures have lost something in the various translations and westernizations. Sometimes improperly sterilized needles have caused great misery.

**Q:** Alright. There was something sent around in an e-mail about a point on the inside of the wrist that is supposed to be able to open one's ability to communicate with one's self 2000 years from now. It was pretty interesting because it is the "inner gate" acupuncture point. Is there something to this "communication chakra?"

**A:** No.

**Q:** Well, that was short and sweet. Is there any harm or benefit to stimulating these points on the inside of the wrist?

**A:** No.

**Q:** Anything you want to add to that?

**A:** No.

**Q:** Okay. (A) There was this unexpected proposal to teach which we accepted...

**A:** We keep telling you...

**Q:** Yes. That we will be provided for. Yes, but it is hard because we have to be apart... Okay. I would like to know what the geographic coordinates, according to our current grid system, that would frame Atlantis. I don't need the exact shape, just a general box shape... the perimeter...

**A:** Like asking: "What are the geographic coordinates of the North Atlantic Treaty Organization?"

**Q:** Okay, let me get more specific: the Atlantean land that was supposed to have existed in the Atlantic Ocean... what was the farthest north of any part of Atlantis that was in the ocean, that no longer exists?

**A:** It is "time for you" to know that Atlantis was not a nation, land, Island, or continent, but rather, a civilization!

**Q:** All I wanted was to have an idea of a land mass in the Atlantic ocean that people talk about - where did it sit?

**A:** Where do you think?

**Q:** Well, I sort of think that the Azores and the Canary Islands are sort of...

**A:** Yes, but many other places too. Remember, the sea level was several hundred feet lower then...

**Q:** Why was the sea level several hundred feet lower? Because there was ice somewhere or because there was not as much water on the earth at that time?

**A:** Ice.

**Q:** Was the ice piled up at the poles? The ice sheet of the ice age?

**A:** Yes.

**Q:** So, Atlantis existed during the ice age?

**A:** Largely, yes. And the world's climate was scarcely any colder away from the ice sheets than it is today.

**Q:** Well, how could that be? What caused these glaciers?

**A:** Global warming.

**Q:** How does global warming cause glaciers?

**A:** Increases precipitation dramatically. Then moves the belt of great precipitation much farther north. This causes rapid buildup of ice sheets, followed by increasingly rapid and intense glacial rebound.

**Q:** Why have we not heard from Tom French?

**A:** Maybe you should be gentler in your approach, now that the "cranium is swollen" by so much widespread praise from so many quarters!

{Tom had been awarded the Pulitzer Prize.}

**Q:** Well, I don't know what you mean. We simply wrote and called with congratulations! I also sent the little bit of the last session he attended that seemed to hint about this Pulitzer win... I just sort of feel that he has...

**A:** That was not gentle.

**Q:** What do you mean by 'gentle?' How much more gentle can you get than being happy for someone and being nice?

**A:** That was nice bombardment.

**Q:** Well, I was just curious. I was also hoping that maybe he does not need to write about me anymore since he has his Pulitzer, and he can forget about us...

**A:** Swollen cranium... burst with a pop.

**Q:** Oh?

**A:** Maybe.

**Q:** Are you saying that it maybe will happen and maybe not depending on him?

**A:** Yes.

**Q:** Okay, I guess the gentle thing is to just ignore it. I do want to ask a quick one about these ruins found off the coast of Japan in the past year that is just now getting noticed here in the US.

**A:** Fault movements reveal previous layer of civilized exploits.

**Q:** What civilization?

**A:** Clues can be found by studying historic dynastic China.

**Q:** So, you would say that this is Chinese rather than Japanese. Okay. Recently there was some information about a VERY distant and intense explosion seen with the Hubble telescope... I am interested in what this was.

**A:** Reflection of other universe's genesis.

**Q:** What other universe?

**A:** They all start, and end that way!

**Q:** (A) Other universe?

**A:** What is "big bang" Arkadiusz?

**Q:** (A) Well, it was a big bang, certainly, but it was in OUR universe and not some other universe...

**A:** But what was the origin? And from where? All is one and one is all.

**Q:** (A) What was the origin of what? Our universe? Or the origin of this explosion? Or the origin of everything?

**A:** Yes, yes, yes.

**Q:** (A) Okay. What was the origin of our universe. This I don't know. This I want to know. This is okay to use just words, but if you use mathematical models...

**A:** That is where you come in.

**Q:** (A) Well, goody!

**A:** Each colossal begets its light to where there was no light. And where once there was all light!

**Q:** (L) I want some more clues!

**A:** Not tonight, Laura, I have a "Light ache." Good night.

END OF SESSION

## **6.13 May 14, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Votorr

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We received a letter from Blue {Resonant Human}. He says he is going to Egypt on Friday and has apparently a chance of going

and investigating some of the archaeological business going on over there. He wanted to know if there was any particular travel advice you might have for him?

**A:** Just beware of the dangers inherent to being an American in Egypt.

**Q:** Are Americans not very popular in Egypt at this time?

**A:** They are popular with most, but decidedly unpopular with a few.

**Q:** Anything in particular about what is going on with the pyramid, the purported preparations to open the door in the shaft, the supposed discovery of chambers under the Sphinx... What exactly IS going on there?

**A:** That would be long and complex. Best to refer to Cayce.

**Q:** So, what Cayce had to say is what is going on?

**A:** Essentially.

**Q:** Why are the Egyptian authorities being so uncooperative?

**A:** Mostly protective for politically motivated reasons.

**Q:** Can you offer any particular advice for Blue while he is in the pyramid itself?

**A:** Pyramid is slow to give up secrets to those looking directly.

**Q:** So, if you don't look for anything in particular?

**A:** Maybe one should also gaze skyward.

**Q:** Okay. Can you offer any...

**A:** Stay in groups where heavily guarded by armed authorities. Avoid foods if not aware of site of preparation.

**Q:** Is he going to have any problems?

**A:** Minor unless cautious.

**Q:** Is he going to make any interesting or amazing discoveries there?

**A:** Minor unless not cautious.

**Q:** Is he going to have any internal enlightening experiences there?

**A:** Suggest not to anticipate for best results.

**Q:** Is there any particular thing he should look for while surveying these sites?

**A:** Open mind. Problem with D\*\*\* has been too prejudicial.

**Q:** He is too prejudicial?

**A:** Has been. Too anticipatory.

**Q:** So, should he just relax, enjoy, have a good time, stay aware, and be ready for any experience of something new?

**A:** Expect nothing, then not disappointed.

{Personal questions/answers redacted. Without context, they are meaningless, and context is private.}

**Q:** The other night {my youngest daughter, aged 9} thought she saw a ghost. Did she?

**A:** Yes.

**Q:** Who was it?

**A:** Arnold Bailey.

**Q:** What was Arnold Bailey doing walking through my living room?

**A:** Exploring.

**Q:** Does he have any connection with this house or did he just drop in?

**A:** Connection.

**Q:** Why did he suddenly decide to explore here?

**A:** Worked here.

**Q:** Did he just recently die?

**A:** No. 1953.

**Q:** Is he happy with his explorations?

**A:** Neutral.

**Q:** Is he going to cause any problems?

**A:** No.

**Q:** Is he going to continue to hang around?

**A:** Maybe.

**Q:** Is he responsible for making the clock chime? {A mantel clock that belonged to my great, great-grandfather, and which had a completely severed spring, had suddenly begun to tick and chime.}

**A:** Yes.

**Q:** Why haven't we seen him before?

**A:** Construction.

**Q:** So the work {on the house} is what woke him up or disturbed him?

**A:** Close.

**Q:** Is it the change in the geometry of the house?

**A:** No.

**Q:** Anything about this situation I ought to know?

**A:** No.

**Q:** Are we going to do any traveling this year?

**A:** Wait and see.

**Q:** Am I an unnatural person because I don't really feel that I want to visit my mother?

**A:** Mother/daughter issues abound in this grouping.

**Q:** What is the main conflict in these mother/daughter issues?

**A:** Resentment/rebellion.

**Q:** Why does there seem to be so much resentment and rebellion here? I try to be understanding and patient. What do I need to learn?

**A:** Patience.

**Q:** I thought I was. Can you give me any advice about the psychomantium? I try to not try and it is pretty hard. I mean, my eyeballs fall out of my head. Should I change my breathing?

**A:** Meditate, do not anticipate.

**Q:** When you say that, do you mean that I should not anticipate being able to SEE something?

**A:** Yes.

**Q:** Well, I feel pretty stupid doing that. I mean, the obvious reason one goes into a dark room with a mirror and a candle is to SEE something! It's kind of hard to sit there and NOT think about

seeing something when you are in a room that is obviously designed to SEE something!

A: No. Meditate; clear head.

Q: Anything else this evening?

A: No.

Q: Thank you.

A: Goodbye.

END OF SESSION

## **6.14 May 16, 1998**

Frank, Ark, Laura

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Jovinne.

Q: And where do you transmit through?

A: Cassiopaea.

Q: We have been talking about this funny incident. Do I really have a problem with the time issue on the way to Gainesville, or was I just simply that late and not aware of it?

A: Awareness is the key to all learning.

Q: What caused my radiator cap to pop off the van?

A: Simply search through the “archives” for the answer.

**Q:** Well, what do the archives have to do with... uh... all the way up to that point, the temperature needle was fluctuating, though it never overheated exactly. Can you tell me anything at all or am I going to exhaust myself over it? If you are not going to tell me anything, just say so!

**A:** See the truth recorded.

**Q:** What do you mean? Recorded where?

**A:** Look.

**Q:** Look where? The psychomantium?

**A:** Archival record.

**Q:** What archives? And what am I looking for?

**A:** Clue in response.

**Q:** What about the guy who stopped to help?

**A:** How dressed?

**Q:** He was dressed in work clothes. He had on jeans and a long sleeved shirt - cuffs and buttons - and it seemed like he had on a vest. A hunting vest. Padded.

**A:** All important events reveal themselves in their construction.

**Q:** Well... okay. (A) Does it mean that the event was important?

**A:** Yes.

**Q:** (A) Was there also something unusual on our way back?

**A:** Maybe other, look for clues from which to compare.

**Q:** Alright, when we were leaving, we had to pull over and stop for that machine to be moved. We had to sit on the side of the road...

**A:** Search and research until “light” goes off.

**Q:** Off? Remember, when we stopped, there was the strobe on top of the vehicle? Maybe they were NOT moving farm equipment... maybe it was a UFO!?! (A) Which light?

**A:** That is part of the clue.

**Q:** Did having to stop for that farm equipment - was that part of the important event? Was it a cover for something? Was it not as we perceived it?

**A:** No.

**Q:** That was just ordinary?

**A:** No.

**Q:** Well, what was it?

**A:** What is “ordinary?”

**Q:** Well, that was as it seemed to be? They were moving an irrigator across and down the road?

**A:** Maybe.

**Q:** This is NOT the time to be cagey! (F) When is the time to be cagey? (L) Are you talking about stopping at a traffic light?

**A:** ?

**Q:** Well, you are gonna have to help me out here... there are a million tiny details and we could go through every one of them!

**A:** Not necessary to be that thorough.

**Q:** (A) The archival record. Is there something in the van that can be recorded? (L) The light on the tape recorder?

**A:** No.

**Q:** A light in the van?

**A:** Not necessarily.

**Q:** Not necessarily, but it could be. (A) Something in the van?

**A:** Or around.

**Q:** (A) What do we have around? A tape recorder? Around here or around the van? (L) The taillights?

**A:** In magnetic “sphere” of the van.

**Q:** (A) Are we talking about the way in or way back?

**A:** Both and others as well.

**Q:** So, what is the deal with the van here? I want you to know that I am so tired and it is utterly impossible with such a tired brain to figure this out! Help us out here!

**A:** We are. But you need not know answers today. If you search as usual, they will become apparent.

**Q:** I know! The van is a time machine!!!! It is a traveling psychomantium, complete with mirrors!!!

**A:** All is a “time machine.”

**Q:** So, when we get in the van... and that is funny, when I drive the van, it never has that bumpy business. So, when Ark drives the van it must become a time machine! Does this have something to do with the van?

**A:** Its occupants.

**Q:** Well, when the light goes out... search and research until light goes off... part of the clue... something about the occupants... search and research...

**A:** Take “time” to study.

**Q:** Do you have another clue? (A) There is no point of departure. (L) What is the point of departure for the clue?

**A:** Look for it.

**Q:** Is it in what you have given?

**A:** Yes.

**Q:** Very bizarre. Moving along. We would like to ask about this fellow, W\_\_ B\_\_. He has been sorting and formatting the material. He lives in Dothan, Alabama. The thing is, he asked me to ask about his involvement to put my mind at rest, so to speak. He he knows that we are a little paranoid... and apparently this asking is more for our peace of mind... anything about W\_\_ B\_\_?

**A:** No one is a problem if you are adequately prepared.

**Q:** Can you say anything in general about or to W\_\_ B\_\_?

**A:** Mr. B\_\_ has not asked us any questions yet.

**Q:** He actually has a list of things he would like to ask about the wave and 6th density and so forth. He is of the opinion that once these issues begin to be addressed that progress will be exponential by leaps and bounds. He seems to really understand the material.

**A:** Good.

**Q:** Well, you guys are being SO uncommunicative tonight!

**A:** Maybe next session we will delve into specific questions from Mr. B\_\_ that are of universal import. But, tonight you are not in the proper vibrator frequencies, as you are fatigued... Woof you... besides, if you have Mr. B\_\_ over for a session, then he can ask hello for himself.

**Q:** Last time you said that, in one respect, A\_\_\_ and I would have a parallel lesson. Could you give me a clue about this?

**A:** Child/parent learning progression.

**Q:** So, what I am learning in relation to my mother could be related to what she is learning in relation to her mother?

**A:** Yes, and other factors.

**Q:** Clue please?

**A:** No.

**Q:** Anything else about this incident of traveling?

**A:** Look for learning.

**Q:** The whole thing was so bizarre... it took us longer to get back than it took me to get there... look at the odometer... mileage... lights... (A) Our bodies?

**A:** Maybe.

**Q:** (F) I think that they mean you can find the answers by researching. (L) You said something about recorded in archives.

**A:** Yours.

**Q:** In my head, on paper, or on disk?

**A:** Both.

**Q:** From some of the old sessions?

**A:** Yes and other material.

**Q:** Did the guy who stopped to help have something to do with the situation?

**A:** Look for answer.

**Q:** When you say look, are you emphasizing something that is visual, available to the eyes? Something that can be seen clearly?

**A:** Okay, but you must search to learn for protection.

**Q:** Is whatever was happening something that we must be protected from in the future?

**A:** You will see. Must go now. Good night.

END OF SESSION

## **6.15 May 30, 1998**

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Jozza.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have several questions: I have been corresponding with a woman on the web on the subject of Jesus. I noted in re-reading the transcripts on the subject that you had said he lived 'near' Palestine and that the Bible was not entirely accurate. Where, precisely, did this person who came to be known as Jesus live?

**A:** Aramaia.

**Q:** Where is that?

**A:** In what is now Lebanon.

**Q:** His name was Jesinavarah, as you said before. During his life-time, did he have a large following?

**A:** Towards the end, and after.

**Q:** You said that he was not crucified, that he was taken up into a ship on a beam of light - at what age did this happen?

**A:** Age is not measured.

**Q:** At that time, according to our measurement, how many years did he spend on the earth plane before he was taken up in this beam of light?

**A:** 43.

**Q:** Okay, when he was taken up in this beam of light, where did this event occur?

**A:** The Sea of Galilee.

**Q:** On the shore?

**A:** Yes.

**Q:** You said he had children by three Roman women and he also had a wife?

**A:** Close enough.

**Q:** Did he have a twin?

**A:** No.

**Q:** Was Judas Iscariot his brother?

**A:** No.

**Q:** Did he have a brother named Jude or Judas?

**A:** No.

**Q:** Did he have brothers and sisters?

**A:** No.

**Q:** Is any part of the nativity story true?

**A:** Slight.

**Q:** I have an idea relating to the ancient gods and heroes... they all had these massive amounts of hair, and it seemed that cutting off the hair caused them to lose their strength in some way. Was this totally symbolic, or was it actually believed that they had to grow their hair?

**A:** Symbolic.

**Q:** What was the hair symbolic of?

**A:** Virility.

**Q:** Okay, virility. What was the symbology where women were concerned such as in the story of Mary Magdalene washing Jesus' feet and drying it with her hair?

**A:** Act like a brush.

**Q:** What was the symbology of using a brush on the feet?

**A:** Cleansing.

**Q:** Why would the feet require cleansing in the symbolic stories? Why was this a symbolic act?

**A:** One's standing emanates from the ground upon which one stands.

**Q:** How does one's standing emanate from the ground upon which one stands and how does this relate to one's feet being dried with hair?

**A:** Energy arises from within planet. You would not want to corrupt that with filth on the soles, would you?

**Q:** How does anything on the soles of the feet corrupt energy? People have dirty feet all the time! Gosh, they must be completely corrupted. Unless this was a particular ritual activity in which it was extremely important to have clean feet.

**A:** Would dirt on your eyes corrupt your sight?

**Q:** Of course! But nobody ever thinks about dirt on the body as being something that corrupts your energy.

**A:** Nobody?

**Q:** Alright, in general. So, this was a purification of energy process...

**A:** Symbolic of same in depiction.

**Q:** What was the purpose for which this ritual act was being performed. She was washing his feet before the crucifixion, or some sort of symbolic cleansing was taking place, am I correct?

**A:** Close.

**Q:** This event that is described in the New Testament as the crucifixion was obviously a symbol for something else. You have told us that this was a symbolic story...

**A:** More like propaganda.

**Q:** So, the crucifixion was not symbolic of some other hidden meaning, or event?

**A:** See "Gods of Eden."

**Q:** You also said that Jesus was going to return, that he would emerge from this other density experience and come as a teacher.

Is this because he is the number one teacher doing this work at the time?

**A:** More because the messenger most capable of delivering the message, because of expectations.

**Q:** And what message is he going to deliver?

**A:** Wait and see.

**Q:** You mean that we, the three of us sitting here, will see him and hear this message at some point in this reality?

**A:** Maybe.

**Q:** Would we have instant recognition?

**A:** Wait and see.

**Q:** Alright. This W\_\_ B\_\_ situation: is there any relationship between the Bill Brooks communication and the incident with the radiator in the van?

**A:** No.

**Q:** Well, we still haven't come up with any solution on this van business. (A) In fact, I checked all around and under the van for any device that might be magnetically attached to the van, and I could find nothing. I was almost sure that there would be something, some mechanical or electronic device, but I could not find anything. And I have no idea what that means, the magnetic sphere of the van. Is this something material which is to be found?

**A:** What caused car window to explode?

**Q:** You are saying it is me that does these things?

**A:** Maybe.

**Q:** So we are having more of the fun shattering-and-explosion events. And, it WAS an explosion, wasn't it? And I was awfully good at that for quite awhile. (A) But this is not a complete explanation because we were asking about this man who was helping, and apparently, from your answers, it was clear that there is something to be learned about this man, and that this incident, this explosion...

**A:** Many will be watching you.

**Q:** Well, since this guy was watching and came and helped, maybe that would indicate that he was a benevolent watching person?

**A:** No.

**Q:** Well, THAT makes me feel secure!

**A:** Security on 3rd density? You must be joking!!

**Q:** Well speaking of 'watched by many,' what about this W\_\_\_ B\_\_\_? He was already to come and he was gonna charge on down here and Ark started thinking he was manipulating and maneuvering a bit, and he did a few things that made me feel a little uncomfortable, and puzzled me because they didn't quite fit or sit well. So, as a result, we cancelled. But, I am divided in my thoughts about this. I'm sure you are aware of the long conversation we had about it earlier, so tell me about W\_\_\_ B\_\_\_'s sword dream.

**A:** Yes.

**Q:** Was the dream made up to manipulate me particularly?

**A:** Not just you.

**Q:** Okay. What is the agenda behind the manipulation?

**A:** Control.

**Q:** Who is behind Bill B\_\_\_ that wishes to control? Is it Bill B\_\_\_ himself, or someone or some agency behind him?

**A:** Lessons are valuable to those who learn.

**Q:** Is it a human agency here behind Bill B\_\_\_ or is it 4th density. I would think it would have to be a 3rd density group otherwise why would they want all the transcripts? I would say it would have to be a 3rd density agency or his own personal agenda that he wants to plagiarize the transcripts...

**A:** Two good guesses.

**Q:** Okay. Tell me about this reverse speech that Ark and I were looking at on the internet today. Is this reverse speech an actual phenomenon as this fellow describes it?

**A:** Many can do this.

**Q:** Well, he says that when we are talking that we are also constantly saying things in reverse and that if we would tape our conversations and play the tapes in reverse that we would hear what we are saying in reverse from another part of the brain and that this is a normal part of all speech. A sort of mirror image speech. Is this, in fact, happening?

**A:** Maybe with some.

**Q:** But not with everyone? Is that it?

**A:** Not at all times.

**Q:** So, it is not altogether as he is saying. Ark wants to use the psychomantium. Are there any suggestions for him to follow that would be different from instructions for me? But, then I am not an example to follow because I haven't been having a whole heck of a lot of success!

**A:** Keep experimenting with an open mind... do not anticipate.

**Q:** Well, I am really trying to get rid of this anticipation business. (A) I want to know whether this light is important - whether there must be a light or whether it must be total darkness?

**A:** Must be some light.

**Q:** (A) Should something be seen in the mirror... (L) I asked whether I would see something in the mirror or in my mind's eye and they said both...

**A:** Yes.

**Q:** Yes, I didn't know whether it would be a holograph or something in my own head... any special technique for Ark to use? (A) Yes, because I think that I do everything different from other people. Must I just go into some kind of a trance state, or can I do it my way?

**A:** Yes, just keep up the experimentation. You will see...

**Q:** Is this program that Ark is working on going to be something that we can modify to analyze crop circles, to decode them, so to speak?

**A:** The upcoming adventure will answer that for you.

**Q:** What upcoming adventure? I don't like the sound of that!

**A:** Why?

**Q:** I don't know... when you say we are gonna have an adventure, sometimes its not my idea of an adventure!

**A:** And sometimes it is.

**Q:** When you say 'upcoming,' that sounds like something fairly imminent. You don't usually say something like that unless it is pretty soon...

**A:** Maybe.

[Loud sounds from children outside on porch coming in and out of house.]

**A:** There is much interfering energy tonight!! We are sorry, but we must go for tonight. Goodbye.

END OF SESSION

## **6.16 June 6, 1998**

Terry, Jan, Frank, Ark, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Ekokiah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Ark would like to know about this program{ing} project he is involved in. It apparently looks like an impossible task and we would like to know if there is anything you can say that would point him in the right direction?

**A:** Use library resource material for inspirational foundation.

**Q:** In other words, he will find something in a book that will give him a key or a clue?

**A:** Yes.

**Q:** Any other clues other than that? It is a pretty awesome task here...

**A:** Interesting that you are declaring it to be daunting even at beginning.

**Q:** Well, that is just my perception.

**A:** Does one know what the road un-travelled is like?

**Q:** No. What is it? If you don't travel it you don't know. (T) How do you know it is going to be daunting if you don't travel it? (L) Oh, I see! They might be saying that it is going to be a lot easier than we think.

**A:** We are saying: Anticipate not!

**Q:** (A) I will have to decide about whether to take teaching in the fall or hope that this will continue into a new project after this is done?

**A:** Investigate for answer.

**Q:** Well, he will have to fill out the paperwork NOW for the teaching, and if he fills it out, he will HAVE to do it because he will be obligated - and that is why it is important to decide now rather than later.

**A:** So then, what do instincts of Arkadiusz say?

**Q:** His instincts say that he doesn't want to teach because the teaching is killing him, it's killing me, and it would be better to...

**A:** Then?!?

**Q:** Well, we don't want to anticipate that he is gonna have this other job and dump the teaching and then find out that we don't have a job!

**A:** If one is being "killed" by something, and one does not wish to be killed... whatever should one do?

**Q:** I know. One doesn't do it. That simple. Okay, now, I was reviewing our Jesus pages for the net, and on the subject of this life of Jesus that you gave, the few details, you mentioned that the biological father of Jesus was an individual named Tonatha. Then, you said that this individual was a member of what you called the 'white sect' also known as Aryans. Aryans are not precisely known as a sect, but what sect is there among Aryans that you were referring to; what is it called?

**A:** White sect.

**Q:** So, they call it the White Sect. Is it like the White Brotherhood?

**A:** Those of fair complexion who wear white robes.

**Q:** (T) We call them KKK here! (L) Similar to the Templars? Is there, for example, a name that they call themselves?

**A:** White Sect.

**Q:** And when they call themselves this, in what language did they create this moniker?

**A:** Aramaic.

**Q:** So, we need to know what it is in Aramaic. What kind of teachings did they follow?

**A:** Similar to the monks of orthodox Christianity.

**Q:** If they were similar to the monks of orthodox Christianity, then the activities of this individual in being the biological father of Jesus, would that not be considered to be breaking one's monkly vows?

**A:** All can be forgiven a singular indiscretion.

**Q:** So, this Mary knew this individual who was, for all intents and purposes, a monk in this sect and the hypnosis was activated and

possibly in him also... was he also hypnotized level 1 as you said about her?

A: Close enough.

Q: He was a monk and he had taken vows, this event occurred and this child was conceived, is that correct?

A: Yes.

Q: Was she also a member of some sort of order?

A: No.

Q: Was she in any way a sort of Temple virgin or did she had spent her whole life preparing to be the vessel for this child?

A: No.

Q: Is it true that the Essene community that was attempting to prepare a vessel for the coming of the messiah, that this was their whole plan, their work?

A: No.

Q: This sect existed... where was this monastery or group located?

A: Near today's Haifa.

Q: Where, in fact, was this child born?

A: [Many spirals] Nazareth.

Q: You have said that he did not travel and receive special teachings, yet that he knew that he was special from the beginning, and that the information was channeled to him. How do I want to phrase this? At what age did he receive this enlightenment?

A: Was progressive.

**Q:** So, it went on over a period of time. Did he ever know who his biological father was, that his father was a member of this White Sect... did he know that?

**A:** Vaguely.

{Discussion of genealogy project and bloodlines.}

**Q:** (T) What will Laura find as she tracks the family trees? The bloodline?

**A:** Roadblocks.

**Q:** Well, I have already found plenty of those. (T) What else will she find?

**A:** Frustration.

**Q:** Okay, you have given me all these clues, and told me that I will understand all about bloodlines, and now you are telling me that I will have roadblocks and frustration, so should I just simply drop this?

**A:** Because you would approach it in an improper manner.

**Q:** Should I just drop the whole bloodline thing?

**A:** Why?

**Q:** Well, because you are saying I would approach it in an improper manner, and I am getting roadblocks and frustration, and I certainly don't want that!

**A:** So, find the proper manner.

**Q:** I don't know what you mean by proper manner. What's the proper manner?

**A:** Gradual passage of phases.

**Q:** Is that the proper manner?

**A:** Yes.

**Q:** (T) Which phases are passing gradually?

**A:** The answer to that is the clue you need most.

**Q:** (T) Phases of what?

**A:** It is the discovery that fosters the learning.

**Q:** So, I will discover these as I go along, I guess. One dot leads to the next dot. The only way to learn is to do it. (A) The original questions was whether we should follow this bloodline research... to what purpose?

**A:** Bloodlines reveal destiny. Why do you think they have been covered up so thoroughly?

**Q:** {Question lost because of tape malfunction.}

**A:** Answer to that is like circumnavigating the interior of a balloon.

**Q:** {Question lost because of tape malfunction.}

**A:** Explore all possible angles of that answer.

**Q:** {Question lost because of tape malfunction.}

**A:** Now you are reaching...

**Q:** {Question lost because of tape malfunction.}

**A:** Or confusion.

**Q:** {Question lost because of tape malfunction.}

**A:** Part of it, but others do not want them to be found much more!

**Q:** {Question lost because of tape malfunction.}

**A:** Some.

Q: {Question lost because of tape malfunction.}

A: Yes.

Q: {Question lost because of tape malfunction.}

A: It was der Fuhrer who tried hardest. But not nearly enough.

Q: {Question lost because of tape malfunction.}

A: Find it in order to supercede the very power structure that created him.

Q: What power structure was this?

A: The "Third Reich."

Q: And who created the Third Reich?

A: Illuminati.

Q: So Hitler thought he could find something that would enable him to take complete control...

A: Sort of like a termite trying to vanquish "Orkin."

Q: {Question lost because of tape malfunction.}

A: Not tried, succeeded!

Q: {Question lost because of tape malfunction.}

A: No.

Q: {Question lost because of tape malfunction.}

A: Yes.

Q: {Question lost because of tape malfunction.}

A: One of them.

Q: {Question lost because of tape malfunction.}

**A:** Yes.

**Q:** {Question lost because of tape malfunction.}

**A:** Yes.

**Q:** What is it in this bloodline that makes it so important to cover it up?

**A:** It would lead directly to verity on a scale never before seen on earth while at 3rd density STS.

**Q:** And what would be the result of this verity?

**A:** The truth shall set you free... as you are imprisoned!

**Q:** {Question lost because of tape malfunction.}

**A:** There are many possibilities.

**Q:** {Question lost because of tape malfunction.}

**A:** The “main danger” is when one reveals too much before one has enough stature or notoriety, on web pages, for example. [Discussion of repercussions of ‘Diana’ material on web pages after Diana’s death]

**Q:** So, I should be more careful of what I say in regards to the discoveries I have made about the bloodline of Jesus on the ‘Jesus’ pages on the web?

**A:** Tread lightly.

**Q:** Alright, I will. Where did these bloodlines originate?

**A:** Orion region.

**Q:** For how long were they maintained with any semblance of purity?

**A:** Indefinite.

**Q:** Are you saying that they are still maintaining them and manipulating them from other densities?

**A:** That is for you to discover.

**Q:** Are these bloodlines carrying a specific codon that is designed to activate at a certain period of time or in response to a certain frequency?

**A:** Possibly, but why should not that apply to everyone?

**Q:** Okay, so we have got ticking time bombs in our DNA, all of us!

**A:** Maybe.

**Q:** Alright, bizarro... (A) It is not necessarily time bombs, these are bombs which could be ignited by something else, like knowledge. (L) Is that the case, that knowledge could unlock these codons?

**A:** Yes.

**Q:** Certain activities such as meditating?

**A:** Yes. Or... channeling.

**Q:** So, channeling can actually unlock these potentials...

**A:** Enough on your plate for tonight... Good Night.

END OF SESSION

## **6.17 June 13, 1998**

Laura, Ark, Frank

(Unless otherwise specified, Laura is asking all questions.)

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Verriah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** First of all, this session on 11/11/95, the question was asked - you were talking about matrixing Gemini and Aquarius, the 11th and 3rd houses of the zodiac - and I made the remark that 33 could represent... giving my idea... and you answered 'Medusa 11.' I'm assuming loosely that your answer, Medusa 11' was to the question of what 33 represented. So, Medusa 11 was the answer?

**A:** 1/3 of 33.

**Q:** Medusa was 11 of the 33. So that means that there was 22 of the 33 that was represented by something else, is that it?

**A:** If you wish to perceive it as such.

**Q:** Okay, well then, is my perception erroneous?

**A:** The pathway chosen is fruitful, but do not suppose the terminus to have been reached.

**Q:** Well, Medusa 11 is one third of 33, what are the other two thirds. (A) I believe, that in general, they will try to take you out of this idea of 33. They never, by themselves - I am not sure that the 33 is right...

**A:** 33 is right, but what it means is complex and fluid in nature.

**Q:** This Medusa idea, as I have recently learned, is part of a triad of female figures. And in this triad, the other two female figures are Cassiopaea and Andromeda, or Cassiopaeian and Danae. I don't know which set to select.

**A:** Select that which fits.

**Q:** I think that Danae and Cassiopaea could be the same entity in the mythical sense...

**A:** Who speaks for Andromeda?

**Q:** Cassiopaea... or Perseus? What do you mean who 'speaks' for her?

**A:** If you do not know, you need more pieces before you can advance. You see, ask the mathematics teacher what happens if students fail to maintain the progression of study? But why?

**Q:** Because, if you fall behind, you miss a piece and can never catch up because other pieces don't fit, so you have to find the piece that fits.

**A:** Is this true Arkadiusz?

**Q:** (A) What happens is just that they stop understanding what follows next. (L) Okay, the story says that Perseus has slain Medusa and he is on his way back and came to Ethiopia. He found that a lovely maiden had been given up to be devoured by a horrible sea-serpent, and her name was Andromeda. She was the daughter of a 'silly, vain woman named Cassiopaeon.' She had boasted that she was more beautiful than the daughters of the Sea God. The punishment for the arrogance of Cassiopaea fell not on her, but on her daughter, Andromeda. The Ethiopians were being devoured in huge numbers by the serpent - sounds a little bit like what the Lizzies are doing today - and learning from the oracle that they could be freed from the pest only if Andromeda could be offered up to the beast - the forced Cephus, her father, to offer her up. So, her mother got her into the soup and her father turned on the heat. Anyway, Perseus arrived and the maiden was chained to a rocky ledge waiting for the monster. He saw her and fell instantly in love. So, he waited

beside her until the great snake came and cut off its head. They sailed away and lived happily ever after. So, who spoke for Andromeda, her mother and father, is that what you mean?

**A:** It is a beginning.

**Q:** Okay, so what is the point of who spoke for Andromeda? What does that have to do with the 1/3 of 33?

**A:** Your searches sooner or later “net” results.

**Q:** Okay, one interesting thing that we just discovered was that Hyakatuke and Hale Bopp both crossed the eye of Medusa, the star Algol, on April 11th exactly one year apart. What is the significance of this?

**A:** You must remember mosaic, matrix... When you are on the verge of quantum changes or discovery, the realities begin to reveal their perfectly squared nature to you.

**Q:** Is that the only thing you want to remark about the crossing of the comets in front of the eye of Medusa?

**A:** Can you not picture all reality as a curving and bobbing journey through a transparent, undulating matrix mosaic?

**Q:** Well, do you have anything else to say about Andromeda? (It's VERY HOT in here!) Okay, Medusa 11. So, this was 11 of the 33, and assuming that you were not saying that there were 11 heads, but that Medusa was one of three heads, is that what we are getting at here, that there are three heads and Medusa was one?

**A:** Or both times 2.

**Q:** What do you mean? I don't understand.

**A:** Both times 2 is your square, my dear. In other words, perfect balance.

**Q:** Okay...

**A:** No! Ponder, do not jump around so much, lest ye lose the chance to learn!

**Q:** So, Medusa represents both heads times 2, and that is the square and balance. But that is only 22 or 121. So where does the 33 come from?

**A:** All these 1s 2s and 3s... hmmm...

**Q:** Well, if Medusa is one of the heads, what is the other head called?

**A:** Who are your prime numbers?

**Q:** The dwellings or the mystics, or do you want specific numbers?

**A:** Yes.

**Q:** (A) Who?

**A:** Who?

**Q:** How do we find out who are the prime numbers? Do we plot...

**A:** Who are the first 3?

**Q:** Father, Son and Holy Ghost?

**A:** Numbers!!!

**Q:** (A) 1 2 3 are the first three prime numbers...

**A:** Yes, thank you Arkadiusz!!!! Laura is dancing around in wonderland, meanwhile all of creation, of existence, is contained in 1, 2, 3!!! Look for this when you are trying to find the keys to the hidden secrets of all existence... They dwell within. 11, 22, 33, 1/2, 1/3, 1, 2, 3, 121, 11, 111, 222, 333, and so on! Get it?!?!

**Q:** When you say that the secrets of all existence dwell within 1 2 3 or variations thereof, what kind of secrets are we talking about here?

**A:** All.

**Q:** Well, name two at the top of the list just so I know where we are going here?

**A:** You can do that!

**Q:** Are we talking about secrets of physics?

**A:** Yes.

**Q:** Are we talking about secrets as in encoded words?

**A:** Yes.

**Q:** Are we talking about the Fibonacci series?

**A:** Yes.

**Q:** (A) Continuous fractions?

**A:** Yes.

**Q:** (A) That means all...

**A:** Yes.

**Q:** So, how can we most effectively utilize this information in some way that makes it useful?

**A:** You have.

**Q:** How have I utilized it?

**A:** By receiving it.

**Q:** Speaking of three... should we continue on this Medusa subject at this point?

**A:** You are beginning to obsess. The answers lie within the finished painting, not within the paintbrushes.

**Q:** Okay. Next: On this subject of ‘looking for the frequency of light,’ the ‘undreamed of treasures in Rhineland,’ and needing a better ‘handl’ on it. I came to the conclusion that it might be Liechtenstein because of the ‘handle of a stein’ and Liecht is light in German, so we have the frequency of light with a handle on it, or Liechtenstein. And, in this place there is a little town called Triesen.

**A:** What does stein mean, is it “written in stone?”

**Q:** Stein as in ‘grail,’ and stone as in ‘philosopher’s.’ So, maybe we are getting close.

**A:** What does Einstein mean?

**Q:** ‘One stone.’ And a stein is a cup and a stone at the same time. So, Triesen is in the ‘beautiful countryside between the Rhine and the alpine world.’ There is an alp called Lawena, nearby Lake Constance, and the Swiss canton of St. Gallen. You said something about being buried in ‘Galle’ and this seems to have all the related elements collected together... all the key words... so am I...

**A:** On the right track? It looks good.

**Q:** But how do alfalfa fields connect with all of this? There is nothing about alfalfa? Comment?

**A:** You think there is no alfalfa in the Germanic highland?

**Q:** Well, are we supposed to go to Liechtenstein to find what we are looking for?

**A:** Be patient... clues will progress nicely. Remember the Canary Islands?

**Q:** Yes, I remember. Okay, that takes care of several things. You are talking about bloodlines becoming parasitically infested and harassed at times of quantum leaps such as now, when I was reading back over this, it seems that this is a repeating cycle, this parasitic infestation; and then reading the history of Gregory of Tours, and all of these truly amazing things - lights in the sky, plagues, repeated incidents of aerial phenomena... a 'light like a serpent' in the sky... a bright light and 'snakes fell from the clouds...' in 590, fiery globes traversed the heavens and then an eclipse of the sun. These astronomical phenomena were usually followed by inclement weather which, in its turn, brought plague... is this the kind of parasitical infestation, harassment and so forth that we are talking about here?

**A:** Maybe, look for more clues.

**Q:** Well, do you have a specific point that you would like to toss on me here so that I have an idea of what I am looking for?

**A:** Undulating matrix/mosaic.

**Q:** Well, there is definitely a LOT of that. It is completely amazing what our forebears wrote about that other people just pass off as an overactive imagination. Are we talking about these kinds of things going on nowadays... it seems pretty obvious that it is...

**A:** Wait for more... and good night.

END OF SESSION

## **6.18 June 20, 1998**

Frank, C\_\_\_, Ark, Laura

**Q:** Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Choose another board

[Board had ridges which made movement difficult. We replaced it.]

Q: Alright, hope that is better.

A: Olorra.

Q: And where do you transmit through?

A: Cassiopaea.

Q: First question: okay, this book, *The Key*, by Cohane, is talking about a rock drawing in the Hoggar region of the Sahara; there is a figure of this man on these rock drawings surrounded by these various other figures; the man is pictured without a face. Where his face should be there are parallel brownish black lines that look like two things, the slats of a bed or the grill of a barbeque. Then, it says that “in the West Indies, and throughout North America, the indians had, as one of their most vital implements, a device that served as both bed and as a cooking utensil. It consisted of an oblong metal frame, three feet high, with slats or bars across the framework much like the slats of a modern bed. The indians cooked their meat on this grill over an open fire, and then, when the fire had died down, they wrapped themselves in their blankets and slept on the grill above the embers. To nomadic people, this object was the very center of their life. On this device, they not only cooked and slept, but also begot children. Out of this simple invention came what we today call a barbeque.” Anyway, the thought that came to my mind as I read that was the idea of the magnetite in the brain and the representation of the darkened bars across the face of this god figure as

being symbolic of iron magnetite, and some kind of energy transition going on in the head. Can you comment on this idea?

**A:** We need you to be more specific, if you please.

**Q:** Well, do the dark lines represent a)iron or b)the magnetite of the iron?

**A:** Seldom are answers so readily obtainable as in the “key” book.

**Q:** You got that right! It blew me away! So, in other words, the answer was very close to the description of the barbeque?

**A:** Interesting that they should mention “barbeque,” as the lines described could very well denote the effects of the “grill” after one’s face had been pressed upon it, while the fires burned underneath!

**Q:** What would be the source of such fires? The nature of the fires?

**A:** Firewalkers could tell you that.

{This was an interesting response since C\_\_\_’s late husband was very interested in fire walking though neither Frank nor I knew it at the time.}

**Q:** What is the nature of the grill? Is it an external iron object, or an internal effect of iron?

**A:** Both.

**Q:** Why would this be represented as dark lines across the face?

**A:** When one is shamed, one is no longer seen, only sees...

**Q:** Are you saying that this is a representation of hiding one’s face in shame?

**A:** More like being hidden.

**Q:** What figure did this god represent that had these lines drawn across the face?

**A:** The figure was more collective than individual.

**Q:** So, it was a collective rather than an individual god... (C) How do you know it was a god? (L) Because it was... well, we don't. It was just that the size was so huge. Was it one of the Nephilim?

**A:** When it comes to the Nephilim, references all point to a unified legend.

**Q:** Was this figure the fertility god of the Hoggar region?

**A:** Better study more material relating to Mediterranean region, particularly Malta.

**Q:** Okay, that is at least the third time you have brought up Malta. I will look for something on Malta. Now, I have noticed in all this reading that certain dates are repeatedly associated with certain subjects as signs or markers... and that these dates are associated with particular rituals, with particular groups, secret societies, various ancient matters - repeating over and over again. For example: the January 17th issue. It is like some sort of hugely important day. What I want to know is, is there some repeating relation between these dates and certain energy exchanges between densities? Are these dates indicative of some cycle of exchange between densities, or dates when the cycles create a situation wherein doorways are more easily opened?

**A:** Dates provide marker only.

**Q:** Are they a marker for the signaling to other people of their significance?

**A:** If you did not have "dates," would you remember anything?

**Q:** Well, I guess not. Okay, what are we supposed to remember

from January 17th. Obviously this is some deep memory of an extremely significant event.

**A:** Consult Maya.

**Q:** (C) They had the 52 year cycles. Wonder what January 17th was. (L) Anything else about January 17th?

**A:** Also 365 day cycles.

**Q:** Yeah, they had several cycles. (C) Was that a beginning of a cycle?

**A:** Measurement of what happened and when.

**Q:** What happened on January 17th?

**A:** Consult Maya.

**Q:** But January 17th recurs repeatedly in the alchemical texts...

**A:** And you may see the connection. Why do you suppose alchemists knew of the secrets brought “to the table” by the Maya/Egyptians?

**Q:** They constructed a mathematical table of some sort and this fits into that table, is that it? Is that why it reveals a secret?

**A:** It is a start.

**Q:** So, there is a ‘table’ involved... hmmm... alright, now: for a long time I have been curious about the reason for the wearing of the cord around the waist, against the skin, that is a symbol of many secret societies. What was the meaning of the cord around the waist?

**A:** Balance.

**Q:** How can a cord symbolize balance?

**A:** Body magnetic field.

**Q:** I don't see how that relates to wearing a cord around the waist? Are you saying it balanced the body's magnetic field, or was supposed to?

**A:** Symbolism.

**Q:** There's gotta be something else to this cord around the waist... it was some big symbolic thing and it relates to the wearing of the Masonic apron... (C) Maybe it's a symbol of the larger garment? (L) Any comments?

**A:** No need for any.

**Q:** Alright then. {Later note: What came to mind as I was re-reading this is the Hermetic maxim "as above, so below, and the cord symbolizing this division between above and below in a physiological sense. This then would lend substance to the Chinese alchemical figure of the "three cauldrons," and the practice of Tantra where the sexual energy is conserved until it overflows into the middle cauldron, continued conservation would then cause it to overflow into the "upper cauldron," or the consciousness.} There is another thing: the five-fold bond. There is the very famous figure from the Maya of the guy who is tied up - they call it 'hog-tied.' The person is tied with feet and hands tied together and then to the head. Five parts of the body are tied together. This is seen as a ritual activity or symbol of same. What can this possibly mean? The Mason's have the remnant of this with the rope tied around the neck.

**A:** You need to research the Masonic rites.

**Q:** I have. And that is what I am talking about. All I can see is that they are re-enacting the 'opening of the mouth' ceremony of the Pyramid Texts. Why haven't they made that connection? That is clearly what they are doing.

**A:** Who is?

**Q:** The Masons, when they go through their initiation. I read a description of the rites, and this is what it seems they are going through. Is this a reenactment of the slaying of Hiram? No, that doesn't make sense... Anything else you want to say about it?

**A:** We have already commented about the need for you to further research the Masonic rites.

**Q:** It says in this 'Holy Blood, Holy Grail' book that, among the artifacts that were recovered from the Templars at the time of their arrest, was a woman's skull decorated with gold or silver with a sign on it that said 'Caput LVIII m' which could either be 58 m or, if the m meant 1,000, then the 58 would be subtracted leaving 942, or it could be 58 and the Virgo symbol. Of these three ideas, is it one of them?

**A:** 942.

**Q:** What does 942 relate to?

**A:** Use numerological data for suggestions there.

**Q:** Well, that leaves 6. What does the number 6 lead us to?

**A:** Rounded it shows you groupings of twos and threes.

**Q:** Rounded?

**A:**  $2 \times 3$ ,  $3 \times 2$ .

**Q:** Anything further about this skull?

**A:** What does Kaput signify?

**Q:** Well, head, or finished? The end of something. Who did the skull belong to? It was supposed to be some saint or martyr.

**A:** You see Laura, you are on the right path, but you have a proclivity for side trips.

**Q:** So, this isn't important enough to worry about. Okay, in January of 1244, nearly three months before the fall of the fortress of Montsegur, two of the Parfaits escaped. According to tradition, the bulk of the Cathar treasure went with them - that is, gold, silver etc. Supposedly it was taken to a cave in the mountains and then to a castle stronghold. After this, the treasure vanished and has never been heard of again.

In March, three months later, Montsegur capitulated after with less than 400 defenders remaining. The defenders requested a two week truce. Now, these guys have been duking it out and slaughtering each other, yet they are granted a two week truce! This is quite amazing! They wanted to consider the terms of surrender. The terms were that all the fighting men were to receive a full pardon various crimes. They would be allowed to depart with all their baggage, gifts, and any money they received from their employers. The Parfaits were to be generously dealt with if they would renounce their beliefs and confess their sins to the Inquisition. They would be freed, and subjected only to light penances. This was COMPLETELY out of keeping with what the Inquisition was all about. Anyway, they asked for two weeks to consider the terms. In return, they offered hostages.

Then, on March 15, the truce expired. The following day, 200 Parfaits were hauled out and burnt. There was no time to erect individual stakes, so they were all burned together in a wooden stockade at the foot of the mountain. Not one recanted. On the night of March 16 it says that four men, accompanied by a guide, made an escape by descending the sheer western face of the mountain, suspended by ropes. According to tradition, these men carried the 'true' treasure of the Cathars. Why was this not smuggled out with the bulk of the treasure three months earlier? Why was this retained in the fortress until the last moment? What was the delay for? Why did this item or items need to be retained

until a specific date that coincided with the Spring Equinox? It is known that some sort of festival was held on March 14, the day before the truce expired. Apparently, this ceremony HAD to be held on March 14. From the reports, this ceremony or festival was quite impressive because some of the hired mercenaries, defying inevitable death, converted to the Cathar faith at this time. Could whatever was smuggled out have been necessary to the ceremony on the 14th? Was it necessary for them to retain something in their possession until a certain period of time had passed?

**A:** If you understood the cycles, and more importantly, the forces directing them, then you would already have the answer to this.

**Q:** Well, that is why I am asking. So, apparently these Cathars DID have something...

**A:** Sometimes, your asking is merely for validation of your own hunches.

**Q:** Well, darn it!

**A:** And for growth and progress, one must learn to let the answer stand.

**Q:** What was the head worshipped by the Templars that was supposed to have been called "Baphomet?"

**A:** Seer of the passage.

**Q:** What does that mean?

**A:** Remember, secrets of Knights Templar were kept in caves guided by eternally burning lamps.

**Q:** Okay, next question, is this Ophiuchus, the serpent holder, the same as what you have called 'the holder of Trent?'

**A:** Close.

**Q:** I guess that I am going to just have to accept that as a partial answer - why do I bother?! Okay, let me ask this, these guys who have researched this Holy Bloodline business have sort of focused all the attention on a particular line, purportedly the line of Jesus going into the Merovingian kings... This guy, Pierre Plantard, seems to have more or less created a genealogy with their own validations... sort of like describing x in terms of y and y in terms of x. Now, is this Pierre Plantard a genuine carrier of the bloodline that we are concerned with?

**A:** Partially.

**Q:** Then, that makes me think that the significant thing that we are looking for is a convergence of the blood lines... These lines are symbolized by the god figures, the children of Odin, and what we are looking for is a place where these lines converge?

**A:** Yes.

**Q:** Well, what characteristics might an individual have who is a product of this convergence?

**A:** Fair skinned and cleft chin.

**Q:** Well, Ark and Frank both have cleft chins, but C\_\_\_ and I don't! Does this mean...

**A:** We aren't saying that all with these features are of that blood line!

**Q:** So, you can have the bloodline and look quite different?

**A:** Yes.

**Q:** How many persons on the planet contain these 'convergent' bloodlines?

**A:** 7367. Kites were used for cross communication between bloodline members.

**Q:** Kites?! What do kites have to do with it? What the heck... you guys are driving me NUTS! Do you mean kites as in paper and string or kites as in the bird?

**A:** Yes, paper wood and string.

**Q:** (C) Like smoke signals? (L) Well, how is flying a kite... (C) Well, if it has a certain symbol on it...

**A:** And shape.

**Q:** What shape is that?

**A:** No, not now.

**Q:** (C) Well, maybe the shape of a cleft chin? (laughter) (L) Fair skin, cleft chin... (C) Yeah, and how did they communicate when it was raining? (L) Yeah, and at night? Did they set them on fire? Kites. This is obviously something that... (C) This is implying that such people know they have the bloodline and keep in touch with each other? (L) Or, is this something for the future when those of the bloodline wake up?

**A:** Yes.

**Q:** All of the above? Or just the last part?

**A:** Latter.

**Q:** So, we need to go fly a kite... (C) With a particular shape and symbol...

**A:** Research kites.

**Q:** (C) The Japanese fly kites... and there are a lot of people who hang banners outside their houses all the time...

**A:** Want revelations? Prepare for “Treasure” Hunt.

**Q:** Thanks a lot!

**A:** These quests energize you, Laura!

**Q:** Yes, they do. When I start finding things that connect, it is like having little explosions of energy in the brain... (A) Well, I don't understand these kites. They don't fly by themselves, they are on a string. You cannot see them at great distances... only a few miles... what is the point of communicating this way with someone who is only a few miles away?

**A:** Kites can be released, or left behind too!

**Q:** (A) When you release a kite, it falls down! Well, maybe we ought to wait and see where this clue goes before we get stuck on the technical aspects. Maybe it is just sort of a marker... We don't know if it will relate to a literal kite, or a reference to a kite, a drawing of a kite... a carving... something will appear that will connect, I am sure. It always does. [Discussion ending in comments about the symbol of the skull and crossbones.] Is there something about the skull and the physiological processes going on in the skull, and the thighbone and the physiological processes going on inside the long bone, that are somehow related?

**A:** To what?

**Q:** To each other. Why this ubiquitous representation of crossed thighbones with a skull? What is their relationship to each other?

**A:** Not point of grouping.

**Q:** (C) Well, if you have a thought and you want to move that thought, the thigh bones represent movement... so, if you wanted to spread a thought... see where I am going with this? (L) Yes, and there is some precedent for that idea. For example, the word 'well,' and wells repeatedly appear in this symbolism... this is related to the Indo-European word meaning 'to roll, or walk,' which symbolizes coming into being, life. Then, there is the electrical force of Zeus impregnating the earth goddess... is this in

any way related to these thigh bones?

**A:** Getting further away.

**Q:** Do the thigh bones represent the bloodline since the majority of the marrow which manufactures blood cells is in the long bones?

**A:** Suggest you leave this aspect until later. Needs more pieces to fit into place first. And now we must go for now... goodbye.

END OF SESSION

## **6.19 June 27, 1998**

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Honnorah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** C\_\_ was here last week and suggested that we should try to make arrangements to go to North Carolina and do some sessions there. I would like to ask if this would be advisable?

**A:** No.

**Q:** Why not?

**A:** This is where your energy is.

**Q:** Is there any other reason why this would not be advisable other than that?

**A:** Logistics.

**Q:** Well, yeah. Speaking of North Carolina, I want to ask, regarding T\_\_'s passing (C\_\_'s late husband), if there was any relationship between their moving there and his subsequent demise? I mean, no sooner had they gotten everything set up and organized, the house built and so forth, he passed. What was the relationship, since you mentioned once that there was an indirect relationship between the move there and his passing?

**A:** Once he had fulfilled his wish, it was the end of the line.

**Q:** Is there any other connection, other than the fulfillment of his wishes?

**A:** No.

**Q:** Okay. So, once he had what he wanted, that was it. Well, I can't think of anything else on that subject...

**A:** She is disbanded there.

**Q:** She is disbanded there? What does that mean?

**A:** To locator she clings for closeness to the one to whom she was banded, who is no longer there. So what is accomplished by this? Inner rupturing of the subsensate band.

**Q:** What is this 'subsensate band'?

**A:** Research for learning.

**Q:** What is the general outcome of a rupturing of a 'subsensate band'?

**A:** One turns inward until as a "spinster in waiting."

**Q:** Is this detrimental?

**A:** Yes. Why do you think she keeps returning here? Does it not seem to you an inordinate amount of returns for someone supposedly so “settled?”

**Q:** But she has reasons for returning. She has business to take care of, she has family here. So, this means that she frequently comes down here for a variety of reasons. But she wants to live there - that is her home base.

**A:** Unless this changes, it will be nothing less than her total undoing.

**Q:** Well, that is a bizarre thing to say! You said that about Sue...

**A:** And...?

**Q:** Well, yeah... okay. Point taken. Well, C\_\_ prefers the mountains because she was born in the mountains, she spent her early formative years in the mountains, and it is just that, to her, mountains are the natural way the land should look! That’s why. It seems natural to her. It is peaceful, cool, calm, leafy and green and there are all these nice, loving people all around - just a lot of reasons.

**A:** Mountains are the way the land should look?

**Q:** Well, to her... that’s what she was familiar with as a child. She feels more at home there. And, there is nothing anyone can say against such a thing.

**A:** No.

**Q:** Okay, why did she sleep so long and heavily after attending last Saturday night’s session. Was this related to being here for the session? If so, why?

**A:** Yes and vibratory frequency alignment.

**Q:** Was this beneficial?

**A:** Yes.

**Q:** Would it be beneficial for her to attend more sessions?

**A:** Sure.

**Q:** Well, let me cover...

**A:** Fate will intercede.

**Q:** That brings this up: if a person has a life plan and do not seem to be following it because they are distracted for one reason or another, do dire things happen in such cases?

**A:** Yes.

**Q:** If C\_\_ had been more in the direct seeking mode while she was married to T\_\_ - is it possible that he would not have died so soon? I mean, was she supposed to be moving in a different direction and all these things happened to stop her, turn her around, make her think and so forth?

**A:** Marriage was not right to begin with.

**Q:** Well, T\_\_ was the love of her life.

**A:** Cancer is evidence of this. How many instances can you think of where husband and wife, relatively young, are each subsequently stricken with such potentially deadly strains?

**Q:** In that sense, I would say that the bodies are definitely speaking loudly and clearly about something that the conscious minds are not even admitting. But, that is her issue. She would have to dig pretty deep for that. Why is she so stubborn about not looking at her own issues? Why does she prefer the 'personal myth,' as she calls it?

**A:** Some souls persistently chase ideals, even when totally detrimental to their chosen path. Check natal chart for substantiating clues there.

**Q:** Go back to the remark 'fate will intercede.' Can I have a clue?

**A:** Do you really want to know?

**Q:** Yeah! But, I am sure you are not going to tell me. I'm not greedy, I won't ask for the whole answer - just a crumb. I can figure it out - a crumb is all I ask!

**A:** Crunch.

**Q:** What?! That's the clue?!

**A:** Yes.

**Q:** You guys are bad to me! What kind of clue is that?

**A:** Can mean many things, yes?

**Q:** Yeah! That's why you are bad to me! It could mean 5,000 things. Well, no more on this subject. Now, I have forgotten to ask this the past couple of times... I have such a screwy metabolism. Now, I know that you once told me that my thyroid had been tampered with from other densities in an effort to dissuade me or prevent me from doing my work. The result of this is that I can go for days and eat almost nothing, and still gain weight! Why?

**A:** Because you have changed your third density frequency.

**Q:** What am I supposed to do now? Just stop eating altogether?

**A:** Lost. Altered your chosen balancing mechanism.

**Q:** What altered my chosen balancing mechanism?

**A:** First: what is your chosen balancing mechanism?

**Q:** Do you mean something physical in my body?

**A:** Close.

**Q:** I don't know. Going to the gym?

**A:** No.

**Q:** Something about the way I work or function?

**A:** No. Something you, or one, takes into the body.

**Q:** Thyroid pills?

**A:** This substance raises hemoglobin levels.

**Q:** What?! I quit smoking?!

**A:** Yes.

**Q:** How can smoking be a balancing mechanism?

**A:** Speeds up metabolism, thus allowing greater food intake.

**Q:** Well, all it did for me was allow me to eat at all! I guess that now I will have to quit eating completely forever!

**A:** Or bring nicotine back.

**Q:** Well, that's not gonna happen! Isn't there something else that would work?

**A:** No.

**Q:** So, you are saying that nicotine is actually good for me?

**A:** Yes. Without it, you will remain with weight problems, because you will not be able to lower food intake enough to compensate. Why do you think you had the inkling to start smoking in the first place?

**Q:** Well, I just was going along with my friends, I thought.

A: No.

Q: What other things does nicotine do?

A: Raises defences.

Q: What kind?

A: Immunological.

Q: Anything else?

A: Excites neurotransmitters. You require less sleep.

Q: Is this true for everyone?

A: No.

Q: (A) How much nicotine is necessary?

A: 100 mg per day.

Q: (A) Can it be in pill form?

A: Cigarettes infuse it to brain tissues most effectively.

Q: Well, I am certainly relieved! Now I know that I do not have a 'smoking demon' possessing me! I was really getting worried!

A: Those who fit this profile find it nearly impossible to "quit" completely.

Q: So, there are people who are actually benefitted by smoking?

A: Genetics will offer proof of this.

Q: You mean that one can see changes in DNA before and after smoking?

A: Close

Q: Is this also true for Frank?

A: Yes.

Q: Why us?

A: It is simply part of your “profiles.”

Q: Is that also why I have been having more stomach problems than usual?

A: Yes.

Q: Well, I always noticed that smoking could settle my stomach. It also stimulated my bowels... (F) Yes.

A: (A) What is serious here is the number. How many milligrams... (L) How many cigarettes does the number translate into?

A: 20.

Q: Well, I never smoked that much! Only about 15...

A: No.

Q: Well, I told myself 15!

A: It was not.

Q: Ark doesn't need to smoke, does he?

A: No. He does not fit the profile. He actually had to “work” to start smoking.

Q: (L) Did you? (A) Yeah, probably. (L) Well, then why did you? (A) Well, it was somewhat self-annihilating. (L) Ark is NOT happy with this explanation you guys have given.

A: Life contains unhappy explanations at 3rd density, sometimes.

Q: Well, I was really beginning to think I was possessed...

A: No.

**Q:** Well, that is not unheard of, you know! Okay, I have been having this sensation of an electrical charge building up in my legs and I would like to know what I can do to discharge this. All the muscles are hard and uncomfortable.

**A:** Molecular changes due to DNA evolving.

**Q:** We got a genealogy program and I have been loading all this data into it thinking that I am going to find something. You told me to investigate the Knight line and I have gotten back to Willielmo Knyght back in 1325, but I need to know what it is I am looking for. I have all these other lines, and it is a crazy bunch of people and strange events...

**A:** You have dug up the figures, now analyze.

**Q:** Analyze. What am I supposed to see in seeing these figures?

**A:** The figures are the people.

**Q:** Well, the thing about this Knyght guy is that I think a)he took the name because he was a child of a Templar who decided to call himself “Knyght” because he was a Knight of the Temple who had blended into the landscape, so to speak, after the disbanding of the Templars, or b) that he was incognito. Why would a person take this name? I mean, there were so many knights, functionally speaking, so why would a person take this name unless they were trying to be incognito and not use their true name?

**A:** Right.

**Q:** So, which direction should I go? Who was this guy? Who was he really? He sort of appeared out of the blue?

**A:** Search.

**Q:** Okay, I will keep searching. Ark is mad at you guys, you know {about the smoking responses}. So, I would like to know what is

the advantage, if any, of this profile you have described - what is the evolutionary advantage of having this sick metabolism?

**A:** Who says this is “sick?”

**Q:** Well, I am saying this loosely. I mean, it’s not normal, it’s not natural, it’s highly unusual... nearly everyone I have ever met who has a weight problem also has an eating problem and I can promise you that I don’t!

**A:** Better metabolism for cat... Sorry, that was our attempt at an abbreviation!

**Q:** What were you attempting to abbreviate?

**A:** Guess.

**Q:** {Laughter} Is channeling the first word?

**A:** CAT.

**Q:** Next letter?

**A:** How about post cat-a-clysmic world.

**Q:** Well, Ark doesn’t have that metabolism... I don’t want to be in a post-cataclysmic world without him...

**A:** Then give him the food.

**Q:** What food?

**A:** What food you have, if... confronted with the situation.

**Q:** Are you saying that we are gonna be hanging out on a post-cataclysmic planet?

**A:** That is always a possibility.

**Q:** There are some people who have written me on the web who are telling me that they have a reliable report that there was a

huge UFO seen sinking into the Pacific Ocean. Supposedly the Navy is watching it and there is a whole bunch of stuff going on. Is this story true?

**A:** Get the web data yourself, print and analyze for answer.

**Q:** They say that this is inside info and that it is not anywhere on the web...

**A:** If they have it, they can mail it. If not, they cannot, yes.

**Q:** So, if they don't have a source... hmmm... if, in fact, such a UFO does exist, and did, in fact, submerge itself in the Pacific Ocean, theoretically speaking, what group of aliens would it belong to?

**A:** Orion STS.

**Q:** And, if such a UFO did, theoretically, submerge itself in the ocean, how large a craft would this have been?

**A:** 20 Kilometers in diameter.

**Q:** And, how many alien beings might inhabit such a UFO?

**A:** 60,000.

**Q:** If such a UFO did submerge itself in the Pacific, where would it be at the present time? Still sitting on the bottom of the Pacific?

**A:** Underneath the floor.

**Q:** And if it was, in fact, under the ocean floor, what are the plans of said craft? What are the plans of the beings operating said craft?

**A:** Too complex.

**Q:** Well. If such a craft was there, is the Navy, or other agencies aware that it is there?

**A:** Maybe.

**Q:** Is it being monitored?

**A:** Maybe.

**Q:** Has there been any contact?

**A:** Ask for further data.

**Q:** Recently Johan had a real awakening. He did a lot of praying and was going to get a job, and he was doing all that the 'New Age' teachers advise, and everything fell through, and now he has decided that there is no providence, there is no God, and that he is basically cast adrift in an uncaring universe. I know that this is a start in the right direction, but is there anything you can say in this situation?

**A:** All there is is lessons. When one understands this, one no longer searches for the non-existent and unnecessary, safety net.

**Q:** One final question: I have to start scheduling time for the psychomantium. Can you suggest the optimum time or optimum schedule?

**A:** Mid-evening and nearer to full moon and new moon.

**Q:** Well, that is helpful... good night.

**A:** Good night.

END OF SESSION

## **6.20 July 4, 1998**

Frank, Ark, Laura.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Higurrah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (A) I am trying to write down some things about a cosmology, and I have some questions mainly about the coming events. First there was the story of the sun's companion brown star which is apparently approaching the solar system, and I would like to know, if possible, details of its orbit; that is, how far it is, what is its speed, and when it will be first seen. Can we know it? Orbit: how close will it come?

**A:** Flat elliptical.

**Q:** (A) But how close will it come?

**A:** Distance depends upon other factors, such as intersecting orbit of locator of witness.

**Q:** (L) What is the closest it could come to earth... (A) Solar system... (L) Yes, but which part of the solar system? We have nine planets... which one? (A) I understand that this brown star will enter the Oort cloud... (L) I think they said it just brushes against it and the gravity disturbs it...

**A:** Passes through Oort cloud on orbital journey. Already has done this on its way "in."

**Q:** (A) You mean it has already entered the Oort cloud?

**A:** Has passed through.

**Q:** (A) So, it will not approach...

**A:** Oort cloud is located on outer perimeter orbital plane at distance of approximately averaged distance of 510,000,000,000

miles.

**Q:** (L) Well, 510 billion miles gives us some time! (A) Yes, but what I want to know... this Oort cloud is around the solar system, so this brown star, once it has passed through... (L) It must already be in the solar system? (A) No, it could have passed through and may not come closer. Is it coming closer or not? Is it coming closer all the time?

**A:** Solar system, in concert with “mother star,” is revolving around companion star, a “brown” star.

**Q:** (A) So, that means that the mass of the companion star is much...

**A:** Less.

**Q:** (A) Less?

**A:** They are moving in tandem with one another along a flat, elliptical orbital plane. Outer reaches of solar system are breached by passage of brown companion, thus explaining anomalies recently discovered regarding outer planets and their moons.

**Q:** (A) But I understand that the distance that the distance between the sun and this brown star is changing with time. Elliptical orbit means there is perihelion and aphelion. I want to know what will be, or what was, or what is the closest distance between this brown star and the sun? What is perihelion? Can we know this, even approximately. Is it about one light year, or less or more?

**A:** Less, much less. Distance of closest passage roughly corresponds to the distance of the orbit of Pluto from Sun.

**Q:** (A) Okay. Now, this closest pass, is this something that is going to happen?

**A:** Yes.

**Q:** (A) And it is going to happen within the next 6 to 18 years?

**A:** 0 to 14.

**Q:** (A) Okay, that's it. I have some idea about this. Now, I understand that, either by chance or by accident, two things are going to happen at essentially the same time. That is the passing of this brown star, and this comet cluster. These are two different things?

**A:** Yes. Different, but related.

**Q:** (L) Is there a comet cluster that was knocked into some kind of orbit of its own, that continues to orbit...

**A:** Yes.

**Q:** (L) And in addition to that comet cluster, there are also additional comets that are going to get whacked into the solar system by the passing of this brown star?

**A:** Yes.

**Q:** (A) I understand that the main disaster is going to come from this comet cluster...

**A:** Disasters involve cycles in the human experiential cycle which corresponds to the passage of comet cluster.

**Q:** (A) I understand that this comet cluster is cyclic and comes every 3600 years. I want to know something about the shape of this comet cluster. I can hardly imagine...

**A:** Shape is variable. Effect depends on closeness of passage.

**Q:** (L) So, it could be spread out... (A) We were asking at some point where it will be coming from. The answer was that we were supposed to look at a spirograph.

**A:** Yes.

**Q:** (A) Now, spirograph suggests that these comets will not come from one direction, but from many directions at once. Is this correct?

**A:** Very good!!!

**Q:** (A) Okay, they will come from many directions...

**A:** But, initial visibility presents as single, solid body.

**Q:** (A) Do we know what is the distance to this body at present?

**A:** Suggest you keep your eyes open!

**Q:** (A) I am keeping my eyes open.

**A:** Did you catch the significance of the answer regarding time table of cluster and brown star? Human cycle mirrors cycle of catastrophe. Earth benefits in form of periodic cleansing. Time to start paying attention to the signs. They are escalating. They can even be “felt” by you and others, if you pay attention.

**Q:** (L) We have certainly been paying attention to the signs!

**A:** How so?

**Q:** (L) Well, the weather is completely bizarre. The fires, the heat...

**A:** Yes.

**Q:** (L) I notice that the tides are awfully high all the time with no ostensible explanation...

**A:** And low, too.

**Q:** (L) Yes. I have noticed that particularly. (F) I have too. Not too long ago I noticed that the tides were so incredibly low for this

time of year. (L) And also the signs in people - these kids killing their parents, all these people going berserk - you know...

A: Spike.

Q: (L) What do you mean spike?

A: On a graph...

Q: (L) Just spikes, not the biggie...

A: Spikes are big.

Q: (L) Well, from what you are saying about this - I mean how are we supposed to do all these things you say we are supposed to do? I mean, we won't have time!

A: Who says?

Q: (L) That is kind of what it is sounding like. Unless our lives and experiences escalate in concert with all these other events...

(A) I have a last question which I have prepared. So, we have these two physical disasters or events, the coming brown star and the comet cluster, but we have been told that this time it is going to be different because this time it is accompanied by a plane convergence.

A: Yes. Magnetic field alteration.

Q: (A) This plane convergence, or this magnetic field alteration, it's supposed to be related to realms crossing or passing. A realm border.

A: Realm. What is root of "realm?"

Q: (L) Reality.

A: Yes. How does the magnetic field "plug in?" Other planchette, please. Carbon disturbance, as someone "melted" crystal on top.

[We replaced planchette.] We want to stay on this general subject matter through this session, for your sake.

**Q:** (L) Okay, in terms of these signs, these things going on on the planet, these fires and so forth - you never said anything about all these fires in Florida. You said Arizona was going to burn, but you never said Florida was going to burn...

**A:** We did not say it would not.

**Q:** (L) I know. But, it is really oppressive. I have read a couple of signs in the last day or so that we are going to have a change in the weather, a break, is my little method of predicting...

**A:** Reverse extreme?!?

**Q:** (L) Oh! Floods again! Well, I guess floods are better than fires... but, maybe not!

**A:** Italy and Greece are burning too.

**Q:** (L) Yes, we noticed that in the paper today. Is there a relationship between Italy and Greece and where we are on the planet? Some kind of psychic link?

**A:** Just same current malady.

**Q:** (L) Okay, back to the comet cluster and realm border...

**A:** Not yet.

**Q:** (L) Well, which direction should we take right now?

**A:** Step by step.

**Q:** (L) Okay, you just said we are going to have a reversal in our weather. Are there any other conditions that we should be aware of at the present time?

**A:** Point is to watch, look, listen.

**Q:** (L) When we are watching, looking and listening, is there some particular thing we are supposed to be watching for that is to give us a clue about something?

**A:** All.

**Q:** (L) Is there something we are supposed to do at some point when we perceive a particular clue or event at some point?

**A:** What would you suggest?

**Q:** (L) I don't know that I would suggest anything except to keep a low profile and keep on working until we figure out the answer. It is like a race against time. We have to figure out the answer because, obviously, you are not going to tell us...

**A:** No. No race needed.

**Q:** (L) Well, I sometimes feel completely inadequate for all of this.

**A:** Stop thinking 3rd density!

**Q:** (L) Well, I don't want to just live in LaLa land and say, 'oh yes, I'm watching. I see the signs! I'm looking! I'm listening! And then count them off on my fingers and say: but I'm not gonna think about it because that's 3rd density!' See what I am saying here?

**A:** No, because you are still thinking 3rd density. Better to have a "front row seat," and enjoy!

**Q:** (L) But I feel like I am not supposed to be enjoying myself so much! I feel guilty!

**A:** Why not?

**Q:** (L) Well! I'm supposed to be DOING something!

**A:** You are.

**Q:** (A) When you watch, look and listen, you are getting some signals, and these signals cause a certain pattern of thinking which were not yet able to emerge, but now, after you receive certain signals, you start to think in a different way. So, you cannot now think in a different way, but when you learn this and this has happened, then you start to think in a different pattern. So, you cannot now do things, but you always have to be ready to change your thinking at any moment when you understand more, when you see more, when you notice more, when you put things together which are not yet together. Then, there may be a big change of perspective, a total change. And this we have to keep our minds and thinking patterns open and ready to change, and work and put the puzzle and mosaic together. And, this is all that counts. It is this work that we are now doing that counts, not some future big thing: oh! Now we go on a ship! No, it is only doing our best, and what is it? Our best? It will change. I believe so. That is the idea. So, everything depends on this.

**A:** Yes. You see, my dear, you cannot anticipate that which is not anticipatable.

**Q:** (L) Well, swell. Okay, you want to stay on this subject, so let us move another step.

**A:** We are glad you noticed this birth of the spike.

**Q:** (L) Is that a clue? Is this one of those obscure remarks? Yes, I noticed, the kids killing their parents, all the shooting going on, the weather... is this connected in some way to some other event?

**A:** 27 days of record heat out of 30, oh my oh my! Suggest you awaken your internet pals, as they are too busy chasing "goblins" to notice.

**Q:** (L) So, I should have something to say about this?

**A:** In Florida now, where to next? How about a shattering sub-

duction quake in Pacific Northwest of U.S.? We estimate 10.4 on the Richter scale. We have warned of Rainier. Imagine a 150 meter high tsunami in Puget Sound...

**Q:** (L) Does this subduction quake have anything to do with that UFO that buried itself in the Pacific?

**A:** All are interconnected.

**Q:** (L) The information I got on that was that it was about 600 mile north and east of Hawaii. A couple of submersibles were sent down and disappeared or were destroyed or didn't come back... it is supposedly giving off a lot of energy. Any comment?

**A:** No.

**Q:** (L) Should I follow that direction?

**A:** All directions lead to lessons.

**Q:** (L) Now, you have mentioned this earthquake. I know that you don't usually give predictions, why have you done so now?

**A:** We do not give time tables.

**Q:** (L) Anything else other than a tsunami in Puget Sound and a big subduction quake... 10.4 on the Richter scale is almost inconceivable.

**A:** Rainier... caldera.

**Q:** (L) What about the caldera?

**A:** Expect one.

**Q:** (L) Other than floods, anything else for Florida upcoming?

**A:** All areas experience accelerating "freak weather patterns."

**Q:** (L) Okay, all of these freaky weather patterns and bizarre things going on on the planet, how does it relate to the comet

cluster and the brown star? Is it related?

**A:** Human experiential cycle intersects.

**Q:** (L) Any specific physical manifestation of either this brown star or this comet cluster or this realm border, that is related to these events on the planet?

**A:** Approach of wave stimulates precursor activity which in turn causes effects which in turn stimulates further “heating up” of activity...

**Q:** (L) I thought it was curious that you used the term ‘birth of the spike.’ Is there something or someone that was born at that particular time?

**A:** No. Spike is as on a graph...

**Q:** (L) Okay, is there anyway we could graph this ourselves, and if so, what types of events would we include to create the background data?

**A:** “El Nino, La Nina,” etc...

**Q:** (L) Is this El Nino thing connected to sunspot cycles?

**A:** No.

**Q:** (L) It has its own cycle. I don’t think it has been tracked for long enough to get...

**A:** Global warming, a part of the human experiential cycle.

**Q:** (L) I read where Edgar Cayce said that a slight increase in global temperature would make hurricanes something like 5 times stronger... given a baseline temperature. Does this mean we are going to have stronger and more frequent hurricanes?

**A:** Yes.

**Q:** (L) Will they hit land more frequently, or just spin out in the ocean?

**A:** Either, or.

**Q:** (L) Does this quest I have been on, this bloodline and grail business, does that have any connection with this cycle business?

**A:** Only indirectly.

**Q:** (L) Is that something that I should put aside for the time being and work on something else?

**A:** You may do as you wish, just keep one eye and one ear tuned to current events. And, very important, log dreams. Arkadiusz too!

**Q:** (L) Is there going to be some communication to us through our dreams?

**A:** Visions.

**Q:** (L) Where will these visions originate from?

**A:** Ether.

**Q:** (L) On this project Ark is working on, I have the feeling that there is going to be some way that he can utilize this information to be able to analyze or read the crop circles. You once said that this was an important area to investigate. Is this something that we should continue to pursue?

**A:** Yes.

**Q:** (L) What about the building of the pool you suggested. Is that something that is essential or useful?

**A:** Not essential, but very helpful.

**Q:** (L) Is that something we should do where this house is, or should we hold off on that... well, we have to hold off anyway for financial reasons...

**A:** Let them direct you.

**Q:** (L) Let who direct us?

**A:** Finances.

**Q:** (L) Speaking of which, are the finances going to be alright.

**A:** Wait and see.

**Q:** (L) You just love to say that! My night would not be complete if I didn't get a 'wait and see.' Now we have to have an 'open' and an 'up to you.'

**A:** Okay, open and up to you.

**Q:** (L) My night is complete now! Now, when you were talking about the weather changing from one extreme to another, were you talking in a past sense or future sense?

**A:** Both.

**Q:** (L) Now, we want to ask about this 'Zeta Talk' web material.

**A:** Specifics.

**Q:** (L) Okay, we wanted to know if it was a legitimate source but corrupted by a lot of noise, or if it is a major disinformation campaign?

**A:** Not legitimate.

**Q:** (L) What is the energy behind this woman who claims to channel these Zetas?

**A:** Ego.

**Q:** (L) Well, from what I read, it is pretty much an amalgamation of stuff from other sources... I mean, there was nothing that would validate it as higher density material... there was stuff from Sitchin, Velikovsky, Cayce... there is nothing there she couldn't have gotten from other sites. Ra, our stuff...

**A:** Yes.

**Q:** (L) And it is just a mishmash of all this stuff along with erroneous stuff that must have come right out of her own head.

**A:** Yes.

**Q:** (L) And, there is a huge amount of garbage coming out of her own head...

**A:** Yes.

**Q:** (L) But, as Ark pointed out, it is a very well organized site, mirror sites, she obviously has supporters and fans and all of that.

**A:** Any one seeking this can accomplish it. Do you really believe the "Zetas" would expend energy warning humans about impending earth changes?

**Q:** (L) Well, if they wanted humans to perceive the gray aliens as the good guys they would! That's what occurs to me when I think about it.

**A:** How much energy do you expend warning squirrels about fires?

**Q:** (L) Okay, point taken. None. Is there anything else that we should ask that we haven't asked, any subject...

**A:** To be continued... Good Night.

END OF SESSION

## 6.21 July 11, 1998

Frank, Ark, Laura, Terry and Jan

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Sigurri.

**Q:** Where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) I would like to comment on the fact that today is 7/11.

**A:** Yes.

**Q:** (L) Are there any particular energies flowing about on such a day?

**A:** Only the energies that always “flow.”

**Q:** (A) I want to continue questions from the previous session. First, about this companion star: where is it now; which part of the zodiac?

**A:** Libra Constellation.

**Q:** (A) Where is the periodic comet cluster?

**A:** Not visible. It approaches in “scatter pattern,” indicating that one or two of the members may have already made the circuit.

**Q:** (A) We have been told that it will look like one solid object at first.

**A:** Yes, but not necessarily only one grouping. Will show up first in the region of the Magellanic Clouds.

**Q:** (A) So, we have the idea. Next question concerning this companion star; we were told that its mass is less than the sun, can we have a figure on how much less?

**A:** 56 percent of the mass of the sun.

**Q:** (A) Okay, if this is really so, then when it really starts to approach the solar system, and they rotate in tandem, it means that the sun will really start to feel its gravity, and because of this, the solar system will start to move with respect to other stars, so all the constellations will shift, is this correct?

**A:** More like a slight “wobble” effect.

**Q:** (L) Will that be perceptible to us here on the Earth?

**A:** Only through measurements.

**Q:** (T) There have been a lot of reports of late regarding major solar activity, solar flares, solar winds, etc. The surface of the sun has a whole lot going on. The last I heard, one of the two satellites observing the sun, one of them is gone. Is this an effect from the sun itself, or is this an effect of the approaching brown dwarf?

**A:** The sun.

**Q:** (T) As the brown dwarf approaches, will it intensify the solar flare activity?

**A:** The effect on the physical orientation of the sun from the periodic passage of its companion is to flatten the sphere slightly. This returns to its original spherical shape with the retreat.

**Q:** (L) Is this flattening of the sphere of the sun going to have any noticeable effects in terms of enhanced, accelerated, or magnified radiation from the sun?

**A:** No.

**Q:** (T) Solar flares or anything like that?

**A:** No.

**Q:** (T) So there is not going to be any appreciable effect on the planet from this as far as the sun goes?

**A:** The sun's gravity increases, thus inhibiting flares.

**Q:** (T) Inhibiting flares is good. (L) Not necessarily. Solar minimums have been periods of ice ages. (T) One of the recent crop circles this year shows what the crop circle interpreters say is an image of the sun with a large solar flare coming off of it. It is supposed to be a warning to us that the surface of the sun has become unstable...

**A:** All events intersect.

**Q:** (A) Okay, I would like to ask what kind of effects other than just gravity we should expect from the close passage of this star? Any particular electro-magnetic, gamma radiation, or what to look for? In which part of the spectrum?

**A:** Radiation emits from those cosmic bodies which radiate.

**Q:** (L) Are you saying that the brown star does not radiate?

**A:** Yes.

**Q:** (L) If it doesn't radiate, what does it do?

**A:** Its radioactive field is severely limited as the "fire" went out long ago. It does not give off light.

**Q:** (J) It's a brown star. (T) One or two steps away from being a collapsing black hole. (L) Well, that's friendly, especially after watching "Event Horizon" last night!

**A:** No. Black holes only form from 1st magnitude stars.

**Q:** (A) We have been told that there is going to be a change of the magnetic field of the earth. Does this mean that the magnetic pole will shift?

**A:** Yes.

**Q:** (A) About this shift of the poles, is it going to be a complete pole reversal?

**A:** Yes.

**Q:** (A) What is going to happen inside Earth that could cause this magnetic pole reversal?

**A:** Is caused by disturbances in the mineral content of the substrata rock, brought on by the interaction of Earth with outside forces.

**Q:** (L) What specific outside forces?

**A:** Those already discussed.

**Q:** (L) What is going to be the specific mechanism of this disturbance? Can you describe for us the steps by which this pole reversal will take place?

**A:** Pole reversal is cyclical anyway, these events merely serve as trigger mechanism.

**Q:** (L) Let me ask it this way: is there a charge that builds up in the mineral substrata that requires discharge, or that becomes excited to the point that it discharges and then reverses? Is this what we are talking about in terms of the mechanism?

**A:** Examine what is needed to magnetize metal. Ask Arkadiusz.

**Q:** (A) What is needed to magnetize metal. One has to align the spins of the atoms which means one has to strike the metal, or

one has to bring a magnetic field close. (T) Strike as in annealing... heating and striking metal or rock which causes the crystalline structure to decompose so that the metal becomes pliable. Then, each time it is hit, it reforms until it cools again. (L) Is this what we are talking about here?

**A:** Close.

**Q:** (A) One can also have an external magnetic field to align. But, where is it going to come from?

**A:** Guess.

**Q:** (L) The wave?

**A:** All are interconnected.

**Q:** (T) Now, this is just a thought: where would an external magnetic field strong enough to do something like that come from? On the earth, if you supercharge the ionosphere, you create an extremely intense magnetic field. That's what the ionosphere basically is. That is what the HAARP group of programs is about. That is what Tesla was into - the ionosphere - cause there is a large charge there. (L) Is the HAARP project involved here?

**A:** No.

**Q:** (T) They are monkeying around with that stuff. (L) Do the people in charge of the HAARP project know about all of this and are they constructing this HAARP array to utilize this energy in some way?

**A:** Those who know are at foundation.

**Q:** (T) To protect us?

**A:** HAARP is for mind control. It is hoped it can be successful in 4th density too!

**Q:** (L) Well, if these people are aware that this sort of thing is getting ready to happen... never mind. **(A)** We have been told that this magnetic disturbance is closely related to this realm border crossing, and you asked us the question 'what is the root of realm' and it is reality. Now, realm has an m at the end. Does this have something to do with magnetic?

**A:** Realm border is when the reality shifts for all.

**Q:** (A) Yes, but why is this reality shift related to magnetic field disturbance? What is the connection?

**A:** Your physiology and etheric orientation are both tied into the magnetic state of your environment.

**Q:** (L) Okay, you said before that the magnetic field is going to reverse...

**A:** Magnetic poles reverse.

**Q:** (L) Okay, what is the magnetic field going to do. It is going to change in some way. Is it going to increase, decrease... is this to a degree - something other than direction - amplification? **(T)** Will anything change in the strength of the field?

**A:** Let us illustrate. Now: Earth. [A circle is drawn with radiating spikes all around fairly close to the surface.] Earth after: [A circle is drawn with double radiating spikes with those in polar regions considerably longer than the others.]

**Q:** (T) So, it is the same, except it is larger?

**A:** Close.

**Q:** (T) Are you indicating that the magnetic field will be stronger?

**A:** Broader and larger.

**Q:** (L) What is the cross in the middle?

**A:** Geodirectional grid reference. You incorrectly added circle on side. Lines of magnetic field alignment should be shown as longer at poles. “Crosshairs” in illustration are for directional reference only.

**Q:** (T) Does this mean it will be stronger also?

**A:** Larger and broader.

**Q:** (A) People work near strong magnets much stronger than the Earth’s magnetic field, yet nothing happens to them that we can see.

**A:** Not true. Body chemistry is altered. Is not long term or permanent exposure.

**Q:** (L) So, apparently long term and permanent exposure can make a big difference. I want to ask about the Dan Winter web site. He uses a lot of keywords that are very familiar to us. His whole site is devoted to pyramids, golden ratio, geomagnetic grid, geometry, bees, bloodlines, etc. The question is: everything that happens, I consider that it happens for a purpose. What is the purpose of being directed to this site? Is this all his own nonsense, or is he channeling this?

**A:** Extract.

**Q:** (L) He extracts his stuff?

**A:** Yes.

**Q:** (L) And we should extract from there the pertinent information?

**A:** Yes.

**Q:** (L) Well, he seems to be real hung up with this Drunvalo Melchizedek guy...

**A:** No. No good.

**Q:** (L) Drunvalo is no good?

**A:** Yes.

**Q:** (L) Well, I already figured that out. So, this Dan Winter is not really hung up with Drunvalo, is that it?

**A:** Some good, some not.

**Q:** (A) Now, you say that this brown star and the comet cluster are coming into our solar system at the same time, and you have said that they are different events, but that they are related. Now, what is the relation, if not just the point in time, the deeper relation between these two phenomena?

**A:** Picture biorhythm graph.

**Q:** (A) What is the period of pole shift?

**A:** 100,000 years, roughly.

**Q:** (A) Now, about the relation between the phenomenon of physical disasters that are going to happen and psychic changes related to the realm border. What is cause and what is effect?

**A:** One precedes the other.

**Q:** (L) Okay, so disasters happen and then the reality changes in psychic terms?

**A:** Yes.

**Q:** (T) Is the approach of the realm border, is the change in the magnetic field... does the reversal of the poles and the broadening of the magnetic field, is that going to be before the realm border crossing?

**A:** Intersection.

**Q:** (L) So, in practical terms, it may be that, what we observe will be a series of cataclysms, disasters, the ‘cleansing’ of the Earth...

**A:** This has already begun.

**Q:** (L) So, it is already happening. It will accelerate and intensify. And what we will observe is all of these things happening. And, as a result of the intersecting of these various energies, this realm border, this reality change, this change in the magnetics because of the interaction with the comet cluster, the sun’s companion, the realm border, and so forth, it will then have an effect upon the people left on the planet who will then change in some way as a result of this, is that correct?

**A:** Your Bible says that there will be many wonders on the Earth and in the Heavens in the last days.

**Q:** (L) Okay, this period of time after this realm border, is this period a preliminary to the total end of the Earth and all life on it?

**A:** No.

**Q:** (L) After all of this change, those people who continue to be on the Earth will be in a new environment, and it will be almost like having to grow gills to live in water, and some people will have the ability and some will not. Is that it? It will be more gradual in terms of individual physical structures and psychic structures?

**A:** No.

**Q:** (L) It will be a sudden, total change? Like flipping a switch and everything is going to be different?

**A:** The key is awareness.

**Q:** (L) Are there going to be people...

**A:** Yes.

**Q:** (L) You didn't let me finish asking my question!

**A:** But we knew it!

**Q:** (L) In other words, there are going to be people who are simply not going to see what is happening?

**A:** Lost lambs beying in the knight.

**Q:** (T) They are not getting it. They are lost sheep. That really describes it. (L) Why did you give that funny twist on the spelling?

**A:** Why not?

**Q:** (T) Now, didn't they tell us that when the transition occurs, those who are moving to 4th density will move, and those who aren't, won't. And that it is not a physical move. That we really would not notice a difference when we shifted because it's all right here. And, those who are going to shift will shift right where they stand, and they won't really notice a change, and the perception is not the issue, it is the awareness of the shift, because we will still be physical... am I heading anywhere in the right direction?

**A:** Variability of physicality.

**Q:** (L) Does this have anything to do with changing of DNA via awareness?

**A:** Both ways.

**Q:** (T) So, we will notice that we can control much more than we could before in terms of our environment and physical structure, but we will still be doing a lot of things we have always done. (A) I have a last question that is unrelated. In the next weeks we will probably have a visit from this W\_\_ B\_\_. Is there anything we have to be careful about when he comes?

**A:** Being too effusive and an open book.

**Q:** (L) Should we just simply keep putting him off?

**A:** No.

**Q:** (L) So, we should give him a definite day... we can put him off forever...

**A:** You cannot put him off forever!

**Q:** (T) He has read the pages? (L) Yes, and he's all gung ho. (T) Does he understand what he is reading? (L) Oh yeah. (F) Maybe only TOO well... if he is a CIA agent... (A) If he is an agent, he is an agent for whom?

**A:** We did not say that he is an agent.

**Q:** (L) Uri Geller sent an e-mail to the mail list recommending that people visit Brother Blue's web site for info on the Aviary. Then he says that he has personally known and been involved with these 'birds.' Anyway, there is this whole deal going on with Vallee being caught in a lie on the mail list. Are they trying to assassinate him or is he really a bad guy?

**A:** Vallee is not sticking to the "program."

**Q:** (L) What is the program that Vallee should be sticking to?

**A:** You do not get it, apparently.

**Q:** (L) Well, he produced this witness who supposedly debunked the Philadelphia Experiment, and Vallee put his reputation behind this. Then, another guy came along and ripped Vallee up and it made him look bad.

**A:** The bottom line: The Philadelphia Experiment did happen.

**Q:** (L) Then what program is Vallee not sticking to? Why did he produce this witness? Why is he doing this?

**A:** Bad influences.

**Q:** (L) What kind of bad influences?

**A:** 33.

**Q:** (Jan) 33rd degree?

**A:** That is close enough.

**Q:** (L) So, maybe the Consortium got next to him, read him the riot act, and wanted to use his reputation to plant their disinformation, and he responded by doing it in such a way that his reputation is now in tatters and CAN'T be used by them? (T) So, they tried to compromise him and he did something so that it would be obvious that he was being compromised?

**A:** More complex.

**Q:** (A) I want to know about this Uri Geller. Why is he now writing this stuff about this Consortium?

**A:** The term "Consortium," in this case, originated with us.

**Q:** (L) Okay, he is talking about this Aviary. Has, or is, Geller associated with this Aviary?

**A:** No.

**Q:** (L) Is he trying to get publicity?

**A:** Close.

**Q:** (L) Now, just this last week, on Thursday, we had two earthquakes, one in the Aleutians and one in the Azores. Is this related to this coming subduction quake?

**A:** No.

**Q:** (T) Is there some major Earth change going to happen some time around the end of this month or the beginning of next month?

**A:** ?

**Q:** (L) Okay, I had a question I wanted to get in: you said that Neanderthal man was taken off the earth, and Cro-Magnon man suddenly appeared. Is this Cro-Magnon man really Kantekkian man?

**A:** Close.

**Q:** (L) Well, they supposedly existed side by side on the Earth for some time. Did they intermix or intermarry?

**A:** Marriage?!

**Q:** (L) Well, you know what I mean! Genetic intermixing.

**A:** Can you picture a Neanderthal marriage?

**Q:** (L) Yeah! The old club and drag 'em off by the hair ceremony!  
(T) It was a ritual... handed down father to son along with the club... (L) Okay, getting back to your little remark about 'beying in the knight.' You mentioned once about Kelly Green and I connected Kelly to Kali, and then there is the Green Knight. What is the connection between the Green Knight and Kelly Green? Why Green?

**A:** Better look into it further.

**Q:** (L) Well, why green? Why the relationship to jade? And why was the philosopher's stone called the 'jade stone?' And why was jade held to be sacred by the Chinese? And what is the relationship between the Chinese and the Philosopher's stone and the secrets that have been transmitted from the East, and Orion, and...

**A:** Okay, that is all folks! Good Night...

**Q:** (L) But I was just getting started! Good Night!

END OF SESSION

## 6.22 July 18, 1998

Frank, Terry, Jan, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Donillo.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) Now, frivolous question number one: Do you guys like Pink Floyd?

**A:** “Like” is a bit off base.

**Q:** (L) What would be more ‘on base?’

**A:** Absorb.

**Q:** (L) Do you absorb Pink Floyd?

**A:** We are Pink Floyd, and all other facets of your higher consciousness.

**Q:** (L) Well, cool! I would like to know if you could comment on what we were discussing earlier, the purported idea of man’s destruction of the planet. This is, of course, a disturbing aspect of mankind, but I wonder if mankind is as guilty as he is made to feel?

**A:** Mankind, so called, is one element of creation.

**Q:** (L) When you say ‘one element of creation’ in relation to the question about man’s destruction of the planet, are you saying

that this so-called destruction can, in a sense, be considered to be creative?

**A:** The “destruction” is merely one segment of all that exists in a long wave cycle.

**Q:** (T) Basically, man is doing what he is supposed to be doing, whether we know it or not. One thought is, regarding crop circles, is it that even hoaxed crop circles are what they are supposed to be. I mean, do little balls of light do it, or does the Universe get Doug and Dave to go out there and do it? It’s still a crop circle, it’s still there for some reason. (L) Now, one question that we were discussing earlier is: how can the close approach of the companion star cause an increase in the Sun’s gravity when there is no reason why it should change anything since gravity is a function of mass?

**A:** But do you really know all there is to know about gravity?

**Q:** (A) No, we don’t know. But, does this mean that this will be an effect that does not follow from the theory of gravity that we know already?

**A:** Gravity is the life force that binds all realities as one.

**Q:** (L) What are the mechanics of the increase in the Sun’s gravity? What is going to cause this?

**A:** In order to understand this, you would need a reworking of the theorem.

**Q:** (L) Can you help us in this reworking of the theorem?

**A:** Waves.

**Q:** (A) What I want to ask is: we have Einstein’s theory of gravity, and the question is whether the effect of increasing the Sun’s

gravity is something that goes beyond Einstein's equations or not?

**A:** You must see the wave.

**Q:** (A) What wave, a gravitational wave, or an electromagnetic wave, or some other wave? What wave?

**A:** Arkadiusz, how do these intersect?

**Q:** (A) Gravity and electromagnetic?

**A:** Yes. And others.

**Q:** (A) How they are described within a theory, or how they intersect in space when they come together?

**A:** Both.

**Q:** (A) Okay, why does this increase in the Sun's gravity have anything to do with electromagnetism? We were told that the Brown star will not radiate any radiation, so, in particular, no electromagnetic radiation. So, where does electromagnetics come in? I do not understand...

**A:** Gravitational pull incites electromagnetic impulse.

**Q:** (A) Okay, that means we go beyond gravitational theory, and this is part of Unified Field Theory?

**A:** Yes, exactly!! The complete UFT was withheld from you!

**Q:** (L) I think they mean humanity in general...

**A:** Yes.

**Q:** (T) So, the complete UFT is known to someone here on the planet?

**A:** Yes.

**Q:** (T) And they are not making it available...

**A:** Oh no, because “The Truth Will Set You Free!”

**Q:** (J) From gravity!

**A:** You may access hyperspatial truths with UFT.

**Q:** (A) Is it a good time for me to know more on that, to work on that? Can you give me a pointer so that I can discover it for myself?

**A:** Back up to where you were in “69.”

**Q:** (T) You must have been looking into something in 1969... you were a young’n then and didn’t know you had stumbled onto something. (A) I was reading books by Lichnerowicz on UFT...

**A:** Yes. Check the notes.

**Q:** (L) Well, we have a REAL problem with these notes and papers and things because of the fact that the bags that they were packed in have disappeared!

**A:** Gee, we wonder why?!?

**Q:** (L) If we make a stink about these bags, will we get them back?

**A:** No. Wait to see if they arrive.

**Q:** (L) We have been waiting a year! Well, there was a lot of stuff for them to go through... we’ll have to wait awhile!

**A:** Even without notes, the lonely young man walks down the concrete walk with the clumsily arranged light poles, contemplating the truth, the REAL truth. You were in an alpha state, a crossroads, wondering “where do I go from here?” “And why are all these things being pushed onto me?” Go back to then, Arkady. You know you are really a “Russian” at heart!

**Q:** (A) Well, we started with the increased mass of the Sun, and we came to UFT which is hidden from us because it would make us free; there is this tendency in me to follow this road because it is science and would open a new road. The question is whether such activity or knowing such things will lead to other densities? Is it just for satisfaction, or is there real value in knowing more in this direction?

**A:** Well, the Unified Field Theory unlocks the door completely to the higher densities.

**Q:** (T) But there are parts of this that have yet to be discovered by the general research books because it is being kept secret?

**A:** No.

**Q:** (T) Has science acknowledged that gravity is a wave, as something that can be measured, quantitative?

**A:** Controversy.

**Q:** (L) What gravity is and what it is not is a controversy. (T) But if gravity is part of the UFT, and somebody knows what it is... (L) They are building HAARP. (T) I think there is more to it than this HAARP. UFT is a major step...

**A:** Grids.

**Q:** (L) What kind of grids... (T) They keep jumping off... wait a minute...

**A:** We are not "jumping off."

**Q:** (L) What kind of grids?

**A:** The planet has been enshrouded with EM grid.

**Q:** (T) Are these the ley lines?

**A:** No.

**Q:** (L) Are they artificially generated?

**A:** Contoured.

**Q:** (L) They are artificially contoured. What is the result of this shrouding?

**A:** Manipulated for use by 3rd/4th Consortium.

**Q:** (A) What kind of EM grid? (L) The natural EM grid is being contoured...

**A:** Like a gently waving geometric “blanket.”

**Q:** (T) Is it on the surface of the planet, through the planet, or where?

**A:** Above.

**Q:** (J) Do microwave towers factor into this?

**A:** Indirectly discovered by same principal. [person?]

**Q:** (A) Who is this principal? A name? (T) The gravity waves, whether they exist or not, are a controversy, yet they are part of the UFT, and someone already knows how it works. Therefore, it is only controversy to those who don't know what the answer is, and it is not a controversy to those who know. They know what it is and how to measure it and how to use it.

**A:** Of course.

**Q:** (T) So, it is only a controversy that is allowed to be. (L) Or created. (A) Some power is used to sustain this grid. What is it?

**A:** Land and space based generators.

**Q:** (T) What can it be used for?

**A:** Multiple uses.

**Q:** (L) Well, what are the top three, for example?

**A:** No “top three.”

**Q:** (T) Just an example, give us an idea? How does this affect us?

**A:** Broaden concept.

**Q:** (T) Can this grid be used by other objects as a power source?

**(J)** Can it be tapped into?

**A:** Net.

**Q:** (L) It is a net that traps things?

**A:** Broaden.

**Q:** (L) It is a net that...

**A:** Calculates...

**Q:** (J) Internet? **(T)** Is it like a big fence to keep us in?

**A:** You are dancing on the 3rd density ballroom floor. “Alice likes to go through the looking glass” at the Crystal Palace. Atlantean reincarnation surge brings on the urge to have a repeat performance.

**Q:** (T) The Atlanteans who have reincarnated are getting ready to do the same thing they did before with the crystals. So, this is an Atlantean type thing that is being done now? Different equipment, but the same type of thing?

**A:** All lessons must be learned before you can move onto bigger and better things.

**Q:** (L) Is that a general statement about the Atlanteans repeating the lessons, or that once we learn this lesson, we can move onto bigger and better things in counteracting this grid?

**A:** All that is present and future too.

**Q:** (T) Well, maybe it is a defensive shield that has been put up to protect us since we have monkeyed with the ozone so much...

**A:** No. Better to contemplate and meditate. No linear thinking please, you know better.

**Q:** (J) I think they just slapped your hand. (A) I want to ask if there is something that we can and should do about this grid for ourselves?

**A:** Why? To know was all you need.

**Q:** (A) Well, it was said that this was for the purpose of control and manipulation. So, knowing is all that we need. Or, we could try to shield... (L) But, to know IS the shield. I don't know how that works, but it seems to be so.

**A:** Yes.

**Q:** (A) Now, how did we come to this grid from UFT?

**A:** Grid construction represents application of...

**Q:** (L) Somehow we went from the increased gravity of the Sun, to UFT, to the grid...

**A:** UFT explains the "increased" gravity of Sol. But, is there not something in UFT about increase/decrease???

**Q:** (A) There is no reason for it to increase or decrease... but this is Einstein's theory which we were told is incorrect... (L) Well, maybe it is speed? When two things are rotating in tandem, when they come together, wouldn't it increase their speed, and doesn't speed increase gravity? (A) No, we were told that there is some interaction between gravity and EM wave, and this is what UFT is about... If we use other dimensions which we are supposed to use in this UFT, going with Kaluza-Klein, then the

very concept of mass is something which is not so clear, and mass can be variable...

**A:** Yes, variability of physicality.

**Q:** (T) Fourth density. (A) We were told earlier that this UFT opens the door to other densities...

**A:** Yes.

**Q:** (A) And, some time ago Santilli was here and he had his own idea about UFT; gravity and anti-gravity, and he was told that he had a good idea of UFT, but that he only has one seventh of the equation. I don't understand why UFT has to go to other densities? Does it follow, or is it necessary once we have UFT, that the other densities will become clear in that they are necessary? How is it?

**A:** Fragmented inquiry.

**Q:** (A) Can we have a UFT which unifies EM and gravity and does not include the concept of other densities. In other words, can we put in a textbook all about the gravity and electromagnetics, and a student could learn all of this and still know nothing about other densities?

**A:** No. Other densities become apparent when...

**Q:** (A) So, it means that Einstein and Von Neumann knew about these other densities?

**A:** Yes, oh yes!!!

**Q:** (T) Just a thought: having UFT and being able to manipulate different fields within it, creates different effects. So, as we understand it in the apparent present state of science, we have to spin something in space in order to create gravity. But, with the UFT, one small offshoot is that one could create real gravity with-

out spinning anything. So, the problem of weightlessness is really already solved...

**A:** Elementary my dear Terry, elementary.

**Q:** (T) So, this whole thing with the space station and all the trouble they are having readapting to gravity when they come back, is all a game...

**A:** When you “let the cat out of the bag,” you create an entire feline “nation.”

**Q:** (T) So, we are capable of “Star Trek” right now?

**A:** In a sense, but there is so much more than that.

**Q:** (T) Of course. Most people would say that ‘cutting edge’ science is 25 years ahead of what we see, and I say it is more like a hundred years, and I am even off? Cutting edge science on this planet is more like 3 or 4 hundred years ahead?

**A:** More like 30 to 40,000 years “ahead!”

**Q:** (L) Is that because of 4th density influence and information?

**A:** Yes.

**Q:** (T) 30 to 40 thousand years? Let me get that number right...

**A:** Yes, at least.

**Q:** (L) Okay, we want to ask about this Donestra named in the Imbrogno book?

**A:** Symbolic moniker. So is Solarion.

**Q:** (L) What is the source of this contact with this guy Dean Fagerstrom?

**A:** Source is partially 5th density, partially 4th density.

**Q:** (L) Is he really channeling Franz Liszt?

**A:** No. Mental imprint from hyperspace.

**Q:** (L) What was this device that came into his room that floated in front of his face and made the sound?

**A:** 4th density imprinting device.

**Q:** (L) What was it imprinting?

**A:** Knowledge.

**Q:** (L) Well, I would like to play Franz Liszt! Why haven't we had something like this?

**A:** You do not get to choose the nature of interaction with 4th density STS! Unless of course hamsters, chirpy little birds in cages and sweet, sad, dependent doggie "friends" get to choose the nature of their interactions with you!

**Q:** (L) So, you are comparing Mr. Dean Fagerstrom to a hamster, a bird, or a doggie?

**A:** Why not? It is the same thing.

**Q:** (L) And, he seems to be very obedient! (T) So, they are just jerking him and other people around through him.

**A:** Yes.

**Q:** (L) Give the doggies a biscuit! (T) So, where is my holodeck?

**A:** Ask for a holodeck and you might get an electrostatic brain splicer job instead.

**Q:** (L) Maybe that is what a holodeck is? Is that a clue?

**A:** No.

**Q:** (L) Well, I tried. Okay, another thing that Imbrogno noted was that they graphed the UFO sightings in this area, and what they found was that they occurred in these places over and over again. So, the guy goes out and investigates the sites and found, more often than not, these standing stones or stone chambers that have been connected to the ancient Celts. Now, this relates to my work with tracking the bloodlines in a way. The remark was made that dancing could charge the stones. But, some of these chambers are sometimes so small. My idea is that they are doorways.

**A:** Okay.

**Q:** (L) Well, there was a considerable series of sightings of these black boomerang type craft. Are these stones markers of doorways between densities?

**A:** Windows.

**Q:** (L) Do these windows open and close arbitrarily?

**A:** Electrical storm.

**Q:** (L) Can they be opened and closed by deliberate, engineered factors?

**A:** Yes.

**Q:** (L) What is the connection between the Celts and these flying black boomerangs?

**A:** None.

**Q:** (L) Then why is it that the Celts seem to have been the ones who erected these stones, and the stones and chambers seem to be connected with the black boomerangs?

**A:** If you build a house, then someone comes along and installs a 220 volt plug in it, what connection do you have with the clothes dryer?

**Q:** (T) Two different things. You build a house, somebody comes along and installs an improvement and uses it in another way.

**A:** Crystals make density and dimensional windows open from “time to time” thus making the oblivious quite obvious.

**Q:** (L) Are the craft always there and the crystalline structure of the stone causes the windows to open and make them visible?

**A:** If certain factors mitigate...

**Q:** (L) Okay, I want to ask about Dan Winter. His writing is so illiterate that it is incomprehensible how he can manage. (A) He gives lectures on ‘sacred geometry.’ (L) Is it going to be useful to meet with this guy?

**A:** All lessons are useful.

**Q:** (L) I don’t like the sound of that!

**A:** Okay, now good night.

END OF SESSION

## **6.23 July 25, 1998**

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Waybon.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) I read the new book by Dr. David Jacobs, professor of History at Temple University, concerning his extensive research into the alien abduction phenomenon. [Dr. Jacobs wrote his Ph.D. thesis on the history of the UFOs.] Dr. Jacobs says that now, after all of these years of somewhat rigorous research, that he KNOWS what the aliens are here for and he is afraid. David Jacobs says that producing offspring is the primary objective behind the abduction phenomenon. Is this, in fact, the case?

**A:** Part, but not “the whole thing.”

**Q:** (L) Is there another dominant reason?

**A:** Replacement.

**Q:** (L) Replacement of what?

**A:** You.

**Q:** (L) How do you mean? Creating a race to replace human beings, or abducting specific humans to replace them with a clone or whatever?

**A:** Mainly the former. You see, if one desires to create a new race, what better way than to mass hybridize, then mass reincarnate. Especially when the host species is so forever ignorant, controlled, and anthropocentric. What a lovely environment for total destruction and conquest and replacement... see?

**Q:** (L) Well, that answered my other question about the objective. Well, here in the book, Dr. Jacobs says that there are ongoing abductions through particular families. I quote: “Beyond protecting the fetus, there are other reasons for secrecy. If abductions are, as all the evidence clearly indicates, an intergenerational phenomenon in which the children of abductees are themselves abductees, then one of the aliens’ goals is the generation of more abductees. Are all children of abductees incorporated into the

phenomenon? The evidence suggests that the answer is yes. If an abductee has children with a non-abductee, the chances are that all their descendants will be abductees. This means that through normal population increase, divorce, remarriage and so on, the abductee population will increase quickly throughout the generations. When those children grow and marry and have children of their own, all of their children, whether they marry an abductee or non-abductee, will be abductees. To protect the intergenerational nature of the breeding program, it must be kept secret from the abductees so that they will continue to have children. If the abductees KNEW that the program was intergenerational, they might elect not to have children. This would bring a critical part of the program to a halt, which the aliens cannot allow. The final reason for secrecy is to expand the breeding program, to integrate laterally in society, the aliens must make sure that abductees mate with non-abductees and produce abductee children.” Now, this seems to suggest that there is a particular bloodline that is susceptible to...

**A:** We have told you before: the Nazi experience was a “trial run,” and by now you see the similarities, do you not?

**Q:** (L) Yes, I do see...

**A:** Now, we have also told you that the experience of the “Native Americans” vis a vis the Europeans may be a precursor in microcosm. Also, what Earthian 3rd density does to Terran 2nd density should offer “food for thought.” In other words, thou art not so special, despiteth thy perspective, eh? And we have also warned that after conversion of Earth humans to 4th density, the Orion 4th density and their allies hope to control you “there.” Now put this all together and what have you? At least you should by now know that it is the soul that matters, not the body. Others have genetically, spiritually and psychically manipulated/engineered you to be bodycentric. Interesting, as despite all efforts by 4th

through 6th density STO, this “veil remains unbroken.”

**Q:** (L) Now, the big question is: what are we supposed to DO with this information?

**A:** As with all else, it is not what you should do with it, it is just that you have it.

**Q:** (L) Is there any possibility of defeating the plans of the 4th density STS in this project?

**A:** Is there any possibility of defeating the Spanish Conquistadores and the English, French, Dutch and German “colonists?”

**Q:** (F) Did they say what I think they said? (L) Yes. That is inexpressibly depressing.

**A:** And you expected a Rose Garden?

**Q:** (L) If that’s the way it is, why don’t we all join the Heaven’s Gate cult and commit mass suicide and just not deal with all this stuff?!

**A:** You chose to “deal with it,” now did you not?

**Q:** (L) Well, was I in my right mind when I made that choice, or had I been drinking?

**A:** No drinking on 5th density!

**Q:** (L) Now, I have been having an exchange with Carla McCarty who was the Ra channel. She says that we are not supposed to DO anything, we are just supposed to BE, and what we are supposed to BE is to just let love flow through us, love the aliens and everybody and just sort of relax in the tulips and, if they take us over, then we should LOVE that, too. Somehow, I don’t find this...

**A:** All there is is lessons!!

**Q:** (L) Is the lesson to learn how to give up the ghost with panache? What's the point?

**A:** Your experiences never end, only transform. No bodycentrics need apply.

**Q:** (L) Well, you once said something about the transition to 4th density creating a 'level playing field.' Then, the people will wake up and there will be a battle between the humans and aliens...

**A:** Yes.

**Q:** (L) And if it is a more level playing field, then the situation would not quite be the same as the Conquistadores against the Aztecs and the Native Americans against the Europeans and...

**A:** Wrong, all in that drama were at 3rd density. The rabbits, rats, dogs, etc. are not on a level playing field with you!

**Q:** (L) Do the aliens know about the upcoming comets and all that sort of thing?

**A:** Yes.

**Q:** (L) And they have the idea that what they are doing, this race they are creating, is going to survive this cataclysmic activity?

**A:** Of course.

**Q:** (L) Is that 'of course' as in they ARE going to survive, or that they BELIEVE they are going to survive?

**A:** Both.

**Q:** (L) Okay, you once told us that this was like a 'cosmic battle.' That the cycle was going to create balance and so on. I am trying to understand this. If that is the case, it seems that there is more to it than the Conquistadores against the Aztecs and the Europeans against the Native Americans; that at some point the

story changes - the oppressed fight back - I am trying to get the allegory into a more understandable framework. Do you see what I mean?

**A:** No.

**Q:** (L) Well, that is because I am confused. What I am trying to ask without asking it directly is: what chance do we have of doing anything?

**A:** You are still not seeing the “bigger picture.”

**Q:** (L) What is the bigger picture?

**A:** Your souls, your consciousness.

**Q:** (L) So, in other words, we chose to come in at this particular point in time to experience this mass take over of our planet and the conquest and destruction of the human race, just so we could have this experience, check- out and reincarnate?

**A:** No.

**Q:** (L) Well, that is what it sounds like! You say that the only thing that really matters is our souls, our consciousness, so if we tend to our souls and our bodies check out, then obviously the answer is to a) reincarnate, or b) move to the next density and reincarnate. What other option is there?

**A:** How long did you expect to “live?”

**Q:** (L) Well, under the normal circumstance, 70 or 80 years, optimistically.

**A:** And is that long?

**Q:** (L) No, it is not. By cosmic standards it is a whiff of vapor. What are you getting at here?

**A:** Think about it. ? Have you had any contemporaries who transited to 5th density?

**Q:** (L) Yes.

**A:** How come? How can this be possible?

**Q:** (L) Because they died. The body died.

**A:** Why?

**Q:** (L) Because that is what bodies do.

**A:** But is it “fair?”

**Q:** (L) Is it fair?! I guess if that is what they choose.

**A:** And...

**Q:** (L) I don't know where you are going with this!

**A:** You seem to be under the impression that only “good” experiences are acceptable.

**Q:** (L) No, I am not under the impression that only good experiences are acceptable, but I AM in a little bit of a quandary here because, here we are talking to you guys who are supposed to be ‘us’ in the future. Here we are in this period of time on this planet, where things are in a very strange state. There is some kind of huge transition going on, and I am just wondering what is the whole point. Why are we talking to you? What's the point?

**A:** It is the lesson. Do you not understand still? The lesson, the lessons, that is all there is. They are all immeasurably valuable.

**Q:** (L) Okay, we are having these lessons. You have told us what is going on. We see it going on around us. I am convinced that what you have said is so from a LOT of other circumstantial evidence as well as the research of others who have come to the same con-

clusion and, DAMN IT, IT'S UGLY! DO YOU UNDERSTAND ME?! IT'S UGLY!

A: That is your perspective.

Q: (L) Well, as Chloe said on the phone the other day, what are we supposed to awaken to? Are we supposed to just awaken to the fact that we can SEE all this stuff going on?

A: Yes.

Q: (L) And just waking up and seeing it is the whole thing? Okay, once we wake up and SEE it, why can't we just check out at that point? If you know what the script is, you don't have to watch the movie!

A: But then you miss out on the experience.

Q: (L) So, we are all here to experience being munched and crunched...

A: No.

Q: (L) Imprisoned, controlled, being treated like rats in a cage in a laboratory...

A: Ecstasy, remember?

Q: (L) Ecstasy?! WELL SWELL! We can just ALL be BURNED AT THE STAKE! I understand that is QUITE an ECSTATIC experience! I'm sure William Wallace felt perfectly ecstatic when they castrated him and removed his bowels and burned them in a brazier in front of his face!

A: Not so long ago, your face smashed upon the pavement...

Q: (L) Was that an ecstatic experience?

A: Yes.

**Q:** (L) So, when you say ‘ecstatic’ you could just be talking about jumping out a window and croaking?! You gotta understand here! The perspective here on 3rd density! You don’t have faces to smash on pavements!

**A:** Neither will/do you/us.

**Q:** (A) You say knowledge protects. It protects against WHAT?

**A:** Many things. One example: post transformational trauma and confusion.

**Q:** (L) So, knowledge is going to protect us against post transformational trauma and confusion. You are saying that this transition to 4th density is going to be traumatic and confusing. Do you mean transformation from 3rd to 4th density, or 3rd to 5th density, i.e. death?

**A:** Both.

**Q:** (L) So, if one does not have the shock and trauma and the confusion and so forth, one is then able to function better?

**A:** Yes.

**Q:** (L) Well, if a person transitions directly from 3rd to 4th density without cycling through 5th density via dying, that implies that persons can transition directly from 3rd to 4th density without dying. Is that correct?

**A:** Yes.

**Q:** (L) How does that feel? How is that experience...

**A:** Alice through the looking glass.

**Q:** (A) Okay, they say that knowledge is supposed to protect from trauma and confusion. On the other hand, all is lessons,

so trauma is a lesson. Why are we supposed to work to avoid a lesson?

**A:** You are correct, it is a lesson, but if you have foreknowledge, you are learning that lesson early, and in a different way.

**Q:** (L) So, if you learn the lesson in a different way, does that mitigate the need or the way or the process of the way of learning at the time of transition?

**A:** Yes. Smoother.

**Q:** (L) I do have to say that thinking about it all, not being able to do anything about it, not being able to talk to people about it because they don't believe, is certainly more painful than being hit by the shock of it...

**A:** No.

**Q:** (L) Well, you are suggesting that I CAN tell others such things?

**A:** You can convey, but suggest it be done in a subtle fashion.

**Q:** (L) Well, how subtle can it be? I mean, 'hello folks, you know the words munch, crunch, yum yum???'

**A:** It is not all that way, and you know it! Most are not eaten, just manipulated. Knowledge protects in the most amazing ways. Mathematics are "taught" in your realm in such a way that only a select few will learn. And mathematics is the language of all creation. For example, advanced math studies, such as algebra, provide the keys to unlocking the doors between the matter and antimatter universes. Suggest those present who still need to, learn algebra.

**Q:** (L) Okay, you suggest that those present learn algebra...

**A:** Who need to.

**Q:** (L) Are you saying that we can unlock doors between matter and anti-matter universes? Is that what you are getting at here?

**A:** Maybe...

**Q:** (L) I certainly don't want to hang out on this planet after it is taken over by aliens and everybody is getting munched!

**A:** Munched? Please!!

**Q:** (A) I want to refer to the previous session when we were talking about UFT and you said that I should go back to 1969. I tried to remember what, in particular, in 1969, what was the crossroads? I couldn't remember anything. Can I have some clue: what was it? Which month?

**A:** August.

**Q:** (A) Was it in Wroclaw?

**A:** Yes. Lodz.

**Q:** (A) That is the town where my brother is living. Perhaps, yes... I was there in 1969. Yes, that is true. I want to know about the remark saying 'Russian at heart?'

**A:** You studied it, you interacted with amazing people... Hamburg...

**Q:** (A) Yes, that is true, but why is it relevant?

**A:** The doors are opened to revelation by contemplating the past which is really the present.

**Q:** (A) Now, is this mention of 'Russian,' and going to Hamburg related to research I was doing in Hamburg?

**A:** Reading Russian books about pertinent theoretical or hypothetical principles? Hamburg? Research? Yes, but that is a clue

and all we can give you, lest you miss the opportunity to discover something truly important.

**Q:** (L) Okay, we'll work on it.

**A:** Pathway by the lightpoles, Arkadiusz... Good Night.

END OF SESSION

## **6.24 August 1, 1998**

Frank, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Yortah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have some interesting questions this evening, but before we get started I would like to ask a personal question. Will that be okay?

**A:** Yes.

**Q:** The problem is that [child aged 8] has developed some patches on her skin that pretty much look like psoriasis. Is this, in fact, what it is?

**A:** Is yeast related.

**Q:** Can you give me some effective therapies that I can implement?

**A:** Therapies not as important as behaviors.

**Q:** What behaviors could I implement, or she, or whatever? Behaviors in what sense?

**A:** [Child] likes close contact with protozoa laden surfaces.

**Q:** Ah, behaviors. Okay.

**A:** Animals, dirt, et cetera, you get the picture?

**Q:** Yes. So, what can I do to get this to clear up in addition to keeping a closer eye on where she goes, sits, plays, and so forth?

**A:** Exactly.

**Q:** Just that? I need to do something. Just my 'yeast attack' program?

**A:** Yes and baking soda salves.

**Q:** Anything else on that?

**A:** No.

**Q:** Thank you very much. Now, in a previous session when we were talking about the initial discussion about the brown dwarf, you compared the companion star to an electron. In the discussion of the electron, you said that an electron emits gravity. Recently you said that this companion star does not radiate. But, does it emit gravity?

**A:** Radiation is at lower end of scale, and gravity is present.

**Q:** I was reading about the interactions between twin star systems, and it is conjectured that when a companion star approaches its primary, that the primary star 'robs' something from it. There are even photographs of gases flowing from the smaller star to the larger. Is this the case with this particular system?

**A:** Was.

**Q:** And it is now no longer the case?

**A:** Barely.

**Q:** I also read about these WIMPs, or Weakly Interactive Massive Particles, that they say are at the core of the sun, and that somehow they modulate the sun's internal temperature. Do these WIMPs exist?

**A:** All exists which is imagined.

**Q:** Well, that's not helpful. Also, this stuff in this book says that when the sun shrinks there are fewer, or no, sunspots, and that the shrinking of the sun increases the radiation because it burns hotter, yet the climate on the earth gets cooler...

**A:** Gravitationally related.

**Q:** The weather is related to gravity?

**A:** Earth may not deviate as much annually.

**Q:** (A) When looking for clues about Lodz, we came upon these pages of the guy from Lodz, whom I know. He speculates about faster than light particles. The main hypothesis is that neutrinos really travel faster than light. Is this the case?

**A:** This is opening a doorway to hyperspace.

**Q:** (A) You mean investigating this question?

**A:** Close.

**Q:** (A) Or using neutrinos?

**A:** Combine with those on the pathway of wormholes.

**Q:** (L) Well, on that subject, when you said 'pathway by the light-poles,' did you mean the poles of the Sun?

**A:** Investigate.

**Q:** (L) Well, when you said ‘Russian at heart,’ were you referring to faster than light particles at the heart of the Sun, i.e. neutrinos?

**A:** If so, look for a Russian scientist.

**Q:** (A) Is the Russian scientist Sakharov?

**A:** Sakharov!

**Q:** (A) Is this related to the research that I was doing...

**A:** Yes. And Sakharov was censored for reasons other than publicized.

**Q:** (L) There have been a couple of movies that we have seen lately, ‘The Sphere,’ and ‘Event Horizon,’ about spaceships that go into black holes and then re-emerge with some very strange things going on. The whole idea of a space ship going into a black hole just sort of boggles my mind. I would like to know what would be experienced by a person or space ship that goes into a black hole? What would it be like?

**A:** Disintegration, followed by conversion to anti-material energy.

**Q:** (L) So it would not come out on the other side in another universe? (A) It will.

**A:** Yes, but not as matter.

**Q:** (L) After something has gone into a black hole, can it then re-emerge into the material universe intact?

**A:** No.

**Q:** (L) So, once it’s gone in the black hole, it’s sayonara, hasta la vista?

**A:** Stars are also portals of this nature.

**Q:** (L) So, what we perceive as stars in the anti-matter universe would be black holes?

**A:** No, windows.

**Q:** (L) But, if you lived in this other universe on the other side of black holes to us, what would the black holes look like from there?

**A:** Too complicated to explain.

**Q:** (L) Well, give me a reference...

**A:** That is just the point! You have no reference.

**Q:** (A) You mentioned hyperspace. What is hyperspace?

**A:** 4th through 7th density, except 4th only perceives it, as “living in the doorway.”

**Q:** (L) Okay, back to these two movies: ‘The Sphere’ was about this huge UFO found on the bottom of the Pacific. I was just wondering if this book and movie have led to these stories about this huge UFO that is supposed to have gone under the water in the pacific?

**A:** Maybe.

**Q:** (L) Is there or is there not any truth to this story?

**A:** The rumor may be true, but the nature of it may differ.

**Q:** (L) I was also reading in some of the transcripts as I have been going through them getting them ready to print, that you once said that ‘supremely powerful’ STS forces were responsible for kidnapping and programming me. My question is: if they had me, why did they bring me back?

**A:** Would you expect otherwise?

**Q:** (L) Well, you said that they tried to do some programming and that it didn't work and that STO forces intervened. So, I am just a little confused. If I was such a threat to them, why did they bring me back. Under the circumstances, I could have just disappeared forever and that would be that!

**A:** No.

**Q:** (L) What prevented that?

**A:** Occlusion.

**Q:** (L) Occlusion of what?

**A:** Best to research through meditation and hypnosis.

**Q:** (L) Okay, back to the previous remark. You say that stars are portals. What, specifically, are they portals for, of, from or to?

**A:** How about other dimension. Remember, density and dimensional concepts intersect. Density level relates more to conscious awareness, but dimensions house consciousness and all other.

**Q:** (L) So, you can have many 'houses' along a row at one level and many at another level, in a vague sort of way?

**A:** Close.

**Q:** (A) Is the concept of density related to what Sakharov was doing?

**A:** Close. Think of hyperspace as 4th dimension.

**Q:** (L) I would like to ask, off on another subject, since there were so many instances when you promoted the presence of Terry and Jan, I am just wondering what are the implications of this choice they have made to move to Tallahassee?

**A:** Financial.

**Q:** (L) Are you saying they are going to make a lot of money or lose their shirts?

**A:** Open.

**Q:** (A) I have the impression that when they were present, certain questions that I asked were not answered. Is this correct?

**A:** Maybe.

**Q:** (L) Why is that?

**A:** Energies affected by notions.

**Q:** (L) Our energies affected by our notions or by their notions?

**A:** Coincides.

**Q:** (L) I would like to have a little check on [daughter]. Is she okay?

**A:** Yes.

**Q:** (L) Is that it?

**A:** If that is all you will ask.

**Q:** (L) Well, is she anywhere to the point that she understands anything from my point of view, realizing that my point of view may not even be the right point of view...

**A:** No.

**Q:** (L) She's not, is that it?

**A:** Correct.

**Q:** (L) Is she still angry with me?

**A:** No.

**Q:** (L) How does she feel?

**A:** Busy with others.

**Q:** (L) I had the thought the other day that AnnaJ was going to arrive here and show up in court. What are the odds of this happening?

**A:** Unlikely.

**Q:** (L) Are we going to have any problems with the divorce hearing?

**A:** Worries are pointless, better to just take one step at a time.

**Q:** (L) Yes, but you are always telling us to expect the unexpected, and to prepare for things to head them off, and if that is a possibility, I would like to be prepared for it...

**A:** Are you dissatisfied?

**Q:** (L) No, I'm not dissatisfied. I just want to be prepared for any unexpected, bizarre things, because all kinds of unexpected bizarre things happen to us. All the time!

**A:** Then you are prepared.

**Q:** (L) Speaking of prepared, what happened to the bicycle key we mailed to John?

**A:** Fell out.

**Q:** (L) I want to ask about Frank's type B-negative blood. Is Frank an alien hybrid?

**A:** Open.

**Q:** (L) Well, that's real encouraging!

**A:** Best to discover.

**Q:** (A) What is the test of being an alien hybrid. One is this blood type, what is another?

**A:** No criteria, but subjects of this nature seem “off-center” by terrestrial standards. However, the truest nature of this subject is as of yet undiscovered.

**Q:** (L) Okay, this guy from the schoolboard is coming on Monday. Am I going to have any problems with him?

**A:** Wait and see.

**Q:** (L) According to Dr. Jacobs and the stuff you told us last week, we are pretty well fried on this planet.

**A:** No.

**Q:** (L) What are our options?

**A:** Vague.

**Q:** (L) I know that. But, there does not seem to be any other way to ask this question...

**A:** Knowledge protects, remember, there are no limits with knowledge.

**Q:** (L) That’s all fine and dandy, but how are we ever going to learn enough in time? I feel like I am in a race.

**A:** No.

**Q:** (A) I want to ask about Lodz. Did we already get the clue and it’s...

**A:** You are on the right track.

**Q:** (A) Now, this business about Sakharov, is this related, or better, when I think about Sakharov, I think about his theory that

space, time metric can change signature; that space/time geometry builds a kind of singularity, changes the algebraic structure of the metric tensor; and I was trying to relate it to changing of density at some point...

**A:** Yes. Sakharov knew the answer was in the pentagon.

**Q:** (L) Do you mean ‘pentagon’ as in the government building, or as in the geometric structure?

**A:** Why do you suppose they are linked? Why is the “pentagon” a pentagon?

**Q:** (L) I don’t know. Why is it?

**A:** Answers are within your grasp.

**Q:** (L) When you say ‘grasp,’ does it relate to five fingers... (A) or to the fifth dimension?

**A:** Yes, and what you possess.

**Q:** (L) What do you mean ‘what you possess?’

**A:** The key is in this room and your office. But that is not the only meaning. Suggest you begin your quest by looking for patriots.

**Q:** (L) Do you mean the mirror?

**A:** No.

**Q:** (L) Do you mean the Commander X book?

**A:** Maybe...

**Q:** (L) The Matrix books?

**A:** Maybe...

**Q:** (L) On the internet?

**A:** Maybe...

**Q:** (L) Well... (A) What was this answer 'yes' to the changing of density and how it relates to what Sakharov was working on and how it connects to Kaluza Klein theories?

**A:** Both.

**Q:** (L) Well, I guess we are going to have to wait until I type it to make any sense out of it...

**A:** Geometry... pentagon and hexagon, algebraic equations...

**Q:** (A) Pentagon and hexagon algebraic equations... (L) What is the connection between the pentagon and hexagon?

**A:** Discover.

**Q:** (A) In physics and mathematics we write a triangle to symbolize certain operations in three-dimensional space. One draws a square to symbolize wave equations in 4 dimensional space. One draws a pentagon to symbolize equations in 5th dimensional space, and a hexagon to symbolize equations in 6 dimensional space.

**A:** Goodnight.

END OF SESSION

## **6.25 August 8, 1998**

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Fimohoh.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) To get us started, I would like to ask about my dream the other night. Do I need to recount the dream or can you just talk about it without me telling it?

**A:** Can be input related, or vice versa.

**Q:** (L) Okay, I dreamed that I was in this castle type place with many rooms and many people. In one of these rooms, a sort of main room, there was a 'Head of the Family.' I understood that all the people present were 'members of the family' with greater or lesser connection to the head. This person was in a large chair and all these people were there and all this activity was taking place, and it was going on around him, but he was not paying too much attention to anything. I couldn't tell if he was bored, or sick. There seemed to be some sort of plots and sub-plots being whispered all around, and I became aware of a plot to kill this 'Head of the Family.' I was horrified and I made a decision that, no matter what, I had to go to him and tell him this and offer my help. When I did, it was almost like it gave him new life. He perked up and became more interested in all his surroundings because of this information I gave him. He invited us to go to a private room to have a meal together. The funny thing about this guy was that he kept alternating between being black and white. One minute he was a pure Aryan type, and the next he looked like an Egyptian or African. One thing that was outstanding was the clarity of his skin whether black or white. So, we went to this room, a small, intimate room with a pair of windows, and two little twin children, seemed to be girls, came with us. I was aware that they were his children. They too alternated between being black and white. We sat at the table and there were simple plates and simple food. I was surprised that it was

so simple and plain and I wondered about it and asked a question about it. I was told that pomp and circumstance was only for the impression on those who do not know anything, but that it is the responsibility of the 'Members of the Blood' to be careful in what they eat and their personal habits. We ate and then I was told that I would be escorted back to our vehicle because I must return for the time being to prepare myself for some task. It was also said that because of my decision to do 'what was right' that I had demonstrated that I was the 'chosen' one who would become the 'heir' in some way. Now, our vehicle had been left at the end of a road... a road that we had traveled and had then, when the road had run out, we had been 'taken' to this castle by some miraculous means so that we had to be taken back to our vehicle. We were warned that there would be dangers in returning. There was some sense of danger in our travels back home, but we made it and then there was the sense of waiting for some sign that would come in the future. The rest was unclear and I woke up. What can you tell me about this dream?

**A:** Near death experience indicates resolve.

**Q:** Whose resolve?

**A:** Try to interpret laterally.

**Q:** What does 'laterally' mean?

**A:** Patience charts course, not pressure.

**Q:** Another funny thing is that, a few days later we bought this book about the Holy Grail and it talks about dreams of people switching between being black and white, and about birds that represent this concept such as the magpie, the balance between good and evil and so forth.

**A:** Theme presents itself in balanced cycle. Search for grey middle ground when tempted to choose either black or white.

**Q:** Anything else on this?

**A:** No.

**Q:** Okay, next item is this photo here, purported to be a spirit photo, or 'time' photo. The anonymous woman who took it says that the Pleiadians told her to take a photo of the scenery and that they would give her a gift, and this photo of Jesus and Joseph of Arimathea and Jesus' brother James and Simon Peter came out on the film. It says: Could this be a picture of one man's great decision that forever changed the course of history?

**A:** Photo is of screenplay scene from "Jesus Christ Superstar," taken from video screen.

**Q:** Well, that took care of that! (A) We went today to the MUFON meeting and there was this strange woman who came in late and interrupted. My theory is that she was a kind of spy or an agent. Is that correct?

**A:** Biggest problem at such gatherings involves emotions, not normally "espionage." However, key pieces of knowledge can be retrieved from this forum.

**Q:** (L) Well, it was almost like a repeat of the JW scenario...

**A:** Remember, as we have told you before, it is not the vehicles themselves that count, but rather the forces that work through them.

**Q:** (A) Okay. I understand that she was emotional and she wanted very much to say something. She was telling strange stories about photos of the Virgin Mary in Clearwater that she has done with a Polaroid camera. Can you comment on this and the pyramids that she was talking about, and the photos?

**A:** Only the emotional response.

**Q:** (L) Would it be worthwhile for us to go down and see if we can get some unusual photos there?

**A:** Hmm... Better contact Malcolm for the latest on the “space brothers.”

**Q:** So, I guess we shouldn’t waste our time?

**A:** Marie M could lend some assistance...

**Q:** (A) I want to know about this Bible Code, because one possibility is that all of this is created by just wishful thinking...

**A:** Any large literary work can be found to have a “code” if one searches...

**Q:** (L) Well, we don’t really know what the professor wrote because the reporter wrote the book, not the researcher. You also have a couple of problems with the Hebrew language. The accusation was made that when the exact ‘code’ didn’t fit, he would skip some extra letters or words or lines to make it fit. So there is a controversy over this.

**A:** Hindsight is 20/20.

**Q:** (L) The woman who was talking about the book said that all of the ‘findings’ were ‘after the fact.’ I don’t think he really made any ‘predictions’ in the book. (A) Can one predict things in this way?

**A:** If one chooses.

**Q:** (L) Doesn’t mean it’s gonna happen! (A) Okay. Now, I want to ask a question about the medium. We have been repeatedly told that we should get a better medium which can convey more information. We were experimenting with psychomantium without success...

**A:** Because you did not do it correctly.

**Q:** I thought I was doing everything that had been suggested.

**A:** Light must be placed properly so as to illuminate black depth sufficiently. Also, chamber must be large enough to stimulate relaxed meditative state. And no seams or ripples must be evident in reflection. Lastly, patience must reign supreme, with as little anticipation as possible.

**Q:** So, you are saying that the closet we are using is not large enough...

**A:** We never suggested a closet.

**Q:** How large should the chamber be?

**A:** 10 by 10 by 8.

**Q:** (L) Well, that's almost a whole room!

**A:** Yes. One room idly sits...

**Q:** (A) I have the idea that one should go with a given question and then come out with an answer instead of waiting and waiting...

**A:** My dear Arkadiusz, by now, you know imagination is the bridge to the Akashic.

**Q:** (L) So, you are saying that his idea is a bridge to the Akashic, and when he gets such ideas, they are important clues?

**A:** Good!

**Q:** (A) Now, we have been reading this Vajra material channeled by Sean David Morton. (L) Yes, he says that he is channeling himself in the future, that is his future incarnation as his own grandson. He supposedly uses a Tibetan 'Time Transference' technique. Instead of a past life regression, it is a post life progression. He talks about the 'quinta' of time as opposed to

the 'quanta' of time. It then describes him going into this state... It describes all kinds of conniptions going on as he supposedly experiences his death and rebirth. Could you comment on this process?

**A:** Sounds like fun!

**Q:** (L) Is what he is saying true?

**A:** "True" and false are one when all is sanctified.

**Q:** (L) That doesn't help us a bit!

**A:** Futures all exist, but are infinite.

**Q:** (L) Anyway, he describes about the planet being hit by a comet and the birth of the 'Chosen One' or the 'Queen of the Earth,' Immanuela, who is supposed to be the 'new Christ' so to speak. He says that his name is 'Vajra of the House of Morton.' This 'Queen' was born on the day that all the UFOs appear in the sky. He says that this is after the comet has struck the earth, after nuclear war, and after 7 or 8 years of clouds and darkness with the planet wandering around in its disrupted orbit. He says that these 'observers' do not interfere in history, but that they 'clean' the environment... the atmosphere... and that they appear en masse for one solar day giving 'hope' to mankind. They also stabilize the orbits of Earth and the Moon and bring everything back into harmony - all this without 'interfering' in history. This 'Chosen One' is born in England, at Stonehenge, and is the 'White Buffalo Calf Woman' - talk about mixing your metaphors! Anyway, this woman is the 'Queen,' the 'Leader,' 'The Immanuela.' 'She had great technology and was able to crack the codes around the rearrangement of matter. Her symbols were the Ankh and the staff of Ra which she used as devices which allowed her to channel energy from the Ark of the Covenant which allowed her to rearrange certain types of matter. She came to the Queenship at

a very early age. She was infused with Messianic Consciousness at the age of five and at the age of seven she was recognized and coronated.’ And so on. Now, what did you think of that?

**A:** Sounds as if this “Vajra Soul” is a charmer, though perhaps a bit “light in the loafers.”

**Q:** (L) You mean he dances well? He’s dancing around.

**A:** Yes. We are surprised he did not throw in the Atlantean Crystals on the way to Urantia. Do you get it? The guy is a goofball!

**Q:** (L) Well, that’s the most definite thing you’ve said so far. Anyway, some people on this mailing list who read his predictions of an economic collapse and asked about it. Also, recently, there was a prediction of economic collapse in one of the tabloids. (F) Well, one of these days they are gonna be right if they keep putting it in there every two weeks! (L) Good point! So, could you tell us if we are facing an imminent economic collapse?

**A:** Only if desired by the powers who decide such things.

**Q:** (L) As the probabilities now stand, what is the percentage of probability that they will decide to engineer a collapse this year?

**A:** The concept of “economic collapse” is now considered a bit passe. We suggest you be careful to analyze that which appears on your internet before printing it.

**Q:** (L) Well, the only reason I asked was because I was asked, and I think some of these people have a suspicion that this guy is a looney tune...

**A:** Suspicion?!?

**Q:** (L) Next question: we printed some information from Val’s pages that someone said that the Clinton situation would snowball and that there is a possibility of impeachment.

**A:** Impeachment means to formally accuse of commission of a crime. Much depends on public reaction, which would be highly negative.

**Q:** (L) Are you saying that the public reaction to the idea of impeaching Clinton for fooling around would be negative?

**A:** All that happens in the arena of your political undertakings is merely window dressing for purposes of preoccupying the body politic.

**Q:** (L) The sentiment of the public at the present time is that this Kenneth Starr is on a witch hunt. I don't think that people really care. HAS Clinton been doodling around as Starr is claiming, and is he as immoral as Starr is claiming? Does he therefore...

**A:** Yes, but so what?!? None of this has anything to do with the control of your realm. That is all undertaken in hidden circles.

**Q:** (L) What would be the objective of bringing Clinton down?

**A:** Decoy.

**Q:** (L) Decoy for what?

**A:** All that really matters.

**Q:** (L) So this is to attract attention away from issues that really matter?

**A:** Close.

**Q:** (L) Again, what is the probability that he will leave the office before the term is up?

**A:** Low, but again, it means nothing.

**Q:** (L) What is motivating this gal Lewinsky to cooperate in this investigation?

**A:** Your inquiries are not well-advised.

**Q:** (L) So, the powers that be behind this are playing this game for their own reasons and I ought to drop it. Okay. (A) There is a website called 'In Search Of' moderated by a fellow named Dan Woolman, ex-physicist, ex-government, ex-NASA, who, at some point after quitting all this, he suffered a stroke at the age of 39, and after this he started this website which collects all the data about UFOs, Crop Circles, and such things. What about this stroke? Is it like Marinov and others? What was behind his stroke?

**A:** Should look for evidence of verity.

**Q:** (L) Are you saying that it wasn't a stroke?

**A:** What we are saying is, unfortunately, your internet sources are largely unverifiable.

**Q:** (L) So, we don't know that he is ANY of the things he claims to be. Anything to add to that?

**A:** No.

**Q:** (A) What is the purpose of this site?

**A:** Ego "stroking."

**Q:** (A) I have started to organize questions and subjects from the previous sessions, and I have certain problems with this. I lack an organizing principle: how to do it, how to organize it, which link or clue to follow first. Can I have some help or clue about organizing the next questions? Maybe I am already doing okay, but if there is something I could do better, can I have a clue?

**A:** Answers come when you back up and worry not.

**Q:** (A) What do you mean 'back up'?

**A:** Go back.

**Q:** (A) Also, I have decided after going back and worrying not, that it has been a long time since I was working on the crop circles. This has been for many reasons, the most important being the lack of time. Now, there is more and more time... I am supposed to work on this crop circle business; I am supposed to decode them. I started to look at what is known about decoding of crop circles on the internet. On the Art Bell site there is an interview with Hoagland and some guy who claims to have decoded everything, never mind that we don't know what is the answer. Anyway, they have the idea to three dimensionalize, and this was what you had told us as well. Now, about this three dimensionalizing, then what? You have interpreted some crop circles for us. I have this idea that these crop circles can serve as a kind of alphabet and that other crop circles can be interpreted in terms of already analyzed circles, by making them into certain numbers and combining these numbers and ideas. Also the idea was that the same program we use to analyze gamma spectra in terms of the library of already known spectra can be used in this way. Is it the right idea, or are we missing something very important that will hinder progress?

**A:** You are not missing something, except perhaps enough faith in your own abilities. Just proceed, fear not stumbling.

**Q:** (A) So, no more help in this direction.

**A:** Do you not know that your mind either contains already, or can access all that exists?

**Q:** (L) Well, there is a position over at St. Leo, and since we don't know how long this position at Constellation will last, Ark has inquired into this position. Is that a good direction to follow?

**A:** All directions are.

**Q:** (L) Wonderful! Like we have time to follow all of them!

A; Have you yet failed to persevere?

Q: (L) Not yet, but we were feeling VERY guilty for all of the money we have spent in the last couple of weeks, and we were really feeling a little on the panicky side.

A: Compare today to that which you perceive as three years ago.

Q: (L) So, I guess that 3 years ago we had no money or anything and now, at least we have something and SOME money. But, at the rate we are going, we WON'T have any money! We'll be broke again! I mean, we bought a stereo system, a lawn mower, paid for the work on the house, bought beaucoup books, groceries at Sam's Club, I mean...

A: Appreciate, or you may indeed stumble.

Q: (L) In other words, be glad and grateful and happy to spend money? Is that what you are saying?

A: And worry not. Remember, we told you would have all you needed. Have we been wrong yet?!?

Q: (A) I want to ask: I was going back over the session of May '95, the session with R. Santilli. We were talking a little bit about him and I was being critical. I didn't want to meet him or talk to him. (L) I had suggested a meeting, and Ark rejected this idea because his papers are basically unreadable. Is this because he really does NOT need to meet with Santilli?

A: Santilli has much to offer, but will he?

Q: (L) What is behind that? He was here, was very excited and interested, and then turned entirely the other direction. Why was that?

A: Bad publicity.

Q: (L) About what?

**A:** You.

**Q:** (L) From whom?

**A:** Several who felt emotionally spanked.

**Q:** (L) By me?

**A:** Yes.

**Q:** (L) Well, I'm sorry. Will Ark be able to counteract that negative publicity?

**A:** Certainly is possible, especially if it is Ark who initiates contact.

**Q:** (L) See! You could save my reputation! Okay. Ark is ready to meet with Santilli and we think we should be able to offer him a few clues derived from the sessions to inspire greater confidence so could you give us said clue. (A) In this session with Santilli there was repeated at least twice the term 'matrix.' Laura made a comment that maybe it was a three dimensional matrix. So I was thinking about this matrix and I have two possibilities. If it is related to the number 3, it can be a matrix that is flat and 3 by 3. Or, it can be any matrix that is three dimensional rather than flat. Which of these, if any, is the concept mentioned in the session?

**A:** Three dimensional 12 by 12.

**Q:** (A) 12 by 12 by 12?

**A:** Yes.

**Q:** (A) Why number 12? What is so particular about number 12?

**A:** Try it and see.

**Q:** (A) Einstein. We were told that Einstein discovered UFT, or the possible consequences, and stopped, that the thing that scared

him was variability of physicality. I cannot see a trace in his papers. I can't see which particular year that he discovered that variability of physicality could follow from UFT. Which year was it?

**A:** 1936.

**Q:** (A) Thank you! Now, I know which version of UFT! (L) That was tricky! (A) Of course. I was asking before and this question was avoided.

**A:** No, it is answered after you have done enough "homework" so that the answer will not abridge your learning matrix.

**Q:** (A) I haven't done enough homework to understand how or which way...

**A:** What does nanosecond have to do with this question?

**Q:** (L) I don't have a clue! (A) Nano second is a measure of time. Time is subjective and is encoded in our DNA...

**A:** What is the measurement reflected or... represented by nano?

**Q:** (A) Nano is because it is 10 to -9. Nine zeros, one over 1 billion. It is a very short time. (L) No kidding! (A) What does it have to do with... we have been told that time should not be mixed with space in a UFT, and now we have this time again...

**A:** Do we???

**Q:** (A) Yes, because we have been told that the Galilei group which treats space different from time is better than the Lorentz group which treats space as equal to time.

**A:** But, the link, the link is the bridge, not necessarily a sum of the parts, in other words, that link does not need to belong to either to exist.

**Q:** (A) Okay, I will do my homework. Now, pentagon. There was this pentagon we talked about last time. Pentagon and then hexagon. My guess is that the pentagon is related to the wave equation in 5 dimensions. I want to ask about this...

**A:** If one seeks to unify, one needs a common source. If “time” really were the 4th dimension, what if it sprang from, or was born of a fifth. Now, how or where does one “plug” gravity into the equation?

**Q:** (A) Normally gravity is plugged into the equation as part of the geometry of space and time, except if Newton and Galilei, who consider time as different...

**A:** Ah, now enter those sneaky pentagons and hexagons.

**Q:** (A) Okay, I have to do my homework...

**A:** Now, we leave you with this food for thought. Goodbye.

END OF SESSION

## **6.26 August 15, 1998**

Frank, Ark, Laura

**Q:** (L) Hello.

**A:** Hello.

**Q:** (L) And who do we have with us this evening?

**A:** Mahijm.

**Q:** (L) And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) I want to ask about the board situation. I have been thinking about covering the board with glass or plexi-glas. Would it be advisable to cover the board with either of these, or should I make the table the whole board and cover it with glass.

**A:** Up to you.

**Q:** (L) I know that, but I am talking about in terms of energy. Which would be better energy wise?

**A:** You must discover, if you wish.

**Q:** (L) Okay, now: I would like to know if there was a real historic person behind the legend of King Arthur?

**A:** Close. Sorcerer's Coven. Secret pact of coven is covenant.

**Q:** (L) Was this the Nordic Covenant behind the legend of King Arthur?

**A:** Not really.

**Q:** (L) I think that implies that there might be a connection?

**A:** Maybe there is something more like an offshoot.

**Q:** (L) The Nordic Covenant is an offshoot of the Arthurian Covenant or vice versa?

**A:** King Arthur story based on an offshoot of Nordic Covenant Root.

**Q:** (L) Okay, now you say that the Nordic Covenant can be positive or negative. Would the Arthurian Cycle be of the Positive Offshoot?

**A:** Both.

**Q:** (L) What period of time did this Sorcerer's Coven...

**A:** During the "Dark Ages.

**Q:** (L) Can you get me closer to a year, or period of years?

**A:** We will let you do that.

**Q:** (L) The chief thing I noticed about this period of the Dark Ages is that from the time of the 'birth of Christ,' for about 1300 years, there is an incredible lack of documentation. Now, there were some manuscripts written by Monks, such as Gregory of Tours and so forth, but in general, the only things that have survived from this period are things put out by Monks under the control of the church. It is as though the whole world became illiterate. Is this, in fact, the case? Was it that nobody was writing anything down during this period?

**A:** Close.

**Q:** (L) Was any part of this because of the control of the Catholic Church over writing and education, and that they opposed everything that did not support their views?

**A:** Close.

**Q:** (L) So, what we have to work with is what we have to work with. And, I guess that's as close as we can get. It isn't a whole heck of a lot. How many people were in this Covenant?

**A:** Look for answers, trees will lead you to it.

**Q:** (L) What literary source could I go to to find the least distorted or corrupted information?

**A:** Trees.

**Q:** (L) How long has this Nordic Covenant been in existence?

**A:** Look for it.

**Q:** (L) You said that you were in regular contact with the Kantekians on Kantek before they were airlifted to Earth 80 thou-

sand years ago or thereabouts. Now, was the destruction of this planet a result of Orion Manipulations of the people such as is taking place on our planet at the present time?

**A:** Maybe somewhat, but not all.

**Q: (L)** I have tried to imagine a planet full of people of pure Aryan types, or purified Celts, and it is difficult to imagine what such a culture would be like. Is there anything that we can look at, literary or otherwise, that would give me a concept of what this culture or society could have been like?

**A:** Search Japan and the Bahamas.

**Q: (L)** What?! What do Japan and the Bahamas have in common?

**A:** See for yourself. Remember, learning is fun and energizes. Spoonfeeding sessions do little for you.

**Q: (L)** When you were in regular contact with the Kantekkians, what was the nature of this contact?

**A:** Educational.

**Q: (L)** Was it coming through a board, or coming to the head, or through transducing it like through Stonehenge, or something altogether different?

**A:** Seek those most in tune who ask, then enter data when ready.

**Q: (L)** Who was the author of the “Protocols of the Elders of Zion?”

**A:** Source is “Aryan” in nature.

**Q: (L)** Was it written to make the Jews look bad, or to cast blame on them?

**A:** Some.

**Q:** (L) Was it also written as a disguised protocol for the Aryan plan to take over the world?

**A:** No.

**Q:** (A) I heard that the source was in Russia?

**A:** No, Turkey.

**Q:** (L) I would like to ask about J\_\_'s [son] friend C\_\_. He is still suffering some paralysis... is there something more that can be done to help him?

**A:** Slow mender.

**Q:** (L) Will he get his function back in a more complete way.

**A:** More, yes.

**Q:** (L) Now, you said that I should search for the original zodiacal clues in the Hague. Now, this book I recently got that was written by a guy from The Hague, is THIS the clue I was to look for, or is there still something there in the city itself? Some artifact?

**A:** Book is the key.

**Q:** (L) We have been discussing this period of the Brown Star. Is this period 26 or 27 million years?

**A:** Close.

**Q:** (L) So, the last time it was here was at the time of the dyings of the dinosaurs?

**A:** Possible.

**Q:** (L) What is the period of the orbit of the Brown Star? (A) Is it periodic?

**A:** Variably periodic.

**Q:** (A) This variability is due to perturbations from other stars, correct?

**A:** And gravitational anomalies from other sources.

**Q:** (A) Has it already come through the Oort Cloud and is now getting farther and farther away?

**A:** No.

**Q:** (L) They said it had already passed through on its way IN.

**A:** Yes.

**Q:** (L) There is this internet site in Mexico which puts up this information about the alien bases. [Reads excerpt] It says that in the areas where there are these bases, there is often a lot of strange phenomena. I would like to know if you can identify the source of this information as he does not identify himself or where he is getting this stuff? He does not even have an e-mail option on his page.

**A:** You can test verity of all such information based upon that which you already know or have “put together.”

**Q:** (L) Can you give me an approximate number of aliens currently interacting with, or on, or under our planet as a whole?

**A:** “Aliens?” What constitutes such?

**Q:** (L) Okay. Well then, non-human beings. Extra- terrestrials, Ultra-terrestrials, and so forth.

**A:** These bases have naturalized the inhabitants. Anomalies occur as much because of where the bases are chosen to be located as any other factor. Magnetic faults and their inherent portals, you know!

**Q:** (L) This guy thinks that there is a rather limited number of

aliens, and that people ought to get together and resist this threat because our numbers are greater. Is that, in fact, correct?

**A:** Not point. The question of the hour is: what is the motive?

**Q:** (L) Okay, what is the motive?

**A:** Build a house step by step, and when it is finished, you can move into the neighborhood and out of the motel.

**Q:** (L) Oh jeez. So, these are a bunch of aliens hanging out in 'motels' waiting for their house to be built. That does not sound good.

**A:** Many of you have recently become "bedazzled" by the "information superhighway," and its accompanying computer hardware. Gee, we wonder why?

**Q:** (L) Well, you told us to network. We have been networking like crazy, digging up information, reading and comparing. Yes, there is a ton of garbage out there, but if we don't ask, how will we know?

**A:** Point was: who is manipulating thee? Not so much you specifically, but the others? So many kids and kids-at-heart are thunderstruck by techno-sensory toys. Those cellular phones, those pagers and the Christmas toy computers... They are like, so cool!

**Q:** (L) So what are you implying about these techno toys?

**A:** Ponder.

**Q:** (L) Give me a clue. A word, something to point me in the right direction.

**A:** Fuzzy jello-brained kids.

**Q:** (L) Are you saying that pagers and cell phones, and techno toys that kids get for Christmas can have effects on them that

turn their brains to jello?

**A:** In a figurative sense. All this technology represents a Brave New World. Like Huxley said: Woe is to those who have been led to eat their brains for lunch.

**Q:** (L) My kids have pagers. Are pagers, in particular...

**A:** What do you think comprises the signal content?

**Q:** (L) I don't know. What does comprise the signal content?

**A:** Microwaves.

**Q:** (L) What do these microwaves do to the individual?

**A:** Contour brain cell structure.

**Q:** (L) Do they emit a signal continuously, or only when they are being used?

**A:** Wave cycle low to high.

**Q:** (L) Well, that's not good. How close does the pager have to be to you to have this effect?

**A:** Four meters. Cell phones too and television and computer screens can be transmitted through thusly.

**Q:** (L) Is there any kind of device that we can build or purchase that can emit a blocking signal?

**A:** Knowledge protects.

**Q:** (L) When you say 'contouring brain cell structure,' what would be evidence or results of such effects?

**A:** Increasingly narrow outlooks and being unable to employ discriminatory thinking.

**Q:** (L) Confusion?

**A:** No. Just lack of depth and breadth to one's mental and psychic abilities.

**Q:** (A) First little question: what happened to my left arrow key on my notebook and can I fix it?

**A:** Spring. Coil defective.

**Q:** (A) Can I fix it?

**A:** Better to get expert, but be careful in choosing.

**Q:** (A) I want to ask whether this channel is being monitored, and if so, by whom?

**A:** Only effective monitoring so far is by direct 3rd density observation and enticing some to share data, then "spill their guts" with "shaky" correspondents.

**Q:** (L) So, it's only when I get enticed to share what ought not to be shared, or when someone is present who is a monitor, that we have been monitored?

**A:** Close. It can be monitored in other ways, but so far, these have been only seldom necessary. All STS always seek the path of least resistance first.

**Q:** (L) You once said when Terry and Jan were here that we should imagine the words appearing on a screen somewhere as they were being delivered on the board. Now you say that this is not necessarily the lengths to which they have gone. Why?

**A:** Seldom does not mean never.

**Q:** (L) If such a thing was to happen, would it be because of the presence of someone, such as when you said PZ was a monitor?

**A:** P\_\_ Z\_\_, yes definitely!

**Q:** (A) Santilli?

**A:** No.

**Q:** (A) Okay, now I have a question that goes back to Marinov. When we were asking about him, and what it was that he knew, and the answer was that it was UFT and it was given in quotation marks. All other mentions of UFT were given without quote marks. What was this for? What more can be said about that in this case?

**A:** Watch, not spell out.

[Attempts made to draw something, but unsuccessfully.] Russian letter “b.”

**Q:** (L) What next? I don’t understand...

**A:** Cyrillic “S” - P - K - G - Y - S - K - A.

**Q:** (L) If that was in Cyrillic, what would it say? Were you trying to show us a diagram of something?

**A:** No. Place is near Urals.

**Q:** (A) It is a place?

**A:** Yes. Start at Novosibirsk, draw a line to Irkutsk.

**Q:** (L) How does that relate to the question?

**A:** Site is lab at magnetic meridian.

**Q:** (L) What does that have to do with what Marinov was working on?

**A:** Everything.

**Q:** (L) But telling us where the site is doesn’t tell us anything about it!

**A:** Presumptuous!

**Q:** (A) There is something at this site?

**A:** Yes, but your clue begins your discovery. Marinov saw light waves.

**Q:** (A) What does that mean?

**A:** Oscilloscope.

**Q:** (A) Is there anything we can or should do with an oscilloscope?

**A:** It is a clue.

**Q:** (A) Okay, we see waves on an oscilloscope...

**A:** What if it measures magnetic pulse?

**Q:** (A) Okay, I will follow this clue. Now, I was following another clue, Einstein's UFT, and I looked at 1936 and he published a paper then describing Einstein-Rosen Bridge.

**A:** Yes.

**Q:** (A) This is a bridge between two different realms, so to say.

**A:** Yes.

**Q:** (A) But there is nothing in this idea, really, that relates to UFT.

**A:** That is not true.

**Q:** (A) There was nothing in this idea which relates to hyperspace in the sense of fifth dimensions, pentagons, hexagons. At least I could not see it.

**A:** Yes.

**Q:** (A) So there is another piece of information which has to be put together with this idea to lead to the UFT, yes?

**A:** Yes.

**Q:** (A) Another clue that we were following was Von Neumann. We have this info about the Philadelphia Experiment, probably from Bielek. It says that Von Neumann took over the project in March of 1942, after Tesla. Is this correct?

**A:** Yes.

**Q:** (A) It says that in 1943, Von Neumann installed a third generator...

**A:** Yes.

**Q:** (A) I have trouble with this because Von Neumann was a mathematician, and I can hardly imagine him installing generators which involves knowledge of electronics, physics, and so on. What was the truth?

**A:** Von Neumann was not unassisted. The mathematics apply to a language which translates quite naturally to EM principles. His involvement on that aspect was coerced.

**Q:** (A) What kind of mathematics?

**A:** What is the light one observes in the presence of a charged EM field? Algebra.

**Q:** (A) Algebras of operators?

**A:** Calculus.

**Q:** (A) Now, in this paper they also mention a mathematician by the name of Levinson who wrote the so-called 'Levinson Time Equation.' Was there such a mathematician participating in the project?

**A:** Yes, but only after. Not in '43.

**Q:** (A) There is also mention of Hilbert, another mathematician, and it is said that 'Hilbert, the mathematician who devised equa-

tions for Hilbert space which describe multiple space and multiple realities mathematically. These equations for multiple space became very important in the project.’ Is that correct?

**A:** Again, this was after the “Experiment.” The “Project” continues.

**Q:** (A) Who are the scientists known to me who participate in the Project that continues, if any?

**A:** Not necessarily known to you.

**Q:** (A) What are their names?

**A:** The scientists who participate in projects of this nature are now isolated away from the mainstream scientific community, in order to prevent leaks...

**Q:** (L) So, you are saying that in the beginning they called on the talents of scientists who were known, but since that time...

**A:** Groomed and trained in a closed system.

**Q:** (L) So, they have selected, groomed and trained their own scientists... So, if they are in the mainstream scientific community, writing papers and doing ordinary stuff, they can’t be part of the project. And, if they start getting too close, and they can’t be sucked in and controlled, they are done away with. Is that the idea here?

**A:** Not quite.

**Q:** (L) Is it close?

**A:** Fortunately, few have been done away with.

**Q:** (L) But, they can ridicule them, destroy them professionally, mess with their lives, etc.

**A:** Maybe.

**Q:** (A) I want to have one more clue about the relation of quantum theory to all of this. Hilbert dealt with quantum theory. Is it true that, from UFT, like Einstein dreamed it, that one can derive quantum theory?

**A:** Yes.

**Q:** (A) What is the relation of this Hilbert Space business to multiple realities. I don't understand this. Can I have a clue?

**A:** What do you not understand?

**Q:** (A) I do not understand what Hilbert's Mathematics have to do with Multiple Realities. I understand multiple realities can have all kinds of wormholes and bridges...

**A:** The wormholes are the bridges. His mathematics have to do with how one passes through parallel realms in order to traverse extreme distances within the same originator realm without altering the perceived passage of time.

**Q:** (A) That's interesting to think about.

**A:** In other words, "zero time," and the folding of space. This is where the complete Unified Field Theory would come into play. You see, the problem needing solution is to demonstrate how space and time are interchangeable, and how gravity and magnetism are born of the same source, with the application of electromagnetic fields as the key to utilizing all realms simultaneously. Goodbye.

END OF SESSION

## **6.27 August 22, 1998**

Frank, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Urturra.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) I want to ask about Frank's gallbladder. [Frank had recently suffered a severe gall-bladder inflammation attack.] Of the many things we have discussed about it this evening, including emotional causes of disease, use of acupuncture, and diet, is there anything that you can add to this at the present, or is there anything that was said in error that you would like to correct?

**A:** Condition is largely hereditary.

**Q:** Then, that would be similar to my own which means that a person has to eat a specific way and behave in specific ways to correct for the defective gene. Is that correct?

**A:** No. Defective gallbladder is hereditary.

**Q:** Then, is it advisable for him to have the gallbladder removed?

**A:** Eventually.

**Q:** Will it help to change his eating habits to the Atkins plan?

**A:** All is good there with two exceptions: suggest inclusion of bran fiber and liquid dairy, due to blood type, and need for elimination. This is greatly inhibited by "Atkins" plan, which is a fundamental flaw therein. You should consume "Mississippi Mud" for this purpose.

**Q:** What is THAT?

**A:** Fibrous porridge.

**Q:** Oh, I know that stuff!

**A:** Otherwise there is a risk of serious bound-up syndrome.

**Q:** I know that too. I am taking teas to counterbalance that.

**A:** But severe constipation can damage liver.

**Q:** Anything else on that to make some fine-tuning adjustments?

**A:** You should investigate blood type diet differentials, there is validity there.

**Q:** (A) I want to ask why is it so that when I look at Laura in the mirror, as I have several times without glasses at the gym, my vision was a little unsharp, I was seeing a gold glow, a big gold glow in both of her eyes. Why was this?

**A:** You are developing some DNA change related 4th density “bleed-through.”

**Q:** (A) But what was this glow in her eyes?

**A:** Part of 4th density reality, related to aural frequency.

**Q:** (L) Now, on to the questions I have prepared: In a previous session you said that the pyramid was built 10,643 years ago. That would be 8,649 BC. Is that a correct figure, or was there any corruption?

**A:** Yes. Correct.

**Q:** Then you talked about the pyramid as a focuser of energy to do ‘all things’ or many things. Later we asked about Stonehenge and you said that Stonehenge was built 6,000 BC by Druids, an early Aryan group, as an energy director to do ‘all things.’ This seems to indicate that both structures had similar design functions. Is that correct?

**A:** No. Stonehenge is a vector of energy derived from Solar and Cosmic rays. Pyramids focus electromagnetic energy from the atmosphere ambiently. Stonehenge was built 8,000 BC, by the way.

**Q:** If it was built in 8,000 BC, and the Pyramids were built 8,649 BC, which is 10,643 years ago, more or less, that means that they were built at almost the same time, or at least within 600 years of each other. If they were built at almost the same time, were they built by the same, or similar, groups of people?

**A:** Atlantean descendants.

**Q:** Obviously the Great Pyramid is a marvel of engineering - and Stonehenge is as well - yet the two structures are so dissimilar. The Pyramid presents such a finished and sharp and elegant appearance, and Stonehenge might give a person - of course that is based on how it appears today - a more primitive presentation.

**A:** Was not originally.

**Q:** Did they work in conjunction with one another and were the two groups that built them in communication with one another?

**A:** No and yes.

**Q:** Was it two different groups? One, with the Stonehenge business, and one with the Pyramid business?

**A:** Offshoots of same group.

**A:** Were they antagonistic toward one another or were they friendly toward one another?

**A:** No, yes.

**Q:** If the flood of Noah, as you have said before, occurred 10,662 BC, that means that the Pyramid and Stonehenge were built more than 2,000 years after this event.

**A:** Yes.

**Q:** Did it take 2,000 years for them to develop or create the technology?

**A:** No.

**Q:** What were they doing in those 2,000 years?

**A:** Reassembling.

**Q:** In that 2,000 years of reassembling, do you mean reassembling as a group through reincarnative processes...

**A:** All. Built using sound wave technology.

**Q:** When you say that it was built using sound wave technology, were these sound waves produced by human voices or by instruments or mechanical devices of some sort?

**A:** Mostly latter.

**Q:** What kind of a device would this be? What would you call it?

**A:** Something like tuning fork.

**Q:** It would be something that could be struck and would produce a sound that could then be directed in some way?

**A:** A sound enhancing collector/focuser.

**Q:** Can we build such a thing?

**A:** Must be like a two-way antenna; solidly brass or bronze.

**Q:** Other than a solid piece of metal, were there any other internal parts such as a mechanism of some sort?

**A:** Silicon arterial wand.

**Q:** (A) Can we see somewhere a picture of this?

**A:** No pictures exist to where you have access.

**Q:** (L) Was the pyramid itself ever used as a sounding mechanism, the chambers?

**A:** Not exactly.

**Q:** How many chambers or cells are there in the Great Pyramid?

**A:** 19.

**Q:** So, there are some that have not been found yet. Now, according to this book, the 'Message of the Sphinx,' they are saying that the orientation of the pyramid complex which includes the Sphinx, designates or denotes a time, or replicates on the ground, of the pattern of Orion related to the constellation of Leo exactly 10,500 years ago. What is the significance of this date 10,500 years ago?

**A:** Complex, but what about Orion?!?

**Q:** What about Orion?

**A:** For you to surmise.

**Q:** Was this a date when the ships from Orion arrived to go into orbit around the Earth?

**A:** No. Now you should study all you can about supernovae.

**Q:** Okay, there was a mention of a supernovae in this book. Was there a supernova at that particular time?

**A:** Maybe, but the real question should be: Will there be one again, and soon?

**Q:** They have said that this designates the lowest point of Orion in the precessional cycle, the nadir of the cycle, and that the mid-heaven would be 2400 AD. If you have the representation of this

precessional nadir, what is the next ‘notch’ on the clock? Is it going to be the midheaven of the cycle 400 years or so from now?

**A:** Best not to assume without adequate data.

**Q:** Okay. Well, the other thing that they mentioned was that this orientation of the Sphinx and the Pyramids dealt with what is called ‘Zep Tepi.’ It says [reading]: ‘In their most profound and beautiful religious texts, the ancient Egyptians spoke of the Time of the Gods, Zep Tepi, or the First Time, with the unshakeable conviction that there had indeed been such an epoch. In other words, they believed that Zep Tepi had been an actual historical event. In line with their prevailing dualism, they also believed that it had been projected and recorded in the catalogue of the starry sky, and it was a story that was reenacted endlessly in the cosmic setting by the cyclical displays of the celestial orbs and the constellations. What they had in mind was a kind of Cosmic Passion Play in which each main character was identified with a specific celestial body. Zep Tepi was regarded as a mysterious and golden age that had immediately followed creation.’ What can you comment about this Zep Tepi? Was Zep Tepi the time of the first civilization that had existed immediately after creation?

**A:** You are pursuing a “dead end” there.

**Q:** Okay, then we will forget Zep Tepi. Also, it says here regarding the issue about iron [reading]: ‘It is unsettling to discover in the Pyramid Texts, supposedly the work of Neolithic farmers who had hardly begun to master copper, that there were abundant references to iron. The name of it was B’ja, or the ‘Divine Metal.’ We always encounter it in distinctive context to astronomy. For example, B’ja is frequently mentioned in the text in connection to the ‘Four Sons of Horus,’ presumably related in some way to strange beings known as the Shemsu Hor, or the ‘Followers of Horus,’ or the ‘Transfigured Ones.’ At any rate, these very myste-

rious ‘Sons of Horus’ seem to have been made of iron or to have had iron fingers. [...] It is clear that iron was somehow seen by the composers of the Pyramid Texts as being imperative in the rituals aimed at ensuring new life cosmic and stellar. The verses of the Texts connect the metal and its uses to the ancient prototype of all such rituals by means of which Osiris himself, Egypt’s ‘Once and Future King,’ died and was restored to immortal life as Lord of the Sky Region of Orion. ‘The doors of iron which are in the starry sky are thrown open for me and I go through them.’ It appears to be nothing less than an iron stargate intended to admit Osiris and all the dynasty of dead kings after him into the celestial realms of the belt of Orion. But, if the Pyramid Texts are describing a stargate, they are also describing a timegate for they express no doubt that by passing through the iron portals of the sky, the soul of the deceased will attain a life of millions of years.’ So, they are describing the Pyramid as a stargate, a timegate, a portal. However, they are doing so in figurative terms, that the person could mentally travel, or use this in some way. Could you comment on this bit about the iron stargate?

**A:** Iron is highly magnetic.

**Q:** Yes, we know that...

**A:** Opens doorways or portals.

**Q:** Were the Egyptians using the Pyramids to travel in time?

**A:** Maybe in a crude sense, more like an oracle.

**Q:** They say that there is a subterranean chamber under the sphinx that leads to all the other pyramids. Is this correct?

**A:** Yes. But more importantly, there is a buried capsule of sorts.

**Q:** Has this buried capsule been found?

**A:** Not uncovered, but the evidence exists.

**Q:** Are those Egyptians over there who are banning all the other people from excavating aware of this?

**A:** They fear ramifications.

**Q:** One of the things I noticed in this book was that they said that there was a colony from the city of Harran in what is nowadays Turkey, and that this colony formerly resided on the Giza plateau. Is there any connection between this colony they mention and the fact that you said that the 'Protocols of the Elders of Zion' were composed in Turkey by an 'Aryan' source?

**A:** Yes.

**Q:** What relationship is there?

**A:** One and the same.

**Q:** We watched this television show the other night which talked about the city of Angkor Wat and its orientation to [the constellation] Draco 10,500 BC. You said that Angkor Wat was built 3108 years ago by the Lizzies themselves, and that the city of Mohenjo Daro was also built by the Lizzies 3065 years ago, which is within 30 or 40 years of the same time period. Do you still confirm that the Lizzies themselves built these cities?

**A:** Reptilian Beings.

**Q:** And they did this themselves?

**A:** Yes.

**Q:** What happened to the inhabitants of these cities?

**A:** Taken to another planet.

**Q:** Why was this city built in orientation to the constellation Draco?

**A:** Was not, was a record: see the texts of Kaballah for details after linkage is established.

**Q:** After what linkage is established.

**A:** Between the astronomical data and the sites.

**Q:** Now, we are in the process of constructing a psychomantium tent, a 10 by 10 by 8 foot tent, to suspend from the ceiling in the bedroom. After what you suggested about the time and mode of meditation, and the fact that 'one room stands idle,' I thought that trying to use it in the early evening in the back room would be almost impossible. However, setting it up in the bedroom, it will be better all the way around. Lying on the bed to meditate makes for much more comfortable conditions. I would like to know if this is going to be... I know that you don't want to tell me, but it just seemed to be the ideal place to put it, in the bedroom - for comfort and quiet and a lot of different reasons. Can you comment?

**A:** Good.

**Q:** Well, would it be better in the back room? There are a lot of reasons why that would be unpleasant...

**A:** Trial leads to realization.

**Q:** Any further advice about the psychomantium? I am getting kind of excited about trying it this way. It is going to be so much better and more comfortable...

**A:** Yes.

**Q:** (A) I have one question about the pyramids. There is a complex of pyramids at Giza, and they are now trying to find out if this complex points to some special place, a vanishing point. Is it really so that the three pyramids point to some important place as a complex?

**A:** Orion.

**Q:** (A) Not some place on the earth or under the earth?

**A:** No, no need.

**Q:** (A) I want to go back to the previous session when you were trying to point us to a laboratory in Russia and we were unsuccessful in finding the place. First, there was the Russian letter 'b' which didn't fit to anything on the map. My guess was that it could be the initial of a Russian scientist, for instance, Breznev.

**A:** Clues go step by step.

**Q:** (A) So I must speak about one letter, that's one step...

**A:** Prokov.

**Q:** (L) Well, he did have the idea of following the magnetic meridian of our present locator over the North Pole and this appeared on the other side of the globe in the exact center of the two cities you named. Was that part of the solution?

**A:** The solution lies in a mountain pass.

**Q:** (A) A mountain pass?

**A:** Yes.

**Q:** (L) Well, there is that magnetic mountain there. Is that the one you are talking about? But that has nothing to do with the two cities?

**A:** Good start. Remember, there may be more than one locator involved.

**Q:** (L) You were trying to draw some letters in the Cyrillic alphabet and I just got completely screwed up. So, is there something that you can add to it to clarify it?

**A:** Not now.

**Q:** (L) Okay, we would like to know what was this famous explosion in Tunguska?

**A:** Comet fragment.

**Q:** (L) Did that have anything to do with this laboratory or this magnetic meridian business?

**A:** No.

**Q:** (A) I was considering writing to the Rockefeller Foundation for support. Is it advisable to write to them for a grant?

**A:** Be careful, they have an agenda in mind.

**Q:** (A) Referring back to Von Neumann, you mentioned light and the question was ‘what kind of light is related to electromagnetically charged particles.’ Then you mentioned that Von Neumann was applying algebra. Now, is the answer about what kind of light, if I say infrared, is that the correct answer?

**A:** Refracted image.

**Q:** (A) Okay, I was thinking about this...

**A:** Like an induced mirage.

**Q:** (A) Now, I want to ask about the software that I am working on. I realized that these people have a spectrometer that produces bad spectra, there is, as far as I can see, the methods that I am using may fail completely with this spectrometer. What should I do to work out an efficient analyzing program that will work so that...

**A:** Fit a model into your program calculations which is demonstrable. In other words, fit your machine to your program, rather than the other way around.

**Q:** (L) You are saying that, based on what will work program-wise, that the machine should be re-designed...

**A:** Yes.

**Q:** (A) But still I have the feeling that the method I am using is not the optimal one even for this machine, but I don't know what to do.

**A:** Adjust machine to method.

**Q:** (L) Are you saying that his method is the best and the only one that is going to work and that the machine is going to have to be modified?

**A:** Best of the rest.

**Q:** (A) That is not much help. (L) We really need to do something with this project!

**A:** It will work out!

**Q:** (L) Well, he really needs this to work out. We don't want this project to fall flat on its face!

**A:** Follow instincts.

**Q:** (L) Is there anything we ought to be doing in terms of employment at the present time? Is there any other direction we should be looking at the present time?

**A:** Not until you reach the crossroads.

**Q:** (L) What crossroads? I don't like the sound of that!

**A:** Wait and see. Now: study supernovae!

**Q:** Okay, we will study supernovae. (A) I have a question about UFT. A piece from Einstein's biography says that in 1931, Einstein

and Mayer re-formulated Kaluza's five dimensional theory, retaining a four-dimensional space-time. I would like to know if it was a step back or a step forward when they did this?

**A:** Step back, then forward.

**Q:** (L) The paper was a step back and then they stepped forward in secret?

**A:** Close.

**Q:** (A) Next question: three weeks ago you mentioned in relation to UFT pentagons and hexagons. I have here a pentagon and a mathematical formula under pentagon which for me, relates to a pentagon, and it has  $x, y, z$ , three dimension; time, which is one dimension, and perhaps the fifth dimension, which corresponds to the fifth. Is this association of pentagon with this mathematical symbol below correct?

**A:** Yes.

**Q:** (L) I want to ask if you ever told us to do something with a Tesla coil which I failed to record or got lost somewhere?

**A:** Maybe. Gravity waves, pentagon is the foundation; hexagon is the conclusion.

**Q:** (A) I want to go back to this little mathematical formula here. I have here a plus or minus and I don't know which sign to take in front of this field variable. Should it be plus like  $x, y$  and  $z$ , or should it be minus, like with  $t$ ?

**A:** Minus.

**Q:** (A) Related to these gravity waves, in 1936 Einstein wrote a paper which was rejected, in which he claims to have discovered that there are no gravity waves. When you talk...

**A:** Cloak for others. Einstein knew differently, but was forced to comply for political and security reasons.

**Q:** (A) Should gravity be quantized as other fields?

**A:** It can be.

**Q:** (A) But, if it is quantized, it will be gravitons, and you said that there are no gravitons...

**A:** Gravitons are really electrons within a time vacuum.

**Q:** (A) Physicists today and for the past 5 or 10 years have been trying to build a theory of everything which is built on the idea of strings - that everything is composed of oscillating strings - they call it SuperString Theory. Is the idea of strings any good?

**A:** No.

**Q:** (A) Now, about pagers... we were told that pagers emit some radiation which can be detrimental up to a distance of four meters. As far as I understand a pager is a passive device, a receiver. It is not emitting anything. How can a pager be detrimental?

**A:** Microwave "bounce effect."

**Q:** (A) So, they bounce from the receiver... I see.

**A:** Cell phones too.

**Q:** (A) Yes, but cell phones have a transmitter. Now, in many of these internet papers on UFT we find the name of Bearden. I have here a page: 'Utilizing Scalar Electromagnetics to Tap Vacuum Energy'. [Reads abstract] This guy wrote several books and several papers. Is there any truth in what he is saying?

**A:** Yes.

**Q:** (A) Is it worthwhile to study?

**A:** Yes.

**Q:** (A) Are there lies there too? Is he lying too?

**A:** Maybe some mixed in to cloak for safety sake.

**Q:** (A) Is his idea of scalar electromagnetics sound?

**A:** Close.

**Q:** (L) Okay, going back to the pyramid. In the Pyramid Texts, when they talk about the 'Boat of Millions of Years,' what are they talking about?

**A:** Time machine.

**Q:** (L) Who were the 'Followers of Horus?'

**A:** Those who held the 3rd "insight."

**Q:** (L) What was the third insight?

**A:** There are 10. The 3rd involves transcendental existence.

**Q:** (L) The Pyramid Texts also talk about the 'Duat.' What is this?

**A:** Scene of martyrdom.

**Q:** (L) They also talk about the 'Seven Sages.' You once said that Perceval was 'knighted in the Court of Seven' and that the sword's points signify 'crystal transmitter of truth beholden.' Do these seven sages relate to this 'Court of Seven' that you mentioned?

**A:** Close.

**Q:** (L) When you said 'swords points signify crystal transmitter of truth beholden,' could you elaborate on that remark?

**A:** Has celestial meaning.

**Q:** (L) Also since the layout of the pyramids and the Sphinx seems to indicate that the constellation of Leo is in some way very significant, does this relate in any way to your remark that your 'next stop: Leo,' that we should 'call Leo?'

**A:** Getting warmer.

**Q:** (L) Okay, since you said that the Sphinx symbolized a religion, or worship of a god named Endurra which just 'fizzled out,' how can this be reconciled with the obvious celestial relationship to this monument and this whole Giza complex. It seems that there is a far deeper meaning to the Sphinx than just the worship of a feline principle that just 'fizzled out.' Comment please?

**A:** It "fizzled" because the kept secrets faded.

**Q:** (A) Here is a picture of a pyramid, and they ask what this hieroglyph means. [Picture of a man pointing to something] What does it mean?

**A:** Passage to higher levels.

**Q:** (L) The original 'Widow's Son' seems to have been Horus. Perceval of the Grail Stories was also known as the 'Widow's Son' so we can clearly see the relation between the Egyptian and Celtic 'Quest.' You said that the definition of the 'Widow's Son' is 'he who stalks wisdom incarnate.' Why is this defined as wisdom incarnate?

**A:** Wisdom is greatest when not carnate.

**Q:** (L) Was it a reverse expression meaning that looking for wisdom that was incarnate was a waste of time?

**A:** No.

**Q:** (L) I dont' understand.

**A:** Seek that which is elusive... good night.

END OF SESSION

## 6.28 August 29, 1998

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wisoma.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (L) I have a couple of quick questions before we get into Ark's involved ones. The first question is: In this book, 'Fingerprints of the Gods,' the guy [Graham Hancock] talks about what the Maya call 'The Suns' or world ages. The first sun's duration was 4008 years; the second was 4010 years; the third was 4081; the fourth 4026; and the fifth and current sun is supposed to end in 2012 on the 23rd of December, and it began in the fourth millennium BC of the Christian calendar. So, what I would like to ask is: are these suns, as the Maya described them, are these the periods of revolution of the companion star of our Sun?

**A:** Well, this could be the case, or, it may be something else. Or it could be a combination of factors/events. It would not be prudent of us to provide you with a direct, definitive answer at this juncture. Signposts will provide the answers as you go along, if you are patient and open minded.

**Q:** It also says here that on this pyramid, at the time of the Spring and Autumn equinoxes, combined patterns of light and dark

combine to create the illusion of a giant serpent undulating on the northern staircase. On each occasion the illusion lasts for 3 hours and 22 minutes exactly. What was this optical illusion created to convey?

**A:** Worship of serpentine deity.

**Q:** Was it created to convey or produce any other effect other than worship?

**A:** The key is in the reading of the geometric cycle.

**Q:** On page 80, the book talks about these statues at Tiahuanaco on Lake Titicaca. It says: 'Carved in red sandstone, worn and ancient beyond reckoning, the statue stand about 6 feet high and portrays a humanoid, androgynous being with massive eyes and lips. In it's right hand it clutches something resembling a knife with a wavy blade like an Indonesian kris. In it's left hand is an object like a hinged and case-bound book. From the top of this book, however, protruded a device which had been inserted into it as though into a sheath. From the waist down, the figure seemed to be clad in a garment of fish scales.' Okay, there is another statue with an object in its left hand that is like a case bound book, but from this one protrudes a forked handle. The right hand object was roughly cylindrical, narrow in the center and bigger at each end. It appeared to have several different parts. I would like to know what these objects, or devices, carved into these ancient statues represented?

**A:** Conductor.

**Q:** What did these conductors conduct? Were these the sound machines that you have described previously?

**A:** No.

**Q:** What did they conduct?

**A:** Quartzine energy from atmospheric source. [Atlantean crystals?]

**Q:** What was this energy used for?

**A:** All.

**Q:** Well you have described a lot of things that did all kinds of things... the pyramid, Stonehenge...

**A:** When one harnesses free energy, no limitations need apply.

**Q:** Why were these beings depicted with these fish-like garments?

**A:** Reptoids have that genetic profile to varying degrees.

**Q:** According to the Sumerian traditions, this was like the god Oannes. In the night time, he would plunge back into the sea, but in the daytime he would converse with men, giving them insight into letters and sciences and every kind of art. But, it was noted that he was never observed to eat. It says that he taught men how to construct houses, temples, to compile laws, and explained to them the principles of geometric knowledge. He made them distinguish the seeds of the earth and made them gather fruits. In short, he instructed them in everything that would tend to soften manners and humanize mankind. From that time, so universal were his instructions, that nothing has been added materially in the way of improvement. The surviving images of Oannes on Babylonian and Assyrian reliefs clearly portray him as a fish man. Is this another similar profile?

**A:** "El legato."

**Q:** Was this Oannes fish man similar to the Quinotaur that was supposedly the half-father of the Merovingian royal line?

**A:** Only if one considers losses in the translative quarry.

**Q:** Well, quin is five. Does it relate somehow to the pentagon, the pentagram, to five dimensional space?

**A:** No.

**Q:** Here it says: The Spanish Conquistadores and missionaries destroyed nearly everything that we could possibly use to learn about the South American civilizations. A sixteenth century eye-witness says that there was an emerald idol that was completely fantastic. Father Benito took this idol and had it ground up, stirred the powder in water, poured it on the ground and stomped on it. Cortez was given two circular calendars, one of gold and the other silver, as big as wagon wheels, with all kinds of hieroglyphs on them, which he immediately had melted down and cast into ingots. 'All over Central America, vast repositories of knowledge, accumulated since ancient times, were painstakingly gathered, heaped up, and burned by the zealous Catholic missionaries. In July, 1562, for example, in the main square of Monte, in the Yucatan, Father Diego de Landa burned thousands of Maya manuscripts, paintings and hieroglyphs inscribed on rolled up deerskins. He said: 'We found great numbers of books written in the characters of the Indians, but since they contained nothing but superstitions of the Devil, we burned them all, which the natives took most grievously, and gave them great pain.' Hancock says: 'Not only the natives should have felt this pain, but anyone and everyone then and now who would like to know the truth about the past. Diego de Landa participated in Spain's Satanic mission to wipe clear the memory banks of Central America. In the marketplace at Texcoco, they built a vast bonfire of astronomical documents, paintings, manuscripts, hieroglyphic texts, which the Conquistadores had forcibly extracted from the Aztecs during the previous eleven years. As this irreplaceable storehouse of knowledge and history went up in flames, a chance to shake off some of

the collective amnesia that clouds our understanding was lost to mankind forever.' So, having read this sickening description about 'Spain's Satanic Mission' to destroy the past, I would like to have a comment on what was motivating the Catholic Church, the Catholic Missionaries, and Spain itself, since Spain has been designated as one of the areas where 'artifacts' may be still found. Could you comment?

**A:** You should not need commentary, as we have told you much about the desires of 4th density STS to obscure truth by manipulating 3rd density STS.

**Q:** Well, yes. But, Lord have Mercy! It just makes a person sick to think about it... all of this and the Library at Alexandria too! Was this the kind of stuff that was being done in Europe during the so-called 'Dark Ages?'

**A:** Yes.

**Q:** And that is why the Dark Ages are Dark. The Catholic Church destroyed everything that did not sharpen their own axe. Now, it says that this Professor Posnansky of the University of La Paz, and Professor Rolf Mueller, pushed the date of the building of Machu Picchu back to 15,000 BC. Is this a correct date?

**A:** Close.

**Q:** Can you tell us when Machu Picchu was built?

**A:** 12009 BC.

**Q:** Close enough. Now, the Nazca lines: there is a spider there that some people have done some work with and they say this spider figure is a representation of Orion. Is this, in fact, the case, that this Nazca Spider is devised as a terrestrial diagram of Orion?

**A:** No, but then again, the truth is observable.

**Q:** When you say this about Orion and the Spider, what do you mean?

**A:** Find your truths through observation.

**Q:** What did this spider represent?

**A:** Symbolic, according to language representing biological beliefs.

**Q:** It says that, as it happens, it accurately depicts a known spider genus, one of the rarest in the world, so rare that it is only found in remote parts of the Amazon rain forest. The representation is accurate even to the image of the reproductive organ positioned on the end of its right leg. Can you comment on this unusual species of spider?

**A:** Examine visually.

**Q:** In this other little book: There is a Celtic word that pops up in this funny little book, 'pryf.' What is pryf?

**A:** Soul.

**Q:** The book says here that there is a need for someone of a certain bloodline to come along and 'free the dragon spawn.' 'None other than she can bring the pryf up from the deep no matter how they may make the serpents squirm. If she can hold her place in the gates of time.' What are they talking about here; bringing up the dragon spawn, and how does that relate to soul?

**A:** You cannot see?

**Q:** It also says that this person with this bloodline, that it is the duty of this person to create a bridge between man and the gods, to open the doorways of time. Can you comment on that?

**A:** These questions have explanations which are readily apparent.

**Q:** Well, before, when I asked a question, you said that I would get my answer from the 'trees.' This book is all about 'trees,' in one way or another - ancient Druids and so forth. Was that clue given so that I would notice these things in this particular book even though it is fiction?

**A:** Certainly.

**Q:** (A) I want to come back to the laboratory which we have failed to identify. We know that the answer is in a 'pass in the mountains.' Still, I am puzzled by the phrase that it is on a magnetic meridian? I don't understand because ANY site is on some magnetic meridian where ever it is. How should I interpret this?

**A:** First you must superimpose magnetic grid over the earth.

**Q:** (A) What is the distance between lines of the grid?

**A:** 200 kilometers, approximately.

**Q:** (L) What is the prime, or the 0 meridian? Where is it located?

**A:** In Western Pacific at 90 degrees East Longitude.

[Session ended due to sudden illness of Frank.]

END OF SESSION

## **6.29 September 5, 1998**

Frank, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Vomaz.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (A) My first question concerns a technical problem I have with my job. There is a device and the engineer detects vibrations in this device. I was looking for the reasons for this vibration, looking through all the software that generates the motion of this motor and was not able to find the place that was responsible for this particular vibration. It would be very nice if I could fix this problem. Perhaps you can give a hint as to where to look for the reason for this 2.5 hertz frequency?

**A:** Please, be more specific.

**Q:** (A) There is cooling machine, and this cooling machine is run by a linear motor, and this motor is run by a current that is controlled by a computer. This computer should generate a sinusoid of 58.6 megahertz. Ken, the engineer, finds that this motor has another vibration that it should not have, and this vibration cause problems with the detector. So, the problem is: where is the reason for this extra vibration?

**A:** 56.8 megahertz may be improper setting for natural flow as dictated by the function of design.

**Q:** (A) Okay, I will look...

**A:** But you need more than that... for example, should the setting be higher or lower? What are your thoughts on this. And why did engineers settle on that setting?

**Q:** (A) I don't know. I will ask. (L) Should it be set higher or lower?  
(A) I don't think that there is any particular reason why they set it at this frequency. They had to do something, and probably it could be set for a different frequency. I have to do research. It's

a good point. Okay, next question: we have found this Novosibirsk group. They apparently have some kind of detectors and some kinds of ideas according to this Russian guy Kozyrev, which enable them to measure instantaneous signals caused by some kind of irreversible events, such as when the comets hit Jupiter. I would like to know if the effect they have measured is a real, new effect?

**A:** Not “new” of course, but this is most interesting, because now we are dancing on the threshold of gravity waves, the very same thing we have been hinting at for so long, as you measure it in your linear perspective. The unusual condition that has arisen in Russia has created a bubble within the framework of the world power structure which has allowed some concussive “discoveries” to be occasionally leaked out into the open. This, of course, presents unique but potentially hazardous opportunities for you in your research.

**Q:** (A) What is hazardous, the contacting of these people?

**A:** No. It is the monitoring of your contacting.

**Q:** (L) Who is doing the monitoring?

**A:** Guess!

**Q:** (L) Is it third density or fourth density?

**A:** Both, as usual. In other words, proceed, yes, but tread carefully.

**Q:** (L) Well, you guys are the ones who gave us hints about this. Are you giving hints about things that will lead us into some dangerous situation?

**A:** It is dangerous only if handled with innocent or indiscreet zeal.

**Q:** (L) So, we must keep a low profile, inquire, read, do whatever, but don't go running out and telling anybody about it, which you don't do anyway...

**A:** But Laura is another story.

**Q:** (L) I swear! I will not breathe a word!

**A:** It matters not to us, we will love you eternally, in any density.

**Q:** (L) I.E. fifth density! (A) Now, the problem I found is that these people have effects, they have this very general idea of Kozyrev, but apparently they don't know what kind of mathematical structure, or geometrical structure is behind this phenomena, what kind of field is operating.

**A:** They do not know what you do.

**Q:** (A) I understand. Which means that I should not let them know what I know.

**A:** We suggest you contact them via internet in code. Contact in Russian, using words for "gravity" and "wave" separated innocently, or benignly in a key sentence.

**Q:** (A) Now, about this Guts. He is in Omsk and he wrote a few papers on this Kozyrev business and Kaluza-Klein theory, and he seems to be nice. Any comment about this guy. Should I take care, or is he friendly?

**A:** He is friendly.

**Q:** (A) Now, I think it was two weeks ago when you first mentioned this Russian link, that we should look for a Russian, and you mentioned a name 'Prokov.' Prokov doesn't seem to be a Russian name. But, I have found Frolov, which is similar to Prokov. He has a page on the internet and this page is entitle 'Time Machine.' He lists the following as subjects of his private

research: chrono-technology, teleportation, change of rate of time, gravitational chrono-propulsion, free energy, over-unity, perpetuum mobile, cause-effect correlation, ether technologies, electro-gravitation, inertial propulsion, Biffeld-Brown effect, reactionless propulsion, Tesla's technologies, N. Kozyrev's technologies... Who is this guy? Is he a real researcher, or is he a spy, or both?

**A:** No, he is not a spy. He is more like a theorist looking for a place to land.

**Q:** (A) Can I contact him discreetly?

**A:** Yes.

**Q:** (A) Now, I have here something from Australia. These people are talking about many things including this Kozyrev Time Machine. Also, they have something on what they call 'The Amazing Hieronymous Machine.' (L reads) "On 27th September, 1949 a very strange patent was granted, by the United States Patent Office, to one Dr. Thomas Hieronymous. It was for a device which was intended for the detection and analysis of minerals, using a previously undiscovered sensing method. The machine uses a sensing detector made of a coil of wire, an optical prism which is mounted on a rotating mechanism, a small electronic amplifier, and an output device known as a 'tactile sensor.' Sometime in early 1960 when I owned an electronics design laboratory a regular client wandered in with one of these devices. He had found instructions on how to build one in a popular science fiction magazine, and he wanted to see what I thought of it. Well, I can tell you now, I didn't think of it. The whole thing was ridiculous and was an insult to everything I had learned about electronics. The only problem I had was... it worked!! And it worked like this: the mineral sample was placed in front of the pickup coil and the prism rotated mechanically until a signal was detected at the

output. And this is where my belief system was strained to its limit! The 'output' consisted of a flat coil of wire placed beneath a piece of glass. I was told to rub my finger lightly over the glass and tune the prism at the same time. At a critical point in the tuning process the contact between my finger and the glass suddenly felt 'tacky' as if someone had spilt orange juice on it. And this was the basis for the patent, a new form of detection... the Tactile Detector. All forms of detection in measuring equipment prior to this had been by sight or sound. That is, you could watch a voltmeter mover or you could hear a changing audio tone. but this new device worked by a 'change in feel/touch.' Since then this form of detection has been widely adopted for use in general 'radionics' devices which are used by a number of alternative medicine practitioners in Australia as a means of determining health problems. I have seen one of these machines demonstrated by a skilled operator and the accuracy is better than 90%. If the dial of a Hieronymous machine is calibrated to a certain mineral, any similar mineral placed by the pickup coil will produce a 'response' at exactly the same portion of the dial. By using advanced attenuating circuits the metallic ration in alloys can be accurately determined. Nobody has a clue how or why it works but then again, in the 19th century, nobody had a clue how electricity or magnetic fields worked, but plenty of people used these strange 'new' effects to make money. [...] A well known rocket engineer, Harry Stine, who was employed at the White Sands missile range, New Mexico, built one of these machines and tried it out on the other scientists and engineers on the base. He found that 80% could get it to work and even Dr. Clyde Tombaugh, the astronomer who discovered the planet Pluto in 1930, found he could make the machine work effectively. Stine was so dumbfounded with the possibilities that he has since devoted a fair portion of his life to investigating these and similar devices." (A) I would like to ask why this machine works?

**A:** Transducer is crystalline in nature. Quartzine polymer collects ambient radiation through point of even balance.

**Q:** (A) I have here a catalog of books which I can get from Tesla Book Company. Some of these books look very interesting. I have an idea that I really have to order some of these books and study; especially those that deal with UFT. But there are hundreds of books! (L) Use a pendulum. (A) What if pendulum shows a hundred books?

**A:** Why not dowse, silly!

**Q:** (A) I am silly?

**A:** No, we were just having fun.

**Q:** (A) Okay, so I am supposed to dowse. Now we are together, we want to know about this meridian because we are confused.

**A:** Nikolai is the first name. Igorivich is middle name. Padritsyn, or Padritzhin is last name.

**Q:** (A) Okay, so that's the person to look for. Okay, now this brown star business. We would like to have some more data to be able to do a computer simulation. This one more piece of information would be, for instance, WHEN this solar companion was last here?

**A:** We have been a little evasive about this, because perhaps you would be better served at this juncture by understanding more about the "Whats" rather than the "Whens."

**Q:** (F) What's wrong? (L) I am having a terrible stomach ache. (F) Now you? I hate to think what will happen to Ark next week! [Frank had to leave early the previous week due to a gallbladder attack.] (L) What is causing my intense tummy ache?

**A:** Contractions of a ductal nature.

**Q:** (A) Are you talking about my pancreas?

**A:** Close.

**Q:** (L) My gallbladder?

**A:** Not as close.

**Q:** (L) So, it is because of the grapes I ate, the insulin and all that business?

**A:** When you induce “sleep” of your pancreas, naturally, when you wake it up, it yawns and stretches and stumbles a bit before gaining balance, just as do you.

**Q:** (L) Well, it is certainly miserable. It is too low and centered to be gallbladder. It’s insulin. (F) Has your pancreas been asleep?

(L) Well, yes. I haven’t had carbs in so long... (F) Well, naturally!

(A) No more grapes!

**A:** It may not be wise to become too aggressive about avoiding carbohydrates.

**Q:** (L) I have determined that I am insulin resistant which then becomes hyperinsulinism, which then causes every single thing I eat to turn to fat. So, what is the solution?

**A:** That is more complicated than what you have read so far, but your RH factor is the key.

**Q:** (L) Anything else I should know on this to avoid any future suffering?

**A:** There is more, but remember it is a mosaic.

**Q:** (L) Okay. Let’s take a short break.

[Break]

**Q:** (L) Having done my homework on supernovas to some extent, and having discovered that either supergiant red stars are in the process of going supernova, or supergiant blue stars are getting ready to be ready to go supernova, as well as eruptions of massive interstellar clouds, I note that Betelgeuse, in the right shoulder of Orion, is a red supergiant, and Rigel, in the foot of Orion, is a blue supergiant, both of which could go supernova. Am I going in the right direction?

**A:** You have begun to trek down the right path.

**Q:** (L) We noticed that the supernova that occurred in Cassiopaea 300 years ago did not seem to have been widely noticed by people on earth. What is the reason for this?

**A:** Distance.

**Q:** (L) Now, formerly I asked about the ‘two new stars in Cygnus and Serpentarius’ that were written about in the Rosicrucian Manifesto of about this period of time, and you said they were talking about ‘novae.’ But, it seems that there are no new stars in either of these constellations. Yet, at approximately this time, was the supernova in Cassiopaea.

**A:** Yes, those with foreknowledge were looking.

**Q:** (L) Also, there was a supernova that became the Crab Nebula, which occurred 5,000 years ago, yet was not seen on earth, until 900 years ago, which happens to be exactly the time period I have been looking at as having been a turning point where seeds were planted that are now bearing fruit. Can you tell us if this supernova that was seen 900 years ago, were there effects from the Supernova that contributed to this state of affairs at the culmination of the Dark Ages, the creation of the Templars and so forth. What were the effects of this supernova that was seen 900 years ago?

**A:** Excitation of base liquid molecules.

**Q:** (L) Did this have a physiological effect, or genetic, DNA effect on people?

**A:** Slight.

**Q:** (L) What were the pronounced effects that one would have been able to note. That is microscopic...

**A:** Growth.

**Q:** (L) Growth in what sense? Growth and change in the size of people?

**A:** Close.

**Q:** (L) Growth in a psychological or mental sense?

**A:** Close.

**Q:** (L) What kind of growth specifically?

**A:** Both.

**Q:** (L) At the time of that particular supernova, 5,000 years ago, were there any superluminal effects that were felt instantly?

**A:** Maybe, research and correlate.

**Q:** (L) Was the Great Pyramid at Giza built and lined up to supernova?

**A:** Part of the picture.

**Q:** (L) Were these supernova that occurred at the time of the construction, or that were expected to occur at some point in the future?

**A:** Both.

**Q:** (L) Are supernova in any sense cyclical?

**A:** In a sense requiring higher senses.

**Q: (L)** Do supernova create portals to other universes?

**A:** The doors may be redirected.

**Q: (L)** Does any of this supernova business have anything to do with the constellation Leo?

**A:** In a way.

**Q: (L)** In what way?

**A:** Through geometric configuration.

**Q: (L)** What do you mean ‘through geometric configuration?’

**A:** Status of Trine.

**Q: (L)** You mentioned the importance of the Horsehead Nebula in relation to the symbol of the Knight. What is the significance of the Horsehead Nebula?

**A:** Keep up your search, as you are near.

**Q: (L)** What would be the effect of cosmic rays emitted by a supernova that is in some proximity to the earth on the human body?

**A:** Genetic splice of strand.

**Q: (L)** How close would a supernova have to be to have this effect?

**A:** 2000 light years.

**Q: (L)** So that either of these stars in Orion that are potential supernova prospects could have this effect since they are approximately 1500 light years away?

**A:** Yes.

**Q:** (A) Are we talking about effects that propagate with the speed of light, or effects that are superluminal and instantaneous?

**A:** Both, and slower as well.

**Q:** (L) What would be the effect that would be instantaneous?

**A:** Lesser.

**Q:** (A) Now this supernova that is supposed to explode soon, will it be soon in the sense of our SEEING it, that is the arrival of the light from this, or soon in the instantaneous sense?

**A:** Optically.

**Q:** (L) So, this supernova must have already occurred?

**A:** Yes.

**Q:** (L) And where did this supernova take place?

**A:** No dice, baby!

**Q:** (L) What clue can I follow to determine which star it is?

**A:** Instincts.

**Q:** (A) But, if it already occurred, then this means that the instantaneous effects have already been felt, even if it was lesser than the optical effects. It must have been recorded by anomalous changes in genes? (L) Is that true?

**A:** Close.

**Q:** (L) So what, in the records, should we be looking for?

**A:** Sign of struggle out of sequence with pre-ordained activities of Royal Blood Lines.

**Q:** (L) In other words, the usurpation of the blood lines?

**A:** Close.

**Q:** (L) What is aphelion of the companion star of our solar system?

**A:** Not yet, as you need more understanding of those cycles that you so keenly allude to. And on that note, good night.

END OF SESSION

## **6.30 September 12, 1998**

Frank, Ark, Laura, Chloe, TomK

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Zonah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Do you have any remarks on our wedding today?

**A:** It was a grand affair.

**Q:** (L) It wasn't so grand. (C) Depending on what you consider grand! (L) Well, thank you very much. I assume that you guys were present?

**A:** No, we were at Wal-Mart!

**Q:** (L) We got a live one tonight! Alright, what was the Blue Light special?

**A:** That is at K-Mart.

**Q:** (L) Sorry. Alright, on with the questions. On the subject of supernovas; I have discovered that three of the supernovas of antiquity which have been discovered and time estimated by the remnants, if they were not observed, occurred in or near Casiopeia at very interesting points in history.

**A:** Yes...

**Q:** (L) Well, one of these periods in history was around 1054. This is a very interesting time. It just so happens that there are no European records of this supernova which was recorded by the Chinese, Japanese, and perhaps even the Koreans. Yet, there are no European records. What happened to the European records?

**A:** Europe was in a “recovery mode” at the “time.”

**Q:** (L) Recovery from what?

**A:** Loss of civilized structure due to overhead cometary explosion in 564 AD.

**Q:** (C) There were certain historical facts you picked up, so that doesn't make sense to me. (L) On the other hand it might, because there is some stuff from Gregory of Tours that is real bizarre. What effect did this have on the civilized structure? Was it a direct effect in terms of material, or did it have effects on people causing them to behave in an uncivilized and barbaric way?

**A:** Well, the burning fragmentary shower ignited much of the land areas in what you now refer to as Western Europe. This had the results you can imagine, causing the resulting societal breakdown you now refer to as “The Dark Ages.”

**Q:** (L) Well, it damn sure was dark. There is almost a thousand years that nobody knows anything about!

**A:** Check Irish or Celtic, and French or Gallic records of the era for clues. There were temporary “islands of survival,” lasting

just long enough for the written word to eke out.

**Q:** (L) Okay, when reading about the Great Nebula in Orion, there is a kite shaped area adjacent to the Horsehead Nebula. I wondered if there was any relation between this and your previous mention of kites. Are we looking at something in that particular area of the sky that is going to go supernova?

**A:** For supernova, look to the “foot.”

**Q:** (L) Rigel.

**A:** Maybe.

**Q:** (L) Is the binary system in the eye of the Gorgon in the constellation Perseus, which is a star named Algol, one which contains a star and a black hole?

**A:** Quasars determine these.

**Q:** (L) I once asked you if Isabel the Fair and Roger de Mortimer had a child while in France and you replied, ‘no.’ I have recently been researching this period and it seems that, during the year in question, they were both in residence in the Tower of London... he as a prisoner, and she was ostensibly recovering from the birth of her fourth and last child. She was in residence for over a year and declined her husband’s invitations to move to any of their other residences. In fact, I don’t think they even saw each other for over a year. Now, I am wondering if a child was born as a result of their interactions while in the Tower?

**A:** That could be the case, if you research tryst catecomb.

**Q:** (L) Well, it just happens to be that this was 1325, the year of the birth of my mysterious ‘Knyght’ ancestor. (C) I would like to ask a question. Immediately after, or shortly after, the death experience, do people tend to experience that which they have been led by their beliefs to expect?

**A:** Essentially, yes, but some people do not know, or presuppose anything of this. Therefore, for these souls, the experience is “purer.”

**Q:** (C) What is the purer experience? What do they experience when they have no presupposition?

**A:** What have you heard about this?

**Q:** (C) A tunnel of light... a tunnel, a bright light, a loving being, and...

**A:** Wait... what about seeing one’s “body?”

**Q:** (C) Okay, the first thing would be drifting above and seeing the body, and then seeing a tunnel and the light.

**A:** Yes, but there is not always a “loving being” awaiting. That is part of the presuppositional material.

**Q:** (C) What was Tommy’s experience? [Chloe’s deceased husband]

**A:** Well, we must caution you that for those who presume “nothingness,” there is usually a transitory period of total unconsciousness for preparatory and readjustment to 5th density purposes.

**Q:** (C) So, if you don’t presuppose something, then you are just unconscious. (L) Or, if you presuppose nothingness, then... (C) Right, but that really surprises me because he had his own faith, but he did have a certain amount of faith. But...

**A:** Subject was unconscious prior to transition.

**Q:** (C) Oh, I see. That is what I thought. The doctor thinks he had an arrhythmia and his blood pressure dropped so low he passed out. Okay, what happens when a person has gone through what they have presupposed and experienced that, and are ready to go on to what really happens, THEN what happens?

**A:** Dreamlike state gradually merges with reality.

**Q:** (C) And what is the reality?

**A:** Entrance into 5th density.

**Q:** (C) What is that like?

**A:** Well, what do you think it is like, my dear?

**Q:** (C) Well if I say what I think it is like, then I am presupposing.

**A:** No, not necessarily.

**Q:** (L) When you are in 5th density, are you merged with your various soul essences so that you can perceive all of your extensions into other realities at different points in 'space-time,' and are you in...

**A:** That would be quite a kick in the butt, do you not think?

**Q:** (L) In what sense? You once said that when you are in 5th density that you are in a condition of 'timeless understanding.'

**A:** Yes.

**Q:** (L) And that you see and perceive in this timeless understanding condition, like a state of pure consciousness. Is that so?

**A:** Close.

**Q:** (L) Do you feel happiness, do you feel... well, I guess feel is the wrong term because you don't have anything to feel with...

**A:** Full range of emotional responses in profound clarity.

**Q:** (L) Would one say that being at 5th density was a pleasant experience, or just an intense one?

**A:** Intense, but not as you would imagine this.

**Q:** (C) I assume that it is intense without the negative aspects, that it would be good...

**A:** No. Negativity, yes that is there, but there is not the underlying fear of physiological damage that one perceives in third density due to genetic body response through hormonal brain swarms.

**Q:** (C) Okay, so what does one do in everyday life once one has become adjusted to 5th density?

**A:** “Everyday life” does not apply.

**Q:** (C) Take it as a term. (L) In other words, what does one do in 5th density? (C) Yeah, what is one’s activity?

**A:** Consider it a sort of timeless pondering learning.

**Q:** (C) Do different people learn different things?

**A:** Of course, according to one’s karmic resonance profile.

**Q:** (C) What is the mechanism of learning?

**A:** Natural attractive growth balance.

**Q:** (L) I guess it is just a finding of balance. (C) So, it is not a mental learning that we do here, but a sort of consciousness absorbing. Kind of like what we would like to do here, sleep on a book and absorb it? (L) Is that a good analogy?

**A:** No.

**Q:** (L) Help us out here. I liked it!

**A:** Well, Laura, picture a 5 dimensional screen.

**Q:** (L) I can’t. I can’t picture anything 5 dimensional.

**A:** Okay, then now you know what we are up against in the explanatory mode here!

**Q:** (C) But it is a sort of automatic transmission? (L) Or automatic function?

**A:** The interesting thing is the timelessness. This is why very recently “departed” souls are often “seen” by their loved ones, imparting incredible knowledge. There have even been cases where two souls were involved in 3rd density traumas together, and one instructs the other to go back, as it “is not your time yet.”

**Q:** (C) So, that is how that one would know to tell the other, the timelessness factor, it was their ‘time’ and they got it immediately, so it would seem that for some people it is an instantaneous transition to 5th density. What determines a person’s ability to cross into 5th density and assimilate the new state easily?

**A:** Vague.

**Q:** (C) It is a difficult question.

**A:** Re-ask please.

**Q:** (C) I am trying to re-form my question. (L) When such a case occurs, what distinguishes the one who is able to say ‘go back, it’s not your time’ ...

**A:** Chloe ask.

**Q:** (L) Sorry, I’ll shut up. (C) We have discussed the people who have presuppositions and who have played out the experiences they expect. What mind-set, or what presupposition should a person have to adapt most quickly and easily to the reality of 5th density?

**A:** Well, that is in itself a presupposition. But, let us just say an open-minded researcher would do best. But all do well ultimately.

**Q:** (L) When Sandra had her cardiac arrest. It was 20 minutes be-

fore the paramedics got there, so she was brain dead even when they revived her and put her on life support. I was at the hospital talking to her and trying to bring her back. I gave her Reiki and everything. So, we decided to ask if we could communicate with her and the C's said they would have to step aside for us to talk to her. We talked to her, and it was a very convincing conversation. But, at the time we were talking to her, she said something about a radio station and news in New Zealand and that we would hear soon and something about 'don't hurt the young girl!' She told me several things that convinced me that it was really her that we were communicating with, even though her body was still technically alive down at the hospital on total life support. I asked her if she was going to come back and she said no. I asked her why, and she said that she was having too much fun and when was the last time I remembered her to have fun, which was the truth. I asked her what it was like there. She told me that it was like a school. I asked what she was learning and she said that there was no way to explain and she could not tell me, but that we are in a certain class when we are in the body and a different one when out. As it turned out, we heard the next day about the lunatic in New Zealand who was shooting up all those people in Port Arthur Australia, and this was her reference to someone hurting a little girl. As I understand it, there was a little girl hiding behind a tree. So, she could SEE this business going on at the same time she was talking to us. She exclaimed about it even. It was a bizarre little conversation. (C) So, already she was there. (L) Indeed. (F) And she did say 'I'm not coming back.' (L) Yup. She said 'no way!' She said things that were so characteristic of her mode of expression that it was like when we were conversing with Keith just after he died and I was completely convinced it was him because of the way he was playing with words in the same way he did when alive. He loved puns and he was using them right and left. (C) Okay, we have done the

ouija board a couple of times in NC and have asked to speak to Tommy and got some information. Were we, indeed, speaking to Tommy at that time?

**A:** You know when you are.

**Q:** (L) I guess you would KNOW if you had and would not have to ask the question. (C) Well, it sounded like him. Can we talk to him now?

**A:** No.

**Q:** (C) Why not?

**A:** He does not occupy the necessary level at your confluence. You see, one on 5th density must shift contemplation frequency to communicate with 3rd density, even through a medium such as this. Best results are achieved when the souls are recently “departed,” as then you are most likely to play a big part in the contemplation process. This is because of the intensity of frequency modulation coming from those “left behind.”

**Q:** (C) Okay, that makes sense. (L) It does? (C) Well, when the soul has just passed over they are closer to their third density mentality and frequency, and it is easier for them. (L) And it is better not to bother them after because you don’t want to hold them at that frequency. (C) Right! And, I guess that the intensity of the frequency modulation comes from the person who is drawing them. I told him to go and not hang around. (L) Yeah, you don’t want them to hang around. (C) Okay, I guess that is pretty much my questions. (A) Okay, I want to ask about the nature of this communication that these Russian scientists were observing. What is the nature of it. Is it really instantaneous, or is it just very fast?

**A:** What is gravity really, Arkadiusz?

**Q:** (A) It is a kind of a structure which structures space and time.

**A:** Close, but no cigar.

**Q:** (L) That is a little touchy thing to say right now guys!

**A:** We are timeless, so therefore, timely as well!! Gravity is the foundation of all material existence. Therefore, gravity waves are of instantaneous imprint, as they rule all time in extant by nature.

**Q:** (A) But I am confused because if gravity waves are instantaneous, then how come we are waiting for a gravity wave that is coming...

**A:** The instantaneous nature of it is that which is perceived if one has the necessary equipment. After all, you know by now that gravity has the feature of “bending” time, space, light, etc.

**Q:** (A) So the wave that is supposed to come is NOT instantaneous. (L) Are you talking about The Wave? (A) The Wave. (L) I don't think they ever said it was a gravity wave.

**A:** Correct Laura.

**Q:** (L) If I remember correctly, they said it was a wave of ‘hyperkinetic sensate.’

**A:** Yes.

**Q:** (L) What does hyperkinetic sensate mean?

**A:** Your being merging with hyperspatial energy.

**Q:** (L) Cool!

**A:** Matter/antimatter. One features atomic particle based matter, the other features pure energy in conscious form. Gravity is the balancing binder of it all.

**Q:** (C) I have always seen energy as atomic.

**A:** That is material energy.

**Q:** (A) I want to go back to this Russian experiment. I asked what was the nature of the effect that they observed, and the answer was that it was a gravity wave that they expected. And it was the result of impact of a comet on Jupiter. Now what was so particular about this impact? Does every impact create a gravity wave?

**A:** There was nothing so particular about that, except that their instrumentation was trained on the event.

**Q:** (A) Does it mean that every impact creates a gravity wave?

**A:** Every outburst of energy.

**Q:** (C) Creates a gravity wave?

**A:** Yes.

**Q:** (L) Where does energy burst out of?

**A:** Collision.

**Q:** (L) Collision between what and what? (C) Physical bodies?

**A:** And/or atomic particles. Remember your microdynamic/macrodyn matrix. Laura was approaching the concept in the “Noah Syndrome.”

**Q:** (L) Approaching doesn't get you there! So, when there is an approach between bodies, there is an interaction or exchange, and this exchange produces a gravity wave?

**A:** What happens when you strike two rocks together?

**Q:** (L) There is a vibration. A jarring. Depending on the rocks, one may crush the other. There is heat. There can be sparks, de-

pending on the rocks. (C) You tear off, or knock off some particles. (L) Yeah, electrons.

**A:** Hmm... magnetization... hmmm...

**Q:** (C) We're making them think! (L) Sure we are. (A) Well, when you are striking rocks together, some atoms come pretty close one to another and they try to interpenetrate and probably... (C) Well, does it produce a gravity wave? Sounds like a collision to me. They said any collision.

**A:** Supercollider...

**Q:** (C) Are they saying that if you put two small objects together, to produce gravity, or that you have to have a supercollider? (L) So, if you put them in a supercollider and they impact, are you creating a gravity wave, even a small one? Or are you creating gravity when the sparks fly?

**A:** We would suggest you munch a little on the food for thought.

**Q:** (A) Okay, they don't want to continue this problem. (L) In the middle of the night the other night as I was going to sleep, I thought of something that you guys once said about the Denver airport, TDARM, that both sides can use airports and that the meaning was 'much, much deeper than that.' It made me think of what you had said before about planets and stars being windows or doorways. Is it possible that there are points in deep recesses or underground places of our planet where one can enter a portal and emerge through a portal on another planet or system. Are the centers of planets and stars the emergences of wormholes or something?

**A:** If utilized as such.

**Q:** (C) So it would have to be intentional. Is anyone utilizing them as such?

**A:** Maybe...

**Q:** (A) What is so particular about the center of a planet as opposed to the center of a snowball. Both are balls, one is just a little bit larger than the other. A planet is a big ball, a snowball is a small ball.

**A:** Have you ever tried to melt a planet in your hand?

**Q:** (A) No, because a planet is a little bit bigger than my hand. What is so particular about a planet. It is just a piece of matter like a snowball is a piece of matter.

**A:** Magnetic field gravity profile.

**Q:** (L) What is the magnetic field gravity profile?

**A:** Intensity and... here comes that word... density.

**Q:** (L) Well, off to the side, just what IS at the core of our planet?

**A:** Fluid crystalline gas core.

**Q:** (L) And what is this fluid crystalline gas core composed of?

**A:** Methane and ammonia.

**Q:** (L) How can methane and ammonia be crystalline?

**A:** They can be under the correct magnetic conductivity.

**Q:** (C) Can the condition found at the core be duplicated on the surface of the planet?

**A:** No.

**Q:** (C) So you couldn't achieve the proper magnetic conductivity?

**A:** Right.

**Q:** (L) What is so particular about methane and ammonia that it composes the core?

**A:** Methane binds to the ammonium crystals.

**Q:** (L) Well, that's the bizarrest thing I ever heard!

**A:** No.

**Q:** (L) Well, it's right up there in the top ten! (C) Was that the beginning of the formation of the earth when the methane bound to the ammonium crystals?

**A:** No.

**Q:** (L) Well, how did it get there?

**A:** Methane collected at the core after cooling. Buoyancy is determined by gravitational profile. This is why Jupiter and Saturn, for example, both of which are less dense than the Earth, but have immensely stronger gravitational fields, have atmospheres consisting of ammonia as the dominant gas.

**Q:** (C) There are a lot of different facts there and there must be a conclusion to be drawn from these facts. (L) How does this very strange core in the earth relate to gravity waves?

**A:** Well, the wave is an integral factor of the excitation of the basic substance.

**Q:** (L) Are you saying that excitation of these substances produce gravity waves?

**A:** Excitation of the environment produces a wave of the foundational entity of that environment.

**Q:** (L) What is the foundational entity of the environment of this core?

**A:** Same as all others.

**Q:** (L) Well, you have led us in a huge circle here!

**A:** No.

**Q:** (A) I have a problem with this Saturn and Jupiter. If they are less dense, but have stronger gravitational fields. According to what I know their gravitational field is stronger because they are bigger. So, even though they are less dense, they have more mass and their gravitational field is stronger. And that is all.

**A:** Yes this is true.

**Q:** (A) So, what does this have to do with it? (T) Does the methane have anything to do with it?

**A:** No.

**Q:** (L) What about the buoyancy?

**A:** Wait a moment. Arkadiusz must be unconfused before we can continue.

**Q:** (A) Well, they said that this is true what I said...

**A:** How does what we said conflict with what you said?

**Q:** (T) They didn't say anything about size. (A) What they say, if they are really gasses then the planet must be bigger, but they say it has a stronger gravity field because of that.

**A:** No, no, no. We did not say it has a stronger gravity field because of that. Review, please!

**Q:** (C) Okay, buoyancy. I guess that if we were to walk on Jupiter or Saturn we would be more or less buoyant than on the Earth? (L) Now wait a minute. We were asking about this core, and we were curious as to how this methane could be at the core because we perceive methane as being 'fluffy,' or buoyant... (C) But it bound to the ammonium crystals... (L) And they said that buoyancy was determined by gravitational profile. Jupiter and Saturn

have atmospheres consisting of ammonia as the dominant gas because buoyancy is determined by gravitational profile. (C) What does buoyancy have to do with the binding of methane and ammonia or with the gravitational profile. (L) That is HUGELY confusing! (C) Well, we are getting a lot of facts here and we are not putting them together right. (L) What is the gravitational profile of Jupiter or Saturn, for example, as contrasted to the gravitational profile of the Earth?

**A:** They are much stronger gravitationally.

**Q:** (L) Is this gravitational profile of Jupiter and Saturn related in a direct way to the ammonia?

**A:** Indirectly.

**Q:** (C) Why didn't their ammonia bind with the methane and sink to the core?

**A:** Because density affects buoyancy.

**Q:** (L) The bounce of what?

**A:** The gasses.

**Q:** (L) Why are they less dense?

**A:** Because of their size juxtaposed with their environment relative to their distance from Sol.

**Q:** (L) Why did the impact of the comet Shoemaker-Levy, in this ammonia environment produce these effects that were measured on these instruments by these Russian scientists?

**A:** Ponder based upon what we have given you. Now refer to your knowledge base regarding microdynamic atomic physics.

**Q:** (A) I want to ask about this macrodynamics. In microdynamics we have Planck's constant and it is very small, and this is why

we have quantum jumps and quantum events in microdynamics. But there is this concept of macrodynamics, perhaps we have probability waves and quantum jumps on a macro scale. This is something which we don't know...

**A:** Yet.

**Q:** (L) I don't like the sound of that! (A) So there is something like Planck's Constant but much bigger that converts on a macro scale?

**A:** Something like that. And if this is food for thought, you have been presented with a veritable feast tonight, so, good-bye.

END OF SESSION

## **6.31 September 19, 1998**

Laura, Frank, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Loxacca.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have several things from the little mail list that I would like to get to first because I think they may go fairly quick. The first is this book called "Trance Formation of America; The true life story of a CIA slave" by Cathy O'Brien with Mark Phillips. There is a rather lengthy quote from this book here that we have all

read. I certainly am not going to read it out loud because I don't want to have to type such a thing myself, so I won't read it, but I am sure you are aware of what it says. What I would like to know is: what is the motivation behind the authors of this book?

**A:** Disruption.

**Q:** Disruption of what?

**A:** Anyone disruptable.

**Q:** It specifically seems to be aimed at the Clintons or the power structure. Are any of these descriptions of the behaviors of Hillary and Bill Clinton as explicated in this extract anywhere near close to reality?

**A:** Anywhere near? Well maybe, but not as described.

**Q:** Is there such a thing as this girl describes? These CIA slaves that are sexually mutilated and programmed with this mind control programming that she has described?

**A:** Any such experiment would be handled by the cellular structure of pseudogovernmental satellite, not normally by CIA.

**Q:** So, what you seem to be implying is that what is described here IS taking place?

**A:** To an extent, but the story as related is fictional.

**Q:** Are the Clintons as depraved as she presents them?

**A:** No, but recreational drug use may have occurred. However, we suggest you not share that!

**Q:** Okay, enough on that. Here is a note from Mike C-T. He writes: "Laura, I was very dismayed to read your post on Diet and Nutrition on the Web Page. The C's are saying that Love is enough and that sex is a pure physical craving and that orgasm energy feeds

the 4th D STS buggers. Then, they go on to say that you should smoke, and consume x mg of nicotine, because you need it. Those 2 ideas seem contrary to me, since smoking is also a ‘physical craving.’ Yes, people gain weight after they quit smoking, but the metabolism does settle down after a year or so. Are you sure of the source of this message? Could STSers be getting through and are getting you and others to try to kill yourself slowly? Covering ones lungs with ash cannot be good for you, regardless of what the ash is made of. Even wood smoke causes breathing disorders. I felt sick when I read that part. It didn’t fit into my world view of the C’s.” Signed, Mike. Could you comment on his remarks?

**A:** We did not suggest that smoking was advisable per se, the response was in regard to a personal inquiry about difficulty in achieving weight loss on the part of Laura. And, we did not say that this was a permanent solution.

**Q:** Well, you DID say that it enhances resistance to disease and that it did other beneficial things.

**A:** Yes, but, it is best accomplished with pure tobacco products, not the corrupted variety available on the mass market.

**Q:** Well, what about the sex issue?

**A:** Specifics, please.

**Q:** He says that the two ideas seem contrary...

**A:** How so?

**Q:** I guess his idea is that is if you are gonna give up sex, you ought to also give up smoking because they are both physical cravings. Or, that if smoking is okay, then sex ought to also be okay. I am not altogether clear on the perspective. I did write back that my understanding was that it is not sex, per se, that was bad, but rather the drive for self gratification that was feeding STS.

**A:** True.

**Q:** He then says: 'Are you sure of the source of this message. Could STS be getting through and getting you and others to try and kill yourself slowly?'

**A:** No, and besides, "killing of one's self slowly," is occurring anyway, whether triggered by one's self or not.

**Q:** He says: 'Covering one's lungs with ash cannot be good for you, regardless of what the ash is made of.'

**A:** Noncorrupted tobacco product does not have that effect.

**Q:** I also mentioned the fact that this professor of Hematology in Gainesville told me that the only thing they know of, aside from some pathological process, that increases the red blood cell count, thereby the hemoglobin, and thus the iron content of the blood and brain, is smoking tobacco.

**A:** True.

**Q:** It was my assessment from this information, coupled with all the work done on tracking this 'blood issue' that is so dominant in the 'Grail quest' and the ancient literature, that increasing the red blood cell count was a VERY desirable thing to do to enhance one's ability to transit densities with ease. Is that a correct idea?

**A:** Yes and makes one more resistant to microbial infection.

**Q:** (A) Where can one find non-corrupted tobacco products?

**A:** Tobacco shop.

**Q:** So, I guess I have to roll my own!

**A:** Machine can be purchased which does this.

**Q:** He said: 'I felt sick when I read that.' I can identify with this feeling because there are a number of things I have learned in

this process that has had the same effect on me. But, I have also learned that when this happens, it is only my resistance that causes this suffering. Can you comment?

**A:** Emotions cause views.

**Q:** (A) I was also brainwashed in this way and I am changing. (F) We are ALL brainwashed! (L) Okay, now Eddie says: ‘Laura brought up several comments about Love that confused me. I do not understand how could giving love when not being asked could harm instead of improve.’ Can you remark on this?

**A:** “Giving” love is not giving, in such a case.

**Q:** So, if you give love when you have not been asked, you are NOT giving?

**A:** You are taking, as usual.

**Q:** When you say you are ‘taking,’ what are you taking?

**A:** Energy, a la STS.

**Q:** How does it come that you are taking energy from someone by giving them love when not asked?

**A:** Because an STS vehicle does not learn to be an STO candidate by determining the needs of another.

**Q:** I don’t understand how that means you are taking energy?

**A:** Because the act is then one of self-gratification. If one “gives” where there is no request, therefore no need, this is a free will violation! And besides, what other motivation could there possibly be in such a scenario?!? Think carefully and objectively about this.

**Q:** My thought would be that, in such a scenario, that if one gives love to someone who has not asked or requested, that it seems to

be a desire to change the other, i.e. a desire to control.

**A:** You got it!!

**Q:** Now he says further: ‘Yes, everything is lessons and if a person has chosen a specific path they should be allowed to go and learn their way. But, let’s say this is happening to someone you really love. And let’s say that the person may be in a period of his life that his/her thoughts are probably taking her/him to commit, let’s say, a murder. Don’t you think that if you send this person love, even unconsciously, that it may provide the necessary energy (influence) to stop that murder?’ Comment please.

**A:** No, no, no!!! In fact, if anything, such an energy transference even could enhance the effect.

**Q:** In what way?

**A:** Imbalanced waves could be drawn upon by the receiver.

**Q:** I think that this word he used is a clue: ‘Don’t you think that if you send the person love, it could provide the person the necessary energy’ and in parentheses he has the word ‘influence’ which implies control of the other person’s behavior, to ‘stop that murder.’ So, it seems that there is a desire to control the actions of another person.

**A:** Yes.

**Q:** But, his intent is entirely benevolent because he wants to stop a murder which is the saving of a life, as well as prevent the loved one from going to prison. So, it SEEMS to be benevolent in intent. Does this not make a difference?

**A:** Have we forgotten about Karma?

**Q:** Well, both Sylvia and I mentioned the fact that one cannot always judge these situations because we don’t know. We cannot

know. For all we know the potential murder victim is an Adolf Hitler type or the potential parent of one, or something like that, and then the murder would save many lives with the sacrifice of two lives, or that this murder is supposed to happen because of some karmic interaction that is essential between the murderer and victim, and that we simply cannot KNOW these things and judge them.

**A:** Yes.

**Q:** Any other comment about that?

**A:** No.

**Q:** He says: 'I believe that if we do not send love energy to the world that the egocentric STS energy will be dominating.

**A:** Why would one choose to send this? What is the motivation?

**Q:** To change it to your idea of what it is supposed to be. To control it to follow your judgment of how things ought to be.

**A:** Exactly. The students are not expected to be the architects of the school.

**Q:** So, when you seek to impose or exert influence of any kind, you are, in effect, trying to play God and taking it upon yourself to decide that there is something wrong with the universe that it is up to you to fix, which amounts to judgment.

**A:** Yes, you see, one can advise, that is okay, but do not attempt to alter the lesson.

**Q:** He also says: 'I believe that an enlightened being is emanating love where ever that person is, and this is even without being asked. It just happens because that is what they are - love.' Comment, please.

**A:** An enlightened being is not love. And a refrigerator is not a highway.

**Q:** What?! Talk about your mixed metaphors! I don't get that one!

**A:** Why not?

**Q:** They are completely unrelated!

**A:** Exactly!!!

**Q:** What IS an enlightened being?

**A:** An enlightened being.

**Q:** What is the criteria for being an enlightened being?

**A:** Being enlightened!

**Q:** When one is enlightened, what is the profile?

**A:** This is going nowhere because you are doing the proverbial round hole, square peg routine.

**Q:** What I am trying to get to is an understanding of an enlightened being. Eddie and a LOT of other people have the idea that an enlightened being IS LOVE, and that is what they radiate, and that this is a result of being enlightened.

**A:** No, no, no, no, no. "Enlightened" does not mean good. Just smart.

**Q:** Okay, so there are STS and STO enlightened beings?

**A:** Yes, we believe the overall ratio is 50/50.

**Q:** Okay, what is the profile of an enlightened STO being?

**A:** An intelligent being who only gives.

**Q:** Well, since we have dealt with the idea of not giving love to those who don't ask, what do they give and to whom do they give it?

**A:** All; to those who ask.

**Q:** He says: 'As you can see, I believe in the power of love. I am open to try to understand that which I have not yet been able to. Perhaps that is why I am here with you guys. So, could we talk more about this subject? Could provide more of what the C's have said about Love?' I collected the excerpts from the text about love and how you had said that Knowledge was love and light was knowledge and all that. Anything further you can add to that?

**A:** No, because the receiver to this does not wish to receive.

**Q:** Okay. Sylvia responded: 'Eddie thank you for your pointing out the paradox of the concept of the expression of love between the C's and that as some of us think we know, but KNOW what we experience. I feel that it may be very difficult for the C's to deliver adequate understanding into our 3rd density or dimension. [...] My view of the paradox is thus: If one emanates love as a natural course to the Universe it is not consciously limited or directed - at least I, for one, cannot do this; that simply is the way some of us are a lot of the 'time.' To eliminate groups or individuals, is beyond my comprehension to constantly define since a lot of this is done unconsciously anyway; and it certainly would compromise my experience of sending love. Unless one is Bodhisattva, love is probably only directed with greater intensity when focused toward an individual; how is one to know whether the intended recipient is not ready/able to receive?' [...] And 'receive,' I think is a clue: the intended recipient can either remain oblivious or ward off the love energy - free agency.

**A:** Yes.

**Q:** If it IS 'love energy' is it subsequently corrupted by STS?

**A:** Maybe.

**Q:** She then says: 'If one directs love very specifically toward an individual it can be directed freely, judgementally, subjectively..... One challenge is to direct love freely..'

**A:** No.

**Q:** 'Giving love to the Universe may be the best way generally, but if one does focus toward a loved one and it CAN be effective, could the general Universe be JUST as effective?'

**A:** The universe is about balance. Nuff said!

**Q:** Next, in regard to this not giving of love when not asked, she says: 'That does not mesh with networking to spread KNOWLEDGE among those who care and love. THAT is directed...'

**A:** What?

**Q:** Well, I DID point out that the only reason we have even gotten anything is because we asked for a LONG time, repeatedly and sincerely.

**A:** The bottom line is this: You are occupying 3rd density. You are by nature, STS. You can be an STO candidate, but you are NOT STO until you are on 4th density. You will NEVER grasp the meaning of these attempted conceptualizations until you are at 4th and above.

**Q:** She also says: 'And there are soulless ones.' Is this true?

**A:** No.

**Q:** I think that what she means by this is that there are those who are STS in their very essence and many people judge this to be a 'soulless' condition, I believe.

**A:** But STS is not “soulless.”

**Q:** Sylvia also asks: ‘May there be a time when one is faced with choosing between the lesser of 2 karmas?’

**A:** No, because karma dictates its own existence.

**Q:** What do you mean by that?

**A:** There is no fork in the road, because there is no linear time. That is an illusion and, when you graduate, you will know this.

**Q:** Okay, she further says regarding the C’s views on sex: ‘Their view implies very strongly that Humans are conceived in sin after all. That does not mesh with an un-vengeful, benevolent Geometry of Divinity, for me.

**A:** No, sex is not sin. Neither is food. It is simply physiological. Remember what we told you about variable physicality?

**Q:** Yes, that 4th density is the level of variability of physicality. Apparently, from what I can understand, when one is in that state, one finds that under most circumstances one would choose the state of pure consciousness rather than the physical, because there would be greater freedom in that state, and therefore, if one is choosing consciously to be in the non-physical state, one would be also choosing to not have sex or eat.

**A:** Close.

**Q:** Her other statement is: ‘The C’s have stated that they are a continuance of the Pleiadians. The Pleiadean view on sex, to be freely expressed, appears in direct opposition.’

**A:** Well, this is a jumbling of concepts. But just to tackle one of these, who is to say that the representations of Pleiadian concepts are really the same?

**Q:** One of her final remarks is: 'I ponder some on just how to 'study the trees.' Can you comment?

**A:** Study them as you wish. It is all lessons.

**Q:** This is just a side comment, as much as I was hoping that the group effort would increase understanding via discussion, I am afraid that this will not be the case.

**A:** No need to hope. Those who will understand, will understand.

**Q:** Alright. For Ark, let me read this from the Kozyrev book: 'Kozyrev imagined time as a mighty flow embracing all the material processes in the universe, and all the processes taking place in these systems were sources feeding that flow. He writes about the intensity, or density of the time flow, the energy it carries, its emission and absorption; the rectilinearity of its propagation, its reflection from obstacles and absorption by matter. Kozyrev said: Time flows into a system through a cause to an effect. There is an impression that time is pulled inside by a cause and gets denser at the location of an effect. In every process of nature, time can be formed or spent. Therefore, it appears to be reasonable to identify Kozyrev's flow with some substantial flow whose source is, by Kozyrev, an irreversible, out-of-equilibrium process.' In terms of his remarks about time, how close to an accurate understanding did he come when making these comments?

**A:** Close.

**Q:** Then he also says here: 'Kozyrev pointed out the sharp contradictions between the second law of thermodynamics which brings nearer the thermal death of the universe, and the absence of any signs of equilibrium in the observed diversity of the universe. He stressed that the attempts to explain the absence of thermal death have been quite apart from the real universe ob-

served by astronomers. The point is that the celestial bodies and their systems are so isolated from each other, that their thermal death **MUST** have occurred much sooner than any external system could interfere. Therefore, degraded states of systems ought to dominate, whereas they are almost **NEVER** met. The question is: why celestial systems continue to live despite the theorized short relaxation times.' Then he says: 'The problem with surmounting the thermal death of the world is most closely connected with the origin of solar and stellar radiation. It is of interest that such a concrete question such as 'why does the sun and stars shine?' Why are they out of equilibrium with the ambient space, and this cannot be answered with the known physical laws. The conclusion follows from astronomical data analysis that stellar lifetimes **SHOULD** be short, but that this is not the observable case.' So, he is saying that because stars live a lot longer than they should by theoretical laws, and do things that are not covered by these theories, that what is **INSIDE** them cannot be what is theorized. So he says: 'Stars are machines getting energy from the time flow.' And he also says that the interior of the star cannot be the thermo-nuclear reaction as described. What can you say about this idea of stars being sustained by the time flow?

**A:** Stars are not machines, but windows.

**Q:** What is in the interior of our sun? What is its internal state?

**A:** The opening to another realm.

**Q:** In the interior of the sun, how does it appear to us in 3rd density?

**A:** It does not.

**Q:** So, it is something that is completely unknowable to us?

**A:** Close.

**Q:** Does it present as any kind of matter, super condensed, or something?

**A:** Close.

**Q:** (A) The point is that we cannot go to the interior, so asking what it looks like makes little sense.

**A:** Yes.

**Q:** (A) But, of course, we can try to investigate these openings through other means that we do not know exactly yet what they are. Some of these Kozyrev inventions may be useful in these ways. But first, we need to have a theoretical understanding, not only in terms of words, but also how it relates to other concepts that we know. I want to ask about gravity waves. At one point you mentioned Sakharov. So, here is a book by Sakharov. But it is the ordinary idea of gravity waves that propagate at the speed of light as everybody believes.

**A:** No.

**Q:** (A) They do not?

**A:** Well, what do you think?

**Q:** (A) What I think is that there is confusion. The current concept of gravitational waves is that they propagate like EM fields with the velocity of light. Scientists have tried to measure them based on this idea, but thus far, have not succeeded. There is a mathematical theory, and there are machines which are supposed to measure gravity, but they are not able to do so. For example: if you have a binary star system, one star rotating around the other, they should make ripples on the curvature of space time, and these ripples ought to propagate and we should be able to detect and measure these ripples. This book by Sakharov is about these kinds of gravitational waves. I don't know. Do they exist

in this way?

**A:** No. Timeless, my dear Arkadiusz, Timeless. How can one equate gravity waves when using the vacuum of the speed of light. The speed of light exists within the larger framework of gravity, so does time.

**Q:** (A) Okay, a related question: this Sakharov says that we should quantize gravity and that the true theory will include quantization of gravity. I think that we should NOT quantize gravity. So, I wonder why he is saying these things which are so standard when he is supposed to be an unconventional thinker?

**A:** Because of politics, sort of. Best to read between the lines when studying his writings.

**Q:** (A) Last time you said that gravity waves are of instantaneous imprint. That would mean that the wave propagates in space instantaneously. How does its intensity vary when you are away from the source? Does its intensity become weaker and weaker?

**A:** No.

**Q:** (A) You say no. That's a funny thing. If there is a source, how can we recognize what is the source of the wave? Where is it?

**A:** First you must get a correct picture of gravity. Gravity is the binder between matter and anti-matter.

**Q:** (A) You are using the word 'gravity.' Scientists are also using the word 'gravity.' Apparently there are two different meanings?

**A:** How so?

**Q:** (A) Because, according to science, gravity is a force, like other forces, is a field, like other fields, and being a field...

**A:** But it is the foundational field from which all other fields emanate.

**Q:** (A) Now, there is something which we call ‘space.’ Is there such a thing as space? Is it one of the fundamental things? The space concept? Is it secondary?

**A:** Now this is where all 3rd density types keep getting untracked, because they have never been able to rectify the definition of space. For example, where does “space” begin and end. And if it does not, how is this?

**Q:** (A) I want to know about the mathematical model; how to model space mathematically. I know what is the standard way of modeling space which comes from Euclid and Newton, which says that space is just a three dimensional manifold. But then we have this French guy from Paris, Nottale, who says that space is chaotic, fractalized, non-smooth; and starting from this idea that space is a very complicated object, fractal-like, he derives equations for planetary orbits much like the theories of Velikovsky, that planetary systems are like atoms, and that a kind of quantum theory can be used to get these orbits, and then that quantum jumps can happen. He derives equations out of his concept of space. Now, I got a bunch of papers from this guy because I believe they are worth studying and continuance in this direction. I would like to know if my intuition in this respect is correct?

**A:** Yes.

**Q:** (L) Can I ask a question? (A) Yes. (L) Does space have a beginning or an end?

**A:** To answer that for you would be like telling a four year old human child that there is no Santa Claus.

**Q:** (L) Well, I can take it! If it does or doesn’t. Because my next question would be, if it DOES have a beginning or an end, would be: in what space does our space exist?

**A:** Not today, Gracie!

**Q:** (A) Some other day. (L) Apparently I ask questions they don't want to answer! I'm sorry. (A) On Monday I will go to ConTech and it is a crucial point in time, because it will be decided whether the contract will be prolonged and so forth. How should I act in order to secure...

**A:** Do you want the contract to continue?

**Q:** (A) It is not a question of what I want or not, it is that it is a necessary source of money, so the answer is yes.

**A:** Then state your case honestly and sincerely.

**Q:** (A) Okay, that answers one of my questions. The other question is: this contract is much better than teaching, but yet it takes almost all my time, and now we have these exciting things, like this Kozyrev book, that can be the start of research...

**A:** Well, we have advised before just to enjoy the ride as it will not result in negative conclusion. So far, when our advice has been heeded, what have been the results?

**Q:** (L) Let me insert really quickly a question about this so-called 'Meadows inheritance.' It came about in such a strange way that I began to wonder if it was one of the 'arrangements' that you were hinting at in some of this bloodline research I have been doing. Is that possible?

**A:** But wondering is such a stimulating experience!

**Q:** (L) Is there any possibility that anything will come out of this?  
(A) I think you should ask what you should do to make it happen.

**A:** No, you should not.

**Q:** (L) What should I ask?

**A:** Laura, just let it be.

**Q:** (L) Okay. (A) I want to ask about this Barry who wrote to me about Monoatomic Gold. Laura suggested that it is a distraction. But, he directed me to this Finnish guy who is rather strange, but his theories make sense to me. Do you have any comment on this possible distraction scenario?

**A:** We will not comment.

**Q:** (A) This Finnish guy has developed a Topological Geometrodynamics which includes some math that may be helpful to accommodate consciousness. It has something to do with prime numbers and I like this idea.

**A:** Then explore! And, on that note, Good Night.

END OF SESSION

## **6.32 October 3, 1998**

Frank, Laura, Ark

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Wonnica.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** How do you feel about this plexiglas cover over the board and the felt on the pointer?

**A:** Okay for now.

**Q:** Is there something that might work better?

**A:** If there is, you will find it.

**Q:** (A) I have one technical question and one non-technical question, so I will start with the non-technical one. I notice that, because of lack of time due to involvement in this programming, that I have neglected many things which I should not. I neglect gym, I neglect writing in the journal, I neglect getting enough sleep, I don't get up early in the morning or work on my web pages. I am not working on UFT and related things; work on the transcripts. So, the question is: how to get out of this situation? Will effort be enough, or do you have some advice?

**A:** When you are doing as you should, it is effortless. Let that be your guide. There is no such thing as "hard" work, unless one is going against the "grain."

**Q:** (A) Now, the technical question: in the physics news, it is reported that scientists have discovered long range acceleration towards the Sun in the observations of the path of Pioneer 10 which is now 70 AU from Earth, and they cannot explain this. The problem is that there are speculations that this may suggest there is something wrong with the theory of gravity, and that a new theory is necessary. What is the reason for this unusual behavior of Pioneer 10?

**A:** Wave emittance.

**Q:** (A) From where?

**A:** Cosmic energy is composed of particles misidentified.

**Q:** (L) As what?

**A:** Not "as," but of.

**Q:** (L) Of what?

**A:** Particles are...?

**Q:** (L) Tachyons?

**A:** Arkadiusz, please!

**Q:** (L) Alright, I'll shut up.

**A:** What do your scientists think about the matter-antimatter matrix?

**Q:** (A) Well, now you are leading me somewhere else. I asked about the anomalies in the path of Pioneer 10 and now you are talking about matter and anti-matter. The issue is the acceleration of Pioneer 10 TOWARDS the Sun.

**A:** Towards the Sun... Not from...

**Q:** (A) Well, I don't see any connection between this problem and this matrix you keep mentioning...

**A:** Yes, so now we see why one goes: "What?!?"

**Q:** (A) Okay, I will think about it and try to figure it out.

**A:** No, you will not escape that easily! We are trying to get you to put your "thinking cap" on and you won't even go near the hatrack!

**Q:** (A) Okay, as you repeatedly mention this 'matrix,' I want to know exactly what your definition of 'matrix' is?

**A:** Picture a perfectly symmetrical three dimensional parallelogram.

**Q:** (A) It's a cube.

**A:** Yes, now convert to 4 dimensions, and you have the mathematical representation of the matter-antimatter matrix.

**Q:** (A) In mathematics, by a matrix we understand a cube with slots to put numbers in. How many slots do we include?

**A:** Try inserting phi or an infinite number.

**Q:** (A) The number of slots must be an integer like one, two or three, not a decimal like phi.

**A:** Four dimensional, Arkadiusz, 4th Density, see?

**Q:** (A) Okay, I will think about it.

**A:** No, you will not. What is the square root of 13?

**Q:** (A) When you ask about the square root of 13, do you want me to use a decimal representation?

**A:** Yes, that would be fun for starters.

**Q:** (A) Okay, the square root of 13 is 3.6005551275. Do I see anything particular? No. But, it is a good start. Okay, what is so particular about the square root of 13 as opposed to the square root of 17?

**A:** Compare with the numerical representation of phi.

**Q:** (A) I believe that is one plus square root of five over two, which is 1.618033989. Now, compare. I don't see any particular relation between these numbers.

**A:** Subtract...

**Q:** (A) Okay, I subtract and we have 1.982521138 and so on. It's a number. I still do not see anything particular about this number, the result.

**A:** Now, if you can only reconcile your matrix numerically...

**Q:** (L) Using these numbers?

**A:** Yes.

**Q:** (L) What do you mean by the term ‘reconcile?’

**A:** What do you mean when you use it?

**Q:** (L) These three numbers are the three dimensions?

**A:** Play with them, see what you get. Will be better than Rubik’s cube.

**Q:** (A) Okay, I will play with them. It’s not clear to me how I should play with them, but I will... yes...

**A:** Computer.

**Q:** (L) Play with them on the computer. **(A)** I will. I am done. **(L)** Okay now, we received this e-mail from the fellow who was at Leonard’s meeting, and he asked Billy Meier if he has knowledge of the Cassiopaeans. Billy said, and I quote: “I heard before that a contact group says it is in contact with the Cassiopaeans. Now I asked Ptaah for more detailed information. The result of the inquiries is as follows: 1) The spiritual leaders of the Plejares did not have any knowledge about Cassiopaeans who are in contact with a human group on earth 2) I asked also if the Plejares are in contact with some beings in the Orion or Cassiopaean star constellation. Such a contact does not exist was the answer. 3) After the research of Ptaah and of Florena (daughter of Ptaah visiting the earth often in her spaceship) on earth are the Cassiopaean contacters stealing materials from other sources and a lot originates in their own phantasy. 4) Ptaah told me that no beings on their planet Erra or on one of the surrounding planets have any contact to Cassiopaean beings in physical or spiritual existence 5) It was also told to me that no beings neither in spiritual nor in physical bodies are now coming for contacts to our earth. 6) The Cassiopaean contact group - as many others - distributes the products of their own phantasies. That is the pronouncement of the ‘Great Billy Meier.’ Comment please.

**A:** Comment?

**Q:** (L) Well, yes! Who are the Plejares?

**A:** Those who originate from Plejar.

**Q:** (L) And where is Plejar?

**A:** Near Margaritaville.

**Q:** [Laughter] (L) I see. In other words, a Jimmy Buffet alcohol inspired fantasy. Who is this Ptaah that Billy talks to?

**A:** We do not suggest you pursue confrontational controversy. It serves no purpose. And it would be wise to remember that there is a great potential Armada of those who would equally doubt the validity of Cassiopaeans, Pleiadeans, Orions, Zeta Reticulans, etc. Any way. So what is the point?

**Q:** (L) Well, I know that. But, I would just like to know what is the energy behind the Billy Meier contacts?

**A:** As we have so stated, Meier had legitimate contact in the beginning, but has since become the Swiss version of J.Z. Knight.

**Q:** (L) Okay, enough on that. Moving along. Mike asked about the cutting of the Elm at Gisors. Can you comment on the meaning of the 'Cutting of the Elm?'

**A:** No.

**Q:** (L) Well, that was short and sweet. Mike also asks: 'I wonder if the quest that we are on, working with the C's is distracting us too much from learning about our true nature, and preparing us for 4th density?'

**A:** Not unless one assumes such a posture.

**Q:** (L) He also asks: 'I would like, at some time, to ask the C's what we could each do to best develop ourselves to be ready for

the transition. [...] Maybe the question is: what do each of us, individually and/or as a group, need to do to ensure that we are candidates for 4th density during the transition, and can we help friends and loved ones?’

**A:** Not correct concept.

**Q:** (L) What IS the correct concept?

**A:** If one embarks upon a journey, what does one do to prepare?

**Q:** (L) Well, I guess that if one is not really sure of the route or destination that one tries to have as much of a variety of clothing and necessary essentials and packs the suitcase and gets ready to leave, yes?

**A:** Does one concern one’s self with the proper texture of the suitcase?

**Q:** (L) Not usually. If it is big enough and strong enough to hold what might be needed, that is all that matters. Are you comparing the suitcase to the body?

**A:** No.

**Q:** (L) Then I don’t understand the analogy.

**A:** If one walks down a street, does one choose the color of one’s socks based on what one expects to arise during the walk?

**Q:** (L) No, that would be an utterly trivial concern. And you pick your socks based on what you have, what you like and what feels good. You don’t pick your socks based on where you are going to walk!

**A:** Yes, so?

**Q:** (L) He further writes: ‘I’m not sure what constitutes the requirements for transition to 4th density. I would have thought

spiritual enlightenment and commitment to STO, and related attributes would have been high on the list. But the Lizards are on 4th density, and they are certainly not all that nice to us and are not STO, as a rule. How did they get to 4th density?' I already suggested that he need to read the Ra Material.

**A:** He needs a better understanding in general, and this is a natural process, there is no preparation.

**Q:** (L) Okay, Bill B\_\_ writes in response to Mike: 'There is evidence for the case that mankind is devolving rather than evolving. We have descended from our forebears, not ascended from some ape-hybrid.

**A:** Devolving?!?

**Q:** (L) Okay, he further writes: 'Seems that there were indeed many civilizations that were on the planet with far superior inner resources to which we compare as grade school kids...

**A:** You are jumping ahead way too fast!

**Q:** (L) He writes...

**A:** No, no, no.

**Q:** (L) You don't want me to continue this line?

**A:** We want to take one step at a time.

**Q:** (L) Well, this was what Bill said back to Mike...

**A:** No, no, no, no, no, no! You did not answer our question!!!! You just ignored it. How do you expect this discussion to progress?

**Q:** (L) Okay, your question was 'devolving.' I was talking about what he was saying. Are you saying that 'devolving' is not an accurate way of describing this process?

**A:** Of course not!!

**Q:** (L) So, devolving is not accurate. What would be an accurate way to describe man's present state...

**A:** Devolving does not exist!

**Q:** (A) The question is, does Evolving exist?

**A:** No.

**Q:** (L) That's not the question. Does evolving exist?

**A:** No.

**Q:** (L) So all just exists and IS, is that it?

**A:** Yes. All there is is lessons.

**Q:** (L) Well, we are talking about the obvious evidence for higher and more advanced civilizations of the past. My thought would be...

**A:** That is not devolving. If your great grandchildren wind up tossing spears, that is 'evolution' too.

**Q:** (L) So, it is the spiritual matters that count and not the technological state of the civilization?

**A:** Close.

**Q:** (L) So, a highly advanced civilization could be not as highly evolved, spiritually speaking, as a less advanced civilization in terms of spirit?

**A:** No matter what, it is still "evolution."

**Q:** (L) Does it have to do with the fact that time is variable and selective, and all actually exists simultaneously?

**A:** Somewhat.

**Q:** (L) So, it is just cycles?

**A:** No, you are missing the point. There is no such thing as de-  
volvement. All experiences are rich with lessons. Many in your  
realm need to move beyond this superiority/ inferiority kick.

**Q:** (L) Anyway, speaking of these ancient civilizations, he says:  
'Yet they all met the same decisive end. They failed to graduate.  
Cataclysms overtook them all...'

**A:** Who says they failed to graduate? This gentleman proposes to  
know what constitutes graduation?!? How does he know this?

**Q:** (L) I guess it is an assumption that the state of the material  
civilization, or what happens to it, is a measure of the possi-  
ble/probable graduation of the members of that civilization  
in whole or part. He says that we must 'rediscover what was  
known before. I personally believe that it was a failure to pre-  
pare for the transition to 4th density.' He says: 'The 4th density,  
as I understand it, is one where the thoughts of the heart can  
actually generate external reality almost instantaneously. Can  
you imagine the devastation if one is not prepared for that.  
Preparation, it seems to me, would consist of honestly coming to  
grips with those demons within us and purging them through  
a variety of means until the water of Spirit runs clear from our  
intentions.

**A:** Preparation consists of merely being there!

**Q:** (L) I think that the issue is, what these two guys are trying  
to get to is that they want to transition to 4th density, they don't  
want to be hanging out on a post- cataclysmic world where ev-  
erything is all messed up, they don't want to go back to square  
one and do third density all over again and suffer, and they want  
to know how or why or what to do to ensure that they make this  
transition?

**A:** You cannot honestly entertain such nonsense, can you?

**Q:** (L) Well, I have tried to explain to them that it doesn't matter where you are or any preparations that you have made along this line, but it is important as to WHO you are and what you SEE. And, seeing is based on awareness, and awareness is based on knowledge. Therefore, it seems to me that the only thing one should be occupying oneself doing is gathering and gaining knowledge.

**A:** Closer.

**Q:** (L) Can we get closer than that?

**A:** No.

**Q:** (L) Okay. Let's move right along here. Bill also says that what he thinks is part of the preparation for 4th density is an extensive effort toward the methods of creating our own reality in the sense of using visualizations toward a desired end with enough consistent emotional intensity as to manifest the phenomenon in the physical.'

**A:** Also, three cups of sugar, mixed with quinine and eye of gnute. Be sure to shake it three times over your head in a burlap sack while wearing an amulet depicting King George backwards over your left nipple. Say 14 ooms while shaking your left ankle 5 times, throw in some monoatomic gold... [at this point we are becoming aware of what is being said and laughing so hard that it is difficult to call out the letters.]

**Q:** (L) I think I get the point. You are saying that all of this stuff that people are doing is, where they think they are doing something to get them somewhere, is simply a waste of time?

**A:** Oh no, not at all, we have forgotten to mention the sage, salt and the unleavened bread!

**Q:** (L) The bottom line that I have on the subject is that anybody

who does this or that WITH THE INTENT of achieving 4th density, is following the STS mode because they EXPECT SOME RESULT or reward, and that is Servicing Self...

**A:** Yes, and they are missing the point. By the way, when does the next flight leave for North Carolina?

**Q:** (L) So, wanting to DO anything other than to just BE as fully as you can be in the here and now constitutes...

**A:** STS and... 3rd density thought.

**Q:** (L) Alright. I think that covers that! Now, let's move onto Falun Dafa. He says: 'Falun are intelligent Entities. They are cultivated by practicing Buddha law and by the movement exercises which look like Tai Chi. The emphasis is on the practice of Zhen Shan Reng, or Truthfulness, Benevolence, and Tolerance, the supreme characteristics of the universe. You gather a Falun and place it in the Dan Tien, the navel, and it revolves there, and continues your cultivation for you. [...] What I am most interested in is the idea of Falun as intelligent entities. What or who are they?'

**A:** This is still not germane.

**Q:** (L) Well, the most important issue to him is, do they exist as described by this Master Li.

**A:** Okay, so they do.

**Q:** (L) Can you gather them and cultivate them and achieve 10,000 supernatural powers?

**A:** Yes, we suppose. But first, contact your broker, secure the credit cards, remember to turn off the computer and unplug the microwave. Also, the Maple dining room set should get a fresh dose of Lemon Pledge, so as to give the authentic maple that "see your reflection shine!"

**Q: (L)** What?! Why are you being so sarcastic? All of these people know about as much as we did when we started!

**A:** Because you already know how to counsel them on such issues.

**Q: (L)** I know that! But, when I say it, it's not the same. They want YOU to tell them in specific!

**A:** Okay, we have.

**Q: (L)** Okay, in reading these various books relating to elements of the 'quest,' we find a lot of bearded white men running around dispensing knowledge and a close association between them and serpents, though there has not emerged yet a reference between the Serpent and the Templars and Christ. I suggested that I thought that were 'good guys' and 'bad guys' and that something that seems benevolent could also be otherwise upon closer examination. Mike agrees except for the mention of the 'smoking mirror' god which brought back the sacrifice. So, there seems to be the association of the benevolent guys with the 'serpent of wisdom.' Can you comment?

**A:** Many stories stemming from your history or antiquity are confused or corrupted.

**Q: (L)** Are the bearded white guys running around dispensing knowledge associated with the serpent?

**A:** No.

**Q: (L)** So, the bearded white guys are in opposition to the serpent.

**A:** Confused with.

**Q: (L)** What was the 'smoking mirror god' spoken of by the Maya?

**A:** Something like Castaneda's description.

**Q:** (L) So, it was an unfriendly 4th density dude. Now, he quotes from John Keel's book 'Our Haunted Planet.' It says: 'The parahuman Serpent People of the past are still among us. They were probably worshipped by the builders of Stonehenge and the forgotten ridge-making cultures of South America.' Were the Serpent People worshipped by the builders of Stonehenge?

**A:** No.

**Q:** (L) Who was worshipped by the people who built Stonehenge?

**A:** Complicated.

**Q:** (L) Give me some key words to work it out.

**A:** Spirit, stars, energy.

**Q:** (L) Keel also talks about Serpent people integrated in our society with holographic images superimposed over their faces. Is this ever the case?

**A:** Maybe.

**Q:** (L) As in Men in Black?

**A:** Maybe.

**Q:** (L) Mike further asks: 'How do we maximize our efforts? Maybe, once we get up to speed, we can split up and hunt on different paths. Maybe the C's can suggest a plan of action.' Can you?

**A:** Gather knowledge at your own pace; network.

**Q:** (L) Let me quickly ask about this: I read the book about Spindletop and wrote to the author with some questions, and the guy sort of blew off my questions. The question now becomes: is there ANY validity to any Meadows claim to the income from this oil field.

**A:** Wait and see.

**Q:** (L) Why did Rosine McFaddin murder her boyfriend after he had been reported to have been talking to the professional genealogist in Salt Lake City?

**A:** Fit of jealousy.

**Q:** (L) Was there any concern about something the boyfriend may have told the genealogist?

**A:** No.

**Q:** (L) Then why did she go to visit the genealogist, risking being put back in jail for jumping bail?

**A:** Love of sorts.

**Q:** (L) So, she was just a whacked out menopausal woman. Now, when I asked previously about the carriers of this significant bloodline that I am supposed to be tracking, you said to follow the trail from Morocco to Spain to France and included the Canary Islands. Also, that the bloodline was carried by those most capable. Now, I have thought that this might be the Arab connection via the Moors to the noble houses of Spain and then into France. Is this, in fact, the case?

**A:** Yes.

**Q:** (L) Okay, you said that the artefacts provide the key. I had a dream the other night that the artefacts in question were the major arcana of the Tarot deck, that they could be used to discover the mystery. Was this a legitimate clue in my dream?

**A:** Tools. So are astrological charts.

**Q:** (L) In doing this bloodline tracking, I came across this fellow who was the Gallo-Roman Senator named Tonantius Ferreolus. Is this individual descended from Jesus/Jesinavarah?

**A:** This is certainly a possibility.

**Q:** (L) You said that Jesinavarah had three children with three Roman women. I never asked if they were male or female children. Were they male or female?

**A:** Vella? What would you suppose?

**Q:** (L) The names Vella, Rafae and Alicia were given as the names of the three women who were the mothers. Was I mistaken and did I garble it when it was really the names of the children?

**A:** Sometimes, one follows another.

**Q:** (L) What were the names of the children of Jesus?

**A:** You have the clues, and your quest has been admirable so far, why stop now?

**Q:** (L) So, I will find them! Okay.

**A:** Could be like the Holy Grail.

**Q:** (L) What could be like the Holy Grail?

**A:** Chalice.

**Q:** (L) What does the chalice represent?

**A:** What is its root?

**Q:** (L) Okay, why are dogs represented in the Egyptian mythology as the 'opener of the way?'

**A:** Guards, guides.

**Q:** (L) What is the point of this quest? I know it is something that utterly fascinates me and I want to solve it...

**A:** Keep going.

**Q:** (L) It's not a waste of time? I mean, it's not gonna get me to 4th density, I'm just doing it because I like it, I guess.

**A:** If you did not do it, what would you do?

**Q:** (L) Well, I can't think of any puzzle that is more fascinating or interesting except maybe building a time machine, and I am of the opinion that the answer to this puzzle will lead to a time machine.

**A:** Maybe...

**Q:** (L) Okay, I have been hearing funny popping and crackling sounds in the psychomantium at night. The other night I even saw an Egyptian guy walking back toward the mirror along the side of the bed where I was. He looked exactly like one of those carved images with the funny perspective. It seemed that he must have come out of the mirror, interacted with me in some way, and I was awakened by his presence as he was going back... We have been sleeping regularly in the psychomantium and there is a HUGE increase in frequency and clarity of dreams. There is an interesting energy in the tent. Who or what was this being I encountered?

**A:** Find out.

**Q:** (L) Is there anything we can do to enhance this process? We sleep in it and are trying to just be used to it being there without expectation.

**A:** Good.

**Q:** (L) Is it a doorway that can be used while we are sleeping?

**A:** Yes.

**Q:** (L) Do we use it while we are sleeping?

**A:** Probably.

**Q:** (L) Anything you want to add about the psychomantium?

**A:** No.

**Q:** (L) Is everything progressing as it ought to?

**A:** Oh, Laura!

**Q:** (L) What does that mean? Are you just frustrated with me for asking a silly question?

**A:** Close. Good night.

END OF SESSION

## **6.33 October 10, 1998**

Frank, Ark, Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Hidorra.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have a couple of short questions that I would like to get in very quickly. C\*\*\* wanted to know if there was any significance to the fact that I was born on Lincoln's birthday and she was born on the day Lincoln died?

**A:** Not especially.

**Q:** She also wanted to know if there was any significance to the fact that we were both born on the same line of longitude, and exactly 10 degrees of latitude apart?

**A:** No, as this is true with endless combinations of people.

**Q:** I would like to ask if there is any significance to the fact that Frank is being afflicted in the area of his gallbladder, considering the relation to the word ‘Gaul?’

**A:** Only significance is that this is an unnecessary organ, much like the appendix.

**Q:** You say it is unnecessary. Was it ever necessary?

**A:** In earlier models... When one receives message of pain there, could it be symbolic of advancement of neophysicality?

**Q:** Are you asking me? I have known a lot of people who had pain there who are just unhappy people.

**A:** But why unhappy? Think, my dear... And remember, your consciousness operates on four levels, not just one!

**Q:** And what are these four levels?

**A:** Physical body, consciousness, genetic body and spirit- etheric body.

**Q:** Are those the four composites of the human manifestation in 3rd density?

**A:** 3rd and 4th. One leads oneself, through physical actions, as well as psychic ones, to develop these “problems” when one is preparing to “bump it up” a notch.

**Q:** Very interesting...

**A:** Now, a gentle warning: soon you too, Laura, will experience something similar!

**Q:** How similar?

**A:** Exactly similar!

**Q:** Is Ark going to be sick too?

**A:** Not likely, as his chemistry bypasses it. In other words, his gallbladder is functionally obsolete, it is comatose, as a result of diet and psychic nature.

**Q:** Alright now, anymore on this before we go in another direction?

**A:** Well, what do you think of that?!?

**Q:** I think that he must have bumped up a notch or two already.

**A:** Maybe... but you are all advanced... Why do you suppose you have adopted the dietary practices you have?

**Q:** Because they seem to be the only ones that work to keep me from being sick. I can't eat like other people... never have been able to.

**A:** It will be interesting to see what happens post removal...

**Q:** After the removal of Frank's gallbladder?

**A:** Yes, and...

**Q:** Now, listen here! I don't want to go in the hospital! I'm scared of hospitals! I'm scared of doctors. I don't want needles stuck in my veins. I don't want to be put to sleep, and I don't want anybody cutting on me! I swore I would NEVER do it again!

**A:** That will change when nature starts singing her song. We suggest you start now to concentrate on weightloss, as this will make the process much easier on you!!!

**Q:** I would like to know what you propose that I do to lose weight because I already eat almost nothing.

**A:** Almost nothing presents as a great gulf of distance between it, and nothing!

**Q:** So, you are proposing that I should just fast - eat nothing?

**A:** What is wrong with that?

**Q:** Okay, I'll have at it. Are we done with this subject? You want me to fast... I want to ask about remote viewing. Is it okay to ask about this?

**A:** Why would it not be?

**Q:** I just want to make sure that we are ready to change gears so drastically. There are people who claim to 'remote view,' and I think that it is possible and probable. In specific, when a person is remote viewing, are they able to view other densities when doing this?

**A:** Sometimes.

**Q:** Is there any way to tell when you are viewing other densities as opposed to 3rd density? Is there any distinguishing characteristic?

**A:** That would be up to the awareness of the viewer.

**Q:** Is a person who is capable of remote viewing in higher densities, generally capable of perceiving higher densities in a 'normal' state?

**A:** Maybe.

**Q:** So, if a person is unaware of higher densities, are they still able to remote view higher densities?

**A:** The viewer must have a "clue" as to the view.

**Q:** What do you mean ‘a clue?’

**A:** Review your previous question.

**Q:** I see. So, it IS connected to the ability to perceive higher densities in general awareness. Okay, in particular, is it a condition of remote viewing higher densities, assuming one has the general awareness of higher densities, that one is able to look in all directions at once; that is, to sense oneself as a ‘point’ of consciousness and to perceive material reality as being somewhat amorphous or fluid; is THAT evidence of viewing higher densities?

**A:** It could be.

**Q:** Is there anything that one could look for in a remote viewing exercise that would clearly indicate that one is NOT viewing higher densities?

**A:** These questions are a bit elementary for you, when one thinks of that which you already know.

**Q:** Well, my opinion is that, depending upon the scenario that is presented, and the way it is presented, that one could tell. And, there are a great many people who are doing remote viewing, who are claiming to be remote viewing higher densities, and getting information that is clear to me that it is what somebody at higher densities WANTS them to think, or WANTS them to see and MANIPULATES them to see.

**A:** It is a two way street.

**Q:** So, individuals COULD remote view higher densities to see what the higher densities are up to?

**A:** No. Expectations... ? Anticipation... ? Prejudice... ? What have we told you?

**Q:** Is it possible that, when one person gives a target to another

for a remote viewing exercise, say, as just a code number, can the person doing the remote viewing use this exchange as a means of locking in on the frequency of the person giving the assignment?

**A:** Close.

**Q:** So, if I were to give an assignment to someone, this person could then lock in on our frequency here and remote view us?

**A:** Maybe. Try it.

**Q:** Well, Ark doesn't want me to because of his work. He thinks everybody is a potential agent.

**A:** Spies do not ask.

**Q:** I just have a lot of reservations about remote viewing in general. I think that it is just a different name for practicing clairvoyance. And, I am not so sure that people who claim to be able to do it as they claim, are really able to do it. In other words, it is like a talent, some are better than others.

**A:** Yes, you are right.

**Q:** I want to ask a little bit about this book, 'The Tomb of God,' and the clues it has given me, or that I THINK it has given me, to tracking this treasure in the Rhineland. Is this book, and the clues that I believe that I have found in it, one of the major conjunctions that you mentioned in a previous session?

**A:** Yes, but add some flour.

**Q:** What? Add some flour? Why did you say 'flour'?

**A:** Why do you think?

**Q:** What does flour do when you add it?

**A:** Clues, my dear, clues. That is what these are.

**Q:** What is the result when one adds flour?

**A:** Emulsion...

**Q:** What does one get from an emulsion?

**A:** Transference.

**Q:** Where should I look for the flour?

**A:** Whey.

**Q:** Am I correct in my idea that these paintings from this manuscript produce...

**A:** Your are still on the trail... But one always when termination is at hand.

**Q:** What? Termination is at hand?

**A:** Resolution.

**Q:** Were these guys in any way at all onto something when they came up with the idea that Jesus was buried in France near Carcassone?

**A:** Oh we cannot tell you that.

**Q:** Is there a time gate where this treasure is buried in the Rhineland?

**A:** Stones.

**Q:** Is there any clue you can give me as to what to be looking for specifically?

**A:** And you shall find that...

**Q:** I see. Well, is there some STS force working through A\_\_ to cause these repeated disruptions on Saturday nights?

**A:** Maybe.

**Q:** Has this STS force operated through this kid Matt?

**A:** Maybe, but there are many portals, as always.

**Q:** I had a dream last night that I should file this claim on this Spindletop case because something would be decided within a month. Was this dream symbolic of something else?

**A:** Analysis is needed.

**Q:** I have conjectured, that since you have not told me that I am wasting my time with this genealogical research, that maybe I am not wasting my time. I have also thought that, perhaps it may not be necessarily directed at that objective, but at something else, otherwise you would tell me as you have on other occasions, not to waste my time, that it is a dead end.

**A:** Do you think you are wasting your time?

**Q:** I like doing it, and sometimes when I am doing something that I like so much, tracking something down, I feel a little guilty, like I ought to be doing something unpleasant, and maybe I am enjoying it too much!

**A:** No.

**Q:** Should I try to analyze that dream here and now?

**A:** Open.

**Q:** What are the possibilities of anything coming out of this Meadows line claim on these mineral rights to Spindletop?

**A:** Instincts?

**Q:** My instincts say that anything possible, especially when 4th density is activated.

**A:** Okay.

**Q:** But, base on the material information, there is a very low probability.

**A:** Ah? We have doubts... And yes, we have always said that you create your own reality!

**Q:** Well, have YOU said that we create our own reality?

**A:** When did we not?

**Q:** Well, but you have also said that anticipation messes things up, and so I don't want to have any anticipation.

**A:** Anticipation is not creating one's own reality.

**Q:** Just give me one word of something in this direction because I don't want to take up any more time. I mean, for ten bucks I can file, and if it happens, it happens. It's no more than buying a few tickets to the lottery. I suppose I have about as much chance of that happening as I have of winning the lottery. I am not going to anticipate that or anything.

**A:** Good.

**Q:** That's all you are going to say about it?

**A:** Yup.

**Q:** (A) I want to ask about the meaning of my dream, which was so vivid... about Elohim and Seraphim. What was the meaning of this dream?

**A:** Peace torch.

**Q:** (A) What is peace torch? From whom?

**A:** Not from. All considered before decision on judgment.

**Q:** (L) That makes no sense at all.

**A:** Yes it does.

**Q:** (A) Who were the Elohim?

**A:** Elohim refers to past, as a connection to future as envisioned in your dream. It is the connector that counts, see?? Ruling council of Od; Odiem.

**Q:** (L) What about the Seraphim?

**A:** Council in clouds... We are speaking of advanced insight here.

**Q:** (L) Why were there 300 Elohim and 301 Seraphim?

**A:** Who is the odd one out?

**Q:** (A) Who is the odd one out?

**A:** Check your roots. Od, odiem, odd, could we spell it out any clearer for you? Not without abridging free will!

**Q:** (L) Who is Sara?

**A:** Roots.

**Q:** (L) Who is the 'King of the Angels'?

**A:** No more spoonfeeding. Gerbers is out of stock!

**Q:** (L) Okay, go on...

**A:** Arkadiusz is supposed to be asking about this. It was his dream.

**Q:** (L) Alright. I'll hush. (A) I cannot ask now anything about that as I know nothing about this 'od.' So, first question: Sometime ago we were asking about the comet cluster, when it will come, and you answered '0 to 14 years' from now.

**A:** Yes.

**Q:** (A) I would like to know first, when you say 0 to 14, is it absolutely sure that it will be 0 to 14 and not 0 to 15, and you can

assign some very small probability that it will be MORE than 14 years? Is it really certain?

**A:** Nothing is certain. The course of the lessons is dictated by the progress of the studies.

**Q:** (L) [Whispering to Ark] Ask about the gamma rays...

**A:** No, Ark has the floor. You are in the quiet chair now. Or, Ark could be excused to go do chores if you wish.

**Q:** (A) Nothing is certain, but is the concept of probabilities, as it is used in the Seth material, legitimate? Can we speak about probabilities?

**A:** Yes.

**Q:** (A) Can you assign a probability to this period 0 to 14 years? How big is the probability?

**A:** Big.

**Q:** (A) How big? How close to 1?

**A:** 82 per cent.

**Q:** (A) Okay, so it is 82 percent that it will happen between 0 to 14 years. Can you assign a probability to the idea that it will happen between 0 and 7 years?

**A:** No, because that would disrupt your learning channel.

**Q:** (A) How are you calculating this 82 percent probability? Do you just compute all different worlds and this is in how many years this can happen accordingly?

**A:** The computation is based upon the calculation of all the possible variables factored against the window of the “time” frame.

**Q:** (L) So there is a window of opportunity, so to speak? A period in which this CAN occur, and if it were to be forestalled in some way beyond this 14 year period, does that mean it would NOT occur?

**A:** End word.

**Q:** (L) Is that what you meant? 'End word?'

**A:** Yes.

**Q:** (L) What does 'end word' mean?

**A:** Who knows. We like Ark to have the floor when it is time to dance. '

**Q:** (A) Why are you telling me that telling me anything about a 0 to 7 year probability would disrupt my learning channel? I would like to know what the curve of probabilities looks like. It would disrupt in what way?

**A:** 0 to 14 years is enough for now. Can you imagine what would happen if we told you that the cluster was going to blast into the picture next year?!? You would then demand to know the precise day and the hour. You would let this dictate all your activities hence, and that would be it.

**Q:** (A) About this Kozyrev book: they describe experiments with a kind of torsional pendulum which is very sensitive and is covered with a glass, and they take other precautions. Apparently, when there are irreversible or dissipative processes going on, there is some force acting on this pendulum. This can be anything that is irreversible. For instance, it can be gamma radiation or light from a distant star which causes the pendulum to move, or it can be the evaporation of acetone nearby, and they use this as a test. What kind of a force is acting on their device?

**A:** Inertia.

**Q:** (A) How can inertia be produced by evaporating acetone?

**A:** What is beneath the acetone, though?

**Q:** (A) Underneath? Something supporting this acetone, is this what you mean?

**A:** What gives birth to it?

**Q:** (A) I don't understand. There is a piece of cotton saturated with acetone and it evaporates. It evaporates and then this device moves. What is beneath the acetone? Acetone is evaporating from a piece of cotton.

**A:** What is the chemical breakdown of the acetone? What compounds make up the acetone??

**Q:** (A) Well, it is not important that it is acetone. It can be any irreversible process. It can be somebody thinking nearby; it can be somebody getting a fever; it can be something breaking into something; it can be a comet hitting Jupiter. How does this cause... it is not a question of acetone... a thought can move this device. What kind of force is it?

**A:** But then why choose acetone for the test?

**Q:** (A) Because acetone evaporates very fast... it is an irreversible process.

**A:** Why is this?

**Q:** (A) Okay. I will think about this. I cannot answer at present. I will see. So, that was that question...

**A:** We would like you to come back to us with your findings in another session.

**Q:** (A) A not here session? (L) Another session!

**A:** You teach her the Polish, you perfect your English faster and further, my boy!

**Q:** (L) I'm learning - about one word a month! (F) Oh! At that rate you will be fluent in about 2,087 years! (A) Why is teaching Polish so important?

**A:** We have told you before. Review.

**Q:** (L) I think it has something to do with me being able to figure out clues hidden in word roots.

**Q:** (A) Can space with fractal properties, non-differentiable structure, non-smooth structure, be used to derive Schroedinger equation and quantum theory like the Nottale is proposing in some of his papers?

**A:** Close.

**Q:** (A) What is incorrect? Why is it only close?

**A:** Light bends at intervals. Look to the quasar for the clue.

**Q:** (A) Okay, I will. Now, I was communicating a little bit with a Finnish guy, Mattie Pitkanen, and he has a lot of material on his web pages and in his publications, which are very close to what I am thinking. First question, is he somehow channeling through his publications?

**A:** Yes.

**Q:** (A) Who is he channeling?

**A:** All the masters have channeled, whether aware or not. The "who" is not Germaine.

**Q:** (A) It is not important. Now, he is talking a lot about p-adic numbers which are different from real numbers, and they are related to prime numbers, and it is a whole big area which may

be important for development for the right mathematics for the future. What about p-adic numbers? Are they important?

**A:** Yes.

**Q:** (A) Should I learn them?

**A:** With room for alterations the key to quantum jumps is always in discovering “new” mathematics.

**Q:** (A) Now, concerning new mathematics, I wanted to ask also, because I have received an elaborate treatise from somebody in China who is sending this treatise to all the greatest mathematicians of the world, and apparently I am one of them, and this is about what he calls the mathematics of Unified Field Theory which is based on I Ching. There are a lot of things that are very hard to follow. It is all about Chi and the way the Chinese philosophy tells us that our mathematics should be built on a different principle. Why am I repeatedly getting this? Is there some meaning, that I should really look into this?

**A:** Yes.

**Q:** (A) What, in particular, should I pay attention to?

**A:** The connection between philosophy and math.

**Q:** (A) A connection between philosophy and math. Okay, I will look.

**A:** You will find.

**Q:** (A) When I was asking about UFT, you said I should go back to 1969. I went back to 1969, but I don't have any notes from then, so the only thing I can remember that I was doing then which could relate, was that I was thinking about certain algebraic machinery which tells us that there is a kind of perfect symmetry between matter and anti-matter. Was this the clue?

**A:** Yes!

**Q:** (A) I was looking for the connection between the square root of 13 and  $\phi$ , and I couldn't find any. So, my question is, when you say square root of 13, do you mean an ordinary square root, or using one of these p-adic number fields?

**A:** Latter.

**Q:** (A) But, if so, then last time I took the calculator and computed the ordinary square root of thirteen; yet you did not stop me at this point, but ask me to subtract from this ordinary square root, the number  $\phi$ . So, if it is not an ordinary square root, as you suggest, I would expect that you would not ask me to subtract from the wrong number!

**A:** We did not ask you to subtract from the "wrong" number. Besides, you did what you are supposed to do; think!! This quest is for you. Our prime channel is becoming weak and fatigued, so we must now go!

**Q:** (A) Very funny. (A) Why are you laughing? (A) Because I am always left to the end! (L) Next time we will start with your questions! (A) This is not the first time you are telling me this! (L) Last time I let you ask all your questions first! (A) Last time?! Last time I was sleeping in this chair. I had no questions! (L) That's not so! (A) Yes, I was sleeping in this chair, I could not even make notes. (L) But there have been other times when you asked all your questions first! (A) You have been asking your questions for how many years! I will teach you Polish, you will see! (L) You are going to teach me Polish...? (A) Yes...[speaks Polish] (L) Are you saying something MEAN to me? (A) it is not funny at all! That is what I am saying! I WILL teach you Polish!

END OF SESSION

## 6.34 October 31, 1998

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Eggedora.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

{Note: There had been growing issues in our minds about “Frank” at this point in time. I finally devised a way to ask about them by substituting Terry’s name for Frank’s, and Jan’s name for Frank’s sister. There are actually a number of questions about Terry in the transcripts that are actually about Frank, but since Frank was present, I had no other way to ask than to create a code so that the Cs could communicate with me without Frank being alerted. As things turned out later, this dream describes exactly the dynamic with Frank and his sister.}

**Q:** I would like to address a couple of things before Ark gets on to his questions if any. First of all, I had a dream the other night about Terry and Jan. In the dream, Terry was at my house and it was the old house up in Hudson. He was going through the house claiming that I had things that belonged to them, such as books, which I did not have, in fact, they DO have books which belong to me. Nevertheless, since he could not find anything that was theirs, and I spent some time allowing him to look through everything to prove the point, he began collecting all sorts of little things such as bars of soap, even used soap, cosmetics, and an old book that he claimed because I could not identify it as mine, and

it was damaged by water and useless. He kept going around the house saying “isn’t that mine? Isn’t that mine?” and on and on. Finally, I got mad at my time being endlessly wasted and the fact that he did not believe me, and I ordered him to leave my house and never come back. He left reluctantly and soon was back with Jan. Jan was then trying to placate me and being all sweet and huggy and said “I heard you had a little tiff with Terry,” and she did not realize that it was NOT a little ‘tiff,’ I had simply HAD it with BOTH of them. I was boiling mad, and she was saying “I know you have stuff that belongs to us,” and SHE started poking around here and there, and they even went to the opening to the attic and started pulling down the insulation in the roof to see if I had hidden stuff that belonged to them up there! They just couldn’t find anything, but they kept saying that they were SURE that I had something that belonged to them, and it seemed to be mainly books. Could you tell me what this dream represents?

**A:** Your reflection of them.

**Q:** My reflection of them?

**A:** Yes.

**Q:** In what sense? I don’t understand what you mean?

**A:** Your view.

**Q:** So, my view of them is that they are trying to take something from me that doesn’t belong to them and insisting that it does?

**A:** Close. Maybe something you do have.

**Q:** Trying to take something from me that is mine by claiming that it is theirs?

**A:** Yes.

**Q:** Any other comment on this dream? This was rather threaten-

ing to me and I thought I ought to examine it because it was so realistic.

**A:** There is a karmic “twist” between you and them.

**Q:** What is the karmic twist?

**A:** Just as it is... Unresolved issues, like kids playing in the sand box.

**Q:** Is there any indication from this dream that they are going to swoop back into our lives?

**A:** Well, they probably will, will they not?

**Q:** I don’t know. I thought it was singularly unpleasant.

**A:** You fascinate and frustrate them.

{Personal exchange redacted.}

**Q:** Now, the other night, in front of the psychomantium, I did not exactly have a vision, but something came into my head, and the idea was that prime numbers are important because, the principle that they are only divisible by themselves and by one is indicative of the fact that they are direct links, channels, or conduits to seventh density, or first density, or something...

**A:** How about all densities?

**Q:** Okay, that is sort of what I mean, that they are, in a sense, gateways - would that be a good term?

**A:** Close.

**Q:** How does one utilize the energies inherent in prime numbers in this respect? Do they represent frequencies or frequency relationships?

**A:** Verities.

**Q:** Is there any formula, or any thing about prime numbers that makes it easier to find them... anything about them that is unique?

**A:** Pyramidal.

**Q:** Pyramid relationships would help one find prime numbers?

**A:** Graph.

**Q:** A pyramid type graph. Okay, anything else about prime numbers? When you said that they were the 'dwellings of the mystics' I had an idea that a prime number could be a dwelling of a mystic because the individual would express in some manner a frequency that related in some way to a prime number. Is that somewhere along the line...? That mystics can traverse all densities because of frequency?

**A:** Something like that.

**Q:** My next thought was that it could indicate actual places or locations in space time on the planet that would be represented by coordinates.

**A:** Zuber.

**Q:** What does THAT mean?

**A:** Research.

**Q:** Okay. Now. This woman with this book "The Horse of God," talks about the shadow of the horse in the Shepherds of Arcadia painting that is evident if you turn it upside down. I know that I dreamed that the painting was a map. In terms of this map, what would be the zero meridian that one would use to place the map?

**A:** There need not be a zero meridian.

**Q:** Is there any one thing... I doused the picture, and it seemed

that the head of the kneeling man with the beard was the important figure. Where, on a map, would one place this head in order to have the other figures in correct alignment?

**A:** Best to split the image, head to head. Vertically.

**Q:** Split the image and put the same guy head to head to his own head?

**A:** Close.

**Q:** Now, when you were saying that I needed to get a better 'handl' on it and I found...

**A:** Have you overlooked North America? Check Atlas indices for names to pique interest.

**Q:** What names?

**A:** Oh now, we cannot tell you that!

**Q:** The reason I have been focusing on Europe is because you said that this thing we were supposed to find was in the Rhineland...

**A:** But there are always connections, both hither and yon. Tricky those Rosicrucians, tricky. And what of Piri Reis?

**Q:** Well, I was already lost in a sea of puzzle pieces. Nothing like making it harder!

**A:** Or easier. Template... Templar.. Temporary. Temperature... prime numbers, prime rib... Primary.

**Q:** Oh God! I thought it was bad before, now it is worse! We were talking about, at some point, going to France and checking some of these things, and even finding a place to live that belonged to these families...

**A:** Patience.

**Q:** Well, obviously, we would have to have a LOT of bucks to do any of this so it is out of the question at present. Now, Mike wanted me to ask about this time when remote viewing was effective. Is this in fact true, and if so, why?

**A:** Remote viewing requires the accessing of the imagination situation.

**Q:** How does that relate to the time of day?

**A:** When it is 03:33 at 33 degrees, what is it at 66?

**Q:** I guess what this means is that when it is one time in one place, it is a different time someplace else.

**A:** Hours are determined by those who set them.

**Q:** Indeed. So, it works if you think it does?

**A:** Constraints produce restraints.

**Q:** I want to go back to the Terry and Jan issue because I think that there is something important here. You say that I fascinate and frustrate them. What is it about me that fascinates them?

**A:** Is it not obvious?

**Q:** I don't know. What is the source of the frustration?

**A:** Same.

**Q:** You say that there is something obvious about me that fascinates them...

**A:** Not just you, more like you all.

**Q:** What is it that frustrates them? That they cannot control me, they cannot be in charge, or that they want something that we have?

**A:** All those.

**Q:** Now, I have long wondered about something you said to Terry, about him being connected to a thought center called Neormm, and that it was related to orimulsion, and this is some kind of a fuel. I wonder if you could clarify that remark. What is Neormm?

**A:** Not yet.

**Q:** You also made a remark to Terry once, “oh Terry, the battle is always, it’s when you choose that counts.” What do you mean by “when you choose.” I thought that time did not exist, so why did you make this remark to him?

**A:** Remark was for him.

**Q:** Did that indicate that he was not choosing something, or that he ought to choose? I know I am poking into his business.

**A:** Yes, you are.

**Q:** But in the sense of his interaction with us, it would be useful to know if he was a robot person, programmed to disrupt, a psychic vampire, or something other.

**A:** The issue here is not him per se, but the blend in a karmic sense. Obviously, these people hold an inordinate level of your consciousness. So why is this? If you seek answers, it is wise to not leave doors unopened.

**Q:** What kind of doors? Leave the door open to Terry and Jan?

**A:** No, it is the quest we speak of. One cannot find clues without understanding the interpreter.

**Q:** Could you be a little bit clearer? I am just not grasping this!

**A:** Why do Terry and Jan enter your dreams? Do you suppose it is because you have no interest?!? We think not!

**Q:** What doors... am I leaving some doors closed?

A: Yes.

Q: What could I do to open these doors in a practical sense?

A: Look within.

Q: Is there something I can or should do to disconnect?

A: Explore the issues.

Q: (A) I was trying meditate and I have discovered that I don't think it will work for me. I don't know how to do it...

A: Remove ripples, adjust light.

Q: Do we need to move the light backward, forward, or dim it?

A: Back it up and dim.

Q: In general, is the structure as we have it adequate? It seems to have really good energy.

A: Getting there.

Q: Well, it has the size, and the lines of the structure seem to concentrate energy, and there have been a few interesting experiences in there...

A: Sparks, yes, but no flame yet.

Q: (A) I was thinking that for me it will not work at all unless I can write something down, because otherwise, it is not recorded...

(L) I think that is a good idea to take a pad and pen and write whatever comes to you...

A: Yes.

Q: (L) You don't have to see what you are writing...

A: Writing has always worked for Ark.

**Q:** (A) Well, if it is true that writing has always worked for me, is it also true that this psychomantium environment will help?

**A:** Yes.

**Q:** (L) Just write in bed, in the tent, every night before you go to sleep. (A) Is there any way we can improve or change the way we are having our sessions with the board?

**A:** Room.

**Q:** We are working on changing the room.

**A:** Okay.

**Q:** I know that back room is a better room, and maybe I should just clean it out so we can use it. (A) Why is the other room better?

**A:** Energy vector.

**Q:** (A) Why is the energy vector in the other room better than in this room?

**A:** It is conduit.

**Q:** Where does the conduit extend from, above or below?

**A:** Both. Like static electrical charge.

**Q:** (A) What about conduit in the bedroom where we have put this psychomantium?

**A:** Psychomantium utilizes one's own psychic body, thus is portable to a greater extent. But, if you were to place the structure there, it would enhance things...

**Q:** It would enhance things psychomantium-wise or board-wise?

**A:** Each.

**Q:** Well, the only problem with putting the psychomantium there is there is nothing to sit in as comfortable as it ought to be...

**A:** As of now.

**Q:** What are we supposed to do? Have a whole complete room for it?

**A:** That is how it is generally done. Just ask Michel de Notredame.

**Q:** Then, I just need a different house! I need a dining room and new kitchen!

**A:** Have you had this since 1990?

**Q:** No, and it is a real pain!

**A:** Oh, the pain, the pain.

**Q:** So, what you are saying is that you want me to take the psychomantium, set it up in the back room, put the table back there, get some comfortable chairs...

**A:** We don't "want" anything. Suggest? Oh yes, we do this.

**Q:** Okay, we filed the forms with the INS people. Do you foresee any problems with that?

**A:** No, just "redtape."

**Q:** Well, we KNOW that! (A) Now, apparently, everything is going well, and for a while, I think I will have more time to start some real research, and I would like some advice because we don't know how long I will have this time. What would be the first priority for me to work on for now?

**A:** The journal, to start with. One's objectives should be outlined. The scientist usually begins with this for "fine tuning." We see more opportunities coming though. We led you to the garden, and you planted the beanstalk. Now watch it grow, Jack!

**Q:** (L) That doesn't mean there is going to be a giant going around saying "fee, fie, foe, fum," does it?

**A:** The giant is in the meaning.

**Q:** You mean we gotta kill a giant?

**A:** No.

**Q:** (A) I also wanted to ask if I should be more active and ask more questions in future sessions, or to ask less questions and work more on my own?

**A:** Questions open the doors, Arkadiusz.

**Q:** (L) I want to go back to this beanstalk!

**A:** Well, what of the fable?

**Q:** (L) Well, Jack got these beans and planted them and they grew. He climbed the beanstalk and figured out how to transform or kill the giant, and got the treasure, and ran away and chopped the beanstalk down so the giant couldn't get him. (F) I remember that he used the beanstalk to get to the same level with the giant. (L) Well, which does it mean? Does he use the beanstalk to rise to the level of the giant, get the treasure and live there, or does he run away with the treasure and chop down the beanstalk?

**A:** Take your pick.

**Q:** (L) Well, the essence of the story is that Jack was successful. He planted these magic beans and they REALLY grew, like OVERNIGHT! He woke up the next day and the beanstalk reached all the way to the clouds - that is how fast it was. I guess that what you have been doing in this job is planting magic beans that are gonna take off and grow like crazy and be a ladder you can climb to some giant success! If I remember correctly, there was a harp involved. (A) I want to ask if these

sessions we are having are affecting Frank's health in a negative way?

**A:** No, but as always, the channeling is a wee bit draining. No harm done, but the following hours provide a needed regeneration sequence.

**Q:** (A) It seems to me that I notice that when I ask some difficult or mathematical question, that Frank becomes instantly very tired. Is there anything to this? How should I ask these questions to get answers and not to make Frank sick?

**A:** This does not make Frank sick.

**Q:** (L) We notice also that when we hang out without doing the channeling. The last couple of weeks when we did not do a session, we all became very tired, so that even the next day, it was like being completely drained. Was this because of his recent sickness, or because we weren't channeling and we were supposed to ... (A) Or because there were some energies around?

**A:** A, B, C.

**Q:** What were the other energies?

**A:** There are always other energies near you because your work attracts them.

**Q:** (A) I want to ask about this blood type diet. My opinion is that this is a silly book and it has nothing to do with reality... (L) It's working for Frank... (A) Well, what about this book? I have the idea that the author just invented stuff out of his head. Am I right?

**A:** Not really, but the RH factor hones it in better.

**Q:** (L) Can you tell us how the RH factor will affect it to refine what this guy says?

**A:** Exactly.

**Q:** (L) We did a little muscle testing to find out what type Ark is and it said A, but also responded to B, so my guess is he is AB. (A) But does it matter what type I am?

**A:** Yes, and find out.

**Q:** (L) Okay, I will send for the test. (A) Even if I am AB, I will just eat what I want to! (L) He knows what he likes to eat and what makes him feel better, and that includes chocolate and Oreo cookies... (A) Now, I want to ask about Klaus Baumann who apparently just died of a heart attack, which was suspicious to me. Was the cause of his death natural?

**A:** Depends on how you define “natural.”

**Q:** (A) I have two theories. One is that it was due to the presence of this Max Planck place nearby, and the other is that it was because of his research.

**A:** The institute hurts some, including Ark.

**Q:** (L) I wanted to ask what was Jesus’ blood type?

**A:** B negative.

**Q:** (L) A lot of people say it was AB...

**A:** No.

**Q:** Another thing I wanted to ask was this: I was reading that it is impossible for two blue eyed people to produce a brown eyed child. {name redacted} has brown eyes and both her parents had blue eyes. What does this suggest?

**A:** Not true. If grandparents carry the dominant gene, will occur in about 1 in 87 cases.

**Q:** That's not true. In order to have blue eyes, a person must receive the blue eye gene from both parents. Once a person has their set of eye color genes, that's it, it is what they have! In order to have blue eyes, they must have two blue-eye genes. If there is a blue and a brown, the child WILL have brown eyes because the brown eye gene is dominant. A person with brown eyes can carry the blue gene, but will have brown eyes which is why two brown eyed people can have a blue-eyed child. Even though they have the blue gene, the brown is dominant, but they can pass the blue to their child. But, if a person has blue eyes, they CANNOT have the dominant brown gene. The blue eye gene is recessive.

**A:** But you have overlooked the "speckling" effect. Some blues are really blue/brown.

**Q:** Eye color genes can mix?

**A:** Close.

**Q:** I would like for you to give me a super-duper, hunky-dory, knock-me-off-my-socks clue to my treasure hunt.

**A:** Chevin.

**Q:** That's it?

**A:** Yes.

**Q:** No more?

**A:** No.

**Q:** One last thing, apparently Ed Dames supposedly saw this gamma ray blast that occurred in August, even though there is some discrepancy in when it may have occurred. Now, he has remote viewed some other dreadful event in the spring of this coming year. Is something going to happen in the spring that is going to make it unnecessary for people to make plans?

**A:** Is not this always being predicted?

**Q:** Yes, they predict it and then offer to sell you the book on how to survive it.

**A:** Why? What are they going to do with the proceeds from the book?

**Q:** How fast is the bean stalk gonna grow?

**A:** Wait and see. Goodbye.

END OF SESSION

## **6.35 November 7, 1998**

Frank, Ark, Laura (later, BRH via telephone)

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Ammiliwae.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We will be having a guest later on, but before we do that, I want to ask about my daughter, A. You said that I should not ask her to find her own place, and I didn't, but she decided to do it against my wishes. Is she going to be alright?

**A:** Which makes you less liable.

**Q:** Makes me less liable, for what or to what?

**A:** “Abandonment.”

**Q:** Is she going to be alright?

**A:** What is your definition of “alright?”

**Q:** I don’t want to have to bury my child, and I don’t want her to be maimed or crippled or physically hurt, and I don’t want her to be maimed or crippled or hurt emotionally.

**A:** Some of those have already happened.

**Q:** Obviously she is emotionally or psychologically crippled in some way. Can you tell me what’s the cause? What did I do wrong?

**A:** Do you believe you did wrong?

**Q:** I KNOW I’ve done wrong. I am NOT a perfect person. I have been in all kinds of states of mind during the past 20 years. I know I’ve done wrong.

**A:** Do you subscribe to the notion that parents “shape” their children?

**Q:** No, I do NOT subscribe to that notion. I think that they are who they are and they either... what’s at the root of her problem?

**A:** Well, certainly past lifetimes reflect there. Also, you yourself know where the “electra complex” resided. Hormonally driven desires to be “loved” drive some to extremes... Remember to pay attention to the words we place into quotes, you have been “slipping” there lately.

**Q:** Well, I didn’t think I had. I always pay attention to the words in quotes. So, you are suggesting that some of this has to do with L?

**A:** In an offhand way.

**Q:** In anything else you can tell me? I have been really upset. I need to know something here to help clarify things in my mind.

**A:** Expect return visits. Avoid the urge to scold.

**Q:** Is there anything else I could or should do where she is concerned that would help the situation?

**A:** Vague.

**Q:** Why did she become such a liar? At what age did she make the decision that she had to lie?

**A:** That is a habit from observance.

**Q:** Observance of what?

**A:** Whom.

**Q:** Observance of whom?

**A:** Who else lies?

**Q:** Well, L lied continuously to everyone including himself. And the bad thing was, he was not even conscious of lying!

**A:** And we have as always, the genetics factor to consider.

**Q:** My impression was, and it is breaking my heart, that she was just born STS in her soul configuration and that she is just manifesting it more fully now that she is older.

**A:** You are all born STS configured...

**Q:** Anything I can do to help her, aside from avoiding scolding?

**A:** Lessons learned are those which include no preacher.

**Q:** (A) Did I learn my lesson, or did I make some mistake in my approach to her?

**A:** Not significant.

**Q:** Why did she call the police before? What was her objective consciously or subconsciously?

**A:** Influenced by?

**Q:** Well, my other daughter, I guess.

**A:** Yes.

**Q:** Why does SHE hate me so much?

**A:** Not hate, jealousy.

**Q:** Why is she jealous of me?

**A:** You have accomplished plenty.

**Q:** I'm her MOTHER, for goodness sake!

**A:** So.

**Q:** Okay, let's move on. (A) You mentioned the term 'pyramidal' and I thought about putting prime numbers along a pyramid, around, higher and higher, but then, today, we discovered that Ulam was putting prime numbers along a spiral and there were funny patterns arising. So, I thought that maybe we should do something similar, but three dimensional rather than two. Is this the right track?

**A:** In prime numbers, you will find resonance.

**Q:** Resonance in prime numbers? Can you please elaborate a little bit on that?

**A:** Elaboration is not needed because the answers are there for you already in the texts, as with so much else. One needs only listen to the "music to your ears."

**Q:** Why didn't you answer my question about putting prime numbers around a pyramid?

**A:** Mathematics converts to sound in geometric measurements. Why do you think the pyramid became a pyramid?

**Q:** (A) It became a pyramid because it is a simple shape to build.  
(L) Did it become a pyramid because a sound shaped it? Determined its shape?

**A:** Closer.

**Q:** (L) And, what was the origin of this sound?

**A:** Those who heard it knew.

**Q:** (L) Who were those who heard it?

**A:** Those who knew how to convert math to sound. Why would the mystics reside there? Yahoo!

**Q:** (A) Somehow I have problems with following your clues, and I really don't know what is my problem...

**A:** The problem is impatience with the digestion phase.

**Q:** (A) How long can a digestion phase last? We don't have much time!

**A:** However long it takes. And who says you do not have much "time?" Answer, my Arkady, answer!!

**Q:** (A) Well, I agree that I am impatient. But, the point is that I feel that if I would have a little bit more of a clue, I could do much more, and for now...

**A:** Our words sing to you. Let them ring.

**Q:** (A) What is the difference between singing and ringing? (L) I don't think that's the point. (A) Ring is to awake? Probably. You mean I am not taking your words seriously enough?

**A:** No. We meant to let it sink in rejoice. Exult!

**Q:** (L) Would it help...

**A:** Listen to Ludwig's 9th. Combine with the prime numbers, and what do you have?

**Q:** (L) Hmm... musical notation that relates to prime numbers?

**A:** Why not bring the ninth in here now for inspiration?!?

[We put the ninth on and crank up the volume so that it can be heard.]

**Q:** (L) Okay, now we can hear it, but not too loudly.

[Turned sound down.]

**A:** That is good.

**Q:** (L) Now my question is: if you translate numbers into musical sequence or notation, does this accomplish the deed?

**A:** You are certainly on your way!

**Q:** (A) What can I do as a mathematician, or what SHOULD I do?

**A:** Let the pathway lead you. It has not yet failed Lolly. [Laughter at the use of Laura's nickname.] So you insinuate failure for yourself? Tsk tsk, my boy. Faith in this enterprise takes one places. Look where it has taken you so far!!

**Q:** (L) I think that they just mean that you need to be more patient, and do what occurs to you to do, try different things that inspire you and something will come out of it. It always does! And, sometimes, the most bizarre things... you will have an urge to do something, to read something, and something happens that hits you like a ton of bricks... and you KNOW it! It has happened over and over again! You are impatient! Yet, sometimes you are incredibly patient... You are impatient with yourself. Okay, I want to ask a question about Mike's dream. He had several events happen to

him in the dream and he thinks that it could be a screen memory of an abduction. Was this, in fact, an abduction?

**A:** Events of the dream represent mind programming.

**Q:** Does this mean he has experienced mind programming?

**A:** Maybe it is more of a warning. Knowledge protects.

**Q:** Any specific comments about his dream or anything that he could be doing in terms of his quest for knowledge?

**A:** He is on the quest already and seems to be progressing okay to us for his purposes.

**Q:** What are his purposes?

**A:** Purposes equate to pathway.

**Q:** Okay, what happened with his arm? What is the deal here?

**A:** Withheld at this juncture.

**Q:** You are withholding that information at this juncture?

**A:** Yes.

**Q:** Can you say what these things that appeared as staples or sharp things in his skin represented?

**A:** We could, but...

**Q:** Well, I am just trying to help him out here and I don't know exactly what to ask...

**A:** Exactly!!

**Q:** So, I don't know what to ask, so I will skip over the rest of the dream. He says, "Sorry to bore you with this, but something must be going on or changing in my life. The dreams are getting intense. Another one last night. I have a strong sense that they

are related. I can still feel my arm where I was cutting it. I even looked for a scar, but didn't find one, thank God. That would have sent me over the edge. The dream I had last night was quite foreboding. I was on a beach with family and friends, and someone was calling everyone off the beach to the treed parking area. I immediately got a bad feeling about that and tried to keep my family and friends from that area. I noticed some people's eyes glazing over as they got closer to the parking area. My son was heading over for a lollipop but I ran over and got him and we all got the heck out of there. There was a major brainwashing episode going on." So, I guess this was what you were talking about, the mind programming.

**A:** Yes.

**Q:** So, he is becoming aware of mind-programming...

**A:** He must ask when he has inquiries. We will be happy to answer. Then later, as consciousness rises and expands, others will also inquire about thoughts they have of a broader importance. Then the knowledge base expands exponentially!!

**Q:** Okay, I talked about my dream about the explosion in the sky and the sky being full of UFOs and the guy coming out of the woods in the jeep...

**A:** Sort of like George Bush's "thousand points of light," yes?

**Q:** So, you mean that my thousands of little space craft...

**A:** Yes.

**Q:** So, George Bush's Thousand Points of Light are connected to a space invasion... One thing I noticed about these beings in these space craft, was that they could not respond to anything that was not in their program... and that this was their weakness. Was that an accurate assessment?

**A:** Yes when one is really a programmed biocyberprobe.

**Q:** What was the key to the guy who was off in the woods drinking and hunting and missed the whole programming thing? What made him immune to programming?

**A:** Altered reality. Also, alcohol removes fear, intimidation, and inhibition.

**Q:** Any other key from that dream?

**A:** No.

**Q:** Alright: 'mathematics converts to sound in geometric measurements.' When we set up these figures...

**A:** Imagine an interlocking triangular mosaic in three dimensions.

**Q:** When one wishes to apply this, does one somehow... Is the sound inside one?

**A:** It is all around and through you.

**Q:** Is it a sound that can be perceived with the physical ears?

**A:** Yes.

**Q:** What frequency?

**A:** Not issue. Tone.

**Q:** Tone and...

**A:** Vibratory pitch.

**Q:** Well, if that is the case... is the tone something that is produced by a series of tones at 'mathematical distances' from one another that relate to prime numbers... chords, that is?

**A:** Best to reach when graspable.

**Q:** If these tones are produced either in sequence or in conjunction, are they based on the musical scale with which we are familiar?

**A:** See last response.

**Q:** (A) There are infinitely many prime numbers. How many of these frequencies do we have to produce so that the sound will act in a certain way? One, two, three... one hundred...

**A:** Variable, according to environs.

**Q:** Environs in what sense?

**A:** All senses.

**Q:** When you say 'environs,' do you mean indoors, outdoors, in the mountains, in the valley, by the sea, in the city... what?

**A:** All.

**Q:** (A) If I want to use the computer to produce such a composite sound based on a series of prime numbers, how many of them should I take and, from where? It is important whether it is ten or one hundred, or one thousand.

**A:** Okay, so start with 10. But, do not limit yourself. The pathway leads...

**Q:** Just a little while ago, we looked at the image of the prime number designs that were like interlocking pieces of...

**A:** Flattened pyramids.

**Q:** That's exactly what they looked like. Okay, if you take your series of sound from those that form a three dimensional pyramid by the proximity based on the flattened pyramids... it really doesn't matter where you start? You pick one, and take the ones that are connected, is that the idea?

**A:** Close. But, you will not discover the answer tonight. For example: you have already seen that we sometimes employ anagrams...

**Q:** (A) What about 'zuber' and this 'bezu' mentioned in this book, The Horse of God? Was it an anagram?

**A:** Oh now, it may just have been.

**Q:** (L) Well, it freaked ME out, coming the next day after last week's session... with the mention of 'chevin' and the funny numbers representing the Golden ratio and all that... it was amazing, even if the woman does not have a clue of what she is talking about!

**A:** Learning is such fun. Ludwig put words to his music.

**Q:** (L) Yes... the poetry of Wolfgang Schiller. His Ode to Joy.

**A:** What does Schiller, or Schoeller mean?

**Q:** Now that you brought this up! This is a VERY strange thing because this guy wrote a bunch of cosmic poems to someone named Laura, and they were about universes and gravity and the music of the spheres, and reincarnation, time and time warps, a bunch of funny stuff. He even wrote one that begins: 'I was in Arcadia born...' He hung out with Von Eckarhausen and I think he was an alchemist...

**A:** Was he zuber?

**Q:** (A) Zauber, in German, means 'magic.' (L) Close enough! (A) Does this mean he was a magician?

**A:** Other close one... Zeuber?

[Blue Resonant Human connects via telephone]

**Q:** (BRH) What is it about my present situation that I am not seeing or that I am unable to see?

**A:** These are vague directives, but to begin, D\_\_\_ can look to a paternal block for some clues. We see the same cycle of intense effort coupled with anger borne of the frustration caused by trying too hard. Careful not to slip into the pattern of being hurtful to those near to you during periods of frustrative oblivion! Pensiveness... somnolence... striving, driving accidents... neglecting closely held duties... no, we know better, do we not?

**Q:** (L) I would say that this might be in the way of a warning...

**A:** Better to let D\_\_\_ elaborate. If he wishes to have advice, he will recognize. Career? Family? Repeat mistakes of paternal one? Now, we think the “food for thought” should elicit some interesting inquiries from the Blue Resonant Human.

**Q:** (BRH) What is this ‘paternal block’ you refer to?

**A:** What is it?!! If you have no clue as of yet, we ain’t the Casiopaeans! Sojourns lead one to yearn.

**Q:** (L) A trip or a journey? (BRH) The trip to Egypt?

**A:** C’mon, D\_\_\_, you know better than to let your physical self to interfere with your striving for spiritual progress. Splitting oneself down the middle always leads to separation. Now, let’s hear a specific question, for goodness sake!

**Q:** (BRH) After 20 years, I am going through a very painful divorce, I am filing chapter 7, and losing every (expletive) thing. What is up with that?

**A:** Losing is gaining if viewed in proper perspective. What is more important to you? Your quest, or the material bonds that have always objected or obstructed anyway? When one is on the right pathway, the livelihood and the quest merge beautifully.

**Q:** (L) [To BRH] You are describing your wife as a ‘thorn in the flesh?’ How about a ‘burr under the saddle?’ Yes... a veritable cornucopia of cliches! My situation was very similar. When people think they have fallen in love and decide to form a relationship, in most cases it is a programmed response in them. Not only that, it is also programmed into the chemistry. What happens is, this other person literally sends out like little psychic fishhooks which bury in your body, your mind, your psyche, and getting away from a person who is taking you to pieces, even tiny bit at a time, pulling these psychic hooks out of your flesh is excruciatingly painful. It is a question of habit, propinquity, chemicals, the psychic hooks. And, there is the mind programming... you fluctuate between thinking ‘I gotta get away...’ and ‘it wasn’t so bad... not as bad as being ALONE!’ And this way, you compromise and sell yourself out. When you are around a certain person for a long period of time, the chemistry goes into a self-perpetuating cycle, and when that person is no longer there to emit the pheromones or whatever it is that keeps YOUR chemicals going, it is like going through drug withdrawal! The C’s have said that people can be ‘vectors of frequency.’ If you are coupled with a person who is one of the ‘vectors of frequency,’ and the frequency is designed to keep you off balance or to limit you or confuse you or drain you, for some reason, when they are gone, and you can begin to think clearly for a change, you are so used to your usual state of numbness and confusion, that you think that this clear state of mind is abnormal! You plunge into despair... Sandra said to me before she died: ‘make your list and read it every time you think it wasn’t so bad. Never forget why you are doing what you are doing!’ Let’s get back to the questions... (BRH) I see doors open all over the place, so where to now?

**A:** Oh D\_\_\_, what is your Quest? We mentioned before about career. And we mentioned family. When one is engaged in going against the grain, never the twain shall meet. You have seen that

by now. Now please recognize that your interests should direct your life from here. To be engaged in unsatisfactory endeavors has led you to this point. Please follow your instinctual objectives. This is what will lead from the gloom into the Glorious Light.

**Q:** (BRH) I have always considered a career to be a dirty job, but a necessary evil on this blob of mud, this swamp we call planet earth. I have always resented it. My quest for spiritual matters has always been contaminated by the mundane matter of having to make a living and survive in the material world. Many years ago I was on the verge of suicide and I sensed and felt the presence of God, and heard a voice, at this very intense turning point. The word was: 'Don't worry, I have a job for you.' I was completely enraged! So, is there a place for me in Vegas?

**A:** D\_\_, your ideas about career are distorted. A job is just that: a job. A career is your life's work. You have always invested too much energy in your quest to hold down a "job." Why not consolidate, my boy? Life would be so much easier.

**Q:** (BRH) The pursuit of money is the antithesis of my quest, or so it appears.

**A:** When one worries first about money, the trap is set. When one pursues one's passion, all else falls into place. What you do not yet allow yourself to understand is that this principle never, ever fails. But you certainly are not alone. The 4th density STS programmers relish the thought.

**Q:** (BRH) I have a health problem that has plagued me for quite a number of years and I can't get on top of it and don't know what to do about it.

**A:** The health is directly related to the psyche. When one is operating at cross purposes necessarily, the physical realm is chron-

ically affected. When this is resolved, the physical problem is solved. We need not repeat the sins of the father where alcohol is concerned either, by the way!

**Q:** (L) I would suggest that you look into the blood type diet as was suggested to us, if you have a health issue. Frank was absolutely ready for surgery and seems to have completely recovered on this diet. (BRH) What about Phil?

**A:** Try not to be misled.

**A:** (BRH) I mean more specifically about his alleged interstitial hoodlums.

**A:** “Hoodlums” are not leading, they are led.

**Q:** (BRH) Anything you can tell me about Ron, John and Victoria and Dr. V that would be good for me to know?

**A:** We see one with a plight. One secretly holds the light. Why not run with his program? Because it is missing some data. But, who supplies the data? Someone reaches out, but if this one grasps your hand, they will not let go.

**Q:** (L) I will suggest that these ‘clues’ will become quite clear at some point. Apparently one of these people has a problem. One is a good guy but doesn’t have the right data, I guess... (BRH) Concerning my children in this situation, what is your advice?

**A:** The children shall always remain close to you especially the young female of about 8 years. The separation will only be temporary. So fear not about this.

**Q:** (L) I rather suspect that this means you may get custody eventually...

**A:** No comments, please.

**Q:** (L) Okay, I'll shut up! (BRH) Is there any way I can contact you guys directly?

**A:** Well, D\_\_\_, only if you present yourself into the presence of these 3rd densities here. Remember, their request was hard earned, and one of them has been channeling throughout this incarnation, much to his detriment. Those neighborhood kids usually do not respond favorably to psychic awareness, now do they? Another one here has literally turned the world upside down in search of the greatest truths for all of humanity, much to her potential peril. And the third one here had to endure almost unimaginable hardships and tests of stamina in order to realize his destined path of bringing your 3rd density realm to the brink of 4th density transitional adjustment. So, the path is open to you. Wanna follow?!?

END OF SESSION

## **6.36 December 5, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Emorraha.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I would like to start with one thing that I don't want to forget: last Friday, Ark's friend Moshe, died. Since, during one ses-

sion several years ago, you brought up the name ‘Moshe’ in conjunction with a discussion of our past life in Germany, and later on there were some funny connections to Dijon, and Moshe was based in Dijon, and I once asked if there was something significant about Moshe, which led into some very significant remarks about Orion and this Rhineland business; and you mentioned Tel Aviv, and Moshe has just been buried in Tel Aviv; so, I would like to ask if there is any particular significance regarding the sudden death of Moshe?

**A:** Please be more specific!

**Q:** Is Moshe’s death a marker of a reality shift?

**A:** Not really, in the sense that you are conceiving.

**Q:** I know that Sandra’s death was like a marker in my life, and I had the feeling that many things changed after her death, and perhaps even as a result of her death.

**A:** It was a marker, as you chose to make it so.

**Q:** Is there any subliminal connection between Moshe and Ark, Moshe and me, Moshe and both of us, or Moshe and our lives?

**A:** Moshe transited as a result of a genetic line defect.

**Q:** What...

**A:** Weakened arterial walls. Soul counts, not body.

**Q:** Well, how is Moshe doing at the present time?

**A:** Fine, but there is no “present time.”

**Q:** I know that, I’m sorry. Let me ask this: when you mentioned the name ‘Moshe’ at the time that Roxanne was present, was it this Moshe you were referring to?

**A:** There are so many Moshes, perhaps you should study the Hebrew root. [Mosheh: drawing out; to pull out; rescued.]

**Q:** Well, there were some funny things going on in that session where you mentioned it. But, we will drop it for now. Okay, regarding this Rennes-le-Chateau business, Mike asks: I would like to know what or who created this pattern of mountains?

**A:** Mountains are a natural construct.

**Q:** Then he asks: about the beehive huts in the area, to which you answered ‘not germane,’ and he said ‘yes, but I’m curious about the beehive huts.’ Is there any symbolism to the beehive huts in the area? {Not to mention the funny spelling of the word “germane”.}

**A:** None.

**Q:** What were they used for?

**A:** Honey production!

**Q:** In what manner was this honey production accomplished?

**A:** Carefully, so as not to get stung!

**Q:** Very cute. Who was using these beehive huts for honey production?

**A:** 19th century agrarians.

**Q:** I thought they were supposed to be like really OLD! Do you mean A.D. or B.C.?

**A:** A.D.

**Q:** Okay, Mike asks further: The six mountains at Rennes-le-Chateau form a natural pentagon surrounded by a circle. This reminds me of ancient spell-casters surrounding themselves

with a circle when summoning spirits or demons. Was this area set up as a giant gateway or place of summoning?

**A:** Gateways occur where the conditions are right.

**Q:** Is this area a gateway?

**A:** Window.

**Q:** If it is, do the five surrounding peaks contain or shield whatever...

**A:** Contain is o.k.

**Q:** So, he is right, it DOES contain. Does this have to do with Atlantean technology and energy production?

**A:** In an offhand way.

**Q:** Are there other significant natural formations that follow similar patterns that we should be looking for?

**A:** Yes, of course. And they are numerous. Monument Valley is but one example.

**Q:** Well, on the same subject: did Abbe Saunier put clues in the stations of the cross in the Church at Rennes-le-Chateau?

**A:** Some, but they are gilded.

**Q:** What do you mean by that?

**A:** You will see.

**Q:** Does the message involve all the stations of the cross?

**A:** Just look. Now folks, remember: Rennes-le-Chateau is a means, not an end. Sort of like unlocking the trunk, expecting to find the gold, and merely finding a map.

**Q:** So, when you said ‘template, Templar,’ you were possibly referring to the fact that what was going on here, the constructions, the name and word clues, and even the events and incidents may have been a model that we should look for in other places?

**A:** Temples too.

**Q:** What is the...

**A:** What is behind your temples?

**Q:** Behind, in a general sense? The creators, the instigators? The church?

**A:** Place your fingers upon...

**Q:** What do you put your fingers on that has to do with a temple? Place your fingers on your temple? On your head? What is behind your temple? Your brain...

**A:** Which part?

**Q:** Well, the TEMPORAL lobe... the part of the brain where magnetite is found.

**A:** Yes....

**Q:** So, what are you getting at here?

**A:** We are not, you will.

**Q:** So, the instructions or clues found in this place, may, in fact, apply to some other location? Is that it?

**A:** Or to a grid.

**Q:** Was Saunier aware of this grid?

**A:** It is not important, the grid is.

**Q:** What I am trying to get at is, if he was aware of it, he might have put clues about it in his decorations in the church.

**A:** Who says?!

**Q:** He wrote across the doorway of the church: *Terribilis locus est*, or This is a Terrible Place...

**A:** And some have put: “Biohazard” where they store riches.

**Q:** What grid are we talking about? An EM grid...

**A:** Yes. Meridians...

**Q:** In response to your remark from last week, ‘ever feel that you are dancing around in circles?’ Mike wanted to know if this was a reference to crop circles?

**A:** No, not directly!

**Q:** Then, you also said: ‘quite simply we would say, where is Arcadia?’ Arcadia ...

**A:** You need to work on that one. The answers to these mysteries are not easily solved, but well worth it!

**Q:** The chief thing I noticed about Arcadia was, the Arcadians were the enemies of the Trojans, they were the creators of the Trojan Horse - a huge deception... and the Celts are supposed to be the descendants of the refugees from Troy. And, when Hitler came along, one of his ideals was to resurrect Arcadia, and that Germany was going to be the new Arcadia and destroy the ‘old corrupt civilization,’ which was Troy. Troy is ‘three’ and is connected to ‘Ilium,’ and I guess what my question is here is: just who’s on first?

**A:** Who is on second?

**Q:** Who’s on first, who’s on second? Nope, not gonna touch

that one! Very quickly: Kathy and Bob have been having some bizarre things going on. On December 1, Bob was having a ‘fight with ‘Them,’ during a sleep state. He said he had to struggle to get his body to move and his mind to come awake, and he heard someone telling him that he was not supposed to fight as he tried to yell. Kathy asked him who he thought it was, and he said ‘the Grays.’ Kathy was in the half sleep state and remembers thinking at one point ‘they are here,’ only when she opened her eyes, no one was in the room. She asks: ‘Is this possible? We feel to some extent as if we have gone off the deep end. I do not like the way this feels. I know it has been said that this is not easy, and certainly that is correct. But I can’t help thinking that our minds are making all this up, after all, the C’s did say an abduction in our case did not occur. So, why would those guys be showing up now. We can hardly be any kind of threat, we are in kindergarten, for goodness sake.’ She writes that she is concerned for her children, too. Her son mentioned a dream of being a baby where a ‘ghost’ was looking into his crib. He wondered if it was a dream or a memory. Kathy said that it reminded her of the ‘little ghost people’ from Bob’s childhood. And she has heard that ghosts are often a screen memory of when the Grays have been around. What she really wanted to ask was about the pain in her left arm. She writes: ‘I don’t want to waste your time.’

**A:** Too many assumptions!! Best to investigate with an open mind. Something about a well, white wood frame homes.

**Q:** That’s the clue she should follow?

**A:** “Kindergarten, ??!?” Why must we think our consciousness is thusly limited? Who knows of the content of the soul matrix if not adequately investigated?

**Q:** Anything else to help her out so that she doesn’t feel like she

is going off the deep end?

**A:** No.

**Q:** One final question: Martha Neyman has written back to say that she thinks this Rennes-le-Chateau is just a simple country village with a simple mystery, and there are no aliens, there is no conspiracy to control the world, and, therefore, she does not feel that any further communication on the matter is worthwhile. I, of course, agree. I spent too much time trying to point her in new and possibly fruitful directions, and she seemed only to want me to agree that she was so terribly clever with her naive symbolic interpretations. Do you have any comment on that?

**A:** No.

**Q:** Okay, I am done. (A) I want to ask about this grid business. I have this book with this 'sacred geometry' business, Bruce Cathie and all that. These people draw these grids with geometric shapes that differ from simple meridians. I would like to know how to find out what is the true geometry of this grid? Is it as complicated as they draw it, or is it as simple as longitude and latitude? Can I have some help with this?

**A:** Seek answers in the pyrotechnics.

**Q:** (L) Do you mean having to do with explosives or fireworks?

**A:** All that is related to the root. For example: lightning.

**Q:** (L) Yes, but what we are asking is how to SHAPE, to construct a correct grid! Is there a particular geometric figure that applies, and are there particular locations ...

**A:** No, no, no. You are assuming, and you are not being patient.

**Q:** (A) I don't understand what this pyrotechnics is about, but first question: at some point we were asking about this magnetic

grid, and we were told that the grid lines are located about every 200 miles, and that it is a regular pattern of lines...

**A:** Yes, but those are primary. What happens at the poles?

**Q:** (A) At the poles, these lines converge, and the pattern becomes more complex, I suspect.

**A:** Convergence.

**Q:** (A) Okay, they converge at the poles, and probably go inside.

**A:** In atmosphere, there is undulation. At core, there is primary convergence, and that is also your doorway/bridge.

**Q:** (A) Core of the Earth?

**A:** Yes.

**Q:** (A) These lines that are being drawn, are they just one dimensional lines, or are they a plane that crosses the Earth along these lines?

**A:** Latter.

**Q:** (L) Are these points of locus denoted by these deposits of clay that adsorb tritium?

**A:** Off the track, and you, my dear, are in the “quiet chair.”

**Q:** (L) Sorry! (A) Well, I wanted to make sure because, when we were directed to this place in Russia and the term ‘magnetic meridian’ was brought up, and we asked the question as to where the zero magnetic meridian was located, we were told that it was at about 90 degrees East longitude in the Western Pacific ocean. We checked the map and it is clearly the Indian Ocean and not the Western Pacific. Was this just a mistake?

**A:** No because all those lovely, shimmering oceans intersect around a lovely island with really inexpensive real estate!

**Q:** (A) They are joking! They act like they drank too much! I have no idea what that means! [Laura stops and gets the Atlas and examines the area in question.] (L) Okay, the only island I can see that those lovely shimmering oceans intersect around, in the terms in which you have expressed it, is Antarctica.

**A:** Yes.

**Q:** (L) In that sense... (A) Okay, this brings us to the question about the Piri Reis map. We wanted to know the origin of this map?

**A:** Complex, but the origin would date back to 14,000 B.C.

**Q:** (A) Atlantis?

**A:** Close.

**Q:** (L) Was this map drawn when Antarctica was NOT covered by ice?

**A:** Yes.

**Q:** (L) Was Antarctica not covered by ice because the poles were in a different location?

**A:** No.

**Q:** (L) Was it not covered by ice because the entire planet was not covered by ice?

**A:** No.

**Q:** (L) Was it not covered by ice because it was in a different location itself?

**A:** No.

**Q:** (L) Why was it not covered by ice? (A) Because the climate was warmer.

**A:** Technologically achieved.

**Q:** (L) Why would somebody want to technologically warm Antarctica if the whole rest of the planet was available for use? What is so special about Antarctica?

**A:** The whole rest of the planet was available for use? Not hardly.

**Q:** (L) Why was the rest of the planet not available for use?

**A:** Ice.

**Q:** (L) So, the rest of the planet WAS covered by ice?

**A:** No.

**Q:** (L) There is something I am missing here. (A) Much of the planet was covered by ice, but not all.

**A:** Yes.

**Q:** (L) So, instead of using the areas that were NOT covered by ice, why, in particular, was Antarctica...

**A:** What?!?

**Q:** (L) What I am getting at is: why go to all the trouble to thaw out a whole big island if it might have been easier to have been somewhere else?

**A:** Well, first of all, we thought this was Ark's turn. But, since you have asked, is it not obvious by now? Magnetic power grid physics . EM utilization. Crystals, and the like. Seeking paths to the interior? The "Poles" know best!

**Q:** (A) ) Okay, now we have been brought to electromagnetism, and that was my next question. I got some very old papers by Whittaker...

**A:** EM generators usually employ a grid. 'Tis for field creation.

**Q:** (A) When you say this, you mean A grid, not THE grid?

**A:** Yes. Looks like a waffle iron.

**Q:** (A) You mean like a waffle iron that is used in transformers?

**A:** Okay. Why? To duplicate nature. Earth has a web, and so doeth thee!

**Q:** (A) Now, Earth's grid is just an imaginary grid related to field, or just a mathematic grid... no, it must really exist...

**A:** Yes.

**Q:** (A) If it really exists, is it a field of grid, or is it a grid made out of some matter, like these waffle irons? Just field, or matter?

**A:** The iron is attracted, not attractive.

**Q:** (A) I wanted to know if the grid is a material grid, or if it is just a grid of field and nothing more, or if there is something material in the earth relating to it?

**A:** Both.

**Q:** (A) We get a hint, but not an answer. The original question was about the Whittaker papers of 1903, about solutions of wave equations, and this relates to this Bearden who is making a lot of money on anti-gravity books and zero point energy devices. At some point, you told us that there was something in this. Bearden speculates that this Whittaker's ideas were useful for UFT. I obtained copies and I am studying them, and they are quite interesting.. Is this something that is worthwhile or another red herring?

**A:** No. They are worth it.

**Q:** (A) Recently, by a strange chance, I was pointed to a guy in Brazil who wrote some papers with Assis, and Assis was connected to Marinov, so this sort of closes a circle. This Rodriguez writes about superluminal waves. He writes a lot of papers about

it... and he even says that he believes that superluminal waves can be used technologically pretty soon. Any comment this particular guy, if he is on the right track?

**A:** Yes.

**Q:** (A) What about quaternions? Lord Hamilton invented quaternions, and this Bearden tells us that Maxwell wrote his equation using these quaternions, and his original papers are hidden from us by the government; that Maxwell knew more than we are told. Is this really the case?

**A:** Yes.

**Q:** (A) Are these quaternions useful?

**A:** Partly, but there is a missing link.

**Q:** (A) Sure. Now, I was thinking today about this Whittaker discovery, and whether I should work on linking it to the pentagons and hexagons. Is it the missing link? Or, did you mean another missing link?

**A:** Well, linking the geometric factors you speak of is wise, but there are other links missing as well.

**Q:** (A) Okay... that is all for tonight. (L) I would like to know if my back pain is linked to some subliminal message?

**A:** No.

**Q:** (L) Why is it so bad?

**A:** Posture.

**Q:** (L) What about the clay and the montmorillonite, and the connection of the clay TO the montmorillonite, and what you once said about trace minerals unlocking secrets in some way?

**A:** Yes.

**Q:** (L) Yes what? (A) How much should we drink?

**A:** No.

**Q:** (L) We shouldn't drink it?

**A:** Be vague, we vague.

**Q:** (L) Is this montmorillonite the objective of the clues about tritium? The fact that tritium pointed to this clay, and that this clay is situated in the Rhineland, among other select sites, and alfalfa possibly grows there. Is this where the clue was supposed to lead us?

**A:** The question is about the mind, spirit and body, and what happens hence.

**Q:** (L) Well, what I am trying to get to here is: is it useful for us to ingest this montmorillonite? Will it assist in this mind/body/spirit connection?

**A:** What is more to the point is who was assisted before, how and why.

**Q:** (L) I don't get it. Maybe it is because I am so tired, but I am hitting a blank on that.

**A:** You must be, as the obvious is quite oblivious!

**Q:** (A) We are not getting anything about this mineral... who was assisted before, how and why... (F) I can figure that out! (L) Well, go ahead! (F) If this clay is in Germany, and if the implication is that the mineral causes some sort of beneficial effect, perhaps, in antiquity, somebody was using it for that reason. (L) Is Frank right on this?

**A:** Yes, he is.

**Q:** (L) One last question that just occurred to me: why did the Druids cut mistletoe in such a ceremonial way?

**A:** No, that is too complicated for now. Good night.

**Q:** (L) Okay, we will ask it next week. Good night.

End of Session 1 3

## **6.37 December 12, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Fiberroh.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** For openers, I noticed on our astronomy program that the spelling of Cassiopaea differs when referring to the remains of the supernovae as opposed to the constellation; and, in fact, the spelling of the deep sky object is very much like the spelling you use. I wonder if there is a relation to the fact that you spell it as the deep sky object is spelled?

**A:** Not really.

**Q:** Well, while we are on the subject of spelling, you DO use unusual spelling from time to time, though normally you are very good spellers. What rules direct your spelling since it is not always according to modern usage?

**A:** No rules, just clues, as allways.

**Q:** Does this refer also to the way you spell 'germain'? When you say 'it is not germain,' you spell it differently from the way someone would spell it if just saying that something is not relevant.

**A:** Tis French, as in clue to be.

**Q:** Now, in reference to your question to me: 'where is Arcadia,' that I need to look at this some more, I was reading in Gregory of Tours' History of the Franks, and he was recounting that the Franks who colonized along the Rhine in the area about which we are seeking clues, came from an area called Pannonia. I looked up Pannonia. It is in Eastern Austria and crosses the border into Hungary. In Pannonia there are vineyards. It is a very famous grape growing and wine making area. A statement from the 4th century says: 'Pannonia is a land rich in all resources and fruits, beasts and commerce.' Pannonia is also the location of an interesting lake. The lake is called Neusiedl, or 'New Town.' This is the only 'steppe lake' in all of Europe. It is only six feet deep at it's deepest point and is a giant, shallow sweet body of water surrounded on the Eastern bank by marshlands, numerous salty ponds and pools. Apparently, this place produces a very fine environment for grapes and wine, in particular a type of wine called 'Eiswein.' This Eiswein is called 'The treasure of liquid gold.' It says here: 'the production of Eiswein remains the winemakers ultimate challenge.' Only a small amount of this wine is produced. Etomologically speaking, Pannonia is probably named after the God 'Pan,' and that derived from Sylvanus, the 'Shepherd God.' So, all in one spot, we have shepherds, a wine called liquid gold, a lake called Neusiedl, and an 'Arcadian environment.' Can you tell me if there is any particular significance to my discovery of the terms relating to this area from whence came the Franks to the Rhineland? Is this, in fact, Arcadia?

**A:** Arcadia is a crossroads for the one Essene, the Aryan one of Trent.

**Q:** Can you clarify that for me?

**A:** We can, but shall not.

**Q:** Is the fact that we have had some eggnog this evening going to be detrimental?

**A:** No.

**Q:** Can you comment on Pannonia in general? Is it in any way significant? This lake Neusiedl?

**A:** Eiswein: Eisenstadt.

**Q:** Any further comment?

**A:** No.

**Q:** Now, I was preparing these genealogies to print for Christmas and, while waiting for them to print, I wondered who would be last if one started at the present and worked backward... not specifically in terms of time, but in terms of generations. I wondered WHO the tree would end with. Well, it ended with the Frankish King Clovis. So, I wondered about your use of the term 'cloverdale,' and how it might relate to Clovis. Is it a deliberate or accidental connection?

**A:** Your quest is your own. We do not "steer." We supply the mortar, you are the Masoness.

**Q:** Well, I don't know how to take that! I mean, the Masons could be the most evil organization in existence! BRH thinks so.

**A:** Such judgements miss the point, if there are keys stored within the envelope.

**Q:** Well, on that subject, BRH really hates being in the body. He thinks that he is here by mistake...

**A:** Nonsense. He is depressed, but it is the way for those who are to take another step.

**Q:** So, he is in process of taking another step. Well, his question was, and he was frustrated by this, and it is a good point, I think, that if we have so many incarnations, and all there is is lessons, why can't we remember them. Why do we seemingly have to start over and over again. What is the cause of the forgetting? By this conscious forgetting, do we lose our ability to navigate from one life to the next? Why can't we remember previous lives?

**A:** You do, at the subconscious level. And it is at that level where the balancing to be derived from the lessons is most needed!

**Q:** Is there any other reason for the forgetting?

**A:** DNA strand structured.

**Q:** Alright, I found this article on the net called 'Hidden History of Jesus and the Holy Grail' written by Sir Laurence Gardiner, KT etc., author of 'Bloodline of the Holy Grail,' transcribed from a lecture given at 'The Ranch' in Yelm, Washington. What he says is that he had been appointed historian and 'sovereign genealogist' to 33 royal families... he was putting together written chronological accounts of things these families knew the substance of, but not the details.

He talks about the fact that Jesus was married and that he had heirs and that this was discussed in the published papers of Mary, Queen of Scots, and in the papers of James II of England. He says:

'I began this work with separate commissions from separate families, doing work on these genealogies. What happened was they began to converge. It became very apparent, and it took a long

time, because genealogies have to be done backwards, put together backwards, and constructed backwards; but what was happening was that a triangle from a large top base with numerous family lines, was pulling to a point. I suddenly realized what this point was and I said 'wow! do you realize what I have found here?' and they said 'oh, you know, the father of so and so,' and I said 'oh, no, no, what I am finding is that this comes out of the house of Judah in the first century.' And they said: 'yeah, we know all that, what we wanted you to do was blah blah blah.'

So, he says that he had access to Celtic Church records dating back to 37 A.D., the very documents that the Knights Templar brought out of Europe in 1128 and confronted the Church establishment with, and frightened the life out of them because these were documents that talked about bloodlines and genealogies. Blah blah blah. Before I go on, this guy says that all these family lines go back to the house of Judah. Do they actually have written genealogies back to the house of Judah connecting the royal families of Europe to this house?

**A:** Somewhere, maybe.

**Q:** Did Jesus descend from the house of Judah?

**A:** Is it important really?

**Q:** I don't know. I am building a basis for further questions.

**A:** You need not build bases.

**Q:** In other words, this guy is just blowing more smoke over the issue? I think he is blowing smoke.

**A:** Okay.

**Q:** You are agreeing with me that he is blowing a lot of smoke?

**A:** Perhaps.

**Q:** It seems to me that if what he was saying was true, that he certainly would not be allowed to say it. It's based on and converges with all the stories they are telling about Rennes-le-Chateau and seems to be more smokescreen. Anyway, Mike has questions. (M) You said that this place over Rennes-le-Chateau was a window. What is a window? (L) Now, I realize that we have all assumed that we know what a window is, but we have never really asked for a definition. Could you define for us a 'window'?

**A:** Convergence; opening to alternative states via energy grid points.

**Q:** Are windows where you can pass back and forth? Moving between realms?

**A:** It is possible.

**Q:** How does a window differ from a 'portal'?

**A:** Window is open, portal is crafted.

**Q:** A window is naturally occurring portal?

**A:** Close.

**Q:** Does a window remain open all the time, or does it open and close for various reasons.

**A:** Closer to latter.

**Q:** What determines its opening and closing?

**A:** Frequency.

**Q:** Frequency of what?

**A:** Energy patterns.

**Q:** Frequency patterns of the area itself, or of people, or of people in interaction with the area?

**A:** Former.

**Q:** What could occur to change the frequency of the area?

**A:** EM pulse.

**Q:** Where do these EM pulses originate from?

**A:** They are transmutable.

**Q:** Transmutable from what?

**A:** Not online.

**Q:** What?

**A:** Your assumptions get you lost.

**Q:** What does it mean when you say ‘EM pulses are transmutable?’

**A:** We will not answer these rapid fire inquiries as they abridge learning.

**Q:** I suggested that one of the things you may have meant by suggesting, last week, an investigation of pyrotechnics, might be as simple as finding where, on the planet, are the highest number of lightning strikes, and that these might indicate foci of grid points. Would this be, in fact, a good line to follow?

**A:** One of them.

**Q:** Could you offer more clues about this ‘pyrotechnic’ suggestion, because we were pretty much drawing a blank during the week on it. It was not a useful path so far.

**A:** But it will be. Rome was not built in a day, and neither is your higher knowledge.

**Q:** Last week when I asked about the stations of the cross in the church of Rennes-le-Chateau, whether they were important or

would give clues, you said ‘some, but they are gilded.’ Mike suggested that this term could mean 1. To overlay with gold; 2. To give an attractive, but deceptive appearance; and 3. Guild, as in organization. He asks: I wonder which definition they meant?

**A:** 2.

**Q:** Okay, he asks again about the beehive huts. You said they were not ‘germain’ and we have already discussed that issue. He writes: were these huts really used for honey production, that doesn’t seem logical. Were they built in the 19th century by the agrarians you mentioned, or just used by them? Because some of them are completely filled with rocks.

**A:** Crystals figure in here.

**Q:** Why do crystals figure in here?

**A:** Look to see.

**Q:** He asks if there is a technology buried in the area to facilitate the workings of the window?

**A:** No need for that.

**Q:** He asks: Could WE use it?

**A:** You could be zapped by it.

**Q:** He wanted to know why the EM grid was important...

**A:** See 1954 UFO mapping study: France.

[BRH calls and joins session via telephone.]

**Q:** (BRH) I was very inspired by the particular Cassiopaeon who spoke to me a couple of years ago. Would it be possible to communicate further with that particular individual... is that possible?

**A:** Of course, as we are all one and the same, and yet we are all individuals.

**Q:** (BRH) I knew it! Hello old friend! (L) Well, I didn't think you could do that!

**A:** Hello Dev! Ha ha, we fooled ya!

**Q:** (BRH) What you told me before that produced such a profound change in my life, was 'we see the little one who frequents your shoulder is the binder that will ultimately solidify all of the unanswered questions.' That strikes me as immensely profound and I don't know where or how to find a lead on this.

**A:** Soul connects.

**Q:** (BRH) What are these soul connections?

**A:** We hesitate to use the term "soul mates," as your culture has convoluted the meaning to connote something of a romantic nature. However, it is still succinct, as in this case, the student learns prime meaning of love from the teacher.

**Q:** (BRH) Who is the student and who is the teacher?

**A:** Who think ye?

**Q:** (BRH) You have mentioned soul connections and past lives, and I have no idea in my wildest imagination how to pursue uncovering this information, and I hope you don't suggest hypnosis...

**A:** There is no need for such a pursuit, as the answers will reveal themselves when needed.

**Q:** (BRH) Thank you very much old Friend, but I don't want to take up any more time on personal questions...

**A:** Take up our time? Not to worry, the time clock is broken, and

we have been unable to bring ourselves to contact the repair person, or in our case, the repair 6th density being of light!

**Q:** (BRH) Is there anything you want to say to BRH at this point that he hasn't thought of, but ought to ask?

**A:** Palomar? What gives?

**Q:** (BRH) I can't believe it! I was just going over that and thinking to myself that it was too late... they gave that suggestion several years ago, and I was thinking that the window of opportunity had passed... is it too late to stake out Palomar?

**A:** Never too late, but we suggested this before.

**Q:** (L) Is staking out the only way? Can he follow other research clues?

**A:** There is a flat rock up there, near the road, off the guard rail. We know it as just below the observatory about 1.3 kilometers. Is inconvenient for driving and especially parking, but if there is a will, there is a way. Look for the juniper as a sight line guide post.

[From this point on, for some reason, the tape did NOT record, so questions are reconstructed.]

**Q:** (BRH) What about this thing I had surgically removed from my back that went 'plink' when it dropped into the tray?

**A:** Silicon based.

**Q:** (BRH) Well, the knot reappeared almost immediately.

**A:** Replaced.

**Q:** (BRH) Replaced by whom?

**A:** Those who use to transceive.

**Q:** (BRH) You are suggesting that this is an implant?

**A:** Yes. Those can happen in work setting, too. Could have been planted by a “coworker.”

**Q:** (BRH) I am wondering about my present job...

**A:** The environment in general is negative.

**Q:** (BRH) I have been thinking about arranging to work fewer hours so that I can have time to write a book...

**A:** Use your heart chakra to answer this. Sorry, but now we must go. Goodbye.

END OF SESSION

## **6.38 December 26, 1998**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Zanea.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

{Personal discussion redacted.}

**Q:** (L) Okay, I have discovered that this author, Goodrich, thinks that the island of the grail castle was the Isle of Man. There are a huge number of the clues you have given on this grail quest that seem to converge in this area, including the coast of

Scotland. There is a cave where Merlin is supposedly buried, four churches, the Isle of Man, the little islet of St. Patrick, the churches of St. Patrick and St. Germanus, or ruins of them, standing next to each other, and the church called “Candida Casa” in a meadow, or field, that was dedicated to St. Augustine; there is a place along the coast called ‘Rhinn’ and the northern part of Wales was formerly called ‘Galles.’ So, it is like all of these things converge to this area, and there is the consideration that King Clovis of the Franks was a contemporary of Arthur and there may have been blood connections. Am I on the right track with these churches in this area?

**A:** Maybe so, but you did not finish with the previous subject!

{Personal discussion of no benefit to others redacted.}

**Q:** (A) Why should we be more responsible for our children than for other people?

**A:** What do you mean?

**Q:** (A) Why do we worry so much about our children when they are grown; we spend so much energy on this; we lose sleep; but these are separate souls, so should we not practice to become immune to this worry? Why do we worry about our children?

**A:** Genetic/emotional/hormonal/instinctual/karmic interface is most intense there.

**Q:** Does it have to do with a pre-life agreement to interact in certain ways, to do certain things?

**A:** Partly. Souls chose you as a vehicle for primary learning regarding karmic lesson profile.

{...}

**Q:** Okay, I am done. (A) I was trying to put together things related

to research on UFT, and the questions I have asked recently. After a time of being quite desperate, because I could not put these things together, I could finally see some dim light. So, I would like to ask. But, please do not reassure me if what I think is wrong... just tell me it is wrong, and I will look for something else. I came up with the idea that we should model our space time on a kind of a surface embedded in a higher dimensional flat space. This would account for several things that you have told us. At some point you said the following: 'Old makes new again,' which suggested that we should come back to what Einstein was thinking, and then you said 'equilateral versus hypotenuse.' I didn't have a clue, but then I got an idea that it is related to different kinds of tensors with three indices, rather than to geometrical features. Is this guess correct?

**A:** Partly, but geometric figures provide a third density guide for visualizations of field concepts.

**Q:** (A) Hmmm....

**A:** Pyramids inverted upon one another.

**Q:** (A) Where to put these pyramids?

**A:** Hexagonal representation of flat plane...

**Q:** (A) What is hexagonal representation?

**A:** What does a hexagon look like when converted to three dimensional representation?

**Q:** (L) Well, a 'flat pyramid' is a triangle, and a triangle has three points, and two triangles inverted becomes a sort of Star of David, and that has six points and is a sort of hexagon... (L) Well, this hexagon business... two dimensional inverted pyramids make a Star of David. But, what if these pyramids were really tetrahedrons? They LOOK like a hexagon in a plane, but in 3 dimen-

sions... (A) They are octohedrons... Octonions... hmmm...

**A:** Vortices... this is what your “wormhole” would look like.

**Q:** (A) Now, we have a problem here, because you speak in terms of features, geometrical features, and I would like to convert this to equations which...

**A:** Okay, what is the problem?

**Q:** (A) I want to describe gravity, and to describe gravity I must have some geometrical quantity which describes this gravity, so my idea is that gravitational field is described by the bending of our space time in a higher dimensional flat space... **A:** Yes...

**Q:** And that this bending would describe both gravity and electromagnetism.

**A:** Yes...

**Q:** (A) In all this I do not see a place at all for tetrahedrons. What do they have to do with a bent surface?

**A:** Maybe you do not see yet.

**Q:** (A) But, still I want to understand what was all this talk about tetrahedrons. So, I thought about tetrahedrons that I have worked with and met in my research. There were several occasions. First, there are tetrahedrons which we need if you build a continuous theory of completely discrete elements. Then we do the triangulation of the surface, or we need tetrahedrons to triangulate space, so let me call it Place One. Place Two: tetrahedrons I understood as symbols because tetrahedrons have three edges from each vertex, so I thought this three should represent third order differential equations. Place Three: I use tetrahedrons for describing magnetic monopoles, but they were not necessary, and I have no other way to put tetrahedrons into the idea to bend geometry. If things are fluffy, what are

tetrahedrons doing there? I have no clue at all! So, I want to ask about a possibility of describing different densities. It came to my mind that perhaps Einstein, when you spoke about variable physicality, that Einstein was afraid when he understood that in his work. I thought about this and I think that Einstein determined that the future must be determined from the past and present, and when he found that he had a theory where the future was open, he dismissed it and was afraid. Is this a good guess that variable physicality, mathematically, means a theory where there is a freedom of choosing the future when past and present are given?

**A:** Yes.

**Q:** (A) Is it related to the fact that we should use higher order differential equations, not second order?

**A:** Yes. Einstein found that not only is the future open, but also the present and the past. Talk about scary!!

**Q:** (A) All you have said so far points to an idea by a Swiss guy named Armand Wyler. This Wyler found a way to compute from geometry so-called Fine Structure Constant, which is a number and can be found experimentally. Then, of course, he was invited to Princeton to explain how he did it, and apparently he failed to explain himself, and he ended in an asylum for the mentally deranged. The question is: if I follow his way of thinking, can I succeed in deriving and understanding the nature of this Fine Structure Constant?

**A:** Yes.

**Q:** (A) Well, if I do it, should I keep it a secret so that I won't end up in an asylum?

**A:** The problem with Wyler was with the audience, not the speaker.

**Q:** (A) What does that mean? (L) I guess it means that the people he was talking to couldn't grasp it, not that he couldn't explain it. Did he really lose his mind, or was he sort of 'helped' to go crazy?

**A:** He suffered a "breakdown."

**Q:** (A) Now, let's change a little bit. BRH sent me an e-mail where there was a discussion between Sarfatti and a Russian physicist who was working with Sakharov by the name of Ryazanov, at Moscow University. He says he can do derivation of quantum mechanics from electro dynamics with two signs of time. He is speaking about possible reversing of causality. On the other hand, he is saying that it is the sin of physicists that they believe in the power of mathematics. Part of what this Ryazanov is saying seems to correspond to what I think also. Does he really have a theory which explains quantum mechanics?

**A:** Yes, but he made an omission.

**Q:** (A) What omission?

**A:** Calculating the frequency constant.

**Q:** (A) Okay, I will try to get his paper. In looking for this Ryazanov on the web, I have found the pages of a Polish Medical Doctor who is making all kinds of funny experiments, including parapsychological, being, at the same time, director of the University Clinic. I had the idea that I should get in contact with him. Who is he? Can I have a clue?

**A:** Who is he?

**Q:** (A) His name is Brodziak. He is in contact with Sarfatti, Pitkanen, Deautsche, and so on. Should I become more active in these discussions, these mailing lists?

**A:** Sure, but you will need to separate the "wheat from the chaff."

**Q:** (A) Okay, I am done. (L) Okay, let me see if I can get a couple of these other questions in. I have this book called the “Curse of Cain,” and it talks about the relationship between Monotheism and Violence, positing that Monotheism itself is the root of violence. She has a chapter on Covenants. She writes ‘Collective Identity, which is a result of a covenant of Monotheism is explicitly narrated in the Bible as an invention, a radical break with Nature. A transcendent deity breaks into history with the demand that the people he constitutes obey the law he institutes, and first and foremost among those laws is, of course, that they pledge allegiance to him, and him alone, and that this is what makes them a unified people as opposed to the ‘other,’ as in all other people which leads to violence. In the Old Testament, vast numbers of ‘other’ people are obliterated, while in the New Testament, vast numbers are colonized and converted for the sake of such covenants.’ She also talks about the idea of the ‘provisional’ nature of a covenant, and that this means that it is conditional. Believe in me and obey me or else I will destroy you. That’s all fine and good, and the chief thing that occurs to me is that this belief business in religions or whatever, constitutes a sort of ‘permission,’ if you will, to take the ‘vengeful’ action if the agreement is broken. The Hebrew phrase for ‘he made a covenant,’ is karat berit, or literally, he CUT a covenant. In the covenant with Abraham in genesis, animals are cut in two and a fire passes between them in a mysterious ritual. Then, there is the cutting of the flesh at circumcision, and the Sinai covenant where the laws were cut into stone. So, these covenants are apparently what constituted Israel as a nation. The entire foundational frame of Israel is framed by the severed pieces of animals, it seems. Why?

**A:** Confused principles.

**Q:** Book says: ‘In ancient Near Eastern rituals, the cut made to the

animal is symbolically made to the inferior who enters into the covenant with a superior.” Is this an accurate representation?

**A:** Maybe for some.

**Q:** At the making of the Covenant at Mt. Sinai, there was a bunch of sacrificed animals, and Moses took the blood, dividing it in half, he cast one half on the altar. Taking the book of the covenant, he read it to the people, and they said ‘we will observe all that Yahweh has decreed. We will obey.’ And then Moses took the blood and cast it on the people saying ‘this is the blood of the covenant that Yahweh has made with you containing all these rules.’ What is this blood of the covenant?

**A:** Has to do with bloodline.

**Q:** So this symbolized the bloodline of the Jews?

**A:** No.

**Q:** What bloodline are we talking about here?

**A:** Aramaic/Aryan.

**Q:** Are you saying that the Jews are Aramaic/Aryan?

**A:** No. Jews are not bloodline categorizable, per se.

**Q:** When the person who was later represented as Jesus lived, was that, as Paul described it, a New Covenant of Blood?

**A:** No.

**Q:** Was any of this related to the Nordic Covenant?

**A:** In a parallel sense.

**Q:** Okay. Umm... It says then: ‘We are heirs of a long tradition in which Monotheism is regarded as the great achievement of

Judeo-Christian thought. Monotheism is entangled with particularism, and with the assertion that this god, and no other, must be worshipped. This particularism is so virulent that it reduces all other gods to mere idols, and is so violent that it reduces all other worshippers to abominations. The danger of a universal Monotheism is asserting that its truth is THE truth; its system of knowledge, THE system of knowledge; its ethics, THE ethics; not because any other option must be rejected, but because there simply IS NO OTHER OPTION. They presuppose a kind of meta-physical scarcity, a kind of hoarding mentality, hoarding belief, hoarding identity, hoarding allegiance, because there is a finite supply of whatever, it must be contained in whole or part. It suggests limit and boundaries.' Well, aside from reminding me of the parable of the talents, she goes on to talk about how Monotheism is the chief thing at the root of violence in our culture. She makes a good case. Is this idea part of the Nordic Covenant?

**A:** No.

**Q:** Is the Nordic Covenant in any sense similar to any of the things I have read here?

**A:** It is a mystical thing, not related to theology in a direct sense.

**Q:** How long has the Nordic Covenant been in existence?

**A:** 5129 years.

**Q:** Is the Nordic Covenant made between humans and other humans, or between humans and higher density beings?

**A:** Mostly between humans and humans, but some of the other.

**Q:** Does this Nordic Covenant exist on the earth today in similar format as it did at its inception?

**A:** Yes.

**Q:** Is this Nordic Covenant the same as you have referred to as the Quorum?

**A:** No.

**Q:** Would you say that the Nordic Covenant and the Quorum are in opposition, or just different?

**A:** Segmented relationship.

**Q:** Is there any particular thing about this that I ought to ask at the moment that I am not going to discover in the course of my research? The mail group asked a few questions about this, so I thought I ought to approach the subject. Is the Nordic Covenant made between people who are blond and blue-eyed?

**A:** Not the central issue.

**Q:** What is the central issue of the Nordic Covenant?

**A:** Bloodline extends off the planet.

**Q:** Is this Nordic Covenant a group that is in place on the planet for the purpose of guarding or propagating a particular bloodline?

**A:** To guard secrets.

**Q:** What does this secret have to do with a bloodline?

**A:** You should be able to figure this one out!

**Q:** Are these people with this bloodline and with these secrets the same ones involved with the genetic engineering of new bodies for the Lizzies to occupy at the point of transition to 4th density?

**A:** No.

**Q:** Are these secrets negative to our civilization or race?

**A:** From your perspective, maybe.

**Q:** Do these bloodlines have to do with Nephilim?

**A:** A little.

**Q:** What secrets are they guarding?

**A:** Your origins; the nature of your being.

**Q:** So, this Nordic Covenant is that which wishes to maintain the darkness of our realm, the time loops, the replays, and all that sort of thing?

**A:** One of the players, yes.

**Q:** You also said that the Nordic Covenant was a duality, that it could be positive or negative. So, if that is the negative side of it, is the positive the same, or different?

**A:** Too complex for your current understanding.

**Q:** Is the 'buried treasure' of the Templars or Cathars, or whoever, manuscripts from the Alexandrian library telling about the true origin and nature of man?

**A:** Well if so, maybe that would explain the structure you live under.

**Q:** Society? The Universe? The EM grid? Any or all of the above? What structure do I live under?

**A:** Forced choices.

**Q:** Is that what is buried off the coast of Scotland, the Isle of Man, in that region?

**A:** No, at least not the whole puzzle.

**Q:** Am I at all correct in pinning this location down, so that I ought to work on the further project of getting some detailed maps to get even closer?

A piece is there.

**Q:** Is there also a piece in Rhineland proper, as in Germany or France?

**A:** Maybe...

**Q:** How many pieces are there? Seven? Seven Horseheads... ?

**A:** No more clues on that. Good night.

END OF SESSION

# Chapter 7

## 1999

### 7.1 January 2, 1999

Ark, Laura, Frank, later, “Blue Resonant Human” via telephone

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Siannah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

{Personal family related questions redacted.}

**Q:** {...} Okay. I have had a couple of dreams lately. In one we received a 22,000-dollar check from {Ark’s employer} because they wanted to buy Ark out of the remainder of his contract. In the other, we got a LOT of money, from some unknown source that

seemed to be something like an inheritance. Can you comment on either of these dreams?

**A:** There may be more money for you, but no need to speculate upon the possible sources.

**Q:** I was just concerned about this thing with {the employer}. They strike me as a bizarre bunch of people ...

**A:** All corporations are ultimately linked to the same source, either directly or indirectly.

{Family questions redacted.}

**Q:** Well, let me get to some of these other questions. Previously you said that the central thing about the Nordic Covenant was that there were bloodlines that extend off the planet. From what I understand, all humans on the planet have bloodlines that extend off the planet. In what sense did you mean this about the Nordic Covenant; that the bloodlines extend off the planet?

**A:** Not all so recent, not all so “pure.”

**Q:** In the sense of recent, how recent do you mean?

**A:** Speculate, using your transcripts.

**Q:** I am reading some books about the various members of these families that were involved in all these strange things back in the 12th century. What I would like to know is, were all of these people as licentious and corrupt as these books make them out to be?

**A:** No.

**Q:** Well, the awful stuff that gets written about incest, sexual abuse of young girls, and all kinds of really dreadful behavior among these people – Henry II was actually at war against his own sons and kept his wife in prison for years – it just makes

one ashamed to be connected to these disgusting people! But, you are saying that this is an incorrect portrayal?

**A:** No, “people” are always dubious from some perspective or another.

**Q:** Why is there a legend that the King of the Franks could heal with the touch of his hand?

**A:** So can you.

**Q:** As in anybody?

**A:** Close, if you have the knowledge ...

**Q:** I am inferring from what you are saying that the Franks had knowledge of some order, passed down through the royal families, or the kings ...

**A:** On an individual basis, it has always been thus.

**Q:** On a couple of occasions when you have made the remark ‘it is not germane,’ using that peculiar spelling, did you mean that it was not only NOT German, but also NOT French?

**A:** Maybe.

**Q:** So, we are back to something else. I once asked about the Third Man Theme and that perhaps you meant that the imagery was that of the Triple Goddess relating to the Isle of Man ... and you said ‘if viewed through sheets of rain.’ So, in this book that I am reading, it talks about the fact that the Celts of Gaul worshipped the Rain as the manifestation of the Goddess, and the Celts of Scotland worshipped the Sun ... the male God. Does this relate in any way to this remark you made about sheets of rain?

**A:** In an offhand way.

**Q:** Anything further you can tell me in terms of a clue about ‘sheets of rain?’

**A:** Not for now, when you get there, you will find the chalice.

**Q:** Where and WHAT chalice?

**A:** Wait and see!

**Q:** Okay, now, enough of that. Onto this alien book {title: “The Ultimate Alien Agenda”}. It seems to be almost a point-by-point refutation of some of the things you have told us. At the same time, it is very revealing. This guy says that ‘alien scientists have developed an array of human programs or life orientations which they use to create human hybrids. I was programmed to serve others, and most of my life has been devoted to service as a public official, educator, and psychic counselor. My life exemplifies one category of alien programming.’ Is it a fact that the Reptoid aliens are making a bunch of hybrids to ‘serve others.’

**A:** No.

**Q:** Another thing he talks about is the underground laboratory, and he has a terrible time trying to speak about it because of the pains in his head. He finally gets to the point where he admits that part of the human ‘engineering’ project, part of what they are doing with the embryos they create by harvesting human eggs and sperm, is that they use them for ‘nourishment.’ Naturally, he is aghast at this admission from his own memory. And somehow he just glosses over it. Is this true? That some human embryos are being created to provide nourishment for aliens?

**A:** In a sense.

**Q:** He never comes back to this specifically, except to vaguely state that the vats and body parts and all that, which are reported

by many eye-witnesses, are merely 'symbolic' imagery to teach us how unimportant the body is ... Can you comment?

**A:** Not necessary.

**Q:** He further says that the Reptoid aliens have been increasing human intelligence for these many thousands of years with the intention of letting go and leaving us on our own. The Reptoids are going to pull out soon, because they just came to help us evolve, and now we are at the stage we can take charge of things ourselves ... Have the Reptoids been increasing human intelligence? Is this part of their agenda?

**A:** Perhaps, but the agenda is not as stated.

**Q:** Okay, he says, "I wonder if the current relationship between humans and aliens may be analogous to the abolition of slavery in America. Freedom arises when people accept others rather than being afraid of them or trying to control them. We may be learning to accept a technologically advanced interdimensional race, and the aliens may be trying to transform us into compatible neighbors. Perhaps humans and aliens will become more alike as time passes and our two dimensions will become increasingly integrated. They are now allowing us to discover this information. I believe the aliens are getting ready to reveal who they are, but first they are helping us to discover who we are. Aliens may be programming human hybrids like myself to learn through self-discovery and self-acceptance, and we are likely to learn more about them as we discover ourselves. Important information about them may be archived in our minds or implanted in our bodies. To retrieve the information, we must learn to express the interdimensional aspects of our being. In other words, we must integrate our human and interdimensional selves and learn to function in both worlds. I believe this is how we will eventually establish two-way

communication with our alien creators, and learn to coexist with them.” Blah-blah-blah. Then he says that he was created from the genetic material and soul essences of three separate individuals. Comments please.

**A:** No need.

**Q:** Well, yeah. All of these things have already been covered, which is why it was so interesting to see such different explanations for the same observations. He says that his “image is being used to tell people: wake up human hybrids! It’s time to accept your interdimensional identity. It’s time to discover your Reptilian heritage and fulfill your mission!” YUCK! Then he talks about the sexual aspect of abduction. He wondered why it occurs so frequently.

**A:** This is not germane.

**Q:** And there is that funny word again! But, he thinks there is a link between the frequency of human sexuality and Reptilian intelligence ... he thinks that “this could explain why people so often perceive aliens and their messengers in sexual roles. So many abductees report having sexual experiences, in fact sexuality is a common theme of all alien abduction experiences. Could sexual stimulation be part of the methodology of alien intelligence?” Could it?

**A:** And the “playboy channel” originates on Zeta Reticuli!

**Q:** Okay, I am done. (A) My first question is: I was thinking about what could be the optimal situation for us, for me to work and to proceed, and I decided that the best situation is to have a lot of money, so that we are independent. So, I started to think about how to make a lot of money, and it came to me that the best thing is to get the Nobel Prize next year. So, I started to think about how to get a Nobel Prize, and the best possibility is through computing

this Fine Structure Constant. This is in my reach, and it can be done in one year, and it is safe to get a Nobel Prize for this. Am I hallucinating here?

**A:** Your goals are reachable, but the Nobel Prize is politically charged.

**Q:** (L) Yes, but it gives sufficient influence that one can do what one likes, and it certainly is not the money that you get as the prize that is so significant, as it is the offers you get after you have it that are significant. I don't think that, in and of itself, it is such a huge amount of dough. It is a chunk of change, but not to set one up for life unless one is very frugal and careful. (F) One bar of soap every nine months. (L) It will buy more than that! (F) I am just saying that if you have to be that frugal ... to be set for life ... (A) I am confused. If it is politically charged, this means it is not the optimal way of optimizing the situation.

**A:** Optimal way is nonexistent. But, investing one's earnings helps.

**Q:** (L) Investing in what?

**A:** Wide array of options.

**Q:** (L) Well, when we get some earnings to invest, we will discuss it, unless there is something you want to say now.

**A:** Money shall not be a problem, as we have stated previously. We told Laura that her situation would improve ...

**Q:** (L) I suppose that the '...' refers to the psychomantium?

**A:** No, it refers to other things, too.

**Q:** (A) Next question: I have become active on the internet and came in contact with a fellow by the name of {name redacted}, who proposes some kind of collaboration. So, I am supposed to

help him and he says that we shall apply for a grant from NSF to work on faster-than-light communication. Is this a good idea? Or ...

**A:** Pursue with caution and patience.

**Q:** (A) Is that a way of saying to go with this idea?

**A:** ?

**Q:** (L) I would say, caution and patience means don't move too fast.

**A:** But not "do not move."

**Q:** (A) Are we on the right track with our public activities? Are we not making mistakes in this discussion with these scientology types?

**A:** Be careful about being over-eager to share the information you receive in this communication too widely.

**Q:** (L) We are being careful. Where this communication is concerned, we have only shared some philosophical things. I don't think we have ...

**A:** It is you, my dear, that gives us some concern. This will not be a pathway to "fame and fortune," unless and until it is balanced.

**Q:** (A) Which communication are we not supposed to share, Casiopaeon?

**A:** Yes, but we did not say: do not share. We mean to be careful. Snakes in the grass lurketh.

{“Blue Resonant Human” joins via telephone.}

**Q:** (BRH) I believe I found the right place at Polomar. Is it?

**A:** Yes.

**Q:** (BRH) What is the best day and time to go to Palomar?

**A:** The day is not important, but the hour is best after sunset without prejudice.

**Q:** (BRH) Does that mean any time at night or specifically at sunset time?

**A:** Any time at night.

**Q:** (BRH) Would it be best if I crawled under the fence and had a look at the little lakes there?

**A:** That is okay, but be careful of your footing!

**Q:** (BRH) Do you have any other suggestions? I am open to all.

**A:** Why not bring binoculars?

**Q:** (L) A camera, too. (A) Infrared. (BRH) Is there anything else you want to say on that subject before we bring it to a close?

**A:** Ask specific questions, please.

**Q:** (BRH) Am I talking to a lawyer this time?

**A:** A lawyer has a meter which is always running. We do not. Did you find the rock?

**Q:** (BRH) I think so. Did I?

**A:** You will know, others have.

**Q:** (BRH) What others?

**A:** No, no, not yet.

**Q:** (BRH) So, you are not going to tell me, is that it?

**A:** Yes, that is it.

**Q:** [Tape end, question lost. Notes indicate that it was something about Jack Parsons.]

**A:** Open.

**Q:** (BRH) What is the significance of the rock?

**A:** Well, maybe it has something to do with energy vectors ... Now Dev, you must also know that Palomar is also connected to the activities of those who have controlled your realm for what you would perceive to be thousands of years, as you measure time. But while this is obviously important for a variety of reasons, it is good enough for you to know of this to be protected.

**Q:** (BRH) Well, that was on my mind. (L) Mine, too. (BRH) Is there anything else I need to know to be protected?

**A:** Just know that this locator is oriented the way that it is for a reason.

**Q:** (BRH) Does the military or the intelligence network know of the significance of that place or the rock?

**A:** Well, now have we not opened a can of worms here? First of all, the “military intelligence network,” and the “government” are not existent in the way that they are presented.

**Q:** (BRH) How should I respond to this statement about the military? (L) Well, there is a bunch of stuff in other sessions, so I would try to read it all before asking more questions in that regard. (BRH) Who else knows about this place? And what was the significance of the enormous gate that looked as though it was made to allow huge vehicles to pass?

**A:** Oh now we have hit upon something here, have we not? The gate has a sloping curve. Hmmm ... would it not be nice to know where that leads?

**Q:** (L) How can a gate have a sloping curve? (BRH) Just past the gate, the road curves and slopes downward. (L) Well, if you go looking, don't step on any landmines! (BRH) Are you joking? (F) Semi. But, beware of electronic sensors. Remember, 'watch your footing.' When your eyes finally get opened to all that is going on all around you, right under your nose, you will be amazed. But, when you finally discover that you are nothing more than a marionette hanging from some strings, you want to kick the other marionettes and say 'look at those strings!' And all they ever want to do is dance and think they are doing the dancing. (BRH) Is there anything that can cause bodily injury there – landmines or whatever?

**A:** Lack of caution can cause bodily injury. But then again, 3rd density is ultimately dangerous to one's body!

**Q:** (F) As long as you are aware and you use caution, you'll be okay. (BRH) Who else is aware of the significance of this place?

**A:** Many.

**Q:** (F) Well, it is amazing. I just never thought of Palomar as anything other than an observatory. God knows what is going on underground there - or anywhere, for that matter. (BRH) Have I ever been abducted?

**A:** That will not be answered at this juncture, as the information would not be useful, until the questioner has discovered one more piece to the puzzle relating to "Berkeley."

**Q:** (BRH) Regarding the alleged implant in my back, I am considering having it removed. Is this a wise choice?

**A:** No.

**Q:** (BRH) Is it a good idea to possibly bring Dr. Alexander in on this stuff?

**A:** Only when it has been determined what benefit would be served by all concerned.

Good night.

END OF SESSION

## **7.2 March 6, 1999**

Ark, Laura, Frank, "Chloe"

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Znsllsos.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I think Chloe had a couple of questions that she wanted to ask this evening. (C) When I was living at the farm I had a dream where I woke up with some words reverberating in my ear. Do you know the dream I am talking about?

**A:** Speak in precise in present tense.

**Q:** I have a question about a past dream.

**A:** My dear, fire away. Hesitate not!

**Q:** Is the name and/or the entity 'Sekenenre' significant to my life or to the life of the people gathered here?

**A:** Certainly.

**Q:** Would you care to enlighten us?

**A:** Enlightening comes through discovery, born of searches.

**Q:** Is Sekenenre connected to the legends behind the Knights Templar?

**A:** Whoa!

**Q:** (L) Who? Oh, WHOA! I get it!

**A:** Do you? We thinks you a bit rusty.

**Q:** (C) Okay ... Sekenenre ... (L) I think that ‘whoa’ means that you are supposed to back up and regroup with your questions ...

**A:** Jump to conclusions. How ya gonna keep ‘em down on the “farm?”

**Q:** (L) Is it jumping to a conclusion to think that there is a connection between Sekenenre and the Knights Templar? Well, back up to the personal issue here. The dream. (C) Was I actually a contemporary of Sekenenre in the body?

**A:** See previous answer.

**Q:** (L) I guess you are jumping to conclusions again. I think I would get very basic. In the first place, we don’t even know for sure that Sekenenre actually existed as described or listed. It could be all disinformation. Was or is Sekenenre an incarnate person?

**A:** No.

**Q:** (L) Why was Sekenenre known as one of the pharaohs of Egypt?

**A:** History is a bit muddied by design.

**Q:** Okay, from what source did this dream and this voice Chloe experienced originate?

**A:** Now you are getting back on the track.

**Q:** (C) So, what source?

**A:** Sometimes, our fifth density friends play games when they know our vulnerabilities.

**Q:** (L) Are you saying that this source was fifth density and that it was playing on her vulnerabilities?

**A:** Yes.

**Q:** And what vulnerabilities were these?

**A:** Assumptive mind analysis.

**Q:** (L) Well, who is Sekenenre?

**A:** Not yet.

**Q:** (L) What was the purpose of this dream and voice?

**A:** Multi-tiered.

**Q:** (L) Can you tell us the most basic of the purposes?

**A:** Riddles reveal.

**Q:** (L) What was the riddle?

**A:** Search for truth.

**Q:** (C) Okay, so Sekenenre did not exist as a person ...

**A:** Chloe, you could have foreseen all obstacles if you had learned better interpretations. Review for revelation.

**Q:** (L) Review what for revelation?

**A:** Dreams, my dear, dreams!

**Q:** (C) It was pretty simple. There wasn't really a dream. I woke up, and as I woke up I realized that just before I woke up I heard a voice saying, "Beloved of Sekenenre." I told you about it because I had never heard a voice so clear and I had never heard of Sekenenre. You found Sekenenre as a pharaoh in that book about the Masons with a hole in his head. Okay, who was the skeleton with the hole in its head in the book that was identified as Sekenenre?

**A:** Masonic rites guide to life's path.

**Q:** (L) Chloe's life path?

**A:** And others too.

**Q:** (L) So, Chloe had the dream and the "word." I found who it was and the connection...

**A:** Clues ... not conclusions.

**Q:** (C) Was this an illustration of a connection of our lives?

**A:** Maybe, but there is more to it than that.

**Q:** (C) Are Laura and I and Frank and Ark also, connected to Sekenenre or is fifth density involved in that in some way? That's not a clear question ...

**A:** And this is not clearly explainable, unless one gives up all of one's assumptions/anticipations.

**Q:** (C) So, forget about the connection; that's really not important.

**A:** We had trained Laura do this, but she is rusty!

**Q:** (L) Not so much rusty, but this is Chloe's dream. If this were my dream and I wanted to find out some things about it, I would ask, first of all, was it in fact the ending of a dream?

**A:** Yes.

**Q:** (L) Okay. Was it also an interaction with beings of other densities?

**A:** Fifth.

**Q:** (L) Were these beings STS or STO?

**A:** Fifth is recycling zone.

**Q:** (L) Was it someone on the verge of recycling, someone who was being recycled, or was it someone who had been incarnated and was in the recycling zone between incarnations?

**A:** Latter.

**Q:** (L) So, it is someone who had been incarnated and was now at fifth density, having died. Was it someone Chloe had known?

**A:** Yes. Maternal.

**Q:** (C) Was this my mother?

**A:** Yes.

**Q:** (C) Was the name Sekenenre one of her ...

**A:** Your fifth density connections must get creative in order to message, as that old free will edict is a real “bear.”

**Q:** (L) So, in other words, her mother was trying to get a message to her in such a way as to not violate free will?

**A:** Close enough for horseshoes!

**Q:** (C) So, I am getting messages from my mother and others on the other side. And Laura found the Sekenenre ... what did the ‘beloved’ part mean? Was that just an attention getter?

**A:** Maybe.

**Q:** (L) Okay, you have dealt with the free will part and you know that somebody is trying to get messages to you without violating your will ... Would it be part of this free will, or message business ... (C) Okay, I'm here, so let them give me the message.

**A:** No.

**Q:** (L) Well, she got the message, it connected to something in a book, would it be possible ... (C) Is my life path part of the message they were trying to get to me?

**A:** Not really ...

**Q:** (L) Can we assume that, since such a dramatic message was conveyed to her, that she DOES have a life path and is, perhaps, not following it, and that this was a 'wake-up call'?

**A:** Not bad for shooting in the dark!

**Q:** (L) So, I'm there!

**A:** Not there, but maybe in "Orlando."

**Q:** (L) Is she supposed to be in Orlando to find her life's path and Sekenenre?

**A:** Better to meditate on this.

**Q:** (C) I'm planning on going to Orlando next week. Will I find a clue at that time?

**A:** It is possible.

**Q:** (C) Is this related to business?

**A:** Ditto.

**Q:** (L) Okay, you had a communication that you told me. I found a clue and told you. You couldn't make head or tails of it, which led to you now asking and being told that someone has tried to tell

you something without violating free will, and they have pointed in the direction of Orlando and meditation. That seems to be about the limit of free will here.

{Personal family matters redacted.}

**Q:** (L) I would like to know what was the source of the fire that started by the house last night? Was it J\*\*\*\*'s cigarette tossed over there?

**A:** And tannic acid.

**Q:** (L) I have been working on putting the puzzle together and I have come to a lot of thoughts, and I have been reviewing the material and finding clues here and there, and I found this amazing sunken city in Wisconsin. Somehow I am wondering if this is what you meant when you mentioned treasures in Rhineland. It is not in Rhineland, but it is not too far. I would like to know if this is part of the clue system since there was a huge link between this site and the Canary Islands. {Book referenced is Frank Joseph's "Atlantis in Wisconsin."}

**A:** Keep digging.

**Q:** (C) That's an interesting double-layered remark. (L) When you made the remark that travel is okay for me in small doses, I started thinking that when the point in time comes for us to go and dig something, that it might be either right under our house or not too far away?

**A:** Maybe.

**Q:** (L) Is it still an important thing for us to find what is buried under this house?

**A:** If you have a hunch, does it serve you wrong?

**Q:** (L) Not usually. It would be so bizarre to find something im-

portant right under this house. That would explain why I got it so easily!

**A:** And would that not be cool?

**Q:** (L) Yes, it would be totally KEWL! Okay, so ... that is a possibility. I have been trying to take it easy in order to let things sort out in my mind. On the one hand, I feel sort of useless, on the other hand I think I am doing the right thing for the moment ...

**A:** It all leads to paydirt. So, patience is the virtue begotten.

**Q:** (L) Well, there have been several clues along the way about something under this house, and I asked once about the value of it, and the reply was that it was very valuable to some, so that gave me the idea that it was an artifact of some sort rather than money or jewels or so. (C) Well, tonight they have remarked about digging and paydirt. (L) Well, the circumstances surrounding the getting of this house are just so bizarre, and it was remarked that there was a reason I got this house ... a very specific reason. Was there ever another structure here before this house was built?

**A:** For you to discover.

**Q:** Well, we're getting too close to it ... and this Miami Circle thing makes you wonder ... (C) Was there a cellar there before the cement block cellar was put in?

**A:** Maybe. We ain't gonna tell you that!

**Q:** (C) I think what's down there is older than the cement blocks. They said something about an eccentric former owner hiding something down there, and it could have been something HE found rambling around these parts and then reburied. (L) It would just crack me up if this blasted thing I'm looking for all over this planet is buried right under this house! That would be

absolutely the ultimate irony! (A) I want to ask about my sleeping disorder ... what is the reason ...

**A:** Vitamin and dietary changes, combined with diligent efforts to solve that which may or may not be solvable at work. Increase dairy intake, add light doses of niacin.

**Q:** (A) What about this humidity that I think I am lacking in the air? I can't sleep because of this.

**A:** Open windows up.

**Q:** (L) Well, if he does that, I won't be able to sleep!

**A:** Yes you will.

**Q:** (L) No I won't. I'll breathe that outside air and it will kill me!

**A:** If that will kill you, then you are doomed.

**Q:** (L) Speaking of air and being doomed ... there was some stuff on the internet the other day about contrails being a dump of chemicals or bacteria or something into the atmosphere this way and that this is what is making everybody sick. Is there any truth to this rumor?

**A:** Not much, but in isolated instances, yes.

**Q:** Well, we don't have anything else tonight ...

**A:** Goodnight.

END OF SESSION

## **7.3 June 19, 1999**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Wampha.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Since our lengthy sabbatical, I have accumulated a number of questions, but there has been another matter that has come up in the past few days that I would like to cover first. Apparently there is a newly discovered comet that some people are suggesting fits the prophecies of Nostradamus where he says in quatrain 10.72:

L'an mil neuf cens nonante neuf sept mois,

Du ciel viendra vn grand Roy d'effrayeur:

Resusciter le grand Roy d'Angolmois,

Auant apres Mars regner par bon-heur.

which translates into English:

The year 1999, seventh month,

From the sky will come a great King of Terror:

To bring back to life the great King of the Mongols,

Before and after Mars to reign by good luck.

The reason for the comparison is because it is thought that Nostradamus was referring to September and NOT July, and, in point of fact, this comet will have made its circuit around the [sun] by September, and some folks are theorizing that it could be 'vacuuming' and picking up a lot of matter which could slow it down,

change its direction, and cause it to interact with the Earth in a detrimental way. Is this, in fact, going to happen?

**A:** Nostradamus had a specific date tied to a vague prediction.

**Q:** You are right. Yes, that's true. Are you suggesting that there is some other event besides a cometary one that he is referring to in this prediction?

**A:** If he was, let it not be known. The question is: is "1999" a number, or is it more?

**Q:** You mean that 1999 could imply a code of some sort?

**A:** Perhaps it is best for you to see events in this subject unfold, then analyze later. Maybe it is a beginning of a cycle ...

{In retrospect, it almost seems like a hint about 9-11.}

**Q:** Well, there is another thing that the 'Millennium Group' has brought up, and that is the possibility that there is some object that has entered our solar system and the increased sunspot activity and so forth is a reaction of the sun to this object or objects. Can you comment on this?

**A:** The sun needs no such prompting to react thusly. It is a reactor, after all. It tends to react to less than others react to it.

**Q:** (A) But what is the 'it?' (L) And, the sunspot prediction was around a hundred the other day, but the actual sunspot activity was 240, I believe. Now, supposedly, when this Comet Lee swings around the sun during this period of high sunspot activity, the Millennium Group are saying that it is going to discharge the solar capacitor and that there is a possibility that great bolts of electricity will pass between planets and the comet or between planets and other planets, or between the sun and the comet, or something. Is this, in fact, likely to occur?

**A:** Bolts charge between positive and negative ions. What is the sun's atomic structure vis a vis its "children?"

**Q:** (L) I guess the sun is positive and its children are negative, right?

**A:** We have a physicist present, yes?

**Q:** (L to A) Is the sun positive or negative? In an atom, what is the charge of the nucleus? (A to L) The question is: what is plasma coming from the sun? Electrons. Then what remains is positive. (L) So the sun is positive, and, since the electrons flow out toward the planets, then the planets must be negative, right? (A) That's a possibility.

**A:** Research this for definitive answers to your question. What about the positive/negative ratio between earth's ionosphere and possible passing "objects?"

**Q:** (L) Well, that's what I was asking. These fellows claim that there will be discharges either between the sun and the comet, or the comet and the planets, or the planets and the planets, or the sun and the planets ... all the bases are covered!

**A:** No they have not. What about the "vacuum" of space?

**Q:** (L) Are you saying that this electrical discharge can't create visible bolts of lightning because of the vacuum conditions of space?

**A:** No we are not. We are posing a question in order to stimulate intellectual debate and inquiry. Learning is fun, after all!

**Q:** (A) I want to ask about the 'plasma theory of comets,' which the Millennium Group are promoting.

**A:** The plasma theory is correct, when certain factors are present. Could it have something to do with the composition of the object in question?

**Q:** (A) This is exactly the question. The object in question is the comet, and the question is: what is its composition, is it a dirty snowball, or is it a charged object that collects particles on its way like the ‘vacuum cleaner’ model?

**A:** Nickel?

**Q:** (L) So the composition of this particular comet is nickel?

**A:** No, we are almost desperately trying to “jump start” your intellectual capacities. Remember, this is a group effort here. Not a series of questions from the meek and helpless to the Lord High Commander!!

**Q:** It seems that they are desperately trying to tell us something without violating free will, but we have to participate in order to receive it.

**A:** Yes.

**Q:** (A) I just want to know about this particular comet?

**A:** Nickel?

**Q:** (L) What do we know about nickel? (A) There are all kinds of things about nickel. It is a metal. The question is whether nickel has anything to do with this particular comet.

**A:** If it does, it could be vital.

**Q:** (A) What is the composition of this comet?

**A:** Most comets are indeed “dirty snowballs,” composed largely of water ice and particulate matter. But, some are more like fast moving asteroids caught up in an orbital plane. Your “Millennium Group” is maybe just a bit too one-side-or-the-otherish at this point. Thus, a spectral analysis of this object is in order before one assumes it to be a cosmic vacuum cleaner.

**Q:** (A) I guess from this that, even if these guys can be in some cases correct, this comet, after analyzing, will prove to be just an ordinary dirty snowball. That is my guess.

**A:** No guessing allowed!

**Q:** (L) These guys say that they have repeatedly ask to get some data on this comet from the various government sources who have the capacity to do such analyses, simply have not been forthcoming with this information as though they have something to hide.

**A:** They are not the only ones who can analyze.

**Q:** (L) Then, I guess we need to find somebody who has done a spectral analysis. Find out who can do this. (A) It requires special equipment ... (L) Is there something about this comet business that you want to convey to us so that we need to keep on it until we get to the right question?

**A:** You need to “keep on” a lot of things.

**Q:** (L) That’s what I mean. If there is nothing crucial about this at the moment, if spectral analysis is what we need to find and you are not going to tell us what it is composed of ... ARE you going to tell us? What is it composed of? Or do we have to do a spectral analysis and find out on our own?

**A:** Have we not already indicated? Knowledge is power. If we give it to you like Halloween candy, it is diffused.

**Q:** (L) You said that the primary composition of this comet is nickel?

**A:** No, we said “nickel?”

**Q:** (L) What does ‘nickel’ mean? (A) It’s a shiny metal. (L) A coin, a five-cent piece ...

**A:** What does molten nickel look like against the backdrop of space?

**Q:** (A) It would look like silver ... (L) Would it have a color? (A) I don't think so.

**A:** Does it conduct electricity? Is it magnetic?

**Q:** (A) Yes, it can conduct, but it's not magnetic. Why 'molten'?

**A:** What about the "tail" of such an object coming into contact with the ionosphere?

**Q:** (L) Oh. I think I get it. The Nostradamus thing about a great comet's tail or something ... let me look it up:

After great trouble for humanity, a greater one is prepared

The Great Mover renews the ages:

Rain, blood, milk, famine, steel and plague,

In the heavens fire seen, a long spark running.

This one is supposed to refer to something that occurs at the turn of the Millennium ... Is this what we are getting at here? Something that will look like a 'long spark running' which then comes in contact with the ionosphere which may exchange potentials with the earth by virtue of this conducting, molten nickel tail? Yes????? Is that good?

**A:** Ask Arkadiusz.

**Q:** (L) Well, honey ... am I on to something here? (A) The point is that this comet is in space. Space is rather cold, so the question is: what would make nickel molten? (L) Well, it will be close to the sun! That will heat it up! (A) This particular comet is not going to come close enough to the sun to melt it! (L) Well then, how can the nickel be molten???

**A:** What about flares?

**Q:** (L) That's it! A bodacious solar flare! And, combined with the bodacious solar flare is a change of trajectory because of its accumulation of matter ... so that it is closer to the sun ... (A) But it is not coming close enough to the sun to be caught in a solar flare!

**A:** Is nickel magnetic?

**Q:** (L) No. What does it mean to this subject that a nickel is not magnetic?

**A:** Does nickel have a companion?

**Q:** (A) Well, when we say a 'companion,' it means another metal in the same family in the Mendeleev Table. I believe that cobalt and nickel are in the same family, but I will have to check ...

**A:** And cobalt is invisible in the good old vacuum of space, but not nickel!

**Q:** (L) Does that mean it will attract cobalt?

**A:** No, cobalt will attract.

**Q:** (L) The cobalt will attract flares ... electromagnetic phenomena ...

**A:** Et al.

**Q:** (L) I see.

**A:** Now, you need to know the composition of this comet ... And any other closely following same. We have alluded to the increased cometary activity before. Oort, and that which cyclically disturbs it.

**Q:** (L) I just want to know one thing ... are any of these comets gonna hit the earth?

**A:** Someday, certainly. As have before.

{Sound anomaly on side two of tape one begins here.}

**Q:** While we are on the subject of the comet, sort of, a corollary thing, if this kind of activity gets out there, naturally the stock market is gonna drop completely off the charts ... all the financial institutions on the planet. Things will be dire and desperate if such things get out ... We were wanting to ask about investment possibilities ...

**A:** Is such information going to “get out?”

**Q:** I doubt it. The powers that be will convince everybody that nothing is going on. There is nothing about it at all in the press. Very quickly, throw out a couple words about investment potentials at the present time.

**A:** Hold on, or buy a little of the precious metals ...

**Q:** Next: I’m not going to read this whole thing here; it’s a statement by Arizona Wilder who claims that she conducted human sacrifice rituals for the Illuminati Elite for decades. These included the British Royal Family, George Bush, Henry Kissinger, and a stream of world famous names revealed in “The Biggest Secret” and the video “Revelations of a Mother Goddess,” available through this web site, which is David Icke’s. Since she escaped from her mind-controlled confinement she has dedicated herself to exposing what is happening. First question: did Arizona Wilder conduct human sacrifice rituals for the Illuminati Elite for decades?

**A:** Is Henry Kissinger a royal bloodline?

**Q:** I don’t think so. George Bush is distantly related to the Queen of England. I think that what she means is “for” the royal family, AND George Bush AND Henry Kissinger. Is this woman what she

claims to be and did she do what she claimed to do?

**A:** Better “hold the mustard” on that one.

**Q:** What does “hold the mustard” mean?

**A:** Be careful before swallowing whole.

**Q:** I see. Well, she also says the Illuminati, the clique which controls the world, are genetic hybrids, a result of interbreeding between human beings and the reptilian aliens many thousands of years ago. The center of power is not even in this dimension, it is in the fourth dimension, the lower astral as many people call it, the realm of demons of folklore. She obviously doesn't have a CLUE!

**A:** Either that or all humans have some reptilian genes ...

**Q:** She says that every presidential election has been won by the candidate with the most European Royal Genes. Of the 42 presidents up to Bill Clinton, 32 have been related to Alfred the Great ...

**A:** John Kennedy???

**Q:** Well ...

**A:** No, answer please.

**Q:** Did Kennedy have royal blood? I think Nixon had more than Kennedy.

**A:** So then, need we say more???

{The “speeded up” recording of side two of tape one caused this to be the end of the tape. The following is reconstructed as best as possible from memory.}

**Q:** All right, we have two pictures of the interior of the pyramid here. One is supposedly taken from a drawing in a book pub-

lished in 1861 and I would like to know if this is what the interior of the pyramid looked like then?

**A:** Close.

**Q:** Does this mean that those guys over there working in the pyramid are hiding the true map of the interior?

**A:** Close.

**Q:** Well, why are they doing this?

**A:** Why do you think?

**Q:** Well, I just can't understand how they could get away with a deception like this!

**A:** The point is you have been deceived about the pyramid in so many ways. Why should this surprise/matter.

**Q:** Okay, I have been invited to talk on the radio. Is it in our best interests for me to do this?

**A:** If you are careful not to get "carried away," and reveal too much.

**Q:** How will I know what to say and what not to say?

**A:** Instincts.

**Q:** Eve Lorgen {author of a book about "alien lovebites"} had a question as to how one can go about deactivating the programs of the Lizzies and their human cohorts such as have been described by yourselves and others?

**A:** In order to "deprogram," one must first be aware of the programming.

**Q:** How does one become aware of the programs?

**A:** Knowledge, knowledge does what ...?

**Q:** Are you saying that simply knowing about them is the key?

**A:** Once you have the knowledge, you have broken open the veil!  
How does one get the knowledge?

**Q:** I don't know ... how?

**A:** When those most intimately familiar effectively telegraph.

**Q:** Telegraph as in some sort of electronic signal or simply communicate the information?

**A:** Latter.

**Q:** What kind of information specifically?

**A:** Triggers.

**Q:** It will trigger something?

**A:** Programming keywords.

**Q:** Oh, you mean learning about the trigger words will open up the knowledge of the program so that a person can then deactivate it?

**A:** Close.

**Q:** So, I should get in touch with this woman who has this study of programming and get her book and this will help me to know what sorts of programs I may have?

**A:** It may lead there. Network with those most familiar with the process.

**Q:** Well, so far, you are the ones who are most familiar with the programs and have been best able to communicate these things.

**A:** Maybe the best, but not the only.

**Q:** (A) I would like to know what methods of programming may have been used on L during her kidnapping ... the week-long ‘missing time?’

**A:** Research Gestapo techniques. Who became CIA.

**Q:** So, we need to look at the German programming techniques ...

**A:** And Waffen SS.

{Side two of tape two begins here. No sound anomaly.}

**Q:** (A) So the answer to my question is yes, I guess. Now the question is how to get rid of things implanted by these techniques and the answer must be knowledge. If there is something that was implanted during this missing time, the question is how to find out and get rid of the programming without putting in danger ... how can researching the techniques help us to deprogram and access without harm. Sometimes it is better to let sleeping dogs lie. Can we have some help here?

**A:** You have it.

**Q:** (A) We have a clue. (L) When we returned from the Gulf Breeze Conference, I wrote a letter to Linda Howe and she responded and wanted to know about the deal with Mike Lindemann, that we didn’t see eye-to-eye because he and his group were Gray Huggers and promoting the Gray Hugger gospel. Since that time I have communicated with a couple of other people who have been very disturbed by Linda’s apparent drift into the Gray Hugger realm. She collected all this information in these books and does such fine work, yet she seems to be missing the point. In the third book, she prints a whole bunch of channeled information that is, for the most part, cleverly twisted disinformation about the aliens being here to help us and blah, blah, blah. They even use phrases like ‘we are you in the future,’ only the

ones who are saying this are Grays and Lizards, so it is clearly the probable future they would like to invoke. They give some true information that is just twisted slightly to put the slant in the Gray/Lizzie camp! My feeling is that Howe, Lindemann, Art Bell, and the whole crew of them are disseminating disinformation and I don't know if this is deliberate, forced upon them, or if they are innocent dupes of the Lizzies. Could you give me some insight on this?

**A:** Maybe you should pursue Linda from a more inquisitive angle before the "body slam" technique commences. Get a dialogue going, then begin infusing. Patience pays!

**Q:** At the UFO conference there was a guy named Lloyd Pye who has this skull that he thinks is an alien skull.

**A:** Even if it is, do you feel he has a chance in Hell of being heard?

**Q:** Of course not. But, for my own personal curiosity, is it an alien skull or a severely deformed child?

**A:** Maybe it is a goat.

**Q:** It's not a goat! It is definitely humanoid type! That was not even nice!

**A:** We were not being mean to you. We meant chimpanzee, but we got confused! Sorry ...

**Q:** At one point you said that Hermes Trismegistus was the betrayer of Pharaoh Rana. Who was this Pharaoh and when did he reign?

**A:** We will leave that for another session. Good night.

END OF SESSION

## 7.4 July 3, 1999

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Orotheia

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I would like to find out what was the deal with this radio show? Ron Engelman invited me to be on his show, and the day before it was scheduled, he called telling me his schedule had been changed and I had been cancelled. Why was it cancelled?

**A:** Maybe others complained.

**Q:** Who were these others who might have complained

**A:** Others scheduled to appear.

**Q:** What did they complain about?

**A:** Your purported agenda.

**Q:** What agenda did they object to?

**A:** Us, my dear.

**Q:** Well, that does seem to be true. We do get more than our share of attack. I just want you to know that, for the most part, it is a thankless task.

**A:** Which means you are on the right track.

**Q:** (laughter) Well, if the Gray Huggers don't bomb us, or the scientific types don't bomb us, then somebody else does! Okay, recently there were some serious questions being brought up on one of the mailing lists about Linda Howe being 'co-opted' for disinformation purposes. A number of seemingly reputable people have pointed out coincidences in clear disinformation and her work. I have always felt that, of all the people out there doing research, she was truly sincere and clear headed. Could you comment on that possibility?

**A:** Linda is not co-optable.

**Q:** Why is she hanging out with folks who DO seem to definitely be co-opted and promulgating such clear disinformation?

**A:** The modus is not to be confused with the operandi.

**Q:** There was a strange little series of events last week involving Ron Engelman, Eve Lorgen, Hank Harrison, Dick Farley, and Ira Einhorn who wrote me a couple of e-mails. I would like to know what is the deal with Ira. Either this guy is completely crazy to have lived for 18 months with a dead body in his apartment, completely egotistical and believes nobody else is as smart as he is, or the whole deal was planted to shut him up, or he was Greenbaumed. Now, did I miss any possibilities, is it one of these, or is it something else altogether?

**A:** Maybe he did what he did, and then, convinced himself that he did not a la O.J. Simpson.

**Q:** In this whole situation, who or what was the portal connecting all of these things?

**A:** To find portal, retrace steps until you find the ray peeking through the blinds.

**Q:** (A) Was it coming through me?

**A:** No.

**Q:** Well... it all started when I began to communicate with Eve.

**A:** No. It was not Eve. She is under attack for her revelations.

**Q:** (L) Can you give me another clue? ‘The ray peeking through the blinds...’

**A:** Yes.

**Q:** Is it Ron Engelman?

**A:** But who manipulates Engelman?

**Q:** 4th density, no doubt. {I dropped the subject, but retrospect shows that the “ray peeking through the blind” was undoubtedly Ray Flowers, friends with Vincent Bridges. At this point in time, Bridges was a very small blip on my radar.} My first question is regarding this diagram of the pyramid here and this second diagram of the pyramid as we know it and this book about the pyramid where it says: ‘In 1974 the Danish professor, Hubert Paulsen, a retired architect, announced following extensive research within the pyramid, his theory that an undiscovered chamber existed, probably beneath its foundations. He based his theory on the geometric principle upon which the pyramid was built. This chamber may have been the pharaoh’s tomb and may contain treasures even more remarkable than those found in Tutankhamen’s tomb.’ Anyway, this was a 1974 study of the pyramid. This is the only 1974 study I have come across since you suggested that we look for something done in 1974 regarding the pyramid, though you mentioned an ‘engineer,’ so I was first thinking that it must be Robert Beauval’s work, since he is an engineer. I suppose that an architect could be a sort of engineer. Is this the study that you had in mind?

**A:** Paulsen could use further perusal.

**Q:** Of these two diagrams of the interior of the pyramid, this one was taken from a booklet published in 1861 which describes a great cavity in the center of the pyramid. When people were visiting the pyramid at that point in time, was this, in fact, the configuration of the interior of the pyramid?

**A:** Close.

**Q:** Is it still configured that way but that portion of it is blocked off or concealed from visitors at the present?

**A:** Close.

**Q:** Do the present excavators and archaeologists and workers over there know about these other chambers in the pyramid?

**A:** Some.

**Q:** Is there a large chamber under the pyramid concealing some sort of artifacts?

**A:** Yes.

**Q:** Is this a treasure or is this information?

**A:** Either/or.

**Q:** Are the people who are working in or around the pyramid at the present time aware of this deeply hidden underground chamber in the pyramid?

**A:** Only a few.

**Q:** There is one woman whose writings are posted on the internet and she claims that the pyramid is a 'great clock' and that it would 'reset the time' of the planet.

**A:** No.

**Q:** Well, she claims that she has been given information that there once existed some kind of a great gear or wheel that was set in the Grand Gallery and that it would roll or something in the notches found there. If that is not the case, what were these notches for?

**A:** Levelling principle.

**Q:** Levelling of what? They were used to set a level of something? When something was put in the notches, it set the level of something?

**A:** Close.

**Q:** Was what was placed in these notches, these holes some type of a bar-type object that crossed the gallery from side to side?

**A:** You do not have the base data yet.

**Q:** What is the base data?

**A:** Clues lead you there, not proclamations.

**Q:** I would just like to have some sort of visual image of what was placed in this gallery...

**A:** We know you would.

**Q:** Everybody in the world is posting crazy, bizarre theories on the internet, and writing these elaborate web pages about their visions and their information from other 'sources,' and that the pyramid is a giant bell, or a clock that resets time, and so on and on....

**A:** Hoagland.

**Q:** Fine with Hoagland! He was on the radio the other night saying that Leedskallen moved his Coral Castle because he wanted to align it with Hoagland's proposed grid theory. That is clearly the

most obvious foolishness since Hilliard told us about the moving of the Coral Castle and that it was because of some county regulatory reasons. That is the most ridiculous bunch of poppycock I have ever heard!

**A:** Whatever else you find true about Hoagland, just remember that genius resides adjacent to insanity!

**Q:** (A) What is the meaning of this remark about Hoagland?

**A:** Some of his stuff may be “poppycock,” but some is right on the money, honey!

**Q:** (L) Well, what did Hoagland ever say about the pyramid? (A) He said that the way the Coral Castle was built was the same way the pyramid was built. (L) Well, we know that because Leedskallen said that himself! That’s not news. Hoagland talks about this 19.5 degree latitude line and this double tetrahedron, but I don’t know how that relates to something that is located at about 29 degrees of latitude such as the pyramid. That’s about 10 degrees off. Has Hoagland ever opined about the pyramid itself?

**A:** Look it up!

**Q:** Okay. We will. (A) Carbon dating. Is it incorrect by a factor of two prior to 10,000 years as L has suggested? We observe a factor of 2 variation in the scientific dating versus your dating. This is a repeating phenomenon on nearly all dates you have given.

**A:** “They” fail to take into effect the influence of magnetic aberrations caused by ancient cataclysms.

**Q:** (L) How can these magnetic aberrations affect radiocarbon dating?

**A:** By altering the isotopal imprints of matter.

**Q:** So, the cataclysm of about 1500 B.C....

**A:** All of them scramble the radiological data because of magnetic surges.

**Q:** (L) Speaking of magnetic surges, we have been in an apparently very high sun spot cycle. What noticeable effects, other than those commonly known, could these extreme numbers of sunspots be having on the planet or inhabitants?

**A:** Increased static electricity.

**Q:** (L) So, increased static can mean more electrical storms?

**A:** And other.

**Q:** (L) Regarding this prophecy of Nostradamus and Comet Lee, we discovered that a fellow named Peter Lemesurier went back to the original editions of the seer's work and found that a misplaced apostrophe changed the word 'appeaser' to 'terror' so that it is NOT the 'Great King of Terror' but the 'Appeaser King' that is connected to the 'seventh month' of 1999. Of course, the standard interpretations say that whatever it is, it is going to 'bring back' the 'Great King of the Mongols,' which they are identifying as Kublai Khan or Genghis Khan. Could you comment on this?

**A:** Comment? How so?

**Q:** What could an 'appeaser king' imply? What could it mean?

**A:** You have the power to define these terms.

**Q:** (L) Yeah, but there are only so many hours in the day! But, an 'appeaser' is one who brings peace or 'pacifies' or 'quiets' by giving into demands. It can also mean to 'satisfy' or 'relieve.' The only thing that fits in these terms with 'king' - the only person I can think of who NEEDS to 'satisfy' or 'relieve' is Prince Charles, and he has a sort of 'debt' to pay the British public for the death of Princess Diana, or so it is perceived. But, the only way he could be king would be if Queen Elizabeth dies. So, is this a prediction

of the death of Queen Elizabeth and the accession of Charles as king and his repudiation of Camilla? Am I onto something here?

**A:** Maybe.

**Q:** (F) But how would he bring back the 'king of the Mongols?' (L) I don't know. The 'king of the Mongols' could be related to having a harem or something... give us a clue here on this!

**A:** No.

**Q:** (L) Previously when I had asked a question about Hermes Trismegistus, you remarked that he was a 'traitor to the court of Pharoah Rana.' Who was this Pharoah Rana? Was he prior to the Pharoah Menes?

**A:** Much prior.

**Q:** Was the Pharoah Menes the same as King Minos of Crete?

**A:** No.

**Q:** What was the relationship between the Cretans and the Egyptians?

**A:** All were the same originally.

**Q:** So they were Egyptians who left Egypt and moved to Crete and set up their version of the Egyptian culture there? Is that it? Or did they develop independently?

**A:** Former is closest.

**Q:** Was Abraham, the founder of the monotheistic covenant, Hermes?

**A:** No.

**Q:** Was Akhenaten Moses?

**A:** Only through the eyes of the themes.

**Q:** What happened to Akhenaten? He also brought about the monotheistic worship and was apparently so hated that any mention of him, his very name, was stricken from buildings and statuary; his tomb was defaced and there was tremendous turmoil in the land. He essentially disappeared from the landscape, erased by the people who must have really hated him. What was the deal with Akhenaten?

**A:** Is not that enough? Must one endure anymore?

**Q:** Endure anymore what?

**A:** Vilification.

**Q:** Why was Akhenaten portrayed in images as a rather feminine individual? Did he have a congenital disease? Was he a hermaphrodite? Was he an alchemical adept who had gone through the transformation?

**A:** None of these.

**Q:** What was the reason for his strange physical appearance; his feminine hips and belly and strangely elongated face...

**A:** Depictions.

**Q:** So this was NOT how he really looked?

**A:** Not really.

**Q:** Did he choose to be depicted this way?

**A:** No.

**Q:** Was he depicted this way later as an insult?

**A:** Closer.

**Q:** Well, Abraham was the father of Ishmael who was the 'father of the Arabs' according to the Hebrew texts. Hermes was sup-

posed to have been the father of Arabus who was also called the ‘father of the Arabs.’ This Arabus was the legendary father of Casiopeia, which is almost a parallel development with just some name changes. It seems as though Arabus and Ishmael were comparatively the same in type and function and there are further comparisons to be made. But, the essential thing here is that Casiopeia would then have been a granddaughter of Hermes and daughter of Ishmael, and we have talked before about the bloodline of the Ishmaelis as the true ‘royal line.’ Can you comment on this?

**A:** You are doing well in your analysis.

**Q:** But, just a few minutes ago you said that Hermes was NOT Abraham, and Abraham was clearly an adept...

**A:** What we are saying is... it is time for Arkadiusz to ask questions.

**Q:** (A) My first question is: has there been a change in the time schedule in the coming of the comet cluster and ‘twin sun?’

**A:** There is no “schedule,” as such.

**Q:** (A) There is no schedule, but there was uncertainty concerning the disasters that are coming...

**A:** Disasters?!?

**Q:** (A) Yes, disasters... these comets will come and some of them are supposed to cause a pole shift and this is certainly a disaster...

**A:** Whoa! Wait a minute, Arkadiusz! All is according to perspective! Let us not be subjective. If one transits to 4th density in the midst of said “disaster,” then how disastrous is this!?! And, how does one suppose to know the “schedule,” when it is up in the air, so to speak?

**Q:** (A) So, it is not going to be a disaster for some - those who transit to 4th density. I understand.

**A:** And for those who transit to 5th density, it will not be so bad either. Sort of like, “sit back and enjoy the show.”

**Q:** (L) Well, you once told me to ‘sit back and enjoy the show.’ Does that mean I am going to 5th density soon?

**A:** Soon? Later? What is the difference? You were prescreened before entrance into your present container.

**Q:** (A) What do you mean by ‘prescreened?’

**A:** You saw a preview, and you volunteered.

**Q:** Well, I was under the impression from things you have said that we have some sort of mission here...

**A:** Yes, and...

**Q:** (L) Does that mean checking into 5th density in the middle of all this?

**A:** You think the job ends there?

**Q:** (L) I don’t know... you come into a body with a plan...

**A:** We know, you thought you were guaranteed so many “years.”

**Q:** (L) No. You can always screw up and make the wrong choice and check out on any day...

**A:** Yes.

**Q:** (A) I was going to ask a question about this mission, because the time is passing, and, as far as I see...

**A:** Time does not pass, as such.

**Q:** (A) Days are passing. Days on the calendar, and we are not accomplishing...

**A:** Nonsense!!!! You have made enormous accomplishments, so far.

**Q:** (A) What are these accomplishments, for instance?

**A:** Where were you in 1996?

**Q:** (A) You mean geographically?

**A:** No, we mean in all terms. Well... ?

**Q** (A) The question is: what is the mission? I am spending most of my time programming, and it takes more and more of my time and I have no time for research. I am not as desperate as I was before, but...

**A:** Do not worry! And you did not verbalise the answer to our question.

**Q:** (A) In 1996... well, I was hoping that I would gain some more knowledge because the rate at which I was gaining this knowledge was very slow according to my criteria.

**A:** Ahh! Your criteris are not really that limited. Or at least they should not be. Remember, Arkadiusz, successful research involves discovery on more realms than just graphs, charts and theses. The rhythm of the soul must be in harmony before one's hypotheses can even begin to mesh with accomplishments.

**Q:** (L) If I can interject, does this mean that all that he is doing now, even if it seems as though he is not pressing forward in direct research, is a balancing period, or a gestation period?

**A:** How about foundation building? Was not Ark sinking in quicksand before?

**Q:** (A) We communicate with many other people via the internet and the question is: where are the STO people who know more than we know? We look for somebody who can teach us something and we never seem to be able to do it. What are we doing wrong?

**A:** Maybe you should more the teacher than the student be.

**Q:** (L) Well, gosh! We'd like to get some answers! (A) We know that there are good guys somewhere...

**A:** They shall appear, as needed.

**Q:** (L) Well, we feel pretty alone with all the lunatics and attack we have been subjected to. It is a rather lonely existence.

**A:** Not for long.

**Q:** (A) Not for long? A related question concerning our internet activities which have been going on for some time, and we do it because we feel that it is necessary, but we don't really know or understand what is the real purpose of what we are doing. Some people are reading our pages and writing letters, and then they disappear or they are discouraged, or they do nothing on their own. We are expending a lot of time on this publishing of information, but without clear understanding of what we are supposed to accomplish by this. (L) At this point, it is not accomplishing a whole lot except drawing down fire on our heads! (A) Right!

**A:** You should rejoice! From the fire comes light. Patience pays. You are on the right track. Fear not, have we steered you wrong a lot lately?

**Q:** (L) Well, not so far. But, I was thinking that this radio show would be useful and I would get the webpages all ready for folks to read...

**A:** Anticipation.

**Q:** (L) I wasn't really anticipating. I mean, the guy called me right out of the blue... so I wanted to be sure that if I was going to talk on the radio that we had the website prepared so folks could go to see it. I sort of thought that the guy was a good guy sent to create an opening...

**A:** Assume.

**Q:** (L) I know. I know. Just another long series of stuff...

**A:** Why complain ye?

**Q:** (L) I'm not complaining. We do work awfully hard, though. (A) I want to ask about the guy who sent me this book about the 'supersecret weapons of Hitler.' It is essentially some research into possible applications of antigravity by Germans, and is a project in which this guy is participating founded by I don't know whom. He was publishing for the military, and now he found me and he wants me to participate in this project. I would like to know if this is a sincere request, or...

**A:** Yes, it is.

**Q:** (A) Okay, if it is sincere, then it means I should answer him. Last question: I was thinking about what is the most important for me at the present, and I think that I want to understand and implement this concept of densities; to implement it into physics and mathematics. But, it seems to me that I am completely alone with that. I would like to know where should I look, because certainly other people have already tried to do it. I don't want to start from scratch if there is something that I can look at or study before I really jump into this difficult project. Were there people, scientists... where to look?

**A:** Study the works of Gurdjieff and Jung, for starters. Also, Vallee

is on a similar path, and a little ahead of you. He would be most approachable, if you can convince him of your sincerity.

**Q:** (A) Vallee? Okay, I finished my questions...

**A:** Okay, so until the next, goodbye.

END OF SESSION

## 7.5 July 10, 1999

Ark, Laura, Frank, Chloe

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Krollah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (A) I want to start with some completely unrelated questions. I would like to know if I could have some clue about my genealogical tree: where to search because I know nothing before my grandfather; I have no idea where my DNA comes from. So, where to look?

**A:** Some lines originate in Belarus. Some can be tracked through the Slovak Republic. Governments in these areas are currently working on genealogical programs, in order to stimulate international tourism in the rest. Family on father's side was "broken up" during Napoleonic raid in early 19th century. Mother's side has a strong cluster in Gdansk region.

**Q:** (A) If I can ask a little bit more: how was my name deformed? Where does it come from?

**A:** The name is not deformed, simply altered, due to nationality change.

**Q:** (L) So, it was originally a Russian name?

**A:** White Russian.

**Q:** (L) What was the original before it was ‘Polishized?’

**A:** Website reveals.

**Q:** (L) White Russian?

**A:** See previous answers.

**Q:** (L) Okay, we will be doing some checking. (A) Okay, that was one question. Second unrelated question: should we be thinking of moving to Switzerland? Is it a good idea?

**A:** You may think of anything.

**Q:** (A) Okay, no clue there. Now, next question relates to the story of creation which L wrote for the website, and I was reading it and trying to make sense, to make it not contradictory, and I found that it is not easy because many of the concepts that are used during these sessions are somehow contradictory to each other or they don’t quite fit with the standard meanings of these concepts, so I wanted to ask for some explanation. First, we were told that gravity is essentially the most universal force and that it is from this that everything originates...

**A:** Gravity is the binder.

**Q:** (A) But, my question is: gravity is a term that is defined in dictionaries and encyclopedias and is a term which has a very precise meaning for physicists and mathematicians. I want to

know if you are talking about the same thing or if you are using the term ‘gravity’ to describe something completely different that we know as gravity. Are we talking about the same thing?

**A:** Well, are you certain these “definitions” you speak of are not limited?

**Q:** (A) Yes, I am sure they are limited. Nevertheless, they are precisely defined concepts and you are using the same term ‘gravity,’ so I am asking if we are talking about the same thing, or if you are talking about something completely different?

**A:** How about a great expansion upon the same concept?

**Q:** (A) Okay. That answered my question. So, we are using the same thing, but for you it is more adequate or so. Now, I want to ask about mathematical modelling of gravity. The gravity that we know about is modelled by geometry of a curved space. Is the gravity that you are talking about, which is an expansion of this concept, capable of being modelled in a similar way: by geometry?

**A:** Geometry is the correct model.

**Q:** (A) So, geometry is the correct model and I understand that we have to just write a generalization or expansion of Einstein UFT, and that this will be the correct model of gravity; is this correct?

**A:** Close.

**Q:** (A) Now, the question is: if gravity can be modelled in this way - geometry is the correct model - what do we need more to model also consciousness? Will it be automatically implied in such a model of gravity, or is it something extra?

**A:** Consciousness is contained within the expanded realization of the gravity model. The Unified Field Theory, if completed, would

give one an insight into the synchronous relationship between gravity and consciousness.

**Q:** (A) If gravity is modelled by curvature or torsion of geometry, mathematically, how would consciousness come out of geometry?

**A:** That is a broken question. What we can say is this: if one could visualize the inverted representation of the gravity geometric model, one would be squarely on the path to understanding the geometric model of consciousness.

**Q:** (A) Now, there are claims, more or less, shared by many scientists that quantum theory is necessary to model or understand consciousness. From what was said before, it seems that quantum theory is not necessary, that it is sufficient to have the right geometric model of extended gravity.

**A:** No, not extended, expanded.

**Q:** (A) Does that mean that quantum theory is irrelevant for understanding the modelling of consciousness?

**A:** Quantum first needs to be graduated from the realm of theory.

**Q:** (C) It means it needs to be proved, right?

**A:** No. Proving is a concept we should now be moving beyond.

**Q:** (C) When they said ‘graduated from the realm of theory,’ I assumed that meant that it needed to be proven. So how does it get graduated? What is the next realm after theory?

**A:** No, my dear, you are missing the point. the currently imposed protocol for “proving” theories is a bit passe, we thinx. Can you imagine trying to fly a plane if you must first prove that there is a sky?

**Q:** (C) So, don't try to prove quantum theory, just go ahead and use it, I guess.

**A:** Pretty close.

**Q:** (A) Are you laughing at quantum theory?

**A:** No. We are laughing at 3rd density scientific protocol!

**Q:** (A) Okay, we are coming to densities. But, before that, one more question: what is matter? How is matter built out of gravity? What forms of gravity correspond to matter in terms of the geometric model?

**A:** First of all, since we are to answer such questions, you need to make this surface smoother!!

[The plexiglass cover on the board was tacky. We used window cleaner and polished it up.]

**Q:** (A) So, it was good for previous questions, but not for this! (laughter) (L) Okay, carry on!

**A:** You live in a "matter" universe, from your perspective. There is an accompanying energy universe which you largely are unable to perceive as of yet.

**Q:** (A) But, my question was ...

**A:** Who/what is Mandlebrot??

**Q:** (A) Okay, you are talking about fractals now, certainly...

**A:** Are we?

**Q:** (A) Mandlebrot is the name of a French mathematician who is famous because he discovered fractals and some laws that govern fractals and chaos. But, as to 'what' - some fractal images are also called 'mandlebrot.'

**A:** And where does this lead, Ark?

**Q:** (L) But that doesn't answer what matter is.

**A:** We are bringing you to the place where you can begin to path to understanding this.

**Q:** (A) That brings us to fractal properties of space time and such things.

**A:** What if matter were the "half-life" of energy?

**Q:** (C) Well, half-life is the decay factor. What if energy decays into matter? Is that what they are saying?

**A:** Be careful of the quote marks, they bring you to the crossroads. As in: "you take the high road, I'll take the low road, and I'll be in Scotland before ye."

**Q:** (L) I guess that means that we are not to use the usual interpretation of 'half-life,' but that there is a pun, a clue intended here that is to be deciphered.

**A:** Look folks, we cannot just spill the secrets of all existence all over this board, but we sure can open the doorways, yeah.

**Q:** (L) That brings me to a little question that I want to insert here. You have said that Service to Others means 'giving all to those who ask.' We are asking, so why aren't you giving all?

**A:** Not quite. Cannot abridge free will!

**Q:** (L) Well, my free will says that I want all the secrets of existence! I mean, other people are channeling sources that just dump endless answers to anything and everything...

**A:** Other people are channeling crappola.

**Q:** (C) It's a new breakfast cereal! (A) Now, the two main concepts that we are using are dimensions and densities. Again, you

use the concept of dimension in not quite the way physicists and mathematicians use it.

**A:** Phi.

**Q:** (A) Well, I have no idea what this phi is doing here which is probably related to Fibonacci and the Golden Ratio...

**A:** Carboni.

**Q:** (A) Yet, still there is my question about dimensions. Phi is not an integer number and we will look into it. But, what I said was that the way you are using the term ‘dimensions’ is not what physicists are familiar with in using this term.

**A:** The trouble here is with semantics: the general public uses that word to mean different things from the physicists!

**Q:** (C) Okay, phi is a Greek letter but I don’t see how that is connected.

**A:** No, not phi, dimensions!

**Q:** (L) Define dimension. (A) I have tried to guess what you mean by dimensions from all the things that you have said about it...

**A:** Our “meaning” is closer to that of the general public definition.

**Q:** (A) Very good, yet you have said certain things in a context that was more related to the structure of the universe. And we were talking about dimensions also in the context of Kaluza-Klein theories. At one point, you said there are infinitely many dimensions, and at another point it was implied that different dimensions meant different universes, which would mean that there are infinitely many universes. I would like to represent these dimensions in some mathematical model. My idea was that these dimensions were like slices; and each slice is a universe and, indeed, there are infinitely many possible slices. So, that was my

idea of dimensions: slices. Is it correct?

**A:** That is good.

**Q:** (A) There are infinitely many dimensions because there are infinitely many slices. Now we come to densities. There are not infinitely many densities, there are only seven. Or, are these seven just for the general public and there are really infinitely many of them as well?

**A:** No.

**Q:** (A) Good. So, there are seven densities. Now, how come, there are seven, and not three or five, or eleven? Does it follow from some mathematics?

**A:** What form of mathematical theory best describes the concept of balance?

**Q:** (L) Algebra. (A) So, I had the idea that these seven densities were related to what Gurdjieff relates to the number of laws that apply in the various densities; the higher the density, the fewer the laws that apply, which means there is more freedom?

**A:** That is very close. Consciousness is the key here.

**Q:** (A) Yes, so my question relates to the geometric model of gravity and consciousness.

**A:** Picture an endless octagonal... in three dimensions.

**Q:** (A) A lattice, you mean?

**A:** Okay.

**Q:** (A) Are these densities related to the mathematical concept of 'signatures of the metric?' I would like to model densities with slices of different geometric properties, in particular slices with different properties of the distance.

**A:** Yes...

**Q:** (A) There are several people who essentially think the same direction as we have been discussing... they are almost on the same track. Matti Pitkanen is one of them and Tony Smith is the other. How can these two guys have these similar ideas without having access to channeling?

**A:** Who said they they have no access to channeling? Some channel without knowing it.

**Q:** (L) Well, Jack channels! (laughter) (A) Today, on this list there was a guy by the name of Boyd who talks about his shamanistic experiences in talking to rocks. He doesn't sound whacko, but he talks to these stones on a daily basis and these stones talk to him, and these rocks have consciousness, they have memories. I wrote to him, but I would like to know if his experiences are authentic and not just his imagination?

**A:** That is a very broad question, which assumes limits or barriers where none may exist.

**Q:** (L) Is anyone able to tune into the consciousness of rocks?

**A:** What if they are really tuning to a consciousness through the rocks?

**Q:** (A) To A consciousness? Whose consciousness or what consciousness? Universal consciousness?

**A:** Another.

**Q:** (A) Another consciousness. (L) Do rocks have consciousness?

**A:** Refer to material re: 1st density.

**Q:** (L) Yes, well it has been previously said that 1st density does have consciousness... that even rocks have consciousness and can learn. That brings us back to Boyd, is he, can he, does he tune

into the consciousness of rocks and/or other consciousnesses THROUGH rocks?

**A:** The latter is closer.

**Q:** (L) So, the consciousness of a rock might not be amenable to communicating.

**A:** Right.

**Q:** (L) What other consciousness might a person tune into through a rock? ANY other or a specific other?

**A:** Closer to former.

**Q:** (A) If there is consciousness, it means that there is a consciousness unit, and this consciousness unit can be within or associated with some body of some density. Can one tune to consciousness that resides, so to say, in higher densities than third, using rocks? Is it possible?

**A:** Close.

**Q:** (A) So, you can tune to dead dudes or Cassiopaeans. (L) Is the consciousness of human beings something that has cycled from minerals to plants through animals to evolve into consciousness of 3rd density mind, as we understand it?

**A:** In a roundabout way.

**Q:** (L) Was each of us, sitting here, at any point in the remote past, using time loosely, a critter, so to speak, or a plant or a tree?

**A:** You still be a critter, baby!

**Q:** (L) So, leaving out time, the stream of consciousness that makes us as individual units, branches out and extends into lower densities, or connects to them like a tree?

**A:** Maybe.

**Q:** (A) Concerning these rocks, I want to ask about this DNA phantom effect that some Russians recently discovered. They shoot with lasers into this vacuum and record photons with detectors. It detects noise because there is nothing coherent. Then, they put a little piece of DNA there. This DNA has a certain regular structure. So, the photons from the lasers scatter from this DNA molecule in a certain wavy pattern which corresponds to the internal structure of the DNA. Now, they remove the DNA and for a month or two they continue to obtain a coherent pattern from the vacuum as though something was still there. They call it the ‘phantom DNA.’

**A:** The “phantom” is a remnant of the consciousness residue contained within the DNA structure.

**Q:** (A) Where does this remnant reside? In the vacuum, in the vibrations of the vacuum, in a gravitational field that is inside the vacuum, in some nonlinear electromagnetics? Where is this remnant? What keeps it? Space itself?

**A:** You hit it pretty close with the last three.

**Q:** (C) Wouldn’t it be like leaving an impression in a cushion?

(A) Yes, but this is a vacuum.

(L) I guess that a vacuum isn’t what we think it is. There is something there that is not amenable to our perception.

(A) So, consciousness resides in a DNA structure.

(C) Well, going back to the rocks, is not all consciousness connected?

(A) Yes, but the funny thing about these rocks is that they have the ability of tuning one consciousness to another consciousness so that even if, in principle, all consciousness is one consciousness, yet there are separate consciousness units, which at some level

they connect, yet at our level they seem to be separate, so there is something about rocks.

(C) Maybe its the fact that they are so simple.

(A) Yes. But, it seems that a rock would do it, but dirt would not, so what is so special about rocks?

(L) Okay, this anthropologist, Michael Harner, was doing some field work, and it says here that Harner went to the Peruvian Amazon to study the culture of the Conibo Indians. After a year or so he had made little headway in understanding their religious system, when the Conibo told him 'if he really wanted to learn, he had to drink ahayahuasca. Harner accepted, not without fear because the people had warned him that the experience was terrifying.

The following evening, under the strict supervision of his indigenous friends, he drank the equivalent of a third of a bottle. After several minutes he found himself flying into a world of true hallucinations. After arriving in a celestial cavern where a supernatural carnival of demons was in full swing, he saw two strange boats floating through the air that combined to form a huge dragon headed prow not unlike that of a Viking ship. On the deck he could make out large numbers of people with the heads of bluejays and the bodies of humans, not unlike the bird-headed gods of ancient Egyptian tomb paintings.

After multiple episodes, which would be too long to describe here, Harner became convinced that he was dying. He tried calling out to his Conibo friends for an antidote without managing to pronounce a word. Then he saw that his visions emanated from giant reptilian creatures that resided at the lowest depths of his brain. These creatures began projecting scenes in front of his eyes while informing him that this information was reserved for the dying and the dead.

‘First, they showed me the planet Earth as it was aeons ago before there was any life on it. I saw an ocean, barren land, and a bright blue sky. Then black specks dropped from the sky by the hundreds and landed in front of me on the barren landscape. I could see that the specks were actually large, shiny black creatures with stubby pterodactyl-like wings and huge whale-like bodies. They explained to me in a kind of thought language, that they were fleeing from something from out in space. They had come to the planet earth to escape their enemy. The creatures then showed me how they had created life on the planet in order to hide within the multitudinous forms, and thus disguise their presence. Before me, the magnificence of plant and animal creation and speciation and hundreds of millions of years of activity, took place on a scale and with a vividness impossible to describe. I learned that dragon-like creatures were thus inside all forms of life, including man.’

At this point in his account, Harner writes in a footnote at the bottom of the page: ‘in retrospect, one could say that they were almost like DNA, although at that time, in 1961, I knew nothing of DNA.’ So, I would like to know what was the source and nature of these nearly universal visions that occurs in these shamanistic practices; the various creatures including serpents and bird-headed dudes, and so forth? What is the source of these hallucinations?

**A:** Be more specific.

**Q:** (L) How can I be more specific? (C) In these chemically induced trances, why is there the common experience of seeing these bird-headed or serpent-like creatures?

**A:** While you have physicality, some part of you will maintain the connection to its roots.

**Q:** (L) Are you saying that all these people who say that human

beings have reptilian genetics, are telling the truth? Do we have reptilian genetics?

**A:** Yes.

**Q:** (L) Do we also have bird genetics?

**A:** Yes.

**Q:** (L) And that is our physical connection or basis?

**A:** Yes, as third density bioengineered beings, you lead the smorgasbord parade of that which surrounds you in the physical realm.

**Q:** (A) So, we are 3rd density bioengineered beings. (L) That leads to another question: there is a lot of talk about the Merovingian bloodlines, or the 'Nordic Covenant' bloodlines, or whatever label is put on it, being a 'fresher' version of the reptilian genetic strain. This is represented in the myths of the god Oannes of Sumerian fame, or the Quinotaur who impregnated the mother of Merovee while she was bathing in the sea, and even the wife of the founder of the Angevins, Melusine, variously described as an aquatic fairy or a mermaid. So, there is this claim that there is a stronger and more virile reptilian strain in these bloodlines. Is that correct?

**A:** It may be.

**Q:** (L) Well, is that significant in any way?

**A:** For those obsessed with materialism.

**Q:** (L) Okay, there is also some newly propagated ideas that the month of August, this year, is going to produce some direful changes or events, or significant events during the 'dog days' of August. Is there anything significant about the coming month of August?

**A:** what is the point of predicting/warning of direful changes?

**Q:** (L) Well, my observation is that such predictions are designed to distract people and to keep them worried and upset so they can't concentrate on what is important. Now, going back to Harner's story: this business about these dragon-like creatures fleeing from something. This story gets repeated a lot. Is that an accurate part of the tale? Were they fleeing from something?

**A:** Maybe, but so what?

**Q:** (L) What were they fleeing? I'm curious!

**A:** Fleeing? All life just fills the voids that exist. It is a natural process; existentialism.

**Q:** (L) As you know by now, I did the radio show. My feeling is that it was not significant in any way. I DID learn that I don't want to go on the radio again! Do you see any repercussions relating to that?

**A:** We abstain. Okay, folks, goodnight.

END OF SESSION

## 7.6 July 24, 1999

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** Who do we have with us this evening?

**A:** Conopi.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I have been having a dialogue with a fellow on the net in the last week or so who is very well versed in the Ra Material. He sent me a large chunk of volume 5 of the Ra books, which was material that had not been released earlier. It seems that during the times that Don Elkins was asking some questions about different conspiracies and the nature of the 4th density STS manipulations and some other rather grim subjects, that there was some sort of judgment made by this group, or members of this group, that such subjects were not appropriate lines of questioning for an STO channel. They were, apparently, considered to be a focusing on negative aspects, therefore they were not of 'love and light.' Such questions and directions of questions were, therefore, discouraged or agreed by this group to be not desirable to pursue. Don Elkins DID, however, commit suicide. Can you tell us why?

**A:** Suicide is a chosen pathway for the purpose of close realization of shutting off the noise.

**Q:** What noise was he wanting to shut off?

**A:** It is a figure of speech.

**Q:** I would like to understand. Here, these folks had this marvelous contact with Ra...

**A:** Contact with Ra does not preclude the possibility of attack.

**Q:** Why did Ra not convey to him the information necessary to understand that he was under attack, and what kind of attack it was, and how to deal with it?

**A:** The questions were not asked.

**Q:** Why were the questions not asked that would have protected him?

**A:** “Love and Light.”

**Q:** So, because they were so focused on the love and light aspects...

**A:** There is no positivity without negativity.

**Q:** So, positivity, alone, becomes, in effect, negativity, or becomes null?

**A:** No, there is always negativity present, whether acknowledged or not.

**Q:** So, you are saying that if it is not acknowledged, placed on the table, so to speak, that it sort of ‘bites you’ no matter what? That, in some way it will manifest, and if a person goes to an extreme in terms of love and light, the negativity will come in the back door?

**A:** Close.

**Q:** Okay, there was a little bit more about Linda Howe and David Jacobs on the net recently. Bruce Maccabee wrote an article in which he described the differences in attitudes between David Jacobs and Linda Howe. David Jacobs, of course, thinks the whole alien thing is 4th density STS. He pretty much understands it and has a grip on the negative nature of these manipulations. But, Maccabee mentions that Linda Howe is inclined to follow the ‘aliens are here to help us no matter how horrible these things they do seem’ path. She seems to be trying to find goodness in all of it, despite the in-depth investigations she has done into the cattle mutilations and so forth. So, once again, this has come up in discussion. Comment please.

**A:** Specifics, please.

**Q:** Well, once before, you said she was not corruptible, but, this blindness to the negative nature of our reality and the obvious

manipulations, seems to be a form of corruption.

**A:** No, you are reading too much into critiques. There is much jealousy within the “UFO community.” This manifests as sniping, name calling, and other forms of skullduggery. You have tasted some of this bitter tea yourself, and, of course, it is all representative of attack.

**Q:** (A) Well, we were talking about Don Elkins, and essentially, he was under attack, but the questions were not asked that could have helped him to understand this. I would like to ask if we are under attack now. It is better to ask the question.

**A:** You have always been under attack, but the difference is that you have awareness of it. Knowledge protects.

**Q:** (L) Well, if Carla were here, would you say anything to her?

**A:** Yes, but this is not important.

**Q:** (A) I am always suspicious. We had this car stopping in front of our house, and I was suspecting that they were doing something; beaming something at us, or deploying some kind of frequency at us. Was my suspicion justified?

**A:** Ask yourself by examining the details. What did the vehicle look like? What did it do? What did the occupants look like? Etc... Observation is the companion of awareness.

**Q:** (L) The one strange thing about this was that, at that particular time, A became very sick. His stomach just went completely bonkers and he has been unable to eat anything but bread and milk for several days now. Was this related?

**A:** We did not hear your responses to inquiries.

**Q:** (L) Well, on three different occasions this happened. One vehicle was a taxi, one was an ordinary red car, and the other was a

new pick-up truck. In the one case, the person seemed to be just parked there and eating. I didn't see what the taxi person was doing. (A) He was essentially doing nothing... just sitting there. (L) And then the truck: somebody stopped and got out and was doing something, and I thought it might be a meter reader, but by the time we saw the woman, she was getting back in the truck, and it was not a regular service truck from the water or power companies.

**A:** In future, when you notice suspicious activities such as this, record them. If necessary, approach the vehicle in a friendly manner, explain to them your required response as a member of a neighborhood crime watch team. Observe aerial anomalies as well. Be vigilant and on guard.

**Q:** (A) I would like to know what brought on my drastic and prolonged stomach problem? Was it my fault? (L) Was it the turkey, the vitamins, or what?

**A:** The potential for food poisoning requires greatly increased awareness on your part. Remember, this is a perfect modus of attack. Wash hands often, be very careful with what you ingest.

**Q:** (L) I double washed the greens in the salad, the meat was fresh from the deli...

**A:** Deli meats? In this era: verboten!!!

**Q:** (L) I guess I have to cook everything myself. No more prepared foods.

**A:** There is currently a huge problem there. But why? Ignorance feeds opportunity for experimentation. If ever needed, many could be eliminated this way. After all, how ignorant the populace!

**Q:** (L) I thought it was the turkey. It wasn't the greens or the

dressing. But, I had them slice it from a fresh roast. (F) There is a LOT of this sort of thing happening. It's in the news all the time. It is getting worse and worse and more and more frequent. (A) How can we be sure that our water is okay?

**A:** R.O.

**Q:** (L) Yes, we have an R.O. water filter. (F) Yes, when you have the combination of a water softener and a reverse osmosis purifier, there is very little chance that you will have any contaminants in your water, even if it is deliberately put into the water. There was an article today about a local well that had high levels of radiation. I don't think the R.O. will filter that, however. (L) Essentially, we are living in dangerous times. (F) Yes, what an easy way to eliminate people by putting things in the food or water. (A) One more health question. What is this blister that both of us have?

**A:** Germ.

**Q:** (L) A germ?

**A:** Yes, but mild.

**Q:** (L) I want to ask what happened to our tape recorder several sessions ago when it recorded at about triple speed.

**A:** EM interference.

**Q:** (L) From what source?

**A:** Radio towers.

**Q:** (L) How could EM interference from a radio tower cause my tape recorder to record at triple speed when it is a one-speed recorder?

**A:** You remember your 30 second long phone ring 5 1/2 years ago?

**Q:** (L) Sort of. I remember that happening once. It was completely strange. It started ringing and it was like stuck.

**A:** Nuff said.

**Q:** (A) Is this EM interference from radio towers directed?

**A:** More like attracted.

**Q:** Attracted by all of us, any particular one of us, or what we are doing here?

**A:** Latter.

**Q:** (L) And, of course, at that exact time we were asking questions about Nazi mind programming, Arizona Wilder and her wild claims regarding present day mind programming, and we actually lost some of the tape because of the speed. We were able to recover a lot by digitizing the recording and speeding it up and enhancing it somewhat. A 45 minute side of tape finished recording in about 15 minutes. And then, another bizarre thing is that it didn't trigger the auto shut-off when it hit the end of the tape. We continued the session thinking we had a tape going, but it had already ended! I had to reconstruct about 20 minutes of the session. Another funny thing was that, last Saturday, we were sitting there playing the last part over and over again to determine exactly where the tape had ended, and it kept ending on "Kennedy." And, of course, that night we hear that JFK, Jr. has been killed. Then, of course, A points out that these Kennedy people aren't very bright. They should have figured out by now that they are under special attack conditions for some reason, and should NEVER take risks. So, I want to know what is the deal on this JFK, Jr. plane crash?

**A:** Lack of awareness feeds fate.

**Q:** (L) That's the truth! And of course now all the tabloids and ru-

mor mongers are saying that this kind of plane couldn't do such a nose dive; somebody heard an explosion; the rumors are just flying. And, in relation to rumors, there are a lot of them flying around about the weather. What's the deal with all the recent weather activity? These terribly unusual lightning storms?

**A:** Increased static electricity in atmosphere.

**Q:** (A) Is it only in our region or all over the planet?

**A:** Latter.

**Q:** (L) Well, it all seems to be discharging over our heads! I have never witnessed such lightning. (A) Okay, I was trying to figure out how to build this expanded gravity, and I made a table to assist the question. The first possibility is that one can build gravity on a square matrix. This matrix can be symmetric, can be non-symmetric, or can be a complex matrix, which I call possibilities a, b, and c. The second possibility is to build a theory of gravity on the basis of a connection which looks like a cube rather than a matrix. Here we also have three possibilities: no curvature, but torsion; no torsion but curvature; torsion and curvature. These are possibilities 1, 2, and 3. Another possibility is to use any combination of these two lines of speculation. Another possibility is none of the above, but to build gravity on the basis of an irregular cube, or an irregular square, which I call A. Another possibility is to use something that is none of the above.

**A:** Octagonal complexigram. Try the formula for possibility 1-c first.

**Q:** (A) During the last two weeks or so, I got a new connection through the internet, in particular I was pointed to a Russian guy by the name Alexander Shpilman, who is writing about special generators of what is called 'spin field,' which is supposedly a new kind of field which can penetrate lead without any problem,

and he is building or describing the generator of this field which has essentially rotating pieces of ferrite with little magnets inside and so on, which can be detected by human beings because you can feel this field if you are in the right state and so forth. This guy and another guy named Boyd then try to relate this to some kind of expanded gravity with torsion because spin is supposed to be a source of torsion in space. All that seems to me quite reasonable, and maybe even the right track to follow. (L) He even talks about the funny 'light pole.' (A) What I want to know is if the things that Shpilman is describing really work?

**A:** Yes, they would work.

**Q:** (A) Is it a path to a kind of expanded gravity?

**A:** Enhanced gravitational pull. Relates to space/time management.

**Q:** (A) Another problem: I am stuck at one point. When we were talking about phi and Mandelbrot, you mentioned the name 'Carboni.' (L) And you also mentioned the name 'Carboni' to Santilli, saying that this group was behind the Molise Institute.

**A:** Yes. Scientific/intelligence matrix. Neapolitan.

**Q:** (L) Well, we did a search and have not been able to find anything on it. I don't know if Molise has very much money behind it because, by looking at their pages, it doesn't seem to be very well funded.

**A:** Looks can be deceiving. Front is vulcanology.

**Q:** (L) You mean they study volcanoes?

**A:** Front.

**Q:** (L) Ark wrote an e-mail to Santilli because Ruggero sent out an announcement by e-mail that he was going to be suing several

people for using his stuff without giving him credit; stealing his work, in effect. So, Ark wrote him a little note inquiring about the situation and invited him to get in touch. So far, we haven't had any response. Any comment?

**A:** Terry and Jan Rodemerk poisoned this link.

{I suspect that this response does not suggest that Terry and Jan did this consciously or deliberately.}

**Q:** (L) I was recently re-reading that Santilli session, and it is really strange. He was so happy and enthusiastic, and he somehow just got turned off and turned completely cold. Is there any point in pursuing that link?

**A:** You can reestablish it if you wish, with some effort to make clear that Arkadiusz is here.

**Q:** (L) Is it useful to reestablish that link, for research reasons or otherwise?

**A:** Possibly, but his faculties are not what they once were.

**Q:** (A) But, I still don't understand what is the story with this Carboni that was mentioned in a quite unexpected way, in relation to phi?

**A:** Phi is a key component to the puzzle with regard to gravity waves. Carboni relates to one of the "keepers of the castle," so to speak.

**Q:** (A) So, this is a kind of a foundation, yes?

**A:** Clues, clues.

**Q:** (L) Maybe Carboni is the name of an author or something that relates to this. A castle implies a kind of fortification in which something is being protected. So, maybe somebody named Carboni knows one of the keys to get inside...

**A:** Yes, but this is dangerous to fool with, unless with care! Figure it out yourself? O.K. Publicize it? Be oh so careful. Magnetic fields relate. Mineral properties... Study these with regard to your gravitational questions. What compounds balance material space? Which ones reflect this property on your locator?

**Q:** (L) Are you guys gonna leave if I ask the 'Nobel Prize' question?

**A:** Try it and see.

**Q:** (L) Are we ever gonna win the Nobel Prize?

**A;** Open.

**Q:** (L) Well, we would really like to have some bucks to settle down to this research, work on the web pages, publish books, and so forth... I would like to get a book put together and sell it on the website. Which, by the way, we have a new domain... called 'cassiopaea.org.' Aren't you proud? I have put up a LOT of new material and people are reading it! Well? (A) No comment.

**A:** Yes, so now we say goodbye.

END OF SESSION

## 7.7 July 31, 1999

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Lorskvaa.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I want to ask an off-the-wall question here before we get serious. Is there any kind of rain dance we can do to cool things off a bit? It is really scorching and our air conditioner is going constantly.

**A:** You can do as you choose.

**Q:** Well, if I knew that it might work, and if there was such a thing as a real rain dance, I would certainly choose to do it!

**A:** Laura, you cannot possibly expect us to answer such a vaguely and weakly worded inquiry!

**Q:** Well lighten up!

**A:** We are light.

**Q:** Well, let me phrase it this way...

**A:** Okay...

**Q:** There are many legends and stories and myths and customs around the globe that involve the use of varying ecstatic techniques which are designed to establish some sort of balance in the practitioner and this is supposed to extend to the environment, which, if things are overly dry, will balance itself by producing rain. Are any of these...

**A:** Most of the so-called rain dances would leave the participants so exhausted that ultimately, they cared not if it rained or not.

**Q:** But, is there a grain of truth in these ideas?

**A:** If you can dance all day on your tippy toes, then you deserve rain, baby!

**Q:** I am obviously not going to get anywhere with this line of questions since you are being so elusive! I am of the personal opinion that there ARE things that one can do that induce response

in the environment; not necessarily dancing, but meditative or whatever practices that can have this effect. Any comment?

**A:** Meditate oh so softly and soothingly while strategically positioning a garden hose so that it is pointed straight upward, then slowly turn on the faucet.

**Q:** Okay, various folks are now saying that Dr. Mengele of Nazi fame is the same person as Dr. Green of Greenbaum programming fame.

**A:** No.

**Q:** Did Mengele go to South America and die there as reported?

**A:** Yes.

**Q:** The Greenbaum material says that there was a Jewish boy brought to America and trained as a doctor who became this infamous Dr. Greenbaum. Is that true?

**A:** No. "Green" is an alias, or more accurately, a pseudonym for multiple persons engaged in mind control efforts.

**Q:** Next question. Somebody sent me some information recently about something called "Roswell Rods." Can you tell me what these "Rods" are?

**A:** Do you mean the life forms?

**Q:** Well, that IS what some of the folks are trying to call them!

**A:** 4th Density Life Forms.

**Q:** That's pretty interesting. (A) Is it a being with a soul?

**A:** Sort of.

**Q:** (A) Intelligent?

**A:** Relative to others.

**Q:** In terms of what we know about relative intelligence, could you give us an example of something in our density that relates here?

**A:** Birds.

**Q:** They are like 4th density birds?

**A:** Maybe. That's close enough.

**Q:** Now, there is some woman who is sending some information around on the net saying that there is supposed to be some sort of 'grand cross window' around August the 13th, that will do something that she calls 'imprinting.'

**A:** No.

**Q:** Is anything interesting going to happen on August 13?

**A:** Vague. Open.

**Q:** I know it's vague. Just another of the endless rumors and obfuscations. These people must sit up all night thinking of this stuff! Now, somebody sent in a question: Was the moon placed in orbit around the earth for a purpose?

**A:** !?! That is a leading question, i.e.: when did you stop beating your wife? Presumptuous.

**Q:** Let me ask it this way: was the moon added or placed deliberately?

**A:** Okay. This is impossibly complex because in one way or another, everything is part of a "plan."

**Q:** So, if we go far enough back or deeper into the considerations of the various densities, you will find out that everything is part of a grand plan. Can you give us just briefly any of the significant effects of the moon in its position in relation to the Earth?

**A:** These are basically known.

**Q:** So, the scientific observations are to be considered, as well as the earlier remarks you made about this. Now, this guy also asks: The Cassiopaeans have said that there are 16 groups of 'good 'guys and 16 groups of 'bad guys.' {Aliens being intended in the question.} Have they ever mentioned the names of any?

**A:** Excuse us!?

**Q:** Well, they want you to name the different groups since you did make this remark at one point. Are you going to give a list of the participants on each side?

**A:** No, we are not.

**Q:** So this is one of the things we have to learn to figure out ourselves.

**A:** Yes.

**Q:** There is another guy who wants to know if there is a possibility that the effect of the Wave is reflected in physiological phenomena, such as elevation in blood pressure and other things?

**A:** In some cases.

**Q:** In my own case, was my extremely high blood pressure a reflection of this Wave business, or was it just simply too much coffee?

**A:** Are those the only two possibilities?

**Q:** No. What was the cause?

**A:** Combination of many factors. We think you are possessed of more than enough knowledge for this!

**Q:** Okay, Larry and Elvira. Some guy writes to him as follows: "Larry, I am getting some strange reports about the Pacific UFO.

What have you heard? One thing, there is more and more effort being put into finding it or getting it, or however you put it. If you will look into it, the Navy has just launched a deep sea rescue submersible and they announced that they are going to 'test' it in the Pacific. Another thing, ASTAT announced about a week ago, maybe two, that there is an unidentified sonic source from the deep Pacific." So, Larry added: "it appears to me that the Lizzies are constructing an underwater base in anticipation of the arrival of more than 36 million Lizards due to arrive soon. Could this be so?"

**A:** The problem with these questions is that they attempt to construct the beginning at the middle: presumptuous!! If one truly wishes to learn, one must be open to all possibilities.

**Q:** Okay, I guess that you are saying that there is some assuming going on here. So, let me ask this: are there 36 million Lizards on their way here?

**A:** The Lizard beings occupy 4th density.

**Q:** Are you saying that because they occupy 4th density, they don't have to COME here because they ARE here?

**A:** Close.

**Q:** Now, you have told us that there ARE 36 million Nephilim on the way.

**A:** Nephilim are 3rd density; big difference.

**Q:** Is an underwater base being constructed in the Pacific in anticipation of something?

**A:** No need to construct that which already exists.

**Q:** Is there any truth to the idea that the U.S. Navy is trying to find or get something out in the Pacific?

**A:** Maybe, but all governmental stuff is compartmentalized, so it is pointless.

**Q:** Okay, he also writes: “the photon belt energy is almost upon us according to our channels.” I guess he means the wave energy, or the interpretation of this according to these various channels. Is a ‘photon belt’ or wave energy almost upon us?

**A:** Laura, you know how to deal with this.

**Q:** I know. This purported photon belt has been ‘almost upon’ us so many times that it is becoming boring. Now, another person wants to ask: “is archangel Michael one of the Nordic beings?” Don’t blast me; I’m just the middle man here!

**A:** No comment.

**Q:** Now, this guy here suggests that ceiling fans and other things can interfere with alien abduction or manipulation. Can electronic gadgets interfere with aliens coming through the density curtain?

**A:** No, but maybe a pin cushion would help.

**Q:** Why a pin cushion?

**A:** Why not?

**Q:** (F) I think they are getting irritated with all of these irrelevant questions. (L) Well, this guy suggests that tinkling wind chimes and garlic slices placed around the room, the rubbing of garlic into affected body parts, keeping the lights on, and so forth will keep aliens away. (F) That won’t keep away aliens, but it WILL keep away human abductions! (L) Well, hold on here! This is interesting: he says that when an abduction is imminent, place the hose on the ground, turn the water on and walk across it... that running water can block the aliens.

**A:** B.S.!

**Q:** There is another guy who sends this list: he says that {reading}: "...on August 12, 1943, in Cornwall, that Aliester Crowley performed a ritual with the intention of producing a line of 'rough water' from Cornwall to Montauk point. Also, in August 1943, the Navy went ahead with the Philadelphia Experiment. Then, on August 12, in 1983, the Montauk Project crashed after successfully manipulating time and space as well as mind behavior control. Then, on August 11, 1999, the last solar eclipse of the Millennium will take place, and that the path of this eclipse is the same as the path of rough water Crowley wanted to produce in 1943. Furthermore, the shadow of the eclipse will first touch land at Cornwall, UK at 11.11 a.m.

"On August 12, 1999, one day after the last solar eclipse of the Millennium, four major constellations will form a grand cross square in space - (this must be where this woman gets this grand cross imprinting thing) - with Earth as its center."

Some folks are saying August 17th and 18th.

"The four constellations are Leo, Taurus, Scorpio and Aquarius. These same four figures make up the Sphinx and are directly out of the book of Revelations. On August 12, 1999, at the Great Pyramid of Giza, the Illuminati, a faction of the Freemasons, begin rituals in preparation for the return of Horus. In attendance will be some of the most significant leaders of the world. Also, on August 12, 1999, a comet only just discovered this past April - this is Comet Lee - will complete its trek from behind the Sun. This comet fits all the Nostradamus predictions for a disaster in 1999."

Crowley was associated with Wilhelm Reich, this guy says, but I believe that is incorrect as far as I have been able to determine; just more rumor mongering - famous for his theory on Orgone energy. "The military used him in their research on weather

control;” I believe that is also a spurious rumor because, if the government did ANYTHING regarding Wilhelm Reich, it was to silence and destroy him.

“Orgone energy was essential to sexual magick practices by Crowley and others who followed and worshipped the ancient gods. Sexual Orgone Energy was a primary factor in Montauk projects,” this guy says, and the Illuminati are a faction of the Freemasons who want to usher in a New World Order because they believe they will inherit the earth and that they can accomplish this by arranging for the return of Horus.

He further writes that: “Crowley’s wife, Rose, went into trance and delivered to her husband instructions from Horus on the ways and means of preparing for his return. All of this smacks of conspiracy. I am not a conspiracy believer, but I do believe that many influential people do believe in practicing rituals according to secrets that have been passed down through the ages. How could Crowley coincidentally perform a ritual that connects Montauk to Cornwall, which happens to be the site of ancient occultic practices, at the same time as the Philadelphia Experiment, simultaneously connecting all three via time and space as well as physically.” Alright, could you make a comment on that, or should I go through it more slowly.

**A:** General comment: oh please!

**Q:** That’s what I thought. Now, you told us that the Montauk experiment was something that began in the 1920s. All of the stories say that the Navy was trying to make ships invisible to radar for defensive purposes. That’s the story. My question is: is that just a cover story?

**A:** No.

**Q:** Is that, in fact, what they were attempting to do?

**A:** Close.

**Q:** Can you get me any closer to it? What were their intentions?

**A:** Convergence of interests: US Navy, Secret Government, Esteemed physicists.

**Q:** Did they actually, even accidentally, discover through this work something about time travel?

**A:** Yes, but it was more an accident for the Navy than for others involved.

**Q:** Okay, was the accident and following fiasco fairly accurately represented in the various books about it?

**A:** Fairly.

**Q:** After all of this, did they bring the project to a halt, even if only temporarily?

**A:** No.

**Q:** Did they decide that ‘oh, we have discovered something really fantastic; let’s see what we can do with it?’

**A:** Closer.

**Q:** Did this actually take place at Montauk?

**A:** Some.

**Q:** Were Russians and/or Germans working on similar projects at the same time, or even a little later?

**A:** Germans earlier, Russians later.

**Q:** Are the efforts of the Germans, Russians, and the Americans combined at the present time?

**A:** At some levels they are combined, yes.

**Q:** Would you be able to evaluate the efforts of the three and say which one, at the present time, is the most advanced?

**A:** Does not work that way.

**Q:** Why does it not work that way?

**A:** Advanced goes to Consortium.

**Q:** Are you saying that when work of this kind gets to a certain level, it gets absorbed into the Consortium?

**A:** Close.

**Q:** Was Aliester Crowley connected with any of these people involved in the Montauk project?

**A:** No.

**Q:** Was Aliester Crowley just a looney tune on the outside...

**A:** No.

**Q:** What was Aliester Crowley's role in all of this?

**A:** Role?

**Q:** Did Aliester Crowley have a role in ANY of this Montauk/Philadelphia business?

**A:** No.

**Q:** So what Aliester Crowley was doing was altogether separate, though it may have been of interest to some groups?

**A:** Separate, though it may have occasionally intersected.

**Q:** Is there any particular significance to the date August 12, at any point in time?

**A:** No.

**Q:** Back to Montauk: the Montauk project continued. Did they ever, at any point in time, produce monsters as some of these stories I have heard relate?

**A:** Maybe.

**Q:** Was this a result of opening portals between densities or dimensions and having cross-density window fallers dropping in, so to speak?

**A:** Partly.

**Q:** Were any of these supposed monsters that they were supposed to have created, productions or creations of their minds?

**A:** Other densities afford a degree of one and the same thing.

**Q:** Okay. You previously have said that the HAARP project is a continuation of the Montauk project.

**A:** Partly.

**Q:** What part is not correct?

**A:** You must remember compartments.

**Q:** So, the right hand often doesn't know what the left is doing. You also once said that the HAARP project was partly operational. Are some of these wildly extravagant shootings of recent times, or people going off the deep end, a result of some of the HAARP experimentation in mind control, or testing?

**A:** This is a result of many forces.

**Q:** Is this something that we ought to pursue: a line of questions about these recent acts of violence?

**A:** Only if you had a better grasp.

**Q:** I don't think I have a good enough grasp. Back to Montauk. Is Montauk connected in any way with this Alternative Three idea of transferring groups or perimeters in the event of a cataclysm or disaster?

**A:** Too complex, but be careful of what you read.

**Q:** In what sense?

**A:** Disinformation. This is most of what you hear and read.

**Q:** (A) Okay, you have mentioned the Navy and the physicists, and then there were these people who simply were producing monsters, which does not seem to be anything that the Navy would want to do, much less physicists!

**A:** You are confusing subjects and time frames.

**Q:** (A) Somebody had to plan this experiment, yes?

**A:** But that was the Philadelphia Experiment.

**Q:** (L) How did this business of producing monsters and all that even come into this project?

**A:** Experiments in mind programming and psy-warfare.

**Q:** So, these were separate experiments. But, did they fall under the Montauk project...

**A:** Yes.

**Q:** So, they were compartmentalized things.

**A:** But the monsters were long after the Eldridge.

**Q:** When did the experiments with the monsters occur?

**A:** Late 70s.

**Q:** Have they continued on with this monster producing business?

**A:** No need to get hung up on “monsters.”

**Q:** Well, that would give me the heebie jeebies for sure!

**A:** Other materializations.

**Q:** They are working on other materializations, or they HAD other materializations?

**A:** Not just monsters.

**Q:** Well, that’s too good to pass. What OTHER kinds of materializations did they have?

**A:** You name it!

**Q:** Were they able to materialize money for themselves?

**A:** No need.

**Q:** Were they able to materialize people from the past or the future?

**A:** Temporarily.

**Q:** Did they, in fact, do this?

**A:** Yes.

**Q:** Did they ask people from the future what kinds of events have occurred between then and now in order to refine their plans and activities?

**A:** No such.

**Q:** Why?

**A:** Variable futures.

**Q:** So, they could materialize somebody from the future, but it was only as potential, or probable future, so therefore, it meant very little, or was useless?

**A:** One of 329 decillion.

**Q:** Probable futures?

**A:** Yes.

**Q:** It's a lot.

**A:** Up to a point...

**Q:** At which time something collapses into the now. Regarding these folks they materialized from the past: anybody we would know?

**A:** No.

**Q:** Could they select who they materialized, or was it random?

**A:** The materialization was really a duality. Review texts re: abductions between densities for idea.

**Q:** Could it be possible that, using this technology, the U.S. Government, or Secret Government, has been doing abductions on human beings that the victims THINK is an alien abduction?

**A:** Maybe in some cases, but the technology is not comparable.

**Q:** Other than people from the past and future, what other kinds of things did they materialize in the Montauk experiments?

**A:** Review.

**Q:** What kinds of things were they interested in materializing more than anything else? (A) Probably technological devices. (L) Did they materialize technology from the future?

**A:** This is more complex than your questions indicate.

**Q:** I realize this. I am struggling with this whole idea. I would just like to know what sorts of things they were most interested in materializing so that I would then have a clue as to which direction to go with my questions.

**A:** Not applicable.

**Q:** When they were doing this materializing, did they not have direct intent? Were they just experimenting to see what WOULD materialize at various settings?

**A:** Their knowledge brought them to a level different than your current imaginings.

**Q:** Well, help me out here! What do you mean?

**A:** No use comparing apples to oranges.

**Q:** At any point did their knowledge and materializations incline them toward benevolent acts and tendencies regarding the rest of the human population?

**A:** This is not working because you are thinking one way and they do not.

**Q:** Can you give me a word or two that will clue me as to how to change my thinking?

**A:** Sure. Try to explain calculus to a kindergartner!!

**Q:** You are saying that this Consortium, these Montauk folks, have a level of knowledge, and a way of thinking, that makes my thinking, and our thinking, seem like ...

**A:** Poppycock.

**Q:** My thinking is poppycock relative to theirs?

**A:** Close.

**Q:** (A) But this is only because we do not have this knowledge!

**A:** Right !!!!

**Q:** And we are trying to get it!

**A:** You cannot get it without an enormous amount of patience!

**Q:** Do we have time to have that kind of patience?

**A:** These experiments have been conducted over a time period you would recognize as about 93 years and have involved thousands of humans and a few hundred NHIs.

**Q:** Are the people involved in these experiments STS or STO?

**A:** All “people” are STS.

**Q:** Well, the people who are working in the direction of STO, what chance do they have of access to this knowledge?

**A:** They do not need it.

**Q:** Why don't they need it?

**A:** They will have it when the elevator reaches “floor number 4.”

**Q:** Are you saying that it is not essential for us to struggle to know these things because it will come naturally?

**A:** Close.

**Q:** Well, gosh! You had me worried there! So, these guys are working and digging for knowledge to control others?

**A:** Close.

**Q:** Are they trying to develop technology to lock the planet into 3rd density so that it won't go to 4th density?

**A:** Some may be.

**Q:** Do they see the moving to 4th density as a threat to their plans and projects?

**A:** Perhaps.

**Q:** (A) I believe that there is a lot of this knowledge that would be useful for me to know before I go to 4th density, assuming I will go. I mean, knowledge is knowledge, and I am sure I would make good use of this. Why did you say that this knowledge is not needed for us?!!!

**A:** We did not say that.

**Q:** You said that all people are STS, and then we asked about those who are moving to STO, and the answer was 'they do not need it. They will have it after they reach 4th density.

**A:** But you are not there yet.

**Q:** You just said that we couldn't possibly get it! We don't have ninety some years and thousands of people to work on, and that what we know now is just poppycock!

**A:** No, no, no. You are misreading what we said!!!! Your line of questioning bespoke a level of knowledge not on the same level as those directly engaged in the vast experimentation which in part, was conducted at Montauk. If you were to review the transcripts extensively, you would find that you possess much more knowledge on this sort of thing than you apparently have remembered for tonight's session. You have put forth so much energy toward building the website that you have drained some of your conscious recall ability for the moment. And no, we are not criticizing your efforts, we applaud them!!! But, you could use a thoughtful, meditative review! Good night.

END OF SESSION

## 7.8 August 28, 1999

**Q:** Hello.

**A:** Hello.

**A:** Kiolorra.

**A:** Cassiopaea.

**Q:** We have been discussing the strange visitors to our website. It seems that there is a lot of interest from groups that are connected with intelligence and military organizations. Can you tell us what their interest is in our material?

**A:** Material is largely accurate.

**Q:** Do they understand that this material is largely accurate, and is this the reason for their interest?

**A:** Yes.

**Q:** Do we have to be concerned about any ramifications as a result of their interest?

**A:** Not interest we speak of; destiny.

**Q:** Well, since we have revamped the website, there has been a huge amount of interest, so we have decided that it would be a good idea to get a book out since I can already see signs of plagiarism on other sites, and they are taking whole chunks of our material and passing it around on some of the news groups. I need to put the whole thing together. Any advice about the book? Anything you would like to add or suggest?

**A:** Be careful to make attributions valid.

**Q:** I don't think that will be a problem. Anything else?

**A:** Resist urge to place credit/onus on yourself. E.G. if “you know what hits the fan,” do you wish to be in the line of fire?

**Q:** I don’t think that’s a problem either.

**Q:** Now, I asked Terry and Jan to contribute to the book, and I would like to know how to place them in context? Can you advise? Should they be just observers and sometime participants?

**A:** Yes.

**Q:** Should they also be in the context of significant contributors to the receiving of the information?

**A:** Open.

**Q:** I have noticed from the energetic action at the times they were present, it almost seemed that they were a ground wire, so to speak? Would that be an accurate assessment?

**A:** Maybe.

**A:** No.

**Q:** (A) I think they were active and lively participants.

**A:** Tell the story as it happened.

**Q:** I had thought that I would limit the story and concentrate on the material.

**A:** The material is part of the story. So are the participants.

**Q:** What about all the peripheral people

**A:** Each deserves mention commensurate with input/impact.

**Q:** Gads! That will be a HUGE story to tell all of that!

**A:** Not necessarily.

**Q:** I have this book, this Marcia Schafer thing: “Confessions of an Intergalactic Anthropologist,” and its a bunch of channelled stuff; one thing she says: “the snake is associated with the sign of wisdom and higher learning, and is often regarded quite highly in mystical circles.” She had an interaction with a rattlesnake, for which she felt sympathy, and she also has sympathetic interactions with Lizzies. I would like to have a comment on the idea of the snake as a “sign of wisdom and higher learning.” Does this, in fact, represent what the snake symbolizes?

**A:** Snake is/was reported in context of the viewpoint of the observer.

**Q:** Are you saying that when the observer’s viewpoint is that the snake is a symbol of higher learning, maybe...

**A:** Maybe the observer was just “blown away” by the experience.

**Q:** Clarify, please.

**A:** If you were living in the desert, or jungle, about 7,000 years ago, as you measure time, would you not be impressed if these Reptoid “dudes” came down from the heavens in silvery objects and demonstrated techno-wonders from thousands of years in the future, and taught you calculus, geometry and astrophysics to boot!?!?

**Q:** Is that, in fact, what happened?

**A:** Yup.

**Q:** Well, this is one of the problems I am dealing with in trying to write this history of mankind. As I understand it, or as I am trying to figure it out from the literature, prior to the ‘Fall in Eden,’ mankind lived in a 4th density state. Is that correct?

**A:** Semi/sort of.

**Q:** Please be more specific.

**A:** 4th density in another realm, such as time/space continuum, etc.

**Q:** Okay, so this realm changed, as a part of the cycle; various choices were made: the human race went through the door after the 'gold,' so to speak, and became aligned with the Lizzies after the 'female energy' consorted with the wrong side, so to speak. This is what you have said. This resulted in a number of effects: the breaking up of the DNA, the burning off of the first ten factors of DNA, the separation of the hemispheres of the brain...

**A:** Only reason for this: you play in the dirt, you're gonna get dirty.

**Q:** What was the motivating factor for playing in the dirt? What essential thing occurred? You said once that it was 'desire based imbalance.' What was it a desire for?

**A:** Increased physicality.

**Q:** What was the objective sought for in this desire for increased physicality?

**A:** Sensate.

**Q:** How was sensate experienced so that these beings had an idea that they could get more if they increased their physicality?

**A:** Not experienced, demonstrated.

**Q:** Demonstrated how, by who?

**A:** Do you not know?

**Q:** It was demonstrated by the Lizzies?

**A:** Basically.

**Q:** Demonstrated in what way? Did they say: ‘here, try this!’ Or did they demonstrate by showing or doing?

**A:** Closer to the latter.

**Q:** They were doing, experimenting, playing, and saying: ‘look, we are doing this, it’s so great, come here and try it?’

**A:** Not really. More like: “you could have this.”

**Q:** What seemed to be so desirable about this increased physicality when they said ‘you can have this?’

**A:** Use your imagination!

**Q:** Was there any understanding, or realization of any kind, that increased physicality could be like Osiris lured into his own coffin by Set? That they would then slam the lid shut and nail him in?

**A:** Obviously, such understanding was lacking.

**Q:** Sounds like a pretty naive bunch! Does the lack of this understanding reflect a lack of knowledge?

**A:** Of course. But more, it is desire getting in the way of...

**Q:** Okay. The ‘Fall’ occurred. It seems like, and some of the archaeological studies indicate, that for many thousands of years, there was a peaceful existence and a nice agrarian society where the goddess or female creative forces were worshipped. At least, this is what a lot of present-day books are proposing...

**A:** No. These events took place 309000 years ago, as you measure it. This is when the first prototype of what you call “modern man” was created. The controllers had the bodies ready, they just needed the right soul matrix to agree to “jump in.”

**Q:** So, prior to this time, this prior Edenic state...

**A:** Was more like 4th density.

**Q:** But that implies that there was some level of physicality. Was there physicality in the sense of bodies that look like present-day humans?

**A:** Not quite.

**Q:** What did these pre-fall...

**A:** Cannot answer because it is too complex for you to understand.

**Q:** Does this mean that they are experienced... that the bodies we possibly would move into as 4th density beings, assuming that one does, would also be too complex for us to understand? You are saying that this 'sort of 4th density' pre-Fall state, in terms of the physical bodies, is too complex to understand. If going back to 4th density is anything like coming from 4th density, does that mean that what we would go back to is something that is too complex to understand? This variability of physicality that you have described?

**A:** Yes.

**Q:** So, was there any kind of worship of God, or religious activity in this pre-Fall state; this Edenic, 4th density state?

**A:** No need when one has a clue.

**Q:** What I am trying to get at here, what I am trying to understand, is the transition from the goddess worship to the god worship; the change from the understanding of cyclical time as expressed in the feminine cycles, and expressed as the goddess; to the concept of linear time, expressed as the masculine principle. It seems to me that these were stages of inversion of concepts which gradually led to the ideas that the Lizzies are imposing on

us, and seem to have been working in this direction for millennia - the dominator experience which expresses as: believe in something outside yourself that will save you, otherwise you are damned because the world is gonna end, and you are going to get judged. This is the concept I am trying to deal with here. I am trying to understand what was worshipped. Okay, we had these guys; they fell from Eden, but they were still fairly close to the original concepts, in some terms. Once they jumped into the physical bodies, as you put it, what was their level of conceptualization regarding the universe? Did they still retain some understanding at that point?

**A:** Kind of like the understanding one has after severe head trauma, vis a vis your normal understanding in your current state.

**Q:** So, they were traumatized; they may have had bits and pieces of ideas and memories, but they may also have lost a great deal altogether. There may have even been a sort of “coma” state of mankind for many millennia. But, after they woke up, with the bits and pieces floating around in their heads, they may have begun to attempt to piece it all together. So, they started putting it all back together. What was the first thing they put together regarding the cosmos around them?

**A:** Sex.

**Q:** What did they decide about sex? I mean, sex was there. They were having sex. Is that it? Or, did they understand the cosmos as sex?

**A:** More like the former. After all, that is what got you guys in this mess in the first place! Just imagine the sales job if you can: “Look how much fun this is! Want to try it?!? Oops, sorry, we forgot to tell you, you cannot go back!”

**Q:** I really fail to understand - and I know it is a big issue that has been hinted at and alluded to, and outright claims have been made regarding sex in all religions and mythologies - but I fail to understand the mechanics of how this can be the engineering of a 'fall.' What, precisely, are the mechanics of it? What energy is generated? How is it generated? What is the conceptualization of the misuse of this energy, or the use of the energy?

**A:** It is simply the introduction of the concept of self-gratification of a physical sort.

**Q:** On many occasions you have said that the ideal thing is to have perfect balance of physicality and ethereality. This has been said on a number of occasions. Now, I don't understand how it can be that gratification of a physical body can be the mechanics by which one is entrapped? Is it not gratifying to look at something beautiful? Is it wrong, sinful, or a form of a fall, to look at beauty, to hear something beautiful such as music, or to touch something that is sensually delightful such as a piece of silk or the skin of a loved one? These various things that the human being derives pleasure from very often elevate them to a spiritual state.

**A:** Possession is the key.

**Q:** What do you mean?

**A:** In STS, you possess.

**Q:** That's what I am saying here...

**A:** If you move through the beautiful flowers, the silk, the skin of another, but do not seek to possess...

**Q:** It seems to me that it is possible to experience all of these things, including sex, without the need or desire to possess; only to give. In which case, I still don't understand how it can be a mechanism for a 'fall.'

**A:** If it is desired, then the mechanism is not to give. Do you eat a piece of chocolate cake because it is good to give to the stomach?

**Q:** Well, you could!

**A:** No, in STS, which is your realm do not forget, one gives because of the pleasant sensation which results.

**Q:** Could it not be said that, if everything that exists is part of God, including the flesh, that if one gives to the flesh, without being attached to the giving, that it could be considered a giving to the 'All?'

**A:** Explain the process.

**Q:** For example: there are some people who like to suffer, because they believe that the flesh is sinful. That is a big thing that the Lizzies have instituted. For centuries they have wanted people to suffer, and they have made this big deal about sex and anything that might be considered pleasant or desirable should be denied, and that a person should suffer, and revel in their suffering. And, actually, making a person...

**A:** If one seeks to suffer, they do so in expectation of future reward. They desire to possess something in the end.

**Q:** What I am saying is: if a person can simply BE, in the doing and being of who and what they are, in simplicity; to become involved in doing everything as a meditation, or as a consecration, whether they are walking down the street and being at one with the air, the sunshine, the birds and trees and other people; in this state of oneness, doesn't that constitute a giving to the universe as giving oneself up as a channel for the universe to experience all these things?

**A:** Not if one is "feeling this oneness."

**Q:** We are what we are. Nature is nature. Progression is progres-

sion. And if people would just relax and be who and what they are in honesty, and do what is according to their nature without violating the Free Will of others, that this is a more pure form of being than doing things out of any feeling of expectation, or desire; to just BE, not want... just BE?

**A:** Yes, but STS does not do that.

**Q:** (A) From which I draw conclusions: if there STS around us, we cannot just...

**A:** You are all STS. If you were not, you would not be where you are.

**Q:** (A) There are those who are happy in the STS mode; and there are those who are trying to get out of the STS mode...

**A:** STO candidate.

**Q:** (A) These STO candidates cannot just simply BE, even theoretically, because then, STS would eat them.

**A:** No.

**Q:** Why not?

**A:** STS does not eat according to protocol.

**Q:** What does that mean?

**A:** What do you suppose?

**Q:** I have no idea!

**A:** STS “eats” whatever it wants to, if it is able.

**Q:** That’s what we said. If you are STO in an STS world, you are basically defenseless and they eat you.

**A:** No.

**Q:** Why? What makes STO unavailable or ‘inedible?’

**A:** Frequency resonance not in sync.

**Q:** (A) But then, that would mean that all these people who are saying that we need just to love everything and everybody, are right. They just be, and love, don’t do anything, just give everything to the Lizzies... they are right!

**A:** No, because motivation is STS.

**Q:** How is the motivation to love everything and everybody, and to just give, STS?

**A:** Feels good.

**Q:** So, they want to do it because it feels good?

**A:** Want is an STS concept.

**Q:** So, you seem to be suggesting that the real trick is to just become non-attached to anything and anybody, do nothing, and just dissolve into nothing? No thought, no want, no do, no be, no anything!

**A:** If you are STS, that does not fit, but, if you did exactly that, you would reincarnate in an STO realm, where such energy does fit.

**Q:** But, if you have become nothing, how do you reincarnate? And, when you say ‘reincarnate,’ that implies being in a body!

**A:** You do not become nothingness.

**Q:** But, being incarnated means being in a body?

**A:** No.

**Q:** You mean moving into a realm that does not necessarily mean being in a body?

**A:** Close. But 4th density is partially physical. Does not consume nor possess.

**Q:** (A) This is contradictory to what we are doing. (L) Why write a book or do anything? There is no point. We should just sit around, do nothing but contemplate our navels and do nothing. (F) Why do you say that? (L) Because doing anything at all constitutes wanting, needing, possessing, having, and so on. (F) Of course, because this is an STS realm. (L) So, therefore, we should do nothing. We should contemplate our navels and try to get out of it and to heck with everybody else! (F) I disagree. (L) Otherwise, it is contradictory. If you try to help anyone else, or do for anyone else, you are desiring to help them. Therefore, you are desiring to change something... (F) Well, sure, but this is an STS realm. (L) Anyway, I would like to know who and what this Marcia Schafer is channelling. She seems to be channelling several sources, or claims to be. Could you tell me who and what?

**A:** Not yet, because this issue is not yet resolved. You are confused because you seem to think you must be STO to be an STO candidate. You are STS, and you simply cannot be otherwise, until you either reincarnate or transform at realm border crossing.

**Q:** Alright, I got that.

**A:** But, did Ark?

**Q:** We are here, we are what we are, and until the realm border comes, we can't be anything else. (F) So, don't worry about being STS. That is what we all are. As long as we eat food, that's what we are. It's that simple. You can be moving toward STO, but you aren't there yet, and there is nothing wrong with that. (A) We ask a question, and you answer this question, and this answer can be interpreted in different ways. I am not sure which way this answer was meant. The answer was: if you are STS, the answer does not fit. I mean, sitting and doing nothing. If you are STS that

does not fit. But, if you do exactly that, you will reincarnate in an STO realm where such an energy does fit. There are several interpretations. One is that, if we do exactly that, we reincarnate in an STO realm where the energy does fit, and it would be just the right thing to do, because we WANT to be in an STO realm. So, one sure way to go to an STO realm is to sit under the tree and do nothing and contemplate your navel, but not having too much fun... eat nothing, desire nothing... typical Zen. There is another possible interpretation: if you would do exactly that, then you would reincarnate in an STO realm where such energy does fit, but there may be other STO realms that do NOT consist of such energies. So, maybe there is a way to another way to another STO realm, to which this energy does NOT go, but other ways would go. (L) And, there is another problem here: the very fact that one would do this is DESIRING to go to an STO realm! Which precludes the going. If you desire to be STO, you are screwed! (A) Not being, that is what some teachers teach. Nirvana. Is this something that is supposed to be the only way, and is it something that we are being encouraged to follow because it is no desire, no anything. Or, are there different STO realms?

**A:** Not different realms, as such, but different ways of getting there. Your respective developments have led you to where you are.

**Q:** Alright. I want to get a couple of quick questions in about these books...

**A:** The books? Consider them to be trolling bits and pieces of info from ethereal sources.

**Q:** One thing she says here: “Reptilian species are a common visitor, at least for me. They always wear a uniform... their civilization emphasizes culture and educational training...” She also writes that she read a book by another gentleman who

described his experiences with creatures that was “hauntingly similar,” though his encounters were not with Reptoids. She judges the other guy’s account to be authentic based on her own experiences, and sort of draws a connection between this other group of aliens and her own group based on the name similarity. She then says that “this is a very loving society, and I do not believe that the name mix-up, if there was one, would be due to misguided humor.” The conclusion she draws by making the comparison, based on the name is that the Reptoids are a “loving society.” She says here that “the Grays have always regarded her with friendliness and treated her well.” Here she says: “We are now having a lot of contact with Andromedans. I keep seeing a very human looking being resembling us a bit when I try to remember their image. They are very scientifically advanced. Many people who have a finely developed scientific or medical intellect have ties to this planetary civilization. I say this, because when I meet these folks, I am telepathed about their civilization. The Andromedans have a strong presence...” Well, I guess she isn’t aware that the Andromedans are most likely the invention of someone else’s wild imagination after borrowing a huge chunk of our text files!

**A:** Wolves do well when they present in sheep’s’ clothing.

**Q:** Aside from most of the absurdities in this book, there was one thing that did disturb me: On March 19, 1997, she says that she had a major abduction. She remarks that “I recall being present at a meeting with hundreds of other humans. In retrospect, this bothers me. We were told that we were being tested to see how well we could recall specific training we had been given over our lifetimes to work their technology. Each of us had a partner and we were assigned to activate small 3 seater spacecraft. I don’t know what the other people were told, but I do recall what happened to me. They had a lot of information and it was given in

pieces. I was informed that I would no longer be allowed to dismiss or repress my work with others not of this planet. They said that the time had come, and I must have complete recall. They showed me a life review. They revealed all the visits and interactions I had in this lifetime. As they were about to start this, I recall arguing heatedly with them. In fact, I remember saying "No f\_\_ing way! I'm not going through this. In retrospect, I find this kind of funny in a juvenile type of way, that I swore at them. I received back the telepathic response: 'Way!' In other words, I had no choice and this was going to happen. Generally my wishes were respected in things of this matter. But, not now; they said it was 'time' and I was being brought into 'full activation' in accordance with schedule, whatever that means."

It just so happens that this event {described above in excerpt from book} occurred at about the same time of the major UFO sightings out in Phoenix, and, if I remember correctly, you commented at the time that things were really getting ready to heat up, though we were unaware of these sightings then, being so busy with travelling back and forth to Gainesville. You did indicate that this had something to do with the fact that Ark and I were together, finally, and the beginning stages of some grand destiny were falling into place.

{We had a session on the night of the 15th, and I asked the question about what had made me so violently sick the previous night, and for several nights previous to this, I had awakened startled and fighting, feeling presences in the room and things touching me. Also, on the night of this session, the spider descended on the table in the middle of asking our questions about protons.}

Is there any relationship between what was occurring with this Marcia Schafer, and what was occurring with us?

**A:** Well, best to consider this book, and the author, as an amalga-

mation of things read and things imagined.

**Q:** (A) There is something funny. Before, they said that they can't disclose who is this woman channelling. (L) No, they didn't want to talk about the book because of the other issue. Now, Olga Kharatidi has some interesting experiences in a physics lab in Novosibirsk, Russia, so she claims. She claims to have had some other interesting experiences with some shamans up in the Altai Mountains. Then, I later read that there was archaeological evidence that the Altai Mountains had traces of civilization that were dated back 300,000 years. My question is: are the Altai Mountains the magnetic meridian you were pointing us to when you were talking about Novosibirsk and Irkutsk, and did it have anything to do with the archaeological discoveries that were made there at about the time she was having here shamanic experiences....

**A:** This is a good lead for you.

**Q:** Yes, this book has a quite different flavor from the others. (A) Is this story she tells about this Nuclear Physics Laboratory in Novosibirsk a true story?

**A:** Pretty close.

**Q:** Has she disguised the names and specific place?

**A:** Yes.

**Q:** (A) Was it in Novosibirsk?

**A:** Yes.

**Q:** (A) Was it the Institute of Nuclear Physics?

**A:** Name close, but there are 12 major facilities there.

**Q:** One of the things she did: they had her go into a tube, the interior of which was polished like a mirror, and it was in this tube

that all of the visionary and hearing of voices stuff happened. It is sort of on the line of the psychomantium, with one exception, she wore earphones that blocked out all sound. My thought was, would it be useful or advisable for us to use the earphone and music technique too?

**A:** Okay.

**Q:** Do you still consider the use of the psychomantium to be a technique to follow?

**A:** Yes.

**Q:** I have wondered if painting the frame of the mirror black would help.

**A:** Maybe.

**Q:** I just, for some reason, can't get motivated to do it. I don't know why.

**A:** Too many distractions, such as the "pitter patter of juvenile feet."

**Q:** There is not a whole lot I can do about that! I have here Carla Turner's "Masquerade of Angels," the story of Ted Rice and all his experiences. Is the methodology used by Barbara Bartholic in stripping away screen memories a valid method, or is it possible that she creates memories that do not exist by her approach?

**A:** Both.

**Q:** This idea that came out with Ted Rice was perfectly horrible. He said he remembered his grandmother being raped by a Reptoid that pretended to be her dead husband, and that basically, the reptoids killed his grandmother. He came to see all of his psychic experiences and everything that happened to him as instituted and controlled by the Lizards. Is that, in fact, the case?

Or, did he also have some good guys working with him?

**A:** Latter.

**Q:** Did he, essentially, throw the baby out with the bathwater because of his work with Bartholic?

**A:** Close.

**Q:** Well, there does not seem to be a lot of discernment and discrimination in that crowd. Everything is either black or white.

**Q:** (L) There were several dark streaks seen in the sky at the time of the recent solar eclipse. There has been a great deal of comment about this at various sites on the internet including some of the 'hard science' astronomical ones, yet there is no general consensus as to what they were. There were also strange lights and objects seen around the sun, and later, crossing the surface of the moon. There is also an ongoing discussion about some sort of 'Incoming Object' as though there is an anomalous object in our solar system that is creating this effect. Now, I realize that you said before that we ought to watch for something AFTER Comet Lee, the exact words being 'Now, you need to know the composition of this comet... And any other closely following same. We have alluded to the increased cometary activity before. Oort, and that which cyclically disturbs it.' So, it does seem that what you were alluding to is transpiring at the present. I mean, 'closely following' probably means close in terms of time, also. And you did say that such comets as have been disturbed would approach in a 'scatter pattern,' which would mean from any and all directions. Can you comment on these current events?

**A:** Not yet.

**Q:** Why? Is there something we should be watching for?

**A:** Best to keep watching....

**Q:** Anything in particular we should be watching for?

**A:** No. Be open to all possibilities.

**Q:** Are we on the verge of a) an alien invasion; b) a cometary impact; c) the appearance of a twin sun, a death star in our solar system?

**A:** Wait and see.

**Q:** I don't want to wait and see! (A) Wait and see! When it hits us, we will know! (L) Let me ask this....

**A:** What a glorious transition to 4th density STO. With maybe a quick stopover in 5th just to pick up a few things for the trip!

**Q:** Are you saying that we are getting ready for the Big Kahuna?

**A:** Only Don Ho knows for sure.

**Q:** What?!

**A:** Well, you did say "Kaahuna," yes?

**Q:** Okay, you have repeatedly, in the past year, alluded to something that we are supposed to be watching for, that we are supposed to 'enjoy the show,' and all that sort of thing. Now you have made this remark about 5th density, where 3rd density goes at death. Are you suggesting that a lot of folks are going to check out?

**A:** Maybe we were trying to Lighten things up a bit!

**Q:** That's all fine and good, but I just want one word here, a clue about what is coming down in the near future that you are making all these hints about... just a one word clue?

**A:** KABOOM!

**Q:** Now wait a minute! You can't DO that! What do you mean 'kaboom?' I changed my mind, I want two words! One more word!

**A:** SPLAT!

**Q:** Okay, a word that applies to us sitting right here....

**A:** Florida.

**Q:** We KNOW its Florida! What about a word that will give me a clue about our location?

**A:** Hot.

**Q:** (A) I guess that means it will be hot here, but safe.

**A:** Okay. Hot but safe, maybe.

**Q:** Kaboom and splat? Does that relate to what you said about C\_\_\_ last year when I asked if she had a plan to fulfill that she was not attending to at present and you said 'Fate will intercede,' When I asked HOW fate was going to intercede, you said 'Do you really want to know?' So, I said that I just wanted a one word clue, and you said: 'CRUNCH.' Is this what we are talking about here? Can we connect these dots?

**A:** Oh no, she is in the mountains. So of course, she is safe!!!

**Q:** (A) She is safe because she is in the mountains?

**A:** Humor, people!

**Q:** So that is a backward clue?

**A:** Open.

**Q:** (A) I don't know for what reason, but I want to write about disinformation, or lying, by Bearden and misleading by Richard Hoagland. I want to expose them. I don't know if it is a good

thing, but the idea that I should do it, provided it is done in a proper way...

**A:** The problem with Mr. Hoagland is that he has been lead astray by others.

**Q:** (A) He has been lead astray by others, and now he is leading astray many others himself.

**A:** Yes.

**Q:** (A) I don't know why, but somehow I want to prevent this. The main question is: he takes a lot of info and propagates some of the ideas that come from Bearden, and which, to me, are evidently wrong. I believe Bearden knows that he is simply lying; about Maxwell equations, for example; how physicists have been deceived and how silly they are and how they are in the dark. My question is: assuming that, because it is almost evident to me, that he is lying and he knows that he is lying, why is doing that?

**A:** Maybe has been paid to do so. Who would benefit from this? {Hoagland and Bearden's lies.}

**Q:** (A) Government, secret government, Lizzies...

**A:** Uh huh.

**Q:** (A) The next question is: will I be in trouble...

**A:** Best to contact him directly, privately.

**Q:** (A) Him? Bearden or Hoagland?

**A:** Former. Hoagland is not in control anymore.

**Q:** What would result from contacting Bearden? (A) If he is being paid for lying, what would follow?

**A:** If you do it right, maybe you will get an insightful response.

**Q:** (A) A possible insightful response would be persuading me to publish this. Okay. But, I want to get more info about this Bearden. My hypothesis is: yes, he is being paid to lie; and he is also not completely free; nevertheless, he has a certain good will, so he tries to lie in such a way that...

**A:** Yes, but few see it.

**Q:** (A) What positive effect could result from contacting him and writing about it, supposing it is done in a right way?

**A:** Tread softly.

**Q:** (A) I have such a problem: we have this book by Osho. I was reading this, and this piece tells the following: you should not look at what others are doing, whether they are lying or whatever, because you should concentrate on yourself, and the things you should do. Watching your neighbors just takes your attention from what you should be doing. So, I don't know. (A) Maybe my urge to do this is a distraction?

**A:** True. Truth exposes lies for those who need to learn.

**Q:** I guess it is better to just talk about what is good and right and true, and spend less time pointing out what others are doing that are lies. Those who are ready to receive it, will get it. Those who want to believe Hoagland and Bearden, will do so no matter what you say because they want to believe lies.

**A:** Right!

**Q:** (A) I don't know what the truth is....

**A:** But you will!

**Q:** (A) Okay, we are done. (L) And final words, consolation, advice... I mean, you kind of left us hanging here!

**A:** Enjoy upcoming events. Good night.

END OF SESSION

## 7.9 September 25, 1999

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Klorhn.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I would like to address some particular issues. Apparently, there is an awful lot of speculation on the internet in various places about ‘disasters’ of various sorts. There was Comet Lee back a few months ago; then the Nostradamus issue was brought in creating a general panic; now there are other calls of alarm being raised. The disasters on the planet are being attributed to, among other things, the passage of Comet Lee through the Solar System. There are speculations that asteroids or other cometary type bodies are going to cause imminent disasters because of their electrical interactions with the Sun and other bodies of the Solar System. The Internet has, essentially, become a Grand Forum for Doomsday Prognostications. Site after site is waiting for an imminent strike of the planet by some celestial body. I mean, we just have a few days left according to one site! I know that we have dealt with many of these issues before, but the hysteria among some groups is increasing, being bred, generated, being transmitted and encouraged via the Internet. Could you comment please?

**A:** Normally, we do not “comment” to a non-inquiry, but let it be said that many cling to “doomsday” prophetic calamities as a means to absolve personal frustrations with others. I.E. “Just you wait, Henry Higgins, just you wait!!”

**Q:** On one site, an individual read a part of the transcripts published on the website, where you had asked for the different planchette (it’s actually not a “planchette” but just an indicator, but we use the word because it is handy), because there was a stone stuck on the old one with superglue. This individual put a wild interpretation on this simple request for a new planchette, as though it were some secret, coded message to her alone! It was, to her, symbolic of the “melting of the carbon of the planet,” thus leading to the “devolution” of mankind! I had to explain to everyone that this was merely a simple request for a different instrument of communication as the first was was “out of synch.” But, that is neither here nor there, but, just to make sure: WAS there any hidden meaning in this request for a different planchette?

**A:** Obviously, she is a “fruitloop.” But, fruitloops are sweet, if full of chemicals and empty calories.

**Q:** Another of her themes is the devolution of the planet... but we have discussed that way in the past, so we don’t need to go there.

**A:** No we do not.

**Q:** Then, there were further remarks that the Cassiopaeans were obviously going to use up all our “juice” and then take over our carcasses! Do you have such plans?

**A:** What do you think?

**Q:** Well, you have such a cushy existence as you are, why would you want to hang out here? I mean, this 3rd density existence is HIGHLY overrated! And, the particular body I have is pretty use-

less for many things at this point anyway! Can't imagine anyone else wanting to use it!

**A:** We serve others.

**Q:** Are you going to serve them on a platter with mint sauce?  
(laughter)

**A:** Now Laura, really!

**Q:** Well, that is, of course, the response that we often get to that. Some folks out there are just bound and determined to disinform the public!

**A:** And so it goes...

**Q:** Now, there IS an awful lot of weird stuff going on! There was the earthquake in Turkey; there was an earthquake in Taiwan; there were hurricanes; a fireball in Turkey; strange radar anomalies, as they call them. In fact, one of these circular things showed up on our local radar when the tropical storm was heading our way. Could you tell us what is behind all of these ...

**A:** Well, first of all, it is true that some heavenly bodies transiting the Solar System, such as some comets, do indeed interact electrically with the Sun and the planets. This does cause an increase in natural calamities, but this is not new.

**Q:** There is also a theory of Paul La Violette, that there is a wave that comes from explosions in the galactic core, and that THIS is what is behind this increased activity.

**A:** Such waves exist.

**Q:** Are these waves part of the cataclysmic double catastrophes that are predicted to be "on the way?"

**A:** Who says?

**Q:** Well, Paul La Violette and Vincent Bridges, and Jay Weidner, for example.

**A:** You are not capable of predicting such things yet.

**Q:** (A) We are not able to predict many things. You are able to predict better than us.

**A:** Maybe so, but we do so oh so discreetly.

**Q:** When you gave the information a couple of weeks ago about the “Kaboom! Splat!” business, I put it on the website and explained that there was really no way of interpreting it exactly. Of course, there were the most dire interpretations put upon it by others. Could you clarify the “Kaboom! Splat!” remark?

**A:** We also said to “lighten up.”

**Q:** Are you saying that you were joking?

**A:** Maybe.

**Q:** When you say that we should “lighten up,” that you are referring to our frequencies?

**A:** Well, it is important not to worry over that which is not changeable, and which is trivial in the really big picture. If the surface 3rd density realm of your locator is soon to be rent asunder, why does it matter to you, or more to the point, why does it frighten you so? You are supposed to be moving beyond this 3rd density STS thinking.

**Q:** What’s the point of even talking to you guys, then?

**A:** Do you expect to stop talking to us after you transition?

**Q:** Well, I guess it depends on where I transition to. Are we going to make the big transition to 5th density...

**A:** Wherever you go, the communication will be more succinct. Now, even if “nothing happens,” how long do you expect to remain in your present state? Can you remember “35 years ago?” Well??

**Q:** I am thinking! I was just a kid then. Yes, I can remember.

**A:** How long “back” does it seem?

**Q:** Sometimes it seems like forever...

**A:** No.

**Q:** In another way, it seems like yesterday.

**A:** Yes.

**Q:** It just depends on what mood I am in.

**A:** Not long, eh?

**Q:** Well, you are NOT improving my mood! I don't want to tell people things like that, that they have to see themselves as only souls and that the physical body is just a garment to be worn out and tossed aside. They can't handle it when they are faced with imminent possible suffering. They will get hysterical!

**A:** Maybe they will. And maybe they need to. Maybe they need to learn something. Nothing lasts forever, and thank goodness for that!

**Q:** You have talked about space battles and cosmic struggles and individuals and beings and races of beings coming from one direction or another to act in this cosmic drama...

**A:** It is part and parcel of the energy that maintains all existence, as are you all.

**Q:** You also once said that there were “good guys” and “bad guys.”

**A:** From a chosen perspective.

**Q:** Does that mean that the “good guys” and “bad guys” CHOOSE to undertake these roles for the sake of this Cosmic Drama?

**A:** Yes, to some extent. It also means that to the fishes and the cockroaches, et al, “you is de bad guys.” Subjectivity reigns in STS!

**Q:** Would you care to name these groups? You have said that there is the Orion Federation and the Orion Union. The Federation is supposed to be STO, and the Union is supposed to be STS. Is there also a group called the “Markab Confederation,” as one person asked?

**A:** This stage is so huge that there is every “group” you can imagine! And, if you imagine them, they are there.

**Q:** You hinted at one point that we would come in contact with, or interact with, 4th density STO beings who would help us in some way.

**A:** Yes, are you getting impatient?

**Q:** Well... yes.

**A:** Then you should know this: you will not get in, or come into contact with them until things are just about to get very “interesting.” Whenever that may be.

**Q:** Well, I want to get back to all this stuff going on in the Solar System. I am curious about all these things flying about. Asteroids, comets, fireballs, meteors, and things that seem like a cross between meteors and spaceships; all being reported with great regularity recently. All kinds of activity going on. There has also been comment about the star Eta Carinae that has become very active in a very unusual way. Is this some sort of harbinger of something?

**A:** Harbingers unite mental awareness.

**Q:** I see! Is Eta Carinae going to blow, as in go “supernova?”

**A:** It will, but when is the question.

**Q:** Is there anything more you can tell us about these oncoming comets? There were objects seen flying into the Sun; there is a lot of excessive activity of the Sun lately, which is cyclical, but extremely high even considering the normal cycle. What about this possible Twin Sun business?

**A:** There is much going on, yes. But it is cyclical. And will not spell it out for you. The past, if carefully and accurately charted, holds all the answers for you. How do you think the prophets do it?

**Q:** How?

**A:** No.

**Q:** Well now, Vincent Bridges and Jay Weidner and their book about the cyclic cross of Hendaye, talks about the cycles of the past and future and the ages of the world and so forth. They say that Fulcanelli added a chapter to the second edition of his book that was published in 1957, and that this chapter was about the Cyclic Cross at Hendaye. This chapter was supposed to give the whole secret away. He says that this cross represents a double cross, a double disaster, and that it says in code that “life is preserved in a single space” at the time of this double disaster. Could you interpret for us Fulcanelli’s intention in placing this addenda to this book at that particular period of time?

**A:** No need.

**Q:** Why?

**A:** You have been best at uncovering your own clues.

**Q:** I almost had the feeling that the reason this chapter was added in 1957, so synchronous with certain crucial events in my life at that time, was that it was a message to me personally! That sounds crazy. Could it be possible?

**A:** If you wish to perceive it as such.

**Q:** There could be many explanations. Now, we have a correspondent who wrote and asked a question. He said that he noticed there was promotion of Hoagland's idea about the 19.5 degree tetrahedral configuration at one point, and then another idea regarding the parallelogram business involving an 18 degree mark in another section. So, what is the difference between the 19.5 degree comments of Hoagland, and the 18 degree point of interest that you brought up? Are we talking about two different things here?

**A:** Well, if you do the math, you see that 18 degrees fits nicely with ninety. Maybe 19.5 is due to crustal slippages in some "land mark" event?!

**Q:** (A) But, in geometry, this 19.5 degrees is what you get when you try to put a tetrahedron into a sphere. That's how Hoagland got it, not because of observation.

**A:** Okay, that is good, too.

**Q:** How come you didn't know that?

**A:** We pointed it out in the first place.

**Q:** Is that why you put "landmark" in quotes? That 19.5 is where it touches. It is the mark of the point of contact. Is that it?

**A:** Clues, my dear, clues, and the eternal need not to abridge free will.

**Q:** But, if these tetrahedrons fit in a sphere, and they touch the

sphere at 19.5 degrees, how do they relate to this effect that you have said manifests at 18 degrees?

**A:** Does 1.5 fit into 90? Does 90 fit into 180? Does 180 fit into 360? Ask yourself, "what does it mean?"

**Q:** We don't know. (A) The point is that the angle Hoagland is talking about is not 19.5, it is an approximation of point something, something, something.... So, if it is just 19.5, that's the difference between 19.5 and 18 - that is 1.5, which, in this case, is not exactly 1.5, it's one point something which does not fit into anything that we know.

**A:** Circumference.

**Q:** (A) Yes. 360 degrees. Is the circumference important?

**A:** It is important.

**Q:** (A) So, we can compute these two circumferences, and these will differ by some number, and this number will fit again into one of these circumferences, and the point is that it could fit so that there is an integer number...

**A:** Yes.

**Q:** (A) But, there will then be many more angles. There will be not only 18 and 19.5...

**A:** Yes. All Hoagland has done is highlight a point at which magnetic lines converge using the tetrahedron model.

**Q:** If they converge at that point...

**A:** But the question is how does the tetrahedron model relate to trans-dimensional space?

**Q:** How does the tetrahedron model relate to trans-dimensional space?

**A:** A key which unlocks the door.

**Q:** Speaking of a key that unlocks a door: there is some information going around that a gigantic computer has been installed inside the earth that was put there by a Reptilian race, and that the recovery of this thing is one of the reasons for the current or upcoming “invasion” by them. Does this tetrahedron configuration in the earth relate to some giant alien computer?

**A:** No.

**Q:** Is there a giant alien computer buried in the Earth?

**A:** Not likely that.

**Q:** Back to the tetrahedron. How is it a key to trans-dimensional space? Does one activate it in some way? Do you place machinery of some sort at these points?

**A:** No. Magnetism.

**Q:** Are you supposed to generate magnetism, or is it natural magnetism?

**A:** Natural.

**Q:** Are you supposed to do anything to it or with it?

**A:** Supposed???

**Q:** Is it useful to do something with it?

**A:** Can be.

**Q:** In what sense?

**A:** Travelling between dimensions.

**Q:** Is anybody at the present time utilizing it in this way?

**A:** Not terran STS 3rd density.

**Q:** That implies that 4th density STS IS doing this. Could one construct a scale model of a tetrahedron in a sphere, magnetize it, and open portals?

**A:** Yes.

**Q:** Would it require a lot of electrical current?

**A:** Yes.

**Q:** Is there anyway to travel between dimensions, in space time, or whatever, utilizing very little power, as such?

**A:** Off the point we told you before that all spheres of cosmic nature are windows.

**Q:** Going in a slightly different direction. I have been thinking about the nature of our reality, and I have been thinking that underneath it, or at the base of it, there is a 4th density reality similar to the Kaluza-Klein theory. Am I correct so far? Am I going somewhere here?

**A:** Pursue.

**Q:** Okay. And, beneath this 4th density reality, there is an etheric reality; and the etheric reality consists of 5th density. Okay? Beneath the 5th density reality, there is the 6th density reality which I am trying to describe in terms of geometry. That geometry is the underlying, essential thing about ideas, natures or aspects of concepts that come into being in our material world; that geometry is the essential nature of things. Am I getting there? But, beyond this geometry, from what does the geometry emanate? I know you are going to say something like “The One,” or “Seventh Density,” but I would really like to have a concept because I can’t get beyond this. Even if it is inadequate, from what does geometry, which expresses as gravity, emerge?

**A:** Not in sync.

**Q:** What will get me “in synch?”

**A:** No “beneaths.”

**Q:** Okay. Since there are no “beneaths,” what term would be a suitable replacement?

**A:** Around.

**Q:** What is around this geometry?

**A:** For you to pursue.

**Q:** Can you give me a hint here?

**A:** We just did.

**Q:** Would it be safe to say that it is “nested?”

**A:** No, no, no. You still think in terms of a limited domain. When one goes out into space there is no above, below, up, down, left, right, beneath, etc. There is only around. In a spherical sense.

**Q:** Every point is the center?

**A:** Closer.

**Q:** Back to the tetrahedron, these points where this tetrahedron touches this sphere, and these are lines of magnetic convergence; how do these lines of magnetic convergence appear on this sphere; do they radiate out from the convergence points like spider webs? Or do they converge from the center to the outside of the sphere? Are they laid on the sphere like the grid of longitude and latitude?

**A:** Closer to latter.

**Q:** So, when you say they are lines of convergence, does that mean that a latitude line and longitude line, so to speak, converge at those points?

**A:** Think multi-dimensionally. No flat paper please.

**Q:** Okay, let's go in another direction now and try to get these questions covered. I would like to ask what are all of these spherical configurations that are showing up on radars all over the place in recent times? It is quite a scandal that it is happening so repeatedly and nobody is explaining it.

**A:** Stay tuned for more. And for now, goodnight.

END OF SESSION

## 7.10 October 23, 1999

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Eggoram.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I want to you have lost a fan because he was not happy with what he considered to be "internal inconsistencies" in that you were NOT favorably disposed toward hallucinations produced by substances such as Mescaline and Ayahuasca, but yet you recommend Melatonin because it is a hallucinogen. Then, you said that spiritual powers could not be obtained through chemicals or plant type means, but then said that Melatonin exercises psychic abilities. Could you comment on this?

**A:** Several comments: First of all, "fan" is short for "fanatic." Secondly, melatonin does not force an alteration in physiological

brain chemicals, as do mescaline, peyote, LSD, etc. Accessing the higher levels of psychical awareness through such processes is harmful to the balance levels of the prime chakra. This is because it alters the natural rhythms of psychic development by causing reliance on the part of the subject, thus subjugating the learning process. It is a form of self-imposed abridging of free will. Melatonin simply allows the system to clear obstructions in the brain chemistry naturally, thereby allowing the subject to continue to learn at a natural pace. And, it is by no means unimportant that melatonin is a natural body hormone. The other substances mentioned are, at least in part, synthetic, with the exception of peyote. But even that is not a natural ingredient of the human physiological being. And besides, we have already discussed the importance, or lack thereof, of those who pass judgment upon this exercise, or communication.

**Q:** Okay. Going in another direction, we have just recently learned that there is a fellow named Randell Mills who claims to have discovered or written the Grand Unified Field Theory. Is this in fact, true?

**A:** If he has, where is the evidence?

**Q:** We ordered the book! A hundred bucks, too! It's on its way as we speak!

**A:** Theories must be successfully tested to be valid according to your scientific convention. Otherwise, they are merely hypotheses, and anyone can do that, for 100 dollars a pop, we might add.

**Q:** Well, he does seem to have a lot of support...

**A:** Support is not confirmation. A completed, valid Unified Field Theory does indeed exist among 3rd density STS, but it is held in the strictest secrecy!

**Q:** Along that line, Ark is getting really sick of programming. He

has put in his CV in dozen or so places, but there are a lot of places he can't work because he isn't a citizen yet.

**A:** Citizenship can be expedited, explore at once.

**Q:** Is there something else we can explore at once regarding employment so he doesn't have to do this programming. Working as a physicist would be nice.

**A:** Yes, but it may also be limiting, though in a different way.

**Q:** Do you have any suggestions?

**A:** There are many such opportunities in the area.

**Q:** Well, give us a couple of words to focus our search?

**A:** Interstate 4.

**Q:** Don't hang up on us here now! This is serious!

**A:** Where have you looked?

**Q:** In all the obvious places, of course. Lockheed, NASA, universities, etc. (A) Okay, I was advised to contact this Phipps, and we had an exchange, but he was not able to explain one thing that I was asking. Finally he gave up and said that it would be the end of our communication because he wanted to have his "private life," and he apologized for his errors! The question is, of course, whether there is anything of value, and how to find it, in this work of Phipps. This contact with Phipps was unsatisfactory. He couldn't answer questions, wouldn't answer questions; there are several possibilities here: one is that what he was writing was crap.

**A:** When one confronts one of a "showman's" nature, it usually ends in frustration. Sometimes, someone near them is able to offer more concrete answers.

**Q:** (A) Yet, I was advised to contact this guy by you!

**A:** Yes, because sometimes the trail leads to pay-dirt, even if not immediately. Remember, this is a puzzle, not a road map.

**Q:** Well, maybe something WILL result from this contact and conversation. Maybe the comments you have made will be read by someone else. You just never know. (A) Yes, it's a puzzle. But, this Phipps presents Maxwell Equations with extra terms, which probably is wrong, but there may be something to this. It may show the way. My hypothesis is that what he has said about Maxwell Equations is wrong, but it shows a way toward something that can work. Is this correct?

**A:** Yes.

**Q:** We learned that Leedskalnin supposedly wrote a book back in 1949. (F) He did? I bet he didn't reveal his secrets! (L) No, but it is interesting anyway. We ordered it. We read parts of it from the internet, and it is written in rather archaic language, or he had some problems explaining things in English, but it is about basic principles he was investigating. We want to play with some of his experiments at some point. (F) Is there anything about spinning? (L) No, but I figured out what the airplane seat was for by reading some of his experiments. (A) Is there any experiment in this book that would show us the way toward UFT, or better, a way out of standard physics? Or, are his experiments just standard things, but since he did not know the laws of physics, he may have misinterpreted his results? He was amazed by the behavior of magnets, but the experiments were standard? Well, we will have to see. I wrote to this anti-gravity group and asked them if there was one, just one, repeatable experiment that I can do myself, which cannot be explained by standard theories. Is there one?

**A:** Is there such an experiment, yes. But one needs the necessary

equipment, and that is difficult to come by. One needs the means to supply the adequate power for an artificially created EM field.

**Q:** (A) But that would mean that what is in this book by Leedskalnin is just normal experiments because, for the most part, they just use car batteries.

**A:** More power than that is needed, because the grid is too weak for substantive results.

**Q:** (A) But, when he was building this Coral Castle, apparently he was using such effects! What power was he using?

**A:** Sound waves.

**Q:** (A) How was he producing these sound waves?

**A:** Through correlation of rocks and power source, obtained “illegally.” Instrument was similar to a tuning fork, but energized to a level that was lethal if one were to come in contact with it, or its ground.

**Q:** (A) Have we been discouraged from experimenting here?

**A:** No.

**Q:** (L) Did he use this tuning fork while sitting in his suspended swing?

**A:** Yes, because to do otherwise would have been fatal!

**Q:** (L) Where did he illegally obtain this power source?

**A:** Tapped into high energy power lines.

**Q:** (L) So, he was an energy pirate! But, that certainly makes it less mysterious! (A) Can we obtain the necessary equipment? I know what we need.

**A:** Be careful.

**Q:** (L) No kidding! I don't want to vaporize! (A) We will experiment on Percy. (L) No! Not the poor doggie! (A) I have one more question. I want to ask about time. We have been told several times that time is subjective, time does not exist. On the other hand, we are told again and again about electromagnetic phenomena. Now, the problem is, electromagnetism is governed by Maxwell Equations, and you have to write Maxwell Equations with time as one of the variables because it is all about how EM fields propagate in time. I am totally confused. I don't know how to do EM theory without time. I haven't the slightest idea. And, this silly Phipps, wanted to replace time, and he advocates something that he calls "proper time." Proper time is something that is an individual time rather than a universal time that is inclusive of everyone; so there is this proper time that is individual; every particle has its own time. I want to know how to do physics without time. At least how to start. Or electromagnetism without time. Maxwell equations are about time. Einstein's relativity is about space AND time. How to do physics without time?

**A:** So many questions, one at a "time," please.

**Q:** (A) Can equations of electromagnetism be written without using time as we use it?

**A:** Yes.

**Q:** Should we discard this time that is in the present equation altogether, or replace it by something else?

**A:** Reinterpret. It is subjective, therefore fluid, or variable. In other words, open to many interpretations.

**Q:** (A) I want to ask about the theory that I developed with Blanchard that was recently criticized by a third referee of a journal. The paper was rejected. Essentially, the referee was, in a sense, partly right. I am not completely convinced that what we have

done is going in the right direction. I spent on this ten years going in a certain direction, but then the development has stopped. The problem is that I don't understand Quantum Theory. Trying to understand Quantum Theory, we developed this theory in which part of the world is classical and part of the world is quantum. But, of course, we don't know which part of the world is classical. Stapp was thinking that it was mind, consciousness; Penrose thinks it is gravity. The question is: is this theory that we were developing with Blanchard, for ten years or even more, is it a step forward, or is it just crap like this Phipps produced? Can it be made a step forward by completing it?

**A:** Yes.

**Q:** Okay, if it can be a step forward, the main question that we don't know the answer to is: what is classical? Gravity or consciousness or something else? What? Or, perhaps everything is classical...

**A:** Classical negates consciousness, regarding the mind as merely a function of chemical functions and electrical impulses occurring within a vacuum, rather than being interfaced with the rest of creation at all levels of density and all dimensions, which is of course, the case. Gravity is the "glue which binds all aspects of reality, physical and ethereal. Nothing would exist without consciousness to perceive it. Classical physics assumes, among other things, that consciousness and "the brain" are one and the same, or that one exclusively facilitates the other. In actuality, the brain is merely that conduit which facilitates conscious expression in the physical state of human 3rd density states and similar manifestations.

**Q:** (L) I would like to ask a sort of general question: since we have this website and a fairly good amount of visitation, but it has become sort of a forum, so to speak. Most of the basic concepts

are on the website. I am little by little getting other things up; most of it is already in the transcripts; but once in awhile there is expansion needed, such as the subject of hallucinogens this evening; but, for the most part, the pretty basic things are there and are being discussed. My question is: is there a particularly fruitful direction that these sessions ought to take from this point on?

**A:** Just let them flow, as always.

**Q:** (L) I seem to be lacking a particular element in my diet, but I am not sure what it is. Can you tell what it is and the best source to get it?

**A:** What is the problem that makes you believe there is a lacking?

**Q:** (L) I have this irregular system and I believe I have a hormone problem.

**A:** What sort?

**Q:** (L) Just what I said. Irregular. That's as specific as I want to get!

**A:** Calcium, potassium is a little off balance. And you are prone to experimentation based on impatience.

**Q:** I want to ask a secret question.

**A:** No. Share with forum.

**Q:** I can't! It's a personal question!

**A:** You have the ability to receive answers to such inquiries in an equally "personal communication."

**Q:** (A) About the programming, I can do it as long as I am well paid. But, in a university, you have access to journals and books

and so forth. But, maybe I don't need it. (L) Is the job situation stable?

A: It is stable, if tedious.

Q: It's certainly that. Good night.

A: Good night.

END OF SESSION

## 7.11 November 13, 1999

(L) We have a lot of questions to get through tonight, and I have sort of organized them so that the ones that will go quickly are in the top of the pile; but we know how THAT goes! Could be a BIG mistake! We could be here all night on just one of them! Okay...

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Fogorrh.

Q: And where do you transmit through?

A: Cassiopaea.

Q: The first question we have here is from a correspondent who asks: "Have the Cassiopaeans ever mentioned the significance of numbers?" She was particularly interested in the number 666, and I answered that there was already some discussion of this on the website. I also mentioned that there is some good material on the subject that I have not posted yet because I have not gotten to that yet. But, she did ask a couple of questions that we had not

covered before, so I wanted to get them in here. She asks about this “magic square of the sun.” Does this have any deep symbolic meaning?

**A:** Mathematics is organized such that one can construct what one wishes.

**Q:** Are you saying that Professor Eco was correct when he wrote: “With numbers you can do anything you like... I believe the universe is a great symphony of numerical correspondences...” and that the works of man “reproduce in their structures, unconsciously, the harmonies of the cosmos. ...If there is a secret, it is much more profound...” and that those who write about such things remain simply on the surface, “discovering with their incredibly tortuous methods a straightforward truth. ...The true initiate knows that these are metaphors, masks, conventional lies or, at most, pathetic surrogates, for an ancestral forgotten force.”

**A:** Yes.

**Q:** Okay. Then it’s a good thing that it’s Greek to both of us! Next, she heard something along this line and asked: “Do crop circles use geometry and gematria to send us messages?”

**A:** Messages? Yes. Geometry and “geometria? If one so desires.

**Q:** Okay. I think we can use our brains to figure out the rest of it. Next question; a reader writes: “In Scientology, man is viewed as a composite entity comprised of one being, supposed hopefully to be”in charge,” and an enormous number of separate entities in various states of consciousness/unconsciousness, not completely dissimilar to the description given in Ouspensky’s “In Search of the Miraculous.” One of the critical differences between what the Cassiopaeans are saying and what is given as fact in Scientology is that, in Scientology, one is taught that one is not

ultimately One, that an individual remains an individual to the upper reaches of evolution, and evolves as a “god.”

**A:** The Grand Pulsation makes individuality a temporary state of being.

**Q:** By saying that the Grand Pulsation is only a temporary state of individuation, this means that all are One and return to the state of Oneness.

**A:** Yes. If so, it is always true. All are ultimately “god.”

**Q:** But they don’t evolve as a god by remaining individual in the upper reaches of evolution?

**A:** What would be the purpose?

**Q:** I guess they are hung up on remaining individuals and becoming as “gods” for power and control issues... sort of ultimate STS.

**A:** Maybe that would work if time and linear reality were correct, but...

**Q:** Next question, and I think this one will be quick: can you make any comments on the likelihood of this Y2K situation getting out of hand and bringing on the “New World Order” or causing the institution of Martial Law, or causing people to need to store food, guns, ammunition and take all their money out of the bank? There is an AWFUL lot of hysteria out there about this...

**A:** Ask them what happened on November 7th.

**Q:** Oh, you mean the big Hoagland prediction that something was going to strike the earth... supposedly revealed to him by a “confidential informant” who somehow proved his “reliability,” by having “inside information” and so forth. In other words, another spate of disinformation?

**A:** Yup!

**Q:** Okay. Another reader asks what really happened to Flight 990?

**A:** Pilots lost control when windburst tipped plane. Autopilot was disengaged after beginning of dive. Centrifugal force prevented soon enough correction in attitude to prevent structural damage to wings and struts. When plane was reascending, stresses sheared off right wing. No radio contact was made due to the desperation of the situation requiring all attention of the flight crew.

**Q:** Did you mean “altitude?”

**A:** We meant “attitude.”

**Q:** So there was really nothing mysterious about the crash of Flight 990.

**A:** Mysteries are subjective.

**Q:** Were there any mysterious personages aboard this plane, such as persons involved in the “HOR project” in Egypt?

**A:** Probably not. But even if so, do some of your correspondents think everything is a conspiracy!?!

**Q:** Yes. Some of them do! Next question; a correspondent writes: I am wondering if you could ask the Cassiopaeans about the ORIGIN of the TAROT CARDS. Do they represent the esoteric knowledge that the god Thoth - an Atlantean High Priest - wanted saved at the time of the sinking of Atlantis?

**A:** No.

**Q:** What do Tarot cards represent?

**A:** A method for sensitives to tune in with. Or for less psychically endowed persons to “play” with.

**Q:** Were they carved by the god Thoth on transparent crystal tablets according to principles of sacred geometry?

**A:** If so, why did Thoth not get a “copyright?”

**Q:** So, they were not carved on transparent crystal tablets?

**A:** No.

**Q:** Did the Atlantean high priests bring them to Egypt?

**A:** No.

**Q:** Did they come from the Druids?

**A:** No.

**Q:** Who invented them?

**A:** Greek origin, refined in Roman times in France.

**Q:** Well, I guess that takes care of that! Now, there is a rather desperate couple of letters from a correspondent who writes:

“about 5 years ago , I had a reading from a very good trance channel. The female voice that came in said I was from Andromeda and she was my Tracker. She explained my lineage and evolution there. She also said I had been to many ascending planets. I assumed that what I did was assist in that process.; she did not say that. I have now enrolled in that spiritual school of ascension. They say that I am an information broker. That means that I have unconscious agreements to provide ascension information to Andromeda. That does not sound bad, it sounds like service. It’s not. It keeps me from ascending. It also creates karma for me , because I have been instrumental in taking other people’s information without them knowing it. I need information on this phenomenon. I hope you will help me. No one knows how to break the contract effectively. The school says that the Andromedans have engineered their ascension. is this true?

I wish to cancel my contract and get my information back, how can I do that? Information brokering is causing those involved to not ascend, even when they do not consciously know it. Can the Andromedans not read the information without depleting our ascension gridwork? We ask that something be changed so that we are not depleted. We ask the Cassiopaeans to assist. This is a call to assist in returning information and canceling contracts that affect our information. All help will be appreciated. I do not have a clue about which Andromedans are involved.”

This lady wrote in an earlier letter that this “School of Ascension” was run by folks who call themselves “Lord and Lady Agape and Lord and Lady Athena.” Aside from the fact that this sounds an awful lot like that Circe nonsense, I thought you might address this directly, aside from the fact that the only contract I can see that needs to be cancelled is the one to pay any money to attend this “school.”

**A:** Dabbling in such nonsense is not necessary for one to ascend. Two more comments: in this case, a “good trance channel” is defined as one which tells the client that which the client wishes to hear. Comment two: What?! No “godsparks?”

{This is a humorous reference to another “psychic” of which we are aware, who was assigning “godspark levels” to her clients in a completely nonsensical cosmology designed to separate the client from their money and make them feel important.}

**Q:** Here is a guy who asks: “do you know about the ‘Revelation of the Method?’”

**A:** What method?

**Q:** Good question. (A) I would like to know how we should respond to the Fundamentalists who write and threaten us?

**A:** Best approach is to not respond.

**Q:** Next question, or series of questions; this correspondent wrote on our Discussion Page:

“If the Cassiopeans are correct in that Humans came from the 7th density via Lucifer/the fall, why did they choose this? If we came from 7th density we would be aware of the knowledge of the Cassiopeans and more, and as time has no meaning above the 3rd density, then we would have known what would happen to us, including the takeover by the STS group. This can be explained by the Grand Cycle, as we would have known that we would need to do this, but then where is free will? It would seem as though we are caught in an endless loop, which is ultimately futile. On the other hand, if there is free will then, as time does not exist, we should not even be here as all would have happened in an instant as everything progressed to 7th density in a single moment of thought! Since this does not appear to have happened, then everything must in fact be changing continuously. 7th density is union with the One, as stated by the Cassiopaeans. This would equate to the ultimate expression of our existence, as we were, are and will be there. Why leave? As this requires an orientation to STO, then our decision to leave could only be a benefit to all, as opposed to being”cast out” for the desire for physicality. To me, this can express an attempt to go beyond 7th density! Why leave unless there was an something more to be learned in this existence! But what could that possibly be! The Cassiopeans, who claim to be what we were/are/will be, perhaps could shed some light on this subject. Another possibility is that we are attempting to change the Lizzies by letting them change us! As much as they have given us their brain, they are taking samples of us to incorporate into the Greys and possibly themselves. Hard to get more Machiavellian than that! Last thought. If we at 7th density did make a mistake by coming down to 3rd density, then couldn’t the Cassiopeans, at 6th, be just as prone to error? The reason I have gone into these lines of thought are that I want to understand a

bit of the BIG picture. Understanding motives goes a long way to understanding our world/reality. I would like to try to understand our motives for being here, as has been pointed out, knowledge is all and we are ultimately in charge of our own destinies regardless of whatever influences there are. I admit I would like to ascribe some higher motives to our presence here out of ego, but wouldn't it make more sense as well?"

I suppose you want me to break this down into questions?

**A:** Yes we do.

**Q:** Okay. If humans came from 7th density via the "Fall," why did they choose this?

**A:** Not choice in a sense as understood by 3rd density STS.

**Q:** If we came from 7th density we would be aware of the knowledge of the Cassiopeans and more, and as time has no meaning above the 3rd density, then we would have known what would happen to us, including the takeover by the STS group.

**A:** Who said that humans descended from 7th density?

**Q:** Well, you said that human beings are a "fragmented soul unit" that, before they came into the bodies here on earth were "In Union with the One." And, Union with the One is 7th density as you have so often said.

**A:** We have also said the the end is the beginning and vice versa.

**Q:** It would seem as though we are caught in an endless loop, which is ultimately futile.

**A:** It would seem that way if one is transposing 3rd density linear thought from a physicalized standpoint upon that which is infinitely more complex.

**Q:** On the other hand, if there is free will then, as time does not exist, we should not even be here as all would have happened in an instant as everything progressed to 7th density in a single moment of thought!

**A:** See previous answer.

**Q:** The reason I have gone into these lines of thought are that I want to understand a bit of the BIG picture. Understanding motives goes a long way to understanding our world/reality. I would like to try to understand our motives for being here. So, he wants the big picture: why are we here? Why does ANYTHING exist?

**A:** This cannot be understood from your perspective. But no need. Patience, please. Lessons are learned sequentially. And, of course we can make errors. After all, we are still learning too, Ken!

**Q:** Now, here is this:

“You probably know I have been in correspondence with your husband regarding a way to apply his theories about the possibility of time travel. He has withdrawn any support on the grounds that there may be one chance in 10,000 that to do so would violate free will. I can’t speak for Karen and she can no longer speak to me. I only know what she said while she was here. The last three months were very bad, and if she refused to stay here on the day she died, I would understand. But it is farther in the past which I want to change. I want to give her 5 to 10 years with one of my kidneys instead of less than two years dying on a machine. I cannot speak to her anymore, but perhaps you can. . Her name in this life was Karen Claudia S\*\*\*\*\*. Ask her if she could undo the transfusion and receive Gary’s kidney, would she want to try again? If you can reach her, please give her this message:

“The Cassiopaeans said that time is selective and variable. I do

not want to win a lottery or cure cancer or become rich and famous. Someone I love had a dream about creating a life where she could run a small art shop and be happy and successful. It was a small dream but she didn't think she could ever realize because she had a psychiatric problem she didn't understand. The problem was never completely resolved, but enough so that she could try to make her dream come true. The last two years of her life were the only ones that she said were happy. Nothing in my life gave me as much happiness as helping her build her dream. I don't want all that much, just a little more time for love.

“Please ask the Cassiopaens if developing a technology to allow humans to experience time as selective and variable is violating anyone's free will. The channeling you received say it is a natural function that is blocked by our illusions. I don't see how free will relates to that.

“Please ask Karen what she wants.”

**A:** Now, as for this person: does he not understand? It is the soul that matters, not the body!!!

**Q:** Yes, but he has lost his perspective in his grief. He wants to deliver this message to Karen:

“Karen, I know now that I should not have been so focussed on storage and generators at our place in the country. It was my form of denial. I could create a place where we could survive even if the world crumbled around us for as long as we had fluid for your machine. What I couldn't face was that the machine was no longer working. Every week, your blood sugar swings got wider and you lost a little more function. Instead of creating our retreat because it was something I could do, I should have spent every moment with you. I should have been doing what I can do no longer, holding you in my arms and telling you how much I love you. I have all the time I need now to prepare for

the future but all my hopes and dreams for that future died with you. I'm so sorry, sweetheart. Please forgive me."

**A:** Karen is at 5th density. Her soul energy understands what is germane. If forgiveness is warranted, it is given. This person is obviously comfortable with STS reality.

**Q:** Is developing a technology to allow humans to experience time as selective and variable violating anyone's free will?

**A:** Depends on how it is utilised.

**Q:** Would it be violating Karen's free will to go back and try to prevent her death?

**A:** It would also be impossible.

**Q:** Why would it be impossible? Technologically impossible? Or, was it that she had chosen to die no matter what for karmic reasons that we aren't aware of?

**A:** More complex than that, but closer to the latter.

**Q:** Well, I would like to tell this person just one thing that would help him to feel some peace and to understand a little better... but, he is so deep in his grief, I don't think he CAN understand anything but that...

**A:** You got it!

**Q:** Any other comment?

**A:** No.

**Q:** He wants me to ask Karen what she wants.

**A:** This is not 5th density "love connection."

**Q:** Okay, now this next correspondent writes:

“I decided to listen to one of the C’s suggestions about Melatonin. What the heck, after all I might meet Santa! Curiously, It was rather hard to find it in our stores. It turns out that only a herbal/natural version of it is allowed for sale but I don’t think that it’s any different. Well, I must say it is all that I ever thought it would be. I have gone through the stages described in your transcripts and now am at a rather odd stage where everything seems like a TV broadcast Last night I had a very unusual dream about an asteroid impacting Earth. I must say, I do not necessarily subscribe to this theory. I have been reading A LOT about this so it could be my subconscious mind playing tricks on me. The impact took place in the vicinity of the north pole with the approach path from the south. But there was this curious red line extending up and over the pole after it had taken place. I don’t know what it meant. Before, I also dreamt about there only being one more pope, the Japanese being involved with the Grays and I had some dreams with religious connotations. But what really blew me away was a dream couple of nights ago. I dream that I was lifting up from my bed, through the chimney (which I do not have) into a space ship! I could actually see myself lifting off the bed. Then I was on some sort of a raised surface with a short BEING with long arms and A HUMAN DOCTOR beside me. The little fellow seemed rather upset and tried to calm me down even though I was at peace, waving his arms to stop doing something. Then the doctor tried to do something to my lower back but I woke up. Now get this - I woke up turned around - with my feet on my pillows, on my back which I rarely do. When I got up, I actually noticed that the sheets weren’t messed up at all - when I toss in my sleep, the sheets are always kicked off half of the bed. I don’t know what happened, I know it sounds suspicious but I am very sceptical. In my case it is probably more of a wishful thinking than anything else. Regardless of what had taken place, this

particular hormone resulted in a lot of research material.”

I want to ask about this dream that our friend had under the influence of melatonin. There has been something of a controversy about it recently as one group claims that melatonin is stimulated in the brain by aliens in order to cause the paralysis that overcomes the victim and thereby enables them to go about their nefarious abducting activity. Is that, in fact, the case? Is melatonin part of the paralysis factor of alien abduction?

**A:** No.

**Q:** What chemicals are stimulated in the body to cause this paralysis?

**A:** That is not the method used.

**Q:** What IS the method used?

**A:** Electronic wave diversion.

**Q:** They are diverting the electronic waves of our brain or our physiology?

**A:** Closer.

**Q:** Okay, what about our friend’s dream; was this a memory, a dream or an abduction?

**A:** Etheric body abduction.

**Q:** What was the purpose of abducting his etheric body?

**A:** Study.

**Q:** Who abducted his etheric body?

**A:** Orion STS. Melatonin only serves to make one more aware of processes in this context.

**Q:** So, lots of people are being abducted, physically, etherically, or in other ways, and simply are not aware of it at all?

**A:** More often etherically.

**Q:** Most abductions are etheric, but people are not aware. The melatonin is what enables them to be aware of what is happening by removing the blocks the aliens put in place?

**A:** Precisely.

**Q:** And, by becoming aware, do they have some chance of stopping the abduction process by their awareness?

**A:** Or more importantly, limiting the damage. Knowledge protects.

**Q:** Well, that's bizarre. Now, our friend also writes:

“I'd like to mention one more thought that I had the other day. Actually, it occurred to me while watching a trailer for “Cliffhanger”. In that trailer Stallone was jumping out of the frozen pool of water with heaps of ice flying up in the air. At that point, I thought about the different states of energy. Ice is frozen water. From what I remember of my physics classes, freezing is like taking kinetic energy out of vibrating particles. The absolute zero is when the particles stop vibrating at all. Now, vapour goes the other way round - the extra kinetic energy is added and the particles escape their gravitational bounds turning into steam. Well, what if the ascension is like adding some extra energy. The the gravitational or other boundaries become meaningless since each individual vibrates on a higher level. What if you keep increasing the energy levels and the vibration is so rapid that you cannot be located - you are basically EVERYWHERE at any given point in “time” - the differences between the individual particles disappear and you become ONE/UNIFIED. Now, WHAT IF THAT ENERGY IS KNOWLEDGE?? The more knowledge you add, the more

energetic your soul becomes.”

Is this going in the right direction? Is knowledge energy or is energy knowledge? When you add knowledge, do you have more energy?

**A:** Energy is a component of knowledge, yes.

**Q:** Okay, now I was reading in this book that told that many secrets were hidden in the mystery of the Egyptian cat worship. I looked it up and found that this first sacred cat, the goddess Bastet, appeared sitting under a “Persea Tree.” What is this Persea Tree?

**A:** The tree refers to the afterlife, as envisioned by the Egyptians. Felines were thought to be psychic, thus the connection to the afterlife, which was revered in the Nile Basin.

**Q:** Who were the Levites?

**A:** Sect of monk-like pacifists. Connected to Moses.

**Q:** Well, that doesn’t make a lot of sense. They sure did a lot of warmongering and they were behind all the rules and regulations that the Jews followed and that was behind the orders to massacre entire races of. That doesn’t seem to make sense at all!

**A:** Oh yes it does. Pacifists can be managers, not slaves.

**Q:** What about this magazine in India that wants to put the Casiopaeans on the cover? Should we get out our sheets and paint dots on our foreheads?

**A:** Not likely. No sheets, no dots!

**Q:** Now, as you know, Richard Hoagland and others had this big thing going about something that was going to impact the planet. It didn’t. Nevertheless, these folks and their ilk now have a new circus going on, including rumors about the HOR in Egypt and so

on. Are there any upcoming situations that we should be aware of? Is there anything in particular that we need to pay attention to? There is so much going on with these earthquakes and so on... it's pretty busy out there!

**A:** Just watch and learn. We do not like the notion of joining the prognosticator soup! And on that note, good night.

END OF SESSION

## **7.12 December 4, 1999**

Ark, Laura, Frank

(Unless otherwise designated, all questions asked by Laura.)

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Laopinnah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have a number of issues to deal with this evening; the first one is the subject of Flight 990. There have been a number of scenarios suggested by the media and other sources on the internet. One of them says that the autopilot was disengaged BEFORE the plane began to dive. Is this the case?

**A:** No. Plane was disturbed from flight path by windburst, therefore, autopilot was disengaged in order to better combat problem.

**Q:** There has been a big controversy going on. One of the contributors to this controversy was Ed Dames who, on the Art Bell show, claimed that his organization “remote viewed” the situation and that there had been a fight in the cockpit. This claim was made, I believe, before the flight data recorders were retrieved. So, this was a scenario that the media picked up. Then, after one of the recorders was found, for a short while, this idea was popular, because it seemed to explain the crazy behavior of the aircraft. But then the voice recorder was found, and there was no real evidence to support the “fight” scenario, but there was a sort of prayerful exclamation heard, being made by the co-pilot who was, apparently alone in the cockpit when the activity began. Then, the pilot returned and there were sounds of desperate activity and so forth, so the next scenario proposed was that the co-pilot had decided to commit suicide in a big way. As a result of this Ed Dames episode on Art Bell, followed by the NTSB and FBI trying to fit the clues to Dames’ scenario, there is now the suggestion making the rounds of the internet rumor mongers that Ed Dames is in the employ of the “powers that be,” and that he deliberately planted this story so that they could then come along and validate it to give him more credibility so that he would be in place to plant more and greater rumors and stories of the disinformation variety. Is that the case? Did Ed Dames and his group accurately remote view the cockpit of Flight 990?

**A:** No. Ed was hoping for a “hit.”

**Q:** So, Ed Dames is NOT in the employ of the “Powers that be?”

**A:** No.

**Q:** Was the co-pilot suicidal?

**A:** No.

**Q:** So, what he said was the equivalent of “Oh my God!” or some-

thing?

**A:** Close.

**Q:** Now, I have another correspondent who was on a beach about a hundred miles west of the crash site. This individual was with a companion and they both saw an orange glow in the direction of the crash at approximately the time of the event. This orange glow was, in her opinion, anomalous, and quickly disappeared. Was what was seen by my correspondent an effect of this plane crash?

**A:** Possibly linked, but not likely.

**Q:** Well, the question now comes about the nature of the “windburst.” You previously said about this that “mysteries are subjective.” Did you mean to imply that we could have or should have followed up with questions about the windburst itself?

**A:** No, these things happen. Sometimes a fault in autopilot analog computer causes system to fail to adjust properly, thus causing an attitude aberration in wingtips. Planes can dive suddenly and inexplicably. Refer to April 1979, Flint Michigan, TWA flight non-stop from New York to Minneapolis. Quick pilot reaction saved that one, but it was close, very close! Included same “g-force” anomalies, i.e. passengers floating out of their seats, etc. Suggest you look this up on internet. Aircraft manufacturers jealously protect their “turf.” 1999 incident involved Boeing 767, 1979 incident was a 727. At root is the fact that Boeing is feeling Airbus Industries Inc. nipping at its heels. It is all that 3rd density STS love of money stuff, you know!

**Q:** (A) Well, about this windburst, was there some dimensional phenomenon or trans-density window as we have suggested on our site? (L) Was it an ordinary windburst? I think I have heard that it is impossible to have a windburst at that altitude.

**A:** Not “ordinary,” but not trans-density, or dimensional. It was a Jet stream “eddy.”

**Q:** So, there were no rays, beams, microwaves, trans-density or dimensional windows, weird, anomalous, conspiratorial event going on here?

**A:** No, no, no, no, no!

**Q:** It was just a terrible tragedy. The pilots fought as hard as they could to save the plane, but were unable to do so, and the bottom line is a lot of people died?

**A:** Yes, but as is common in all-out emergencies, the human factor was not “perfect.” Pilots were working at cross purposes, but not intentionally! Look up the data on the 1979 case and point this out to the conspiracy thirsty correspondents!

**Q:** Next item on the agenda: the loss of the new Mars probe. As of the latest I heard, it had still not “called home.” Is the Mars probe lost?

**A:** Not lost, just partly dysfunctional.

**Q:** Why is it dysfunctional? Or partly dysfunctional?

**A:** Rocky surface, mis-alignment of antennae, slight damage to communications package. may still be retrievable if technicians can locate proper backup software inlet.

**Q:** So, that is the advice to try to save the mission?

**A:** Yes.

**Q:** Anything else?

**A:** No.

**Q:** So, there is no conspiracy there, either?

**A:** It is just as dangerous and just as useless to “see” conspiracy in everything as it is to “see” conspiracy in nothing. We tire of conspiracy “buffs.” They are nutty, and serve as perfect false sponsors to those who really DO seek to conduct widespread mental/psychic manipulations and control.

**Q:** Okay, that leads into the next question about the excessive contrail activity.

(F) I read the articles about the contrails. There did not seem to be any way of verifying anything that was said. Essentially, you were left with the claims of this or that person, few of whom were trained observers, or who were taking all the factors into consideration.

(L) Well, we noticed them a lot in the spring of 1998 when we had all the floods and fires later. They are THERE!

(F) Yes, but the claims are that contrails were appearing in clear skies, at which point the sky became overcast as a result of these contrails, when the two may not have been related at all. Then, people were noticing cob webs or “angel hair” type stuff falling on the ground.

(L) I agree that a lot of it is unverifiable and I haven’t seen any hard proof myself, either; but they ARE there! LOTS of these jets flying about. An exceedingly LOT of flying! And, not only that, other things have been reported and photographed; strange streaks and lines in the sky, dark and light both - as though some sort of cosmic structure is bleeding through!

(F) Yes, but you have to wonder about these people. I mean, the stuff about the radar anomalies was clearly an example of ignorance of both radar and weather. Oh, yes, big spheres appear on the radar, but those have been appearing forever! They are nothing but cumulo-nimbus blow-ups - what is called a meso-

cyclone, and is very common. The only reason they are getting excited about it is because there is all this communication, all these satellite and radar link-ups, and now the average person gets to see what weathermen have been seeing all along! More coverage and communication just makes it seem like it is something new. People need knowledge about this! Sure, there is stuff going on out there, but people seem to be seeing boogy men behind absolutely everything that happens! And this is because they have no knowledge about these things. Why are these people going off the deep end about these half-baked ideas without bothering to get expert opinions, or even a number of opinions? Why do they promulgate all this nonsense to everybody else as though THEY are experts, with nothing to balance the observations in the way of competent analysis? Meso-cyclones, eruptions of cumulo-nimbus super cells are, by their very nature, perfectly circular because of the cyclonic up-draft!

(L) But, the fact still remains, in my opinion, that there are a LOT, LOT, LOT of planes flying above us in the past few years! Whether they are dumping anything on our heads, or what, there are an extreme number of planes flying in these upper level criss-cross patterns. Now, whether they are just playing war-games, or they are spy planes, they are doing SOMETHING! What is the reason for all of this upper level flying that results in these criss-crossed contrails that everybody is seeing?

**A:** A lot of it is “training maneuver” oriented.

**Q:** Why are they training so many pilots? What are they preparing for?

**A:** Military budgets must be justified, you know. Review “Military-Industrial Complex 101.”

**Q:** So, this is just training flight, justification of budget, and nothing more than that?

**A:** Well, we would not say “not anything more to it than that,” but, when you say “M-IC,” you have said a lot!

**Q:** Are you implying that there is a build-up of the Military-Industrial Complex for a reason?

**A:** To preserve status quo during “peacetime.” This peace business is not very profitable, you know.

**Q:** Does that suggest that they are building up to set off a war so they can make more money?

**A:** Maybe if indeed, and if the populous can be hoodwinked. But, fortunately, the public is less hoodwinkable. Maybe the real enemy is “out there,” rather than “over there.” Was it not always?

**Q:** Does any of this increased aircraft activity have anything to do with the increased awareness and activities of aliens in and around our planet?

**A:** As always. But, this awareness is factionalized and compartmentalized.

**Q:** This brings us to the question from one of our readers: is there anything to this so-called “Gulf War Syndrome?”

**A:** Of course.

**Q:** What is the real cause of the “Gulf War Syndrome?”

**A:** Medications used supposedly to counteract effects of serin; nerve agent.

**Q:** So, a medication was given to these people to counteract a possible threat to live, and the medication itself was a threat to life?

**A:** Yes.

**Q:** Now, on a similar subject: what I hear from various correspondents on the net, there are a lot of folks who have “emerging” Montauk memories. These folks are “waking up” and it is now “kitschy” to be a “Montauk Survivor.” It’s like a sub-culture... can it be possible that this many people...

**A:** No.

**Q:** Well, what is it that these people are remembering? As I understand it, they are very sincere and are convinced that they have these “Montauk experiment” memories.

**A:** Some do, but most, no.

**Q:** Well, the ones who don’t, are they lying deliberately, or are they being deceived with screen memories from abductions; have they received some sort of programming to make them believe this; or are they just being caught up in a sort of hysteria that is “catching” and gets them attention?

**A:** The latter is closest.

**Q:** Is there any way a person can discover who, among them, is telling the truth? Is there any clue to validate what any of them are saying?

**A:** Is it not obvious? Check thoroughly into their background using recollections of independent third parties. If the supposed “Montaukee” was known to have never have lived anywhere near Montauk, then it would seem unlikely they were ever there.

**Q:** Now, according to some information posted on the Millennium Group site, there are some photographs that seem to indicate that there IS something anomalous in orbit around the Sun... maybe a new “planet,” or something. Is there a new object in our solar system in a close orbit around the sun?

**A:** Maybe.

**Q:** There is conjecture that this object appeared around the time of the passage of the Hale Bopp comet. Is that the case?

**A:** No.

**Q:** Is this object that is possibly in orbit around the sun, is it a natural or artificial construction?

**A:** Latter.

**Q** Who constructed it?

**A:** Orion STS.

**Q:** What is it?

**A:** HQ.

**Q:** The Orion Headquarters?

**A:** For your star system.

**Q:** Okay, you said “maybe” to this being a “new object.” When did it arrive, or when was it placed there?

**A:** You measure “time” linearly.

**Q:** Can we give it a “linear” definition, or does it come and go through some sort of portal in terms of time, in a cyclical way, or a variable and selective way?

**A:** Yes, but it arrived at that coordinate 26730 years ago, sort of.

**Q:** What is its orbit, or distance from the Sun?

**A:** 31,230,000 miles.

**Q:** How large is this object?

**A:** 1005.6 kilometers diameter.

**Q:** What is the general configuration or shape of it? (A) A sphere, a ball, a disc, a cylinder?

**A:** Partial sphere, hexagonal.

**Q:** (A) Is it in a circular orbit or an elliptical orbit?

**A:** Circular. Rotation is altered by guidance system, gravitationally powered.

**Q:** What is its angle to the plane of the ecliptic?

**A:** 21 degrees.

**Q:** Okay, you said that it is “headquarters,” so that answers what it does. And, it did not arrive with Hale Bopp. Just off to the side, was there REALLY a Hale Bopp companion - this rumor just won't die!?

**A:** No.

**Q:** Now, what do these Orions DO in this object? I mean, isn't it a little warm so close to the sun? I know. That's a stupid question. Space is cold.

**A:** Yes, and study magnetism for answers.

**Q:** Do Orions LIVE in this object?

**A:** Close.

**Q:** Do they use it as a transfer portal?

**A:** Yes.

**Q:** So, it is a doorway, so to speak?

**A:** Doorway as are many.

**Q:** How many of these objects are in our solar system?

**A:** Two.

**Q:** Where is the other one?

**A:** Outside, on the fringe of the solar system.

**Q:** Is the government, or some faction or department, aware of this object?

**A:** Yes.

**Q:** Anything else you can tell us about this object?

**A:** No need.

[Break to look at photographs.]

**Q:** Now, in terms of the photographs of this object, it looks sort of like two cylindrical objects with a dome or energy flow arc at the top. Could you tell us what we were seeing.

**A:** The object.

**Q:** Was it two part?

**A:** No.

**Q:** What was this arc looking part? Part of the spherical part?

**A:** Your visual perspective.

**Q:** Are the two cylindrical parts aspects of the hexagonal shape extending down from a spherical cap?

**A:** Close.

**Q:** Now, related in a general sort of way, there is Ong's Hat, Emory Cranston, and the Incunabula Papers. Supposedly they are like a "democratic time travel" group. There are claims that they were raided some years back, several of them were killed, and there is quite a story behind this group. Is Ong's Hat what it claims to be?

**A:** No.

**Q:** Is Ong's Hat a cover for some sort of covert government operation?

**A:** No.

**Q:** IS Ong's Hat a group of people who are actually experimenting with time travel?

**A:** Close.

**Q:** Are they experimenting with physical time travel, or time travel via consciousness?

**A:** Both, but with limited success.

**Q:** Were they actually raided by the "powers that be," and were some of them killed as is claimed in the story?

**A:** Yes.

**Q:** Who is Emory Cranston? I have heard it is a pseudonym...

**A:** Pseudoscientist.

**Q:** Do you mean he really knows what he is doing, or he just has a good clue as to what he is doing?

**A:** Latter.

**Q:** Is there any benefit to us to pursue this "Ong's Hat" clue?

**A:** Not really.

**Q:** Okay, Philip K. Dick wrote this book called V.A.L.I.S., meaning Vast Active Living Intelligence or Information System. Some of his information was strikingly similar to the information we have received through this source. He obviously wasn't prepared for this in the same way that Don Elkins was not prepared for the Ra Material, and it caused a lot of problems

in his life. Was Philip Dick channelling something like a Sixth Density source?

**A:** Not much of the time, but in part.

**Q:** Was he being abducted by aliens?

**A:** Interaction.

**Q:** Did he actually live in another universe...

**A:** No.

**Q:** He didn't live in another branch of the universe where Germany won the war and everything was horrible?

**A:** No.

**Q:** Why did he have these memories of having lived in another time and then...

**A:** Genius is next to insanity.

**Q:** So, he was a genius in his ideas, but they unbalanced him?

**A:** Close.

**Q:** He claims to have had a couple of experiences very similar to some I have had; and in these experiences he claims to have actually seen the underlying reality matrix... he saw the universe as it really is, in its nature of flowing lights and colors and so forth, as it reformed, so to speak... was he seeing 4th density?

**A:** Close.

**Q:** We have been discussing the possibility of Rigel going supernova as has been suggested in the past, and the arrival of the optical effects being conducive to DNA changes in human beings. Is this, in fact, possible or probable?

**A:** Yes.

**Q:** Are the optical effects of the supernova the same as The Wave?

**A:** Do not get ahead of yourself. The Wave will be apparent when it arrives.

**Q:** Is this wave different from the optical effects of the supernova?

**A:** Yes.

**Q:** Is this wave related to the supernova in some way?

**A:** No.

**Q:** Are only those who have a certain frequency going to transition to 4th density, or is it that the whole planet is going to transition and folks don't really have a choice in the matter?

**A:** Complex issues, suggest you accept dualities rather than uniformities.

**Q:** Well, what I am trying to get at is: will those who transition to 4th density, for all intents and purposes, disappear to those who remain at third density?

**A:** We have discussed options before, for your perusal.

**Q:** Well, I have read them, and have posted them, but some folks don't quite understand. They want to understand if people will experience this as a sort of "Rapture" event where people just disappear?

**A:** But the definitive answer they seek is predicated upon uniformity of experience based upon the typical 3rd density linear time model.

**Q:** Another question along this line: one reader noted that the last time the "Wave" arrived, there were 6 billion people on the planet. And now, it is supposed to be coming again, and we are

again in that ballpark in terms of population. So, the question is: is this sort of like a marker for the Wave, sort of like a critical mass?

**A:** Numbers don't mark. Psychic aural fields of energy mark.

**Q:** I have two last questions: at one point you said to note the "struggle out of sequence with pre-ordained activities of royal bloodlines." Now, of course, I made the remark about usurpation of a throne, but later I realized that we don't really know what the pre-ordained activities of royal bloodlines really are. They don't necessarily have to do with a secular position, they could be a function. What are the pre-ordained activities of royal bloodlines?

**A:** Control.

**Q:** Control of what? People?

**A:** Close.

**Q:** Control of the reality in some sense?

**A:** Not as close.

**Q:** Control as in STS domination?

**A:** Yes.

**Q:** Are there any other pre-ordained activities?

**A:** Need there be?

**Q:** Okay, "struggle out of sequence." Loss of control? The royal bloodlines lose control?

**A:** Only when energies build prior to completion of cycle.

**Q:** What sign am I looking for? Struggle out of sequence... a rebellion that breaks out... a particular cycle to these events... a period

of time?

**A:** You need to review.

**Q:** I want to clarify the issue of Jesus' wives. The first time we asked, you said that Jesus was not married, but had three children with three Roman women. The second time we asked, you said he had a wife, Anatylenia, and had three children with this one woman. My question is: did he have six children, three with one woman, and one each with three other women?

**A:** No.

**Q:** He had a wife and not the three Roman women?

**A:** No.

**Q:** Did he have a wife?

**A:** Three women, all were wives, in the "Biblical sense."

**Q:** Now, Anatylenia was one of these Roman women?

**A:** Yes.

**Q:** Who were here parents? What was her patronym?

**A:** Sermalain and Galleinia.

**Q:** There were three children, one from each woman?

**A:** Yes.

**Q:** Male and female children?

**A:** Yes.

**Q:** How many of these children were male?

**A:** Two.

**Q:** Two boys and one girl.

**Q:** What was the name of the boys?

**A:** No, not for tonight's session. Low energy now. So, goodnight.

END OF SESSION

# Chapter 8

## 2000

### 8.1 January 22, 2000

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Anoova.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** As you know, the morning after the last session, I woke up in extreme pain. It took several weeks to get this under control, and all the physical efforts seemed to have little or no effect. I went to the chiropractor, I had acupuncture, massage, ice, heat, you name it. I would like to know what was the cause of this physical attack?

**A:** Tenseness, aggravated by sleep posture and psychic tear in medial collateral veil of etheric body. This leads to “opportunistic” invasion of energies intent upon harm.

**Q:** What was the cause of the weakening of the etheric body, or the “tear” you have identified?

**A:** Emotional/psychic distress relating to original malady, and weakened resistance of etheric protection system.

**Q:** When you mention an “original malady,” what do you mean, specifically?

**A:** Muscular. Think of it as the etheric equivalent of bacteria invading a cavity.

**Q:** So, something broke through the veil of an etheric nature?

**A:** Yes.

**Q:** Can we identify them?

**A:** Represented by those who wish you were not as aware and as communicative as you are; i.e. 4th density STS.

**Q:** Was it a spirit attachment, or was it more like a pipeline pumping in negative energy?

**A:** Closer to latter. Recent events indicate attack. Vigilance should be powered up! Ark has also been “under the gun.”

**Q:** So, we should be expecting attack?

**A:** Expecting it then countering it thusly.

**Q:** What aspect of our lives, which of our activities, was the origin of the weakness: financial, emotional, or what?

**A:** The origin is not nearly so important as the awareness/vigilance.

**Q:** Well, the upcoming attack mode you have identified: is it going to be psychic, emotional, financial, or what?

**A:** Psychic, of course. This can affect all other realms obviously! We have discussed this before. And, be always aware. The more exposure you have, the more potential portals come into the picture.

**Q:** Are you alluding to the upcoming article Tom French is writing?

**A:** Yes, and the website, etc...

**Q:** Well, if that is the case, ought we to tone down what we are putting on the website?

**A:** Awareness does not usually require concession.

**Q:** Any specific advice?

**A:** Vigilance is the key.

**Q:** (A) The original question was “why did this come about just after the last session?” Considering that all of the recent sessions have been very draining, and that seems to indicate that some element of corruption has been coming through.

**A:** Awareness negates that.

**Q:** If you are aware that you are being drained, then the obvious solution is to stop having the sessions.

**A:** No. Aware that attempts will be made to drain.

**Q:** What was it, in particular, about this last session that made me so vulnerable? Lack of awareness?

**A:** Close.

**Q:** You had said that the channel was “grooved” and that other forces couldn’t “horn in” any longer. So, I was being comfortable with that idea...

**A:** If you have bacterial invasion of your oral cavity, awareness of this prompts you to gargle with peroxide.

**Q:** What is the equivalent of gargling with peroxide after doing a session?

**A:** Awareness leads to mental/psychic resolve that “will not be drained, the attack will not succeed.”

**Q:** (A) In what sense was I “under the gun?”

**A:** Injuries/maladies.

**Q:** The flu and your toe, I guess. Is there any other thing on this attack issue; any area where we are most vulnerable that we need to pay attention?

**A:** Just be aware of all portals.

**Q:** Could this have a financial effect on us?

**A:** It could, but if vigilant, less apt to occur.

**Q:** Do you see the job situation as being stable for the time being?

**A:** Mostly.

**Q:** Mostly is not completely!

**A:** What could affect this?

**Q:** Well, they recently started making noises about creating a position at the company for regular employment, designed, it seemed, for Ark to apply. He did not do so because he was advised that, if he did, it would put him in a far more precarious position. He would not have a contract, being a regular employee,

he could be fired summarily, which this bunch seems to do from time to time, the benefits are lousy, he would have to work IN the building instead of at home; it just was not an attractive option. Then, we found out that a couple of people DID apply for the position, and they were only offered 30 thousand a year, which is pennies. So, will they take the fact that Ark did NOT apply for this position askance, or are they trying to get somebody in there to take the position so that he is no longer necessary? Those are some of my concerns in addition to the whole security clearance thing. Besides, this is a REALLY weird company! They just collect government money and do nothing!

**A:** Like a front, yes?

**Q:** Yeah. What's it a front for? Well, maybe they will keep Ark, they can keep up appearances! They can say that somebody is really doing something! Any comment?

**A:** No.

**Q:** (A) Now, I contacted IBR, Santilli, and kind of announced that I am interested in a grant that they have advertised. Apparently, on Monday, I will call Santilli and arrange a meeting, perhaps. I would like to know if I am entering some potentially dangerous involvement, or if I am entering into something which potentially can bring good future opportunities? I would like to have some advice here?

**A:** More likely the latter.

**Q:** (A) What approach is good...

**A:** Straightforward.

**Q:** (A) Also, since we are talking about this job situation, I would like to ask about this Miami opening which I applied for, but its part of the game. What chances do you see of getting this, or

another position because of this application?

**A:** Your future is better served as an independent agent. When you are working within the confines of realms controlled by others, you are quite vulnerable.

**Q:** Now, we have this picture of this sort of “track” on the Moon here. It is 29 KM long and about 1 KM wide, and they are calling it a “landing strip.” Well, it’s pretty big to be a landing strip, in my opinion. What is it?

**A:** Residue of ancient mining operation.

**Q:** How ancient, by our calendar?

**A:** 350,000 years, approximately.

**Q:** In specific, how does this mark relate to a mining operation? Was it like strip mining, or where mining machines were driving back and forth, or what?

**A:** Underground channel mining.

**Q:** So, it is a depression caused by an underground mine. What was being mined?

**A:** Lignite and gold.

**Q:** Who was doing the mining?

**A:** Who made you?

**Q:** Orions?

**A:** Yes.

**Q:** What did they use this lignite and gold for?

**A:** Conduction of electromagnetism.

**Q:** Did they take this material out of our solar system to use elsewhere?

**A:** Some.

**Q:** (A) I don't understand something here. These alchemists, who were not so clever as 4th density, were apparently able to produce gold. Now, these Orions who are so much more advanced, one would suppose, could not do transmutation, but needed to engage in mining? If they are so clever, why couldn't they transmute iron to gold? Why did they have to mine the gold?

**A:** Have to? Not necessarily. Greed dictates that when it is there for the taking, do so. Does the counterfeiter walk away from a stash of cash?

**Q:** I had a dream the other night that somehow we travelled in time, to the past, and for some reason it was the period of time in which Nostradamus lived, and we encountered him. There were people watching us, and these people decided that we, along with Nostradamus, were to be burned at the stake for sorcery. During this interaction with Nostradamus, we learned from him that he was also a time traveller from the future, though from a different timeline than ours. We had intersected with him at this particular point in our past. It seemed to be very important that Nostradamus NOT be burned at the stake, important for the future of humanity. But, we couldn't get back to the future. People who were monitoring events from the future saw the difficulty, and they sent reinforcements, and were going to kill off all these people who were trying to burn us all at the stake. It seemed to be more important that HE continue to exist, though they didn't care a lot about whether we did so or not, though we were saved as a sort of byproduct of this activity. So, we got saved from being burned at the stake. I was taken by this group who had come back into the past, and they had disguised me and were sending

me to a convent, but Ark and some others came along and rescued me. We realized that we were stuck in the past, and could do nothing but hope that someone from the future was going to come back and save us, or to find our time machine and fix it, so we decided to live our lives as part of this past situation, while at the same time, keeping our eyes open for our chance to get out of there. We started a horse farm as a “cover” for our activities. The last thing was a remark made at the end of the dream saying that I was descended from Nostradamus on my Knight side of the family, and that was why we “intersected” with him in our time travel excursion. That made me a descendant in the future, of somebody who had traveled into the past from a different future and had gotten stuck there... tell me about this dream!

**A:** Well, check out the genealogy.

**Q:** Was, Nostradamus a time traveller into the past, which is why he wrote all these prophecies that were partially, or occasionally accurate, but in general, not? Is it because his travel into the past CHANGED the future?

**A:** Maybe, at the soul level. But then again, who is to say that the same does not apply to you all now!?!

**Q:** I was thinking about time travel when I went to sleep that night. I wasn't thinking about Nostradamus, for sure, but I was pondering time travel. The thing I was thinking about was that, for some reason, we are all going about it in the wrong direction. Time travel is, in my opinion, a lot easier than we suspect, though I can't quite wrap my mind around what it is we are missing here. Can you help me out here? People keep thinking in terms of a) collapsing the gravity wave so that time around stops; or b) going faster than light so that time stops in that way. Either of those two approaches seems to be going at it backward, but I can't explain why. What is it that I am trying to get my mind to grab onto that

is slipping away?

**A:** Changing channels.

**Q:** Changing channels? You mean you can change channels to do it?

**A:** Yes. All is present, there is your illusion.

**Q:** Is the changing of channels something that is accomplished internally, like in the physiological structure, or in the mental/psychic/soul structure?

**A:** More complex.

**Q:** But, you said before that one has to generate an electromagnetic field, a la Tesla coils, do you have to have massive amounts of power in order to change channels and time travel?

**A:** That is the pathway accessible from 3rd density.

**Q:** How much power do you have to have?

**A:** Let us just say that GIGAWATT is the term of choice.

**Q:** Okay, if you are generating a magnetic field, and you “change the channel,” is it from that immediate point within this field, that you can access a channel of some sort, and move into a different timeline. I mean, is it like being suddenly placed at the center of a spider web, with all the times available all around one, and it is a matter of direction of choice?

**A:** Something like that.

**Q:** What kind of device, or control system would you use to select the proper channel? Is this strictly a mental activity, or is there something that you use to select a frequency which resonates with a particular time, or channel, and you have to experiment to figure out which time is which frequency? (A) How do we tune?

**A:** Your suggestion of mental imagining's good.

**Q:** So you have to be able to create a mental image, which means that you must HAVE a mental image of something that is fairly accurate that will pull you into the right "time line." You have to have a marker, a significant marker!

**A:** Dates will do.

**Q:** If dates will do, and the calendar has been screwed with so much, do you use the concept of say, "2000 years before today," ignoring conventional calendrical systems? Is that it?

**A:** One method.

**Q:** Well, clearly, if you are traveling backwards and forwards in time, you want to move into the timeline in a discreet manner. You don't want to just appear in the middle of a street in a busy city with a bunch of people standing around staring at your materialization, who immediately grab you and burn you at the stake. So, if that is the case, perhaps you want to select your location as well as your time. And, how can you select a location without having an image, and how can you know that your image of the location is correct if...

**A:** Your are assuming immediate appearance in the visual spectrum as recognized by 3rd density.

**Q:** So, assuming that one materializes immediately is apparently not so.

**A:** It is not necessarily so.

**Q:** So, you can time travel and remain invisible? Sort of in an ethereal state, and then opt, at any point, to become more solid?

**A:** If you have skill/knowledge. If not, it could indeed be a "crapshoot."

**Q:** Is that 7-11 you win; snake eyes you lose!? (A) But this time travel involves TransDimensional Remolecularization. (L) I guess, if you have the skill it does, but if not, it doesn't. Very interesting. I have been looking at the French cave paintings which are so obviously superior to later prehistoric art, and I started thinking that maybe these caves could be what time travellers use as their points of entry and departure. (A) Suppose you time travel, can some other beings, even advanced humans, see you on a screen or something? In other words, when you time travel, can they monitor you? Kill you, block you? Are they "watching" to make sure that nobody time travels? Is there some sort of "time travel police," as was suggested in a movie I once saw? Is this possible?

**A:** Can be monitored, but only to a limited extent.

**Q:** Is time travel something that is going to be a significant part of our future?

**A:** Yes, absolutely!!!

**Q:** This dream I had, when we appeared in this other reality, we came tumbling down a chute of some sort, through the castle wall, and landed on our bottoms in this hallway with people walking back and forth! We were standing in a field one minute, and the next minute there we were! We weren't even dressed appropriately. (F) Yes, it would be hard to explain to Henry VIII who Calvin Klein is! (L) But, on the other hand, there is always the possibility that time travel could include transferring your focus of consciousness from one of your "selves" in one time period to another of your selves in another period, what we would call another "incarnation." You just change your focus.

**A:** These all are reality. And of course, the UFO issue is tied into this too.

**Q:** Now, that reminds me: we have this bizarre picture here of this absolutely strange creature in a museum in Germany. So, speaking of time travel and UFOs, what is this 265 year old creature kept in formaldehyde?

**A:** Hybridized conception/gestate.

**Q:** Was there hybridization and genetic manipulation going on almost 300 years ago?

**A:** Most done this way are miscarried.

**Q:** Did it live at all after birth?

**A:** No.

**Q:** Who was responsible for this experiment?

**A:** It was not an experiment. It was the result of Reptoid “rape.”

**Q:** So, the mother was raped by a reptoid. Why do reptoids rape human women?

**A:** We have discussed motives.

**Q:** Yes. They feed on the fear, terror, or absorb some substance emitted by the sexual organs and chakra, and in some cases they are “changing the genetic program.” But, in general, when we have discussed this, it has not included impregnating human women with Reptoid sperm. How often does this activity result in impregnation?

**A:** Rarely.

**Q:** So, in this case it did, and here is the result. Pretty horrible. We have been puzzling for some time over a remark you once made that, at 4th density, there is no right or left. How can we conceptualize this?

**A:** It is difficult of you to conceive of this. Directionals exist within the perceived limitations of your reality.

**Q:** Are you saying that at 4th density, an individual exists as a “point consciousness” and there is no materiality unless you will it to be so?

**A:** Close.

**Q:** (A) Does it have anything to do with the fact that, on a mobius strip, there is no right or left?

**A:** Yes.

**Q:** A mobius strip is not so difficult to think about at all. I also know about mathematics in which you can add extra dimension which can change left into right. It is not a problem. Should we think about something like this?

**A:** If everything is in reality circular in nature, then direction is optional.

**Q:** (L) We have been having a little discussion on our mailgroup, and one participant commented that our remarks about the Lizzies makes it seem that we are thinking of them in terms of “cosmic -homies-,” as she put it. She is focused on unifying the dark and the light within herself. She has suggested that STS and STO might not be the only options to choose, that there might be other options that we are not aware of. She thinks that choosing one or the other boils down to choosing one side AGAINST the other. She wondered what you would say about our apparent “racisim” regarding the Lizzies. I responded that the Lizzies were, in realty, cosmic Nazis. But, the bottom line is that she more or less wants to “love” Lizzies.

**A:** When one “desires,” one is expressing STS.

**Q:** (A) Does this also relate to desire for knowledge?

**A:** Yes.

**Q:** So, in our drive to obtain knowledge, we are STS?

**A:** You are STS, period.

**Q:** But, once we have knowledge, we become STO?

**A:** No.

**Q:** But, you are always saying that we should seek to gain knowledge. You are supposed to be STO, and we are supposed to be STO candidates, so how does that...

**A:** While you are in this realm, you are by nature STS. Gaining knowledge is a separate issue.

**Q:** So, I guess that if you are in a realm where you can't help but be STS, then you ought to be STS about gaining knowledge, because it is the only thing that can assist in changing. (A) There are different ways to desire something. One has the choice of WHAT to desire. (L) Now, there is a lot of talk about the imminent stockmarket crash, so I put up the financial info on the site without any specific advice. Could you comment on this potential for a major crash or depression happening this year?

**A:** Is there not always an "imminent" crash/depression?

**Q:** Of course there is! It's like the Weekly World News predicting the imminent End of the World about once a month. Eventually, they will be right! (A) Maybe not. (L) Well, another thing that was brought up in our discussion with this new gal in the mail group was that nothing of any importance or significance would happen in terms of transition on the earth for at least another thousand years or so. She was saying that we would slowly transform for the next thousand years, and there would be no cataclysms or earth changes. I am wondering if this is a new option that has come up because of changes in consciousness?

**A:** It may be. But remember, the “future” is merely a matter of which reality one experiences in real time, so called. It is merely which of those that exist shall the menu selectors elect?

**Q:** I am curious. Now we have the big 05-05-2000 coming up. I was reading something about this today. Apparently on this date, the planets line up in conjunction with the peak of the solar cycle and there is supposed to be the “Big Kahuna” of earthquakes or whatever. What is the likelihood of the majority of people experiencing THAT timeline?

**A:** 0.1

**Q:** (A) Many people are saying that the most probably date of earth change is 2012. That falls in what you previously you gave as an outside limit of the arrival of the comet cluster, twin sun business; in the middle, in fact. Of course, it may never happen, but is this still the case?

**A:** Maybe...

**Q:** (A) Is this a better probability than 0.1?

**A:** Between 0.1 and 100.

**Q:** (laughter) (F) Well, THAT narrows it down! (L) As you know, Tom French is finishing the article and it is supposed to be published either on January 30th or February 13. They have turned it into a “love story,” and you guys are being presented as “cosmic matchmakers.” Comment, please.

**A:** News media are mischievous.

**Q:** One thing about it is probably is that everybody who wants to find their soul mate will be on the line asking you guys to find theirs! That is a distinct possibility! (F) Along with requests for lotto numbers! Yes, and for \$59.95 we will be happy to oblige. No refunds! (laughter) (F) Yes, they can pay or shut up! If people

are going to seek you out for their own benefits, they will just have to pay up. You would never have a moment's peace otherwise. Every 15 minutes the phone would ring. (L) I don't like that idea. (F) How could you not have thought of it? (L) Well, because we have never charged anybody anything. Never. (F) The point is, you are not soliciting business. It will solicit you. But... if we are going to all be involved in this solicitation of advice from the Cassiopaeans, we should ALL profit! The thing I am concerned about is not so much the positive fallout, but the negative fallout. (L) What is the possibility of the negative fallout; aside from being attacked by the fundamentalists, crosses being burned on our lawn, and all that. (F) Well, it all depends on the content. If Tom is fast and loose with his words, or the editor is - well, it could be a problem.

(A) Now, we were discussing this right and left business, and you were suggesting that there were many, many time loops, and the space/time is fractal or something like that, and that this is the reason that there is no right or left. I had a different idea that these time loops exist, and yes, maybe space/time is fractal, but that this absence of left and right has to do with access to real, big, huge, extra dimensions. You somehow stressed this nonexistence of the distinction between left and right, and because you stressed this, I would like to know which way to go with my math. Any comment?

**A:** Best to place options before us for response.

**Q:** (A) The options are 1) Fractality of space/time becomes relevant in higher densities; and 2) Additional dimension and hyper-space available.

**A:** Choose option 2.

{Personal exchange snipped}

**Q:** I dreamed the other night that my brother died. This was upsetting to me. Should I tell him about this dream; give him some sort of warning? Was it a warning to me? How should I respond to this?

**A:** How?

**Q:** Do you mean “how did he die?”

**A:** Yes.

**Q:** Well, it was a heart attack, I guess.

**A:** Then, warnings should help.

**Q:** Is it a possibility that my brother is going to die of a heart attack?

**A:** Well, all such possibilities exist for all, to some extent.

**Q:** I remember having three death dreams, but they seem now, to have been dreams of my impending divorce. So, I was wondering if this dream about him could have been a signal of some impending change in his situation.

**A:** Maybe, but best to make aware.

**Q:** Anything else?

**A:** No. Good night. End of Session

## **8.2 February 5, 2000**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Tiannah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Okay, we have a bit of a problem here. I would like to ask some personal questions without fear of being thought too STS.

**A:** It is STS, but so be it.

**Q:** Has there been a major change in Tom French's attitude lately?

**A:** No.

**Q:** Has Tom always thought that I was a little crazy?

**A:** Yes.

**Q:** How did he manage to conceal this from me? I mean, I perceived interest and intellectual participation. How did he maintain this facade?

**A:** Interest in his subject.

**Q:** What is his subject as he sees it?

**A:** You.

**Q:** Well, how does he see me?

**A:** Fascinating woman.

**Q:** Why does he not convey THAT in his article as much as he conveys that he thinks I am crazy?

**A:** He does not view you as "crazy" in the literal sense. Rather, he views you as a wild eccentric, using eccentricity as your own

personal mode of surviving the struggles common to all humanity. More overview needed. Mister French does indeed like you, Laura. In fact, it would not be entirely inaccurate to say that there even has been some prurient interest there at times... But, such is the state with this soul. He does not intend to cause harm. But he has repeatedly misjudged the depth of your being, often trying to label. He still does not quite get it. But, his domain does not contain as much depth as yours. Try to understand, the concept of 6th density light beings is as foreign to him as professional wrestling is to you.

**Q:** (F) But, that begs the question: how familiar is professional wrestling to him? (L) I suppose that he is working on the changes we have discussed. Is this the case?

**A:** To some extent.

**Q:** Are there any other changes that we ought to ask him to make?

**A:** Maybe a little.

**Q:** What is the most probable and likely result of the article with the changes that are being made, and as it will come out, following the present probabilities?

**A:** Bouquets and daggers. Fame and infame. But, Laura, Frank, and Arkadiusz: such is the state of the realm in which you now reside... If you cannot stand the heat, get out of the kitchen... But if you leave the kitchen, you will miss the aroma. In general, those predisposed to react positively will do so, regardless of literary content, and vice versa.

**Q:** I guess it is as it is, and that is that. How are the girls going to react to this thing? I am so worried about them being upset.

**A:** A\*\*\* is less vulnerable at this point. She may view any “questionable” content as simple vindication of already existing neg-

ative feelings toward you. In other words, she may externalize rather than internalize.

**Q:** How is L going to react to finding out that I thought he was a robotoid?

**A:** You should nip that one.

**Q:** Is this story going to have positive or negative effects on Tom's career, aside from its effects on us?

**A:** More positive.

**Q:** (A) Is there anything important which we should try to have changed beyond what we have already thought of? Is there anything important, that can make a difference, that has not occurred to us?

**A:** Well, it is late in the game for very much more revision. However, this may serve to attract further outside interest.

**Q:** The article will attract further outside interest?

**A:** Yes, tv, news, authors, publishers, etc... Remember, the Saint Petersburg Times has a well visited web site, too!

**Q:** Well, why do we feel like we are waiting for the guillotine to fall on our heads?

**A:** Guillotine will miss its mark if one retracts head.

{Personal exchange re: private information about other people.}

**Q:** What is the deal with this Santilli business? Do they have a machine that is producing free energy, or at least more energy comes out than is put in?

**A:** No.

**Q:** Are they opposed to the idea of having somebody come in and have a look because that person might discover that their claims are greatly overrated? Are they using these claims as a lure to get government funding?

**A:** Will not get government funding. These people must not be aware that the “government” is fully aware of how to produce “free” energy. Some private sources, European in nature, may be interested, though.

**Q:** Are they trying to attract funding fraudulently?

**A:** More clumsy than fraudulent.

**Q:** It’s really sad that Santilli is involved with such flakey people! (F) Hasn’t he always been? (L) He is certainly influenced by the wrong people! And I don’t think we want anything to do with him at all. (A) Now, we were talking about Kaluza Klein, and you mentioned the Germans “exploring the loop of the cylinder” in relation to time travel. I don’t know what this means but I have the idea that it is related to extra dimensions, hyperspace. Now, we asked a question at some point and you said that a cylinder is really a double loop. You then suggested that we meditate on the true meaning of this sentence. Now, I don’t know how to meditate, but I do know how to do math. So, I drew three pictures here: one is a real cylinder, two is a which is a kind of cylinder inside a cylinder, and three, like a torus. Laura said that it wasn’t any of these, that it should only have one side like a cylinder/mobius strip - no left and no right. So, this could be option 4, something like a Klein bottle or option 5, something called a twisted torus. Is it 1, 2, 3, 4 or 5? Or 6, none of the above? Is it one of these?

**A:** Selection 3.

**Q:** 3 is the torus. (L) What is a loop of the cylinder? Yes, there

is one loop and then there is another loop. One loop is probably what we call time - cyclical time.

**A:** Time cycle.

**Q:** What is the second loop?

**A:** Included, but not inclusive.

**Q:** I guess that means that it is included, but is not the whole thing. It covers that, but that isn't the whole thing. What DOES it mean?

**A:** Yes.

**Q:** Wait, I asked what is the second loop. The second loop is included but not inclusive?

**A:** Remember, you do have cycles but that does not necessarily mean cyclical. 3 Dimensional depiction of loop, seek hexagon for more. Geometric theory provides answers for key. Look to stellar windows. Octagon, hexagon, pentagon.

**Q:** Are those the different levels of density?

**A:** No, but it relates. Geometry gets you there, algebra sets you "free."

**Q:** That's funny. There is Tony Smith's website, and whenever I search for any keyword that comes up here, I go straight to Tony Smith. He has everything there. (L) But, does he know what he is doing? (A) Well, he has it all there. He is now working on a new theory of gravity. (L) But, if he really knew something, would he be still walking around? Anything else?

**A:** No, not for now. Good night.

END OF SESSION

## 8.3 February 19, 2000

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us?

**A:** Woneen.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** First of all, I would like to know if you have any comments on our guests earlier this evening? {A doctor and his wife.}

**A:** You should ask specific questions.

**Q:** The first thing was that he came to us with this story about a “near death experience.” After we started to talk about it, I realized that we couldn’t get a straight answer out of him. He talked for thirty minutes in 50 different directions; talked about death threats; talked about this event that he called a near death experience which clearly wasn’t; we had to stop him, back him up, stop him and back him up, over and over again just to get a sequential account of the events. He talked about hallucinations, going psychotic, schizophrenia, and on and on. And then finally, as if on cue, he said “Oh, I saw a UFO.” Now, we had some funny impressions about this: was this guy an agent sent in to cause disruption in what we are doing here?

**A:** No.

**Q:** Did he have an abduction experience?

**A:** Not an abduction, but a close encounter.

**Q:** Were the effects he was experiencing part of a “bleedthrough” of 4th density in the area?

**A:** To some extent.

**Q:** He was pretty distressed by all this, to the extent that he closed down his medical practice and just basically walked away from his life. Can you tell us what he wanted from us?

**A:** He is disjointed because he has been jarred semi-awake after years and years of programming. The effect has been something akin to a “nervous breakdown,” but it goes deeper than that. It is difficult for you to relate, as you have been “on track,” for the whole of your lives. He was a standard player. Severe experiences brought him to the brink, now he is both retrieving the shattered pieces of what is worthwhile that remains, and exploring the whole new arena that beckons.

**Q:** So, my impression of it being not such a good idea for him, in his state, to attend the session, was correct?

**A:** Maybe so, but maybe in the future he will have himself more together...

**Q:** So far, we haven’t had a single call or e-mail from a single publisher, author, television station, radio or anything, as a result of the article. It just went kerflop!

**A:** Just you wait Henrietta Higgins, just you wait!

**Q:** I had a terrible traumatic experience last Sunday, the day the article came out. I thought I was gonna have a heart attack. What happened?

**A:** Panic attack.

**Q:** It was terrible. My heart stopped beating, it was just shaking so hard that my chest was vibrating; I didn’t have a pulse. I

thought my heart was just gonna stop completely. (F) Probably you were rescued by 6th density beings. (L) I was rescued by Ark. Okay, as the article is, what do you guys think?

**A:** It is an opening to an array.

**Q:** Oh, I see. Alright. My little mail list has been discussing the fact that there seems to be something “in the air.” There were these three fireballs over the Yukon recently; Larry Smith is talking about the Pacific heating up; there have been a couple of huge CMEs - in fact, I think one is supposed to hit today. There was one last week that hit on Sunday or Monday. So, they are wondering about these fireballs and things being related to cometary fragments and that sort of thing. They feel like something is imminent. Could you comment on that idea?

**A:** It appears that some feel imminence at every turn! If “something” ever happens, how anticlimatic for this poor lot!

**Q:** So that is kind of like saying that nothing is imminent. Well, they all seem to work each other into a frenzy. (A) I am concerned by this strange, short e-mail... that something is “offered.” Is there some danger from this?

**A:** E-mail is not deliverence.

**Q:** I guess that means that something “offered” is not “delivered” via e-mail. Saying you have something to offer is a lot different from delivering it. We also received an e-mail from some friends of the Aisenberg’s who want us to inquire about Baby Sabrina. I wrote them back that we really couldn’t present any questions for the parents unless the parents themselves were to ask. You have already commented on this, and I have the feeling, due to your previous comments, that the parents WON’T ask. But, is there any other comments about this you could make?

**A:** It is not appropriate.

**Q:** I didn't think so. Okay, in this book it says: Diodorus Siculus, writing in the 1st century B.C., said that "certain sacred offerings wrapped in wheat straw come from the Hyperboreans into Scythia, whence they are taken over by the neighboring peoples in succession until they get as far west as the Adriatic. From there they are sent south, and the first Greeks to receive them are the Dodonaeans. Then, continuing southward, they reach the Malian gulf, cross to Euboea, and are passed on from town to town as far as Carystus. Then they skip Andros, the Carystians take them to Tenos, and the Tenians to Delos. That is how these things are said to reach Delos at the present time." So, from very ancient times, there was this practice of the Hyperboreans sending sacred offerings to the Island of Delos. Now, the Island of Delos is supposedly the birthplace of Phoebus Apollo, whose mother was Leto. Supposedly he was born on Mt. Cynthus. This is a very curious thing. This is contrary to the old view that the cultural flow was from the Mediterranean to the North, that civilization began in the Near East. It implies a cultural flow from the North to the South. What were these ancient Hyperboreans sending to the Island of Delos?

**A:** Leaves bearing cryptic codes.

**Q:** What was the connection between the Hyperboreans, including the Celts of Britain, I believe, and the people of Delos?

**A:** Northern peoples were responsible for civilising the Mediterranean/Adriatic peoples with the encoded secrets contained within their superior extra-terrestrially based genetic arrangement. Practice of which you speak was multi-trans-generational habit.

**Q:** Is it the case that some of them communicated with higher density beings via Stonehenge, and that these communications they received...

**A:** Stonehenge used to resonate with tonal rill, teaching the other wise unteachable with wisdoms entered psychically through crown chakra transceiving system.

[Note: the word “rill” is new to me. Webster defines it as a small stream or a little brook; to flow in or like a rill.]

**Q:** Was Stonehenge ever complete, with all the stones there? This author suggests that it was never completed because there are missing stones...

**A:** Of course.

**Q:** What happened to the stones that are missing? The books suggests that it was never finished because the architect must have died.

**A:** Nonsense. Multiple shocks registered throught the ages.

**Q:** Was Stonehenge built in stages as this author suggests? Did it start out as a circular ditch, at the time of the so-called Aubrey holes?

**A:** No.

**Q:** Was it built all at once, complete?

**A:** Yes.

**Q:** The legend was that the god, Phoebus Apollo, danced at Stonehenge every nineteen years. What does this relate to ?

**A:** Symbolic. Tides, moon eclipses, that sort of thing. Think of Wiccans entubed on the information superhighway!

**Q:** I mean, there are stones just plain missing! Who could haul off such big pieces of rock?! . (A) You asked about these missing stones, and the answer was the multiple shocks registered. (L) Right. What about these multiple shocks. What, in particular?

**A:** Some were earthquakes; mini-cataclysmic in nature. Some were EM generated smashes, when terran forces clashed with outside “forces.”

**Q:** Are you suggesting that some of these rocks were vaporized, as it were, by some sort of particle beam weaponry?

**A:** EM activity.

**Q:** What was the purpose of the 56 Aubrey holes?

**A:** Ground.

**Q:** Why did they bury ashes of dead bodies in them?

**A:** That was later... fragmented suspicions.

**Q:** Was Stonehenge once known as the Cloister of Ambrius?

**A:** Yes.

**Q:** Who was Ambrius?

**A:** Druid tradition/cloak.

**Q:** What was it a cloak for? Who was Ambrius?

**A:** Not who. What.

**Q:** What was Ambrius?

**A:** They would label as a god. You might say otherwise.

**Q:** What was the meaning of the Sword thrust into the ground that was worshipped by the Scythians; the Scythians being connected with the Hyperboreans and Celts of Britain.

**A:** Scithe.

**Q:** Who was that?

**A:** Scythe.

**Q:** That was the Sword God? Saturn?

**A:** No.

**Q:** That was the meaning of the sword thrust into the ground; it was a scythe?

**A:** Empowerer, or so they thought.

**Q:** Which god did this sword in the ground represent?

**A:** Maybe Zeus.

**Q:** Did Berengar Sauniere find parchments in a pillar of any kind?

**A:** Yes.

**Q:** Were they coded messages?

**A:** There were/are so many such.

**Q:** Are these coded messages that he supposedly found, the same ones that are presented in the book Holy Blood, Holy Grail?

**A:** No.

**Q:** Are the ones in the book dummied up?

**A:** Corrupted.

**Q:** Is there any particular effect that we should be looking for from this solar maximum business, forgetting the idea of something being “imminent?”

**A:** Leaves its mark electromagnetically in belts which surround your 3rd and 4th density visualizations.

**Q:** So, all of this hoopla over it is basically a waste of time and energy. But, boy, they sure do work it for all they can get out of

it! It's amazing! Okay, now, as the probabilities exist right now, who is going to be elected president?

A: Open.

Q: Aaargh! That's not nice! Well, is there something that you can see around the corner of our lives that we don't see, that we ought to see, and which, if we were not so tired...

A: Let it unfold with joyous hearts.

Q: Well, that sounds nice. You mean we are all gonna be happy?

A: Maybe so, wait and see.

{Private exchange snipped}

Q: ... Anything else?

A: No. Good night.

Q: Good night.

END OF SESSION

## 8.4 March 18, 2000

Laura, Ark, Frank

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Ponollah.

Q: And where do you transmit through?

A: Cassiopaea.

**Q:** (A) I have two questions. The first question is about a German fellow named Heim who wrote a couple of books about gravity, antigravity, and all kinds of strange theories that somehow fit what I think is the right direction. These theories were advertised on the internet by our friend, Berkant, and I looked into it and they seem to be interesting. But, they are in German and are costly. They may be useful, but on the other hand it may be a risk. There is no way to say if they may be valuable or not. So, is it worthwhile to invest in these books?

**A:** Well, the books contain valuable information, but it is not all valid. One must weave. Static electricity engages a part of continuum.

**Q:** This relates to these books?

**A:** Yes. Three pronged instrument. Wave transducer.

**Q:** I guess that means it's worthwhile to study these books.

**A:** "Heim." Pseudonym?? Clue?

**Q:** That's all my questions.

**A:** Need more questions.

**Q:** What is the deal with Barry Warmkessal? ... Barry has written a paper about the formation of solar systems and the necessity for a twin star system in such developments. According to his calculations and his theory, the mass of the companion star must be far less than what you indicated the mass of the proposed companion star for our solar system might be. He theorizes that the relationship should be the same as between a proton and an electron, mass wise. Is he correct?

**A:** Best to not quite fall into the mirror image atomic principles trap, lest one suppose to have completely conquered the atomic properties puzzle.

**Q:** Okay, can you give us an interpretation of this crop circle here that Barry has interpreted in his way?

**A:** Maybe a solar type system. Maybe not the one commanded by Sol.

**Q:** If it is not the one commanded by Sol, which one would it be? It must be one of such importance that such a message is being conveyed in a crop circle formation, I would think.

**A:** Maybe.

**Q:** What solar system would it be? What is the name of the star? Would we even know the star?

**A:** In or of Epsilon.

**Q:** Which Epsilon?

**A:** Major.

**Q:** There are a lot of stars called “epsilon.” Which constellation?

**A:** Adjoining constellation.

**Q:** What constellation?

**A:** No more information to be revealed at this time.

**Q:** Is this a solar system from which some of the aliens visiting our planet originate?

**A:** Something like that... From which someone originates.

**Q:** Someone who?

**A:** Take a wild guess!

**Q:** Are they STS or STO?

**A:** STS.

**Q:** Well, you have said that the crop circles are expressions of 6th density thoughts. Does this mean that we are being warned about this?

**A:** On wrong track. More like an historic pictogram.

**Q:** Is the orbit depicted without a planet depicting a planet that was destroyed?

**A:** No.

**Q:** What does the orbit without a planet depict?

**A:** Transference.

**Q:** Transference of that planet to another realm? Transference of what?

**A:** Those who were relocated after the prototypical population was completed.

**Q:** Are you saying that this is a pictogram of the mother planet of the human race?

**A:** Close. That which led to the human race as it now exists.

**Q:** As we measure time, what period of time does this pictograph represent, counting backward in years?

**A:** Millions.

**Q:** Getting back to the earth and companion star business, Barry is predicting that comets will begin hitting about the year 2003, based on the planet positions of this crop circle. Now, even if it is not a representation of planetary positions in our solar system, he COULD be picking up information psychically and using this information as a 'bridge' to present, or rationalize it. So, he has this prediction, what is the likelihood of this idea or prediction coming true?

**A:** Probably will not be.

**Q:** He said that the orbit of the companion star, based on his calculations, was about 5000 years long...

**A:** Our “companion star” data was meant as a clue for guidance purposes, not as the be all and end all.

**Q:** Would you address the issue of Michael’s claim that the dawn of man was dated to about 58000 years ago?

**A:** No. 58000 years ago, as you would perceive it, human types on earth were a thriving, techno-society, already long since entrenched.

**Q:** Well, where does this Michael entity get his information?

**A:** Separate wheat from chaff.

**Q:** Speaking of wheat and chaff, why is Ark sneezing so much lately?

**A:** Pollen allergy shows up this year due to increased pollen count.

**Q:** Speaking of pollen count, we need rain. Is it going to start raining?

**A:** Yes.

**Q:** Is it going to rain a lot?

**A:** Yes.

**Q:** Is it going to be soon?

**A:** Yes.

**Q:** Now, a couple of world events have recently occurred which were in an earlier list of predictions. One of these was the Ukraine explosion and the other was the flood in Africa. In fact,

the flood headlines were almost in the same words you gave it. What this made me think was that, since these things are beginning to happen, since they were given as a group prediction, does this mean that the other things in that particular segment may be just around the corner in time, so to speak?

**A:** Could be.

**Q:** You also made a remark once that ice ages occur much, much faster than people ever thought...

**A:** Yes.

**Q:** Do we need to invest in some mukluks and snowshoes?

**A:** ??

**Q:** Well, what I am trying to get at is: should we start stockpiling firewood?

**A:** Maybe.

**Q:** So, it could be that fast?

**A:** Oh yes, and faster when in response to global"warming."

**Q:** When you put "warming" in quotes, you obviously mean warming in more than just an ordinary sense? Is that correct?

**A:** And/or not really "warm."

**Q:** Whitley Strieber and Art Bell have published a book about a "global superstorm." Is any of the information they have given in this book fairly accurate?

**A:** Derived from non-human sources known for stark accuracy, when convenient.

**Q:** What makes it convenient at the present time for them to be "starkly accurate?"

**A:** Fits into plans.

**Q:** Plans for what?

**A:** Do we not know already?

**Q:** In other words: world conquest and the takeover of humanity?

**A:** Not as simple.

**Q:** What would make my statement more accurate?

**A:** Call it amalgamation.

**Q:** I do want to ask about this head of Tutankhamen: why was his head so extremely elongated, as well as the heads of the other members of that family?

**A:** Trace gene.

**Q:** Where did the trace gene come from?

**A:** Last “call.”

**Q:** The last visit of the Nephilim?

**A:** Close enough.

**Q:** Did the gene come through Ankhenamen or Nefertiti?

**A:** One sound like nephilim, or your “Nefilim.”

**Q:** So, Nefertiti. Where did Nefertiti come from? She is a BIG mystery. I had been formulating the idea that she was Sarai, the wife of Abraham, and the whole story about the pharaoh of Egypt stealing Abraham’s wife and this caused an “affliction” was really the story of the marriage of Nefertiti to Ankhenaten and explained his peculiar physical characteristics. Supposedly Abraham’s wife was very beautiful, and the name “Nefertiti” is supposed to mean “A Beautiful Woman Has Come,” and that sort

of fits. Nobody seems to know where she came from... or who she was. Then, she disappeared from history; nobody has ever found her body or the body of Ankhenten. It's just such a big mystery. Where did she come from?

**A:** We will let you search some more.

**Q:** So, I guess that means I will figure it out from clues yet to be found. Now, I want to go back to what you said about Whitley Strieber and Art Bell getting their information from “non-human” sources about world conquest and domination. Are Art and Whitley consciously aware of their connection to this source of information?

**A:** Amalgamation, we did not say “conquest.”

**Q:** But, on previous occasions you have discussed the alien plan to manipulate humanity via time travel, creating an infrastructure for taking over the world. Are you saying that it will be done in such a way that there is no “outward” sign that it has happened?

**A:** Close.

**Q:** So, in other words, the world is being taken over gradually, right now, as we sit here and speak, and most people aren't even aware of it?

**A:** Sort of....

**Q:** Are people, at any point, going to become aware of it? Are they going to wake up... or is it just the way of nature?

**A:** Natural processes.

**Q:** So, aliens are never going to appear in the sky; there is never going to be a battle as you have previously stated; there is never going to be...

**A:** WHOA!

**Q:** Well, that's kind of what you are saying!

**A:** No. You are impatient for a quick, packaged definition.

**Q:** What I am trying to get at is; you are saying it is a natural process; you are saying we are being taken over; it is not a conquest; though you did not say that it was not domination, of course - clearly domination is part of it, is that correct?

**A:** One could call it evolution.

**Q:** Well, still those things make one tend to think of natural processes that do not involve a war in the sky, spaceships shooting lasers...

**A:** Who says such rules apply?

**Q:** I'm just saying that it how you are making it sound; that it is just a strictly natural process. We are talking about 4th density beings... I guess they could...

**A:** Natural processes are not restricted by your preconceived boundaries.

**Q:** Then, let me come at it from another direction: are these beings who are behind Strieber and Bell's book part of those who will participate in some sort of battle? The problem here is that you have excluded the word "conquest." (A) I think they excluded conquest because, to a large extent, for most people, it is not a conquest; they just simply allow it. So, there is no conquest for most...

**A:** That is part of it, but we know you can exceed your programmed ideas if you try. Conquest, or lack thereof is a matter of opinion/perception.

**Q:** Let me get this straight: how is this book by Strieber and Bell going to play into the plans of STS aliens?

**A:** Not the book, the events depicted.

**Q:** So, are you saying that Whitley and Art are doing a favor for all of us by publicizing this information, that it could be helpful?

**A:** Makes little difference.

**Q:** Is there anything that COULD make a difference? Or is it necessary to make a difference?

**A:** In the biggest picture, no.

**Q:** So, it's not necessary to make a difference?

**A:** The soul, she counteth. The body, she doth not!

**Q:** So, that's the biggest picture. Narrow the picture down: is there something that could make a difference? Clearly, in the biggest picture, nothing makes a difference...

**A:** Native Americans asked similar questions once!

**Q:** Which brings up the subject of Native Americans. A big part of what is being taught by them at the present time is that the aliens, the Grays, and assorted others, are good guys - the "star people" coming here to teach us and to help us advance! They claim that it is a "good" thing to have contacts, abductions, and so on and on.

**A:** No. Corrupted message. Some early contacts were with benevolent STO beings.

**Q:** And now they are confused because they think that the present contacts are with the same beings of the past contacts?

**A:** Close.

**Q:** Okay. Now, there is a peculiar side effect going on with our little mail group. These are folks who are well-read and pretty much aware. But, what seems to happen is that, when folks start to read our material, to become aware, they start to have all kinds of weird stuff start happening to them. Some of this stuff is SO bizarre!

**A:** You know this already.

**Q:** Are there any words of advice you can give to the group, in general?

**A:** Sure... KNOWLEDGE PROTECTS IGNORANCE ENDANGERS!

**Q:** It seems that once they start getting some clues, the attacks increase and it becomes very discouraging. How can they survive this stage of the process?

**A:** One must know of attack, expect it, then counteract. Some of your correspondents are too naive.

**Q:** Any other advice? Some of them are getting hit pretty hard just now...

**A:** You can take it from there. And you are tiring now...

**Q:** I know, but I have one quick one. We have this guy, Johan M\*\*\*\* in Belgium, who claims to have had a sort of Epiphany on a night train to China some years ago. Apparently, this involved Cassiopeia, and he believes that he is "in touch" with you guys. He is coming to Florida next month and wants to meet with us. Is he really in contact with you, or is he a spy? Even if a friendly spy?

**A:** Who cares? Learning is fun! Even if one or two toes falls off.

**Q:** You said before that there were going to be all kinds of events resulting from the article. So far: zero, zip, zilch. Not a word, not

anything. I am beginning to think it was just a twenty minute wonder...

**A:** So far is so far.

**Q:** Can you tell us anything about what is coming up?

**A:** No.

**Q:** Are we gonna like it?

**A:** Wait and see.... good night.

END OF SESSION

## **8.5 April 8, 2000**

Laura, Ark, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Rinirrah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have some questions from readers; I have some questions from my reading; and we have some questions about some ideas that have been tossed around in the last few days. Which would it be better to start with?

**A:** Start where you wish.

**Q:** One of the first things is that we had our INS interview and it was a rather unpleasant experience, to say the least. And, there

is going to be, I understand, some effort made to get some assistance in waiving the permanent residency requirements and go directly to the citizenship stage. Just thought I would throw that in because, of course, it is necessary for Ark to be a citizen to have a security clearance, and that is necessary in order for him to progress in his work. In regards to this work, George and Ark have talked about going for a contract, a military contract, on their own, and leaving Constellation.

**A:** Risky.

**Q:** Is George leading Ark astray in any way in his different comments about the company and his interactions with the company himself?

**A:** George is enigmatic.

**Q:** Why is George enigmatic?

**A:** Mental energies focus eccentricities.

**Q:** (A) Sometime ago we were asking about the situation at Constellation, and the answer was that it was stable. According to what George states, it will be stable only until December, and after that there is no money for the particular projects we are working on now. So, it doesn't look too stable. The question is: what kind of measures should we take so that we...

**A:** Constellation is growing, not contracting.

**Q:** Yet, according to what George says, there is a fight between George and the president, and because of this fight and animosity, as far as I understand, there will be no money for the programming work that I am doing under George. Of course, there is the possibility that Constellation will hire me for some other work, but it is not clear whether it will happen. So, the future is open and we are worrying.

**A:** George is the bug in this system. Not wise to align yourself too closely there.

**Q:** To whom should I talk?

**A:** Not to whom, concentrate talents.

**Q:** What does that mean?

**A:** You are the commodity, others may be the oddity.

**Q:** Is the president aware of the work that Ark is doing, and is he aware of his value?

**A:** To some extent, but also clouded to some extent by those who may wish to manipulate partly by filtration.

**Q:** Are you suggesting that George is manipulating by “filtration?”

**A:** Be on lookout.

**Q:** What would be the best advice you could give Ark at the moment, aside from concentrate talents? Be more specific.

**A:** Be own spokesperson, rely not upon others for this task.

**Q:** Are you suggesting that Ark should sit down and talk to the president, or have lunch with the president, or chit chat with him, or...

**A:** The point is to not rely upon others for communication.

**Q:** (A) Should I recommend to George that he should advise the military guys to allot money to Constellation for the extra project so that I would be working with Constellation for this money rather than with George?

**A:** Why do you feel you must operate via George?

**Q:** But, if anything is said to the president, George might hear about it and cause problems.

**A:** Does George have your best interests in mind... or his?

**Q:** Well, he has certainly created the idea that he has our best interests at heart. He has been very good to us.

**A:** But where does this lead?

**Q:** This can lead to a big downfall. If you encounter somebody who appears to have your best interests at heart, and you trust them and act according to their advice, sometimes you can fall into a pit. But, on the other hand, sometimes they DO have your interests at heart. Yes, they have their own interests at heart, but they may see your interests and their interests as being coincidentally the same.

**A:** Coincidental, or dependent?

**Q:** In other words, what you are implying, is that George was in a rough spot; he got Ark and his work to beef up his image; George gets the credit for Ark's work, and still isn't getting ahead or being perceived as he thinks he ought to be even with Ark backing him up and working day and night; and George is getting ready to jump ship, and he wants to drag Ark with him because he thinks Ark is going to help him make money that he can't do on his own.

**A:** If you say this, we have only revealed for you that which you already sensed, even if reluctantly.

**Q:** (A) At one point there was this opening, and perhaps there is still this opening, to hire somebody, and I can apply, but I understood from George that it is better NOT to have a job where I would have to go to Constellation daily; that it was better to work on contract. That was George's advice.

**A:** Remember, Constellation wishes to keep those whom it perceives have value!

**Q:** So, maybe Ark needs to talk to this president about this position? Is it possible to have a contract AND a position? A contracted position. Why is it that George says they can't fire him? If it was as easy to fire somebody as he suggests, why haven't they fired him with all this animosity going on? (A) Probably he was somehow nominated by the military when Constellation came into being. (L) I don't think that is a good excuse. Is that what he told you? (A) No, but I believe so. How else would he get this position as a vice president? He must have been nominated by somebody.

**A:** Manipulators manipulate... that is their trade.

**Q:** (A) Now, it sounds like if I work FOR Constellation, and if I am hired, then it is sure that I will NEVER have time for anything else. (L) Maybe you should talk those concerns over with the guy and use that as the reason you have been reluctant to apply for the position...

**A:** Those who have true value can "name their price."

**Q:** I think you should talk to the guy. You don't have to say that anybody advised you, but you can say that if you are a "full-time employee," you won't have time for your own research, that you are interested in furthering that and still being able to meet your financial goals, and that you are still considering it because, as you understand it, there is only going to be money until December, and you would like to find out what the status would be, if a position were offered to you, and if you did take it? What would be your status and what would be your prospects in terms of time and obligations to be IN the building and so forth. Don't sell yourself short. I really DO think that George is capitalizing on YOUR work for his own benefit.

**A:** It is “the American way.”

**Q:** I don’t think you should tell George in advance that you are going to talk to the president about taking a position. (A) Why? (F) Because then he will manipulate... he’ll pull something out of the hat.... (A) No... (L) Don’t tell him in advance what you are gonna do. Am I right?

**A:** Yes.

**Q:** Just, next time you go, ask George to see if the guy is there, and just walk down the hall and talk to him then and there, giving George no time to do anything in advance. Don’t make the arrangements through George in advance. Am I right?

**A:** Yes.

**Q:** Now, we promised George that we would give him some advice about what to do about this military contract. What advice would you give to George? The major problem is that if he was going to ask for a military contract, he would have to do it right away in order for it to be budgeted for next year.

**A:** It is risky, as there are so many hurdles, so many “fingers in the pie.”

**Q:** Once you tell George this answer, that even HE needs to stay with Constellation for the present, it gives you a platform from which to make it clear that you wish to go for the position.

**A:** We will give one more reinforcing example: where oh where does the budgeting come from?

**Q:** (A) Probably because there is some congressman in charge of this particular aspect. (L) And who is the congressman a friend of? George or the president of the company? (A) Probably the president, yes. (L) So, there it is. George would lose if he tried to go against that.

I want to throw something on the table here since it is kind of freaky. This guy writes “I’ve read the article written about you in the St. Pete Times, and have read much of the material posted on your webpage. Like you, I live in the Tampa Bay area. I was wondering if you could possibly do me a favor by asking a question of the C’s. I am Wiccan. One night I was astral traveling while in a circle. While I was in the depths of space, I saw a craft with a large window where the bridge would be located. Through this window I saw beings of non-terrestrial origin. They had whitish and yellowish splotchy skin, elongated eyes, and a ridge that projected from their foreheads giving them a Neanderthal appearance. It also appeared that these beings were looking directly at me as though they could see me in my astral form. The question that I hope that you will ask for me is: were these beings that I saw members of the groups utilizing the Wave to travel toward the Earth? And were they able to see my astral form because they were higher density beings? I would appreciate greatly if you could ask this question in one of your upcoming channelling sessions. If you would like to contact me, please reply to this email. I hesitate to give out any further information due to the fact that we have never met.” Well, I think it is pretty rich that I am supposed to give out information to someone I don’t even know! Here he wants to take up MY time, but he hesitates to tell me anything about himself. I hesitate to exert my time on behalf of him here because I don’t know him! Maybe I am being overly sensitive. But, yeah, we’ve never met, but he has read all about me in the newspaper.

**A:** Our suggestion: best to not watch too much “Star Trek” before astral traveling!

**Q:** Now, we have this very unique one-liner here: “Are you nuts? What level of existence are you on, anyway?” That’s from Emily Gotchnaur.

**A:** Do you feel this requires a response?

**Q:** Ark already took care of it. But I AM curious about anyone who would write such a thing and what kind of level of existence is THAT person on? What kind of person would ask that kind of question?

**A:** Someone who likes to knock down, not build up.

**Q:** This is a good one. Brad has written a couple of times. He was reading the Flight 19 session and he said: "This indicates to me that perception can manifest into a reality given proper conditions." Is his assumption going in the right direction? Can perception manifest into reality given the proper conditions?

**A:** Essentially, but it is more complex, as it involves manifestations from other realities, where the conditions do not parallel yours.

**Q:** Now he says: "If true, then an individual could manifest their reality if enough energy or focus or will could be focused to produce a result." You just said that it involves energies from other realities than our own. But, he goes on to say: "What I think is implied here is that the dominant belief will be the most often produced result. However, if ten people believe they see a UFO, but three others don't believe they see a UFO, then what is the result in this case? Do the three non-believers end up seeing UFOs because their perception that UFO's do not exist is overridden by the ten people who DO believe?"

**A:** Trying to impose conditional conceptualizations re: 3rd density awareness.

**Q:** Well, the question still is, if ten people think they see a UFO, and three don't, DO the three non-believers see a UFO?

**A:** Not valid due to rigidity of concept.

**Q:** Well, let me go on: “The prevailing or popular belief seems to override the less popular belief if I read the text of your essay correctly. That would certainly explain why disinformation and propaganda used by religious groups is so effective. I am not sure about the proper way this works according to your essay. It seems to me that, in order for an individual to buck the trend of a commonly held belief or thought, and for that person to manifest their own reality, or produce a desired result, they would have to be very strong willed, or have the ability to focus their will and intention so as to magnify its power and produce a reality which differs from that which is the common perception. It’s all rather confusing. If ten people believe that Napoleon never died, but is still alive, and two people believe he is dead, the dominant belief prevailing would have Napoleon still alive. Perhaps you could go into some detail on this at a later time. If all is illusion, as so many New Age teachings suggest, then there are no constraints as to what reality can be.”

**A:** No constraints? Then why the attempt to impose constraints?

**Q:** I think the one thing he missed in that session was the point that we were talking specifically about the Flight 19 incident where you had already said that the EM field generated by the aberrant activities of the Atlantean crystal, created an opening into what you called the Thought Plane, and as long as it remained open, this condition prevailed. But, under most circumstances, this is not the condition under which we live.

**A:** And even the EM crystal itself is transitory; in the space/time continuum it is of the “Philadelphia Experiment” mode.

**Q:** The example of the Flight 19 situation was a description of an aberrant situation, even though these aberrations can and do occur naturally or artificially, sometimes planned and sometimes random. Is that correct?

**A:** Sort of.

**Q:** But, in talking about our consensual reality. Are the conditions, say, for example, on our planet, a result of the consensus reality?

**A:** Ditto last response.

**Q:** Okay. Sort of. You say that we have these programs, and that there is this undulating matrix force field around the planet that holds these effects, and the programs in place, so to speak, but that some people CAN get out of the control and see what is real, but most people cannot.

**A:** Yes, or do not.

**Q:** So, if a critical mass of people began to SEE things, or to escape from the programming, would that effect a change for others in terms of the way they experience the reality, or would the reality that they had been choosing to experience...

**A:** Such a “critical mass” does not occur until the consensus “chooses.”

**Q:** So, the reality under which we live is essentially, even if held in place by manipulations from higher densities, and some sort of matrix control system, is CHOSEN?

**A:** Close.

**Q:** To get back to this idea about changing the reality: can an individual or group of individuals change their personal reality so that they no longer have to or are required to participate in the consensus reality?

**A:** It is possible.

**Q:** Is it, as our correspondent has said, because such people are very strong willed, or have the ability to focus their will and in-

tentions so as to magnify the power of the will, to change the reality...

**A:** Constraints constrain.

**Q:** Yes. The Matrix page on the website discusses this. So, it amounts to the fact that if a person is in THIS reality, for some reason they have CHOSEN it until they learn how to UN-choose it. (A) The question is: how often can people do it? Yes, it is possible, but can we know more?

**A:** Some truly rare types possess this talent flukishly, as it does not represent normal 3rd density domain.

**Q:** You once remarked to Ark “He who has the will of a Lion does not have the fate of a mouse.” And then you added “to paraphrase, ‘I am become One, creator of Worlds.’” I would like to understand the implication of these remarks?

**A:** The understanding of that comes from exploration, not explanation.

**Q:** I kind of figured you were going to say that! Now, I have this book entitled “Arktos.” He says something here that echoes a remark you once made. He says: “It is a very remarkable thing that enlightenment seems to have come from the North against the common prejudice that the Earth was enlightened as it was populated from South to North. The Scythians are one of the most ancient nations; the Chinese descend from them. The Atlanteans themselves, more ancient than the Egyptians, descend from them.” You said that the civilizing influence came from the North to the South. Of course, all the standard texts claim that civilization came from South to North, starting in Mesopotamia. Now, getting...

**A:** Okay, just a minute here. Thinking Mesopotamia is the beginning is like thinking that the beginning starts at the 12th chapter.

**Q:** I know that! The problem is: finding artifacts. I've been searching and digging, and I find a little bit here and there, but my God! Either nothing survived...

**A:** Artifacts have a limited shelf life!

**Q:** Exactly! The problem is that they've got specimens of humanoid types from 100 to 200 thousand years ago, and even further, but no specimens of modern man that are that old. Why is this so? Are they just looking in the wrong places?

**A:** Specimens survive by sheer luck.

**Q:** So, they are lucky that they have any specimens at all. Who knows, when they find a very ancient specimen of a modern type human, they won't believe it - it will be called an "anomaly!" There ARE artifacts that are EXTREMELY ancient, which give evidence of the presence of modern type man, and they just simply argue themselves to death over them.

**A:** Yes.

**Q:** They ignore them. But, during the time Neanderthal man was on the Earth, did he live alongside Modern man?

**A:** Yes. Except modern type man was different then.

**Q:** In what ways?

**A:** DNA and psycho/electrical frequencies.

**Q:** Does this mean that their physical appearance was different from what we consider to be modern man?

**A:** Radiance.

**Q:** What do you mean "radiance?"

**A:** You find out!

**Q:** Oh, that's interesting. Well, there are legends that the Northern people had "light" in their veins. Very ancient belief. Is this what you are referring to?

**A:** Maybe.

**Q:** Was this light related to the hemoglobin level, the iron level in the blood?

**A:** Maybe.

**Q:** Did they have a much higher iron level in their blood?

**A:** Possibly....

**Q:** Okay, part of the ancient legend of Arktos was that, in very ancient times the Earth was different because it had a vertical axial orientation. This contributed to the golden age or the Edenic condition. Is this, in fact, one of the conditions that existed in the Golden Age? **A:** Well, yes, but still some puzzle pieces needed.

**Q:** I noticed also that there are several ball-park type figures given for the precessional cycles. Apparently there is not a whole lot of agreement as to how long this cycle is, exactly. I notice that, if you divide 309,882 years by 12, you come out right in the ball park of 12 precessional cycles. Is this the reason that the zodiac was set up with twelve signs or houses?

**A:** Related, yes.

**Q:** Now, since all the recent conjecture about the precessional cycle has really gone all over the place, it is my thought that the real reason for the ancient clues about this cycle are to inform us that the length of 12 of these cycles is a GRAND Cycle, and that THIS is the big clue.

**A:** Needs some study by you.

**Q:** One of the interesting things about this Northern civilizational factor is that one of the hallmarks of the Aryan attitude is the Male dominated religion. When did the masculine religion “take over?” Was this always the tendency or leaning of the Aryan group?

**A:** Involves more than religion. Religion is the facilitator.

**Q:** Facilitator of what?

**A:** Customary psycho/social habitue.

**Q:** Customary to whom?

**A:** Those whom you refer to as Aryans.

**Q:** Where did they acquire the “habit” of a masculine oriented religion? Everybody else was worshipping the goddess in one form or another. But this male dominated theology was the distinguishing characteristic of the Northern peoples. Where did they come up with this.

**A:** Originated on home planet.

**Q:** Kantek?

**A:** For all intents and purposes.

**Q:** Was it this male dominated religion that contributed to the destruction of Kantek?

**A:** No.

**Q:** Okay, when they were on their home planet, why did they develop a masculine religion as opposed to a feminine one, considering the fact that women are the source of life, in certain terms?

**A:** In your density, masculinism/feminish is essentially a roll of “the dice.” Remember, at higher levels gender is nonexistent.

**Q:** Well, the problem I am having here is this: the masculine religion is monotheistic, essentially.

**A:** In your references.

**Q:** Was the older masculine religion polytheistic?

**A:** Going off the track.

**Q:** The Aryans always thought they were better than everybody else...

**A:** They were more advanced than the company they found themselves amongst.

**Q:** But then, as far as I can tell, the Hebrew monotheism is also derived from the Aryan, monotheistic, male dominated religion. It then “fathered” Christianity, and that has been the whole patriarchal, kill-em-all and let God sort-em-out war mongering thing under which we have lived for over 2000 years. This is the Western, European mind... it came from the Aryans, from the North; it was the so-called “civilizing” influence in nearly every respect that you can track. The cohesiveness and dominance of this type of thinking was able to civilize, but then civilization involves dominance, killing, war, territory, the Hitler scene, the whole nine yards. All of this is antithetical to all that you promote as far as being desirable. Yet, you have said that you were in contact with the Northern Peoples for millennia. Yes, Cassiopeia is a Northern Constellation, and probably figured in the early myths of these peoples in ways we cannot know, but the whole thing is that they represent all that is STS.

**A:** But so do you, so then why did we contact you?

**Q:** Well. I don't buy into that whole monotheistic, dominator, war-mongering, make everybody conform to one way of thinking head trip!

**A:** So, you think all individuals conformed then, or is it the soul that counts in the final analysis?

**Q:** Okay, obviously all individuals are different, and some did not conform then, either.

**A:** And neither do you.

**Q:** Point taken. I am just having a hard time with this. I wish you would just tell me! Who interacted with these Aryans to give them this male-dominated, monotheistic idea that they then sought to impose on every other human being on the planet - and are STILL trying!

**A:** Interactions were transdensity.

**Q:** Let me ask one final question. I am reading this book about Jack the Ripper. The author claims that the real Jack was a “mad surgeon,” which is what you suggested at one other time. This book also says that the murders were inspired by political considerations. Supposedly, the murders were designed to cover up the murder of one, specific person. It is even said that the Masons were involved, and the actual murders were symbolic Masonic statements. Is there any truth to this theory?

**A:** Maybe a little.

**Q:** The killer, as suggested by this author, was Dr. William Gull, physician to Queen Victoria. Now, this theory is so close to what you suggested, that I was sort of amazed to read this book. The refutation comes from people who say that, around the time of the Ripper murders, Dr. Gull had a stroke and was, therefore, unable to physically perform the murders, so must have had an assistant. Right after the murders ended, he retired from the practice of medicine, saying he didn’t “feel like himself.” Supposedly, he died but there are some who say he was really locked up in an asylum and a fake funeral was held. Well, the guy writ-

ing the book really did find some evidence of a cover-up, though whether or not it was THIS being covered up, I can't tell. It IS a compelling story. When this Dr. Gull had this stroke, and the supposed epileptic seizures that followed, was he, in fact, possessed? Is he even the one? Was Dr. William Gull the Ripper?

**A:** The theory is close, but the details are incorrect.

**Q:** Can you satisfy my curiosity?

**A:** Not really, not tonight.

**Q:** But I want to KNOW! Was Dr. Gull the Ripper?

**A:** Such "gall." Good Night!

END OF SESSION

## 8.6 April 15, 2000

Ark, Laura, Frank, Terry, Jan, Guest Johann M, Guest Stephanie

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Yojon.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (T) We have guests here tonight... (L) Yes, you guys have anything to say to them?

**A:** Yes, you have people here tonight! Would it not be better to just let the inquiries flow!?

**Q:** (L) Okay. I downloaded this article from the internet. It says: “For two days in May, the Solar Wind that blows constantly from the sun virtually disappeared; the most long-lasting and drastic increase ever observed. ...Dropping to a half its normal density, a fraction of its normal speed, the solar wind...”

**A:** A bit of an unusual event, yes, but the observation equipment has improved, yes?

**Q:** (T) Just because it was “observed” this time, doesn’t mean it isn’t something that hasn’t happened before.

**A:** Yes.

**Q:** (L) It says: “Because of the decrease in energetic electrons from the sun, they were able to flow to the earth in narrow beams know as ‘stroa.’ Under normal conditions, electrons from the sun are diluted and mixed and redirected in interplanetary space and by earth’s magnetic field. One of the things that happened was that earth’s magnetosphere swelled to five to six times its normal size. This was observed from satellites. There was no”bow shock” formation in the earth’s magnetosphere.

**A:** Permeation.

**Q:** (L) Is this anything like what you were talking about in terms of the expansion of the earth’s magnetic field as being a more permanent state after transition to 4th density?

**A:** Temporary glimpse.

**Q:** (L) When you described it this way, you were talking about everything “opening up.” You mentioned that if the earth’s rotation were to slow, even a minute bit, that everything “opens up” gravitationally speaking. But, this seems to be connected to solar activity, and no so much the speed of the earth.

**A:** The solar and earth activities are interconnected.

**Q:** (L) What effects may have occurred as a result of this event on May 5, 1999?

**A:** Biogenetic, related to disease pathogens.

**Q:** (L) In what sense?

**A:** Transmutation.

**Q:** (L) Did it enable disease pathogens to mutate so that they become more difficult to deal with, or did they mutate into milder forms?

**A:** Some both ways.

**Q:** (L) Is that the main event that occurred during this solar wind lapse?

**A:** For now, it was so brief.

**Q:** (L) Can you tell us what was the cause of this disappearance of the solar wind?

**A:** Rotating cyclical wave of cosmic energies.

**Q:** (L) What was the source of this wave?

**A:** Deep space “winds,” relating to clusters of antimatter particles. Particulate, as in a mirror reflection of matter.

**Q:** (L) So, that is the source of this wave. Is this going to happen more frequently in the future, or is this just a fluke?

**A:** You shall know.

**Q:** (L) Well, that’s what I’m asking you!

**A:** And we refrain!

**Q:** (A) I think that the answer is in the earlier question; that this is a standard thing, but with the improvement in observational

equipment, it was noticed. It is rotating cyclically, so yes, it happens again and again. We don't know how often...

**A:** And there are cycles within cycles.

**Q:** (L) This is something I have always wanted to get into a session, but I keep forgetting it. So, I wrote it down so I wouldn't forget. What is a "Merkabah?" All these New Age types are talking about it all over the place, and I just want to know if the standard interpretation is anything close to the reality. What is a Merkabah?

**A:** A creative creation.

**Q:** (L) Are you saying...

**A:** As were...

**Q:** (L) You didn't let me finish my question!

**A:** We heard it in you.

**Q:** (L) Well, just to get the question on the record, it was are all these people making all this stuff up about what the Merkabah is?

**A:** But then again, what is made up and why? It is not so simple!

**Q:** (L) In ancient literature, something called a Merkabah is talked about, but the definition of this extremely mysterious thing has been lost down through the centuries. There have been many "explanations" from such sources as the Midrash - Jewish commentaries - but there is even argument there. It seems that, even then, nobody knew what it was. But now, we have all these New Age folks coming along who have decided that they know what it is, and it is variously described as rotating double tetrahedrons...

**A:** If no one knows what it is, that is as good as any other explanation.

**Q:** (L) I want to know what the ancients who wrote about it meant? What is the definition of the word as the ancient writers used it?

**A:** The original definition predates this.

**Q:** (L) What is the original definition that predated the ancient writings that we have access to?

**A:** What do you think?

**Q:** (L) What? Well, it's a curious word because it is composed of two words or even three: mer kaba or mer ka ba. If we think of it as three part word, we have the Egyptian Ka, which is like the astral body, and the Ba which is similar to the Ka. I guess you could think of them as the astral body and the genetic body. Then there is the Ab which is the sort of principle element of the life in man - like the part that is of God or the soul. The Ab was represented as a red stone. It was the part of the man that expressed desire, lust, courage, wisdom, feeling, sense and intelligence. So, all of them together sort of expresses an abstract creative principle Kaaba is Arabic for cube, and it is the square stone building in which the Black Stone is housed in Mecca. It was supposed to have been built by Ishmael and Abraham. So with Mer, Ka, Ab, and Ba, we have a cube made up of the principle parts of the etheric self, and housing a stone. Soul stone? Mother stone?

**A:** By god, she's got it!

**Q:** (L) Okay, we've got the soul or mother stone. Or the mother of all stones. Now that we have a definition, what was it?

**A:** The Matriarch Stone.

**Q:** (L) Is the Matriarch Stone the one in Mecca?

**A:** Symbolism reigns supreme here.

**Q:** (T) Is this also the Philosopher's Stone?

**A:** "Stone" to those you perceive as ancients symbolized communication from "a higher source."

**Q:** (L) What is it about a stone that made the ancients associate it with communication?

**A:** Radio waves.

**Q:** (L) How did radio waves interact with the stone? Were they recorded by the stone; transmitted by the stone?

**A:** Transmission.

**Q:** (T) Crystals are stones. Crystals are used for radio transmissions.

**A:** Yes.

**Q:** (L) And it was said before that Stonehenge was a giant transmitter and receiver. The original purpose of Stonehenge was to receive communication and to send communication. It wasn't all that Druid Hoodoo stuff that people talk about nowadays. It was a machine, so to speak. (Johan) Could it be that people who come in contact with a stone in one place, and then they go to another place and come in contact with another stone, transfer something from one stone to another?

**A:** Well, one strengthens their abilities due to awareness channel grooving.

**Q:** (L) What gets strengthened from contact with the stones?

**A:** Your abilities.

**Q:** (L) When they are talking about this Mother Stone, are they talking about something similar to the Atlantean crystals that

gathered, dispersed and/or transduced energy?

**A:** It is more symbolic. But you are on the right track.

**Q:** (L) So, in talking about Merkabah, we are not talking about spinning tetrahedrons that enable you to ascend or generate some kind of “astral vehicle.” They are saying that visualizing yourself inside of one of these enables you to ascend, or something.

**A:** If you do that, it may help, though.

**Q:** (L) It may help what?

**A:** We are going around in circles here. You should use your own abilities to complete the answers to some of these. But, then again, it is one form of “spinning,” is it not?

**Q:** (T) Everything we have been doing here is all about gaining knowledge and increasing frequency in order to transit from 3rd to 4th density. In ancient times, they would have had to do the same things. But, there may not have been as many experiences available. In order to get experiences, they may have had to travel. So, by going to the stones, they might have increased their frequencies to transit from 3rd to 4th density.

(L) Or they used them as a direct machine or device to do it. Archaeologists say that the people who erected the megaliths were barbarians. They are defined as barbarians because they didn't build cities, they didn't have the wheel, they didn't have organized agriculture, and they left no written records. Those are the defined elements of civilization. Yet, this group of people, whoever they were, did things that we cannot duplicate today, and they did it all over the globe. The groups who came along after them who DID have all the hallmarks of what we call civilization, also could not erect these gargantuan stones.

I thought about this for a long time. Archaeologists say they must have erected them as monuments to their gods, or heroes or whatever. Some of them think they were calendars to tell them when to plant the corn. Well, I think that is stretching it a bit. If you can't cross off the days on the wall and look outside and see that it is time to plant the corn, you're in pretty sad shape. You hardly need to haul stones as big as buildings across hills and valleys to set them up in special places to tell you to do that!

The psychology of the human being cannot have changed all that much over the many thousands of years from then to now, and it is true that people do not do anything without a powerful motivation; what I call the "payoff." What could be the payoff to haul these things around on greased logs as they are depicted? To create a monument or to bury their kings? To get naked and dance in the moonlight?

(A) Like they had a lot of time to do this while struggling to live the barbarian existence, too!

(L) Yeah. They are supposed to be howling savages who must constantly hunt to get food, yet they are spending all their time, occupying all their strongest men, to push rocks around! Meanwhile, according to the archaeologists and paleontologists, these folks only live to about 40 years at max!

(T) They got a lot of mileage out of those 40 years!

(L) Exactly! But, we are supposed to be thinking about the things they didn't have: cities, wheels, agriculture, and writing.

(F) Maybe they didn't need it.

(L) And why would that be? Because the stones did it all!

(T) Maybe they were 4th density STO beings who planted all those

stones all over the place.

(L) Well, if you think about a group of people who are setting up these massive stones like they were pieces of styrofoam. The stones collect energy and information. They then transduce the energy or amplify it. These people know things about movement, dances or spinning or something, that enables them to behave in concert with the stones so that they all become part of a grand machine that does things! All of the legends talk about stylized dances and the oldest things about Stonehenge say that it was the Temple of Apollo and that Apollo danced there all night at certain periods of time. Every 19 years, I believe. When you think about that, and the other places Apollo appeared, the inversions and redactions of the legends, and we come to these magical stones that produce things. Then we come to the head of Bran the Blessed which supposedly produced endless supplies of bread and fish or whatever else was desired. Bran's head was the giver of all good things. But more than that, it was an oracle. It could speak. And here we have the idea of a similar function for Stonehenge: both an oracle as well as a giver of blessings and bounty. Anything you wanted or needed it provided for you. If you wanted to go somewhere, it transported you as in the legends of the flying carpets. It was magic transportation. All of these things are associated, when you track them back far enough, with a stone. The stones did everything.

(Johan) And it is funny that stones come up. What I have been doing for the past 10 or 15 years is running around the globe collecting stones. I've been to some of the most ancient places on earth, and I go from one to the other. And from each one, I've collected stones. Plus, Apollo: on Crete, there was an oracle of Apollo on Tara...

(L) And there was Tara in Ireland...

(Johan) I wouldn't be surprised if Tara meant stone too! How is all this connected?

(L) Exactly. This is what I have always thought about these megaliths. They DID things. All of the things we think are the "signs" of civilization were done by the stones. Maybe Terry is right; these people were at some level of density where they could make this work. At some point, something happened, the ability was lost, and then people had to build cities, engage in agriculture, invent the wheel, and develop writing - because they could no longer do it the "easy" way.

(Johan) In talking about stones, would the mother of all stones be the navel of the earth; is that the same as Ayers rock? It's the largest stone on earth and they call it the navel of the earth.

(L) Does Ayers rock have anything to do with this?

**A:** No. Stones were once utilized to provide for all needs, as the energies transmitted connected directly with the pituitary gland to connect spiritual realities with the material realms of 3rd and 4th densities. So you see, the "stone" was viewed as Matriarchal indeed!

**Q:** (L) Were the beings involved in this type of activity 3rd density, 4th density or bi-density?

**A:** Originally 4th when home was in other locators.

**Q:** (L) Could it be said that the pituitary gland itself is the body's own "mother stone?"

**A:** If you prefer. We suggest a new path now.

**Q:** (L) Steph has a personal question that she says she will make short. Is that okay?

**A:** Oh, sure.

**Q:** (S) What can I do to help my skin clear up?

**A:** Emotional state is still in flux. Underlying conflict. Unresolved issues. Okay? Is that it? We suspect not!

**Q:** (S) What is the conflict?

**A:** You know this.

**Q:** (Johan) What was it that I found on the beach on Magnetic Island in 1985?

**A:** Looking for meaning? Start at the centre.

**Q:** (Johan) Center of Australia? Center of what?

**A:** You have been to the “centre.”

**Q:** (Johan) I am not too sure that this means a physical place. For me, what I found was the center of knowledge. It started at Magnetic Island, and took 12 years for me to realize what it meant. For me it was the grail, or the representation of the grail.

**A:** You have the stem, now wait for the flower to “bloom.”

**Q:** (Johan) And now I am going to be back in the same place! Is the flower going to bloom where I found the stem?

**A:** The locator is not so important as the located.

**Q:** (L) Where you find it is not so important as what you found.  
(Johan) Yes, that’s true. I don’t know what your story is with the Holy Grail, but for me, it took me twelve years to understand what I found which was my interpretation of what the Grail was - it represented it. That’s interesting with the bloom...

**A:** We thrive on clues and so do you!

**Q:** (L) I want to help Stephanie with her problem.

**A:** Why bother, she is cloaking. She does not yet feel comfortable in sharing some things.

**Q:** (S) I wish they would give me the clues to which issue it is!

**A:** You know this, dear!

**Q:** (L) I want to go in a slightly different direction. Earlier we were discussing the translating of the material on the website into other languages. In terms of doing such a thing and getting the information out, could you suggest a way to do this without getting organizational. We all know that when you start forming organizations, you lose your focus. Yet, we know that everyone who participates in such a work needs to have their needs considered. Can you point us in the right direction?

**A:** There are translation programs available. The latest ones require much less editing.

**Q:** (L) So, the real problem is just simple distribution?

**A:** Close.

**Q:** (J) Don't people have the ability to translate websites on the spot? (T) Not all search engines do that. (J) You might want to expand your keywords into other languages. That will help people to find the material.

**A:** Okay, you have your answers.

**Q:** (Johan) The question I had was what would be the best way to bring the information to as many people as possible without going into an organization? That's probably not a precise enough question.

**A:** You are correct; not precise enough.

**Q:** (Johan) Sharing information is something I have been involved with for many years...

**A:** But this process is expanding naturally anyway due to the exponential growth in your technology. And this, by the way, is an integral component in the eventual transition to 4th density. Not because of the technology, but the explosion of the knowledge base it is/will facilitate.

**Q:** (J) What exactly is the function of the pituitary gland in your references to Stonehenge?

**A:** This gland is your uplink.

**Q:** (L) Is it possible that the pituitary can be stimulated by external sources such as radio waves, waves from a supernova, or other frequencies in the environment?

**A:** Yes and experiments have ensued.

**Q:** (L) Would it be beneficial for us to experiment with such things?

**A:** Not wise. You could fry yourself in your zeal.

**Q:** (J) Are you guys actually channelling through your pituitary via radio waves?

**A:** This channeling process is comprehensive. Spiritual/psychic/physical.

**Q:** (L) I guess we aren't supposed to do any experimentation with it though.

**A:** You can experiment, but not technologically.

**Q:** (L) Johan has some black mirrors. Would it be advantageous to trade my standard mirror for a black mirror?

**A:** Not necessary. Just need to utilize light correctly.

**Q:** (L) Now, let me demonstrate. When I use the psychomantium, I arrange things this way... [demonstrates]. I have tried it with this little lamp, and with candles on the floor under the angle

of the mirror. I can't see the light, but the illumination is there. Now, which of these two light sources is best?

**A:** Candles. But place properly.

**Q:** (L) Okay, if I am here, and the mirror is there, where should I place them and how many?

**A:** 5 and behind and above.

**Q:** (L) So, I need them behind me?

**A:** Yes.

**Q:** (L) How high above me?

**A:** Just above.

**Q:** (L) So, I have to have a stand or a tall candleabra. What angle should the mirror be tilted?

**A:** 12 degrees.

**Q:** (L) Five candles are a lot of candles. And I'm supposed to look up and to the left.

**A:** The flicker is a key here.

**Q:** (L) Do you have any remarks about this solar maximum associated with the eruption of the Japanese volcano and the mass suicide of that cult over in Africa?

**A:** No.

**Q:** (L) I didn't think so. Just the cycle of things. A lot of people are writing to me about dreams lately. They seem to be having a lot of dreams about beings in the sky, entering our reality. All kinds of strange things.

**A:** Beings come and go at will always, it is the awareness that is expanding.

**Q:** (L) Another trend of the dreams is being pursued, attacked, split up from their families, being put in concentration camps - just all kinds of things.

**A:** All are possible futures, just wait and see. There is an alien race that has plans to replace your physical vehicles with a new “model.”

**Q:** (L) What are they going to do with the old models?

**A:** “Retire them.”

**Q:** (T) Which race is this?

**A:** Orion STS.

**Q:** (L) Is this essentially what happened with Neanderthal?

**A:** Yup!

**Q:** (L) Well, for a period of time it seems that they continued to exist on the planet alongside the new model, cro-magnon or whatever.

**A:** Some did.

**Q:** (L) For how long did Neanderthal exist side by side with the “new model?”

**A:** 233 years.

**Q:** (L) I thought that Neanderthal was here for a long, long, long time; and if modern man arrived on the planet, as you say, 70 to 80 thousand years ago, wasn't Neanderthal already here then?

**A:** Time references have been miscalculated.

**Q:** (L) Who miscalculated the time references?

**A:** Science.

**Q:** (L) What is the oldest Neanderthal that's been found? Anybody know? No, well then when did Neanderthal appear on the planet?

**A:** 5.3 million years ago.

**Q:** (L) You are saying that when science says that modern man appeared 35 to 40 thousand years ago, and Neanderthal disappeared at the same time, the real time frame was 70 to 80 thousand years ago? In other words, a factor of 2 error.

**A:** Close.

**Q:** (L) And, of course, we can't depend on any of the dating methods because of metamorphosis.

**A:** And genetic manipulation.

**Q:** (L) So, in effect, we ARE the new Neanderthals on the eve of extinction. You have said that those who transition into 4th density in the body will go through some kind of rejuvenation process or body regeneration or something. Does that mean that these present "Neanderthal" type bodies that we presently occupy will morph into something more in line with the new model? Is it genetically encoded into some of them to do so?

**A:** Something like that.

**Q:** (L) So, that's why they have been following certain bloodlines for generation after generation; they are tinkering with the DNA and arming genetic time-bombs that are waiting to go off. (A) What is interesting is how do those who are trying to get these people, to abduct them, how do they spot them? How do they get the information? By following the bloodline, or by some kind of monitor you can detect from a long distance - and they can note that "here is somebody of interest" or "here is somebody dangerous" or "let's abduct this one" or whatever. How do they select?

Do they search the genealogies or is it some kind of remote sensing?

**A:** Now this is interesting Arkadiusz, as it involves the atomic “signature” of the cellular structure of the individual. In concert with this is the etheric body reading and the frequency resonance vibration. All these are interconnected, and can be read from a distance using remote viewing technology/methodology.

**Q:** (L) Can it be done in a pure mechanical way without using psychic means?

**A:** At another level of understanding, the two are blended into one.

**Q:** (T) Computerized psychic remote viewing, maybe. Like artificial intelligence. Maybe a mind connected to a computer?

**A:** That is close, yes.

**Q:** (T) Which we are not capable of yet - that we know of, anyway. (J) I'll bet the Russians are. (L) Why?

**A:** Work? Yes. Succeed? Not much.

**Q:** (L) Off to the side, in examining the map along this line where you had us looking, from Novosibirsk to Urkutsk, I discovered that there is a range of mountains there called “Sayan” or “Sayany.” Is this the original Mount Zion and is this the area where there is a secret lab or something?

**A:** Yes, but not Mount Zion.

**Q:** (L) What was the original Mount Zion?

**A:** Sinai.

**Q:** (L) What is in these mountains between Novosibirsk and Urkutsk?

**A:** Magnetism lab.

**Q:** (L) What stone was Nicholas Roerich returning to a temple when he made his trek into Siberia?

**A:** Stone was diamond from Persia.

**Q:** (L) What kind of UFO was it that he sighted at the time that he made the dedication of this temple; considering also that this was on the direct line of Tunguska?

**A:** UFO was a probe.

**Q:** (L) Was it there because they were there, or was it unrelated?

**A:** Related.

**Q:** (L) What was the significance of this diamond?

**A:** Energized.

**Q:** (L) By what?

**A:** Not by: for.

**Q:** (L) Energized for what?

**A:** Link.

**Q:** (L) Link to what?

**A:** Your move.

**Q:** (T) For the wave?

**A:** No, Terry, we are reminding Laura that this is not 20 questions.

**Q:** (T) Is this magnetism lab related to the one in Tallahassee? (L) I don't think so. I mean, it's so secret that even we can know about it yet! (T) There's one in Tallahassee - a high energy magnetism lab...

**A:** Different orientation.

**Q:** (L) It's my feeling or conjecture that this one we have been led to investigate, and I do mean led, is that it's a center of activity where the matrix is generated and maintained. I think it is also connected to ancient things simply by virtue of the timeless nature of time. (S) Do they generate "time" there? (L) Possibly.

**A:** Not "just Russians."

**Q:** (L) It's not just Russians. I think it is the center of the Consortium web - their home base. It is out in the middle of nowhere that there is nowhere near!

**A:** Good night.

END OF SESSION

## **8.7 May 27, 2000**

Ark, Laura, Frank, Barry T., Stephanie

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Olonnagia.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** I guess the first question on everybody's mind tonight is RAIN! We need rain. Now, a) can you tell us if rain is coming soon? or b) is there something we can do to bring rain?

**A:** There is an atmospheric inversion which has been unusually stubborn over your locator, yes. But, the extensive low level heat will soon “punch” holes in this oppressive high pressure system, thus allowing rising air to combine with low level moisture rising to produce the much anticipated precipitation.

**Q:** (A) What does “soon” mean? Maybe two days or two hundred days. (laughter) Can we have some limit?

**A:** We give you 10 days, as you measure time, for significant relief. Ask the one sitting with you if he has had a preview?

**Q:** (L to B) Have you had a preview? (B) Of rain? Just a dream that I posted a long time ago. (L) What was the dream? (B) That everything turned into a swamp. That’s when I rescued the elephants. (L) Yeah, I remember that. Bizarre dream.

**A:** You have also had precipitation.

**Q:** (L) Ark and I both had flood dreams on the same night a couple of nights ago.

**A:** Barry locator go back 11 days.

**Q:** (B) I had just gotten back from California. (L) Last night I really thought I heard rain blowing against the house. It was either that or Sylvia’s radionics were chasing demons away from the area! Did I hear rain?

**A:** No.

**Q:** (L) What did I hear?

**A:** Leaves.

**Q:** (L) Well, there was wind blowing something! Now, we have a person on our mail list who writes: “I tell you what else I was told,” and she does not indicate the source. In parentheses she says “the Cassiopaeans are not the only ones passing this

material.” What she was told was: “When we are in 4th density it will be a world like the present only wild and unspoiled. All life forms will have evolved to a higher state of intelligence and/or natural abilities. The predators will be more efficient! There will be much communication between humans and animals. A horse, for example, will choose its rider rather than the other way around. Maybe I will finally get to ride the horse of my dreams. In other words, not a paradise, but a kind of primeval world, dangerous in many respects. We ourselves will have grown more alert in response to our surroundings, and the temperature will be comparable to southern California coastal climate; Club Med in 4th density.” Now, this is apparently what this individual was told about 4th density, and I thought it was an interesting description. I would like to know how accurate it is?

**A:** The thing to remember is that descriptions of this type are difficult to reconcile, as the receiver is forced to view them from a 3rd density perspective. It is the old “apples and oranges” thing, ya know!

**Q:** (L) Well, in its essential nature, perceiving is apprehension of an energy construct that presents itself in symbols. So, in this respect, is the above description a symbolic representation of the energy of 4th density? (B) But, 4th density is the realm of the ultimate in wishful thinking. Maybe that comes into play here? (S) I would like to know what elements are like in 4th density.

**A:** We suggest you reign in anticipation.

**Q:** (L) In other words, stop “wishful thinking.” I’m not anticipating anything. But, the remarks were made, and it sounds nifty, so that is the only reason I was asking. Do you have anything else to say in response to that?

**A:** We are not just communicating with you.

**Q:** (S) That must be in response to my question about elements.

**A:** No.

**Q:** (L) Do you mean that the response you gave was for the others, including the one who was making the comments, not just me?

**A:** Yes.

**Q:** (L) Now, Stephanie wants to know about the elements: air, earth, fire and water, in 4th density?

**A:** Again, descriptions do not compute for you. We have attempted to explore this avenue already, but it was more for symbolic purposes. Literal definitions restrict.

**Q:** (L) Well, Barry had some interesting ideas about the progression of densities, so maybe this is the point to bring them up.

**A:** Let Barry roll!

**Q:** (B) While reading “Wave 6” on the website, there was a section in there that was trying to compare awareness of 2nd density to 3rd density in order to create a framework in which to conjecture about the awareness of 4th density. It was stated there that we recognize objects by their similarity, and that 2nd density recognizes objects by their difference. Making a progression, does that mean that on 4th density, we would recognize the commonality of all objects, therefore allowing an aware manipulation of things in 3rd density? Also, if animals see in two dimensions, and sense the third as transience or movement, such as we sense time, then maybe in 4th density we would sense time as a 4th dimensional measurement. For 2nd density, the third dimension is the illusion factor, and for 3rd density it is also an illusion, but we are aware of the illusion and therefore interpolate it into the reality. So, on 4th density, would time become concrete, and therefore manipulatable because it is no longer an illusion?

**A:** Quite close. Now, pay attention! What if: one on 2nd density perceives objects due to their similarity. One on 3rd density perceives objects due to their difference, and one on 4th density perceives objects in terms of their own union with all of them?

**Q:** (B) In terms of their own union with all of them? I kind of thought that would be the NEXT step up.

**A:** No.

**Q:** (B) So, 4th density, instead of being an incremental step, is a GIANT step? (L) Yup. I guess the steps follow some sort of mathematical square progression rather than simply numerical. (B) Well, that would have to be true because if you consider the difference between 1st density and 2nd density, that's a MEGA jump! (A) I have a problem with this sentence. It says: "one on 4th density perceives objects in terms of their own union with all of them?" Who is in union with the objects?

**A:** Perceiver.

**Q:** (L) Yes. It's like the perception when one is out of the body, so to speak. My own experience with this was truly interesting. Whenever I thought of something, I was instantly perceiving it not only by "seeing" it from the outside, but I was "inside" it also. It was like thinking about it, put me inside it. I became part of it. If I thought about a sphere, I was not seeing a ball "over there." I was "in union" with it. I can't say I was "inside" it, because that implies "inside" as opposed to "outside." There was none of that sort of thing. It's a perception all the way through at once. Is this what we are talking about here?

**A:** Part of it.

**Q:** (L) Okay. We want to cover a couple of other things tonight. Now, I am dying of curiosity about this one. I want to know what

...

**A:** You are not yet dying!

**Q:** (B) You should have seen that coming! (L) Yeah. But you know what I mean!

**A:** Yes, but we like to have fun with you!

**Q:** (L) Don't play with me on this one! I want to know what is the cause of the so-called "cart tracks" on the island of Malta?

**A:** Grooves.

**Q:** (L) Well, I KNOW that! But they are grooved in such a way that they cannot possibly be cart ruts, as they are called. I just recently purchased a book about the archeology of Malta which talks on and on about the temples and so forth, and then, on the very last page, devotes a single paragraph to the "cart ruts." This book says:

"The enigmatic cart ruts are too obvious in the Maltese rocky landscape to be ignored in any work, however concise, on Maltese archeology even though they are still not easy to locate in the chronological sequence. according to the traditional view, they should be placed in prehistory, more precisely in the Bronze Age, the main argument being that some specimens are cut by "Punic" tombs and, therefore, should be prior to that period. The validity of this argument is, in my view, highly questionable particularly since for Temi Zammit, its originator, 'Punic' could mean anything from the 7th century BC to the 3rd century AD, especially as far as tombs are concerned. In my search and study of ancient quarries over the last fifteen years, I found cart ruts very frequently, almost invariably, associated with them. The best example is, perhaps, the Buskett group which lies next to the largest and most important of Malta's ancient quarries. For this reason I cannot refrain from believing that they were intended for the transportation of construction blocks from the quarry face

to the road in ancient (i.e., not prehistoric) times. This view is supported by a good number of parallels abroad (for instance in Sicily, southern France and Greece) as well as by their concentration in several areas around Melite which must have required a constant supply of ashlar masonry for its buildings. ”

There is a single picture of the ruts in this book. In the 1975 *Lexikon der Archaeologie* (30), the entry under Malta reads:

“More emigrants from Sicily came to the island around 3200 BC. An astonishing number of megalithic temples were constructed between 2800-1900 BC. The still extant temples, some thirty in number, exhibit a highly developed plan and superstructure ...This population possibly followed warlike immigrants from western Greece... The strange ‘cart-ruts’ belong to the same period.” Now, the problem with this cart rut theory is the following: When you look at these furrows impressed in the ground, most of them parallel as they should be, the natural thing is to think of them as ruts. But, apparently, close examination shows that they CANNOT have been ruts in the ordinary sense of the word. The reason is that the tracks of the two parallel furrows are not only DIFFERENT FROM RUT TO RUT! but also vary in the course of a single stretch! They run through valleys, over hills, and sometimes exist in several “pairs” side by side which then unite into single two track stretches, followed by sudden curves. They also run off straight into the Mediterranean. Others end abruptly at cliff edges. They are from 65 to 123 cm wide. The furrows themselves are frequently over 70 cm DEEP! At one place, on rut runs in a curve over a hill and cuts 72 cm into the limestone ground. If a cart ever ran in these ruts, it could not have taken a curve because of the great depth of the ruts! Either the axle would have vanished in the deep imprint or the axle must have been at least 72 cm high which would have given the wheel a diameter of 1.5 cm. But that presents the problem that

such a large wheel could NOT have taken such a tight curve! It would get stuck or break. Such wheels that would be necessary to navigate the depth of the ruts could not have maneuvered in the narrowness of them which is approximately 6 cm. Since every single-axle cart has two wheels which must run absolutely parallel in the furrows, we are faced with an impossibility. Even a double axled cart would not work because when taking a curve, the rear wheels have to trace a narrower track than the front wheels which is why large trucks have to make a wide swing to take a tight curve. At another point on the island, four pairs of ruts join together into one rut. They all have different “gauges” a prior to this union. Nearby, there is a rut that crosses another, but they are of different depths. Another rut is up to 60 cm deep, and has a width of 11 cm at the deepest point, and 20 cm at the highest. As noted, in many places, the ruts run straight into the waters of the Mediterranean.

It was assumed until recently that the ruts would end underwater a few meters from the coast, which would suggest that they had originated when the sea level of the Mediterranean was lower. However, divers have discovered that the ruts continue in the stone to great depths below sea level. Now, recently, a German real estate investor who was also a part-time archeologist, claimed to have identified a megaliths temple similar to Mnajdra on the sea-bed in Malta’s territorial waters. Supposedly, the discovery was made by two Maltese divers who noted the structure during a dive on the 13th of July in 1999. They took photographs. This was some 3 KM off the eastern coast of Malta. If this discovery were “authenticated,” it would overturn existing history as we know it! In order for a temple to lie on the bed of the Mediterranean sea, it would have to date to the last ice age. The implication would then be that the Maltese temples are at least 6,000 years older than previously thought.

Following this announcement, which really set the archeologists on their ears, there was a report printed in the “Malta Independent” on Sunday, November 7th, 1999 which said: “The initial caution and scepticism with which the news was received by local archaeologists would now appear to be vindicated. After an on-site dive carried out by the Museums Department last Friday, a spokesman for the Department expressed serious doubts that the underwater structures in question have any archaeological importance at all, let alone constitute a complete prehistoric temple, as suggested by amateur German archaeologist Dr. Huber Zeitlmair, who took credit for the discovery. An official press statement to this effect is expected to be released shortly.

The structures which elicited such widespread interest and even excitement were first filmed by local divers Shaun and Kurt Arigo on an underwater plateau some three kilometres east of Malta. At its deepest point the plateau is over 25 metres below sea level; at its shallowest, about seven metres. Strewn about the area are several large rectangular stones which give the impression of fallen menhirs. Beyond, there are a number of what appear to be kidney-shaped chambers, bearing some resemblance to the apses of above ground temples such as Mnajdra and Hagar Qim.

“For Dr. Zeitlmair, video footage was evidence enough to publicly assert that the structures represent a complete megalithic complex, constructed at a time when the plateau would have been above sea level. the fact that it is now underwater could be due to the melting o the polar ice caps during the last ice age, which would mean that the structures were inundated between 8,000 and 10,000 BC.

“The implications are, to say the least, dramatic. Sadly, though, his interpretation has not stood up to preliminary investigations, and it now appears that what we are dealing with is most likely

a natural phenomenon. Meanwhile, contacted independently of the Museums Department, Professor Anthony Bonanno of the Department of Classics and Archaeology at the University of Malta, described the possibility of an underwater temple as "extremely improbable."

"The fact that Dr. Zeitlmair is part of a society of 'Palaeoastronauts' automatically puts me on my guard", he says. As for the theory of an antediluvian temple culture, Prof. Bonanno dismisses it out of hand.

"Our existing temples have been very reliably carbon-dated to the period 3,600 to 2,500 BC. In that space of time we have traced a regular evolution in style, from the small and rudimentary to the large and complex." The good professor then goes on to suggest that, if the ruins ARE validated, the only way they could possibly have gotten where they are is if they were contemporary to the ruins on the island, and were on an adjacent part of the island that "sank because of a fault in the rock."

So, what it amounts to is another discovery is being co-opted by the authorities who immediately pooh pooh it, cover it up, explain it away with their circular cerebral gymnastics.

The bottom line is: I want to know what was the cause of these crazy cart ruts that cannot have been cart ruts! They cannot possibly be cart ruts!

**A:** Energy grooves.

**Q:** (L) What kind of energy?

**A:** Something like short circuit at time of disturbance in magnetic field of planet.

**Q:** (L) Was there something inlaid there that conducted this energy? I mean, did this rock melt like this because it had lines of

conductors laid into the ground?

**A:** Crystal generators were once used to collect and redistribute cosmic and terran energy fields.

**Q:** (L) How long ago were these ruts or grooves formed?

**A:** 14019 years ago as you measure it.

**Q:** (L) Was this before the temple structures were built on Malta?

**A:** Yes. Survivors built those.

**Q:** (L) These ruts are certainly in the way. They are a definite hazard to walking. Maybe they filled them in with dirt that later washed away.

**A:** Magnetic disturbance, human cause.

**Q:** (L) What do you mean by that? Are you saying that the magnetic disturbance was caused by humans, or that the magnetic disturbance contributed to the cause of the ruts, and that the ruts were caused by humans, in such case, how did they cause the ruts in relation to the magnetic disturbance?

**A:** No. Calamities caused magnetic disturbances. Picture a short circuit in the global crystal power grid.

**Q:** (L) So, in other words, a global crystal power grid short circuited due to magnetic disturbances, and these human constructed grid lines all over the planet - I'm sure they must have existed in other places if that is the case - did it just melt the rock?

**A:** Maltese condition is somewhat unique from a preservational standpoint.

**Q:** (L) Again, did the rock just melt along these laid out grid lines?

**A:** More like atomic changes structurally.

**Q:** (A) I don't understand if they were built or were they natural lines of conduction? Was this power grid artificial or natural?

**A:** An artificial utilization of natural energy fields.

**Q:** (L) Well, archaeologists like to explain them as cart ruts. But to dig such ruts 72 cm deep would take a VERY long time. And there is no consistent size or depth or direction, so that they are completely unexplainable as cart ruts. Yes, there ARE places where you see real cart ruts. In ancient Rome, they placed stones in the streets for pedestrians to walk across because the streets were often muddy or full of waste or water. But the stones were placed at specific intervals to accommodate a standard axle width. Here, there is NO standard! There is not standard axle width, there is no standard depth, there is no standard anything. Another explanation offered was that the Maltese were "dragging" things with something like the Native American travois deal. Get real! 72 cm deep in solid rock?! That's a LOT of dragging ! Another explanation was that the ruts were used to contain rolling balls on which things were slid along the ground. Only problem is that there is no consistent width of individual ruts, and many of them are incised as "V's" in the rock, not rounded as would be thought if balls were being used. None of the explanations make any sense. But, let's move on.

Next question: This was something that was bugging me, and somebody sent an e-mail asking the same question, so I thought I would toss it in here. What is the origin of the Finns. They are quite different from their neighbors, and something of a puzzle.

**A:** Tribal split in transit.

**Q:** (L) What tribe?

**A:** In other words, "you take the high road and I'll take the low road..."

**Q:** (L) Are they split off from the Hungarians? Were the Hungarians and the Finns originally the same tribe?

**A:** Yes.

**Q:** (L) And what is the origin of the Hungarians and Finns before they split?

**A:** Carpathian zone.

**Q:** (L) Now, you have them in a locator, what is the origin of their genotype since they sort of stand out alone?

**A:** What do you propose?

**Q:** (L) I guess that they were another experimental creation. A genetic “tweak,” so to speak.

**A:** Works for us. [Laughter.]

**Q:** (L) Okay, that takes care of my short questions. Now, we have a problem here with Roswell. I just finished reading Kal Korff’s book “Roswell: What they don’t want you to know,” and it is pretty much a bashing expose of lies and confusions spread, supposedly, by the many witnesses who have come forward over the years. He takes Jesse Marcel apart, he takes the fireman’s daughter’s story apart; he rips the undertaker’s story to pieces; he takes Phil Corso’s story apart; you name it, he bashes it to bits. Pretty effectively, too, in my opinion. He seems to have located the origin of the “little sticks” with hieroglyphics on them” seen by several of the so-called witnesses. This is a SERIOUS problem with this whole story. The problem is that, despite the fact that all the stories have been dissected by this guy so effectively, there ARE things he cannot account for, and explanations that he makes that simply don’t fit his thesis.

On the one hand, he claims that the Roswell base people instituted a cover up of a top secret balloon project, and on the other

hand, he says that the Roswell base did not KNOW about the top secret balloon project because it was so secret! That is completely irreconcilable.

Then he quotes a general's written statement that something WAS going on that had something to do with alien interactions, and dismisses this signed statement as "hearsay."

The thing that occurs to me is that

a) either we have somebody going back and forth in time, tweaking the facts, such as Marcel's military records and such things including any records of the nurse that the undertaker claims to have talked to, or

b) we have something that did happen and either they went back in time to set a situation up so that people would start remembering something OTHER than what happened, so as to cover up the real event with more or less "false memories" that could be not stand scrutiny; or

c) they are just feeding disinformation through all of these people, and have produced a whole scenario with all kinds of witnesses and weird stuff to cover up something that happened. Could you comment on this. You have already said that the actual crash did not occur at Roswell, that it occurred on the Plains of San Augustin...

**A:** Try scenario 3.

**Q:** (L) So, they are feeding disinformation through all the so-called "Roswell witnesses."

**A:** Close.

**Q:** (L) To cover up something that really did happen?

**A:** Yes.

**Q:** (L) And they are feeding the disinformation through the people so that they will come out with this whole story, make all this big splash, so that it can THEN be proven false, so that everybody will think that the whole thing was a crock of kablooey. Is that it?

**A:** Not quite. Confusing stories and fabrications are used to muddy the waters in anticipation of future disclosures. And beware of authors who cast one stone and hit multiple targets. As with any conspiratorial mystery, keep focused on the earliest entries in the evidentiary train, i.e. “RAAF recovers flying disk in Roswell region.”

**Q:** (L) Oh, the newspaper headlines. Yes. Hmmm... Terry was saying that he thought the Roswell business was a cover-up for space-time travel by some secret U.S. group.

**A:** No.

**Q:** (L) So, the other information you have already given on Roswell still stands. Is there any other comments you want to add to this information at this time?

**A:** Roswell did involve evidence of non-human intelligence.

**Q:** (L) I just can't understand some things. When these researchers get out there and they start digging into things, and this happens over and over again, they don't dig deep enough...

**A:** Kennedy was assassinated by every one... according to the myriad researchers, so called.

**Q:** (L) So true. You read one “carefully researched” book, and there is one candidate for the assassin. You read another “carefully researched” book and there is another candidate. By the time you get done reading all the books, everybody in the country is implicated! At the very least, everyone present in Dealey Plaza had the opportunity.

(F) They keep on searching. But, if you go back to the very beginning, that is where the clues are. Right away, there were reports of shooters on the “grassy knoll.” The very early evidence gathered from those present was completely ignored and washed away as “irrelevant” or “misperception.”

(B) There were people ducking and diving for cover because of their awareness of the source of the bullets!

(L) Yes, but all that is just brushed away as panic or whatever because, of course, Oswald did it! And, handily, Oswald gets blown away by Jack Ruby so he can never talk, for sure.

(F) And Jack Ruby died of cancer without talking to anyone except Dorothy Kilgallen, who then decided that it was the best time to commit suicide, right after interviewing Jack Ruby... naturally, before she ever wrote a word about it.

(L) Is there any trail we could follow that would enable us to obtain a more definite indication of what really DID go on in the Roswell case?

**A:** There is no “proof” or evidence unless the perceiver is willing.

**Q:** (L) So true. Like the Malta “cart ruts.” It’s there in stone, and the archeologists still seek to explain it away with nonsense.

(F) Yeah. It’s the same story with the abduction experience. They have now discovered that if you put somebody in a sensory deprivation chamber and subject them to EM waves of some sort, they will report the same thing. So, let’s just ignore the physical traces of alien interaction. Let’s forget all that and pronounce that “see?! We have tested these other people in tanks, under waves, and that proves that this is the only thing going on here!” Forget the fact that the people experiencing abductions were NOT in sensory deprivation chambers and were NOT subjected to the same types of waves and suggestion.

(L) Moving along to the next question: we have been discussing memories and how memories of, say, past lives are stored, and that leads to the question of what is the structure and composition of the soul? How does the soul remember? How does it carry its memories from lifetime to lifetime, from body to body, whether simultaneous or sequential? How does the soul “store” them?

A: Has to do with atomic principles. These with gravity present the borderland for the material and the nonmaterial. Which theoretical atomic particulates would you think form the basis here?

Q: (L) How about tachyons?

A: Maybe neutrons?

Q: (A) Neutrons? Or neutrinos?

A: Neutrinos.

Q: (A) Well, first they say neutrons, then neutrinos. Or “maybe neutrons.” I say “neutrinos” and they say “yes.” So a “maybe” is only a pointer. Neutrinos are funny particles because they are massless. But, some people don’t believe that neutrinos exist. My guess would be neutrinos. Do they exist?

A: Okay, we are going to throw caution to the “winds,” and say yes. [Laughter.]

Q: (L) In terms of these neutrinos and soul composition, how are memories formed or held or patterned with these neutrinos?

A: Contained within for release when and if suitable.

Q: (L) Memories are contained within the neutrinos?

A: Sort of.

**Q:** (L) Are they contained within patterns formed by the neutrinos?

**A:** Closer.

**Q:** (L) So, that means that if one “consciousness unit,” or soul, has more memories or experiences than another consciousness unit, it would have more neutrinos?

**A:** No.

**Q:** (B) Different patterns?

**A:** No.

**Q:** (L) What’s the difference?

**A:** More data per unit, sort of.

**Q:** (L) Does that mean that an individual neutrino can be, in and of itself, more “dense” in data, so to speak?

**A:** So to speak.

**Q:** (L) Does this increased density of data change the nature or function of the individual neutrino?

**A:** Maybe it changes the function of the awareness, thus the environs.

**Q:** (L) Is there a specific number of neutrinos that constitutes a consciousness unit, or soul?

**A:** Number is not quite the right concept. Orientation is closer.

**Q:** (L) What are the orientational options?

**A:** Vibrational frequencies.

**Q:** (L) Do the vibrational frequencies increase or decrease with density of data?

**A:** Change; better not to quantify.

**Q:** (A) We are talking about soul. Soul is what density, in concept?

**A:** Ark, are neutrinos related to the concept of a bridge into pure energy in some way?

**Q:** (A) Yes. I was going in that direction. I was wondering why you speak about neutrinos and not photons, because photons are also a bridge to pure energy, I would say. The difference between photons and neutrinos is that photons are bosons and neutrinos are fermions. Neutrinos have to dance so that they don't touch each other. Bosons are like pairs of neutrinos and photons, as bosons, are free to move in space any way they want.

**A:** We would mention photons in terms of this discussion, but for the tendency of some reading the WebPages to misinterpret in terms of the "love and light" fantastic.

**Q:** (L) Well, the "light fantastic" was a dance around the turn of the century, so that refers back to the remark about "dancing." (A) Are neutrinos the fundamental building blocks of everything? The most fundamental particle, so to speak?

**A:** More like a midpoint with spherical outward expansive quality. Tetrahedron, pentagon, hexagon.

**Q:** (L) Just a quick question about why my feet are swelling so much...

**A:** Circulatory aberration.

**Q:** (L) What can I do to make it go away?

**A:** Aspirin therapy. If fails, try plavix until naturopathic remedies suffice.

**Q:** (L) What is "plavix?"

**A:** Prescription anticoagulant.

**Q:** (S) I was watching a jet the other day, and I saw two balls in the sky, only a little lighter than the sky itself, and I watched them for about 30 seconds, doing things that were impossible for a plane. What was I seeing?

**A:** UFO activity of probe in nature.

**Q:** (L) Were they interacting for her benefit, in her direction, or were they just there in a general sense?

**A:** Option 2.

**Q:** (L) Frank has been discussing the stock market with me. We are curious as to what kind of advice you would give at present. On other occasions you have advised other people on investment strategies that proved to be quite dramatic. At the time, we were unable to take advantage of such strategies. However, at the present time, we have some little surplus. What kind of investment strategies would you suggest for somebody looking for something that would assist in putting them in a position where they could devote more time to doing research and less time to working their buns off?

**A:** Be patient and communicate directly with corporation board members of prospective companies. “Small cap” technology and biotechnology firms offer the best long term investment potential.

**Q:** (L) Well, if the “wave” is gonna come or any other weird stuff is going to happen, do we want to look for long term investments?

**A:** When is wave coming?

**Q:** (B) I guess you take care of this business now and that business then! (L) I guess so! So any stocks in particular; any particular names; should we buy gold; is the market going to crash; what

about bonds; the market is very unstable now. It's acting crazy. It's almost scary to jump in right now!

**A:** Market is not unstable, was for a short time as greedmeisters had their comeuppance.

**Q:** (L) That's the whole deal? Nothing more than that?

**A:** What more do you desire?

**Q:** (L) Well, kind of like this movie I was watching the other day. Is there some kind of formula you can use to predict if something is going to go zooming up so you can buy it before it does?

**A:** You need no formulas. You only need insight. Your gift is in the area of communication! We suggest application accordingly.

**Q:** (S) I guess if you apply yourself as diligently to the stock market as you do to your other studies, you'll be just fine. (L) I don't have TIME for that! I don't have time to study the market. I want something to put me on the right track so I can continue to work on the website!

**A:** If financial gain is an attractive option to you, and let us face it, yours is a 3rd density STS realm, then we believe you will discover previously uncharted reserves of "time" as the process unfolds.

**Q:** (L) So, you are saying don't jump in without checking things out... because we don't have enough money to just throw it away...

**A:** Yes, but you, Laura, are simply not deterred nor intimidated by the imaginary pomp and circumstance of those who sit in board rooms.

**Q:** (B) Maybe what they are saying is that with your character make-up, what would normally put off another person wouldn't

stop you at the board room door. You'd just charge in there... (L) But what does that have to do with buying stocks? (B) They said "Be patient and communicate directly with corporation board members of prospective companies." (L) So, if I research different stocks... (F) Maybe you should just e-mail them and say "hey, what's going on with your company?" You need to know what is going on with the company. (L) Any last questions before we stop for the night? (B) Are we going to be as vulnerable as I think we are going to be upon arrival in 4th density? I mean, we will be the new kids on the block!

**A:** Are you not already pretty damn vulnerable?

**Q:** (L) Well, yes we are already pretty vulnerable. Are we going to be MORE vulnerable?

**A:** What fear have ye, if ye remember that the soul is what counts, and that it is indestructible. Good night.

END OF SESSION

## 8.8 June 24, 2000

Ark, Laura, Frank, BT, Johan M

{Johan M was a visiting European businessman who was quite taken with the Cs and had the idea that we should form a partnership with him for promoting our work. We weren't too sure about this so we decided to discuss it with the Cs. My feeling during this session was that Frank's stock market/gambling energy was rather pervasive. I think he was angling to be taken on as a financial adviser by Johan M. So, as long as the questions were on these financial issues, I think there was emotional leading coming from Frank. As soon as I could, I turned the topics elsewhere.}

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Morrah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** (J) I don't know how far it is useful to ask questions about a business plan, but I did have a more general question: In what way can I best help Laura and Ark in their quest?

**A:** The "quest" is universal. We should clarify by adding that it is not limited to Ark and Laura.

**Q:** (J) Is setting up the structure now important?

**A:** We wish to point out that we have previously advised against restriction, however, choices are included within your arena.

**Q:** (L) Are you saying that you have advised against anything restricting, but within the arena of setting up a structure, choices are there that we can make without advice.?

**A:** No.

**Q:** (A) I think I know. Previously they advised against restriction, so we should go out in the open. But in the open, there are choices, and some of these choices are within the arena of setting up a plan. So, the question is: what are these choices?

**A:** Let us try another approach; restriction mandates anticipation. The pathway you have embarked upon is not a corporation. However, if you desire to learn lessons relating to this fact more directly, who are we to stand in the way of your choices!

**Q:** (L) Does this mean we have to act 100% on instinct, intuition?

**(A)** Ad hoc?

**A:** Perhaps a review of the path heretofore traveled will yield a clue. Has anything interesting happened so far?!?

**Q:** (L) I guess you are not supposed to anticipate good things, but you are supposed to anticipate attack?

**A:** Attack is not anticipated, it is the awareness, my dear!

**Q:** (L) So, it is awareness that it can happen at any moment, not that you are anticipating it?

**A:** It is the awareness that it exists.

**Q:** (L) Okay, in terms of getting a book put together, getting it published, getting it promoted, we are still dealing with a possible necessity to have a financial structure in order to pay the bills for it, and to pay everybody's expenses for what they have to do. Is that...

**A:** We have told you that all would be provided. Of course we were wrong, no?

**Q:** (L) No, you weren't wrong.

**A:** Do you remember the "old days?"

**Q:** (L) Yes.

**A:** They were financially comparable to the perceived present, right?

**Q:** (L) Wrong. I get the point. In other words, acting on faith!

**A:** You have been led to the threshold of a lucrative financing source. We suppose you must have "cold feet." Perhaps crossing the threshold will warm those feet a bit!?!

**Q:** (L) You mean the book, in terms of a lucrative financing source? Just do it?

**A:** We ain't talking about the book, my dear!

**Q:** (L) You aren't talking about the book? (B) Maybe they are just talking about things in general as opposed to...

**A:** No.

**Q:** (L) What are you talking about?!

**A:** We will give you 20 guesses!

**Q:** (J) "You have been led..." Who is "you?" Laura. (L) Who are you talking to?

**A:** All.

**Q:** (L) Oh. They are talking to all of us. (A) And not a book.

**A:** The book is OK, but it does not represent immediate financial potential.

**Q:** (L) Now, you guys are really being mysterious. What the heck are you talking about? (B) Are they referring to the last session when they gave some pointers about areas of the stock market to watch and research?

**A:** Good for you, Barry! You won the prize!

**Q:** (B) Remember, the last session you were talking about stocks, and you were concerned if the market was even going to continue to exist, and they said to concentrate on the tech and biotech industry. They said to start researching. (L) Are you hinting to us that there is going to be a big boom in the market, and if we get in now, we can take advantage of it?

**A:** If you "get in" anytime you will be better off, providing you are prudent, patient and persevere.

**Q:** (L) Well, you just said “immediate financial source.” That doesn’t sound like an immediate financial source to me!

**A:** Every climb begins with the first step.

**Q:** (L) What does that have to do with our immediate concern which is: getting the material available to the world?

**A:** All will fall into place.

**Q:** (L) You keep saying that!

**A:** Why do you lack faith? Is your experience no guide? Or Perhaps you would prefer a return to your previous life?

**Q:** (L) Anything further on this?

**A:** Oh there is much, but if you are impatient, we understand.

**Q:** (L) You said “tech” and “bio-tech.” Is that still the way to go, or is there something to be added to that?

**A:** It is not just “tech” and “biotech,” but the various players contained within that counts. Patient research, combined with those who have a “feel” for this being your networking guides, provides the key.

**Q:** (B) Are you looking for a fast climb, in terms of a person, as opposed to a company?

**A:** Either/or.

**Q:** (A) I don’t understand something. When we were talking about these stocks, the idea was that the only thing you can do was to buy these stocks, to invest, and so on, then you have no real finances, because if you start to sell, you pay taxes, and it makes no sense. So, we were just told by this expert that we will just be investing for long term, until, so to say, it becomes less

taxable when we are older than 59 or so, yes? So, that is not clear!

**A:** Portal of attack throws you off track!!

**Q:** (F) Somebody told you that if you sell you have to pay taxes?  
(L) Oh, yes! (F) Do you think that you have to pay every cent of the profit in taxes. (J) The only solution to that would be to make a LOT of money so that whatever you pay in taxes is still a LOT less than what you have made, and you are still left with a big profit! (F) Yes, you pay a lot of taxes, but you still have a lot left. (J) Yeah. Imagine what would have happened if you had bought microsoft in the beginning! You may find the next microsoft! (L) Okay, give us a clue on the next microsoft. (B) I think they are giving the key with the person involved that you are supposed to look for.

**A:** Patient research; networking. Combine energies.

**Q:** (L) So, they are saying that we are all supposed to be researching, networking and combining energy. (B) I wonder if they mean “patient” in the medical sense as opposed to “patience?”

**A:** Oh, it is both.

**Q:** (B) Well, we have a clue here. So, it is not just patience in terms of time...

**A:** We will make one last effort to help you with this one: if you are searching for a “diamond in the rough,” how do you go about this???

**Q:** (B) Dig in the dirt in the vicinity of a known diamond mine!  
(L) Yeah. You dig in the dirt!

**A:** Well, do you slam your shovel into the dirt frantically?

**Q:** (L) No, you dig carefully.

**A:** And how did you know that there was a diamond mine in the vicinity?

**Q:** (L) Maybe it has a sign that says “Diamond Mine!” Or maybe it’s a place that is enclosed and fenced off from the rest of the area! (B) Or do you research it?

**A:** Bingo! Barry is knocking ’em dead tonight!

**Q:** (L) I just want you guys to know that we sat down here tonight to talk about a book! Are you saying that is not important?

**A:** A book is good, but all in its proper place.

**Q:** (L) So, we need to make the money so we can produce the book. (B) Well, the worst thing you can do when you try to do anything, is to be undercapitalized. (J) Yes. (B) Even though the ideas are not about profit here, we can’t really do anything without being capitalized. I think that this is the problem the C’s are trying to solve here. Now, what about some sort of company that combines “patient” and “research” in another way; a sort of internet company that is making research available on the internet, as I have recently heard discussed? (L) Is Barry onto something here? Is this the kind of “diamond in the rough” we are supposed to be looking for?

**A:** That may be good, but maybe we should not try to figure the layout of the treasure trove until we have opened the door.

**Q:** (L) What kind of money are you suggesting as initial investment capital in order to accomplish...

**A:** We cannot lead you any further, sorry!

**Q:** (J) You told Laura to get on the internet, and that worked to find Ark. What would result in an equivalent outcome in my case? (L) Well done!!! (Referring to the cleverness of the question.)

**A:** You must be kidding!

**Q:** (L) No he's not! He's serious! But then, I didn't get on the internet because I was interested in anything but my research. It was part of my mission. So, I guess that was the focus that opened the right doors for me. I had no idea, no expectation, no anticipation - NOTHING. Maybe if you are even looking, you will BLOCK what you need to have in your life? Maybe forever.

**A:** Yup!

**Q:** (L) Well, Johan thought Ivey was the one!

**A:** He was anticipating. By now we should know that this is a wee bit disappointing.

**Q:** (L) I think you have to just give up. I did. I was focused on one thing and one thing only: the quest for the truth. And, it just so happened that Ark was similarly focused, and that is what intersected for us. (B) Yeah. It's like dating. You get all dressed up and go to a bar, and sit there alone all night. Then, you change a tire, get all dirty and hot, and go in the bar to get something to cool you off, and you meet somebody!

(L) Okay, let me get to my questions in the folder here. LS, from the Karinya site, has a little poll about the Lizard story on his website. He asks people if they think the story is true or not, and if they have any comments. One person wrote (and I am pasting it in here exactly as it was posted): "feels like Truth, as does the Wave series. I would like suggestions on protection please. There is so much accurate information here that my eyes have been bloodshot for the past 3 days, while processing the site My Favorite Site: info from the Casseopaeian transcripts... Awesome Assistance!! thank you for having this Knowledge online."

That is all fine and good, but then another person writes: "The story is fact, but some parts are not fact for our reality/timeline.

In our timeline things aren't exactly the same as the story perceived by Cassiopaeans. We will encounter a 10th planet (Nibiru) that is artificially directed, rather than an uncontrollable group of comets. The reptoids are operating from astral/4th density level, but "density" designations are merely relative, and the notion of only 7 levels is quite misleading. Not all reptoids or grays are locked into the STS plans, and things aren't as simple or dismal as the story would suggest. I hope this helps people understand the drama better!" And, of course, one is urged to visit the Nibiruan website where one can learn the TRUTH about the density levels, etc."

Now, I would like to know if something has changed, as is suggested here. Are we dealing with an "old time line" as is suggested here?

**A:** No.

**Q:** (L) Is there a 10th planet, Nibiru, in the present time line, naturally?

**A:** If you wish to call it that, you may.

**Q:** (L) Is this 10th planet, that some may wish to call Nibiru, an artificially directed planet?

**A:** When you ask these questions, Laura, feel you have some insight already.

**Q:** (L) Well, of course. I know that the Reptoids and Grays are STS, and they ARE 4th density, in which fact is the implicit understanding that they are more POLARIZED in the STS mode, which of course implies a deeper level of nastiness, and that any of them existing as STO beings is so rare that it is not worth considering. I also have done sufficient research on the density levels, outside of channelled sources that this is pretty much a given historically speaking, and mathematically speaking...

**A:** the grays and reptoids are STS, and so are YOU. So we suppose that means that someone, somewhere, regards third density terrestrial humans as the “bad guys.”

**Q:** (L) Oh, yeah. The roaches, particularly. As far as they are concerned, I am either an avenging god, or the devil! A reader writes: “Laura, I commend you on your vision, fortitude, courage... I have read most of the material with great interest. It feels right, but I have a couple of questions: I can’t reconcile the idea of our being trapped or lured (by sensuality) into a physical state with the idea that we have progressed through the vegetative and animal states.” This is a good question. It seems that the energy of creation has progressed through the vegetative and animal states, that animals can graduate to third density and become human, just as humans can graduate to 4th density. How do we reconcile this with the idea that human souls were entrapped into third density bodies from 4th density, by the Lizards? Are we talking about two different functions? Two different groups?

**A:** Humans were not entrapped by the “Lizards.”

**Q:** (B) We volunteered! (L) Well, they did say that the Lizards were waiting for the right soul matrix to “step in.” So, we were the right soul matrix and we stepped into these engineered bodies that the Lizards created. That’s what you said. So, how do we reconcile us stepping into these engineered third density bodies with soul evolution through the vegetative and animal states?

**A:** If you look more closely at the material, it was not stated that the consciousness levels currently represented by humans and many others “stepped into” anything in particular but PHYSICALITY.

**Q:** (F) Perhaps individual consciousness units have stepped into different physical forms. Some may have “stepped” in as humans

right off the bat, and some may have done otherwise. (B) You can't get hung up on any kind of evolutionary system. It's just an ongoing and concurrent thing.. (F) It is simply that WE chose to experience physicality in many forms, maybe simultaneous rather than in a linear progression, but since we perceive time the way we do, it seems that it is a progression. We could be all kinds of things in other realities. (L) So that relates back to the idea of "simultaneous disbursement?" Half of The All chose to "fall asleep" as matter, and other "units" or groups chose to interact with matter by "informing" it with life of all different varieties, more or less simultaneously? So we can have souls that are slow accretions out of matter over the long wave cycle, moving through the densities over aeons, and souls that thought they would speed things up a bit by a different method of entering directly into bodies and changing them. Well, that seems like a sort of "right off the bat" violation of the free will of the energies of such bodies and their emerging consciousnesses in the long wave cycle. That right there is STS even if it was not realized as such at the time. And such an act could have some tremendous implications in terms of what you have called a "desire based imbalance." It takes us back to the story of the Prodigal Son. So we have a very complex idea of souls and their evolution in more than one mode.

**A:** Yes.

**Q:** (L) And in the end, it is a timeless mass division and disbursement that was, is and will be?

**A:** Yes.

**Q:** (L) There are some questions that have been asked about what sort of humanoid types may have originated in Lyra. I realize that Lyra is a constellation, and not a planet, but this person states: "apparently all of the human race comes from Lyra."

**A:** No.

**Q:** (L) Well, there is a lot of information out there along this line. Billy Meier even makes this claim. This person says “The human race did not originally exist in Lyra; it came from some other galaxy, but first began to evolve in our galaxy in the Lyran system.”

**A:** Closer.

**Q:** (L) According to the Andromedans, “there are over 135 billion human beings in the 8 galaxies closest to ours. Now, there are also other races out there. Some of these races have had a lot of conflict with the human race and that conflict continues, but there are things happening that will hopefully alleviate that problem....”

**A:** Your current physical form has been fine tuned on your present locator through advanced biogenetic engineering. It is an ongoing process.

**Q:** (L) It says here: “many members of extraterrestrial races live from an average of one thousand to 1500 years.” Now, you have already told us that such ages are the case at 4th density. But, here it says: “The Andromedans live to an average of 2007 years. They do not look at time the same way that we do. They say that our universe, which consists of everything that we do and don’t know about is a 21 trillion year old hologram. They say that all the matter that is in our universe came out of black holes. Under every galaxy, they say, is a black hole from whence everything comes.” Now, does everything in our galaxy come out of a black hole? Is the center..

**A:** Whoa! Wait a minute! The term “year” is a 3rd density concept of the terran variety.

**Q:** (L) So, in other words, the whole thing is ridiculous?

**A:** No, the whole thing is not ridiculous. Some may be, but not all.

**Q:** (L) Well, here is an interesting thing: according to the Andromedans, on March 23 of 1994, a specific sound and color frequency began to emanate from all the black holes in the known universe. What this energy and frequency is doing is creating a holographic impression throughout all dimensional levels, of which they say there are eleven creational densities. This new holographic impression has become a 12th density. They say that this new holographic impression has one frequency. What this frequency is doing is pulling up all the dimensional levels below it. They say that by December of 2013, 3rd density as we know it will cease to exist. It is imploding in on itself as everything is being drawn up. Those on the 11th level are going to 12th. We are supposed to go to 4th and then to 5th density. From the Andromedan perspective, 4th density is a consciousness. It is where an entire race is telepathic with each other. They are aware of each other, they feel each other, they are of one mind, separate individuals, but still one. Fifth density is where beings, considered from 3rd density, are light. They say this is what is going to happen to us no later than December of 2013, based on their science.” Alex Collier comments: “Do I know if this is right? I will know when you know, but they have not been wrong yet.” So....

**A:** No comment.

**Q:** (L) You aren't going to tell us if this thing about the sound and color emanating from black holes is really happening?

**A:** That is for you to decide.

**Q:** (L) Well, according to these Andromedans, and also according to Carla McCarty, the Ra channel, the planet that became the asteroid belt was called Maldek, not Kanteck.

**A:** But who called it?

**Q:** (L) Obviously NOT the inhabitants. You guys are giving me a hard time tonight.

**A:** No, you are giving us a hard time.

**Q:** (L) Now, [displays piece of star shaped metal] Johan has this little gadget and he waved it around over my feet and it seemed to make the pain in my ankles go away. Can you tell me why it would do that?

**A:** It is an interesting little gadget!

**Q:** (L) Why does it seem to make pain go away? I tested it. We did one foot one day and the other foot the second day. Would any piece of metal do the same?

**A:** If properly conditioned.

**Q:** (L) The person or the gadget?

**A:** Both.

**Q:** (L) It seems to work. (A) Is the shape important for it to work, or are there other shapes that would work the same way?

**A:** Shape helps.

**Q:** (L) What about the symbols engraved in it? Do they help?

**A:** Maybe.

**Q:** (L) What about the metal that it is made of?

**A:** Maybe.

**Q:** (L) So, the shape is the most significant thing. (B) What about the intent of the person using it?

**A:** Yes.

**Q:** (L) What would be your suggestion for an appropriate topic to get me off in the right direction?

**A:** Just let it flow, my dear!

**Q:** (L) I would like to know if Solomon's temple is the same as Stonehenge, or is Solomon's temple the same as the Pyramid? It is obvious that no such thing as Solomon's Temple ever existed in Israel until AFTER the Babylonian captivity when the Jews were fed a whole line of propaganda about their whole history in order to generate nationalistic feeling to get them to go home and actually BUILD a temple! Or, is it something else altogether different?

**A:** It probably is at least one of the above.

**Q:** (L) That's great! It's either Stonehenge, the Great Pyramid, or something altogether different! That leaves everything as an option!

**A:** And that is just it, is it not? Leave everything as an option!

**Q:** (B) In the mid seventies, I was working with a subsidiary of the California farm bureau out of Berkeley and was apparently considered for membership in what appeared to be a secret organization by the CFO of that company. What or who were they? And, did my declining of the invitation have anything to do with the shutting down of my journey inward?

**A:** It probably is good that you declined unless you enjoy being a puppet on a string. Organization was connected to a financial consortium by the name of "Zebulon."

**Q:** (L) Well, that's a name from the Bible. (J) I would like to know what happened when I was in Milwaukee. I was in my hotel room, laying in my bed, asking questions, and something happened there. Who was it, who was speaking. I had a tape

recorder. I ask the Cs to come in, and I would like to know who it was?

A: 4th density skipper.

Q: (L) What's a skipper?

A: One who seeks transdensity communicate.

Q: (L) So, what happens here? I don't get that. Are you saying Johan is the "skipper?"

A: No.

Q: (L) This being that was talking to him is a "skipper?"

A: Yes.

Q: (L) Was this being STS or STO?

A: STS.

Q: (L) Can you explain to me why it is that, when STS beings communicate, they are able to produce such benevolent, warm and fuzzy sensations? Isn't there some kind of instinctive thing in us that can help to sort these things out?

A: Kind of like "Little Red Riding Hood."

Q: (L) You mean, we are like Little Red Riding Hood? And they dress up like the grandmother. (B) And we see the grandmother because that is what we WANT to see. (J) Yeah. And if you want to see the Cassiopaeans, they can dress like them! (L) How did Little Red Riding Hood figure it out? She didn't until the wolf jumped up and attacked her. Yeah! And he'd already eaten the grandmother! Right up to the point when the wolf leaped off the bed to devour her, Little Red Riding Hood was in the dark, even though she was SEEING something that puzzled her! You know: the big eyes and all that...

**A:** She checked with the Cassiopaeans on the board.

**Q:** (L) You said at one point that you were communicating with other people on the planet. Yes, we were the only ones using a board which produces a certain clarity of information - a certain objectivity - not obtainable otherwise....

**A:** Yes.

**Q:** (L) How many other people on the planet are you communicating with?

**A:** Varies, but up to 50.

**Q:** (L) That's not a big number. Well, when you usually communicate, and I know that a board and group method has both its advantages AND limitations, when you communicate with these other people, what is the general form or mode?

**A:** Channelling individually.

**Q:** (L) Are these people channelling in trance; are they getting it right in their head while they are walking down the street; or do they have to be in a meditative state; or are they writing any of this down and sharing it?

**A:** All of the above.

**Q:** (L) Do they know it is the Cassiopaeans, by that designation?

**A:** Mostly no.

**Q:** (B) Is that because of their own perceptions?

**A:** In part.

**Q:** (L) Well, if they don't know it is the Cassiopaeans, and that is part of their perception, does their perception also, to some extent, influence the material so that we would not recognize it?

**A:** Close.

**Q:** (L) Well, now Johan had this amazing experience on a train in Thailand, and he RECOGNIZED it as coming from Cassiopaea. Was that you guys giving him a little tweak?

**A:** Yes.

**Q:** (L) Would it be advisable for us to look for these others?

**A:** If needed, they will find you.

**Q:** (B) One night back in the 50s, I went to sleep with a specific train of thought in my head, and woke up the next morning with the same thoughts, right where I left off. (L) As though the whole night had not passed.

**A:** Astral Travelled.

**Q:** (B) Is that the same when I saw the light?

**A:** No.

**Q:** (L) What was that? (B) It was a classic near death experience.

**A:** Yes. Barry had some rambunctious he is not fully revealing connected to some of this.

**Q:** (L) Were you a rambunctious person at the time? (B) Probably. (L) Hmmmm. (B) What is it I am not revealing?

**A:** Scrappy nature in period referred to.

**Q:** (L) Did you get into fights or something? (B) I was pretty calm then. (L) I don't know which particular thing they are referring to; was it seeing the light, or the astral travelling? Which was it?

**A:** Referring to a plethora.

**Q:** (L) Did you have more than just those two experiences? (B) Oh, a lot of things. They would fall under the heading of general

psychic things. I felt at the time that my involvement was experimental and should be for a purpose, so I sort of backed off.

**A:** Energies were building.

**Q:** (L) What kind of energies?

**A:** Many.

**Q:** (L) Well, some of the people on the little mail list have been having some frightening dreams. Caroline had her purse stolen, there have been dreams of being attacked, and all that sort of thing. The thing about Caroline's dream was that she dreamed about having groceries stolen, and then a few days later she was in a grocery store and her purse was stolen. She wrote and told us all about the dream in advance of the incident. We analyzed it, but apparently we sort of missed it. Can you comment on Caroline's dream about her groceries being stolen followed by the actual theft of her purse? Is this a form of attack, or a random event. (A) There is a third possibility: that she had this dream and then she attracted the event...

**A:** Warning. The dream was a warning of upcoming event.

**Q:** (L) Is this dream AND the event that followed, both some kind of warning about the danger involved with the book she is writing?

**A:** No.

**Q:** (L) So, the event was in no way related to her expose or the people around her?

**A:** Attack.

**Q:** (L) So, you are saying that the dream warned of the event, and the event was attack. Would she be able to reduce the level of

attack by getting away from the people connected to this church system?

**A:** She must learn her lessons. Which is more important, relationship or quest. When the two conflict, far too many choose to fail to see this!!!!

**Q:** (L) Okay. Is there any other line of questions we should follow at this time?

**A:** This is up to you.

**Q:** (J) A few weeks ago I was lying on the bed beside my daughter, and at the same time I was in a sort of other reality. In that other reality, I was pulling out of my head a sort of wire, and when it snapped, my tooth became numb. I wondered what it was, because it was not in this reality. My sister in law was there in the other reality, and I told her to look at this wire and to remember it because it was important. What was that?

**A:** Psychic exercise of a frequently engaged in nature.

**Q:** (L) What? (J) I don't understand that. (A) Who was frequently engaged in this?

**A:** The experiencer.

**Q:** (L) Are you saying that Johan does this sort of thing frequently, he just doesn't know about it?

**A:** Knows a little.

**Q:** (L) What was the nature of the wire he was pulling out of his head?

**A:** Visualization.

**Q:** (L) Visualization of what?

**A:** The wire.

**Q:** (L) What does this wire represent?

**A:** You are off track.

**Q:** (L) Was it a real wire in another reality, or was it a psychic wire?

**A:** Both.

**Q:** (L) By pulling it out, what did Johan accomplish?

**A:** A recognition of ability.

**Q:** (J) Yeah! It's the first time I was CONSCIOUS of it!

**A:** Self testing routine.

**Q:** (L) What stimulated him to suddenly become aware of this, or at least to be able to hold the awareness?

**A:** Not what happened. He practices such things often, more for the experience, per se.

**Q:** (L) How come it is the first time he was aware of it? You are saying that he frequently does it, but he's not aware that he frequently does it.

**A:** Yes he is.

**Q:** (J) Well, yes, I am aware of dual consciousness, but nothing this fully aware! I was awake and asleep at the same time. It was the first time that I experienced something that deep.

**A:** There is a first time for everything.

**Q:** (L) Well, we certainly thought we had something interesting to talk about with this book thing... but you guys weren't into it.  
**(A)** Well, there IS a question: non-profit or Co-op?

**A:** Something like a Co-op is closer to the target.

**Q:** (L) Okay, anything else for any of the subjects we have talked about?

**A:** No. Good night.

END OF SESSION

## 8.9 July 15, 2000

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Maranatta.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Let's cover the attack issue first. Frank just had a feeling about attack coming through to us in the not too distant future. Is this an accurate assessment?

**A:** Yes.

**Q:** Can you identify the source of the attack?

**A:** Many possible, but illness dangers are significant. There is still a 'bug' inside of Ark, which could explode at any time into a household-wide infectious pandemonium!

**Q:** What could be done in advance to prevent this? What kind of bug is it, and what measures to take?

**A:** It is bacterial, with a worm type attachment. Recommend colonic.

**Q:** Where did this bug come from?

**A:** Poland origin.

**Q:** And a colonic should do it? Anything by mouth?

**A:** Increase B vitamin intake.

**Q:** Well, Frank felt that the attack would come through {Ark's work}, but I guess if Ark was sick, that would be sort of true, because then, he couldn't work. Is that why Frank picked it up that way?

**A:** Partly, but other complications lurk... Jealousies building with one who has a name with a "B." {In retrospect, this was a warning about Vincent Bridges.}

**Q:** Any particular action to take to forestall that one?

**A:** Be on alert to conferences with others.

**Q:** Any particular action besides just being alert?

**A:** Not to this point.

**Q:** Any other potential attack sources? Or, at least the next most significant?

**A:** (Atriedes). Not yet sufficiently aware of dangers of travel by road vis a vis himself.

**Q:** Any specific means of forestalling such a problem?

**A:** Remind and pray.

**Q:** You aren't saying my son is going to have an accident, are you?

**A:** It is possible.

**Q:** Can you give me a time frame; a specific window?

**A:** When travel distances expand.

**Q:** Well, he will be starting school on the 24th which means he will be driving back and forth to Tampa every day. Should one of us drive him for a period of time? Or go with him?

**A:** We hesitate to advise too strongly where finances are concerned, but newer vehicles have more safety features which can prevent physical damage.

**Q:** While we are on the subject of financial things, in order to update the car - a financial thing - if there is going to be a problem with {Ark's work}, of course we don't want to increase our indebtedness, and I HAVE put some of our money into the stock market, so...

**A:** Wait a minute. There will not be a problem in the near term with {Ark's work} if vigilance is practised. The spelling is a clue.

**Q:** Well, since things are starting to move, I guess it is also time to increase vigilance.

**A:** It would definitely be advisable.

**Q:** Any further advice on my stock market investing? I have taken the step, and I have done the best I could without you guys telling me what to do specifically what to do. Can you tell me if what I have done so far is the right thing?

**A:** You are doing well, so far.

**Q:** Any further advice? Should I just buy and hold, or should I buy and sell?

**A:** Buy defensive hedges.

**Q:** What are defensive hedges?

**A:** Stocks which weather recession well.

**Q:** What stocks weather recession well?

**A:** Food, drugs, energy, etc...

**Q:** But what about the tech and biotech which you told you before. That's what I have been going into, tech and biotech, and pretty heavy duty, too.

**A:** That is good!

**Q:** So now you think I ought to diversify into food and drugs? What kind of stocks deal with food? (F) Nabisco, General Mills, Kraft, Post, Borden. And drugs would be Abbot, merck, Liggett Myers, Pfizer, and so forth. (A) WHY? If tech and biotech are going to go up, as you suggest, why should we invest in something else? If now is such a good opportunity to buy tech and biotech, why don't we just do that? Why diversify?

**A:** A good opportunity. If you diversify, you have a better chance to make more money and faster!

**Q:** So, maybe they are saying that food and drug stocks, and tech and biotech stops are all going to go up?

**A:** Yes.

**Q:** What about fuel?

**A:** Energy.

**Q:** Like the coal industry? I mean, "diamonds in the rough" are carbon, and carbon is coal, right?

**A:** Okay.

**Q:** Just okay. Not the best. What about Tampa Electric or Con-Ed? Things like that?

**A:** Those are shaky.

**Q:** What do you mean by energy? Gas?

**A:** And oil and nuclear and newer forms.

**Q:** (A) What is newer than nuclear? “Free energy” is newer than nuclear. (L) Tom Bearden! (A) Right!

**A:** Yes.

**Q:** (L) Well, everything about this Perceptronics matched what you were saying a couple of weeks ago, and it was really cheap, so I picked up a couple hundred shares for practically nothing

**A:** Good!

**Q:** Now, onto Frank’s mom. Aside from what Frank is doing, are there any additional things that can or should be done that would optimize her recovery?

**A:** She is improving faster now.

**Q:** Is there anything he needs to add to her regimen? Anything you would recommend?

**A:** Not as of yet.

**Q:** Is there anything he can do to minimize the stress being produced by his sister?

**A:** Just being present helps...

**Q:** Frank says he is going to commit suicide if his mother dies. Is that a good idea?

**A:** No, but it won’t happen.

**Q:** See?! They said she is not gonna die.

**A:** She is in better health than he is.

**Q:** What does Frank need?

**A:** He is okay, but she is strong, due to powerful genetic line. His is not as strong, due to his father.

**Q:** Is there anything he can do for himself?

**A:** Not now.

**Q:** I received this very mysterious e-mail in response to my Grail pages. [Reads e-mail] Is this a crackpot, somebody from the inside, or a veiled threat?

**A:** Close to number 1: Crackpot.

**Q:** Okay, let's get to the main subject. We have a serious problem here. In this series of sessions we had over a period of years about Roswell, on October 7, 1994, we were discussing Roswell, the question was asked about the number of bodies recovered by the government. The answer you gave was "three dead, one still in operation." Then, you said it was a "robotic, biogenetic being rather than a soul-encompassing physical existence."

On September 2, 1995, again we have a body count of 4, who were described as hybrids, and this was in relation to the alien autopsy video. So, we have four hybrids, composed of human and Grey Alien genetic combination.

On October 21, 1995, I was reciting the story from the alien autopsy video, and the camera man was quoted as having stated that there were four beings, and one was dead, and three were standing outside the craft crying and clutching boxes of some sort. I asked if this was accurate, and you said yes. So, in this case, which must also be the case of the four hybrids mentioned above, we have a count of four beings, with one dead, and three living.

Next: we talked about it further, and we asked about how many

beings were in a particular crash, and you said 21. I asked how come the reports said that there were only four, and you said the reports were suppressed and fragmented because fewer individuals witnessed the interior of the craft.

So, now we have 17 more beings on the inside. However, on this occasion, what we were talking about was the fact that this was a mission to retrieve dead bodies for study. Five of the bodies inside were human, and two were bigfoot types. Before, you had said that the craft that crashed were on a “highly specialized mission” of reconnaissance and testing of environmental conditions of the area as a result of the nuclear testing that had taken place there. But this particular mission seems to have been otherwise. But, I know that one mission profile does not negate the other. Yet, it seems to be contradictory. But, the biggest contradiction we have seems to be where it states that there were four bodies. On the one occasion, three were dead and one was alive, then three were living, and one was dead, and now, suddenly, we have 21 and a whole different ballgame. Now, I understand that the way our questions are framed, and what awareness we have, are factors that can vary the response. But I have to deal with this because I am writing about it and there is confusion here.

**A:** There was more than one “crash in the vicinity” of Roswell, and at different times. The four body scenario refers to the incident most frequently cited.

**Q:** Now, when we say the “four body incident most frequently cited,” how many were living?

**A:** Three dead, one living.

**Q:** So, what about the incident where there were three living and one dead?

**A:** Yes, in early June and approximately 100 miles further west of the Roswell area.

**Q:** So, in early June there were three living and one dead. And this is the one that the camera man was talking about?

**A:** Yes.

**Q:** And then there was an incident in July where there were three dead and one living, and that is the one that most of the Roswell witnesses are talking about?

**A:** One more.

**Q:** One more crash?

**A:** Yes.

**Q:** Okay, so there were two crashes at the same time?

**A:** Three.

**Q:** There were three in the July period?

**A:** June/July.

**Q:** Two in June, and one in July?

**A:** June 4th, July 1st, and July 4th.

**Q:** The one in June occurred 100 miles further west?

**A:** Yes.

**Q:** The July 1st, incident, where did that occur?

**A:** 67 miles southeast of White Sands.

**Q:** And the third crash was the Plains of San Augustin crash that you have already given figures on, correct?

**A:** Yes.

**Q:** Which one of these crashes had the 21 bodies?

**A:** Second. This explains the famous news release because the base was abuzz due to all these occurrences.

**Q:** It seems to me that if the base was already abuzz with these occurrences, they would already have had their cover organized and their stories straight! In such a case, the famous news release would never have happened.

**A:** No.

**Q:** Previously, I asked about this Kal Korff book, and essentially you said that my scenario about the different stories, the various witnesses, whoever is behind the cover-up is just feeding disinformation through all of these people. They are capitalizing on all kinds of witnesses and so forth that then get “exposed as frauds,” are just part of the cover up. You said that this was correct. So, I said that “they are feeding disinformation through all of the so-called”Roswell Witnesses,” and you said “close.” I would like to know how close, and just how they are feeding disinformation through all of these witnesses. Obviously, these people believe what they are saying.

**A:** They do.

**Q:** They believe. Why do they believe?

**A:** They are telling what they remember, but it is soaked in twisting parallels.

**Q:** Are the people doing this themselves?

**A:** No. Event mixture.

**Q:** But they all seem to remember this July 4th crash, or so they say.

**A:** Yes.

**Q:** I don't get what you are saying here.

**A:** Events were intertwined.

**Q:** So, some may have witnessed different events?

**A:** Parts of...

**Q:** Have they also been tampered with in terms of abduction or having implanted memories or screen memories?

**A:** No.

**Q:** Have they, in any way, been exposed to something that was falsely staged by the government in order to make them think....

**A:** No.

**Q:** So, they are all sincere and honest witnesses, but they are witnesses to different events, and they all think that they are witnesses to the same event?

**A:** The so-called suspicious circumstances are merely a patchwork, cleverly used by those who wish to conceal.

**Q:** For example: did the fireman actually go to a crash site and witness what his daughter claims he witnessed?

**A:** Yes.

**Q:** Was it an alien craft crash site?

**A:** Yes.

**Q:** Did Jesse Marcel witness a crashed UFO?

**A:** Pieces of one.

**Q:** Did Glen Dennis really talk with a nurse who later disappeared?

**A:** Yes.

**Q:** How did this woman disappear? Kal Korff could find no record of her existence.

**A:** Transferred, discharged, records expunged.

**Q:** Is she dead, so that she doesn't know all the stories about her experience?

**A:** Yes.

**Q:** Did she die under suspicious circumstances?

**A:** No.

**Q:** Did the little balsa wood piece actually come from a toy company as Korff suggests?

**A:** No. Kal Korff was paid to mislead, but it is now moot as the military changed its story yet again after his book was published.

**Q:** One of the things that Kal Korff did was to dig into Jesse Marcel's background, and he claims that Marcel never had any of the background that he claimed, and that Jesse Marcel is basically a liar. He has the military records to back him up on this. Were Marcel's records altered?

**A:** Jesse Marcel never claimed to be a military pilot. He was an intelligence officer who held a private pilot's license

**Q:** That's not what Kal Korff says. He quotes Stanton Friedman, and William Moore and all those guys who wrote about Roswell, as quoting Marcel to have said he was a military pilot. Korff quotes from their books, and says they wrote these things and didn't check to find out that Jesse was a liar.

**A:** Jesse did not lie.

**Q:** Okay. Well. You also said "Roswell did involve evidence of non-human intelligence." Did this just mean basic information

about the reality of alien visitation, or was there some other implied meaning here?

**A:** No implied meaning.

**Q:** Now, in this second crash where you said that there were two big foot types: were the big foot types also dead?

**A:** Yes.

**Q:** You also said that some of the beings went into 4th density, sort of, at the time of one of these crashes. What exactly DID happen?

**A:** It is complex, but suffice it to say that they re-transited to 4th density.

**Q:** You said that there were five dead humans inside that were retrieval and study specimens. Where did they get these bodies?

**A:** Mexico and South America.

**Q:** Now, on two or three occasions you said I should be researching a modern-day connection between the Roswell event and the underground zones and the Canary Islands. What is the connection of the Roswell incident to the Canary Islands, other than the names? Are the Canaries a sort of headquarters?

**A:** Clue is that similar energies are employed.

**Q:** Recently, I went to this hypnotist down in St. Pete, who took me back to this incident when I was a child. My impression was that drugs were used on me. Is this correct?

**A:** Yes.

**Q:** What was the drug?

**A:** LSD.

**Q:** When I saw the werewolf type being sitting at some kind of console that controlled people. I had the impression that these people who were doing these things to me were robot type beings, that they were not human, and that they were controlled by this werewolf type being. Was that also correct?

**A:** Close.

**Q:** Who was this werewolf? I was expecting to see a Lizard, or anything but a werewolf. He had eyes like lasers.

**A:** Screen mask.

**Q:** What was behind the screen?

**A:** You know.

**Q:** Lizards?

**A:** Yes.

**Q:** Why would they screen themselves as a werewolf?

**A:** Cloak.

**Q:** Well, did I accomplish anything with this session, or was this woman just not the right one I need to go to, that I need to do more.

**A:** That is okay.

**Q:** The issue of Val Valerian being associated with beings who have “blockbuster” information has come up a time or two lately. There are a couple of ideas as to who these beings might be. As a matter of fact, we have discovered that Val Valerian is not as reliable as one would wish. He seems to be quite a disseminator of disinformation. So, who, precisely are these beings Val is associated with? Are they aliens?

**A:** No.

**Q:** Are they government types?

**A:** Yes.

**Q:** So, Val is a doorway for dissemination of information and disinformation?

**A:** Yes.

**Q:** Well, he has just recently posted some stuff that is so trashy that I really was taken aback. Is he hooked up with Scientology and Black Magick? That is where it looks like his information is tending lately. This Samuels guy has really written some strange stuff that seems to be loaded with disinformation.

**A:** Val trips up as do many...

**Q:** Well, who is this Samuels, and who is behind him? It sounds so much like Scientology...

**A:** Pay no attention to this, but some of his information commands serious review.

**Q:** Well, I know that! But, he has really gone off the deep end with this stuff! What does one have to do to keep from falling into such traps?

**A:** Find one's own path.

**Q:** On the alien autopsy video, Ray Santilli has consistently refused to reveal any information at all as to who was behind the release of this film. Could you tell us who is behind making available to him this alien autopsy information. Was it a rogue individual, or was it a deliberate leak ....

**A:** Latter.

**Q:** And that is why he has and will refuse to reveal his source to anyone. He simply CANNOT. Did the camera man as he was

described, ever exist at all?

**A:** Close.

**Q:** So, Ray Santilli is under a restriction that makes it utterly impossible for him to say anything at all in his own defense. He cannot and will not.

**A:** Close.

**Q:** Thank you. Good night.

END OF SESSION

## **8.10 July 22, 2000**

Ark, Laura, Frank, LC, CF, AK, IT, SF, PC

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Vostorra.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have guests tonight, guys! You notice?

**A:** Really?? You're kidding, right?

**Q:** Actually, I wasn't. You are the one who is kidding.

**A:** Yes.

**Q:** (IT) Is quantum tunneling important?

**A:** Vague, dear.

**Q:** (IT) Why did that pop in my head while I was meditating on the subway?

**A:** Has to do with the concept of enclosure, combined with motion. The enclosure is a space defined by the visualization of the perceptor, more than an actual physical state.

**Q:** (IT) [Attempts to read back remark with some difficulty.]

**A:** Suggestion: try to inscribe letters without trying to break into words while writing. Otherwise, you will lose step!

**Q:** (IT) That's right! I'm trying to anticipate what they are going to say. (L) And the interesting thing about this exercise is, it conditions your mind to NOT anticipate!

**A:** Which is good, indeed.

**Q:** (IT) This visualization of a perception, more than an actual physical state, is it that I am perceiving something and trying to put it into words? What am I perceiving? What is quantum tunneling? I was trying to think about it and said "forget it! Nothing travels faster than the speed of light..."

**A:** You will know soon enough. As we have said before: learning is fun!

**Q:** (IT) So, I should take each step as it goes. Was I abducted?

**A:** You have had some experiences relating to ancestral occurrences, especially. We see two females in your "bloodline" who were unusually strong in a psychic sense, my dear!

**Q:** (IT) I don't know! (L) I guess that, for whatever reason, it was because of your bloodline. (IT) Was that the Scottish thing?

**A:** No.

**Q:** (IT) Maybe my mother. I don't want to ask all these things relating to personal issues, but now they've got me thinking! Does this have something to do with why my grandmother decided to just die?

**A:** Of course. You see the connections as you reflect.

**Q:** (IT) That is so right. I'm trying to think. My grandmother left because she couldn't handle it, maybe?

**A:** No. Your grandmother transitioned because it was her time. Others saw it less well-intentioned.

**Q:** (IT) I don't understand at all. Now I am totally confused.

**A:** She "left" at the correct juncture. But, other persons were less than pleased, therefore, casting a slight pall over the situation.

**Q:** (L) Were there people who made comments about the time and place of your grandmother's passing; did they make an issue of it?

**A:** Feelings, Laura.

**Q:** (IT) I know that my mother and my grandmother kind of had a reconciliation. My grandmother didn't raise my mother; there's a whole crazy issue there. I only saw my grandmother twice in my entire life. I saw her once when I was very young, then we moved here and she moved to the Bahamas. My mother and her had no relationship, and then suddenly - I don't know what happened, I think my grandfather died - and my mother decided to get to know her mother better. My grandmother came to visit us in New York, and everything went very well. That was the second time I saw her. She started communicating with my mother. She was supposed to come visit and we were waiting for the house to be finished before she came, but she died before she could come. I think my mother feels very guilty about it. It hit my mother

very hard. She is still unable to deal with it. Anyway, I think my mother is psychic. She's probably the other psychic person. (L) What does all this have to do with whether or not IT was abducted?

**A:** We did not discuss abduction.

**Q:** (IT) But, this is the answer you gave when I asked about being abducted!

**A:** Yes. We gave the best answers on the current situation. Before one is prepared to hear about abductions, one must be properly conditioned. This includes proper level of awareness to the complex mechanical nature of abduction!

**Q:** (L) I guess that they want you to think about your bloodline, about your relationships, about all the related factors...

**A:** Okay, Laura, each student is on their own path.

**Q:** (IT) I agree. I never sensed an abduction, I never saw an UFO, so maybe I just should not be thinking about abduction...

**A:** Open mind.

**Q:** (IT) Maybe I am focusing too much on the wrong thing?

**A:** You are doing fine, but there is much more to come.

**Q:** (IT) So, whatever comes up, comes up. (LC) I'm really curious. I feel like all of us here have been drawn together for a reason. We had a hell of a time getting here, every one of us, but we did, and I'm just wondering what is this all about? Why did all of us feel so drawn that we just HAD to be here?

**A:** You are not wondering so much as you are seeking confirmation.

**Q:** (IT) You probably sense that we have a purpose together, or

that we know each other at another level, and you just need confirmation... I don't know. Why do YOU think we are drawn together? (LC) I don't know. I just feel something powerful.

**A:** Every one here thinks on more than one level. This already puts everyone into a different category than the status quo. You all have quite well developed senses, a more difficult task is learning to trust the messages. Remember, you all have received negative programming at the third density level, which is designed to derail your higher psychic awareness. You by now know that this is false programming, but we realize that the subconscious centers are more difficult for you to overcome. Patience will pay off for you big time!!!

**Q:** (PC) This is my feeling about the whole thing: us coming together, the energy created by each of us being in each other's presence is a key; it's unlocking something that we agreed to come together at this time, though it may not be apparent now, it's going to be. That's the way I have felt about this whole thing. (IT) Yes. I HAD to come. No matter what. (PC) Yes. (LC) I guess I was wanting confirmation of WHY I felt I HAD to come! (L) And they are telling us that "patience will pay off big time!" They don't say that sort of thing often, and when they do, it really means something big. But, we can't have a clue, because if we start anticipating, we block it! (laughter) If we just keep doing what is before us to do, things will keep happening to guide us. (F) The energy in this room is really powerful tonight, I notice. (PC) Yes. I just feel like crying. I'm tired, but energized. (IT) And I'm having so much trouble keeping up. I'm trying to listen to the letters one at a time... (L) And that's how we have to deal with this whole thing. It's sort of like listening to the letters one at a time. (LC) And my hand won't move until three letters after I hear one! It's so frustrating! It goes so fast. (A) What kind of programming do we all have? I know it's negative, but what kind in specific?

**A:** You receive programming daily from many sources, but the ultimate root is essentially the same.

**Q:** (IT) Yes, TV, cell phone towers, all of that, I guess...

**A:** Childhood training, etc.

**Q:** (IT) I was bombarded with religion when I was a child. I hated it. I tried to read the Bible from cover to cover, but by the time I got to Exodus, I knew that this was crap. I tried the Mormons. I didn't get past the second chapter because all of that was crap, too. I tried the Jehovah's Witness thing, and that was crap. I tried being an athiest, and that was crap. Everything that came to me, was crap. (L) Yep. We are in the doodoo for sure!

**A:** Yes, but the "doodoo" promotes powerful learning opportunities...

**Q:** (IT) That is SO true. I've been in the doodoo so many times before - and I'm STILL in the doodoo! (LC) Okay, another question, and this is a kind of selfish one I am thinking about...

**A:** Wait a minute, remember, your plane of existence is STS by its very nature and that is okay, because you're all where you are for a reason... Now LC, fire away and be just as selfish as you please, dear. (laughter)

**Q:** (LC) Well, if that's the case! I want to ask about past life relations between us. I'm sure there is.

**A:** Be specific.

**Q:** (IT) Do we all have some kind of past life connection?

**A:** IT is not LC.

**Q:** (L) It's LC's turn! (laughter) (LC) But she put it so well! (L) But, they are trying to make you think here. (LC) Let me just parrot

what IT said. Are there any specific past life connections between any of the women in this room?

**A:** Who?

**Q:** (LC) Well, let's start with Laura. Do I have a past life connection with Laura?

**A:** Before we answer that, we wish to hear from you what you perceive a past life circumstance to be.

**Q:** (IT) For some reason I feel a past life connection to SF. I feel like she was either a parent or someone who taught me a lot about me. I felt that just from reading her correspondence. What do you think? (LC) I don't know... the question didn't really form in my head until I got here...

**A:** How do you perceive the reincarnation process to be?

**Q:** (LC) I perceive it as you come back with people you choose to come back with, and that you choose people that you are karmically connected to. (IT) I see it a little bit differently than that...

**A:** Aha! We have a variance!

**Q:** (IT) I think that when we die and go to 5th density, that we make pacts with people in each incarnation, so when you come back, it is coming back to fulfill that pact. (LC) Yes, that is the way my line of thinking is going. But, when they asked that question, I was thinking that you have people you come back with because of closeness. Somebody may be your mother in one life, and there is a love bond, and then there are other people that you come back with because you have to resolve something to let go of that person rather than to get closer.

**A:** This is partially correct. But, there is more to it than this. For example, one can incarnate on various planes of existence, not

just the one you perceive currently. And, one may actually reincarnate on more than one plane concurrently, if one is advanced enough to do this.

**Q:** (IT) You know, a psychic told me that I had two lives going on at once... (L) Are you suggesting that ...

**A:** Yes, we are!

**Q:** (L) I was thinking it, but they didn't let me finish. For the record, I was thinking that we are all part of the same soul unit here.

**A:** To an extent, but you may not yet understand what exactly a "soul unit" is in that sense. And of course, there is more than one sense for this as well. The "trick" that 3rd density STS life forms will learn, either prior to transition to 4th density, or at the exact juncture, is to think in absolutely limitless terms. The first and most solid step in this process is to not anticipate at all. This is most difficult for you. We understand this, but this as also why we keep reiterating this point. For example, imagine if one of your past lives is also a future life?

**Q:** (IT) There we have quantum tunnelling!

**A:** Yes.

**Q:** (IT) This has to do with past lives and future lives.

**A:** Yes.

**Q:** (IT) But somehow I can't put it together yet. I can't connect it.

**A:** You will. "All in due time, my pretty, all in due time."

**Q:** (L) That was a line from the Wizard of Oz! When Dorothy wanted to know where Toto was. (PC) Now, I just want to say that I think that we have all of us here traveled back in time to change the way things are now. We inserted ourselves into this

time period to wake up and see what is really happening. This is 3rd density thinking, I know, but it is the only way I can describe it. We looked back on the way things happened, the way the world is now, and we have come back to change things. We have come from the future, to wake up now, because we didn't wake up before. (C) Maybe that's our "past life/future life" connection here? (PC) Right, we all agreed to insert ourselves in this time line.... (L) So, we ARE from the future... (PC) Because the world is going in this direction, and SOMETHING had to be done. That's what I see. (IT) Yes. We all decided to come back, but there was a strong possibility that we would not be able to wake up and link up. And that's why so many things happened to attempt to keep us from getting together. (PC) Not just that, things happen to keep us from waking up period! We've all been bombarded with stuff all our lives. (IT) Yes, and when we started waking up, and realized that we HAD to come together to "link" to DO whatever it is we are going to do, there has to be all kinds of things to prevent it - like Caroline's cats, even! (laughter) (S) I would like to ask a question about synchronicity...

**A:** Wait a minute... someone said something a short while ago that is surprisingly close to the truth. Now just a moment... reflect please.

**Q:** (L) PC was saying that we have come back from the future and inserted ourselves into this timeline...

**A:** Yes. That is close to being totally correct!

**Q:** (L) In terms of reincarnation, that we were talking about a few minutes before that, we are possibly incarnations of ourselves incarnated at different levels. This just happens to be one of the levels of reality that we are occupying, but there are other selves at other levels thinking and doing other level stuff, and these other levels are perceived by us as the future...

**A:** Maybe for some of you, but let us not get ahead of ourselves.

**Q:** (PC) The C's say that they are US in the future. So, we, being THEM in the future, some of who they are in the future, have come back as us, to do what we are doing, to undo what is happening on Earth...

**A:** Close, but more complex than that. It would be difficult for you to completely understand at this point, but let us just say that you are close.

**Q:** (C) I wonder if we, living here, as we are now, are also living in all the densities, one through six, at the same time, so that some part of us now, understands some part of us at all the other levels. Like, I am a tree, I am the water, I am here in this body, and I am in other densities also?

**A:** No, not really, but a good effort!

**Q:** (A) Well, PC binged on what she said about coming back from the future. (IT) They said I should reflect, so maybe we should reflect on other things...

**A:** You should reflect upon all that is in the reflection!

**Q:** (L) Everything. What is the reason for the use of the term "reflection?" (A) We never have left our source of origin...

**A:** "Alice through the looking glass."

**Q:** (L) When she went through the mirror, she was in an alternate reality. (IT) Are we in an alternate reality?

**A:** Yup. But then again, are not all realities "alternate?"

**Q:** (IT) True, because the source is the REAL reality, everything else is alternate.

**A:** Pretty close, IT. You earn a silver star!

**Q:** (IT) You guys are hilarious! I like stars and I like silver.

**A:** Cool, yes, but the gold ones are even better!

**Q:** (IT) I was writing something in my journal about supernovae being steps toward the Big Bang, in the sense that each supernova represents a reflection of ourselves...

**A:** In a more physiological sense, supernovae present cosmic energies which “up the ante” of awareness, when one is in close enough proximity.

**Q:** (IT) Now, this supernova that happened in fairly recent times - the Cas A supernova of 1658, or thereabouts - does that have anything to do with our awareness thing going on right now?

**A:** It has some to do with this conduit.

**Q:** (IT) I had that feeling. I went back and read “Supernovae, Vehicle of Ascension?” Did whatever happen with that supernova, is it affecting us....

**A:** The more interesting question would be, what about the NEXT supernova?!?

**Q:** (IT) There is one coming up, and that’s going to be the wave? Or...

**A:** No, no, no. No anticipation, please.

**Q:** (L) Well, that’s pretty hard when you said “what about the NEXT one!”

**A:** Reflection, yes, but anticipation? No!

**Q:** (IT) We have to go back to this reflection thing because they keep sending us there. (C) One thing that was said awhile ago was that maybe we, as a group, have created some kind of energy or

barrier. (PC) I think we are creating a possibility that would not have existed if we had NOT come together here.

**A:** Yes, but that is generally true in most similar circumstances. The question is the degree to which there is significance.

**Q:** (IT) How significant a possibility are we creating here now?

**A:** That is for you to see.

**Q:** (IT) So, we don't know. We sense something very important about changing the universe. (L) I think that it is also up to us, individually and as a group, to choose how we respond to the upcoming events. The saying "many are called, few are chosen" should be rephrased to say "Many are called, but few choose to answer the call." (PC) Everyone is called! (L) Yes. But so many succumb to the attacks, can't overcome the blocks and barriers, and choose to continue to view life in mundane, surface terms. When push comes to shove, how many really DO answer. It is a very subtle thing to read the signs and "see the unseen" in the morass of conflicting signals that the 3rd density reality sends to block our vision. (PC) Yes. Animals have an abundance of young in order that some will survive. I think there is an abundance of us so that some WILL wake up. The odds are against it, so there HAS to be an abundance of us that have come back for this reason. (S) The sea turtles. (PC) There is no guarantee that we would all wake up. (IT) Yes, and SOME of us could go back to sleep! (PC) Yes. (L) It is a constant danger to all of us. There was an interesting thing that a reader sent to me about the fact that there is a moment, a crucial point of choosing, and it is called in the Don Juan tradition "The Cry of the Eagle." A soul is called to choose a singular act that will change their life forever, and either they respond, or they don't. And, once the call has come, once the moment has come, if they don't choose, the call never comes again because the moment is gone forever. It's a soul sum-

mons. If they turn away from it, or think that it will come again, or that there will be other opportunities, then they are choosing to NOT respond, and it never comes again. Either you do it or you don't. (LC) And, of course, that is when the attacks really start!

**A:** No, LC, the attacks are ongoing.

**Q:** (IT) The attacks are always there, but it is just when you start to awaken you start to become aware of what they are and have the choice of perceiving the nature of them and choosing to overcome them, or to think that it is just stuff that happens, and you have to “go with it.” or submit to the circumstances...

**A:** Yes. Awareness is the key; knowledge protects, ignorance endangers.

**Q:** (IT) Yes, I could have just stayed home when we realized that our money wasn't going to be there as we planned. It was definitely an attack to prevent us from coming. (LC) Yes, the same thing happened to me. But, I had some money put aside that I called my “end of the world money.” I had been saving it for a long time, and I told my husband I was going to use my “end of the world money.” (laughter) (IT) Yes. I was determined to come regardless. And then, at the airport, when I missed my flight, and it was possible that we might not get another flight... I was even thinking about AMTRAK, renting a car, whatever. (LC) Yeah! IT doesn't even drive, and she was gonna rent a car! (IT) Yes, that is the choice that we were all faced with: is it important enough?

**A:** Its the lack of awareness of the attack. But that is okay, as we all learn at our own pace.

**Q:** (LC) Well, Caroline didn't come because her cat was going to have kittens. (L) I suppose that the conduit might have been the vet? (LC) But, she also is in that situation where she has had clear warnings, but says that the astrology chart says this or that

so that the energies aren't "right" to leave. (L) Well, that can be a form of attack to, to buy into all that stuff. Especially considering the timing and source of the information. But, let's change gears. I had a call from Vincent Bridges who informed me that the Wave series was really creating a stir. It seems that he has had a connection to this Dr. Hammond of the Greenbaum lecture fame, and also had a number of exchanges with Andrija Puharich, and it is Vincent's contention that the UFO phenomenon, the alien abduction phenomenon, and the many and varied other things we talk about and study and discuss, are a product of super advanced technological, human controlled mind-programming projects using the technology of Puharich and Tesla. Yes, it is supposed to be so advanced that they can not only read minds and can control minds, but that it is, in the end, merely human engineered programming. Is he, even in part, correct?

**A:** Well, there are elements of the phenomenon which may be connected to human, 3rd density STS engineering, but by and large, this is not the case.

**Q:** (L) He also said that it was his opinion, that the center of the web of all of this mind programming conspiracy, is in Tyler, Texas. Is that correct?

**A:** The what?!?

**Q:** (L) Well, what about the center of the human branch of the programming conspiracy?

**A:** We feel that Vincent needs to recharge his batteries a bit.

**Q:** (L) He also said that the area we are living is the center of a particular programming experiment, something like Nazi/Black magick cultists or something like that.

**A:** Better not to get too carried away. Remember, the root of all "negative" energies directed at 3rd density STS subjects, coming

from 4th density, is essentially the same.

**Q:** (LC) Are we being currently monitored by 4th density STS?

**A:** You are always!

**Q:** (A) That's the helicopters.

**A:** That is more likely 3rd density. Suggest a review of the transcripts relating to the situation in Nazi Germany for better understanding here.

**Q:** (A) Is that why you can't leave Tyler...

**A:** We wish to review some things first. The concept of a "master race" put forward by the Nazis was merely a 4th density STS effort to create a physical vehicle with the correct frequency resonance vibration for 4th density STS souls to occupy in 3rd density. It was also a "trial run" for planned events in what you perceive to be your future.

**Q:** (L) You mean with a strong STS frequency so they can have a "vehicle" in 3rd density, so to speak?

**A:** Correct. Frequency resonance vibration! Very important.

**Q:** (L) So, that is why they are programming and experimenting? And all these folks running around who some think are "programmed," could be individuals who are raising their nastiness levels high enough to accommodate the truly negative STS 4th density - sort of like walk-ins or something, only not nice ones?

**A:** You do not have very many of those present yet, but that was, and still is, the plan of some of the 4th density STS types.

**Q:** (A) And that's who are operating the helicopters?

**A:** Helicopters are STS 3rd density, no doubt influenced from 4th density STS.

**Q:** (A) Was that woman at the SCIONS meeting who kept interrupting one of those programmed individuals sent in as an agent of disruption?

**A:** Scatterbrain.

**Q:** (A) I want to know what is going on in East Texas! (L) Yes. Even if Vincent is not right about it being the center of the web, he says that the first phone call Hoover made after the Kennedy assassination was to somebody in Tyler, Texas...

**A:** One thing that is interesting about East Texas, or more specifically, Northeast Texas, is that the water is very heavily fluoridated. This makes one more susceptible to intense forms of ELF mind programming. There have been some experiments conducted in this area relating to this.

**Q:** (A) That's Extremely Low Frequencies?

**A:** Yes.

**Q:** (A) But the water tasted so GOOD! It was the best water I ever drank! I'm serious!

**A:** That is by design.

**Q:** (A) Oh, they're so tricky! I mean, you drink the water there and you just say "This is SO good!" And you want more and more!

**A:** If you wish to catch bees, are you going to use a net, or some honey, maybe??

**Q:** (A) That makes total sense. (IT) Does Brooklyn have this problem?

**A:** No, Brooklyn has other problems.

**Q:** (IT) Yes, Dwayne and I discussed how the kids in the neighborhood are just interested in their clothes and their music - they

don't even ask or think about the questions of their reality.

**A:** There is something located under the "East New York" neighborhood...

**Q:** (L) Where are the ELF waves in East Texas generated from?  
**(IT)** So, what's going on in East New York? (L) Let's get finished with Texas first!

**A:** Centered in two generation points: Bryan/College Station, Secret government facility connected to NASA/NORAD and located in Fort Bend County west of Houston.

**Q:** (A) West Texas? All the way up there from Houston? (C) Bryan College is only about an hour away from us!

**A:** Satellites are used to concentrate the signal in a "bounce back" mode. Power station covers underground facility in East New York. Very unobtrusive looking. The healthiest borough to live in in New York City is the Bronx.

**Q:** (IT) Yes. I believe that. When I had that breakdown in 94 or 95, I was literally going crazy. Dwayne and I moved to the Bronx, but we ended up moving back because we got this house with my parents. But living in the Bronx was the best experience for me. It was so healing. (PC) I have something to say. I'm kind of frustrated right now. I feel that - and this is maybe my own anticipation - but I feel frustrated with the questions tonight because I feel that we are supposed to go somewhere ... (IT) Yeah, I feel that too... (PC) And I am feeling frustrated that this opportunity - which is a big deal for me - is not going where it is supposed to go. I feel that there is something we all need to know. What is that thing - what we all need to hear - since we are all here?

**A:** When you leave this grouping that you perceive as your immediate present, the layers will unfold more and more rapidly for you. Patience is the key, as all learning is a continuity... In other

words, when new realities are revealed for you a week, a month, a year from now, and soon, as a result of these experiences, the value will be just as strong for you as it would be if it were all revealed for you tonight.

**Q:** (A) For me, just being here and making the connection is what is important. I don't feel let down at all. I didn't anticipate some sort of great revelation just because I'm here...

**A:** This is an ongoing process.

**Q:** (PC) Well, everybody is saying "don't anticipate!" But it is so very serious to me! I can't even think! I'm here for a reason. I'm not just here for a good time, though that is part of it. I just feel that being here, for me, is a monumental event in my life....

**A:** But did you expect the significance of it to all be resolved right now?

**Q:** (PC) No. But, I feel that I have missed something tonight. I feel that there was something I was supposed to say or ask and I haven't. (Ark) We always miss something! (PC) I feel like I am going to go home and think "I blew it" because I wasn't paying attention or something. There is too much commotion in the room and my mind is... I can't focus... (F) Well, it's like when you go to the grocery store, there is always something that you forget. (PC) Yeah. But if I'm going to the grocery store and forget something, it's no big deal. (IT) We can always meet again....

**A:** It is okay to feel this way, but do not be surprised if it all comes together when you least expect it.

**Q:** (PC) So, I was right. My physical presence here was the main thing. (L) Maybe it is like some sort of subliminal key?

**A:** You were given a key to put on your keychain!

**Q:** (L) So, there IS some sort of exchange going on here at levels

we don't even understand. (LC) I want to go back to that question about the supernova. They said it was a more interesting question as to whether there was going to be another one...

**A:** Wait and see.

**Q:** (IT) Yes I have a long way to go and a lot of work to do just to understand what I need to know...

**A:** All of us have a long way to go, but getting there is half the fun. And on that note, good night.

END OF SESSION

## 8.11 August 5, 2000

Ark, Laura, Frank, Jon, Carrie

{This was a really weird session. Jon was an emeritus professor of economics from a northern university who had contacted us and wrote that he was going to be vacationing in Florida and could he attend a session. We checked out his credentials and he was who he said he was but, at the time, we didn't realize what a strange bunch economists who worked with Milton Friedman actually were. Anyway, here's this guy Jon at our session. The Cs address him and he actually lost his power of speech and practically became comatose almost through the whole session! This happened right after the Cs ask him about somebody named "Mel." What we didn't know at the beginning of the session was that this guy was closely associated with Drunvalo Melchizedek and his "flower of life" stuff, that he - and a bunch of other people that we later encountered in various ways - including Vincent Bridges - had attended some sort of initiations in the Great Pyramid at Giza. Curiously, Johan M, who had contacted us and attended a previous session ALSO had some sort of experience in

the pyramid. So these sorts of people were just crawling out of the woodwork like crazy and all wanting to come and visit and more or less take over the Cs or tell us how to do stuff. So this was one very weird session.}

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Komorrih.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have guests this evening; this is Jon and Carrie. They have traveled down from Ohio...

**A:** Really?

**Q:** Yes, actually. Jon, would you like to lead off? Or Carrie? [Negative.] Okay. I guess I'll go first then...

**A:** We would like to hear from your guests... We welcome Jon and his esteemed wife! Well....

**Q:** (J) I'm glad to be here, and...

**A:** You have been "here" before.

**Q:** (J) I guess I should add that I feel the service here is very important.

**A:** Important is good, but subjective. Start asking, Jon.

**Q:** (J) Okay... {very long pause. Jon is unable to speak.}

**A:** Do you remember Mel?

**Q:** (J) No, no.

**A:** Search... We are attempting to get the 'ball" rolling. Jon is reluctant. [Long pause - Jon just stares at everyone.] O.K., if Jon does not wish to participate now, we will let him "jump in" when comfortable.

**Q:** (L) I do have a question. It says here in this Top Secret document penned by the so-called Nexus Seven: "The bottom line is, ARC has discovered that it is very possible that confirmation, validation and consensus scientific acceptance equals an open invitation to invasion. Think about it. Denial may be one of the most powerful measures we have at our disposal to prevent the overt acceptance of the reality of advanced alien presence into the consensus consciousness. Denial is a munition." They are saying that as long as the whole idea of alien presence remains in the realm of the fantastic and kooky, the implausible and mentally ill" that it is a line of defense against aliens. They see this as just a little "guided free will" to protect consensus belief using "popular deployable psychological munitions of belief." They are saying that denial is a psychological weapon, a "deterrent of aliens into mainstream reality since the aliens seem to respect the stance of individual and group consciousness and acculturation free-will more than military might and power. Therefore, we can, by accepting alien presence and existence above board in enough mainstream public, unwittingly turn off the restrictions against overt contact the aliens are following. The overt invasion trigger is our general human acceptance." Could you comment on the idea that denial of the reality is protection? Is that, in fact, so?

**A:** No. Protection comes from awareness, not the other way around.

**Q:** That was an interesting idea to me, so I did want to pose it. Another idea in this document was that the patriarchal, monotheistic religion brought some measure of blanket protection. From

this assessment, as soon as the patriarchal monotheism was installed on the planet, the alien presence withdrew. Is this a valid concept? Does the patriarchal monotheism act as a deterrent of alien intrusion into our reality?

**A:** This is a confused concept. Why would aliens install monotheistic principles if the result is to close off the contact opportunity?

**Q:** That's what I thought myself. I mean, what better contact opportunity than under the guise of god, Jesus or angels or the Holy Ghost. Alien intrusion into our reality was, in my opinion, facilitated via the monotheistic religions. But, they did note that after the institution of monotheism, the APPARENT alien contact became much less, thus the conclusion they drew.

**A:** The two events are either coincidental or inaccurately measured.

**Q:** Well, it is clear that the whole monotheistic religion was a perfect front for the alien contact to continue to feed on humanity within the holy of holies of the temples. It did NOT stop, as this document suggests. The whole animal sacrifice thing, the offerings to the gods, the chanting and praying and all that; it just gives a whole new meaning to cattle mutilations! Sheesh! Okay, there IS something very interesting in this document. "What is the final ontological matrix of hidden truth? What elucidates all the aspects of the true-to-life UFO phantasm in our past, present and future? What are the critical goals of Echelon beyond information suppression and technological catch-up? What are the

hyper-intelligence focal points for the future? The sun, our sun, is dying, and too soon. This was caused by regional dimensional vortex shutdown some 90,000 years ago. Solar instability can cause much life on Earth to be unsustainable in 40 years. Ancient astro-theology calendars all end around now. There are also dangerous interplanetary bodies, with civilization threatening capa-

bility due to cause more serious damage to Earth in another 150 years. One way or the other we are slated to leave Earth, sooner or later, or else. This is a prevailing secret truth. Those in control would rather save themselves and a few elite than worry about the whole of mankind, despite the presence of a few well meaning but deluded true human patriots amongst the bunch.” Is, in fact, our sun dying?

**A:** Yes, and so is everything else.

**Q:** Is it going to do it in 40 years?

**A:** You do not understand our attempted allusion. What is not dying?

**Q:** Well, I KNOW that, but they are saying that our sun is dying too soon.

**A:** No. What is “too soon?”

**Q:** Well... (A) Forty years is certainly too soon!

**A:** Why?

**Q:** (A) Because scientists would normally give the sun much longer...

**A:** But do “scientists” really know?!?

**Q:** You are NOT helping here! Are you saying this guy is right?! I don’t want to talk about it anymore!

**A:** Be patient, Laura, this is a lesson.

**Q:** Is our sun slated to burp and blink out in 2012 with the Mayan calendar?

**A:** We asked YOU a question. It is impolite to not answer!

**Q:** (A) Well, no, scientists don’t really know; but they conjecture.

**A:** Ah hah! Conjecture!

**Q:** So, what's your point?

**A:** Our point is: what is too soon and why?

**Q:** Too soon would be... well, I guess that in completely objective terms, there is no such thing as "too soon." When things happen, it is exactly the right time for it to happen. When something happens, everything is perfect.

**A:** Okay.

**Q:** So, in the deepest sense, nothing is ever too soon... however... (C) What situations would have to be in place for this to happen within forty years?

**A:** There are unlimited numbers of situations...

**Q:** Are any of the situations that would have to be in place for the sun to burp and go out in forty years actually present and activated in our present time-line?

**A:** Burp?

**Q:** Well, you know what I mean! Expand, become a red giant, burn out, run out of gas, go supernova...

**A:** Some of those possibilities are always present, especially when combined with multitudinal external factors.

**Q:** What would the external factors be?

**A:** Energies, or cosmic forces present in space at various locators which the sun would pass through in its journey through space, for one example.

**Q:** Are we slated to pass through any of those energies or forces?

**A:** Wait and see.

**Q:** You guys can't do that to me!

**A:** Yes we can!

**Q:** Well, let me ask the next question on that subject. Does any of this have to do with dimensional vortexes that were shut down 90 thousand years ago in the area of Sirius?

**A:** We are interested in knowing the "dimensional shutdown of vortex process." Could you explain, please?

**Q:** Is there such a thing as a dimensional vortex?

**A:** Semantics.

**Q:** What would you call a dimensional vortex?

**A:** Once again, this is not flowing because you are navigating haphazardly through subjective proclamations.

**Q:** So, you are saying that all of this analysis of what the deep ontological truths are, is just subjective proclamations. Was there ever something that happened that might have been perceived by the person who wrote this material, as a dimensional vortex shutdown 90 thousand years ago?

**A:** What is that?!?

**Q:** So, basically, you are trying to point out that there is no such thing as a dimensional vortex shutdown. But, you have said that the planet Kantek exploded between 70 and 80 thousand years ago, right?

**A:** If so, that is not what the writer is attempting to portray

**Q:** Could it have been a supernova?

**A:** Look here! This is pointless.

**Q:** So, all of this stuff is nonsense?

**A:** No.

**Q:** Are you telling me that I am too dense to get what you are trying to say here?

**A:** We would normally not suggest something as harsh as that.

**Q:** Well, the only thing you didn't say was "but."

**A:** Okay; "but."

**Q:** So, I am really missing the point here. Okay. What I am getting from what you are and are not saying, is that this person is clearly trying to portray something, and that there IS something behind what he is saying, but I am just too dense to figure out the right question so you can download the answer.

**A:** Dense? No my dear! You are just learning, as are we all.

**Q:** 90 thousand years ago. Is the 90 thousand a parameter for something? Can I start there?

**A:** We doubt it!

**Q:** Now, I did have a thought that this 90 thousand year cycle could be the period of the companion brown star you have said is on it's way into the solar system. Is that what they might be talking about?

**A:** Closer.

**Q:** So, what they are really talking about, or may have seen in some way, is the companion star, rather than the death of our own sun. (A) Let me just ask a simple question. Can you estimate the liklihood that the sun will die in 40 years?

**A:** That is unlikely.

**Q:** Well, what a relief! (A) We are done! How unlikely?

**A:** There is one chance in 189 million.

**Q:** Well, when I read this Top Secret document and they said this business about the sun, I just really wondered where they were getting all this! I mean, does the secret government really believe this crap? And if they do, and all their actions are geared around that, then that would explain a lot. But, if they don't believe it, then they might even be responsible for putting out this kind of disinformation just to make people panic and get even more anti-government so they can have more excuses to clamp down on the masses and take away more freedoms! This Nexus Seven says right up front: " This document is a clear and present danger to the mental health of unstable persons!" Well, they DID warn us! (laughter) (A) Well, it's a Val Valerian source! The fact that one or more things are wrong does not mean that everything is wrong!

**A:** Arkadiusz is right on the money!! There is much accurate information there and some disinformation mixed in!

**Q:** Yes. I figured out that as long as the Nexus seven guys were talking about the secret government echelons, the ideas of the compartmentalization, the views of the different factions about how to manage the alien threat, and so on, he was on pretty safe ground. But, when he launched off onto the many things that were clearly borrowed from a number of channelled sources, including Billy Meier, he really missed the boat. But, it made me aware that there are people in the government who really are following channelled material, who are using it to make their assessments, because they really don't have much choice. They are as much against a brick wall as most everyone else in figuring out the whole scenario! I guess that Billy Meier and now this Anna Hayes, are their favorite guys because it appeals to their STS hierarchical mindsets. But, when they start to rely on channelled sources for their explanations, they run off the road be-

cause most of that sort of information is put out by the very beings they are trying to second guess, who clearly, from all their behaviors, have a serious vested interest in remaining behind the curtain, so to speak. It's hardly likely that they are going to go to all the trouble doing wicked things in secret, and then blab all their secrets to every Gray Hugger on the planet who sits down with a pyramid on their head! And, when the abductors come and "take you to their leader" to "explain the facts of life" to you, because you have been "demanding answers" all your life, don't expect them to tell the truth. It's like the Wizard of Oz when he finally was unmasked: he was still a humbug and gave out fake hearts, fake diploma's and worthless testimonials. There is a deep lesson in that scene! If the aliens are maintaining a covert operation, but then DO contact people, do they expect them to tell them the truth? Sheesh! You'd think these big shots in the military would figure THAT one out! It's pretty standard intelligence maneuvers! I think that Nexus Seven runs afoul of his objective, unless his objective IS disinformation. I would like to know: what is the possibility for Sirius to go supernova?

**A:** Sirius is indeed a supernova candidate.

**Q:** Well, it's about 8 light years away. I don't think the human race would survive that one!

**A:** In the words of a wise philosopher: you would fry!

**Q:** (A) That's a wise philosopher. (L) What is the likelihood of Sirius doing the supernova number in the next hundred years or so?

**A:** Not good.

**Q:** So, we can forget that one for now. Okay, last session you brought up the subject of Frequency Resonance Vibration. You suggested that there are certain STS forces who are developing

or creating or managing physical bodies that they are trying to increase the frequency in so that they will have bodies that are wired so that they can manifest directly into 3rd density, since that seems to be the real barrier that prevents an all-out invasion, the fact that we are in 3rd density and they are in 4th. Now, I assumed that the same function could be true for STO individuals. It seems that many individuals who have come into this time period from the future, coming back into the past via the incarnational cycle so as not to violate free will, have carefully selected bodies with particular DNA, which they are, little by little, activating so that their 4th density selves, or higher, can manifest in this reality. Is it possible for those energies to manifest into such bodies which have been awakened or tuned in 3rd density?

**A:** STO tends to do the process within the natural flow of things. STS seeks to alter creation processes to fit their ends.

**Q:** This Top Secret document and the Anna Hayes material to some extent, both talk about many abductions being “ourselves from the future” who have come back to the past, or what is for us, the present, to abduct their own bodies to make genetic adjustments so that they can advance and not make the mistakes they made in another timeline. Is that, in fact, part of the scenario?

**A:** Very close to the truth!

**Q:** Can you abduct yourself in an STO manner and help yourself in this way? Can that be STO?

**A:** It is not, because that is not STO.

**Q:** So, when that is happening, and if it is happening, it is occurring in the STS parameter?

**A:** Yes.

**Q:** How do the STO manage?

**A:** They do not concern themselves with such things.

**Q:** Well, if the STS guys are genetically tweaking themselves to have some kind of different outcome for some reason that we do not perceive, don't you think there should be a balancing action on the STO side of some sort?

**A:** You are thinking in STS terms. But that is natural, since human 3rd density is STS.

**Q:** You say they don't concern themselves with that. What do STO individuals coming back from the future into the past concern themselves with?

**A:** Answering calls for assistance with knowledge.

**Q:** What do these STS individuals coming back into the past hope to do by genetically tweaking their ancestors? What happened that they want to have happen differently?

**A:** Infinite number of possible answers to that question.

**Q:** So, they are coming from all different timelines with all different kinds of agendas - all designed to serve themselves. {Jon finally is able to speak.} (J) I was thinking along another line of questions. In 1995 I was in the Great Pyramid and it appeared that the King's chamber activated in response to certain tones that we made.

**A:** Pyramids constructed through sound wave focusing.

**Q:** (J) Did it respond? Did we activate it?

**A:** Yes. Not activate, stimulate. Block fell.

**Q:** (J) We have been talking about moving in time, or at least out

of this time/space dimensional fix that we are in... Is this important to continue?

**A:** You have already experienced some of this in dribs and drabs. The flash you see signals “time portal opening.”

**Q:** Do you see a flash? (J) Maybe. I don’t remember one though.

**A:** Yes. Yes it is important to continue efforts. Found gene.

**Q:** Were you thinking something? (J) No. (A) There was the previous question about whether it was important to continue... (J) The intent was to ask if it was important to work with Time Technology.

**A:** We answered.

**Q:** (L) Found gene? Maybe you have a gene for it?

**A:** Laura, let it rest please.

**Q:** (L) Okay, I won’t say any more.

**A:** Who is Helen?

**Q:** (L) Well, nobody knows. Helen of Troy? Jon is not very talkative tonight...

**A:** He is tired and disconsolate.

**Q:** Why?

**A:** Reflective. Trying to find time travel, when it is nearly within grasp with some current and past associations.

**Q:** Is sound what is going to make the machine work?

**A:** Networking.

**Q:** Is the present design the foundation to start with?

**A:** We wish no further comment.

**Q:** I guess they are saying you are very close... (A) Just more power...

**A:** Leave this.

**Q:** Are we being monitored?

**A:** Maybe.

**Q:** (A) I want to know where this Nexus Seven comes from? Is it one guy or a group?

**A:** Group.

**Q:** Who are they associated with?

**A:** Hallinden.

**Q:** What is that? Hal Linden? We have this page in this Top Secret document that says “decode this simple cipher key and super secrets are available to you if you know how to slither.” Then, there is a code, and a couple of hints. I would like to know if it is a joke or if it is a real code?

**A:** Code is geometric. Not a joke.

**Q:** What is the point of this code? If we decode it, do the guys in the three piece suits come to our door?

**A:** Only if you telegraph it.

**Q:** (A) What is the point of this code?

**A:** Exercise to gauge communicative potential interest.

**Q:** (A) Who is to gauge?

**A:** Writer, et al.

**Q:** So, if somebody decodes it, and communicates to them that they have decoded it, what would happen?

**A:** If you contact group, you are “let in.”

**Q:** (A) Oh, I see. And the code is how to contact the group!

**A:** Close.

**Q:** (A) Do we want to be let in?

**A:** Up to you.

**Q:** Well, it says “slithery.” (A) We can decode just for fun! (L) I want to ask my stock question. How come my stocks are all going down? You told me to buy ’em, I bought ’em, and now they are all going down. I’m losing my shirt here!

**A:** No.

**Q:** Then tell me what’s going to happen with the stock market!

**A:** It will be there.

**Q:** Swell! Are my stocks going to climb?

**A:** What do you think?

**Q:** I have no idea! Give me percentage... a probability. What is the probability that I am going to be really happy with my stock picks by December?

**A:** 67 percent.

END OF SESSION

## **8.12 August 17, 2000**

Ark, Laura, Frank

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Zallah.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We received an email from some guy who says you guys are 5th density STS, dark forces, and all that. According to him, you are really leading us down the primrose path. It was a very upsetting email because he said that everything Ra said was absolutely the LAST WORD, and you guys are chopped liver, so to say. I shouldn't even ask about it...

**A:** No reason for upset.

**Q:** I know. But, he did suggest that Don Elkins committed suicide because that was his pre-incarnative plan. Is suicide possibly part of a plan made before incarnation?

**A:** It is one of many choices available.

**Q:** In Don's case, was it his plan to commit suicide at that point, or did he commit suicide because he was under such extreme attack?

**A:** Well, his suicide was his choice.

**Q:** Was it his choice before he incarnated? Was it mapped into this incarnation?

**A:** It is a choice open to all.

**Q:** (A) I would like to know what was his reasoning. How did he justify this choice to himself?

**A:** It was an escape.

**Q:** An escape from what?

**A:** Displeasure.

**Q:** Displeasure from whom? Himself or others?

**A:** Many things.

**Q:** What did this displeasure relate to?

**A:** Not important!

**Q:** Did he feel this displeasure from Carla?

**A:** See previous response.

**Q:** What was important about what was in his mind?

**A:** When one feels displeasure, one sometimes chooses to exit.

**Q:** So it was HIM who was feeling displeasure. Did he have no pleasure in life? Was everything bleak and dark because of the information they were bringing through?

**A:** Laura, it is not necessary for you to probe further into this.

**Q:** If you guys were an STS 5th density source, obviously you would not tell us the truth about whether you were or not. But, I don't think you are because so many things you have said have been verified. But, on the other hand, you have said that the STS forces have the ability to create confirming synchronicities to validate their disinformation. So, having things validated is not necessarily proof of STO orientation. I know it is a silly question, but how can one identify a 5th density STS source?

**A:** Not often communicative.

**Q:** My thought was that a 5th density STS being would be so encapsulated, so contracted, that they would hardly bother to GIVE anything... "give" being the operative word here. I would think

that such beings live only in thought and are simply not WILLING to communicate. Is that correct?

**A:** More or less.

**Q:** Well, a couple of weeks ago, we had Jon C here. When we sat down to have the session, and he was present, he was basically unable to say a word. He later remarked on the fact of how unusual it was that he was unable to speak. He was clearly almost paralyzed. Can you tell us why?

**A:** Jon is a fun type.

**Q:** When you say that, what do you mean?

**A:** Entertaining.

**Q:** Is he, as he believes, a 5th or 6th density soul who has come into this reality to help us change the universe?

**A:** By now, we feel your acquired knowledge is sufficient to answer that question for you.

**Q:** Okay, we have a woman coming on Wednesday to talk to us about putting this book together. Her name is Bobbie J\*\*\*, and her company is called CasAnanda publishing. I do think we need some professional advice and help on this project because we don't want it to look like we don't know what we are doing. We could probably muddle through, but...

**A:** Maybe it is better if you do not know what you are doing.

**Q:** So, that almost makes me think that you think we ought to do it ourselves, even if we don't know what we are doing. Maybe get a "how to" guide.

**A:** We feel you learn by observation, and, other ways too!

**Q:** Is trying to get the book out by January too soon, or should we wait for the May show?

**A:** When you schedule in matters such as this, not only do you bring about stress for yourselves, but you also may miss opportunities. It is that old “anticipation” bug again you know!

**Q:** So, there may be something else in store that we don’t even know about.

**A:** We see exponentially building interest out there... Who knows which parties may step up to the “plate.”

**Q:** Will the investment club work out; will it be a binder of the group or a source of contention?

**A:** If everyone understands the mechanics, there is no contention. by the way, you must be an impatient investor! Good things happen to those who have patience and avoid anticipation.

**Q:** What do you mean good things happen to those who are patient and avoid anticipation. I would just like to be able to buy more stocks and I don’t have the money.

**A:** Oh yes, a wee bit... and money flows from unexpected sources.

**Q:** Our little egroup discussion list is growing. Everyone is talking about the Wave: what does it mean, what is it, when is it coming, how are we going to be able to tell, and so on. I have been collecting the material and getting it in shape. I have been learning a lot as I go along as well. It isn’t finished, but as I go along, I do have some questions. We would like to have a little bit of a clue about the progress of the wave. I would also like to know if this Wave is sort of like the recompiling of a computer program, with the universe as the program? What is the progress, and is it going the recompile the program of our universe?

**A:** So many questions rolled up into one. But, one way it might go is that all of a sudden, everything that ever was is new, everything that IS is new, and everything that will be is new. Programs change, oh we suppose, what an awesome event indeed!

**Q:** Is it important for the information about the potential making new of everything and the awareness of the state of the planet as it is now, or the state of the universe, be shared and spread so that as many people as possible will be aware at the point of the arrival of the wave so that it makes it more likely that beneficial changes will occur, that the universe will change in a positive way? Or is that simply not even important. It will change the way it is going to change no matter what anybody does?

**A:** Closer to 2nd criterion.

**Q:** In other words, we are doing what we are doing, and it doesn't really matter what we are doing. The Wave will happen, everything will change, become new, and that's that?

**A:** What matters most is what others are doing, have done and will do.

**Q:** Who are these others that it matters most what they have done, are doing and will do?

**A:** Program rewriters, i.e. you and us in the future.

**Q:** So, what we have done, what we are doing, what we will do - WE - is important? I think that I missed something. I thought you said that what we were doing simply didn't matter.

**A:** You are/will be others.

**Q:** Okay, how is what we are doing now helping or hindering this process?

**A:** No help/hinder, just is.

**Q:** So, this has all been done before? It's a foregone conclusion how it is going to turn out? It's a done deal?

**A:** No Laura, stop your linearishness!

**Q:** I don't understand. Is what we are doing making a difference?

**A:** What is "time?"

**Q:** Time is an illusion. (A) Is doing also an illusion?

**A:** If you are thinking in linear "time" terms.

**Q:** In other words, the best way for an STO future to manifest is for us not to anticipate that ANYTHING we do will matter. Because, if we are anticipating that what we do will make a difference, it won't. It is wanting. (A) I can't stop thinking that my working is going to be useful! (L) I can't stop what I am doing either because it is what I DO. It is being ME. We have to stop anticipating. We do what is in us to do without expecting it to matter.

**A:** And you do it because you are directing you to do it from another plane of existence where you know the score. Where you are on your present awareness plane, you are largely, though not completely, scoreless and clueless.

**Q:** So, it is from another level of reality that we create THIS reality?

**A:** Close.

**Q:** How much input do we have from this level of reality regarding the creation of a future reality, and I use the term "future" loosely, but meaning "future" as we perceive it from this reality? How much input?

**A:** About as much awareness as a small child does when contemplating how to fly the plane they are riding on.

**Q:** Well, you have talked about the Wave before, and I complained that we did not have time to do certain things that you had suggested that we do. You said that, yes we would, and that these things were suggested to “prepare” us for this event. Just trying to deal with it from a linear point of view, we still have to build this pool with the columns, get a Nobel prize, supposedly, work with people on the crop circles, and all that. Are we still looking at doing these things in this linear time progression that we exist in; that we are aware of as small children on a very large plane?

**A:** If you let it flow, it will flow.

**Q:** So, you are us in the future, we are you in the past - when you say this, are you “us” in the future in the sense of ALL mankind, or in the sense of any particular group of mankind?

**A:** In between those limited options.

**Q:** Could you be more explicit?

**A:** No, because you would not “get it.”

**Q:** When I post material on the website, those people who resonate to the material believe that this refers to them also. I have been of the opinion that Unified Thought Form being must mean a very large group as represented in this density. I know that we are dealing with limiting terms. But, is this applied to people who CHOOSE the Cassiopaeon option?

**A:** Maybe it is best to say it applies to those who recognize the application.

**Q:** So, if they recognize it, if they know it is them, they are part of it. (A) But, thinking in nonlinear terms, its up to us to work to make this precise. You are asking this question which implies that the answer exists. But, exactly what the answer is may be it

is not yet chosen, and it is up to us to make it this way.

**A:** Lodestar is a clue for you.

**Q:** I guess that means a guiding star of some sort. Something that attracts... a lodestone is magnetic, it is where the compass points. In the myth, Cassiopaea, Danae, and Athena work together to enable Perseus to cut off the head of the Gorgon and kill the sea monster and rescue Andromeda. Of all the mythical heroes, Perseus stands out because he was SUCCESSFUL. He went on the quest, he succeeded in the mission, he freed the maiden in distress, killed a slew of Lizzie types, balanced the situation in his environment, and then even lived happily ever after. He didn't lose his reason, he didn't fail... it is about the only really successful myth. He DID it. And did it well. Is that...

**A:** A quest is successfully followed one step at a time. No need to gauge the staircase.

**Q:** The only point I was trying to make was that maybe the only reason for the Cassiopaeian connection, maybe even for the term "Cassiopaea," is that it is the archetype of the function...

**A:** That is good, planning book fairs? Maybe not so good. We shall see!

**Q:** You guys, just basically, from the whole start of this thing about a book, have basically hinted that there is something else in store, and that we should not even try to do that...

**A:** We have not said that that is not the way. We have hinted that the way will become clear when it is necessary.

**Q:** (A) I think that it is good to have an external pressure to make things happen. Composers, like Mozart, had to be under pressure to produce. There should be pressure. We need to have income to build this pool and other things. So, if we put it into the

indefinite future... (L) But they said money will come from unexpected sources. I don't know where or how that can possibly be. But YOU were certainly unexpected! I would have dreamed of YOU! (A) Well, there may be another unexpected millionaire may come to replace me! (L) Nobody could replace YOU! (A) How else shall we explain this unexpected money?

**A:** No need to explain, or expect either, silly! You should know that the one time that Mozart wrote music under external pressure he quickly transited to 5th density.

**Q:** (A) Well I know that I work best under standard external pressure.

**A:** No, because you only sometimes think it is external, but it is not really. When you have been "treated" to external pressure, you have rebelled.

**Q:** (A) Okay. UFT. This is one of these things that I don't know what it is good for, because the Wave will erase everything and make everything new. Yet, it is in me, so let me ask. I don't know what it is good for, but I want to do it. Einstein was working on his UFT for like 30 years. Maybe more. He was changing his methods. At some point, did he realize that he found a solution? During all these thirty years, was there a point where he came upon the right solution?

**A:** Yes, but sadly, his solution for UFT largely erased TOR.

**Q:** (A) Once he found this solution, did he reject it because it erased TOR?

**A:** No. His progenitors sealed it, in order to keep intact the status quo.

**Q:** (L) His progenitors? Isn't that your parents?

**A:** Other definitions apply. [A source from which something develops.]

**Q:** (A) Can we have an idea of which year Einstein found the solution that erases TOR?

**A:** Sure, it was 1938.

**Q:** (A) According to what I know, between 35 and 38 there was a period in which Einstein published nothing. In 38, he published a paper with Bergman which was a revival of Kaluza Klein theory. That was exactly 1938. So, I guess that was the paper that was close.

**A:** Can you obtain a copy?

**Q:** (A) Yes, I have a copy.

**A:** Good!!! Clues abound within.

**Q:** (A) What I do not understand is why, a few years later, he completely abandoned that and started working very hard on a completely different solution. If he knew...

**A:** Was under control.

**Q:** (A) Can you control somebody and make him spend years.... Oh! Mind control! They got him!

**A:** Why do you think he emigrated to the United States in the first place?

**Q:** (A) Well, that is not a surprise. He was a Nobel Prize winner and America was getting together every possible Nobel Prize winner, and also there was the persecution of the Jews, so it was natural.

**A:** More to it than that. What about Freud?

**Q:** (L) I guess they didn't want Freud! He didn't know anything about UFT! (A) Now, apparently Von Neumann was also involved in application of UFT. But, Von Neumann was, as far as we know, doing a completely different kind of mathematics. He didn't even really know geometry, differential geometry. He was doing completely different things. So how come the UFT that was discovered by Einstein, involved Von Neumann. What did Von Neumann contribute to this project?

**A:** Von Neumann was one of three overseers at Princeton with level 7 security clearance, and a clear budget request permitance.

**Q:** (L) My question is, about Von Neumann, as I understand it, Von Neumann was supposed to have been involved with the creation of a time machine, right?

**A:** Yes.

**Q:** (L) Did he succeed in such a project?

**A:** Yes.

**Q:** (L) Well, why was it that, when he developed a brain tumor and realized he was going to die - and I read that he screamed and yelled like a baby when he knew there was no hope - if he was somebody who had access to a time machine, why wasn't he able to do something about it instead of carrying on like a madman? The stories about his screams echoing all over the place, are horrible. He realized that his great mind was going to soon be still; if he had access to a time machine, one would think that he would have used it, would have pulled every string he could, to forestall his own death.

**A:** No Laura, it does not work that way. And besides, if you had a brain tumor, you could be forgiven for a few mental peculiarities too!

**Q:** (L) I just don't understand why, when he knew he was sick, that he didn't just use the time machine to go forward in time for a cure, or backward in time to correct something in his past...

**A:** The time machine was not his property.

**Q:** (L) So, they got what they needed from him and let him die. (A) It is not clear. He got this cancer so suddenly, it may even have been induced. (L) Well, that's a thought. (A) It is said that when he was dying, his brain was working perfectly and that was his tragedy. He could think, he could produce, he was a genius. (L) What happened to him after he died?

**A:** 5th density.

**Q:** (L) Well, I figured THAT! (A) At a previous time when we were talking about UFTs, my different options that I was trying to suggest, you told me to pursue the subject of torsion. All these Russians speak of torsion. Now, Einstein's 1938 paper is a Kaluza Klein paper - no torsion. What is the story about torsion?

**A:** Clues hidden in the text.

{Personal questions redacted.}

END OF SESSION

## 8.13 September 9, 2000

Ark, Laura, Frank, Barry

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Larria.

**Q:** Where do you transmit through?

**A:** Cassiopaea.

**Q:** (A) Regarding my calculation of the coming of the comet cluster, taking into account all the data that were given, I came to the conclusion that there is no way to fit the data unless I assume that the period of the comet cluster is changing during these past 300,000 years. I had to assume that it is decreasing. Is this conclusion correct?

**A:** The period between visitations of the implicator is decreasing.

**Q:** (L) What is the implicator?

**A:** Visitor.

**Q:** (L) What is the visitor?

**A:** Maybe dialogue with Arkadiusz is good here.

**Q:** (L) Okay, I'll shut up. (A) Who is the implicator? Visitor?

**A:** Dark.

**Q:** (L) Oh, dark star. (A) Okay, let me ask again. I am not ready to discuss the dark star. My computations had to do with the comet cluster which is an independent visitor, as I understand it. What about the period of visitation of the comet cluster? Is it also decreasing?

**A:** In accordance.

**Q:** (A) In accordance with the period of the dark star?

**A:** Shrinking orbital plane.

**Q:** (A) In accordance with the shrinking orbital plane. Is shrinking of the orbital plane the same as the shrinking of the orbit?

**A:** Close.

**Q:** (A) Taking into account the decreasing of the period, I came to the conclusion from all the data, that the coming visit of the comet cluster will be, most probably in the middle of 2009, with possible plus or minus 6 months. So, it will come 2009. Are these calculations correct?

**A:** You are doing well.

**Q:** (A) Is the comet cluster going to come in 2009?

**A:** We refrain here...

**Q:** (A) I am done. (L) Now, I have this information that someone sent to me. It says that Palestinian rebels have 3 suitcase size, low yield, small capacity nuclear bombs. It further says that Palestinian leaders are being pressured to strike at Israel for blackmail purposes. The time factor which is critical is the third week of September. I guess they mean THIS September. It then says that, should this occur, Israel will strike back without compassion. Other Arab nations will gather to strike at Israel in the last week of October. Let me first ask if Palestinian rebels have nuclear bombs?

**A:** It is not Palestinians behind this effort.

**Q:** Who is behind this?

**A:** Complex, but consists of Persian influences.

**Q:** (L) Oh, the Iranians. Are they planning on using such a threat to blackmail Israel?

**A:** Will not work, if such effort is made.

**Q:** (L) If it doesn't work to try blackmail, will they use these bombs?

**A:** No. Think about it: bombs of nuclear capability in Israel cook Palestine too since they are essentially the same!

**Q:** (L) Not to mention Iran, Iraq, Syria, Saudi Arabia and the whole kit and kaboodle. One of the things said in this information is that America is supposed to be “distracted” BEFORE this strike, (so that would have to be pretty soon here), by using nuclear devices in OUR country. Are they planning on using nuclear bombs in the United States?

**A:** How is this accomplished?

**Q:** (L) Well, I guess the idea is that terrorists would smuggle them in somehow and plant them and Boom! There you have it!

**A:** You make it sound easy!

**Q:** (L) Well... Anyway, they say that there are seven of these nuclear bombs in the possession of Palestinian rebels or guerilla groups in the United States now, that were brought in across the Southern Border with Mexico. It further says that the cities with the highest probability of being hit are New York, San Francisco, and others. The whole thing is supposedly backed by the consortium of “regressive aliens,” (whatever THAT is), composed of 19 races from the constellation of Orion along with the Draconians and Sirians. Well, it is sounding whackier by the minute, I gotta admit!

**A:** Good tale spinners!

**Q:** (L) Yeah. Where do they come up with this stuff? (A) But, you see, it seems that some kind of conspiracy has some bombs. Many kinds of conspirators may know about this fact, and somehow it has leaked out, so now they are discussing this and they are fighting over the best use of these bombs. The best use, as I would see it, is to use them for blackmail to get money. I would say that they may try to blackmail the government of the U.S. or Israel. But, blackmail will not work, and when it doesn't, then the first thing to do is use one so that the next attempt at blackmail

WILL work. This might be the most likely scenario.

**A:** No. Who is going to pay? And for what and to whom? Your world does not operate like that.

**Q:** (L) Well, considering the incredible surveillance capabilities of the U.S. government, not to mention possible alien technology, it is hardly likely that any such group would get far in such a plan. Not only that, since there is already a One World Government, and ALL nations are already under the control of the human/alien Consortium, they certainly aren't going to go around blowing up what they already own. So, any information of this kind is purely and simply disinformation designed to confuse and disrupt and distract. Is that correct?

**A:** Close, and one can buy "low yield" weapons from disenfranchised Russians, but do they work?

**Q:** (L) Well, that's certainly a good question! Another remark was that these folks made a prediction that New York was going to be sacrificed by 1999 (which obviously did not happen!), via a terrorist act of nuclear detonation. Some of the same story here. But, anyway, this was supposedly prevented by the "good aliens" that are proposed to be in contact with this source. It is claimed that this terrible prediction did NOT come to pass because of the "intervention of the Andromedans." It says that San Francisco was targeted in order to set off the San Andreas fault, and that this disaster was designed to set off social and economic disorder which would result in more controls on a national level. Now, aside from the fact that it is really handy to make dire predictions and then, when they do not happen, to say that your "good guys" saved all our buns from the fire, it seems to be eluding these guys making the predictions that there is absolutely no need for anything like this to set up "national controls." In case they haven't noticed, we are already so completely controlled and monitored

that there is simply no point in “fixing” what isn’t broken! But, what is the likelihood that any of this kind of stuff is going on; that is, terrible things are being avoided by all these “interventions?”

**A:** Please Laura, enough with this fantasy dribble!

**Q:** (L) Well, okay. So much for that! That was my take on it too, but since inquiring minds have sent these questions, I did think I would present them! Now, this one ought to be quick. Another correspondent wants to ask some questions about his research in astrology. The question is: could you give a number, in percentages, representing the degree of influence or correspondence of astrological factors, relating to the whole system of possible influence over character, constitution, and destiny of an individual?

**A:** Varies according to the preconceived notions of the perceptor.

**Q:** (L) So, it could have a great deal of influence for someone who believes it does, or no influence over somebody who does not believe? Is it possible that, if you do not believe, it has no influence? Or...

**A:** No.

**Q:** (L) So, even if you believe it has no influence, it will still have some influence?

**A:** Yes.

**Q:** (L) For somebody who is completely skeptical, what would be the percentage of influence?

**A:** Not measurable in such terms.

**Q:** (L) Can you get me in a ball park here?

**A:** You are misconceiving.

**Q:** (B) Is the reason you can't give a percentage because, even under such circumstances, the percentages are variable?

**A:** Yes.

**Q:** (L) If it is variable, is there a percentage in a global or general sense of the term?

**A:** We have spoken of illusion before.

**Q:** (L) Is astrology in general a false assumption?

**A:** Astrology is a stepping stone to higher knowledge.

**Q:** (L) What is the most useful application of astrological concepts as known today?

**A:** Publishing works which other 3rd density types will gleefully purchase!

**Q:** (L) Well, that's pretty cynical! Now, this guy has developed something he calls the "Natural House System." He asks: Is the Natural House System a better approximation to the problem of houses in astrology related to other known systems? Is his idea better than what is out there?

**A:** If it if he can convince enough others.

**Q:** (L) Is there, in 4th density, an equivalent to 3rd density astrology?

**A:** Not needed there.

**Q:** (L) Okay, moving right along here. We have here a guy who has written a paper that says: "To make interstellar travel believable, NASA was created. The Apollo space program foisted the idea that man could travel to and walk upon the moon. Every Apollo mission was carefully rehearsed and then filmed in

the large sound stages at the Atomic Energy Commission's Top Secret test site in the Nevada Desert and in the secured and guarded sound stage at the Walt Disney studios within which was a huge, full scale mock-up of the Moon." Is it true that the Apollo missions were films as described here?

**A:** No.

**Q:** (L) Did the Apollo missions actually go into space as we think they did?

**A:** Yes.

**Q:** (L) This guy further writes that "All names, missions, landing sites and events in the Apollo space program echo the occult metaphors, rituals and symbology of the Illuminati secret religion. The most transparent was the fakes explosion on the spacecraft Apollo 13 named 'Aquarius' at 1:13 on April 13, 1970, which was a metaphor for the initiation ceremony involving the death, placement of the coffin, communion with the spiritual world, and the imparting of esoteric knowledge to the candidate, rebirth of the initiate, and the raising up of Phoenix, the new age of Aquarius by the group of the Lion's Paw..." and so on and on. Was this occult significance applied to these events, either deliberately or accidentally?

**A:** Maybe coincidentally.

**Q:** (L) If there was any coincidence of application of these principles, did it bespeak an underlying synchronous or nonlocal reality of oneness?

**A:** These ideas being put forth this evening are entertaining if nothing else!

**Q:** (L) Well, I always said that you could derive occult significance from where the paper man tosses the paper on the lawn if

you try hard enough! Nevertheless, this guy further writes that “The tremendous radiation encountered in the Van Allen belt, solar radiation, cosmic radiation, solar flares, temperature control and many other problems connected with space travel, prevent living organisms from leaving our atmosphere with our known level of technology. Any intelligent high school student with a basic physics book can prove NASA faked the Apollo moon landings. If you doubt this, please explain how the astronauts walked upon the moon surface enclosed in a space suit, in full sunlight, absorbing a minimum of 265 degrees of heat, surrounded by a vacuum. And that is not even taking into consideration any of the effects of the cosmic radiation, solar flares, micro-meteorites, etc.” Comment please?

**A:** No comment!

**Q:** (A) On the list to which I am subscribed, there was news about a Brazilian physicist, D’Aquino is his name, who was doing experiments with anti-gravity. I was following his work, and it is true that he is a physicist, but what he was writing made no sense to me. Finally, he published a paper in which he described some effects he got, succeeding with his anti-gravity work, but when I read it, it seemed like cheating to me. The description was not of a TRUE anti-gravity effect. Nevertheless, NASA awarded this guy a 600 thousand dollar research grant to continue his research. The question is: did he really succeed in producing anti-gravity?

**A:** He succeeded in producing a red herring.

**Q:** (L) So, if we produce a red herring they’ll give us money, too?

**A:** Payment is for distraction value only. Maybe you would get a grant, but you cannot use the funds to redecorate!

**Q:** (L) Now, we have a problem with our group. There was an issue some weeks ago where another member was in dire finan-

cial straits. He understood the rules that you have to ask for help. He was homeless, jobless, carless, and pretty much rejected by his own family. Of course, we know that such situations can exist either because of attack or simply because a person is a user and manipulator and their family and friends know the score. We know that people can leave themselves open for this kind of attack in many ways. Nevertheless, I made it clear that, if the guy was trying to expand his knowledge base, and if he asked for help, he would get it. He asked if we could help with the immediate financial thing. We basically took up a collection and sent it to him, he was able to renew his rent, got a job as a night watchman, and stabilized, or so it seems. But then, as moderator on the egroup, he began posting some writings that were certainly not a positive reflection on the Cassiopaea site, to say the least, though, in general, I have no argument with anybody thinking or writing anything they like. In this case, however, he had been warned that, as moderator, he was supposed to set an example. There was also some question as to whether his writings and musings about mass killings could be evidence of instability, which might then lead to backlash on the Cassiopaeian site and US.

Knowing how such things, if left unattended, can certainly come back to hit you in the face, I made it clear to the group, the public, as it were, that this was not condoned nor was it reflective of our efforts. We removed him as moderator. The end result was that the small group started to talk about it and Linda decided that this was a BIG lesson for all of us, and if we didn't "get it" now, we were going to keep getting it over and over again. The big lesson, in her mind, was that we helped this guy and by helping him, we violated his free will because he didn't really "ask," and that opened the door for us to all be attacked.

Well, the list became quite divided on this one. There were those who were simply not expecting anything about the recipient to

change, and who felt that giving was NOT a mistake. And then there was Linda and her circle, Carla and Alisa, who were all pretty much agreeing with her that we did a big boo-boo by giving ANYthing to this guy. Right at this point, problems erupted in the lives of a number of the group members. Linda got a big toothache and was attributing her toothache and energy problems to this “giving” episode. And, of course, it was notable that nobody had any problems until the idea that it WAS a problem was suggested.

However, in the midst of the toothache, Linda wrote about it again and, voila! Her tooth stopped hurting! She then wrote to me privately and listed the obvious attacks we were all getting: Sara had foot problems, Polly had bowel problems, my writing on the page that was produced right after this was stinky, I\*\*\* and A\*\*\* were depressed, and so on. The issue was, of course, even if the poor guy asked, did he REALLY ask?! The fact that saying it brought immediate relief to her tooth was, in her mind, validation. The fact is, however, that nobody had any problems UNTIL it was suggested, or insisted, that this was a big lesson and we all screwed up by giving! We should have made the guy crawl on his knees, or ask over and over or whatever. Now, this is the situation behind the questions. Before I even start, do you have a general comment on giving for the future?

**A:** Best to investigate carefully before giving.

**Q:** (L) Well, yes. We did investigate within the limitations of the medium. Perhaps not as thoroughly as would be liked, but considering the small sums of money involved, it wasn't worth a big deal here. But, again, as soon as the email was posted suggesting that we had a lesson going on because of Phillip's behavior on the list, the personal problems among the various members kicked in. My feeling was that if we gave with no strings, if we did not think it was going to “save” him, our intent was to demonstrate

a principle. But, my question, straight out is: is Linda right that we should not have given anything at all?

**A:** When one gives, best to not expect ANY outcome.

**Q:** (L) I didn't. I wasn't even upset with the guy afterwards, except to just more or less calmly write the email that would establish disassociation and remove him as moderator. And, I did that simply as a preventive measure because of past experience. And, I don't think Polly or Sara or Barry or any of the others had any expectations either. But clearly, since she suggested that we made a mistake by trying to "save him," which was the last thing on my mind, that it was the FIRST thing on HER mind. She must have somehow felt that our act was going to save him, and she must have been attached to an outcome even if she said that she wasn't. She had a big string attached to her giving.

**A:** Yes.

**Q:** (L) Well, she writes to me about the physical manifestations that everybody was getting from Sara's feet to Polly's colon. She wrote that Polly "was pissed about the prospect that someone said she might be wrong" and that she was in denial and that this was the root of her colon problem, since P\_\_\_s internet handle is Bucket Man, or BM, and now Polly had a "BM" problem. Linda read this as a clue, completely ignoring that this was a flare-up of an already existing condition and that IF the flare up related at all, it was more likely related to the conflict than P\_\_\_ or helping him. Then, Sara's foot problem is related to the fact that she wrote to Linda that "she refuses to go there" as in getting into a conflict about Phillip, I guess. Of course, at this point, I became aware that Linda was more or less writing to the others on the list, trying to convince them that she was right since I was not confirming the "we made a mistake" idea. Actually, I thought the whole thing was a tempest in a teapot, but it was clearly a

BIG deal to Linda. She had an outcome expectation, and nobody else did. She got this terrible toothache which lasted until she dumped on everybody how bad they were for giving to Phillip and how direful the consequences were going to be if we didn't "tighten up" and "get it."

**A:** Toothache is incidental but the heartache is not.

**Q:** (L) So, her heart was hurting and it manifested through the tooth?

**A:** Close.

**Q:** (L) Well, why did the toothache end after she "had her say," so to speak?

**A:** She was "dumping" negative energy. This always resolves issues for the "dumper," but not necessarily for the "dumpees."

**Q:** (L) I see. Well, the thing is, my feeling is that, from my own experience, when you see an issue like this outside of you, it reflects something in your personal life. You are in the process of giving and doing in a personal way, and you are asking for love, but not getting it. Is this a reflection of her lesson?

**A:** Reflectivity can be present but the lessons for individuals are for the individuals.

**Q:** (L) In a general sense, did we violate P\_\_\_\_'s free will by sending him cash?

**A:** No.

**Q:** (L) Did we interrupt his lessons? Or did we become part of an enriched lesson?

**A:** Closer to the latter.

**Q:** (L) Well, why did Polly have this flare up? Was that a result of Linda's dumping?

**A:** No.

**Q:** (L) Well, since she already asked me to ask, what IS the deal with the bowel problem?

**A:** Polly has lessons yet to be learned regarding internalization of anger, and the physical circumstances which match.

**Q:** (L) How can she follow up investigating this?

**A:** Past experiences fester.

**Q:** (L) What would be the best approach for her to deal with this?

**A:** Forgiveness helps, especially when concerned parties are now in 5th density.

**Q:** (L) Can you speak to her with something that will be a clue?

**A:** Tough, but not impossible.

**Q:** (L) Speaking of negative energy, where did negative energy come from that Linda is holding? Did she connect to P\_\_\_ by giving?

**A:** P\_\_\_ is not germane to her issues.

**Q:** (L) So, you are suggesting that there are just simply big issues going on with Linda and this incident was just a likely thing to blame it on? Did this negative energy come from her misperceptions? Does it come from outside her, as in someone projecting it onto her? Is it amplified emotions inside her? Is it her expectations or illusions?

**A:** Some of the above and more.

**Q:** Getting back to Polly, point her in a direction for relief while working on the issues.

**A:** Colonics.

**Q:** (L) Well, I would like to have some direction to be able to weather such storms. It is certainly too good a group for such an exaggeration of emotion to be allowed to destroy it!

**A:** Knowledge protects.

**Q:** (L) Am I making any mistakes in managing the problem? Am I supposed to manage it?

**A:** Of course!! If you were not making mistakes, now that would be a problem!

**Q:** (L) I don't know what that means. As long as I am making mistakes, I'm okay?

**A:** Unless you would like to transit quickly to a higher density unilaterally!

**Q:** (L) What does that mean? I guess, if you don't make mistakes, you have stopped learning...

**A:** Because you have finished your lessons... "Time to move on."

**Q:** (L) Is there any thing that would help Linda at all with this? What does she need to see, if anything?

**A:** She will not see it until she stops struggling.

**Q:** (L) And, knowing her, she is so stubborn she won't do that until she is laid flat on her back, literally or figuratively. Okay, let's move on. This Toltec book says that, on June 13, 1994, there was a very significant full moon. Supposedly, on that day, the earth entered a new era... etc. Was this full moon as significant as this guy, Theun Mares suggests?

**A:** No.

**Q:** (L) Is it time for people to clearly make a stand for which side they are going to fall on? STS or STO? Is this the big thing going on at this time?

**A:** No.

**Q:** (L) What IS the most important thing for human beings to be focusing on in terms of the opportunity of transitioning to 4th density?

**A:** There is no such thing!

**Q:** (L) I don't understand. (A) There is no such thing as the MOST important. Whatever is important to the individual is important, and it is different with each.

**A:** Yes, thank you Ark!!!

**Q:** (B) I've always had sounds in my ears and when driving through Louisiana, I was hearing a distinct "tinking" sound. Is there any significance to this?

**A:** You may hear many things, as you have increased psychic sensitivity in that way.

**Q:** (L) You should ask about this heart and lung business you were talking about earlier. (B) I don't know what to ask.

**A:** Let Barry ask what he desires to ask, please.

**Q:** (B) I just didn't want to clutter up the session with personal issues. Is there something specific that I should be doing, other than the normal routine things, to promote a healthier lung and circulatory system?

**A:** Diet. Vegetables increase.

**Q:** (B) That sums it up. Is there any benefit to chelation or peroxide via IV?

**A:** Chelation is preferable to bypass surgery. Peroxide: topical only, not internal.

**Q:** (L) I guess you could put it in a spray bottle and spritz it all over after a bath. (B) Is there any special direction or attention we should be aware of in regard to the investment club or in an overall sense?

**A:** On track.

**Q:** (L) Now, we had some guests today who were Scientologists, as I found out. Were they here to spy on us?

**A:** Maybe in a personal sense.

**Q:** (L) Is L. Ron Hubbard's Scientology set up going in the right direction in helping people to become free of the Control System on the planet?

**A:** Exchange, to a limited extent.

**Q:** (L) So, it is just an exchange of control system from one to another?

**A:** Something like that.

**Q:** (L) Well, the gentleman pointed out that, at least when Scientology gets done with a person, they are off drugs, off alcohol, they stop beating their wife and kids, and become productive people. That DOES seem to be true! They get free of attachments and improve themselves in many ways. Couldn't that be considered positive?

**A:** Sure.

**Q:** (L) What is the downside of such a positive thing?

**A:** Decreasing individual discovery.

**Q:** (L) Now, according to Scientology, an alien group landed in a volcano 70 million years ago, and it exploded and that started the human race, or something like that. Is any part of that accurate? This is the “initial event” that has to be ultimately audited. Could this be symbolic of the descent of man into matter?

**A:** Up to the individual perceiver.

**Q:** (L) Why is Scientology so secretive? That is something I don't care for, though I can mostly understand it.

**A:** Why is Masonic temple so secretive?

**Q:** (L) Is Scientology really as aggressively destructive toward people who say things against them as is reported?

**A:** No.

**Q:** (L) Did L. Ron Hubbard derive his information by plagiarizing other people's work?

**A:** Too general.

**Q:** (L) Did L. Ron Hubbard participate in sex magic rituals with Jack Parsons and Aliester Crowley?

**A:** Maybe.

**Q:** (L) Did he derive some of his information or teachings from these magical sex rites?

**A:** Maybe.

**Q:** (L) Was L. Ron Hubbard Greenbaumed?

**A:** Maybe.

**Q:** (L) Can sex magic rituals be a source for valid insight?

**A:** Can be, but so can all others. Insight is open to the individual's preferences.

**Q:** (L) What were the conditions surrounding L. Ron Hubbard when he died? Had he really gone mad or was he addicted to drugs?

**A:** Laura, this is so incredibly unimportant!

**Q:** (L) Is there any insight in a general sense that a person can gain by studying Scientology and the auditing process? Would it be a useful path to follow?

**A:** What did we just say?!?

**Q:** (L) Okay, I get it. Is there anything else we ought to cover that we haven't thought about? Is there anything around the bend that we need to be aware of? Any concerns that we need to pay attention? If so, please indicate.

**A:** Well, specificity is not in vogue here tonight.

**Q:** (L) I had all these things backed up to ask for other people. I am just pressing forward on the website, so I didn't really have a set of questions prepared for the clarification issues.

**A:** You need not ask about that which you already know. i.e., please no more about the Andromedans!

**Q:** (L) I know. That stuff is so pathetic. But people get so worked up about those things!

**A:** So?!? It is not your lesson, so why consult us? They will believe what they wish to believe.

**Q:** (L) So, are any aliens gonna land this year? Are we gonna have any major UFO flaps? Is there gonna be a big solar flare to fry the planet?

**A:** Laura, you know better!

**Q:** (L) I was just joking...

**A:** Answer: yes, no, yes, yes, no, yes.

**Q:** (L) Now you are joking! You gave six answers for 3 questions!

**A:** Good night!

END OF SESSION

## **8.14 September 23, 2000**

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening.

**A:** Kinnemah.

**Q:** The first question we have this evening is from our Scientology friend down in Pinellas County. He was reading about Susan V\_\_\_, who was discussed in the Wave series. He writes: “regarding Susan V\_\_\_, apparently during a bad plane trip, the Cassiopaeans said that she was the one who kept the plane safe although she slept through the trip. Other things pointed to her being a”good guy.” But the conundrum is that her life was falling apart; drinking and association with the black magic people. So, the question is: do you or the C’s think that she is the 4th density Nordic?”

**A:** No.

**Q:** Well, the conundrum is that you said that she is the bravest human we ever saw, that “agent Susan” brought down the Out-

law motorcycle gang, and so on. Were all those just clues to enable me to see a certain pattern around her, or were those things about her that are actually true?

**A:** The truth here lies at another level.

**Q:** Do you mean that at another level of density she is one of the “good guys,” but at this level of density she was deep in the illusion and being used? Is that what you are suggesting?

**A:** Yes, but not density, rather it is consciousness at another level of this density.

**Q:** Was, or is, there any possibility for this other level of consciousness of hers to come through and penetrate into her ordinary consciousness and turn her life around?

**A:** Yes.

**Q:** Now, our Scientology friend’s next question is: “do you have any idea of how many 4th density Nordic types might be on the planet at this time?” How many 4th density Nordic STO are on the planet is what I think he is wanting to know.

**A:** If it is useful to know this, use your own powers of perception to narrow it down.

**Q:** I would say something like 2 percent of the population of the entire planet.

**A:** No.

**Q:** More or less?

**A:** Less.

**Q:** Well, maybe that is in the ballpark.

**A:** No.

**Q:** You mean it's so much less we aren't even in the ballpark?

**A:** Yes.

**Q:** Is it possible that there are people on the planet now, who are manifested as 3rd density STS, who at a certain point in time, due to some event, such as the Wave, will activate genetically, so that they will then transform into 4th density STO Nordics?

**A:** Close, once again, the answer is not so much physicality as it is spirituality.

**Q:** So, there could be a lot of 3rd density people who are conduits or projections of 4th density STO into this reality?

**A:** Souls, my dear, it is the souls!

**Q:** So there are 3rd density bodies, inhabited by 4th density souls, but these bodies, because of the STO honoring of free will, have all the 3rd density limitations for the present?

**A:** Yes.

**Q:** Now, our Scientology friend writes: "L. Ron Hubbard's service to others is unmatched by any individual or group in recorded history. The words of his own creed are "the being is only as valuable as he serves others. L. Ron Hubbard really has served, and does serve, others, even those you are most concerned about. I can't tell you how that latter service is exactly applied, as that is confidential data that I have pledged not to divulge. But please rest assured that their needs are more than adequately cared for in a very workable manner. I will, however, give you a big clue on why you have no cause for concern." And then the clue is: "any auditing is better than no auditing, and all auditing dissipates actual electrical charge from our collective unconscious, making it all more conscious and directly benefiting those you are most concerned for, and, of course, awakening the collective

unconscious helps us all, at least indirectly. Part of the reason you are as bright as you are comes from the millions of hours of auditing that has occurred on this planet for the last 50 years. So, the more auditing they do, the better it is for us.” (F) Is that suggesting that the auditing has an effect by osmosis, so to speak? (L) I think it is more like cumulative. My question is, is auditing benefiting the planet as a whole, and is it enabling me to be more intelligent?

**A:** Maybe.

**Q:** Is it true that any auditing is better than no auditing?

**A:** Depends upon the nature of the auditors.

**Q:** Our Scientology friend further says: “Through Ron’s teachings and technology, I and millions of others have shed installed STS obsessions and programs, thus awakening from the madness of nightmares into the warm sunlight of promising new days.” My question here is: does auditing dissipate electrical charge from our collective unconsciousness making it all more conscious, with the previous conditions understood?

**A:** Murky.

**Q:** What do you mean? The question is murky?

**A:** No.

**Q:** What is murky?

**A:** The concept detailed there.

**Q:** (A) I think that they are talking about the electric charge. First of all, I do not think it applies at all to the concept of collective consciousness, so it’s kind of way of speaking. So, exactly what is meant by this, we don’t know. (L) Then let’s ask a basic question. Is there an electric charge to the collective unconsciousness?

**A:** Not exactly.

**Q:** Our Scientology friend says here that the STS group, i.e. alien/human consortium I suppose, tried to co-opt Ron's work by recalling him back into Naval service. Apparently, they had tried bribes, and this didn't work, so they felt that kidnapping with all its attendant pain, drugs and mind altering tech would work. Was Ron subjected to kidnapping, pain, drugs and mind altering technology?

**A:** Ron? L. Ron Hubbard was in charge of his destiny. Period.

**Q:** Was part of the destiny that he was in charge of include the kidnapping, pain, drugs and mind altering technology.

**A:** That sounds more like the modus operandi of him and his associates at the "company."

{CIA or some other alphabet soup agency is obviously intended here.}

**Q:** Well. Our Scientology friend wrote at the end: "Ron wanted me to tell you that, while he is little interested in what the Cs think of him, he is terribly concerned about what YOU think. The old rogue always did have an eye for a pretty face with sparkling brown eyes, all framed with salt and pepper hair. (F) Well, he must be talking about Crystal Gayle because your eyes are green. [sings]"Don't it make my brown eyes ... blue..." (L) Well, it doesn't make them green. (F) Is our Scientology friend saying he is in contact with Ron? (A) No, I think that it is part of the higher level ideas in Scientology that they ARE in contact with Ron. (L) Nevertheless, {this guy and a number of other high level Scientologists have} read a lot of the website. He says: "now that I feel that I have a grounding concerning the C's wisdom, I'm anxious for some personal tutoring from you if you're game, etc. etc." He is somewhat concerned about his mortality. He writes that "the

light that near death experiencers claim to have seen could be of monumental significance. Make a mistake here, and everything could be down the tubes. Conversely, make the right decision regarding the light, if there is one, and a multitude of shortcomings could be rectified. Please do not take offense, but I believe there is a flaw in your rationale in why one should seek the light. That is not Scientology speaking and I defy anyone to show me anyplace L. Ron Hubbard favors avoiding or seeking the light. Personally, I do not have confidence in either approach. In my current frame of mind I'd just grab the silver thread and gather more data before I did anything else. etc, etc. So, ask the Cs about me. ...Tell the C's that I have grown to love them and that they are constantly saying things that endear them... etc etc. Then ask them what they think about me.” His big concern is, of course, what shall he do when he dies. I didn't think he looked at all like he was going to check out any time soon, but then we never know from one moment to the next what will happen.

**A:** {Your Scientology friend} is adventuresome, a “free spirit,” and always has been. He will continue to do well in all his endeavors.

**Q:** His issue is what should one do when one dies.

**A:** It is not an issue.

**Q:** Why is it not an issue? Apparently it is a big issue with some folks.

**A:** When one's body expires, the path taken is the one prescribed by the individual's consciousness and experiences/expectations.

**Q:** Do you think it would be helpful to him for me to tutor him as he asks? Aside from the fact that it might sharpen my brain a bit...

**A:** If you wish to, then there is no harm.

**Q:** I do feel a rapport there and I do feel that he has some incisive questions. Let me ask this: when Ron died, did HE go into the light?

**A:** Most probable.

**Q:** Okay. We have this stuff that Jon C – the economist - sent us the other day. It is written by Jelaila Starr of the Nibiruan Council. [Groans from group.] Now back off! She might have something useful here! She writes:

“In the early morning of August 27th I awoke to hear a voice in my head saying, “The ingathering has begun”. I looked at the clock to see what time it was. It was 2:22 a.m. Immediately a picture from a childhood storybook of the animals walking up the ramp into the Ark came to mind. I knew this was important because the feelings in my heart chakra were very intense. I sensed that the message came from a collective voice, a voice representing many nations and races. It seemed to me that they were the Elders of each of these races. The name that I get is the Star Elders. In any case, it felt like they were telling me that they had begun calling all the people together. My understanding was that they were referring to the starseeds, walk-ins and lightworkers and those doing the calling were the family member of each race who was in charge of overseeing the path of their people on earth. There was no doubt in my mind that this reference was to a new phase that had begun and I was being requested to deliver that message to the people per my assignment as a messenger for the Nibiruan Council.” End of quote from Jelaila Starr

Now, is there an ingathering that has begun. I am asking this, not because I am trying to compare information, but because you have suggested on other occasions that different people are receiving different segments of info that needs to be networked. With all due respect to Jelaila, is there an ingathering that has be-

gun in the sense that she has described it, i.e. star elders calling the starseeds, walk-ins and lightworkers to come together?

**A:** What do you think?

**Q:** Well, in the first place, I don't think there is going to be any star elders calling anybody together simply because everybody on the planet is here because they made a free will choice to be here, and everybody is here to do what they are going to do according to their plans, whether they are in cooperation with anyone else or not and don't need anybody to call them to tell them anything. In the second place, the only ones who would be "calling" anybody to "come together," would the STS oriented beings because such bidding from a higher density being only CAN come from the STS faction, because the STO faction aren't going to call anybody to come together because if they want to "come together" with anyone it has to come from inside from free will choice and not because they are called.

**A:** Yes.

**Q:** On the other hand, if Service to Others types DO come together, what kind of stimulus for that coming together could, or would, there be?

**A:** Natural progression.

**Q:** So, anyway, Jelaila further writes that she is shown a vision:

"There were what I could only describe as cities of light separated by the deep blackness of space. Each one was connected to the other by grids of light. They were in a circle, like a wagon wheel or even better, a spider web. The cities were all connected to a city located right in the center. I saw pulsing lights moving along the grids that connected each of the cities to this city/hub and to each other. The center city was not as fancy or glittery as some of the others, but it did its work providing an integration vortex

for the information coming from the higher realms as well as information that was received from the higher realms via people in the other cities. It took this information and placed it into the bigger universal picture showing how each group, each race fit into the greater consciousness in order to foster cooperation and unity. It was the most magnificent thing I think I have ever seen. Next, he told me telepathically that the cities of light were websites on the Internet and that the space I saw was the space that existed between these websites on the Internet.

...So his message was that the ingathering meant that starseeds, walk-ins and lightworkers would be impulsed to either create one of these cities of light/websites or gather in one that was already created. So what would they do in these gathering places and what would the gathering places provide? What is their purpose? The cities of light/websites would be places where the people would receive information, education and emotional/physical support to continue and complete their missions. Earlier in the week I received a flash of information about this while talking with a friend. I was shown the Second Grand Earth Experiment and received a message that said, one of the reasons the second experiment did not succeed is because they could not get the starseeds to work together and complete the ingathering.” End quote by Jelaila Starr.

(L) Well, we certainly know that this is true. But, back to Jelaila who writes further:

“Their focus on differences between groups and channeled information and fighting over who’s information was right and who’s was wrong (mainly fueled by the teachers) caused them to resist coming together for the good of all. They could not, would not accept that everyone’s information had value and when interpreted multidimensionally was truth for that group or race and had its place in the bigger universal picture. They did not un-

derstand and would not understand the concept of multidimensional truth. This along with a few other challenges culminated in the destruction of the planet and a failure to achieve polarity integration.” End quote by Jelaila.

(L) It sounds to me that what she is promoting is the support of the idea of obedience to becoming part of a spider’s web of entrapment that doesn’t bother to learn and discern. There is the guilt trip about “they couldn’t get the starseeds to work together” because they were “fighting over whose information was right who’s was wrong.” My thought is that if you join together with wrong information, you are coming together for the wrong reason!

**A:** Yes.

**Q:** My thought is that it is crucial to spend time working to discover what is closest to truth and what is not, learning to discriminate by testing and scrutinizing and learning, is the most useful and worthwhile thing one can do and whoever is talking to Jelaila is basically, in a sort of left hand way, trying to subvert the gaining of knowledge.

**A:** To an extent.

**Q:** Was this vision she had one of control or unification?

**A:** Neither.

**Q:** Do you have any further comment on it.

**A:** No need.

**Q:** Well, she says further:

“The cities of light/websites will become the new ‘5D’ communities. All goods and services will eventually be available through them including food, clothing, educational information, etc,

and the form of exchange will be a higher dimensional form of barter. Once again, these will not be where you live physically, but where you live interdimensionally. In other words, this new world will exist interdimensionally and you can connect to it at anytime through your computer. Your computer is the doorway into the interdimensional 5D community.” End quote by Jelaila.

(L) I don't think she has a clue about what 5th density really is.

**A:** Get those scoops ready for all those barrels filled with oatmeal bran mix for strong bones and teeth needed for the coming of the great messiah of light ,who will arrive upon moonbeamship flight number five at love port seven...

**Q:** Well, oatmeal bran mix doesn't make strong bones and teeth... it cleans your colon - oh! I get it! In other words, put on the hip waders because it's getting pretty deep. Well, okay. She then says:

“There is more to write about this new phase including information about the race of beings who have come to our planet to set up the technology for the new cities. I will write about them, the challenge they are now facing and what we can do to assist them in an upcoming article. For now, I am told that this is the end of the message that they requested I deliver. Once again, I hope it has helped a few more of the pieces of your puzzle come together. Until next time, I remain, your humble messenger, Jelaila Starr, The Nibiruan Council.” End quote by Jelaila.

**A:** Ego is a terrible thing!

**Q:** Well, here is another nifty thing that somebody sent along that raises some issues. I'll skip over the intro and get to the interesting remark where it says:

“And so it is now. There are those upon your planet who would call themselves”human,” but in their actions, thoughts,

and words would appear to be some kind of monster—without feelings for others or others’ pain and suffering. The “love quotient” in these individuals is nearly absent, but that is part of their learning, too. Think of the one you called Hitler. Was he enlightened? Was he happy? Was he satisfied with what his life brought him? The answer is clearly “No.” And so the soul of this one you called Hitler is still on the inner planes, mulling over the effects of that life, trying to understand what went so horribly wrong.”

(L) I don’t think this individual really understands the nature of STS, that Hitler wasn’t lacking in the “love quotient” at all. It’s just that his love quotient, which was exceedingly high, was directed toward self. My question is: was Hitler happy and satisfied with what his life brought him?

**A:** Initially.

**Q:** And I think that the only thing he might be unhappy about is how he failed to be more successful as a totally dedicated STS being.

**A:** Yes.

**Q:** Is he still on the inner planes trying to understand what went wrong?

**A:** No.

**Q:** What is Hitler doing right now? Planning on coming back and trying to do it again? (laughter) Seriously, what is Hitler doing now?

**A:** Soul in transit.

**Q:** To where? Does that mean he isn’t at 5th density?

**A:** No.

**Q:** He's already been there?

**A:** Floater.

**Q:** What's a floater?

**A:** Returnee.

**Q:** He is floating around and waiting to come into a body?

**A:** Yes.

**Q:** You mean he's already done 5th density and is ready to incarnate again?

**A:** Yes.

**Q:** Well, that's a scary thought! Just so we know, does it happen to be here on earth?

**A:** Wait and see.

**Q:** Well, that sounds ominous. Is this something others will know about once it happens?

**A:** Maybe.

**Q:** Well, swell! When he incarnates in this next life, is he still sold out to the Dark side as he was in the last one? Or, has he been degaussed and will he switch and match his nastiness with good deeds?

**A:** Open.

**Q:** Well, this thing here further says:

“You each have incarnated to gain certain understandings, and it is no different for those of the STS persuasion than it is for those of the STO orientation.”

I don't think that this person realizes that there are no STO people on the planet at the present time. At least not enough to factor in for any significance. This is written as though there are actually STO people on the planet. The further remark is made here:

“Those who have positioned themselves as the power elite on your planet have laid grand plans to take over everything and profit from it. However, as much power as they have amassed, it is only based on economics.”

(L) Is the power base of the elite on the planet based on economics?

A: Close.

Q: Let's continue:

“As long as the economic system operates and people have to depend on it for their needs, the power elite will have an easy time of putting into place their plans for world domination. However, this would be a violation of everyone else's choices, and this particular time in Earth's course is all about choices, so the Earth herself will be a major factor in keeping things more equal so that everyone has the opportunity to choose. There are major storms coming-economic, geophysical, and political. People will be challenged to make a choice: will they act for self-preservation or will they work together to help one another? You who read and cherish these Messages will be spared the worst part of things, as a rather dramatic occurrence will be coming for you in the very near future (that is a relative term, of course, as time has no meaning for us in the higher dimensions-it is always”now.”).

In the near future, as you are lifted in your vibration, you will experience yourself as living in a very different kind of reality. It will not be an abrupt shift, but a gradual dawning in your awareness that things are not the same somehow. At the same time,

there will be a threshold that can be felt by those who are sensitive to such things, and you will be safely across the barrier that separates the third density from the fourth. Make no mistake: this will only happen for those who are attuned to and aligned with these Messages. The others who have chosen Terra but are not yet awakened will endure the effects of the coming storms as part of their process of personal cleansing and the opportunity to refine their choice for the positive path.”

(L) Well, that’s handy. What this monologue is basically saying is, the conditions are set up so you have free will to make a choice, BUT, basically the choice is their version of the “positive path” or you are screwed. If you listen to and are aligned with their messages, you are gonna be just fine, but if not - well, it’s gonze-rooni for you, baby! Hasta la vista and all that.. It’s like the whole Judeo-Christian thing: it’s our way or the highway. I wonder if these folks really have a grasp of the concept of free will? Or am I missing something here?

**A:** You are close enough.

**Q:** Anyhow, it goes on, blah blah. And it is signed: Amen. Adonoy Sabayoth. We are the Hosts of Heaven. (F) Of course! How could that possibly come from anyone else! (L) Well, basically, this thing is entitled “The Coming Storm.” Nothing was definitely said or predicted, but essentially it was hinted that “if you aren’t in tune” with these messages, forget it, buddy! You’re gonna get fried. And the way you are going to be fried is that the economy is going to collapse, the sun is going to shut everything down and toast a few folks, there’s gonna be wars, crop failures, starvation, the elite are going to be lording it over everyone, and everybody is going to basically go down the tubes - but just for awhile. In the end, it’s a whole lot of words that really says nothing significant. (F) And, we’ve heard it all before, soooo many times! It’s like the guy on the Gong Show whose always going to play his trumpet.

(L) Well, after reading it, I don't even think I want to ask a question about it. Let's move along here. We have a question about the Wingmaker's information that we pretty much went through and analyzed at an earlier time, but never really brought to the table here. Is the Wingmaker's thing a complete hoax as has been suggested by some analysts?

A: No.

Q: Is the Wingmaker's presentation a source of good clues if one can figure out how to decipher it?

A: Yes.

Q: Are the clues in the poetry, the pages of philosophy or the art?

A: All.

Q: Is the story about the Wingmaker's information true?

A: Some.

Q: Is the Wingmaker's material "left" from the future into the past for someone to find in the present?

A: Close.

Q: Here is a comment from one of our listmembers:

"Our reality depends on what we believe to be true. What we believe depends on our perception. Our perception depends on what we look for. What we look for depends on our thoughts. What we think depends on our state of wisdom. Our wisdom depends on our state of awareness. Our awareness depends on our intuition. Our intuition depends on maturity of soul. The maturity of soul depends on the image we represent of the one infinite mind. All images are holograms of this mind. We are duplicates of the original." Is this an accurate way of representing our reality?

**A:** Close. It is one chain of relations, though not all. The dependent relationships are far more complicated.

**Q:** Now, let me get to MY questions! You once said that the core of DNA is an as yet undiscovered enzyme related to carbon. Is that correct?

**A:** Yes.

**Q:** Here in this book it says:

“Evidence is accumulating that only a relatively small portion of the DNA sequence is for so-called structural genes. Structural genes lead to the production of protein. There are an estimated 50,000 structural genes with an average sized of approximately 5,000 base pairs, which then accounts for only 250 million of the estimated 3 billion base pairs. What is the rest of the DNA for? Some of the DNA is so-called repetitive sequences, repeated thousands of times. The function is unknown. The ALU, repeat, for instance, contains over 300,000 copies of the same 300 base pair sequence. Certainly this DNA is not junk and plays some important role in the gene regulation chromosomal architecture or chromosomal replication. Until 1977, it was thought that genes were single sequences of DNA that are coded into RNA and then into protein. However, further study has shown greater complexity. It is now known that there are pieces of DNA within a gene that are not translated into protein. These intervening sequences, or INTRONS, are somewhat of a mystery, but appear to be a very common phenomenon.”

Now, is this thing they are talking about, these INTRONS, are these the core that you were talking about?

**A:** In part.

**Q:** What about this ALU repeat with over 300,000 copies of the same base pair sequence. What is it?

**A:** Tribal unit.

**Q:** What is a tribal unit?

**A:** Sectionalized zone of significant marker compounds.

**Q:** What does this code for?

**A:** Physiological/spiritual union profile.

**Q:** Could you define “tribal” for me?

**A:** You define.

**Q:** What does the rest of the DNA code for that is not coding for structural genes. What else can it be doing?

**A:** Truncated flow.

**Q:** Truncated flow of what?

**A:** Liquids.

**Q:** Liquids from where to where?

**A:** What is your sense?

**Q:** Well, what liquids?

**A:** Time for your input.

**Q:** Do some of these...

**A:** No. Not alright: we asked you a question!

**Q:** Okay. Truncated flow of liquids. I'm not even sure what that means. (A) Maybe something was flowing and something cut it off and stopped it and it cannot be developed. It means that something was cut. (L) Does truncated flow mean a flow of liquid that has been stopped?

**A:** Yes. Because of design alteration!

**Q:** Is this liquid that has been truncated a chemical transmitter?

**A:** Yes.

**Q:** And would this chemical transmitter, if it were allowed to flow, cause significant alterations in other segments of the DNA?

**A:** Yes.

**Q:** So, there is a segment of code that is in there, that is deliberately inserted, to truncate this flow of liquid, which is a chemical transmitter, or neuropeptide, which would unlock significant portions of our DNA?

**A:** Close Biogenetic engineering.

**Q:** I assume that this was truncated by the Lizzies and cohorts?

**A:** Close, but more likely Orion STS designers.

**Q:** Okay, can you tell us what this specific liquid or transmitter [is that] was truncated?

**A:** Think of the most efficient conductor of chemical compounds for low wave frequency charge.

**Q:** (A) Well, gold is one... (L) Acetylcholine?

**A:** No.

**Q:** (L) Water?

**A:** No.

**Q:** Saline?

**A:** Closer. It is a naturally bonding combination.

**Q:** (L) Well, I'll have to research it. The fact is, we've got 3 billion base pairs... do some of these so-called segments of "junk DNA,"

if they were activated, would they instruct chromosomal replication to take place with more than 23 pairs as a result?

A: In part.

Q: Is there anything we can do in terms of activities or...

A: No. Biogenetic engineering.

Q: Was my insight that I had one night that, at some point in time something may happen that will turn genes on in our bodies that will cause us to physically transform, an accurate perception of what could happen at the time of transition to 4th density?

A: For the most part, yes.

Q: Are there any limitations to what our physical bodies can transform to if instructed by the DNA? Could we literally grow taller, rejuvenate, change our physical appearance, capabilities, or whatever, if instructed by the DNA?

A: Receivership capability.

Q: What is receivership capability?

A: Change to broader receivership capability.

Q: (A) That means that you can receive more of something.

A: Close.

Q: (A) It means how good is your receiver.

A: Yes.

Q: (L) What is your receiver? The physical body?

A: Mind through central nervous system connection to higher levels.

**Q:** So, that is the whole issue of gaining knowledge and developing control over your body. If your mind and CNS are tuned to higher levels of consciousness, that has significance in terms of your receivership capability?

**A:** Close.

**Q:** Now, on a couple of occasions we have talked about trees. You have said that the trees would lead me to an answer. Then you made remarks about beechnut, and oaks, and beech and bloodlines and family trees and the Nordic Covenant. Basically, I asked about this Nordic Covenant and you said that I would find the answer, that the trees would lead me to it. I asked what literary source I should go to to find the least distorted source of information. You answered “trees” again. Then, you pointed out the leaves of the trees on this book. Later, when I read the book that was all about trees, it said that there was a need for someone of a certain bloodline to come along and free the dragon spawn. “None other than she can bring the pryf, or soul, up from the deep, no matter how they may make the serpents squirm. If she can hold her place in the gates of time.” You answered me “You cannot see?” It also says that this person with this certain bloodline has the duty of creating a bridge between man and the gods to open the doorways of time. You said to me that these things had explanations that were readily apparent. Then, when I asked the question about this book and all the trees in it, that this was a clue given so that I would notice the things in this particular book, you said “certainly.”

Now, having gone through all the shamanic stuff, all the information about the world tree, the world axis, and your remarks about building a staircase, which is another variation on the world axis or world tree, and having some kind of mission, and the mission being piercing the spider, which relates again to the world axis and the world tree, which one climbs one step at

a time. Then, you talked about Jack and the Beanstalk, which is another example of the world tree. Over and over again we are having all these representations of trees which basically has something to do with some sort of destined action, and it is almost as though you are hinting that some person has to be physically tuned as a transducer of some sort to “stand in the gates of time,” for the rest of humanity. Then, you made the remark recently about lodestar. Well, there might have been a time in my life when I might have thought that it was me who could do something like that. And, if I ever did, maybe it was even ego thinking. However, I am getting a little old for that sort of thing, so I don’t really think that it is my role. But, I do think that there is somebody in the world whose role that is, and I would like to know if that is somebody we are supposed to be looking for, or that we are going to find this person?

**A:** Perhaps you shall find, or perhaps they will find you!

**Q:** Well, it kind of takes the burden off my shoulders. I think that somebody who does something like that is never useful for anything again. Somebody who does such a thing is like a sacrifice. They have to give their life up for others to act as this transducer and it fries all their circuits. Can you comment?

**A:** No.

**Q:** Am I correct that somebody who does this is basically sacrificing themselves and they get fried in the process?

**A:** In some instances.

**Q:** But, it is true that we are looking for somebody who will stand in the gates of time and act as a bridge?

**A:** Maybe. You shall see...

**Q:** Okay, I want to find out about this Jack and the Beanstalk and

the “giant meaning” you have talked about in the recent past. Not only that, but you have continuously hinted that something is just around the corner, and we are getting to the point where we are thinking that there is just simply not going to be enough time to do anything. Ark’s got 800 pages of Maxwell to go through; he can’t stop working to do that; 800 pages of equations is a lot of work - like months of hard work - and, time is passing - four years have gone by, and zip! I’m not getting impatient here, but time is going and you guys are 6th density and it means nothing to you... but we’re getting older. What we are supposed to do, if we are supposed to do something to make the connection for things to move?

**A:** You are so anxious. Perhaps you should examine the ground covered, or were you just as close 10 years back?

**Q:** Well, ten years ago I didn’t wear glasses. I didn’t need ’em either! I could thread a needle! I mean, this thing called time has a profound effect on physiology whether you guys notice it or not! I know, it’s the soul that counts, but my thought is that we are in these bodies, and it has been subtly suggested that we are in these present vehicles to DO something.

**A:** But is it not a great adventure?

**Q:** Well, lately it has been a lot of working and slaving. Working to pay the bills. Then we had to survive this period when the company wasn’t paying our invoices, so we had to borrow on our credit cards, now we have to pay that back AND live at the same time. So, boom! Work, work, work!

**A:** So maybe you should return to the way things were when we first contacted you?

**Q:** No! I’m not complaining!

**A:** Yes, you are, though in a gentle way.

**Q:** Well, I mean you did so much, you brought us together, did all these things... and...

**A:** And you think there is no more?

**Q:** Well, no... but...

**A:** But what?!?

**Q:** Well, we're together and we are happy. And because we are together and happy we feel like we should be getting things accomplished... that there are...

**A:** And you are not?

**Q:** Not in a big useful way.

**A:** So say you. Thank goodness you ain't an expert in this judgment arena!

**Q:** So, you are saying that, even though it appears to us on the surface that nothing is happening, that at some level, something IS happening?

**A:** Oh, yeah!! So... Quit yer bitchin.

**Q:** Is it too much for me to ask for you to give me just one teensy tiny little hint about what is going on at these other levels that we are not aware of that is so important?

**A:** You may ask.

**Q:** Well, I did. Just give me a little bitty hint... a three word clue... Something to calm me down. Something to make me sleep well at night and that will let me know that all is right with the world...

**A:** RAM.

**Q:** That's the clue?

**A:** Yes.

**Q:** Was that an abbreviation or a word?

**A:** Seek and ye shall find.

**Q:** (A) RAM. Random Access Memory.

**A:** Yes.

**Q:** How does that relate to what is going on at higher levels? Does everything we do, or does the movement of the project, depend upon my pursuit of the psychomantium project?

**A:** A little.

**Q:** Is part of this waiting process the completion of the Wave series since that has been consuming my life since May.

**A:** Yes.

**Q:** I have to say that the writing of this series has been one of the most educational projects I have ever undertaken. Because, in the writing, I have had to comb through the transcripts and have had to explain it to other people and before I can do that, I have to explain it to myself. It has become a profound mind expansion thing...

**A:** Good.

**Q:** It's almost as much fun to be learning the things I am having to assemble as if I were reading it. And I'm the one writing it. It's really quite amazing.

**A:** In part you are.

**Q:** So, I need to finish the Wave. When I finish that, I have a couple of other projects already lined up. If I finish that, the Lord is willing, the creek doesn't rise, and I manage to keep breath in my body, I might, in another five years get all the material we have so far on the web. But, it is an enormous undertaking.

Day and night, either writing in my head, getting ready to write, writing, or going back over what has already been written. Every day. Consumed with it. I guess we are done for now...

A: So, goodbye.

END OF SESSION

## 8.15 December 2, 2000

Ark, Laura, Tom K., Barry T.

Q: Hello.

A: Hello.

Q: And who do we have with us this evening?

A: Soalam.

Q: And where do you transmit through?

A: Cassiopaea.

Q: Since we are regrooving with Tom, let's start with yes/no questions. We would like to ask how many sessions would be necessary to establish the new groove, to re-tune, since Frank has dropped out?

A: Four. Work on tuning.

Q: Is this a better combination than with Frank?

A: Yes. Possibly.

Q: (TK) [Indicating large crystal on table.] Do you like the new crystal?

A: Yes.

**Q:** (L) Is it helpful to have it on the board?

**A:** No difference.

**Q:** (L) What is Frank upset about that caused him to want to drop out of the group?

**A:** Ring.

**Q:** (TK) What “ring?”

**A:** His importance.

**Q:** (TK) He’s upset about his loss of importance in the group due to Ark and Laura getting married? Is that the ring?

**A:** Yes.

**Q:** (L) Is it possible that he is being manipulated by other forces?

**A:** Via other forces.

**Q:** (L) In other words, his thoughts and feelings are his own, but they are being utilized by amplification. (BT) Was Frank being used to monitor?

**A:** Yes. Some.

**Q:** (L) Was Frank influencing the material himself?

**A:** Only when his field was off. Like that moon.

**Q:** (L) Frank’s field was off? (B) Or his disinformation was cyclic like the moon? (L) It was waxing and waning. In other words, we could go back through the material and use a cyclic pattern to discover the influences?

**A:** Yes.

**Q:** (L) Okay, what was this beeping noise we heard in the house the other day?

A: No. 318 monitor.

Q: [Laughter.] (L) A physical monitor?

A: Yes.

Q: (L) Something in our house, and it's still there?

A: Monitor. Yes.

Q: (L) Did it have some sort of glitch that made it start beeping suddenly?

A: Yes.

Q: (L) Who put it there? I mean, physically?

A: D\*\*\*.

Q: (L) The guy who did the work on the house?! In the attic?

A: Yes. Real small.

Q: (L) Did D\*\*\* know he was doing it?

A: No.

Q: (L) Which reminds me: did D\*\*\* forget to return our slap stapler?

A: Yes.

Q: (TK) Is there any way of feeding disinformation through this monitor?

A: Yes.

Q: (BT) Is that something that we should attempt to do?

A: No.

Q: (A) Now, you say "no. 318" monitor. Does that suggest that there are at least that many monitors in our house? Is this be-

cause they are small? I theorized that when they brought the truck to blow the insulation in the attic, that this would have been a perfect way to install listening devices. But they would have to be small and numerous. (TK) Yes. How many monitors are in this house?

A: 85.

Q: (BT) Is this correlated to the cars that were regularly stopping out front?

A: No.

Q: (TK) They don't really have to get close for that kind of work. Do they have to get close to access these monitors?

A: No.

Q: (BT) Are they being monitored by 3D or 4D?

A: 4th.

Q: (L) Did these cars stopping in front of the house have something to do with us, even if not related to the monitors?

A: Yes.

Q: (L) What were they up to? What about the people who came to the door? Were they sent for monitoring purposes?

A: Yes. Moles team.

Q: (BT) As in covert or undercover?

A: Yes. Motor handled.

Q: (L) Does this mean they are machines? They did a really good imitation of Sammy Davis Jr. (A) I want to go back to who is responsible for placing these monitors.

A: Illuminati Nacionale knights.

**Q:** (A) That sounds Italian. Hmmm. (L) Does Tom have some of these fun things in his house? (TK) Yeah!

**A:** Yes.

**Q:** (TK) How many?

**A:** 85.

**Q:** (TK) Boy, they sure like that number! (A) What do they monitor?

**A:** Voice.

**Q:** (TK) Are they sound activated?

**A:** Yes.

**Q:** (L) Maybe we should encourage the children to play weird music upstairs. (TK) They record whatever sound activates them, and then are later downloaded?

**A:** Yes. Often.

**Q:** (L) Aside from recording whatever we say, what is the objective of these monitors?

**A:** Control.

**Q:** (L) Do these monitors also emit anything? (B) Are they active as well as passive?

**A:** Yes.

**Q:** (TK) All of them, or is it a combination of different types of monitors that are interactive or linked?

**A:** Yes.

**Q:** (L) Does Barry have some in his house, too?

**A:** Yes.

**Q:** (BT) Did that have anything to do with triggering the doorbell?

**A:** Yes.

**Q:** (A) Well, the fact that they are monitors, I can live with this. But the fact that they are not just passive, but also are active, makes me a little bit upset. If they are active, they probably produce some kind of vibration which acts on us continuously, so to say.

**A:** Yes.

**Q:** (TK) It is sound - or vibrations? (A) What kind of action is it?

**A:** Psychic.

**Q:** (L) That's a pretty broad field. (A) Now, what is important for us, I think, is to know whether we can counteract this control by para-psychic means, by being aware, in a certain state or another, or if there is a physical action and we cannot control it because it acts on our genes, or our cells directly - our body chemicals - and messes up what we are doing. In that case, some kind of action would be reasonable. (TK) Okay, if these things are frequency emitters, and they affect us psychically, is there some way to counteract it, to neutralize it?

**A:** Yes.

**Q:** (L) Is this something physical or psychic?

**A:** Physical.

**Q:** (TK) Would it be a counter-vibration to cancel this out?

**A:** Yes.

**Q:** (L) So we need a device that produces a certain frequency?

**A:** Yes.

**Q:** (TK) Is such a thing available commercially?

**A:** Other.

**Q:** (L) It has to be built. (TK) Are crystals involved in this?

**A:** Yes.

**Q:** (A) Well, we've got a problem here because we have these 85 monitors. They monitor sound. This means that they are monitoring now.

**A:** Yes.

**Q:** (TK) So, if we discover what we have to build or do to counteract this, then the whole thing will be a waste of time because they will come along and install new ones or act to cancel out what we have done. Is this true?

**A:** Yes.

**Q:** (TK) Is this a no win situation?

**A:** No.

**Q:** (L) So, there IS a way to figure it out. (TK) Can we have some sort of idea as to how to go about counteracting this? (L) Yeah, gasoline and a match. [Laughter.] (TK) For instance, discuss it at a session held somewhere else?

**A:** Maybe.

**Q:** (TK) That says that it would not necessarily help. It wouldn't be a long term cure.

**A:** Yes.

**Q:** (L) Well, we could just sell the house and let them monitor someone else.

**A:** No.

**Q:** (TK) Is there a way to shield this room? At least temporarily.

**A:** Yes.

**Q:** (TK) But that doesn't help between the sessions. We would still be bombarded by these frequencies between the sessions. But, if the area were shielded while getting the information... Do we have to make or build some kind of personal device that people can carry or wear to shield themselves from this type of manipulation? Is that a viable option?

**A:** Yes.

**Q:** (A) Well, these things must be getting energy from somewhere. Well, they could be getting energy from the electromagnetic field which is everywhere. (TK) Do crystals have anything to do with the proposed device - the shielding device?

**A:** Yes.

**Q:** (L) They have mentioned that crystals with energy fields are helpful in this way. Apparently the sun's energy is helpful also. (TK) Okay, if we were to figure out how to fabricate such devices, can such a thing be modified to counteract changes in the attack frequency?

**A:** Yes.

**Q:** (L) I had a thought about those metal sheds. Run some electrical current to it, go inside and fire it up. (BT) Isn't that something like a Faraday Cage. (TK) Well, that would provide an area that would shield the sessions. But it wouldn't help between the sessions. Would this be some kind of big, huge thingy... (L) As in really expensive and difficult to make?

**A:** No.

**Q:** (L) Now, waves are things. You can make waves... (TK) And

you can cancel them. Like white noise or something along that line. (L) Well, maybe we ought to get one of those white noise machines. Would that help?

**A:** Some.

**Q:** (TK) How would you know what to set it to? It has to be super low or super high frequency... (A) There is a different possibility. Now, when we wear these zappers, we have a current going through us. Can something along this line cancel activation of physical changes generated by these monitors?

**A:** Yes. To a point.

**Q:** (BT) Is this no 318 monitoring commonplace, or is it reserved for “special” people? That is, it common to the populace at large?

**A:** No.

**Q:** (A) What does 318 stand for? Is it a model number?

**A:** Number of monitor.

**Q:** (A) So, it’s like our user number. We are location 318. So they must have a map.

**A:** Big log.

**Q:** [Laughter.] (L) Not a map, just a big log. Well heck, if we are only number 318, who is number 1? (TK) Is the number related to the order of importance?

**A:** No.

**A:** (BT) Just a locator number for identification. (A) I guess they have a certain number of places and they assign numbers. If there is a successful “monitoring” and the people die, then they can assign the number to someone else. (L) Right, like social security numbers. Back to the problem. Would lining the room with

metal (aluminum foil) help?

A: No.

Q: (L) Would lining the room with foil and electrifying it help?

A: No.

Q: (TK) How about copper mesh?

A: Better.

Q: (TK) When we were running tests onboard the ship, they loaded some trailers on the hangar deck and they contained real sophisticated and classified equipment in there. To protect it from radar sweeps, they covered the trailers with copper mesh. It didn't have to be activated by any current, but it did have to be grounded. What it did was absorb the radar and shunted it to ground instead of allowing it to "read." Then, there is something else called "RAM," or Radar Absorbent Material.

A: Yes.

Q: (TK) That stuff is expensive. (L) What about silk?

A: Yes.

Q: (L) The alchemists say that to protect the body from outside frequencies, one should wear silk. I know that sounds crazy, but that's what they said and did. Silk is a heck of an insulator. (TK) If we shielded the area with a silk tent, or wear silk clothing... (A) Silk by itself might not work, or it probably only works when in contact with the body. (TK) A copper mesh around the area would help.

A: Yes.

Q: (TK) RAM would help?

A: Yes.

**Q:** (TK) Silk would help?

**A:** Yes.

**Q:** (TK) Would all three in combination be necessary?

**A:** Yes.

**Q:** (L) Well, you are talking some big bux there. (TK) Is there another way to do this that isn't quite so involved? Does it require this degree of protection?

**A:** Yes.

**Q:** (L) What we have figured out is that if we produce a canceling frequency, all they will do is change the frequency. That could go on, tit for tat, endlessly. (A) They have standard monitors. They can tune it a little bit differently, but they cannot do much without continuously planting new devices. There is a limit to the changing of frequencies, perhaps. So, if we know how to tune our device to their device, we can do it. (TK) I don't know if what we are needing is so complicated a device. Probably just a frequency generator. A simple device hooked to a crystal. Is that going in the right direction?

**A:** Yes.

**Q:** (A) Our zapper, for instance, is a very simple device. It operates on a single integrated circuit. (TK) A frequency generator can be cheap. You hook it to a crystal for amplification.

**A:** Plot many frequencies.

**Q:** (A) We need to know the range. (TK) Can you tell us what frequency range?

**A:** Yes. 549 hz to 832 hz.

{Typical voice frequencies might range from around 90 hertz for

a low-pitched male voice to about 300 hertz for a high-pitched child's voice. The audible bands start at about 10Hertz. 1035 Hertz is that of Cosmic Rays. Wireless communications varies from about 3KHz, which is still in the audible range, up to the visible light range at about 1015 Hertz where some laser-based systems operate. These frequencies all vary in their propagation characteristics and susceptibility to interference, which determines their value for a particular purpose. For most applications the usable spectrum stops about 300GHz, at the beginning of the infrared band. A normal human can hear between 20 Hz and 20,000 Hz.}

**Q:** (A) So it's sound. Standard sound. Okay, white noise would be a partial solution. These numbers mean we would have to produce quite a range of frequencies. (TK) I was under the impression that it would be a very low frequency or a very high frequency, something beyond the range of hearing. (L) Well, this could relate to the fact that they are sound monitors. (TK) Where do they download from?

**A:** Ship.

**Q:** (BT) They said it was 4th density, didn't they? (TK) Spaceship?

**A:** Yes.

**Q:** (A) Can these little things send information directly to a spaceship? (L) Well, considering that it is supposed to be 4th density technology... (TK) Is that correct?

**A:** Yes.

**Q:** (A) I want to argue. If we can counteract with 3rd density technology... (L) Then there must be some element of 3rd density tech involved. (A) Right. (L) Well, there probably has to be. They may have some super-duper humdinger of a chip that we haven't even dreamed of yet. They may be using nanotech for all we

know. We may have these kinds of monitors in our bodies based on nanotechnology. (TK) How can we determine what kind of personal device we can build or make to protect ourselves?

**A:** More silk.

**Q:** (L) Is most of this activity designed to interact with the glandular system or with neuropeptides?

**A:** Label meier.

**Q:** (BT) A garment manufacturer with the label of Meier? (L) What about Billy Meier? (TK) Is it a garment manufacturer?

**A:** Label Meier.

**Q:** (L) On a scale of 1 to 10, how clean was the transmission while working with Frank?

**A:** 5.

**Q:** (L) Okay, on a scale of 1 to 10, what are we working with now?

**A:** 2.

**Q:** (TK) So we are getting garbled information. (L) It's always that way when you are tuning a new combination of receivers. (L) I would say that we need to really "weed" what we are getting right now and maybe come back to it later. (TK) Yeah. Some of it is good information, but you have to figure out which is which. (L) And we have to keep "grooving" because doing it makes it work. (TK) Is it better than last time?

**A:** No.

**Q:** (TK) About the same?

**A:** Yes.

**Q:** (A) Clearing the channel means two things: being more sensitive and when you get more sensitive, more data comes, and you get happy and you are so happy that, without knowing it, you act on the data. You may distort the data. The more you get, the more you are inclined to act from yourselves. So, when you get more, you have to work on being more silent.

**A:** Maze.

**Q:** (BT) The transmission is a maze, or the device needs to be more like a maze? (L) I think they are referring to the fact that getting out of the soup is a maze. We are in a maze in general as Ark pointed out. (L) Well, there is something I would like to inquire about. Previously, toward the end of the period of working with Frank, there was a lot of encouragement given to investing in the stock market. That was Frank's ambition. Was that biased information from Frank?

**A:** Look now.

**Q:** (BT) Does it mean that now is a good time to look at stocks?

**A:** No.

**Q:** (BT) Now is a good time to reveal the investment program?

**A:** No.

**Q:** (L) Look at the stock market now?

**A:** No.

**Q:** (L) We were also told that worrying about getting a book put together was not something we were supposed to be concerned with, that it would happen on its own? That was not a problem.

**A:** Not not problem.

**Q:** (L) Is there anything we can do to accelerate the grooving process?

**A:** More channeling.

**Q:** (L) Just simply to do it more?

**A:** Yes.

**Q:** (L) What is the cause of the state of mind I have been in with the writing for the last few weeks. I have basically been in a very chaotic state, unable to write. Is that a result of Frank's actions and thinking?

**A:** Monitors.

**Q:** (L) What chemical are they producing? {BT's cell phone emits beep noises and is turned off. Laughter.}

**A:** Fe fe fe fe fe fe.

**Q:** (L) What is that? (A) Fe is iron. (L) Oh! Yes, we asked what was going on with my chaotic state. (TK) Is that the answer to Laura's question? (L) Is my iron level low?

**A:** Yes.

**Q:** (L) Is there anything we need to know for the upcoming week or two that you could advise us on without specific questions?

**A:** All must be careful.

**Q:** (L) Well, that's pretty general. (BT) In a physical, mental or emotional way?

**A:** All.

**Q:** (L) Are we under a particularly intense period of attack at the present time?

**A:** No.

**Q:** (L) Nothing more than usual.

**A:** Yes. Goodbye.

END OF SESSION

# Chapter 9

## 2001

### 9.1 February 3, 2001

Ark, Laura, Terry R., Jan R., Barry T.

[Recorder off during intro.]

**A:** Stop, listen.

**Q:** (L) Are we going in the right direction with the non-profit organization? {Referring to our creation of the Perseus Foundation}

**A:** Yes. Forward into the project to awaken the lost chosen ones.

**Q:** (T) Is there anything we should have discussed this evening that we didn't?

**A:** Yes. Lost.

**Q:** (L) In other words, we didn't focus enough on what our real project is which is to awaken the lost?

**A:** Yes.

**Q:** (L) In order to do that, we need to get cracking because there are others.

**A:** Not now. Listen.

**Q:** (T) Okay, we are listening. (BT) Listen to our inner self?

**A:** No.

**Q:** (T) Are we supposed to be hearing something?

**A:** Yes. Forward into the light. Listen.

**Q:** (T) Something outside?

**A:** Yes.

**Q:** (T) By the house?

**A:** No.

**Q:** (J) Above?

**A:** Yes.

**Q:** (T) Something is above the house?

**A:** Yes.

**Q:** (T) If we go out and look would we see it?

**A:** Yes.

**Q:** (T) Is it a helicopter or an airplane or something?

**A:** No.

**Q:** (T) Tree?

**A:** No.

**Q:** (T) Should somebody go outside and look?

**A:** Yes.

**Q:** (L) We'll send Barry. [Laughter.] Go outside and look up. If you aren't back in ten minutes, we'll come looking for you. {Barry goes outside.} (T) Is Barry gonna make it back?

**A:** Yes.

**Q:** (T) Is it something visible that he can see?

**A:** Yes.

**Q:** (L) Are we being blocked?

**A:** Yes.

**Q:** (L) Is it good that Frank is no longer part of the group?

**A:** May be others.

**Q:** (T) There may be others that will work better?

**A:** Yes.

**Q:** (T) It just didn't have a lot to do with Frank, per se, it just has to do with the communication?

**A:** Yes.

**Q:** (L) Of course, Frank thought it was all about him.

**A:** Yes.

**Q:** (L) And he was just the "ground," so to say.

**A:** No.

**Q:** (L) What was he?

**A:** Member.

**Q:** (L) What was Frank upset about?

**A:** Ego.

**Q:** (L) Yes. It didn't show itself so clearly except when he was under hypnosis, and then his ego was just simply repellent. (J) Yes. (L) The whole attitude was that he was all-knowing and the rest of the world was just basically dirt.

**A:** No. Afraid.

**Q:** (T) Afraid of what?

**A:** Not being. Ego.

**Q:** (L) His ego was afraid of not being?

**A:** Yes.

**Q:** (L) Should I write another letter to Frank and invite him to come back?

**A:** Yes. Do what you must.

**Q:** {Barry returns.} (L) Did you see anything? (BT) Just a slight break in the clouds overhead. (T) Are the clouds causing the problem?

**A:** Yes.

**Q:** (T) So, its not an attack of any kind, its just the nature of the air tonight?

**A:** Yes.

**Q:** (T) And we have a weak channel yet.

**A:** Yes.

**Q:** (T) And we need to burn a big one right straight up through the clouds?

**A:** Yes.

**Q:** (T) We need a laser. (L) What should we do about Ark's contract work? Should we look for more work, or look elsewhere?

**A:** Up to you.

**Q:** (L) Well, you said once before that the situation at {employer - DOD subcontractor} was stable. It doesn't look so stable just now.

**A:** No.

6th density close

Contact diminished

END OF SESSION

## **9.2 March 17, 2001**

Mirror, mirror, on the wall...<sup>1</sup>

Ark, Laura, Vincent Bridges

Reconstructed from notes.

**Q:** Is anyone there?

**A:** Yes.

**Q:** What is your name?

**A:** Oxajil.

**Q:** Is that your name?

**A:** Yes.

**Q:** Do you transmit via Cassiopaea?

---

<sup>1</sup><http://www.cassiopaea.org/cass/mirror.htm>

**A:** Yes.

**Q:** Do you have any messages for us?

**A:** Open other door.

**Q:** What does that mean?

**A:** Look mirror now Laura.

**Q:** Does this mean we should use the mirror for communication?

**A:** Yes.

**Q:** Is there anything Vincent can do to help this process?

**A:** Open.

**Q:** (V) If it would be my free will to do something along this line, would it help to facilitate communication?

**A:** Work on Laura.

**Q:** (V) That means we should have done the work on Laura before the session, as Ark suggested?

**A:** Listen to Ark.

**Q:** (V) So, we screwed up by not listening to Ark earlier?

**A:** No. Listen to Ark.

**Q:** (V) Something else Ark said today?

**A:** Yes.

**Q:** (V) Can you give us a keyword for this work on Laura that we need to do?

**A:** Number Five.

**Q:** (V) What does number five have to do with anything?

A: Laura. Listen to Ark.

Q: (L) Question for A\*\*\*\*\*: is Sweetheart alright?

A: Yes.

Q: Is she in kitty kat heaven?

A: No.

Q: Has she been reincarnated?

A: K. Yes. (Kitten?)

Q: (V) Back to the number five clue. How does this relate?

A: Open other door.

Q: (V) Door as in the mirror?

A: Open now.

Q: (V) You mean we should try the mirror right now?

A: Yes.

Q: (V) Is this related to what I was told in 1987?

A: Yes. More.

Q: Can we have another clue?

A: L V...

Q: We don't understand.

A: Knowledge protects.

Q: But what is this L V?

A: Process of L V. Source.

Q: (V) Does this mean that the process of deprogramming will lead to the source?

A: L V I 3 5 Ark.

Q: (Confusion expressed about this last “clue.”)

A: L 5 I 3 for more. Mirror.

Q: (V) So we will know more or be able to get more via the mirror?

A: Yes. Goodbye.

END OF SESSION

## 9.3 March 19, 2001

Mirror, mirror, on the wall...<sup>2</sup>

Ark, Laura, Vincent Bridges

Q: Hello.

A: Hello.

Q: Is someone with us?

A: Air. Cassiopaea.

Q: Do we have the Cassiopaeans with us?

A: To U.

Q: Do you have a name?

A: Faitij. [Curious name; almost an Arabic flavor.]

Q: (L) Okay, we had a hypnosis session today. Did we do all that was necessary to blow off the locks?

---

<sup>2</sup><http://www.cassiopaea.org/cass/mirror.htm>

A: Close.

Q: (VB) Did we do what was necessary for now?

A: Close.

Q: (A) What percentage of what was necessary to do did we accomplish?

A: 49 percent.

Q: (VB) Was 49 the right number?

A: Yes. Laura has open window in more keys. ["keys" as in sound?]

Q: (L) Did we utilize the clues from last night properly?

A: Yes. Now must look us up to talk to us.

Q: (L) Look us up as in the phone book? (VB) Look them up in the mirror. (L) Is there...

A: Key FI 3 ["phi" 3?]

Q: (VB) Key "phi 3?" You jokers! (L) What is phi 3? (VB) Phi to the 3rd power? (L) A phi circle with 3 turns?

A: Route.

Q: (VB) Is this phi 3 a path or something?

A: Open your.

Q: (VB) Open "your" phi 3? (A) Now route is French for road, and "F" could be for France; and "I-3" could be a number of a road in France.

A: Yes.

Q: (VB) Are you pointing us to somewhere in France?

A: Yes.

Q: (VB) Is it a place that either Ark or I have been to?

A: No.

Q: (VB) Is it a place we should go to?

A: Yes. O T

Q: (VB) Operating Thetan? I can't make any sense out of this because I am trying so hard to stay out of it. (A) We know the route number. O T must be the initials of something. It might even be in the little book you just bought. (VB) Are we correct in our suppositions so far?

A: Yes.

Q: (VB) Tell us more about O T.

A: O T.

Q: (L) Well, that was real clear! [We get book and look at it.] Does O T mean Operating Thetan?

A: No.

Q: (L) Let's go back.... You say "route." (VB) Is it a place in France?

A: Yes.

Q: (L) Is it the name of a place?

A: No. Laura can see.

Q: (L) Do we need to do more hypnosis to enhance the seeing process?

A: Yes.

Q: (L) Do we need to do it as soon as possible, like right away?

A: Open.

Q: (L) Is there a couple word clue... [Begins to sweep the alphabet as though gathering energy.]

A: Key is not number mix F,

Q: (VB) What?!

A: Yes. Five 3

Q: (L) So, you are saying that it may not be a number mixed with a letter, but that the key is Five 3 O T.

A: Yes. Not key F I 3. Route I 3.

Q: (L) Not “phi,” but a route with an F somehow. This is not making a whole lot of sense here. I realize you are trying to tell us something, but you are going to have to come at it another way because we just aren’t getting it this way. (VB) Are we understanding what we think we are getting?

A: Yes.

Q: (VB) Can you be more clear because we aren’t understanding something here?

A: Titus lair.

Q: (VB) Titus was an emperor, but that’s all I remember off the top of my head. [We stop and look Titus up in a book and discover that he was the one who sacked Jerusalem and was commemorated on the “Arch of Titus.” It was then suggested that the temple treasure was taken to Rome, and stolen from Rome by the Visigoths.] (L) Okay, are we onto something with this Titus and the Temple treasure? Is O T the Old Temple?

A: Yes.

Q: (VB) Does this have to do with Perseus’ purpose?

**A:** Just told you. Place Laura must go to slow F I 3.

**Q:** (L) To “slow F I 3?” What is F I 3 that it must be slowed?

**A:** Sneak attack.

**Q:** (L) So, this is some kind of code for the route of entry of a “sneak attack?” (A) And we must go there to slow this attack? (VB) Can you tell us more about this attack?

**A:** STS 4 D.

**Q:** (VB) And what are the STS 4 D things attacking?

**A:** Earth.

**Q:** (L) So, you are saying that there is a doorway there that they can come through, or do through, or plan to come through, or through which they can send energy, or something along this line?

**A:** No.

**Q:** (L) There is something buried there that we must find to use to slow this attack?

**A:** Yes.

**Q:** (VB) If we find it, that will slow the attack?

**A:** Not just slow. Jump up the protection required in order to survive slam by meteors in 2010 space war.

**Q:** (L) Well, I want to know... why do I have to be there? (VB) Do all three of us in this room have to be there?

**A:** Yes.

**Q:** (VB) Why?

**A:** Must create conduit.

**Q:** (L) So, we are back to the seven people that must assemble?

**A:** No.

**Q:** (L) Doesn't have to be seven. (VB) But it has to be the three of us?

**A:** Yes.

**Q:** (VB) Can we bring others with us?

**A:** Yes.

**Q:** (VB) Just checking. (L) I'm not leaving my kids! (VB) Bring the whole family?

**A:** It is humanity's hope for survival what lures you to the quest here Perceval 3.

**Q:** (L) Well, we have one slight little factor that we are going to have to deal with, and that is the money factor. Obviously, we are going to have to have a lot of money to carry out this mission. I mean, do we need to just pack up, sell the house, and move?

**A:** To save the world you will vote for knowledge protection rite, Laura; instincts not knowledge abandonment. Move when time is right.

**Q:** (VB) That strikes me as a really odd note, for some reason. (L) Well, that's their whole thing. Knowledge protection "rite" is "awareness." Do you mean some kind of actual ritual?

**A:** Be prepared.

**Q:** (L) Yes. How does knowledge protect? By awareness and being prepared. Being prepared is the "rite" of "knowledge protects." (VB) Is there something we need to do or know to be prepared?

**A:** Yes. Sell books.

**Q:** (VB) So, what you guys are saying is that it is not exactly a ritual, but being prepared is having all the books out.

**A:** Yes.

**Q:** (VB) Do we have to have all the books out?

**A:** Yes.

**Q:** (VB) So, that means it is not on the slate for this May. Are we all supposed to be there this May?

**A:** No. Just knowledge is must. [Tape ends; pause while new one inserted.] Quest.

**Q:** (L) So, knowledge is a must, and for this we must continue to quest. (A) To sell books, one must write books. Writing books is an opportunity to get knowledge and spread knowledge, and that is the most essential thing here. (L) Do we need to do another hypnosis session before Maynerd leaves tomorrow. Would it be advantageous?

**A:** Okay, yes. Not urgent now.

**Q:** (VB) Yes, it would be advantageous. Is that what you are saying, that we've done as much as we can?

**A:** Not.

**Q:** (A) It wouldn't harm, is that what you are saying?

**A:** Spade up the sleeve.

**Q:** (VB) Ace in the hole. (L) Spade. Can also be a shovel. A double meaning. An ace in the hole; turn something up; dig. They could have just as easily said "ace." If we were to do another session, what would be the key words to guide the focus?

**A:** Safety gate.

**Q:** (A) Define “safety gate?” (VB) A back door they can access you? A secure entrance? What?

**A:** Post-hypnotic gate pre-text.

**Q:** (L) Maybe they are saying that we need to install a post hypnotic gate pre-text? Is Maynerd supposed to install a post-hypnotic suggestion series of words that I or Ark can use to open or close a gate?

**A:** Yes.

**Q:** (VB) What kind of gate? (L) One that can be opened or closed. (VB) Somehow connected to the knowledge protection rite. What is a pre-text? A pretext? (L) Should we put in a suggestion for viewing the mirror, a series of words, to open the gate for viewing, and then a series of words for closing the gate?

**A:** Yes. Precisely. Just a few words.

**Q:** (L) In Polish?

**A:** No.

**Q:** (A) What is this “spade up the sleeve?” (L) Well, applying it here would mean to have it open and close at will. (VB) Does “spade up the sleeve” mean our “secret weapon?”

**A:** Yes.

**Q:** (VB) Do we have to develop this secret weapon?

**A:** Yes.

**Q:** (VB) Is that what we are supposed to do with the hypnotic safety gate?

**A:** Yes.

**Q:** (VB) Is there any more information you can give us?

A: Yes.

Q: (VB) Can you give it now?

A: Puns or slogans.

Q: (VB) The Green Language?

A: Yes.

Q: (L) So we are supposed to come up with some puns or slogans to install as triggers of our own...

A: Yes.

Q: (VB) And that will facilitate Laura's ability to open the mirror seeing at will?

A: Yes.

Q: (VB) But this is not urgent, it just must be done before we take off on the quest?

A: Yes. Must follow lots of paths.

Q: (L) So, we still have a lot to learn coming up before us here. [And only now are we beginning to move into the stage where we can literally get to the bottom of the matter, I think.] (L) So, we cannot just rely on the mirror. That's an ace up the sleeve. We have a lot of work to do. (VB) We are talking about a situation in which Laura is going to need...

A: Yes.

Q: (VB) ...a system in which Laura can "turn on" unknown to anyone else, that we can use in public without anyone else knowing...

A: Yes. Use to home in on right level of log u to snse [sense] fight...

End of Session. The energy fell off. Whether this was a remark that reflected a sensing of a “fight” that was present at this point, blocking the transmission, or was an instruction that we were to be able to learn to sense “fighting,” we don’t know.

## 9.4 July 5, 2001

Mirror, mirror, on the wall...<sup>3</sup>

Ark, Laura, Vincent Bridges, Orri E, Barry T

**Q:** Testing. (L to VB) Warm up your fingers. You’re not going to go flaky on me are you? (VB) You never know. I’ll try not to make it go around the board 8 times between letters. I have a terrible time when I start. (L) Hello, is anyone there? Hello, hello. [Extremely long pause.] Well. We are just sitting here with no action. (A) A\*\* just walked by. Maybe we wait. They don’t like kids. (L) They love kids; they just don’t want them around. It’s not healthy for them. (VB makes inaudible remark) (L) You non-believer! (laughter) (VB) It didn’t stop them the last time. (L) They were desperate. They had something to say, too. Maybe they thought they told us all we needed to know. [Long pause. L gives VB instruction on how to suspend the arm from the shoulder. Planchette begins to move in circles and stops on Capricorn.] (L) Hello. Is anyone there?

**A:** 1

**Q:** (L) Do you have a name?

**A:** UC !

**Q:** U I C ?

---

<sup>3</sup><http://www.cassiopaea.org/cass/mirror.htm>

**A:** O U Look. [The word “look” is a whole word on the board and was not spelled out.]

**Q:** (L) 1 U seek, O U look?

**A:** S A R Wait. [This last is a whole word on the board and was not spelled out.] Listen. [Another whole word on the board was indicated.]

**Q:** Listen?

**A:** Yes. [Another whole word on the board.] M

**Q:** [Planchette stopped. Long pause.] (VB) It stopped. (L) It’s like in between Sagittarius and Capricorn.

**A:** Look. [Again indicating a whole word.]

**Q:** (L) So, what have they said so far? (A) Once “U C.” (VB) What are we supposed to be looking for, or looking at?

**A:** Lara look. [Spelled “Lara,” whole word “look.”]

**Q:** (VB) Well, they spelled your name. (L) Yeah, but they left out a letter.

**A:** Laura look. [Spelled name, whole word “look.”]

**Q:** (VB) Is there some reason why you left the “u” out?

**A:** Yes. Lara L U C.

**Q:** (L) What is “Lara Luc?” (VB) Okay, are we talking to the Cassiopaeans? Or are we just scooting around in astral space here?

**A:** Cassiopaea, Laura... [Planchette begins to spiral slowly.]

**Q:** (VB) Okay, what is this? (L) It’s still turning. We did that in the beginning a lot. It builds energy. [Planchette continues to spiral.]

**A:** Aura lock.

**Q:** (VB) Okay guys, don't make it fly off the board, alright? [Planchette spiraling faster and faster.] (A) It is spiraling very fast. (VB) In my mind's eye see a little green flame planchette. I can follow it around the board with my eyes closed. (L) You're not supposed to have your eyes closed. They're supposed to be open. (VB) I'm actually doing better with them closed. Um, is there something to that little green flame I'm seeing guys? Anything you want to tell me about it? [No answer. Planchette flies out from under VB's fingers.] (VB) Okay, thank you for flying out from under my hand. And it stopped on that same spot. (L) Okay, they said they were doing an "aura lock?" (VB) Yes. That's why I asked about the green flame.

**A:** 3 body junctim ground rail motqetuh.

**Q:** (L) I don't know what they are saying.

**A:** o s e over k o r e 5 k

**Q:** (L) It stopped. What did they say? (VB unintelligible remark)  
(L) We have to start somewhere until it's grooved. It's called "grooving."

**A:** New groove. [Planchette spirals.]

**Q:** (L) That's why they're spiraling. And they just want to spiral. [Pause while planchette continues to move in circles.] And it makes your arm tired. (VB) Maybe that's the point? [Long silence while planchette continues to spiral.] I'm getting in the groove here. (BT) It will wear out your muscle response. (L) Yeah. That may be so because of... (VB) Brother skeptic's desire to make things go a certain way? [Planchette continues to spiral.] (L) Busy, busy, busy. Boy, they are just busy, aren't they? (BT) Pretty energetic spiraling. (L) My arm is about ready to fall off. All right! Maybe ask some questions, even if we stick with some simple ones here in the beginning.

**A:** Time to urge everyo [spiraling] ne to under (L sighs) (VB) Come on. (L sighs) stand ri ri ri de.

**Q:** [VB rubbing shoulder.] (L to VB) You hurting? (VB) Yeah. (L) That's good. Something's happening. (VB) Well yeah. The thing's flying around the board so fast I can't... (L) No, it's doing other stuff, just trust me. (VB) What did we get? (BT) "Time to urge everyone to understand ride." (L) In other words, that you're supposed to ride, not drive. I think they're having trouble doing things because you like to drive, not ride. (VB) Well, I'm doing my best... (L) I know. (VB) This is so much better than the last time. (L) Okay. Well, I'm just telling you. There's probably unconscious reasons for this. (VB talking seemingly to air) My mistake. Leave me out of it [Irritated]. (L) Well, just stop pressing hard. Just enjoy it. You're supposed to enjoy the ride. (VB) Does your shoulder hurt as much as mine? [Laughter.] (L) No, but it used to. And it probably hurt a whole helluva lot more.

**A:** Other method other purpose board is good for grooving so enjoy ride!

**Q:** (L to VB) Well, you need to be grooved. (VB) Well what's the other method, other purpose? (A) It's open to you to ask. (L) Is it advisable to continue to work with the board? In addition to the other method? [Long pause. Spiraling.]

**A:** Do it here right now.

**Q:** (L) Do what here right now?

**A:** Mirror.

**Q:** (L) Damn it! (VB) I tell you, you may be grooving me... (A) Are we having fun? (L) "Do it here right now?" Why? Sorry guys, I had to ask.

**A:** See 4 density.

**Q:** (L) They aren't gonna let me out of it, are they?

**A:** Laura now!

**Q:** (L) Will I see our \$300,000 bux?

**A:** Open maybe gain insight about funds look

**Q:** (BT to L) Okay, is that just you, or with the moon full or what?  
(L to BT) Well, I don't think it makes any difference. We did it before with Ark and VB. [Long pause.] Any other words of wisdom before we set the mirror up? (VB) Uh, actually guys, I've got a couple of questions. Would you kind of help me out here, since I'm the "newbie?" I know she needs to look in the mirror, but you, what can you tell me about all this weird stuff? Like what do I need to know?

**A:** Laura look

**Q:** (VB) Alright, come on, come on. I'm not through yet! I am the stubborn one guys, I'm sorry. If Laura looks, is there anything we need to know about her looking to help her do it?

**A:** Hypnosis laura future time new look deed ok not much human toil to funds

**Q:** (A) What does this mean? (VB peremptorily) Okay, the "deed ok" is, I was silently asking, "I don't want to hypnotize Laura; I'm afraid of being another Dr. Puharich" So I think the "deed ok" was, they were answering me in the middle, which may have thrown off the "much human," because I was resisting... Oh, no, no, I don't want to do this; you guys really don't want to do this do you? (L) Well, you've got to remember, VB, all the work that was done to prevent me from being able to do it naturally, it has to be overcome, and we don't have a lot of time left. (VB) Okay. I would prefer to do it another way, but I suppose they're not helping me much, though, are they? (L) Well, why don't you ask a question

to the mirror? (VB) Well, this is very interesting isn't it? (L) It's a full moon. [Long pause.] (VB) Okay guys, I'm getting the feeling that you're telling us.... [Tape ends, VB restates lost question on next side.] Are you telling me the only reason I'm here is to make sure she can actually get deep enough to see through the mirror? If not the only reason, maybe a big part of the reason?

A: [Long silence. No response.]

Q: (VB) Say something guys.

A: Percival.

Q: (VB) Okay, there's five of us at the moment. Is this making a difference?

A: Yes.

Q: (VB) Should we cut back down to three for the mirror?

A: No. T I u e t h u l t o i t

Q: (L) What was that? Try again, guys. (VB) Wait, wait, wait, wait. (L) What was this word? This "tinue" whatever?

A: Ties you to it guide Laura mirror look room is mirage.

Q: (L) What is it? (VB) They don't usually spell that bad. Okay, more clarity please, on "room is mirage." What do you mean by that?

A: People in room perceive mirage.

Q: (L) Oh, I get it. The people in the room add energy to the viewing so it enables it to come through better and clearer, is that what you are saying?

A: Yes.

**Q:** (VB) Okay, we're going to look in the mirror. We're going to do it right after you finish this next question. But you need to tell us the steps. You need to tell us exactly how you want it done.

**A:** point out perception is just mirage and only look for what is real

**Q:** (VB) What the hell is that? (BT reads back) That was a direct response to you asking for steps. (VB) Guys that really doesn't help. (A) Point out that perception, yes? Is just a mirage, right? (VB) But they're saying that the perception of everyone in the room should be a mirage, that we're giving energy to the mirage, so how do we see through it?

**A:** people help move perception satisfactorily jump start

**Q:** (VB) Okay. Is there anything else, and if not, we'll go right to the mirror. Anything else we need to know?

**A:** [No response. Long pause.]

**Q:** (VB) Absolutely nobody just moved close to me right now. Nobody moved? (A & B) No. (L) Why? (V) Ooooh, nothing. (A) Something touched you? (VB) That's right. So what, I need another pat on the shoulder. (B) It was your right shoulder? (VB) Yeah. [End of tape.]

### Mirror Session

VB: As you breathe, stay focused on the mirror. And, at the corners of your eyes, allow yourself to become aware of the room. You can see almost all of the room out of the corners of your eyes. Stay focused on the mirror. Take a deep breath, release, again deep breath, release. As you breathe, allow the perceptions of the room to fade. The room we are sitting in is a mirage. It's empty. There's nothing here but you and the mirror. Focus your eyes deep into the mirror, and let your perceptions of everything

in the room, except the mirror, let them fade. As if it was a mirage in the desert, waving, disappearing, until nothing is left but the mirror. You can see the surface of the mirror, you can perceive a boundary or surface to the mirror. Everything else is fading out. As you look into the mirror, it's like looking into a very still piece of water. Look deep into that surface, allowing everything else in the room to fade away. Breathing comfortably, relaxing thoroughly, focusing on the mirror. Allowing the room to fade away until nothing remains but the mirror. I want you to focus on the mirror; feel the room fading. Allow yourself to become completely focused; all of your awareness, all of your energy; focused on the mirror; feeling that boundary, the surface of the mirror. In just a moment I'm going to count from ten to one. With each count you will feel your body getting very light, your body fading away like the rest of the mirage. With each count, as your body fades, feel your awareness going through the boundary, until at the count of one, you will be looking with your eyes open deep into the mirror, past the boundary, and deep within the mirror, you will see only that which is real. As we count back now from ten to one, feeling your body fading away, until is nothing is left but your focus on the mirror. As you focus on the mirror, look deep into its surface, until at the count of one you will be deep within the mirror, seeing only that which is real. Now, counting back: [Countdown.]

Deeply focused into the mirror, just allow the energies to come. Focusing on the mirror. Beneath the surface. Just allow the energies to surface. Keeping your eyes open now, stay focused on the mirror, begin to feel or see or sense what is deep within the mirror. Staying focused on the mirror; just feel your body; staying focused on the mirror, just allow the sensations in your body to drift away.

Deep, slow breaths. Focused on the mirror. Allow any bodily

sensations just to fade away. Any discomfort, any tension, just allow it to fade away. Staying focused on the mirror. Allowing the energies to emerge. Looking deep within the mirror.

Just describe what you see and what it is.

[Long pause.]

Whatever you see -start - just allow it to emerge.

[Long pause.]

Whatever it is, just describe what you are seeing in the mirror.

Laura: Lights.

VB: Good. Just keep looking. All the lights. Just keep describing what you see.

Laura: Plasma clouds.

VB: Just stay focused on the mirror. On the clouds. Just tell me what you see. Just describe what you see.

Laura: [Mostly inaudible. Seems to be descriptions of amorphous cloud shapes that move and come and go.]

VB: Stay focused on the mirror. Take a deep breath and allow all bodily sensation to fade away. You can talk easily and without effort. The awareness of your body is fading away as you gaze deep within the mirror. Just describe what you see.

Laura: Nothing in particular. Just amorphous lights and clouds. Shapes. Geometric figures.

VB: Pick one of these figures and look very closely; just describe what you see.

Laura: [Descriptions of shapes and colors, clouds of light, coming and going.]

VB: Keep looking. Can you follow one figure.

Laura: Well, it's like amorphous. Moving clouds. Some of them billow slowly, some of them are just flitting by.

VB: As you see one flit past, reach out and slow it down.

Laura: Oh, you can't slow them down.

VB: Speed up to their level to look very closely. What do you see?

Laura: Nothing but lights and clouds.

VB: Take a deep breath. Again a deep breath. And release. With every exhale, every exhale, you become more and more focused on the depths of the mirror. Breathe in, as you release, allow your awareness to go deeper into the mirror. Deep into the mirror. Good. What do you see?

[Long pause.]

VB: Deeper into the mirror. Nothing but the images in the mirror. Deep into the mirror. Breathing deep into the mirror. This room and your body are the mirage. What you see in the mirror is reality. Open yourself to it. Feel it as real, and describe what you see. On the count of three, you will let go of all awareness except for the images deep within the mirror. [Countdown.] Just describe what you see.

Laura: Indefinite shapes and colors and lights. Figures waiting to take form.

VB: Describe what you see.

Laura: Geometric light. That's the only way I can describe it.

VB: Just let go and move deep into the mirror. Go deep into the mirror, so that you're in the space of the mirror. You're in the

space of the geometrical lights. With your mind's eye you can look around in the space; just tell me what you see.

Laura: The problem is, a specific question has to be asked in order for anything to form. [Sound of beating heart on tape.] Vague directions don't seem to go anywhere except into vague amorphous representations.

VB: Okay. You need to ask a question to see something. Relax completely. Stay open and focus deep within the mirror. Ask your question.

Laura: I am not the one to ask.

VB: Why not?

Laura: It's not appropriate.

VB: Why not? Okay! What are you experiencing right now?

Laura: Sensations of constriction.

VB: What is constricting?

Laura: Asking for the self, serves only the self. I cannot be the one to ask. It is inward directed, and constricts.

VB: [Loud smacking noise.] Just keep looking. What are you feeling now?

Laura: It's better now. Some danger was passed.

VB: Breathe deep. As you release the exhale, sink back into that space. Deep into the space. See the clouds. We would like for Laura to see an image of the C's. Can we see an image of the Cassiopaeans?

Laura: In the mind's eye.

VB: You're looking in the mirror. Watch it form. Tell me what you see?

Laura: Shapes, light.

VB: Keep looking. Relax into it. Can you show Laura more about this image?

Laura: I see an image of a spiral galaxy spinning in space.

VB: Can you show Laura 4th density?

Laura: That is inappropriate phrasing. It causes constriction; constriction in my chest.

VB: Why?

Laura: Because it is phrased so as to be a question from self to self.

VB: On the board, you said that Laura could see 4th density if we looked in the mirror. What did you mean? Can you show Laura what you meant?

Laura: What about 4th density do you wish to see?

VB: Try not to merge with the mirror. What does Laura need to see about 4th density that is so important that we do it now? Show that to her.

Laura: That's an inappropriate request.

VB: On the board, you suggested that there was a reason why Laura needed to look now, and that it involved seeing 4th density.

Laura: There are many questions.

VB: Go on.

Laura: Why don't you ask them?

VB: [Voice becoming tense and hard.] Laura, I want you make sure that you see or hear C's and that you repeat what they say to you. Don't just answer in your voice. Do you understand?

Laura: I understand that it comes through me.

VB: Okay. That's what I'm saying. See it or hear it in the mirror. Okay? See it, hear it, coming from the mirror. Connect through the mirror. And let the being in the mirror speak. Why does Laura need to see 4th density now?

Laura: The answers to the questions can be obtained by seeing when the questions are phrased properly.

VB: [Obviously irritated.] Okay now Laura, just look in the mirror, keep your eyes on the mirror, and literally what do you see?

Laura: I see shafts of light to the left, billowing lights at the upper right, fluctuations of light in the central depths, flashing lights that are random throughout, amorphous images coming and going.

VB: [Very authoritative.] Okay. Show Laura what she needs to see NOW.

Laura: The question must be asked specifically in proper terms.

VB: What, in 4th density, does she need to see now?

Laura: Answers to the questions.

VB: How will she see these answers?

Laura: When the question is asked.

VB: How will she see these answers?

Laura: When the questions are asked, the answers appear. Vague questions receive vague answers.

VB: So there is nothing that you need to communicate, other than what we ask?

Laura: Only if you ask, can you receive an answer.

[Long silence.]

VB: Okay, Laura, take a deep, deep breath. Feel where you are, feel your psychic state, feel the openness in the mirror. Now I want you to just leave that behind, and I want you to consciously step out. I want you to look at your connection to the mirror, between the chair and the mirror; and what do you see?

Laura: I see a silhouette like shape.

VB: In the mirror?

Laura: Yes. It's like a silhouette-like cut-out.

VB: Okay, keep looking at the cut-out.

[End of 45 minute tape. Continuation on reverse begins in mid-sentence.]

VB: The figure is beginning to change. As you watch, you will be able to see more and more. What do you see happening to the figure?

Laura: The figure is there, and there are flitting images in the depths. Amorphous.

VB: What do you see in the blackness?

Laura: Lights, emerging and receding.

VB: Follow the lights. Follow the lights. Just keep watching the lights. What are they doing? Where are they going?

Laura: They come from the center and sparkle out in all directions.

VB: Focus on the center. Allow your awareness to move through that center. Keep looking. Describe what you see when you move through the center.

Laura: It's moving, waving.

VB: Now stay in contact with the waving. Feel that waving.

Laura: Ooh! Look at that!

VB: What did you see? Describe it.

Laura: Living light. Iridescent light. Iridescent shapes. Like shimmering eggs.

VB: Can you see them now?

Laura: No. They emerged and receded.

VB: Feel that waving darkness.

Laura: Yes. It's purple.

VB: [Voice very sharp.] What's the purpose of doing the mirror work?

Laura: To bond with another reality.

VB: What reality?

Laura: Fourth density.

VB: And what in 4th density do you need to bond with?

Laura: Awareness. When you see, you become more aware. And the more aware you are, the more you are able to operate in that reality, to become more free of restriction and deception.

VB: Can you see the eggs again?

Laura: Now I see a shaft of light coming down from the upper left to the lower right, like a light beam.

VB: I want you to imagine that you're moving into that light. See yourself in the mirror moving into that light beam. Does anything change?

Laura: Everything's brighter.

VB: How do you feel in the light beam?

Laura: Fine. It pulsates.

VB: Will you allow Laura to see - or can Laura see...

Laura: If the appropriate question is asked.

VB: Can Laura see what's happening through the mirror?

Laura: If the appropriate question is asked.

VB: Can you show Laura where the artifact is?

Laura: What artifact?

VB: The artifact that was discussed on the board, in the past.

Laura: At the appropriate time.

VB: So that means you could show it but you're not going to show it now?

Laura: There are several steps that must precede such.

VB: Can you tell us about those steps?

Laura: You have to ask a simple question. It has to be phrased simply and specifically.

VB: [Sharp and impatient.] Anybody ELSE want to give it a try with a question?

Ark: Can you see kabbalah tree? Its real structure? Through all the densities?

Laura: Umm! As close a representation as there is, it seems is...

VB: [Interrupting] Can you allow yourself to see it by looking through the mirror..

Laura: [Apparently ignoring VB] Now this is very strange.

VB: Describe it.

Laura: Aaaaah! This is a very fluid place! Whooo!

VB: Describe it. How do you mean “fluid?”

Laura: Ahh! Well, light doesn't go in straight beams here. It... it ... it's like ropes or strings. You ask about kaballah tree and suddenly I see ropes and strings, structures... the object that we draw as the kaballah tree is very structured and static and has nothing to do with the real thing! Here it is - and it's almost indescribable.

VB: Keep looking. What happens as you just watch? Can you still see the tree?

Laura: Yes, it's living light that moves and connects like a vast network with infinite...

VB: [Interrupts] Can you show Laura the time machine?

Laura: Would YOU like to see the time machine?

VB: Sure. Can you show Laura the time machine?

Laura: That's an inappropriate request.

VB: Why so?

Laura: It's not phrased properly.

VB: Can Laura see the time machine?

Laura: Would YOU like to see the time machine?

VB: I would like for Laura to see the time machine and describe it to us.

Laura: It seems to be an object about the size of a very large breadbox. It emanates a field, or a glowing beam. I'm not sure if you only have to be in contact with it, or stand in the beam, or if you just stand near it. It's clear that one does not get "inside" it, like in the movies. The field it produces is the important thing. The beam is like in the movie where they shine the beams up in the sky and wave them around; it's like that, only it has a shape. It's not long, straight and tubular, it's more cone shaped. So yes, there it is, it's...

VB: [Interrupts] Now I want you to stay focused...

Laura [Ignoring the interruption] ...it has angles to it, metal plates, and the structure itself is like some sort of geometric tubing...

VB: Will Laura be able to remember and draw it?

Laura: Actually, in a funny sort of way, it's similar to the shape of the static tree of life on it's side, doubled and inverted like having a mobius twist...

VB: Is this the Ark?

Laura: Yeah... it...

VB: Ark. Noah's Ark. The Ark of the covenant... the Ark of Time...

Laura: The object of which you speak, goes inside... it's the field...

VB: Now, keep looking, and stay outside the mirror; could you show Laura, so she can describe it for us, where, in time, this machine originates?

Laura: Ah! That's odd. The answer comes as 10,000 BC.

VB: Where is it in our immediate future?

Laura: Yes.

VB: Can you show Laura where it is in the immediate future?

Laura: In the immediate future.

VB: Can you show her where on the planet it is, when it enters our future?

Laura: At the appropriate time.

VB: Why is this not the appropriate time?

Laura: Because there would be danger.

VB: Stay on your side... 10,000 BC. Where has it been between then and the immediate future?

Laura: It's been found and used numerous times. It was used for very negative purposes, and it was deemed appropriate to retrieve it and...

VB: [Interrupts] Now don't get pulled in the mirror... stay on this side!

Laura: [Inaudible remarks]

VB: Can you show Laura so she can describe to us, the catastrophic situation in our future, our near future?

Laura: It seems as though it will be a progression. Like the beginning of rain, when the first few big, cold drops fall; and then a pause followed by a few more drops; and then, a downpour.

VB: Describe what you are seeing?

Laura: I see rocks - but they aren't very large. They are like the size of your fist. Just a few. And they make something of a stir. An uproar. People will be excited... very upset. It looks like just two

- two small rocks. And then nothing else happens for awhile, and then they forget about it. It all dies down. And then, a third, a fourth, a fifth and a sixth - and maybe even a seventh... isolated events, or so it seems. Still small. And then, a big one. All this will go on over a period of months.

VB: Take a deep breath, stay on this side of the mirror.. looking through. Keep looking; look through the mirror. Would you show Laura, so that she can describe for us, the situation concerning Percival, Percival Three.

Laura: The previously mentioned time machine, placed precisely at a specific location - and it's not exactly clear whether the action - there's a choice at that point in time, you know...

VB: What kind of choice?

Laura: A group can leave with the machine, or a group can bond their awareness, and utilize the device to shift the earth out of the path of destruction. It's not a shift in material terms, it's a shift in time.

VB: So that the comet will hit where the earth isn't anymore?

Laura: Right.

VB: How, much of a jump does this require?

Laura: Oh! Well, in terms of time, a miss is as good as a mile!

VB: How much of a jump in time is required?

Laura: A day.

VB: The space that the earth travels during one revolution on its axis, is enough to avoid a direct hit?

Laura: Yes.

VB: What would the effects be of moving the planet and everyone on it back or forward a day?

Laura: If you can do it, most people, after the shift, will forget that there was ever a danger.

VB: Is that a good thing?

Laura: [Sighs]

VB: Yeah, I know. Trick question. Now take a deep breath. Pull back, come out just a little. Let Laura's consciousness hear me clearly. Is there anything bothering you about this contact? Anything you can consciously feel while maintaining your connection? Anything at all disturbing you.

Laura: There's only a disturbance in the questioning. The questioning is constricting and directing consciousness. Questioning needs to be open and it's as though the answer can only come through uncorrupted if the question is framed in a non-assumption way. For me to act as the intermediary of what is being viewed, for others to ask questions, the questions must not restrict. This restriction is felt physically. There is some constriction - instantly, when the question is phrased so as to shift it from me asking myself - me asking the other me - rather than holding the responsibility for the question yourself. Do you understand?

VB: Well, my next question is why does Laura keep slipping into the mirror? Why is it so hard for her to stay on this side?

Laura: Ahhh... There is a formation of a bond of awareness. There is another self in that not-too-distant future time that is me. It's me communicating with me; it's the C's approaching me; and because it's closer from 4th density, its easier to communicate back and forth if I merge with myself in the future. It's like

bringing two soap bubbles close to each other - they just become one. It's not the negative thing you...

VB: It seems to me that we want to avoid that happening.

Laura: Not necessarily. Each and every one of us needs to begin merging with the higher self in terms of awareness... [inaudible]

VB: Why am I sensing negativity?

Laura: Insecurity.

VB: I'm quite comfortable with my own energy. Is that all that is at work here?

Laura: Oooh! [Sees something in mirror, apparently]

VB: What are you seeing?

Laura: Well, they are like combination puppies and flowers... [Tape ends]

...something that was with you; I can't say that it was in you or around you; something that you still carry with you, it's almost like a very heavy suitcase. It actually looks like you have to force it to close by standing on it and shoving stuff in the cracks and tying it closed with straps because it is ready to burst open.

VB: Okay, now look deeper in the mirror, through the mirror. Just keep describing what you see.

Laura: Ummmm. Now I see amorphous moving lights and clouds.

VB: Keep moving through that waving, purple darkness. In that space, just look around very carefully and tell me what you see.

Laura: [Inaudible.]

VB: Will you allow Laura to look around in the space so she can describe it for us.

Laura: Well, this is funny, have you ever seen a cartoon with a pencil being? (laughs) Oh, that's funny. That's what it's like.

VB: The stick figure is like dowsing rods?

Laura: No. That's... that's... (laughter) What a play on words! They are so funny! Core. You know the words "core being?" Well, it's not a joke! (laughter) Just think of yourself as a light being, in a sense, and in another, as not so amorphous as some people would think. There is some plasticity. You know how in this reality, the solid substance seems to be what it is and we have no control over it? Well, in 4th density, there is amorphous substance all around, and there is the "core being," who can assemble this substance by an act of will. It then becomes more structured in the same way food, in our reality, becomes your body, though here it takes a long period of assimilating and converting. There, it is rather quick. There is the core being - and it's really a core!

VB: Like an apple core?

Laura: No, a core - like tubular almost. But you know, most people don't utilize it as such, because they like to play with the materials available. It's more fun. But, it's not necessary, and under different circumstance, they can remove all those things exactly the same way we take off our clothes. [Inaudible] It's just more valuable.

VB: Now, you are using "you." Is that a general term, or is the stick figure me?

Laura: Anybody in 4th density.

VB: Are we in 4th density?

Laura: I am.

VB: So that's YOU, you are seeing in 4th density?

Laura: Me and others.

VB: So the stick figure is you in 4th density?

Laura: It is the visual representation of the core being of any 4th density individual. It is the essence.

VB: Take a deep breath. There are mechanisms at work that I, personally, am uncertain of. Is there anything you can tell me to make this easier?

Laura: Can you ask more specific questions? What, specifically are you uncertain about?

VB: I'm uncertain of the nature of the contact. I am uncertain of the nature of the perception. I'm uncertain of why I'm involved the way that I am. I'm uncertain why it's necessary to do this at all.

Laura: Okay.

VB: Any response?

Laura: Ask the question. I cannot answer if you do not ask.

VB: Why am I having these uncertainties I just listed? What can we do to make this whole process easier?

Laura: The uncertainty relates to - it's difficult to answer the way you have asked it "why are you having these uncertainties."

VB: Are the uncertainties part of the process?

Laura: How do you perceive the uncertainties?

VB: I perceive the uncertainties... Is the uncertainty an artifact of how I'm having to do this? Does the artifact come from our

clumsiness in doing the process?

Laura: It is unfamiliar territory; it is an unfamiliar process to you, in particular, because the essential nature of it requires as much openness...

VB: [Interrupts sharply] OKAY! Why am I seeing what Laura is seeing?

Laura: That has to do a great deal with why you are part of the process at the moment.

VB: Why am I part of the process?

Laura: That has to do with genetic linkages, and choices made at other levels to do certain things at a certain point in time, both at a future point in time...

VB: If I decided NOT to do this, what would be the effect?

Laura: Someone else would step up and fill your shoes. The Universe is infinitely capable of taking care of itself.

VB: Is that what is going on here? Is the universe trying to take care of itself?

Laura: Oh, yes! That's...

VB: What do you see?!

Laura: I'm just seeing that you, me, we ARE the universe. It acts through us.

VB: What should we do - we need to know - in order to get funding for our research?

Laura: (laughter) Well, I have to say that the first thing that pops up is a series of numbers and I'll just tell them - 6, 14, 25, 48, 52.

VB: Are these dates?

Laura: I don't know.

VB: Well ask 'em, are they dates?

Laura: You ask them.

VB: [Yells] Are they dates?!

Laura: No.

VB: What are they?

Laura: Numbers to use as you choose.

VB: And what should we do with these numbers?

Laura: Whatever you choose.

Ark: I think I know what to do with these numbers.

VB: Is that a question?

Ark: No. [Inaudible]

VB: Well, I don't follow you. Say that again?

Ark: I think they are probably lottery numbers.

VB: Are these lottery numbers?

Laura: They could be.

VB: Why won't you be more specific? I'm asking a very specific question?

Laura: They could be lottery numbers; they could be used in any number of ways. They could apply to choices that are taken over the next three months. You may encounter someone who has these numbers involved with them in some way; you may find these numbers on a page in a book which will then tell you something you need to know. These things come in so many layers;

there is any number of applications; so don't close off other possibilities and say they are just "lottery numbers." They could be, but they could also be so much more.

VB: [Sighs with exasperation] It's suspicious to me that gave 52. Am I just exercising my suspicions?

Laura: You can reverse.

VB: We already have a 25.

Laura: Then you have two 52's.

VB: Okay. Let's go in a different direction. Take a deep breath. Can you show Laura, so she can describe for us, what we need to do, to get the next step started?

Laura: Ask without limits, and everything will fall into place. Do not worry, there are things moving in areas that we don't even know about, that will converge in amazing ways, and it's better not to even know, because then you will anticipate and block it.

VB: [Sharply] Okay! Why was Ari here today? Can you tell me what that is?

Laura: He has a very strong interest; he wishes he could be as bold as he used to be; and as free. However, it may not be possible for him to get free of the bonds that restrict him. However, the energy exerted in any direction, even exerted toward an individual who does not respond to it the way you wish, when they leave your presence, may carry that energy with them into the rest of the reality. And it is there available to someone else. Any energy put into a goal, even if you talk to 25 people who are the wrong people, the fact that you are putting energy into a goal openly...

VB: [Interrupts sharply] What was that image you just saw?!

Laura: Well, just lights and geometric figures...

VB: Okay, these lights have some sort of function. What's the function?

Laura: They are like the substance from images will ultimately coalesce in a very solid and realistic form. These are incipient image formation stuff.

VB: I get the feeling that some of these lights, some of these seed thoughts, whatever, want to come through the mirror into this reality. Is that a correct assumption?

Laura: I don't see that at all; no.

VB: What's giving me that impression?

Laura: Well, you said it: assumption. You have a lot of assumptions. It's very hard to work with all those assumptions. [Inaudible descriptions of mirror images]

VB: And that's NOT crossing over into our reality?

Laura: No. They are just looking. Like friendly puppies; energy forms. They are cute.

VB: Anybody else got a question?

Ark: What was this thing when Vincent felt something touch his arm?

Laura: Vincent has some friends who travel with him, and they try to keep him out of trouble. It seems like, in this particular instance, somebody was banging on his shoulder just to let him know he was okay.

VB: And what kind of friends travel with me?

Laura: Actually, one of them looks like - he has a suit on, with a watch chain dangling from his waistcoat - but he doesn't have

the time, which is funny. Brown suit, shoe boots, average height, he points his finger a lot; glasses. He's fond of you. Can't say that he is an "attachment," but he likes to be around you.

VB: Where's he from?

Laura: Actually, what I am seeing is obviously a projection. He is projecting this image, and I almost feel like, in a funny sort of way, he's maybe even you in another life.

VB: Okay, he's not the one who patted me on the shoulder. [Very strong voice effect] Did the C's pat me on the shoulder, both then, and did they burn the hand print on my shoulder back in the past?

Laura: [Feeling extreme constriction and unable to resist the command/assumption, very low and weak voice] Yes. [Immediate sensations of choking.]

VB: Okay. Now, the C's are quite aware of all the different things that are in my luggage. Will you ask them to show you what is in my luggage?

Laura: Dirty underwear!! [Laughter. Constriction released suddenly and the answer erupts almost before VB finishes speaking. The instant the question was asked, the large, overstuffed, strapped suitcase mentioned earlier was seen to spring open and hundreds of pairs of dirty underwear flew everywhere. They weren't just normally soiled, but were stained with fecal matter and it was as though, instead of washing them, or admitting that they needed washing, each pair was hidden away and new ones were added until they were soiled and added to the collection. However, all of this visual imagery was not requested, so it was not given in words.]

VB: Keep looking! What else? Come on!

Laura: [Strong voice] There is some real funny old fashioned clothes. I swear, this pair of pants - if you ever wore them out in public don't say you know me, they are awful pants - and they have suspenders. There's a leather case.

VB: Open the leather case. What do you see?

Laura: In the leather case there is a bunch of little bottles; they are bottles of pills; they are blue. There's a shaving kit, a comb; the comb has missing teeth...

VB: Do you see anything else in there?

Laura: There's handkerchiefs, an old mirror, and there are clean, white shirts, that have never been taken out of the packages. You have never worn these shirts.

VB: Now, you're doing real good. Now, if the C's would be so kind as to explain to Laura why I carry this luggage...

Laura: Why do you carry it? Because you can't let go.

VB: Why can't I let go?

Laura: Because you always want to be prepared.

VB: And what am I prepared for?

Laura: You're prepared for a trip, that's one thing. And you're afraid that something is going to make you get on the wrong train.

VB: Yep. Can you translate that "wrong train" into more direct terms?

Laura: Well, there's a funny thing about that. It's like the real problem is you think you don't have any money to buy what you need when you get there.

VB: [Sharply] Okay, this funny but we're wasting time. Anybody else got another question?

Orri: [Asks question about health issue.] Is there a particular course of study to follow to be of greater service to the process of furthering free will?

Laura: [Comments on the health issue.] [Tape ends. Large section missing from the beginning of the next tape.]

VB: If the C's will be so kind as to give Laura a symbol that she can see in her mind's eye, that will allow her to quickly establish this contact...

Laura: I've got it.

VB: Do you need to describe it?

Laura: No.

VB: See it very clearly. Now, you will break the contact by seeing this image fade. And as it fades, the mirror will come back to just being a mirror. Coming back into your body. Take a deep breath. [Countdown to awaken.]

## 9.5 July 28, 2001

Ark, Laura

This was our first sitting with just the two of us. We sat for a minute or two. The planchette began to circle slowly, and then spelled out:

Pulsation Pattern Pygmies.

This reminded Ark of a dream he had had a couple of nights previously.

**Q:** Okay, now when you refer to these pulsation pattern pygmies, are you referring to the dwarf clowns in Ark's dream the other night?

**A:** No u trot I ile orts.

**Q:** That's not making a whole lot of sense. Who are we talking to? Do you have a name?

**A:** Yes.

**Q:** What is your name?

**A:** Xyenri

**Q:** Did you ever have a body of your own?

**A:** No. Cassiopaea.

**Q:** Are you having difficulty connecting?

**A:** Yes.

**Q:** How long will it be before we have a re-grooved connection?

**A:** Soon.

**Q:** {Dog begins barking in the background.} Why is the dog barking?

**A:** Alley activity.

**Q:** What should we do about Vincent?

**A:** Til money comes, no deal.

**Q:** Well, the trouble is, we need money right now. We need to know what to do. I mean, we are going daily into debt thanks to his advice. Can you give us any pointers in the proper direction?

**A:** Hosting.

**Q:** Hosting?! Hosting what?

**A:** Soon will come an offer.

**Q:** What kind of an offer will it be?

**A:** To host.

**Q:** To host what?

**A:** TV show.

**Q:** That's the craziest thing I ever heard in my life! (laughter) To host a TV show? That's the craziest damned thing I ever heard. {Laughter} Well let me ask you this: Am I right to be so upset with Vincent and his damned ritual magic stuff?

**A:** Yes.

**Q:** Am I right in my thinking that even if he is not conscious of it, he was sent as an agent to extract information from me?

**A:** Yes.

**Q:** Are the Cassiopaeans the ones that got in contact with him in his childhood and then when he was older {as he claims}?

**A:** No.

**Q:** Is he consciously working as an agent?

**A:** No.

**Q:** (L) Well, what can we think of to ask, just to warm up [the connection]? (A) What about this TV show? I mean, should we do something? (L) I don't think I'd get excited about it.

**A:** Look smart. Ugly doesn't get it. [Laughter. Dog still barking.]

**Q:** Well, that doesn't make sense. Nice to know you have a sense of humor at our expense.

A: Right on!

Q: Are you sure you're not just an old hippie?

A: No.

Q: I know, you're just trying to warm up, to get the connection going. Now, let's go back to your "pulsation pattern pygmies." What are they?

A: STOing will point the way.

Q: Ummm... is Grace going the way it ought to [in order to be helpful to others]?

A: Yes.

Q: Should we publish our books ourselves?

A: Close.

Q: Are we going to have future dealings with Vincent?

A: Looks bad.

Q: Well, that's what I expected. Did the {hypnosis} work that Vincent did with me - was that beneficial?

A: OK

Q: Do I still need more work done?

A: Yes, 5 turns.

Q: (A) By who?

A: Ark.

Q: (A) Are they joking? (L) No. Only you know me well enough to do it. You're the only one who could. That's my thought.

A: Good.

**Q:** Where did that stuff about the “Percival 3” come from when Vincent was here?

**A:** Vincent.

**Q:** Is there really something hidden in the “Lair of Titus?”

**A:** No.

**Q:** Is there really going to be a 2010 Space war?

**A:** No.

**Q:** Are we really supposed to build some kind of thing to shield the earth in 2010?

**A:** No.

**Q:** Are we supposed to build some kind of technology for SOME reason?

**A:** Yes. Later.

**Q:** Can you tell us what our mission is?

**A:** Keep learning.

**Q:** It must be the C’s! Only they would say that! We can’t know anymore than that?

**A:** Close.

**Q:** What?

**A:** Hoot holler!

**Q** “Hoot and holler?” Like “ride ’em cowboy?”

**A:** Yes.

**Q:** {J\*\* comes in} (J) What do you think is so funny? (L) It’s got to be the C’s talking because they won’t give me the answers I want

to hear! Well, what else can I ask to get a non-answer?

**A:** Yes. 5 million.

**Q:** 5 million questions I can ask to get a non-answer. I see.

**A:** Voila! Joy! Now Learn!

**Q:** (A) Was that a joke? (L) In other words, learning is fun?

**A:** FUN!

**Q:** It might be fun for you guys; however, there's certain things about this 3 D environment, like when you kick rocks, it hurts; and when you spend more money than you have, you go into debt.

**A:** Bet it is more fun that way.

**Q:** Are we supposed to move to France?

**A:** Yes.

**Q:** Are you sure?

**A:** Yes.

**Q:** When will we move to France?

**A:** 2003.

**Q:** (laughter) (L) There's a method to my madness! Are we supposed to DO something in France?

**A:** Yes.

**Q:** What?

**A:** More work.

**Q:** Well, SWELL! Should we finish working on this house before we move?

**A:** Can.

**Q:** Should we sell our house before we move to France?

**A:** Yes.

**Q:** So we'll never come back, after we move to France?

**A:** No.

**Q:** (A) This is very nice! (L) Will I have to learn to speak French?

**A:** Yes.

**Q:** (A) Oui. Je t'aime. (L) Je ne parle. Okay. So we're going to move to France and do more work?

**A:** U 5.

**Q:** "U 5?!" Us and the three kids?

**A:** 8835 million.

**Q:** (A) What does that mean? (L) Hmm. Do you have any particular messages tonight? To warm up our connection?

**A:** Hope and glory is coming close!

**Q:** Anything else?

**A:** Point the way to love in realms of light. Trust on it.

**Q:** (L to A) Well, is there anything you want to ask?

**A:** Yes.

**Q:** (L laughs) (A) What's so funny? (L) You're so shy about asking questions. This is how we warm up. Just play. Let's see... can I ask some kind of really nosey questions...

**A:** Up to you.

**Q:** Well, I'm just trying to groove the channel here; I'm not trying to get too heavy duty.

**A:** Listen now to Sir Ark.

**Q:** Do we really have horizontal hearts like the doctor said?

**A:** Yes.

**Q:** Why?

**A:** Love is more locked in this way.

**Q:** (A) It's true.

**A:** Take a break now.

**Q:** I want to know why so many things were told to us in code when Frank was present?

**A:** Frank is a Mole.

**Q:** (A) If Frank was a mole, why did he leave?

**A:** STS looks at his own time to hook onto zone of sail soon.

**Q:** (L) Are you saying that STS... I don't know how to put it. Why did he leave? Was he trying to get information and he couldn't get it, and then they decided to pull him out, so that if he couldn't get it, I couldn't get it either?

**A:** Soon to answer itself.

**Q:** Are we going to get any more hassle from this M\*\* person?

**A:** Maybe.

**Q:** What was it that we know that Frank couldn't know?

**A:** How to build a prototype.

**Q:** Prototype of what?

**A:** Demolecularizer.

**Q:** Demolecularizer? Cool! How long will it be before we have a really good connection. I mean, it's tolerable now, but it's got to get better.

**A:** Soon. 45 minutes.

**Q:** Does that mean we should do this for 45 minutes each time? Once a week?

**A:** Yes.

**Q:** I think we've done it 45 minutes. Is it time to say good night?

**A:** Yes.

**Q:** Good night.

**A:** Good night.

END OF SESSION

## **9.6 August 7, 2001**

Laura, Ark

**Q:** Hello, hello, hello. Is anyone there?

**A:** Hello.

**Q:** You're supposed to watch, just to see what it does. (A) I will. Do you have a name? Tell us your name.

**A:** Daohha.

**Q:** Did you ever have a body of your own?

**A:** No.

**Q:** What are you here for?

**A:** Cassiopaea.

**Q:** Are you the 6th density beings who transmit through Cassiopaea?

**A:** Yes.

**Q:** All right. What was behind ... what forces were behind Vincent's action? Were they simply 4th density manipulation?

**A:** Close.

**A:** Was there any Satanic cult activity behind his activities?

**A:** No.

**Q:** Was there any ... was he, in fact, loaded with attachments, as I saw him in the viewing?

**A:** Yes.

**Q:** What was the source of these attachments?

**A:** Rituals.

**Q:** All right. What is the motivating factor behind his pushing for me to discover where the "grail" is buried? Was it simply his own desire to discover it?

**A:** Yes.

**Q:** Was he programmed to ask this question or to seek this?

**A:** Yes.

**Q:** What would have been the consequences if he had been able to squeeze the answer out of me?

**A:** Death to you.

**Q:** Sh ... was he even remotely aware of that possibility?

**A:** Yes.

**Q:** Apparently he wasn't sufficiently aware of it to really believe it, I would think. He thinks it's still a game.

**A:** Yes.

**Q:** He doesn't really understand how serious it is, that if you really get close to the secret, you die.

**A:** Yes. Nor have you.

**Q:** So that's why you guys don't answer a lot of questions?

**A:** Yes.

**Q:** Well, that's a good enough reason, I reckon - to keep us alive. (A to L) Who gave the orders ... (L) Who gave the orders to Vincent? (A) Who is behind ... We know he was programmed. 4th density? (L) Let me ask this, since he was programmed, and that was the information he wanted to obtain, is it in fact true that 4th density STS either doesn't know or cannot access this secret?

**A:** Yes.

**L:** And they are as anxious for it to be discovered ... in fact, they are the MOST anxious?

**A:** Yes.

**Q:** Let me ask while I've got you here, some questions from a member of our group. He is reading some material that suggests that this planet is a breeding ground for aliens, and the life cycle of the aliens, as in the Reptilians or whatever, may mimic something, such as a preying mantis. It also alludes to the suggestion that the underground of the earth is kind of a dormant stage for

the female, and it is the male that is returning or that does return at the end of each epoch, and that the focus of this appears to be the great pyramid, and that if we move to STO - it doesn't say those words but it's the same - much terror can be avoided, as the return of the male dragon will die for love for the female nymph. Okay. Is the earth a breeding ground for some kind of aliens as suggested in this passage?

**A:** No.

**Q:** Hmm. So this stuff that this guy has made up about this is like right out of his darkest nightmares? I mean the worst possible spin that could be put on this? It's already bad enough. So we really ought to forget this and just get some sleep at night, huh?

**A:** Yes.

**Q:** What is the source of this type of material? I mean, what kind of energy is behind it?

**A:** STS mind control signal.

**Q:** What is it designed to do?

**A:** Reach those that are programmed to receive.

**Q:** Let me ask you this - If some of these STS programming signals that are going out ... I mean, I'm assuming that some of them come from 3rd density. Is that correct?

**A:** Yes.

**Q:** Do they actually have, like, some place on the planet where these guys read science fiction books and get these really crazy theories and stories that they put together with sort of fiendish glee, and then convert them via computer into the programming code that gets beamed out into people's heads, while they sit there and just - you know - fall down on the floor laughing at

what they have just done? I mean, is this possibly something that is going on [meaning in secret mind control experiments]?

**A:** Yes.

**Q:** That's sick! I mean, just take a whole HP Lovecraft novel, convert it into the programming signal and beam it out - and people are saying, "My God, the aliens told me ... it's just like HP Lovecraft said. Oh, my God!" Can you imagine? (A) And it works. (L) Sure does, doesn't it? (A) And we see what this guy RC is telling us about this egroup, and it is... What he is telling us, I think is true ... they have these capabilities ... {Referring to mind control signals being utilized in rock music, rock concerts, etc} (L) Yeah. (A) Inducing these states, and it's coming, and there will be massive programming! (L) Yup. (A) And it's coming pretty soon. (L) What are Ophanic intelligences, as Vincent understands them? The ones he calls upon with his 30 calls to the aethyrs?

**A:** 4D STS.

**Q:** Hmm. Well. We recently had a major attack from a bunch of Zionists who were claiming that we were anti-Semitic because we didn't believe their religion, but we did believe they were special, which was kind of a weird twist to that whole thing. Ummm ... is this something that we should just back - I mean, you don't normally advise, but you know, I've been having thoughts about just simply pulling the material down off the site completely and just leaving the subject matter alone. This is what I've been thinking, and I would like to know if the future looks brighter with respect to ourselves if I do that.

**A:** Yes.

**Q:** I mean, I know it's courageous and all that, but it's not necessary. I mean, what's said is said on the site. (A) I had another idea, which I was checking, and we can put one or two pages

out and put it on a different website that we have, which is not linked - not associated with Cassiopaea in any way - and we can just - instead of being on Cassiopaea, these pages will be on a different website. And you can always read the pages by clicking, going there, then come back, and it would give us a kind of legal advantage, so that in case someone decides to attack, it would be not on Cassiopaea pages. (L) Yeah, well, I think that discretion at this point is probably the better part of valor. (A) What do you mean “discretion”? (L) In other words, not telling everything you know. (A) Right.

**A:** Good idea.

L: Well, the thing was, I put it up ... {unfinished remark was “to help because of my deep sympathy for the Jews...}

**A:** Jews will be destroyed anyway.

L: Well, that's NOT friendly! So, it is better to pull it all down and leave them alone, let them fry in their own juices and do their own stupid things, and let them destroy themselves; because there's nothing anybody can do anyway? (A) Right. (L) I mean, there's no point in trying to ... (A) No gain. (L) There's no gain for us, no gain for them, and nothing we can do.

**A:** Yes.

**Q:** Well, anyway... That's pretty depressing. (to Ark) Have you got any questions about what you're working on that you were going to ask? I mean, we need to ask questions to groove or something. (A) Um-m. (L) I mean, just ... (A) Um hm. (L) I don't really have any. We need to keep the ... need to work this. (A) The thinking ... (L) Yeah. (A) Okay, we what we will do ... I don't have today questions. I didn't do my homework. We were so busy with these other matters and so on. So, okay, we should continue another night. So we will be coming back. (L) Yeah, I need to work.

**A:** Yes. Root is strong because of prior grooving.

**Q:** Okay. And we answered B's question, and I can't think of any particular thing. And I think I'll just go in and take that page down ... do it tonight. The whole Jewish thing.

**A:** Yes.

**Q:** All right then. Thank you very much. And, unless you have something that you know we need to know, or any questions that should have been asked that we haven't asked ... (A) Right. (L) That's important now, please tell us.

**A:** Hold on to me. Good Night.

END OF SESSION

## 9.7 August 10, 2001

Vincent Bridges' post to the Cassiopaea Guestbook regarding Theft of the Cass Transcripts<sup>4</sup>

To The the Members of the Cassiopaea Discussion Group: Know Your Rights: Zaca Lake Refunds<sup>5</sup>

Retreat from Zaca<sup>6</sup>

The Jadczyk - Weidner Correspondence<sup>7</sup>

Ark, Laura

**Q:** Hello?

---

<sup>4</sup><http://www.cassiopaea.org/cass/clarification.htm>

<sup>5</sup><http://www.cassiopaea.com/archive/zaca.htm>

<sup>6</sup><http://www.cassiopaea.com/archive/zaca2.htm>

<sup>7</sup><http://www.cassiopaea.com/archive/wiley3.htm>

A: Hello.

Q: And who do we have with us this evening?

A: Viaggmor.

Q: And where do you transmit through?

A: Cassiopaea.

Q: I would like to ask if we can ask some questions about Vincent Bridges and Jay Weidner.

A: Yes.

Q: What are their intentions toward us?

A: Bad.

Q: What are their plans?

A: Sip prormt

Q: (A) What? What? It doesn't make sense. (L) That wasn't a word. What are their plans?

A: Sip pout gag.

Q: (A) What? What do you ... (L) Sip? Pout? Gag? (A) What is sip? (L) Sip means to take a drink of something - sip something. Sip? Pout? Gag? What are they going to sip?

A: Knowledge.

Q: Oh, they took a sip of knowledge - or they're going to take a sip of knowledge?

A: Yes.

Q: And this sip of knowledge is going to make them pout and gag? (A) What is pout? (L) To just ... (demonstrates). Who are

they going to get this sip of knowledge from that is going to make them pout and gag?

A: Lawyer.

Q: In other words, they're going to find they do not have a leg to stand on?

A: Yes.

Q: Well, is Vincent really connected to these Satanic people?

A: Yes.

Q: Is he connected to them close to the inner circle?

A: No.

Q: Is he really an initiated Sufi?

A: No. Karma is coming.

Q: Do we have anything to be concerned about where they are concerned?

A: No.

Q: Do we need to take any further actions like putting more information on the website, any other things than what we are currently doing or have already done?

A: Yes.

Q: What?

A: Some more web info.

Q: (L) Should I put on the Perseus site what we have discovered about Vincent? A report on his claim to fame? {Much of this information was provided to us by Teresa Burns}

A: No.

**Q:** What, in specific, on the web?

**A:** Files make him sick move to gag.

**Q:** (L) In other words, I should put something else that would drive him to go to an attorney? Make him madder?

**A:** Yes.

**Q:** Should I post Jay Weidner's letter from this morning? {See: <http://www.cassiopaea.com/archive/wiley3.htm>}

**A:** Yes.

**Q:** (A) What's the point? (L) To make him go to an attorney? I don't know. What's the point - I don't get it? (A) What's the point of making them go to an attorney? (L) Well, an attorney may tell them that they are crossing dangerously close over the lines of being subject to a lawsuit themselves.

**A:** Yes.

**Q:** And I could also post Vincent's article or the letter he wrote himself about slander and libel.

**A:** Yes.

**Q:** Well, I don't like the idea of doing any of those things. They make me feel yucky. So why are you telling me to do them?

**A:** How do you think Vincent will feel?

**Q:** Well, he'll obviously feel more yucky than I will. I'll think about it and see how I feel in the morning. See if they send any more blasts in the morning. (A) I think they said they will. If they decided to organize a conference, they will be in touch with these other people. And it takes their energy to organize. (L) They're not organizing anything. Did you ever notice them organizing anything at all so far? They have no idea what they're doing.

All they're doing is running a con job. They're taking people's money. That's all they're doing. (A) Well, for me, it's hard to believe. (L) That's all they're doing. Is all this just a con job to put themselves in a position to take people's money?

**A:** In part.

**Q:** Well, I just can't imagine what was going through that man's mind when he wrote that E-mail. I mean, that man is like ... I mean, I simply can't conceive of the type of consciousness that could occupy a physical body that could write that type of an E-mail. You know, it passes my understanding.

**A:** STS love.

**Q:** Service to Self love. Well, boy, he must be exploding on himself, or imploding or whatever. OK. Is Infinity Publishing a ... I don't know how to ask this question. We found this place called Infinity Publishing, where it's like print-on-demand. We'll have total control of the product, and we think this is a pretty good way to go. Should we be focusing on this book deal right now, since we can do it this way, since we've been working on it. Should we continue to push on this or should we just back away and do something else?

**A:** Do it now!!!!

**Q:** Are we going to get any decent sales for our books?

**A:** Yes!!!!

**Q:** Are we going to be able to survive this flame war and attack from Vincent and Jay Weidner?

**A:** No.

**Q:** Why not?

**A:** They will open the door to fame.

**Q:** What?! HOW can that be possible? Huh? (A) From slandering us?!

**A:** No, but have contacts who will be interested.

**Q:** (A) They have ... who? (L) They have contacts that will be interested. That's weird. Well, what do you want to ask them? Anything in particular? Is Barry an STS agent {as suggested by Terri Burns and Vincent Bridges}?

**A:** No.

**Q:** Do we have an STS nasty agent on our list?

**A:** Yes.

**Q:** How many?

**A:** Two.

**Q:** Have they been there a long time or are they recent?

**A:** One each.

**Q:** (A) One what? (L) One each. One has been there a long time and one recent. Is anyone on the list forwarding the list mail to Vincent?

**A:** No.

**Q:** I didn't think so. They're all pretty good. (A) There are two different agents? (L) Yeah. Is J\*\* R\*\*\* involved in Satanism [as claimed by Vincent Bridges]?

**A:** No.

**Q:** Who killed Jon Benet Ramsey? [Long wait, then laughter.] (L) They won't answer that ... thought I'd slip that one in real quick. Well, was J\*\*\* R\*\*\* involved with that, as Vincent suggests?

**A:** Close.

**Q:** Do you mean he was close to it or involved with it?

**A:** Close to it.

**Q:** Was he involved with it in the sense of something that brought it about?

**A:** No.

**Q:** (L to A) Any questions you want to ask? There was something I was thinking about earlier today that I wanted to ask. Oh, so many questions I want to ask. I think about them, then when I sit in here, my mind goes completely blank. Well, do you have any messages for us tonight? Is there anything that we should be asking that we haven't asked? Something around the corner that we don't see that we ought to see? Because we're both so tired - we've been working so hard all day. Cut us some slack here. Consider it asked. [Long pause.]

**Q:** (L) What happened to P\*\*, by the way? God, she went off the deep end! (A) She did it the second time, right? (L) Yeah.

**A:** Racial obsession!

**Q:** (A) What? What? (L) Racial obsession. (A) What does that mean? (L) Well, she's obsessed with this Nordic business. (A) Oh. (L) You know, she's blonde and blue-eyed and she's special - she's chosen! (A) Oh. (L) She's the one! (A) OK. And if she's the one, and if she's not appreciated as the one ... (L) She's going to trash anybody who doesn't appreciate her. Yes, that's pretty much what S\*\* was saying. P\*\* has this mission and she's got to figure out what this mission is, and it's to save our buns, I guess. Are we supposed to build some sort of technological device to take us into 4th density?

**A:** Possibly.

**Q:** Is it going to be the building of them that will do it, or the de-

vices themselves? I have a feeling it's the building and the knowledge that's going to do it.

**A:** Yes.

**Q:** Acquiring the knowledge to be able to do it puts you there. Awareness binds you to the reality. And I was reading this story by Plato about the cave today, and this whole thing is just so amazing. (A) What cave? (L) Plato's Cave, you know. You know, the shadows on the wall and everything. And he really said some interesting things there - a completely analogy of 4th density. All right then ... (A) Well, in fact, when Tony Smith mention Rodin coils - whatever they are - and toroidal structures - they will probably be important at some point. (L) Yeah ... (L) When, I saw this thing in the mirror, this gadget that shot out this beam or whatever, was that the true image of some kind of a time machine or time-transiting device, or was that something that Vincent was projecting into my mind?

**A:** Good catch.

**Q:** Yeah, when I saw that picture on his webpage, I knew he'd been projecting that. He was sitting there focusing on it so I would see it. I told you, I showed it to you, didn't I? That was what I saw, that twisted up figure 8 thing. [Laughter.] I couldn't figure it out, what in the world it was. Is there an object buried in France I'm supposed to find?

**A:** Yes.

**Q:** Are we going to find it?

**A:** Yes.

**Q:** Can you tell us what year we'll be finding it.

**A:** Two (tape ended and was blank for some time then picked back up with a segment of what sounded like a heartbeat)

**Q:** What is the object?

**A:** Holy grail.

**Q:** What is the holy grail? {Tape noise gets very, very loud here. Planchette was spinning around and drawing figures.}

**Q:** Huh. I don't know if they were drawing something or just playing. Guess they're not going to answer that one. Well, anything you want to ask? (A) Yes. It's pretty fun to be talking, so we're talking ... it's fun.

**Q:** (L) So ... well, do we have any big explosions coming up in Israel? Do we have any volcanoes going off or any earthquakes or anything of real significance going on on the planet here?

**A:** The solar activity is slowing down.

**Q:** So I guess that kind of means no. Are we doing to get hit by a comet or an asteroid? (A) When? (L) When what? When are we going to get hit by a comet or an asteroid? (L to A) They won't tell us that! (A) Why not?

**A:** Soon!

**Q:** Yeah, well soon to you guys could be in the next millennium! {laughter} (A) Soon! (L) Yeah! What exactly do you guys mean by "soon?" (A) Eight days? Six days? They are having problems with time! [Laughter.] (A) We know what to do. We are not sure about putting these things on the web. Probably we can put something. (L) Yeah. Knowledge protects, so we will put the knowledge out there.

**A:** Knowledge does protect.

**Q:** (L) Well, is Vincent doing any of his "workings" to try to harm us? I mean, is he out there with his robes on, and drawing his pentagrams, and chanting, and calling to the Ophanic

intelligences to slam lightning and thunder down upon our heads?

A: Close.

Q: Is he getting frustrated that it isn't working?

A: Yes.

Q: Was he deliberately trying to put the love bite on Terri?

A: Yes.

Q: What were his motives?

A: Control.

Q: All right. So...

A: Goodbye.

Q: Yes, we're sleepy.

END OF SESSION

## **9.8 August 20, 2001**

Laura, Ark, Terri Burns

Q: Hello.

A: Hello.

Q: Who are we speaking to?

A: Gillror.

Q: And where are you transmitting through?

A: Cassiopaea.

**Q:** We have Terri with us tonight.

**A:** Hi to Terri.

**Q:** (T) Hi.

**A:** See you have fun!

**Q:** (L) All right, we have some questions tonight. We actually have questions instead of diddling around. Can we ask our questions or should we warm up?

**A:** Good job.

**Q:** All right, first question is, what is the origin of the Levites?

**A:** Hittites Moon Worshippers.

**Q:** Well, before the Hittites became Hittites, what were they?

**A:** Indo-europeans.

**Q:** What was the source of the Indo-europeans?

**A:** Aryan sub-race.

**Q:** Is there any other group the Aryans mixed with to produce the Indo-Europeans?

**A:** Fourth Density genetic tweak.

**Q:** Was Abraham a Levite?

**A:** Yes.

**Q:** Was Sarah Nefertiti?

**A:** Yes.

**Q:** What was the reason for the strange skull shape of Nefertiti and her family?

**A:** Genetic tweak.

**Q:** Was this 4th density genetic tweak done by STS or STO?

**A:** STS

**Q:** If the Levites were the Hittite Moon worshipers, how come Akhenaten, who hung out with Nefertiti, instituted Sun worship? That doesn't make sense.

**A:** Future Ho into.

**Q:** Future what into?

**A:** Ho.

**Q:** HO must stand for something. I don't understand. Was Nefer-titi responsible for Akhenaten's Sun worship?

**A:** Mostly.

**Q:** Well why did it turn into Sun worship instead of Moon worship?

**A:** Future honor of Ra. Go 353535. Deity.

**Q:** So in other words they were laying a foundation for future layering of other concepts?

**A:** Yes.

**Q:** Was the Temple on Crete at Knossos, was it really a necropolis as Wunderlich suggests?

**A:** 5th density waiting room.

**Q:** Did they sacrifice humans there?

**A:** Yes.

**Q:** Did they sacrifice animals?

**A:** Yes.

**Q:** What animals were they sacrificing, and to whom?

**A:** Apis Bull in part.

**Q:** What was the other part?

**A:** Haho 353535

**Q:** “Ho” must be a name. Is Ho a name of a god?

**A:** HOH 353535

**Q:** (T) Is it water? (L) Is it like Hawah? (A) HOH water?

**A:** Remember Irish pig.

**Q:** Was this temple the source of the legends of the Temple of Solomon?

**A:** Yes.

**Q:** Was Solomon also King Menes of Minos of Crete?

**A:** No.

**Q:** Was Solomon a king of Egypt?

**A:** Yes.

**Q:** Which king of Egypt was the equivalent of Solomon?

**A:** Narmer.

**Q:** Was Daedalus the “architect” who became known as Hiram Abif?

**A:** Close.

**Q:** Was the explosion of Thera the cataclysmic story later added to the Exodus?

**A:** Yes.

**Q:** Did the Mediterranean Sea part?

**A:** No.

**Q:** Did this happen at the same time as when Abraham was fleeing from Akhenaten, hauling off his wife Nefertiti/Sarah?

**A:** Yes.

**Q:** What happened to Akhenaten?

**A:** Drowned in the Nile.

**Q:** Is the story of David a gloss of the Perseus legend?

**A:** Yes. More than that though.

**Q:** Okay, can you tell me what it is more than that?

**A:** A Tale of 4th Density.

**Q:** So it's interactive in the sense of groups, not individuals?

**A:** Yes.

**Q:** Where is the Ethiopia of the Cassiopeia story? Where it is today?

**A:** 4th Density.

**Q:** Okay, what people did it refer to, in a larger group sense, if it was an archetypal expression?

**A:** Gaul.

**Q:** Well, that's bizarre. Was King Scorpion of Egypt the "Joseph" of the Bible?

**A:** Mainly.

**Q:** Does that mean that Joseph was a composite story?

**A:** Yes.

**Q:** Was King Scorpion a son of Sargon the Great?

**A:** Close.

**Q:** Was he, as the Joseph story tells, kidnapped and sold into Egypt?

**A:** No.

**Q:** Was he sent to Egypt to have a hand in the unification of Egypt and the control system there?

**A:** Close.

**Q:** Were the Midianites and the Ishmaelies the same?

**A:** Partly.

**Q:** Were they the Danaans?

**A:** No.

**Q:** If Akhenaten pursued Abraham and Sarah at the time of the eruption of Thera, did it happen that the waters of the Nile withdrew and then slammed back and hit him?

**A:** In part.

**Q:** So the disruption upset the Nile. It made it turbulent, or overflow, or dangerous in some sense?

**A:** Yes.

**Q:** We read that some Mason traveled to Ethiopia looking for something?

**A:** Close.

**Q:** Did they obtain the Book of Enoch from Ethiopia?

**A:** Close.

**Q:** Well, if it was close, what will get us closer?

**A:** Egypt.

**Q:** Did they make it up that they got it from Ethiopia? To throw people off?

**A:** Most likely.

**Q:** How did they know to look there?

**A:** Given the sign by Howah.

**Q:** (T) Should we ask who Howah is? (L) They already told us. This “Irish Pig” god. The Moroccans say the name “Casablanca” comes from one white building where Portuguese sailors would meet people. Is this true?

**A:** Partly

**Q:** Is it important?

**A:** No.

**Q:** What is important about “White House?”

**A:** Future Hit 4th density.

**Q:** Future what 4th density?

**A:** Hit.

**Q:** (A) What was the question? (L) What is important about white house.

**A:** Go to 4th density through there.

**Q:** What does white house actually mean? Is it a building, or does it have an esoteric meaning?

**A:** Genetic structure.

**Q:** So it's a "house" more in the sense of the Green Language in the Babel book?

**A:** Yes.

**Q:** Was Rock Lake also a necropolis?

**A:** No.

**Q:** Where did the people come from who built the structures in Rock Lake?

**A:** Have come from many places.

**Q:** (T) Is the "M" mound a natural formation?

**A:** No.

**Q:** (L) Who made it?

**A:** F 353535

**Q:** Is it worthwhile to keep studying these clues?

**A:** Yes.

**Q:** What group mined the copper in northern Wisconsin, Minnesota, and Michigan, like in Isle Royale?

**A:** Aryans.

**Q:** What did they want the copper for?

**A:** Weapons.

**Q:** Wouldn't iron make better weapons?

**A:** Not in 4th density.

**Q:** I'm getting the feeling that there have been bleed-in, bleed-out situations with 4th density on this planet a lot more often than we suspect.

**A:** Yes.

**Q:** Are these situations sometimes manufactured by those who know how?

**A:** Close.

**Q:** Do they just happen to know where those window points are?

**A:** Yes.

**Q:** Is it significant that Rock Lake is on the same longitude line as Tikal?

**A:** Yes.

**Q:** Does it have to do with the windows we just talked about?

**A:** Close.

**Q:** What is the significance of the red patchy birthmark on all of our skulls?

**A:** 4th density connection point.

**Q:** Was Akhenaten the real son of Amenhotep III?

**A:** Yes.

**Q:** Terri wants to know if she's had some sort of programming other than socio-cultural programming?

**A:** Yes.

**Q:** Was she subjected to any sort of ritual Satanic abuse?

**A:** No.

**Q:** Was the programming done by 3rd density beings or 4th density beings?

**A:** 4th.

**Q:** What was the purpose of the programming?

**A:** To defuse, confuse, misuse energy.

**Q:** Was she abducted as a child?

**A:** Yes.

**Q:** How many times has she been abducted in her life?

**A:** 13. Given implants at age 5.

**Q:** (T) Where was I given them?

**A:** Nasal passage.

**Q:** Were these physical abductions or soul extraction replication abductions?

**A:** Both.

**Q:** How many actual physical abductions?

**A:** 3.

**Q:** By whom was she abducted?

**A:** Grays and Lizards.

**Q:** Have any of her children been abducted?

**A:** Yes.

**Q:** Were these physical or soul extraction duplications?

**A:** Mostly latter.

**Q:** (T) Can I ask if there is something I can do to prevent that? (L) We all wish. Let me ask, has it happened since Terri has begun waking up to it as a possibility?

**A:** No.

**Q:** Is awareness the chief protection?

**A:** Yes.

**Q:** What is the best way to remove or undo programming?

**A:** Awareness and resistance.

**Q:** How many times has Vincent been abducted? [Laughter.]

**A:** 136.

**Q:** (T) Oh my god! (L) I just had to ask that. (A) Every 3rd day. {Laughter.} (L) Every time he calls on the Ophanic Intelligences. Did we successfully get Terri's attachment shipped off down the road?

**A:** Yes.

**Q:** Does she have any more at this time?

**A:** No.

**Q:** Okay, was the attachment that gave its name as "Tree of Life" was that deliberately put in by Vincent?

**A:** No.

**Q:** In other words, Vincent doesn't know what he's doing well enough to do that, but it happens just by hanging out with him? {Laughter.}

**A:** Yes.

**Q:** (T) How recently has he been abducted? Yesterday? Last week?

**A:** Hot popper.

**Q:** (L) What is a "hot popper?"

**A:** Recently.

**Q:** In other words, he's still hot. He's been there so recently he's still popping. {Laughter.} All right. (T) Should we ask if D\*\* is an agent? (L) Is D\*\*\* O\*\*\* our group agent {as Vincent claims.}

**A:** Partly.

**Q:** Meaning he's an agent who doesn't know he is?

**A:** Yes.

**Q:** Was the Yellow Emperor of China... he had some talking, walking tripods. Were these things similar to the Ark of the Covenant?

**A:** No.

**Q:** What were his tripods?

**A:** Ground communicators.

**Q:** What did they communicate with? Each other, or something in the sky?

**A:** Both.

**Q:** What was in the sky that they communicated with?

**A:** Mothership.

**Q:** What was on the Mothership?

**A:** Lizards.

**Q:** Charming. (T) You said that many groups built Rock Lake. Who were some of the many groups?

**A:** Aryans.

**Q:** In conjunction with who?

**A:** Lizards.

**Q:** (L) Is that why the Indians have these glyphs about snakes and serpents and stuff?

**A:** Yes.

**Q:** Very interesting. (T) When David was contacting, he thought, extraterrestrials, who was he contacting?

**A:** STS HQ.

**Q:** (T) Great. Was David a “Star Kid?”

**A:** What is that?

**Q:** (T) Part of some elite group of brilliant kids that the US Government took for special training or programming.

**A:** No.

**Q:** (T) Well, that was Vincent’s line. (L) Was there a special group of brilliant kids that the US government put through special training?

**A:** No.

**Q:** Are there a few odd ones they took?

**A:** Yes.

**Q:** Who was talking to Jack Sarfatti on the telephone in the metallic voice?

**A:** 4th STS.

**Q:** (T) Did David ever experience time travel?

**A:** Yes.

**Q:** (T) So when I last met him, was he really younger?

**A:** Yes.

**Q:** (L) Doesn't mean it's a good thing. (T) No, I don't think it was a good thing. Was David at the University of Florida particularly to find me and keep me from doing what I would otherwise have done?

**A:** Yes.

**Q:** (T) What is David doing now?

**A:** Deteriorating.

**Q:** (L) Is that the general fate of the tools of STS?

**A:** Yes.

**Q:** (T) When I was pregnant and lost the baby, was that part of some abduction experience? {Long pause.} (L) They don't want to answer that. That's a touchy subject for them. Did she have a baby that was taken by the STS aliens?

**A:** Very likely.

**Q:** (T) Did you ever ask that about the baby you wrote about losing? (L) Nodding. They said I don't want to know. (T) Can I ask what the yellow fluid was that was surrounding my mother when she was born, that was so weird?

**A:** Normal fluids for late delivery, has to do with activation of liver.

**Q:** (T) Does or did my brother have a twin?

**A:** No.

**Q:** (L) Why was Vincent convinced that he and I were some kind of astral twins?

**A:** Con job. {Laughter.}

**Q:** Well, I didn't buy it. So there. **(A)** That was kind of sweet. **(T)** Remember what we were going to ask? The bit about him bringing fame? **(L)** Oh, the host show. **(T)** No, the... **(L)** Oh yeah, okay. Previously you said that Vincent's and Jay's attacks would bring us fame... **(T)** {reading} "They will open the door to fame." **(L)** I would like to know if there's anything more specific about that that you can tell us.

**A:** Help by trying to harm.

**Q:** **(L)** What is the general approach that all of us should take to Vincent? Should we try to explain anything to him?

**A:** No.

**Q:** Will he ever get it?

**A:** Most likely not.

**Q:** That's a shame. **(A)** We don't know. It's "most likely not." **(L)** Well, I know, but "most likely not" it would really, really take a big event in his life to... does he WANT to get it?

**A:** No.

**Q:** Well. **(A)** It's not the right question because it assumes there is a "he" and there are 20 of "he's." He's not an "I." He's a typical example of what Gurdjieff said, there is no Master, there are several of them, and they want to serve different gods. We ask "he," but there is not even a major "he." There is "he" on Thursday and "he" on Wednesday. There is "he" in the night and "he" in the day. That's it.

**A:** True.

**Q:** **(T)** That's because he's a "hot popper!" **(L)** Oh, we have a new asteroid, PM-9. Is PM-9 going to hit us on May 10, 2003? **(A)** Maybe.

A: Very possible.

Q: Is that our “Kaboom, splat?”

A: Maybe.

Q: If it hits in the Pacific, Rainier will be a caldera, tsunamis would roll into Puget Sound, and goodbye to Hawaii!

A: Yes.

Q: (A) If it will hit, we will have nuclear radiation.

A: Yes.

Q: (T) Before, they gave probabilities, like 1 in how many. (L) What is the probability?

A: High.

Q: Will we move to France before then?

A: Yes.

Q: (T) Will I move out of Wisconsin?

A: Yes.

Q: (L) Well, good night unless there is something else you want to say?

A: Progress is being made at all levels, so carry on! Good Night.

END OF SESSION

## 9.9 August 23, 2001

Ark, Laura, Terri Burns

Q: Hello.

A: Hello.

Q: And who do we have this evening?

A: Jemmona.

Q: And where do you transmit through?

A: Cassiopaea.

Q: The first question we wanted to ask is: did the guy on our e-group, Daniel P-N, really die or was he “taken over.”

A: Yes.

Q: Did he die of completely natural causes?

A: Yes.

Q: His death had nothing to do with the fact that he was researching the 11 house zodiac?

A: Close.

Q: Did it have something to do with his research?

A: Yes.

Q: Was he just not sufficiently aware of his vulnerability?

A: Yes.

Q: Okay, last time we were talking about the “M” mound in Wisconsin. You said that it was not a natural structure but that it was built for “F 353535.” Could you say more about this? Was this used somehow to genetically manipulate the surrounding population?

A: Best so called lie in town.

Q: That doesn’t make any sense.

**A:** Lay. [As in “ley” lines?]

**Q:** (TB) It looks like a big man laying. Is something laying there?  
(L) Or was it used for some kind of fertility rites? Is something buried inside it?

**A:** Force field generator.

**Q:** (L) Is it a force field generator by virtue of the kinds of rocks that are in there? Is it like rocks under a mound? {To TB} Have they ever x-rayed it to see what’s under it? (TB) The whole area is a lead and zinc mining area. There’s a lot of lead deposits around. Maybe they shield it, but it’s supposed to be a natural formation, but the C’s have said it’s not a natural formation. (L) {chuckling} So maybe it’s that everybody around there who “gets laid” is having some force field generator affecting them? Is that correct? Does it do something to the people in the area when they conceive children? Or do you mean ley line?

**A:** Close.

**Q:** (TB) There is an incredibly high rate of cancer in the area. Is it related to this high rate of cancer?

**A:** Yes. Lies are lays.

**Q:** (A) The cancer could be due to the lead which leaches into the water. (TB) That’s true. (L) Genetically manipulate the surrounding population. Does this force field... well, yeah. Lies are lays. Ley lines, lies are lays... (TB) STS control field. (L) Is that what you are saying?

**A:** Close.

**Q:** (L) Was there really a guy named Don Juan Matus who was the teacher of Carlos Castaneda?

**A:** Close.

**Q:** (L) Was he a “composite person” as some have suggested?

**A:** Yes.

**Q:** (L) Was he a composite of several people who Carlos actually knew, as in 3rd density humans?

**A:** Yes.

**Q:** (L) Regarding Michael Topper: how accurate are the writings of Topper?

**A:** 57 percent.

**Q:** (L) Was his wife his channel?

**A:** Yes.

**Q:** (L) Was the corruption level due to the fact that they may have engaged in rituals in order to get their material?

**A:** Close enough.

**Q:** (L) Okay, who is this “final incarnation” guy presented on Val Valerian’s website? Is it really somebody who is in his final incarnation as is claimed, is it made up, or is it Val himself?

**A:** Val.

**Q:** (L) Is Val really in his “final incarnation?”

**A:** Best not to judge.

**Q:** (L) Is it a final incarnation of STS or STO?

**A:** STS.

**Q:** (L) So that is how a final incarnation of STS might think and the teachings they might present?

**A:** Yes.

**Q:** (A) What is a final incarnation? (L) Somebody who is so spiritually advanced that they don't need to incarnate anymore after this life. (A) And what happens after? (L) Well, I don't know. I guess you go to 4th density. (A) Oh. I see. (TB) Okay, George Green has dictated all these "Handbooks for the New Paradigm." He claims that it comes from some entity. Who is that entity?

**A:** George Green.

**Q:** (L) Well, these books are all over the place. Who is funding them?

**A:** Consortium.

**Q:** (L) Well, that says a lot. Okay, next: is "DOVE" really a programming key word designed to target those susceptible to New Age religious programming?

**A:** Maybe.

**Q:** (L) {Reading list of questions asks TB} M\*\*\* has dialogues with Grays? (TB) Yeah. Yeah. (L) She talks to them herself? Or she is reporting dialogues that somebody else has? (TB) I'm not sure. She presents them as ones that she's had. That is one of the reasons I quit wanting to correspond with her. She was the one who had those dialogues about petroglyphs. A bunch of Grays. (L) Is M\*\*\* talking to Grays?

**A:** Yes.

**Q:** (L) Is she an "agent of the Grays" on our list?

**A:** Yes.

**Q:** (L) Okay, moving on to the next question: Are Semites a mixture of Aryan genetics and Negro genetics as I\*\*\* and I have theorized?

**A:** Partly.

**Q:** (L) Once before you talked about the “mission destiny profile prior encoding” of the Semitic genetic code structure. Of course, you talked about this being done 130,000 years ago, so that’s a long time. But, was that original code structure put into the genetic code of the Black peoples...

**A:** Yes.

**Q:** ... to then be spread via their mixture with Aryans - as Semites - into other races?

**A:** Partly.

**Q:** (L) What is the other part?

**A:** Genetic tweaking of Semites.

**Q:** (L) Is there something in the sub-Saharan African genes that makes one tend more toward STO?

**A:** Not really.

**Q:** (L) {Reading from list of questions.} If not, why does there seem to be a continuing effort to wipe out these groups? Is this simply karma? {To TB} This was asked once before and the response was that it was partly karmic because, indeed, the Black peoples had a high civilization and were cruel masters of slaves. Same deal with the Jews. They are reincarnated Atlanteans and the holocaust was part of the expunging of their guilt for the former destruction of the global civilization. Okay, are we near to the time of seeing 4th density Nordics among us?

**A:** Close.

**Q:** (L) Have any of us here met any?

**A:** Good possibility.

**Q:** (L) Okay, TB wants to know about the eyes of this guy she used

to know, David. (TB) Yes, what was he doing when he was manipulating me some way with his eyes? Or was that just a con? Was he not doing anything?

**A:** Giving an impression of great spirituality that was non-existent.

**Q:** (L) Does that sound right? (TB) It worked. I guess. I'd never thought about it that way. (L) Okay, now about the Pig God: what is it about pigs that makes them ideal as a symbol for the manifestation of God energy, or even as a vehicle?

**A:** Genetically manipulated RU 353535.

**Q:** (L) What does that code relate to?

**A:** Race underpinning tribal code structure.

**Q:** (L) Are you suggesting that some codon of human DNA that relates to a "tribal code structure" was spliced into an animal?

**A:** Close.

**Q:** (L) Why an animal and not a human being? Is it because the STS energy is so contractile that a pig is an appropriate receptacle?

**A:** Yes.

**Q:** (L) That's bizarre. Moving along. What sort of 4th density weapons was copper used for?

**A:** Mostly conduction of EM energies.

**Q:** (L) Now, I have a little problem with my writing. First of all, did the eruption of Thera occur in 1627 BC or thereabouts?

**A:** Close.

**Q:** (L) What stimulated the eruption of Thera?

**A:** Venus.

{Here I think that “Venus” is a code for the giant comet described by Victor Clube}

**Q:** (L) Well, about 40 years after that there was the comet cluster, in 1588 BC, correct?

**A:** Yes.

**Q:** (L) Well, it seems that Nefertiti disappeared from history in the 12th year of the reign of Akhenaten. He then died in the 17th year of his reign. If Nefertiti was Sarah, where was she during this five year period, if Akhenaten died going after her when Abraham/Moses carried her off?

**A:** Locked up.

**Q:** (L) So, Nefertiti is Sarah and Abraham came and rescued her somehow, is that correct?

**A:** Yes.

**Q:** (L) And that happened at the time of the passage of the comet cluster, between 1627 BC and 1588 BC - dramatic events which is what enabled that particular drama to take place...

**A:** Yes.

**Q:** (L) So Abraham retrieved Sarah and Akhenaten went after them and drowned in the river or something?

**A:** Close.

**Q:** (L) So, from 1627 BC to 1588 BC - that's 39 years - almost exactly 40 years of “wandering in the desert,” so to say. So they must have escaped when Thera blew and forty years later, the comets came. What was Abraham and his crew doing during that time?

**A:** Bedouins.

**Q:** (L) How many were in this tribe?

**A:** 623.

**Q:** (L) So it wasn't multiple thousands of people as the Bible would have us believe. Okay, is Abraham the same individual as is presented as his son, Isaac?

**A:** No.

**Q:** (L) Did Sarah, known to the Egyptians as Nefertiti, give birth to a child when she was 90 years old?

**A:** No.

**Q:** (L) Was Sarah the mother of Isaac?

**A:** Yes.

**Q:** (L) Why did Abraham want to sacrifice his son?

**A:** Did not happen.

**Q:** (L) Who was Hagar the Egyptian?

**A:** Princess of Egypt.

**Q:** (L) Was she Sarah's maid?

**A:** No.

**Q:** (L) Was she Sarah's daughter?

**A:** Right nurture to.

**Q:** (L) What do you mean? I don't understand.

**A:** Sara's daughter by Akhenaten.

**Q:** (L) Did Abraham have a child by Hagar also, his wife's daughter by another man?

**A:** Yes.

**Q:** (L) Well, that's pretty incestuous. Did Sarah actually get so jealous of her own daughter's child that she demanded that Abraham abandon her?

**A:** Close.

**Q:** (L) When did this tribe finally arrive in Israel and settle down. Was this after 40 years living as Bedouins?

**A:** Pretty much.

**Q:** (L) Well, I still have to deal with this King David issue. He was like a Robin Hood. Now, in another direction, what's this deal about Abraham talking to God. Is this where the whole monotheism came in?

**A:** Close.

**Q:** (L) So, it started out with Abraham and his tribe. Did he have reinforcements of his Levite brothers who came and joined his tribe from Hittite land?

**A:** Close.

**Q:** (L) Are there any details of this story that I haven't covered that I ought to?

**A:** David was a Levite.

**Q:** (L) Was he of the line of Abraham?

**A:** No.

**Q:** (L) Did he come from "Hittite land?"

**A:** Close.

**Q:** (L) How many generations before he was born did his family come to the area of Palestine?

**A:** 5.

**Q:** (L) Were they relatives of Abraham?

**A:** Somewhat.

**Q:** (L) Distantly related. So, what did David do? Came along and gathered the people together?

**A:** Yes.

**Q:** (L) Did they, or did they not, have the Ark of the Covenant? Was this given to this group of people by 4th density?

**A:** Close.

**Q:** (L) Who was it originally given to?

**A:** Abraham.

**Q:** (L) Who gave it to him?

**A:** Sara.

**Q:** (L) Is the story of Rachel stealing the household gods from her father may have really been the story of Sara stealing the Ark from Akhenaten?

**A:** Yes.

**Q:** (L) No wonder Akhenaten was hot to follow them. He wasn't after Sara, he wanted his Ark back.

**A:** Yes.

**Q:** (L) Who gave the Ark to Akhenaten?

**A:** STS 4th Density.

**Q:** (L) I begin to smell a rat! We have read that David's grandmother, Ruth, was a Moabite. That story is a whole other mystery too. Okay, where does the story the Jews tell about being impris-

oned, enslaved, crushed, etc come from? What is the source of this tribal memory of being in captivity?

**A:** Sumerian concept.

**Q:** (L) Okay, that makes sense. So the Sumerian contribution to the Bible stories mix is the enslavement idea. They had this ancient legend of having been genetically created to be slaves. They were servants to the gods, but not the Pharaoh. Okay, going in another direction: what was the use of the “12 mirrors” that the Chinese emperor Huang Ti supposedly used?

**A:** Collection of energy.

**Q:** (L) Were they really mirrors?

**A:** No.

**Q:** (L) Okay. They were just perceived as “mirrors” by the people who saw them, or the transmission of the information was corrupted. (A) What energy did they collect?

**A:** Electromagnetic.

**Q:** (L) What was this energy used for?

**A:** Power for his craft and other machines.

**Q:** (L) Well, where did Huang Ti come from?

**A:** Orion Lab.

**Q:** (L) And he had things that were described in the literature as robots or mechanical guys, didn't he? So those were his other machines. What did these machines do?

**A:** Many things.

**Q:** (A) I want to know... okay, they were collecting EM energy. Where was this energy coming from. I would also like to collect

EM energy. Was this energy from the EM field, was it solar energy, from zero-point energy, or cosmic energy, or what? Where was this energy coming from?

**A:** Solar moon.

**Q:** What does that mean?

**A:** Reflected and therefore modified.

**Q:** (L) So that suggests the “mirror” concept of Huang Ti. Okay, previously you said that Rock Lake was not a necropolis. What was it?

**A:** Control center.

**Q:** (TB) Did Devil’s Lake have the same purpose?

**A:** Close.

**Q:** (L) {Reading} The Gottschalk Rock Shelter shows the story of Red Horn Giants and the Thunderbird. What is this story depicting? What does the Thunderbird depict?

**A:** UFO.

**Q:** (TB) If we were to identify the Unidentified Flying Object, what would it be?

**A:** STS craft.

{After a lot more reading, I actually think that the Thunderbird and Sky serpents represented the giant comet break-up described by Victor Clube. But then, the Cs have made allusions to 4D that might include weather as warfare and comets as “craft” though not in the 3D sense.}

**Q:** (L) {Reading from list of questions.} The Maori origin of kites. Why did the Maori fly kites?

**A:** To attempt communication with Gods.

**Q:** (TB) Which is exactly what their myths state. (L) Which gods?

**A:** STS.

**Q:** (L) Well, we should have figured that. There's hardly been anybody else running things for the last 300 thousand years or so. Okay, going in another direction: what other names were the Danaans known by?

**A:** Scythians.

**Q:** (L) How did the Scythians get to Egypt?

**A:** VIA Akkad.

**Q:** (L) Was Sargon a Scythian?

**A:** Yes.

**Q:** (L) Were the Hittites a genetically altered group of Scythians?

**A:** Close.

**Q:** (L) Where do the Scythians come from?

**A:** China.

**Q:** (L) How did they get to China?

**A:** From the Caucasus.

**Q:** (L) So, they started off from the Caucasus, went to China, and were later driven back West by the Chinese? Is that it?

**A:** Yes.

**Q:** (L) Northern China or Southern China?

**A:** North.

**Q:** (L) What is the difference between Galle and Gaul?

A: Clue.

Q: (L) Do they both refer to France?

A: No.

Q: (L) Does Galle refer to Rhineland?

A: Close.

Q: (L) I discovered today that one of the Maltese islands, the one that is now called Gozo, was once called "Gaul." Is that getting closer?

A: Close.

Q: (L) You aren't going to tell me that. (TB) And you're sure it's not Sri Lanka? (L) Is it Sri Lanka?

A: No.

Q: (A) Why did Einstein and Bergman abandon their 1935 theory without following it up? Because it was wrong?

A: No.

Q: (A) Why did they abandon it?

A: Scared of consequences.

Q: (L) Scared of consequences that they saw in the theory, or scared of consequences that were externally suggested?

A: Both.

Q: (L) So, once they saw the ramifications, they must have talked to somebody...

A: Close.

Q: (A) What is the relation between the fourth density that we know and the fifth dimension of Einstein and Bergman?

**A:** Identical.

**Q:** (A) Why don't we know about this fifth dimension?

**A:** Barriers to concept imposed by 4D STS.

**Q:** (L) Are these barriers to the concept part of what I have been approaching in my writing - the imposition of the idea of linear time by the monotheistic philosophy and religious controls - which is resulting in so much attack?

**A:** Yes.

**Q:** (L) Indeed. It terrifies people "religiously" to even think about it. (A) We know what it means that I am distant from you by 20 inches in space. I know what it means to be distant from the future by 20 minutes in time. What does it mean to be distant from something in the 5th dimension? I can't think of it...

**A:** Distance is a 3rd density constraint of consciousness energy grid structure.

**Q:** (L) Are you saying that consciousness energy is extruded into a grid structure? I don't even know how to ask. (A) Einstein, Bergman and Bargmann, were using distance to measure distance in the 5th dimension. They were not using consciousness, they were not using a grid, but they were using distance. And it was supposedly a good theory because they had to abandon it. So, none of them said anything about consciousness, yet they were using distance. So, my question is, is distance an expression of consciousness? Is there a distance from one point to another point expressed as, say, 2 million atoms? Is that a distance? What does consciousness have to do with this? How to model atoms in this 5th dimensional world?

**A:** As Grid.

**Q:** (A) Grid of what?

**A:** Energy.

**Q:** (A) What is the 5th dimension role in this grid?

**A:** Rim of Cylinder.

**Q:** (A) What is rim?

**A:** Surface of loop.

**Q:** (A) Loop. Loop in 3 D or loop in 5th?

**A:** 5.

**Q:** (L) Sounds wacky to me. (A) I'll have to teach them some algebra.

**A:** Yes. Grooving takes time.

**Q:** (TB) Seems pretty groovy to me. (L) Yes, but it's application that counts. Instead of giving us the center dead-on answer, very often it seems to be slightly to the left or the right so that we have to work for the solution. (TB) What did Einstein think would come out of his 1935 theory?

**A:** UFT.

**Q:** (A) I don't understand. If he saw the consequences - it was 1935 - and he thought "okay, it's a good theory and I can see the consequences," then what is the reason that for the next 20 years he was all the time working on all the wrong theories? What's the purpose of working on what is wrong?

**A:** Paid.

**Q:** (A) Well. Money? What did he need money for? (L) To live. (A) He could move to any other university and do whatever he wanted! (L) Not if the Consortium said "no." He could go nowhere and do nothing. (A) Okay. Why. Maybe he signed a non-disclosure until the end of his life.

**A:** Yes. And Good night.

END OF SESSION

## **9.10 September 14, 2001**

Ark and Laura

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Vupoori

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** We have a series of questions about this recent event. Was the attack on the World Trade Center undertaken by Moslem Terrorists?

**A:** No.

**Q:** Who was behind this attack?

**A:** Israel.

**Q:** Is it going to become known that it was Israel? Will they be exposed?

**A:** Yes.

**Q:** Is this the event that is going to lead to the destruction of Israel?

**A:** Yes.

**Q:** Is the god worshipped in Judaism, Yahwah, really Howah, the Pig God?

**A:** Yes.

**Q:** Are there going to be further terrorist attacks in the US next week as others have been predicting?

**A:** No.

**Q:** Are there going to be further terrorist attacks of this kind at any time in the near future in the U.S.?

**A:** No.

**Q:** Is this the beginning of WW III?

**A:** No.

**Q:** Is the US. Going to bomb Afghanistan?

**A:** Possible in future.

**Q:** Well, you say there aren't going to be any further attacks; can we believe you?

**A:** Up to you.

**Q:** (A) You say that Israel will be exposed; in what time perspective?

**A:** Month {before first hints emerge.}

**Q:** Expose Israel? How?

**A:** Yes, open. Perhaps sooner.

**Q:** (A) What mistake did they make?

**A:** Infiltrated.

**Q:** (A) They seem to be so smart with their god behind them, and they did such a big thing, only to make a mistake. (L) I guess we can only wait to see how it turns out. It's a spooky idea. What do countries do when something like that is discovered and they have had a long-term diplomatic relationship? They talk to each other, they pat each other on the back. What do they do? It's like having to get a divorce when everybody thought you had such a happy marriage. And when it's like this? It's like having to get a divorce after discovering that your partner has murdered your children and buried them in the back yard. (A) Yeah, but it's not so clear, because when you say "Israel," it's not one thing. There are different parties, different factions, they are fighting. We don't know.

**A:** Gore is pushing buttons on Capitol Hill.

**Q:** What does Gore have to do with anything? He lost the election. Well... (A) He had this Lieberman as his running mate. He was in bed with Jews. What kind of buttons? Huh. (L) Is he pushing buttons to expose?

**A:** To suppress.

**Q:** Well, that's the damnedest thing I ever heard. Did the U.S. Government shoot down the fourth plane as some people are suggesting?

**A:** Yes.

**Q:** Did the United States know about this attack at any time in advance of it? Did any of our people in any position to do anything, know?

**A:** No.

**Q:** Were they blindsided?

**A:** No. But not expecting.

**Q:** (A) So, they knew it was going to happen, but they didn't know when and what exactly? Is that it?

**A:** Yes.

**Q:** Is it truly a "failure of intelligence?"

**A:** Yes.

**Q:** So, the infiltrator must have learned something, but wasn't in on the whole thing?

**A:** Close.

**Q:** (A) What is the most probable scenario. There were infiltrators, they had some knowledge, and they communicated this knowledge to some part of Intelligence, but this part of Intelligence did not press to communicate it to the higher parties?

**A:** Yes. And it was not known plan.

**Q:** So the infiltrator did not know the specific plan. So, they overstepped. Hubris. (A) Which part of Israel government was behind it? (L) Probably some deep level orthodox bunch like Kochav.

**A:** Yes.

**Q:** (A) But they killed a lot of Jews. (L) They don't care. Jews killed a lot of Jews in WW II. Hubris.

**A:** Greed.

**Q:** (L) Are they going to be able to recover anything from my hard drive?

**A:** No.

**Q:** What happened to my hard drive?

A: 4th Density STS.

Q: They're really after that Noah book, aren't they?

A: Yes.

Q: Well, I'm saying stuff in there that's needed to be said for a long time. Are we going to survive until we get it printed?

A: Yes.

Q: How are we going to survive?

A: It will become evident.

Q: I hope it becomes evident soon because we are getting to the end of the reserve period.

A: Yes. Money will come soon.

Q: Okay, what is causing this prolonged rainstorm. Besides the fact that it is a tropical system, it sure is sitting on top of us for a long time.

A: 4th density battle.

Q: (A) Is there anything that we should take precaution about that is not on our mind like the one that killed our hard drive?

A: Failsafe awareness.

Q: Why are my ankles swelling so much?

A: Sitting.

Q: (A) Fourteen hours a day, non-stop, both of us. (L) I guess if we took one hour a day to do exercise... Anything else that we need to be aware of... (A) On our website, we have entered a kind of political stream which attracts attention. Going into this is natural and automatic. But there may be other not-so-natural things

that may not come to our minds. Anything additional we need to cover?

A: You will become famous.

Q: (L) Well, I am assuming that I ought NOT to put on the website that Israel is behind this attack, is that correct?

A: Yes.

Q: Was this guy writing these posts on the newsgroups the same as Sollog, the so-called prophet?

A: Yes.

Q: Is he involved with the Israelis?

A: No.

Q: How did he know about this event?

A: Fourth Density STS contact.

Q: Is this another instance of when they can be stunningly accurate when they choose?

A: Yes.

Q: So, this guy was not an insider in the plot?

A: No.

Q: Well, I find that hard to believe.

A: Patience.

Q: Was he being set up to look accurate so people would buy into his rant?

A: Yes.

**Q:** Well, Sollog did predict that this would happen in 1997. But then, then, the guy on the newsgroup predicted that something was going to happen in seven days... That was bizarre. He didn't say what, but the message was headed with 9/11. If he had known what was going to happen, I think he would have at least hinted. (A) But that would be too dangerous for him.

**A:** Yes. More like a miss.

**Q:** How did they get those guys to agree to fly those buildings into those planes and commit suicide?

**A:** Mind control.

**Q:** I guess that's it for tonight.

**A:** Good night.

END OF SESSION

## 9.11 September 24, 2001

Laura and Ark

**Q:** (L) Hello

**A:** Good being back.

**Q:** (L) And who are we communicating with this evening?

**A:** Hoskim.

**Q:** (L) And where do you transmit through?

**A:** Cassiopaea

**Q:** (A) Let's ask about this invitation to do the radio show. Is it wise to engage with this particular...

**A:** Yes. Host a fine show

**Q:** (L) It's funny that that guy would call me up to ask me if we wanted to host a show, after the C's had said something - what a month or so ago - about hosting a show. Remember? And we thought it was crazy. Was that when Terri was here, it was before she was here.

**A:** Yes. Make you famous

**Q:** (L) Is that something we want to do?

**A:** Yes.

**Q:** (L) Why?

**A:** Influence for TOE. {Theory Of Everything.}

**Q:** (L) You said last time that Israel was behind the attack on the WTC. They are collecting evidence that Osama Bin Laden and company are behind it. Are they manufacturing this evidence?

**A:** Yes.

**Q:** (L) Is the truth going to come out?

**A:** Yes.

**Q:** (L) Can you give us a clue about when or how? I know when is not a good question, but how? (A) You already know what they said last time. (L) What? (A) Month or less. (L) Well we know their sense of timing is lousy. (A) Yeah, since our time is not the same as theirs. (L) Exactly. (A) December our time might not be... (L) Maybe December ten years from now. (A) Right. (L) Is the stock market ever going to go back up?

**A:** Yes

**Q:** (A) I'm curious about this collapse of this building. Did we ask?

(L) I think we asked something but. So many people are saying that the building collapsed because it had explosives planted in it. (A) Or something, because it was not a natural act of just airplane impact. There is more to that. (L) Is there more to the collapse of these buildings than the event which occurred that we saw: The airplane impact, the fire, the explosion, jet fuel and that sort of thing. Is there more to it than that?

**A:** No.

{The last answer is clearly wrong and reflects my own strong emotional reaction.}

**Q:** (L) Endless speculation. The conspiracy mongers just go crazy on everything. It was just a cheaply built building. It was not built to withstand a jumbo jet. So are we going to have a war here?

**A:** Close.

**Q:** (L) Are we going to have more terrorist attacks in the US? They already said no, but that's because we already know it wasn't terrorist. Are we going to have more violence in the US that may not be as a results of terrorists?

**A:** Yes.

**Q:**(L) Can you designate any of the areas where this violence may occur in the near future?

**A:** Indianapolis.

**Q:** (A) What is that? (L) Indianapolis is a city in Indiana. Well that's something that has never been mentioned. What kind of violence?

**A:** Hit by focusing beam of the HAARP array.

**Q:** (L) Well that's weird. (A) By mistake? An accident?

**A:** No.

**Q:** (L) What will be the outcome of Indianapolis being hit by this focusing beam of the HAARP array?

**A:** Mind controlled violence.

**Q:** (L) Can we know what form it will take?

**A:** Shootings.

**Q:** (L) Are there going to be any other kinds of violence, such as bombs or airplanes being flown into buildings, or release of anthrax, or small pox, or any other kind of chemical or germ warfare activities. Any of those?

**A:** Yes.

**Q:** (L) Which ones?

**A:** Fair chance of germ disbursement.

**Q:** (L) What kind of germ?

**A:** Influenza.

**Q:** (L) Do you mean a deadly form of flu?

**A:** Yes.

**Q:** (L) But nothing like anthrax or small pox or any of those really sick ones? Is that it?

**A:** No. Keep looking and listening.

**Q:** (L) Well we plan to. What is going to happen with the Middle-eastern situation; this Afghanistan or whatever?

**A:** Herding of population to much finer order of control.

**Q:** (L) What is the purpose of this control; this increasing control.

**A:** Preparation for war in Palestine.

**Q:** (L) But nobody has said anything about having a war in Palestine. They're all talking about having a war in Afghanistan. How does Palestine fit in here?

**A:** It is the ultimate objective of Israel.

**Q:** (L) Why would they want to have war in their own country? Well, aside from the fact that they've been having a war in their own country for a long time. I guess they want to bring it to a final conclusion. What is going to be the result of this plan?

**A:** Destruction of Jews.

**Q:** (L) Well obviously this is not what THEY are planning, is it?

**A:** No.

**Q:**(L) They are planning destruction of Palestinians, right?

**A:** Yes.

**Q:** (L) It seems that through out history whenever the Jews have plotted and planned to destroy somebody, they are the ones who have ended up being destroyed themselves. Or am I misreading my history here?

**A:** No.

**Q:** (A) We've had months of fighting, demanding and rescuing and fixing, and now it's - where are we? It appears as if it will continue. Now the point is it was probable kind of a distraction and it was kind of successful. The question is now, of course, out of many things that I can do concerning the research, what is the thing that I need to concentrate on; what are the missing parts. I need to take a decision now. Can you help?

**A:** Invitation will arrive soon. When it comes accept graciously. It will lead to an important change for you.

**Q:** (A) I hope the invitation will come soon. Perhaps six years from now. I'd like to know what I should concentrate on, in the period between now and the invitation that will come soon?

**A:** Hyperdimensional physics.

**Q:** (A) Well hyperdimensional physics, means putting away Maxwell, putting away superluminal, putting away electromagnetism, putting away Rodriquez, putting away quaternions. It means, as I read it, going back to...

**A:** Yes. 1969. Yes, most beneficial.

**Q:** (A) OK 1969: I was thinking about Kaluza-Klein theories. I was playing with algebras and infinite dimensions.

**A:** Yes.

**Q:** (A) Alright I was thinking at the time about symmetry between matter and anti-matter.

**A:** Yes.

**Q:** (A) And this may also take us to our French friend Jean-Pierre Petit.

**A:** Yes.

**Q:** (A) Oh well, very strange. (L) I'm just watching going around.  
(A) Alright, I'll go to work.

**A:** Yes. Pronto!

**Q:** (A) {Laughter} Pronto? Oh! Another thing in 1969, I was introduced to 'pronto.' In 1972 I went to Rome and met with Sergio Doplicher and he was answering the phone 'pronto, pronto!' And at

that time, I was also using these algebras to describe electromagnetism and what I called indefinite metric, which was supposed to be my first paper in 1969, but I never published it at that time. 1969 can also mean...

**A:** Pronto! Dear ones, we want to see you succeed in your mission.

**Q:** What is the mission?

**A:** You will discover it.

**Q:** (L) Are we going to be unhappy or happy when we discover it?

**A:** Joy unspeakable!

**Q:** (L) I dreamed about a baby the other night. What did this baby represent?

**A:** Your progression, your path of discovery.

**Q:** (L) Do we have any particular worries at the present moment, aside from financial worries? I mean like is the FBI going to come knocking at our door and try to inject us with some kind of name and number chip under our skin. Or are they going to try and come and muscle us out of here or do you see any such danger ahead of us? Or am I just being overly-imaginative?

**A:** No, but keep watch.

**Q:** (L) Should we buy a gun to have on hand in the house?

**A:** No.

**Q:** (L) Settled that. I didn't want one anyway. But you just never know. I mean I don't even like shooting. Yucky So what else do you need to know? Oh, did our creating a little whirlpool in

the swimming pool cause the rain. (A) {Snickering. The mood changes, Ark cracks himself up until the end}

**A:** No

**Q:** (L) Oh honey you did that. (A) I didn't! They're joking. They are having fun. But in a sense. Yes, because you know there is always this mixing of what is cause and what is effect. So in this case we know there was going to be rain. (L) We did not. I didn't expect there to be rain, that's why I wanted to make rain. There was no sign of rain. (A) We in another density, we knew it and we caused it. (L) Well let me ask, does this copper spiral that we have under the pool with the little hangy-out spiral does it produce any affect at all of any interest? (A) {Wheezing with laughter.}

**A:** Yes.

**Q:** (L) You're playing with me. Can you tell me what this effect is?

**A:** Hydro-energetic transposition

**Q:** (L) Transposition to what?

**A:** Physical rehabilitation.

**Q:** (L) You mean it just collects energy in the water and transfers it to the body if you're in the water?

**A:** Yes.

**Q:** (L) And it doesn't shoot any energy up in the sky and make rain or storms or any kind of thing like that?

**A:** No.

**Q:** (A) So we should swim everyday, each day, even if it rains. (L) Do orgone accumulators make rain?

A: No.

Q: (L) Do orgone accumulators accumulate orgone? {giggling}

A: Yes.

Q: (L) What is orgone?

A: Life-force.

Q: (L) What is life-force? (A) What is the closest expression in physical terms?

A: EM substrate.

Q: (A) What is substrate?

A: Base.

Q: (L) How does EM substrate or base... (A) Vacuum point? Vacuum.

A: Close.

Q: (A) Something related to what people call zero point energy?

A: Close.

Q: (A) Something related to 1969?

A: Pronto!

Q: (L) I want to know how to make rain. I think that is a handy thing to know. Is there a way?

A: Sure.

Q: (L) Is there a simple way, like making orgone shooter things?

A: No.

Q: (L) Rats. (A) I know all I need tonight, I go read, think of it. I know what to do. (A) Well if I have life-force and if I know about

vacuum, and so on, we'll have everything we need to shoot this energy and we'll transform and we will make rain. (L) Should we refinance our mortgage?

**A:** Wait and see events.

**Q:** (A) Do you remember a year ago? They were saying about our stocks that in December we were going to be... (L) ...be happy (A) Be happy. OK? It's another December coming. (L) Are we going to be happy with our stocks this December?

**A:** Yes

**Q:** (L) I'll be surprised. (A) If we invested in anything that's of military value, then we'll be happy to be in a war. See? (L) Trying to see if there's anything else. (A) I want to go to bed then work and then talk tomorrow. (L) Anything else we need to know tonight that we didn't ask? About world affairs, the e-group, the web site, the book, radio show, work, anything?

**A:** No

**Q:** (L) Well then, goodnight. Sleep tight, sweet dreams and goodnight.

**A:** Goodnight.

END OF SESSION

## 9.12 October 5, 2001

Laura and Ark

**Q:** (L) October 5th. Today's the day we buried my grandmother.{In 1985}

Hello.

**A:** Hello dear ones. Listen for help.

**Q:** (L) And who do we have with us this evening?

**A:** Hailiea.

**Q:** (L) Where do you transmit through?

**A:** (L) Cassiopaea.

**Q:** (L) Are you ready? (A) Yes.

**Q:** (A) This is an ordinary question about my state of affairs, about this sleepiness, because once in a while it becomes very strong. There are probably many ingredients for this, yet I would like to know which has the most importance. What about this sleepiness when it's time to do research?

**A:** "Coil failure."

**Q:** (A) What coil? Coil failure? Do I have a coil in my brain?

**A:** Hypothalamus.

{Sitting beneath the cerebral hemispheres are the thalamus and hypothalamus. The thalamus is a relay center between the periphery and the cortex. It receives sensory information from virtually every region of the body, filters all of the information, and then relays the filtered portion to the cerebral cortex. The hypothalamus functions much like the thalamus, but mediates its actions by controlling the release of hormones by the pituitary gland. Its major functions include regulation of body temperature, adjusting heart and respiratory rates, and stimulation and inhibition of eating and drinking.}

**Q:** What kind of failure?

**A:** Energy surge causes short circuit.

**Q:** (A) But this phenomenon sometimes was going on for weeks or months.

**A:** Yes.

**Q:** (A) Why is it certain activities keep me awake, and certain others make me sleep?

**A:** Failure has a genetic basis. {Pause} Push against.

**Q:** (L) What does pushing against this tendency accomplish?

**A:** Unlocks DNA.

**Q:** (L) Anything specific that would be beneficial other than just pushing against it?

**A:** Aging stumps the brain that is unused.

**Q:** (L) In other words use it or lose it. (A) But I had exactly the same phenomenon like twenty years ago. Is there anything else that will help, other than pushing against it and forcing it to unlock DNA?

**A:** Not really you must overcome some things on your own steam.

**Q:** (L) What will be the benefits once he pushes past this?

**A:** Faculties jacked up a big step higher.

**Q:** (L) How long will it last if he struggles with it whenever he needs to sleep? This is my idea but - just struggling against it. That's the only way I can describe it.

**A:** Yes.

**Q:** (L) I don't think it does any good to walk away from it. If you have to lie down, then struggle while lying down. Take a book with you and battle the sleepiness. If you fall asleep, keep the

book handy and the instant you wake up, go back to it. (A) Alright, that confirms what I know. Let's change the subject. Last time we talked, you told us about 1969. Somehow I couldn't find...

**A:** Hair is key.

**Q:** (L) Huh? {To A} When did your hair turn white? (A) I have no idea. (L) Did it happen gradually? I think that refers back to the genetic thing. (A) I have this photograph when I was writing on the blackboard. I still had dark hair. But I had gray hair when I was in school. So, probably it started turning when I was about 32. I have no idea. (A) Why is hair the key? What kind of key?

**A:** Gene block activation.

**Q:** (L) Gene block activation. (A) What does that mean? (L) Is that activated externally or just internally because of the way the genes were set up. Was a gene block activated by something external?

**A:** Force, yes.

**Q:** (L) Are there any nutrients or activities that will be beneficial?

**A:** Spirulina.

**Q:** (A) Alright, something that is with hair genetics and so on. But that doesn't help with 1969 because I have no idea what kind of key it is. Essentially I was told that I should go back to 1969. I understood that there is a subject I was thinking and working on in 1969, that I have to go back to. I can't find what exactly what subject it was.

**A:** Go to years before.

**Q:** (A) In the years before there were certain subjects; one of them was algebras, one of them was indefinite metric and the probabilities. These two subjects were what I was working on at

this time. I was also working on these two subjects later on. I was trying to put them together into one subject. When you say 1969 does it mean algebra and indefinite metric?

**A:** Yes, part of it.

**Q:** (A) That is only part of it. I have another problem: there is the other part of it which escapes completely my thinking. I cannot think of anything else.

**A:** Join up to geometry.

**Q:** (A) Join up means just add to it or what?

**A:** Partly, but also integrate integers!

**Q:** (L) What the heck does that mean? (A) Probably it means that integers are important. There is a piece of algebra where you give matrices entries which are integers. And...

**A:** And...

**Q:** (A) I think it could help me. At that time I found something that was interesting that relates to integers. I found somebody writing a paper on Lorentz transformation that was made of integers; that is like, if space-time was kind of a grid or lattice. And...

**A:** Indeed it is.

**Q:** (A) That could help! Okay, so that would add integers. So now, next thing looking for 1969 algebra, I got this paper by Noyes and another guy. This paper tries to explain Quantum mechanics in terms of negative probabilities and so on. It is 80 pages which are very hard to understand and puts me to sleep in particular. I read a page and understand...

**A:** Push!

**Q:** (A) This paper has very interesting keywords like time loops

and negative probabilities, Von Neumann, and the question is whether it is worthwhile to invest in this matter, or perhaps it is just crap like 99% {of physics papers}?

**A:** Push!

**Q:** (A) Now going back to 1969: I got several books on probability theory.

**A:** Jump start by finding paper on windows.

**Q:** (L) What kind of windows?

**A:** Mathematical.

**Q:** (A) The only windows that come to my mind are windows produced in chaotic phenomena when you do a simple algorithm. You take a number and you do something to this number - very simple - and you get another number. And you do this simple thing to another number. You repeat this operation, okay? You get a lot of numbers; you plot these numbers. And you say "Oh! It's chaotic! It's everywhere! Complete nothing. Chaos. No regularity. Except: here, I get a window. Numbers which I generate by my algorithm are chaotic except they never fall into this window! And here is another window. Why do we have these funny windows?" You can run the computer, simple program, and you create these windows. So that was one window. IS it this kind of window or a different window?

**A:** Close enough to get you there.

**Q:** (A) Why are windows important?

**A:** You will see.

**Q:** (A) Certainly because windows are related with algorithms, chaos, population ratios; that will not put me to sleep. I can play with windows. (L) But you had to push on the other thing. (A)

Yes, now you. (L) I just wanted to ask whatever happened to Terri Burns?

A: Her hormones triggered a brain swarm.

Q: (A) What does that mean? "Swarm?" (L) Extremely chaotic activity. Like when you knock over a beehive, all the bees come out after you; it's called "swarming." All systems in chaos. Well, my only concern in recent times is the CD of all our unedited sessions that Vincent has taken which he has not returned, and what he plans to do with it, considering that there is much personal information there about many people. Is there anything we ought to be aware of or ought to do in regards to that?

A: He will make you famous.

Q: (L) How about infamous? {laughter} That is his intent!

A: No.

Q: (L) Is TB going to join up forces with Vincent since that's where her hormones are taking her.

A: No.

Q: (L) What's going to happen with TB?

A: Hospital is final destination.

Q: (L) Is TB able to control her thinking if she tried?

A: No.

Q: (L) Does she need to be on medication as she has claimed?

A: Maybe part of the time.

Q: (L) Well, anything else we need to know about? Are her girls ok? I am very concerned about them considering the way she

just drops them off and leaves them for such extended periods of time.

**A:** Yes.

**Q:** Any advice?

**A:** Finish the book.

**Q:** (A) That's very good, finish the book! {laughter} After tomorrow. (L) I can't it will require a certain period of time. I could do like Kris says: you know, you never finish a book, they just take it away from you and give it to the printer. {Laughter} It does have definite shape in my mind and here it must go and how it must end. It's getting there! I still have to rewrite what I lost with the hard drive crash. That was the big chapter leading to the finish. Not only was I going to destroy standard Egyptological dating, I was going to propose the solution. Such as: who was Abraham really? Who was Moses? When did it all really happen and how? I have some answers to propose. But the false foundation has to be torn apart before even doing that, which is what the chapter was about that was lost. So You {C's} are clever you know exactly how much work I have to do yet!

**A:** Goodbye.

END OF SESSION

## 9.13 October 9, 2001

Ark and Laura

This sound on this tape is extremely distorted.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us tonight?

**A:** Leijooa

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** Kobejapan.

**A:** Earth quake

**Q:** Is this coming?

**A:** Soon

**Q:** Gonna be a big one?

**A:** {Indecipherable from the tape. Sounded like:} Tonechance

**Q:** Did you bring it up for any reason?

**A:** No

**Q:** Hmmm.

**A:** {Indecipherable. Sounds like:}Keep khueroupsoobrooceking ohapisuissicelt.

**Q:** {Totally indecipherable segment. Question lost}

**A:** Listen to Ark.

**Q:** (A) Well, you see, I had an idea. What I wanted to say, I wanted to have a confirmation that my idea that it is absolutely necessary to do something to get out of the loop, to see from outside, to change the way, to do something active... (L) I've got to finish the book.... (A) You are not finishing the book because you are so involved in things. (L) I'm finishing the book, it's getting very close. (A) Very good, what did we do today? (L) Well, today I didn't work on it... (A) Aaaah! Because going outside once in

awhile - once maybe in a week - doing something out of the box - it will help. (L) Okay.

A: Yes.

Q: (L) I want to know what was the source of this awful feeling I had for two nights. I felt so awful I could hardly stand it. I laid awake last night until four o'clock and I could hardly bear it.

A: Health is harmed by stasis.

Q: (L) You're not answering my question. (A) {Laughs.} (L) So what is going to be the result of this bombing of Afghanistan?

A: Hosed lies.

Q: (L) My brother used to use that word about hard drives. I'm not sure what it meant. I guess it means stripped of something. Stripped lies?

A: Yes.

Q: Are we going to have anymore terrorist attacks in the US?

A: More are likely now in Florida.

Q: Should we sell our house and move?

A: Not yet.

Q: You said that we were going to move to France in 2003. Is that going to be in the early months of 2003?

A: Soon the way gets clear.

Q: Is there something out there working behind the scenes on our behalf?

A: Most likely.

**Q:** Should I take Grace off the site? It's very personal. But there are so many people who are so glad that we are so accessible. (A) Should I pay attention and possibly edit these pages?

**A:** Yes.

**Q:** (L) Kris edited a lot. (A) But she is looking for one thing, and I am looking for another. What else is on your mind that will not let you sleep. Ask. (L) What was making me upset that I was unable to sleep? Was I being psychically attacked by these crazy people?

**A:** Yes.

**Q:** If the group acts against these crazy people, will it erect a shield?

**A:** Yes.

**Q:** They like pushing me right to the edge. (A) In a sense, you see, I know what we need to do. We need to keep focused and show the world that is observing us that we are able to reach the goal. The help only comes to those that show a guarantee to succeed. Help is not going to those who give no such guarantee. The help is looking for those who give this guarantee. Only if we are absolutely determined to reach the goal, the help will come. We will make it come with determination. (L) Are there any clues we ought to look for when we encounter other people that we don't know about that would help us to avoid getting involved with people like Vincent? Aside from the obvious: check people out, which I should have done.

**A:** No.

**Q:** (A) This quantum fractals idea I had. I had this idea and it distracts me a little bit, that I should spend a few days creating a web page and doing the calculations with quantum fractals. It

distracts me. And I like it. Can you help me? Is it the right thing to do, or should I reject it?

**A:** Good idea to do what excites you.

**Q:** (A) It also excites me to look for other ideas that would excite me. So one thing is that it excites me, but there may be other ideas that excite me, and if I am doing this, these other ideas get out of my focus. So, taking into account the fact that we want to make a major breakthrough, what is the way?

**A:** Riemann and Pauli.

**Q:** (L) What?! What's Pauli got to do with it? (A) Well, what Pauli has to do with it is due to two reasons: today I was thinking about Pauli because somebody on the physics research group was talking about Dirac operator on a Riemannian manifold and I was thinking: oh! Pauli wrote a paper on this, so I even looked into the book by Pauli...

**A:** Yes.

**Q:** (L) Well, if nothing else, it's telepathic! {Laughter.} (A) My god! Well, okay, so you said Riemann and Pauli, or I said Riemann and Pauli...

**A:** Drop off signs lost in space.

**Q:** That's bizarre. "Lost in Space" used to be a TV show.

**A:** Operators link Riemann to Pauli.

**Q:** (L) What's an operator? (A) Dirac operators. Dropping off signs does it mean going to metric which are degenerates?

**A:** Generates means local operators not heading in the right direction.

**Q:** (A) Well, we have a funny feature here because of this communication, because what I meant was a technical term “metric degenerate” not generate, and the piece here starts with “generates,” which possibly has a meaning but is not answering my question. It relates partly to a certain part of the word which I was using with a different meaning. So, I would still like to know about my question about metric which are degenerate, is this equivalent to jumping signs?

**A:** From signs you get Riemann.

**Q:** (L) Huh? (A) Yes, when there are signs, you see, plus or minus, we get Riemann. If there are only plusses or only minuses, or we call it pseudo-Riemann if there are several plusses and several minuses. And where there are some zeroes which are neither plusses nor minuses, then we call it degenerate. So, it’s true that from signs we get Riemann, but the question is: is dropping signs the same as replacing them with zeroes, or is there a difference? Is it the same?

**A:** Hearing a symphony is not the same as a radio.

**Q:** (A) Okay. This concept is new to me. Can you help me about this dropping of signs.

**A:** Riemann radio.

**Q:** (L) The other option must be the symphony. Dropping the signs?

**A:** 6 Signs.

**Q:** (A) Well, long ago we were talking about signs, and we came to the conclusion that in this hexagon there should be four plusses and two minuses. That’s what comes to my mind when we think about six signs. But what does it have to do with dropping of signs? I will have to think about this Riemann and Pauli.

**A:** Route will be made clear.

**Q:** (A) Alright. (L) Is there a real mind program like MKULTRA or Puharich or whatever?

**A:** Yes.

**Q:** Is Terri Burns mind programmed?

**A:** Partly.

**Q:** Is there anything else we should know or do or ask that we haven't thought of?

**A:** Not now. Sweet dreams!

END OF SESSION

## **9.14 October 13, 2001**

Ark and Laura, Barry T.

**Q:** Hello.

**A:** Hello.

**Q:** And who do we have with us this evening?

**A:** Loriea.

**Q:** And where do you transmit through?

**A:** Cassiopaea.

**Q:** My first question: People are talking about, and are concerned about, what is to be the proper attitude, or the proper action - if any - or behavior, or response to the current situation in the world: terrorist activity, the increasing controls of the government, that sort of thing. In other words, they are wanting to

know if they should take action, or if they should just observe. Or, should they be guided by their individual situations. People are concerned. Can you respond to these concerns?

**A:** Most people will not be harmed in direct ways.

**Q:** If most people will not be harmed in direct ways, does this mean that the idea that the United States may become the target for an all out... (A) Before you ask, “most people” is an imprecise term. “Most people” could be just over half. That leaves a lot of room for “people” being harmed. (L) Can you be more precise?

**A:** Force will not get out of hand yet.

**Q:** (A) Which I read as a “negligible number of people will be harmed” in global terms. (L) Is it true that only a negligible number of people will be harmed in the upcoming period?

**A:** Yes.

**Q:** (L) But, of course, if one is among that “negligible number,” it can be up-close and personal. Can you give us - do we dare ask for a number? (A) No, because then we would have to specify the country and work our way through all the details. You see, four thousand is still negligible in global terms. (B) Will the primary harm to people be psychological?

**A:** Partly but also real strictures.

**Q:** (L) Do you mean greater control and loss of freedoms? Is this stricture going to be physical, or a stricture on our freedoms, or a combination of both?

**A:** Both.

**Q:** (L) Is there going to be a witch hunt in this country for people who the government wishes to identify as being potential terrorists, or anti-American, like the McCarthy era?

**A:** First there will be controls by laws. Then more force.

**Q:** (L) Is all of this going to culminate in some plan that is being activated at the present time? Is this all directed to a specific outcome by the powers that be, so to speak?

**A:** Mostly; but unexpected twists and turns from opposing forces.

**Q:** (L) And who are these opposing forces? Are there good guys, or is it just like another “gang,” as in global gang wars? Using “gangs” metaphorically here.

**A:** 4th density STO will manifest help for some 3rd Density groups.

**Q:** (L) Do any of those 3rd density groups that are going to be helped include us? {Laughter.}

**A:** Close.

**Q:** (L) BT wants to subtract himself from the question to see if that narrows it down? In other words, do you mean that help will come to Ark and me in particular, excluding others?

**A:** Same as a group.

**Q:** (L) {Raspberry at BT!} See, same thing! Okay, so there are going to be twists and turns. Can we know any of the highlights of these twists and turns in our global or national situation? It sounds like an interesting show? Is it better that we don't know? If the STO forces are planning something, maybe it's better that we don't know so that it remains a surprise. Is that true?

**A:** Close. Just know that help is near.

**Q:** (L) I think that BT and I have a question that we discussed earlier. We want to know if Terri Burns and Vincent Bridges have been in cahoots since as early as September 9th and 10th?

**A:** He was planning. She fell into plans later.

**Q:** (L) Were they in communication with each other throughout this past month?

**A:** Yes.

**Q:** Were they in communication with each other before TB came here to visit?

**A:** Yes.

**Q:** Did TB come here with the intent of acting on VB's behalf?

**A:** Yes.

**Q:** (B) Was she doing it consciously?

**A:** Yes.

**Q:** (L) Well, that's not nice. (A) Well, remember, doing something consciously only means part of the consciousness. Another part was playing games. One part of the consciousness can set a goal, and then turn off. (L) Is TB one of Andrija Puharich's "whiz kids" who were programmed as "agents" many years ago?

**A:** A different branch.

**Q:** (L) What is our best response? What response from us will produce the best STO result in the end?

**A:** Ignore them.

**Q:** (L) Well, that is what we thought up to the present. Next question: Is the anthrax that has been contracted by several people around our country a terrorist act against our country by foreign terrorists?

**A:** No.

**Q:** Where did the Anthrax come from?

**A:** U.S. government.

{This proved to be correct. The anthrax strain was produced in U.S. gov laboratory.}

**Q:** (L) That's not very nice. (A) Well, the "U.S. Government" can mean any of many parts that all fight with each other. (L) Okay, when you say "U.S. Government," is that the government that we consider to be our government, or is that the secret government - some maverick branch that is operating without the approval of our elected officials?

**A:** Latter.

**Q:** (A) Well, that's imprecise. I am sure that at least one elected official is in on it. Certain questions have more or less known answers. What we know is that it comes from some part of the U.S. government. A maverick part. We don't know, and I don't know if we want to know from which part. (L) Probably not. (A) So, probably when they start to look for tracks of the Anthrax, it will certainly point somewhere abroad - to Afghanistan or somewhere else. (L) Right. That will give the government a reason to go and bomb somebody else. (A) So, is this reasoning correct? (L) Are they going to try to blame it on some foreign element?

**A:** Yes.

**Q:** (L) So, if they are going to try to blame it on some foreign group, can we have any idea of which group?

**A:** Iraq.

**Q:** (L) Are we ultimately headed toward bombing Iraq?

**A:** Yes.

**Q:** (A) Notice however, one complication: groups all over the world, as we are now noticing, have started protests against

America. People are going to the streets in Europe to protest. So, in order to avoid this protest, probably America will have to produce some new evidence. Maybe an explosion of anthrax - maybe something completely new. (L) Is that something that is going to happen?

**A:** Yes.

**Q:** (L) And what might be the next major act of terrorism be that will... (A) It may be somewhere in Europe to convince the European countries. (L) So, whoever is protesting the most is the one that is likely to get hit in some way. (A) But, on the other hand, it may not be easy for America to produce something there, since it is much easier to produce “terrorist” events in America where they have complete control of everything. (L) If they try to do it elsewhere, they are liable to get caught.

**A:** France may be hit next with nuke.

**Q:** (L) Well, that’s not friendly! (A) Well, that may make sense. There is this connection between the Afghans and Algerians and France. Algeria has already terrorized France in the past, so that may be the set-up. (L) That would certainly get their attention. Is there going to be an outbreak of terrorism on the 31st of this month as has been circulating on the internet grapevine?

**A:** Not likely.

**Q:** This Sollog guy made predictions about a certain series of events a few years ago. He claims that he predicted the plane hitting a big building, followed by the death of the Pope, followed by the death of a sitting American president. If this is true, he did make a “hit” on the “big building,” and we certainly have a very aged Pope who is likely to go at any time now. That leaves the question of an American President dying in office. Is there any likelihood of that happening in the next year or two?

**A:** Yes.

**Q:** (A) Likelihood can be 1%. (L) Okay, is there a high probability of that?

**A:** No.

**Q:** (BT) Well, the thought that went through my mind, in such a scenario, is related to Cheney. Could he be part of the maverick group pulling the strings?

**A:** Close.

**Q:** (L) He may not even be conscious of it. I have the idea that most of them aren't. They are just like everyone else: manipulated puppets. (BT) Well, somebody has to be conscious of it, for this faction to be involved. When you were asking the question about Bush, the thought about Cheney just jumped to the fore. (L) Are any of these people in the government, those in the public eye, the decisions makers; are any of them consciously aware that they are furthering the agenda for the STS takeover of the planet? The main players.

**A:** No.

**Q:** (L) Bush is just a puppet. He's like Pinnochio. Every time he opens his mouth his nose just gets longer and longer. Pretty soon his nose will be so long he won't be able to walk across the room. (A) In Poland, we had this guy Jaruzelski, who introduced Martial Law. He was a general. Well, my mother was in favor of him. Because he was military. But I could see through him. (L) Well, it is easy to get upset with Bush until you realize that he is as much a dupe as anyone else. He seems to be going around in a fog. All the jokes that are made about him being so dull are true! How can you get mad at a complete puppet? I've never heard the guy say an intelligent thing that wasn't written down for him, and even then he sometimes manages to screw it up. (A) Yes, it seems

so. Because those leaders who have proven NOT to be stupid in the past, have proved to be... (L) ...dead. (A) Or, they proved to be able to kill millions to stay alive. (L) Yup, seems to be so. (A) Yes, they can be stupid in a very intelligent way. (L) Are all of these people going to be exposed, caught, shown for what they are?

**A:** Ultimately.

**Q:** (BT) Yeah, and that can be part of the STS program anyway. Expose 'em and replace 'em with something worse. If everybody relies on the government to save us, and then find out that the government is not only not going to save us, but that they are guilty of harming us for manipulation, that is a manipulation of a higher order. (L) Yeah! And then who will the people cry for to be in charge? Aliens? (A) It's a "free" choice. {Laughter.} (L) Well, it's a terrible thing to feel that way about your president who is supposed to be the representative of your country. (A) I'm surprised that some Americans... (L) ...actually believe that he's doing a good job and telling the truth. (A) Yes. (L) I would like to know what is the REAL percentage of Americans who think that Bush is doing a good job. I know they put up the results of polls, but I have observed that polls are often published to sway public opinion, and are not an accurate representation of it. What is the real percentage?

**A:** 53 %.

**Q:** (L) Just a little over half. Well, even that figure is depressing. Are we in danger of Anthrax?

**A:** Most likely not or anything else.

**Q:** (L) Well, we ordered a micron filter for the air unit just in case! (A) I would like to ask about how this building collapsed and why. There is more and more discussion about it, and theories are flying. (L) Well, let's ask again just to be clear. Were

the WTC buildings collapsed by internal sabotage, or simply as a result of being hit by jets?

A: Airplanes.

Q: (L) There was no internal sabotage?

A: Yes.

Q: (L) What caused the buildings to collapse?

A: Structural weaknesses.

Q: (L) We watched one film that showed a strange, dark object, shooting down towards the ground. What was that?

A: 4th Density energy surge.

Q: (L) Where was it surging from and to?

A: Dome of destruction energy time lock to ground.

Q: (L) Are you saying that there was a dome of a time lock over this area? Do you mean that they put a “time lock” over this area so that they could “harvest” bodies or energy?

A: Close.

Q: (BT) Was there any other purpose besides harvest?

A: Gathering records, gold, soul extraction, he said.

Q: (L) What does “he said” mean?

A: Journeyman.

Q: (L) Who or what is a “journeyman?”

A: Informant.

Q: (L) So there is a “journeyman” who is the informant from whom you obtained the information regarding the question?

**A:** 4th Density STO observer.

**Q:** (L) What did they want the gold for?

**A:** 4th density uses gold for technology.

**Q:** (BT) Well, that is in many myths about the “gods” mining gold in antiquity. (L) Were they gathering records in the sense of material objects?

**A:** Partly.

**Q:** (L) Might these records also have been an extraction of “records” from people as they were dying?

**A:** Yes.

**Q:** (L) For what purpose did they intend to use the souls that were extracted?

**A:** Remolecularization.

**Q:** What will they used these remolecularized beings for?

**A:** Insert them back into building to escape and be rescued.

**Q:** (L) Are you saying that this was an opportunity used as a very traumatic screen event of a mass abduction, so to say?!

**A:** Yes.

**Q:** (L) What was done to these people who were abducted? Was there a specific reason for a mass abduction?

**A:** Turn on the programs.

**Q:** (TB) So, those who “escaped” are very likely programmed individuals turned loose in our society. People with programs set to make them run amok at some point?

**A:** Close.

**Q:** (A) Well, we still we have one problem: the problem involvement of Israel. We were worrying about what is going to happen in Israel. At present, all the anger is directed at the United States.

**A:** America may shift blame.

**Q:** (A) Well, there was a Russian journalist - a woman - whose husband was known to be Mossad, and they were known to be in Afghanistan and doing something there. Little things are emerging. (L) Okay, I wanted to ask a few things about the egroup. My idea has been that one of the main things that the group ought to be dealing with is how to learn to read when programs are activated around them. There are plenty of groups that can discuss politics and conspiracies and so on, but the real work on the self is quite a bit more difficult. I have been thinking that the most important thing we need to do is learn how to free our energy and increase our frequency thereby. Can you give any guidance about how to best go about this other than what we have already learned or what we are already doing? Any further guidance?

**A:** Help others to read programs in themselves.

**Q:** (L) Well, we just had one guy, J\*\*, who had a definite program running. It was pointed out to him numerous times that he was manipulating and running some kind of energy sucking game in the group, and he accused Ark of running a "power program." My thought was that this guy was just simply not there to learn anything. Is that assessment correct?

**A:** Yes.

**Q:** Why did he join the group?

**A:** To subvert and confuse.

**Q:** (A) That suggests that he joined with a certain mission. The question is, who was pulling his strings?

**A:** 4th density STS.

**Q:** (A) Is there, at present, any person in the group who is dangerous for the mission of the group and who should be identified and removed?

**A:** Yes.

**Q:** (A) Can you help us with suggestions as to what to look for to identify such persons and what kind of action to take? Our idea was to look at responses to our call for help and keep only those who responded... (L) Can we tell by those who responded as to whether or not they are in a true “network mode?”

**A:** Close. Help is STO.

**Q:** (L) And STO gives all to those who ask. (A) Well, that means that only about 20 people would be left. (L) Well, there are many who aren’t there yet... but have potential. Of course, there were many who didn’t respond at all. (A) It seems that those who don’t respond must not have enough motivation to participate in the process. They have other cares that take precedence. (L) Okay, well, anything we should have asked that we didn’t ask, consider it asked.

**A:** 762 no go.

**Q:** (L) What? (A) What is 762? 76 to no go? Is that about the group?

**A:** Yes.

**Q:** (L) 76 members to stay. (A) We only got about 30 responses. That means about 176 are not even reading. Anything else we need to know?

**A:** Patience.

**Q:** Goodnight.

A: Good night.

END OF SESSION

## 9.15 October 31, 2001

Laura, Ark

Q: (L) Hello

A: Hello! My dears

Q: (L) And who do we have with us this evening?

A: Hifaa

Q: (L) And where do you transmit through?

A: Cassiopaea.

Q: (L) Well Bruce has some questions so I'm going to take Bruce's questions first. Bruce asks, Is the concept of Orgone energy as rediscovered by Albert Pike the same as the Odic Force as presented by Baron von Reichenbach?

A: Yes.

Q: (L) Is understanding the Scottish rite helpful in understanding and using this energy?

A: Not really.

Q: Is orgone the energy used to power the pyramid at Giza?

A: No.

Q: (L) Is orgone the energy used to power Stonehenge?

A: No

**Q: (L)** Can orgone energy be used to cure disease?

**A:** Helps.

**Q: (L)** Is it the same energy used in the silicon wand that you have previously discussed?

**A:** No.

**Q: (L)** Is silicon needed to use orgone energy?

**A:** No.

**Q: (L)** Can orgone energy be used to activate the part of the DNA that has been burned away or deactivated by light?

**A:** Not necessary

**Q: (L)** Okay, is the geometry of the Elder Futhark alphabet helpful in harnessing orgone energy?

**A:** No.

**Q: (L)** Is the orgone energy concept helpful in completing Unified Field Theory?

**A:** Portal necessary for UFT, orgone is universal.

**Q: (L)** Is orgone energy the same force that was discovered by the Vril Society to develop propulsion into outer space?

**A:** No.

**Q: (L)** Is this Odic Force the same that emanates from crystals as used in Atlantis?

**A:** No, this has been covered.

**Q: (L)** Yes I know. Ummm...Did the Egyptians use this force with a metal head band wrapped around the forehead?

**A:** No.

**Q:** (L) Is iron necessary to use this energy?

**A:** No.

**Q:** (L) Does this force have a positive and negative component to it?

**A:** No.

**Q:** (L) Did Einstein acknowledge the concept of orgone energy?

**A:** Yes.

**Q:** (L) Did it help him with his UFT?

**A:** No.

**Q:** (L) Did the government use orgone energy in the Philadelphia Experiment?

**A:** No.

**Q:** (L) Can orgone energy be used for transportation from one spot on Earth to another?

**A:** No.

**Q:** (L) Did the Odic Force originate with the Nephilim?

**A:** No

**Q:** (L) I know these are silly questions. Did the Nephilim intermarry with the Tribe of Benjamin?

**A:** No.

**Q:** (L) Since Odic Force is Scandinavian is it involved with Sinclair and Oak Island?

**A:** Nonsense.

**Q:** (L) Did the Ark of the Covenant activate the Vril Force?

**A:** No.

**Q:** (L) Was it composed of gold and rutilated quartz?

**A:** No.

**Q:** (L) He must be reading some real trash. Is the Vril Energy the same as Kundalini?

**A:** No. Yes it is nonsense

**Q:** (L) Ah, Bruce is off on a tangent. He gets to reading these damn Dan Winter type things and he's just sure that he's found something that's going to tune him in. Alright, enough of that. Now, I suppose that we should ask some reasonable questions. We've already covered this WTC...Ohhhh! (A) I have a lot of questions about this pole shifting. Well go with your question. (L) That's probably where I was going. I was going off to Novosibirsk. You once made the remark that the secret lies in a mountain pass in Russia and something about a line drawn between Novosibirsk and Urkutsk. Is there a mountain pass in this area where something important is waiting for us to find it?

**A:** Yes.

**Q:** (L) Now according to these guys who are writing this web page about pole shift, they say it can be predicted where the poles will shift to. Is this in fact the case?

**A:** No.

**Q:** (L) Why can't pole shifts be predicted? Can't we know where the new pole will end up?

**A:** Chaotic function here

**Q:** (L) Okay, in a pole shift does the lithosphere of the planet slide on the core? (A) No. We have to be very precise. There are three possible things that would come under the name pole shift. Only
